[2] Duplexes are allowed in the Residential/Sensitive Resource (RSR) and Single Family Low Density Residential (SFL) zone districts. Such uses shall not occupy more than twenty percent of the total lots in a new short plat or subdivision, which was legally established after April 15, 2021. In such cases, the Community Development Director shall have the discretion to alter the percentage in order to allow the new short plat or subdivision to meet minimum required densities due to topography or other special conditions related to the site, such as critical areas.

[3] Duplexes are allowed in the Residential/Sensitive Resource (RSR) and Single Family Low Density Residential (SFL) zone districts. Such uses shall not occupy more than twenty percent of the total lots in a new short plat or subdivision, which was legally established after April 15, 2021. In such cases, the Community Development Director shall have the discretion to alter the percentage in order to allow the new short plat or subdivision to meet minimum required densities due to topography or other special conditions related to the site, such as critical areas.

[4] Duplexes are allowed in the Single Family Medium Density Residential (SFM) zone district. Such uses shall not occupy more than thirty percent of the total lots in a new short plat or subdivision, which was legally established after April 15, 2021. In such cases, the Community Development Director shall have the discretion to alter the percentage in order to allow the new short plat or subdivision to meet minimum required densities due to topography or other special conditions related to the site, such as critical areas.

[5] Townhouses and rowhouses are allowed within a residential planned unit development in the Single Family Medium Density Residential (SFM) zone district.

Housing Types	City Definition (TMC 18.04)	RSR Residential/Sensitive Resource Zone District (2-4 DU/Acre)[1]	SFL Single-Family Low Density Residential Zone District (4-7 DU/Acre)	SFM Single-Family Medium Density Residential Zone District (6-9 DU/Acre)
Triplexes	A building designed for and used exclusively for occupancy by three families independent of each other where all three dwelling units are located on the same lot and are completely separated from each other, except for common stairwells or garages.			
Fourplexes	A building designed for and used exclusively for occupancy by four families independent of each other where all four dwelling units are located on the same lot and are completely separated from each other, except for common stairwells or garages.			
Multifamily Dwellings	A building designed and used for occupancy by five or more families all living independent of each other and where all dwelling units are located on the same lot.			
Boardinghouses and roominghouses	A dwelling unit having only one kitchen and used for the lodging (with or without meals) for compensation of persons other than the related family members or operator of such dwelling unit. A roominghouse that is rented for less than thirty consecutive days at a time requires a business license per TMC Chapter 5.04. A roominghouse may allow for an unlimited stay, unlike a bed and breakfast which is limited to two weeks.			

Housing Types	City Definition (TMC 18.04)	RSR Residential/Sensitive Resource Zone District (2-4 DU/Acre)[1]	SFL Single-Family Low Density Residential Zone District (4-7 DU/Acre)	SFM Single-Family Medium Density Residential Zone District (6-9 DU/Acre)
Independent Senior Housing Facility	An independent living facility consisting of dwellings designed for and occupied by persons fifty-five years of age or older in accordance with 42 U.S.C. 3607. These facilities may consist of individual dwelling units of a barrier-free design, with separate bathroom facilities and a full kitchen. These facilities may have a communal dining area, recreation facilities (such as a library, lounge, or game room), laundry facilities, and open space. No nursing staff or assisted living staff is provided in an independent living facility.			
Assisted Senior Housing Facility	An assisted living facility, which is an establishment which provides living quarters and a variety of limited personal care and supportive health care to persons fifty-five years of age or older in accordance with 42 U.S.C. 3607 who are unable to live independently, but who do not need the skilled nursing care of a rest home, nursing home, or convalescent center. These facilities may consist of individual dwelling units of a barrier-free design, with separate bathroom facilities and a full kitchen. The facility may provide a minimal amount of supportive health care monitoring, such as assistance with medication, but is limited to health care services that do not require state or federal licensing. These facilities may have a communal dining area, recreation facilities (such as a library, lounge, or game room), laundry facilities, and open space.			

Table 29. Development code housing type summary (2 of 3).

Housing Types	City Definition (TMC 18.04)	MFM Multifamily Medium Density Residential Zone District (9-15 DU/Acre)	MFH Multifamily High Density Residential Zone District (14-29 DU/Acre)	MU Mixed Use Zone District (14 DU/Acre and greater)
Special Zone District Notes				All residential uses are allowed, provided that minimum density standards are met
Single-family detached dwellings	A building that is not attached in any way to another dwelling unit or structure providing complete, independent living facilities for a family.	Allowed[6]	Allowed[7]	See above
Manufactured Homes	A single-family dwelling built according to the Department of Housing and Urban Development Manufactured Home Construction and Safety Standards Act, which is a national, preemptive building code. A manufactured home does not meet the criteria to be classified as a "designated manufactured home	Allowed		See above

[6] Single-family detached dwellings constructed after April 15, 2021 are not allowed in the Multifamily Medium Density Residential (MFM) zone district, except as part of a PUD planned unit development overlay as regulated by TMC 18.36 if the site to be developed has more than one zone district.
[7] Single-family detached dwellings and duplexes are not allowed in the Multifamily High Density Residential (MFH) zone district, except as part of a PUD planned unit development overlay as regulated by TMC 18.36 if the site to be developed has more than one zone district.

Housing Types	City Definition (TMC 18.04)	MFM Multifamily Medium Density Residential Zone District (9-15 DU/Acre)	MFH Multifamily High Density Residential Zone District (14-29 DU/Acre)	MU Mixed Use Zone District (14 DU/Acre and greater)
Accessory Dwelling Units (ADUs)	A dwelling unit that is an accessory use or structure subordinate to a single-family detached dwelling subject to the general land use regulations found in TMC 18.42.010.	Allowed	Allowed	See above
Manufactured Home Parks	Any real property lot which is rented or held out for rent to others for the placement of three or more manufactured homes, designated manufactured homes, or new manufactured homes for the primary purpose of production of income, except where such real property lot is rented or held out for rent for seasonal recreational purposes only and is not intended for year-round occupancy	Allowed		See above
Cottage Housing	A grouping of smaller than average detached single-family dwellings clustered around a common area and developed with a coherent plan for the entire site	Allowed		Allowed
Duplexes	A building designed for and used exclusively for occupancy by two families independent of each other where both dwelling units are located on the same lot and are completely separated from each other by an unpierced wall extending from ground to roof or an unpierced ceiling and floor extending from exterior wall to exterior wall, except for common stairwell or garage exterior to both dwelling units.	Allowed		See above

Independent Senior Housing Facility	An independent living facility consisting of dwellings designed for and occupied by persons fifty-five years of age or older in accordance with 42 U.S.C. 3607. These facilities may consist of individual dwelling units of a barrier-free design, with separate bathroom facilities and a full kitchen. These facilities may have a communal dining area, recreation facilities (such as a library, lounge, or game room), laundry facilities, and open space. No nursing staff or assisted living staff is provided in an independent living facility.	Allowed	Allowed	Allowed	

Housing Types	City Definition (TMC 18.04)	CBC Capitol Boulevard Community Zone District (30 DU/Acre and greater)	TC Town Center Mixed Use and/or Town Center Residential Subdistrict (30 DU/Acre and greater)	BD Brewery District Zone (10 DU/Acre and greater)	MHP Manufactured Home Park Zone District (6-9 DU/Acre)
Assisted Senior Housing Facility	An assisted living facility, which is an establishment which provides living quarters and a variety of limited personal care and supportive health care to persons fifty-five years of age or older in accordance with 42 U.S.C. 3607 who are unable to live independently, but who do not need the skilled nursing care of a rest home, nursing home, or convalescent center. These facilities may consist of individual dwelling units of a barrier-free design, with separate bathroom facilities and a full kitchen. The facility may provide a minimal amount of supportive health care monitoring, such as assistance with medication, but is limited to health care services that do not require state or federal licensing. These facilities may have a communal dining area, recreation facilities (such as a library, lounge, or game room), laundry facilities, and open space.	Allowed	Allowed	Allowed	Allowed

Notes

- Courtyard apartments are not addressed specifically by the zoning code, but would be allowed as a triplex, fourplex, or multifamily dwelling, depending on the number of units.

- Tiny houses as defined by state law would be allowed as detached single-family dwellings or as accessory dwelling units.
- Adult family homes and residential care facilities are allowed in all residential zone districts, except for the MHP Manufactured Home Park zone district and in all commercial zone districts.
- Group foster homes are allowed in all residential zone districts and in the Neighborhood Commercial (NC) zone district as a conditional use and are allowed in all other commercial zone districts except the Historic Commercial (HC) zone district.
- Convalescent centers, rest homes, and nursing homes are allowed in the Mixed Use (MU), Capitol Boulevard Community (CBC), and General Commercial (GC) zone districts.
- High-rise residential (five stories or more) uses are permitted in the some subdistricts of the Capitol Boulevard Community (CBC), Brewery District (BD), and Town Center (TC) zone districts and it is a conditional use in the GC General Commercial zone district.
- Mid-rise multifamily residential (three or four stories) uses are permitted in the GC General Commercial zone district.
- Multifamily dwellings, adult family homes, and residential care facilities are a permitted use in the HC Historic Commercial zone district.
- Independent Senior Housing Facilities are allowed in the Neighborhood Commercial (NC) zone district and Assisted Senior Housing Facilities are allowed in the Neighborhood Commercial (NC) zone district as a conditional use.
- Dwelling or dwelling unit is defined in the TMC as a building or a portion thereof designed for occupancy by one family for residential purposes, having kitchen and bathroom facilities, and on a permanent foundation. A dwelling used as a rental unit shall not be rented for less than thirty consecutive days at a time.
- Family is defined in the TMC as an individual or two or more persons, related by blood, marriage or adoption, or two or more persons with functional disabilities as defined in TMC Chapter 18.53, or a group of not more than six unrelated persons, living together to share a single dwelling unit. **Mayor's June 6, 2021 Comment:** *The Mayor noted the legislature changed the law in 2021 limiting our ability to limit the number of unrelated persons in a house.*

Regulations Evaluation #2 – Density, and Bulk and Dimensional Regulations

Tables 31-33 *Development code density, and bulk and dimensional regulation summary* lists the density, and bulk and dimensional regulations for each of the zone districts that allow housing in the City.

Table 31. Development code density, and bulk and dimensional regulation summary (1 of 3).

Density and Bulk and Dimensional Regulations[8]	RSR Residential /Sensitive Resource Zone District	SFL Single-Family Low Density Residential Zone District	SFM Single-Family Medium Density Residential Zone District
Density (low to high number of dwelling units per acre)	2 to 4[9]	4 to 7[8]	6 to 9[8]
Lot Size (Minimum)	9,000 SF	3,200 SF	3,200 SF
Lot Size (Maximum)	None	None	None
Clustered Subdivision	Yes	Yes	Yes
Impervious Lot Coverage	Depends on lot size	60%	70%
Structure Height	35 feet	35 feet	35 feet
Front Yard	20 – 25 feet	10 feet	10 feet

[8] Table 31 is intended to be a summary for general comparison only. Refer to the Tumwater Municipal Code for additional requirements and exceptions.
[9] DU/Acre = Dwelling units per acre. For example, 2-4 DU/Acre means that the minimum allowed density in the RSR zone district is two dwelling units per acre and the maximum allowed density is four dwelling units per acre. In many zone districts, achieving the maximum listed DU/acre is dependent on the purchase of transfer of development rights in accordance with TMC Chapter 18.57. The calculation of the density requirements is based on the portion of the site devoted to residential and associated uses (e.g., dwelling units; private community clubs; open space; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

1. Land that is required to be dedicated for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of open space/park areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations;
2. Land that is intended for future phases of development created in accordance with TMC 18.14.060;
3. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment, and infiltration facilities).

Density and Bulk and Dimensional Regulations[8]	RSR Residential /Sensitive Resource Zone District	SFL Single-Family Low Density Residential Zone District	SFM Single-Family Medium Density Residential Zone District
Side Yard	7.5 feet	5 feet	5 feet
Rear Yard	20 – 25 feet	20 feet[10]	20 feet[11]
Planned Unit Development	Not Allowed	Allowed	Allowed

[10] Accessory dwelling units may be located a minimum of five feet from property line.
[11] Accessory dwelling units may be located a minimum of five feet from property line.

Table 32. Development code density, and bulk and dimensional regulation summary (2 of 3).

Density and Bulk and Dimensional Regulations[12]	MFM Multifamily Medium Density Residential Zone District	MFH Multifamily High Density Residential Zone District	MU Mixed Use Zone District
Density (low to high number of dwelling units per acre)	9 to 15[813]	14 to 29[814]	14 and greater
Lot Size (Minimum)	N/A	N/A	None
Lot Size (Maximum)	None	N/A	None
Clustered Subdivision	N/A	N/A	N/A
Impervious Lot Coverage	70%	70%	85%
Structure Height	40 feet	Lesser of 50 feet or five stories[15]	Lesser of 50 feet or five stories
Front Yard	10 feet	10 feet	No minimum
Side Yard	5 feet	5 feet	No minimum
Rear Yard	5 feet	5 feet	No minimum
Planned Unit Development	Allowed	Allowed	Allowed

[12] Table 32 is intended to be a summary for general comparison only. Refer to the Tumwater Municipal Code for additional requirements and exceptions.
[13] Note that maximum density in the Multifamily Medium Density Residential (MFM) zone district can be increased to 20 dwelling units per acre if permanently affordable housing units are provided in a new multifamily housing project ten or more dwelling units in size and meet the requirements of TMC 18.42.140.
[14] Note that maximum density in the Multifamily High Density Residential (MFH) zone district can be increased to 39 dwelling units per acre if permanently affordable housing units are provided in a new multifamily housing project ten or more dwelling units in size and meet the requirements of TMC 18.42.140.
[15] Note that maximum height in the Mixed Use (MU) zone district can be increased to the lesser of 60 feet or six stories if permanently affordable housing units are provided in a new multifamily housing project 30 or more dwelling units in size and meet the requirements of TMC 18.42.140.

Table 33. Development code density, and bulk and dimensional regulation summary (3 of 3).

Density and Bulk and Dimensional Regulations[16]	CBC Capitol Boulevard Community Zone District	TC Town Center Mixed Use and/or Town Center Residential Subdistrict	BD Brewery District Zone	MHP Manufactured Home Park Zone District
Density (low to high number of dwelling units per acre)	30 and greater	30 and greater	10 and greater	6 to 9[8]
Lot Size (Minimum)	None	None	None	N/A
Lot Size (Maximum)	None	None	None	N/A
Clustered Subdivision	N/A	N/A	N/A	N/A
Impervious Lot Coverage	None	None	75% - 100%	85%
Structure Height	50 to 65 feet[17]	55 to 85 feet[18]	35 to 55 feet[19]	40 feet
Front Yard	12 feet from curb line	0 feet	0 to 10 feet	10 feet
Side Yard	No minimum	0 feet	0 to 10 feet	5 feet
Rear Yard	No minimum	feet	0 to 10 feet	5 feet

[16] Table 33 is intended to be a summary for general comparison only. Refer to the Tumwater Municipal Code for additional requirements and exceptions.
[17] Note that maximum height in portions of the Capitol Boulevard Community (CBC) zone district can be increased to 75 feet or 50 feet if permanently affordable housing units are provided in a new multifamily housing project 30 or more dwelling units in size and meet the requirements of TMC 18.42.140.
[18] Note that maximum height in portions of the Town Center (TC) zone district can be increased to 65 feet if permanently affordable housing units are provided in a new multifamily housing project 30 or more dwelling units in size and meet the requirements of TMC 18.42.140.
[19] Note that maximum height in portions of the Brewery District (BD) zone district can be increased by 10 feet if permanently affordable housing units are provided in a new multifamily housing project 30 or more dwelling units in size and meet the requirements of TMC 18.42.140.

Density and Bulk and Dimensional Regulations[16]	CBC Capitol Boulevard Community Zone District	TC Town Center Mixed Use and/or Town Center Residential Subdistrict	BD Brewery District Zone	MHP Manufactured Home Park Zone District
Planned Unit Development	Allowed	Allowed	Allowed	Not Allowed

Notes

- The General Commercial (GC) zone district, new multifamily or mixed use projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units would be allowed a maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of 75 feet. Projects providing permanently affordable housing units by this method would have to meet the requirements of TMC 18.42.140.

Regulations Evaluation #3 – Housing Innovation Program

Table 34 *Housing innovation program review* assesses the number of housing tools that are currently used the City by comparing them to those recommended in the Puget Sound Regional Council's Housing Innovation Program. The Housing Innovation Program was created to promote housing options and affordability in local communities. This assessment of housing tools will assist in the development of Housing Action Plan strategies to increase housing options in the city.

This evaluation shows that the City utilizes 32 of the 49 Housing Innovation Program Housing Tools and the City would be willing to consider using more of the tools.

Table 34. Housing innovation program review.

HIP Housing Tools	Housing Tools Currently Available in in the City	Comments
Development Types		
Accessory dwelling units (ADU)	Yes	Accessory dwelling units have been allowed in the City with minimal restrictions. The City Council updated the codes further in 2021 by Ordinance No. O2020-005 on March 16, 2021. In addition, the City is providing free accessory dwelling unit house plans for residents wanting to build units.
Cluster development	Yes	Allowed through the transfer of development rights program.
Cottage housing	Yes	Cottage housing allowed as a use in 2017. The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to allow cottage housing in all single-family zone districts.
Infill development	Yes	Encouraged and allowed.
Master planned communities	No	The City has limited areas that would be appropriate for a master planned community, but the City does use the Planned Unit Development process, as well as development agreements to meet the intent of a master planned community.

HIP Housing Tools	Housing Tools Currently Available in in the City	Comments
Mixed use development	Yes	Brewery District (BD), Capitol Boulevard Community (CBC), Town Center (TC), and Neighborhood Commercial (NC) and Mixed Use (MU) zone districts encourage these types of development as well as the General Commercial (GC) zone district.
Mobile/manufactured homes	Yes	Allowed in all residential zone districts.
Multifamily development	Yes	Allowed in multifamily zone districts as well as Brewery District (BD), Capitol Boulevard Community (CBC), Town Center (TC), and Neighborhood Commercial (NC) and Mixed Use (MU) zone districts encourage these types of development as well as the General Commercial (GC) zone district.
Planned unit development	Yes	Encouraged and allowed.
Preservation & rehabilitation	Yes	Encouraged and allowed.
Small lot single family development	Yes	The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to allow 3,200 SF lots in the Single Family Low Density Residential (SFL) and Single Family Medium Density Residential (SFM) zone districts.
Townhomes	Yes	The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to expand where such uses are allowed.
Zero lot line development	Yes	Part of townhouse and rowhouse developments. The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to expand where such uses are allowed.

HIP Housing Tools	Housing Tools Currently Available in in the City	Comments
Other Regulatory Tools		
Design guidelines	Yes	Design guidelines adopted in 2016.
Flexible single family development regulations	No	The City would be willing to consider this tool in certain areas of the City.
Form based zoning	No	The City would be willing to consider this tool in certain areas of the City.
Inclusionary zoning	Yes	The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to allow in multifamily zone districts as well as Brewery District (BD), Capitol Boulevard Community (CBC), Town Center (TC), and Neighborhood Commercial (NC) and Mixed Use (MU) zone districts encourage these types of development.
Lot size averaging	No	The City would be willing to consider this tool in certain areas of the City.
Minimum densities	Yes	In all zone districts that allow residential uses.
No maximum densities	Yes	In the Brewery District (BD), Capitol Boulevard Community (CBC), Town Center (TC), Neighborhood Commercial (NC), Mixed Use (MU), and General Commercial (GC) zone districts.
Performance zoning	No	The City would be willing to consider this tool in certain areas of the City.
Regulatory streamlining	Yes	Ongoing process of identifying and improving regulatory processes.
SEPA categorical exemptions	Yes	In November 2019, the City Council approved Ordinance No. O2019-022, which raised the SEPA categorical exemption threshold for multifamily projects to the maximum under State law.

HIP Housing Tools	Housing Tools Currently Available in in the City	Comments
Short plats	Yes	Short plats are defined as nine or fewer lots to match the maximum allowed by state law.
Transit oriented development (TOD) overlays	Yes	The Brewery District (BD), Capitol Boulevard Community (CBC), Town Center (TC) and zone districts are effectively this kind of overlay. Could be expanded to include the Littlerock Subarea.
Transfer of development rights (TDR) for affordable housing	No	The City would be willing to consider this tool. There would need to be work with Thurston County to do this.
Up-zones & rezones	Yes	The City has been exploring more options for this tool, most recently in 2020 in various locations in the City.
Incentives		
Density bonuses	Yes	The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to allow for density bonuses as an incentive for permanently affordable multifamily housing as well as the already existing bonuses for transfer of development rights for rural development.
Fee waivers or reductions	Yes	The fee reductions were identified in a strategy to pursue in the 2019 City Council Affordable Housing Work Program. City is currently developing a fee resolution for review and approval by the City Council in 2021.
Incentive zoning	Yes	The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to allow for permanently affordable housing to be built in exchange for density or building height increases depending on the zone district.

HIP Housing Tools	Housing Tools Currently Available in in the City	Comments
Multifamily tax exemption (MFTE)	Yes	The City Council established the Multifamily tax exemption program on April 4, 2017 by Ordinance No. O2017-004 for 8-years and the 12-year Multifamily Tax Exemption developments in the Brewery District (BD) and Capitol Boulevard Community (CBC) plan areas. On January 21, 2020, the City Council approved Ordinance No. O2019-023, which expanded the 12-year Multifamily Tax Exemption program to the Tumwater Town Center (TC) and Littlerock Road Subarea.
Parking reductions	Yes	The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to reduce parking requirements for certain residential use.
Permitting priority	No	The City has considered a permitting priority system for affordable housing, but has not seen the need given the current permit approval timelines.
Planned action EIS	No	The City would be willing to consider this tool in certain areas of the City, such as the Brewery District or the Capitol Boulevard Community Plan Areas.
Other Financial Tools		
Commercial linkage fees	No	Economic conditions at not right for the City to use this tool.
Credit enhancement	No	Economic conditions at not right for the City to use this tool.
Local housing fund	Yes	The City is working with the regional Housing Council in allocating regional housing funds as well as allocating CDGB funds for housing assistance.

HIP Housing Tools	Housing Tools Currently Available in in the City	Comments
Public land for affordable housing	No	The City has considered this tool, but it did not identify any surplus public land that could be used for this purpose.
Project-Level Tools		
Affordability covenants	Yes	The City Council updated the codes in 2021 by Ordinance No. O2020-005 on March 16, 2021 to allow for permanently affordable housing to be built in exchange for density or building height increases depending on the zone district to be managed by permanent covenants and restrictions.
Development agreements	Yes	The City uses development agreements for new development now and it can be used for affordable housing projects.
Renter/Homeowner Assistance		
Displacement resources	No	The City has considered this tool, but has decided it does not have the financial or staff resources to fund and manage its use. If it is considered, it may be part of the actions of the Regional Housing Council.
Direct Household Assistance	Yes	The City has considered this tool, and has funded local non-profits to run programs for rental assistance.
Foreclosure resources	No	The City has considered this tool, but has decided it does not have the financial or staff resources to fund and manage its use. If it is considered, it may be part of the actions of the Regional Housing Council.
Partnerships		
Nonprofit partnerships	Yes	The City has a number of local non-profits it work with directly as well as regional non-profits through the Regional Housing Council.

HIP Housing Tools	Housing Tools Currently Available in in the City	Comments
Interjurisdictional cooperation	Yes	The City has worked with other jurisdictions in a number of ways, such as the development of the regional Thurston Climate Mitigation Plan and the Housing Action Plan development process, as well as formally on homelessness and affordable housing through the Regional Housing Council.
Education & Outreach		
Community outreach plans	No	The City would be willing to consider developing this tool.
Educating permitting officials	No	The City would be willing to consider developing this tool.
NIMBY, strategies to address	No	The City would be willing to consider developing this tool.
Strategic marketing	No	The City would be willing to consider developing this tool.

Regulations Evaluation #4 – Development Code and Other Barrier Summary

Table 35 *Development code barrier summary* identifies potential barriers to building housing within the City's current development codes and practices.

Table 36 *Other potential barriers summary* identifies potential barriers to building housing within the City's current development codes and practices.

The identification of these potential barriers will assist in the development of Housing Action Plan strategies to increase housing in the City.

Table 35. Development code barrier summary.

	Potential Development Code Barriers
Housing Types	
HIGH DENSITY	
Multifamily	**Pedestrian & Vehicle Access and Circulation** • Explore reciprocal access easements for adjacent developments **Parking** • Consider reducing minimum stall size for some portion of parking requirements • Re-examine required minimum parking requirements • Re-examine drive aisle minimum width • Consider shared parking provisions as a means of reducing parking requirements **Landscaping** • Explore options for alternative landscape buffer widths • Consider changes to parking lot landscaping requirements • Consider granting more flexibility in landscape chapter **Incentives** • Explore expanding incentives, including by encouraging three bedroom units

	Potential Development Code Barriers
MEDIUM DENSITY	
Triplex and Fourplex	**Allowed Uses** • Expand as a permitted use to the Single-Family Medium Density Residential (SFM) zone district **Parking** • Re-examine required minimum parking requirements • Consider shared parking provisions as a means of reducing parking requirements
Townhouse	**Allowed Uses** • Expand as a permitted use to the Single-Family Medium Density Residential (SFM) zone district without a Planned Unit Development • Expand as a permitted use to the Single-Family Low Density Residential (SFL) zone district with a Planned Unit Development **Parking** • Re-examine required minimum parking requirements • Consider shared parking provisions as a means of reducing parking requirements
Duplex	**Allowed Uses** • Expand as a permitted use without restrictions in the Single-Family Low Density Residential (SFL) and Single-Family Medium Density Residential (SFM) zone districts **Parking** • Re-examine required minimum parking requirements • Consider shared parking provisions as a means of reducing parking requirements

	Potential Development Code Barriers
LOW DENSITY	
Small Lot Single Family	**Parking** • Re-examine required minimum parking requirements • Review parking requirements to allow tandem garages or clustered parking **Other** • Consider adding a provision regarding zero-lot line development
Accessory Dwelling Units	**Parking** • Re-examine required minimum parking requirements **Other** • Consider increasing accessory dwelling unit size to 1,000 square feet • Simplify water and sewer connection requirements • Work on promotion of accessory dwelling unit options
Detached Single family	**Parking** • Re-examine required minimum parking requirements • Review parking requirements to allow tandem garages or clustered parking **Other** • Review lot coverage and setback requirements
Manufactured Homes	**Parking** • Re-examine required minimum parking requirements
Code Requirements	
GENERAL STANDARDS	
Density	**Potential Density Increases** • Explore increasing minimum densities for multifamily zone districts • Consider allowing up zones within the large lot residential low zones once utility infrastructure, such as sewers, is available

	Potential Development Code Barriers
Landscaping Standards	**Landscaping** • Consider changes to the landscaping code that would be more supportive of and complimentary to higher density and mixed use residential development types • Consider options for alternative landscape buffer widths • Consider changes to surface parking landscaping • Consider removing/reducing the non-compatible buffer requirement between residential developments of different densities, and certain commercial uses
Parking	**Parking** • Reduce required off-street parking ratios in residential areas near transit service and where there is sufficient on street parking to increase the buildable land available for housing
Incentives	**Development Incentives** • Add a development incentive chapter to Title 18 *Zoning* to explore methods to incentivize methods to incentivize a variety of different housing types
OTHER	
Design Guidelines	• Review design guidelines to determine if amendments are needed to allow for the development of more affordable housing
Parking Lots, Driveways	• Consider reducing the amount of pavement required in parking lots and driveways for multifamily developments
Planned Unit Development	• Review the Planned Unit Development requirements and consider amendments to TMC 18.36 *Planned Unit Development (PUD) Overlay*
Height Limits	• Explore increasing height limits
Neighborhood Compatibility	• Consider reducing requirements for multifamily developments near higher intensity uses • Examine setbacks and screening and consider basing it on structure height or mass as opposed to zone district

	Potential Development Code Barriers
Unit Lot Subdivision	• Explore options for subdivision of attached units (unit lot subdivision) to allow for fee-simple ownership instead of condominium ownership. This would be specifically for detached and attached housing units in multifamily residential and mixed-use zone districts
General Development Standards	• Vary development standards, such as parking, open space, and setbacks, by certain housing types to provide permanently affordable housing

Table 36. Other potential barriers summary.

	Other Potential Barriers
OTHER BARRIERS	
Infrastructure Investments	• Make infrastructure investments for infill areas needing upgrades with follow-up by City staff to develop potential scenarios with emphasis on areas where affordable housing is most likely to occur
Development Standards	• Review the City's Engineering Development Standards to identify potential barriers
Comprehensive Plan Map Amendments and Rezones	• Review the City's Comprehensive Plan and the Citywide zoning map designations and determine if there are areas in the City that could support a higher range of residential densities

Appendix E. Previous Work

Background

After the City Council adopted Resolution No. R2018-016 in July 2018, the City has been working on a number of actions to reduce homelessness, increase affordable housing, and collaborate with other jurisdictions and agencies to explore regional solutions to these issues.

The Planning Commission and the City Council undertook a significant effort from September 2018 to May 2019 to develop the Affordable Housing Work Plan for the City Council to use in make informed decisions when prioritizing the next steps to implement Resolution No. R2018-016. Since 2019, the City had spent a substantial amount of time implementing the 2019 Affordable Housing Work Plan through ordinances and process changes.

While the City was implementing the 2019 Affordable Housing Work Plan, the state legislature passed E2SHB 1923 in 2019, which created state grants through the Department of Commerce to address the need to create more affordable housing through the creation of local housing action plans. Seeing an opportunity to pool resources and work regionally to create materials to support the development of a City's Housing Action Plan, the City joined with the Cities of Lacey and Olympia in applying for the state grant.

By January 2020, the three cities were awarded the grant, agreed to an interlocal agreement to work together on the initial work products, and contracted with the Thurston Regional Planning Council (TRPC) to do the work. With the help of TRPC staff, a stakeholder group made up of developers, real estate professionals, and housing activists, as well as staff from the three jurisdictions, over the course of 2020 and into January 2021, a Regional Needs Housing Assessment, a Landlord Survey, and a draft Housing Action Plan template were completed.

2016 Comprehensive Plan Update

In 2016 to ensure the plan complied with the requirements of the GMA, Chapter 36.70A RCW as part of the Growth Management Plan requirement to update the City's Comprehensive Plan every eight years in accordance with RCW 36.70A.130(1) under Ordinance No. O2016-012, the City reviewed and revised the Housing Element of the Comprehensive Plan.

2018 Resolution No. R2018-016 Homelessness and Affordable Housing

In the first half of 2018, the City Council devoted considerable time to discussions of the causes of and resources available to address homelessness and the lack of affordable housing in the City. In July 2018, the City Council adopted Resolution No. R2018-016 Homelessness and Affordable Housing, which included a number of actions to start to reduce homelessness, increase affordable housing, and continue to work with other jurisdictions and agencies to explore regional solutions to these issues.

A. <u>Reduce Homelessness</u> – Increase resources/actions to combat/decrease regional homelessness.

Take the following actions now:

1. Review, and clarify as necessary, policies related to homelessness for first responders.
2. Develop strategies with the Tumwater School District and nonprofit partners to house homeless students/families.
3. Better understand and describe the extent and general location of Tumwater poverty and low-income areas.
4. Commit more current City resources to targeted regional homelessness actions.
5. Act to better connect people to services.
6. Continue to participate in homeless count each year.
7. Meet with Tumwater faith leaders to explore faith community's potential role addressing homelessness.
8. Assess and track homeless/low-income services in Tumwater.

Review and evaluate the following actions once the actions above are complete and their outcomes evaluated:

1. Further explore community support for a new tax/fee source for targeted homeless housing and services.
2. Evaluate Tumwater's future role in providing managed encampments, safe overnight parking areas, and shelters. May include code amendments addressing these land uses.

B. <u>Boost Housing Affordability</u> – Actions to increase affordable housing.

Take the following actions now:

1. Pursue grants for affordable housing.
2. Strengthen incentives for affordable housing within the Capital Corridor and Brewery District and explore extending these incentives to the entire InterCity Transit #13 bus corridor.
3. Evaluate and, if necessary, propose amendments to City code and zoning to support smaller scale affordable housing in neighborhoods to offer a greater variety of housing options.
4. Promote actions property owners can take to increase affordable housing such as accessory dwelling units.
5. Participate in regional discussions to understand factors affecting housing affordability and what steps can be taken to mitigate new housing costs.
6. Assess actions for assuring mobile home parks continue to provide affordable housing toward a goal of property ownership by residents.
7. Encourage more housing development overall.
8. Encourage abandoned houses moving back into the active housing inventory.

9. Enact policies to protect tenants experiencing housing instability, which may include:
    a. Review current eviction/renter protection policies, laws, and legal services and assess possible actions.
    b. Assess need for/knowledge of landlord-tenant conflict resolution services.
    c. Support renter resources (mediation, etc.).
10. Inventory and track affordable housing units in Tumwater.

Review and evaluate the following actions once the actions above are complete and their outcomes evaluated:

1. Further explore community support for a new tax/fee source to support affordable housing and low-income services.
2. Consider options for reducing fees and service charges for certified affordable housing units.
3. Focus on creating one significant affordable housing project with partners in the next five years.

C. <u>Ongoing Regional Actions</u> – Continue work with other jurisdictions and agencies to explore regional solutions to homelessness and affordable housing.

2019 Housing Affordability Work Plans

After the City Council adopted Resolution No. R2018-016 in the summer of 2018, the City worked on a number of actions to reduce homelessness, increase affordable housing, and continue to collaborate with other jurisdictions and agencies to explore regional solutions to these issues.

One of those tasks was the City Council's 2019 Housing Affordability Work Plan, which is intended to increase the amount of privately and publicly funded residential development in the City to bring the supply and demand of housing in the City more into balance.

Objective

The City Council's development text and fee work plans addressed the following actions from Resolution No. R2018-016, which support the goal of increasing housing affordability:

GOAL: Boost Housing Affordability

Action #2 – Strengthen incentives for affordable housing within the Capitol Corridor and Brewery District and explore extending these incentives to the entire InterCity Transit #13 bus corridor

Action #3 – Evaluate and, if necessary, propose amendments to City code and zoning to support smaller scale affordable housing in neighborhoods to offer a greater variety of housing options

Action #4 – Promote actions property owners can take to increase affordable housing such as accessory dwelling units

Action #7 – Encourage more housing development overall

Background

After the City Council adopted Resolution No. R2018-016, the Planning Commission studied material on homelessness and the lack of affordable housing in the City in the fall of 2018. In the winter of 2019, the Planning Commission reviewed potential implementation actions the City could take to increase its affordable housing supply by reviewing the City's land use regulations and development fee structures for barriers to affordable housing.

Staff prepared draft tables of potential implementation actions for the Planning Commission to consider, which included background information as well as a rough estimate of the complexity of enacting the change, its relative effect in increasing the affordable housing stock in the City, and potential costs to the City. The Planning Commission completed its recommended development text and fee work plans on March 12, 2019.

The City Council reviewed the Planning Commission's proposed development text and fee amendment work plans at worksessions on March 26, 2019, April 23, 2019, and May 28, 2019. At their May 28, 2019 worksession, the City Council decided to focus on specific items in the Planning Commission's proposals in the final development text and fee amendment work plans.

Development Code Text Amendments

The intent of the development code text amendments is to increase the amount of privately and publicly funded residential development in the City, which would increase the overall supply of housing. Some of the development code text amendments would focus on increasing the amount of permanently affordable housing in the City.

The City Council's final work plan for development code text amendments to provide more housing, affordable and otherwise, in the City included the following actions:

1. Review the City's Comprehensive Plan and the Citywide zoning map designations and determine if there are areas in the City that could support a higher range of residential densities.
2. Provide an affordable housing density bonus in addition to the maximum density permitted in residential zone districts in limited areas of the City, if the proposed project provides permanently affordable housing units. In addition, consider a density bonus to incentivize developers to provide specific housing types in limited areas of the City that provide permanently affordable housing units.
3. Expand the locations where special residential development types such as accessory dwelling units and cottage housing and smaller types of housing such as micro-housing, tiny homes, and smaller lot single-family development are permitted. In addition, consider incentives for including accessory dwelling units with new single-family home developments.
4. Streamline accessory dwelling unit permitting by researching what other jurisdictions such as the City of Lacey and the cities in east King County are doing and look at ways to incorporate that work into the City's processes.
5. Add duplexes or other smaller types of housing units as a permitted uses to single family residential zone districts, such as the Residential/Sensitive Resource (RSR), Single-Family Low Density Residential (SFL), and Single-Family Medium Density Residential (SFM) zone districts.

6. Increase height limits in the Knoll subdistrict of the Brewery District zone district for permanently affordable housing projects.
7. Reduce required off-street parking ratios in residential areas near transit service and where there is sufficient on street parking to increase the buildable land available for housing. In addition, consider eliminating the 1.0 parking space per dwelling unit requirement for accessory dwellings.
8. Vary development standards, such as parking, open space, and setbacks, by certain housing types to provide permanently affordable housing. Note: Council asked that a more detailed proposal be prepared for this item before it gives its approval to include in the work plan.
9. Require new housing created specifically to be affordable to remain affordable in perpetuity with protective covenants and deed restrictions.
10. Raise the SEPA categorical exemption thresholds for multifamily residential development from 25 to 60 multifamily residential units.
11. Explore options for subdivision of attached units (unit lot subdivision) to allow for fee-simple ownership instead of condominium ownership. This would be specifically for detached and attached housing units in multifamily residential and mixed-use zone districts.

Development Fee Amendments

Based on the implementation actions identified in the Brewery District and Capitol Corridor Subarea Plans, the City Council's development fee amendment work plan included actions to reduce development fees to encourage the building of more housing, which could include permanently affordable housing. The actions in the development fee amendment work plan are focused in the Brewery District and the Capitol Boulevard Corridor subareas, the Town Center, and the Littlerock Road Subarea.

The intent would be to improve the financial viability of new development by allowing private and public developers to spread out or reduce the costs of infrastructure and capital improvements over the course of the development process and in turn allow more dwelling units of all types to be built.

The City Council's final work plan for development code fee amendments to provide more housing in the Brewery District, the Capitol Boulevard Corridor, the Town Center, and the Littlerock Road Subarea of the City included the following actions:

1. Lower, delay, or adjust the timing of development fees, such as impact fees and connection charges, such as:
    a. Transportation impact fees where there is a nexus between the location of affordable housing and access to transit and after working with the Public Works Department to assess transportation demand in these neighborhoods;
    b. Park impact fees after reviewing the assumptions the City considered as part of the Metropolitan Park District ballot measure and working with the Parks and Recreation Department;
    c. Water and sewer connection fees after working with the Public Works Department; and
    d. Sewer capacity development charges for permanently affordable housing after working with the Public Works Department.

2. Exempt emergency housing from impact fees (SHB 2538).
3. Expand the multifamily tax exemption program to other areas of the City, such as the Town Center, and the Littlerock Road Subarea, and look at expanding the percentage of permanently affordable units that would need to be provided.
4. Cut, reduce, or cap fees for nonprofits building permanently affordable housing.
5. Reduce fees for private-sector development of permanently affordable homes and units.
6. Make infrastructure investments for infill areas needing upgrades with follow-up by City staff to develop potential scenarios with emphasis on areas where affordable housing is most likely to occur.
7. Reduce fees for affordable, single-family homes (under 1,500 sq. ft.) and manufactured homes.

March 31, 2025

Appendix E

HOUSING DISPLACEMENT RISK ANALYSIS

For the Cities of Lacey, Olympia, Tumwater, and Yelm

Prepared by:

uncommon BRIDGES & bhc CONSULTANTS

Introduction

This report analyzes housing displacement risks in the cities of Lacey, Olympia, Tumwater, and Yelm. As city populations grow and evolve, policies protecting residents from displacement are critical. Based on analysis of historical policies, current trends, and community dynamics, this report offers actionable recommendations for local governments to enhance housing security and promote equitable living conditions. The research process was informed by robust engagement with community stakeholders.

Communities face unparalleled challenges at the local level. Inflation, fentanyl, and the mental healthcare crisis all contribute to housing displacement. Housing interventions alone cannot succeed without the support of other human and social services. An analysis such as this should be considered within the context of those challenges and the unique way they play out amongst different places and people. While the social conditions for creating housing security are complex, there are policy opportunities that cities can take to reduce displacement and protect community wellbeing.

How can the cities of Lacey, Olympia, Tumwater, and Yelm use this document?

1. To **describe populations at risk** of housing displacement.
2. To explore the dynamics of **housing displacement risk metrics.**
3. To outline **risk reduction policy avenues.**

WHAT IS HOUSING DISPLACEMENT?

Displacement is the process by which a household is forced to move from its community because of conditions beyond their control. Displacement can be described through a number of lenses, including:

- **Economic Displacement -** Displacement due to inability to afford rising rents or costs of homeownership like property taxes.
- **Physical Displacement -** Displacement as a result of eviction, acquisition, rehabilitation or demolition of property, or the expiration of covenants on rent-or income-restricted housing.
- **Cultural Displacement -** Residents are compelled to move because the people and institutions that make up their cultural community have left the area.

Increasing levels of housing displacement have significant implications for communities across the United States. The following section explores how past and present housing policies have contributed to resident displacement, highlighting the disproportionate impact on specific demographic groups. By analyzing the failures of existing policies and the socio-economic dynamics at play, we aim to shed light on pathways to reform that prioritize housing security for all residents. A complete analysis of the sources referenced in the next section can be found in the Housing Displacement Academic Field Scan Memo.

WHO IS AT THE GREATEST RISK OF HOUSING DISPLACEMENT?

Older, Poorer, People of Color

Residential mobility amongst the poor is variable, unplanned, and typically involuntary. Eviction filings doubled between 2000 and 2016. Older people, African Americans, and Latinos are overrepresented across most types of displacement.

Suburban populations

Suburban poverty creates conditions ripe for displacement. With less public transit, poorer households must spend more money to get around. They have limited access to nonprofit services typically concentrated in cities, and confront a municipal infrastructure less suited to deliver holistic social services.

Manufactured Housing Residents

Households in mobile homes are over twice as likely to live in poverty. Half of all mobile homes in the US are in urban areas. There are 1.7 million mobile home renter households and 5.3 million mobile homeowners in the US. Mobile home closures should be treated as mass evictions, which are primary indicators of displacement risk. Those who own their trailers but don't have the means to move them to another location face an additional loss of a valuable household asset.

Families with Children

Households with children are at an increased risk of displacement. A Milwaukee study found that renters with two children have an 11.7% chance of being evicted and a 9.5% chance with one child.

Cost-Burdened Households

Cost-burdened households spend more than 30% of income on housing costs including rent, mortgage, and utilities. Households spending more than half of their income on housing are considered severely cost-burdened.

WHAT PAST HOUSING POLICIES RESULTED IN RESIDENT DISPLACEMENT?

Property owners have significantly more protection under the law than renters.

The de facto imbalance of power between landlords and tenants creates situations where the wellbeing of renters becomes secondary to financial profit with little to no regulation. For example, the Housing Choice Voucher Program provides choices to renters beyond government housing projects, however the lack of protection under anti-discriminatory law makes it difficult for renters to find landlords who accept vouchers, opening the door for residential self-segregation by socio-economic class.

Even when protections for renters exist, a lack of information can be exploited by property managers to coerce renters to act against their own interests.

The housing-specific COVID-19 programs are a prime example of protections put in place that many renters didn't realize they were eligible for.

Policies to improve housing stability in the US most often exacerbate housing insecurity for renters.

That is because US housing policy has a legacy of protecting, preferring, and subsidizing for homeownership and homeowners. Little is done for rent-burdened renters to alleviate displacement risk other than advocating for them to buy homes, a distant possibility for most.

The conversion of public housing projects into mixed-income communities drives housing displacement for low-income households.

Despite the opportunity intentionally designed into mixed-income, multifamily public housing projects, research shows that only one-fifth of original project residents return to experience those benefits.

WHAT TYPES OF CURRENT HOUSING POLICIES CREATE THE RISK OF RESIDENT DISPLACEMENT?

Government subsidized housing aid delivery is notoriously slow.

But it is irreplaceable in the fight to reduce housing displacement. Nesting housing aid into existing, successful, and well-known programs creates a waterfall effect by increasing household disposable income and thereby decreasing the percentage of total income a household spends on housing.

Current market trends and the existing housing policy environment are resulting in growing suburban corporate landlord conglomerates.

Governments should work to support, subsidize, and grow the amount of local small businesses that provide rental housing while incentivizing them to pass on savings to renters. Local property owners are more likely to provide support and relief to renters in financial distress, while corporate landlords are more likely to immediately resort to eviction.

Policies restricting housing development contribute to displacement.

Increasing housing supply makes housing more affordable, and housing affordability is directly correlated to an individual's housing cost burden, an indicator of displacement risk. When new housing is built and priced higher, it pushes older housing into a lower price range, creating additional housing availability for lower-income households. This concept, known as housing stock filtering, is at odds with the commonly accepted drivers of gentrification and neighborhood change.

WHAT ARE COMMUNITY STAKEHOLDERS SAYING?

To gain a locally rooted understanding of housing goals and displacement risks, the project team conducted extensive collaborative outreach. We held a series of planning staff meetings, four community affinity group roundtable discussions, and a community survey that resulted in 167 responses. Affinity groups included those with lived experience and relevant connections to **1) Manufactured housing communities**, **2) Communities of low-wage workers**, **3) Military families and households,** and **4) Accessory dwelling units**. Emergent themes collected during community feedback are outlined below. A full accounting of all engagement analysis and raw data is provided as an attachment to this report.

Survey Responses

WHAT WE HEARD

Cities should promote educational programs that **explain the long-term investment opportunity of ADUs**, and the financial plan required to pursue.

Cities should ensure robust transportation is available to residents and **minimize land used for parking in favor of housing density.**

Affordable housing and **homelessness prevention** programs should work closer together as they share the same clientele.

Cities should work with community groups to coordinate a **one-stop shop for housing benefit explanations** and application support.

Cities should **disincentivize corporate ownership of housing** and create a program to support private ownership of mobile home communities and rental units by local, family-owned operations with on-site or local management.

Cities should promote an **educational campaign to private landlords about legal requirements, renters rights,** and renter income qualifications for those on supplemental income.

Cities should use **creative zoning overlays and innovative land use policies** to classify and protect mobile home communities, as well as other types of affordable housing.

WHAT POLICY UPDATES FOR THE REGION WOULD HELP REDUCE HOUSING DISPLACEMENT RISK?

While each jurisdiction has unique policies that support and challenge affordable housing and displacement, several common themes stand out. Every jurisdiction has policies that support various housing types for all income levels, including efforts to minimize regulatory review and unnecessary barriers to housing and support the development of housing for all needs. Jurisdictions also have policies to assist individuals experiencing homelessness and partnerships with organizations that provide assistance or resources to unhoused community members.

While many policies are supportive, crucial policy gaps remain. Broadly speaking, each city can enrich its housing policies by identifying intentional efforts to increase affordability and prevent and mitigate displacement while prioritizing low-income and historically marginalized populations. For example, every city uses the term “neighborhood character,” which could lead to exclusionary housing practices and be leveraged to maintain high-cost housing types unattainable to those with lower incomes. Rather than relying on this vague term, policies could be strengthened by specifying aspects of neighborhoods that should be maintained or enhanced while considering how those requirements may disproportionately impact low-income or historically marginalized populations.

It’s clear from this policy analysis that the cities of Lacey, Olympia, Tumwater, and Yelm are each engaged in important work to increase housing affordability and reduce displacement pressures. The next step is identifying ways these cities can build upon the work they are already doing, whether that is through increasing partnerships with local organizations, implementing additional actions in their Housing Action Plans, and developing new policies to address gaps in the cities’ housing policies to better address racially disparate impacts, displacement, and exclusion in housing.

HOW CAN WE TELL IF A POLICY REDUCES DISPLACEMENT RISK?

To assess and evaluate policy options and recommendations, we completed a policy evaluation using two sets of criteria: displacement-specific and locality-specific. The displacement specific criteria were based on the Department of Commerce's categories of displacement: economic, physical, and cultural. Through discussions with city staff, audits of the cities' Housing Needs Assessments, and stakeholder feedback, we identified additional criteria to better evaluate potential policies and recommendations based on the jurisdiction's unique needs. City specific criteria are included within the displacement risk profile section of this report.

Policy Evaluation Criteria for All Cities

Racially Disparate Impacts: Does this policy prevent racially disparate impacts or work to repair past harm?

Economic Displacement: Does this policy help prevent or mitigate economic displacement?

Physical Displacement: Does this policy help prevent or mitigate physical displacement?

Cultural Displacement: Does this policy help prevent or mitigate cultural displacement?

Housing Exclusion: Does this policy prevent the exclusion of historically marginalized or other vulnerable populations from accessing safe and affordable housing appropriate for their needs?

Implementation Considerations: Does the city have staff and resources necessary to implement this policy effectively?

DISPLACEMENT RISK PROFILES

Generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse
- Households are spending more than 30% of income on housing
- Rental units become unaffordable for extremely low-income residents
- Poverty rates increase in a community
- Homeownership rates decline

These metrics are derived from the Racially Disparate Impacts tool created by the WA Department of Commerce. The tool has five metrics for housing displacement risk: racial diversity, cost burden, rental affordability, income levels, and homeownership.

The following pages detail the dynamics of housing displacement risk as observed in each of the four cities. Profiles include housing displacement indicator data, policy recommendation summaries, and city-specific policy evaluation criteria. Our profiles have added age and manufactured home unit metrics to reflect research findings and feedback from the community.

A full accounting of all proposed proposals and proposed policy updates can be found in the **Policy Recommendation Matrix** attachment of this report.

Most Prominent Risk Type:
Economic Displacement

Policy Avenues to Reduce Housing Displacement Risk Using the Comprehensive Plan Housing Chapter

- Identify and develop partnerships with organizations that provide or support low income, workforce, and senior housing as well as other populations with unique housing needs.
- Create a manufactured home park zone type to promote preservation. Allow manufactured home parks in multifamily and commercial areas.
- Encourage housing affordable to lower wage earners so those who work in Lacey can afford to live in the city

Policy Evaluation Criteria

- Does this policy encourage or remove barriers to providing affordable housing?
- Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?
- Does this policy increase overall housing supply?
- Does this policy reduce housing costs?

HOUSING DISPLACEMENT RISK PROFILE

OLYMPIA, WA

Housing for all income levels exists in Olympia, but nearly 40% of households are cost burdened and there is a relative lack of units for extremely-low income residents.

Where is our risk coming from?

36% of All Households are Cost Burdened

44% of Residents are Low, Very Low, or Extremely Low Income

65% of Vacant Rental Units are for Low or Very Low Income Residents

11% of Vacant Rental Units are for Extremely-Low Income Residents

91% Growth of non-White population 2010-2023

23% of Residents are 60+ Years Old

20% of residents are Under 19 Years Old

1,030 Total Manufactured Housing Units

Most Prominent Risk Type

Physical Displacement

Policy Avenues to Reduce Housing Displacement Risk Using the Comprehensive Plan Housing Chapter

- Policies for the protection and preservation of the manufactured home community.
- Additional measures to encourage the retention and maintenance of existing affordable housing, especially in high-opportunity neighborhoods or areas that have historic patterns of segregation.
- Evaluate the relationship between the Olympia and county's home fund to ensure housing goals are met.
- Expanding allowance of residential tenant improvements without triggering land use requirements
- Allowing Single Room Occupancy (SRO) housing in all multifamily zones

Policy Evaluation Criteria

- Does this policy incentivize and support the development of affordable and deeply affordable housing, including supportive?
- Does this policy increase housing supply, including middle housing and ADUs?
- Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?

Most Prominent Risk Type

Economic Displacement

Policy Avenues to Reduce Housing Displacement Risk Using the Comprehensive Plan Housing Chapter

- A Community Land Trust style program for mobile home communities.
- A City program to support private, local, small scale ownership of mobile home communities. This builds on the City's mobile home housing stock and also wishes to help preserve existing affordable stock
- Increased staffing capacity to process ADUs quickly and reduce costs under City control

Policy Evaluation Criteria

- Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?
- Does this policy incentivize and support the development of affordable and deeply affordable housing?
- Does this policy encourage adaptive reuse of existing residential units or other buildings where feasible?
- Does this policy incentivize or reduce barriers to developing diverse housing types including smaller homes?

Project Methodology

Housing Displacement Risk Analysis for the cities of Lacey, Olympia, Tumwater, and Yelm

Introduction

This report analyzes housing displacement risks in the cities of Lacey, Olympia, Tumwater, and Yelm. As urban areas evolve, the need for effective policies that safeguard against displacement becomes increasingly critical. This analysis aims to identify factors contributing to housing instability and displacement, especially among vulnerable populations. By examining historical policies, current trends, and community dynamics, we seek to outline actionable recommendations for local governments to enhance housing security and promote equitable living conditions for all residents. Through collaborative engagement with community stakeholders, this report underscores the importance of inclusive housing strategies that prioritize the needs of marginalized groups while fostering sustainable development.

Research

The project team submitted a Housing Displacement Academic Field Scan memo synthesizing the latest peer-reviewed journals from the last decade that responds to the lines of questioning set out within the Housing Displacement Analysis project for the cities of Lacey, Olympia, Tumwater, and Yelm, including:

- What past housing policies resulted in resident displacement?
- What types of current housing policies create the risk of resident displacement?
- What groups and communities are at the greatest risk of housing displacement?

Data Indicators

For a localized understanding of displacement risk, the project team completed a demographic analysis based on the Racially Disparate Impacts (RDI) tool published by the Washington State Department of Commerce outlining a variety of indicators to measure displacement risk. The RDI tool relies on estimates published by the U.S. Census Bureau and the Department of Housing and Urban Development (HUD). Additionally, demographic data was pulled from the American Community Survey.

Public Engagement

Affinity Groups

Uncommon Bridges coordinated four (4) affinity group conversations to gather community stakeholders for a discussion about housing displacement risk in Lacey, Olympia, Tumwater, and Yelm. Affinity group topics included:

1) Manufactured housing communities,
2) Communities of low-wage workers,
3) Military families and households, and;
4) Accessory dwelling units.

Public Survey

A key aspect of this project involves assessing community insight, perceptions, and lived experiences around the impacts of livability, affordability, and displacement in Olympia, Lacey, Tumwater, and Yelm. A robust data collection effort, including multi-lingual outreach via community anchors, focus groups, and an open-access multi-modal survey, sought to engage both those who have been frequently engaged as well as new perspectives and experiences not included in past policy and housing assessments conducted in the region.

Policy Recommendation Analysis

To assess and evaluate policy options and recommendations, we completed a policy evaluation using two sets of criteria: displacement-specific and locality-specific. The displacement-specific criteria were based on the Department of Commerce's categories of displacement: economic, physical, and cultural. Through discussions with city staff, audits of the cities' Housing Needs Assessments, and stakeholder feedback, we identified additional criteria to better evaluate potential policies and recommendations based on the jurisdiction's unique needs.

Criteria Evaluation Method and Scoring

Policies were evaluated with a set of criteria and scored based on the following scale. These were then totaled to calculate an overall impact score for each policy option.

- **Yes, positive impact** (+2): The policy option has a positive impact and directly addresses the criterion.
- **Somewhat positive impact** (+1): The policy option has a somewhat positive impact, or indirectly addresses the criterion.
- **Neutral/ No impact** (+0): The policy option does not directly address the criterion, but may benefit other housing priorities for the jurisdiction.

- **Negative impact** (-1): The policy option may exacerbate, or detract from, addressing the criterion or issue. However, while some options may have a negative impact on one element of the scoring criteria, it does not mean that they are bad options overall. For example, encouraging redevelopment may increase housing supply overall and reduce long-term displacement pressures, but also increase physical displacement pressures in the short-term.

We used the following criteria for all jurisdictions in this report as a common set.

- **Racially Disparate Impacts**: Does this policy prevent racially disparate impacts or work to repair past harm?
- **Economic Displacement**: Does this policy help prevent or mitigate economic displacement?
- **Physical Displacement**: Does this policy help prevent or mitigate physical displacement?
- **Cultural Displacement: ** Does this policy help prevent or mitigate cultural displacement?
- **Housing Exclusion**: Does this policy prevent the exclusion of historically marginalized or other vulnerable populations from accessing safe and affordable housing appropriate for their needs?
- **Implementation Considerations**: Does the city have the staff and resources necessary to implement this policy effectively?

In addition to these, each of the jurisdictions had their own, unique (yet sometimes related and similar) policy evaluation criteria.

Lacey

- Does this policy encourage or remove barriers to providing affordable housing?
- Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?
- Does this policy increase the overall housing supply?
- Does this policy reduce housing costs?

Olympia

- Does this policy incentivize and support the development of affordable and deeply affordable housing, including supportive?
- Does this policy increase the housing supply, including middle housing and ADUs?
- Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?

Tumwater

- Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?

- Does this policy incentivize and support the development of affordable and deeply affordable housing?
- Does this policy encourage adaptive reuse of existing residential units or other buildings where feasible?
- Does this policy incentivize or reduce barriers to developing diverse housing types including smaller homes?

Yelm

- Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?
- Does this policy incentivize or reduce barriers to developing diverse housing types including smaller homes?
- Does this policy incentivize and support the development of affordable and deeply affordable housing?

Identifying Policy Recommendations

After analyzing the critical issues in each jurisdiction and the challenges of housing displacement, we compiled a comprehensive inventory of potential policies and programs to address these concerns. The list also included each city's respective Housing Action Plan policies to better reflect existing programs and policies to show how these contribute to or detract from anti-displacement goals, and to help the cities prioritize future implementation actions of their HAP.

MEMORANDUM

Date: October 17, 2024
To: Planning and Community Development Departments of the Cities of Lacey, Olympia, Tumwater, and Yelm
From: Ariam Ford, AICP, Equity & Engagement Lead, Uncommon Bridges
Subject: Housing Displacement Academic Field Scan

Purpose

The following document is a synthesis of the latest peer reviewed journals from the last decade that responds to the lines of questioning set out within the Housing Displacement Analysis project for the cities of Lacey, Olympia, Tumwater, and Yelm, including:

- What past housing policies resulted in resident displacement?
- What types of current housing policies create the risk of resident displacement?
- What groups and communities are at the greatest risk of housing displacement?

What past housing policies resulted in resident displacement?

1. **Property owners have significantly more protection under the law than renters do.** The de facto imbalance of power between landlords and tenants creates situations where the wellbeing of renters becomes secondary to financial profit with little to no regulation. For example, the Housing Choice Voucher Program provides choices to renters beyond government housing projects, however the lack of protection under anti-discriminatory law makes it difficult for renters to find landlords who accept vouchers, opening the door for residential self-segregation by socio-economic class (Besbris et al. 2024, 210).
2. **Even when protections for renters exist, a lack of information can be exploited by property managers to coerce renters to act against their own interests.** The housing-specific COVID-19 programs are a prime example of protections put in place that many renters didn't realize they were eligible for (Besbris et al. 2024, 212).
3. **Policies to improve housing stability in the US most often exacerbate housing insecurity for renters.** That is because US housing policy has a legacy of protecting, preferring, and subsidizing for homeownership and homeowners. Little is done for rent-burdened renters to alleviate displacement risk other than advocating for them to buy homes, a distant possibility for most (DeLuca, Stefanie, and Eva Rosen 2022, 345).
4. **Driven by macro-level increases in income inequality, neighborhoods are becoming more segregated by income.** Contrastingly, racial integration is increasing, especially in U.S. cities (Chapple et al. 2017, 10).
5. **The definition of displacement is not universal.** Caused by investment or divestment, displacement takes many forms - direct, indirect, physical, economic, or exclusionary (Chapple et al. 2017, 27).

6. **The conversion of public housing projects into mixed-income communities drives housing displacement for low-income households.** Despite the opportunity intentionally designed into mixed-income, multifamily public housing projects, only one-fifth of original project residents return to experience those benefits (Lee and Evans 2020, 6).
7. **Market corrections and global events do little to overcome the effects of racism and socio-economic discrimination on housing displacement.** While major events such as Covid-19 may create housing uncertainty across all demographics and identities, low-income people of color remain the most likely to experience housing displacement (Lee and Evans 2020, 18).
8. **Quantitative efforts to measure displacement underrepresent the plight of disadvantaged populations by not considering lived experience.** To counter this, displacement studies must include user generated, geographically tracked content to truly understand the state of gentrification risk in a community (Chapple and Zuk 2016, 115).

What types of current housing policies create the risk of resident displacement?

1. Government aid delivery is notoriously slow but critical when trying to implement policies designed to reduce housing displacement. **Nesting housing aid into existing, successful, and well-known programs creates a waterfall effect by increasing household disposable income** and thereby decreasing the percentage of total income a household spends on housing (Besbris et al. 2024, 212).
2. **Governments should take a holistic and comprehensive approach to mapping the overlap of government aid programs in their communities.** Only 1 in 4 households eligible for rental assistance actually receives it. There are opportunities to "nest" housing-specific policies within existing and more consistent government programs to boost successful delivery (Besbris et al. 2024, 208).
3. **Housing relief is most expediently and directly delivered via a landlord or property manager.** Government aid can oftentimes fail to provide timely relief for even those who qualify for assistance (Besbris et al. 2024, 217).
4. **To reduce housing displacement risk, governments should focus on increasing household financial stability and reducing socioeconomic inequities within Suburban communities.** Today, most low-income Americans live in the inner suburbs, where evictions are increasing faster than in urban areas. (Rutan et al. 2023, 164)
5. **To fight a growing trend of suburban corporate landlord conglomerates, governments should work to support, subsidize, and grow the amount of local small businesses that provide rental housing while incentivizing them to pass on savings to renters.** Local property owners are more likely to provide support and relief to renters in financial distress, while corporate landlords are more likely to immediately resort to eviction.(Rutan et al. 2023, 166)
6. **Code enforcement and condemnation can be a policy-driven displacement factor without a comprehensive plan to support displaced tenants.** Low-income households may reside in substandard conditions, and in cases where a property owner is unable or refuses to make improvements, tenants may be forced to vacate (Lee and Evans 2020, 3).

7. **Policies restricting housing development contribute to displacement risk.** Increasing housing supply makes housing more affordable, and housing affordability is directly correlated to an individual's housing cost burden, an indicator of displacement risk (Been, Gould Ellen, and O'Regan 2019, 4).
8. **New housing is required to achieve the displacement risk reduction benefits of housing stock filtering.** When new housing is built and priced higher, older housing is pushed down into a lower price range, creating additional housing availability for lower-income households. This concept is at odds with the commonly accepted drivers of gentrification and neighborhood change (Been, Gould Ellen, and O'Regan 2019, 6).

What groups and communities are at the greatest risk of housing displacement?

1. **Suburban poverty is ripe for displacement.** With less public transit, poorer households must spend more money to get around. They have limited access to non-profit services typically concentrated in cities, and confront a municipal infrastructure less suited to deliver holistic social services support (Rutan et al. 2023, 166).
2. **Residential mobility amongst the poor is variable, unplanned, and typically involuntary.** Eviction filings doubled between 2000 and 2016 (DeLuca, Stefanie, and Eva Rosen 2022, 348).
3. **Households in mobile homes are over twice as likely to live in poverty.** Half of all mobile homes in the US are in urban areas. There are 1.7 million mobile home renter households and 5.3 million mobile homeowners in the US (DeLuca, Stefanie, and Eva Rosen 2022, 348).
4. **Mobile home closures should be treated as mass evictions, which are primary indicators of displacement risk**. Those who own their trailers but don't have the means to move them to another location face an additional loss, leading to not only displacement but also the loss of a valuable household asset (Lee and Evans 2020, 6).
5. **Older people, African Americans, and Latinos are overrepresented across most types of displacement** (Lee and Evans 2020, 9).
6. **Households with children are at an increased risk of displacement.** A Milwaukee study found that renters with two children have an 11.7% chance of being evicted and a 9.5% chance with one child (Desmond and Gershenson 2017, 8).
7. **Renters who experience job loss are more likely to be evicted.** A Milwaukee study found that renters who lost their jobs were twice as likely to be evicted (Desmond and Gershenson 2017, 8).
8. **Community character change, or gentrification, is not necessarily an indicator of displacement.** A Milwaukee study found no significant difference in eviction risk between those living in racially or economically transitioning neighborhoods and those who live in homogenous communities (Desmond and Gershenson 2017, 9).
9. **Having a more affluent support system is not necessarily a buffer to experiencing housing displacement, but decreasing poverty shocks amongst those in your social networks will decrease displacement risk.** A Milwaukee study found that while renters in social networks with others experiencing poverty shocks are more likely to experience

eviction, having a more affluent social network did not decrease a renter's risk of eviction (Desmond and Gershenson 2017, 8).

Policy Framework Review

Evaluation Method

With the passage of HB 1220 in 2021, jurisdictions are required to make adequate provisions for housing for all economic segments of the community. This includes identifying *"local policies and regulations that result in racially disparate impacts, displacement, and exclusion in housing."*

The following evaluation table assesses the existing Comprehensive Plan's goals and policies for impacts for racially disparate impacts, including displacement and exclusion, in the Housing Element and residential goals and policies in the Land Use Element. The evaluation used the following criteria in evaluating each goal and policy, consistent with the Department of Commerce's Racially Disparate Impacts guidance:

- **Supportive**: The policy is valid and supports meeting the identified housing needs. The policy is needed and addresses identified racially disparate impacts, displacement and exclusion in housing.
- **Approaching**: The policy can support meeting the identified housing needs but may be insufficient or does not address racially disparate impacts, displacement, and exclusion in housing.
- **Challenging**: The policy may challenge the jurisdiction's ability to meet the identified housing needs. The policy's benefits and burdens should be reviewed to optimize the ability to meet the policy's objectives while improving the equitable distribution of benefits and burdens imposed by the policy.
- **Not Applicable (NA)**: The policy does not impact the jurisdiction's ability to meet the identified housing needs and has no influence or impact on racially disparate impacts, displacement, or exclusion.

All Goals and policies in the Housing Element were included in this evaluation. For the Land Use Element, only residential-use-related policies were evaluated.

City of Olympia

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Land Use and Urban Design Element, Comprehensive Plan				
PL6.1	Establish and periodically update a design review process and design criteria consistent with the goals and policies in the Comprehensive Plan for: ● Commercial and mixed use development adjacent to freeways and public streets ● Other highly-visible, non-residential development, such as the Port of Olympia, campus developments, and master planned developments ● Multifamily residential development and manufactured housing parks ● Detached homes on smaller lots (less than 5,000 square feet) and in older neighborhoods (pre-1940) ● Properties listed on a Historic Register or located within a designated historic district	**Approaching**	The policy could address that the design review process should be reviewed and updated to ensure a streamlined review process and sufficient housing production to meet capacity goals.	Establish and periodically review and update a design review process and design criteria that ensures streamlined review, encourages sufficient housing production to meet the City's housing capacity goals, and is consistent with the goals and policies in the Comprehensive Plan for: ● Commercial and mixed use development adjacent to freeways and public streets ● Other highly-visible, non-residential development, such as the Port of Olympia, campus developments, and master planned developments ● Multifamily residential development and manufactured housing parks ● Detached homes on smaller lots (less than 5,000 square feet) and in older neighborhoods (pre-1940)

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
				• Properties listed on a Historic Register or located within a designated historic district

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PL6.4	Require multi-family housing to incorporate architectural forms and features common to nearby housing; to include porches, balconies, bay windows and similar details; to have entries oriented to streets or a courtyard, and include accessible open space; and to be reduced in size near lower density residential districts.	**Challenging**	Additional restrictions on multi-family housing types can result in less affordable rents. While design standards are not necessarily negative–they can ensure liveable spaces–this policy should be updated to balance both design and affordability goals, allowing flexibility to ensure housing production and choices.	Balance design standards for multi-family housing that require developers incorporate architectural forms and features similar to existing development, include entries oriented towards streets or a courtyard, and include accessible open space, with flexibility to ensure design standards do not increase the cost of development and prevent housing production.
PL8.4	Avoid height bonuses and incentives that interfere with landmark views.	**Challenging**	Limiting density for aesthetic reasons can result in lower housing capacity. However, this may be an acceptable compromise as long as the housing and affordability considerations are planned for elsewhere. To avoid subjective views being used as a tool for limiting housing development, this policy should be updated to specify or map viewsheds are most	Avoid height bonuses and incentives that interfere with the City's special landmark views and specify which areas of the city this applies to in the city's code.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			important to preserve through code provisions.	
PL11.2	Provide incentives for housing in commercial districts near transit stops.	**Approaching**	Providing housing near jobs can be helpful in preventing displacement while reducing overall community impacts such as traffic. The incentives could be expanded to consider affordability as well.	Provide incentives for housing and affordable housing in commercial districts near transit stops.
GL14	Olympia's neighborhoods provide housing choices that fit the diversity of local income levels and lifestyles. They are shaped by thorough public planning processes that involve community members, neighborhoods, and city officials.	**Approaching**	While this policy does address housing for the different income levels, it should be expanded to clearly call-out low income groups and prioritize housing for historically marginalized groups.	Olympia's neighborhoods provide housing choices that fit the diversity of local income levels and lifestyles. They are shaped by thorough public planning processes that involve community members, neighborhoods, and city officials, and actively seek input from historically marginalized or overburdened populations.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PL14.2	Concentrate housing into three high-density Neighborhoods: Downtown Olympia, Pacific/Martin/Lilly Triangle; and the area surrounding Capital Mall. Commercial uses directly serve high-density neighborhoods and allow people to meet their daily needs without traveling outside their neighborhood. High-density neighborhoods are highly walkable. At least one-quarter of the forecasted growth is planned for downtown Olympia.	**Approaching**	While this policy does address the city's housing needs and demands, it does not address reducing displacement and affordability pressures.	NA
PL14.3	Preserve and enhance the character of existing Low-density Neighborhoods. Disallow medium or high-density development in existing Low-density Neighborhood areas except for Neighborhood Centers.	**Challenging**	Language that aims to preserve low-density, single-family neighborhood "character" can often be used as a proxy for prohibiting more diverse housing choices. Instead of "character," this policy could consider height and building form while allowing more flexibility for similar, yet more affordable, housing	Focus medium or high-density development in Neighborhood Centers of low-density neighborhoods.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			types such as middle housing.	
PL14.4	In low-density Neighborhoods, allow medium-density Neighborhood Centers that include civic and commercial uses that serve the neighborhood. Neighborhood centers emerge from a neighborhood public process.	**Approaching / Supporting**	Depending on how inclusive the Neighborhood Center identification and engagement process is, this policy would support anti-displacement through placemaking and housing, or it may cause further displacement.	Ensure neighborhood centers are developed around a public process that actively seeks input from all residents, prioritizing those from historically marginalized or overburdened communities.
Land Use and Urban Design Element, Comprehensive Plan - Housing Section				
GL16	The range of housing types and densities are consistent with the community's changing population needs and preferences.	**Approaching**	While the policy acknowledges different community and population needs, it could be improved by incorporating affordability and anti-displacement language.	Ensure a range of housing types and densities consistent with the community's changing population needs, preferences, and to provide housing affordable for all income brackets.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PL16.2	Adopt zoning that allows a wide variety of compatible housing types and densities.	**Approaching**	The policy intends to allow a variety of housing types. However, “compatible” is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.	Adopt zoning that allows a wide variety of housing types and densities to provide housing for all needs.
PL16.3	Allow 'clustering' of housing compatible with the adjacent neighborhood to preserve and protect environmentally sensitive areas.	**Approaching**	This goal would allow parcels that would be undevelopable under strict application of the zoning code to be developable. However, “compatibility” could be further defined to ensure the building types used are not exclusionary.	Allow clustering of housing to preserve and protect environmentally sensitive areas and increase the developable area of parcels with critical areas present.
PL16.4	Disperse low and moderate-income and special needs housing throughout the urban area.	**Approaching**	While this policy seeks to ensure lower income households are not isolated to certain parts of the city, it could be enhanced to go further by allowing and fostering capacity rather	Allow and increase the amount of low and moderate-income and special needs housing in the city.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			than focusing on dispersion.	
PL16.5	Support affordable housing throughout the community by minimizing regulatory review risks, time and costs and removing unnecessary barriers to housing, by permitting small dwelling units accessory to single-family housing, and by allowing a mix of housing types.	**Supportive**	This policy supports housing growth and affordability.	NA
PL16.6	Promote home ownership, including by allowing manufactured homes on individual lots, promoting preservation of manufactured home parks and allowing these parks in multi-family and commercial areas, all subject to design standards ensuring compatibility with surrounding housing and land uses.	**Approaching**	This policy could be improved by better defining compatibility. Consider identifying whether compatibility is driven by architectural massing or design styles.	Promote home ownership, including by allowing manufactured homes on individual lots, promoting the preservation of manufactured home parks, and allowing these parks in multi-family and commercial areas, with appropriate development standards.
PL16.7	Allow single-family housing on small lots, but prohibit reduced setbacks abutting conventional lots.	**Approaching**	Allowing smaller homes on smaller lots reduces land costs.	NA. The intent of this policy needs to be clarified by City staff.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			"Conventional lots" is unclear however.	
PL16.8	Encourage and provide incentives for residences above businesses.	**Supportive**	Incentivizing residences over businesses creates flexibility and a variety of units.	NA
PL16.9	In all residential areas, allow small cottages and townhouses, and one accessory housing unit per home -- all subject to siting, design and parking requirements that contribute to neighborhood character.	**Approaching**	While allowing cottages and townhouses supports housing and affordability goals, "neighborhood character" is vague and could be tied to exclusionary housing practices.	Allow small cottages, townhomes, and one accessory dwelling unit per home, all subject to design standards and parking requirements consistent with the underlying zone.
PL16.10	Require effective, but not unreasonably expensive, building designs and landscaping to blend multi-family housing into neighborhoods.	**Approaching**	Requiring additional standards for multi-family housing types ultimately hinders affordability.	Require effective, but not unreasonably expensive, building standards and landscaping to blend multi-family housing into neighborhoods, and periodically review these standards to ensure they do not prevent the development of affordable housing.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PL16.11	Require that multi-family structures be located near a collector street with transit, or near an arterial street, or near a neighborhood center, and that they be designed for compatibility with adjacent lower density housing; and be 'stepped' to conform with topography.	**Approaching**	Requiring multi-family housing to be located near transit or neighborhood centers increases their accessibility, but this policy could be expanded to include multi-family housing throughout the city to increase the number of housing units. This policy could also be improved by better defining compatibility.	Require that multi-family structures be prioritized near a collector street with transit, near an arterial street, or near a neighborhood center, encouraged throughout the city, and be designed to conform with topography in a stepped formation.
PL16.12	Require a mix of single-family and multi-family structures in villages, mixed residential density districts, and apartment projects when these exceed five acres; and use a variety of housing types and setbacks to transition to adjacent low-density areas.	**Approaching**	Requiring a mix of single- and multi-family housing types could support housing growth and affordability, but it does not address reducing displacement and affordability pressures. This policy could be better improved by specifying the “mix” of housing.	NA
PL16.13	Encourage adapting non-residential buildings for housing.	**Supportive**	Adapting non-residential buildings for housing supports housing growth and affordability.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PL16.14	Provide annual information on affordable homeownership and rentals in the City, including the operative definitions of affordable housing, criteria to qualify for local, state, and federal housing assistance, data on current levels of market-rate and affordable housing, demand for market-rate and affordable housing, and progress toward meeting market-rate and affordable housing goals.	**Supportive**	Reviewing affordability and funding opportunities to increase housing annually is supportive of housing growth and affordability.	NA
Land Use and Urban Design Element, Comprehensive Plan - Downtown and Other Neighborhoods - Neighborhoods Section				
GL20	Development maintains and improves neighborhood character and livability.	**Approaching**	This policy could be improved by specifying what “neighborhood character” means, as the term is vague and could be tied to exclusionary housing practices.	Ensure new developments maintain the scale and form of existing neighborhoods while increasing their livability and affordability.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PL20.1	Require development in neighborhoods to be of a type, scale, orientation, and design that maintains or improves the character, aesthetic quality, and livability of the neighborhood.	**Challenging**	This policy could be improved by specifying "character", which is vague and could be tied to exclusionary housing practices. This policy does not directly address housing affordability or supply. Requiring additional standards could ultimately hinder affordability.	Maintain development standards for new residential developments that balance maintaining the scale and form of existing neighborhoods with flexible standards that encourage diverse housing types.
PL20.2	Unless necessary for historic preservation, prohibit conversion of housing in residential areas to commercial use; instead, support redevelopment and rehabilitation of older neighborhoods to bolster stability and allow home occupations (except convalescent care) that do not degrade neighborhood appearance or livability, nor create traffic, noise or pollution problems.	**Approaching**	This policy preserves housing in residential areas, but it could increase displacement risk as it does not address protecting residents from potential displacement or racially disparate impacts that may result from the redevelopment and rehabilitation of older neighborhoods.	Prohibit the conversion of housing in residential areas to commercial use unless necessary for historic preservation and support the redevelopment and rehabilitation of older neighborhoods to maintain existing affordable housing stock and allow home occupations, considering and preventing the potential displacement impacts that may result from the redevelopment and rehabilitation of older neighborhoods.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
20.3	Allow elder care homes and seniors-only housing and encourage child care services everywhere except industrial areas; but limit hospice care to multi-family and commercial districts.	**Approaching**	This policy addresses housing supply and affordability by allowing housing for the elderly. It could be more equitably applied to residential zones, rather than only being allowed in multi-family and commercial districts.	NA, could consider allowing hospice care in all areas but industrial, as well.
PL20.4	Support development and public improvements consistent with healthy and active lifestyles.	**Supportive**	This policy could be improved by prioritizing investment in neighborhoods that have historically experienced a lack of investment.	NA
PL20.5	Prevent physical barriers from isolating and separating new developments from existing neighborhoods.	**Supportive**	This policy supports housing growth, affordability, and the integration of new developments.	NA
Public Services Element, Comprehensive Plan				
GS3	Affordable housing is available for all income levels throughout the community.	**Supportive**	Providing affordable housing advances housing growth. This goal should be updated to consider housing by income bracket to meet	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			the requirements of HB 1220.	
PS3.1	Promote a variety of residential densities and housing types so that housing can be available in a broad range of costs.	**Supportive**	Allowing different types of housing and affordability levels fosters a cohesive and inclusive community when it comes to housing. This policy should be updated to consider housing by income bracket to meet the requirements of HB 1220.	NA
PS3.2	Encourage preservation of existing houses.	**Approaching**	This policy is supportive of housing goals but could prevent affordable housing from being built.	Encourage the preservation of existing or naturally affordable housing units.
PS3.3	Take steps to ensure housing will be available to all income levels based on projected community needs.	**Supportive**	Allowing different types of housing and affordability levels fosters a cohesive and inclusive community when it comes to housing. This policy should be updated to consider housing by income bracket to meet the requirements of HB 1220.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
GS4	Deteriorating residential areas within the City are revitalized.	**Approaching**	This policy is supportive of housing goals but could lead to displacement or disproportionate impacts to vulnerable or historically marginalized communities.	Encourage renovation or retrofit of deteriorating residential units to maintain the quality of the existing housing stock, and partner with other organizations or create a city program to provide temporary relocation assistance where needed.
PS4.1	Support efforts to preserve the historic features or character of historic properties in City housing rehabilitation programs.	**Challenging**	This policy could place additional burdens or barriers to housing rehabilitation.	Ensure rehabilitation programs support efforts to preserve historic features of historic properties in the City where feasible and do not prevent housing rehabilitation or the provision of safe housing.
PS4.2	Provide assistance and incentives to help low-income residents rehabilitate properties they cannot afford to maintain.	**Supportive**	Providing assistance to low income residents to rehabilitate their properties is supportive of housing growth and maintaining existing affordable housing stock, while prioritizing assistance for low income groups.	NA
GS5	Special needs populations, such as people with developmental disabilities, the homeless, the frail elderly, and others who have difficulty securing housing,	**Supportive**	This goal is supportive of housing goals, especially to provide housing for vulnerable populations.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	have adequate, safe, and affordable housing.			
PS5.1	Disperse housing for low-income, moderate-income, and special-needs residents throughout Olympia and its Urban Growth Area, and discourage concentration of such housing in any one geographic area.	**Approaching / Supportive**	This policy is supportive of housing growth and ensuring low income or other types of housing are integrated throughout the city.	NA
PS5.2	Support the Fair Share Housing allocation process and work with other jurisdictions to monitor progress toward achieving agreed upon goals.	**Approaching**	This policy helps support housing growth, but doesn't directly address affordability or displacement.	NA
PS5.3	Evaluate the possibility of providing density bonuses to builders who provide low-income housing in market-rate developments, and of tying the bonus to affordability.	**Approaching**	This policy could be strengthened by requiring low income units.	Evaluate the possibility of providing density bonuses to builders who provide low-income housing in market rate developments or requiring the provision of low-income units.
PS5.4	Encourage new housing on transportation arterials and in areas near public transportation hubs.	**Approaching**	While greater housing density and new units near transportation facilities–especially transit–can connect households to	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			employment, this policy may also result in greater densities of housing adjacent to toxic and harmful emissions near busier streets, resulting in environmental justice concerns.	
PS5.5	Encourage self-help housing efforts in which people earn home equity in exchange for renovation or construction work, such as "sweat equity" volunteer programs.	**Approaching**	This policy provides incentive and a way to build home equity but could include other ways for people who are not able bodied.	Encourage self-help housing efforts in which people earn home equity in exchange for renovation or construction work, such as “sweat equity” volunteer programs, and explore other methods of building home equity for those who are not able bodied.
PS5.6	Retain existing subsidized housing.	**Supportive**	This policy is supportive of housing goals and displacement prevention.	NA
GS6	Our community is safe and welcoming and social services are accessible to all who need them.	**Supportive**	This goal aims to provide social services to those who need them, but could be strengthened by prioritizing the most vulnerable populations in Olympia to ensure their needs are met.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PS6.1	Support non-profit and faith-based charitable organizations that provide funding and/or oversight for social service funding.	**Supportive**	This policy aims to provide social services by assisting other organizations.	NA
PS6.2	Work with other local governments to provide financial support and oversight of social service funding.	**Supportive**	This policy aims to provide social services by working with other local governments.	NA
PS6.3	Support programs and projects that assist low-income people and those at risk of homelessness with public funding.	**Supportive**	This policy aims to provide social services by contributing public funding, which could help mitigate or prevent potential displacement.	NA
PS6.4	Identify barriers to social service, shelter and housing resources for low-income people and those at risk of becoming homeless.	**Supportive**	This policy helps to mitigate or prevent displacement by reducing barriers to providing services.	NA
GS7	There is enough emergency housing, transitional housing, permanent housing with supportive services, and independent affordable housing.	**Supportive**	This goal is supportive of housing goals and addresses housing exclusion for individuals experiencing or at risk of homelessness.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PS7.1	Encourage a strong network of emergency shelter resources for homeless and at-risk families with children, childless adults, unaccompanied youth, and victims of sexual and domestic violence.	**Supportive**	This policy is supportive of housing goals and addresses housing exclusion for individuals experiencing or at risk of homelessness.	NA
PS7.2	Take a regional approach with other jurisdictions so that support for a broad range of social services and resources, including shelter and housing, can be maximized.	**Supportive**	This policy is supportive of housing goals and addresses housing exclusion for individuals experiencing or at risk of homelessness.	NA
PS7.3	Encourage businesses, charitable non-profit organizations, and faith-based community organizations to provide shelter and housing services.	**Approaching**	This policy is supportive of housing goals and addresses housing exclusion for individuals experiencing or at risk of homelessness, but could be strengthened by recognizing the city's role in providing shelter and housing services.	Encourage and support businesses, charitable non-profit organizations, and faith-based community organizations to provide shelter and housing services.
PS7.4	Support coordinated service delivery models to maximize the best use of public, charitable,	**Supportive**	This policy addresses housing exclusion for individuals experiencing or at risk of homelessness and	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	and privately-funded shelter and housing resources.		helps mitigate or prevent displacement by reducing barriers to providing services.	
PS7.5	Support best practices that reflect current standards of care, and incorporate emerging models that optimize the use of public and charitable resources.	**Supportive**	This policy addresses housing exclusion for individuals experiencing or at risk of homelessness and helps mitigate or prevent displacement by reducing barriers to providing services.	NA
PS7.6	Encourage shelter and housing providers and programs to locate in the greater Olympia area, or near transportation arterial hubs, so residents can easily access them.	**Supportive**	This policy addresses housing exclusion for individuals experiencing or at risk of homelessness and helps mitigate or prevent displacement by reducing barriers to accessing services.	NA
PS7.7	Work toward making the community more aware of homelessness in Olympia and how it can be prevented as a way to encourage charitable	**Approaching**	This policy may have good intent to get community members involved, but making the community more aware of homelessness could lead to the	Raise awareness of the city's homelessness and displacement prevention efforts and resources, especially with residents at risk of displacement.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	support and involve community members.		community not being supportive of supportive housing services or emergency housing.	
PS7.8	Use data to continually assess the community's need for shelter and housing and who it is serving. Use this data to continually improve these services.	**Supportive**	This policy is supportive of housing goals, to continually evaluate where gaps in housing are needed. It could be improved by saying "who it is serving and who is being left out" in order to evaluate any disproportionate impacts.	NA
PS7.9	Revise policies that limit or prevent the community from providing shelter and housing resources.	**Approaching**	This policy is supportive of housing goals and could be improved by addressing displacement.	Periodically review *(the City would need to specify how often)* and revise policies that limit or prevent the provision of shelter, housing resources, or that may increase displacement.
PS7.10	Coordinate land use, housing, transportation, and capital facility planning to support all aspects of shelter and housing resources, including emergency shelter,	**Supportive**	This policy is supportive of housing goals and addresses housing exclusion for individuals	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	transitional housing, permanent housing with supportive services, and low-income housing.		experiencing or at risk of homelessness.	
PS7.11	Integrate group homes into all residential areas of the community. Set zoning standards to ensure group home sizes (number of residents and staff) are compatible with allowed densities and that transportation and other services are available.	**Supportive**	This policy is supportive of housing goals and addresses housing exclusion for individuals living in group homes.	NA
PS7.12	Evaluate regulations so the City can be more flexible in locating shelters and increasing capacity.	**Supportive**	This policy is supportive of housing goals and addresses housing exclusion for individuals experiencing or at risk of homelessness.	NA
GS8	The existing low-income housing stock is preserved.	**Supportive**	This policy is supportive of housing goals and displacement prevention.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PS8.1	Continue to fund the repair and rehabilitation of single-family and multi-family housing using federal, state, and local funding sources.	**Supportive**	This policy is supportive of maintaining existing housing. It could be strengthened by considering potential displacement impacts and affordability.	NA
PS8.2	Support applications by the Housing Authority of Thurston County and other non-profit housing developers to construct or purchase existing units for low-rent public housing.	**Supportive**	This policy is supportive of maintaining existing affordable housing, while prioritizing opportunities for low income groups.	NA
PS8.3	Support applications from eligible non-profits to federal and state funding sources to build new, or rehabilitate existing housing to meet low-income housing needs.	**Supportive**	This policy is supportive of maintaining existing affordable housing, while prioritizing opportunities for low income groups. It could be strengthened by considering potential displacement impacts.	NA

It could be strengthened by considering potential	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	rehabilitate low-income, multifamily rental housing.		displacement impacts from rehabilitation.	
PS8.5	When Community Development Block Grant or Housing and Urban Development-funded buildings are at risk of being converted to market-rate status, inform the tenants of any purchase and relocation options available. When possible, help the Housing Authority of Thurston County and non-profit organizations buy such housing.	**Approaching**	This policy aims to mitigate the impacts of displacement, but could be improved by prioritizing avoiding displacement.	NA
PS8.6	Enforce policies* that provide financial and relocation help to people who are displaced from their homes as a result of construction and development projects using federal funds. **(Per section 104(d) of the Housing and Community Development Act of 1974 as amended, requiring the replacement of low- and moderate-income housing units that are demolished or converted to another use, in connection with a*	**Approaching**	This policy aims to mitigate the impacts of displacement, but could be improved by prioritizing avoiding displacement.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	Community Development Block Grant project.)			
GS9	New low-income housing is created to meet demand.	**Supportive**	This policy is supportive of housing and growth, while prioritizing opportunities for low income groups.	NA
PS9.1	Continue to support projects funded by low-income tax credits and revenue bonds.	**Supportive**	This policy is supportive of housing and growth, while prioritizing opportunities for affordable housing.	NA
PS9.2	Investigate and support appropriate multi-jurisdictional support for the Housing Authority of Thurston County bond sales.	**Approaching**	This policy helps support housing growth, but doesn't directly address affordability or displacement.	NA
PS9.3	Promote partnerships between public and private non-profit organizations to increase housing and home ownership opportunities for people with special needs, and for low- and moderate-income households.	**Supportive**	This policy encourages homeownership and is supportive of housing affordability and mitigating displacement, while prioritizing opportunities for low and middle incomes.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PS9.4	Continue to encourage development of single-room occupancy units downtown, along urban corridors, and in other areas where high-density housing is permitted. This could include encouraging alliances between public, private, and nonprofit organizations.	**Approaching**	This policy is supportive of housing goals and displacement but could be more equitably applied throughout the city.	NA, but consider expanding this to more areas of the city.
PS9.5	Evaluate the possibility of supporting a program that would allow low-income tenants of manufactured home parks to jointly purchase and renovate permanent sites for their manufactured homes. Consider funding programs to subsidize the interest rates, loan origination fees, and/or other costs of acquiring the land.	**Supportive**	This policy is supportive of housing affordability, and could be improved to address displacement.	NA
PS9.6	Help low-income and special needs residents find ways to purchase housing, such as shared or limited-equity housing, lease-purchase options, co-housing, land trusts, and cooperatives.	**Supportive**	This policy is supportive of housing growth and affordability for potentially vulnerable or at risk populations.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
PS9.7	Work with jurisdictional partners through the county-wide Home Consortium, to fund affordable housing projects that serve low- and very low-income residents.	**Supportive**	This policy is supportive of housing growth and affordability.	NA
PS9.8	Continue to administer the Housing Tax Credit program to develop both market-rate and low-income housing.	**Approaching**	This policy is supportive of housing goals but could better address affordability and provide housing for all income bands.	NA
PS9.9	Support non-profit and faith-based organizations in their efforts to provide emergency homeless shelters.	**Supportive**	This policy is supportive of housing goals and addresses housing exclusion for individuals experiencing or at risk of homelessness.	NA

City of Lacey

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Planning Areas - Central				
Goal 2	Maintain quality and function of existing residential areas in the Central Planning Area.	**Approaching**	This policy could be improved by specifying what "quality and function" means, as the terms are vague and could be tied to exclusionary housing practices, and by addressing how this policy would prevent exclusion, disproportionate impacts, or displacement.	Maintain existing affordable housing where feasible and ensure future residential development maintains the existing scale and form of residential areas in the Central Planning Area.
Policy A	Acknowledge historical character and value of the Lacey Historic Neighborhood as a unique housing resource. Continue to require special development standards for Lacey Historic Neighbor- hood that recognize and preserve historical values and neighborhood character while allowing reasonable infill and development.	**Approaching**	This policy allows for infill and housing development in the Historic Neighborhood, but could be improved by defining what "reasonable" infill and development means, as well as "neighborhood character", as the term is vague and could be tied to exclusionary housing practices.	Acknowledge the value of the Lacey Historic Neighborhood as a unique housing resource by continuing to require development standards that recognize, preserve, or honor historical values and design while accommodating infill development.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy B	Acknowledge character and value of older residential neighborhoods adjacent to the Central Business District as an affordable housing resource.	**Supportive**	This policy addresses housing supply and affordability, but should better define “character”.	Acknowledge the value of older residential neighborhoods adjacent to the Central Business District as a potential affordable housing resource.
Policy C	Develop and implement a subarea plan for the Golf Club Road neighborhood.	**NA**	This policy could be improved by discussing goals to improve housing affordability and avoid disproportionate impacts to vulnerable communities in this neighborhood.	NA
Goal 3	Provide opportunities for infill in the Central Planning Area.	**Supportive**	This policy is supportive of housing growth and affordability, but could be strengthened to consider potential racially disparate impacts.	Provide opportunities for infill development in the Central Planning Area.
Policy A	Maintain the liberal policy on accessory residential units while maintaining quality and character of neighborhood through performance standards and design review.	**Approaching**	While allowing ADUs supports housing growth and affordability, “character” should be better defined as the term is vague and could be tied to exclusionary housing practices.	Continue to maintain the city's ADU policies while maintaining the scale and form of existing neighborhoods.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy B	Provide opportunities for duplexes, triplexes and quadraplexes to locate in lower density neighborhoods as infill mechanisms which enhance neighborhood character by requiring exceptional and rigorous design requirements.	**Approaching**	While allowing duplexes, triplexes, and quadraplexes supports housing growth and affordability, “character” should be better defined as the term is vague and could be tied to exclusionary housing practices. “Exceptional and rigorous design requirements” can be leveraged to maintain high-cost housing types, unattainable to those from lower incomes or historically marginalized communities.	Increase opportunities for locating duplexes, triplexes, and quadraplexes in low-density neighborhoods and ensure development standards and any design requirements are not overly stringent or increase the cost of development.
Policy C	Provide opportunities for single-family cluster housing on smaller lot sizes than the under- lying zone with exceptional and rigorous design requirements to maintain quality and character of neighborhood areas.	**Approaching**	While allowing cluster housing on smaller lots may reduce land costs and support housing affordability, “character” should be better defined as the term is vague and could be tied to exclusionary housing practices. Requiring “rigorous design requirements” could ultimately hinder affordability.	Develop standards for single-family cluster housing on smaller lot sizes than the underlying zoning to reduce land costs and support housing affordability.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Planning Areas – Horizons Planning Area				
Goal 1	Continue to encourage the development of a range of residential types, providing opportunity for high density residential development along arterials with transitions to existing low density residential development.	**Approaching**	This policy is supportive of housing growth and affordability, but could be strengthened to expand high density housing throughout the city and to consider affordability as well.	Continue to encourage the development of a range of residential types, providing opportunity for high density residential development throughout the Horizons Planning Area, especially in areas near existing services.
Policy A	Undeveloped property along College, Yelm, Ruddell, and Rainier Road should be zoned for moderate or high density residential development.	**Approaching**	This policy is supportive of housing growth, but could be strengthened to consider potential racially disparate impacts.	Zone undeveloped property along College, Yelm, Ruddell, and Rainier Road for moderate or high density residential development.
Policy B	Support infill development in higher density areas primarily around existing neighborhood centers, recognized nodes, and urban corridor areas.	**Supportive**	Providing housing near jobs and neighborhood centers can be helpful in preventing displacement while reducing overall community impacts such as traffic. The policy could be expanded to consider affordability as well.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy C	Encourage a full range of higher density residential uses, including single-family zero lot line developments, townhouse units, mixed residential use, planned residential developments and multifamily apartments.	**Supportive**	This policy is supportive of housing growth.	NA
Policy D	Pay careful attention to blend different land use types to minimize potential land use conflicts while maintaining walkability as a priority.	**NA**	NA	NA
Planning Areas – Lakes Planning Area				
Goal 3	Maintain existing moderate and high density housing opportunities along major arterials with convenient access to transit where no impact to environmentally sensitive areas will occur.	**Supportive**	Providing housing near transit can be helpful in reducing overall community impacts such as traffic. The incentives could be expanded to consider affordability and anti-displacement as well.	Maintain existing affordable and moderate and high density housing units along major arterials with convenient access to transit where no impact to environmentally sensitive areas will occur.
Policy A	Maintain areas for medium density development opportunities along Ruddell Road.	**Approaching**	This policy is supportive of housing growth, but could be expanded to allow high density housing or address anti-displacement in this area.	Maintain areas for medium or high density development opportunities along Ruddell Road. *(Edited to add "high density" as medium and high density options are both included in the Horizons*

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
				Planning Area policies, along the same road).
Planning Areas – Pleasant Glade Planning Area				
Goal 2	Provide opportunities for moderate and high density housing along major arterials with convenient access to potential transit, designating "urban reserve areas", and annexing areas for public use where appropriate.	**Approaching**	Providing housing near transit can be helpful in reducing overall community impacts such as traffic. The incentives could be expanded to consider affordability and anti-displacement as well.	Provide opportunities for affordable and moderate and high density housing along major arterials with convenient access to potential transit, designating "urban reserve areas", and annexing areas for public use where appropriate.
Policy A	Maintain existing areas for moderate and high density development opportunities along arterials of Sleater Kinney and 15th Avenue, contingent on provisions for public sewer.	**Supportive**	This policy is supportive of housing growth, but could be expanded to address anti-displacement in this area.	Maintain existing affordable housing and areas for moderate and high density development opportunities along arterials of Sleater Kinney and 15th Avenue, contingent on provisions for public sewer.
Policy B	Study and analyze designating the northwest portion of the planning area as an "urban reserve area" or "urban holding area" until sewer service can be extended.	**Supportive**	This policy is supportive of housing growth that is supported by adequate public facilities and infrastructure.	NA
Policy C	Consider the annexation of the Greg J. Cuoio Community Park property for the future completion for public access.	**NA**	NA	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Planning Areas – Seasons Planning Area				
Goal 3	Over the long term, encourage development of a range of residential types, with emphasis on providing additional moderate and high density opportunities.	**Approaching**	This policy addresses the city's housing needs and growth, but does not address affordability.	Encourage the development of a range of housing types, with an emphasis on medium and high density development as well as units affordable to low-income households.
Policy A	Maintain areas along Marvin Road for moderate density development as sewer becomes available. Review areas along Mullen, Yelm Highway, and 58th for moderate density development as sewer becomes available. Moderate and High Density zones should be planned to provide transitions to existing low density residential development.	**Approaching**	This policy supports housing growth but could be strengthened by considering impacts on vulnerable populations and racially disparate impacts.	Maintain areas along Marvin Road and review areas along Mullen, Yelm Highway, and 58th for moderate density development as sewer becomes available.
Policy B	Encourage a full range of residential uses when adequate facilities and services are available to serve them.	**Approaching**	This policy supports housing growth but could be strengthened by considering impacts on vulnerable populations and racially disparate impacts.	Encourage a full range of residential uses and housing types for all incomes when adequate facilities and services are available to serve them.
Policy C	Pay careful attention to creating effective transitions between new developments of moderate	**Approaching**	This neighborhood area allows a variety of housing types	Ensure new development fits the scale and form of existing development through development regulations.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	density and existing low density development.		supportive of housing supply objectives.	
Housing Element, Comprehensive Plan				
Goal 1	Have a sufficient number of single-family dwelling units, multifamily units, and group and special need housing to provide a selection of rental and home ownership affordable housing opportunities for all persons.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability.	NA
Policy A	Provide opportunities for development of all housing types to accommodate future needs for each type of housing.	**Supportive / Approaching**	While supportive, this policy will need to be updated to meet HB 1220 guidance on specific household income brackets. However, providing housing across all income segments reduces displacement risk and enables housing opportunities to all, regardless of income.	Increase opportunities to develop a wide range of housing types to accommodate diverse housing needs and provide housing for all income brackets.
Policy B	Monitor the market and available land in the urban growth boundary to provide sufficient area zoned to meet the demand for various types of housing.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy C	Encourage a wide variety of housing from low to high income in range to allow placement and mobility within the housing market.	**Supportive**	This policy is supportive of providing housing for all needs. It could be improved by prioritizing the provision of housing for low-moderate incomes and considering potential displacement impacts. This policy will need to be updated to meet HB 1220 guidance on specific household income brackets.	Encourage a wide variety of housing available to all income brackets to allow placement and mobility within the housing market.
Policy D	Promote preservation and improvement of existing single-family and multifamily units.	**Approaching**	This policy supports housing growth by preserving existing housing stock. It could be improved by considering anti-displacement.	Promote the preservation and maintenance of existing housing units, prioritizing those that serve low income households or provide special housing needs.
Policy E	Support neighborhood revitalization through available grants from the State, Federal and local levels to maintain and improve infrastructure.	**Approaching**	This policy supports housing growth by pursuing grant funding, but could be strengthened by prioritizing affordable housing or improving infrastructure in vulnerable neighborhoods. “Neighborhood revitalization” could be	Pursue grants to provide funding for renovating and maintaining existing affordable housing units and ensure there are anti-displacement mechanisms in place, such as the provision of relocation assistance or a right to return policy.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			better defined, as it could lead to the displacement of historically marginalized populations.	
Policy F	Support policies and programs to address the unique housing needs of the military population, including active duty, reserves, dependents and contractors.	**Supportive**	This policy is supportive of providing housing for all needs. It could be improved by addressing potential displacement impacts.	NA
Goal 2	Achieve a balanced community with each planning area accommodating a fair share of housing needs for all persons.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability. It could be improved by addressing potential disproportionate impacts.	NA
Policy A	Consider requirements and incentives designed to result in a balanced, increased supply of affordable housing in all parts of the City for very low, low and moderate income households.	**Supportive**	While supportive, this policy should be updated to take special attention to HB 1220. The policy could be improved by paying special attention to the lowest incomes, 0-30% Area Median Income, when it comes to housing capacity.	Consider requirements and incentives that result in a balanced, increased supply of affordable housing throughout the City for very low, low, and moderate income households.
Policy B	Consider programs that include mandatory requirements for new developments targeting individual planning areas until	**Approaching**	This policy supports housing growth by pursuing grant funding, but could be	Consider programs that include mandatory requirements for new developments targeting individual planning areas until housing goals

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	housing goals for target groups are achieved.		strengthened by specifying anti-displacement goals and prioritizing vulnerable populations or those with special housing needs.	for affordability, anti-displacement, and special needs housing are met.
Goal 3	Work with regional agencies and bodies to implement affordable housing techniques consistently and on a regional scale.	**Supportive**	This policy is supportive of housing growth and affordability.	NA
Policy A	A myriad of affordable housing strategies should be implemented by all surrounding jurisdictions in Thurston County to meet housing needs on a regional scale for very low, low and moderate income households.	**Supportive**	This policy is supportive of housing growth and affordability.	Work with surrounding jurisdictions in Thurston County to implement a myriad of affordable housing strategies to meet regional housing goals to support very low, low, and moderate income households.
Policy B	Public and nonprofit agencies, such as the Housing Authority with expertise in housing practices and special needs, should be a major partner in inclusionary programs.	**Supportive**	This policy is supportive of housing growth and affordability.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy C	The Housing Authority, or other agencies, should take a lead role where its expertise and function lend itself to best accomplish program objectives. Lead responsibility might include such tasks as qualifying households by income bracket, monitoring target objectives, administration of an affordable housing trust, taking ownership of dedicated lots and units, contracting for the development of units, monitoring the sale and resale controls of designated public units, and other related tasks.	**Supportive**	This policy is supportive of housing growth and affordability.	NA
Goal 4	Achieve housing that is compatible and harmonious with existing neighborhood char-acter while allowing infill and providing for environmental sensitivity.	**Approaching**	Language that aims to preserve low-density, single-family neighborhood “character” can often be used as a proxy for prohibiting more diverse housing choices. Instead of “character,” this policy could consider height and building form while allowing more flexibility for similar, yet more affordable, housing	Ensure infill development that incorporates various housing types and sizes maintains the existing scale and form of neighborhoods and prioritizes the provision of affordable housing.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			types such as middle housing.	
Policy A	When designating areas for infill and zoning classifications, consider and place emphasis on the composition of the neighborhood, housing need, available infrastructure, principals of walk- ability and healthy communities.	**Approaching**	This policy is supportive of housing growth, but could be strengthened to address reducing displacement and affordability pressures.	NA
Policy B	When implementing infill projects in designated areas, require design of infill projects that: ● Meet the housing needs of the planning area considering variety and choice. ● Integrate successfully into the existing residential environment considering form based concepts and healthy community objectives. ● Provide a form, look and feel and social functionality that will add to the character, desirability and value of the surrounding neighborhood.	**Approaching**	This policy is supportive of housing growth, but could be strengthened to address reducing displacement and affordability pressures. Language that aims to preserve low-density, single-family neighborhood "character" can often be used as a proxy for prohibiting more diverse housing choices.	When implementing infill projects in designated areas, prioritize infill projects that meet diverse housing needs, provide affordable housing, and incorporate different housing types.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy C	Continue to utilize design review guidelines for all residential developments.	**Approaching**	The policy intends to ensure new development is integrated with the rest of the city, but additional design requirements could ultimately hinder the development of affordable housing.	Review design guidelines to ensure they are not overly stringent or disincentivize the provision of housing.
Goal 5	Provide a variety of housing opportunities for those with special needs.	**Supportive**	This policy supports housing growth and could be strengthened to address affordability.	NA
Policy A	Provide opportunities for development of various types of group housing.	**Supportive**	This policy supports housing growth and could be strengthened to address affordability.	NA
Policy B	Ensure a full range of housing and facilities for the accommodation of persons with special needs exist within each planning area, with consideration for promotion of housing in those planning areas providing the most services for such individuals.	**Supportive**	This policy supports housing growth and could be strengthened to address affordability.	NA
Policy C	Design group homes and facilities for special populations so that they are integrated, compatible, and harmonious with surrounding land uses.	**Approaching**	The policy intends to allow housing for a variety of needs. However, “compatible” is vague and can be	Ensure housing for populations with specific housing needs, such as group homes or transitional housing, are integrated with surrounding neighborhoods.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.	*(Recommended to delete Goal 6, Policy C for redundancy).*
Policy D	Enforce all requirements of the International Building Code that addresses the Americans with Disabilities Act and the Fair Housing amendments.	**Supportive**	This policy supports housing for all needs. It could be strengthened by addressing housing affordability.	NA
Goal 6	Work cooperatively with local jurisdictions, nonprofits and religious organizations to reduce homelessness and find ways for providing emergency and transitional shelter to serve the identified needs of this population.	**Supportive**	This policy addresses housing exclusion for individuals experiencing homelessness.	NA
Policy A	Based upon identified need, provision of facilities and services should be addressed by all local jurisdictions with fair share commitment reflected in local budgets.	**Approaching**	This policy supports services for all needs, but does not directly address ways to increase housing supply or affordability, or to mitigate racially disparate impacts.	NA
Policy B	Provide the opportunity to accommodate innovative strategies that will include	**Supportive**	This policy addresses housing exclusion for individuals	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	emergency and transitional housing for the homeless population.		experiencing homelessness.	
Policy C	Ensure location and use of emergency and transitional housing considers, and is successfully integrated into, the surrounding neighborhood without impact to other land use activities.	**Approaching**	This policy addresses the provision of housing for individuals experiencing homelessness, but could better specify what it means to be integrated into the surrounding neighborhood without impact to other land use activities. Requiring additional standards for transitional and emergency housing types may ultimately hinder their development and affordability.	Recommended to delete for potential redundancy with Goal 5 Policy C.
Policy D	Maintain and expand linkages with the business, religious and nonprofit communities as partners in ending homelessness.	**Approaching**	This policy addresses provisions for individuals experiencing homelessness, but could be more specific in outlining what the city's role may be.	Actively maintain and expand collaborative efforts with the business, religious, and nonprofit communities as partners in ending homelessness and seek their input on housing-related decisions.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy E	An emphasis in City policy will be to reflect the Continuum of Care approach, which emphasizes supporting self-sufficiency and transitional housing programs rather than stop gap measures which fail to break the cycle of homelessness.	**Supportive**	This policy addresses housing exclusion for individuals experiencing homelessness. It could be improved by addressing housing affordability for those who are transitioning out of homelessness.	NA
Policy F	The City supports an increased role in meeting the problems of homelessness from the private sector through funds, in-kind, and volunteer support and will evaluate its funding decisions partially on the basis of other funding sources. The City will use its resources to leverage support for homeless services from the state and federal government and other funding sources.	**Approaching**	This policy addresses housing exclusion for individuals experiencing homelessness. It could be improved by better, more inclusive language, and the city could consider playing a larger role to supplement the efforts of the private sector.	The City supports an increased role in preventing homelessness by seeking private sector support through funds, in-kind donations, and volunteer support and will evaluate its funding decisions partially on the basis of other funding sources. The City will use its resources to leverage support for homelessness services from the state and federal government and other funding sources.
Policy G	As much as practical, consider the needs of the intended uses and site facilities to provide convenient access to the services the population will require.	**Approaching**	This policy aims to provide services necessary for various housing needs. It could be improved by prioritizing historically disadvantaged communities or vulnerable populations.	Ensure facilities and services are accessible to the populations they are serving, prioritizing the needs of historically marginalized or overburdened communities.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy H	Continue to review and monitor participation and experience in programs that support the homeless population, assess effectiveness in meeting the needs of Lacey's homeless individuals, and provide opportunities for programs that can better serve this demographic.	**Supportive**	This policy addresses strategies to meet the needs of individuals experiencing homelessness.It could be expanded to include housing considerations in addition to the programs mentioned.	NA
Policy I	Particular priority will be provision of services to minors without family resources and families with children. The City will place its highest priority on assisting homeless children and families with children and victims of domestic violence and other special needs groups.	**Supportive**	This policy addresses a particularly vulnerable subset of individuals experiencing homelessness. It could be expanded to include housing considerations in addition to the services mentioned.	NA
Policy J	As long as there is a demonstrated need for temporary transitional housing and the tent city program continues to operate in a fashion that is compatible with adjacent land uses, Lacey should consider continued support of the opportunity for local churches to administer to the home- less by hosting a tent city.	**Approaching**	This policy aims to provide transitional or temporary housing for houseless individuals. It could be improved by removing vague language around "compatibility", which could hinder the provision of housing for houseless individuals.	Consider ways to develop transitional housing, support the tent city program, and assist local churches that host or assist individuals experiencing homelessness.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Goal 7	Identify and support a central contact to provide a help response for the homeless and citizens at risk of becoming homeless.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.	NA
Policy A	Support Lacey's community partners in improving the community's response to the needs of the homeless with identification of a referral point of contact for people to find services. This can include a service like the 211 referral line.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potential displacement, or to assist those who are experiencing homelessness.	NA
Policy B	Support homeless persons or those at risk of becoming homeless by identifying referrals that can put people in contact with the organizations that provide the services that they need.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy C	Make technical assistance documents available to citizens and jurisdictional staff on the 211 referral line and related social services so more people will be aware of community resources and where individuals can find help. Distribution of information to publicize the 211 services should include internet information, distribution at relevant community meetings, contact phone numbers, and informational flyers to community service and religious faith-based organizations.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potential displacement, or to assist those who are experiencing homelessness.	NA
Policy D	Continue to take a regional perspective in addressing homelessness in the Thurston County community through support and participation in the Thurston County Home Consortium that provides coordinated planning, activities and evaluations that address homelessness.	**Supportive**	This policy addresses providing housing and services for individuals experiencing homelessness through increased coordination with other regional jurisdictions.	NA
Policy E	As supported programs formulate future budgets or experience budget growth, promote a sharpened focus on addressing priority issues	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and	NA

	identified for Lacey's homeless demographic.		potentially displacement.	
Policy F	As Lacey reviews programs asking for support through the Housing Consortium, support should be prioritized based upon a program reflecting the goals and priorities identified in this Housing Element.	**Approaching**	This policy could be improved by including equity, racially disparate impacts, and anti-displacement as priorities of the housing element or this policy.	Prioritize programs asking for support through the Housing Consortium to support based on programs that work to undo racially disparate impacts, address displacement, and increase the affordability and availability of housing.
Goal 8	Strive for no net increase in the number of homeless people identified in future homeless census counts by focusing on proactive intervention.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.	NA
Policy A	Look for opportunities to strengthen outreach and engagement activities that will facilitate enrollment in treatment and service programs of individuals who are homeless or at risk of becoming homeless.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.	NA
Policy B	Promote programs designed to ensure that persons returning to the community from institutional or other sheltered settings (including foster care) do not become homeless.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			displacement.It could be improved by including efforts to increase housing affordability for these individuals.	
Policy C	Encourage the use of effective prevention interventions, ranging from family strengthening and high-risk youth programs to specific discharge planning.	**Supportive**	This policy addresses disparate impacts and potential displacement through preventative strategies.	NA
Goal 9	Achieve maximum utilization of public buildings for use in the public interest by scheduling secondary uses and activities at times facilities are not being utilized for primary functions.	**Approaching**	This policy could be improved by specifying what activities are in the public interest, especially in terms of supportive housing services or emergency shelter.	NA
Policy A	Review opportunities for shared use of public facilities where it will not conflict with primary use of the structure and associated activities.	**Approaching**	This policy could be improved by specifying what activities are in the public interest, especially in terms of supportive housing services or emergency shelter.	Review opportunities for the shared use of public facilities when they do not conflict with the primary use of the facility and its associated activities, such as utilizing the facilities to support housing assistance programs or act as emergency shelters during extreme weather.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy B	When designing new public buildings and planning expansions of existing buildings, consider design to serve dual roles in providing a full range of public services, including emergency shelter, meal services, and other services that might be needed.	**Supportive**	This policy supports housing services and emergency shelter.	NA

City of Tumwater

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Land Use Element, Comprehensive Plan				
LU-2.3	Encourage innovative land use management techniques such as density bonuses, cluster housing, zero-lot-line development, planned unit developments, and transfer of development rights to create vibrant centers, corridors, and neighborhoods while accommodating growth.	**Supportive**	This policy is supportive of housing growth and affordability. It could be expanded to consider anti-displacement.	NA
LU-4.3	Continue to allow manufactured housing on individual lots within the City, as well as within mobile and manufactured home parks, to encourage affordable housing.	**Supportive**	This policy is supportive of housing growth and affordability.	NA
LU-4.4	Permit implementing regulations to experiment in new forms of residential development where amenities of open space, privacy, and visual quality can be maintained or improved, and flexible solutions to land use problems such as density, diversity, equitability, and affordability can be achieved.	**Approaching**	This policy intends to create development regulations that encourage diverse, affordable, and equitable housing types with high quality amenities. It could be rewritten to improve clarity.	Develop implementing regulations that provide flexibility for innovative forms of residential development that improve open space amenities, provide privacy, and allow for diverse housing options that are affordable and equitable.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
LU-4.5	Encourage higher density residential uses in order to provide affordable housing. These uses should blend with the existing character of the community.	**Approaching**	The policy intends to allow housing for a variety of needs. However, “character” is vague and can be leveraged to maintain high-cost housing types that are unattainable to those with lower incomes or from historically marginalized communities.	Encourage higher density residential uses that increase affordable housing stock and fit the overall scale and form of existing development.
LU-4.6	Increase housing types and densities in corridors and centers to meet the needs of a changing population.	**Supportive**	Increasing housing types and densities is supportive of housing growth, especially in areas with jobs and services.	NA
LU-4.7	Increase the variety of housing types outside of corridors and centers of appropriate intensities with supporting design guidelines to meet the needs of a changing population.	**Approaching**	The policy intends to allow housing for a variety of needs. However, extensive design guidelines can be leveraged to maintain high-cost housing types that are unattainable to those with lower incomes or from historically marginalized communities.	Increase the variety of housing types allowed in areas outside of corridors and centers to support the needs of a changing population.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
GOAL LU-9	Identify what conditions should be applied to development in residential areas.	**Approaching**	The policy intends to ensure new development is integrated with the rest of the city, but additional requirements, especially in terms of design, could ultimately hinder the development of affordable housing.	Identify appropriate conditions and requirements for development in residential areas to ensure diverse housing types can be built without rigorous standards that may increase building costs.
LU-9.1	Protect residential developments from excessive noise, odors, dirt, glare, and other nuisances emanating from commercial and industrial uses.	**NA**	NA	NA
LU-9.2	Allow for multi-family residential development in the zoning code. Consideration should be given to encouraging this type of development near centers of community services.	**Approaching**	Allowing multi-family developments in the zoning code is supportive of housing growth,especially in areas with jobs and services. It could be improved by prioritizing housing for historically disadvantaged communities or vulnerable populations.	Allow multi-family residential development in the zoning code and encourage multifamily development near centers, community services, and public transportation.
LU-9.3	Integrate design features of existing natural systems into the layout and siting of new residential dwelling units. Preserve trees and significant ecological systems, whenever possible and practical.	**Approaching**	This policy would bring health benefits from additional greenery and shade, but could ultimately hinder the	Where feasible, encourage the integration of design features that highlight the natural environment and preserve existing trees, provided that they don't hinder the development of housing.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			development of affordable housing.	
LU-9.4	Permit experimentation in development regulations with newer forms of residential development where amenities of open space, privacy, and visual quality can be maintained or improved, and flexible solutions to land use problems can be achieved.	**Approaching**	Flexible standards for diverse housing types would support housing growth, but this policy should include emphasis on providing housing for low income or historically marginalized populations.	Develop implementing regulations that provide flexibility for innovative forms of residential development that improve open space amenities, provide privacy, and allow for diverse housing options that are affordable and equitable. (Note: may be redundant with LU-4.4)
LU-9.5	Do not permit private residential gated communities.	**Supportive**	This policy helps prevent exclusive residential communities.	NA
LU-9.6	Promote nearby access to healthy food for residential developments.	**Approaching**	This policy does not directly help the city increase housing supply, but helps increase food security for residential developments, but could be expanded to prioritize promoting access to healthy foods in historically marginalized and low-income communities.	Promote access to healthy food for residential developments, prioritizing historically marginalized or overburdened communities or low-income households.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Housing Element, Comprehensive Plan				
GOAL H-1	To conserve and improve the existing city housing stock and quality of life of neighborhoods.	**Supportive**	Preserving existing affordable housing stock can help reduce displacement pressures.	NA
H-1.1	Assist city neighborhoods in maintaining and rehabilitating the existing housing stock as decent, safe, sanitary, and affordable housing.	**Supportive**	Preserving and improving existing affordable housing stock can help reduce displacement pressures and increase housing supply.	NA
H-1.1.1	Create a formal maintenance and rehabilitation program beyond the current City code enforcement procedures to support Policy H-1.1 in coordination with the City's work with the Regional Housing Council.	**Supportive**	Preserving existing affordable housing stock can help reduce displacement pressures and increase housing supply. Special care should be taken to ensure vulnerable populations are displaced through rehabilitation of housing.	NA
H-1.2	Encourage a range of housing, economic development, and community revitalization in the city.	**Approaching**	"Revitalization" of neighborhoods could lead to displacement. This policy should be expanded to include anti-displacement language.	Encourage a range of housing, promote economic development, and ensure the existing housing stock remains in good condition to retain existing affordable housing units.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-1.3	Promote the quality of life of existing communities and implementation of community housing goals through the preparation of comprehensive plans and the development review process.	**Supportive**	Including affordable housing policies that prioritize anti-displacement, affordability, and equity in the comprehensive plan and development regulations supports housing growth.	NA
H-1.4	Provide assistance to improve community surroundings and infrastructure in residential areas.	**Approaching**	Improving infrastructure to better serve communities is supportive of housing growth, but “improve community surroundings” is vague and could lead to displacement or disproportionate impacts to historically marginalized communities. This policy should consider displacement impacts.	Maintain and improve infrastructure where needed to support existing residential areas and preserve existing affordable housing units.
H-1.5	Encourage and facilitate economic development as an important part of provision of housing by providing jobs.	**Approaching**	Providing jobs does not provide housing in itself, but increasing employment opportunities near housing	Encourage and facilitate economic development to increase employment opportunities near existing housing. OR Encourage the provision of affordable housing near

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
				employment opportunities and encourage economic development to increase employment opportunities near existing housing.
GOAL H-2	To provide a sufficient number of single family dwelling units, multi-family dwelling units, manufactured homes, and group housing to provide an affordable selection of housing to each economic segment of the Tumwater population.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	Provide a sufficient number of diverse housing types and affordable units for each income bracket to meet the City's housing targets and needs for households from all economic backgrounds.
H-2.1	Provide sufficient, suitably zoned land for development of all housing types to accommodate the future needs for each type of housing, including single-family detached dwellings, accessory dwelling units, townhouses, duplexes, triplexes, fourplexes, multi-family dwellings, cottage housing, senior housing, roominghouses, group housing, and manufactured homes in manufactured home parks and on single lots.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	Ensure sufficient and suitably zoned residential land to accommodate a range of housing types to meet all income levels, including those earning 0 to 40% of the Area Median Income (AMI), and update development regulations to allow these diverse housing types, such as single family detached dwellings, accessory dwelling units, townhouses, multi-family dwellings, cottage housing, senior housing, roominghouses, group housing, and manufactured home parks in manufactured home parks and on single lots, among others.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-2.2	Provide opportunities for a range of housing types to provide for all economic segments of Tumwater's population.	**Approaching**	Providing opportunities for diverse housing types and incomes is important.	Provide opportunities for a range of housing types to provide affordable housing for all economic segments of Tumwater's population.
H-2.2.1	Monitor the Land Use Element and Zoning Code to ensure an adequate supply of suitably zoned land.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	(Probably captured in edits to Policy H-2.1.)
GOAL H-3	To provide adequate, affordable housing for residents of all income groups, including sufficient housing affordable to low and moderate-income groups.	**Supportive**	Providing affordable housing advances housing growth. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	NA
H-3.1	Encourage the development of innovative plans, codes, standards, and procedures in order to take advantage of new private and public sector approaches to housing provision.	**Approaching**	This policy would help the city provide additional housing using innovative methods but could be improved by considering how these innovative plans could increase affordability of housing and prevent displacement.	Encourage the development of innovative plans, codes, standards, and procedures to take advantage of new private and public sector approaches to providing housing for all needs and affordable for all household incomes.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-3.1.1	The Zoning Code allows manufactured homes on single-family lots in all residential zones. It is the intent of the Housing Element to promote the designation of a sufficient supply of land for traditional mobile/manufactured home parks and to recognize that modular/manufactured housing on single family lots and in manufactured home parks is a viable form of housing construction.	**Supportive**	Preserving existing affordable housing stock like manufactured homes reduces displacement risk and maintains affordable housing supply.	NA
H-3.1.2	Increase code enforcement efforts and build public private partnerships to encourage renovations of unfit structures for use as transitional or affordable housing.	**Approaching**	Retrofitting existing affordable housing stock reduces displacement risk and maintains affordable housing supply. However, this is phrased as retrofitting unfit structures for use as transitional or affordable housing, rather than retrofitting *existing* transitional or affordable housing, which could create disproportionate impacts if only buildings in need of repair are designated for transitional or affordable housing.	Increase code enforcement to ensure the existing affordable housing stock is well maintained and retrofitted where needed to provide safe housing, and build public private partnerships to identify opportunities for adapting existing buildings for transitional or deeply affordable housing.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-3.2	Encourage provision of adequate building sites through appropriate land use planning and zoning codes, infrastructure supply, and overall regulatory climate.	**Supportive**	Allowing for additional housing with sufficient infrastructure through land use planning and code changes contributes to housing growth.	NA
H-3.3	Tumwater should assume its "fair share" of housing for low and moderate income groups, in cooperation with other jurisdictions in Thurston County.	**Supportive**	Providing affordable housing advances housing growth and affordability. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	NA
H-3.3.1	Monitor land supply, census data, and housing policies to ensure Tumwater accommodates its fair share of housing for low and moderate income groups.	**Supportive**	Providing sufficient land for housing advances housing growth. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	NA
H-3.3.2	Work with Tumwater School District, Housing Authority, and other agencies and organizations to pursue grant funding and implement transitional housing strategies for families with children.	**Supportive**	Pursuing opportunities to increase transitional housing for families supports housing for vulnerable communities and could help mitigate displacement. This policy	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			could be expanded to prioritize low income families or those from historically marginalized communities.	
H-3.3.3	Establish a multi-family tax exemption program that gives financial incentive for developers to create multi-family structures in target areas and to set aside a percentage of units as low-income housing.	**Supportive**	This policy is supportive of housing growth and affordability. It could be expanded to include anti-displacement measures in the “target areas”.	NA
H-3.4	Tumwater should work with the other jurisdictions in Thurston County as part of the Regional Housing Council to share decision making responsibilities related to homelessness and affordable housing in Thurston County to allow for collaboration in expanding affordable housing options and sharing the planning for, identification of, and resource allocation to activities and programs intended to support individuals experiencing homelessness in Thurston County.	**Supportive**	This policy is supportive of housing affordability and preventing displacement, by expanding collaboration with neighboring jurisdictions to provide affordable housing and resources to support individuals experiencing homelessness.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
GOAL H-4	To provide adequate opportunities for housing for all persons regardless of age, race, color, national origin, ancestry, sex, sexual orientation, familial status, marital status, ethnic background, source of income use of federal housing assistance, or other arbitrary factors.	**Supportive**	Providing opportunities for housing for all needs advances housing growth. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	NA
H-4.1	Support the inclusion of living opportunities for families with children throughout the city.	**Supportive**	Providing opportunities for housing for families with children advances housing growth. This goal should be updated to prevent displacement of these households.	NA
H-4.2	Support and encourage a variety of housing types and price ranges through appropriate policies and regulations.	**Supportive**	Providing opportunities for housing for all needs advances housing growth. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	NA
H-4.2.1	Continue the requirement for reasonable maximum lot sizes in order to create smaller lots that are more affordable and that allow a more efficient use of City services.	**Supportive**	Setting maximum lot sizes increases the land available for new residential development. This policy could be expanded to reference diverse housing types	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			affordable for all income levels.	
H-4.2.2	Encourage homeowner associations to adopt Covenants, Conditions, and Restrictions (CCRs) consistent with this policy.	**Approaching**	This policy could be strengthened to require homeowner associations to not prevent affordable or diverse housing types or require strict design requirements that may hinder affordability.	Encourage homeowner associations to adopt Covenants, Conditions, and Restrictions (CCRs) that do not hinder the provision of diverse housing types or affordable housing and do not include strict design requirements that may hinder housing affordability.
GOAL H-5	To supply sufficient, safe, suitable housing sites and housing supply to meet projected future housing needs for Tumwater over the next 20 years.	**Supportive**	This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220, and to prevent potential displacement of existing residents.	NA
H-5.1	Ensure appropriate land use designations and Zoning Code designations to provide sufficient land for housing construction.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	Ensure appropriate land use designations and zoning code designations to provide sufficient land for housing affordable for all household incomes.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-5.1.1	Monitor the Land Use Element and Zoning Code to ensure an adequate supply of suitably zoned vacant land. (2.1.1)	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	(Probably captured in edits to Policy H-2.1.)
H-5.1.2	Continue joint planning with Thurston County to plan for future growth in Tumwater.	**Supportive**	Taking a regional approach to affordable housing goals is important given cross-jurisdiction impacts of displacement pressures.	NA
H-5.2	Lands not suitable for development due to site constraints such as wetlands, steep slopes, geologically hazardous areas, etc., should be identified and considered when determining sufficient land for new housing in accordance with Tumwater's Conservation Plan.	**Supportive**	This policy would allow the city to have an accurate determination of land available for new housing.	NA
H-5.3	Encourage construction practices, which exceed minimum standards. Tumwater will support the use of alternative building designs and methods that exceed the minimum standards set by Tumwater.	**NA**	NA	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
GOAL H-6	To promote a selection of housing that is decent, safe, and sound, in close proximity to jobs and daily activities, and varies by location, type, design, and price.	**Supportive**	Increasing diverse housing types is supportive of housing growth, especially in areas with jobs and services.	NA
H-6.1	Protect residential areas from undesirable activities and uses through aggressive enforcement of adopted City codes.	**Challenging**	This policy is at a high risk of having a disproportionate impact on lower income and historically marginalized communities, resulting in greater displacement.	(Recommended to delete this policy)
H-6.2	Provide for a dynamic mix of residential land uses and zones in order to create a diverse mix of sites available for different housing types.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	Provide for a dynamic mix of residential land uses and zones in order to allow a diverse mix of sites available for different housing types affordable for all household income levels and to meet residents' diverse housing needs.
H-6.2.1	Continue to monitor the available land supply, census data, and City policies to ensure a diverse mix of land for residential housing stock.	**Supportive**	Providing land for a mix of housing advances housing growth. This goal should be updated to consider displacement and affordability concerns and housing by income bracket to meet the requirements of HB 1220.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-6.2.2	Continue to implement innovative design techniques, such as zero lot line developments, architectural design standards, alley houses, and attached single-family housing. Zero lot line developments are residential real estate in which the structure comes up to or very near to the edge of the property. Zero-lot-line houses are built very close to the property line in order to create more usable space.	**Supportive**	This policy is supportive of housing growth. Ensuring clear and predictable standards for housing and building codes supports housing production goals. Strict design requirements can be leveraged to maintain high-cost housing types, unattainable to those from lower incomes or historically marginalized communities.	NA
H-6.3	Support increasing housing opportunities along urban corridors and centers.	**Supportive**	Increasing housing supply is supportive of housing growth, especially in areas with jobs and services.	NA
H-6.4	Encourage provision of affordable housing near public transit routes to promote efficient transportation networks.	**Approaching**	Ensuring that neighborhoods encourage active transportation is important for inclusive communities. However, this goal could be edited to pay special attention to underserved neighborhoods.	Encourage the provision of affordable housing near public transit routes, prioritizing neighborhoods that are underserved by affordable housing.
H-6.4.1	Continue to involve Intercity Transit in Tumwater's development review process.	**NA**	NA	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-6.5	Tumwater will maintain current Building Code standards and will use the most up to date future Code editions.	**Supportive**	Ensuring clear and predictable standards for housing and building codes supports housing production goals.	NA
H-6.6	Increase the variety of housing types outside of corridors and centers of appropriate intensities with supporting design guidelines to meet the needs of a changing population.	**Supportive**	Ensuring clear and predictable standards for housing and building codes supports housing production goals.	NA
GOAL H-7	To ensure that housing is compatible in quality, design, and density with surrounding land uses, traffic patterns, public facilities, and environmentally sensitive areas.	**Approaching**	“Compatible” as it relates to design is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.	Ensure new housing development maintains the existing scale and form of surrounding land uses, traffic patterns, public facilities, and prevents impacts to environmentally sensitive areas.
H-7.1	Support the stability of established residential neighborhoods through appropriate plans and codes.	**Approaching**	This policy may help prevent residential displacement, but may also provide a barrier to increasing housing diversity and affordability in existing neighborhoods.	Support the stability of existing affordable housing through appropriate plans and codes.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-7.1.1	Continue to implement design standards for multi-family and attached single-family dwellings in order to ensure compatibility with existing neighborhoods.	**Approaching**	The policy intends to allow a variety of housing types. However, “compatible” is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.	Continue to implement design standards for multi-family and attached single-family dwellings, ensuring they are not overly stringent or increasing the cost of housing development.
H-7.2	Assure housing will be well maintained and safe.	**Supportive**	Ensuring housing is well-maintained and safe is supportive of housing goals, but should prioritize low income or other historically marginalized communities.	NA
H-7.3	Enhance the appearance of and maintain public spaces in residential areas.	**NA**	NA	NA
H-7.4	Promote community involvement to achieve neighborhood improvement.	**Approaching**	This policy could be strengthened to ensure the concerns of historically marginalized communities are prioritized.	Promote community involvement and opportunities to increase a sense of community by prioritizing historically marginalized neighborhoods and actively seeking their input on city decisions.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
GOAL H-8	To support healthy residential neighborhoods which continue to reflect a high degree of pride in ownership or residency.	**Approaching**	This policy could be strengthened by addressing affordability and to prevent displacement of existing residents.	NA
H-8.1	Support the stability of established residential neighborhoods.	**Approaching**	This policy may help prevent residential displacement, but may also provide a barrier to increasing housing diversity and affordability in existing neighborhoods.	(Redundant with H-7.1.)
H-8.2	Assure housing will be well maintained and safe.	**Supportive**	Ensuring housing is well-maintained and safe is supportive of housing goals, but should prioritize low income or other historically marginalized communities.	NA
H-8.2.1	Protect residential areas from undesirable activities and uses through aggressive enforcement of adopted City codes.	**Challenging**	This policy is at a high risk of having a disproportionate impact on lower income and historically marginalized communities, resulting in greater displacement.	(Recommended to delete this policy, redundant with H-6.1 as well.)
H-8.3	Enhance the appearance of and maintain public spaces in residential areas.	**NA**	NA	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-8.4	Promote community involvement to achieve neighborhood improvement.	**Approaching**	This policy could be strengthened to ensure the concerns of historically marginalized communities are prioritized.	(Redundant with H-7.4.)
H-8.4.1	Encourage neighborhood meetings to discuss community issues as situations and concerns arise.	**Approaching**	This policy could be strengthened to ensure the concerns of historically marginalized communities are prioritized.	(May be redundant with proposed edits for H-7.4.)
H-8.5	Encourage home ownership for Tumwater residents.	**Approaching**	Encouraging homeownership helps mitigate displacement, but should prioritize opportunities for low and middle incomes.	Encourage home ownership for Tumwater residents of all household incomes and provide assistance for low-income households, where feasible.
GOAL H-9	To encourage a variety of housing opportunities for those with special needs, particularly those with problems relating to age or disability.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability. It could be improved by preventing the potential displacement of those with special housing needs.	NA
H-9.1	Require housing to meet the needs of those with special housing requirements without creating a concentration of such housing in any one area.	**Supportive**	This policy is supportive of providing housing for all needs throughout the city. It could be improved by preventing the	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			potential displacement of those with special housing needs.	
H-9.2	Assist social service organizations in their efforts to seek funds for construction and operation of emergency, transitional, and permanent housing.	**Supportive**	This policy addresses support for housing for individuals experiencing homelessness, and could help mitigate displacement.	NA
H-9.3	Support and plan for assisted housing opportunities using federal, state, or local aid.	**Supportive**	This policy addresses pursuing funding to support assisted housing opportunities which could mitigate displacement and increase the amount of affordable housing in the city.	NA
H-9.4	Encourage and support social and health service organizations, which offer support programs for those with special needs, particularly those programs that help people remain in the community.	**Supportive**	This policy addresses services to support populations with special needs to help mitigate displacement.	NA
H-9.5	Encourage alternative housing strategies for homeless youth, which may include Host Homes.	**Supportive**	This policy addresses the provision of housing for homeless youth.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
GOAL H-10	To provide housing that is compatible and harmonious with existing neighborhood character through use of innovative designs that enhance the appearance and quality of Tumwater's neighborhoods.	**Approaching**	The policy intends to allow a variety of housing types. However, "neighborhood character" is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.	Provide innovative housing that reflects the existing scale and form of Tumwater's neighborhoods and provides housing affordable for all household incomes.
H-10.1	Encourage innovation and variety in housing design and development. Tumwater will support efforts to build housing with unique individual character, which avoids monotonous neighborhood appearance.	**Approaching**	Encouraging diverse and innovative design could ultimately hinder housing affordability or supply by requiring additional, subjective design standards.	Encourage diverse and innovative housing design that incorporates diverse housing types that are affordable for all household income brackets.
H-10.2	Multi-family residential housing should be subject to design criteria that relate to density, structure bulk, size and design, landscaping, and neighborhood compatibility.	**Approaching**	Design standards intend to integrate new housing developments with existing ones, but can be leveraged to maintain high-cost housing types, which are unattainable to those from lower incomes or historically marginalized communities.	Ensure design standards for multi-family housing maintain the existing scale and form of development and landscaping in Tumwater without increasing the cost to develop housing.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-10.2.1	Continue to implement multi-family housing design standards.	**Approaching**	Design standards intend to integrate new housing developments with existing ones, but can be leveraged to maintain high-cost housing types, which are unattainable to those from lower incomes or historically marginalized communities.	(Redundant with H-10.2 above.)
GOAL H-11	To provide housing to accommodate Tumwater's housing needs in the urban growth area and make the most efficient use of infrastructure and services.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure.	NA
H-11.1	Reference the Transportation Element and anticipated transportation impacts when making housing decisions affecting the location and density of housing.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure. It should also prioritize affordability.	NA
H-11.2	Reference utility plans and the impact of housing decisions on capital improvements planning.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure. It should also prioritize equity in the provision of services.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-11.3	Encourage the construction of affordable housing, including cottage housing and accessory dwelling units, within a half mile or twenty minute walk of an urban center, corridor or neighborhood center with access to goods and services to provide access to daily household needs.	**Supportive**	Providing housing near transit supports housing supply goals and reduces impacts to transportation and provides access to jobs.	NA
GOAL H-12	To encourage urban growth within the city limits with gradual phasing outward from the urban core.	**Approaching**	This policy could be improved by addressing affordability and encouraging increased density throughout the city.	NA
H-12.1	Encourage the construction of housing on vacant property within the city and the redevelopment of underdeveloped property within residential areas to minimize urban sprawl and associated public service costs.	**Approaching**	This policy supports housing growth, but could better address affordability and anti displacement, especially related to the redevelopment of underdeveloped property to ensure people are not displaced.	Encourage the construction of affordable, transitional, or supportive housing on vacant properties within the city to minimize urban sprawl and associated public service costs.
H-12.1.1	Continue to review and revise, as necessary, City Development Standards deemed unnecessary and make development more expensive and/or difficult.	**Supportive**	This policy supports housing growth and affordability.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
H-12.1.2	Continue to support high-density zoning within specific areas of the city that have the infrastructure and services to support high-density housing.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure.	NA
H-12.1.3	Continue to implement minimum density levels for all residential zoning districts to ensure efficient use of the urban growth area.	**Supportive**	This policy supports housing growth. It could be improved by addressing affordability.	NA
H-12.1.4	Work cooperatively with Thurston County to provide for more efficient and orderly annexations to facilitate urban service delivery.	**NA**	Consider moving to Land Use Element	NA
GOAL H-13:	Ensure consistency with RCW 36.70A.070(2)(c) which requires sufficient land be available for all types of housing including manufactured housing.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.	Ensure consistency with RCW 36.70A.070(2)(c) which requires sufficient land be available for all types of housing including manufactured housing, in order to provide housing affordable for all income brackets.
H-13.1	Maintain the manufactured home park district zoning in appropriate areas in order to prevent conversion of affordable housing to other uses without replacement.	**Supportive**	Preserving existing affordable housing stock reduces displacement risk.	NA
H-13.1.1	Encourage manufactured housing park district zoning to locate near transit services.	**Supportive**	Providing access to services such as transit reduces community vulnerabilities and dependence on car travel,	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			especially for vulnerable community members such as elderly and youth.	
H-13.2	When locating zones and designations for manufactured home parks, carefully consider the risks from natural hazards, such as flooding and liquefaction, and the impacts of those hazards on the future residents of those manufactured home parks, Tumwater's emergency responders, and the city as a whole.	**Supportive**	Renters and lower income communities often have higher risk and vulnerabilities to natural hazards and events. Ensuring that zoning does not push manufactured home parks into high-risk areas reduces displacement and threats to community member safety.	NA

City of Yelm

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Land Use Element, Comprehensive Plan				
Policy 3.3	Adopt two categories of residential single family land use to meet community needs: • Single Family - 4 units per acre; and	**NA - Dependent on Land Capacity Analysis**	See Land Capacity Analysis Report	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
	• Single Family - 6 units per acre.			
Policy 3.4	Adopt two categories of residential multifamily land use to meet community needs: • Multifamily - Medium Density — 6 units per acre; and • Multifamily - High Density — 16 units per acre.	**NA - Dependent on Land Capacity Analysis**	See Land Capacity Report	NA
Policy 3.5	Adopt a mixed use development category which allows both residential and commercial uses suitable for planned developments on larger parcels and which provides for a variety of land uses, more efficient use of open space, and more cost effective public infrastructure.	**Approaching**	This policy supports housing near commercial services. It could better address affordability.	NA
Policy 4.4	Adopt development regulations that accommodate “live-work” structures (where citizens can live and work within the same structure).	**Supportive**	Allowing live-work structures creates both housing and economic opportunities for community members who wish to start a business, but cannot afford a home and a commercial space.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy 4.6	Adopt development regulations that allow permits to be processed in a timely and efficient manner.	**Supportive**	Streamlining permit processes reduces barriers to housing production to meet housing supply deficits and reduce building costs.	NA
Goal 5	Encourage diverse residential growth.	**Supportive**	Allowing diverse housing types and growth allows housing supply to meet the shifting housing needs of households.	NA
Policy 5.2	Adopt development standards that allow duplexes, townhouses, and accessory dwelling units within residential areas. These are intended to increase the variety of housing in the community and aid in achieving an overall urban density.	**Supportive**	Allowing housing diversity supports overall goals of providing different housing types to address different household needs.	NA
Policy 5.3	Adopt development regulations that encourage mixed use subdivisions.	**Supportive**	Allowing housing diversity supports overall goals of providing different housing types to address different household needs.	NA
Goal 10	Create vibrant centers, corridors, and neighborhoods while accommodating growth.	**NA**	NA	NA
Policy 10.1	Promote a greater mix of uses and densities to support efficient provision of services.	**Supportive**	Allowing housing and land use diversity supports overall goals of providing different housing types to	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			address different household needs.	
Goal 11	Create safe and vibrant neighborhoods with places that build community and encourage active transportation.	**Approaching**	Ensuring that neighborhoods are safe and encourage active transportation is important for inclusive communities. However, this goal could be edited to take special attention to underserved neighborhoods.	Create safe and vibrant neighborhoods that build community, support historically marginalized or overburdened communities, and encourage active transportation.
Policy 11.1	Plan at the neighborhood level to increase housing density and diversity while preserving neighborhood character and quality of life.	**Approaching**	While local-level planning can result in inclusive and grassroots actions, the element of “preserving neighborhood character” can sometimes be used as an argument for continuing exclusionary housing types and disputing zoning changes that seek to allow more housing diversity.	Plan at the neighborhood level to increase housing diversity and the quality of life for residents.
Policy 11.2	Plan for land use patterns that provide most neighborhood residents an array of basic services within a half mile or 20 minute walk from home.	**Supportive**	Providing retail and services within a half-mile walkshed encourages community resilience and reduces dependency on vehicular transportation, which can be a large cost factor for households.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy 11.3	Encourage appropriately scaled home-based business and live/work opportunities in neighborhoods.	**Supportive**	Allowing live-work structures creates both housing and economic opportunities for community members who wish to start a business, but cannot afford a home and a commercial space.	NA
Goal 12	Maximize opportunity to redevelop land in priority areas by investing in infrastructure and environmental remediation.	**Supportive**	Reducing the overall land and infrastructure investment while also expanding residential buildable lands supports housing supply goals.	NA
Policy 12.1	Mitigate the additional cost of development in centers and corridors by making public infrastructure investment that adds value, safety and public enjoyment for the entire community and that result in appropriate public return on investment when adjacent properties are developed. Allow for latecomers and other methods of repayment for government outlay for infrastructure.	**Approaching**	While this policy does facilitate housing growth, it could be enhanced by including affordability considerations.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Housing Element, Comprehensive Plan				
Goal 1	Encourage a variety of housing types, densities and a range of affordable housing within Yelm and its Urban Growth Area.	**Supportive**	Allowing different types of housing and affordability levels fosters a cohesive and inclusive community when it comes to housing.	NA
Policy 1.1	Allow a variety of housing types within the residential and mixed use designations to promote a range of housing alternatives within the community. This may include but not be limited to: government assisted housing, housing for low-income families, manufactured housing, multi-family housing, and group or foster homes.	**Supportive**	Ensuring access to affordable housing types–including manufactured home types and group homes–is essential to reducing displacement risks among vulnerable community members.	NA
Policy 1.2	Allow accessory dwelling units in all residential land use categories subject to development standards and design criteria.	**Supportive**	Accessory Dwelling Units provide opportunities for aging in place and adapting existing housing stock and residential land uses to meet the changing housing needs of households.	NA
Policy 1.3	Encourage opportunities for a range of housing costs to enable housing for all segments of the population.	**Supportive / Approaching**	While supportive, this policy will need to be updated to meet HB 1220 guidance on specific household income	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			brackets. However, providing housing across all income segments reduces displacement risk and enables housing opportunities to all, regardless of income.	
Policy 1.4	Encourage the provision of adequate affordable building sites through appropriate zoning, infrastructure, and other development regulations.	**Supportive**	Regularly reviewing and ensuring zoning, development regulations, and infrastructure support housing at different affordability levels supports anti-displacement efforts.	NA
Policy 1.5	Review development regulations to ensure that a range of housing types is available throughout Yelm.	**Supportive**	Allowing and reducing barriers to housing types through development regulations is essential to enabling affordable housing options.	NA
Policy 1.6	Review development regulations to ensure residents can safely walk throughout Yelm.	**Supportive**	Not all community members have consistent access to vehicles, including vulnerable populations such as youth and elderly. Providing walkable residential neighborhoods promotes inclusion and positive health outcomes.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy 1.7	Monitor the need for special needs housing and increase opportunities for such housing.	**Supportive**	Providing housing for special needs reduces displacement and homelessness risk among community members with special needs.	NA
Policy 1.8	Consider density increase incentives to promote a variety of housing types, mixed uses, range of housing costs, affordability, and increased special needs housing.	**Supportive**	Providing a wide range of housing types and densities–at different affordability levels–provides options	NA
Goal 2	Meet the county wide planning policy to ensure a fair share of affordable housing.	**Supportive**	Taking a regional approach to affordable housing goals is important given cross-jurisdiction impacts of displacement pressures.	NA
Policy 2.1	Encourage a variety of housing types in the residential designations to assure choice, opportunity, and availability of a fair share of affordable housing throughout Yelm, its UGA, and adjacent areas of Thurston County.	**Supportive**	Providing housing diversity and sufficient housing options reduces displacement risk and encourages affordability.	NA
Policy 2.2	Participate with other jurisdictions and Thurston County in a regional process to monitor Fair Share Affordable Housing targets within the County.	**Supportive**	Taking a regional approach to affordable housing goals is important given cross-jurisdiction impacts of displacement pressures.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Goal 3	Conserve and improve the existing housing stock and neighborhoods.	**Supportive**	Preserving existing affordable housing stock can help reduce displacement pressures.	NA
Policy 3.1	Maintain up-to-date development regulations for building, housing, mechanical, and other design standards.	**Supportive**	Ensuring clear and predictable standards to housing and building codes supports housing production goals.	NA
Policy 3.2	Require owners of unsafe dwelling units to correct significant problems and encourage the maintenance of existing structures consistent with the standards of the neighborhood.	**Approaching**	Ensuring housing is safe and habitable is important. Rehabilitation, however, can also result in physical displacement pressures as existing households may be forced to move or incur high costs of repair. Such support should involve connecting households with alternatives or incentive programs to reduce these risks.	Require owners of unsafe dwelling units to correct significant problems and encourage the maintenance of existing structures consistent with the city's code, and consider funding assistance for low-income owners or incentive programs to reduce displacement risks.
Policy 3.3	Support rehabilitation efforts for substandard housing.	**Approaching**	Ensuring housing is safe and habitable is important. Rehabilitation, however, can also result in physical displacement pressures as existing households may be forced to move or incur high costs of repair. Such support should	Support rehabilitation efforts for substandard housing and develop assistance programs to reduce displacement risks.

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			involve connecting households with alternatives or incentive programs to reduce these risks.	
Policy 3.4	Encourage and facilitate local economic development as an important element of improving housing conditions by providing economic opportunity.	**Approaching**	While economic development is an important step for ensuring housing growth and conditions–particularly when it comes to local financing–such growth should not result in the rapid displacement of community members through rising costs.	Encourage and facilitate economic development to provide increased economic opportunity for existing residents, so more people can work near their home.
Policy 3.5	Encourage local community groups, churches, and businesses to provide voluntary assistance with maintain existing structures for the elderly, low income, and those with special needs.	**Approaching**	While encouraging local groups is beneficial, this policy would be strengthened through active support and connecting these groups with funding to do so.	Encourage and provide funding for local community groups, churches, and businesses to provide voluntary assistance with maintaining existing housing for the elderly, low income households, and those with special housing needs.
Goal 4	Promote energy efficient housing to reduce the overall costs of home ownership.	**Supportive**	Reducing barriers to home ownership, especially when aimed at historically marginalized or vulnerable community members, could reduce displacement pressures.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy 4.1	Support programs that make existing structures more energy efficient.	**NA**	NA	NA
Policy 4.2	Periodically review the energy efficiency development regulations to ensure that they are up-to-date.	**NA**	NA	NA
Policy 4.3	Promote residential subdivision designs that maximize solar heating opportunities.	**NA**	NA	NA
Goal 5	Provide sufficient housing for low- and moderate-income households within each jurisdiction.	**Supportive**	While supportive, this policy should be updated to take special attention to HB 1220. The policy could be improved by paying special attention to the lowest incomes, 0-30% Area Median Income, when it comes to housing capacity.	NA
Policy 5.1	Provide sufficient housing for low- and moderate-income households.	**Supportive**	While supportive, this policy should be updated to take special attention to HB 1220. The policy could be improved by paying special attention to the lowest incomes, 0-30% Area Median Income, when it comes to housing capacity.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy 5.2	Provide tenants and landlords information about housing rights and responsibilities.	**Supportive**	Ensuring awareness on housing rights can empower tenants and ensure safe housing.	NA
Policy 5.3	Incentivize developers to set aside a percentage of multifamily housing units for low- and moderate-income buyers and renters.	**Supportive**	Providing incentives for less than market rate housing provides opportunities for community members to remain in the community as prices increase, and provides opportunities for new community members to live in the City.	NA
Policy 5.4	Support efforts to provide funding for shared-equity policies — via community land trust or down-payment assistance models — to make buying housing of all types affordable.	**Supportive**	Providing programs to control the variable costs of land could create long lasting affordable housing opportunities for community members, particularly those from vulnerable groups or lower incomes.	NA
Goal 6	Provide sufficient service-enriched housing for homeless and high-risk populations.	**Supportive**	Allowing shelters and other types of emergency housing reduces displacement pressures, and provides services to respond to and prevent households from experiencing homelessness.	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
Policy 6.1	Allow shelters, group homes, transitional housing, and permanent housing with social services in development regulations in locations where these facilities have access to transit, parks, and other amenities.	**Supportive**	Allowing shelters and other types of emergency housing reduces displacement pressures, and provides services to respond to and prevent households from experiencing homelessness.	NA
Goal 7	Encourage housing density and diversity in neighborhoods to add vibrancy and increase equitable access to opportunity.	**Supportive**	Allowing housing density and diversity across neighborhoods gives the community means and options to avoid displacement pressures.	NA
Policy 7.1	Review and amend residential development regulations to provide opportunity for the mix and density of housing needed to meet the needs of changing demographics, use land wisely, and support nearby transit and businesses.	**Approaching**	Providing housing near transit supports housing supply goals and reduces impacts to transportation and provides access to jobs. However, this policy could be further expanded to call out affordability goals as well.	Review and amend residential development regulations to provide opportunities for the mix and density of housing needed to meet the needs of changing demographics, provide affordable housing, use land wisely, and support nearby transit and businesses.
Policy 7.2	Allow densification by providing for accessory dwelling units, small houses on small lots, attached housing types or appropriately scaled multifamily buildings, cottage housing, and village cohousing developments in development regulations.	**Supportive**	Allowing more diverse housing types that support affordability goals, such as smaller houses on smaller lots, also mitigates displacement pressures from increasing land costs	NA

Goal, Policy, or Regulation	Policy Text	Evaluation	Reason / Recommendation	Proposed Edits
			and greater demand than supply.	
Goal 8	Encourage the construction, weatherization and operation of homes to boost energy efficiency.	**Supportive**	Preserving existing housing stock through energy upgrades reduces costs by extending the useful life of the unit.	NA
Policy 8.1	Prioritize home weatherization funds to preserve affordable housing.	**Supportive**	Preserving existing affordable housing stock, without increasing renter costs, reduces displacement pressures from aging buildings and increasing maintenance needs.	NA
Policy 8.2	Support regional efforts to engage landlords and property managers in energy efficiency efforts.	**Supportive**	Supporting easier upgrades can maintain naturally affordable housing units from going into disrepair and being redeveloped into newer, less affordable housing options.	NA
Policy 8.3	Support the efforts of local financial institutions to facilitate affordable financing of energy upgrades.	**Supportive**	Supporting easier upgrades can maintain naturally affordable housing units from going into disrepair and being	NA

NA

Data & Indicators Summary

Housing Displacement Risk Analysis for the cities of Lacey, Olympia, Tumwater, and Yelm

How do we measure the effectiveness of our strategies against displacement, gentrification, and racially disparate impacts? Through its Racially Disparate Impacts (RDI) tool, the WA Department of Commerce suggests the following 5 measures as “bullseye” or supportive metrics.[1] The RDI tool relies on estimates published by the U.S. Census Bureau and the Department of Housing and Urban Development (HUD) and is presented in four-year ranges. This analysis compares RDI data points from two timeframes, 2015-2019 and 2017-2021. Additionally, demographic data was pulled from the American Community Survey.

Generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse
- Households are spending more than 30% of income on housing
- Rental units become unaffordable for extremely low-income residents
- Poverty rates increase in a community
- Homeownership rates decline

Racial Diversity

All cities are increasing in population, but Lacey, Tumwater, and Yelm have seen decreases in certain demographics of non-white residents.

Racial diversity estimates are based on data collected by the U.S. Census Bureau, which classifies people into distinct race and ethnicity categories. Race is a social identity, with a history rooted in oppression and exploitation of people not classified as "white".[2] Ethnicity refers to groups of people who share common ancestry, language, or dialect. There is a wide range of ethnic identities, which may or may not be tied to nationality. The Census asks respondents to identify as either Hispanic or Latino or Not Hispanic or Latino. The

[1] The RDI toolkit is designed for use by the Department of Commerce (Commerce) in its support of local jurisdiction efforts to meet the requirements of the Growth Management Act (GMA). The toolkit compiles statistics relevant to a jurisdiction's analysis of racially disparate impacts in its community.
[2] The Census offers six racial identities for people to choose from. Respondents self-identify. Since the 2000 census, respondents can self-identify as one or more options. The options provided are: White, Black or African American, American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Other.

Office of Management and Budget defines "Hispanic or Latino" as a person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race.

The table below shows the change in racial and ethnic diversity across the four cities between 2010 and 2023, using the US Census American Community Survey 5-Year Estimate data.

Change in # of Residents by Race & Ethnicity	Lacey	Olympia	Tumwater	Yelm
American Indian and Alaska Native	-54	2	-154	89
Asian	1,437	924	608	-132
Black or African American	1,345	345	755	279
Hispanic or Latino (of any race)	4,126	3,099	1,484	908
Native Hawaiian and Other Pacific Islanders	658	421	106	468
Other Race	-44	132	470	0
Two or more races	2,908	2,617	1,786	604
White	6,278	2,335	4,630	2,216
Net Pop Change	16,654	9,875	9,685	4,432

Cost Burden

All cities are increasing in the number of non-cost burdened homeowners. Comparatively, the growth of non-cost burdened renter households is significantly fewer. In some cases, the number of non-cost burdened renter households is decreasing.

A household experiencing a housing cost burden is paying more for housing than it can afford based on income. This means one or multiple of a house's critical needs (i.e., food, physical health, mental health, education, and/or general well-being) are not being met. A household is considered cost-burdened if its monthly housing costs are greater than 30% of its monthly income. Estimates of households experiencing cost burden include:

- Not cost-burdened includes households paying less than 30% of their household income on housing costs.
- Cost-burdened (30-50%) includes households paying between 30% and 50% of their household income on housing.

- Severely cost-burdened (>50%) includes households paying more than 50% of their income on housing costs.

The tables below show the change in the cost burdened populations across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets representing a difference in the data between the years of 2015-2019 and 2017-2019.

Change in # Households by Cost-Burdened Status: Renters	**Lacey**	**Olympia**	**Tumwater**	**Yelm**
Not Cost Burdened	110	-655	100	-35
Cost-Burdened (30-50%)	65	-305	-65	-30
Severely Cost-Burdened (>50%)	200	15	-105	45
Not Calculated	-30	-75	11	5

Change in # Households by Cost-Burdened Status: Homeowners	**Lacey**	**Olympia**	**Tumwater**	**Yelm**
Not Cost Burdened	765	840	355	435
Cost-Burdened (30-50%)	370	145	-175	-59
Severely Cost-Burdened (>50%)	185	190	45	50
Not Calculated	45	5	-10	0

Rental Affordability

All cities have less rental housing for very low-income households (30-50% AMI).

In addition to estimates of households within an income range, CHAS data also provides estimates of the number of rental housing units affordable to households with incomes within the income range. A housing unit is considered affordable if gross housing costs are less than 30% of a household's income. The estimates are based on self-reported housing costs. Since self-reported housing costs reflect the costs to the household, the housing unit estimates reflect all the housing subsidies or other benefits in use in the area. A rental unit affordable to a household with an extremely low income (<30% of AMI) may or may not be occupied by a household in that income range. RDI tool rental affordability estimates use the corresponding household income thresholds:

- <30% AMI includes housing units that are affordable to a household with an income up to 30% of AMI.
- 30 - 50% AMI includes housing units that are affordable to a household with an income between 30% and 50% of AMI.
- 50% - 80% includes housing units that are affordable to a household with an income between 50% and 80% of AMI.
- >80% AMI includes housing units that are affordable to a household with an income greater than 80% of AMI.

Rental unit affordability estimates exclude housing units without complete kitchen or plumbing facilities, as well as vacant units that are not listed as either for rent or for sale and group quarter units.

The tale below shows the change in vacant affordable units across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets representing a difference in the data between the years of 2015-2019 and 2017-2019.

Change in # of Rental Units by Affordability Rating	Lacey	Olympia	Tumwater	Yelm
Extremely-Low Income (<30% AMI)	0	25	0	0
Very-Low Income (30-50% AMI)	-90	-110	-45	0
Low-Income (50-80% AMI)	40	10	10	0
Moderate-Income (80%-100% AMI)	150	75	5	0

Income

All cities are experiencing growth in renter and homeowner households above the median income (>100% AMI). High incomes coupled with continued high housing cost burdens points to high cost of housing outpacing wage gains.

To account for regional variation in labor and housing markets, the WA Department of Commerce RDI tool uses area median income (AMI). AMI represents the midpoint of an area's income distribution. Fifty percent (50%) of households have an income higher than the area median income and 50% have an income lower than the AMI. The Growth Management Act requires jurisdictions to account for the housing needs of households across the income spectrum. Income data and housing affordability estimates are provided by US Housing and Urban Development's Comprehensive Housing Affordability Strategy (CHAS) data. Household income estimates are for the number of households with a

household income up to a threshold based on a percentage of the area median income, with adjustments based on household size. The income bins are:

- Extremely Low Income (<30% of AMI)
- Very Low Income (30% - 50% of AMI)
- Low Income (50% - 80% of AMI)
- Moderate Income (80% - 100% of AMI)
- Above Median Income (>100% of AMI)

The tables below show the change in population income levels across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets representing a difference in the data between the years 2015-2019 and 2017-2019.

Change in # Households by Income Status: Renters	**Lacey**	**Olympia**	**Tumwater**	**Yelm**
Extremely-Low Income (<30% AMI)	-160	-110	-240	15
Very-Low Income (30-50% AMI)	-235	-180	-85	-60
Low-Income (50-80% AMI)	-475	225	-20	-15
Moderate-Income (80%-100% AMI)	535	-85	-15	35
Above Median Income (>100%)	680	730	305	20

Change in # Households by Income Status: Homeowners	**Lacey**	**Olympia**	**Tumwater**	**Yelm**
Extremely-Low Income (<30% AMI)	250	-90	-145	-10
Very-Low Income (30-50% AMI)	15	40	60	-65
Low-Income (50-80% AMI)	-255	-130	-90	5
Moderate-Income (80%-100% AMI)	-150	25	-10	-90
Above Median Income (>100%)	1495	1345	400	585

Tenure/Homeownership

All cities but Yelm are increasing in overall homeowner households of all income levels. Yelm and Tumwater are decreasing in overall renter households of all income levels.

Tenure refers to the distribution of homeowners and renter households across the region.

The tables below show the change in renter and owner households across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets representing a difference in the data between the years 2015-2019 and 2017-2019.

Change in # of Households	Lacey	Olympia	Tumwater	Yelm
Renters	345	590	-60	-715

Change in # of Households	Lacey	Olympia	Tumwater	Yelm
Homeowners	1365	1190	225	-640

Age

Yelm and Olympia saw the biggest changes in any individual age range. Overall, there is great variation in population change by age across the cities, but a trend of aging populations is detectable.

The table below shows the change in age distribution across the four cities between 2010 and 2023, using the US Census American Community Survey 5-Year Estimate data.

% Change in Population by Age	Lacey	Olympia	Tumwater	Yelm
Under 5 years	-0.90%	0.00%	-1.10%	-4.00%
5 to 9 years	0.00%	-1.80%	0.70%	2.00%
10 to 14 years	-0.80%	-1.00%	-1.60%	-2.20%
15 to 19 years	0.00%	0.90%	-3.90%	-1.20%
20 to 24 years	-0.10%	-5.10%	0.90%	4.20%
25 to 29 years	0.30%	0.70%	0.60%	-1.80%
30 to 34 years	0.00%	2.70%	1.00%	1.30%
35 to 39 years	0.00%	0.70%	0.60%	-0.10%
40 to 44 years	1.30%	0.30%	1.60%	-0.80%
45 to 49 years	-0.10%	-0.60%	-0.90%	0.20%
50 to 54 years	-1.90%	-2.00%	-1.90%	1.20%
55 to 59 years	-2.10%	-0.90%	-1.00%	0.80%

60 to 64 years	1.50%	-0.10%	2.50%	2.00%

70 to 74 years	1.10%	3.50%	1.10%	2.20%
75 to 79 years	-0.10%	1.80%	0.30%	-0.20%
80 to 84 years	-0.30%	0.00%	0.40%	-1.10%
85 years and over	-0.30%	-0.60%	-0.80%	-1.60%

Engagement Themes Summary

Housing Displacement Risk Analysis for the cities of Lacey, Olympia, Tumwater, and Yelm

To gain a locally rooted understanding of housing goals and displacement risks, the project team undertook an extensive and collaborative outreach process. We connected with planning staff, residents, and housing advocates across sectors to get a better understanding of the housing challenges facing the area.

The project team was able to aggregate and synthesize the stakeholder feedback across all engagement touchpoints to distill the main takeaways into the following themes for consideration. These takeaways should be read with the context that they are direct feedback from community stakeholders from their own viewpoints, level of understanding, and lived experience with housing. Final policy recommendations are not solely based on this feedback, rather, they aim to integrate the perspectives into what is actually possible within the confines of law and institutional standards.

1. Cities should identify ways to monitor renter income verification, establish local ordinances to enforce attainable income verification and identify and address price fixing.
2. Cities should use creative zoning overlays and innovative land use policies to classify and protect mobile home communities, as well as other types of affordable housing.
3. Zoning should balance commercial development with opportunities for affordable housing.
4. Cities should create a program to support upgraded utilities and infrastructure and promote incentives for property owners, including multifamily, single family, accessory, and mobile homes, to improve their properties. Tenants who are forced to relocate due to substandard maintenance (condemned properties) should receive support so they can effectively relocate to a nearby affordable housing option.
5. Affordable housing and homelessness prevention programs should work closer together as they share the same clientele.
6. Military service providers, including VAs, volunteer groups, bases, centers, and cities, should ensure that their programs are adequately staffed with the most current information regarding housing and support benefits for military families and households.

7. Cities should promote educational programs that explain to homeowners and potential buyers the long-term investment opportunity of ADUs, and the financial plan required to pursue a build.
8. Permitting processes to develop new affordable housing should continue to be simplified and streamlined.
9. Cities could support residents, including current residents of manufactured home communities, in forming cooperatives or community land trusts (CLTs) to be prepared to exercise the right of first refusal and manage properties independently.
10. Cities should create a program to support private ownership of mobile home communities and private rental units by local, family-owned operations with on-site management and disincentivize corporate owners from buying land on which manufactured home communities are located.
11. Cities should take steps to minimize the amount of potential long-term housing being used for short-term transient rentals (Air BnBs).
12. Cities should work with community groups to coordinate a one-stop shop for housing benefit explanations and application support.
13. Cities should promote an educational campaign to private landlords about legal requirements and renter income qualifications for those on supplemental income.
14. Cities should offset the impacts of increased taxes and tax increment financing, as they are seen to contribute to unaffordability for renters and low-income households by way of increased cost of living as new upscale developments are built.
15. Cities should consider rent control options and develop and enforce adequate tenant protections (eviction proceedings, rent increase management, etc.).
16. Cities should balance suburban development with investment in affordable housing in urban centers.
17. Cities should ensure robust transportation is available to residents and minimize land used for parking over housing.
18. Urban renewal efforts should include the protection of existing affordable housing units.

Lacey, WA

Housing Displacement Risk Analysis for the cities of Lacey, Olympia, Tumwater, and Yelm

Introduction & Overview

The City of Lacey has been engaged in collaborative planning to address various regional housing issues with the cities of Yelm, Tumwater, and Olympia. As part of this, Lacey has been working to address housing issues specific to their city, and while the city has made significant efforts to increase affordability and undo racially disparate impacts in Lacey by implementing or initiating many actions in their Housing Action Plan (HAP), the city is facing significant barriers in seeing additional progress. In particular, the city has identified its intent to develop more policies, programs, and partnerships to address economic, physical, and cultural forms of displacement. However, policy alone is not effective enough to meet the city's housing goals. Therefore, the bulk of the recommendations included in this report focus on various partnerships and programs the city could collaborate on to take the existing, revised, and recommended policies further.

Assets

The City of Lacey has worked on many housing-related issues through various planning efforts in recent years, recognizing that housing displacement is a multi-faceted issue requiring multiple strategies and collaboration with regional partners.

In 2019, Lacey adopted an Affordable Housing Strategy as an appendix to their Housing Element, which details specific actions the city can take to increase affordable housing and provide for specific residential needs and services for those experiencing homelessness. In 2021, Lacey participated in a collaborative effort with Olympia and Tumwater to develop a Housing Action Plan (HAP). The City has completed or is actively implementing many items in its HAP, including efforts to offer density bonuses or fee waivers for low-income housing, offer density or other incentives for desired unit types, reduce parking requirements for residential uses, reduce minimum lot sizes, increase minimum residential densities, allow single-room occupancy (SRO) housing in all multifamily zones, and strategically allow live/work units in nonresidential zones.

There has been a lot of progress in recent years, and the City is determined to utilize its Comprehensive Plan update to build upon the work they have done to address racially disparate impacts, housing affordability, and displacement issues, acknowledge past harm, and foster a vibrant and more livable community for its residents.

Issues

While the City of Lacey has made significant progress in advancing actions in their HAP, city staff have identified some housing issues that need greater attention. While many residents choose to call Lacey home, some do not feel like they have a strong connection to the city or feel like they belong, which could indicate potential cultural displacement pressures. Strategies to increase placemaking and retain access to cultural events, religious institutions, or businesses unique to Lacey are important to explore further. There are also concerns that those who work in Lacey cannot always afford to live in Lacey if they want to, or are forced to move out of the city due to rising housing costs. Efforts to preserve existing and naturally occurring affordable housing are also needed to maintain affordable housing and prevent displacement. Together, these issues highlight the need for future policy or efforts to address displacement in Lacey, especially as many existing efforts in Lacey are intended to increase housing affordability or supply, but don't directly address preventing housing displacement, which is a multifaceted issue in itself.

Housing Displacement Risk Policy Analysis

The City of Lacey's existing Housing Element and additional housing-related policies throughout the Comprehensive Plan were reviewed using criteria consistent with the Department of Commerce's Racially Disparate Impacts guidance, as outlined in the Project Methodology section of the technical appendix. The resulting policy analysis found that Lacey's housing-related policies are generally split between policies identified as "supportive" and "approaching." Lacey's housing policies that are "supportive" of housing growth and affordability include efforts to increase higher residential densities, support infill development, provide and incentivize a sufficient amount of housing affordable to all incomes and unique housing needs, and partner with other agencies to improve housing affordability and prevent displacement and homelessness.

Generally, Lacey's housing policies that are identified as "approaching" support housing growth but could better address affordability and anti-displacement to ensure housing is equitably provided to all incomes and those who have historically been excluded or displaced. One policy in particular (Policy C under Goal 3 in the Central Planning Area section) may be strengthened by removing vague wording. Proposed edits clarify the intent of the policy, which is to regulate development standards for middle housing options that encourage them to be sensitive and complimentary of the surrounding neighborhood while balancing other city priorities like climate resilience.

In all, Lacey's housing-related goals and policies address housing displacement and include efforts to prevent disproportionate impacts. To strengthen Lacey's existing efforts, the City should consider additional policies to strengthen community partnerships that can help prevent displacement while continuing to foster a community supportive of existing residents and those who choose to live in Lacey.

Recommendations

There are a few key ways the city can supplement existing efforts to achieve greater success related to preventing racially disparate impacts, providing deeply affordable housing, and preventing displacement (economic displacement in particular). Efforts to increase community connections and partnerships with organizations would help the city take their existing work and policies further, by effectively increasing the capacity of city staff through these partnerships. Additional efforts and social services outside of housing policy are needed for Lacey's housing policies to be more effective.

Despite this, there are several additional policy areas Lacey should consider in its Comprehensive Plan update. For one, there are several existing policies in the Housing Element of Lacey's existing Comprehensive Plan that could be updated with minor edits to clarify the intent of the policies, remove vague language, connect policies to other elements of the Comprehensive Plan, or remove language that may be exclusive. Edits are proposed for many policies in the Final Existing Comp Plan Policy Evaluation Framework Appendix.

New policies or programs are needed to address a few significant policy gaps. For one, policies are needed to preserve existing units and naturally affordable housing, which is crucial to prevent economic displacement and help residents remain in their chosen community. Similarly, efforts are also needed to protect manufactured housing and prevent displacement in these communities. Housing affordable to lower wage earners in the city is also needed to provide housing for those who work in Lacey but cannot afford to live in the city. Cultural displacement could be mitigated by increasing placemaking efforts and retaining existing events and access to businesses, religious institutions, and other facilities and places important to various communities in Lacey.

Finally, Lacey's HAP has many additional actions the city could continue to implement by advancing them to their Planning Commission. Policies from the HAP that score high in the Policy Evaluation Matrix should be considered priorities for this effort.

Data & Indicators

Generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse
- Households are spending more than 30% of income on housing
- Rental units become unaffordable for extremely low-income residents
- Poverty rates increase in a community
- Homeownership rates decline

These metrics are derived from the Racially Disparate Impacts tool created by the WA Department of Commerce. The tool has five metrics for housing displacement risk: racial diversity, cost burden, rental affordability, income levels, and homeownership.

The following pages detail the dynamics of housing displacement risk as observed in each of the four cities. Profiles include housing displacement indicator data, policy recommendation summaries, and city-specific policy evaluation criteria. Our profiles have added age and manufactured home unit metrics to reflect research findings and community engagement feedback.

Racial Diversity

Lacey has seen a decline amongst American Indian and Alaska Native residents. White and Hispanic or Latino populations are growing the fastest.

Change in # of Residents by Race & Ethnicity	2010	2023	Difference
American Indian and Alaska Native	357	303	-54
Asian	4,125	5562	1,437
Black or African American	2,034	3379	1,345
Hispanic or Latino (of any race)	3,126	7252	4,126
Native Hawaiian and Other Pacific Islander	336	994	658
Other Race	192	148	-44
Two or more races	1,415	4323	2,908
White	28,749	35027	6,278

Cost Burdened Population

Lacey has seen a 12% increase in severely cost-burdened households between the two timeframes.

Change in # Households by Cost-Burdened **Status:** Renters	2017-2021	2015-2019	Difference
Not Cost Burdened	4150	4,040	110
Cost-Burdened (30-50%)	2880	2,815	65
Severely Cost-Burdened (>50%)	1915	1,715	200
Not Calculated	10	40	-30

Change in # Households by Cost-Burdened Status: Homeowners	**2017-2021**	**2015-2019**	**Difference**
Not Cost Burdened	9110	8,345	765
Cost-Burdened (30-50%)	1785	1,415	370
Severely Cost-Burdened (>50%)	1015	830	185
Not Calculated	125	80	45

Rental Affordability

Lacey has limited and decreasing rental units affordable to extremely low-income and very-low-income households.

Change in # of Rental Units by Affordability Rating	**2017-2021**	**2015-2019**	**Difference**
Extremely-Low Income (<30% AMI)	0	0	0
Very-Low Income (30-50% AMI)	160	250	-90
Low-Income (50-80% AMI)	40	0	40
Moderate-Income (80%-100% AMI)	150	0	150

Income

Lacey is losing low income renters and gaining moderate and above medium income renters while extremely-low income homeowner households are increasing.

Change in # Households by Income Status: Renters	**2017-2021**	**2015-2019**	**Difference**
Extremely Low-Income (≤30% AMI)	1180	1,340	-160
Very Low-Income (30-50%)	1340	1,575	-235
Low-Income (50-80%)	2125	2,600	-475
Moderate Income (80-100%)	1550	1,015	535
Above Median Income (>100%)	2755	2,075	680

Change in # Households by Income Status: Owners	**2017-2021**	**2015-2019**	**Difference**
Extremely Low-Income (≤30% AMI)	1075	825	250

Change in # Households by Income Status: Owners	2017-2021	2015-2019	Difference
Very Low-Income (30-50%)	635	620	15
Low-Income (50-80%)	1580	1835	-255
Moderate Income (80-100%)	1420	1570	-150
Above Median Income (>100%)	7320	5825	1495

Tenure/Homeownership

Across all income levels, Lacey has seen a 13% increase in homeowner households and a 4% increase in renter households between the two time periods.

Change in # of Households	2017-2021	2015-2019	Difference
Renter	8950	8605	345
Owner	12035	10670	1365

Age

The fastest-growing age groups in Lacey are #1) 65 to 69 years, #2)40 to 44 years, and #3)75 to 79 years.

% Change in Population by Age	2010 ACS	2023 ACS	Change
Total Population	**40,334**	**57,088**	**41.54%**
Under 5 years	6.70%	5.80%	-0.90%
5 to 9 years	6.40%	6.40%	0.00%
10 to 14 years	7.00%	6.20%	-0.80%
15 to 19 years	4.70%	4.70%	0.00%
20 to 24 years	6.60%	6.50%	-0.10%
25 to 29 years	8.50%	8.80%	0.30%

Implementation Capacity & Limitations

Implementing the recommended policies and remaining actions of the HAP will require significant financial resources and staff time to be effective, sustainable, and serve the greatest number of residents. The primary limitation will likely be financing limitations due to the need to navigate city politics, financing, and to identify and secure available financial resources for the recommended programs. City staff would also need additional capacity to pursue funding, whether through grants, regional or state programs, or other sources, for many of these programs.

Many of the revised Housing Element policies, remaining actions in the HAP, and policy recommendations developed for Lacey would also require significant staff time to work with community partners to develop ordinances to update the city's development regulations, in addition to time spent working with the Planning Commission and City Council to review and approve ordinances. The recommended policies would also require significant staff time to identify, develop, and maintain community partnerships and collaborative efforts with local organizations.

Olympia, WA

Housing Displacement Risk Analysis for the cities of Lacey, Olympia, Tumwater, and Yelm

Introduction & Overview

Issues around housing and displacement in the City of Olympia are complicated and nuanced. The City has increasingly taken on a leadership role in efforts to address mounting housing and affordability crises, and they have taken on a multi-faceted approach. Many policies and implementation strategies have been enacted and tested over several years, enough time to see where substantive gains have been made and to concretely identify specific barriers to progress. Recommendations for the City of Olympia are primarily suggestions to fine-tune existing policies to specifically address displacement risk. In Olympia, data and displacement indicators point to a rental population that is at increased risk for displacement, more so than the home-owning population.

Assets

The City of Olympia has worked on many issues related to housing affordability and displacement in the last six years. They have built a web of protective policies, long-range plans, funding strategies, and community partnerships. This approach recognizes that there is no one-step solution to housing displacement; multiple issues have to be addressed simultaneously to have an impact.

The City Council adopted the One Community Plan in 2020 which explicitly seeks community agreement around responding to the homelessness crisis. In 2021, in collaboration with Lacey and Tumwater, the Olympia finalized a Housing Action Plan (HAP) based on data from a Thurston County Regional Housing Needs Assessment and Housing Gap Analysis, and in 2023, The City collaborated with Thurston County and the Housing Authority of Thurston County to conduct an Assessment of Fair Housing. The City is currently implementing many of the actions identified in their HAP, and updates to the Comprehensive Plan seek to fold and build upon all related work since 2018. Updates to the Comprehensive Plan will also support the expansion of middle housing options and opportunities.

The City has also enacted several policies and programs, such as a tenant protection policy, affordable housing incentives, and a multi-family tax exemption (MFTE) program. They are actively collaborating with the development community and manufactured homeowners, and they have dedicated staff to attend and advise during permitting meetings. The MFTE program has been particularly successful in the Downtown area.

Issues

Displacement issues identified within the City of Olympia include some specific boundaries encountered during the enactment of the City's affordable housing protection policies and implementation. These include:

- The difficulty of enforcing tenant protections
- Increases in rent beyond the control of the City (the City has increased efforts to control the costs they can, such as limiting extra fees and move-in costs)
- Restraints on middle housing development due to sewer connections or critical areas
- Middle housing is quite expensive when it does get built and does not serve affordable housing needs.
- Barriers around awareness of the MFTE program, particularly because only a handful of developers are utilizing this program
- A need for more, permanent, supportive, and deeply affordable housing.

Housing Displacement Risk Policy Analysis

To identify policies to enhance all of Olympia's existing work to improve housing affordability, nurture community partnerships, and pursue funding opportunities to prevent displacement and racially disparate impacts, the consultant team reviewed Olympia's current Comprehensive Plan. Policies in the Housing Element, along with other housing-related policies in other elements, namely Public Services, were reviewed for policies that may result in racially disproportionate impacts or are supportive of housing goals. A few of Olympia's policies are identified as "supportive", including policies that encourage adapting non-residential buildings for housing, support the provision of affordable housing by minimizing barriers and regulatory review, and prevent physical barriers from isolating new development from existing neighborhoods. Most of Olympia's housing-related policies are indicated as "approaching" because they aim to increase Olympia's housing supply but could be strengthened to better address racially disparate impacts, identify anti-displacement strategies, and prevent housing exclusion while prioritizing historically marginalized populations. Several conflicting policies are identified as "challenging" housing goals. These include policies requiring additional design or architectural features to be included in new housing or to preserve existing neighborhood "character," which could be updated or changed to remove vague language and allow greater flexibility to ensure increased housing production and choices. Proposed edits to these policies can be found in the Final Existing Comp Plan Policy Evaluation Framework Appendix.

Recommendations

A few policies float to the top of the recommendations for the City of Olympia to assist most directly in overcoming the barriers encountered by the City. A full list of new policy

recommendations is available in the specific Policy Evaluation Matrix for the City. The top-scoring ones are summarized:

- Policies for the protection and preservation of the manufactured home community.
- Additional measures to encourage the retention and maintenance of existing affordable housing, especially in high-opportunity neighborhoods or areas that have historic patterns of segregation.

An analysis has also been completed of the City's Housing Action Plan (HAP) policies, and a number of these score very high, such as:

- Evaluate the relationship between the Olympia and the county's home fund to ensure housing goals are met.
- Expanding allowance of residential tenant improvements without triggering land use requirements.
- Allowing Single Room Occupancy (SRO) housing in all multifamily zones.

The city could consider prioritizing these HAP policies and others that score high in the Policy Evaluation Matrix for implementation by advancing them to their Planning Commission, as they meet city priorities and address existing deficiencies in the city's housing policy.

Data & Indicators

Generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse
- Households are spending more than 30% of income on housing
- Rental units become unaffordable for extremely low-income residents
- Poverty rates increase in a community
- Homeownership rates decline

These metrics are derived from the Racially Disparate Impacts tool created by the WA Department of Commerce. The tool has five metrics for housing displacement risk: racial diversity, cost burden, rental affordability, income levels, and homeownership.

The following pages detail the dynamics of housing displacement risk as observed in each of the four cities. Profiles include housing displacement indicator data, policy recommendation summaries, and city-specific policy evaluation criteria. Our profiles have added age and manufactured home unit metrics to reflect research findings and community engagement feedback.

Racial Diversity

All racial and ethnic groups are growing in Olympia, with the Hispanic and Latino population by 118% between 2010 and 2023.

Change in # of Residents by Race & Ethnicity	2010	2023	Difference
American Indian and Alaska Native	377	379	2
Asian	2,698	3622	924
Black or African American	1,020	1365	345
Hispanic or Latino (of any race)	2,628	5727	3,099
Native Hawaiian and Other Pacific Islander	55	476	421
Other Race	52	184	132
Two or more races	1,487	4104	2,617
White	37,391	39726	2,335

Cost Burdened Population

The severely cost-burdened renter population in Olympia grew by 8% between the two timeframes. Cost-burdened homeowner households increased by 21% over the same period.

Change in # Households by Cost-Burdened Status: Renters	2017-2021	2015-2019	Difference
Not Cost Burdened	5730	5545	185
Cost-Burdened (30-50%)	2995	2970	25
Severely Cost-Burdened (>50%)	3420	3160	260
Not Calculated	315	199	116

Change in # Households by Cost-Burdened Status: Homeowners	2017-2021	2015-2019	Difference
Not Cost Burdened	9285	8445	840
Cost-Burdened (30-50%)	1425	1280	145
Severely Cost-Burdened (>50%)	925	735	190
Not Calculated	90	85	5

Rental Affordability

Olympia lost approximately 58% of rental units affordable to very low-income households between the two time periods.

Change in # of Rental Units by Affordability Rating	2017-2021	2015-2019	Difference
Extremely-Low Income (<30% AMI)	45	20	25
Very-Low Income (30-50% AMI)	80	190	-110
Low-Income (50-80% AMI)	195	185	10
Moderate-Income (80%-100% AMI)	100	25	75

Income

Olympia renter households making above the median income increased by 29% within the two time periods. Homeowner households making above the median income grew by 21% in the same time.

Change in # Households by Income Status: Renters	2017-2021	2015-2019	Difference
Extremely Low-Income (≤30% AMI)	2875	2985	-110
Very Low-Income (30-50%)	2220	2400	-180
Low-Income (50-80%)	2745	2520	225
Moderate Income (80-100%)	1390	1475	-85
Above Median Income (>100%)	3225	2495	730

Change in # Households by Income Status: Owners	2017-2021	2015-2019	Difference
Extremely Low-Income (≤30% AMI)	660	750	-90
Very Low-Income (30-50%)	755	715	40
Low-Income (50-80%)	1355	1485	-130
Moderate Income (80-100%)	1100	1075	25
Above Median Income (>100%)	7855	6510	1345

Tenure/Homeownership

Olympia homeowner households of all income levels increased by 11% while renter households of all income levels increased by 5% in the same period.

Change in # of Households	2017-2021	2015-2019	Difference
Renter	12460	11870	590
Owner	11725	10535	1190

Age

The fastest-growing age groups in Olympia are #1) 70 to 74 years, #2)75 to 79 years, and #3)65 to 69 years.

% Change in Population by Age	2010 ACS	2023 ACS	Change
Total Population	**45,708**	**55,583**	**21.60%**
Under 5 years	5.10%	5.10%	0.00%
5 to 9 years	5.50%	3.70%	-1.80%
10 to 14 years	6.10%	5.10%	-1.00%

75 to 79 years	2.10%	3.90%	1.80%
80 to 84 years	1.70%	1.70%	0.00%
85 years and over	2.90%	2.30%	-0.60%

Implementation Capacity & Limitations

The City has already expended considerable political capital enacting multi-part strategies to address housing affordability. Though these efforts may need to continue for a long period to see definitive progress, politics will need to match the necessary longevity of these programs to see significant results. Changes in leadership or shifts in City funding for programming could erode support for existing implementation efforts that are having a net positive effect.

The City has done a good job of identifying specific barriers to ease displacement pressure. The Housing Action Plan actions collectively represent quite a lot of staff time or consultant time, but quite a number of them can also be seen as making progress against displacement pressures as well.

Tumwater, WA

Housing Displacement Risk Analysis for the cities of Lacey, Olympia, Tumwater, and Yelm

Introduction & Overview

The City of Tumwater wants to keep housing affordable for existing residents and maintain existing housing stock as affordable housing. A lot of new housing supply in the City will not be affordable when it is built.

Assets

The City has zoning protections for manufactured home parks and they anticipate higher-density homes with the enactment of development standards to meet House Bill 1110 requirements. However, the City is interested in understanding how to mitigate the impacts of this density.

The City's Housing Action Plan (HAP), written in collaboration with Lacey and Olympia, shows that the City has begun work necessary to implement anti-displacement policies. Some of these policies include policies to protect existing affordable housing stock, funding projects that increase low-income housing supply, maintaining a rental database to have better information to track whether or not rental costs are rising, helping reduce costs and fees that are under the City's control, and increasing collaboration with various community partners.

Issues

There are several housing issues the City of Tumwater hopes to address in its Comprehensive Plan update. These include wanting to maintain housing affordability for existing Tumwater residents. Also of interest are strategies to revive the market for small local builders who might take on smaller projects that also pass affordability on to residents (a lot of this community was lost in Tumwater during the pandemic). Yet another interest will be policies considering adaptive reuse to preserve existing affordable housing stock.

Housing Displacement Risk Policy Analysis

Many of Tumwater's housing-related policies are "supportive" or "approaching" housing goals. The City's policies generally support housing growth and the provision of adequate services to support housing, mitigate displacement, and support those who need transitional or supportive housing or have additional housing needs. Policies that are identified as "approaching" generally encourage diverse housing types to meet various

housing needs, but could be strengthened to better mitigate displacement, consider housing affordability and availability by income bracket, and protect historically marginalized populations from disproportionate impacts. There is only one policy (that shows up twice in the plan) identified as “challenging;” it aims to protect residential areas from undesirable activities and uses through aggressive code enforcement, which could lead to greater displacement or disproportionate impacts among lower income and historically marginalized groups.

Compared to other jurisdictions, words used in policy language in HAP are not as strong. The City will be updating and incorporating the HAP goals and actions into the 2025 CUP Housing Element. This is a potential opportunity to strengthen policy language in the Comprehensive Plan to incorporate stronger words like “require”, rather than “encourage”.

Recommendations

A few policies float to the top of the recommendations for the City of Tumwater to assist most directly as protective measures against economic and physical displacement. A full list of new policy recommendations is available in the specific Policy Evaluation Matrix for the City. The top-scoring ones are summarized:

- A Community Land Trust-style program for mobile home communities.
- A City program to support private, local, small-scale ownership of mobile home communities. This builds on the City’s mobile home housing stock and also wishes to help preserve existing affordable stock.
- Increased staffing capacity to process ADUs quickly and reduce costs under City control

An analysis has also been completed of the City’s Housing Action Plan (HAP) policies, and a number of these score very high, such as:

- Providing “notice of intent to sell” ordinance for multifamily developments
- Establishing a program to preserve and maintain healthy and viable manufactured home parks (some details of which are captured in the new recommendations)
- Mixing market rate and low-income housing to avoid creating areas of concentrated low-income housing.

The city could consider prioritizing these HAP policies and others that score high in the Policy Evaluation Matrix for implementation by advancing them to their Planning Commission, as they meet city priorities and address existing deficiencies in the city’s housing policy.

Data & Indicators

Generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse
- Households are spending more than 30% of income on housing

- Rental units become unaffordable for extremely low-income residents
- Poverty rates increase in a community
- Homeownership rates decline

These metrics are derived from the Racially Disparate Impacts tool created by the WA Department of Commerce. The tool has five metrics for housing displacement risk: racial diversity, cost burden, rental affordability, income levels, and homeownership.

The following pages detail the dynamics of housing displacement risk as observed in each of the four cities. Profiles include housing displacement indicator data, policy recommendation summaries, and city-specific policy evaluation criteria. Our profiles have added age and manufactured home unit metrics to reflect research findings and community engagement feedback.

Racial Diversity

The fastest-growing racial and ethnic groups in Tumwater are Hispanic or Latino residents and White residents. Alternatively, Tumwater saw a 64% decrease in the American Indian and Alaska Native population between 2010 and 2023.

Change in # of Residents by Race & Ethnicity	2010	2023	Difference
American Indian and Alaska Native	395	241	-154
Asian	512	1120	608
Black or African American	192	947	755
Hispanic or Latino (of any race)	925	2409	1,484
Native Hawaiian and Other Pacific Islander	3	109	106
Other Race	84	554	470
Two or more races	474	2260	1,786
White	14,249	18879	4,630

Cost Burdened Population

Tumwater has seen a slight decrease in cost-burdened and severely cost-burdened renter households while homeowner, not cost-burdened households are growing.

Change in # Households by Cost-Burdened Status: Renters	2017-2021	2015-2019	Difference
Not Cost Burdened	2290	2190	100

Change in # Households by Cost-Burdened Status: Renters	**2017-2021**	**2015-2019**	**Difference**
Cost-Burdened (30-50%)	950	1015	-65
Severely Cost-Burdened (>50%)	975	1080	-105
Not Calculated	25	14	11

Change in # Households by Cost-Burdened Status: Homeowners	**2017-2021**	**2015-2019**	**Difference**
Not Cost Burdened	4510	4155	355
Cost-Burdened (30-50%)	495	670	-175
Severely Cost-Burdened (>50%)	450	405	45
Not Calculated	30	40	-10

Rental Affordability

Tumwater has limited rental availability across all income types, but especially for extremely low-income and very low-income households.

Change in # of Rental Units by Affordability Rating	**2017-2021**	**2015-2019**	**Difference**
Extremely-Low Income (<30% AMI)	0	0	0
Very-Low Income (30-50% AMI)	0	45	-45
Low-Income (50-80% AMI)	80	70	10
Moderate-Income (80%-100% AMI)	80	75	5

Income

Tumwater is seeing significant growth in households making above the median income. Renter households above the median income increased by 27% while homeowner households above the median income increased by 12%.

Change in # Households by Income Status: Renters	**2017-2021**	**2015-2019**	**Difference**
Extremely Low-Income (≤30% AMI)	680	920	-240
Very Low-Income (30-50%)	690	775	-85
Low-Income (50-80%)	990	1010	-20

Change in # Households by Income Status: Renters	2017-2021	2015-2019	Difference
Moderate Income (80-100%)	455	470	-15
Above Median Income (>100%)	1430	1125	305

Change in # Households by Income Status: Owners	2017-2021	2015-2019	Difference
Extremely Low-Income (≤30% AMI)	325	470	-145
Very Low-Income (30-50%)	395	335	60
Low-Income (50-80%)	715	805	-90
Moderate Income (80-100%)	415	425	-10
Above Median Income (>100%)	3635	3235	400

Tenure/Homeownership

Tumwater saw a 1% reduction in renter households across income levels while homeowner households across income levels increased by 4%.

Change in # of Households	2017-2021	2015-2019	Difference
Renter	4240	4300	-60
Owner	5490	5265	225

Age

The fastest-growing age groups in Tumwater are #1) 60 to 64 years, #2)65 to 69 years, and #3)70 to 74 years.

% Change in Population by Age	2010 ACS	2023 ACS	Change
Total Population	**16,834**	**26,519**	**57.53%**
Under 5 years	5.50%	4.40%	-1.10%
5 to 9 years	6.60%	7.30%	0.70%
10 to 14 years	6.50%	4.90%	-1.60%
15 to 19 years	7.90%	4.00%	-3.90%
20 to 24 years	6.10%	7.00%	0.90%
25 to 29 years	8.30%	8.90%	0.60%

% Change in Population by Age	2010 ACS	2023 ACS	Change
30 to 34 years	7.40%	8.40%	1.00%
35 to 39 years	7.90%	8.50%	0.60%
40 to 44 years	5.50%	7.10%	1.60%
45 to 49 years	7.10%	6.20%	-0.90%
50 to 54 years	7.60%	5.70%	-1.90%
55 to 59 years	6.70%	5.70%	-1.00%
60 to 64 years	4.70%	7.20%	2.50%
65 to 69 years	2.90%	4.90%	2.00%
70 to 74 years	2.50%	3.60%	1.10%
75 to 79 years	2.30%	2.60%	0.30%
80 to 84 years	1.60%	2.00%	0.40%
85 years and over	2.70%	1.90%	-0.80%

Implementation Capacity & Limitations

The housing action plan policies are all a good start for the City. The biggest impact on displacement means focusing on preserving mobile home parks as existing affordable stock. This will require continued education and communication to explain why the focus is here to build upon the political support MHPs already have in the City.

Many of the revised Housing Element policies, remaining actions in the HAP, and policy recommendations developed for Tumwater would also require significant staff time to work with community partners to develop ordinances to update the city's development regulations, in addition to time spent working with the Planning Commission and City Council to review and approve ordinances. The recommended policies would require significant staff time to identify, develop, and maintain community partnerships and collaborative efforts with local organizations. City staff would also need additional capacity to pursue funding, whether through grants, regional or state programs, or other sources, for many of these programs to be effective, sustainable, and serve the greatest number of residents.

Yelm, WA

Housing Displacement Risk Analysis for the cities of Lacey, Olympia, Tumwater, and Yelm

Introduction & Overview

Market-rate housing in the City of Yelm sells quickly these days, and much of the housing is of interest to military families who are looking for a small-town feel. Yelm hasn't seen a lot of displacement yet, but economic displacement could be on the horizon and the City eyes displacement and housing affordability crises in nearby Cities with some apprehension. As of right now, the City doesn't have a specific housing program, but it looks to Cities like Tumwater, Lacey, and Vancouver for ideas and program examples that could work in Yelm.

Assets

Proximity to the military base also means a unique set of issues, such as effective price setting as rent is calibrated to be the military basic allowance for housing (bah), which makes rent a bit more affordable overall in the City.

Much of the City's affordable housing stock was built in the 1970s, and there the City runs effective rehab programs, such as for mold abatement, that help homeowners keep affordable housing stock in good condition. Housing that is older than the 1970s has mostly been converted to commercial uses.

There is an openness in Yelm to collaborating with nearby Cities on a multifamily tax exemption (MFTE) credit program. Similarly, the City has considered stock accessory dwelling unit (ADU) plans, particularly if that would help decrease the cost (and affordability) of ADU construction.

Issues

Issues and concerns raised by staff include a broad range of possible interests for the City. These include a willingness to consider additional policies to safeguard against displacement as market-rate housing continues to sell very quickly.

Yelm would like to see more policies as preventative measures against economic displacement, including an MFTE program. The primary barrier to this currently is the City Council's perception of taxation. The biggest issue for a MFTE program Yelm may be getting buy in from the community and the City Council.

Analysis of the Comprehensive Plan and House Bill 1220 showed housing deficits for all bands, including market rate.

Housing Action Plan

Yelm's Housing Action Plan (HAP) identifies a gap in housing units that are available to meet low-income and very-low income renter households. This may need to take the form of subsidized housing or rental assistance programs. The HAP also provides an evaluation of the City's density and current zoning designations to look for ways to increase density and allow for development or redevelopment of parcels.

Housing Displacement Risk Policy Analysis

Yelm's housing policies are generally supportive of housing goals, including policies that encourage diverse residential growth, efficient permit processing, allow various residential uses and types that provide for diverse housing needs, and increase funding for affordable housing or reduce barriers to home ownership. Policies indicated as "approaching" could be improved primarily by considering affordability for all income groups and prioritizing those that have been historically marginalized, but they generally encourage housing growth, the maintenance of existing housing stock, and the provision of housing near transit and other services. There aren't any policies identified as "challenging."

Recommendations

A few policies float to the top of the recommendations for the City of Yelm to assist most directly as protective measures against economic displacement. A full list of new policy recommendations is available in the specific Policy Evaluation Matrix for the City. The top-scoring ones are summarized:

- Policies for the protection and preservation of the manufactured home community.
- Short-term rental programs to minimize long-term housing being used for transient rentals

An analysis has also been completed of the City's Housing Action Plan (HAP) policies, and a number of these score very high, such as:

- Partnerships with low-income housing developers, the Housing Authority of Thurston County, and other organizations that provide support for low-income, workforce, senior housing, and other populations with unique housing needs.
- Community Development Block Grants, Section 108 loans, and other federal resources for affordable housing.
- Offering density bonuses for low-income housing.

Data & Indicators

Generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse

- Households are spending more than 30% of income on housing
- Rental units become unaffordable for extremely low-income residents
- Poverty rates increase in a community
- Homeownership rates decline

These metrics are derived from the Racially Disparate Impacts tool created by the WA Department of Commerce. The tool has five metrics for housing displacement risk: racial diversity, cost burden, rental affordability, income levels, and homeownership.

The following pages detail the dynamics of housing displacement risk as observed in each of the four cities. Profiles include housing displacement indicator data, policy recommendation summaries, and city-specific policy evaluation criteria. Our profiles have added age and manufactured home unit metrics to reflect research findings and community engagement feedback.

Racial Diversity

Yelm lost 57% of its Asian population between 2010 and 2023. Comparatively, the Black population has grown by 115%, the Hispanic population by 158%, and the Native Hawaiian and Pacific Islander population by 720%.

Change in # of Residents by Race & Ethnicity	2010	2023	Difference
American Indian and Alaska Native	40	129	89
Asian	230	98	-132
Black or African American	242	521	279

Native Hawaiian and Other Pacific Islander	65	533	468
Other Race	0	0	0
Two or more races	201	805	604
White	4,835	7051	2,216

Cost Burdened Population

Yelm has seen a slight growth amongst severely cost-burdened rental households but a significant growth amongst non cost burdened homeowner households.

Change in # Households by Cost-Burdened Status: Renters	**2017-2021**	**2015-2019**	**Difference**
Not Cost Burdened	515	550	-35
Cost-Burdened (30-50%)	245	275	-30
Severely Cost-Burdened (>50%)	215	170	45
Not Calculated	45	40	5

Change in # Households by Cost-Burdened Status: Homeowners	**2017-2021**	**2015-2019**	**Difference**
Not Cost Burdened	1545	1110	435
Cost-Burdened (30-50%)	415	474	-59
Severely Cost-Burdened (>50%)	180	130	50
Not Calculated	0	0	0

Rental Affordability

Yelm seems to only have rental units affordable to those making above 100% AMI.

Change in # of Rental Units by Affordability Rating	**2017-2021**	**2015-2019**	**Difference**
Extremely-Low Income (<30% AMI)	0	0	0
Very-Low Income (30-50% AMI)	0	0	0
Low-Income (50-80% AMI)	0	0	0
Moderate-Income (80%-100% AMI)	0	0	0

Income

Homeowner households making above 100% AMI have increased by 77% in Yelm while both love income renter and homeowner households have decreased.

Change in # Households by Income Status: Renters	**2017-2021**	**2015-2019**	**Difference**
Extremely Low-Income (≤30% AMI)	245	230	15
Very Low-Income (30-50%)	130	190	-60
Low-Income (50-80%)	195	210	-15
Moderate Income (80-100%)	220	185	35

Change in # Households by Income Status: Renters	2017-2021	2015-2019	Difference
Above Median Income (>100%)	230	210	20

Change in # Households by Income Status: Owners	2017-2021	2015-2019	Difference
Extremely Low-Income (≤30% AMI)	70	80	-10
Very Low-Income (30-50%)	85	150	-65
Low-Income (50-80%)	325	320	5
Moderate Income (80-100%)	320	410	-90
Above Median Income (>100%)	1345	760	585

Tenure/Homeownership

Yelm has seen an overall decrease in renter and owner households across all income levels.

Change in # of Households	2017-2021	2015-2019	Difference
Renter	310	1025	-715
Owner	1080	1720	-640

Age

The fastest-growing age groups in Yelm are #1) 20 to 24 years, #2)60 to 64 years, and #3)5 to 9 years.

% Change in Population by Age	2010 ACS	2023 ACS	Change
Total Population	**6,186**	**10,618**	**71.65%**
Under 5 years	10.80%	6.80%	-4.00%
5 to 9 years	9.20%	11.20%	2.00%
10 to 14 years	10.40%	8.20%	-2.20%
15 to 19 years	8.20%	7.00%	-1.20%

80 to 84 years	2.00%	0.90%	-1.10%
85 years and over	2.00%	0.40%	-1.60%

Implementation Capacity & Limitations

As is true in many small towns, housing programs are hard to fund, assemble, and administer. But this may be a critical piece of infrastructure needed to truly provide housing or even rental assistance programs to low- and very-low-income renters.

APPENDIX ***41***

Executive Summary

HOUSING DISPLACEMENT ANALYSIS CONTEXT

This report provides foundational context around housing displacement for the cities of Lacey, Olympia, Tumwater, and Yelm that respond to appropriate statutory context guiding the housing element of periodic comprehensive plan updates. By piecing together a relatively current look at housing displacement risk for these four cities, this report provides a reasonable picture of the contributing factors for housing displacement and the implications of possible counter-balancing policy and regulatory recommendations.

Statutory Context

In 2021, the Washington State Legislature passed House Bill 1220 into law requiring all jurisdictions guided under the Growth Management Act (GMA) to "plan for and accommodate housing affordable to all economic segments of the population of this state…".[1]

As part of this requirement, Section 2 of HB1220 directs jurisdictions to adopt comprehensive plans that, among other things: "identify racially disparate impacts, displacement and exclusion in housing policies and regulations, and [begins] to undo those impacts …"[2]

The cities of Lacey, Olympia, Tumwater, and Yelm are working toward the 2025 deadline for their respective comprehensive plan updates which will come under the updated HB1220 requirements for the first time.

How to Use this Document

In response to these requirements, the Cities of Lacey, Olympia, Tumwater, and Yelm agreed to collate resources and contract the consultant team of Uncommon Bridges and BHC Consultants. Cities and consultants collaborated on the expectations of this housing displacement analysis, the sharing of data and connections, and clarity around the use of this product.

The consultant team was tasked with producing a report in line with state guidance that supports each jurisdiction's work to meet stated housing element planning. The team synthesized and interpreted the findings and recommendations included in this report to organize clear, direct, and authentic narratives generated from the various inputs of the analysis.

This document should be read as a supplementary document intended to support each of the city jurisdictions with information that may be communicated to public audiences and to inform

[1] RCW 36.70A.070(2)(2021)

[2] Ibid

compliance with respective comprehensive plan updates. Each City should apply the outcomes of this report in the ways they deem most relevant in addressing local housing displacement, racially disparate outcomes in housing, and housing exclusion issues.

Note—This report *only* provides a perspective on addressing housing displacement through a housing policy and government-led regulatory lens. We recognize that holistic attention to displacement and broader social issues connected to housing requires an approach that includes collaboration across policy and service domains, such as homelessness, mental and behavioral health resources, economics, and more. An analysis such as this should be considered within the context of those challenges and the unique way they play out amongst different places and people. While the social conditions for creating housing security are complex, there are policy opportunities that cities can take to reduce displacement and protect community wellbeing.

WHAT IS HOUSING DISPLACEMENT?

Housing displacement is an experience that impacts both individual households as well as broader neighborhoods and communities. In its most straightforward definition, ***housing displacement is when a household is forced to move from its community because of conditions beyond its control.***

Displacement can be described through several lenses as defined by the Washington State Department of Commerce[3], including:

- **Economic Displacement** - Displacement is due to the inability to afford rising rents or the costs of homeownership, like property taxes.
- **Physical Displacement** - Displacement is due to eviction, acquisition, rehabilitation, or demolition of property, or the expiration of covenants on rent or income-restricted housing.
- **Cultural Displacement** - Residents are compelled to move because the people and institutions that make up their cultural community have left the area.

Quite often, local communities likely experience intersecting factors across all three of these categories. While the use of categories provides a helpful reference point, to build a comprehensive assessment of displacement types – especially on a local scale – requires supplementing these definitions with additional insights.

Other relevant definitions from Commerce[4] include:

[3] Department of Commerce (2023). Guidance to Address Racially Disparate Impacts. https://deptofcommerce.app.box.com/s/1l217l98jattb87qobtw63pkplzhxege

[4] Ibid.

- **Gentrification:** The process in which the character of an area is changed, resulting in households being unable to remain in their neighborhood or move into a neighborhood that would have been previously accessible to them. This is also referred to as "neighborhood exclusionary change" or "exclusionary displacement".
- **Racially Disparate Impacts:** When policies, practices, rules or other systems result in a disproportionate impact on one or more racial groups.

HOUSING DISPLACEMENT ANALYSIS APPROACH

This analysis aims to identify factors contributing to housing instability and displacement, especially among vulnerable populations. By examining historical policies, current trends, and community dynamics, we seek to outline actionable recommendations for local governments to enhance housing security and promote equitable living conditions for all residents. Through collaborative engagement with community stakeholders, this report underscores the importance of inclusive housing strategies that prioritize the needs of marginalized groups while fostering sustainable development.

Data collection and inputs for the analysis included:

- Academic Background Research
- Local Policy Review
- Displacement Indicator Data Analysis
- Public Engagement
- Policy Recommendations

Through these inputs, the consultant team balanced retrospective literature review, lived experience/anecdotal input, and interpretive quantitative data to build interpretations and recommendations of how to measure the effectiveness of strategies against displacement, gentrification, and racially disparate impacts.

How do we measure housing displacement risk?

For this analysis, we are guided by the Washington State Department of Commerce's guidance on measuring possible strategies through its Racially Disparate Impacts (RDI) tool[5]. Measuring the phenomena of displacement, gentrification, and racialized disparities in housing exclusion is complex, the RDI tool guides jurisdictions to consider five primary indicators as "supportive" metrics towards

[5] The RDI toolkit is designed for use by the Department of Commerce (Commerce) in its support of local jurisdiction efforts to meet the requirements of the Growth Management Act (GMA). The toolkit compiles statistics relevant to a jurisdiction's analysis of racially disparate impacts in its community.

this analysis. The RDI tool relies on estimates published by the U.S. Census Bureau and the Department of Housing and Urban Development (HUD) and is presented in four-year ranges. This analysis compares RDI data points from 2015-2019 and 2017-2021. Additionally, demographic data was pulled from the American Community Survey.

According to this guidance, generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse
- Households are spending more than 30% of their income on housing
- Rental units become unaffordable for extremely low-income residents (households earning between 30% and 50% of the Area Median Income (AMI)
- Poverty rates increase in a community
- Homeownership rates decline

Each of the jurisdictions agreed to track measures across these five indicators to best describe the trends and intensity of housing displacement. In measuring the same five indicators across each City, the analysis also provides an opportunity for comparative analysis and movement toward a "regional" picture of housing displacement conditions.

In addition to these five indicators, each jurisdiction integrated their own professional knowledge to identify other relevant metrics for review and consideration. These individualized metrics are described in the *Project Methodology* section of this report.

CITY HOUSING DISPLACEMENT RISK PROFILES SNAPSHOT

For each of the four cities assessed in this analysis, a predominant "displacement risk type" was identified for critical attention. To form these characterizations, the consultant team considered outputs from corresponding RDI indicators, regional engagement, and existing policy review.

As noted previously, the aim in this section is to help outline what might be the *primary* drivers of potential displacement, racially disparate impacts in housing, and housing exclusion issues.

The suggestion of any given displacement type should not be interpreted as being mutually exclusive of the other types – meaning that some interplay among economic, physical, and cultural displacement is likely always happening.

At a regional trend level, all four jurisdictions are currently experiencing stark economic pressures on housing affordability. Where possible, this section intends to make connections about how this either has, or could, impact the types of residents predominantly living in the respective City.

Note – this analysis does not make conclusive statements about the interactions of housing displacement conditions and impacts *between* cities. It is not reasonable to suggest from the basis of this analysis whether pressures in one locale influence or connect to pressures in another.

For more information and analysis see the report section titled "*City Displacement Risk Profiles and Recommendations*".

Lacey

Most Prominent Risk Type(s): **Economic & Cultural**

Lacey's economic pressures make it stand out as a prominent risk type. However, careful attention will be needed to ensure that these pressures do not disproportionately impact its increasingly diverse population of residents.

According to available data Lacey's population experienced:

- A significant **increase in racial and ethnic diversity** among residents between 2010 – 2023;
- A substantial **increase in severely cost-burdened households** for both renters and homeowners between 2015–2019 and 2017–2021
- **A decrease in the availability of affordable rental units** for very-low-income (earning between 30% and 50% AMI) households.
- A relative **decrease in renters earning less than 80% AMI** but an **increase in low-income homeowners** between 2015-2019 and 2017-2021
- An **increase in overall homeowner households**

Olympia

Most Prominent Risk Type: **Physical**

While a range of housing types exist in Olympia, its displacement risk is uniquely characterized by the loss of existing low-income homeownership alongside a significant challenge in providing affordable rental units for very-low-income households.

According to available data Olympia's population experienced:

- A significant **increase in racial and ethnic diversity** among residents between 2010 – 2023;
- A **decrease in cost-burdened renter households** but an **increase in cost-burdened and severely cost-burden homeowner households** between 2015–2019 and 2017–2021
- A slight increase in affordable units for extremely-low income households, but a **significant decrease in the availability of affordable rental units for very-low-income households** (earning between 30% and 50% AMI).
- A notable **increase in low-income renters** (50%-80% AMI) and a **decrease in low-income and extremely low-income** homeowners between 2015-2019 and 2017-2021
- An **increase in overall homeowner households**

Tumwater

Most Prominent Risk Type: **Economic**

Tumwater's economic displacement risk is characterized by the reciprocal relationship of subtle loss of low and middle-income renters with a significant lack of affordable housing for the lowest-income segments of the population.

According to available data Tumwater's population experienced:

- **Little to no change in relative racial and ethnic diversity** among residents between 2010 – 2023;
- A relative **decrease in cost-burdened households** for renters and homeowners between 2015–2019 and 2017–2021
- A relative **decrease in the availability of affordable rental units for very-low-income households** (earning between 30% and 50% AMI).
- A **general decrease across most income categories for renters and homeowners** except for above median income households between 2015-2019 and 2017-2021
- An **increase in overall homeowner households** and a **slight decrease in renters.**

Yelm

Most Prominent Risk Type: **Economic and Physical**

Unlike the commonly interpreted definition of physical displacement, Yelm's greatest risk comes from its pressure to meet the demand for suburbanization. Above-median income populations make up the largest increase income type and as folks look to redevelop land effectively, it has the risk of impacting highly vulnerable population groups disproportionately.

According to available data Yelm's population experienced:

- Little to **no change in relative racial and ethnic diversity** among residents between 2010 – 2023;
- A relative **increase of severely cost-burdened renter households** and a **significant decrease in cost-burdened homeowner households** between 2015 – 2019 and 2017 – 2021
- Little to **no observable change** in the availability of affordable rental units
- Relative **decrease of very-low and low income renters** and a **significant increase** in **above median income homeowners** 2015-2019 and 2017-2021
- Significant **decrease overall of renters and homeowners** households

Project Methodology

OVERVIEW

This report comprehensively analyzes housing displacement risk in Lacey, Olympia, Tumwater, and Yelm, synthesizing academic research, demographic data, and extensive community engagement. The project investigates past and present housing policies contributing to displacement, identifies vulnerable populations, and evaluates potential policy interventions. This study offers a multi-faceted understanding of displacement dynamics in the region by integrating insights from peer-reviewed journals, U.S. Census Bureau and HUD estimates, and direct community feedback through affinity groups and surveys. The policy evaluation framework, incorporating both displacement-specific and locality-specific criteria, aims to provide actionable recommendations for preventing and mitigating housing displacement, addressing racially disparate impacts**,** and ensuring equitable housing access for all residents.

ACADEMIC RESEARCH

The project team submitted a Housing Displacement Academic Field Scan memo synthesizing the latest peer-reviewed journals from the last decade that respond to the lines of questioning set out within the Housing Displacement Analysis project for the cities of Lacey, Olympia, Tumwater, and Yelm, including:

- What past housing policies resulted in resident displacement?
- What types of current housing policies create the risk of resident displacement?
- What groups and communities are at the greatest risk of housing displacement?

DATA INDICATORS

To localize the understanding of displacement risk, the project team completed a demographic analysis based on the Racially Disparate Impacts (RDI) tool published by the Washington State Department of Commerce, which outlines a variety of indicators to measure displacement risk. The RDI tool relies on estimates published by the U.S. Census Bureau and the Department of Housing and Urban Development (HUD). Additionally, demographic data was pulled from the American Community Survey.

SOURCES & DATA LIMITATIONS

Our data evaluation utilizes two primary sources for comparative analysis of metrics at certain snapshots in time.

The first is the HUD Comprehensive Housing Affordability Strategy (CHAS) datasets published as two distinct time frames (2015-2019 and 2017-2021) we use to measure:

a. cost-burdened populations
b. affordable rental units
c. household income levels
d. homeownership rates

The second source is the US Census American Community Survey 5-Year Estimate data published as two distinct snapshots in time (2010 and 2023) that we used to measure:

- racial and ethnic diversity
- age

Why Were These Sources Chosen

The metrics of racial and ethnic diversity, cost burden, rental unit affordability, household income levels, and homeownership rates were derived from the racially disparate impact (RDI) tool published by the WA Department of Commerce. The RDI toolkit is designed by the Department of Commerce (Commerce) for jurisdictional use and guidance in efforts to meet the requirements of the Growth Management Act (GMA). The toolkit is featured under "Step 2: Gather and analyze data" in the published Racially Disparate Impacts Guidance [6]. The toolkit compiles statistics relevant to a jurisdiction's analysis of racially disparate impacts in its community.

The US Census American Community Survey 5-Year Estimate is regularly considered a gold stand tool for national demographic data. The survey has evolved over time and is typically based on a 90% confidence interval serving as one of the most reliable data points available for this work.

What These Sources can Cannot Tell Us

As described in the Department of Commerce's Affordable Housing Planning Resources, The RDI Data Toolkit was most recently updated in November 2023 for jurisdictions completing periodic comprehensive updates in 2024 and 2025.

The currently available RDI Data Toolkit that can be accessed online currently only limits ACS Community Survey Data through 2020 and CHAS data date ranges through 2010-2014 and 2015-2019. As a result, the consultant team directly accessed and utilized the most recently available CHAS data through HUD for 2017-2021. The database was culled to ensure that the corresponding tables were pulled for Lacey, Olympia, Tumwater, and Yelm.

[6] Department of Commerce (2023). Guidance to Address Racially Disparate Impacts. https://deptofcommerce.app.box.com/s/1l217l98jattb87qobtw63pkplzhxege

As the data pulled represents a snapshot in time for the corresponding date range it is difficult to pinpoint the current status of any one metric. Let alone the limitation that the most current and recent date range extends through 2021.

As a result, the consultant team used a comparative analysis across the windows to determine and interpret trends rather than provide absolute results.

The CHAS data, which were publicly available at the time of this report's publication, have some limitations. The 2017-2021 data set represents a synthesis of data from that period and does not tell us much about the effects of COVID-19 or any policy actions undertaken since 2021.

As identified in feedback from jurisdictional staff, conducted community engagement, and academic research the real and perceived impacts of the COVID-19 pandemic on housing instability were significant. We strongly recommend jurisdictions contextualize the analysis in this report for what folks know and understand about the pandemic.

Unfortunately, it is likely only very recently that there is a reasonable data range since the onset of the pandemic to begin understanding the explicit implications on housing displacement, racially disparate impacts, and housing exclusion. Without that window of data, this report is not able to make any strong correlations between the two.

Each jurisdiction is responsible for their respective responses to the updates required by the amended HB1220 (2021). As mentioned in the executive summary, this report should be utilized as a supplementary document to support jurisdictions in this effort. This report should not be considered and/or submitted as a direct response to the statutory requirements without additional deliberation from jurisdictional staff.

COMMUNITY ENGAGEMENT

Affinity Groups

Uncommon Bridges coordinated four (4) affinity group conversations to gather community stakeholders to discuss housing displacement risk in Lacey, Olympia, Tumwater, and Yelm. Affinity group topics included:

1) Manufactured housing communities,

2) Communities of low-wage workers,

3) Military families and households, and;

4) Accessory dwelling units.

Multi-Media Survey

A key aspect of this project involves assessing community insight, perceptions, and lived experiences around livability, affordability, and displacement impacts in Olympia, Lacey, Tumwater, and Yelm. A

robust data collection effort, including multi-lingual outreach via community anchors, focus groups, and an open-access multi-modal survey resulting in 167 responses, sought to engage those frequently involved and new perspectives and experiences not included in past policy and housing assessments conducted in the region.

POLICY EVALUATION & CRITERIA

To assess and evaluate policy options and recommendations, we completed a policy evaluation using two sets of criteria: displacement-specific and locality-specific. The displacement-specific criteria were based on the Department of Commerce's categories of displacement: economic, physical, and cultural. Through discussions with city staff, audits of the city's Housing Needs Assessments, and stakeholder feedback, we identified additional criteria to evaluate better potential policies and recommendations based on the jurisdiction's unique needs.

Criteria Evaluation Method and Scoring

Policies were evaluated using criteria and scored using the following scale. The scores were then totaled to calculate an overall impact score for each policy option.

- **Yes, positive impact (+2):** The policy option has a positive impact and directly addresses the criterion.
- **Somewhat positive impact (+1):** The policy option has a somewhat positive impact, or indirectly addresses the criterion.
- **Neutral/ No impact (+0):** The policy option does not directly address the criterion, but may benefit other housing priorities for the jurisdiction.
- **Negative impact (-1):** The policy option may exacerbate, or detract from, addressing the criterion or issue. However, while some options may have a negative impact on one element of the scoring criteria, it does not mean that they are bad options overall. For example, encouraging redevelopment may increase housing supply overall and reduce long-term displacement pressures, but also increase physical displacement pressures in the short-term.

We used the following criteria for all jurisdictions in this report as a common set.

- **Racially Disparate Impacts**: Does this policy prevent racially disparate impacts or work to repair past harm?
- **Economic Displacement**: Does this policy help prevent or mitigate economic displacement?
- **Physical Displacement**: Does this policy help prevent or mitigate physical displacement?
- **Cultural Displacement**: Does this policy help prevent or mitigate cultural displacement?
- **Housing Exclusion**: Does this policy prevent the exclusion of historically marginalized or other vulnerable populations from accessing safe and affordable housing appropriate for their needs?
- **Implementation Considerations**: Does the city have the staff and resources necessary to implement this policy effectively?

In addition to these, each jurisdiction had its own unique (yet sometimes related and similar) policy evaluation criteria.

Lacey

- Does this policy encourage or remove barriers to providing affordable housing?
- Does this policy encourage the preservation of naturally occurring affordable housing, such as manufactured home parks and other existing affordable units?
- Does this policy increase the overall housing supply?
- Does this policy reduce housing costs?

Olympia

- Does this policy incentivize and support the development of affordable and deeply affordable housing, including supportive housing?
- Does this policy increase the housing supply, including middle housing and ADUs?
- Does this policy encourage the preservation of naturally occurring affordable housing, such as manufactured home parks and other existing affordable units?

Tumwater

- Does this policy encourage the preservation of naturally occurring affordable housing, such as manufactured home parks and other existing affordable units?
- Does this policy incentivize and support the development of affordable and deeply affordable housing?
- Does this policy encourage adaptive reuse of existing residential units or other buildings where feasible?
- Does this policy incentivize or reduce barriers to developing diverse housing types, including smaller homes?

Yelm

- Does this policy encourage the preservation of naturally occurring affordable housing, such as manufactured home parks and other existing affordable units?
- Does this policy incentivize or reduce barriers to developing diverse housing types, including smaller homes?
- Does this policy incentivize and support the development of affordable and deeply affordable housing?

IDENTIFYING POLICY RECOMMENDATIONS

After analyzing the critical issues in each jurisdiction and the challenges of housing displacement, we compiled a comprehensive inventory of potential policies and programs to address these concerns. The list also included each city's respective Housing Action Plan policies to better reflect existing

programs and policies, show how these contribute to or detract from anti-displacement goals, and help the cities prioritize future implementation actions of their HAP.

Existing Conditions of Displacement Risk

OVERVIEW

In addition to the data analyzed from the identified databases, the team also conducted a comprehensive literature review to expand understanding on what other factors contribute towards risk of displacement. Summarized below, this research was considered as part of the holistic evaluation of data analysis to develop recommendations.

What Types of Housing Policies Contribute to Housing Displacement?

In reviewing a swath of peer reviewed journals from the last decade, the consultant team identified eight key trends in response to the contributing policies and conditions for housing displacement nationally.

Property owners have significantly more protection under the law than renters do.
A lack of anti-discriminatory legal protection for renters using programs such as the Housing Choice Voucher Program makes it difficult to find landlords in more affluent communities who accept such vouchers, leading to displacement through residential self-segregation by socio-economic class.[7]

Even when protections for renters exist, a lack of awareness keeps renters in the dark about their rights.
A lack of information sharing and public understanding about housing protection eligibility, such as that implemented during COVID-19, enables property owners to coerce renters into arrangements against their best interests[8]

Policies to improve housing stability in the U.S. most often exacerbate housing insecurity for renters.
U.S. housing policies have historically prioritized homeownership and homeowners, often worsening housing insecurity for renters by offering few direct protections against displacement. Little is done for rent-burdened renters to alleviate displacement risk other than advocating for them to buy homes, a distant possibility for most. [9]

The conversion of public housing public housing projects into mixed-income communities drives housing displacement for low-income households.

---

[7] Max Besbris, Sadie Dempsey, Brian McCabe, and Eva Rosen, "Pandemic Housing: The Role of Landlords, Social Networks, and Social Policy in Mitigating Housing Insecurity During the COVID-19 Pandemic," *RSF: The Russell Sage Foundation Journal of the Social Sciences* 10, no. 4 (2024): 210.

8 Besbris et al., "Pandemic Housing," 210.

[9] Stefanie DeLuca and Eva Rosen, "Housing Insecurity among the Poor Today," *Annual Review of Sociology* 48, no. 1 (2022): 350.

The conversion of public housing into mixed-income communities, such as through the HOPE VI program, resulted in significant displacement for low-income households, with only a fraction of the original residents returning to the redeveloped properties. [10]

Growing suburban corporate landlord conglomerates are more likely than local small businesses to resort to eviction rather than relieving renters in financial distress.
Governments could better support, subsidize, and grow the amount of local small businesses that provide rental housing while incentivizing them to pass on savings to renters. Local property owners are more likely to provide support and relief to renters in financial distress, while corporate landlords are more likely to immediately resort to eviction. [11]

Low housing supply drives up costs and disproportionality burdens low-income households.
Increasing housing supply makes housing more affordable, and housing affordability is directly correlated to an individual's housing cost burden, an indicator of displacement risk. When new housing is built and priced higher, it pushes older housing into a lower price range, creating additional housing availability for lower-income households. This concept, known as housing stock filtering, is at odds with the commonly accepted drivers of gentrification and neighborhood change.[12]

Who is at Greatest Risk of Housing Displacement?

Across the same period, the literature provides insight into what groups and communities are at the greatest risk of housing displacement. Five types of populations stand out:

Older, poorer people of color
Residential mobility amongst the poor is variable, unplanned, and typically involuntary. Eviction filings doubled between 2000 and 2016. Older people, African Americans, and Latinos are overrepresented across most types of displacement. [13]

Suburban dwellers living below the poverty line
Suburban poverty creates conditions ripe for displacement. With less public transit, poorer households must spend more money to get around. They have limited access to nonprofit services

[13] Lee and Evans, "Forced to Move," 102415

typically concentrated in cities and often confront a municipal infrastructure less suited to deliver holistic social services.[14]

Manufactured housing residents

Households in mobile homes are over twice as likely to live in poverty. Half of all mobile homes in the U.S. are in urban areas. There are 1.7 million mobile home renter households and 5.3 million mobile homeowners in the U.S. Mobile home closures should be treated as mass evictions, which are primary indicators of physical displacement risk. Those who own their trailers but don't have the means to move them to another location face an additional loss of a valuable household asset. [15]

Families with children

Households with children are at an increased risk of displacement. A Milwaukee study found that renters with two children have an 11.7% chance of being evicted and a 9.5% chance with one child. [16]

Households spending more than 30% of their income on housing costs

Cost-burdened households spend more than 30% of income on housing costs including rent, mortgage, and utilities. Households spending more than half of their income on housing are considered severely cost-burdened.

Equipped with these learnings, the consultant team paired existing trends occurring across the Thurston County/South Sound Region to infer how housing displacement may be occurring within each of the local jurisdictions.

DATA & INDICATORS SUMMARY

For this analysis, we are guided by the Washington State Department of Commerce's guidance on measuring possible strategies through its Racially Disparate Impacts (RDI) tool[17]. Measuring the phenomena of displacement, gentrification, and racialized disparities in housing exclusion is complex, the RDI tool guides jurisdictions to consider five primary indicators as "supportive" metrics towards this analysis. The RDI tool relies on estimates published by the U.S. Census Bureau and the Department of Housing and Urban Development (HUD) and is presented in four-year ranges.

[16] Matthew Desmond and Carl Gershenson, "Who Gets Evicted? Assessing Individual, Neighborhood, and Network Factors," *Social Science Research* 62 (2017): 365.

[17] The RDI toolkit is designed for use by the Department of Commerce (Commerce) in its support of local jurisdiction efforts to meet the requirements of the Growth Management Act (GMA). The toolkit compiles statistics relevant to a jurisdiction's analysis of racially disparate impacts in its community.

This analysis compares RDI data points from 2015-2019 and 2017-2021. Additionally, demographic data was pulled from the American Community Survey.

Generally, housing displacement risk increases when:

- The population becomes more racially and ethnically diverse
- Households are spending more than 30% of their income on housing
- Rental units become unaffordable for extremely low-income residents
- Poverty rates increase in a community
- Homeownership rates decline

Racial Diversity

Housing displacement risk is generally understood to increase as a population becomes more racially and ethnically diverse. The U.S. Census Bureau collects data on race and ethnicity, classifying individuals into distinct categories for these estimates. Race is recognized as a social identity historically tied to oppression, while ethnicity refers to groups sharing common ancestry, language, or dialect. Respondents to the Census self-identify their race from six options (White, Black or African American, American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Other) and can select one or more options. They also identify as either Hispanic or Latino or Not Hispanic or Latino, with "Hispanic or Latino" defined as a person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.

The table above shows the change in racial and ethnic diversity across the four cities between 2010 and 2023, using the US Census American Community Survey 5-Year Estimate data.

Change in # of Residents by Race & Ethnicity	Lacey	Olympia	Tumwater	Yelm
American Indian and Alaska Native	-54	+2	-154	+89
Asian	+1,437	+924	+608	-132
Black or African American	+1,345	+345	+755	+279
Hispanic or Latino (of any race)	+4,126	+3,099	+1,484	+908
Native Hawaiian and Other Pacific Islanders	+658	+421	+106	+468
Other Race	-44	+132	+470	+0
Two or more races	+2,908	+2,617	+1,786	+604
White	+6,278	+2,335	+4,630	+2,216
Net Pop Change 2010 - 2023	+16,654	+9,875	+9,685	+4,432

Cost Burden

Housing displacement risk is a critical concern, fundamentally linked to how much households spend on housing relative to their income, and the availability of affordable rental units, particularly for those with lower incomes. A household is considered to be experiencing a "cost burden" if its monthly housing expenses exceed 30% of its income, which can severely impact its ability to meet other essential needs like food, healthcare, and education. This burden is further categorized: "not cost-burdened" (under 30%), "cost-burdened" (30-50%), and "severely cost-burdened" (over 50%).

An analysis of data between 2015-2019 and 2017-2021 reveals concerning trends in cost burden across Lacey, Olympia, Tumwater, and Yelm. For renters, the picture is mixed and, in some cases, challenging. Overall, while the number of non-cost-burdened homeowners is increasing across all cities, the growth of non-cost-burdened renter households is significantly slower, and in some areas, even declining.

The tables below show the change in the cost-burdened populations across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets, representing a difference in the data between the years 2015-2019 and 2017-2021.

Change in # Households by Cost-Burdened Status: Renters	Lacey	Olympia	Tumwater	Yelm
Not Cost Burdened	+110	-655	+100	-35
Cost-Burdened (30-50%)	+65	-305	-65	-30
Severely Cost-Burdened (>50%)	+200	+15	-105	+45
Not Calculated	-30	-75	+11	+5

Change in # Households by Cost-Burdened Status: Homeowners	Lacey	Olympia	Tumwater	Yelm
Not Cost Burdened	+765	+840	+355	+435
Cost-Burdened (30-50%)	+370	+145	-175	-59
Severely Cost-Burdened (>50%)	+185	+190	+45	+50
Not Calculated	+45	+5	-10	+0

Rental Affordability

A housing unit is officially deemed affordable if its gross housing costs constitute less than 30% of a household's income. Across all four cities—Lacey, Olympia, Tumwater, and Yelm—there is a scarcity of rental housing options suitable for very low-income households, defined as those earning between 30% and 50% of the Area Median Income (AMI). The data used for these assessments, specifically estimates of the number of rental housing units affordable to households within various income ranges, comes from the HUD Comprehensive Housing Affordability Strategy (CHAS) datasets. These estimates are derived from self-reported housing costs, which inherently reflect any housing subsidies or other benefits households might utilize. It is important to note that a rental unit designated as affordable for an extremely low-income household (less than 30% of AMI) may not necessarily be occupied by a household within that specific income bracket. The rental unit affordability estimates exclude housing units that lack complete kitchen or plumbing facilities, vacant units not explicitly listed for rent or sale, and group quarter units.

The table below shows the change in vacant affordable units across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets, representing a difference in the data between 2015-2019 and 2017-2021.

Change in # of Rental Units by Affordability Rating	Lacey	Olympia	Tumwater	Yelm
Extremely-Low Income (<30% AMI)	+0	+25	+0	+0
Very-Low Income (30-50% AMI)	-90	-110	-45	+0
Low-Income (50-80% AMI)	+40	+10	+10	+0
Moderate-Income (80%-100% AMI)	+150	+75	+5	+0

Income

While all four cities are seeing growth in renter and homeowner households with above median incomes, the high cost of housing is outpacing wage gains, leading to high housing cost burdens.

The Washington Department of Commerce's RDI tool utilizes Area Median Income (AMI) to account for regional variations in labor and housing markets. AMI represents the midpoint of an area's income distribution, with half of households earning above and half earning below this figure. The Growth Management Act mandates that jurisdictions address the housing needs of families across the entire income spectrum. Income data and housing affordability estimates are derived from the U.S. Department of Housing and Urban Development's Comprehensive Housing Affordability Strategy (CHAS) data. Household income estimates are categorized into bins based on AMI, adjusted for household size:

- Extremely Low Income (<30% of AMI)
- Very Low Income (30%−50% of AMI)
- Low Income (50%−80% of AMI)
- Moderate Income (80%−100% of AMI)
- Above Median Income (>100% of AMI)

Overall, while there's an evident increase in higher-income households (both renters and homeowners) across all four cities, the data also highlights shifts in lower-income brackets that could impact housing displacement risk, especially given the general trend of housing costs outpacing wage gains.

The tables below show the change in population income levels across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets representing a difference in the data between 2015-2019 and 2017-2021.

Change in # Households by Income Status: Renters	Lacey	Olympia	Tumwater	Yelm
Extremely-Low Income (<30% AMI)	-160	-110	-240	+15
Very-Low Income (30-50% AMI)	-235	-180	-85	-60
Low-Income (50-80% AMI)	-475	+225	-20	-15
Moderate-Income (80%-100% AMI)	+535	-85	-15	+35
Above Median Income (>100%)	+680	+730	+305	+20

Change in # Households by Income Status: Homeowners	Lacey	Olympia	Tumwater	Yelm
Extremely-Low Income (<30% AMI)	+250	-90	-145	-10
Very-Low Income (30-50% AMI)	+15	+40	+60	-65
Low-Income (50-80% AMI)	-255	-130	-90	+5
Moderate-Income (80%-100% AMI)	-150	+25	-10	-90
Above Median Income (>100%)	1495	+1345	+400	+585

Tenure/Homeownership

Housing displacement risk generally increases when homeownership rates decline. Tenure refers to the distribution of homeowners and renter households across a region.

The tables below show the change in renter and owner households across the four cities based on HUD Comprehensive Housing Affordability Strategy (CHAS) datasets, representing a difference in the data between 2015-2019 and 2017-2021.

Change in # of Households	Lacey	Olympia	Tumwater	Yelm
Renters	+345	+590	-60	-715

Change in # of Households	Lacey	Olympia	Tumwater	Yelm
Homeowners	+1365	+1190	+225	-640

Age

Older populations face a higher risk of housing displacement. Across Lacey, Olympia, Tumwater, and Yelm, there's a noticeable trend of aging populations, although the specific population changes by age vary significantly among the cities. The document presents data from 2010 to 2023, using the US Census American Community Survey 5-Year Estimate, to illustrate these shifts in age distribution.

While there's variation, the detectable trend of aging populations, particularly in cities like Olympia and Yelm, which saw significant shifts in individual age ranges, suggests an increasing proportion of residents are more vulnerable to housing displacement.

The table below shows the change in age distribution across the four cities between 2010 and 2023, using the US Census American Community Survey 5-Year Estimate data.

% Change in Population by Age	Lacey	Olympia	Tumwater	Yelm
Under 5 years	-0.90%	+0.00%	-1.10%	-4.00%
5 to 9 years	+0.00%	-1.80%	+0.70%	+2.00%
10 to 14 years	-0.80%	-1.00%	-1.60%	-2.20%
15 to 19 years	+0.00%	+0.90%	-3.90%	-1.20%

20 to 24 years	-0.10%	-5.10%	+0.90%	+4.20%
25 to 29 years	+0.30%	+0.70%	+0.60%	-1.80%
30 to 34 years	+0.00%	+2.70%	+1.00%	+1.30%
35 to 39 years	+0.00%	+0.70%	+0.60%	-0.10%
40 to 44 years	+1.30%	+0.30%	+1.60%	-0.80%
45 to 49 years	-0.10%	-0.60%	-0.90%	+0.20%
50 to 54 years	-1.90%	-2.00%	-1.90%	+1.20%
55 to 59 years	-2.10%	-0.90%	-1.00%	+0.80%
60 to 64 years	+1.50%	-0.10%	+2.50%	+2.00%
65 to 69 years	+2.30%	+1.30%	+2.00%	-0.30%
70 to 74 years	+1.10%	+3.50%	+1.10%	+2.20%
75 to 79 years	-0.10%	+1.80%	+0.30%	-0.20%
80 to 84 years	-0.30%	+0.00%	+0.40%	-1.10%
85 years and over	-0.30%	-0.60%	-0.80%	-1.60%

WHAT ARE COMMUNITY STAKEHOLDERS SAYING?

The project team undertook an extensive and collaborative outreach process to gain a locally rooted understanding of housing goals and displacement risks. We connected with planning staff, residents, and housing advocates across sectors to better understand the housing challenges facing the area.

The project team aggregated and synthesized the stakeholder feedback across all engagement touchpoints to distill the main takeaways into the following themes for consideration.

- Cities should identify ways to monitor renter income verification, establish local ordinances to enforce attainable income verification, and identify and address price fixing.
- Cities should use creative zoning overlays and innovative land use policies to classify and protect mobile home communities and other types of affordable housing.
- Zoning should balance commercial development with opportunities for affordable housing.
- Cities should create a program to support upgraded utilities and infrastructure and promote incentives for property owners to improve their properties, including multifamily, single-family, accessory, and mobile homes. Tenants forced to relocate due to substandard maintenance (condemned properties) should receive support to relocate to a nearby affordable housing option effectively.
- Affordable housing and homelessness prevention programs should work closely together as they share the same clientele.
- Military service providers, including VAs, volunteer groups, bases, centers, and cities, should ensure their programs are adequately staffed with the most current information regarding housing and support benefits for military families and households.
- Cities should promote educational programs that explain to homeowners and potential buyers the long-term investment opportunity of ADUs and the financial plan required to pursue a build.
- Permitting processes to develop new affordable housing should continue to be simplified and streamlined.
- Cities could support residents, including current residents of manufactured home communities, by forming cooperatives or community land trusts (CLTs) to be prepared to exercise the right of first refusal and manage properties independently.
- Cities should create a program to support private ownership of mobile home communities and private rental units by local, family-owned operations with on-site management and disincentivize corporate owners from buying land on which manufactured home communities are located.
- Cities should take steps to minimize the amount of potential long-term housing being used for short-term transient rentals (Airbnb).

- Cities should work with community groups to coordinate a one-stop shop for housing benefit explanations and application support.
- Cities should promote an educational campaign to private landlords about legal requirements and renter income qualifications for those on supplemental income.
- Cities should offset the impacts of increased taxes and tax increment financing, as they are seen to contribute to unaffordability for renters and low-income households by increasing the cost of living as new upscale developments are built.
- Cities should consider rent control options and develop and enforce adequate tenant protections (eviction proceedings, rent increase management, etc.).
- Cities should balance suburban development with investment in affordable housing in urban centers.
- Cities should ensure robust transportation is available to residents and minimize the land used for parking over housing.
- Urban renewal efforts should include the protection of existing affordable housing units.

Relevance for Analysis

Takeaways from the individual sources of data input: research, data indicators, and engagement were considered holistically

It is important to also recognize the validity of each of these sources of information. Across the various points of engagement, we heard from members of our community that are rarely offered such a prominent and direct line to our planning processes. Diverse, real, and engaged voices contributed to the findings of this analysis through written, audio & video recording, and facilitated points of engagement. This feedback should be read in the context that they are direct feedback from community stakeholders based on their viewpoints, level of understanding, and lived experience with housing.

Final policy recommendations are not solely based on any single point of feedback; as we aim to integrate the perspectives into what is possible within the confines of individual city capacity for implementation.

City Displacement Risk Profiles & Recommendations

OVERVIEW

This section examines the issues of displacement at the city level, analyzing key indicators such as increased housing cost burdens on both renters and homeowners, the diminishing availability of affordable rental units for low-income households, and significant shifts in demographic composition. Furthermore, this section will review current housing policies and provide priority policy recommendations to mitigate economic displacement and foster a more equitable housing environment.

LACEY – ECONOMIC & CULTURAL DISPLACEMENT

Lacey's economic pressures make it stand out as a prominent risk type. However, careful attention will be needed to ensure that these pressures do not disproportionately impact its increasingly diverse population of residents.

According to available data Lacey's population experienced:

- A significant **increase in racial and ethnic diversity** among residents between 2010 – 2023;
- A substantial **increase in severely cost-burdened households** for both renters and homeowners between 2015–2019 and 2017-2021
- **A decrease in the availability of affordable rental units** for and very-low-income (earning between 30% and 50% AMI) households.
- A relative **decrease in renters earning less than 80% AMI** but an **increase in low-income homeowners** between 2015-2019 and 2017-2021
- An **increase in overall homeowner households**

Considering the above trends, the data shows that while Lacey's population grew overall, people from non-white racial and ethnic backgrounds are working and living in Lacey. Given that historical research tell us that racially and ethnically diverse households are more likely to experience displacement, it is important to understand what is driving these communities to Lacey and understand the broader spectrum of cultural needs.

This is an important detail because as households become increasingly cost-burdened, families that are already living on the edge of their means must make difficult choices about where to allocate their income. Across the region, folks engaged for this process often remarked often how they see housing instability quickly teetering on to risk of homelessness for folks that must look for alternative ways to stay afloat; a reminder that "*displacement can happen to anybody*".

Over the same period, we can see that, income and wages are not keeping pace with the rising cost of living, leading to a decline in real income and purchasing power, meaning more people are cost burdened. Concerningly, this trend appears to impact both renters and homeowners alike – the latter of which might be vulnerable to economic displacement if housing costs, such as property taxes, continue to climb.

As real earnings decrease, so to have the availability of affordable units. Review of existing policies and overlapping engagement describes possible impacts from the significant decrease in the availability of affordable rental units for extremely low-income and very-low-income households, coupled with a general lack of social safety nets. We made connections to feedback we heard in both the survey and affinity group discussions that some of these impacts spiked during/post the COVID pandemic. For some folks, like households with a member in the military, it is not easy to move out of the area in search of more affordable housing. Folks on fixed incomes or social security for example do not have the same opportunity to shift brackets and find that their options for quality affordable housing have narrowed. This aligns with the general understanding from the literature purporting that a lack of affordable rental options for the lowest income brackets heightens the risk of displacement.

Housing Displacement Risk Policy Analysis

The City of Lacey has comprehensively reviewed its existing Housing Element and related policies within its Comprehensive Plan, utilizing criteria consistent with the Department of Commerce's guidance on Racially Disparate Impacts. This evaluation sought to identify policies supporting housing goals or potentially contributing to inequitable outcomes. The analysis reveals a general split, with many of Lacey's housing policies categorized as "supportive" or "approaching" their intended objectives.

Lacey's "supportive" policies are actively working to foster housing growth and affordability. These include initiatives designed to increase residential densities, promote infill development, and ensure a sufficient supply of housing that is affordable across all income levels and meets unique housing needs. Furthermore, these policies emphasize critical partnerships with external agencies, recognizing their role in enhancing overall housing affordability and preventing displacement and homelessness. These represent strong foundational efforts in the city's housing strategy.

However, policies classified as "approaching" suggest areas where Lacey can further strengthen its impact. While generally supporting housing growth, these policies could be refined to more effectively address overall affordability and integrate robust anti-displacement strategies. The goal is to provide housing equitably to all income brackets, particularly those historically excluded or displaced. For instance, a specific policy (Policy C under Goal 3 in the Central Planning Area) has been identified for clarification. Proposed revisions aim to ensure that development standards for middle housing options are sensitive to existing neighborhoods and align with broader city priorities, such as climate resilience, while remaining clear and unambiguous.

In sum, Lacey's current housing goals and policies demonstrate an awareness of housing displacement and include efforts to mitigate disproportionate impacts. To build upon these existing strengths and solidify its commitment to equitable housing, the City should actively explore and implement additional policies that foster stronger community partnerships. These collaborations are crucial for proactively preventing displacement and cultivating a truly supportive environment for both current and future residents of Lacey.

Priority Policy Recommendations

This report outlines key strategies for the City of Lacey to augment its current efforts in preventing racially disparate housing impacts, increasing the availability of deeply affordable housing, and mitigating displacement, particularly economic displacement.

Strengthening Community Partnerships and Expanding Capacity

To achieve greater success, the City can significantly enhance its existing work and policies by fostering stronger community connections and partnerships with local organizations. Such collaborations effectively expand the capacity of city staff, allowing for more comprehensive outreach, program delivery, and specialized support. Supplemental efforts and social services, extending beyond the scope of housing policy alone, are also evident for Lacey's housing initiatives to reach their full potential and address the multifaceted needs of its diverse population.

Comprehensive Plan Updates and Policy Refinements

The upcoming update to Lacey's Comprehensive Plan presents a critical opportunity to refine existing policies and introduce new ones to address current gaps. Several policies within the Housing Element of the current Comprehensive Plan could benefit from minor edits to clarify their intent, remove vague language, establish stronger connections to other Comprehensive Plan elements, or eliminate potentially exclusive language. Specific proposed edits for numerous policies are detailed in the Final Existing Comprehensive Plan Policy Evaluation Framework Appendix.

Addressing Policy Gaps and New Program Development

To tackle significant policy gaps, new policies and programs are required. Foremost among these is the need for policies that preserve existing and naturally affordable housing units. This is crucial for preventing economic displacement and enabling residents to remain within their established communities. Concurrently, dedicated efforts are necessary to protect manufactured housing communities and to avoid displacement within these vital affordable housing sectors. Furthermore, there is a clear need for affordable housing for lower-wage earners, ensuring that individuals working in Lacey can also afford to reside within the city. Beyond housing, cultural displacement can be mitigated through increased placemaking efforts and the preservation of existing community events, businesses, religious institutions, and other facilities important to Lacey's diverse cultural groups.

Prioritizing Housing Action Plan Implementation

Finally, the City's Housing Action Plan (HAP) contains numerous actions that Lacey should continue to implement by advancing them to the Planning Commission. Policies from the HAP that scored highly in the Policy Evaluation Matrix should be considered priority initiatives for immediate implementation, as they directly align with the City's housing goals and address identified deficiencies.

Implementation Capacity & Limitations

Achieving the desired outcomes of these initiatives—namely, effectiveness, sustainability, and broad community benefit—will necessitate significant financial resources and dedicated staff time.

Financial Constraints

The primary limitation in successfully executing these housing programs is likely financing. Navigating city political processes and securing the funding for recommended programs will be a considerable challenge. City staff will require augmented capacity to actively pursue and secure diverse financial resources, including competitive grants, funds from regional or state programs, and other potential sources. Without robust and consistent funding streams, the reach and impact of these initiatives will be significantly constrained.

Staffing and Administrative Demands

Implementing many revised Housing Element policies, existing HAP actions, and newly developed policy recommendations will place substantial demands on city staff. This includes the considerable time required to collaborate with community partners in drafting and creating new ordinances to update the city’s development regulations. Additionally, significant staff effort will be necessary to present and work with the Planning Commission and City Council through the review and approval processes for these ordinances. Beyond legislative development, the recommended policies will also require considerable ongoing staff time to identify, cultivate, and maintain strong community partnerships and collaborative efforts with local organizations, essential for these housing initiatives’ effective delivery and long-term success.

Conclusion

Overall, the analysis points towards the need for prioritizing unique housing needs among low-income, workforce, and senior housing; identifying creative ways to support and maintain homeownership, especially among lower-income households (e.g. manufactured home parks), and ensuring that attention on the cliff between low-income affordability and homelessness does not exacerbate toward the latter.

OLYMPIA – PHYSICAL DISPLACEMENT

While a range of housing types exist in Olympia, its displacement risk is uniquely characterized by the loss of existing low-income homeownership alongside a significant challenge in providing affordable rental units for very-low-income households.

According to available data Olympia's population experienced:

- A significant **increase in racial and ethnic diversity** among residents between 2010 – 2023;
- A **decrease in cost-burdened renter households** but an **increase in cost-burdened and severely cost-burden homeowner households** between 2015 – 2019 and 2017 – 2021
- A slight increase in affordable units for extremely-low income households, but a **significant decrease in the availability of affordable rental units for very-low-income households** (earning between 30% and 50% AMI).
- A notable **increase in low-income renters** (50%-80% AMI) and a **decrease in low-income and extremely low-income** homeowners between 2015-2019 and 2017-2021
- An **increase in overall homeowner households**

The trends may suggest that low-income households who are already homeowners, may not be able to keep pace with increasing costs to sustain homeownership and stay in place as seen in the dramatic increase of cost-burdened homeowners.

Interestingly, the increase of low-income renters is a relatively complicated trend to interpret when comparing against the other data points. While inconclusive, it is possible that efforts to increase and retain low-income renters is working positively, especially where renter households have become less cost burdened. Conversely, it is possible that once homeowners have been economically forced to become renters, thus putting a strain on the availability of rental units.

While inconclusive, the engagement data paints an interesting picture around how the market has handled the availability of single-family homes. Some point to the mixed quality of converting these properties to rental units, while others remark that the once naturally-occurring affordable homes are falling into disrepair or being redeveloped entirely into units that cater to higher-income earning residents and visitors.

Some relevant remarks from individual and group engagement include:

- *… in my case, I'm in the "family home" with a failing roof. It's too big for just me. There is enough room to create 2 separate living units. This would allow me to remain here. There's also off-street, discreet parking space for a tiny home/RV. I'd happily leverage what I have to create more space for others in need of housing. Not everyone needs a BIG space.*
- *The lack of single family homes for people to rent, rent to own and even buy. The quality of houses in Olympia has significant differed maintenance, which often causes health hazards to those who rent*

- *In Olympia, housing displacement has manifested through the conversion of single-family homes into high-end rentals and Airbnb properties.*

Housing Displacement Risk Policy Analysis

A segment of Olympia's housing policies is identified as "supportive" of housing goals. These include policies that encourage the adaptive reuse of non-residential buildings for housing purposes, support the provision of affordable housing by minimizing regulatory barriers and streamlining review processes, and actively work to prevent physical obstacles that could isolate new developments from existing neighborhoods.

However, most of Olympia's housing-related policies are categorized as "approaching" their objectives. While these policies aim to increase the overall housing supply within Olympia, they possess opportunities for strengthening. Enhancements could include more explicit measures to address racially disparate impacts, the integration of targeted anti-displacement strategies, and proactive efforts to prevent housing exclusion, particularly by prioritizing historically marginalized populations.

Several policies within the Comprehensive Plan are identified as "challenging" housing goals due to their potential to create unintended negative consequences. These policies often require additional design or architectural features in new housing or seek to preserve existing neighborhood "character." Such policies may inadvertently restrict housing production and limit housing choices, potentially contributing to affordability issues. To mitigate these challenges, proposed edits are detailed in the Final Existing Comprehensive Plan Policy Evaluation Framework Appendix, advocating for removing vague language and introducing greater flexibility to foster increased housing production and housing diversity.

Priority Policy Recommendations

The City of Olympia should consider prioritizing the implementation of these high-scoring HAP policies and other highly rated policies from the Policy Evaluation Matrix. Advancing these initiatives to the Planning Commission would align with city priorities and address current deficiencies in Olympia's housing policy framework.

New Policy Recommendations

To enhance housing affordability and equity, the following new policy initiatives are recommended:

- Protection and Preservation of Manufactured Home Communities: Implement policies to safeguard and preserve manufactured home communities. This is crucial for retaining a vital source of affordable housing within the city.
- Encouraging Retention and Maintenance of Existing Affordable Housing: Develop additional measures to incentivize the retention and maintenance of existing affordable housing units.

Particular emphasis should be placed on high-opportunity neighborhoods or areas with historical segregation patterns to promote equitable access to housing.

High-Scoring Housing Action Plan (HAP) Policies

An analysis of the City's existing Housing Action Plan (HAP) policies revealed several high-impact strategies that align to overcome housing barriers:

- Evaluation of Home Fund Relationship: Assess the relationship between Olympia's Home Fund and the county's home fund to ensure alignment and effectiveness in meeting shared housing goals.
- Expanding Residential Tenant Improvement Allowances: Broaden the allowance for residential tenant improvements without triggering additional land use review requirements. This can encourage the maintenance and upgrading of existing housing stock.
- Allowing Single Room Occupancy (SRO) Housing: Permit Single Room Occupancy (SRO) housing in all multifamily zones. This policy diversifies housing options and can provide more affordable solutions for individuals.

Implementation Capacity & Limitations

The City has already expended considerable political capital enacting multi-part strategies to address housing affordability. Though these efforts may need to continue for a long period to see definitive progress, politics will need to match the necessary longevity of these programs to see significant results. Changes in leadership or shifts in City funding for programming could erode support for existing implementation efforts that are having a net positive effect.

The City has done a good job of identifying specific barriers to ease displacement pressure. The Housing Action Plan actions collectively represent quite a lot of staff time or consultant time, but quite a number of them can also be seen as making progress against displacement pressures as well.

Conclusion

Overall, the analysis points towards the need for encouraging the retention and maintenance of existing affordable housing stock; expand allowances of residential tenant improvements and use creative policy approaches to encourage the appropriate matching of resident characteristic and lived experience to possible housing types, such as manufactured home communities or Accessory Dwelling Units.

TUMWATER – ECONOMIC DISPLACEMENT

Tumwater's economic displacement risk is characterized by the reciprocal relationship of subtle loss of low and middle-income renters with a significant lack of affordable housing for the lowest-income segments of the population.

According to available data Tumwater's population experienced:

- **Little to no change in relative racial and ethnic diversity** among residents between 2010 – 2023;
- A relative **decrease in cost-burdened households** for renters and homeowners between 2015 – 2019 and 2017 – 2021
- A relative **decrease in the availability of affordable rental units for very-low-income households** (earning between 30% and 50% AMI).
- A **general decrease across most income categories for renters and homeowners** except for above median income households between 2015-2019 and 2017-2021
- An **increase in overall homeowner households** and a **slight decrease in renters.**

While Tumwater's population has grown through the last census cycles, the data shows that the largest demographic increase has been of above-median income residents. Research shows that when a population has an increase in higher earning residents that it can potentially increase demand and upward pressure on housing prices. Importantly, these pressures can exacerbate financial burden on lower-income residents and accelerate economic displacement.

Tumwater does not seem to portray a situation with widespread affordability crisis with signs of stability across the spectrum. However, attention should be focused on the stark distinction of those that are not experiencing stability. Among all groups, residents earning 30% - 50% of Area Median Income are both increasing and struggling to find affordable units. As pressures continue the risk becomes that the affordability gap may become pulled in opposite directions leaving long-term residents having to navigate the unstable housing landscape.

To protect against these risks exacerbating, there is an opportunity to focus efforts on preserving naturally occurring affordable housing such as mobile home parks. Similarly, strategies for new development can work to ensure that the scale of housing prices do not outpace the general population's ability to keep up. The economic displacement risk has the potential to increase without protections for Tumwater's long-term vulnerable residents.

Housing Displacement Risk Policy Analysis

Many of Tumwater's housing policies are classified as "supportive" or "approaching" their stated objectives. These policies generally foster housing growth, ensure the provision of necessary services to support residential development, aim to mitigate displacement, provide support for transitional and supportive housing, and address the needs of other populations with unique housing requirements. Policies categorized as "approaching" encourage various housing types to

meet diverse demands. However, these policies could be strengthened to more effectively prevent displacement, explicitly address housing affordability and availability across different income brackets, and safeguard historically marginalized populations from disproportionate impacts.

Only one policy appears twice within the plan and is identified as "challenging." This policy, focused on protecting residential areas through aggressive code enforcement to prevent undesirable activities and uses, risks exacerbating displacement or disproportionately affecting lower-income and historically marginalized groups.

A comparative analysis with other jurisdictions indicates that the language used in Tumwater's Housing Action Plan (HAP) policies is not as robust as it could be. The upcoming update and incorporation of HAP goals and actions into the 2025 Comprehensive Plan (CUP) Housing Element presents a critical opportunity to strengthen policy language. Incorporating more definitive terms, such as "require" instead of "encourage," would enhance the enforceability and impact of these policies, leading to more substantial progress in achieving housing goals and mitigating displacement.

Priority Policy Recommendations

The City of Tumwater should prioritize implementing these high-scoring HAP policies and other highly rated policies from the Policy Evaluation Matrix. Advancing these initiatives to the Planning Commission would align with city priorities and address current deficiencies in Tumwater’s housing policy framework.

- Community Land Trust Program for Mobile Home Communities: Establish a program modeled after a Community Land Trust to support and preserve mobile home communities. This aims to secure long-term affordability and stability for residents within these vital housing sectors.
- Support Program for Private, Local, Small-Scale Ownership of Mobile Home Communities: Implement a city program to support private, local, small-scale ownership of mobile home communities. This initiative seeks to leverage the existing mobile home housing stock and actively work towards preserving current affordable housing options.
- Increased Staffing for Accessory Dwelling Unit (ADU) Processing: Augment staffing capacity within relevant departments to expedite the processing of Accessory Dwelling Unit (ADU) permits. This measure aims to reduce administrative costs and streamline the development of diverse housing types.
- High-Scoring Housing Action Plan (HAP) Policies - An analysis of the City’s existing Housing Action Plan (HAP) policies revealed several high-impact strategies that align with displacement mitigation objectives:
    - "Notice of Intent to Sell" Ordinance for Multifamily Developments: Implement an ordinance requiring property owners to provide advance notice of their intent to sell

multifamily developments. Such a policy can allow residents and community organizations to explore preservation options.

- Program for Preserving and Maintaining Manufactured Home Parks: Establish a dedicated program to preserve and maintain healthy and viable manufactured home parks. This initiative, with some details integrated into the new recommendations, is crucial for protecting an existing source of affordable housing.
- Mixed-Income Housing Development: Prioritize policies that encourage the integration of market-rate and low-income housing within new developments. This approach aims to prevent the concentration of low-income housing in specific areas, fostering more diverse and integrated communities.

Implementation Capacity & Limitations

Prioritizing Mobile Home Park Preservation

While all Housing Action Plan (HAP) policies represent a foundational step, the most significant impact on displacement mitigation will be achieved through focused efforts on preserving existing mobile home parks (MHPs) as a critical source of affordable housing stock. This approach leverages an already established and often more affordable housing type. Successful implementation will necessitate sustained education and communication efforts to clearly articulate the rationale behind this focus, thereby strengthening existing political support for MHPs within the City.

Resource Implications for Policy Implementation

The successful implementation of many revised Housing Element policies, remaining HAP actions, and new policy recommendations for Tumwater will require significant staff time and resources. This includes collaborating with community partners to develop necessary ordinances for updating the city's development regulations. Furthermore, considerable staff engagement will be required for review and approval processes with the Planning Commission and City Council.

Beyond ordinance development, recommended policies will demand substantial staff capacity to identify, cultivate, and maintain robust community partnerships and collaborative efforts with local organizations. To ensure these programs' effectiveness, sustainability, and broad reach, city staff will also require additional capacity to actively pursue diverse funding avenues, including grants, regional, and state programs.

Conclusion

Tumwater faces a significant risk of economic displacement, driven by a severe shortage of affordable rental housing, especially for extremely low and very low-income households, and an increase in severely cost-burdened homeowners. This is evidenced by a complete loss of rental units affordable to very low-income families and declining numbers of lower-income renters, while higher-income residents are increasing, driving up housing costs. Although current housing policies

are generally supportive, they lack robust language to prevent displacement and ensure affordability. Key recommendations include preserving mobile home communities, regulating short-term rentals, and streamlining Accessory Dwelling Unit (ADU) development. Implementing these changes will require substantial resources and staff capacity to address the critical housing needs of the city's most vulnerable residents.

YELM – ECONOMIC & PHYSICAL DISPLACEMENT

Unlike the commonly interpreted definition of physical displacement, Yelm's greatest risk comes from its pressure to meet the demand for suburbanization. Above-median income populations make up the largest increase income type and as folks look to redevelop land effectively, it has the risk of impacting highly vulnerable population groups disproportionately.

According to available data Yelm's population experienced:

- Little to **no change in relative racial and ethnic diversity** among residents between 2010 – 2023;
- A relative **increase of severely cost-burdened renter households** and a **significant decrease in cost-burdened homeowner households** between 2015–2019 and 2017–2021
- Little to **no observable change** in the availability of affordable rental units
- Relative **decrease of very-low and low income renters** and a **significant increase** in **above median income homeowners** 2015-2019 and 2017-2021
- Significant **decrease overall of renters and homeowners** households

As Yelm's overall population has grown, it's land use is being forced to shift from being a meaningfully rural city to one that is beginning to serve young families as a suburb community. Above-median income earning families appear to be moving to Yelm and redeveloping existing land for housing; a trend referenced explicitly by some during the engagement process.

During the engagement process, the team also ensured to focus on households with a member in the military to best describe the respective situations. Military households desire improved coordination of housing services, primarily where the VA lacks capacity and efficiency. Moreover, as folks anticipate improved city infrastructure, they hope that there can be options to support military and veteran households throughout the civilian community.

Housing Displacement Risk Policy Analysis

Yelm's housing policies generally support housing goals, including policies that encourage diverse residential growth, efficient permit processing, allow various residential uses and types that provide for diverse housing needs, and increase funding for affordable housing or reduce barriers to home ownership. Policies indicated as "approaching" could be improved primarily by considering affordability for all income groups and prioritizing those that have been historically marginalized. Still, they generally encourage housing growth, the maintenance of existing housing stock, and the

provision of housing near transit and other services. There aren't any policies identified as "challenging."

Priority Policy Recommendations

These recommended policies, both new and those within the existing HAP, represent critical steps for Yelm to proactively address economic displacement and ensure housing stability for its residents.

- Protection and Preservation of Manufactured Home Communities: Policies should be developed and implemented to ensure manufactured home communities' long-term viability and affordability. This is critical for preserving a significant source of accessible housing for many residents at risk of displacement.
- Regulation of Short-Term Rental Programs: Measures should be adopted to minimize converting long-term housing units into transient short-term rentals. This preserves the existing housing stock for permanent residents and prevents further reduction of available affordable housing options.
- High-Scoring Housing Action Plan (HAP) Policies - An evaluation of the City's existing Housing Action Plan (HAP) policies identified several high-impact strategies that align to prevent economic displacement:
    - Partnerships with Affordable Housing Developers and Support Organizations: The City should prioritize and strengthen partnerships with low-income housing developers, the Housing Authority of Thurston County, and other relevant organizations. These collaborations are essential for developing and supporting housing solutions for low-income individuals, the workforce, seniors, and other populations with unique housing needs.
    - Leveraging Federal Resources for Affordable Housing: The City should actively pursue and utilize federal funding mechanisms, including Community Development Block Grants (CDBG) and Section 108 loans, to secure resources for affordable housing initiatives.
    - Offering Density Bonuses for Low-Income Housing: Implementing density bonuses for developments that include low-income housing units incentivizes the creation of more affordable housing options, directly combating the factors that lead to economic displacement.

Implementation Capacity & Limitations

Implementing effective housing programs, particularly those providing direct housing or rental assistance to low- and very-low-income populations, presents significant challenges for small towns

and jurisdictions such as Yelm. These challenges primarily revolve around such initiatives' funding, assembly, and administration.

Smaller municipalities' limited financial and administrative capacities often hinder their ability to secure the capital for substantial housing projects or ongoing rental assistance programs. Furthermore, the complexities inherent in program design, inter-agency coordination, and sustained operational oversight can prove difficult to manage without dedicated resources and specialized expertise. Despite these hurdles, establishing such housing infrastructure is critical for adequately addressing the housing needs of vulnerable residents and mitigating issues like economic and physical displacement.

Conclusion

Yelm's existing Housing Action Plan strategies point to policies that generally support housing goals, including policies that encourage diverse residential growth and allow various residential uses and types to provide for diverse housing needs. Given the likeliness that both population growth will continue to increase and contend with the limitations of the existing Urban Growth Area (UGA), the City will need to continue its acute focus on building relationships with developers and builders to ensure that local housing needs are met and not overlooked.

Strategies to consider include the incentivizing of low-income housing to developers through density bonuses and to disincentivize corporate owners from buying existing affordable homes in the community. Moreover, ongoing opportunities to strengthen relationships with the VA and other supports for military families may also be appropriate.

CONCLUSION

Addressing housing displacement is crucial for fostering strong, connected communities. If left unaddressed, displacement can lead to increased homelessness and heightened socioeconomic disparities. Our report includes tailored policy recommendations that cater to each city's specific needs and capabilities. These suggestions include a variety of strategies, such as adjusting zoning laws to support diverse housing options, providing tenant protection initiatives, enhancing financial assistance programs, and improving cooperation among local agencies.

We acknowledge that there are deeper layers of analysis that could help answer questions that emerge through this report. We anticipate that in addition to utilizing this information to support each cities' comprehensive plan updates, the jurisdictions may choose to identify more nuanced trends within their communities. Suggestions include:

- Neighborhood analysis of displacement pressures
- Multi-variate analysis of intersecting demographics with income and housing status
- Local historical research
- Additional regional correlation and trends

In conclusion, tackling housing displacement requires a collaborative approach that brings together governmental bodies, community organizations, and private sector partners. By embracing our recommendations and prioritizing housing stability, Lacey, Olympia, Tumwater, and Yelm can move toward building more equitable, inclusive, and resilient communities.

MEMORANDUM

Date: October 17, 2024
To: Planning and Community Development Departments of the Cities of Lacey, Olympia, Tumwater, and Yelm
From: Ariam Ford, AICP, Equity & Engagement Lead, Uncommon Bridges
Subject: Housing Displacement Academic Field Scan

Purpose

The following document is a synthesis of the latest peer reviewed journals from the last decade that responds to the lines of questioning set out within the Housing Displacement Analysis project for the cities of Lacey, Olympia, Tumwater, and Yelm, including:

- What past housing policies resulted in resident displacement?
- What types of current housing policies create the risk of resident displacement?
- What groups and communities are at the greatest risk of housing displacement?

What past housing policies resulted in resident displacement?

1. **Property owners have significantly more protection under the law than renters do.** The de facto imbalance of power between landlords and tenants creates situations where the wellbeing of renters becomes secondary to financial profit with little to no regulation. For example, the Housing Choice Voucher Program provides choices to renters beyond government housing projects, however the lack of protection under anti-discriminatory law makes it difficult for renters to find landlords who accept vouchers, opening the door for residential self-segregation by socio-economic class (Besbris et al. 2024, 210).
2. **Even when protections for renters exist, a lack of information can be exploited by property managers to coerce renters to act against their own interests.** The housing-specific COVID-19 programs are a prime example of protections put in place that many renters didn't realize they were eligible for (Besbris et al. 2024, 212).
3. **Policies to improve housing stability in the US most often exacerbate housing insecurity for renters.** That is because US housing policy has a legacy of protecting, preferring, and subsidizing for homeownership and homeowners. Little is done for rent-burdened renters to alleviate displacement risk other than advocating for them to buy homes, a distant possibility for most (DeLuca, Stefanie, and Eva Rosen 2022, 345).
4. **Driven by macro-level increases in income inequality, neighborhoods are becoming more segregated by income.** Contrastingly, racial integration is increasing, especially in U.S. cities (Chapple et al. 2017, 10).
5. **The definition of displacement is not universal.** Caused by investment or divestment, displacement takes many forms - direct, indirect, physical, economic, or exclusionary (Chapple et al. 2017, 27).

6. **The conversion of public housing projects into mixed-income communities drives housing displacement for low-income households.** Despite the opportunity intentionally designed into mixed-income, multifamily public housing projects, only one-fifth of original project residents return to experience those benefits (Lee and Evans 2020, 6).
7. **Market corrections and global events do little to overcome the effects of racism and socio-economic discrimination on housing displacement.** While major events such as Covid-19 may create housing uncertainty across all demographics and identities, low-income people of color remain the most likely to experience housing displacement (Lee and Evans 2020, 18).
8. **Quantitative efforts to measure displacement underrepresent the plight of disadvantaged populations by not considering lived experience.** To counter this, displacement studies must include user generated, geographically tracked content to truly understand the state of gentrification risk in a community (Chapple and Zuk 2016, 115).

What types of current housing policies create the risk of resident displacement?

1. Government aid delivery is notoriously slow but critical when trying to implement policies designed to reduce housing displacement. **Nesting housing aid into existing, successful, and well-known programs creates a waterfall effect by increasing household disposable income** and thereby decreasing the percentage of total income a household spends on housing (Besbris et al. 2024, 212).
2. **Governments should take a holistic and comprehensive approach to mapping the overlap of government aid programs in their communities.** Only 1 in 4 households eligible for rental assistance actually receives it. There are opportunities to "nest" housing-specific policies within existing and more consistent government programs to boost successful delivery (Besbris et al. 2024, 208).
3. **Housing relief is most expediently and directly delivered via a landlord or property manager.** Government aid can oftentimes fail to provide timely relief for even those who qualify for assistance (Besbris et al. 2024, 217).
4. **To reduce housing displacement risk, governments should focus on increasing household financial stability and reducing socioeconomic inequities within Suburban communities.** Today, most low-income Americans live in the inner suburbs, where evictions are increasing faster than in urban areas. (Rutan et al. 2023, 164)
5. **To fight a growing trend of suburban corporate landlord conglomerates, governments should work to support, subsidize, and grow the amount of local small businesses that provide rental housing while incentivizing them to pass on savings to renters.** Local property owners are more likely to provide support and relief to renters in financial distress, while corporate landlords are more likely to immediately resort to eviction.(Rutan et al. 2023, 166)
6. **Code enforcement and condemnation can be a policy-driven displacement factor without a comprehensive plan to support displaced tenants.** Low-income households may reside in substandard conditions, and in cases where a property owner is unable or refuses to make improvements, tenants may be forced to vacate (Lee and Evans 2020, 3).

7. **Policies restricting housing development contribute to displacement risk.** Increasing housing supply makes housing more affordable, and housing affordability is directly correlated to an individual's housing cost burden, an indicator of displacement risk (Been, Gould Ellen, and O'Regan 2019, 4).
8. **New housing is required to achieve the displacement risk reduction benefits of housing stock filtering.** When new housing is built and priced higher, older housing is pushed down into a lower price range, creating additional housing availability for lower-income households. This concept is at odds with the commonly accepted drivers of gentrification and neighborhood change (Been, Gould Ellen, and O'Regan 2019, 6).

What groups and communities are at the greatest risk of housing displacement?

1. **Suburban poverty is ripe for displacement.** With less public transit, poorer households must spend more money to get around. They have limited access to non-profit services typically concentrated in cities, and confront a municipal infrastructure less suited to deliver holistic social services support (Rutan et al. 2023, 166).
2. **Residential mobility amongst the poor is variable, unplanned, and typically involuntary.** Eviction filings doubled between 2000 and 2016 (DeLuca, Stefanie, and Eva Rosen 2022, 348).
3. **Households in mobile homes are over twice as likely to live in poverty.** Half of all mobile homes in the US are in urban areas. There are 1.7 million mobile home renter households and 5.3 million mobile homeowners in the US (DeLuca, Stefanie, and Eva Rosen 2022, 348).
4. **Mobile home closures should be treated as mass evictions, which are primary indicators of displacement risk**. Those who own their trailers but don't have the means to move them to another location face an additional loss, leading to not only displacement but also the loss of a valuable household asset (Lee and Evans 2020, 6).
5. **Older people, African Americans, and Latinos are overrepresented across most types of displacement** (Lee and Evans 2020, 9).
6. **Households with children are at an increased risk of displacement.** A Milwaukee study found that renters with two children have an 11.7% chance of being evicted and a 9.5% chance with one child (Desmond and Gershenson 2017, 8).
7. **Renters who experience job loss are more likely to be evicted.** A Milwaukee study found that renters who lost their jobs were twice as likely to be evicted (Desmond and Gershenson 2017, 8).
8. **Community character change, or gentrification, is not necessarily an indicator of displacement.** A Milwaukee study found no significant difference in eviction risk between those living in racially or economically transitioning neighborhoods and those who live in homogenous communities (Desmond and Gershenson 2017, 9).
9. **Having a more affluent support system is not necessarily a buffer to experiencing housing displacement, but decreasing poverty shocks amongst those in your social networks will decrease displacement risk.** A Milwaukee study found that while renters in social networks with others experiencing poverty shocks are more likely to experience

eviction, having a more affluent social network did not decrease a renter's risk of eviction (Desmond and Gershenson 2017, 8).

Existing Comprehensive Plan Policy Evaluation Framework

For the cities of Olympia, Lacey, Tumwater, and Yelm

Evaluation Method 1
Olympia 2
Lacey 10
Tumwater 25
Yelm 43

Evaluation Method

With the passage of HB 1220 in 2021, jurisdictions are required to make adequate provisions for housing for all economic segments of the community. This includes identifying *"local policies and regulations that result in racially disparate impacts, displacement, and exclusion in housing."*

The following evaluation table assesses the existing Comprehensive Plan's goals and policies for impacts for racially disparate impacts, including displacement and exclusion, in the Housing Element and residential goals and policies in the Land Use Element. The evaluation used the following criteria in evaluating each goal and policy, consistent with the Department of Commerce's Racially Disparate Impacts guidance:

- **Supportive**: The policy is valid and supports meeting the identified housing needs. The policy is needed and addresses identified racially disparate impacts, displacement and exclusion in housing.
- **Approaching**: The policy can support meeting the identified housing needs but may be insufficient or does not address racially disparate impacts, displacement, and exclusion in housing.
- **Challenging**: The policy may challenge the jurisdiction's ability to meet the identified housing needs. The policy's benefits and burdens should be reviewed to optimize the ability to meet the policy's objectives while improving the equitable distribution of benefits and burdens imposed by the policy.
- **Not Applicable (NA)**: The policy does not impact the jurisdiction's ability to meet the identified housing needs and has no influence or impact on racially disparate impacts, displacement, or exclusion.

All Goals and policies in the Housing Element were included in this evaluation. For the Land Use Element, only residential-use related policies were evaluated.

Olympia

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Land Use Element			
PL6.1	Establish and periodically update a design review process and design criteria consistent with the goals and policies in the Comprehensive Plan for: • Commercial and mixed use development adjacent to freeways and public streets • Other highly-visible, non-residential development, such as the Port of Olympia, campus developments, and master planned developments • Multifamily residential development and manufactured housing parks • Detached homes on smaller lots (less than 5,000 square feet) and in older neighborhoods (pre-1940) • Properties listed on a Historic Register or located within a designated historic district	**Approaching**	The policy could address that the design review process should be reviewed and updated to ensure a streamlined review process and sufficient housing production to meet capacity goals.
PL6.4	Require multi-family housing to incorporate architectural forms and features common to nearby housing; to include porches, balconies, bay windows and similar details; to have entries oriented to streets or a courtyard, and include accessible open space; and to be reduced in size near lower density residential districts.	**Challenging**	Additional restrictions on multi-family housing types can result in less affordable rents. While design standards are not necessarily negative–they can ensure liveable spaces–this policy should be updated to balance both design and affordability goals, allowing flexibility to

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
			ensure housing production and choices.
PL8.4	Avoid height bonuses and incentives that interfere with landmark views.	**Challenging**	Limiting density for aesthetic reasons can result in lower housing capacity. However, this may be an acceptable compromise as long as the housing and affordability considerations are planned for elsewhere. To avoid subjective views being used as a tool for limiting housing development, this policy should be updated to specify or map viewsheds are most important to preserve through code provisions.
PL11.2	Provide incentives for housing in commercial districts near transit stops.	**Approaching**	Providing housing near jobs can be helpful in preventing displacement while reducing overall community impacts such as traffic. The incentives could be expanded to consider affordability as well.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
GL14	Olympia's neighborhoods provide housing choices that fit the diversity of local income levels and lifestyles. They are shaped by thorough public planning processes that involve community members, neighborhoods, and city officials.	**Approaching**	While this policy does address housing for the different income levels, it should be expanded to clearly call-out low income groups and prioritize housing for historically marginalized groups.
PL14.2	Concentrate housing into three high-density Neighborhoods: Downtown Olympia, Pacific/Martin/Lilly Triangle; and the area surrounding Capital Mall. Commercial uses directly serve high-density neighborhoods and allow people to meet their daily needs without traveling outside their neighborhood. High-density neighborhoods are highly walkable. At least one-quarter of the forecasted growth is planned for downtown Olympia.	**Approaching**	While this policy does address the city's housing needs and demands, it does not address reducing displacement and affordability pressures.
PL14.3	Preserve and enhance the character of existing Low-density Neighborhoods. Disallow medium or high-density development in existing Low-density Neighborhood areas except for Neighborhood Centers.	**Challenging**	Language that aims to preserve low-density, single-family neighborhood "character" can often be used as a proxy for prohibiting more diverse housing choices. Instead of "character," this policy could consider height and building form while allowing more flexibility for similar, yet more affordable, housing types such as middle housing.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
PL14.4	In low-density Neighborhoods, allow medium-density Neighborhood Centers that include civic and commercial uses that serve the neighborhood. Neighborhood centers emerge from a neighborhood public process.	**Approaching** / **Supporting**	Depending on how inclusive the Neighborhood Center identification and engagement process is, this policy would support anti-displacement through placemaking and housing, or it may cause further displacement.
Housing Element			
GL16	The range of housing types and densities are consistent with the community's changing population needs and preferences.	**Approaching**	While the policy acknowledges different community and population needs, it could be improved by incorporating affordability and anti-displacement language.
PL16.2	Adopt zoning that allows a wide variety of compatible housing types and densities.	**Approaching**	The policy intends to allow a variety of housing types. However, "compatible" is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.
PL16.3	Allow 'clustering' of housing compatible with the adjacent neighborhood to preserve and protect environmentally sensitive areas.	**Approaching**	This goal would allow parcels that would be undevelopable under strict application of the zoning code to be developable. However, "compatibility" could be further defined to ensure the building types used are not exclusionary.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
PL16.4	Disperse low and moderate-income and special needs housing throughout the urban area.	**Approaching**	While this policy seeks to ensure lower income households are not isolated to certain parts of the city, it could be enhanced to go further by allowing and fostering capacity rather than focusing on dispersion.
PL16.5	Support affordable housing throughout the community by minimizing regulatory review risks, time and costs and removing unnecessary barriers to housing, by permitting small dwelling units accessory to single-family housing, and by allowing a mix of housing types.	**Supportive**	This policy supports housing growth and affordability.
PL16.6	Promote home ownership, including by allowing manufactured homes on individual lots, promoting preservation of manufactured home parks and allowing these parks in multi-family and commercial areas, all subject to design standards ensuring compatibility with surrounding housing and land uses.	**Approaching**	This policy could be improved by better defining compatibility. Consider identifying whether compatibility is driven by architectural massing or design styles.
PL16.7	Allow single-family housing on small lots, but prohibit reduced setbacks abutting conventional lots.	**Approaching**	Allowing smaller homes on smaller lots reduces land costs. “Conventional lots” is unclear however.
PL16.8	Encourage and provide incentives for residences above businesses.	**Supportive**	Incentivizing residences over businesses creates flexibility and a variety of units.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
PL16.9	In all residential areas, allow small cottages and townhouses, and one accessory housing unit per home -- all subject to siting, design and parking requirements that contribute to neighborhood character.	**Approaching**	While allowing cottages and townhouses supports housing and affordability goals, “neighborhood character” is vague and could be tied to exclusionary housing practices.
PL16.10	Require effective, but not unreasonably expensive, building designs and landscaping to blend multi-family housing into neighborhoods.	**Challenging**	Requiring additional standards for multi-family housing types ultimately hinders affordability.
PL16.11	Require that multi-family structures be located near a collector street with transit, or near an arterial street, or near a neighborhood center, and that they be designed for compatibility with adjacent lower density housing; and be 'stepped' to conform with topography.	**Approaching**	Requiring multi-family housing to be located near transit or neighborhood centers increases their accessibility, but this policy could be expanded to include multi-family housing throughout the city to increase the number of housing units. This policy could also be improved by better defining compatibility.
PL16.12	Require a mix of single-family and multi-family structures in villages, mixed residential density districts, and apartment projects when these exceed five acres; and use a variety of housing types and setbacks to transition to adjacent low-density areas.	**Approaching**	Requiring a mix of single- and multi-family housing types could support housing growth and affordability, but it does not address reducing displacement and affordability pressures. This policy could be better improved by specifying the “mix” of housing.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
PL16.13	Encourage adapting non-residential buildings for housing.	**Supportive**	Adapting non-residential buildings for housing supports housing growth and affordability.
PL16.14	Provide annual information on affordable homeownership and rentals in the City, including the operative definitions of affordable housing, criteria to qualify for local, state, and federal housing assistance, data on current levels of market-rate and affordable housing, demand for market-rate and affordable housing, and progress toward meeting market-rate and affordable housing goals.	**Supportive**	Reviewing affordability and funding opportunities to increase housing annually is supportive of housing growth and affordability.
Downtown and other Neighborhoods - Neighborhoods			
GL20	Development maintains and improves neighborhood character and livability.	**Approaching**	This policy could be improved by specifying what “neighborhood character” means, as the term is vague and could be tied to exclusionary housing practices.
PL20.1	Require development in neighborhoods to be of a type, scale, orientation, and design that maintains or improves the character, aesthetic quality, and livability of the neighborhood.	**Challenging**	This policy could be improved by specifying “character”, which is vague and could be tied to exclusionary housing practices. This policy does not directly address housing affordability or supply. Requiring additional standards could ultimately hinder affordability.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
20.2	Unless necessary for historic preservation, prohibit conversion of housing in residential areas to commercial use; instead, support redevelopment and rehabilitation of older neighborhoods to bolster stability and allow home occupations (except convalescent care) that do not degrade neighborhood appearance or livability, nor create traffic, noise or pollution problems.	**Approaching**	This policy preserves housing in residential areas, but it could increase displacement risk as it does not address protecting residents from potential displacement or racially disparate impacts that may result from the redevelopment and rehabilitation of older neighborhoods.
20.3	Allow elder care homes and seniors-only housing and encourage child care services everywhere except industrial areas; but limit hospice care to multi-family and commercial districts.	**Approaching**	This policy addresses housing supply and affordability by allowing housing for the elderly. It could be more equitably applied to residential zones, rather than only being allowed in multi-family and commercial districts.
PL20.4	Support development and public improvements consistent with healthy and active lifestyles.	**Supportive**	This policy could be improved by prioritizing investment in neighborhoods that have historically experienced a lack of investment.
PL20.5	Prevent physical barriers from isolating and separating new developments from existing neighborhoods.	**Supportive**	This policy supports housing growth, affordability, and the integration of new developments.

Lacey

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Planning Areas - Central			
Goal 2	Maintain quality and function of existing residential areas in the Central Planning Area.	**Approaching**	This policy could be improved by specifying what "quality and function" means, as the terms are vague and could be tied to exclusionary housing practices, and by addressing how this policy would prevent exclusion, disproportionate impacts, or displacement.
Policy A	Acknowledge historical character and value of the Lacey Historic Neighborhood as a unique housing resource. Continue to require special development standards for Lacey Historic Neighbor- hood that recognize and preserve historical values and neighborhood character while allowing reasonable infill and development.	**Approaching**	This policy allows for infill and housing development in the Historic Neighborhood, but could be improved by defining what "reasonable" infill and development means, as well as "neighborhood character", as the term is vague and could be tied to exclusionary housing practices.
Policy B	Acknowledge character and value of older residential neighborhoods adjacent to the Central Business District as an affordable housing resource.	**Supportive**	This policy addresses housing supply and affordability, but should better define "character".
Policy C	Develop and implement a subarea plan for the Golf Club Road neighborhood.	**Approaching**	This policy could be improved by focusing on housing affordability and avoiding disproportionate impacts to vulnerable communities.
Goal 3	Provide opportunities for infill in the Central Planning Area.	**Supportive**	This policy is supportive of housing growth and affordability, but could be strengthened to consider

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
			potential racially disparate impacts.
Policy A	Maintain the liberal policy on accessory residential units while maintaining quality and character of neighborhood through performance standards and design review.	**Approaching**	While allowing ADUs supports housing growth and affordability, “character” should be better defined as the term is vague and could be tied to exclusionary housing practices.
Policy B	Provide opportunities for duplexes, triplexes and quadraplexes to locate in lower density neighborhoods as infill mechanisms which enhance neighborhood character by requiring exceptional and rigorous design requirements.	**Approaching**	While allowing duplexes, triplexes, and quadraplexes supports housing growth and affordability, “character” should be better defined as the term is vague and could be tied to exclusionary housing practices. “Exceptional and rigorous design requirements” can be leveraged to maintain high-cost housing types, unattainable to those from lower incomes or historically marginalized communities.
Policy C	Provide opportunities for single-family cluster housing on smaller lot sizes than the under- lying zone with exceptional and rigorous design requirements to maintain quality and character of neighborhood areas.	**Approaching**	While allowing cluster housing on smaller lots may reduce land costs and support housing affordability, “character” should be better defined as the term is vague and could be tied to exclusionary housing practices. Requiring “rigorous design requirements” could ultimately hinder affordability.
Planning Areas – Horizons Planning Area			

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Goal 1	Continue to encourage the development of a range of residential types, providing opportunity for high density residential development along arterials with transitions to existing low density residential development.	**Approaching**	This policy is supportive of housing growth and affordability, but could be strengthened to expand high density housing throughout the city and to consider affordability as well.
Policy A	Undeveloped property along College, Yelm, Ruddell, and Rainier Road should be zoned for moderate or high density residential development.	**Approaching**	This policy is supportive of housing growth, but could be strengthened to consider potential racially disparate impacts.
Policy B	Support infill development in higher density areas primarily around existing neighborhood centers, recognized nodes, and urban corridor areas.	**Supportive**	Providing housing near jobs and neighborhood centers can be helpful in preventing displacement while reducing overall community impacts such as traffic. The policy could be expanded to consider affordability as well.
Policy C	Encourage a full range of higher density residential uses, including single-family zero lot line developments, townhouse units, mixed residential use, planned residential developments and multifamily apartments.	**Supportive**	This policy is supportive of housing growth.
Policy D	Pay careful attention to blend different land use types to minimize potential land use conflicts while maintaining walkability as a priority.	**NA**	
Planning Areas – Lakes Planning Area			
Goal 3	Maintain existing moderate and high density housing opportunities along major arterials with convenient access to transit where no impact to environmentally sensitive areas will occur.	**Approaching**	Providing housing near transit can be helpful in reducing overall community impacts such as traffic. The incentives could be expanded to consider affordability and anti-displacement as well.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy A	Maintain areas for medium density development opportunities along Ruddell Road.	**Approaching**	This policy is supportive of housing growth, but could be expanded to allow high density housing or address anti-displacement in this area.
Planning Areas – Pleasant Glade Planning Area			
Goal 2	Provide opportunities for moderate and high density housing along major arterials with convenient access to potential transit, designating “urban reserve areas”, and annexing areas for public use where appropriate.	**Approaching**	Providing housing near transit can be helpful in reducing overall community impacts such as traffic. The incentives could be expanded to consider affordability and anti-displacement as well.
Policy A	Maintain existing areas for moderate and high density development opportunities along arterials of Sleater Kinney and 15th Avenue, contingent on provisions for public sewer.	**Supportive**	This policy is supportive of housing growth, but could be expanded to address anti-displacement in this area.
Policy B	Study and analyze designating the northwest portion of the planning area as an “urban reserve area” or “urban holding area” until sewer service can be extended.	**Supportive**	This policy is supportive of housing growth that is supported by adequate public facilities and infrastructure.
Policy C	Consider the annexation of the Greg J. Cuoio Community Park property for the future completion for public access.	**NA**	
Planning Areas – Seasons Planning Area			
Goal 3	Over the long term, encourage development of a range of residential types, with emphasis on providing additional moderate and high density opportunities.	**Approaching**	This policy addresses the city’s housing needs and growth, but does not address affordability.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy A	Maintain areas along Marvin Road for moderate density development as sewer becomes available. Review areas along Mullen, Yelm Highway, and 58th for moderate density development as sewer becomes available. Moderate and High Density zones should be planned to provide transitions to existing low density residential development.	**Approaching**	This policy supports housing growth but could be strengthened by considering impacts on vulnerable populations and racially disparate impacts.
Policy B	Encourage a full range of residential uses when adequate facilities and services are available to serve them.	**Approaching**	This policy supports housing growth but could be strengthened by considering impacts on vulnerable populations and racially disparate impacts.
Policy C	Pay careful attention to creating effective transitions between new developments of moderate density and existing low density development.	**Challenging**	Requiring additional standards for multi-family housing types may ultimately hinder housing affordability.
Housing Element			
Goal 1	Have a sufficient number of single-family dwelling units, multifamily units, and group and special need housing to provide a selection of rental and home ownership affordable housing opportunities for all persons.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability.
Policy A	Provide opportunities for development of all housing types to accommodate future needs for each type of housing.	**Supportive / Approaching**	While supportive, this policy will need to be updated to meet HB 1220 guidance on specific household income brackets. However, providing housing across all income segments reduces displacement risk and enables housing opportunities to all, regardless of income.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy B	Monitor the market and available land in the urban growth boundary to provide sufficient area zoned to meet the demand for various types of housing.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability.
Policy C	Encourage a wide variety of housing from low to high income in range to allow placement and mobility within the housing market.	**Supportive**	This policy is supportive of providing housing for all needs. It could be improved by prioritizing the provision of housing for low-moderate incomes and considering potential displacement impacts. This policy will need to be updated to meet HB 1220 guidance on specific household income brackets.
Policy D	Promote preservation and improvement of existing single-family and multifamily units.	**Approaching**	This policy supports housing growth by preserving existing housing stock. It could be improved by considering anti-displacement.
Policy E	Support neighborhood revitalization through available grants from the State, Federal and local levels to maintain and improve infrastructure.	**Approaching**	This policy supports housing growth by pursuing grant funding, but could be strengthened by prioritizing affordable housing or improving infrastructure in vulnerable neighborhoods. “Neighborhood revitalization” could be better defined, as it could lead to the displacement of historically marginalized populations.
Policy F	Support policies and programs to address the unique housing needs of the military population, including active duty, reserves, dependents and contractors.	**Supportive**	This policy is supportive of providing housing for all needs. It could be improved by addressing potential displacement impacts.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Goal 2	Achieve a balanced community with each planning area accommodating a fair share of housing needs for all persons.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability. It could be improved by addressing potential disproportionate impacts.
Policy A	Consider requirements and incentives designed to result in a balanced, increased supply of affordable housing in all parts of the City for very low, low and moderate income households.	**Supportive**	While supportive, this policy should be updated to take special attention to HB 1220. The policy could be improved by paying special attention to the lowest incomes, 0-30% Area Median Income, when it comes to housing capacity.
Policy B	Consider programs that include mandatory requirements for new developments targeting individual planning areas until housing goals for target groups are achieved.	**Approaching**	This policy supports housing growth by pursuing grant funding, but could be strengthened by specifying anti-displacement goals and prioritizing vulnerable populations or those with special housing needs.
Goal 3	Work with regional agencies and bodies to implement affordable housing techniques consistently and on a regional scale.	**Supportive**	This policy is supportive of housing growth and affordability.
Policy A	A myriad of affordable housing strategies should be implemented by all surrounding jurisdictions in Thurston County to meet housing needs on a regional scale for very low, low and moderate income households.	**Supportive**	This policy is supportive of housing growth and affordability.
Policy B	Public and nonprofit agencies, such as the Housing Authority with expertise in housing practices and special needs, should be a major partner in inclusionary programs.	**Supportive**	This policy is supportive of housing growth and affordability.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy C	The Housing Authority, or other agencies, should take a lead role where its expertise and function lend itself to best accomplish program objectives. Lead responsibility might include such tasks as qualifying households by income bracket, monitoring target objectives, administration of an affordable housing trust, taking ownership of dedicated lots and units, contracting for the development of units, monitoring the sale and resale controls of designated public units, and other related tasks.	**Supportive**	This policy is supportive of housing growth and affordability.
Goal 4	Achieve housing that is compatible and harmonious with existing neighborhood char- acter while allowing infill and providing for environmental sensitivity.	**Approaching**	Language that aims to preserve low-density, single-family neighborhood “character” can often be used as a proxy for prohibiting more diverse housing choices. Instead of “character,” this policy could consider height and building form while allowing more flexibility for similar, yet more affordable, housing types such as middle housing.
Policy A	When designating areas for infill and zoning classifications, consider and place emphasis on the composition of the neighborhood, housing need, available infrastructure, principals of walk-ability and healthy communities.	**Approaching**	This policy is supportive of housing growth, but could be strengthened to address reducing displacement and affordability pressures.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy B	When implementing infill projects in designated areas, require design of infill projects that: ● Meet the housing needs of the planning area considering variety and choice. ● Integrate successfully into the existing residential environment considering form based concepts and healthy community objectives. ● Provide a form, look and feel and social functionality that will add to the character, desirability and value of the surrounding neighborhood.	**Approaching**	This policy is supportive of housing growth, but could be strengthened to address reducing displacement and affordability pressures. Language that aims to preserve low-density, single-family neighborhood "character" can often be used as a proxy for prohibiting more diverse housing choices.
Policy C	Continue to utilize design review guidelines for all residential developments.	**Approaching**	The policy intends to ensure new development is integrated with the rest of the city, but additional design requirements could ultimately hinder the development of affordable housing.
Goal 5	Provide a variety of housing opportunities for those with special needs.	**Supportive**	This policy supports housing growth and could be strengthened to address affordability.
Policy A	Provide opportunities for development of various types of group housing.	**Supportive**	This policy supports housing growth and could be strengthened to address affordability.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy B	Ensure a full range of housing and facilities for the accommodation of persons with special needs exist within each planning area, with consideration for promotion of housing in those planning areas providing the most services for such individuals.	**Supportive**	This policy supports housing growth and could be strengthened to address affordability.
Policy C	Design group homes and facilities for special populations so that they are integrated, compatible, and harmonious with surrounding land uses.	**Approaching**	The policy intends to allow housing for a variety of needs. However, “compatible” is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.
Policy D	Enforce all requirements of the International Building Code that addresses the Americans with Disabilities Act and the Fair Housing amendments.	**Approaching**	This policy supports housing for all needs. It could be strengthened by addressing housing affordability.
Goal 6	Work cooperatively with local jurisdictions, nonprofits and religious organizations to reduce homelessness and find ways for providing emergency and transitional shelter to serve the identified needs of this population.	**Supportive**	This policy addresses housing exclusion for individuals experiencing homelessness.
Policy A	Based upon identified need, provision of facilities and services should be addressed by all local jurisdictions with fair share commitment reflected in local budgets.	**Approaching**	This policy supports services for all needs, but does not directly address ways to increase housing supply or affordability, or to mitigate racially disparate impacts.
Policy B	Provide the opportunity to accommodate innovative strategies that will include emergency and	**Supportive**	This policy addresses housing exclusion for individuals experiencing homelessness.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
	transitional housing for the homeless population.		
Policy C	Ensure location and use of emergency and transitional housing considers, and is successfully integrated into, the surrounding neighborhood without impact to other land use activities.	**Approaching**	This policy addresses the provision of housing for individuals experiencing homelessness, but could better specify what it means to be integrated into the surrounding neighborhood without impact to other land use activities. Requiring additional standards for transitional and emergency housing types may ultimately hinder their development and affordability.
Policy D	Maintain and expand linkages with the business, religious and nonprofit communities as partners in ending homelessness.	**Approaching**	This policy addresses provisions for individuals experiencing homelessness, but could be more specific in outlining what the city's role may be.
Policy E	An emphasis in City policy will be to reflect the Continuum of Care approach, which emphasizes supporting self-sufficiency and transitional housing programs rather than stop gap measures which fail to break the cycle of homelessness.	**Approaching**	This policy addresses housing exclusion for individuals experiencing homelessness. It could be improved by addressing housing affordability for those who are transitioning out of homelessness.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy F	The City supports an increased role in meeting the problems of homelessness from the private sector through funds, in-kind, and volunteer support and will evaluate its funding decisions partially on the basis of other funding sources. The City will use its resources to leverage support for homeless services from the state and federal government and other funding sources.	**Approaching**	This policy addresses housing exclusion for individuals experiencing homelessness. It could be improved by better, more inclusive language, and the city could consider playing a larger role to supplement the efforts of the private sector.
Policy G	As much as practical, consider the needs of the intended uses and site facilities to provide convenient access to the services the population will require.	**Approaching**	This policy aims to provide services necessary for various housing needs. It could be improved by prioritizing historically disadvantaged communities or vulnerable populations.
Policy H	Continue to review and monitor participation and experience in programs that support the homeless population, assess effectiveness in meeting the needs of Lacey's homeless individuals, and provide opportunities for programs that can better serve this demographic.	**Supportive**	This policy addresses strategies to meet the needs of individuals experiencing homelessness.It could be expanded to include housing considerations in addition to the programs mentioned.
Policy I	Particular priority will be provision of services to minors without family resources and families with children. The City will place its highest priority on assisting homeless children and families with children and victims of domestic violence and other special needs groups.	**Supportive**	This policy addresses a particularly vulnerable subset of individuals experiencing homelessness. It could be expanded to include housing considerations in addition to the services mentioned.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
Policy J	As long as there is a demonstrated need for temporary transitional housing and the tent city program continues to operate in a fashion that is compatible with adjacent land uses, Lacey should consider continued support of the opportunity for local churches to administer to the home- less by hosting a tent city.	**Approaching**	This policy aims to provide transitional or temporary housing for houseless individuals. It could be improved by removing vague language around "compatibility", which could hinder the provision of housing for houseless individuals.
Goal 7	Identify and support a central contact to provide a help response for the homeless and citizens at risk of becoming homeless.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.
Policy A	Support Lacey's community partners in improving the community's response to the needs of the homeless with identification of a referral point of contact for people to find services. This can include a service like the 211 referral line.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potential displacement, or to assist those who are experiencing homelessness.
Policy B	Support homeless persons or those at risk of becoming homeless by identifying referrals that can put people in contact with the organizations that provide the services that they need.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.
Policy C	Make technical assistance documents available to citizens and jurisdictional staff on the 211 referral line and related social services so more people will be aware of community resources and where individuals can find help. Distribution of information to publicize the 211 services should include internet information, distribution at relevant community meetings, contact phone numbers,	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potential displacement, or to assist those who are experiencing homelessness.

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
	and informational flyers to community service and religious faith-based organizations.		
Policy D	Continue to take a regional perspective in addressing homelessness in the Thurston County community through support and participation in the Thurston County Home Consortium that provides coordinated planning, activities and evaluations that address homelessness.	**Supportive**	This policy addresses providing housing and services for individuals experiencing homelessness through increased coordination with other regional jurisdictions.
Policy E	As supported programs formulate future budgets or experience budget growth, promote a sharpened focus on addressing priority issues identified for Lacey's homeless demographic.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.
Policy F	As Lacey reviews programs asking for support through the Housing Consortium, support should be prioritized based upon a program reflecting the goals and priorities identified in this Housing Element.	**Approaching**	This policy could be improved by including equity, racially disparate impacts, and anti-displacement as priorities of the housing element or this policy.
Goal 8	Strive for no net increase in the number of homeless people identified in future homeless census counts by focusing on proactive intervention.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.
Policy A	Look for opportunities to strengthen outreach and engagement activities that will facilitate enrollment in treatment and service programs of	**Supportive**	This policy addresses support for houseless individuals, specifically to

Goal, Policy, or Regulation	Text	Evaluation	Reason / Recommendation
	individuals who are homeless or at risk of becoming homeless.		prevent homelessness and potentially displacement.
Policy B	Promote programs designed to ensure that persons returning to the community from institutional or other sheltered settings (including foster care) do not become homeless.	**Supportive**	This policy addresses support for houseless individuals, specifically to prevent homelessness and potentially displacement.It could be improved by including efforts to increase housing affordability for these individuals.
Policy C	Encourage the use of effective prevention interventions, ranging from family strengthening and high-risk youth programs to specific discharge planning.	**Supportive**	This policy addresses disparate impacts and potential displacement through preventative strategies.
Goal 9	Achieve maximum utilization of public buildings for use in the public interest by scheduling secondary uses and activities at times facilities are not being utilized for primary functions.	**Approaching**	This policy could be improved by specifying what activities are in the public interest, especially in terms of supportive housing services or emergency shelter.
Policy A	Review opportunities for shared use of public facilities where it will not conflict with primary use of the structure and associated activities.	**Approaching**	This policy could be improved by specifying what activities are in the public interest, especially in terms of supportive housing services or emergency shelter.
Policy B	When designing new public buildings and planning expansions of existing buildings, consider design to serve dual roles in providing a full range of public services, including emergency shelter, meal services, and other services that might be needed.	**Supportive**	This policy supports housing services and emergency shelter.

Tumwater

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
LU-2.3	Encourage innovative land use management techniques such as density bonuses, cluster housing, zero-lot-line development, planned unit developments, and transfer of development rights to create vibrant centers, corridors, and neighborhoods while accommodating growth.	**Supportive**	This policy is supportive of housing growth and affordability. It could be expanded to consider anti-displacement.
LU-4.3	Continue to allow manufactured housing on individual lots within the City, as well as within mobile and manufactured home parks, to encourage affordable housing.	**Supportive**	This policy is supportive of housing growth and affordability.
LU-4.4	Permit implementing regulations to experiment in new forms of residential development where amenities of open space, privacy, and visual quality can be maintained or improved, and flexible solutions to land use problems such as density, diversity, equitability, and affordability can be achieved.	**Approaching**	This policy intends to create development regulations that encourage diverse, affordable, and equitable housing types with high quality amenities. It could be rewritten to improve clarity.
LU-4.5	Encourage higher density residential uses in order to provide affordable housing. These uses should blend with the existing character of the community.	**Approaching**	The policy intends to allow housing for a variety of needs. However, “character” is vague and can be leveraged to maintain high-cost housing types that are unattainable to those with lower incomes or from historically marginalized communities.

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
LU-4.6	Increase housing types and densities in corridors and centers to meet the needs of a changing population.	**Supportive**	Increasing housing types and densities is supportive of housing growth, especially in areas with jobs and services.
LU-4.7	Increase the variety of housing types outside of corridors and centers of appropriate intensities with supporting design guidelines to meet the needs of a changing population.	**Approaching**	The policy intends to allow housing for a variety of needs. However, extensive design guidelines can be leveraged to maintain high-cost housing types that are unattainable to those with lower incomes or from historically marginalized communities.
GOAL LU-9	Identify what conditions should be applied to development in residential areas.	**Approaching**	The policy intends to ensure new development is integrated with the rest of the city, but additional requirements, especially in terms of design, could ultimately hinder the development of affordable housing.
LU-9.1	Protect residential developments from excessive noise, odors, dirt, glare, and other nuisances emanating from commercial and industrial uses.	**NA**	
LU-9.2	Allow for multi-family residential development in the zoning code. Consideration should be given to encouraging this type of development near centers of community services.	**Approaching**	Allowing multi-family developments in the zoning code is supportive of housing growth,especially in areas with jobs and services. It could be improved by prioritizing housing for historically disadvantaged communities or vulnerable populations.

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
LU-9.3	Integrate design features of existing natural systems into the layout and siting of new residential dwelling units. Preserve trees and significant ecological systems, whenever possible and practical.	**Approaching**	This policy would bring health benefits from additional greenery and shade, but could ultimately hinder the development of affordable housing.
LU-9.4	Permit experimentation in development regulations with newer forms of residential development where amenities of open space, privacy, and visual quality can be maintained or improved, and flexible solutions to land use problems can be achieved.	**Approaching**	Flexible standards for diverse housing types would support housing growth, but this policy should include emphasis on providing housing for low income or historically marginalized populations.
LU-9.5	Do not permit private residential gated communities.	**Supportive**	This policy helps prevent exclusive residential communities.
LU-9.6	Promote nearby access to healthy food for residential developments.	**Approaching**	This policy does not directly help the city increase housing supply, but helps increase food security for residential developments, but could be expanded to prioritize promoting access to healthy foods in historically marginalized and low-income communities.
Housing Element, Comprehensive Plan			
GOAL H-1	To conserve and improve the existing city housing stock and quality of life of neighborhoods.	**Supportive**	Preserving existing affordable housing stock can help reduce displacement pressures.
H-1.1	Assist city neighborhoods in maintaining and rehabilitating the existing housing stock as decent, safe, sanitary, and affordable housing.	**Supportive**	Preserving and improving existing affordable housing stock can help reduce displacement pressures and increase housing supply.

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
H-1.1.1	Create a formal maintenance and rehabilitation program beyond the current City code enforcement procedures to support Policy H-1.1 in coordination with the City's work with the Regional Housing Council.	**Supportive**	Preserving existing affordable housing stock can help reduce displacement pressures and increase housing supply. Special care should be taken to ensure vulnerable populations are displaced through rehabilitation of housing.
H-1.2	Encourage a range of housing, economic development, and community revitalization in the city.	**Approaching**	"Revitalization" of neighborhoods could lead to displacement. This policy should be expanded to include anti-displacement language.
H-1.3	Promote the quality of life of existing communities and implementation of community housing goals through the preparation of comprehensive plans and the development review process.	**Approaching**	Including affordable housing policies that prioritize anti-displacement, affordability, and equity in the comprehensive plan and development regulations supports housing growth.
H-1.4	Provide assistance to improve community surroundings and infrastructure in residential areas.	**Approaching**	Improving infrastructure to better serve communities is supportive of housing growth, but "improve community surroundings" is vague and could lead to displacement or disproportionate impacts to historically marginalized communities. This policy should consider displacement impacts.
H-1.5	Encourage and facilitate economic development as an important part of provision of housing by providing jobs.	**Approaching**	Providing jobs does not provide housing in itself, but increasing employment opportunities near housing

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
GOAL H-2	To provide a sufficient number of single family dwelling units, multi-family dwelling units, manufactured homes, and group housing to provide an affordable selection of housing to each economic segment of the Tumwater population.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-2.1	Provide sufficient, suitably zoned land for development of all housing types to accommodate the future needs for each type of housing, including single-family detached dwellings, accessory dwelling units, townhouses, duplexes, triplexes, fourplexes, multi-family dwellings, cottage housing, senior housing, roominghouses, group housing, and manufactured homes in manufactured home parks and on single lots.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-2.2	Provide opportunities for a range of housing types to provide for all economic segments of Tumwater's population.	**Approaching**	Providing opportunities for diverse housing types and incomes is important. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-2.2.1	Monitor the Land Use Element and Zoning Code to ensure an adequate supply of suitably zoned land.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
GOAL H-3	To provide adequate, affordable housing for residents of all income groups, including sufficient housing affordable to	**Supportive**	Providing affordable housing advances housing growth. This goal should be updated to consider

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
	low and moderate-income groups.		affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-3.1	Encourage the development of innovative plans, codes, standards, and procedures in order to take advantage of new private and public sector approaches to housing provision.	**Approaching**	This policy would help the city provide additional housing using innovative methods but could be improved by considering how these innovative plans could increase affordability of housing and prevent displacement.
H-3.1.1	The Zoning Code allows manufactured homes on single-family lots in all residential zones. It is the intent of the Housing Element to promote the designation of a sufficient supply of land for traditional mobile/manufactured home parks and to recognize that modular/manufactured housing on single family lots and in manufactured home parks is a viable form of housing construction.	**Supportive**	Preserving existing affordable housing stock like manufactured homes reduces displacement risk and maintains affordable housing supply.
H-3.1.2	Increase code enforcement efforts and build public private partnerships to encourage renovations of unfit structures for use as transitional or affordable housing.	**Approaching**	Retrofitting existing affordable housing stock reduces displacement risk and maintains affordable housing supply. However, this is phrased as retrofitting unfit structures for use as transitional or affordable housing, rather than retrofitting *existing* transitional or affordable housing, which could create disproportionate impacts if only buildings in need of repair are designated for

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
			transitional or affordable housing.
H-3.2	Encourage provision of adequate building sites through appropriate land use planning and zoning codes, infrastructure supply, and overall regulatory climate.	**Supportive**	Allowing for additional housing with sufficient infrastructure through land use planning and code changes contributes to housing growth.
H-3.3	Tumwater should assume its "fair share" of housing for low and moderate income groups, in cooperation with other jurisdictions in Thurston County.	**Supportive**	Providing affordable housing advances housing growth and affordability. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-3.3.1	Monitor land supply, census data, and housing policies to ensure Tumwater accommodates its fair share of housing for low and moderate income groups.	**Supportive**	Providing sufficient land for housing advances housing growth. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-3.3.2	Work with Tumwater School District, Housing Authority, and other agencies and organizations to pursue grant funding and implement transitional housing strategies for families with children.	**Supportive**	Pursuing opportunities to increase transitional housing for families supports housing for vulnerable communities and could help mitigate displacement. This policy could be expanded to prioritize low income families or those from historically marginalized communities.

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
H-3.3.3	Establish a multi-family tax exemption program that gives financial incentive for developers to create multi-family structures in target areas and to set aside a percentage of units as low-income housing.	**Supportive**	This policy is supportive of housing growth and affordability. It could be expanded to include anti-displacement measures in the "target areas".
H-3.4	Tumwater should work with the other jurisdictions in Thurston County as part of the Regional Housing Council to share decision making responsibilities related to homelessness and affordable housing in Thurston County to allow for collaboration in expanding affordable housing options and sharing the planning for, identification of, and resource allocation to activities and programs intended to support individuals experiencing homelessness in Thurston County.	**Supportive**	This policy is supportive of housing affordability and preventing displacement, by expanding collaboration with neighboring jurisdictions to provide affordable housing and resources to support individuals experiencing homelessness.
GOAL H-4	To provide adequate opportunities for housing for all persons regardless of age, race, color, national origin, ancestry, sex, sexual orientation, familial status, marital status, ethnic background, source of income use of federal housing assistance, or other arbitrary factors.	**Supportive**	Providing opportunities for housing for all needs advances housing growth. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-4.1	Support the inclusion of living opportunities for families with children throughout the city.	**Supportive**	Providing opportunities for housing for families with children advances housing growth. This goal should be updated to prevent displacement of these households.
H-4.2	Support and encourage a variety of housing types and price	**Supportive**	Providing opportunities for housing for all needs

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
	ranges through appropriate policies and regulations.		advances housing growth. This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-4.2.1	Continue the requirement for reasonable maximum lot sizes in order to create smaller lots that are more affordable and that allow a more efficient use of City services.	**Supportive**	Setting maximum lot sizes increases the land available for new residential development. This policy could be expanded to reference diverse housing types affordable for all income levels.
H-4.2.2	Encourage homeowner associations to adopt Covenants, Conditions, and Restrictions (CCRs) consistent with this policy.	**Approaching**	This policy could be strengthened to require homeowner associations to not prevent affordable or diverse housing types or require strict design requirements that may hinder affordability.
GOAL H-5	To supply sufficient, safe, suitable housing sites and housing supply to meet projected future housing needs for Tumwater over the next 20 years.	**Supportive**	This goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220, and to prevent potential displacement of existing residents.
H-5.1	Ensure appropriate land use designations and Zoning Code designations to provide sufficient land for housing construction.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-5.1.1	Monitor the Land Use Element and Zoning Code to ensure an adequate supply of suitably zoned vacant land. (2.1.1)	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
			affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-5.1.2	Continue joint planning with Thurston County to plan for future growth in Tumwater.	**Supportive**	Taking a regional approach to affordable housing goals is important given cross-jurisdiction impacts of displacement pressures.
H-5.2	Lands not suitable for development due to site constraints such as wetlands, steep slopes, geologically hazardous areas, etc., should be identified and considered when determining sufficient land for new housing in accordance with Tumwater's Conservation Plan.	**Supportive**	This policy would allow the city to have an accurate determination of land available for new housing.
H-5.3	Encourage construction practices, which exceed minimum standards. Tumwater will support the use of alternative building designs and methods that exceed the minimum standards set by Tumwater.	**NA**	
GOAL H-6	To promote a selection of housing that is decent, safe, and sound, in close proximity to jobs and daily activities, and varies by location, type, design, and price.	**Supportive**	Increasing diverse housing types is supportive of housing growth, especially in areas with jobs and services.
H-6.1	Protect residential areas from undesirable activities and uses through aggressive enforcement of adopted City codes.	**Challenging**	This policy is at a high risk of having a disproportionate impact on lower income and historically marginalized communities, resulting in greater displacement.
H-6.2	Provide for a dynamic mix of residential land uses and zones in order to create a diverse mix of sites available for different housing types.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
			to meet the requirements of HB 1220.
H-6.2.1	Continue to monitor the available land supply, census data, and City policies to ensure a diverse mix of land for residential housing stock.	**Supportive**	Providing land for a mix of housing advances housing growth. This goal should be updated to consider displacement and affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-6.2.2	Continue to implement innovative design techniques, such as zero lot line developments, architectural design standards, alley houses, and attached single-family housing. Zero lot line developments are residential real estate in which the structure comes up to or very near to the edge of the property. Zero-lot-line houses are built very close to the property line in order to create more usable space.	**Supportive**	This policy is supportive of housing growth. Ensuring clear and predictable standards for housing and building codes supports housing production goals. Strict design requirements can be leveraged to maintain high-cost housing types, unattainable to those from lower incomes or historically marginalized communities.
H-6.3	Support increasing housing opportunities along urban corridors and centers.	**Supportive**	Increasing housing supply is supportive of housing growth, especially in areas with jobs and services.
H-6.4	Encourage provision of affordable housing near public transit routes to promote efficient transportation networks.	**Approaching**	Ensuring that neighborhoods encourage active transportation is important for inclusive communities. However, this goal could be edited to pay special attention to underserved neighborhoods.
H-6.4.1	Continue to involve Intercity Transit in Tumwater's development review process.	**NA**	

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
H-6.5	Tumwater will maintain current Building Code standards and will use the most up to date future Code editions.	**Supportive**	Ensuring clear and predictable standards for housing and building codes supports housing production goals.
H-6.6	Increase the variety of housing types outside of corridors and centers of appropriate intensities with supporting design guidelines to meet the needs of a changing population.	**Supportive**	Ensuring clear and predictable standards for housing and building codes supports housing production goals.
GOAL H-7	To ensure that housing is compatible in quality, design, and density with surrounding land uses, traffic patterns, public facilities, and environmentally sensitive areas.	**Approaching**	"Compatible" as it relates to design is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.
H-7.1	Support the stability of established residential neighborhoods through appropriate plans and codes.	**Approaching**	This policy may help prevent residential displacement, but may also provide a barrier to increasing housing diversity and affordability in existing neighborhoods.
H-7.1.1	Continue to implement design standards for multi-family and attached single-family dwellings in order to ensure compatibility with existing neighborhoods.	**Approaching**	The policy intends to allow a variety of housing types. However, "compatible" is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.
H-7.2	Assure housing will be well maintained and safe.	**Supportive**	Ensuring housing is well-maintained and safe is supportive of housing goals, but should prioritize low

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
			income or other historically marginalized communities.
H-7.3	Enhance the appearance of and maintain public spaces in residential areas.	**NA**	
H-7.4	Promote community involvement to achieve neighborhood improvement.	**Approaching**	This policy could be strengthened to ensure the concerns of historically marginalized communities are prioritized.
GOAL H-8	To support healthy residential neighborhoods which continue to reflect a high degree of pride in ownership or residency.	**Approaching**	This policy could be strengthened by addressing affordability and to prevent displacement of existing residents.
H-8.1	Support the stability of established residential neighborhoods.	**Approaching**	This policy may help prevent residential displacement, but may also provide a barrier to increasing housing diversity and affordability in existing neighborhoods.
H-8.2	Assure housing will be well maintained and safe.	**Supportive**	Ensuring housing is well-maintained and safe is supportive of housing goals, but should prioritize low income or other historically marginalized communities.
H-8.2.1	Protect residential areas from undesirable activities and uses through aggressive enforcement of adopted City codes.	**Challenging**	This policy is at a high risk of having a disproportionate impact on lower income and historically marginalized communities, resulting in greater displacement.
H-8.3	Enhance the appearance of and maintain public spaces in residential areas.	**NA**	
H-8.4	Promote community involvement to achieve neighborhood improvement.	**Approaching**	This policy could be strengthened to ensure the concerns of historically marginalized communities are prioritized.

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
H-8.4.1	Encourage neighborhood meetings to discuss community issues as situations and concerns arise.	**Approaching**	This policy could be strengthened to ensure the concerns of historically marginalized communities are prioritized.
H-8.5	Encourage home ownership for Tumwater residents.	**Approaching**	Encouraging homeownership helps mitigate displacement, but should prioritize opportunities for low and middle incomes.
GOAL H-9	To encourage a variety of housing opportunities for those with special needs, particularly those with problems relating to age or disability.	**Supportive**	This policy is supportive of providing housing for all needs, housing growth, and affordability. It could be improved by preventing the potential displacement of those with special housing needs.
H-9.1	Require housing to meet the needs of those with special housing requirements without creating a concentration of such housing in any one area.	**Supportive**	This policy is supportive of providing housing for all needs throughout the city. It could be improved by preventing the potential displacement of those with special housing needs.
H-9.2	Assist social service organizations in their efforts to seek funds for construction and operation of emergency, transitional, and permanent housing.	**Supportive**	This policy addresses support for housing for individuals experiencing homelessness, and could help mitigate displacement.
H-9.3	Support and plan for assisted housing opportunities using federal, state, or local aid.	**Supportive**	This policy addresses pursuing funding to support assisted housing opportunities which could mitigate displacement and increase the amount of affordable housing in the city.

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
H-9.4	Encourage and support social and health service organizations, which offer support programs for those with special needs, particularly those programs that help people remain in the community.	**Supportive**	This policy addresses services to support populations with special needs to help mitigate displacement.
H-9.5	Encourage alternative housing strategies for homeless youth, which may include Host Homes.	**Supportive**	This policy addresses the provision of housing for homeless youth.
GOAL H-10	To provide housing that is compatible and harmonious with existing neighborhood character through use of innovative designs that enhance the appearance and quality of Tumwater's neighborhoods.	**Approaching**	The policy intends to allow a variety of housing types. However, “neighborhood character” is vague and can be leveraged to maintain high-cost, low-density housing types, unattainable to those from lower incomes or historically marginalized communities.
H-10.1	Encourage innovation and variety in housing design and development. Tumwater will support efforts to build housing with unique individual character, which avoids monotonous neighborhood appearance.	**Approaching**	Encouraging diverse and innovative design could ultimately hinder housing affordability or supply by requiring additional, subjective design standards.
H-10.2	Multi-family residential housing should be subject to design criteria that relate to density, structure bulk, size and design, landscaping, and neighborhood compatibility.	**Approaching**	Design standards intend to integrate new housing developments with existing ones, but can be leveraged to maintain high-cost housing types, which are unattainable to those from lower incomes or historically marginalized communities.
H-10.2.1	Continue to implement multi-family housing design standards.	**Approaching**	Design standards intend to integrate new housing developments with existing ones, but can be leveraged to maintain high-cost

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
			housing types, which are unattainable to those from lower incomes or historically marginalized communities.
GOAL H-11	To provide housing to accommodate Tumwater's housing needs in the urban growth area and make the most efficient use of infrastructure and services.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure.
H-11.1	Reference the Transportation Element and anticipated transportation impacts when making housing decisions affecting the location and density of housing.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure. It should also prioritize affordability.
H-11.2	Reference utility plans and the impact of housing decisions on capital improvements planning.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure. It should also prioritize equity in the provision of services.
H-11.3	Encourage the construction of affordable housing, including cottage housing and accessory dwelling units, within a half mile or twenty minute walk of an urban center, corridor or neighborhood center with access to goods and services to provide access to daily household needs.	**Supportive**	Providing housing near transit supports housing supply goals and reduces impacts to transportation and provides access to jobs.
GOAL H-12	To encourage urban growth within the city limits with gradual phasing outward from the urban core.	**Approaching**	This policy could be improved by addressing affordability and encouraging increased density throughout the city.
H-12.1	Encourage the construction of housing on vacant property within the city and the redevelopment of underdeveloped property within residential areas to minimize	**Approaching**	This policy supports housing growth, but could better address affordability and anti displacement, especially related to the redevelopment of

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
	urban sprawl and associated public service costs.		underdeveloped property to ensure people are not displaced.
H-12.1.1	Continue to review and revise, as necessary, City Development Standards deemed unnecessary and make development more expensive and/or difficult.	**Supportive**	This policy supports housing growth and affordability.
H-12.1.2	Continue to support high-density zoning within specific areas of the city that have the infrastructure and services to support high-density housing.	**Supportive**	This policy supports housing growth by ensuring there are adequate services and infrastructure.
H-12.1.3	Continue to implement minimum density levels for all residential zoning districts to ensure efficient use of the urban growth area.	**Supportive**	This policy supports housing growth. It could be improved by addressing affordability.
H-12.1.4	Work cooperatively with Thurston County to provide for more efficient and orderly annexations to facilitate urban service delivery.	**NA**	Consider moving to Land Use Element
GOAL H-13:	Ensure consistency with RCW 36.70A.070(2)(c) which requires sufficient land be available for all types of housing including manufactured housing.	**Approaching**	Providing land for all types of housing is important. However, this goal should be updated to consider affordability concerns and housing by income bracket to meet the requirements of HB 1220.
H-13.1	Maintain the manufactured home park district zoning in appropriate areas in order to prevent conversion of affordable housing to other uses without replacement.	**Supportive**	Preserving existing affordable housing stock reduces displacement risk.
H-13.1.1	Encourage manufactured housing park district zoning to locate near transit services.	**Supportive**	Providing access to services such as transit reduces community

Goal, Policy, or Regulation	Text	Potential Impact	Reason / Recommendation
			vulnerabilities and dependence on car travel, especially for vulnerable community members such as elderly and youth.
H-13.2	When locating zones and designations for manufactured home parks, carefully consider the risks from natural hazards, such as flooding and liquefaction, and the impacts of those hazards on the future residents of those manufactured home parks, Tumwater's emergency responders, and the city as a whole.	**Supportive**	Renters and lower income communities often have higher risk and vulnerabilities to natural hazards and events. Ensuring that zoning does not push manufactured home parks into high-risk areas reduces displacement and threats to community member safety.

Yelm

Goal, Policy, or Regulation	Text	Evaluation	Reason
Land Use Element, Comprehensive Plan			
Policy 3.3	Adopt two categories of residential single family land use to meet community needs: • Single Family - 4 units per acre; and • Single Family - 6 units per acre.	**Dependent on Land Capacity Analysis**	While these density levels should support middle and multifamily housing, whether this supports housing and displacement goals depends on the buildable lands analysis and forecasted unit need by income band.
Policy 3.4	Adopt two categories of residential multifamily land use to meet community needs: • Multifamily - Medium Density — 6 units per acre; and • Multifamily - High Density — 16 units per acre.	**Dependent on Land Capacity Analysis**	While these density levels should support middle and multifamily housing, whether this supports housing and displacement goals depends on the buildable lands analysis and forecasted unit need by income band.
Policy 3.5	Adopt a mixed use development category which allows both residential and commercial uses suitable for planned developments on larger parcels and which provides for a variety of land uses, more efficient use of open space, and more cost effective public infrastructure.	**Approaching**	While supporting mixed uses does provide housing near commercial services, this policy does not address affordability or displacement risks.
Policy 4.4	Adopt development regulations that accommodate “live-work” structures (where citizens can live and work within the same structure).	**Supportive**	Allowing live-work structures creates both housing and economic opportunities for community members who wish to start a business, but cannot afford a home and a commercial space.
Policy 4.6	Adopt development regulations that allow permits to be	**Supportive**	Streamlining permit processes reduces barriers to housing production to

Goal, Policy, or Regulation	Text	Evaluation	Reason
	processed in a timely and efficient manner.		meet housing supply deficits and reduce building costs.
Goal 5	Encourage diverse residential growth.	**Supportive**	Allowing diverse housing types and growth allows housing supply to meet the shifting housing needs of households.
Policy 5.2	Adopt development standards that allow duplexes, townhouses, and accessory dwelling units within residential areas. These are intended to increase the variety of housing in the community and aid in achieving an overall urban density.	**Supportive**	Allowing housing diversity supports overall goals of providing different housing types to address different household needs.
Policy 5.3	Adopt development regulations that encourage mixed use subdivisions.	**Supportive**	Allowing housing diversity supports overall goals of providing different housing types to address different household needs.
Goal 10	Create vibrant centers, corridors, and neighborhoods while accommodating growth.	**NA**	
Policy 10.1	Promote a greater mix of uses and densities to support efficient provision of services.	**Supportive**	Allowing housing and land use diversity supports overall goals of providing different housing types to address different household needs.
Goal 11	Create safe and vibrant neighborhoods with places that build community and encourage active transportation.	**Approaching**	Ensuring that neighborhoods are safe and encourage active transportation is important for inclusive communities. However, this goal could be edited to take special attention to underserved neighborhoods.

Goal, Policy, or Regulation	Text	Evaluation	Reason
Policy 11.1	Plan at the neighborhood level to increase housing density and diversity while preserving neighborhood character and quality of life.	**Approaching**	While local-level planning can result in inclusive and grassroots actions, the element of "preserving neighborhood character" can sometimes be used as an argument for continuing exclusionary housing types and disputing zoning changes that seek to allow more housing diversity.
Policy 11.2	Plan for land use patterns that provide most neighborhood residents an array of basic services within a half mile or 20 minute walk from home.	**Supportive**	Providing retail and services within a half-mile walkshed encourages community resilience and reduces dependency on vehicular transportation, which can be a large cost factor for households.
Policy 11.3	Encourage appropriately scaled home-based business and live/work opportunities in neighborhoods.	**Supportive**	Allowing live-work structures creates both housing and economic opportunities for community members who wish to start a business, but cannot afford a home and a commercial space.
Goal 12	Maximize opportunity to redevelop land in priority areas by investing in infrastructure and environmental remediation.	**Supportive**	Reducing the overall land and infrastructure investment while also expanding residential buildable lands supports housing supply goals.

Goal, Policy, or Regulation	Text	Evaluation	Reason
Policy 12.1	Mitigate the additional cost of development in centers and corridors by making public infrastructure investment that adds value, safety and public enjoyment for the entire community and that result in appropriate public return on investment when adjacent properties are developed. Allow for latecomers and other methods of repayment for government outlay for infrastructure.	**Approaching**	While this policy does facilitate housing growth, it could be enhanced by including affordability considerations.
Housing Element, Comprehensive Plan			
Goal 1	Encourage a variety of housing types, densities and a range of affordable housing within Yelm and its Urban Growth Area.	**Supportive**	Allowing different types of housing and affordability levels fosters a cohesive and inclusive community when it comes to housing.
Policy 1.1	Allow a variety of housing types within the residential and mixed use designations to promote a range of housing alternatives within the community. This may include but not be limited to: government assisted housing, housing for low-income families, manufactured housing, multi-family housing, and group or foster homes.	**Supportive**	Ensuring access to affordable housing types–including manufactured home types and group homes–is essential to reducing displacement risks among vulnerable community members.
Policy 1.2	Allow accessory dwelling units in all residential land use categories subject to development standards and design criteria.	**Supportive**	Accessory Dwelling Units provide opportunities for aging in place and adapting existing housing stock and residential land uses to meet the changing housing needs of households.
Policy 1.3	Encourage opportunities for a range of housing costs to enable housing for all segments of the population.	**Supportive / Approaching**	While supportive, this policy will need to be updated to meet HB 1220 guidance on specific household income

Goal, Policy, or Regulation	Text	Evaluation	Reason
			brackets. However, providing housing across all income segments reduces displacement risk and enables housing opportunities to all, regardless of income.
Policy 1.4	Encourage the provision of adequate affordable building sites through appropriate zoning, infrastructure, and other development regulations.	**Supportive**	Regularly reviewing and ensuring zoning, development regulations, and infrastructure support housing at different affordability levels supports anti-displacement efforts.
Policy 1.5	Review development regulations to ensure that a range of housing types is available throughout Yelm.	**Supportive**	Allowing and reducing barriers to housing types through development regulations is essential to enabling affordable housing options.
Policy 1.6	Review development regulations to ensure residents can safely walk throughout Yelm.	**Supportive**	Not all community members have consistent access to vehicles, including vulnerable populations such as youth and elderly. Providing walkable residential neighborhoods promotes inclusion and positive health outcomes.
Policy 1.7	Monitor the need for special needs housing and increase opportunities for such housing.	**Supportive**	Providing housing for special needs reduces displacement and homelessness risk among community members with special needs.
Policy 1.8	Consider density increase incentives to promote a variety of housing types, mixed uses, range of housing costs, affordability, and increased special needs housing.	**Supportive**	Providing a wide range of housing types and densities–at different affordability levels–provides options

Goal, Policy, or Regulation	Text	Evaluation	Reason
Goal 2	Meet the county wide planning policy to ensure a fair share of affordable housing.	**Supportive**	Taking a regional approach to affordable housing goals is important given cross-jurisdiction impacts of displacement pressures.
Policy 2.1	Encourage a variety of housing types in the residential designations to assure choice, opportunity, and availability of a fair share of affordable housing throughout Yelm, its UGA, and adjacent areas of Thurston County.	**Supportive**	Providing housing diversity and sufficient housing options reduces displacement risk and encourages affordability.
Policy 2.2	Participate with other jurisdictions and Thurston County in a regional process to monitor Fair Share Affordable Housing targets within the County.	**Supportive**	Taking a regional approach to affordable housing goals is important given cross-jurisdiction impacts of displacement pressures.
Goal 3	Conserve and improve the existing housing stock and neighborhoods.	**Supportive**	Preserving existing affordable housing stock can help reduce displacement pressures.
Policy 3.1	Maintain up-to-date development regulations for building, housing, mechanical, and other design standards.	**Supportive**	Ensuring clear and predictable standards to housing and building codes supports housing production goals.
Policy 3.2	Require owners of unsafe dwelling units to correct significant problems and encourage the maintenance of existing structures consistent with the standards of the neighborhood.	**Approaching**	Ensuring housing is safe and habitable is important. Rehabilitation, however, can also result in physical displacement pressures as existing households may be forced to move or incur high costs of repair. Such support should involve connecting households with alternatives or incentive programs to reduce these risks.

Goal, Policy, or Regulation	Text	Evaluation	Reason
Policy 3.3	Support rehabilitation efforts for substandard housing.	**Approaching**	Ensuring housing is safe and habitable is important. Rehabilitation, however, can also result in physical displacement pressures as existing households may be forced to move or incur high costs of repair. Such support should involve connecting households with alternatives or incentive programs to reduce these risks.
Policy 3.4	Encourage and facilitate local economic development as an important element of improving housing conditions by providing economic opportunity.	**Approaching**	While economic development is an important step for ensuring housing growth and conditions–particularly when it comes to local financing–such growth should not result in the rapid displacement of community members through rising costs.
Policy 3.5	Encourage local community groups, churches, and businesses to provide voluntary assistance with maintain existing structures for the elderly, low income, and those with special needs.	**Approaching**	While encouraging local groups is beneficial, this policy would be strengthened through active support and connecting these groups with funding to do so.
Goal 4	Promote energy efficient housing to reduce the overall costs of home ownership.	**Supportive**	Reducing barriers to home ownership, especially when aimed at historically marginalized or vulnerable community members, could reduce displacement pressures.
Policy 4.1	Support programs that make existing structures more energy efficient.	**NA**	

Goal, Policy, or Regulation	Text	Evaluation	Reason
Policy 4.2	Periodically review the energy efficiency development regulations to ensure that they are up-to-date.	**NA**	
Policy 4.3	Promote residential subdivision designs that maximize solar heating opportunities.	**NA**	
Goal 5	Provide sufficient housing for low- and moderate-income households within each jurisdiction.	**Supportive**	While supportive, this policy should be updated to take special attention to HB 1220. The policy could be improved by paying special attention to the lowest incomes, 0-30% Area Median Income, when it comes to housing capacity.
Policy 5.1	Provide sufficient housing for low- and moderate-income households.	**Supportive**	While supportive, this policy should be updated to take special attention to HB 1220. The policy could be improved by paying special attention to the lowest incomes, 0-30% Area Median Income, when it comes to housing capacity.
Policy 5.2	Provide tenants and landlords information about housing rights and responsibilities.	**Supportive**	Ensuring awareness on housing rights can empower tenants and ensure safe housing.
Policy 5.3	Incentivize developers to set aside a percentage of multifamily housing units for low- and moderate-income buyers and renters.	**Supportive**	Providing incentives for less than market rate housing provides opportunities for community members to remain the community as prices increase, and provides opportunities for new community members to live in the City.

Goal, Policy, or Regulation	Text	Evaluation	Reason
Policy 5.4	Support efforts to provide funding for shared-equity policies — via community land trust or down-payment assistance models — to make buying housing of all types affordable.	**Supportive**	Providing programs to control the variable costs of land could create long lasting affordable housing opportunities for community members, particularly those from vulnerable groups or lower incomes.
Goal 6	Provide sufficient service-enriched housing for homeless and high-risk populations.	**Supportive**	Allowing shelters and other types of emergency housing reduces displacement pressures, and provides services to respond to and prevent households from experiencing homelessness.
Policy 6.1	Allow shelters, group homes, transitional housing, and permanent housing with social services in development regulations in locations where these facilities have access to transit, parks, and other amenities.	**Supportive**	Allowing shelters and other types of emergency housing reduces displacement pressures, and provides services to respond to and prevent households from experiencing homelessness.
Goal 7	Encourage housing density and diversity in neighborhoods to add vibrancy and increase equitable access to opportunity.	**Supportive**	Allowing housing density and diversity across neighborhoods gives the community means and options to avoid displacement pressures.
Policy 7.1	Review and amend residential development regulations to provide opportunity for the mix and density of housing needed to meet the needs of changing demographics, use land wisely, and support nearby transit and businesses.	**Approaching**	Providing housing near transit supports housing supply goals and reduces impacts to transportation and provides access to jobs. However, this policy could be further expanded to call out affordability goals as well.

Goal, Policy, or Regulation	Text	Evaluation	Reason
Policy 7.2	Allow densification by providing for accessory dwelling units, small houses on small lots, attached housing types or appropriately scaled multifamily buildings, cottage housing, and village cohousing developments in development regulations.	**Supportive**	Allowing more diverse housing types that support affordability goals, such as smaller houses on smaller lots, also mitigates displacement pressures from increasing land costs and greater demand than supply.
Goal 8	Encourage the construction, weatherization and operation of homes to boost energy efficiency.	**Supportive**	Preserving existing housing stock through energy upgrades reduces costs by extending the useful life of the unit.
Policy 8.1	Prioritize home weatherization funds to preserve affordable housing.	**Supportive**	Preserving existing affordable housing stock, without increasing renter costs, reduces displacement pressures from aging buildings and increasing maintenance needs.
Policy 8.2	Support regional efforts to engage landlords and property managers in energy efficiency efforts.	**Supportive**	Supporting easier upgrades can maintain naturally affordable housing units from going into disrepair and being redeveloped into newer, less affordable housing options.
Policy 8.3	Support the efforts of local financial institutions to facilitate affordable financing of energy upgrades.	**Supportive**	Supporting easier upgrades can maintain naturally affordable housing units from going into disrepair and being redeveloped into newer, less affordable housing options.
Policy 8.4	Support regional efforts to conduct energy audits of large power consumers to identify efficiency improvements, such as RESNET's Home Energy Rating System.	**NA**	

Goal, Policy, or Regulation	Text	Evaluation	Reason
Goal 9	Increase housing amid urban corridors and centers to meet the needs of a changing population.	**Approaching**	Providing housing opportunities in key centers and corridors fosters housing near jobs and opportunities. This goal could be expanded to consider affordability needs as well.
Policy 9.1	Review regulations that stymie or prevent housing development near or within urban corridors and centers.	**Supportive**	Addressing barriers to housing supply development ensures supply can meet demands, especially in areas with jobs and services.
Policy 9.2	Remove barriers or “right-size” regulations to achieve goals.	**Supportive**	Reviewing and removing regulatory barriers to housing supports housing supply and streamlines review processes.
Policy 9.3	Identify priority areas ripe for housing development that will meet multiple goals.	**Approaching**	This goal aims to increase housing supply. However, it should not come at the cost of displacing historically marginalized households.
Policy 9.4	Examine ways to encourage smaller, affordable housing units through the fee structure, especially in centers, corridors or adjacent to neighborhood service hubs.	**Supportive**	Allowing and encouraging more diverse housing types that are more affordable support affordability and anti-displacement objectives.
Policy 9.5	Reduce impact fees for those projects located where there is less impact.	**Supportive**	Targeting reduce the burden to build housing would support housing unit construction
Policy 9.6	Use tax exemptions, such as Special Valuation, or other financing tools to make projects financially feasible.	**Supportive**	Providing flexibility to support housing construction supports housing supply goals.

Goal, Policy, or Regulation	Text	Evaluation	Reason
Policy 9.7	Identify opportunities to aggregate properties where housing density is needed to achieve community goals and make multifamily projects feasible to build and finance.	**Supportive**	Allowing flexibility to support multifamily housing construction supports anti-displacement by providing diverse housing types.

City of Lacey

Policy Evaluation Matrix

Policy recommendations were evaluated with the shared commerce indicators and the criteria unique to each jurisdiction and scored based on the scale to the right. The scores were then totalled to calculate an overall impact score for each policy option. The score does not necessarily reflect a policy is better than another when it comes to addressing different forms of displacement, but rather demonstrates which policies may have the largest impact on reducing displacement pressures.

Does the policy reduce displacement pressures or advance housing objectives?

Yes, positive impact (+2)	The policy option has a positive impact and directly addresses the criterion.
Somewhat postive impact (+1)	The policy option has a somewhat positive impact, or indirectly addresses the criterion.
Neutral/No impact (+0)	The policy option does not directly or indirectly address the criterion, but may benefit other
Negative impact (-1)	The policy option may exacerbate, or detract from, addressingthe criterion or issue. However, while some

		COMMERCE INDICATORS Each city's policies were evaluated using this common set of criteria						LACEY-SPECIFIC CRITERIA					
Number/Ref.	Policy Recommendation	**Racially Disparate Impacts:** Does this policy prevent racially disparate impacts or work to repair past harm?	**Economic Displacement:** Does this policy help prevent or mitigate economic displacement?	**Physical Displacement:** Does this policy help prevent or mitigate physical displacement?	**Cultural Displacement:** Does this policy help prevent or mitigate cultural displacement?	**Housing Exclusion:** Does this policy prevent the exclusion of historically marginalized or other vulnerable populations from accessing safe and affordable housing appropriate for their needs?	Implementation Considerations: Does the city have staff and resources necessary to implement this policy effectively?	Does this policy encourage or remove barriers to providing affordable housing?	Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?	Does this policy increase overall housing supply?	Does this policy reduce housing costs?	**Score (out of 20)**	**Explanation.** The score does not necessarily reflect a policy is better than another when it comes to addressing different forms of displacement, but rather demonstrates which policies may have the largest impact on reducing displacement pressures.
New Policy Recommendations													
	Strengthen partnerships with local organizations to increase collaboration and coordination in providing affordable housing and reducing displacement pressures.	1	1	1	1	1	2	1	2	0	0	10	This policy would advance housing goals but wouldn't have a direct impact on specific actions to address displacement or affordable housing, as it relates primarily to increasing collaboration and coordination.
	Explore ways to monitor renter income verification, which may include establishing local ordinances to enforce attainable income verification, and identify and address price fixing.	1	1	1	1	1	1	0	1	0	1	8	This policy would help address affordability, potential racially disparate impacts, and allow for more fair avenues for renters to verify incomes, but wouldn't directly impact the supply of affordable housing or prevent displacement.
	Consider creative zoning overlays or land use policies to classify and protect manufactured home communities.	1	2	2	2	2	2	0	2	0	1	14	This policy would help preserve existing affordable housing and manufactured housing, but would not directly impact affordability, housing supply, or address racially disparate impacts.
	Establish a program, partnering with local organizations where possible, to incentivize and assist mobile park owners with improving their properties and support upgraded utilities and infrastructure for these properties.	1	1	2	2	2	1	1	2	0	1	13	This policy would help preserve existing affordable housing and manufactured housing to ensure it is well-maintained, but would not directly address economic displacement, the provision of affordable housing or additional housing, or housing costs.
	Encourage collaboration between local organizations working to provide affordable housing and prevent homelessness.	2	2	2	2	2	1	2	1	1	0	15	This policy would primarily help reduce displacement pressures and increase the supply of affordable housing.
	Create and promote an educational program, partnering with local organizations where possible, to explain the long term investment opportunity of ADUs and the financial plan required to pursue building an ADU.	0	1	0	1	0	1	1	0	2	1	7	This policy would help increase the overall housing supply, and may reduce housing costs and indirectly address displacement.
	Encourage or support residents of mobile home communities in forming Community Land Trusts or other cooperatives so they can manage their properties indepently and be prepared to exercise the right of first refusal.	2	2	2	2	2	0	2	2	0	2	16	This policy would address displacement, preserve existing affordable units, and help reduce housing costs.
	Create a program to support the private ownership of mobile home communities and private rental units by local, family-owned operations with on-site management, and disincentivize corporate owners from buying homes in the community.	2	2	2	2	2	1	2	2	0	1	16	This policy would address displacement, preserve existing affordable units, and help reduce housing costs, but would not directly incentivize or reduce barriers to developing diverse housing types.
	Minimize the amount of potential long-term housing that is used for short-term transient rentals (e.g., Air BnBs).	1	2	1	2	2	1	1	2	2	2	16	This policy would address displacement, preserve existing affordable units, and help reduce housing costs.
	Partner with local organizations to provide a program to assist residents with applications and explain housing benefits and other housing assistance programs.	2	2	2	2	2	1	2	0	0	1	14	This policy would address displacement and help prevent racially disparate impacts.
	Create and promote an educational program to provide private landlords with information on legal requirements and renter income qualifications for those on supplemental income.	1	1	2	1	2	1	1	0	0	1	10	This policy would help prevent physical displacement and housing exclusion, and may indirectly support other housing goals.
	Increase staff capacity to process ADU and other housing applications in a timely manner.	0	1	0	1	1	2	1	0	2	1	9	This policy would help increase the overall housing supply, which may in turn support other housing goals like affordability and anti-displacement.
	Develop opportunities and strategies that enable residents to age in place.	1	2	2	1	2	1	0	1	0	1	11	This policy supports housing for older residents to be able to continue living in their community. It could support other housing goals like affordability as well.
	Develop rent control policies to prevent displacement, such as requiring 180 days notice for rent increases or capping rent increases at a certain percentage.	2	2	2	1	2	1	0	2	0	2	14	This policy would prevent displacement, particularly economic and physcial, and would support other housing goals like affordability and preventing housing exclusion.
	Encourage the retention and maintenance of existing affordable housing, especially in high-opportunity neighborhoods or areas that have historic patterns of segregation.	2	2	2	2	2	1	2	2	1	1	17	This policy would help support many housing goals, like anti-displacement efforts, reducing racially disparate impacts and housing exclusion, preserving existing affordable housing units, and may help reduce housing costs and increase the overall housing supply.
Housing Action Plan	Lacey's Housing Action Plan policies that have not been completed yet are evaluated below to evaluate how these contribute to or detract from anti-displacement goals, in order to help Lacey prioritize future implementation actions of their HAP. The												**Scoring explanations are not included for Lacey's Housing Action Plan policies as these have already been adopted. However, the scores may be useful to help the City prioritize future work.**
1.a.	Donate or lease surplus or underutilized jurisdiction-owned land to developers that provide low-income housing.	2	2	1	1	2	2	2	0	2	2	16

COMMERCE INDICATORS Each city's policies were evaluated using this common set of criteria

TUMWATER-SPECIFIC CRITERIA
Additional criteria was created unique (yet sometimes related and similar) to each city in order to support their diverse housing goals.

Number/ Ref.	Policy Recommendation	Racially Disparate Impacts: Does this policy prevent racially disparate impacts or work to repair past harm?	Economic Displacement: Does this policy help prevent or mitigate economic displacement?	Physical Displacement: Does this policy help prevent or mitigate physical displacement?	Cultural Displacement: Does this policy help prevent or mitigate cultural displacement?	Housing Exclusion: Does this policy prevent the exclusion of historically marginalized or other vulnerable populations from accessing safe and affordable housing appropriate for their needs?	Implementation Considerations: Does the city have staff and resources necessary to implement this policy effectively?	Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?	Does this policy incentivize and support the development of affordable and deeply affordable housing?	Does this policy encourage adaptive reuse of existing residential units or other buildings where feasible?	Does this policy incentivize or reduce barriers to developing diverse housing types including smaller homes?	Score(out of 20)	Explanation. The score does not necessarily reflect a policy is better than another when it comes to addressing different forms of displacement, but rather demonstrates which policies may have the largest impact on reducing displacement pressures.
New Policy Recommendations													
	Explore ways to monitor renter income verification, which may include establishing local ordinances to enforce attainable income verification, and identify and address price fixing.	1	1	1	1	0	0	1	1	0	0	6	This policy would help address affordability, potential racially disparate impacts, and allow for more fair avenues for renters to verify incomes, but wouldn't directly impact the supply of affordable housing or prevent displacement.
	Consider creative zoning overlays or land use policies to classify and protect manufactured home communities.	1	2	2	2	2	1	2	2	0	0	14	This policy would help preserve existing affordable housing and manufactured housing, but would not directly impact affordability, housing supply, or address racially disparate impacts.
	Establish a program, partnering with local organizations where possible, to incentivize and assist mobile park owners with improving their properties and support upgraded utilities and infrastructure for these properties.	1	1	2	2	2	0	2	2	2	1	15	This policy would help preserve existing affordable housing and manufactured housing to ensure it is well-maintained, but would not directly address economic displacement, the provision of affordable housing or additional housing, or housing costs.
	Encourage collaboration between local organizations working to provide affordable housing and prevent homelessness.	2	2	2	2	2	1	1	2	0	0	14	This policy would primarily help reduce displacement pressures and increase the supply of affordable housing.
	Create and promote an educational program, partnering with local organizations where possible, to explain the long term investment opportunity of ADUs and the financial plan required to pursue building an ADU.	0	1	0	1	0	1	0	1	2	2	8	This policy would help increase the overall housing supply, and may reduce housing costs and indirectly address displacement.
	Encourage or support residents of mobile home communities in forming Community Land Trusts or other cooperatives so they can manage their properties indepently and be prepared to exercise the right of first refusal.	2	2	2	2	2	0	2	2	1	0	15	This policy would address displacement, preserve existing affordable units, and help reduce housing costs.
	Create a program to support the private ownership of mobile home communities and private rental units by local, family-owned operations with on-site management, and disincentivize corporate owners from buying homes in the community.	2	2	2	2	2	1	2	1	0	0	14	This policy would address displacement, preserve existing affordable units, and help reduce housing costs, but would not directly incentivize or reduce barriers to developing diverse housing types.
	Partner with local organizations to provide a program to assist residents with applications and explain housing benefits and other housing assistance programs.	2	2	2	1	1	0	0	1	0	0	9	This policy would address displacement and help prevent racially disparate impacts.
	Create and promote an educational program to provide private landlords with information on legal requirements and renter income qualifications for those on supplemental income.	2	1	2	1	0	0	0	0	0	0	6	This policy would help prevent physical displacement and housing exclusion, and may indirectly support other housing goals.
	Increase staff capacity to process ADU and other housing applications in a timely manner.	0	1	1	2	0	2	1	1	2	2	12	This policy would help increase the overall housing supply, which may in turn support other housing goals like affordability and anti-displacement.
	Encourage the retention and maintenance of existing affordable housing, espacially in high-opportunity neighborhoods or areas that have historic patterns of segregation.	2	2	2	1	2	0	0	1	1	0	11	This policy would help support many housing goals, like anti-displacement efforts, reducing racially disparate impacts and housing exclusion, preserving existing affordable housing units, and may help reduce housing costs and increase the overall housing supply.
Housing Action Plan	Tumwater's Housing Action Plan policies that have not been completed yet are evaluated below to evaluate how these contribute to or detract from anti-displacement goals, in order to help Tumwater prioritize future implementation actions of their HAP. The policies with the highest												**Scoring explanations are not included for Lacey's Housing Action Plan policies as these have already been adopted. However, the scores may be useful to help the City prioritize future work.**
1.a.	Donate or lease surplus or underutilized jurisdiction-owned land to developers that provide low-income housing and establish a process for accepting or coordinating the acceptance of land donations from others this action.	2	2	1	1	2	2	0	2	2	1	15	
1.b.	Where a Planned Unit Development is used for residential development, consider requiring a portion of the housing be low- residential development	2	2	0	1	2	2	0	1	0	1	11	
1.c.	Adopt a "Notice of Intent to Sell' ordinance for multifamily developments.	2	2	2	2	2	2	2	1	2	0	17	
1.d.	Provide funding for the Housing Authority of Thurston County and other non-profit organizations to buy income-restricted units proposed to be converted to market rate housing.	2	2	2	2	2	1	2	2	2	0	17	
1.e.	As part of Comprehensive Plan and development code changes, include an evaluation of the impact such changes will have on housing affordability, especially for low-income households.	1	1	1	1	1	2	0	0	0	0	7	
1.f.	Provide funding for low-income and special needs residents to purchase housing through community land trusts.	2	2	2	2	2	1	2	2	1	0	16	
1.h.	Encourage low-income housing units as part of new developments.	2	2	1	1	2	2	0	2	0	2	14	
1.j	Establish a program to preserve and maintain healthy and viable manufactured home parks.	2	2	2	2	2	1	2	2	0	2	17

3.e	Mix market rate and low- income housing to avoid creating areas of concentrated low-income housing.	2	2	2	2	2	2	1	1	1	2	17	
4.a	Adopt a form-based code for mixed-use zones to allow more housing types and protect the integrity of existing residential neighborhoods.	2	1	1	2	2	1	2	1	2	2	16	
4.b	Strategically allow live/work units in nonresidential zones.	2	2	2	2	2	1	0	0	2	2	15	
5.a	Conduct education and outreach around city programs that support affordable housing.	1	2	2	2	2	1	0	1	0	1	12	
5.b	Fund Housing Navigators to assist households, renters, homeowners, and landlords with housing issues.	2	0	1	1	2	1	0	1	0	0	8	
5.e	Partner with a public or private developer to build a townhouse or row house demonstration project.	0	0	0	0	0	1	0	1	0	1	3	
5.f	Track data on affordable housing at the regional level.	0	0	0	0	0	2	0	0	0	0	2	
6.b	Establish an affordable housing property tax levy to finance affordable housing for very low-income households.	2	2	1	1	2	2	0	2	1	2	15	
6.c	Establish an affordable housing sales tax.	1	2	1	1	1	2	0	2	0	1	11	
6.d	Capture the value of city investments (utilities, roads, etc.) that increase private investments in neighborhoods, especially in areas with planned or existing transit.	0	-1	0	0	0	1	0	0	1	1	2	
6.e	Encourage the Housing Authority of Thurston County to take greater advantage of State and Federal housing grants and tax incentives.	1	2	1	1	1	1	2	2	1	1	13	

City of Yelm

Policy Evaluation Matrix

[illegible] jurisdiction and scored based on the scale to the right. The scores were then totalled to calculate an overall impact score for each policy option. The score does not necessarily reflect a policy is better than another when it comes to addressing different forms of displacement, but rather demonstrates which policies may have the largest impact on reducing displacement pressures.

Does the policy reduce displacement pressures or advance housing objectives?

Yes, positive impact (+2)	The policy option has a positive impact and directly addresses the criterion.
Somewhat postive impact (+1)	The policy option has a somewhat positive impact, or indirectly addresses the criterion.
Neutral/No impact (+0)	The policy option does not directly or indirectly address the criterion, but may benefit other
Negative impact (-1)	The policy option may exacerbate, or detract from, addressing the criterion or issue. However, while some

		COMMERCE INDICATORS Each city's policies were evaluated using this common set of criteria						YELM-SPECIFIC CRITERIA				
Number/Ref.	Policy Recommendation	**Racially Disparate Impacts:** Does this policy prevent racially disparate impacts or work to repair past harm?	**Economic Displacement:** Does this policy help prevent or mitigate economic displacement?	**Physical Displacement:** Does this policy help prevent or mitigate physical displacement?	**Cultural Displacement:** Does this policy help prevent or mitigate cultural displacement?	**Housing Exclusion:** Does this policy prevent the exclusion of historically marginalized or other vulnerable populations from accessing safe and affordable housing appropriate for their needs?	Implementation Considerations: Does the city have staff and resources necessary to implement this policy effectively?	Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?	Does this policy incentivize or reduce barriers to developing diverse housing types including smaller homes?	Does this policy incentivize and support the development of affordable and deeply affordable housing?	Score(out of 18)	**Explanation.** The score does not necessarily reflect a policy is better than another when it comes to addressing different forms of displacement, but rather demonstrates which policies may have the largest impact on reducing displacement pressures.
New Policy Recommendations												
	Explore ways to monitor renter income verification, which may include establishing local ordinances to enforce attainable income verification, and identify and address price fixing.	1	1	1	1	0	1	2	0	2	9	This policy would help address affordability, potential racially disparate impacts, and allow for more fair avenues for renters to verify incomes, but wouldn't directly impact the supply of affordable housing or prevent displacement.
	Consider creative zoning overlays or land use policies to classify and protect manufactured home communities.	1	2	2	2	2	2	2	0	2	15	This policy would help preserve existing affordable housing and manufactured housing, but would not directly impact affordability, housing supply, or address racially disparate impacts.
	Establish a program, partnering with local organizations where possible, to incentivize and assist mobile park owners with improving their properties and support upgraded utilities and infrastructure for these properties.	1	1	2	2	2	1	2	0	2	13	This policy would help preserve existing affordable housing and manufactured housing to ensure it is well-maintained, but would not directly address economic displacement, the provision of affordable housing or additional housing, or housing costs.
	Encourage collaboration between local organizations working to provide affordable housing and prevent homelessness.	2	2	2	2	2	1	0	0	1	12	This policy would primarily help reduce displacement pressures and increase the supply of affordable housing.
	Create and promote an educational program, partnering with local organizations where possible, to explain the long term investment opportunity of ADUs and the financial plan required to pursue building an ADU.	0	1	0	1	0	1	1	2	1	7	This policy would help increase the overall housing supply, and may reduce housing costs and indirectly address displacement.
	Encourage or support residents of mobile home communities in forming Community Land Trusts or other cooperatives so they can manage their properties indepently and be prepared to exercise the right of first refusal.	2	2	2	2	2	0	2	1	2	15	This policy would address displacement, preserve existing affordable units, and help reduce housing costs, but would not directly incentivize or reduce barriers to developing diverse housing types.
	Create a program to support the private ownership of mobile home communities and private rental units by local, family-owned operations with on-site management, and disincentivize corporate owners from buying homes in the community.	2	2	2	2	2	1	2	0	2	15	This policy would address displacement, preserve existing affordable units, and help reduce housing costs, but would not directly incentivize or reduce barriers to developing diverse housing types.
	Minimize the amount of potential long-term housing that is used for short-term transient rentals (e.g., AirBnBs).	1	2	1	2	2	1	2	0	1	12	This policy would address displacement, preserve existing affordable units, and help reduce housing costs, but would not directly address racially disparate impacts or incentivize the development of deeply affordable housing.
	Partner with local organizations to provide a program to assist residents with applications and explain housing benefits and other housing assistance programs.	2	2	2	2	2	1	1	0	0	12	This policy would address displacement and help prevent racially disparate impacts.
	Create and promote an educational program to provide private landlords with information on legal requirements and renter income qualifications for those on supplemental income.	1	1	2	1	2	1	0	0	0	8	This policy would help prevent physical displacement and housing exclusion, and may indirectly support other housing goals.
	Increase staff capacity to process ADU and other housing applications in a timely manner.	0	1	0	1	1	2	0	2	1	8	This policy would help increase the overall housing supply, which may in turn support other housing goals like affordability and anti-displacement.
	Encourage the retention and maintenance of existing affordable housing, especially in high-opportunity neighborhoods or areas that have historic patterns of segregation.	2	2	2	2	2	1	2	0	0	13	This policy would help support many housing goals, like anti-displacement efforts, reducing racially disparate impacts and housing exclusion, preserving existing affordable housing units, and may help reduce housing costs and increase the overall housing supply.
Housing Action Plan	Yelm's Housing Action Plan policies that have not been completed yet are evaluated below to evaluate how these contribute to or detract from anti-displacement goals, in order to help Yelm prioritize future implementation actions of their HAP. The policies with the highest total score may be											**Scoring explanations are not included for Lacey's Housing Action Plan policies as these have already been adopted. However, the scores may be useful to help the City prioritize future work.**
1	As part of comprehensive plan and development code changes, include an evaluation of the impact such changes will have on housing affordability, especially for low-income households.	0	0	0	0	0	0	0	0	0	0	
2	Allow third-party review of building permits for development projects.	0	0	0	0	0	2	1	2	1	6	
3	Mix market rate and low-income housing to avoid creating areas of concentrated low-income housing.	1	1	0	0	2	2	1	2	1	10	
4	Allow accessory dwelling units (ADUs) in all residential zones.	0	1	1	1	0	2	0	2	1	8	
5	Allow single-room occupancy (SRO) housing in all multifamily zones.	2	2	0	1	2	2	0	2	2	13	
6	Strategically allow live/work units in nonresidential zones.	2	2	2	2	2	1	0	2	0	13

Housing Displacement Analysis for Lacey, Olympia, Tumwater, and Yelm: Community Outreach

ONLINE SURVEY PRELIMINARY SYNTHESIS OF FINDINGS

01/15/2024

Table of Contents

Housing Displacement Analysis for Lacey, Olympia, Tumwater, and Yelm: Community Outreach 1

Online Survey Preliminary Synthesis of Findings 1

Introduction 1

Process 1

Synthesis of Preliminary Findings 5

Introduction

A key aspect of this project involves assessing community insight, perceptions, and lived experiences around the impacts of livability, affordability, and displacement in Olympia, Lacey, Tumwater and Yelm. A robust data collection effort, including multi-lingual outreach via community anchors, focus groups, and an open-access multi-modal survey, sought to engage both those who have been frequently engaged as well as new perspectives and experiences not included in past policy and housing assessments conducted in the region.

Process

Uncommon Bridges developed two key approaches to gathering community input on housing accessibility and displacement pressures in the four participating cities: a series of affinity-based facilitated focus groups, and an open-access, multi-modal online survey distributed through community anchors and partner cities.

Multi-Modal Online Survey

The online survey was designed through a multi-modal platform, VideoAsk. VideoAsk allows questions to be posed through a captioned video/audio message. This increases access by having clear, verbal positioning of the topic and questions, allowing more access across a range of educational, literacy, and information processing spectra. Three open-ended questions were presented by video in both English and Spanish. Respondents had the option to respond by text, video, or audio, with the option to review their responses before submitting. Video and audio responses were limited to three minutes in length; there was no limit on text-based responses.

A primary landing page provided a project overview, clarity about how input will be used, regulatory compliance details, and some contextual framing of housing displacement.

The Survey itself allowed users to select English or Spanish to submit their responses. The questions posed were as follows:

English Language Version	Spanish Language Version
The cities of Olympia, Yelm, Tumwater, and Lacey are collaborating to tackle housing displacement and exclusion. They aim to analyze local policies that have caused social and racial disparities in housing. The three main types of displacement are: Physical: Forced moves due to eviction, foreclosure, or poor housing. Economic: Rising rents and property costs pushing families out. Cultural: Loss of community identity as services and institutions disappear. Regulations like HB 1220 now require cities to promote housing equity. As they update their Comprehensive Plans for 2025, the Cities will incorporate anti-displacement strategies informed by community input, aiming for a fairer and more inclusive housing policy.	Las cuidades de Olympia, Yelm, Tumwater y Lacey estan unidos en la pelea contra el desplazamiento de las viviendas familares. Juntos, intentan analizar como las iniciativas locales en estas ciudades han causado desigualdades entre diferentes grupos sociales y raciales en la vivienda. Las maneras principales de el desplazamiento son: Desplazamiento fisico: Ocurre cuando alguien recibe una orden de desalojo, ejecución hipotecaria, o hay una falta de viviendas dignas. Desplazamiento economico: Ocurre cuando hay un gran aumento en el costo de la renta y el costo causa el desplazamiento de familias.

Your voices matter. The insights gathered will shape the future of housing policies for a fairer, more inclusive community for all. For our first question, please tell us, have YOU seen housing displacement show up in your community?	Desplazamiento cultural: Ocurre cuando hay una perdida en la identidad cultural de la comunidad mientras desaparecen servicios y instituciones. Leyes en el estado de Washington como HB 1220 requieren que las ciudades promueven iniciativas de viviendas que son justas y dirigidas a proteger contra el desplazamiento de familias. Ahora que las cuidades se preparan para revisar y actualizar sus planes generales, buscan participacion de las comunidades para informar las estrategias que protegen contra el desplazamiento de hogar. Incorporando las voces de la comunidad nos ayudará a crear protecciones de viviendas que son mas justas y inclusivas. Tus voz es importante, y la información que compartes ayudaran a informar como se hacen las leyes y iniciativas de vivienda para asegurar una comunidad inclusiva para todos. Para nuestra primera pregunta, cuentanos si ha visto el desplazo de vivienda en su comunidad? Como ha pasado?
Next, Are there policies or practices in your community that you think increase displacement risk?	Para nuestra proxima pregunta, dinos si cree que hay leyes o practicas que aumenta el riesgo de desplazamiento?
Finally, In your experience, who in your community has been displaced or is most at risk of displacement?	Finalmente, en tu experiencia, quienes en su comunidad esta a riesgo de ser desplazado de su hogar?

Compensation

Participants who completed the survey in its entirety were eligible for a $25 gift card. Amazon Gift Cards were selected for their variety of use options, and due to the low fees which allowed for a maximum budget for community participant compensation.

Distribution
The Survey was distributed by email and through targeted flyers posted at identified locations in the four participating cities.
The City partners distributed the survey through the platforms they deemed most appropriate, including email lists, social media, and direct outreach.

Uncommon Bridges produced suggested outreach language in English and Spanish, a printable flyer in English and Spanish with a QR code, and shortened direct link (using bit.ly) to aid in ease of access to the survey.

Uncommon Bridges identified key community organizations to assist in email outreach:

- Timberland Library – branches in each participating city
- Virgil Clarkson Lacey Senior Center
- Evergreen College Veterans Resource Center
- Disabled American Veterans Ch 41
- Community Action Council
- Thurston County Food Bank
- Rebuilding Together Thurston County
- CIELO
- Hispanic Roundtable

Digital Access
To increase the accessibility of these surveys and mitigate the digital divide, Uncommon Bridges employed two strategies: (1) development of a tech support guide in Spanish and English, and (2) specific community partners to serve as a community location to provide access support.

All community organizations assisting with outreach were provided the Tech Support that they might opt to use to assist their respective audiences in participating in the survey.

Two key community partners agreed to provide digital access support to interested community participants: The Timberland Library (Lacey, Tumwater, Yelm and Olympia branch locations), and the Lacey Senior Center.

The Libraries were provided the printable flyers and tech support sheets. They offered Chromebooks with A/V capabilities that could be used by community members during any regular library hours.

The Senior Center identified two volunteers who were oriented to the project, and who hosted open hours at the Center on Tuesdays and Thursdays to assist tech-limited seniors in completing the survey.

Sample Outreach Language:

> The four unique cities of **Olympia, Tumwater, Yelm, and Lacey** are coming together to identify and study local policies and regulations that have resulted in racially disparate impacts, displacement, and exclusion in housing for their residents.
>
> No one understands the challenges of housing affordability better than those who face them daily. That's why we're inviting impacted and at-risk community members to share their story through a video or audio recording (up to 2 min), or written message via an easy-to-use online portal, available **in English and Spanish**. *These insights will directly inform the policy recommendations we make to local leaders, ensuring they reflect the true needs of our communities.*
>
> For these valuable contributions, participants will receive a **$25 gift card** while funds last.
>
> ***Can you help participants share their story?*** I am reaching out today to connect with those who can help get the word out or provide technical assistance to people whose perspectives deserve to be included in this review of local housing policies. This might include:
>
> - Putting up a flyer (attached)
> - Sending an email message (option for email copy attached)
> - Acting as a technical assistance site (community members may be referred to your location - tech assistance guide attached)
>
> If you have any questions, please reach out to
> Em Piro (Project Associate) at em@uncommonbridges.com or call 206-865-5210, or
> Charlotte Jernick (Project Manager) at charlotte@uncommonbridges.com or call 206.971.6030 x114.
>
> Thank you for helping make a meaningful impact in our South Sound region!

Data Integrity

In an effort to ensure that as many responses as possible reflected the local community, a password was introduced to discourage bots and AI responses. Data was also closely reviewed to filter automated responses and responses submitted from outside the South Sound region.

Synthesis of Preliminary Findings

Are people observing displacement?	Policies or practices increasing displacement risk	Who has been displaced, or is at highest risk?

Overwhelmingly (>95%) Yes	Increase in cost of living	Communities of color
Observations that displacement has increased in recent years	Rent increases	Indigenous communities
Changes to economy are cited as a major factor	Poorly maintained rental housing	Manufactured home residents
Specifically in predominantly Black neighborhoods	Lack of affordable housing	Disability
Downtown Olympia	Increasing costs of building	Access to living wage
Specifically highlighting long-term residents being pushed out of housing	Gentrification: land and neighborhood improvements – "urban revitalization" – coinciding with luxury development and increased cost of living	Low income households
Relatives sharing a household (ex: adult children moving in with parents)	Increases in property tax	Single mothers, women and children
	Zoning laws	Seniors
	Rise of Air BnB listings	African American and Hispanic communities and households
	UGA expansion that prioritizes suburban development over affordable housing	Young people not in high-paying jobs
	Zoning for density has also led to an increase in luxury development	LGBTQ+ populations
	Lack of rent stabilization	
	Tax Increment Financing leading to influx of upscale businesses and development	
	Tax abatement programs for luxury developers	
	Permitting and cost requirements of developing affordable housing, especially in a SFH	
	Inaccessible social services	
	Speculative development	

	Zoning that limits affordable housing development	
	Building renovations	

Quotes:

When we went to city council meetings, they talked about numbers—property values, economic growth. But they never talked about us. It felt like our culture, our lives, and our stories didn't matter in the face of development.

The story of housing displacement is a story of power and whose voices are heard. It's not just about homes; it's about belonging, dignity, and the right to exist in spaces we've built and called home for years.

I have also seen many community institutions such as restaurants and bars close down, some which are safe havens for folks with marginalized identities — an example of cultural displacement. Many people in my age range(30-40) from Olympia have moved to Centralia, Chehailis, Shelton in search of more affordable rent.

Olympia's policy of allowing unlimited density bonuses for developments that include affordable housing units has inadvertently increased displacement risk. Though this policy boost revenue generation but it also enable developers to build larger, more expensive projects that cater to affluent buyers.

Yelm's Urban Growth Area (UGA) expansion policies have heightened displacement risk by prioritizing suburban development over affordable housing and community needs.

December 12, 2024

Olympia, Lacey, Tumwater and Yelm Housing Displacement Analysis Affinity Groups

Accessory Dwelling Unit Affinity Group

On December 3rd, Uncommon Bridges facilitated a Housing Displacement Analysis Affinity Group, made up of a cohort of community members with direct lived or professional experience with Accessory Dwelling Units. Attendees to these meetings consisted of individuals that worked in construction and real estate trades as well as individuals who with own or live in accessory dwelling units. The group discussed ways in which ADU's may help in addressing displacement, issues that they have noticed affecting ADU construction and affordability, and how ADU's may help solve for other issues that the public faces with the Washington housing system.

COHORT ATTENDEES:

- Mary Barrett, Community Member
- Jessie Simmons, Olympia Master Builders
- Chris Lester, Thurston County Realtors
- Doug Mah, Thurston Chamber of Commerce
- Lisa Mikesell, Community Members

Uncommon Bridges followed the agenda below:

- Welcome
- Meeting Purpose & Review
- Understanding Housing Displacement (physical, economic, cultural) and Comprehensive Plans
- How Input Will Be Used
- Questions
- Final Reflections & Adjourn

KEY THEMES

Uncommon Bridges led a discussion on ADUs which led to the facilitators identifying key themes and concerns of group members. Those concerns broadly fell under these categories:

- ADUs provide long term, multi-generational investment opportunities.
- Building and zoning polices/regulations are seen as significant hurdles to siting and developing more ADUs.
- ADUs can be a solution in the long-term elder care crisis as the American population ages.
- Municipal infrastructure and staff capacity may be reducing the speed of ADU permit review.
- ADU owner and builder relationships are more about collaboration and customization, and less marketing and mass production.

Within these themes the facilitators and the group discussed the most important ideas to share with the 4 participating cities.

- The City of Lacy has an effective and streamlined ADU process. Other cities maybe served to draw inspiration from this process.
- Lists of ADU builders on government websites could help connect builders to interested parties.
- Imaginative education materials around ADU uses are needed.
- ADUs are just one small part in addressing the housing crisis.
- The cities should investigate ways to streamline permit processes.
- The cities should find ways to help small developers.
- There is a deep need for more housing diversity.
- ADU affordability raises the conflict between affordability and owner returns.
- Usually, ADU owners need help paying off the loan so affordable construction costs are crucial.
- Rebates for ADU construction are ineffective for both owners and small builders.

Group Discussion Mural Transcription

ADUs Provide Long Term, Multi-Generational Investment

- Societal perceptions on=f multifamily housing
- Adult children currently have difficulty finding housing currently
- Owners may take a lower ROI for renting to family/friends
- ADUS could provide a built-in support system
- ADUs give flexibility for housing needs over the lifetime*
- Many consider buying properties that could have future ADU builds located on them
- ADUs can create urban density with multi-generational household's mind

Permanent Affordability

- Supplement existing community service infrastructure
- Housing cost burden is high for everyone
- Tax structures should be reevaluated to make this more advantageous to builders
- Multiple ADUs collocated on a property
- Integrate case management services

Collocating services geared towards individuals that need supportive services

- Housing as a foundation for other needs
- There are many factors to displacement
- Maximize supply
- Are the savings to development passed on to the consumer
- Investment and housing can be conflicting interests
- Regulating ADUs and delivering low rents is a difficult issue

Building & Zoning Polices/Regulations Provide Significant Hurdles

- Rural ADUs need more attention
- Households used commuting to address rising rents (this is displacement)
- ADUs densify areas
- Preconstruction costs are high
- There need to be economic opportunities to prevent displacement
- Overall housing densification
- Need to supplement ADUs with higher density development
- Many of the issue ADU owners have are similar to large scale developers
- Potential low interest loans for ADU construction
- Regulation review for efficacy
- ADUs provide a path out of housing segregation
- Prepackaged ADU processes speed up complications
- About 25% of the final cost of housing is regulation
- Incentives to create more ADU buyers

Provide Care Structures

- Family can help provide care structures to ADU residents
- Solutions for ageing complications such as degenerative illnesses
- Interpersonal conflicts can also lead to vulnerable people being displaced
- Potentially located near more health services, providing opportunities to those more vulnerable to homelessness

Municipal infrastructure and capacity are an issue

- Sidewalks, sewer connection can be expensive in rural communities
- Building in rural communities may stress services
- Pre-approved design v existing structures
- Staff capacity needed

ADU owner and builder relationships provide an opportunity for collaboration

- ADU's could be part of a home "remodel"
- ADU construction is a Niche field and those offering construction services are few.
- Builder training for ADUs
- Many ADUs are built with already existing buyers

November 21, 2024

Olympia, Lacey, Tumwater and Yelm Housing Displacement Analysis Affinity Groups

Summary

On November 21st, Uncommon Bridges facilitated a Housing Displacement Analysis Affinity Group, made up of a cohort of with residents of the 4 member cities that represent low-income residents or housers in the area. This meeting covered concerns, perspectives, and potential solutions the participants had around displacement and housing in Olympia, Yelm, Tumwater, and Lacey. Themes discussed included preventative measures, policy and practice considerations, and who is being displaced.

COHORT ATTENDEES:

- Berenice Hartt Plazas, Thurston County Food Bank
- Kim Piper, Property Manager
- Eileen Dalton, SPS Habitat for Humanity
- KayVin Hill, Lived Experience Advisory Board, Thurston County
- Faith Foote, Sound Legal Aid
- Ron Baugh-Schlossberg, Sound Legal Aid

Uncommon Bridges followed the agenda below:

- Welcome
- Meeting Purpose & Review
- Understanding Housing Displacement (physical, economic, cultural) and Comprehensive Plans
- How Input Will Be Used
- Questions
- Final Reflections & Adjourn

Uncommon Bridges led a discussion on housing displacement using a Mural Board to capture the comments from the cohort members. The group shared feedback and recommendations given their unique lived experience and perspective.

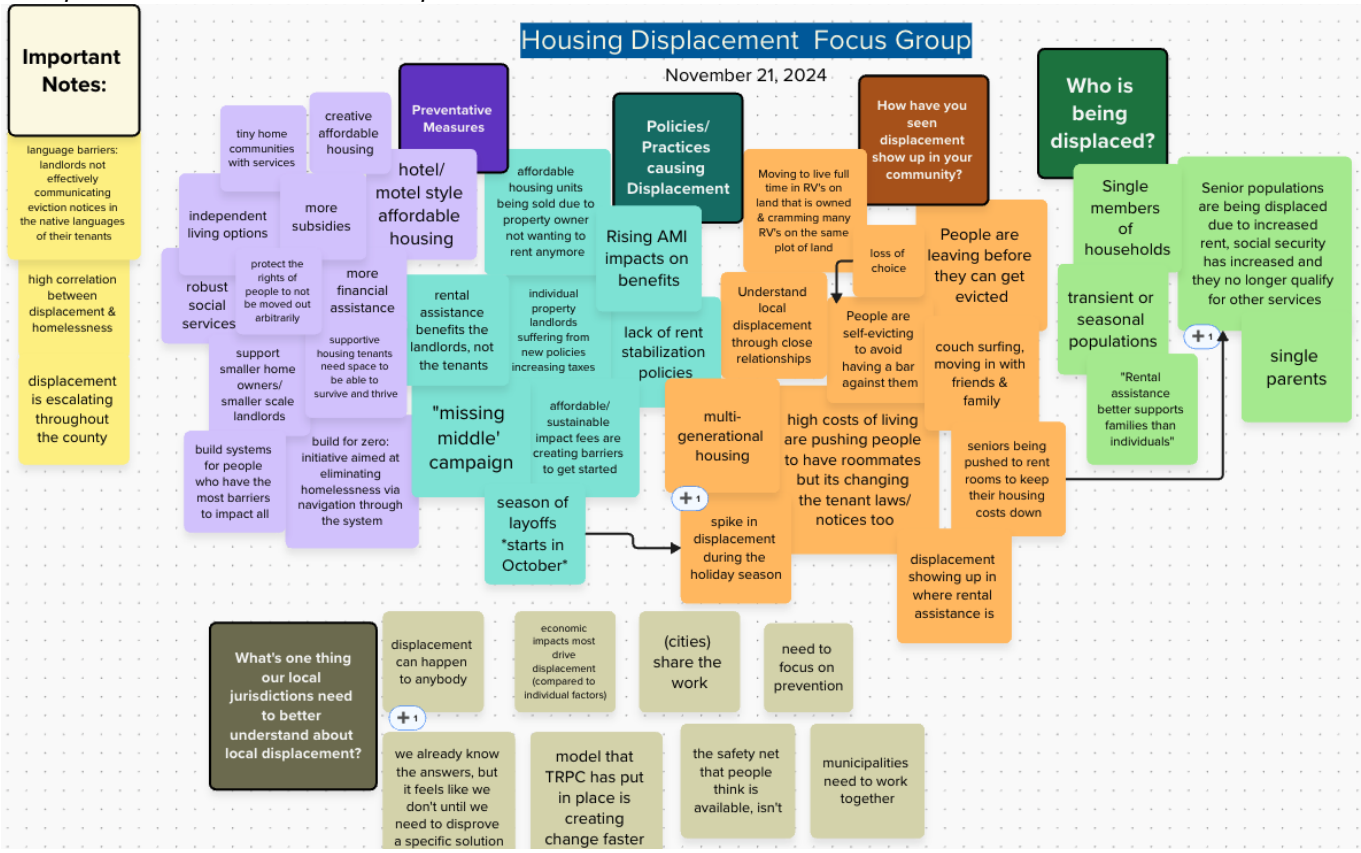
KEY THEMES

Participants shared their reflections, recommendations, and insights on the specific housing pressures they face, issues specific to low-income home communities, and what they would like cities to do to address these challenges. Key themes from the conversation are listed below.

- Displacement can happen to anybody.
- Economic impacts drive displacement.
- There are significant language barriers - landlords do not or cannot effectively communicate eviction notices and warnings.
- There is a high correlation between displacement and homelessness.
- Displacement is escalating throughout the county.
- Watch the model that Thurston Regional Planning Council has put in place is creating change faster to learn best practices.
- The perceived social safety net doesn't exist.
- We need a greater focus on houselessness prevention.
- There is a need for municipal collaboration on providing housing services.

Group Discussion

To construct key themes, our team organized and analyzed the following 4 main topics that emerged from the discussion:



Preventative measures - In order to prevent displacement, there is a need to focus more heavily on prevention rather than react.

Policies causing Displacement - Participants identified a number of policies that create the conditions for displacement or actively make it worse.

How have you seen displacement in your community? - Participants shared ways in which they have experienced or viewed displacement happening in their lives.

Who is being displaced? - Participants shared their views of what characteristics make households vulnerable to displacement.

Group Discussion Mural Transcription

Preventative measures

- Hotel/motel style affordable housing
- More creative affordable housing
- Tiny home community with services
- Independent living options
- Robust social services
- Protect the rights of people to not be moved out arbitrarily
- More financial assistance
- Supportive housing tenants need space the be able to survive
- Build for zero: initiative aimed at eliminating homelessness via navigation through the system
- Build systems who have the most barriers to impact all.
- Support smaller homeowners/ small scale landlords
- Robust social services
- More subsidies

Policies and Practices causing displacement

- Affordable housing units being sold due to property owner not wanting to rent anymore

- Raising AMI has an impact on benefits
- Rental assistance benefits the land landlords, not the tenants
- Individual property landlords suffering from new policies increasing taxes
- Affordable sustainable impact fees impact fees are creating barriers to get started
- Season of layoffs starts in October

How have you seen displacement show up in your community?

- People leave before they get evicted
- Moving to live in RVs on land that is owned and cramming many RV's on same plot of land
- Understand local displacement patterns through relationship building
- People are self-evicting to avoid having an impact on their credit
- High costs of living leads people to have more roommates but buildings change their roommate allowances
- Spike in displacement during holiday season
- Multi-generational housing
- People have fewer options for where to live
- People couch surf (non-visible homelessness)

Who is Being Displaced?

- Single members of households
- Transient or seasonal populations
- Rental assistance better supports families than individuals
- Single parents
- Senior populations

November 21, 2024

Olympia, Lacey, Tumwater and Yelm Housing Displacement Analysis Manufactured Home Community Affinity Group

Summary

On November 21st, Uncommon Bridges facilitated a Housing Displacement Analysis Affinity Group, made up of a cohort of manufactured (or mobile) home stakeholders, including residents, property management, development, advocates, and civic leadership. The participants provided insights, feedback, and recommendations to the cities of Olympia, Tumwater, Lacey and Yelm regarding specific pressures and opportunities regarding housing for the updated Comprehensive Plan. Key themes that emerged from the discussion focused around the differing rates of displacement between small-scale operators and private equity firms as landowners, legal paths, physical and economic entrapment.

COHORT ATTENDEES:

- Stephen Becker, Senior Manufactured Home Community (SMHC) Resident
- Sharron Cornwall, property manager
- Donna Daniels, SMHC Resident
- Karen Gregerson, SMHC Resident
- Richard Gregerson, SMHC Resident
- Ed Hildreth, civic leader
- Diane Houston, SMHC Resident
- Kyle Taylor Lucas (Tulalip/Snohomish), MHC Resident
- Kathy McCormick, SMHC Resident
- Kevin McCrea, Property developer
- Dean Perryman, MHC Resident
- Anne Sadler, Association of Manufactured Homes
- Laura Scheffer, MHC Resident

Uncommon Bridges followed the agenda below:

- Welcome
- Meeting Purpose & Review
- Understanding Housing Displacement (physical, economic, cultural) and Comprehensive Plans
- How Input Will Be Used
- Questions
- Final Reflections & Adjourn

Uncommon Bridges led a discussion using a Mural Board to capture the comments from the cohort members. The group shared feedback and recommendations on housing policy and what measures they would like to see incorporated into the comprehensive plan.

KEY THEMES

Participants shared their reflections, recommendations, and insights on the specific housing pressures they face, issues specific to manufactured home communities, and what they would like cities to do to address these challenges. Key themes from the conversation are listed below.

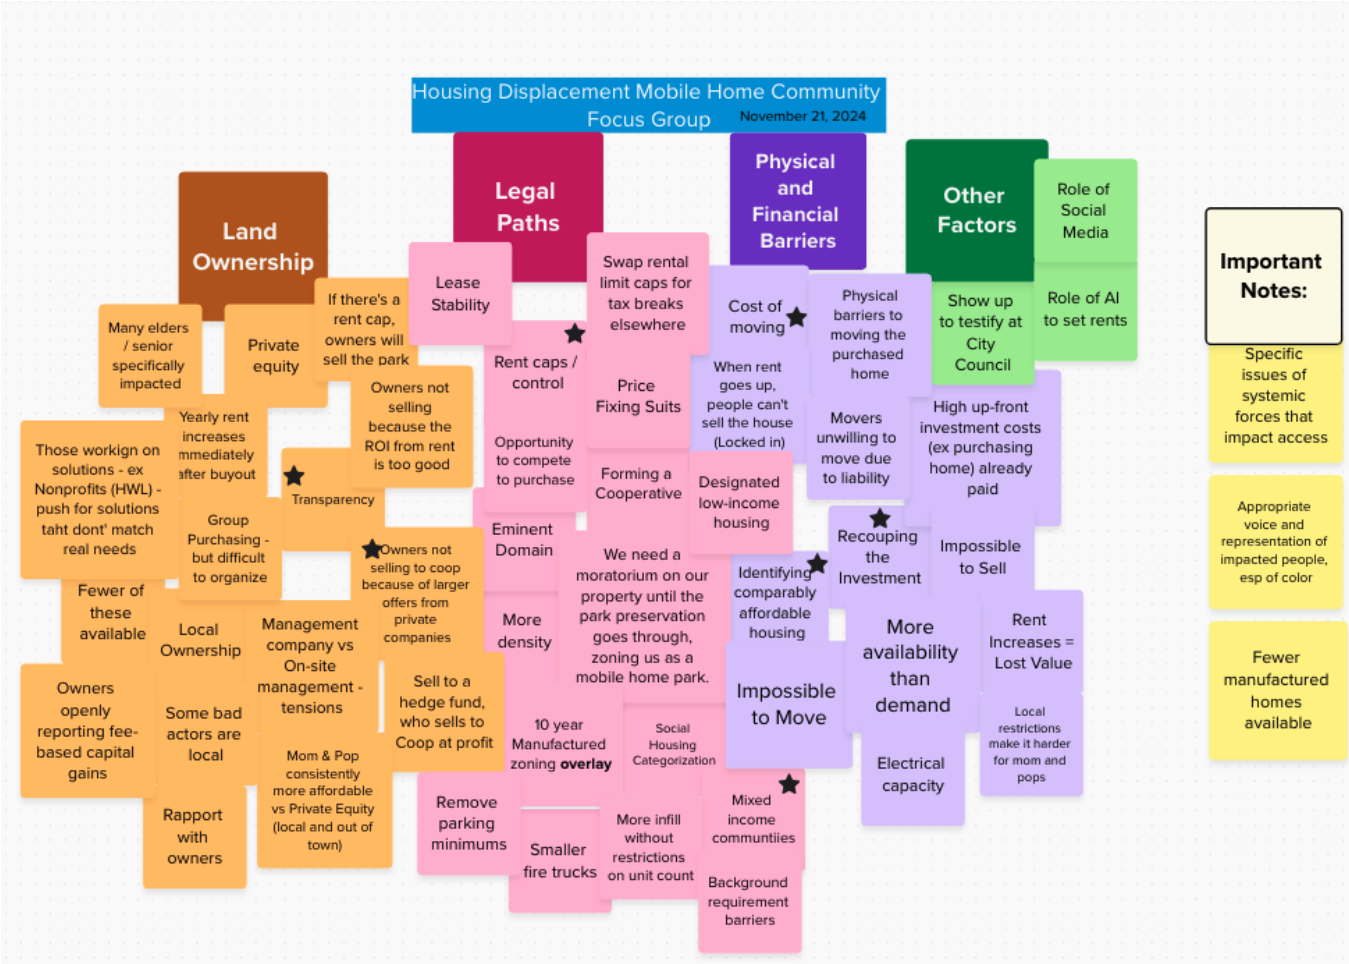
- Small-scale operators and private equity firms as landowners
- Land ownership options and barriers
- Legal paths and challenges
- Physical and economic entrapment
- Role of cities to respond to resident needs
- Availability of quality affordable housing
- Specific impacts and access to advocacy for communities of color

Group Discussion

To construct key themes, our team organized and analyzed the following 4 main topics that emerged from the discussion:

Land Ownership

- All residents shared how the increase in private equity ownership in recent years has led to rapidly rising costs of living in MHC. Some have explored community land trusts (CLTs) but find the setup and structure challenging with existing financial burdens and pressures. Participants reported that private equity firms openly reported fee-based capital gains.
- Residents noted that a preferred model is private ownership of the land by local, family-owned operations with on-site management. They found that establishing rapport with owners led to greater transparency, care for the parks, and tenancy continuity. Participants want cities to ease up local restrictions that make it difficult for local, family-owned landowners to manage parks. Cities could support residents in forming cooperatives or CLTs to be prepared to exercise right of first refusal and manage properties independently.



Legal Paths

- Participants shared the role that rent caps could play in managing rising costs and noted that this could increase the likelihood of landowners to sell the park. Discussion of group buying options pointed out that existing tenants have the right of first refusal, but this is often not recognized by landowners.
- Participants want cities to put moratoriums on properties as they transition through zoning changes, a 10-year manufactured zoning overlay, opportunity to compete to purchase, use of eminent domain as a means of preserving a manufactured home park from being redeveloped, low-income and social housing designations, mixed-income communities, and for cities to explore options around rent caps and tax breaks that disincentivize price gouging.

Physical and Economic Entrapment

- Participants described their situation as “Impossible to move, Impossible to stay.” As landowners increase rents and underinvest in utilities such as electric, water, and waste management, the value of the property decreases and owners are locked in. Insurance companies prevent moving companies from relocating manufactured homes due to the associated risks.
- Participants want cities to support upgraded utilities and infrastructure and promote incentives for park owners to improve their properties.

Group Discussion Mural Transcription

Important Notes and Other Factors

Specific issues of systemic forces that impact access

- Appropriate voice and representation of impacted people, especially of color
- Fewer manufactured homes available
- Role of social media
- Role of AI to set rents

Show up to testify at City Council

Land Ownership:

- Many elders/seniors specifically impacted
- Private equity
- If there's a rent cap, owners will sell the park
- Yearly rent increases immediately after buyout
- Owners not selling because the ROI from rent is too good
- Those working on solutions – ex Nonprofits (HWL) – push for solutions that don't match the real needs
- Group purchasing – but difficult to organize
- Transparency (starred)
- Local ownership
- Management company vs On-site management - tensions
- Fewer of these available
- Some bad actors are local
- Owners not selling to coop because of larger offers from private companies (starred)
- Sell to a hedge fund, who sells to Coop at profit
- Some bad actors are local
- Mom and Pop consistently more affordable vs Private equity (local and out of town)
- Rapport with owners

Legal Paths:

- Lease stability
- Rent caps/control (starred)
- Swap rental limit caps for tax breaks elsewhere
- Price fixing suits
- Opportunity to compete to purchase
- Forming a cooperative
- Eminent domain
- We need a moratorium on our property until the park preservation goes through, zoning us as a mobile home park.

- 10-year manufactured zoning overlay
- Social housing categorization
- Remove parking minimums
- Smaller fire trucks
- More infill without restrictions on unit count
- Mixed income communities (starred)
- Background requirement barriers

Physical and Financial Barriers:

- Cost of moving (starred)
- Physical barriers to moving the purchased home
- When rent goes up, people can't sell the house (locked in)
- Movers unwilling to move due to liability
- High up-front investment costs (ex: purchasing a home) already paid
- Recouping the investment (starred)
- Identifying comparably affordable housing
- Impossible to sell
- More availability than demand
- Rent increases = lost value
- Impossible to move
- Local restrictions make it harder for mom and pops
- Electrical capacity

December 10, 2024

Olympia, Lacey, Tumwater and Yelm Housing Displacement Analysis Military Affinity Groups

Summary

On December 10th, Uncommon Bridges facilitated a Housing Displacement Analysis Affinity Group, made up of a cohort of military-connected households including veterans, dependents, and service providers. The participants provided insights, feedback, and recommendations to the cities of Olympia, Tumwater, Lacey and Yelm regarding specific pressures and opportunities regarding housing for the updated Comprehensive Plan. Key themes that emerged from the discussion focused around coordination of resources and tenant protections.

COHORT ATTENDEES:

- Michael Klos, Special Operations Veteran and Liaison With Disabled American Veterans Chapter 41
- Mohammad Mahis, Veteran US Army Combat Interpreter
- Thomas Mason, Disabled Desert Storm Veteran
- Katherine Jane Mitchell, Military Dependent
- Victoria Lin Vazquez, Military Dependent

Uncommon Bridges followed the agenda below:

- Welcome
- Meeting Purpose & Review
- Understanding Housing Displacement (physical, economic, cultural) and Comprehensive Plans
- How Input Will Be Used
- Questions
- Final Reflections & Adjourn

Uncommon Bridges led a discussion using a Mural Board to capture the comments from the cohort members. The group shared feedback and recommendations on housing policy and what measures they would like to see incorporated into the comprehensive plan.

KEY THEMES

Participants shared their reflections, recommendations, and insights on the specific housing pressures they face, issues specific to military households, and what they would like cities to do to address these challenges. Key theme are listed below:

- The VA's coordination of housing services is lacking capacity and efficiency.
- There are intersecting factors that make finding housing as an active duty, veteran, or dependent (ex. Claiming both disability and veteran benefits for proof of income.)
- There is an inconsistency of benefit access across service members and their families
- The city should serve as convener of resources to support the gaps left by the VA and other support agencies.
- Tenant protections are needed to ensure military households can't be discriminated against for housing based on the non-traditional nature of their income source.
- Social isolation is a part of living in a civilian community as a military or veteran household, making transportation routes and transit options key during new construction.
- There is an opportunity to leverage private funding for military households to support affordable housing construction efforts. (i.e. Foundations)

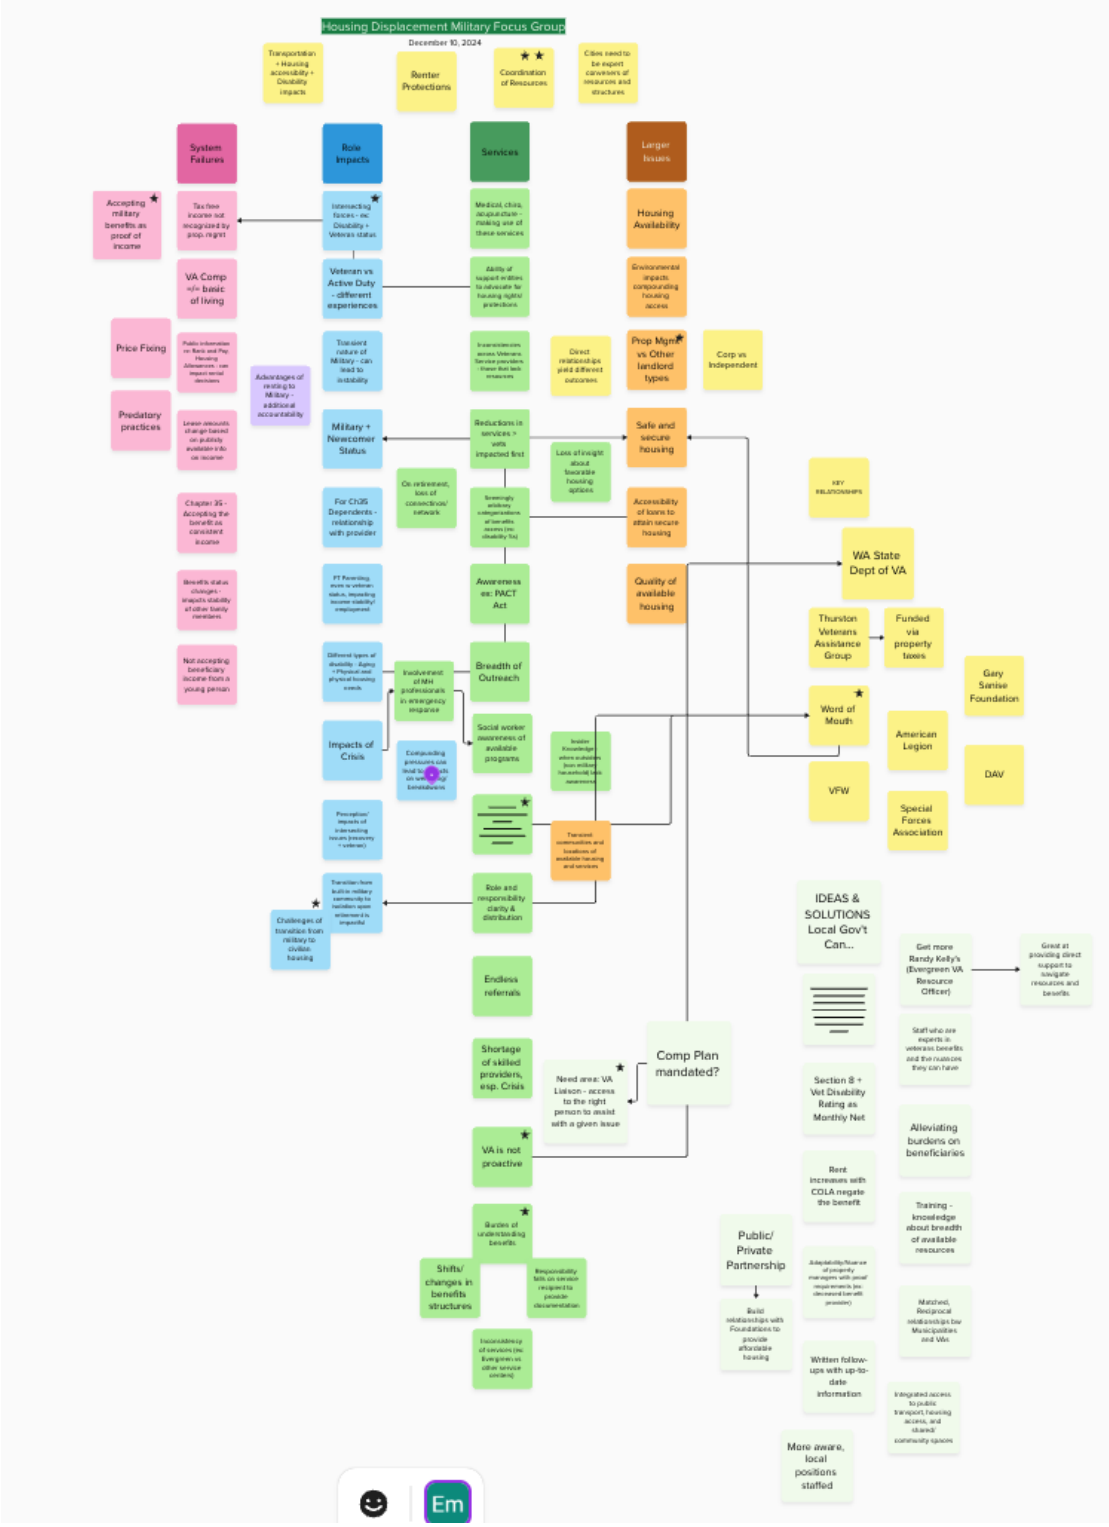
To construct key themes, our team organized and analyzed the following 4 main topics that emerged from the discussion:

Coordination of Resources

- Participants emphasized breakdowns in resource and benefit awareness, availability, and accessibility. These breakdowns result in military benefit recipients being unable to access their benefits, declined housing, and a disproportionate burden upon military households when attempting to navigate benefits that support housing access.
- Participants recommended cities act as resource conveners, equip expert staff positions to support resource navigation, and establish stronger, more reciprocal relationships between municipalities and Veterans Associations.

Renter Protections

- Participants described experiences of being denied housing due to lack of awareness from landlords about military benefit structure, price fixing based on publicly available information about military compensation and housing allowances, age discrimination, and challenges connecting with property management representatives as the sector shifts to more corporate ownership.
- Participants recommended that cities identify ways to monitor income verification, establish local ordinances to enforce attainable income verification, and address price fixing.



Provider Competence

- Participants shared their desires for service providers to serve as advocates when addressing barriers to housing, as well as the challenges they face working with providers, including misinformation about benefits, out-of-date information, difficulty connecting with knowledgeable service providers, referral loops, and overall lack of coordination between providers.
- Participants brainstormed trusted supports and providers during the meeting.
- Participants called on cities to establish reciprocal relationships with the Veterans Association specifically, where the VA supports the city in understanding the needs of the military community, and cities aid the VA in serving as housing advocates. They also suggested the city support professional positions with expertise in the nuances of navigating military benefits.

Comprehensive Approach

- Participants shared the specific impacts felt by intersecting factors, especially disability and veteran status. They recognized inconsistencies in how statuses are determined and the impact on benefits and housing access, as well as the importance of coordinated services that recognize the compounding impacts of physical and mental health, age, immigrant status. They shared the specific challenge when military households transition from active duty to veteran, and the experiences of social isolation. They highlighted the prominence of word of mouth as a key method of accessing housing and navigating benefits.
- Participants reiterated the importance of transportation, housing, and social services being factored together when planning for cities that are accessible for people of all mobilities and abilities.

Group Discussion Mural Transcription

High Level Themes:

- Transportation + Housing accessibility + Disability impacts
- Renter Protections
- Coordination of Resources (starred)
- Cities need to be expert conveners of resources and structures

System Failures:

- Tax-free income not recognized by property management
- Accepting military benefits as proof of income
- VA comp does not equal basic cost of living
- Price fixing
- Public information re: rank and pay, housing allowances – can impact rental decisions
- Predatory practices
- Lease amounts change based on publicly available info on income
- Chapter 35 – accepting the benefit as consistent income
- Benefit status changes – impacts stability of other family members
- Not accepting beneficiary income from a young person

Role Impacts:

- Intersecting forces – ex: disability + veteran status (starred)
- Veteran vs Active Duty – different experiences
- Transient nature of military – can lead to instability
- Military + Newcomer status
- For Ch35 dependents – relationship with provider
- FT Parenting, even with veteran status, impacting income stability/employment
- Different types of disability – ageing and physical, and physical housing needs
- Impact of crisis
- Perception/impacts of intersecting issues (recovery + veteran)
- Compounding pressures can lead to impacts on wellbeing/breakdowns
- Ex: Inaccurate information can feel devastating
- Transition from built-in military community to isolation upon retirement is impactful (starred)
- Challenges in transition from military to civilian housing (starred)

Services:

- Medical, chiro, acupuncture – making use of all these services
- Ability of support entities to advocate for housing rights/protections
- Inconsistencies across Veterans Service providers – those that lack resources
- Reductions in services > vets impacted first
- Seemingly arbitrary categorizations of benefits access (ex: disability percentages)
- On retirement, loss of connections/network
- Awareness ex: PACT Act
- Breadth of outreach
- Social worker awareness of available programs

- Involvement of MH professionals in emergency response
- Insider Knowledge - when outsiders (non-military households) lack awareness
- Impacts of miscommunication/lack of understanding impacts access to services (starred)
- Role and responsibility clarity & distribution
- Endless referrals
- Shortage of skilled providers, esp. Crisis
- VA is not proactive (starred)
- Burden of understanding benefits
- Shifts/changes in benefits structures
- Responsibility falls on service recipient to provide documentation
- Inconsistency of services (ex: Evergreen vs other service centers)

Larger Issues:

- Housing availability
- Environmental impacts compounding housing access
- Property management vs other landlord types (starred)
- Corp vs Independent
- Direct relationships yield different outcomes
- Safe and secure housing
- Accessibility of loans to attain secure housing
- Quality of available housing
- Transient communities and locations of available housing and services

Key Relationships:

- WA State Dept of VA
- Thurston Veterans Assistance Group
- Funded via property taxes
- Word of Mouth (starred)
- American Legion
- Veterans of Foreign Wars (VFW)
- Special Forces Association
- Disabled American Veterans
- Gary Sinise Foundation

Ideas & Solutions: Local Government Can…

- Need area: VA Liaison - access to the right person to assist with a given issue (starred)
- Comp plan mandated?
- Local/State Ordinance mandating property mgmt. companies to stop dismissing fixed income veterans 3x monthly rent gross income
- Section 8 + Vet Disability Rating as Monthly Net
- Rent increases with COLA negate the benefit
- Adaptability/Nuance of property managers with proof requirements (ex: deceased benefit provider)

- Written follow-ups with up-to-date information
- More aware, local positions staffed
- Public/Private Partnership
- Build relationships with Foundations to provide affordable housing
- Get more Randy Kelly's (Evergreen VA Resource Officer)
- Great at providing direct support to navigate resources and benefits
- Staff who are experts in veterans benefits and the nuances they can have
- Alleviating burdens on beneficiaries
- Training - knowledge about breadth of available resources
- Matched, Reciprocal relationships bw Municipalities and Vas
- Integrated access to public transport, housing access, and shared/community spaces

Appendix G

HOUSING ELEMENT: PART 2 – TECHNICAL INFORMATION – APPENDIX E: POLICY EVALUATION MATRIX

City of Tumwater

Policy Evaluation Matrix

Does the policy reduce displacement pressures or advance housing objectives?

Yes - 2	Somewhat - 1	Neutral/None - 0	Negative Impact - (-1)

		COMMERCE INDICATORS						TUMWATER-SPECIFIC CRITERIA				
Number/Ref.	**Policy Recommendation**	**Racially Disparate Impacts:** Does this policy prevent racially disparate impacts or work to repair past harm?	**Displacement:** Does this policy help prevent or mitigate economic displacement?	**Displacement:** Does this policy help prevent or mitigate physical displacement?	**Displacement:** Does this policy help prevent or mitigate cultural displacement?	**Housing Exclusion:** Does this policy prevent the exclusion of historically marginalized or other vulnerable populations from accessing safe and affordable housing appropriate for their needs?	**Implementation Considerations:** Does the city have staff and resources necessary to implement this policy effectively?	Does this policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?	Does this policy incentivize and support the development of affordable and deeply affordable housing?	Does this policy encourage adaptive reuse of existing residential units or other buildings where feasible?	Does this policy incentivize or reduce barriers to developing diverse housing types including smaller homes?	Impact Score (out of 20)
New Policies												
	Explore ways to monitor renter income verification, which may include establishing local ordinances to enforce attainable income verification, and identify and address price fixing.	1	1	1	1	0	0	1	1	0	0	6
	Consider creative zoning overlays or land use policies to classify and protect manufactured home communities.	1	2	2	2	2	1	2	2	0	0	14
	Establish a program, partnering with local organizations where possible, to incentivize and assist mobile park owners with improving their properties and support upgraded utilities and infrastructure for these properties.	1	1	2	2	2	0	2	2	2	1	15
	Encourage collaboration between local organizations working to provide affordable housing and prevent homelessness.	2	2	2	2	2	1	1	2	0	0	14
	Create and promote an educational program, partnering with local organizations where possible, to explain the long term investment opportunity of ADUs and the financial plan required to pursue building an ADU.	0	1	0	1	0	1	0	1	2	2	8
	Encourage or support residents of mobile home communities in forming Community Land Trusts or other cooperatives so they can manage their properties independently and be prepared to exercise the right of first refusal.	2	2	2	2	2	0	2	2	1	0	15

DRAFT

1. Introduction

A. Background

The Land Use Element is part of Tumwater's Comprehensive Plan and was prepared in response to the state Growth Management Act (Chapter 36.70A RCW) requirements to determine where particular land uses would be appropriate in Tumwater.

Tumwater's Vision, Mission, and Belief Statements that provide overarching direction for the future of Tumwater are found in the Plan Introduction.

The Land Use Element aligns and is consistent with the other elements of the Comprehensive Plan.

Part 1 – Goals Policies, and Implementation Actions establishes Tumwater's goals and policies that set forth a direction to manage land uses in Tumwater.

The goals of the Land Use Element are guided by the state Growth Management Act and the Thurston County County-Wide Planning Policies as well as the vision of a Tumwater that will be people-oriented and highly livable, with a strong economy, dynamic places, vibrant neighborhoods, a healthy natural environment, diverse and engaged residents, and a living connection to its history. The Element's goals and policies are coordinated with the other Elements in the Comprehensive Plan and regional plans.

The Land Use Element's goals and policies are the policy basis for the draft implementation actions in Land Use Element and those future actions that will be developed over the next 20 years which will be the foundation for Tumwater's annual work programs to address land use for the community.

Part 2 – Technical Information provides the technical analysis of land use in the Tumwater to support the twenty-year growth projections for Tumwater.

B. How to Read this Element

In Part 1, Chapters 2 and 3 discuss the Land Use Element's connection to the goals of the state Growth Management Act and the Thurston County County-Wide Planning Policies.

Chapter 4 presents each goal with an explanation of how to read the tables and then presents each of Tumwater's land use goals in detail with an explanation of the importance of each goal.

Appendix A contains the draft implementation actions, which are intended to be a source of annual work program items that serve to implement the goals and policies of the Land Use Element.

The annual work programs will further refine the implementation actions prior to their being put into practice. It is expected that implementation actions will be further amended, added, or subtracted as needed over the course of the 20 year Comprehensive Plan as new opportunities arise to meet the intent of the Land Use Element's goals and policies.

DRAFT

2. Growth Management Act – Element Goals

Chapter 36.70A RCW requires that Tumwater show how the Land Use Element meets the fifteen planning goals contained within the Act. The following is a listing of the fifteen applicable goals, and an analysis of how the Land Use Element addresses each goal:

1. ***Urban growth***. *Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.*

The availability of services, including transportation, water and sewer facilities, and other utilities was considered when applying the land use designations in the Land Use Element. The density ranges for all residential land use designations are based on Tumwater's housing allocation across all income groups for the next twenty years and the associated population forecast and is consistent with available or planned public facilities and services.

2. ***Reduce sprawl***. *Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.*

The Land Use Element contains goals, policies, and implementation actions that encourage compact, efficient urban development and supports higher intensity urban growth to be phased outward from the urban core. These policies include minimum density requirements, clustering in sensitive areas, overall higher residential densities throughout Tumwater, and mixed residential and commercial areas.

Each residential designation in the Land Use Element provides adequate density for feasible transportation, water, and sanitary sewer service, while protecting sensitive areas.

3. ***Transportation***. *Encourage efficient multimodal transportation systems that will reduce greenhouse gas emissions and per capita vehicle miles traveled, and are based on regional priorities and coordinated with county and city comprehensive plans.*

The Land Use Element contains goals, policies, and implementation actions that ensure coordination with the Transportation Plan and other local and regional transportation plans.

The transportation goal was updated in 2023 by the state legislature to add reducing greenhouse gas emissions and vehicle miles traveled per capita. Achieving this goal is done through a combination of goals, policies, and implementation actions in the Land Use Element, Climate Element, and Transportation Plan.

The Land Use Element also proposes higher intensity residential, mixed-use, and neighborhood commercial land use designations to encourage multi-modal, transit oriented development.

4. ***Housing***. *Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities*

DRAFT

and housing types, and encourage preservation of existing housing stock.

How affordable housing is accommodated for all economic classes in Tumwater is more specifically set forth in the Housing Element. The Land Use Element plays a role in allocating sufficient land to ensure an adequate supply of buildable land for housing types serving every income group.

Each residential land use designation, including the mixed use designations, provides a variety of housing types at varying densities. Each Neighborhood subarea of the Land Use Element also contains sufficient variability in housing types to ensure that housing needs can be met for all segments of Tumwater 's population for the next twenty years.

5. ***Economic development***. *Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.*

The Land Use Element ensures the provision of adequate land for commerce and industry in Tumwater and accommodates Tumwater's twenty-year employment forecast.

The Economic Development Plan makes specific recommendations for economic development in Tumwater.

6. ***Property rights***. *Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.*

The Attorney General is directed under RCW 36.70A.370 to advise state agencies and local governments on an orderly, consistent process that better enables the government to evaluate proposed regulatory or administrative actions to ensure that these actions do not result in unconstitutional takings of private property. Local governments that plan under the Growth Management Act must use this process.

Tumwater adheres to the most current version of the Attorney General's *Advisory Memorandum and Recommended Process for Evaluating Proposed Regulatory or Administrative Actions to Avoid Unconstitutional Takings of Private Property*, in its permitting and planning decisions. The Attorney General's memorandum provides local governments with a tool to assist them in the process of evaluating land use actions.

7. ***Permits***. *Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.*

The Land Use Element provides the policy basis for Tumwater's development

regulations to be developed in a systematic and fair manner. All jurisdictions fully planning under the Growth Management Act must follow the permit procedures found in Chapter 36.70B RCW *Local Project Review* to administer permit application processes. Project permit processing standards are provided in TMC Title 14 *Development Code Administration*.

8. ***Natural resource industries***. *Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.*

While this goal primarily applies to rural areas of Thurston County, the Land Use Element ensures the viability of natural resource industries that currently existing Tumwater, such as mineral extraction and limited forest production lands, through the identification of such lands in the Land Use Element text and maps. Additionally, the Conservation Element has specific goals and policies that ensure the viability of these natural resource industries and activities as agricultural uses appropriate for an urban area in Tumwater.

9. ***Open space and recreation***. *Retain open space and green space, enhance recreational opportunities, enhance fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.*

The state legislature updated this goal in 2023 to add the requirement to retain green space and enhance habitat and urban and community forests. The Land Use Element, in conjunction with the Parks, Recreation, and Open Space Plan, designates areas of Tumwater that would be appropriate for future open space and recreation uses. The Land Use Element reinforces the recommendations of the Parks, Recreation, and Open Space Plan through land use designations and its goals and policies.

Additionally, the Conservation Element has specific goals and policies that enhance fish and wildlife habitat in Tumwater.

10. ***Environment***. *Protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.*

The state legislature updated this goal in 2023 to add the requirement to enhance the environment. Each designation in the Land Use Element is of an appropriate intensity for where it is applied. Areas of environmental sensitivity are designated as open space or a lower intensity designation than other areas of Tumwater.

The Conservation Element contains specific policies relating to protecting and enhancing air and water quality, water availability, and protection and preservation of critical areas. The Land Use Element also makes recommendations for clustering and other creative development techniques to protect sensitive environmental areas of Tumwater.

11. ***Citizen participation and coordination***. *Encourage the involvement of citizens in the planning process, including the*

DRAFT

participation of vulnerable populations and overburdened communities, and ensure coordination between communities and jurisdictions to reconcile conflicts.

The state legislature updated this goal in 2023 to add the requirement to include the participation of frontline and overburdened communities. For the Comprehensive Plan update, Tumwater followed the strategy outlined in the Final Community Engagement Plan to involve the entire community in the update process.

12. ***Public facilities and services**. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.*

All non-open space designations in the Land Use Element are applied to areas that either have adequate capacity for transportation, utilities, storm, and municipal services or will be provided with these facilities in the future concurrent with development. The Land Use Element ensures concurrency through coordination with the Lands for Public Purposes Element, the Capital Facilities Plan, the Transportation Plan, and other elements of the Comprehensive Plan.

13. ***Historic preservation**. Identify and encourage the preservation of lands, sites, and structures that have historical or archaeological significance.*

The Land Use Element designates an area of Tumwater as the New Market Historic District. The New Market Historic District Master Plan was adopted by the City Council in November of 1993. The Master Plan provides a framework for action and ensures the preservation of historic and archeological resources in the Historic District.

14. ***Climate change and resiliency**. Ensure that comprehensive plans, development regulations, and regional policies, plans, and strategies under RCW 36.70A.210 and chapter 47.80 RCW adapt to and mitigate the effects of a changing climate; support reductions in greenhouse gas emissions and per capita vehicle miles traveled; prepare for climate impact scenarios; foster resiliency to climate impacts and natural hazards; protect and enhance environmental, economic, and human health and safety; and advance environmental justice.*

The state legislature added this goal in 2023. Land Use Element supports the goals of the new Climate Element primarily through land use goals, policies, and implementation actions that support compact urban development that reduce sprawl and allow for multimodal transportation.

15. ***Shorelines of the state**. For shorelines of the state, the goals and policies of the shoreline management act as set forth in RCW 90.58.020 shall be considered an element of the county's or city's comprehensive plan.*

DRAFT

The state legislature added this goal in 2023. Tumwater's Shoreline Master Program was adopted in 2012 and updated in 2018. The next required state update of the Shoreline Master Program will be in 2030.

The Shoreline Master Program addresses the land uses on all lands under the jurisdiction of the Shoreline Management Act in order to protect and preserve water dependent activities and fish and wildlife habitat in the shorelines of the state.

DRAFT

3. County-Wide Planning Policies

The Growth Management Act requires that Tumwater's Comprehensive Plan be consistent with the Thurston County County-Wide Planning Policies, which were last amended in 2025.

The following is a list of the County-Wide Planning Policies that apply to the Land Use Element, and a brief description of how the Element is consistent with these policies. All County-Wide Planning Policies are adopted as part of the Comprehensive Plan and are found in Appendix A of the Plan Introduction.

I. General Policies

The Land Use Element contains goals, policies, and implementation actions that address the wide range of issues covered by County-Wide Planning Policies 1.1 through 1.17.

II. Urban Growth Areas

The Land Use Element contains goals, policies, and implementation actions that address County-Wide Planning Policies 2.1 through 2.6.

Thurston County established the urban growth area boundaries and planning for growth within Tumwater's urban growth area is consistent with the Tumwater and Thurston County Joint Plan. For more information, see the response to Policy IV below.

III. Promotion of Contiguous and Orderly Development, Provision of Urban Services, and Protection of Rural Areas

The Land Use Element contains goals, policies, and implementation actions that address County-Wide Planning Policies 3.1 through 3.4. These goals, policies, and objectives encourage compact, efficient urban development that is phased outward from the urban core. It also proposes residential and mixed-use land use designations that encourage the development of compact urban areas.

To help address County-Wide Planning Policy 3.1, each residential designation in the Land Use Element and their geographic application in Tumwater meets this policy by providing for adequate density to accommodate the 20-year population growth in a sustainable manner. In doing so, the Plan uses innovative development techniques such as clustering and transfer of development rights to protect natural resource areas.

It has been demonstrated in Part 2 of the Land Use Element that Tumwater can meet its population projections over the planning period. The Tumwater and Thurston County Joint Plan also address these issues for Tumwater's urban growth area.

To address County-Wide Planning Policy 3.2, the designation of two to four residential units per acre in particularly unique sensitive areas is consistent with this policy in its entirety.

Any development will have services concurrent with development; and all areas of Tumwater are governed by the 1988 and 1995 Urban Growth Management Agreements, which prohibit extension of water or sewer outside the urban growth area except for public health reasons.

Coordination between Tumwater and adjoining jurisdictions is accomplished

DRAFT

through a number of documents and agreements including the Tumwater and Thurston County Joint Plan, the 1988 Memorandum of Understanding: An Urban Growth Management Agreement, the 1995 Memorandum of Understanding: Urban Growth Area Zoning and Development Standards, and the County-Wide Planning Policies including County-Wide Planning Policy 3.3.

To address County-Wide Planning Policy 3.4, Tumwater coordinates with existing service providers such as fire districts, utility providers, and Thurston County to ensure an orderly transfer before, during, and after annexations. Effective annexation of urban growth areas is encouraged in the Comprehensive Plan.

IV. Joint County & City Planning Within urban growth areas

To address County-Wide Planning Policies 4.1 through 4.5, Thurston County and Tumwater adopted the Tumwater and Thurston County Joint Plan. This plan, an element of both the Tumwater and Thurston County Comprehensive Plans, creates a process for joint planning within Tumwater's urban growth area.

V. Siting County-Wide and State-Wide Public Capital Facilities

To address County-Wide Planning Policies 5.1 and 5.2, the Land Use Element and TMC 18.56.140 address the siting of essential public facilities as required under state law.

VI. Analysis of Fiscal Impact

To address County-Wide Planning Policies 6.1 through 6.3, each non-open space designation in the Land Use Element ensures that needed services can be provided at the most efficient cost to the taxpayer given the constraints and environmental sensitivity of the land.

The Land Use Element has been coordinated with the Lands for Public Purposes Element and other elements of the Comprehensive Plan. Fiscal impacts are also addressed through the Capital Facilities Plan

VII. Economic Development and Employment

To address County-Wide Planning Policies 7.1 through 7.5, the Land Use Element ensures the provision of adequate land for commerce and industry in Tumwater to meet the twenty year projections for employment growth. The Economic Development Element also makes specific recommendations for economic development in Tumwater.

VIII. Affordable Housing

To address County-Wide Planning Policies 8.1 through 8.7, the Housing Element is the principal policy document concerning affordable housing. The Land Use Element works with the Housing Element to provide adequate suitably zoned vacant land to further the policies of the Housing Element.

Each residential designation in the Land Use Element, including designations that allow for mixed use, provides a variety of housing types to ensure that affordable housing is provided for all economic segments of the Tumwater population. The Land Use Element, in conjunction with the Housing Element, includes policies and land use designations

designed to ensure the provision of affordable housing and availability for all income groups in Tumwater.

IX. Transportation

To address County-Wide Planning Policies 9.1 through 9.10, the Land Use Element contains goals, policies, and implementation actions that ensure coordination with regional and local transportation plans. The Land Use Element also proposes residential, mixed-use, and neighborhood commercial land use designations that encourage multi-model, transit-oriented development.

X. Environmental Quality

To address County-Wide Planning Policies 10.1 through 10.9, each land use designation in the Land Use Element has been applied based on specific criteria that include the sensitivity of certain areas to environmental disturbance. These sensitive areas either have received an open space designation or have received a designation of a lower intensity. Additionally, most environmentally sensitive areas of Tumwater recommend that development be clustered away from the sensitive area.

Additionally, the Land Use Element contains goals and policies that ensure coordination of land use with TMC Chapter 13.12 and the Drainage Design and Erosion Control Manual for Tumwater. The Conservation Element, as a part of the Comprehensive Plan, also contains specific policies relating to air and water quality and water availability. The Land Use Element also makes recommendations for clustering and other creative development techniques in sensitive areas of Tumwater.

XI. County-Wide Policies which Establish a Process to Develop Future Policies

To address County-Wide Planning Policies 11.1 through 11.3, the Land Use Element is designed to be an adaptable document. As conditions and circumstances change, or as regional plans and policies are amended, the Land Use Element can be revised accordingly.

DRAFT

4. Element Goals and Policies

A. How to Read These Tables

The Land Use Element's goals and policies are not in priority order.

Appendix A provides a list of the draft implementation actions by goal and policy that will be considered when developing annual work programs for implementing the Land Use Element's goals and policies.

1) Department Leads

Implementation of the Land Use Element's policies are associated with four different Tumwater departments:

CDD Community Development

PRD Parks, Recreation, and Facilities

TED Transportation & Engineering

WRS Water Resources & Sustainability

2) Period

Each of the Land Use Element's policies are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

B. Growth Management Goals

Goal LU-1 Ensure the Land Use Element is implementable and coordinated with other City, neighboring jurisdictional, and regional plans.

Plans that can be put into immediate action with appropriate resources provide better outcomes for communities. Tumwater will prioritize implementation actions and monitor progress toward the goals it sets together with community members.

When resources, timelines, and responsibilities can be coordinated with other partners, more work can be done with fewer resources. Ensuring all partners and community members have a voice in the plan also encourages a sense ownership and belonging.

Policies and Implementation Actions		Lead	Period
LU-1.1	**Ensure the Land Use Element is consistent with adopted County-Wide Planning Policies and integrates climate, conservation, housing, and transportation considerations into land use decisions.**	**CDD**	**Term of the Plan**
LU-1.2	**Coordinate the Land Use Element with all the other Elements of the Comprehensive Plan.**	**CDD**	**Term of the Plan**

DRAFT

Policies and Implementation Actions		Lead	Period
LU-1.3	Implement the following City plans and maps through the Land Use Element: 1. Capital Facilities Plan 2. Economic Development Plan 3. Housing Action Plan 4. Shoreline Master Program 5. Thurston Climate Mitigation Plan 6. Transportation Improvement Plan 7. Tumwater Historic District Master Plan 8. Tumwater – Thurston County Joint Plan 9. Urban Forestry Management Plan 10. Zoning Code and Map	CDD PRD TED WRS	Term of the Plan
LU-1.4	Make capital facilities and transportation improvement decisions through the Capital Facilities Plan and Transportation Improvement Plan consistent with the Land Use Element and the Comprehensive Plan.	CDD PRD TED WRS	Term of the Plan
LU-1.5	Coordinate the Land Use Element with all adopted regional plans and the plans of neighboring jurisdictions and special districts.	CDD	Term of the Plan
LU-1.6	Support the creation of a new city center.	CDD TED	Term of the Plan

Goal LU-2

Ensure development occurs in an orderly, effective, and cost-efficient manner to best utilize available land and public services, conserve natural resources, protect and enhance critical areas and open space, address equity and climate change, and reduce sprawl.

Land is a limited resource. To use land efficiently, all the uses should be considered and balanced to support the needs of the community. Allowing the right use in the right place protects the water and soil resources into the future.

Policies and Implementation Actions		Lead	Period
LU-2.1	Review and update Tumwater's development review and permitting system on a regular basis for consistency with state law and adopted plans to ensure predictability and to process development permits in a timely and fair manner.	CDD	Term of the Plan
LU-2.2	Use innovative land use techniques, such as 15-minute neighborhoods, to create and maintain vibrant centers, corridors, and neighborhoods while accommodating growth, discouraging displacement, and protecting and enhancing critical areas.	CDD WRS	Term of the Plan
LU-2.3	Support vibrant neighborhoods with a range of affordable housing, strong and resilient economies, access to social services, healthy habitats, unique spaces for recreation, engagement, and inclusion.	CDD	Term of the Plan
LU-2.4	Support complete neighborhoods consisting of connected, transit-oriented communities with a range of transportation choices for all residents.	CDD	Term of the Plan
LU-2.5	Ensure new annexations adhere to the goals and policies agreed to by Tumwater and Thurston County.	CDD	Term of the Plan
LU-2.6	Protect designated mineral resource lands from incompatible development.	CDD	Term of the Plan

Goal LU-3 Ensure adequate public services, facilities, and utilities are available to proposed and existing development.

As Tumwater grows, it is important for public services and facilities to anticipate growth and provide services so that they are available as development occurs. Working with internal and external partners is key to coordinating the resources available and ensuring services are available to residents. To use resources efficiently at urban densities also requires efforts to replace private sewer and water systems with public systems.

Policies and Implementation Actions		Lead	Period
LU-3.1	Ensure capital budget decisions in the six-year Capital Facilities Plan are coordinated with the Land Use Element, Lands for Public Purpose Element, Climate Element, Parks, Recreation, and Open Space Plan, and Transportation Plan.	CDD PRD TED WRS	Term of the Plan
LU-3.2	Ensure development conforms with the Water System Plan and Sanitary Sewer Comprehensive Plan.	CDD TED WRS	Term of the Plan
LU-3.3	Analyze all proposed projects for anticipated impact on public services as part of development and environmental review.	CDD PRD TED WRS	Term of the Plan
LU-3.4	Work with developers to determine where and when new public facilities are to be placed to permit proper development of current and future projects and meet concurrency.	CDD PRD TED WRS	Term of the Plan
LU-3.5	Require existing development utilizing permitted septic tanks for sewerage disposal to hook up to the sanitary sewer when a septic system fails, needs replacement, or requires major repairs as sanitary sewer laterals become available.	CDD TED	Term of the Plan
LU-3.6	Require existing development utilizing permitted private wells for water to connect to Tumwater's water service when the well fails, needs replacement, or requires major repairs, where City water service available.	CDD WRS	Term of the Plan

C. Equitable Community Goals

Goal LU-4 Create land use patterns that increase equity across all land use types.

Environmental justice means planning for a future where no people are intentionally placed in harm's way. Providing sufficient land for residential development serving for all income groups ensures that all Tumwater residents can afford the cost of living and not have to sacrifice other needs to keep their home.

Goal LU-4 works together with the Housing Element to ensure sufficient land has been

designated for housing. The Housing Element contains goals, policies and implementation actions that provide guidance for housing types for all income groups.

	Policies and Implementation Actions	Lead	Period
LU-4.1	Embed environmental justice in land use decisions.	CDD	Term of the Plan
LU-4.2	Coordinate residential uses and densities in the Land Use Element with the housing allocations for all income groups in the Housing Element.	CDD	Term of the Plan
LU-4.3	Use innovative techniques to support the provision of affordable housing.	CDD	Term of the Plan
LU-4.4	Support a greater variety of housing types to meet the needs of a changing population by creating flexible design guidelines.	CDD	Term of the Plan
LU-4.5	Develop anti-displacement programs in frontline communities when increasing densities.	CDD	Term of the Plan

Goal LU-5 Ensure land use patterns support efficient multimodal transportation systems in coordination with City and regional transportation plans.

Transportation of both people and goods throughout Tumwater requires coordination with providers and users to ensure services meet the needs of residents, businesses, and customers.

Multiple options for transportation allow residents to live independently regardless of age, income, or abilities. Coordinating development with transit and active transportation options ensures increased access to transportation options for everyone.

	Policies and Implementation Actions	Lead	Period
LU-5.1	Coordinate the Land Use Element with the Transportation Plan, Regional Transportation Plan, Parks, Recreation, and Open Space Plan, Climate Element, and Thuston Climate Mitigation Plan.	CDD PRD TED WRS	Term of the Plan

Policies and Implementation Actions		Lead	Period
LU-5.2	Establish and maintain multimodal links between land uses.	CDD TED	Term of the Plan
LU-5.3	Allow densities and mixtures of uses that reduce the number and lengths of vehicle trips and increase the opportunity to use transit and active modes of travel.	CDD	Term of the Plan
LU-5.4	Coordinate with transportation providers and developers to ensure that developments are designed to promote physical, mental, and social health, and reduce the impacts of climate change on the natural and built environments.	CDD TED WRS	Term of the Plan
LU-5.5	Reinforce the link between land use and public transportation by encouraging development to occur at higher densities along designated transit corridors, nodes, and near commercial and employment centers.	CDD	Term of the Plan
LU-5.6	Monitor transportation improvements for consistency with the Comprehensive Plan and development regulations.	CDD TED	Term of the Plan

Goal LU-6 Ensure physical limitations of the land are considered during development.

Historically cultures have built their communities around natural resources that support livelihoods. To preserve the environment and promote safety, Tumwater reviews the physical features of the environment during development review. Limiting development to lands which have suitable environmental characteristics also protects residents from natural hazards such a landslides and flooding.

The Resiliency Subelement of the Climate Element includes a number of actions that support this goal.

Policies and Implementation Actions		Lead	Period
LU-6.1	Ensure development conforms with environmental standards and requirements.	CDD	Term of the Plan
LU-6.2	Evaluate and set reasonable conditions on development to mitigate anticipated adverse environmental impacts.	CDD	Term of the Plan

Policies and Implementation Actions		Lead	Period
LU-6.3	Integrate design features of existing natural systems into the layout and siting of new development, including significant trees and noncritical ecological systems, where possible.	CDD	Term of the Plan
LU-6.4	Reduce and mitigate the risk to lives and property posed by wildfires by using land use planning tools and through wildfire preparedness and fire adaptation measures.	CDD	Term of the Plan

D. Specific Land Use Type Goals

Goal LU-7 Support development of all types of residential uses.

With the forecasted increase of population and housing need, ensuring Tumwater has sufficient land for a range of residential uses is a top priority. Different types of housing for all income groups support seniors, people with disabilities, low income, and marginalized communities. Accommodating space for diversity strengthens our community.

Policies and Implementation Actions		Lead	Period
LU-7.1	Ensure an adequate supply of residential land to support the development of housing affordable to all income groups.	CDD	Term of the Plan
LU-7.2	Explore and implement methods to protect residential uses from excessive noise, odors, dirt, glare, traffic, pollution, and other nuisances emanating from regional transportation facilities and commercial and industrial uses.	CDD	Term of the Plan
LU-7.3	Concentrate residential development in integrated centers to allow for multimodal access to services.	CDD	Term of the Plan
LU-7.4	Allow innovation in development regulations with newer forms of residential development where amenities of open space, privacy, and visual quality can be maintained or improved, and flexible solutions to land use challenges can be achieved.	CDD	Term of the Plan

Policies and Implementation Actions		Lead	Period
LU-7.5	Do not permit private residential gated communities.	CDD	Term of the Plan
LU-7.6	Support residential developments that provide easy access to healthy food sources and facilitate food recovery efforts.	CDD	Term of the Plan

Goal LU-8 Support development of commercial and mixed uses in appropriate areas.

A strong economy depends on adequate space for providing goods and services to serve residents. Finding the appropriate location for commercial uses depends on the type of activity and intensity of use. Allowing flexibility for smaller scale commercial uses close to housing while buffering residential uses from higher intensity commercial uses is a key to making sure uses are compatible in neighborhoods.

Policies and Implementation Actions		Lead	Period
LU-8.1	Ensure adequate supply of developable commercial land.	CDD	Term of the Plan
LU-8.2	Concentrate high intensity commercial uses in mixed use centers to efficiently provide multimodal access and walkable communities.	CDD	Term of the Plan
LU-8.3	Locate high intensity commercial uses close to arterial routes and freeway access.	CDD	Term of the Plan
LU-8.4	Locate lower intensity neighborhood commercial uses throughout Tumwater to supply nearby residents with everyday goods and services where these uses are small, do not generate excessive traffic, and are compatible with nearby residences.	CDD	Term of the Plan
LU-8.5	Support local small scale commercial opportunities.	CDD	Term of the Plan

DRAFT

Goal LU-9 Support development of manufacturing, industrial, and warehouse uses in appropriate areas.

Industrial uses can include manufacturing, research, warehousing, raw materials storage, and other activities. Allowing a range of industrial activities in Tumwater increases local job opportunities and decreases the transportation costs for those services.

Designating land for industrial uses considers space required for equipment, buffering for adjacent uses, proximity to transportation routes, and reducing environmental impacts.

Policies and Implementation Actions		Lead	Period
LU-9.1	Ensure adequate supply of developable industrial land near primary transportation corridors.	CDD	Term of the Plan
LU-9.2	Group manufacturing, industrial, and warehouse uses into centers in landscaped, urban park quality centers.	CDD	Term of the Plan
LU-9.3	Develop manufacturing, industrial, and warehouse areas following an integrated planning scheme incorporating performance standards regarding green belts, and buffering, landscaping, parking facilities, and design guidelines.	CDD	Term of the Plan
LU-9.4	Locate new manufacturing, industrial, and warehouse development in areas close to arterial routes, freeway access, and rail facilities that minimize pollution and heavy truck traffic through residential and commercial areas.	CDD	Term of the Plan
LU-9.5	Ensure manufacturing, industrial, and warehouse structures are low profile and provide sustainable screening landscaping that also reduces environmental effects of such land uses.	CDD	Term of the Plan

Goal LU-10 Retain and enhance open space, parks, trails, and space for recreational opportunities.

Access to open space, parks, trails, and recreational opportunities improves quality of life and physical and social-emotional health. Underserved communities typically lack access to open spaces, parks, trails, and recreational opportunities. Ensuring that all community members have access to these spaces is a

priority. Additional goals and policies are found in the Parks, Recreation, and Open Space Plan.

	Policies and Implementation Actions	Lead	Period
LU-10.1	Coordinate provision of open space, parks, trails, and space for recreational opportunities with the Parks, Recreation, and Open Space Plan.	CDD PRD	Term of the Plan
LU-10.2	Preserve and enhance environmentally sensitive lands by developing compact urban areas.	CDD	Term of the Plan
LU-10.3	Require a variety of open spaces including landscaped buffers, small parks, plazas, and other community areas to balance higher density development and enhance quality of living.	CDD	Term of the Plan

E. Public Facilities Goals

Goal LU-11 Support development of public facilities in appropriate areas.

Public facilities are built and maintained by a government or agency for public use. They include transportation facilities, road lighting systems, storm and sanitary sewer systems, parks and open space, and transit stops. These facilities need adequate space as Tumwater grows. More goals and policies about the processes by which public facilities are built and maintained are found in the Lands for Public Purposes Element, Parks, Recreation, and Open Space Plan, and Transportation Plan.

	Policies and Implementation Actions	Lead	Period
LU-11.1	Ensure an adequate supply of developable land for public facilities.	CDD	Term of the Plan
LU-11.2	Distribute public facilities throughout Tumwater to ensure multimodal access.	CDD	Term of the Plan

Goal LU-12 Provide for the location of essential public facilities.

Essential public facilities are those that are typically difficult to site and are defined in RCW 36.70A.200 to include airports, state education facilities, regional transit authority facilities,

state and local correctional facilities, solid waste handling and organic management facilities, and in-patient facilities including substance abuse facilities, mental health facilities, group homes, and secure community transition facilities.

In coordination with the development code, the Land Use Element describes the process for siting essential public facilities.

Policies and Implementation Actions		Lead	Period
LU-12.1	Ensure that the Comprehensive Plan and implementing regulations do not preclude the siting of essential public facilities.	CDD	Term of the Plan
LU-12.2	Ensure that where possible, essential public facility sites are used jointly for public benefit.	CDD	Term of the Plan
LU-12.3	Give opportunities for residents, property owners, adjacent jurisdictions, and other interested parties for meaningful participation in decisions on siting essential public facilities.	CDD	Term of the Plan

Goal LU-13 Protect the Olympia Regional Airport from incompatible land uses that could affect present and future use of airport facilities and operations while acknowledging the existing urban environment adjacent to the Airport.

Airports are an important part of the transportation system that supports the local and regional economy. In urban areas, regulations around airports keep both airport users and local community members safe by only allowing compatible uses in airport safety zone overlays. Development regulations that limit the heights of buildings, lights, and types of use can reduce the exposure to potential hazards near an airport.

Policies and Implementation Actions		Lead	Period
LU-13.1	Promote safe operation of Olympia Regional Airport by encouraging compatible land uses and activities and discouraging uses or activities that impede safe flight operations or endanger the lives of people on the ground.	CDD	Term of the Plan
LU-13.2	Work with the Port of Olympia to address off site impacts from airport uses on the surrounding community.	CDD	Term of the Plan

F. Historic Preservation Goals

Goal LU 14 Preserve and protect significant historical and cultural sites.

Preserving local sites of historical and cultural significance is important to understanding the past and learning from our experiences. Physical reminders of our history honor those that have come before. Working with local Tribes to preserve historical and cultural sites is an important component of recognizing our shared bond to this area.

Policies and Implementation Actions		Lead	Period
LU-14.1	Coordinate the Land Use Element with Tumwater and Thurston County's historic preservation programs.	CDD PRD	Term of the Plan
LU-14.2	Protect designated state and national landmarks listed by the State Office of Archaeology and Historic Preservation and cultural or archaeological resources identified by the Tribes in land use decisions.	CDD	Term of the Plan

DRAFT

Appendix A Draft Implementation Actions

Each of the Land Use Element goals and policies in Chapter 4 will require Tumwater to take specific actions to implement over the course of the 20 year term of the Comprehensive Plan.

The draft implementation actions in the tables below were developed in coordination with the stakeholders, the community, and Tumwater staff. The draft implementation actions in the tables below are intended to serve as the building blocks for developing the annual Tumwater work programs that will implement the goals and policies of the Land Use Element.

The draft implementation actions will need further refinement before they are incorporated into annual Tumwater work programs.

As the Comprehensive Plan is put into action over the next twenty years, the draft implementation actions will change as new, unforeseen opportunities emerge: new ones may be added, proposed ones may be modified or replaced by other actions.

1. How to Read These Tables

The Land Use Element goals, policies, and the draft implementation actions associated with them are not in priority order.

Draft implementation actions that can only be undertaken by other entities are not included in this plan.

a) Department Leads

Implementation of the Land Use Element's policies and implementation actions are associated with four different Tumwater departments:

CDD Community Development

PRD Parks, Recreation, and Facilities

TED Transportation & Engineering

WRS Water Resources & Sustainability

b) Period

Each of the Land Use Element's policies and the draft implementation actions are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

DRAFT

2. Growth Management Goals

Goal LU-1 Ensure the Land Use Element is implementable and coordinated with other City, neighboring jurisdictional, and regional plans.

Policies and Implementation Actions		Lead	Period
LU-1.1	**Ensure the Land Use Element is consistent with adopted County-Wide Planning Policies and integrates climate, conservation, housing, and transportation considerations into land use decisions.**	CDD	Term of the Plan
LU-1.1.1	Implement the County-Wide Planning Policies as adopted by Tumwater through the Land Use Element.	**CDD**	Term of the Plan
LU-1.2	**Coordinate the Land Use Element with all the other Elements of the Comprehensive Plan.**	**CDD**	**Term of the Plan**
LU-1.3	**Implement the following City plans and maps through the Land Use Element:** **1. Capital Facilities Plan** **2. Economic Development Plan** **3. Housing Action Plan** **4. Shoreline Master Program** **5. Thurston Climate Mitigation Plan** **6. Transportation Improvement Plan** **7. Tumwater Historic District Master Plan** **8. Tumwater – Thurston County Joint Plan** **9. Urban Forestry Management Plan** **10. Zoning Code and Map**	**CDD PRD TED WRS**	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
LU-1.3.1	Ensure that zoning designations and regulations are consistent with the overall City Land Use Map and Land Use Element goals and policies.	CDD	Review Every Five Years
LU-1.4	**Make capital facilities and transportation improvement decisions through the Capital Facilities Plan and Transportation Improvement Plan consistent with the Land Use Element and the Comprehensive Plan.**	CDD PRD TED WRS	**Term of the Plan**
LU-1.4.1	On a biennial basis, invest in public improvements through the six year Capital Facilities Plan to facilitate and complement private development including streetscape improvements, green infrastructure, public open spaces, and other amenities.	CDD PRD TED WRS	Term of the Plan
LU-1.5	**Coordinate the Land Use Element with all adopted regional plans and the plans of neighboring jurisdictions and special districts.**	CDD	**Term of the Plan**
LU-1.6	**Support the creation of a new city center.**	CDD TED	**Term of the Plan**
LU-1.6.1	Review and update the Tumwater Town Center Plan.	CDD TED	2026-28
LU-16.2	Work with the Port of Olympia and the Federal Aviation Administration to modify or remove their restrictions on residential development on Port owned land in the Town Center to allow full implementation of the Tumwater Town Center.	CDD	2026-28

Goal LU-2

Ensure development occurs in an orderly and cost-efficient manner to best utilize available land and public services, conserve natural resources, protect and enhance critical areas and open space, address equity and climate change, and reduce sprawl.

Policies and Implementation Actions		Lead	Period
LU-2.1	**Review and update Tumwater's development review and permitting system on a regular basis for consistency with state law and adopted plans to ensure predictability and to process development permits in a timely and fair manner.**	**CDD**	**Term of the Plan**
LU-2.1.1	Prepare annual reports on the number, type, and review times for development permits and post them on Tumwater's website.	**CDD**	Annually
LU-2.1.2	Using the information generated by annual reporting and the experiences of applicants and permit review staff assess and update Tumwater's permit processing system.	**CDD**	Every Three Years
LU-2.2	**Use innovative land use techniques, such as 15-minute neighborhoods, to create and maintain vibrant centers, corridors, and neighborhoods while accommodating growth, discouraging displacement, and protecting and enhancing critical areas.**	**CDD WRS**	**Term of the Plan**
LU-2.2.1	Review and update Tumwater's development standards, guidelines, and Citywide Design Guidelines on a regular basis.	**CDD**	Annually
LU-2.2.2	Develop and adopt an adaptive management plan for the protection and enhancement of critical areas.	**CDD WRS**	2028-29
LU-2.2.3	Provide staff with resources and training to support improvements.	**CDD WRS**	Term of the Plan
LU-2.3	**Support vibrant neighborhoods with a range of affordable housing, strong and resilient economies, access to social services, healthy habitats, unique spaces for recreation, engagement, and inclusion.**	**CDD**	**Term of the Plan**
LU-2.3.1	Assess neighborhood vibrancy every five years based on the following criteria: housing, economy, health, recreation, and engagement.	**CDD**	2030, then Every Five Years

Policies and Implementation Actions		Lead	Period
LU-2.3.2	Incentivize the creation of activity nodes in each neighborhood along transit corridors that support housing, jobs, services, and all transportation modes.	CDD	Term of the Plan
LU-2.3.3	Promote access to human services by allowing these uses in suitable locations near transit and housing.	CDD	Term of the Plan
LU-2.3.4	Protect or create open spaces in each neighborhood within a walkable distance of housing.	CDD	Term of the Plan
LU-2.4	**Support complete neighborhoods consisting of connected, transit-oriented communities with a range of transportation choices for all residents.**	CDD	**Term of the Plan**
LU-2.4.1	Regularly update development standards and guidelines to support the creation of pedestrian-oriented transit supportive neighborhoods.	CDD	Term of the Plan
LU-2.5	**Ensure new annexations adhere to the goals and policies agreed to by Tumwater and Thurston County.**	CDD	**Term of the Plan**
LU-2.5.1	Monitor new annexations for the first five years on an annual basis and provide resources for transition to public services and zoning as agreed to in the Countywide Planning Policies, City-County Annexation Interlocal Agreement, and the Tumwater Thurston County Joint Plan.	CDD	Term of the Plan
LU-2.6	**Protect designated mineral resource lands from incompatible development.**	CDD	**Term of the Plan**
LU-2.6.1	Separate mineral lands from incompatible land uses by utilizing buffer areas and other techniques to lessen environmental impacts on adjacent uses.	CDD	Term of the Plan

Goal LU-3 Ensure adequate public services, facilities, and utilities are available to proposed and existing development.

Policies and Implementation Actions		Lead	Period
LU-3.1	**Ensure capital budget decisions in the six-year Capital Facilities Plan are coordinated with the Land Use Element, Lands for Public Purpose Element, Climate Element, Parks, Recreation, and Open Space Plan, and Transportation Plan.**	CDD PRD TED WRS	**Term of the Plan**
LU-3.1.1	Ensure the Capital Facilities Plan can be implemented through the Land Use Element's projected uses and densities.	CDD PRD TED WRS	Term of the Plan
LU-3.1.2	Direct the timing and location of development with the provision of adequate facilities and services within Tumwater's urban growth area, through periodic updates to the Tumwater and Thurston County Joint Plan and Thurston County Code Title 22 *Tumwater Urban Growth Area Zoning*.	CDD PRD TED WRS	Term of the Plan
LU-3.2	**Ensure development conforms with the Water System Plan and Sanitary Sewer Comprehensive Plan.**	CDD TED WRS	**Term of the Plan**
LU-3.3	**Analyze all proposed projects for anticipated impact on public services as part of development and environmental review.**	CDD PRD TED WRS	**Term of the Plan**
LU-3.4	**Work with developers to determine where and when new public facilities are to be placed to permit proper development of current and future projects and meet concurrency.**	CDD PRD TED WRS	**Term of the Plan**
LU-3.5	**Require existing development utilizing permitted septic tanks for sewerage disposal to hook up to the sanitary sewer when a septic system fails, needs replacement, or requires major repairs as sanitary sewer laterals become available.**	CDD TED	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
LU-3.5.1	Work with LOTT to prioritize connecting properties on septic systems to LOTT's sewerage treatment system to reduce impacts to groundwater and surface water quality and programs that support subsidies for community members facing barriers.	CDD TED WRS	Term of the Plan
LU-3.6	**Require existing development utilizing permitted private wells for water to connect to Tumwater's water service when the well fails, needs replacement, or requires major repairs, where City water service available.**	CDD WRS	**Term of the Plan**

3. Equitable Community Goals

Goal LU-4 **Create land use patterns that increase equity across all land use types.**

Policies and Implementation Actions		Lead	Period
LU-4.1	**Embed environmental justice in land use decisions.**	CDD	**Term of the Plan**
LU-4.1.1	Develop an environmental justice audit process, using the state and federal guidance to inform Tumwater's audit process.	CDD WRS	2028-2029
LU-4.1.2	Conduct a citywide environmental justice audit prior to amending land use designations.	CDD	Starting in 2029
LU-4.2	**Coordinate residential uses and densities in the Land Use Element with the housing allocations for all income groups in the Housing Element.**	CDD	**Term of the Plan**
LU-4.3	**Use innovative techniques to support the provision of affordable housing.**	CDD	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
LU-4.3.1	Use adaptive management to monitor and optimize development regulations for housing with community feedback and data.	CDD	Term of the Plan
LU-4.4	**Support an increase the variety of housing types to meet the needs of a changing population by creating flexible design guidelines.**	**CDD**	**Term of the Plan**
LU-4.5	**Develop anti-displacement programs in frontline communities when increasing densities.**	**CDD**	**Term of the Plan**
LU-4.5.1	Review land use maps and Comprehensive Vulnerability Assessment findings to identify regions at high-risk of disaster displacement such as barriers to rebuilding housing in high-risk areas and develop strategies in collaboration with impacted communities to develop solutions	CDD WRS	Term of the Plan

Goal LU-5 Ensure land use patterns support efficient multimodal transportation systems in coordination with City and regional transportation plans.

Policies and Implementation Actions		Lead	Period
LU-5.1	**Coordinate the Land Use Element with the Transportation Plan, Regional Transportation Plan, Parks, Recreation, and Open Space Plan, Climate Element, and Thuston Climate Mitigation Plan.**	**CDD PRD TED WRS**	**Term of the Plan**
LU-5.1.2	Create an active transportation plan which meets goals in the Climate Element and the Thurston Climate Mitigation Plan.	CDD TED WRS	2026-27
LU-5.2	**Establish and maintain multimodal links between land uses.**	**CDD TED**	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
LU-5.2.1	Prepare and adopt a complete streets ordinance.	CDD TED WRS	2028-29
LU-5.2.2	Implement regulatory and capital project changes to incentivize high density residential and commercial development within neighborhoods near frequent transit.	CDD TED	2028-29
LU-5.2.3	Provide incentives for urban plazas when new construction or major renovation is proposed.	CDD	2028-29
LU-5.2.4	Implement regulatory changes to require public and private development proposals to enhance the streetscape to maximize comfort for multimodal users.	CDD	Term of the Plan
LU-5.3	**Allow densities and mixtures of uses that reduce the number and lengths of vehicle trips and increase the opportunity to use transit and active modes of travel.**	CDD	**Term of the Plan**
LU-5.3.1	Concentrate employment and living areas near multimodal transportation.	CDD	Term of the Plan
LU-5.4	**Coordinate with transportation providers and developers to ensure that developments are designed to promote physical, mental, and social health, and reduce the impacts of climate change on the natural and built environments.**	CDD TED WRS	**Term of the Plan**
LU-5.4.1	Update development regulations to ensure facilities and infrastructure to support active transportation modes are included in development.	CDD	2026-28
LU-5.5	**Reinforce the link between land use and public transportation by encouraging development to occur at higher densities along designated transit corridors, nodes, and near commercial and employment centers.**	CDD	**Term of the Plan**
LU-5.5.1	Develop incentives for proposed developments located adjacent to transportation corridors where amenities for multimodal users are included.	CDD	2028-30

Policies and Implementation Actions		Lead	Period
LU-5.6	**Monitor transportation improvements for consistency with the Comprehensive Plan and development regulations.**	**CDD TED**	**Term of the Plan**

Goal LU-6 Ensure physical limitations of the land are considered during development.

Policies and Implementation Actions		Lead	Period
LU-6.1	**Ensure development conforms with environmental standards and requirements.**	**CDD**	**Term of the Plan**
LU-6.1.1	Update the Tumwater Appendix to the Thurston Hazards Mitigation Plan and floodplain regulations on a regular basis and ensure that development regulations are updated accordingly.	**CDD**	Every Five Years
LU-6.2.1	Update the critical areas ordinance as new state guidance and best available science becomes available.	**CDD**	Term of the Plan
LU-6.2	**Evaluate and set reasonable conditions on development to mitigate anticipated adverse environmental impacts.**	**CDD**	**Term of the Plan**
LU-6.3	**Integrate design features of existing natural systems into the layout and siting of new development, including significant trees and noncritical ecological systems, where possible.**	**CDD**	**Term of the Plan**
LU-6.4	**Reduce and mitigate the risk to lives and property posed by wildfires by using land use planning tools and through wildfire preparedness and fire adaptation measures.**	**CDD**	**Term of the Plan**

4. Specific Land Use Type Goals

Goal LU-7 Support development of all types of residential uses.

Policies and Implementation Actions		Lead	Period
LU-7.1	**Ensure an adequate supply of residential land to support the development of housing affordable to all income groups.**	**CDD**	**Term of the Plan**
LU-7.2	**Explore and implement methods to protect residential uses from excessive noise, odors, dirt, glare, traffic, pollution, and other nuisances emanating from regional transportation facilities and commercial and industrial uses.**	**CDD**	**Term of the Plan**
LU-7.3	**Ensure residential development occurs in integrated centers to allow for multimodal access to services.**	**CDD**	**Term of the Plan**
LU-7.4	**Allow innovation in development regulations with newer forms of residential development where amenities of open space, privacy, and visual quality can be maintained or improved, and flexible solutions to land use challenges can be achieved.**	**CDD**	**Term of the Plan**
LU-7.5	**Do not permit private residential gated communities.**	**CDD**	**Term of the Plan**
LU-7.6	**Support residential developments that provide easy access to healthy food sources and facilitate food recovery efforts.**	**CDD**	**Term of the Plan**
LU-7.6.1	Use the Food System Plan to guide implementation actions to improve access to food and abate waste.	**CDD**	2026-27
LU-7.6.2	Allocate funding to fully implement the Food System Plan.	**CDD**	2028-29

Goal LU-8 Support development of commercial and mixed uses in appropriate areas.

Policies and Implementation Actions		Lead	Period
LU-8.1	**Ensure adequate supply of developable commercial land.**	**CDD**	**Term of the Plan**
LU-8.2	**Concentrate high intensity commercial uses in mixed use centers to efficiently provide multimodal access and walkable communities.**	**CDD**	**Term of the Plan**
LU-8.2.1	Limit the linear length areas designated for commercial uses and incentivize mixed use centers with multimodal access and walkable features.	**CDD**	2028-29
LU-8.2.2	Develop integrated high intensity mixed use commercial areas incorporating performance standards to address buffering, landscaping, parking facilities, and other elements of site design.	**CDD**	2028-29
LU-8.3	**Locate high intensity commercial uses close to arterial routes and freeway access.**	**CDD**	**Term of the Plan**
LU-8.4	**Locate lower intensity neighborhood commercial uses throughout Tumwater to supply nearby residents with everyday goods and services where these uses are small, do not generate excessive traffic, and are compatible with nearby residences.**	**CDD**	**Term of the Plan**
LU-8.5	**Support local small scale commercial opportunities.**	**CDD**	**Term of the Plan**
LU-8.5.1	Identify and designate areas that are compatible with food trucks and food truck courts.	**CDD**	2028-29

Goal LU-9 Support development of manufacturing, industrial, and warehouse uses in appropriate areas.

Policies and Implementation Actions		Lead	Period
LU-9.1	**Ensure adequate supply of developable industrial land near primary transportation corridors.**	CDD	Term of the Plan
LU-9.2	**Group manufacturing, industrial, and warehouse uses into centers in landscaped, urban park quality centers.**	CDD	Term of the Plan
LU-9.3	**Develop manufacturing, industrial, and warehouse areas following an integrated planning scheme incorporating performance standards regarding green belts, and buffering, landscaping, parking facilities, and design guidelines.**	CDD	Term of the Plan
LU-9.4	**Locate new manufacturing, industrial, and warehouse development in areas close to arterial routes, freeway access, and rail facilities that minimize pollution and heavy truck traffic through residential and commercial areas.**	CDD	Term of the Plan
LU-9.4.1	Create a tiered system for industrial intensity where more intense uses that produce pollutants, high noise, high traffic are in the center of an industrial area and are farther from incompatible uses and less intense uses are allowed at the edges of industrial areas.	CDD	2028-29
LU-9.5	**Ensure manufacturing, industrial, and warehouse structures are low profile and provide sustainable screening landscaping that also reduces environmental effects of such land uses.**	CDD	Term of the Plan

Goal LU-10 Retain and enhance open space, parks, trails, and space for recreational opportunities.

Policies and Implementation Actions		Lead	Period
LU-10.1	**Coordinate provision of open space, parks, trails, and space for recreational opportunities with the Parks, Recreation, and Open Space Plan.**	**CDD PRD**	**Term of the Plan**
LU-10.2	**Preserve and enhance environmentally sensitive lands by developing compact urban areas.**	**CDD**	**Term of the Plan**
LU-10.3	**Require a variety of open spaces including landscaped buffers, small parks, plazas, and other community areas to balance higher density development and enhance quality of living.**	**CDD**	**Term of the Plan**
LU-10.3.1	Evaluate the use of required dedicated open space every five years to make certain that areas dedicated to open space in development provide the functions intended.	**CDD**	Term of the Plan

5. Public Facilities Goals

Goal LU-11 Support development of public facilities in appropriate areas.

Policies and Implementation Actions		Lead	Period
LU-11.1	**Ensure an adequate supply of developable land for public facilities.**	**CDD**	**Term of the Plan**
LU-11.2	**Distribute public facilities throughout Tumwater to ensure multimodal access.**	**CDD**	**Term of the Plan**

Goal LU-12 Provide for the location of essential public facilities.

Policies and Implementation Actions	Lead	Period
LU-12.1 Ensure that the Comprehensive Plan and implementing regulations do not preclude the siting of essential public facilities.	**CDD**	**Term of the Plan**
LU-12.1.1 Utilize the following siting criteria for siting new or expansion of existing essential public facilities: 1. Proximity to major transportation routes and essential infrastructure; 2. Land use compatibility with surrounding areas; 3. Potential environmental impacts; 4. Effects on resource and critical areas; 5. Public costs and benefits including operation and maintenance; 6. Current capacity and location of equivalent facilities; 7. The existence within Tumwater of reasonable alternatives to the proposed activity, and 8. Other criteria as determined relevant to the specific essential public facility.	**CDD**	Term of the Plan
LU-12.2 Ensure that where possible, essential public facility sites are used jointly for public benefit.	**CDD**	**Term of the Plan**
LU-12.3 Give opportunities for residents, property owners, adjacent jurisdictions, and other interested parties for meaningful participation in decisions on siting essential public facilities.	**CDD**	**Term of the Plan**

DRAFT

Goal LU-13 **Protect the Olympia Regional Airport from incompatible land uses that could affect present and future use of airport facilities and operations while acknowledging the existing urban environment adjacent to the Airport.**

Policies and Implementation Actions		Lead	Period
LU-13.1	**Promote safe operation of Olympia Regional Airport by encouraging compatible land uses and activities and discouraging uses or activities that impede safe flight operations or endanger the lives of people on the ground.**	**CDD**	**Term of the Plan**
LU-13.1.1	Update development regulations addressing aviation compatibility within the Airport Overlay Zone on a regular basis.	**CDD**	Term of the Plan
LU-13.1.2	Prohibit structures and trees from penetrating airspace surfaces as defined by Title 14 of the Code of Federal Regulations Part 77, except as necessary and incidental to airport operations.	**CDD**	Term of the Plan
LU-13.1.3	Permit appropriate urban land uses compatible with airport and aviation uses.	**CDD**	Term of the Plan
LU-13.1.4	Encourage contiguous open space areas within the Airport Overlay Zone that provide functional open space needs for aircraft in cases of an emergency.	**CDD**	Term of the Plan
LU-13.2	**Work with the Port of Olympia to address off site impacts from airport uses on the surrounding community.**	**CDD**	**Term of the Plan**

6. Historic Preservation Goals

Goal LU 14 **Preserve and protect significant historical and cultural sites.**

Policies and Implementation Actions		Lead	Period
LU-14.1	**Coordinate the Land Use Element with Tumwater and Thurston County's historic preservation programs.**	**CDD PRD**	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
LU-14.2	**Protect designated state and national landmarks listed by the State Office of Archaeology and Historic Preservation and cultural or archaeological resources identified by the Tribes in land use decisions.**	**CDD**	**Term of the Plan**
LU-14.2.1	Work with the Tribes to determine the best process for cultural resource evaluation during development permit review.	**CDD**	Term of the Plan
LU-14.2.2	Follow federal Code of Federal Regulation Section 106 National Historic Preservation Act guidance for all projects with federal funding.	**CDD**	Term of the Plan

DRAFT

1. Introduction

A. Background

The Land Use Element is part of Tumwater's Comprehensive Plan and was prepared in response to the state Growth Management Act (Chapter 36.70A RCW).

As part of Tumwater's Comprehensive Plan, the Land Use Element covers the 20-year planning period from 2025 to 2045, and designates the proposed general distribution, location, and extent of all land use types.

Part 2 of the Land Use Element provides the technical analysis to address the requirements of RCW 36.70A.070(1) for land use elements. It analyzes Tumwater's:

- Physical features.
- Existing land use patterns.
- Land use growth targets.
- Land use capacity estimates.
- Land use plan.
- Other considerations.

The assessment supports the development of the Land Use Element's goals, policies, and draft implementation actions found in Part 1 of the Element.

The Land Use Element goals and policies guide the type, distribution, and location of land uses that direct Tumwater's physical development. It provides the policy context for TMC Title 18 Zoning, development regulations, administrative processes, and investment decisions such as capital improvements and work plans for City staff, the Planning Commission, City Council, and community and agency partners.

Tumwater is planning for future growth for the City and its urban growth area together, so land

LAND USE

State requirements (WAC 365-196-405) that the Comprehensive Plan must meet:

- Designation of the proposed general distribution and general location and extent of the uses of land, where appropriate, for agricultural, timber, and mineral production, for housing, commerce, industry, recreation, open spaces, public utilities, public facilities, general aviation airports, military bases, rural uses, and other land uses.
- Population densities, building intensities, and estimates of future population growth.
- Provisions for protection of the quality and quantity of ground water used for public water supplies.
- Wherever possible, consideration of urban planning approaches to promote physical activity.
- Where applicable, a review of drainage, flooding, and stormwater runoff in the area covered by the plan and nearby jurisdictions, and guidance for corrective actions to mitigate or cleanse those discharges that pollute waters of the state, including Puget Sound or waters entering Puget Sound.

use in Tumwater and its urban growth area are evaluated together.

The Land Use Maps represent the general future land use patterns intended for Tumwater and its urban growth area within the 20-year planning period and are a graphic expression of the land use goals and policies found in Part 1 of the Element.

B. How to Read this Part of the Element

Part 2 of the Land Use Element consists of the following chapters.

- **Chapter 2 – Physical Features**: Provides a summary of the prominent geographic features and water resources that define the physical landscape of Tumwater.
- **Chapter 3 – Existing Land Use Patterns**: Offers a summary of existing land use distribution within Tumwater that has emerged from the physical features discussed in Chapter 2.
- **Chapter 4 – Land Use Growth Targets**: Discusses the existing and 2045 forecasted population and employment figures that will guide future land use and the Comprehensive Plan for the next 20 years.
- **Chapter 5 – Land Use Capacity Estimates**: Provides a summary of Tumwater's land use capacity that is needed to accommodate the land use growth targets in Chapter 4.
- **Chapter 6 – Land Use Plan**: Reviews Tumwater's approach to accommodating the 2045 land use growth targets and land use capacity for residential, commercial, industrial, and parks, open space, & public and institutional land uses.
- **Chapter 7 – Neighborhoods**: Provides the land use context, and discusses future land uses, challenges, and recommendation for each neighborhood in Tumwater.
- **Chapter 8 – Other Considerations**: Summarizes other relevant land use matters.
- **Appendix**: The appendix includes the following:

  Appendix A – Summary of Foundational Documents.

C. Connections with Other Elements

The Land Use Element connects all the other Elements of the Comprehensive Plan together locationally.

Figure LU-1 illustrates how the Land Use Element relates to various Tumwater community concerns.

Coordination with all the Elements of the Comprehensive Plan is important to be able to ensure orderly, cost-efficient development that is phased outward from the urban core and transit corridors. All Elements of the Comprehensive Plan are consistent with the Land Use Element.

DRAFT

As some examples, the Land Use Element works with the Conservation and Lands for Public Purposes Elements to protect the quality and quantity of groundwater used for public water supplies and account for drainage, flooding, and storm water run-off by assigning the appropriate land use designations to environmentally sensitive areas.

Figure LU-1. Land Use Element's Connections to Tumwater Community Concerns.

In addition, the Land Use Element works with the Housing Element to allocate sufficient land to ensure an adequate supply of buildable land for housing that serves every income group and supports the Climate Element by encouraging compact urban development to reduce carbon emissions and addresses natural hazards to increase resilience.

Land within Tumwater's urban growth area is addressed through the Tumwater and Thurston County Joint Plan in accordance with adopted County-Wide Planning Policies.

D. Community Profile

The place that became Tumwater at the point where the Deschutes River cascades into Puget Sound at its most southerly point has been inhabited for many centuries.

The Coastal Salish Indian groups, whose descendants are members of the tribes now known as Nisqually, Squaxin Island, and Chehalis, gathered shellfish and frequented the inlets and prairies of the south Puget Sound for centuries before Euro-American exploration and settlement.

The rivers of the region, such as the Deschutes River, were long-established sites for salmon harvesting, the prairies, such as Bush Prairie, were popular hunting and plant harvesting sites, and the beaches were replete with shellfish, harvested by native peoples.

In 1845, Michael T. Simmons, led the first group of permanent American settlers to Tumwater Falls. He settled in the area that would become Tumwater while others in the party, including George Bush, a man of mixed race, and his family, settled in the rich prairies to the south.

The decision of the group to settle north of the Columbia River was made in part because of the black exclusion laws of Oregon's Provisional Government that were not actively enforced north of the Columbia. The 31 members of the Simmons party laboriously cut a wagon trail that became the northern branch of the Oregon Trail. Others followed, with the establishment of Olympia in 1850 and settlement of the natural prairies and river bottom lands throughout the county in the 1850s.

By the mid-1800s, Tumwater was known as the end of the Oregon Trail and was the oldest European settlement north of the Columbia River.

When Tumwater was founded in 1845, it was named New Market. In 1847, the name was changed to Tumwater, as it likened the sound of "throbbing or noisy" water, which was expressed in native languages as Tum Chuck.

Tumwater was the starting point for further American settlements in other points on Puget Sound. It was from Puget Sound that the movement to divide Oregon grew, resulting in the creation of the Washington Territory in 1853.

Tumwater's early growth and development was influenced by its proximity to the power-generating falls of the Deschutes River, the nearby saltwater access for transportation and communication, and the abundance of timber in the area. The town developed on the lands around the mouth of the river, and homes and sawmills were built along its banks.

On November 25, 1869, Tumwater was officially incorporated as a fourth-class town. In 1964, the voters of Tumwater elected to change the classification to a third-class City with a Mayor-Council form of government. In 1994, the Tumwater City Council voted to change the classification to a code city but retain the Mayor-Council form of government.

Interstate 5 was constructed in 1959 and resulted in the demolition of most of Tumwater's historic downtown. The freeway divides Tumwater into western and eastern halves.

An additional historical influence on the development pattern of Tumwater is the Olympia Regional Airport and the associated New Market Industrial Campus that are located at the southern end of Tumwater. The Airport was started in the early part of the 20th century and has been owned and operated by the Port of Olympia since 1963.

Tumwater is contiguous with Olympia to the north and northeast and stretches for approximately six miles to the south and a similar distance from the Deschutes River in the east to almost to Black Lake in the west. The area of Tumwater is approximately 18 square miles or 11,378 acres.

E. Neighborhoods

Land Use Element divides Tumwater into eleven neighborhoods recognizing different land use planning needs:

- Airport
- Brewery District
- Bush Prairie
- Deschutes
- Littlerock
- Mottman
- New Market
- SE Capitol Boulevard
- SW Tumwater
- Trosper
- Tumwater Hill

Chapter 7 contains data about current land use and trends for each neighborhood.

Policy recommendations for each specific Neighborhood are also included. The neighborhood maps graphically represent policy recommendations for future land uses for each neighborhood in Tumwater for the 20-year planning period.

Map LU-2 is the Neighborhoods Map and Maps LU-3 to LU-14 are the future land use maps for each individual neighborhood.

2. Physical Features

A. Geographic Features

1) Topography

Elevation in Tumwater ranges from close to sea level where the Deschutes River enters Capitol Lake to more than 500 feet in elevation at the top of Bush Mountain.

In the northern part of Tumwater, the Deschutes River valley separates the northeastern part of Tumwater from the rest of the City. The eastern edge of the Deschutes River valley is 160 feet in elevation, while the valley floor above Tumwater Falls is 60 feet in elevation.

Moving west from Deschutes River in the northwestern part of the Tumwater, Tumwater Hill rises to 461 feet in elevation directly west of the Deschutes River. Separated by Percival Creek to the southwest, Bush Mountain is over 500 feet in elevation. Farther west is flat at around 190 to 200 feet in elevation which is divided by the Black River Drainage Ditch and the and then the eastern slope of Black Hill in the northwest corner of Tumwater.

The southern half of Tumwater is flat at around 190 to 200 feet in elevation with Bush Prairie occupying the area centered on the Olympia Regional Airport and New Market Industrial Park.

2) Soils

The soil in the Tumwater is predominantly Nisqually loamy fine sand, Cagey loamy sand, and Indianola loamy sand. There are areas of peat in the western part of Tumwater near Percival Creek and the wetland complexes in the western part of Tumwater and granite underlying the hills in the northwest part of Tumwater.

More information on soils is found in Appendix B of Part 2 of the Conservation Element.

3) High Erosion or Landslide Potential

Areas of erosion hazard and landslide hazard are found in the northern half of Tumwater on the edges of the Deschutes River as well Tumwater Hill, Bush Mountain, and Black Hill.

A map of geologically hazardous areas is found in Part 2 of the Conservation Element.

4) Seismic Hazard Areas

The entire Puget Sound Region is considered seismically active and is characterized by a history of major earthquake frequency. Seismic hazards are those areas within the region that are subject to the most severe level of earthquake response due to slope of the land and soil density.

Seismic hazard areas are mapped in those areas that have been filled in the Deschutes River valley and around Percival Creek north of Trosper Road. Areas of peat in the western part of Tumwater near Percival Creek and the wetland complexes in the western part of Tumwater are also seismic hazard areas.

A map of seismic hazard areas is found in Part 2 of the Conservation Element.

B. Water Resources

1) Watersheds

Tumwater covers both the Water Resource Inventory Areas 13 (Deschutes watershed) and 23 (Upper Chehalis watershed). The dividing line between the watersheds follows a northwest to southeast line diagonally through the Tumwater.

The Deschutes watershed includes:

- Deschutes River
- Percival Creek
- Unclassified Creek and pond in the western part of Tumwater
- Black Lake Drainage Ditch
- Barnes Lake
- Lake Susan
- Munn Lake
- Trails End Lake
- Trosper Lake

The Upper Chehalis watershed includes:

- Black Lake
- Fish Pond Creek and associated wetland complex

A map of rivers, creeks, and lakes, including shorelines of the state, is found in Part 2 of the Conservation Element.

The Shoreline Master Program describes Tumwater's shorelines of the state in more detail.

2) Wetlands

Wetlands are classified and protected on a descending scale of sensitivity and habitat score in TMC 16.28. While wetlands are mapped throughout Tumwater the larger wetland complexes are associated with the Deschutes River and Fish Pond Creek and associated wetland complexes.

Part 2 of the Conservation Element describes Tumwater's wetlands in more detail and contains a map of major wetlands.

3) Public Drinking Water Aquifers

All of Tumwater's drinking water supply comes from underground aquifer areas beneath Tumwater. Most of Tumwater is within a critical aquifer recharge area and there are wellhead protection areas around Tumwater's Bush Wellfield, Lakeland Manor Water System, Palermo Wellfield, Port Wellfield, and southwest wellfield.

A map of the critical aquifer recharge area and wellhead protection areas is found in Part 2 of the Conservation Element.

4) Areas that Flood

Part 2 of the Conservation Element describes Tumwater's frequently flooded areas in more detail and contains a map of frequently flooded areas.

3. Existing Land Use Patterns

A. Existing Land Use Distribution, Land Use Designations, & Zone Districts

To plan effectively for the twenty-year planning period, it is necessary to understand existing urban land use distribution and trends. To accomplish this, Thurston Regional Planning Council maintains a land use database for Tumwater.

The types of land uses employed to identify presently existing land uses in Chapter 3 of the Land Use Element are different from the land use designations that will be used to identify future land uses on the Land Use Maps or the zone districts that are found in TMC Title 18 Zoning or the Official Zoning Map for Tumwater and the Urban Growth Area.

Table LU-1 and Figure LU-2 illustrate the results of the inventory citywide.

B. Land Use Distribution

Table LU-1 shows the amount of land in Tumwater and its urban growth area in comparison to Thurston County as a whole. While Lacey and Olympia's urban growth areas are larger than Tumwater's, their total land areas are comparable to Tumwater.

Table LU-1. Land Area in Tumwater & Its Urban Growth Area.

Jurisdiction	Acres	Square Miles	Percent of County
Tumwater – City Only	11,578	18.1	2.5%
Tumwater – Urban Growth Area	2,652	4.1	0.6%
Thurston County	471,394	736.6	100%

Source: Thurston Regional Planning Council, Table 1-01A: Land Area, April 1, 2025.

Table LU-2 and Figure LU-2 summarize existing land use distribution in Tumwater as a whole. The largest percentage of acreage In Tumwater is taken up by residential uses at 34 percent.

Vacant land represents 17 percent of Tumwater's land area, while Public and Institutional comprise the third most predominant land use in Tumwater at 16 percent. The Olympia Regional Airport takes up the majority of Public and Institutional acreage followed by state facilities and public schools.

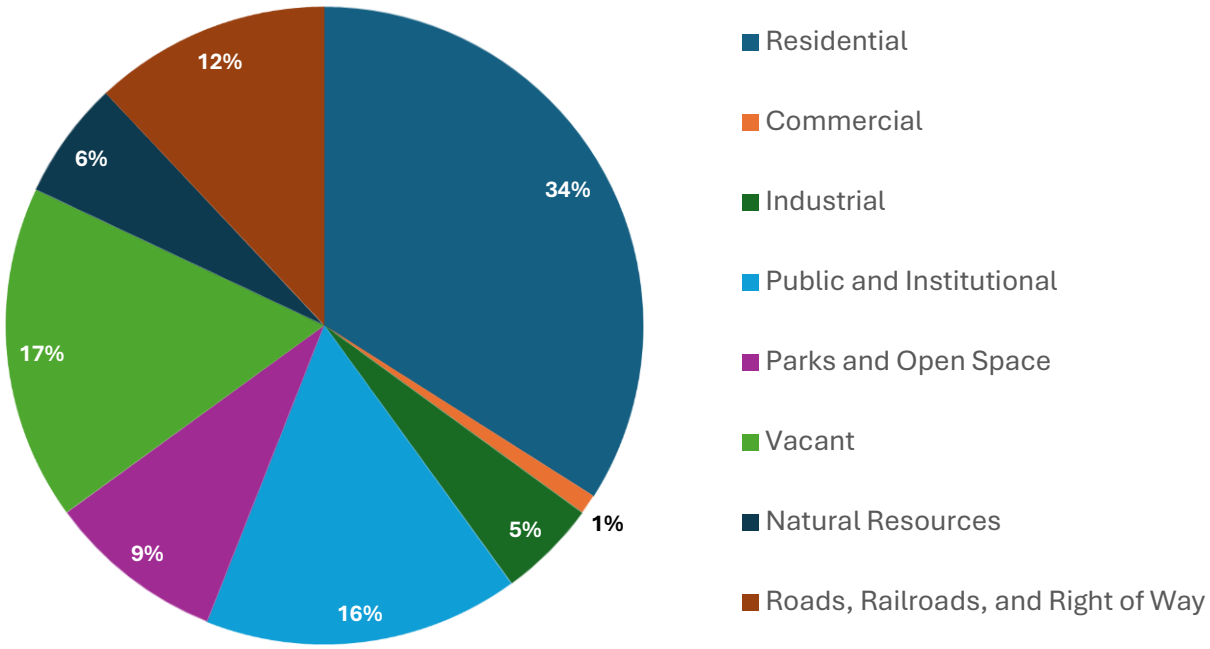

Table LU-2. Summary of Existing Land Use in Tumwater.

Type of Land Use	Acreage	Percentage
Residential	4,802	34%
Commercial	208	1%
Industrial	722	5%
Public and Institutional	2,299	16%
Parks and Open Space	1,260	9%

Type of Land Use	Acreage	Percentage
Vacant	2,371	17%
Natural Resources	886	6%
Roads, Railroads, and Rights of Way	1,702	12%
Total	**14,248**	**100%**

Source: Thurston Regional Planning Council, Tumwater Land Use Alternative Analysis, 2025.
Notes: The Port of Olympia's Olympia Regional Airport and New Market Industrial area are classified as Public/Institutional or Industrial. Tumwater Golf Course is classified as Parks and Open Space. The former Olympia Brewery properties are classified as Industrial.

Figure LU-2. Existing Land Use in Tumwater.

Source: Thurston Regional Planning Council, Tumwater Land Use Alternative Analysis, 2025.
Notes: The Port of Olympia's Olympia Regional Airport and New Market Industrial area are classified as Public/Institutional or Industrial. Tumwater Golf Course is classified as Parks and Open Space. The former Olympia Brewery properties are classified as Industrial.

Roads, railroads, and rights-of-way comprise 12 percent of the land area, while parks and open space are the fifth most predominant land use at nine percent. Open space uses consist mostly of areas presently having a zone district such as Greenbelt or Open Space. The Tumwater Valley Municipal Golf Course, Pioneer Park, Barnes Lake, and Trosper Lake have a land use land use designation of Parks/Open Space.

Natural Resources are the sixth most predominant land use at six percent. Most of the land in this land use is made up of the Black Lake Quarry at the northwest corner of Tumwater.

Industrial and commercial acreage are the seventh and eighth largest land uses at eight percent. The Port of Olympia New Market

Industrial Park and the Mottman Industrial Park take up a large portion of the industrial acreage. Much of the commercial uses are located along Capitol Boulevard between Custer Way and Israel Road and along Littlerock Road south of Trosper Road.

Tables LU-3 and LU-4 summarize the existing land use by neighborhood.

Table LU-3. Percentage of the Area of Existing Land Use by Neighborhood in Tumwater.

Neighborhood	Residential	Commercial	Industrial	Public and Institutional	Parks, Preserves, and Open Space	Vacant	Natural Resources	Roads, Railroads, and Right of Way
Airport	4%	6%	30%	63%	9%	9%	2%	11%
Brewery	0%	13%	1%	4%	5%	1%	0%	7%
Bush Prairie	10%	0%	1%	8%	18%	4%	4%	5%

Notes: The Port of Olympia's Olympia Regional Airport and New Market Industrial area are classified as Public/Institutional or Industrial. Tumwater Golf Course is classified as Parks and Open Space. The former Olympia Brewery properties are classified as Industrial. Commercial and Industrial were separated, assuming uses aligned with land use designation.

4. Land Use Growth Targets

A. Population – Existing & Target

Population growth is driven by two factors: net migration, people moving in minus people moving out, and natural increases, births minus deaths. Since 1960, the growth in Thurston County has primarily been the result of net migration.

Between 2003-04 and 2023-24, an average of 3,368 people moved to Thurston County every year, which is 80.3 percent of total County population growth.

While most in migration is primarily due to the stable economy in Thurston County, the increasing cost of living in the Seattle metropolitan area played a role as well, as individuals from the metropolitan area looked for ways to reduce escalating costs of living, particularly in housing.

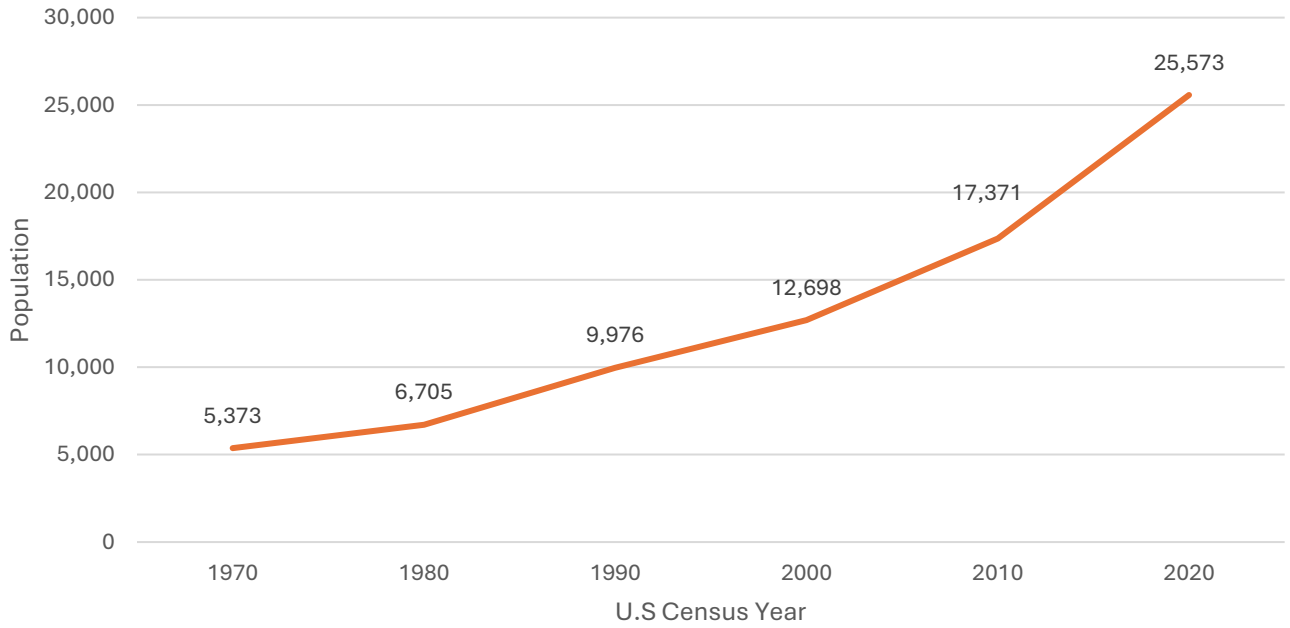
The natural increase of population in Thurston County has been declining every year from 2016-17 to 2023 with 956 more births than deaths in 2017 and 53 more deaths than births in 2022-23.

Tumwater's population in 2000 of 12,698 increased to 27,470 by 2024, an increase of 216 percent. The population is expected to see similar growth over the next 20 years, reaching approximately 46,070 people in Tumwater and its urban growth area as shown in Table LU-5.

Table LU-5. Tumwater & Its Urban Growth Area Population Forecasts, 2020-45.

	Population
Population (2020)	28,707
Projected Population Increase (2020-2045)	17,363
Projected Population (2045)	46,070

Source: 2020 Population includes the 2020 U.S. Census calibrated numbers both within Tumwater (25,573) and its urban growth area (3,134). Thurston Regional Planning Council, Table 3. Population Estimates and Forecast Thurston County Cities, Urban Growth Areas, and Reservations 2010-2045.



The U.S. Census Bureau estimated in 2020 that Tumwater's population was 25,573 and its urban growth area's population was calibrated as 3,134. The Washington State Office of Financial Management estimated that Tumwater's population as of April 1, 2024, was 27,470 and the Thurston Regional Planning Council estimated that Tumwater's urban growth area was 3,100 in 2024 for a total of 30,570 residents.

Figure LU-3 shows the change in Tumwater's population since 1970. Between 1970 and 2020, Tumwater's population more than quadrupled, growing 476 percent over 50 years. Over the next 25 years from 2020 to 2045, Tumwater and its urban growth area population are anticipated to grow by 17,360 to reach 46,070 residents in Tumwater and its urban growth area by 2045.

Table LU-6 shows the population of Tumwater and its urban growth area since 2010. The population

of Tumwater has increased, and its urban growth area decreased since 2010 in part due to annexations.

Figure LU-3. Tumwater Population, 1970-2020.

Sources: Washington State Office of Financial Management, 2020 Decennial U.S. Census Counts of Population for the State, Counties, Cities and Towns and Thurston Regional Planning Council, Small Area Population Estimates and Forecast, 2024.

Table LU-6. Population of Tumwater & Its Urban Growth Area, 2010-24.

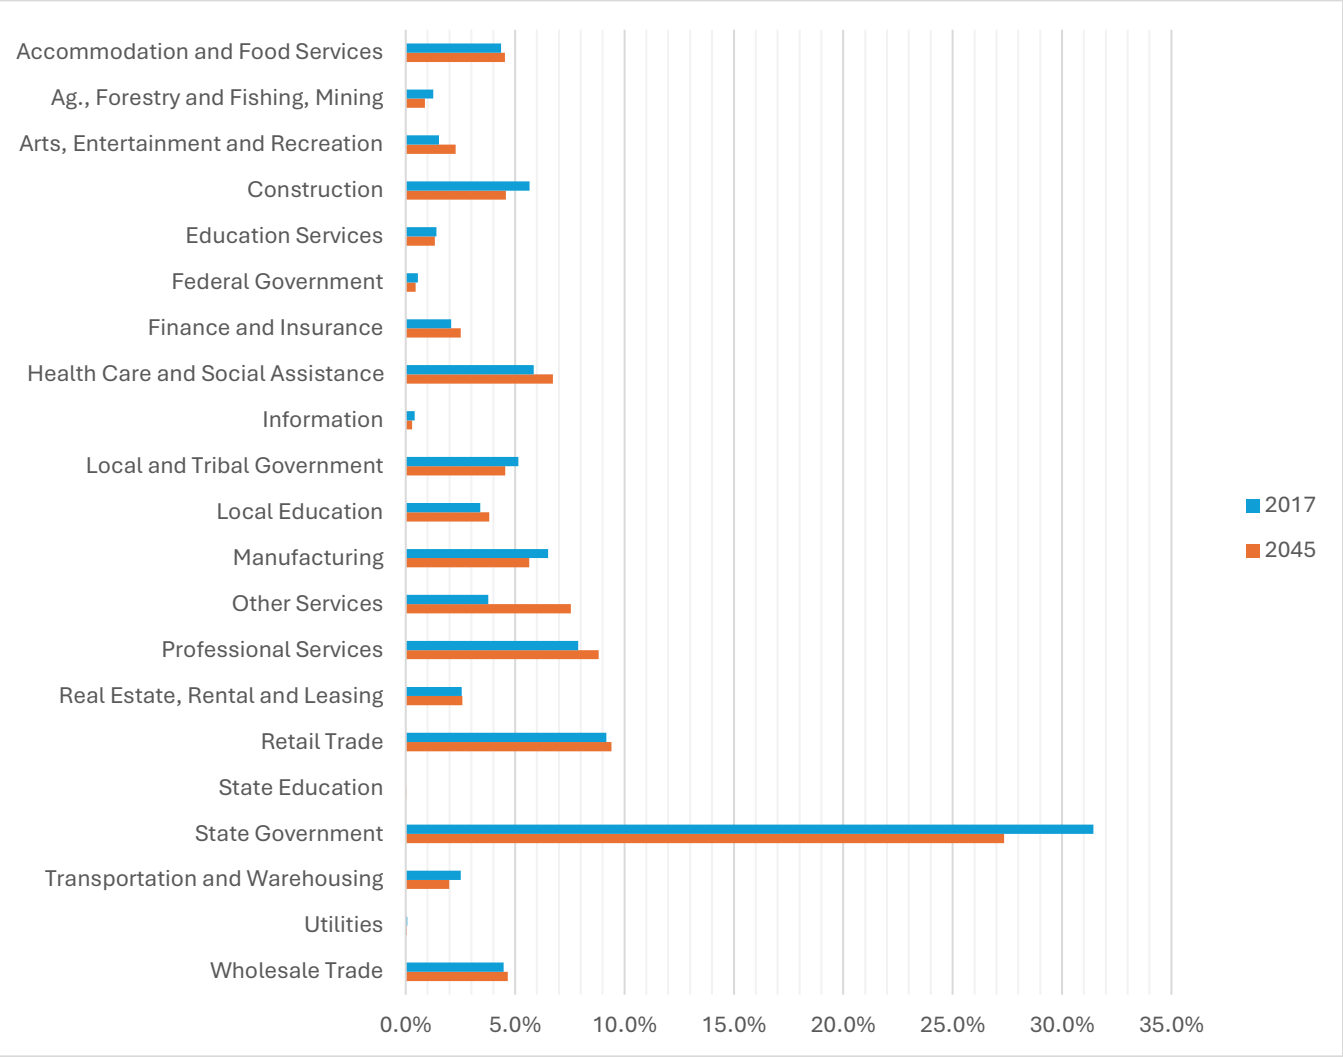
	2010	2020	2021	2022	2023	2024
City	17,371	25,573	26,050	26,360	27,100	27,470
Urban Growth Area	6,350	3,134	3,290	3,300	2,890	3,100
Total	**23,720**	**28,707**	**29,340**	**29,660**	**29,990**	**30,570**

Source: Thurston Regional Planning Council, Small Area Population Estimates and Forecast, 2024.

B. Employment – Existing & Target

Employment quantity and quality is an important consideration when considering housing affordability. The availability of jobs that pay a wage adequate to enable people to afford housing is important. Much of the information included in this section is compiled from The Profile, assembled by the Thurston Regional Planning Council.

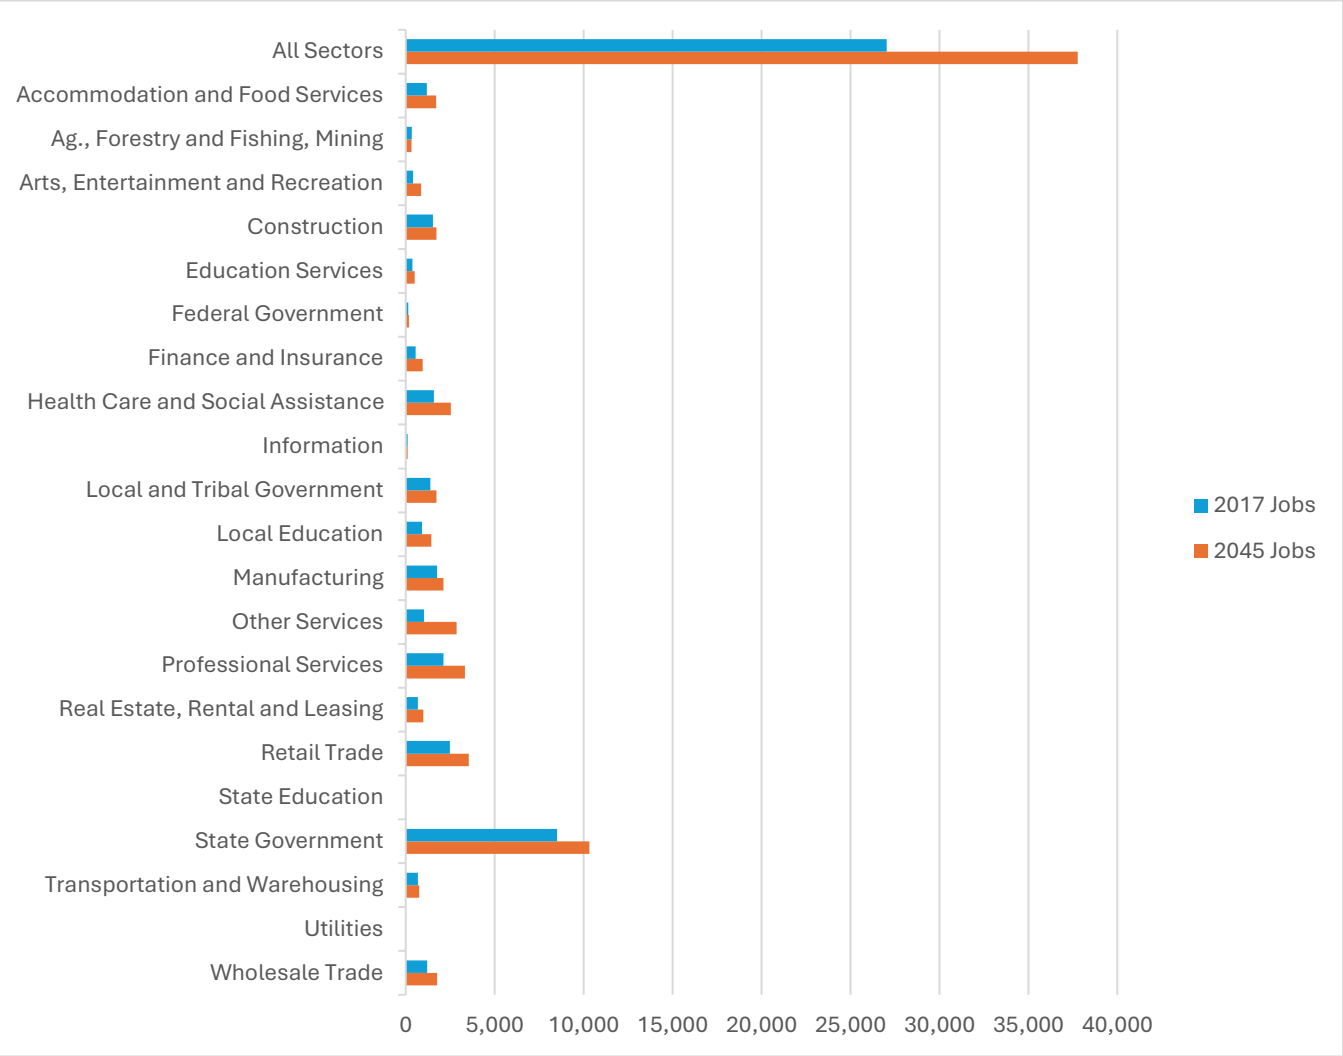
1) County Employment Base



Industries and businesses that produce goods that are exported to surrounding areas, such as other countries, states, and communities, are referred to as basic industries. These firms form the backbone of the local economy by exporting goods out of the area and importing dollars into the area.

An excellent example of a basic industry in Tumwater is Cardinal CG Glass. A non-basic industry is in a support role to the basic industries in a community. An example of a non-basic industry is a shopping center that provides goods to basic industries and their employees.

Figures LU-4 and LU-5 show the percentage and number of jobs by sector in Tumwater.



In Thurston County, State government is the largest basic industry, comprising over 25 percent of the jobs in the county. The proportion of people employed in government jobs in Thurston County is more than double the percentage of the entire State, with local, State, and federal employment together, which is common in counties that have the seat of state government.

Figure LU-4. Employment Bases by Percentage of Jobs in Industry in Tumwater, 2017 & Projected 2045

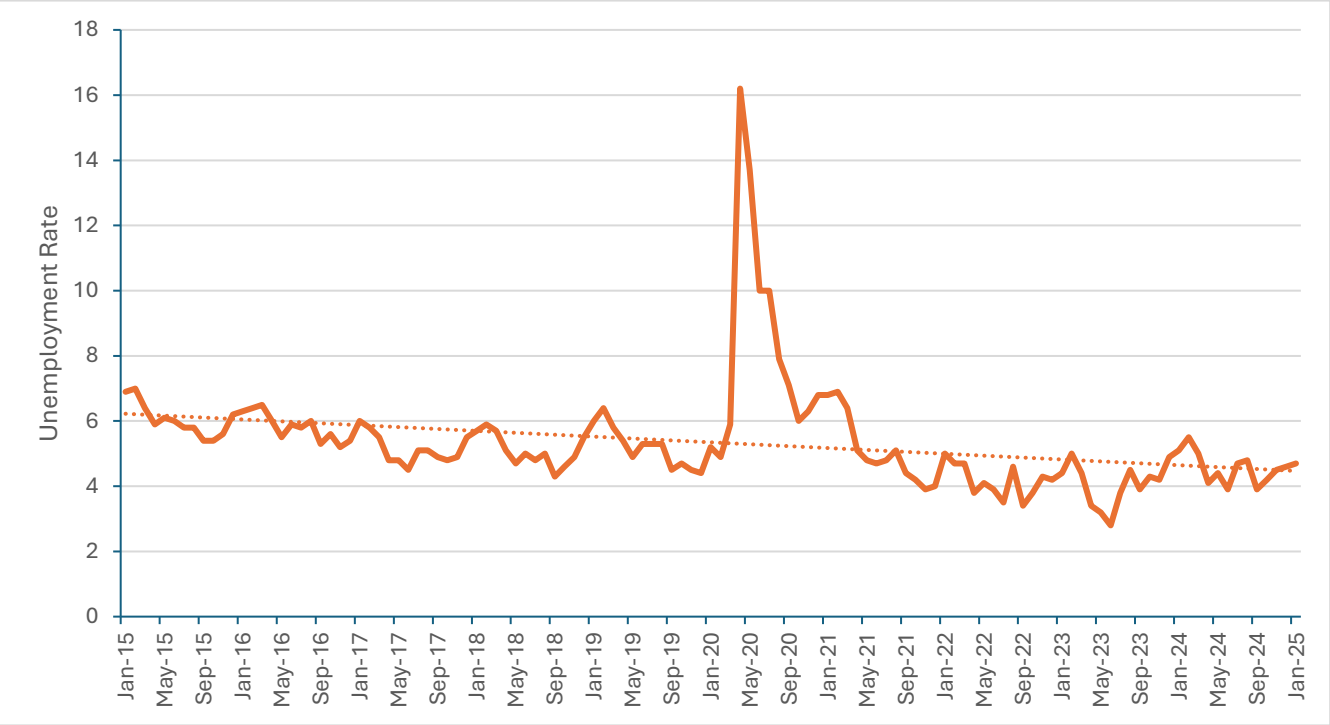
Source: Thurston Regional Planning Council, Population and Employment Forecast (2018 Update).

Figure LU-5. Employment Bases by Number of Jobs in Tumwater, 2017 & Projected 2045.

Source: Thurston Regional Planning Council, Population and Employment Forecast (2018 Update).

Unemployment rates continue in a downward trend in municipalities and payrolls expand with 20,860 new jobs from January 2015 to January 2025. Figure LU-6 shows the unemployment rate since 2015 for Olympia, Lacey, and Tumwater.

In Tumwater alone there were 27,030 jobs in 2017. Compared to 2015, overall employment for the Olympia, Lacey, and Tumwater municipalities in 2025 increased by two percent and unemployment has decreased by two percent. As of April 2025, the unemployment rate was 4.3 percent.



Non-farm employment has increased over the past 10 years by twenty percent. Government employment has expanded slightly (0.5 percent) since 2010. Wholesale, Trade, Transportation and Warehousing as well as Manufacturing jobs are also expected to increase into 2045. Professional and Business Services was the fastest growing industry and added 5,000 jobs in the past 10 years, making up 11 percent of the workforce in January 2025

Increasing taxable sales since 2010 were especially notable in e-commerce up 107 percent,

transportation and warehousing up 93 percent, specialty food and beverage stores up 107 percent and professional, scientific, and technical services up 57 percent. Sales for all industries were up two percent.

Median Household Income in Tumwater has increased 30 percent from $65,167 to $93,635 since 2014 while the number of households has increased 14 percent.

Figure LU-6. Unemployment Rate for Tumwater, Lacey, & Olympia, 2015-2025.

Source: Bureau of Labor Statistics, Unemployment Rates for Metropolitan Areas. February 2025.

5. Land Use Capacity Estimates

A. Introduction

The purpose of the urban land supply analysis is to determine how much residential, commercial, and industrial land Tumwater will need to have to accommodate at least 20 years of projected growth.

Under the Growth Management Act, the State Office of Financial Management gives counties planning under the Growth Management Act a 20-year population projection, which in turn are used to designate their urban growth areas. Thurston County and all the cities and towns within it must accommodate at least the population projected by the State Office of Financial Management.

County-Wide Policy XI addresses population distribution in Tumwater and is found in Appendix B of the Plan Introduction.

Following the housing unit allocation process established under House Bill 1220 (Chapter 254, Laws of 2021) that took the housing dwelling units allocated by the state to Thurston County and then in turn to the individual jurisdictions in the county, the Thurston Regional Planning Council forecasted that Tumwater and its urban growth area will need to add 9,192 net new housing units between 2020 and 2045 in Tumwater and its urban growth area.

Table LU-7 shows base and 2045 forecasts of Tumwater and its urban growth area for housing, population, and jobs.

The 2045 Comprehensive Plan update is using these forecasts to determine the type, size, and characteristics of the land use designations and associated zone districts are needed to accommodate expected growth. The 2045 forecasts are then in turn used to guide the development of the other elements in the 2045 Comprehensive Plan update.

Table LU-7. Tumwater & Urban Growth Area Population, Housing, and Employment Growth Forecasts.

Type	Number
Housing	
Housing Units Needed (2020-2045)	9,192 Units

Population Estimates and Forecast Thurston County Cities, Urban Growth Areas, and Reservations 2010-2045. U.S. Census Bureau, and Thurston Regional Planning Council, Total Employment Estimates and Forecast, Thurston County Urban Areas, 2019.

Table LU-8 shows the breakdown of the projection of population growth for Tumwater and its urban growth area from 2020 to 2024.

Table LU-8. Tumwater & Its Urban Growth Area 20-Year Population Projection.

	2020 Population	2045 Population	Population Increase	Increase 2025-2045
Tumwater	25,573	37,380	11,807	46%
Urban Growth Area	3,134	8,690	5,556	177%
Combined Areas	**28,707**	**46,070**	**17,363**	**60%**

Source: Thurston Regional Planning Council, Small Area Population Estimates and Forecast, 2024.

The data in Table LU-8 shows that the total population for Tumwater's current city limits will be 42,408 in 2045 with another 8,268 in its urban growth areas. In 2020, the population within Tumwater was 25,573 with 3,134 in its urban growth area. An additional population of 16,835 must be accommodated within Tumwater and 5,134 within its urban growth area during the 20-year planning period.

The first step in performing an urban land supply analysis is to determine what land uses are in Tumwater through a land use inventory and land use database. The Thurston Regional Planning Council completed work for Tumwater through the Buildable Lands Program.

B. Partially Used & Under-Utilized Land Supply Analysis

It is particularly difficult to determine the build out of partially used and under-utilized land due to several factors such as current economic conditions, property owners holding property from the market for an anticipated increase in value, businesses retaining property for future expansion, and residential property owners holding property to retain privacy around an existing unit. Thurston Regional Planning Council has incorporated these factors into the Buildable Lands Report for Thurston County (2021).

C. Developable or Re-Developable Land Supply Analysis

Not all the vacant land in Tumwater is available for development. Land might not be available for development for some or all the following reasons:

1. The land is undevelopable due to environmental constraints such as geological hazards and wetlands. These constraints are discussed in the Conservation Element. Previously, a factor of 20 percent was used to estimate the amount of this type of undevelopable land. However, new data and mapping systems allow most environmental constraints to be mapped and calculated more accurately. The Thurston Regional Planning Council incorporated the information into the Buildable Lands Report for Thurston County (2021).

   Note: Thurston Regional Planning Council did not use steep slope data in determining the Buildable Lands data for Tumwater due to an unacceptable level of accuracy when applied to a parcel based citywide map of Tumwater.

2. A certain amount of vacant land will be developed into uses other than residential. These uses include churches, parks, schools, and daycares, all of which are currently allowed within residential land use designations. Thurston Regional Planning Council estimates that these uses will consume varying amounts of land within different residential land use designations.

Thurston Regional Planning Council based its estimates on the assumption related to a market factor but with a variable depending on parcel size that 10 to 25 percent of the vacant developable land, which is being held out of the marketplace for investment, future expansion, or personal use, will be available for development every five years.

It was assumed that some of the vacant land will be available for development at one time or another during the 20-year planning period. The assumption included a range since a larger parcel is more likely to redevelop than a smaller parcel due to its potential value and wider range of development options.

Commercial and Industrial uses were combined in the analysis as land use can vary within those broad categories. State guidance allowed Tumwater to determine how best to calculate buildable lands for commercial and industrial purposes.

The analysis also considered the lands that will be required under future conditions if a habitat conservation plan addressing federally protected species is adopted by City Council. Lands suitable for mitigation were removed from calculations as they will be preserved without development as permanent open space.

Generally, land with the fewest site constraints will develop first because it is less expensive and more convenient to develop. Remaining vacant land has more site constraints and will be more difficult to develop.

When the preceding factors are taken into consideration, there may be less land available for development or re-development than is initially apparent. Table LU-9 shows the buildable land in aces below.

Table LU-9. Buildable Land in Acres in Tumwater.

	Land Use Designation	Residential Uses	Commercial/Industrial
City	Airport Related Industrial	-	6.7
	Brewery District	1.5	8.7
	Capitol Boulevard Community	3.0	5.1
	General Commercial	27.1	80.9

Notes: [1] Land with moderate to high likelihood of intensifying uses.

D. Analysis of Population Accommodation

To determine whether Tumwater has the capacity to accommodate the projected population, an analysis of all the proposed residential land use designations was performed. The study identified vacant or infill land and land that is underutilized and could be redeveloped at higher densities and calculated the allowable dwelling units given the density in each land use designation.

Each land use designation intended for residential uses utilizes a minimum density policy that requires development to be configured so that infill may occur in the future and would ensure that valuable urban land is not developed at extremely low densities. The minimum density policy is one of the main tools to accommodate future population in the Land Use Element.

Similarly to the buildable lands analysis, the data includes reductions for lands that are desirable for habitat mitigation. Only land use designations which allow residential uses are included in Table LU-10.

House Bill 1220 (Chapter 254, Laws of 2021) amended the Growth Management Act housing goal to plan for and accommodate housing for all income levels. The requirement necessitated a shift to assessing housing demand as it is related to the housing types which would be affordable to each area median income bracket in Tumwater.

Note that Table LU-10 is the total capacity for future dwelling units in Tumwater by land use designation, not necessarily the appropriate type of dwelling unit that would be affordable by area median income group. This is addressed in more detail in the Housing Element.

Table LU-10. Capacity for Total Future Dwelling Units on Vacant, Infill or Redeveloped Lots in Tumwater.

City or Urban Growth Area	Land Use Designation	Dwelling Units Available from Vacant or Infill Development	Dwelling Units Available from Redevelopment
City	Brewery District	621	30
	Capitol Boulevard Community	390	338
	General Commercial	1,230	306
	Manufactured Home Park	8	0
	Mixed Use	0	35
	High Density Residential	206	0
	Low Density Residential	3,755	0
	Medium Density Residential	634	0
	Neighborhood Commercial	0	3
	Residential/Sensitive Resource	486	0
	Town Center	6	38
	City Total	**7,336**	**750**
Urban Growth Area	General Commercial	290	18
	Mixed Use	11	13

City or Urban Growth Area	Land Use Designation	Dwelling Units Available from Vacant or Infill Development	Dwelling Units Available from Redevelopment
	Low Density Residential	3,970	0
	Medium Density Residential	1,397	0
	Neighborhood Commercial	0	1
	Residential/Sensitive Resource	76	0
	Urban Growth Area Total	**5,744**	**32**
	TOTAL	**13,080**	**782**

Source: Thurston Regional Planning Council. Tumwater Land Use Alternative Analysis. 2025.

Thurston Regional Planning Council completed a land capacity analysis as part of the Planning for and Accommodating Housing Needs in Thurston County in 2025. The final step of the land capacity analysis was to compare the allocated housing need allocated to Tumwater and its urban growth area to its capacity for new housing.

A summary of the difference between the allocated housing need and the capacity for potential number of new dwelling units that could be built on a parcel based on zoning, development regulations, development trends, and market factors is shown in Table LU-11 and in more detail by area median income level and residential land use designation in Table LU-12.

A positive number indicated that there is a surplus in Tumwater's capacity for new housing units, which is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number indicated that there is a deficit, which is insufficient capacity.

Table LU-11. Summary of Housing Surplus or Deficit in Tumwater & Its Urban Growth Area in 2045.

Aggregate Housing		Capacity		Need Surplus / Deficit	
0-80% AMI	80-120% AMI	0-80% AMI	80-120% AMI	0-80% AMI	80-120% AMI
5,694	1,937	5,729	3,692	35	1,755

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.
Note: A positive number (surplus) indicates that there is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number (deficit) indicates that there is insufficient capacity. AMI is area median income.

Table LU-12. Residential Land Supply & Demand in Tumwater & Its Urban Growth Area in 2045.

Income Level	Land Use Designations Serving These Needs	Housing Need	Aggregate Housing Need	Total Capacity	Surplus or Deficit
0-30% PSH	• High Intensity	723	5,694	5,729	35
0-30% Other		1,736			
30-50%		1,309			

Income Level	Land Use Designations Serving These Needs	Housing Need	Aggregate Housing Need	Total Capacity	Surplus or Deficit
50-80%		1,926			
80-100%	• Moderate Intensity	1,140	1,937	3,692	1,755
100-120%		798			
120% +	• Low Intensity	1,561	1,561	2,441	880
Total Housing Units		**9,192**	**9,192**	**11,861**	**2,670**
Emergency Housing (Beds Needed)		184	184	2,842	2,658

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.
Notes: Income level is the area median income level. A positive number indicates that there is a surplus, which is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number indicates that there is a deficit, which is insufficient capacity. High intensity land use designations are those that allow for multifamily dwelling (5+ dwelling units), moderate intensity land use designations are those that allow for middle housing dwelling (2 to 4 dwelling units), and low intensity land use designations are those that allow for single family dwellings.

While the land capacity analysis found no deficits in Tumwater and its urban growth area in the ability for Tumwater's current land use designations to accommodate future housing demand, in looking at the detailed findings shown in Table LU-12 under the Surplus or Deficit columns, the margin between aggregate housing need and the total capacity to accommodate the housing needs for those less than 80 percent area median income was very small.

Given the small margin, the uncertainty around the amount of developable land that will be available without the Endangered Species Act restrictions, and the limited land use designations that could accommodate housing for the category, under the Land Use Element residential densities land use designations have been increased and the range of potential uses allowed have been expanded.

Figure LU-7 shows the relationship in Tumwater and its urban growth area between area median income, the housing allocation for each of the income groups, the housing types most affordable for the income groups, and housing tenure.

The information will inform the density ranges and permitted types of residential uses in land use designations and zone districts in the Land Use Element and Tumwater's development regulations.

Figure LU-7. 2045 Tumwater & Urban Growth Area Housing Need Allocation by Area Median Income, Housing Type, & Tenure.

0-30% AMI	30-50% AMI	50-80% AMI	80-120% AMI	Above 120% AMI

Notes: PSH is permanently supported housing and AMI is area median income. Numbers may not add to totals due to rounding.

6. Land Use Plan

A. Introduction

The Land Use Element identifies characteristics of lands in Tumwater to determine the best use in each neighborhood based on physical and environmental factors, historical use, existing use, community concerns, and goals. In most cases, recommendations for future land use are broad and applied at the city level.

Tumwater is also divided up into neighborhoods, particularly where historic development occurred. Where special consideration is required, specific recommendations have been made for the eleven neighborhoods within Tumwater. Neighborhoods are defined in Map LU-2 Neighborhoods Map and addition information is found in Chapter 7.

The chapter defines the purpose for each land use designation and identifies the criteria for their use. Additionally, land use designation criteria are used in conjunction with Part 1, Land Use Goals, Policies, and Actions.

Development within each land use designation is subject to design review based upon the Citywide Design Guidelines and any applicable subarea design guidelines such as the Brewery District, Capitol Boulevard Community, and Town Center Design Guidelines.

Table LU-13 shows all the land use categories and designations that were applied in the Land Use Element. The land use designations are meant to address all existing land uses and potential land uses that could occur in Tumwater.

The land use categories in Table LU-13 are a general guide to the land use designations discussed in Chapter 6. In many cases, multiple types of land use can occur in the same land use designation, such as commercial and residential in the General Commercial land use designation, but there is a predominant land use, such as commercial. The chapter is organized around the predominant land use of a land use category.

Table LU-13. Tumwater Land Use Designations

Land Use Category	Land Use Designation
Residential	Residential/Sensitive Resource
	Low Density Residential
	Medium Density Residential
	High Density Residential
	Manufactured Home Park
Commercial	General Commercial
	Neighborhood Commercial

Land Use Category	Land Use Designation

1) City-Wide Future Land Use Map

Map LU-1, the City-Wide Future Land Use Map, represents the general future land use patterns that are desired for Tumwater within the 20-year planning period. The Land Use Element implements the land use designations on the Land Use Map. The land use designations, the goals and policies in Part 1 of the Land Use Element, and the additional information in Part 2 are based on several factors, including:

- The unique topographical, ecological, social, and economic characteristics of a neighborhood.
- The type of existing development.
- Existing zoning regulations.
- Ownership patterns.
- The condition of existing structures.
- Subarea, district, and corridor plans previously adopted by Tumwater that guide land use patterns within specific neighborhoods. These plans include the Littlerock Road Subarea Plan, Brewery District Plan, and Capitol Boulevard Corridor Plan.

The City-Wide Future Land Use Map is meant to be used to evaluate individual land use proposals and is a guide for both public and private actions affecting the growth and development of Tumwater.

The City-Wide Future Land Use Map, in turn is the basis for the Official Zoning Map for Tumwater and the Urban Growth Area and the land use designations are the foundation for Tumwater's development codes and guidelines.

In many cases, more than one zone district would be consistent with the policy recommendations of a particular land use designation.

The City-Wide Future Land Use Map along with the land use designations intended to indicate the type of future development that is desired for neighborhoods, while allowing flexibility where possible to accommodate previously approved development.

The Land Use Element addresses a twenty-year period. The changes that result from the policy recommendations in the Element and the rest of the Comprehensive Plan will take place slowly over time and will result in incremental changes.

The following sections provide specific definitions for each land use category and designation and the criteria for their use.

B. Residential

1) Introduction

Where Tumwater's residents live helps define the character of the community. The residential land use category provides a variety of land use designations that provide a broad range of housing choices to meet the needs of all income groups and ages in the community.

Residential developments should be established with the following guidelines:

- Provide for a dynamic mix of housing types to accommodate the many diverse housing needs of all income groups of Tumwater residents.
- Provide open spaces. Wall to wall development is not acceptable.
- Ensure that housing is compatible in quality, design, and intensity with surrounding land uses, traffic patterns, public facilities, and environmentally sensitive areas.
- Ensure that new residential development promotes diversity in housing types.
- Support the stability and vitality of established residential areas.
- Support incentives for housing ownership and rental housing.
- Enhance the appearance of and maintain public spaces in residential areas.
- Promote community involvement to achieve neighborhood improvement.
- Limit closed loops and favor options for multiple travel paths for emergency access and connectivity to other areas and services.

Legally established mobile and manufactured home parks should have the Manufactured Home Park land use designation applied to them to ensure a sufficient supply of land for manufactured homes in parks.

Several land use designations for residential land use were developed to meet the goals of the Growth Management Act and the Land Use and Housing Elements. Each of these land use designations has specific criteria and characteristics related to development in each land use designation.

Table LU-14 shows every land use designation that allows residential uses with implementing zone district and their minimum and maximum net dwelling units per acre.

The density ranges for residential land use designations are based on net density. Net density means the total number of dwelling units divided by the net area of the site or area. Net area typically excludes streets, streams, ponds and other water areas, and areas with environmental constraints such as flood plains, wetlands, and steep slopes. Net density can also be defined as developable land.

Gross density means the total number of dwelling units divided by the total land area of the site or area with no exclusions. The difference between gross and net density is critical. Roads and parking, both included in gross density, often use 20 percent of a site. Using net density also increases flexibility for habitat mitigation where required.

Table LU-14. Land Use Designation with Implementing Zone District & Minimum & Maximum Net Dwelling Units per Acre.

Land Use Designation	Implementing Zone District	Net Dwelling Units Per Acre
Residential Land Uses		
Residential/Sensitive Resource	RSR Residential/Sensitive Resource	Minimum: 2 Maximum: 4
Low Density Residential	LDR Low Density Residential	Minimum: 6 Maximum: 9
Medium Density Residential	MDR Medium Density Residential	Minimum: 10 Maximum: 19[1]
High Density Residential	HDR High Density Residential	Minimum: 20 Maximum: None
Manufactured Home Park	MHP Manufactured Home Park	Minimum: 6 Maximum: 9
Commercial Land Uses		
General Commercial	GC General Commercial	Minimum: 40 Maximum: None
Neighborhood Commercial	NC Neighborhood Commercial	Minimum: 6 Maximum: 9
Mixed Use Land Uses		
Brewery District	BD Brewery District	Minimum: 8 to 30, depending on subdistrict[2] Maximum: None
Capitol Boulevard Community	CBC Capitol Boulevard Community	Minimum: 30 Maximum: None
Mixed Use	MU Mixed Use	Minimum: 20 Maximum: None

Land Use Designation	Implementing Zone District	Net Dwelling Units Per Acre
New Market Historic District	HC Historic Commercial	Minimum: 10 Maximum: None
Tumwater Town Center	TC Town Center	Minimum: 20 to 30, depending on subdistrict[3] Maximum: None

Notes: [1] Projects that provide permanently affordable housing dwelling units or other forms of permanently inclusive housing dwelling units in the Medium Density Residential land use designation would be allowed to exceed the maximum density stated in Table LU-14 up to a new maximum density of 24 dwelling units per acre.

[2] In the Brewery District, the following minimum densities of net dwelling units per acre apply to the subdistricts. There are no maximum densities.

- Bates Neighborhood North – Minimum: 20
- Bates Neighborhood South – Minimum: 8
- Bluff – Minimum: 10
- Deschutes – Minimum: 20
- Knoll – Minimum: 30
- Triangle – Minimum: 20.

[3] In the Tumwater Town Center, the following minimum densities of net dwelling units per acre apply to the subdistricts. There are no maximum densities.

- Town Center Mixed Use – Minimum: 30
- Town Center Residential – Minimum: 20.

2) Commercial Uses in Residential Land Use Designations

Some neighborhood-scale commercial uses are appropriate in residential land use designations to serve the needs of the local neighborhood. These uses may include neighborhood-scale retail uses, personal services, and small professional offices, including residences in conjunction with these businesses.

Such uses should be allowed in all residential land use designations except those designated Residential/Sensitive Resource. Neighborhood-scale commercial uses should only be allowed as conditional uses to ensure that the uses demonstrate compatibility with the existing neighborhood.

Compatibility of neighborhood-scale commercial uses with residential uses should be achieved using buildings that are sized and designed to be residential in scale; small overall area devoted to neighborhood-scale commercial use; and design and layout, which screens residential areas from excessive noise, lights, storage, and parking areas. Neighborhood-scale commercial uses should be oriented primarily towards pedestrian and bicycle use. Uses, which would result in excessive automobile traffic, should be discouraged, such as gas stations or drive-thru restaurants.

Most neighborhood-scale commercial areas serving a particular neighborhood will consist of one business. However, new neighborhood-scale commercial uses may be considered in areas where one or more such uses already exist. In those cases, additional businesses should be located near existing businesses in detached, non-linear clusters to avoid the development of commercial strips or many small businesses strung out along transportation corridors.

3) Residential/Sensitive Resource

The purpose of the Residential/Sensitive Resource land use designation is to recognize areas of unique open space character and sensitivity to environmental disturbance such as around stream corridors, lakes, and wetlands within Tumwater and its urban growth area.

The Residential/Sensitive Resource land use designation is intended to be used only for exceptional areas within Tumwater and its urban growth area that are not protected by the Shoreline Management Act and are not already built out. Intensive urban development would adversely affect ground or surface waters or environmentally sensitive areas.

Development in Residential/Sensitive Resource land use designation should be low density and clustered. Clustering means grouping development onto part of a property so that the remainder can be preserved as unbuilt open space. The intent of clustering development is to preserve open space along environmentally sensitive areas and provide lot configurations that allow for the preservation of the specified amount of open space and also allows for future applied density to be achieved over the 20-year time period of the Land Use Element.

Where clustering is used, it should be applied in the following manner:

- Clustering is recommended for development proposals in the Residential/Sensitive Resource land use designation.
- Open space preserved through clustering should be at least 30 percent of the gross area of the site. Of the 30 percent, at least half should be useable for passive recreational purposes. Passive recreational uses include activities such as hiking, bicycling, horseback riding, and fishing; and areas that provide access to shorelines and other recreational uses. If half of the 30 percent preserved for open space on a lot or development proposal is not useable for passive recreational purposes, then an additional amount of open space should be set aside to make the amount of area usable for passive recreational purposes, which should be equal to the amount of open space area that is not useable for passive recreational purposes.

In addition to clustering, other methods of preserving open space shall be strongly encouraged to guide development into less environmentally sensitive portions of the land, such as purchase or donation, easements or deed restrictions, covenants, land exchanges, and transfer of development rights as a method of preserving open space.

The minimum density for residential development in the Residential/Sensitive Resource land use designation is two dwelling units per acre and the maximum density of six dwelling units per acre.

Densities in the Residential/Sensitive Resource land use designation should be two to four dwelling units per acre.

To protect groundwater resources from contamination by failing septic tanks and to ensure that urban services can be provided in a cost-efficient manner, a minimum density policy of two dwelling units per acre is established.

It is not the intent of the policy to prohibit construction on lots larger than are required for minimum density. What is important is that the property has the capacity to be developed at the minimum density in the future.

For example, if a property owner proposes to construct a house on a five-acre lot and the minimum density is two dwelling units per acre, they would not be prohibited from doing so. However, the house must be sited on a five-acre lot such that other houses could be built on the site in the future if needed.

Soil and other natural systems should be capable of supporting densities of up to four dwelling units per acre with urban services without resulting in the degradation of environmentally sensitive areas such as stream corridors, lakes, and critical aquifers.

The full range of urban services should be available or be planned in the near future in accordance with the Lands for Public Purposes Element and Capital Facilities Plan.

Construction activities in the Residential/Sensitive Resource land use designation should only occur in the drier months of the year to protect Percival Creek from sedimentation and construction-associated runoff.

Density transfer in the Planned Unit Development overlay is not appropriate in the land use designation due to the extreme sensitivity of the area to environmental disturbance.

Accessory units should be permitted in the land use designation on lots with sewer connections, except where the Health Department has approved septic systems. Accessory units will provide affordable housing and extra income for homeowners.

Designated manufactured housing should be permitted on single lots in the land use designation.

4) Low Density Residential

The minimum density for residential development in the Low Density Residential land use designation is six dwelling units per acre and the maximum density of nine dwelling units per acre.

The density of new development in the Low Density Residential land use designation should be averaged over the entire site to reach the maximum densities required to accommodate future population. It is not the intent of Tumwater to require that lots be of a specific size but that densities are met as an average of the overall site.

Clustering should be considered in the Low Density Residential land use designation to protect environmentally sensitive areas yet still accommodate residential development.

Designated manufactured housing should be permitted on single lots in the land use designation.

Accessory units should be permitted in the land use designation on lots with sewer connections, except where the Health Department has approved septic systems. Accessory units will provide affordable housing and extra income for homeowners.

It is envisioned that the zone district implementing the land use designation would permit housing types such as single family and

middle housing such as townhomes, cottage housing, duplexes, triplexes, and quadplexes. For these housing types to be used, there must be mechanisms to ensure neighborhood compatibility and design quality.

All housing types should be permitted in the land use designation subject to Citywide Design Standards. Designated manufactured housing should be permitted on single lots in the land use designation.

The residential land use designation should provide a mix of housing types to provide affordable housing and ensure neighborhood stability.

5) Medium Density Residential

The minimum density for residential development in the Medium Density Residential land use designation is ten dwelling units per acre and the maximum density of 19 dwelling units per acre.

The density of new development in the Medium Density Residential land use designation should be averaged over the entire site to reach the maximum densities required to accommodate future population. This way lots are not limited to a specific size, but different sized units may be constructed to meet density requirements as an average of the overall site.

Projects that provide permanently affordable housing dwelling units or other forms of permanently inclusive housing dwelling units in the Medium Density Residential land use designation would be allowed to exceed the maximum density stated in Table LU-14 up to a new maximum density of 24 dwelling units per acre.

The Medium Density Residential land use designation can accommodate middle housing such as townhomes, cottage housing, duplexes, triplexes, and quadplexes, and multifamily housing if the overall site meets the density goals of the land use designation. The intent of the policy is to ensure diversity in housing types in these areas.

Designated manufactured housing should be permitted on single lots in the land use designation.

Manufactured home parks are permitted in the Medium Density Residential land use designation subject to City standards and site plan review by the Hearing Examiner.

Additionally, Medium Density Residential designated areas should be accompanied by open space, environmental protection for environmentally sensitive areas and mass transit linkage to make these higher densities viable and compatible with the community.

Clustering should be considered in the residential land use designation to protect environmentally sensitive areas yet still accommodate residential development.

6) High Density Residential

The minimum density for residential development in the High Density Residential land use designation is 20 dwelling units per acre and there is no maximum density of dwelling units per acre.

The density of new development in the High Density Residential land use designation should be averaged over the entire site to reach the maximum densities required to accommodate future population. This way lots are not limited

to a specific size, but different sized units may be constructed to meet density requirements as an average of the overall site.

The High Density Residential land use designation should be applied in areas that are planned for major transportation corridors and areas adjacent to the center of Tumwater.

Clustering should be considered in the High Density Residential land use designation to protect environmentally sensitive areas yet still accommodate residential development.

The High Density Residential land use designation should include significant open spaces, protection for environmentally sensitive areas, and mass transit linkage to make these higher densities viable and compatible with the community.

7) Manufactured Home Park

The Manufactured Home Park land use designation is intended to ensure consistency with RCW 36.70A.070(2)(c) which requires sufficient land be available for all types of housing including manufactured housing.

The minimum density for residential development in the Manufactured Home Park land use designation is six dwelling units per acre and the maximum density of nine dwelling units per acre.

Manufactured home parks are permitted in the land use designation subject to City development standards and site plan review.

Existing manufactured home parks should be maintained and included in the land use designation to protect them from changes into other uses.

Designated manufactured housing should be permitted on pre-existing single lots of record in this land use designation.

The residential land use designation should help to provide sufficient land for manufactured housing in manufactured home parks and ensure neighborhood stability.

Uses that are incompatible or inconsistent with the goal of protecting and preserving manufactured home parks should not be allowed.

The land use designation should be accompanied by open space and protection for environmentally sensitive areas to make these areas compatible with the community.

Subdivision and platting of properties for residential purposes, including condominiums, should not be allowed.

Additionally, land use designation should be located along or near mass transit linkages and close to urban services.

C. Commercial

1) Introduction

Where Tumwater's residents shop helps make the community unique. The commercial land use category provides a broad range of land use designations that support retail and employment opportunities to meet the needs of all income groups and ages in the community as well as support and implement the goals of the Tumwater Economic Development Plan.

2) General Commercial

The intent of the General Commercial land use designation is to provide places for more intense retail space that support and implement the goals of the Tumwater Economic Development Plan.

The General Commercial land use designation should be established with the following guidelines:

- The establishment of a new intense use commercial center for Tumwater;
- The preservation of areas for commercial facilities, which make use of the closeness to Interstate 5, and;
- Minimizing the undesirable impacts of commercial uses on the residential neighborhoods which they serve.

To ensure commercial development is compatible with surrounding uses and the general character of the community, architectural and landscaping design and development guidelines should apply to commercial development. Allowing residential uses amongst commercial development provides opportunities for walkable communities to develop.

Mixed use structures with residential uses are allowed in the land use designation if they are built at a density of 40 dwelling units per acre or greater. Development would be of the same scale as surrounding developments and would support housing that is affordable, transit orientated, and pedestrian friendly. These developments should also offer community open space and provide a sense of belonging and identity due to quality design.

3) Neighborhood Commercial

Some non-residential uses, such as neighborhood-scale retail uses and personal services, are appropriate in residential areas when they serve the needs of the local neighborhood. The Neighborhood Commercial land use designation is an additional method for allowing neighborhood scale retail uses, personal services, and professional offices next to residential areas where local demand, community support, and design solutions demonstrate compatibility with the neighborhood.

Areas designated Neighborhood Commercial should be of a low intensity and minimally affect adjacent residential areas. The Neighborhood Commercial land use designation should provide a buffer area between adjacent residential uses. The buffer should consist of landscaping and sound barriers. Uses that produce nuisances such as light and glare, and excessive noise and traffic should be discouraged. The buffer should also allow for bicycle and pedestrian access to encourage the use of adjacent services without requiring a car trip.

The minimum density for residential development in the Neighborhood Commercial land use designation is six dwelling units per acre and the maximum density of nine dwelling units per acre.

D. Mixed Use

1) Introduction

The Mixed Use land use category provides land use designations with a combination of land uses in close proximity. Mixed use can include development of a parcel or structure with one or more different land uses, such as a combination of residential, office, retail, public, or entertainment in a single or physically integrated group of structures.

The mixed use land use designations provide an opportunity to develop neighborhoods and subareas that are transit oriented and pedestrian-friendly while still accommodating automobiles and provide affordable housing and quality community design.

2) Brewery District

The intent of the Brewery District land use designation is to create a multi-modal activity center. Over time, areas with the land use designation will transform from an auto-oriented commercial node into a lively, walkable, and economically vibrant neighborhood center with a mixture of housing and neighborhood-serving businesses in accordance with the Brewery District Plan, Economic and Strategic Plans, and the Final Report for the Community Visioning Project for the Former Olympia Brewery.

The Brewery District land use designation is intended to foster development that:

- Creates a stronger sense of place by facilitating pedestrian access, establishing gathering places for residents, and fostering a distinct District identity;
- Improves transportation options, safety, and access within and across the District;
- Expands economic opportunity and activity;
- Improves the function and appearance of the built environment; and
- Guides redevelopment of the former brewery site and integration into the surrounding neighborhood.

The minimum density for residential development in the Brewery District land use designation is eight to 30 dwelling units per acre depending on the subdistrict and there is no maximum density of dwelling units per acre.

To implement the goals, policies, and actions of the land use designation, matching zoning and special design guidelines were adopted.

3) Capitol Boulevard Community

It is the intent of the Capitol Boulevard Community land use designation to provide for a broad spectrum of compatible, mutually supporting uses nearby. Over time, the area with the land use designation is envisioned to change from strip commercial development and other low-intensity or non-pedestrian-oriented uses incrementally into a mixed-use, pedestrian, auto, and transit-oriented corridor.

The Capitol Boulevard Community land use designation is intended to foster development that:

- Creates vibrant places and increases business activity, especially for pedestrian oriented businesses;
- Increases security;
- Promotes efficient use of facilities;
- Encourages a variety of businesses, especially those that appeal to pedestrians and serve the needs of the surrounding neighborhood;
- Balances all modes of transportation by increasing access for pedestrians, bicycles, and transit and by providing commercial services, recreation facilities, and employment opportunities near to residences, thus lessening the need to drive;
- Provides affordable housing by reducing development costs and encouraging a greater variety of housing options;
- Creates a pedestrian and bicycle-friendly environment with well-designed streets and public open spaces; and
- Provides a sense of community and place with quality community design.

The minimum density for residential development in the Capitol Boulevard Community land use designation is 30 dwelling units per acre and there is no maximum density of dwelling units per acre.

To implement the goals, policies, and actions of the land use designation, matching the zone district and special design guidelines were adopted. The Capitol Boulevard Corridor Plan should be referenced for more in-depth guidance on the land use designation.

4) Mixed Use

The intent of the Mixed Use land use designation is to have a mixture of commercial and residential uses on the same site. Mixed-use can include but is not limited to mixed-use buildings with retail or office uses on the first floor and residential above or separate buildings with different uses on the same site.

The Mixed Use land use designation provides an opportunity to develop areas that are transit oriented and pedestrian friendly while still accommodating automobiles, supporting small businesses and consumers, and providing affordable housing and quality community design. With architectural design and creative site planning, it is possible to provide dwelling units that are mixed in with commercial uses.

The minimum density for residential development in the Mixed Use land use designation is 20 dwelling units per acre and there is no maximum density of dwelling units per acre.

The Mixed Use land use designation, when developed with design and development guidelines have characteristics that include:

- Transit orientation that lessens traffic impacts by providing ready access to mass transit and provides places to work and shop adjacent to living spaces, thus lessening the need to drive;
- The provision of affordable housing by providing more building lots available to develop at a lower cost;
- A pedestrian friendly environment due to well-designed streets, parks, and public open spaces; and

- The provision of a sense of community and place due to quality community design.

Areas designated Mixed Use should be developed with design and development guidelines that promote quality community design. Design and development guidelines can supplement zoning codes. Incompatible uses such as industrial, warehousing and distribution, chemical handling, and those uses that generate significant noise or are heavily truck dependent should not be permitted in the Mixed Use land use designation.

Mixed-use areas should be dense and compact. The proximity of employment, residential and commercial activities, and public uses will provide residents and workers with a realistic and convenient choice of walking or cycling to work, home, or shopping, thus lessening dependence on the automobile.

Integral to the success of mixed-use areas will be good urban design. Urban design not only refers to the appearance and attractiveness of development, but also to its function. It is important that there be well-designed buildings to maintain compatibility with surrounding development, as well as site design that provides for pathways, open community spaces, and other connecting features that facilitate easy access between developments and inspire a sense of unity.

To ensure that mixed-use development occurs where it is desired, Tumwater should consider providing incentives for such development.

5) New Market Historic District

The New Market Historic District land use designation is applied in a limited area in Tumwater that includes the Tumwater Historical Park, the Tumwater Falls Park, and the site of the Old Tumwater Brewhouse on the east side of the Deschutes River. The focus of the area is the Old Tumwater Brewhouse.

The New Market Historic District Master Plan was adopted by the City Council in November 1993. The Master Plan included input from the public and experts in the field of historic area design, and provisions addressing aesthetics, vegetation, fish and wildlife habitat, historic and prehistoric archeological significance, public access, environmental sensitivity, architecture and community design, traffic, and public education. The Master Plan is sufficiently detailed to determine whether specific proposed structures, uses, and structural revisions are in accordance with the purposes and intent of the District.

All development that occurs in the area designated Historic Commercial is subject to the standards and recommendations of the Master Plan.

The minimum density for residential development in the New Market Historic District land use designation is 10 dwelling units per acre and there is no maximum density of dwelling units per acre.

6) Tumwater Town Center

The Tumwater Town Center land use designation is intended to provide for a mix of public and privately owned developments that will realize Tumwater's vision of a new city center. It is envisioned to include state and local

government facilities; private commercial developments of office, retail, and service businesses; residential; educational; civic services; support facilities and services, such as childcare; and public assembly facilities and outdoor spaces.

The Tumwater Town Center is bordered by Interstate 5, Tumwater Boulevard, Nicholas Street, and Israel Road.

Development within the Tumwater Town Center land use designation should occur in a manner that is consistent with the goals and policies of the Comprehensive Plan, design guidelines, and street standards adopted for the designation.

The minimum density for residential development in the Tumwater Town Center District land use designation is 20 to 30 dwelling units per acre depending on the subdistrict and there is no maximum density of dwelling units per acre.

E. Industrial

1) Introduction

The industrial land use category provides land use designations that establish and preserve areas for manufacturing, warehousing, distribution, and other uses of such a nature with a broad range of employment opportunities to meet the needs of all income groups and ages in the community as well as support and implement the goals of the Tumwater Economic Development Plan.

2) Airport Related Industrial

Airport Related Industrial land use designation is meant to support the Port of Olympia's aviation and industrial related uses at the Olympia Regional Airport and to reflect the unique land use activities of the Airport and associated areas.

The Airport Related Industrial land use designation will support the land use activities permitted in the existing Airport Related Industrial zone district and discourage incompatible uses and heights.

3) Light Industrial

The purpose of the Light Industrial land use designation is to provide land for industrial development that will allow for attraction of new industries and expansion of existing ones while maintaining a high-quality environment. The land use designation recognizes the need for industrial uses in certain areas of Tumwater to provide needed materials, goods, and services to ensure the economic vitality of Tumwater and the region.

To augment the role of industry in Tumwater's future, it is necessary to provide a reasonable supply of land for a variety of uses consistent with the policies of the Economic Development Plan. The Light Industrial land use designation provides for the location of a broad array of activities, including manufacturing, wholesale trade, and distribution activities. The projected growth in manufacturing and distribution industries is also considered when allocating land for these uses.

Light industrial areas need to be located within reasonable access to truck routes, rail, freeway, or air routes. Similarly, public facilities including sewer, water, and storm drainage should either be presently available or should be easily provided during the development process. Industrial uses should be grouped into a variety of parcel sizes to provide coordinated development and sharing of facilities and services.

4) Heavy Industrial

The Heavy Industrial land use designation recognizes the need for heavy industrial uses in limited areas of Tumwater to provide needed materials, goods, and services to ensure the economic vitality of Tumwater and the region.

Heavy industrial uses include but are not limited to chemical processing, mining, and mineral extraction. The Jones Rock Quarry is an example of heavy industrial use in Tumwater.

Heavy industrial uses may have impacts that are difficult to control such as heavy truck traffic, noise, vibration, light, glare, or odors. Heavy industrial areas should be separated from residential and commercial uses by such methods as vegetative or lighter intensity land use buffers. Regulations should also control activities to establish compatibility with surrounding non-industrial development and to protect them from nuisance-creating occurrences such as noise, dust, odor, vibration, and air and water pollution.

5) Utilities

The Utilities land use designation includes those areas of land devoted to the transport and provision of utilities such as electricity, natural gas, telephone, and other utilities. Since utilities are often owned and provided by other service agencies and private businesses, partnership is required to determine allowable uses that are outlined in TMC Title 18 Zoning.

Most of the areas receiving the Utilities land use designation are electrical utility easements. Utilities such as natural gas, telephone, and other utilities can be provided within areas designated for other land uses in ways that are compatible with other land uses. Utilities areas are also often compatible with path and trail connections. The Utilities Element should be referenced for specific recommendations and information on private utility provision.

F. Parks, Open Space, & Public and Institutional

1) Introduction

The Parks, Open Space, & Public and Institutional land use category provides land use designations that support publicly and privately owned facilities such as parks and open space, as well as publicly owned schools, municipal buildings, and other such facilities.

2) Parks & Open Space

The Parks and Open Space land use designation supports and implements the Parks, Recreation, and Open Space Plan. The Parks and Open Space land use designation accommodates public recreational pursuits, retains views and historical features, or preserves land in a natural and open state. It also provides possibilities for urban

agricultural uses on appropriate lands. A site may also provide for or contain support uses consistent with community needs, provided there is appropriate opportunity for public review and comment.

Areas designated Parks and Open Space include developed active parks, privately operated parks, designated open space, flood plains, areas of steep slopes or other physical constraints, golf courses, delineated wetland areas, and lakes not under shoreline jurisdiction, and watershed areas.

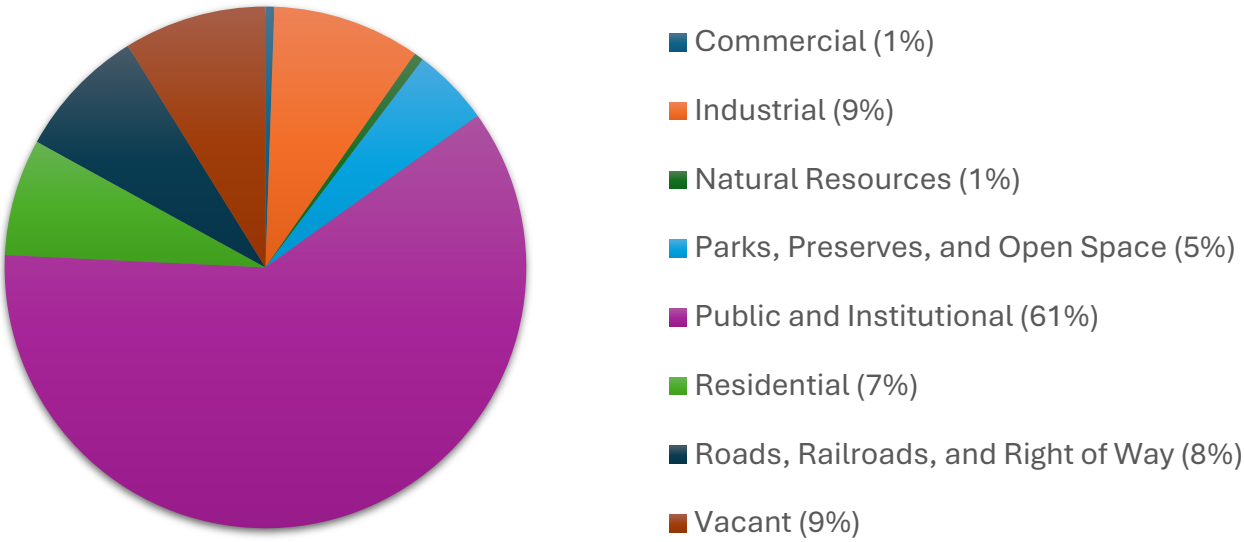
Specific recommendations for many Parks and Open Space designated areas are contained in the Parks, Recreation, and Open Space Plan.

3) Public and Institutional

The Public and Institutional land use designation recognizes those parcels and facilities currently in or planned for public ownership where their primary function is to provide public services.

The intent of the Public and Institutional land use designation is to assure continuation and potential expansion of acreage, facilities, and services at levels consistent with population requirements, and achieved in a manner that is compatible with surrounding land uses. Public and institutional uses include but are not limited to schools, fire stations, police stations, general government buildings, libraries, hospitals, and cemeteries.

7. Neighborhoods



A. Airport

1) Context

As shown on Map LU-2, the Airport Neighborhood is in the south-central area of Tumwater, which is south of Tumwater Boulevard west of Capitol Boulevard/Old Highway 99, and east of Interstate 5.

Major roads in the neighborhood include Tumwater Boulevard SW, Capitol Boulevard/Old Highway 99, Center Street SW, 88th Avenue SW, Kimmie Street SW, and 83rd Avenue SW.

Figure LU-8. Airport Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-8 shows the proportion of land uses that exist in the neighborhood currently. Public and Institutional makes up the majority of land use which includes the Olympia Regional Airport, which is owned and operated by the Port of Olympia.

2) Future Land Use

In the next 20 years, the Airport Neighborhood will continue to provide access to necessary regional transportation services while addressing the needs of the industrial, commercial, and residential uses that are near the airport.

Zoning will continue to support airport related industries, commercial, and low density residential uses.

The mixed use land use designation would provide an opportunity to redevelop the neighborhood in a way that provides space for affordable housing close to needed services and quality community design.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below.

- The water source for much of Tumwater is from wells in the City with high level groundwater. These kinds of wells are more vulnerable to contamination than deeper wells.
- The Olympia Regional Airport and increasing adjacent development also create challenges. Delivering services across a large area with very low-density property to neighborhoods in the far southeast corner of Tumwater is costly.
- Significant historic and cultural resources are found in the area and may limit development and land uses.
- The prairie lands are habitat for federally protected species.

4) Recommendations

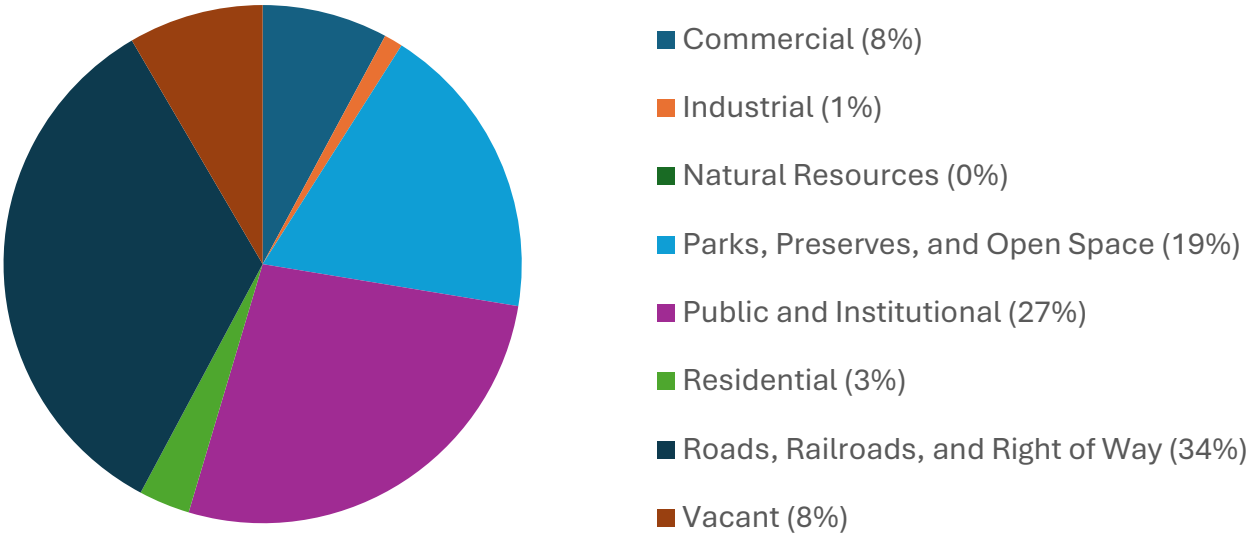
As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Where industrial uses are adjacent to other uses, using buffers to minimize impacts.
- Keep buried pipelines from decommissioned fuel tanks on maps to ensure safe digging.
- Land uses should be carefully considered near buried pipelines to avoid hazards.
- Work with the Port of Olympia to maintain appropriate overlays which support airport operations and meet state development requirements.
- Continue to monitor Wellhead Protection zones and follow state guidance.
- Consider programs to educate the public about cross connections and why they are prohibited.

B. Brewery

1) Context

As shown on Map LU-2, the Brewery Neighborhood is in northeastern Tumwater. Olympia forms the northern boundary; Interstate 5 and Highway 101 serve as the western boundary; M Street SE is the southern boundary; and Cleveland Avenue SE and the cemetery forms the eastern boundary.



This is the oldest part of Tumwater and includes the site of the original settlement of the town of New Market. The dominant features of this neighborhood are the Deschutes Falls and the site of the former Olympia Brewery.

Main roadways in this neighborhood include Capitol Boulevard, Cleveland Avenue SE, Custer Way SW, North Street SE, and Deschutes Way SW.

DRAFT

Figure LU-9 shows the proportion of current land use in the Brewery Neighborhood.

Figure LU-9. Brewery Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

2) Future Land Use

In the next 20 years, the Brewery Neighborhood will contain more mixed use developments that add character and belonging to our community as the neighborhood brings pieces of the past into a vibrant new beginning.

Zoning will consider the unique and sensitive historic and ecological resources in the neighborhood while recognizing its importance as a major connector within Tumwater and to other adjacent municipalities.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

- Both an important historic resource and a brownfield with significant remediation requirements, the former Brewery properties have been difficult to redevelop and have become an attractive nuisance.
- Tumwater's Main Street and Historic Downtown were bisected when Interstate 5 was constructed.
- Significant congestion exists from limited access onto and off Interstate 5 and Highway 101.
- Steep slopes of the Deschutes River Valley make the neighborhood difficult to access. Landslides in the neighborhood have caused damage to public infrastructure in the past.
- High groundwater makes the neighborhood prone to flooding and

DRAFT

increases the risk of contamination to drinking water.

- Some parts of Deschutes River Valley are identified with high liquefaction hazards.

4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Allow low impact, low intensity uses and development in areas with highly sensitive ecological conditions or unstable soils.
- Continue to protect Tumwater's water wells through updates to the Wellhead Protection Plan.
- Continue to limit development on sloped or unstable soils to ensure safety from landslides and other geological hazards.
- Impose necessary mitigation to ensure proper remediation is done before permitting redevelopment.
- Review and follow guidance in planning documents such as the Shoreline Master Program and Brewery District Plan.

C. Bush Prairie

As shown on Map LU-2, the Bush Prairie Neighborhood, named after George Washington Bush, is in the southeastern area of Tumwater. The eastern, northern, and southern boundaries of the neighborhood are marked by the Deschutes River and adjacent greenbelt and open space. The western boundary is the back of the industrial areas along Old Highway 99.

George Washington Bush was an American pioneer and one of the first multiracial Irish and African American settlers in what would later become the state of Washington. The original Bush Prairie homestead, settled in 1845, is in the southwest corner of the neighborhood and was the location of the historic Bush Butternut Tree until a windstorm caused critical damage to the tree in 2021.

Major roads in this neighborhood include Old Highway 99, Henderson Boulevard SE, 73rd Avenue SE, Tumwater Boulevard SE, and 79th Avenue SE.

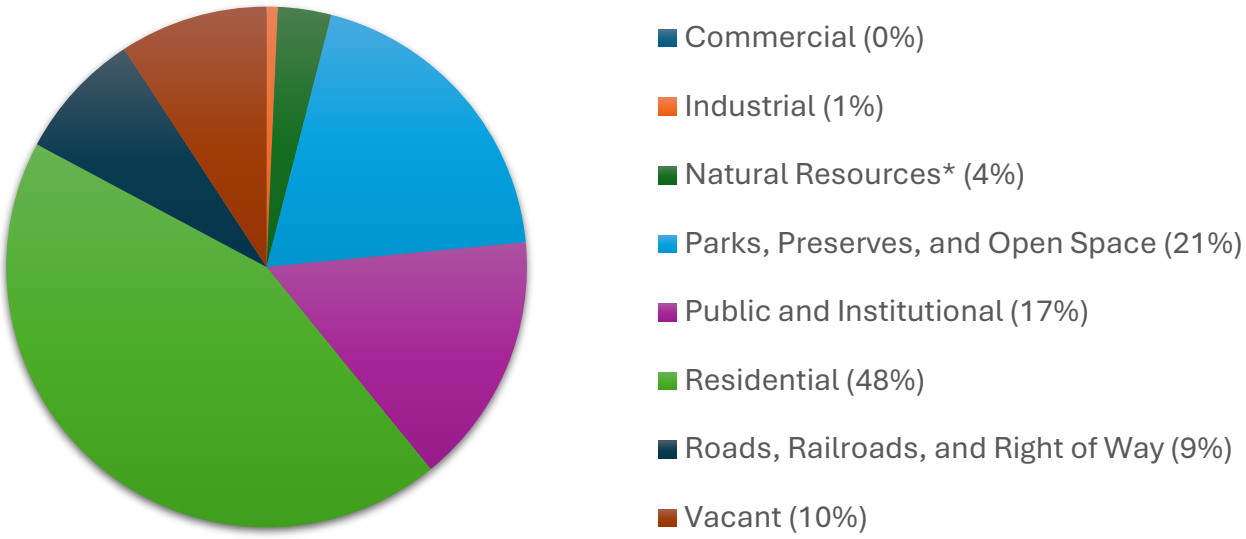


Figure LU-10 shows existing land use in the Bush Prairie Neighborhood. The most prevalent land use is residential.

The neighborhood has several housing developments that were originally built in the unincorporated county and then annexed into Tumwater. For that reason, the development is low density in most areas.

A few parcels in this neighborhood are zoned for manufactured home parks including the Thunderbird Mobile Home Park. This has provided diversity in the housing stock and options for families with different levels of income.

DRAFT

Figure LU-10. Bush Prairie Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

1) Future Land Use

In the next 20 years, this neighborhood will continue to be residential. This is the most appropriate use which is compatible with current and historic uses. Increasing overall density will accommodate more housing. With an established neighborhood, increased density will provide favorable conditions for mixed use and neighborhood commercial development.

2) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

- Transportation connections are challenging since many of the residences were developed to county standards. The local streets have cul-de-sacs and dead ends, forcing many people through one or two entry and exit points.
- The water resources in the neighborhood, which include wetlands, critical aquifer recharge areas, the Deschutes River, Munn Lake, Lake Susan, and Trails End Lake prevent more intense forms of development.
- Airport approach zones limit the size of buildings, lighting, and uses in some areas.
- Historic Bush Homestead and the former home of the Bush Butternut Tree are found in the neighborhood which are considered valuable resources.
- Lack of services in the area forces people to drive more often and further for jobs, daily needs, and recreation.
- The prairie lands are habitat for federally protected species.

DRAFT

3) Recommendations

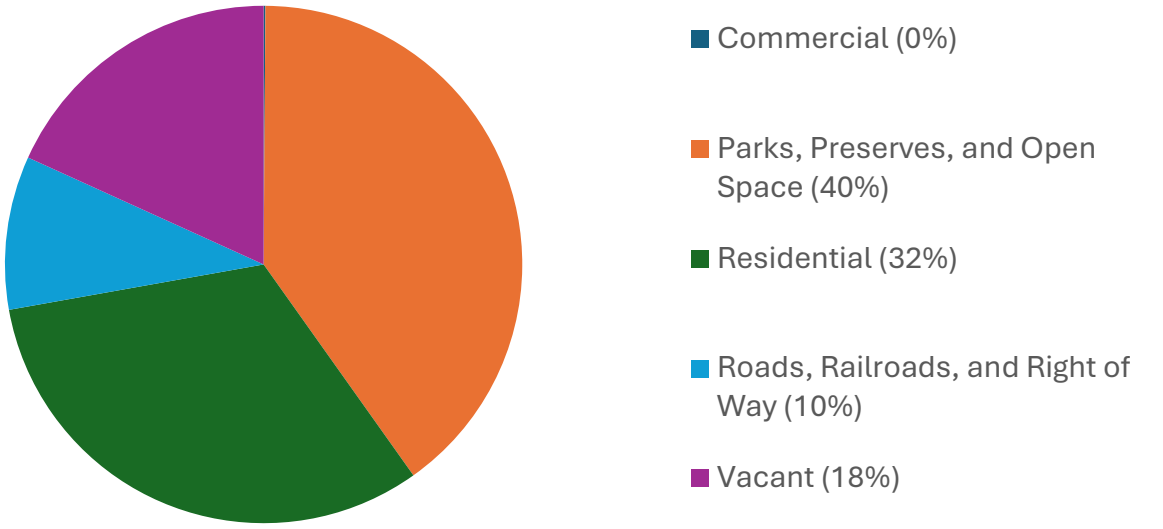
As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Continue to allow different housing types to further diversify the housing stock and allow families more options for housing.
- Encourage mixed use and neighborhood commercial uses in the neighborhood to decrease the number of vehicle miles traveled.
- Where possible, create new transportation connections and slow traffic to allow safe left turns.
- Encourage more office and commercial properties in Tumwater Town Center to decrease the need to commute.
- Complete the Public Works building and park that are planned for 79th Ave and Trails End Road.
- Protect water bodies and wetlands by implementing designated shoreline designations.
- Allow small scale commercial uses within residential developments.
- Provide more opportunities for recreation within the neighborhood to reduce the need to drive.
- Work with Bonneville Power Administration to determine land uses that would provide services to residents and that would be compatible with transmission lines.

D. Deschutes

1) Context

As shown on Map LU-2, the Deschutes Neighborhood is in the northeastern area of Tumwater. Tumwater's city limit with Olympia forms a complicated northern and eastern boundary and the bluffs of the Deschutes River and Tumwater's border with Thurston County form the eastern boundary.



The dominant feature of this neighborhood is the Deschutes River Valley. Recreation and open space, including Pioneer Park and the Tumwater Valley Municipal Golf Course, are the main uses in the valley. The northern and eastern portions of the neighborhood are composed of single-family and duplex residential uses.

Major roads in the neighborhood include Henderson Boulevard SE, Yelm Highway SE, Cleveland Avenue SE, North Street SE, South Street SE, and Hoadly Street SE.

There is an active Union Pacific rail line through this neighborhood traveling north/south from the Burlington Northern Santa Fe Mainline to the Port of Olympia.

DRAFT

Figure LU-11. Deschutes Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-11 shows the proportion of land uses in the Deschutes Neighborhood. Parks, preserves, and open space and residential are the dominant land uses in the neighborhood covering almost three quarters of the land. There is no space designated in this neighborhood for commercial, industrial, natural resources or public and institutional uses.

2) Future Land Use

In the next 20 years the neighborhood will continue to be predominately parks and open space with low density residential where possible. Development will continue to be low intensity since most of this neighborhood is classified as a flood plain.

To reduce vehicle miles traveled and increase services near residential developments, small scale commercial uses may be allowed in optimal nodes and less sensitive areas.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

- Soils are unsuitable for roads, buildings and septic tanks which limits development in the neighborhood.
- Steep hillsides and unstable soils increase the risk of severe settlement and liquefaction.
- Most of the neighborhood is within critical aquifer recharge areas.
- Some areas are within the airport overlay zone of the Olympia Regional Airport which limits size, lighting, and land use.

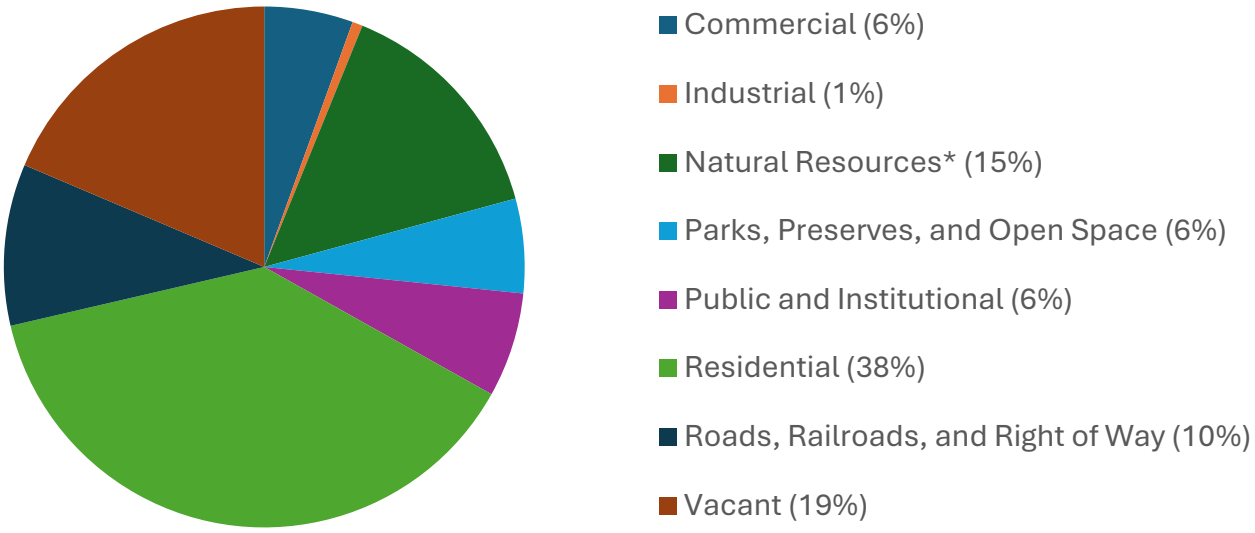
4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be

applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Continuing to limit land uses in hazard areas of the Olympia Regional Airport through an overlay zone managed with Port of Olympia.
- Continuing to implement the Shoreline Master Program for the Deschutes River.
- Protecting rail transportation as a more efficient mode for freight and passengers and reduces vehicle miles travelled.
- Continuing to permit small scale, less intense commercial uses, and limit industrial uses where heavy trucks are required.
- Using vegetative buffers to screen commercial uses from residential uses to reduce impacts of light and noise.

E. Littlerock



1) Context

As shown on Map LU-2, the Littlerock Neighborhood is in the Southwest part of Tumwater. Work to create a village atmosphere is well underway and serves many newer developments under construction in the west part of this neighborhood.

Over the past few years, the neighborhood has been developing quickly in response to the work done to implement recommendations in the Littlerock Subarea Plan, Economic Development Plan and Tumwater Strategic Plan.

Littlerock Road is an important connector not only within Tumwater but also connects to rural areas and acts as a gateway to Tumwater. Other important transportation corridors include 66th Avenue SW, 70th Avenue SW, Trosper Road SW, Israel Road SW, Tumwater Boulevard SW, and Interstate 5.

Figure LU-12. Littlerock Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.

Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-12 reflects the eclectic nature of land use in the neighborhood.

2) Future Land Use

In the next 20 years, the Littlerock neighborhood will be a thriving, walkable place that has the services people need near residential areas. This vision is described in the Littlerock Subarea Plan. This plan provides action steps to create a village atmosphere with residential and commercial uses that is pedestrian friendly and provides access to services for those in the south parts of Tumwater.

Because of favorable conditions for development, the neighborhood is likely to see growth more quickly than other neighborhoods. In fill in lower density developments has been occurring as public investments are constructed.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

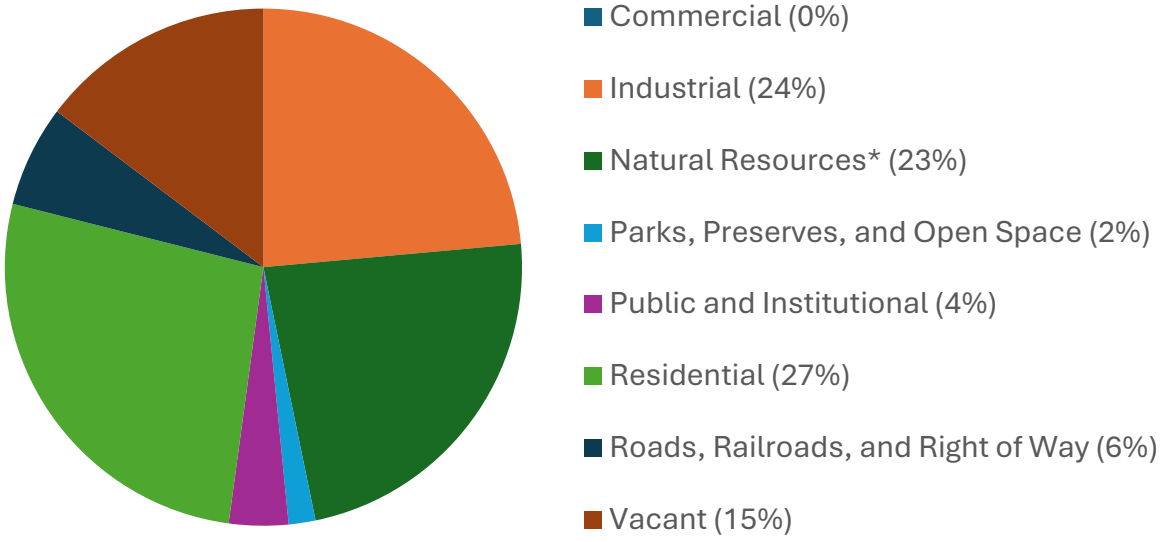
- Several large wetlands and areas of high groundwater flooding make infrastructure improvements difficult and costly.
- The prairie lands are habitat for federally protected species.

4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Reference Salmon Creek Comprehensive Drainage Basin Plan.
- Ensuring that public infrastructure is concurrent with the demand for housing in the neighborhood.
- Ensure ecological functions are retained throughout development.
- Promote and encourage urban agriculture that is compatible with development.

F. Mottman/Black Lake



1) Context

As shown on Map LU-2, the Mottman/Black Lake Neighborhood is in the northwest area of Tumwater. The area is characterized primarily by industrial, residential, and large lot residential, a remnant of rural acreages and farms.

Major roads in this neighborhood include Black Lake/Belmore Road SW, R.W. Johnson Rd SW, and Sapp Road SW. A Burlington Northern Santa Fe line is also a main transportation asset that provides efficient transportation into and out of Tumwater.

DRAFT

Figure LU-13. Mottman/Black Lake Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-13 shows the proportion of current land use in the Mottman/Black Lake Neighborhood. Residential and natural resources take up half of the neighborhood. The natural resource category is a large category in this neighborhood because the Jones Quarry mining operation is classified as a natural resource land use.

Several rights of way and easements run through the Mottman/Black Lake Neighborhood including those owned and managed by Bonneville Power Authority, Puget Sound Energy, and Burlington Northern Santa Fe Railway.

2) Future Land Use

In the next 20 years, the neighborhood will continue to be an important industrial space that provides the necessary materials for local development. The forestry and aggregate mining operations in the neighborhood are protected under state Open Space designations which incentivize retention for sustainable use.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

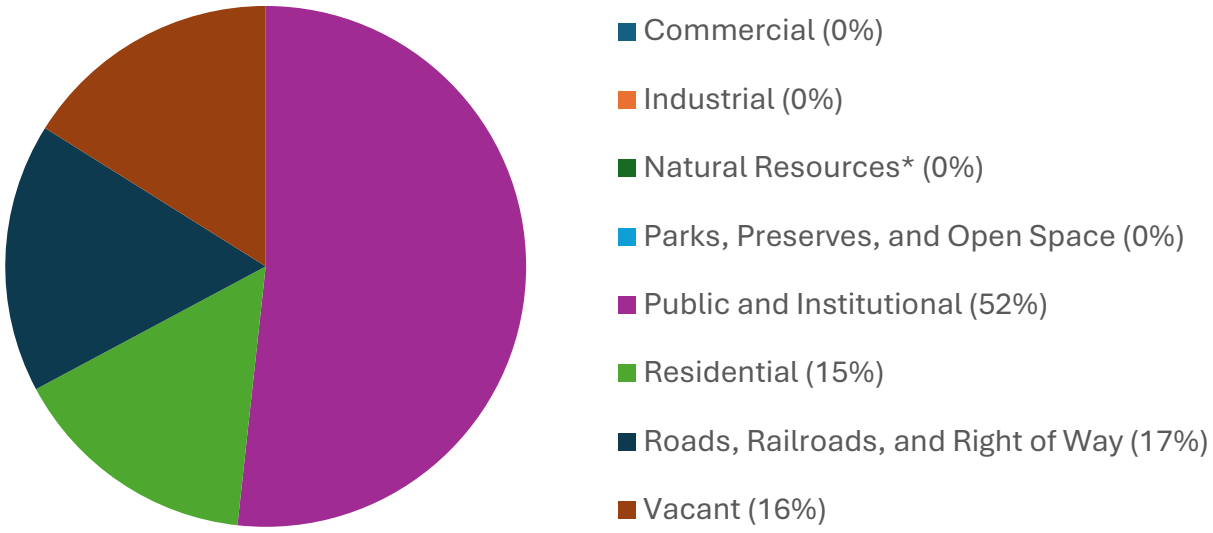
- Industrial uses many impact waters in Puget Sound as Black Lake Drainage flows from the lake to Percival creek and discharges at the sound.
- Many of the properties still utilize septic systems rather than city sewer systems.

4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Facilitate and protect Burlington Northern Santa Fe Railway for freight and potential future passenger use.
- If abandoned, explore the use of the former railroad as a recreational asset.

G. New Market



1) Introduction

As shown on Map LU-2, the New Market Neighborhood is in the south-central area of Tumwater north of Tumwater Boulevard, south of Dennis Street, west of Bonniewood Drive SE, and east of Interstate 5.

Tumwater envisions a future downtown on 190-acres of the New Market Neighborhood bordered by Interstate 5, Tumwater Boulevard SW, Nicholas Street SW, and Israel Road SW. This vision is cast as a true downtown for a city whose urban nucleus was decimated by freeway construction in the late 1950s. The neighborhood is called the Tumwater Town Center, and it represents a component of the New Market Neighborhood.

Tumwater Boulevard SW, Capitol Boulevard, Israel Road SW, and Linderson Way SW are the major transportation connectors in this neighborhood.

Figure LU-14. New Market Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-14 shows the proportion of current land use in the New Market Neighborhood. This neighborhood is characterized by Public and Institutional use. State owned offices, Port of Olympia properties, Tumwater School district facilities, New Market Vocational Skills Center, Tumwater City Hall, and the Tumwater Timberland Library represent public institutional uses.

Residential uses are primarily located along Israel Road. Both multifamily developments and

single-family dwellings exist in the neighborhood.

The area northwest of the intersection of Israel Road and Bonniewood Drive has been designated Light Industrial. Most of the neighborhood is vacant.

The Olympia Regional Airport has played an ever-increasing role in the development, or lack of development, in the neighborhood. The main runway routes aircraft directly over the south end of the neighborhood, either taking off or landing, depending on the wind conditions. As a result, the noise impacts and safety hazards have made the neighborhood less than ideal for residential use. The land use trend has been away from residential use, especially in the areas closest to the runway. The Port of Olympia itself has purchased a large amount of property that was in the clear zone.

2) Future Land Use

In the next 20 years, this neighborhood is expected to become a new downtown core with walkable streets, green belts, mixed use areas, and retail areas.

The vision for the neighborhood includes creation of a downtown and community gathering place, a broad mix of uses, clustered development to create a critical mass for public transportation, and continuing responsiveness to regional goals for growth management and environmental protection. Details for the vision can be found in the Economic Development Plan and Tumwater Town Center Street Design Plan.

With two schools in this zone currently, it is possible that vacant land may be purchased for another school as the community grows. Keeping land available and affordable for public services such as education is something that should be considered.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

- The neighborhood is the source for much of Tumwater's drinking water and consideration must be given to protect wellhead areas.
- Some parts of the neighborhood are in Port of Olympia hazard zones. An overlay limits building size, lighting, and land uses.
- The prairie lands are habitat for federally protected species.

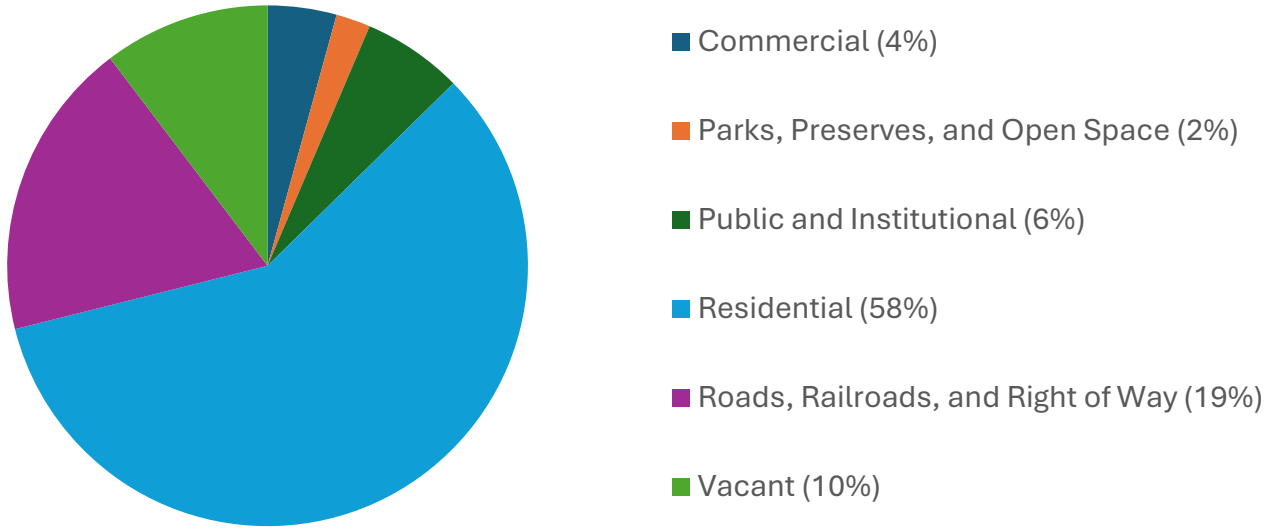
4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Continuing to implement strategies from the Economic Development Plan and Tumwater Town Center Street Design Plan.
- Continue to work with Port of Olympia to ensure safety in airport hazard areas.
- Conditions in the neighborhood favor redevelopment, encouraging infill, and high density residential development.

DRAFT

- Explore solutions for parking.



H. SE Capitol Boulevard

1) Context

As shown on Map LU-2, the SE Capitol Boulevard Neighborhood is located east of Interstate 5, south of M Street SE, and north of the Olympia Regional Airport. The eastern boundary of the neighborhood follows the bluff overlooking the Deschutes River and includes the Thunderbird Village Mobile Home Park.

Major roads that serve this neighborhood include Capitol Boulevard, Israel Road SE, Tumwater Boulevard SE, Trosper Road SE, and Lee Street SE.

Figure LU-15. SE Capitol Boulevard Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-15 illustrates the existing proportion of land uses in the SE Capitol Boulevard Neighborhood. Residential uses are by far the largest use. Most of the residential uses in this neighborhood consist of well-established, single-family homes with only a small proportion of higher density uses, such as apartments more middle housing.

2) Future Land Use

In the next 20 years, the neighborhood is expected to be impacted by Tumwater Town Center as it develops. Adding new professional offices and commercial space will put pressure on these residences to redevelop at higher densities. The Capitol Boulevard Corridor Plan outlines strategies to redevelop the commercial areas on Capitol Boulevard which will also revitalize the neighborhood and make housing here more desirable.

Some areas of this neighborhood are developed at their maximum capacity given environmental constraints and will not experience the same impacts.

3) Challenges

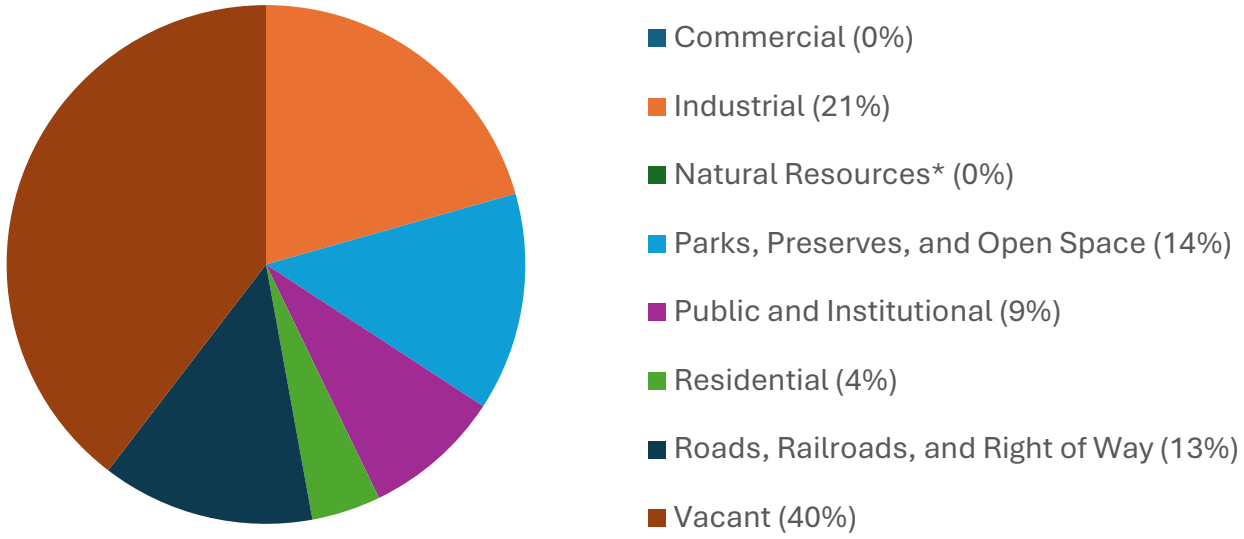
Both landscape and existing development challenges occur in this neighborhood. The primary challenges are listed below:

- This neighborhood exists within an airport hazardous zone for the Olympia Regional Airport .
- The eastern edge of the neighborhood has hillsides and ravines that are difficult to develop.
- High water tables create settling issues which impact roads, buildings, and septic systems.
- Low lying areas are prone to flooding.
- Impacts from the Olympia Regional Airport on neighboring uses include noise and lighting.
- Bluff areas which overlook the river in the Palermo neighborhood are sensitive sloped areas and the Shoreline Master Program has recommendations considering development.
- The prairie lands are habitat for federally protected species.

4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Follow the recommendations in the Shoreline Master Program to protect bluff areas along Deschutes River.
- Continue to implement the Capitol Boulevard Corridor Plan to prepare infrastructure for incoming density increases.
- Create more through roads into residential areas for better emergency access and provide alternate routes and relieve congested thoroughfares.
- Continue to provide protections for manufactured home parks to prevent redevelopment into unaffordable housing types.



I. SW Tumwater

1) Context

As shown on Map LU-2, the SW Tumwater Neighborhood is located near the Interstate 5 and 93rd Avenue interchange or Exit 99. Kimmie Street SW running north and south marks the eastern boundary of the area and Blomberg Street SW marks the western boundary. The northern boundary is the Olympia Regional Airport, and the southern boundary is the city limits.

DRAFT

Figure LU-16. SW Tumwater Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-16 show the majority of property in this neighborhood is vacant with the second largest use being industrial.

2) Future Land Use

The community vision for this neighborhood is light industrial development. Details about the vision and strategies to meet the vision are found in the Economic Development Plan.

With access to freight routes and air transportation and natural buffers from residential uses, the neighborhood is ideal for this purpose. Although residential use is present here, it makes up only four percent and is limited by the Airport overlay zone which protects underlying land uses from hazards related to taking off and landing aircraft.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

- Some areas with poor drainage and aquifer protections will be limited for development into industrial uses.
- The prairie lands are habitat for federally protected species.

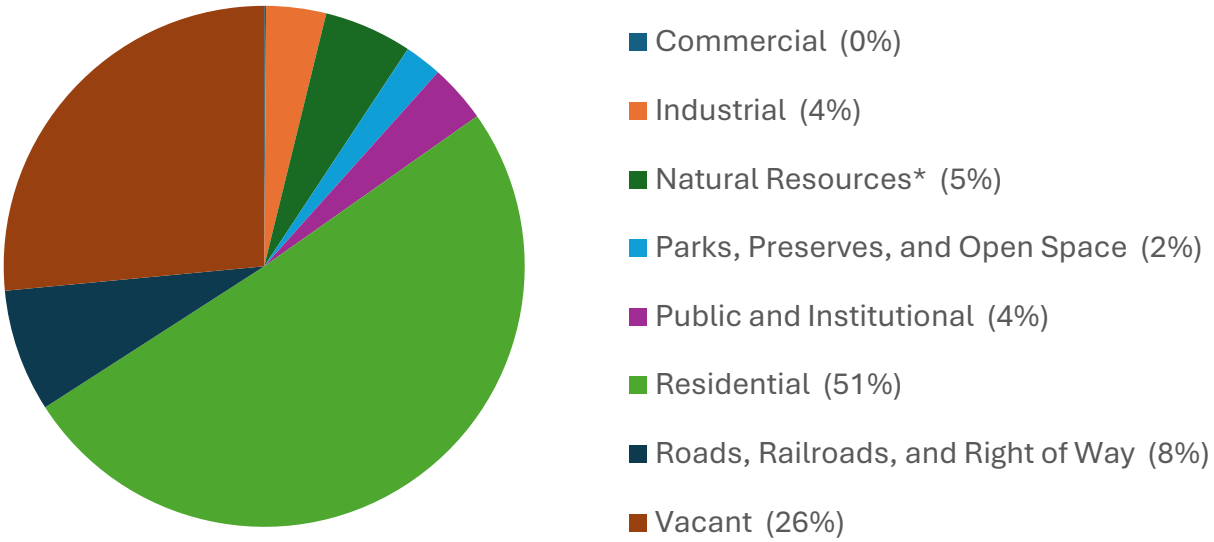
4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Further clarification is needed to define which activities are allowed here with respect to the size and intensity of industrial development.
- Continue implementing light industrial uses with consideration of adjacent incompatible land use.

- Promote the importance of locating all utility lines before site planning to ensure historic lines are not damaged or cause damage to the environment.

Transportation within the area is two primary routes, 93rd Avenue SW running east and west and the Interstate 5 corridor running north and south. Other major north-south corridors include Kimmie Street SW and Blomberg Street SW, which extend to the south from the Olympia Regional Airport area.



J. Trosper

1) Introduction

As shown on Map LU-2, the Trosper Neighborhood is in the center of Tumwater, west of Interstate 5.

Trosper Road SW serves as the major transportation corridor in this neighborhood. Trosper Road SW is an arterial roadway that is used primarily to carry traffic between the Black Lake area and Tumwater. 49th Avenue SW, Trosper Road and 54th Avenue SW are urban collectors that become Trosper Road as it nears the eastern side of the neighborhood. Littlerock Road SW and 2nd Avenue SW function as a minor arterial and serve commercial development adjacent to Interstate 5. Linwood Avenue SW and Lake Park Drive SW are major collector roads in the neighborhood and serve residential uses.

Figure LU-17. Trosper Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-17 shows the current land use in the Trosper Neighborhood. Residential is the dominant use and includes many diverse types of residential uses including single-family homes, mobile home parks, condominiums, and apartments.

2) Future Land Use

In the next 20 years, this neighborhood is expected to develop new residential areas slowly due to environmental constraints. Public infrastructure like stormwater systems and public roads are needed to increase access, however environmental constraints limit opportunities.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

- Wetland, lakes, and other sensitive environments limit development.
- The Beehive Industrial Park is adjacent to sensitive habitats and residences. Stormwater runoff from industrial uses may not have the correct buffer.
- Sensitive environments around Percival Creek impact bodies of water protected by the Shoreline Management Act.
- Further screening may be needed to reduce conflicts between uses.
- Continue to develop in accordance with Thurston County Flood Hazard Mitigation Plan recommendations for limiting development in 100-year flood areas.
- The prairie lands are habitat for federally protected species.

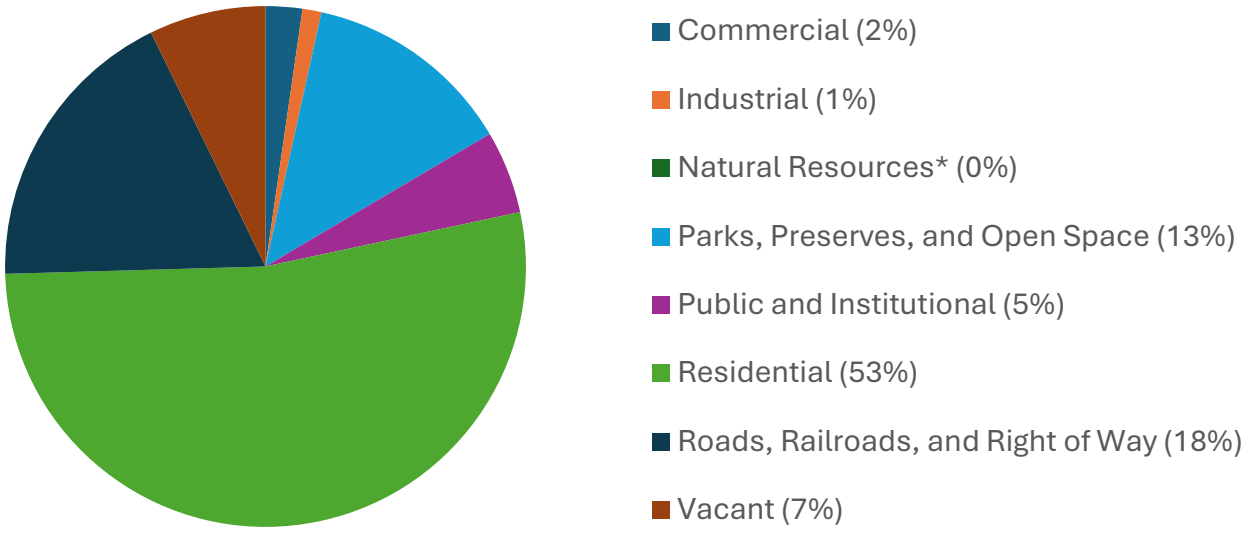
4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Follow guidance in the Transportation Improvement Plan, Parks Recreation and Open Space Plan, Tumwater Stormwater Comprehensive Plan, and the Groundwater Management Plan.
- Improve transportation connections west of the railroad.

K. Tumwater Hill

1) Context



As shown on Map LU-2, the Tumwater Hill Neighborhood is in the northwestern part of Tumwater south of Highway 101, east of R.W. Johnson Boulevard SW, west of Interstate 5 and north of Linwood Avenue SW and Sapp Road SW except for a small area south of Linwood Avenue SW.

It is one of the oldest neighborhoods in Tumwater. Commanding views of Capitol Lake and the Tumwater Valley distinguish the area. The Tumwater Hill Neighborhood received a considerable proportion of new residential development in Tumwater in the 1990s, including several large multifamily developments.

Mottman Road SW, R.W. Johnson Boulevard SW, Sapp Road SW, Linwood Avenue SW, 7th Avenue SW, Barnes Boulevard SW, Crosby Boulevard SW, Ferry Street SW, and Irving Street SW are all major roads that connect the neighborhood.

DRAFT

Figure LU-18. Tumwater Hill Neighborhood Existing Land Use, 2025.

Source: Thurston Regional Planning Council Land Capacity Analysis, 2025.
Notes: Natural Resources Includes agriculture, forestry, and mining.

Figure LU-18 shows the proportion of land uses that exist in the neighborhood currently. Residential uses in this neighborhood consist of a diverse mixture of multifamily, single- family, and duplex uses.

2) Future Land Use

In the next 20 years, this neighborhood is expected to develop new residential areas slowly due to environmental constraints. Public infrastructure like stormwater systems and public roads are needed to increase access, however environmental constraints limit opportunities.

3) Challenges

Both the landscape and the existing development challenges occur in this neighborhood. The primary challenges are listed below:

- Steep slopes and unstable soils have led to historic landslides.
- Exposed bedrock can limit development of buildings and infrastructure.
- Sensitive environments around Percival Creek impact bodies of water protected by the Shoreline Management Act.
- Existing industrial and residential developments are adjacent to one another.

4) Recommendations

As further development occurs in the neighborhood, zoning and regulations will be applied to ensure uses are compatible to protect people, property, and the environment. Recommendations for future land use include:

- Check building heights and landscaping to protect the scenic view at the public overlook park.
- Participate in project review for adjacent development in Olympia to ensure that

Tumwater interests are continually protected.

- Use vegetative buffers to screen adjacent land uses.
- Follow recommendations for parks in the Parks and Open Space Plan.

DRAFT

8. Other Considerations

A. Essential Public Facilities

The Land Use Element and TMC Title 18 Zoning address the identification, siting, and expansion of essential public facilities. The process adopted by the City Council as TMC 18.56.140 was developed by the Thurston Regional Planning Council as a result of a recommendation from County-Wide Planning Policy V implementation, which originated from a requirement in the Growth Management Act.

B. Minimum & Maximum Densities

Minimum densities should be applied to all areas of Tumwater to promote more cost-efficient provision of City services, the provision of affordable housing and the encouragement of transportation modes other than the single occupancy vehicles.

C. Clustering

Cluster development is characterized by small pockets of more intense development, surrounded by open space. Although the development is more compact, gross density does not increase.

The advantages of cluster development are many, including more efficient and less expensive provision of services; reduced transportation costs; the protection of open space and environmentally sensitive areas; and lower land development costs.

The main purpose of clustering would be to protect and preserve environmentally sensitive areas in accordance with the Conservation Element. It should be encouraged wherever it is necessary to protect environmentally sensitive areas in all residential land use designations.

D. Modular & Manufactured Housing

In accordance with state law, manufactured homes should be allowed anywhere where site built single-family homes are allowed.

The intent of the Land Use Element is to provide a sufficient supply of land for traditional mobile or manufactured home parks and to recognize that modular and manufactured housing on single family lots and in manufactured home parks is a viable form of housing construction.

E. Placemaking Strategies

The following provides land use recommendations related to creating spaces within Tumwater neighborhoods. Feedback from the community favored neighborhoods that are walkable and provide a sense of connection.

Since the downtown section of Tumwater was redeveloped to make space for the Interstate 5 corridor and connections, residents report a lack of connection to spaces that in turn leads to a lack of identity.

Housing needs are also better met when considering how development occurs. Present development patterns do not address all the housing needs of the community and are car dependent. Most new residential development that takes place is either small multifamily units or very large expensive single-family houses on large lots. To address the problem, new development should:

- Create a sense of place, of neighborhood, and of community that builds on what is locally unique and enduring to replace the anonymity and urban and suburban sprawl.
- Provide a denser, richer, and more diverse variety of land uses, household types, building types, and socioeconomic groups.
- Provide infrastructure to increase walking, biking, and public transit to reduce dependence on the automobile wherever possible.
- Create compact communities that are built to preserve open space and natural systems and habitats.

F. Design Review

Tumwater is a designed environment. Design will influence the degree to which development is attractive and appealing, comfortable, and safe, compact, efficient, encourages natural and social interaction, provides most needs within short distances, discourages environmentally disruptive influences, and is well connected with other areas. Greater awareness and appreciation of the value of design will continue, and the demand for development that demonstrates design excellence will increase.

The movement to plan comprehensively will create new partnerships to achieve community goals. Public participation and interest in design will continue to increase with greater emphasis on design in City projects. With increasing density in some areas, design will become an important factor in providing stylistic compatibility and privacy.

The Citywide Design Guidelines and the specific subarea design guidelines complement TMC Title 18 Zoning and provide a better tool for ensuring lasting value. Unlike zoning codes that can be prohibitive and exclusionary in their tone and language, Citywide Design Guidelines and the specific subarea design guidelines are illustrative, flexible, and prescriptive and have proved very effective in promoting well designed, mixed-use, new and infill development.

The intent of design review is to use the Citywide Design Guidelines and the specific subarea design guidelines to ensure lasting value through:

1. Infill and strengthening existing neighborhoods;
2. Livable neighborhoods;
3. Affordable housing;

4. Diversity in housing types and styles; and
5. Streetscape design as well as building and site design.

The Citywide Design Guidelines and the specific subarea design guidelines establish a context for development and encourage resolution of technical planning and urban design issues such as pedestrian and traffic circulation, stormwater runoff, landscaping and buffering, and building location and design.

Functions of design review through the Citywide Design Guidelines and the specific subarea design guidelines include:

1. Establishing a community design context;
2. Creating community planning and urban design policy;
3. Assuring conformance to City plans and policies; and
4. Expediting project approval.

The design review process includes aspects such as:

1. The appearance or image of a community
2. Street layout and design
3. Incorporating transit
4. Natural and scenic resources
5. Streetscape
    a. Street character and liveliness
    b. Pedestrian environment
    c. Landscape design
    d. Residence and street transition
6. Site Planning
    a. Neighborhood character
    b. Adjacent properties
    c. Siting
    d. Natural elements
    e. Transit facilitation
7. Building Design
    a. Architectural character
    b. Character and massing
    c. Architectural elements
    d. Exterior finish materials
    e. Parking garages
    f. Mixed-use buildings
    g. Conversions and additions
    h. Special needs housing

Design review is necessary to ensure that new development is compatible with existing neighborhoods; to provide guidelines for innovative land use management techniques; and to provide guidelines for special areas of Tumwater.

The Citywide Design Guidelines and the specific subarea design guidelines were developed as a follow-on implementing ordinance for the remaining areas of Tumwater after consultation with affected groups including community members, builders, and City staff and developed through a process involving substantial public participation.

The goals and purpose of the Citywide Design Guidelines and the specific subarea design guidelines are to:

- Encourage development that considers visual impacts to the community;
- Encourage developments that will contribute to the stability and integrity of a safe and attractive neighborhood;
- Recognize that aesthetic considerations and environmental review contribute toward an enhanced environment; and
- Recognize that aesthetic considerations are appropriate to protect property values of adjacent properties and to ensure that developments contribute to desirable neighborhood character.

MEMORANDUM

TO: Brad Medrud, Deputy Community Development Director
City of Tumwater Community Development

FROM: Michael Ambrogi, Senior Planner
Thurston Regional Planning Council

DATE: February 26, 2025

SUBJECT: Tumwater Land Use Alternatives Analysis

OVERVIEW

The City of Tumwater is examining three different land use alternatives to meet its responsibilities to plan for how to accommodate new housing types and targets by affordability and determine the level of public services and facilities required to serve the increased population of the City by 2045. Three land use alternatives are identified:

Alternative #1: No change to existing land use designations and related zoning requirements.

Alternative #2: Moderate increase land use designation capacity and range of housing types.

Alternative #3: Substantial increase in land use designation capacity and range of housing types.

The City requested TRPC conduct an analysis of the three alternatives' impacts on land developable for residential uses, land developable for commercial or industrial uses, and capacity for future dwelling units.

BACKGROUND

Thurston Regional Planning Council (TRPC) maintains a land capacity model for Thurston County. This database was used to develop TRPC's population and employment forecast (2018 update) and the 2021 Buildable Lands Report for Thurston County. The model includes multiple metrics, including acres of developable land and "residential capacity," the theoretical maximum number of dwellings that could be built on a parcel. In general, the actual number of dwellings constructed over a 20-year time period will be less than the capacity as not all property owners will choose to develop their land, even if they could do so, or because there is less demand for new housing in some areas.

The inputs to the land capacity model include:

- **Existing land use and development.** Some land uses — like churches or parks — are unlikely to further develop in the future even if there is developable land on a parcel.
- **Vested subdivision plans.** Projects that have recently been approved will develop as permitted, even if zoning or development regulations are later changed.
- **Zoning.** Zoning informs the type of future development — whether residential, commercial/industrial, or a mix of both — and the density of future residential development.
- **Average development densities.** In zones that allow a range of uses and housing densities, historical trends inform what is likely in the future.
- **Critical areas and environmental constraints.** Wetlands, steep slopes, and other constraints limit the amount of future development.
- **Ownership.** For Port, tribal, and many government-owned properties, capacity is determined on a case-by-case basis in consultation with staff.

Documentation for the land capacity model is available at https://www.trpc.org/236 (See "Population and Employment Land Supply Assumptions").

The City of Tumwater requested an analysis showing the effects of three different land use alternatives. The alternatives are being considered as part of the City's periodic Comprehensive Plan update, due by December 31, 2025.

ASSUMPTIONS

The model used for the land use alternatives analysis is consistent with those used in the *2021 Buildable Lands Report for Thurston County*[1]. The buildable lands model assumptions and the baseline outputs were reviewed by an advisory committee consisting of jurisdiction staff, members of the real estate and development community, and citizen representatives.

For the city of Tumwater's land use alternatives analysis, the following changes were made to the model:

- Existing land use was updated to account for development completed, approved, or under review as of February 24, 2025.
- The land use alternative uses zoning as of February 2025
- Changes were made to mixed use development assumptions and residential density assumptions. While the Buildable Lands model uses average residential densities observed over the past ten to 20 years ("achieved densities"), the land use alternatives generally uses the highest allowed density.
- Parcels in the City's unincorporated urban growth area use the zoning assumptions of the equivalent incorporated city zone.

Table 1 shows the mixed use and residential density assumptions used in the analysis.

[1] http://www.trpc.org/164

Table 1: Mixed Use and Residential Density Assumptions for Land Use Alternatives

Zone	Zone Name	Percent Residential	Alt. #1 Units/Acre	Alt. #2 Units/Acre	Alt. #3 Units/Acre
ARI	Airport Related Industry	0%	0	0	0
BD	Brewery District: Bates North	25%	20	20	20
BD	Brewery District: Bates South	25%	8	8	8
BD	Brewery District: Bluff	25%	10	10	10
BD	Brewery District: Deschutes	25%	20	20	20
BD	Brewery District: Knoll	25%	30	30	30
BD	Brewery District: Triangle	25%	20	20	20
BD	Brewery District: Valley	0%	0	0	0
CBC	Capitol Boulevard Community	50%	30	30	30
CS	Community Services	0%	0	0	0
GC	General Commercial	30%	40	40	40
GB	Greenbelt	0%	0	0	0
HI	Heavy Industrial	0%	0	0	0
HC	Historic Commercial	0%	0	10	10
LI	Light Industrial	0%	0	0	0
MHP	Manufactured Home Park	100%	9	9	9
MU	Mixed Use	30%	14	14	20
MFH	Multifamily High Density Residential	100%	29	30	30
MFM	Multifamily Medium Density Residential	100%	15	15	19
NC	Neighborhood Commercial	20%	8	8	9
OS	Open Space	0%	0	0	0
R/SR	Residential/Sensitive Resource	100%	4	4	4
SFL	Single-Family Low Density Residential	100%	7	9	9
SFM	Single-Family Medium Density Residential	100%	9	9	9
TC	Town Center: Civic	0%	0	0	0
TC	Town Center: Mixed Use	5%	30	30	30
TC	Town Center: Multifamily Residential	80%	20	20	20
TC	Town Center: Professional Office	0%	0	0	0

Note: “Percent Residential” refers to the estimated share of land that will develop for residential uses in mixed-use zones. “Unit/Acre” is assumption for net dwelling units per acre on developable residential land.

In some cases, a parcel’s ownership or current land use may override these assumptions. For example, on parcels where the current use is a school or church, the model assumes that the parcel is already fully developed, with no additional developable residential land in the future, even if the underlying zoning is residential.

Land Capacity Model Limitations

TRPC's land capacity model does not address bulk and dimensional standards such as lot sizes, building setbacks, or building heights that might limit future capacity. These were not included in the analysis.

For the purposes of this analysis, residential capacity does not take into account reductions due to non-residential uses in residential zones (such as schools, parks, and churches), or capacity for accessory dwelling units. These types of capacity are included in the *2021 Buildable Lands Report*.

TRPC's land capacity model uses general assumptions intended for regionwide analyses. How many dwelling units can be built or how many acres can be developed for a particular parcel is determined by jurisdiction planning or building department staff as part of the development review process. Their determinations may vary from this analysis.

ANALYSIS

The land use alternatives analysis estimates that 2,560 acres of land in Tumwater are developable under current conditions (Alternative #1), of which about 70% is likely to develop for residential uses. Total developable land would increase by less than ten acres in Alternatives #2 and #3.

Tumwater currently has capacity for an estimated 12,138 additional dwelling units on vacant or infill properties, plus 770 dwelling units on redevelopable properties. Capacity on vacant or infill lots would increase by 1,224 units in Alternative #2 and 1,685 units in Alternative #3. Alternative #3 would also increase the estimated capacity on redevelopable lots by 12 units.

Tables 2 and 3 provide a summary of land use alternative analysis. Estimates for each zone are in Tables 4 to 7.

Table 2: Developable Land by Land Use Alternative, Tumwater City and UGA

Type of Development (Acres)	Alternative #1	Alternative #2	Alternative #3
Residential	1,806.7	1,811.4	1,812.0
Commercial/Industrial	754.0	754.0	754.3
Total	**2,560.7**	**2,565.3**	**2,566.3**

Bush Prairie Habitat Conservation Plan.

The City of Tumwater and the Port of Olympia are working on a habitat conservation plan (HCP) to mitigate the impacts of development on four species protected or likely to be listed under the Endangered Species Act. The latest draft of the Bush Prairie HCP identifies significant mitigation within Tumwater's city limits. Therefore, the land use alternatives analysis reduced capacity in the zones where mitigation is most likely to occur by the acreage shown in Table 8. The estimated acres removed for mitigation were provided by Tumwater staff.

The analysis showed that mitigation will likely reduce land developable for residential use by 156 acres and land developable for commercial/industrial uses by 33 acres (Tables 9 and 10) across all three alternatives. Mitigation would likely reduce the capacity for future dwelling units by 852 units in Alternative #1, 973 units in Alternative #2, and 1,028 units in Alternative #3. The analysis assumed that mitigation would not occur on redevelopable parcels.

Table 8: Capacity Reductions for Future HCP Mitigation

Zone	Zone Name	Acres Removed for Mitigation
MFH	Multifamily High Density Residential	5
MFM	Multifamily Medium Density Residential	30
MU	Mixed Use	30
SFL	Single-Family Low Density Residential	190
SFM	Single-Family Medium Density Residential	40
—	**Total**	**295**

Note: Acres removed for mitigation provided by Tumwater staff. Reduction only applied to capacity on vacant parcels.

DRAFT

1. Introduction

A. Background

The Lands for Public Purposes Element is part of Tumwater's Comprehensive Plan and was prepared in response to the state Growth Management Act (Chapter 36.70A RCW) requirements to identify lands and services necessary to support future development.

Tumwater's Vision, Mission, and Belief Statements that provide overarching direction for the future of Tumwater are found in the Comprehensive Plan Summary.

The Lands for Public Purposes Element aligns and is consistent with the other elements of the Comprehensive Plan.

Part 1 – Goals Policies, and Implementation Actions establishes Tumwater's goals and policies to set forth a direction to support the provision of public services for development in Tumwater.

The goals and policies of the Lands for Public Purposes Element are guided by the state Growth Management Act and the Thurston County County-Wide Planning Policies and the vision of a Tumwater. The Element's goals and policies are coordinated with the other Elements and regional plans.

The Lands for Public Purposes Element's goals and policies are the policy basis for the draft implementation actions in the Element and those future actions that will be developed over the next 20 years which will be the foundation for Tumwater's annual work programs to address public services and facilities for development.

Part 2 – Technical Information provides the technical analysis of the lands public purposes and capital facilities in the Tumwater and provides the basis for the goals, policies, and draft implementation actions in Part 1. Part 2 reviews the funding structure for capital facilities and discusses the status and level of service needs for both Tumwater and other public agencies which provide capital facilities and services to support the 20-year growth projections for Tumwater.

B. How to Read this Part of the Element

In Part 1, Chapters 2 and 3 discuss the Lands for Public Purposes Element's connection to the capital facilities goals of the state Growth Management Act and the Thurston County County-Wide Planning Policies.

Chapter 4 presents each goal with introductory text, and an explanation of the lead and timeline for each policy.

Appendix A contains the draft implementation actions, which are intended to be a source of annual work program items that serve to implement the goals and policies of the Lands for Public Purposes Element.

The annual work programs will further refine the implementation actions prior to their being put into practice. It is expected that implementation actions will be further amended, added, or subtracted as needed over the course of the 20 year Comprehensive Plan as new opportunities arise to meet the intent of the Lands for Public Purposes Element's goals and policies.

2. Growth Management Act – Element Goals

Chapter 36.70A RCW requires that Tumwater demonstrate that each Element in the Comprehensive Plan meets the relevant fifteen planning goals contained within the Act. The fifteen goals guide the development and adoption of Tumwater's Comprehensive Plan and development regulations.

The following is a summary of how the updated Lands for Public Purposes Element addresses the two goals related to growth.

8. ***Urban Growth***. *Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.*

   The Lands for Public Purposes Element ensures that services provided by the public sector, such as water, sewer, stormwater, fire, and police protection, are consistent with the Tumwater's Comprehensive Plan and can support the community's growth and development as anticipated over the twenty-year planning period the identification of specific sites and phasing of facilities where appropriate occurs every two years during the six-year Capital Facilities Plan update process.

10. ***Public Facilities and Services***. *Ensure that those public facilities and services necessary to support development shall be adequate.*

The Lands for Public Purposes Element, as required by the Growth Management Act, provides an inventory of the general location of all existing and proposed capital facilities and a description of the current capacity and the expected future capacity of each capital facility in Part 2 – Technical Information.

DRAFT

3. County-Wide Planning Policies

The Growth Management Act requires that comprehensive plans be consistent with the Thurston County County-Wide Planning Policies, which were last amended in 2025.

The following is a list of relevant policies that apply to the Lands for Public Purposes Element of the Comprehensive Plan. All County-Wide Planning Policies are adopted as Appendix B: *Thurston County County-Wide Planning Policies* as part of the Comprehensive Plan.

II. Urban Growth Areas

An overview of existing and proposed capital facilities is found in Part 2: Technical Information of the Lands for Public Purposes Element to assist with the assessment of public services in the urban growth area.

III. Promotion of Contiguous and Orderly Development, Provision of Urban Services, and Protection of Rural Areas

Part 2 – Technical Information of the Lands for Public Purposes Element explains the process for siting and expanding essential public facilities to best support the creation of dense, urban development in appropriate areas while protecting rural areas and the resources they provide. Part 2 – Technical Information also provides the basis for siting and the future need for the expansion of some of the public services Tumwater and other public agencies provides.

IX. Transportation

While the Transportation Plan is the primary inventory of the transportation system, and references to more in depth plans, and some long-term goals for improving multi-modal transit options, Part 2 – Technical Information provides additional detail.

X. Environmental Quality

Water conservation, wellhead protection, and low impact development standards are discussed within the Lands for Public Purposes Element as a means of protecting water quality and how Tumwater might begin to increase reuse and recycling through the Pathways to Zero Waste, a blend of innovative policies to reduce waste production and accumulation.

DRAFT

4. Element Goals and Policies

A. How to Read These Tables

The Lands for Public Purposes Element's goals and policies are not in priority order.

Appendix A provides a list of the draft implementation actions by goal and policy that will be considered when developing annual work programs for implementing the Lands for Public Purposes Element's goals and policies.

1) Department Leads

Implementation of the Lands for Public Purposes Element's policies are associated with six different Tumwater departments:

CDD Community Development

PRD Parks, Recreation, and Facilities

TED Transportation & Engineering

TFD Fire

TPD Police

WRS Water Resources & Sustainability

2) Period

Each of the Lands for Public Purposes Element's policies is associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

B. Growth Management Goals

Goal LPP-1 Provide necessary and efficient services to Tumwater and its Urban Growth Area.

Goal LPP-1 is intended to ensure that Tumwater meets the Washington State Growth Management Act requirements for providing capital facilities required by growth at the time development occurs.

1) Why is this Goal Important?

Between 2020 and 2045, the population of Tumwater and its urban growth area is projected to increase by 21,969 people and 10,736 new jobs are expected to be added.

As new developments in Tumwater occur to meet this population and employment growth, services provided by Tumwater and other public service providers will need to keep pace.

In conjunction with the six-year Capital Facilities Plan, the purpose of the Lands for Public Purposes Element is to use sound fiscal policies to provide adequate public facilities that are consistent with Tumwater's Land Use, Climate, Housing, and Utilities Elements and Economic Development, Parks, Recreation, and Open Space, and Transportation Plans as well as

DRAFT

concurrent with, or prior to, the impacts of development to achieve and maintain adopted standards for levels of service during the twenty-year time frame of the Comprehensive Plan.

	Policies	Lead	Period
LPP-1.1	**Ensure that there is an adequate provision and equitable distribution of capital facilities and associated public services to address public health, safety, and quality of life in Tumwater.**	CDD PRD TED TFD TPD WRS	Term of the Plan
LPP-1.2	**Make capital facilities investments that address disparities and implement Tumwater's strategy for accommodating new development.**	CDD PRD TED WRS	Term of the Plan
LPP-1.3	**Update Tumwater's six-year Capital Facility Plan on a biannual basis to ensure that capital facility projects are scheduled, and funding is identified.**	CDD PRD TED WRS	Term of the Plan
LPP-1.4	**Ensure concurrency with Tumwater, Thurston County, and regional plans to provide the most efficient array of services.**	CDD PRD TED WRS	Term of the Plan
LPP-1.5	**Coordinate with Thurston Regional Planning Council, Thurston County, and other public service providers to identify areas of shared need for facilities.**	CDD PRD TED WRS	Term of the Plan
LPP-1.6	**Direct the timing and location of development with the provision of adequate facilities and services within Tumwater's urban growth area, through periodic updates to the Tumwater and Thurston County Joint Plan and associated regulations.**	CDD PRD TED WRS	Term of the Plan

Goal LPP-2 Support improvements in the provision of public services.

Goal LPP-2 is intended to ensure coordination between Tumwater, its departments, and other public agencies providing capital facilities that support the growth projections of this Plan and to look for ways to improve how those services are provided.

1) Why is this Goal Important?

As the demand in Tumwater for more and varied community facilities and services increases with new development, the provision of the services

that support those capital facilities will need to improve over time as well.

Policies		Lead	Period
LPP-2.1	Work with regional partners to expand and improve Tumwater's multimodal transit network in conjunction with the Transportation and the Parks, Recreation, and Open Space Plans.	CDD PRD TED	Term of the Plan
LPP-2.2	Incorporate environmental quality in capital improvement programs, implementation programs, and public facility designs to ensure that local land use management and public service provision protects and enhances natural resources.	CDD PRD TED WRS	Term of the Plan
LPP-2.3	Work cooperatively with school districts to plan for school facilities to meet existing and future community needs consistent with adopted Comprehensive Plan policies and growth forecasts, including siting and designing schools to support walkable access and to best serve their communities.	CDD	Term of the Plan
LPP-2.4	Support process and technological advancements to improve Tumwater services.	CDD PRD TED WRS	Term of the Plan
LPP-2.5	Ensure that appropriate funding sources are available to acquire or bond for the provision of needed public services and facilities and explore new funding sources to meet service and facility needs.	CDD PRD TED WRS	Term of the Plan
LPP-2.6	Establish, maintain, and strengthen community relationships through direct contact opportunities, outreach, community awareness, education, and volunteer programs.	CDD PRD TED TFD TPD WRS	Term of the Plan

Appendix A Draft Implementation Actions

Each of the Lands for Public Purposes Element goals and policies in Chapter 4 will require Tumwater to take specific actions to implement over the course of the 20 year term of the Comprehensive Plan.

The draft implementation actions in the tables below were developed in coordination with the stakeholders, the community, and Tumwater staff. The draft implementation actions in the tables below are intended to serve as the building blocks for developing the annual Tumwater work programs that will implement the goals and policies of the Lands for Public Purposes Element.

The draft implementation actions will need further refinement before they are incorporated into annual Tumwater work programs.

As the Comprehensive Plan is put into action over the next twenty years, the draft implementation actions will change as new, unforeseen opportunities emerge: new ones may be added, proposed ones may be modified or replaced by other actions.

1. How to Read These Tables

The Lands for Public Purposes Element goals, policies, and the draft implementation actions associated with them are not in priority order.

Draft implementation actions that can only be undertaken by other entities are not included in this plan.

a) Department Leads

Implementation of the Lands for Public Purposes Element's policies and implementation actions are associated with six different Tumwater departments:

CDD Community Development

PRD Parks, Recreation, and Facilities

TED Transportation & Engineering

TFD Fire

TPD Police

WRS Water Resources & Sustainability

b) Period

Each of the Lands for Public Purposes Element's policies and the draft implementation actions are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

DRAFT

Goal LPP-1 Provide necessary and efficient services to Tumwater and its Urban Growth Area.

Policies and Implementation Actions		Lead	Period

1. Introduction

A. Purpose

As population grows and community expectations change, existing facilities can become obsolete and the demand for more and varied community facilities and services provided by Tumwater increases.

In conjunction with the six-year Capital Facilities Plan, the Lands for Public Purposes Element is intended to use sound fiscal policies to provide adequate public facilities that are consistent with the other Elements as well as concurrent with or prior to the impacts of development to achieve and maintain adopted levels of service standards during the 20-year time frame of Tumwater's Comprehensive Plan.

The Lands for Public Purposes Element identifies issues and policies needed to support forecasted population and employment growth of Tumwater over the next 20 years and ensures that the provision of essential public facilities is coordinated with the overall Comprehensive Plan and with delivery of essential public facilities region-wide.

Lands for Public Purposes include buildings, equipment, and governmental services provided public agencies for the community. It addresses those facilities and lands that are owned, operated, or franchised by Tumwater or another general or special purpose local government. The Element addresses lands for public purposes in both Tumwater and its urban growth area.

Because capital facilities are significant projects for Tumwater and other agencies to fund, build, and maintain, the earlier Tumwater can plan for its needs the better it can meet its needs.

Capital Facilities

State requirements (WAC 365-196-415) that the Comprehensive Plan must meet:

- Address capital facilities owned or managed by Tumwater, such as buildings; parks, open space, and recreation facilities; police, fire, and emergency medical services; and stormwater, transportation, and water systems and facilities.
- Address capital facilities owned or managed by other public agencies, such as library, school, sanitary sewer and sewage treatment, solid waste, and transit systems and facilities.
- Identify new and expanded capital facilities necessary for growth over the twenty-year life of the Comprehensive Plan.
- Include an inventory, forecast of future needs based on the Land Use Element, locations, and capacities of expanded or new facilities.
- Include a six-year plan that will finance such capital facilities within projected funding capacities and clearly identify sources of public money for such purposes.
- Reassess the Land Use Element if probable funding falls short of meeting existing needs.

B. How to Read this Part of the Element

Part 2 of the Lands for Public Purposes Element consists of the following chapters.

- **Chapter 1 – Introduction:** Discusses the State requirements for the Element, definitions used in the document, sources of information, levels of services, growth and land use projections, Tumwater's urban growth area, and equity principles in capital facility planning.
- **Chapter 2 – Capital Facilities Review Analysis**: Provides a summary of Tumwater's funding for current and future public services and facilities for development.
- **Chapter 3 – Tumwater Managed Capital Facilities and Services**: Provides an overview of all the Tumwater managed capital facilities and services a summary of critical areas in Tumwater.
- **Chapter 4 – Other Publicly Managed Capital Facilities and Services**: Provides an overview of all the capital facilities and services managed by other public agencies that serve development in Tumwater.
- **Appendix A – Foundational Documents**: Provides a list of the documents used to create the Lands for Public Purposes Element's Technical Summary.
- **Appendix B – New Capital Facilities Equity Checklist:** Contains the New Capital Facilities Equity Checklist to be used in preparation of Tumwater's six-year Capital Facilities Plans

C. Growth Management Act Requirements

The Washington State Growth Management Act requires that the Lands for Public Purposes Element and its associated six-year Capital Facilities Plan include:

a. An inventory of existing capital facilities owned by public entities, including green infrastructure, showing the locations and capacities of the capital facilities;

b. A forecast of the future needs for such capital facilities;

c. The proposed locations and capacities of expanded or new capital facilities;

d. A six-year plan that will finance such capital facilities within projected funding capacities and clearly identify sources of public money for such purposes; and

e. A requirement to reassess the Land Use Element if probable funding falls short of meeting existing needs and to ensure that the Land Use Element, Lands for Public Purposes Element, and financing plan within the Lands for Public Purposes Element are coordinated and consistent. [RCW 36.70A.070(3)]

In addition, in 2023 the state amended the requirements for capital facilities in the Growth Management Act to require that Tumwater do the following:

DRAFT

"…identify all public entities that own capital facilities and endeavor in good faith to work with other public entities, such as special purpose districts, to gather and include within its capital facilities element the information required by this subsection. If, after a good faith effort, the county or city is unable to gather the information required by this subsection from the other public entities, the failure to include such information in its capital facilities element cannot be grounds for a finding of noncompliance or invalidity under chapter 228, Laws of 2023. A good faith effort must, at a minimum, include consulting the public entity's capital facility or system plans and emailing and calling the staff of the public entity."

Recent Growth Management Hearings Board cases have placed greater importance on the preparation and implementation of the Lands for Public Purposes Element. The key points include:

- The Element should address the 20-year planning period and be consistent with growth allocations assumed in the Land Use Element.
- The Element should demonstrate the ability to serve Tumwater and its urban growth area.
- The funding sources in the six-year Capital Facilities Plan should be specific and committed. Tumwater should provide anticipated funding sources for the 20-year period though it can be less detailed than for the six-year period.
- Growth, levels of service standards, and a funded capital improvement program must be in balance. In cases where the levels of service standards cannot be met by a service or facility, Tumwater could do one of the following:
    1) Add proposed facilities within funding resources;
    2) Reduce demand through demand management strategies;
    3) Lower levels of service standards;
    4) Phase growth, or
    5) Amend the Land Use Element.

D. Definition of Capital Facilities

Capital facilities have a long useful life and include Tumwater and other publicly operated infrastructure, buildings, and equipment. The planning for lands for public purposes does not cover regular operation and maintenance, but it does include major repair, rehabilitation, or reconstruction of capital facilities.

The Lands for Public Purposes Element and its associated six-year Capital Facilities Plan addresses infrastructure, such as streets, roads, traffic signals, sewer, stormwater, and water systems, parks, and public facilities through which services are provided, such as fire protection facilities and major equipment, law enforcement facilities, or schools.

According to WAC 365-196-415, at a minimum, the capital facilities required to be included in the Lands for Public Purposes Element inventory and analysis are water, sewer, and stormwater systems, schools, parks and recreation facilities,

and police and fire facilities. The Element also includes City buildings, transportation facilities, and library, solid waste management, and transit services.

E. Levels of Service

Levels of service are established in the Lands for Public Purposes Element and represent quantifiable measures of capacity. They are the minimum standards established by Tumwater to provide capital facilities and services to the community at a certain level of quality and within the financial capacity of Tumwater or other public providers.

Levels of service standards are influenced by the local community, elected and appointed officials, national standards, mandates, and other considerations, such as available funding.

Examples of levels of service measures include the amount of intersection delay, acres of parks or miles of trails per 1,000 population, gallons of water per capita per day, and so forth. Those facilities and services necessary to support growth should have levels of service standards and facilities.

F. Sources and Assumptions

The Lands for Public Purposes Element is based on the following sources of information and assumptions:

- **Capital Facility Functional or System Plans.** Capital facility functional or system plans of Tumwater or other service providers were reviewed for inventories, levels of service, planned facilities, growth forecasts, and potential funding.
- **Growth Forecasts.** Population and job growth forecasts were allocated to Tumwater through the Countywide Planning Policies for Thurston County. The 2024 population as well as population growth for each facility provider is estimated.
- **Revenue Forecasts.** Revenues were forecasted to 2045 using the current budgeted revenues and historical information. The sources of revenue are taken from Tumwater's current budget document and prior six-year Capital Facilities Plans.

G. Foundational Documents

The Lands for Public Purposes Element incorporates by reference the following system plans. These documents are summarized where appropriate in the Element. For full context, please see the following plans:

- Comprehensive Stormwater Management Plan (2018)
- Parks, Recreation, and Open Space Plan (2008 and 2016)
- Police Strategic Growth Plan (2025-2029)
- Sanitary Sewer Comprehensive Plan (2015)

DRAFT

- Strategic Plan, City of Tumwater Fire Department (2024)
- Thurston County Solid Waste Management Plan 2021-2026, Thurston County (2021)
- Transportation Plan (2025)
- Water System Plan (2021)

A complete list of all plans that form the basis for the Lands for Public Purposes Element is found in Appendix A: *Foundational Documents*.

H. Growth and Land Use

The planning area for the Lands for Public Purposes Element is Tumwater and its urban growth area. Capital facilities are proposed to serve growth in Tumwater and its urban growth area.

1) Growth Targets and Projections

To determine needs and system capacities for lands used for public purposes over the 20-year planning period, it is necessary to project the future population of Tumwater and its urban growth area.

In conjunction with Thurston County and Lacey, Olympia, Tenino, and Yelm, Tumwater contracted with the Thurston Regional Planning Council to complete a countywide housing need allocation and a land capacity analysis in April 2025.[1] The Thurston Regional Planning Council completed a countywide employment forecast in November 2019.[2]

Tables LPP-1 and LPP-2 shows the growth targets for Tumwater and its urban growth area based on Tumwater's housing need allocation and employment forecast from 2020 to 2045. Table LPP-3 shows the population growth projection in Tumwater and its urban growth area from 2020 to 2045.

Table LPP-1. Growth Targets for Combined Tumwater and Urban Growth Area, 2020-2045.

Target Type	Growth Target for 2045
Employment	10,730 total new jobs
Housing	9,192 total new housing units

Source: Thurston Regional Planning Council, Employment Estimates and Forecast by Jurisdiction and Sector and Planning for and Accommodating Housing Needs in Thurston County: Implementing the Housing Affordability Requirements of HB 1220, 2019 and 2025.

[1] *Planning for and Accommodating Housing Needs in Thurston County: Implementing the Housing Affordability Requirements of HB 1220,* Thurston Regional Planning Council, April 2025

[2] *Employment Forecast Allocations for Thurston County*, Thurston Regional Planning Council, November 2019.

Table LPP-2. Total Housing Units Needed by Income Level and Emergency Housing Beds (2020-2045).

Income Level or Emergency Housing	Tumwater & its Urban Growth Area
0-30% Permanent Supportive Housing	723 new housing units
0-30% Other	1,736 new housing units
30-50%	1,309 new housing units
50-80%	1,926 new housing units
80-100%	1,140 new housing units
100-120%	798 new housing units
120%	1,561 new housing units
Emergency Housing	184 new beds

Source: Thurston Regional Planning Council, Employment Estimates and Forecast by Jurisdiction and Sector and Planning for and Accommodating Housing Needs in Thurston County: Implementing the Housing Affordability Requirements of HB 1220, 2019 and 2025.

Table LPP-3. Tumwater and Urban Growth Area Population Growth Projections.

Type	Number
Housing Units (2020-2045)	9,192
Population (2020)[3]	28,707
Projected Population Increase (2020-2045)	17,363
Projected Population (2045)	46,070

Source: Thurston Regional Planning Council, 2025.

Note that the population growth projection of Tumwater and its urban growth area of 21,969 in Table LPP-3 exceeds the population growth anticipated population increase of Tumwater and its urban growth area of 17,363 found in the *Population and Employment Forecast for Thurston County Final Report* prepared by the Thurston Regional Planning Council in 2018.

For the purposes of the 2025 Comprehensive Plan, the higher 2024 population growth projection based on the state housing allocation in Table LPP-3 will be used for planning purpose in the Comprehensive Plan and the Lands for Public Purposes Element.

2) Land Use Alternatives

In its Land Use Element, Tumwater examined different land use alternatives to meet its responsibilities to meet population and employment targets and to plan for new housing types and targets by affordability.

[3] 2020 Population includes the Census calibrated numbers both within Tumwater (25,573) and its urban growth area (3,134).

I. Urban Growth Area

Section II of the Thurston County County-Wide Planning Policies contain specific guidelines and policies for the provision of urban services within the urban growth area. These policies are adopted by reference and are included in their entirety in Appendix B: *Thurston County County-Wide Planning Policies* of the Land Use Element.

County-wide policies guide the development and provision of lands for public purposes within Tumwater's urban growth area. These policies are implemented through the joint planning process for those areas in Tumwater's urban growth area. Tumwater coordinates with the Thurston Regional Planning Council and Thurston County along with other service providers to identify areas of shared need for public facilities.

J. Equity Principles

Capital facilities planning ensures that public infrastructure like roads, utilities, and schools, which are vital for housing and overall community development, are adequately planned and maintained.

This planning also considers how capital improvements support new housing development as envisioned in the Housing Element. Throughout the process of capital facility planning and implementation, Tumwater will consider and act upon principles of diversity, equity, and inclusion to strengthen equity in housing and reduce health disparities.

To help this, the New Capital Projects Equity Checklist found in Appendix B is designed to provoke thoughtfulness around equity and lay groundwork for planners and decision-makers to act on these considerations as capital projects are developed.

DRAFT

2. Capital Facilities Review Analysis

A. Overview

The revenue analysis of the Lands for Public Purposes Element supports the financing for providing facilities and services, as required by RCW 36.70A.070(3)(d). Revenue estimates, using assumptions that are based on historical trends, are used to represent realistic expectations for revenue that may be available for capital funding.

This revenue analysis looks at Tumwater's capital facility revenues for municipal services. Through identifying fiscal constraints in the future, and potential gap funding options, project prioritization can be incorporated into the capital planning process.

The revenue analysis provides an approximate forecast of future revenue sources. The numbers projected in this analysis are for planning purposes and do not account for sensitivities such as local, state, and federal policy, economic trends, and other factors.

B. Funding the Lands for Public Purposes Element

Estimated future revenues are projected for the Plan's 2026 – 2045 planning period, in year of expenditure dollars. The following revenue analysis is organized according to the following categories:

- **General Capital Revenues**. Revenues under the category of general capital revenues are the revenues required by law to be used for capital projects. The general capital revenues in Tumwater consist of two types of Real Estate Excise Tax: REET 1 and REET 2.
- **Dedicated Capital Revenues**. Dedicated revenues are required to be used for certain types of capital spending, outlined by the law. The dedicated capital revenues in Tumwater include park mitigation fees and grants.
- **Operating Revenues**. Tumwater allocates operating revenues when available to capital projects, which are transferred into capital funds. The operating revenues are vehicle license fees, revenues collected in the City Street Fund such as motor vehicle fuel tax, and surface water management fees.
- **Potential Policy Options and Other Funding Sources**. There are additional policy tools and sources available to fund capital projects.

C. Assumptions

The assumptions used in this analysis may not align with Tumwater's future budget assumptions around the same revenue sources as the purpose of the two analyses is different. Tumwater's budget estimates how much money it will have available for spending in the coming fiscal year, while the Lands for Public Facilities Element revenue analysis is an estimate how

DRAFT

much revenue specifically allocated to capital projects that Tumwater is likely to receive in total over the next 20 years.

The 2026-2031 Capital Facilities Plan identifies revenue sources for capital projects in that six-year timeframe. Revenues are projected for 2031 to 2045 using various methodologies, depending on trends in historical revenues and best available information. These methodologies are as follows:

- Projecting revenues based on an annual percent increase.
- Projecting revenues based on a constant historical value.
- Projecting revenues based on existing revenue projections.

D. General Capital Revenues

1) REET 1 and 2

Real Estate Excise Tax revenues are collected on property sales at the point of sale. They are required by law to be spent on capital projects.

REET 1 is a 0.25% real estate excise tax (RCW 82.046.010), and REET 2 is an additional 0.25% real estate excise tax (RCW 82.046.035). These two types of revenue sources are used primarily for specific types of capital facilities.

Tumwater is authorized by the state to impose two separate REET levies. REET 1 and REET 2 each allow for a levy of 0.25% on the assessed value of a sale, for a total tax of 0.5% of the total assessed value. All proceeds must be used for capital spending, as defined in RCW 35.43.040.

REET 2 has more restrictions than REET 1, as it may not be spent on acquisition of land for parks, recreation facilities, law enforcement facilities, fire protection facilities, trails, libraries, or administrative or judicial facilities (RCW 82.46.035). REET 2, specifically, can only be levied by those cities and counties that are required to plan under the Growth Management Act. For REET 2, the capital projects must be those specifically listed in RCW 82.46.035(5):

Public works projects of a local government for planning, acquisition, construction, reconstruction, repair, replacement, rehabilitation, or improvement of streets, roads, highways, sidewalks, streets and road lighting systems, traffic signals, bridges, domestic water systems, storm and sanitary sewer systems, and planning, constructions, reconstruction, repair, rehabilitation, or improvement of parks.

Within the parameters defined by law, REET 1 and REET 2 can be spent at the discretion of Tumwater.

Real Estate Excise Tax revenue is based on the total value of real estate transactions each year, and the amount received annually can vary based on fluctuations in the real estate market and trends in the economy. This analysis assumes that total REET revenue will increase annually by the ten-year historical average inflation rate of 18.06 percent.

Tumwater receives REET revenues in the General Government Capital Facilities Plan, Fund 304. Revenues collected in this fund are used to cover Tumwater's debt service and to fund capital projects. This fund supports both Parks,

DRAFT

Recreation, and Open Space capital projects and Transportation capital projects.

Table LPP-4 shows total REET revenue collections and the amount available for capital after the annual debt service amount. This may not align with the amount transferred annually to the Public Works Reserve Fund, which is based on annual project needs. The annual amount for debt service is currently zero. However, Tumwater intends to use debt financing for two large projects in the near future.

Table LPP-4. Actual, Budgeted, and Projected REET Revenues, 2019-2045.

Year	Revenue Collected	Year	Revenue Collected
2019	$1,336,386	**2033**	$6,242,923
2020	$1,671,140	**2034**	$7,370,394
2021	$2,534,458	**2035**	$8,701,488
2022	$2,489,318	**2036**	$10,272,976
2023	$1,102,382	**2037**	$12,128,276
2024	$1,401,080	**2038**	$14,318,642
2025	$1,654,115	**2039**	$16,904,589
2026	$1,952,848	**2040**	$19,957,558
2027	$2,305,533	**2041**	$23,561,893
2028	$2,721,912	**2042**	$27,817,171
2029	$3,213,489	**2043**	$32,840,952
2030	$3,793,845	**2044**	$38,772,027
2031	$4,479,014	**2045**	$45,774,256
2032	$5,287,924

E. Dedicated Capital Revenues

1) Metropolitan Park District

Voters approved the Tumwater Metropolitan Park District and a new property tax per $1,000 of assessed value on November 6, 2018. The City Council established a new dedicated fund for it with Ordinance No. O2019-030 on November 4, 2019.

The Park District allows Tumwater to consider further open space acquisition, the establishment of new parks, expanded recreation programs, and the possibility of a recreation facility in Tumwater. The district was formed according to state law and is a legal entity separate from Tumwater. Tumwater has financial and operational responsibility, and the governing body of Tumwater and Park District are the same.

Tumwater's Capital Facilities Plan assumes these revenues will be collected in 2026 to 2045. Tumwater Metropolitan Park District property

tax revenue from 2026 to 2045 is projected to increase one percent annually, due to the statutory limits on the growth of the total property tax levy. This is less than the estimated future inflation rate.

2) Park Mitigation Fees

Park mitigation fees are restricted for the establishment of parks, open spaces, and recreational facilities to serve the expanding population of Tumwater. These revenues are collected in the Public Works Reserve Fund and transferred to the Parks and General Government Capital Fund. Future park mitigation fee revenues are dependent on development and the issuance of building permits.

3) Transportation Grants

Tumwater receives federal and state grants to support transportation projects. For this analysis, large grants Tumwater has received are excluded as these as not reflective of long-term trends.

F. Other Revenues Used for Capital Facilities

1) Transportation Benefit District Fees

The Tumwater Transportation Benefit District was authorized on September 16, 2014, by Ordinance No. 02014-019. It was created in accordance with state law to provide a source of funding for the maintenance and preservation of streets and related infrastructure, ordinarily a general government activity and reported in the General Fund. Voters approved the Transportation Benefit District sales and use tax on April 28, 2015. It is a legal entity separate from Tumwater. Tumwater has financial and operational responsibilities, and the City Council and governing body of Tumwater's Transportation Benefit District are the same.

The Transportation Benefit District levies a Sales and Use Tax of 0.2% annually. The funds are used primarily to pay for street overlay capital projects and to leverage future Transportation Benefit District funds as local match when applying for federal funds.

Tumwater transfers a portion of this revenue to the Transportation Capital Fund.

Table LPP-6 and Figure LPP-1 show total Transportation Benefit District revenue, and the amount allocated to capital projects. The actual amounts represent Transportation Benefit District revenue that was transferred to the Transportation Capital Fund. Estimates for 2026-2031 are based on the 2026-2031 Capital Improvement Plan.

Projections for 2031-2045 assume total Transportation Benefit District revenue increases by 1.04 percent annually, which is the average increase in total Transportation Benefit District revenue from 2025 to 2035. This is less than the historical inflation to reflect actual prior collections and to acknowledge that this revenue source is likely to grow slowly in the future.

The revenue for capital shown in Table LPP-5 below reflects the revenue that would be available after paying debt service obligations. The current debt service obligation for the

Transportation Benefit District fund ends in 2025. At its regular meeting on January 21, 2025, the City Council approved placing a ballot proposition to renew the Transportation Benefit District in the April 22, 2025, special election.

Table LPP-5. 2023 Schedule of Revenues, Expenditures and Changes in Fund Balance, Tumwater Transportation Benefit District.

Category	Dollar Amount
Revenues	
TBD Sales and Use Tax, 0.2%	$2,444,966
Investment Earning	$244,994
Total Revenues	$2,689,960
Expenditures	
Administration & Financial Services Support	$10,190
Planning and Design	$82,468
Studies	$0
Construction	$4,564,727
Total Expenditures	$4,657,385
Summary	
Net Changes in Fund Balance	$(1,967,425)
Beginning Fund Balance	$6,052,975
Ending Fund Balance	$4,085,550

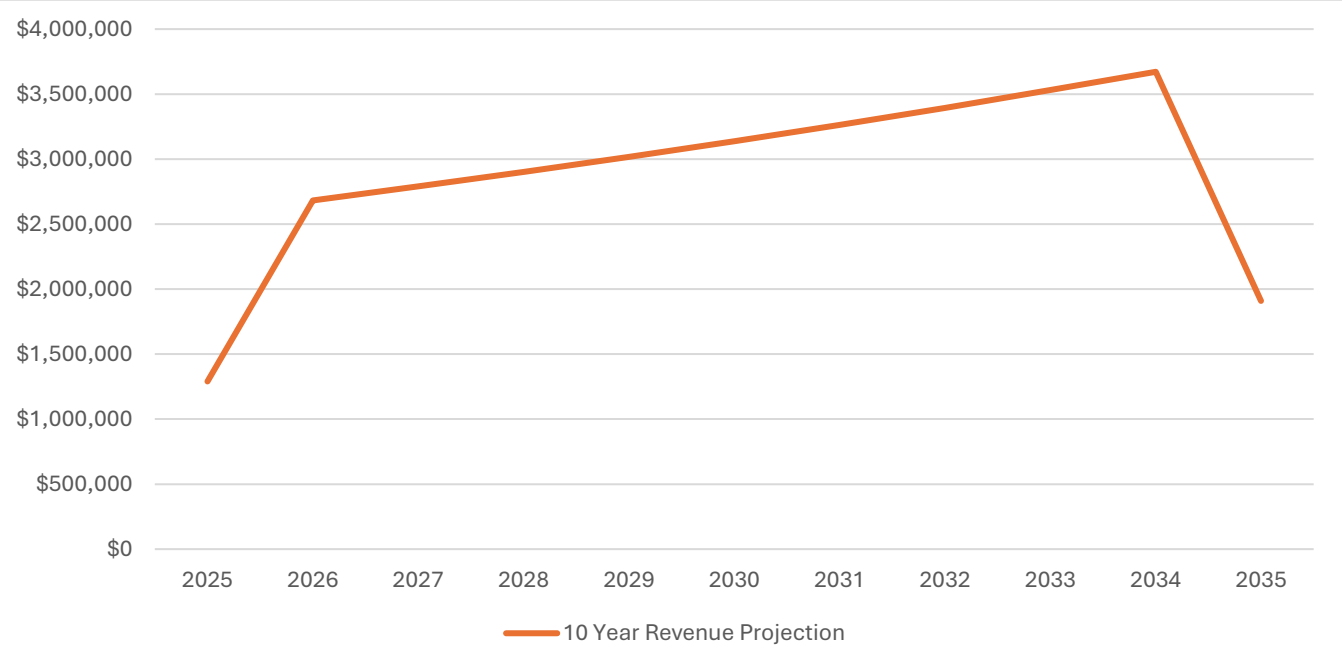
2035	1.04	$3,743,586	$74,872	$1,909,229
	Total 2025-2035	**$34,107,421**	**$682,148**	**$31,590,534**

Source: Tumwater Transportation & Engineering Department.

Note: Assumptions:



Interest Income – Assume conservative 2%.

Growth Factor – Assume conservative 3%.

Half year collections in 2025 and 2035 due to timing of 2025 election and 10 year expiration mid-2035.

Growth Factor in 2025 based on 2023 actuals so use 4% for two years.

Figure LPP-1. Future Estimated Projections, Tumwater Transportation Benefit District.

Source: Tumwater Transportation & Engineering Department.

2) Street Fund Revenues

The City's Street Fund is used to collect motor vehicle fuel tax, which is a dedicated state-shared revenue restricted for street maintenance, and other revenue sources that are not restricted. Tumwater transfers a portion of this fund to the Transportation Capital Improvement Program Fund annually.

3) Surface Water Management Fees

Tumwater collects fees to maintain and improve Tumwater's storm drainage system. These fees are collected in the Surface Water Management Fund. Funds are transferred from the Surface Water Management Fund to the Surface Water Management Capital Fund to pay for capital projects on an as needed basis.

Tumwater's Storm Drainage Master Plan states that historically, surface water capital projects have been funded by Tumwater's stormwater utility and grants for specific projects. The amount of funding provided for stormwater-related capital projects varies from year to year, depending on the program revenue, activities, and priorities. Tumwater will continue to pursue grant opportunities to accelerate the rate of construction for stormwater related capital projects.

As described in Chapter 3, Stormwater, the Stormwater Program currently allocates $350,000 per year in funding to the Infrastructure Replacement Fund to set aside for stormwater system upgrades where roadway projects are occurring. This amount is not sufficient to meet Tumwater's identified needs. There are several unfunded projects identified in the Storm Drainage Master Plan.

H. Policy Options and Other Funding Sources

There are additional policy tools and sources available to Tumwater to fund capital projects. These policy tools and sources include:

- **Local Improvement District or Road Improvement District.** Local Improvement Districts help benefiting properties finance capital improvements, such as installation of sidewalks, curbs, and gutters. Tumwater does not currently have assessment districts. This is a tool Tumwater could consider using to finance street improvements in the future.
- **Impact Fees.** Transportation impact fees must be used for "public streets and roads" that are addressed by a capital facilities plan element of a comprehensive plan adopted under the GMA, per RCW 82.02.050(4) and RCW 82.02.090(7). Tumwater adopted a Traffic Impact Fee in TMC Chapter 3.50. Traffic Impact Fee revenue is not included in the 2026-2031 Capital Improvement Plan. Tumwater could amend Traffic Impact Fees to update its needs and help finance transportation capital improvements related to growth.
- **Operating Transfers.** Tumwater can transfer funds from the General Fund to support capital projects, as it has done in prior years.

DRAFT

- **Grants.** State and Federal grant programs can be pursued for competitive regional priorities for infrastructure investments. Pursuing grant opportunities requires resources, and success is not guaranteed.

- **Bonds.** Tumwater does not currently use bonds to support capital facilities funding and has zero existing debt obligations but does plan to issue bonds in the future to fund major capital project.

  One benefit of using bond funding is the ability to get major projects started and completed more quickly than using pay-as-you-go funding. Because projects can get completed more quickly, Tumwater could mitigate the increasing cost of construction over time. Debt financing also shares the cost of a project among current and future residents. A challenge with bond funding is the annual debt service requirement, which would become a long-term obligation for the operating budget and could limit other funding priorities.

- **Tax Increment Financing.** In 2021, the Washington State Legislature authorized local jurisdictions to form tax increment financing districts. Tax increment financing can be used to fund public infrastructure in targeted areas to encourage private development and investment. Tumwater would designate an area surrounding the site of public improvements. The property tax portion of increases in assessed value of properties within the increment area is allocated towards paying for the public improvement costs. This could be a helpful tool if there were an area where public investment would encourage private development, and this development would not reasonably occur otherwise.

DRAFT

3. Tumwater Managed Capital Facilities and Services

A. Introduction

This section addresses the capital facilities and public services that are required to support growth and that are directly managed by Tumwater, including:

- City Buildings
- Fire and Emergency Medical Services
- Parks, Recreation, Open Space
- Police Services
- Stormwater Systems and Facilities
- Transportation System
- Water Systems and Facilities

B. City Buildings

1) City Hall

Tumwater City Hall provides a center for local governmental activities in Tumwater. This building is a central hub for City Council meetings, Planning Commission meetings, Committee meetings, Open Houses, where community members pay utility bills and apply for permits, and more. It is critical to maintain the building for and its capacity for staff, elected, and the public to use.

City Hall was relocated in 1988 from the current location of the Old Town Center at the intersection of Second Avenue and Bates Street to its present location on Israel Road. City Hall was relocated to the southern area of Tumwater to reflect the future growth of Tumwater and to provide a more central focus.

Tumwater City Hall is in the Tumwater Town Center. The town center consists of approximately two hundred acres and Israel Road, Tumwater Boulevard, and Interstate 5 border it. The Comprehensive Plan envisions a broad mix of uses in this area that are high density, transit-supportive, and pedestrian and bicycle friendly.

City Hall provides office space for the Mayor, City Administration, City Attorney, and other departments. Additional space is provided in the former fire station at the intersection of Israel Road and Capitol Boulevard and is currently used by facilities maintenance staff.

The current City Hall is reaching capacity and is being supplemented with an additional buildings and office space:

- A new Operations and Maintenance Facility. This facility will house vehicles, equipment, and more staff in the Transportation & Engineering and Water Resources & Sustainability Departments. Tumwater has purchased the former Trails Arena and is completing permitting. Construction is estimated to start in 2026.
- The Water Resources Department is located at the South Puget Sound Community College in a leased building.

DRAFT

- Parks and Recreation Department staff relocated from City Hall to a leased building near the Olympia Regional Airport in 2025

The 2024-2029 CFP identifies the need for the City Hall to undergo renovations. The building is over 35 years old, and the workspaces need updating and modernization. Teleworking should be taken advantage of to reduce building occupancy and overcrowding. The parking lot should be expanded after the completion of the new Operations and Maintenance Facility.

2) Community Center

As part of the Metropolitan Parks District funding, voters approved the development of a community center. This community center will have meeting and event space, senior services, indoor sports courts, and land for a future public pool. It is anticipated that Parks and Recreation will have staff working at the Community Center. Currently, the Community Center is under a feasibility schedule, the location and start dates for construction are not known at this time.

3) Other City Buildings

Other Tumwater owned facilities, such as the fire stations, the library building, the Old Town Center, and parks facilities are described in the sections below.

C. Fire and Emergency Medical Services

1) Overview

The Tumwater Fire Department is responsible for protecting Tumwater from fire, medical, natural, and human-caused emergencies. The department provides rescue, fire extinguishment, fire prevention, fire and arson investigation, emergency medical services, hazardous materials services, disaster services, and public education activities to its citizens. In addition to providing these services to citizens, the department also provides fire services to the Olympia Regional Airport.

Tumwater provides Advanced Life Support services in partnership with Medic One. With expanded services and population growth, Fire and Emergency Medical Services will need to continually assess facilities, equipment, and equipment to meet demand. An evaluation of the Fire Department was conducted in 2024 by Emergency Services Consulting International and serves as the basis for the assessment throughout this section.

2) Inventory

The construction and maintenance of facilities comprises an important part of the overall management responsibility of the Fire Department. The number and location of fire stations plays a significant role in determining emergency response time and directly impacts the quality of Tumwater's fire and emergency medical services.

The Fire Department responds to calls from two Tumwater fire stations. The Headquarters Fire Station T-1, located next to City Hall, primarily serves the area south of Trosper Road. Fire Station T-2, located at the intersection of Linwood Avenue and Second Avenue, is also

DRAFT

staffed full time, and serves the northern portion of Tumwater.

3) Facilities Status

a) Fire Stations

Fire Station T–1 – This facility is over 20 years old. It is a full-size headquarters facility. The station houses a fire engine, medic unit, command car, and back-up apparatus. Within the past few years, many upgrades have been accomplished with the facility including a new roof, new siding, replacement of sheet rock in the apparatus bays, new flooring in the watch office, kitchen, and hallways, and painting throughout the exterior and exterior of the station. A full kitchen remodel was completed in 2025. A new vehicle exhaust extraction system was installed in 2020, and a new bay heating system in 2022. The Parks and Facilities Department continues to work through a few other needs that have been compiled and budgeted for.

Fire Station T–2 – This facility is almost 30 years old and since 2017, has been staffed full time. The fire station, which serves the north side of Tumwater, is undersized and plans are in process to remodel the station to meet the needs of the community. Fire Station T-2 also has had construction upgrades with a new roof and gutters, new siding, painting inside and out and interior modification such as new lockers both in the bays and sleeping quarters. A new vehicle exhaust extraction system was also installed in 2019. Like station T–1, Parks, Recreation, and Facilities Department continues to work through a few other needs that have been complied and budgeted for.

The Fire Department has recently initiated a facilities inspection program. Needs that cannot be accomplished inhouse will be forwarded to facilities to mitigate. This new program encourages all personnel to take ownership and pride in our living space with this new program. This can be accomplished by identifying needs that ought to be corrected and mitigated to make our environment safe and healthy.

b) Other

Presently, fire protection is also provided in Tumwater's urban growth area through three fire districts staffed with volunteers and career firefighters. These include:

- Fire District 9 – McLane/Black Lake
- West Thurston Regional Fire Authority
- Fire District 6 - East Olympia

Tumwater presently has reciprocal mutual response agreements with all the county fire agencies. A reciprocal mutual response agreement is an agreement whereby a fire district and Tumwater both aid depending on which unit can respond first.

4) Functions

The functions of the department are divided into five major divisions:

1. Administration
2. Suppression
3. Emergency Medical Services
4. Training
5. Fire Prevention

DRAFT

a) Administration

The Administrative division of the Fire Department is responsible for the overall management and administrative direction, as well as planning and budgeting for all units within the department. Administration maintains ongoing relations with the other Tumwater departments to assist in overall planning for the community's development. The Fire Chief is also responsible for negotiation of fire service contracts, intergovernmental agreements, and acts as the Emergency Management Coordinator.

c) Suppression

The Suppression division responds to all fire and Emergency Medical Service calls. They also conduct public safety inspections and assist in educating the public to prevent fires. In addition, the Suppression division performs routine maintenance on the fire apparatus and the Fire Station facilities to guarantee readiness.

d) Emergency Medical Services

All fire suppression staff is cross trained to provide emergency medical services to our community. Staff are certified either at the Basic Life Support (Emergency Medical Technician) or Advanced Life Support (Paramedic) level. Tumwater maintains an inter-local agreement with Thurston County Medic One which, among other things, provides apparatus/equipment and training as well as more than eighty percent of the funding for the paramedic program.

e) Training

The Training division is responsible for coordinating and supervising all departmental training to meet the objectives of the Administration division as required. The training division is responsible for ensuring all deferral and state training requirements are met.

f) Fire Prevention

The Fire Prevention division performs the coordination of efforts between the Fire Department and the Community Development Department. The training division is responsible for ensuring all deferral and state training requirements are met.

5) Summary

Continued emphasis is being placed on the administration and enforcement of the Uniform Fire Code. This includes on-going inspections of structures for and of occupancy and requires coordination with the Community Development Department by being part of the team of the Development Review Committee.

The 2024 Strategic Plan for the Fire Department and the 2024 Tumwater Fire Department Agency Evaluation are incorporated by reference. It should be referenced for information regarding fire protection in Tumwater that is more detailed. The six-year Capital Facilities Plan identifies funding for fire facilities, and it is hereby incorporated by reference.

6) Emergency Operations Center

Fire Station T-1 serves as the primary location for direction and control as the Emergency Operation Center. The Fire Chief, reporting to the Mayor or designee, is responsible for the organization, administration, and operation of the emergency management program. The Fire Chief, or the appointed Emergency Management Coordinator under the supervision of the Fire Chief, is responsible for managing and

DRAFT

coordinating day-to-day emergency management activities.

Tumwater completed the Comprehensive Emergency Management Plan in 2024 and is incorporated by reference. The Comprehensive Emergency Management Plan was developed to define the policies and procedures necessary for carrying out an emergency management program that ensures the preservation of lives, protection of property, and the execution of special measures. The duties of each Tumwater department, and various supporting agencies, are specified in the Comprehensive Emergency Management Plan.

7) Level of Services Standards

The level of service standards for the Fire Department are based upon service area radius, available technology, risk analysis, and capacity capability.

Tumwater continues to grow, and with that comes an increased call volume. Response times have been increasing, and around one-third of the time, the department has multiple calls. According to the National Fire Protection Association, the national median rate of firefighters to people in the population ranges from 1.54 to 1.81 firefighters per 1,000 people. As of 2024, Tumwater's ratio is 1.55 firefighters per 1,000 people.

Consideration will need to be given to future resource needs. This may include an additional station or units. The goal would be to eventually hire enough staff for full-time staffing of a third engine with that unit sited in a new station according to a comprehensive analysis of the fire department's programs and processes which is looking forward ten to fifteen years so that the department is able to manage and anticipate community growth and service demands.

The Fire Chief has identified the positions of Fire Prevention Officer, Fire Training Lieutenant, and Emergency Manager as critical positions that need enhanced support to meet the short-term and long-term needs as well as provide an opportunity for more comprehensive overall planning, including succession planning.

8) Planned Projects, Costs, and Revenues

The Fire Department is approximately a quarter of Tumwater's general fund budget.

The replacement schedule for front-line engines and ladders historically has been every seven years, although this is dependent on the timing of the levy lid lift. In 2011, a levy LID was approved, allowing the department to purchase four new engines. The Fire Department acquired one engine in 2012, a second in 2018, and a third engine has been ordered and under contrail as of April 2023. The third engine is expected to be delivered in 2026. The department is working with Tumwater to determine adequate funding for the fourth engine. The reserve fleet will naturally rotate out of the system as the front-line apparatus is replaced. Staff vehicles, including the Battalion Chief, Medical Services Officer, and Fire Prevention Officer are scheduled to be replaced about every ten years and purchased with Tumwater funds.

The department's priorities are:

- Implement elements of the Fire Department's five-year strategic plan.

DRAFT

- Improve Fire Prevention and Community Risk Reduction Programs.
- A complete study of potential staffing of the BLS Aid Unit with transport capability to address increasing call volumes and ambulance delays.
- Start the process for a new fire station feasibility study to address location and growth.
- Start the process for a fire impact fee.
- Prepare for the Washington Survey and Rating Bureau re-evaluation of Tumwater's rating.
- Seek a partnership with local tribes to fund equipment for wildland fire response.
- Seek a partnership with the Port of Olympia to help fund Aircraft Rescue Firefighting training and equipment purchases.
- In partnership with Thurston County Medic One, explore opportunities to support opioid response in Tumwater and Thurston County.
- Work to improve Emergency Management planning efforts through a partnership with neighboring agencies.

The 2024-2029 Capital Facilities Plan outlines a few projects from the General Fund for the Fire Department. Table LPP-8 below outlines a few of the major proposed projects. More detailed projects, costs, and revenues are outlined in the 2026-2031 Capital Facilities Plan.

Table LPP-7. Tumwater Fire Department Projects, 2024-2029.

Project	Plan	Funding and Cost
Fire Engine Replacement Program	Fire Department Master Plan / Emergency Services Levy Lid Lift	Levy Lid Lift $1,250,000
Fire Station T-2 Improvements	N/A	General Fund $1,250,000
Digital Alerting Systems	N/A	General Fund $125,000

Source: Tumwater 2024-2029 Capital Facilities Plan.

a) Fire Engine Replacement Program

This program includes a 25-year replacement program for fire engines. This program is funded through a property tax levy lid lift approved by voters in 2011. The acquisition of one fire engine occurred in 2012, and a second fire engine was purchased in 2018. A third fire engine has been ordered (under contract April 2023) with anticipated delivery in 2026. Approximately 50% of the cost is due 90 days. prior to delivery and balance upon delivery. According to our strategic plan, the frontline apparatus will be evaluated for replacement after 6 years of service or when the mileage exceeds 120,000 miles. Projections are for replacement of the 2018 Pierce pumper in 2032 (fourth engine purchased under 2011 levy lid lift).

b) Fire Station T-2 Improvements

Station T2 was built in 1995 and is staffed full-time with a minimum of three firefighters. Under Tumwater's agreement with Medic One, an additional paramedic unit will be staffed at Station T-2 in 2026. This additional staffing, as well as accommodating future growth needs, necessitates a full remodel of the station during the 2024-2029 CFP plan period.

c) Digital Alerting System

The intent is to apply for the Assistance to Firefighters Grant administered through FEMA. This would fund the installation of a digital alerting system in Stations T1 and T2. Digital alerting will provide multiple alerts including voice, LED lighting, and visual information display. Alerting can be controlled in each dorm room, so staff are only alerted to calls for their unit, not all calls, reducing stress for responders. This alerting system has been shown to reduce response times and is being installed in other departments locally.

D. Parks and Recreation Facilities

1) Overview

The Parks and Recreation Department is responsible for operating and maintaining Tumwater-owned parks and facilities like the Tumwater Valley Golf Course.

The Parks, Recreation, and Open Space Plan is an element of the Comprehensive Plan and the Tumwater Thurston County Joint Plan in Tumwater's urban growth area. A 20-year vision for parks, recreation programs, open space, and trails is identified in the plan. The 2008 Parks, Recreation, and Open Space Plan is incorporated by reference, and it is the source for more detailed information on parks and open space needs and services for Tumwater and its urban growth area.

2) Inventory

The six-year Capital Facilities Plan identifies funding for parks and related facilities, and it is hereby incorporated by reference. Tumwater currently operates and maintains twelve municipal parks totaling 153 acres. Additionally, the Parks, Recreation, and Facilities Department operates and maintains the golf course.

The golf course has a total of 232 acres of which 170 acres comprises the golf course "proper." The eighteen hole course has a restaurant, pro-shop, a ten-acre driving range, practice greens, and a maintenance facility.

Parks facilities range from eighty acres to less than one half acre in size and serve a variety of needs and populations within Tumwater. Future park facilities will include additional neighborhood parks, community parks, a community center, and the development of trail systems.

Park facilities also include the Union/Calvary Cemetery and two historic homes within the Tumwater's Historic District.

Tumwater Old Town Center was the former City Hall and fire station. Now, it is a community center that offers programs and activities to seniors through the Parks and Recreation Department. A daycare is also currently leasing a portion of the building.

The Tumwater Parks and Recreation Department will be located at a satellite office starting in spring of 2025 at 821 Airport Court SE, Tumwater. The office space will be leased.

3) Level of Services Standards

The latest version of the Parks, Recreation, and Open Space Plan was adopted in 2008, with a minor amendment in 2016. The 2008 Plan explains how level of service can be measured for parks, recreation, and open space.

According to the 2024-2029 Capital Facilities Plan, parks and open space level of service standards are a combination of "Levels of Service" for parks and "best professional judgement" for trails and open space.

The demand for park, recreation, and open space land can be estimated using a ratio of a required facility to a standard unit of population, such as 3.1 acres of athletic fields and playgrounds per 1,000 residents. The ratio method is simple to compute and can be compared with national or local park, recreation, and open space measurements.

As the population increases, the need for more public parks, recreation, and open space is needed. This includes sports, programs, historical preservation and enhancement, and community spaces and events.

For more information on the levels of service for parks, recreation, and open space, refer to Appendix D: *Land and Facility Demand* of the 2008 Parks, Recreation, and Open Space Plan.

Starting in 2025 staff will begin to update the 2008 Parks Plan as directed by the City Council and the 2025 Long Range Planning Workplan.

4) Planned Projects, Costs, and Revenues

Tumwater has identified the neighborhood parks, trails, and facilities necessary to serve its current and future residents. Priority projects identified in the Parks, Recreation and Open Space plan and the Capital Facilities Plan include the completion of the Deschutes Valley Trail, acquisition and development of neighborhood and urban parks, development of a swimming facility and/or community center, reinvesting in both park and golf course infrastructure and improving community event space.

Project costs and funding sources as outlined in the 2026-2031 Capital Facilities Plan. Major projects in the 2024-2029 Capital Facilities Plan are found in Table LPP-9. More detailed information about projects, costs, and revenues is outlined in the 2026-2031 Capital Facilities Plan.

Table LPP-8. Parks Planned Projects in Tumwater.

Project	Cost	Funding
Deschutes Valley Trail	$16,650,000	Grants, Metropolitan Park District, Parks Impact Fee
Community Center	$13,000,000	Metropolitan Park District, Loan

DRAFT

Project	Cost	Funding
Trails End Park	$2,460,000	Metropolitan Park District, Recreation, Parks Impact Fee, and Open Space Plan

Source: Tumwater 2024-2029 Capital Facilities Plan.

E. Police Services

1) Overview

The Tumwater Police Department is dedicated to providing professional police services and engaging with members of our community to ensure we provide a safe environment to live, work and/or raise a family.

The Police Department presently employs thirty-three commissioned officers, and eight non-commissioned administrative staff. Tumwater Police also provide two school resource officers who support three high schools and two middle schools. Their work focuses on building positive relationships with students, as well as teachers and school administration, to provide a safe learning environment for students and staff.

2) Inventory

The Police Department headquarters are at Tumwater City Hall. Officers patrol throughout Tumwater and respond to calls for service dispatched from the TCOMM 9-1-1 dispatch center that is located at 2703 Pacific Avenue S.E. in Olympia.

The police force has increased in size over the years to support the population and employment growth in Tumwater. The increase in police officers resulted in the need to expand/remodel the Police Department facilities a few years ago. The Police Department currently occupies 10,100 square feet of space, which continues to be modified to meet current needs.

The Police Department is responsible for maintaining law and order and providing police services to the community under the direction of the Police Chief and Commander. The Chief is responsible for the executive functions of the department while the Commander provides day-to-day leadership for the department's operations. Both participate in community outreach activities.

The agency provides for the preservation of life, protection of property, and reduction of crime. The department is organized into four areas:

1) Patrol
2) Investigations
3) Training/Code enforcement
4) Administration

3) Administration

The Administration unit provides the overall management and administrative direction, planning, budgeting, scheduling, inspection, and training for the department. Also included in this division is the records management function, which maintains incident reports and prepares management reports and records necessary for the effective operation of the department. Additionally, the unit handles

telephone and personal requests for service from the public at the Police Station. Tumwater continues to use the Nisqually Jail and Thurston County Accountability and Resource Center for holding and incarceration of defendants.

4) Patrol

The Patrol unit deters and detects crime, apprehends violators, assists traffic direction and control, responds to service calls, assists citizens in community oriented policing, and renders other services designed to provide public protection. This is accomplished by preventive patrol, and preliminary investigation and follow-up of reports and crimes.

5) Investigation

The Investigative unit conducts follow-up activities for serious cases, provides investigative assistance to the patrol unit, and investigates major crime scenes. This unit enforces narcotics violations through participation in the Thurston County Narcotics Task Force, performs crime analyses, and presents information to the Prosecutor's Office for filing of criminal proceedings.

6) Crime Prevention

Through proactive patrol efforts, Tumwater Police reduce crime through public education and assistance in residential neighborhoods, the business community, and in schools. They are responsible for planning and developing various community programs. The primary function is the administration of School Resource Officer program in the school system. Tumwater sponsors the School Resource Officer program with staffing, training, and limited supplies. The Tumwater School District and Tumwater are currently in discussions to expand the program to add regular service to the elementary schools.

7) Training and Code Enforcement

To maintain core skills, officers complete sixty hours of annual training. Furthermore, the Police Department believes officers and staff would be a critical area of improvement by attending the "Able project," also known as Active Bystandership for Law Enforcement. The goal of the program is to prepare officers to successfully intervene to prevent harm and create a culture that supports peer intervention. In summary, it gives police officers tools to better protect themselves, the organization, and the communities that they serve. It also provides training to allow for intervention at all levels before a situation becomes critical. In 2018, the voters of Washington State approved Initiative 940, known as the Law Enforcement Training and Community Safety Act.

The initiative specifies that officers must receive a minimum of forty hours of training every three years. Once the standards are set and the courses have been established, the training must be completed by 2028. This is an unfunded mandate with no consideration given for the annual skills training already required as outlined above. Given the current environment surrounding law enforcement, Tumwater's goal is to have every officer complete this training.

Code enforcement responds to complaints concerning public health and safety issues such as abandoned buildings, excessive trash, inoperable vehicles, and more. In 2016, the City Council authorized transfer of the responsibility for coordinating code enforcement to the Police Department, who took responsibility for the

DRAFT

program in late 2017. Code violations are now investigated by two half-time police specialists, plus one-half of a position dedicated for administrative support.

8) Summary

To continue serving the community and maintain high levels of service, the Tumwater Police Staffing Strategic Plan concluded to increase staff by ten officers over a five year period. The headquarters for this force is in City Hall. The police station is at capacity, and based on the Tumwater Police Strategic Growth Plan, additional office space will be required with the expected growth of the department and an increase in Tumwater population. This new office will create opportunities to provide community meeting spaces and safety events for the community. Officers patrol throughout Tumwater and respond to calls for service dispatched from the TCOMM 9-1-1 dispatch center that is located at 2703 Pacific Avenue S.E. in Olympia.

The Police Strategic Plan and its specific recommendations are incorporated by reference. The six-year Capital Facilities Plan identifies funding for police facilities, and it is hereby incorporated by reference.

Tumwater has been strongly committed to creating and providing a high level of police protection and services. Police protection services should expand at a rate consistent with community need.

9) Level of Services Standards

Based on the 2025-2029 Strategic Growth Plan for the Police Department and a Community Survey in 2022, areas of growth and specific themes have been identified. These goals are the foundation for how the department will grow over the next five years and provide policing services that align with the community's needs:

- More in-person, non-enforcement interactions between officers and community members.
- More robust communication between TPD and the community, especially through social media.
- Opportunities for the community to be involved with TPD, not just TPD involved with the community.
- Increased use of research-based practices and the use of data.
- Provide support to officers and staff so that they remain healthy, both physically and mentally.

To achieve these goals, three critical resources have been identified:

- **Staffing.** To provide the service envisioned by our community, the staffing plan indicates TPD will need to add twelve more patrol officer positions to maintain current service levels. Additional officer and civilian positions are needed to expand the services we provide. Hiring and training new police officers is time and resource intensive. We anticipate that our training staff can manage between three to four hires in a given year.
- **Facilities.** The Police Strategic Growth Plan anticipates growth in staffing and programs, all of which will require space

we do not currently have. The police station is at capacity. To help mitigate measures such as renting storage units, a building expansion, and closing the lobby to create office space has been required. A proposed off site office space to house administrative staff and training rooms has been recommended for interim space solutions within the 2025-2029 Police Strategic Growth Plan.

- **Technology.** A key aspect of our technology plan is to choose tools that will increase our ability to collect and communicate information so that the public better understands how we police. We will also prioritize technology that moves us into the future and helps us evolve.

10) Planned Projects, Costs, and Revenues

With the new requirements under the Law Enforcement Training and Community Safety Act, and the need for intervention training, additional budget should be provided to enable officers to complete all required training in a timely manner at a cost of $91,200.

11) Recommendations

Tumwater should also commit to the standards of the ABLE Project, including the requirements for training at a cost of $16,000.

Overall, the total budget increase identified in the Tumwater Police Strategic Growth Plan for 2025-2029 is between $6,931,550 and $7,424,300. This will cover the proposed services, staffing, facilities, and technology needs to meet levels of service.

More detailed projects, costs, and revenues are outlined in the 2026-2031 Capital Facilities Plan.

F. Stormwater Systems and Facilities

1) Overview

Stormwater refers to the rain and snow that falls to the ground. Stormwater flows over land or impervious surfaces such as paved streets, parking lots, and building rooftops. As the runoff flows over the land or impervious surfaces, it accumulates debris, chemicals, sediment, or other pollutants that could adversely affect water quality if the runoff is discharged untreated. A stormwater utility is a system that collects, manages, and conveys stormwater. Stormwater utilities are important because they help prevent flooding and control erosion. Furthermore, stormwater utility protects water quality and reduces harm to aquatic habitats. Tumwater has outlined a comprehensive approach to the overall management of stormwater in the 2023 Comprehensive Stormwater Management Plan. This plan focuses on long-term stormwater goals while emphasizing prevention, community participation, and resource conservation.

Tumwater manages stormwater on Tumwater lands, streets, and rights-of-way. Stormwater on private property is the responsibility of the land or business owner. Tumwater will provide technical assistance to private stormwater

DRAFT

facility owners for issues surrounding maintenance, upkeep, planting, pollution, and compliance with federal, state, and local regulations.

2) Inventory

Improvements to Tumwater's stormwater system are identified in the six-year Capital Facilities Plan and the 2023 Stormwater Management Program Plan. These plans are incorporated by reference. In addition to these projects, Tumwater has implemented a comprehensive stormwater program since 2007 to meet National Pollutant Discharge Elimination System – Phase II permit requirements. Tumwater has also adopted ground- and surface water-monitoring standards, like that of Thurston County, to examine long-term water quality and water level trends in the Salmon Creek Drainage Basin, Black Lake Drainage Basin, and Deschutes River Watershed. Development standards for new and redeveloping properties are defined by Tumwater's Drainage Design & Erosion Control Manual, which requires developments to limit and mitigate where necessary water quality, water quantity, and regional impacts of the projects.

The Drainage Design and Erosion Control Manual and subsequent updates are adopted by reference. Stormwater management requirements are also identified in Title 13 of the Tumwater Municipal Code.

3) Level of Services Standards

Growth, development, and redevelopment within Tumwater impacts the stormwater system. The more coverage and hard surfaces built means more pollution could enter the stormwater system and end up in the Deschutes Watershed and Budd Inlet. It is important that measures are taken to protect public and private infrastructure and provide protection for natural resources.

4) Planned Projects, Costs, and Revenues

The 2026-2031 Capital Facilities Plan, Comprehensive Stormwater Management Plan, and other noted plans outline the following planned projects for stormwater systems and facilities. Major projects in the 2024-2029 Capital Facilities Plan are found in Table LPP-10.

Table LPP-9. Planned Stormwater Projects, Costs, and Revenues in Tumwater.

Project	Plan	Funding/ Expense
Land Acquisitions – Wetland Habitat Conservation	Plan: E Linwood / M Street Outfall Projects	Grants & Water, Sewer, Storm Fund $3,375,000
Tumwater Valley Regional Facility	N/A	Grants & Water, Sewer, Storm Fund $4,485,000
Deschutes Habitat Restoration Projects	NPDES Permit / Shoreline Management Plan	Grants & Water/Sewer/Storm $980,000

Source: Tumwater 2024-2029 Capital Facilities Plan.

a) Land Acquisitions - Wetland Habitat Conservation

Reserve funds for the acquisition of land for stormwater-related projects requiring wetland mitigation, preservation, or enhancement, and general habitat conservation. Considered projects include former Brewery properties at sixty percent of present value, Kirsop-area wetlands, and Deschutes/Watershed Resource Inventory Area 13 wetlands.

b) Tumwater Valley Regional Facility

Project includes the construction of a regional facility for treatment and detention of discharge from two major outfalls – M Street Basin and Littlerock and 2nd Avenue, with a drainage area of approximately two hundred acres. Project includes outfall retrofit as a constructed wetland, walking trail, educational signage, wetland mitigation, and electrical realignment to treat stormwater discharges to the Deschutes River. Planning and design are largely complete; completion of permitting, mitigation, and construction are dependent on grant funding.

c) Deschutes Habitat Restoration Projects

Project will design and implement habitat enhancement and sediment reduction projects in support of Total Maximum Daily Load compliance actions relating to shade coverage and riparian habitat and water quality enhancements along the Deschutes River and its tributaries, as outlined in Tumwater's Shoreline Management Plan and Deschutes Habitat Restoration Plan. Projects include evaluation and restoration of riverbank erosion along Tumwater Valley Drive, Pioneer Park, and Desoto Canyon.

More detailed projects, costs, and revenues are outlined in the 2026-2031 Capital Facilities Plan.

G. Transportation System

1) Overview

Tumwater's transportation network accommodates many modes of travel, including walking, bicycling, rolling, public transit, freight, and driving. Vehicular travel is the primary mode utilized for most travelers in and around Tumwater, and the roads must accommodate both local trips and regional travelers passing through.

Transportation facilities in Tumwater include state highways, city streets, sidewalks, bike lanes, trails, freight routes, rail, and public transportation facilities and services. A comprehensive inventory of all transportation facilities provides a sound basis for effective planning. Tumwater maintains inventories of transportation facilities that include the street system, pedestrian facilities, bicycle facilities, and transit facilities.

The Transportation Plan contains goals and policies for transportation, documents existing traffic conditions, develops a future and existing land use base traffic model, develops an impact fee program, and develops recommendations for traffic improvements including future transportation corridors.

Tumwater's long-range transportation planning must be consistent with the Regional Transportation Plan which is developed by the Thurston Regional Planning Council. The

Regional Transportation Plan is currently being updated.

Tumwater collaborates with Thurston Regional Planning Council to reach agreement on level of service standards, peak periods, and transportation system goals. The Regional Transportation Plan is the long-range transportation plan and is adopted every four years. The Regional Transportation Plan defines Tumwater projects that impact the movement of people and vehicles at the regional scale.

It should be consulted for information on street and road corridors and the modal integration of Tumwater and its urban growth area that is more detailed. The Regional Transportation Plan is hereby incorporated by reference.

The six-year Capital Facilities Plan identifies funding for the transportation improvements in Tumwater, and it is incorporated by reference.

The Transportation & Engineering Department are responsible for managing project design and construction function for all public works and capital projects.

The Pavement Maintenance Program within the Transportation & Engineering Department provides the preservation of existing streets including structural repairs, crack sealing, and surface treatments.

2) Inventory

a) Streets and Roads

Within Tumwater, there are 123 miles of road, of which fifty-seven miles are local access streets; forty-two miles are collectors, eighteen miles are minor arterials, and five miles are principal arterials.

b) Pedestrian and Bicycle System

Promoting the increased use and safety of bicycling and walking as transportation modes is Tumwater, regional, state, and federal transportation policy.

Bike lanes, curb access ramps, traffic signals, sidewalks, trails, shared user paths, and more are an important active transportation facility. The purpose of a pedestrian and bicycle transportation system is to provide opportunities to walk or ride a bicycle safely as part of their everyday life. As part of the 2025 Comprehensive Plan Update, the Climate Element and Transportation Plan required a Bicycle and Pedestrian Plan. The Bicycle and Pedestrian Plan addresses ADA transition planning, non- vehicle user safety, equity, connectivity, and increased ridership.

The Tumwater Bicycle and Pedestrian Plan is adopted by reference. The Thurston Regional Trails Plan, the Thurston Regional Planning Council Regional Transportation Plan, and the Tumwater Parks, Recreation, and Open Space Plan address the creation of trails as a means of transportation for pedestrians and bicyclists.

3) Level of Services Standards

As Tumwater grows, so does the road system. Tumwater now has 123 miles of streets, and the ongoing annual cost to preserve and maintain street infrastructure continues to rise. It would take $31.8 million over the next ten years to bring Tumwater's current transportation system to industry standards and continued funding to maintain them in good condition.

Current development activities in Tumwater include industrial and commercial projects, with some multi-family housing. The majority of

Tumwater consists of low-density single-family housing. Growth outside Tumwater will also play a major role in the growing demands on Tumwater's transportation network. Tumwater is working to accommodate both local and regional growth, investing in improving opportunities to travel by all modes.

Major projects in the 2024-2029 Capital Facilities Plan are found in Table LPP-11. For a complete analysis of the transportation system and levels of services, refer to the Transportation Plan.

Table LPP-10. Planned Transportation Projects, Costs, and Revenues in Tumwater.

Project	Plans	Cost and Revenues
Pavement Maintenance Program	Strategic Plan & Transportation Benefit District Ordinance	Transportation Benefit District $14,100,000
Multimodal Improvements and Traffic Calming Program	ADA Transition Plan, Transportation Plan, TIP	Grants, annual Sidewalk Program and local match for speculative grants, the State Transportation Package gas tax $3,280,000
Capitol Blvd Corridor, M Street to Israel Road	Capitol Boulevard Corridor Study, Transportation Plan, TIP, Regional Transportation Plan	Grants, Impact Fees $27,000,000
E Street Connection	Brewery District Plan, E Street Study, Transportation Pan, TIP	Grants $60,000,000
Old Highway 99 Corridor	Old Highway 99 Corridor Study, Transportation Plan, Regional Transportation Plan, TIP	Grants, Impact Fees $22,000,000
Tumwater Boulevard Interchange	Transportation Plan, Regional Transportation Plan, TIP	Grants, Development $23,000,000
Henderson Boulevard Corridor	Transportation Plan, Regional Transportation Plan, TIP	Grants, Development $24,000,000

Source: Tumwater 2024-2029 Capital Facilities Plan.

4) Planned Projects, Costs, and Revenues

a) Pavement Maintenance Program

This program provides for the preservation of existing Tumwater streets including structural repairs, crack sealing, construction of sub-grade and resurfacing by use of asphalt overlay or bituminous surface treatments. The projects may include both Tumwater funded projects and Transportation Benefit District projects. Planned expenses after 2025 assume the Transportation Benefit District receives voter support when its initial term expires in 2025.

b) *Multimodal Improvements and Traffic Calming Program*

This Program provides for the construction of miscellaneous multimodal and traffic calming improvements throughout Tumwater. Work could include sidewalk maintenance, repair, infill, ADA curb ramps, pedestrian crossings and connections, bicycle improvements, and neighborhood traffic calming. Individual projects would be developed as needs or issues arise. Identified projects include: all deficiencies in right-of-way contained within Tumwater's ADA Transition Plan, extension of sidewalk on Trosper Road to Lambskin Street; widen sidewalk on 2nd Avenue from Custer Way to Desoto Street; annual Sidewalk Program at $200,000 annual, increase to $400,000 annual starting 2025 pending additional grant funding; and local match for speculative grants. Funding includes the fifty-three percent of multimodal funds generated by the State Transportation Package gas tax increase of $26,000 from 2018 through 2031.

c) *Capitol Boulevard Corridor, M Street to Israel Road*

The Capitol Boulevard Project includes street improvements to create great bicycling, walking, and transit environments, reduce traffic congestion and slow traffic in neighborhoods. There are many steps to this project. The Capitol Boulevard Corridor Plan includes projects such as constructing three roundabouts at the intersections of Capitol Boulevard and T Street, X Street, and Dennis Street.

More detailed projects, costs, and revenues are outlined in the 2026-2031 Capital Facilities Plan.

H. Water Systems and Facilities

1) Overview

Tumwater provides water to both residential and non-residential customers within Tumwater's water service area, consisting of approximately 22.4 square miles.

The Comprehensive Water System Plan reviews land use demands within Tumwater's service area, supply sources, water conservation requirements, system deficiencies, capital improvements to address those deficiencies, and water quality needs and supporting programs such as wellhead protection and utility operations and maintenance. This plan recognizes the need for coordination between land use and water service provision. The City Council adopted the Comprehensive Water System Plan following approval by the Washington State Department of Health. The plan is required to be updated every ten years.

The Tumwater's Wellhead Protection Plan, most recently updated in 2016, addresses groundwater protection. The plan identifies regulated areas where a program systematically reviews the management, use, and disposal of hazardous materials, details an early response-monitoring program, and outlines policies and goals for maintaining protections for groundwater. Aquifer and wellhead protection requirements are found in Title 16 of the Tumwater Municipal Code. The implementation of Tumwater's Low Impact Development ordinance will provide best management practices in design and development to minimize stormwater runoff that could potentially harm Tumwater's water sources.

DRAFT

The Comprehensive Water System Plan and the Wellhead Protection Plan and subsequent updates are hereby incorporated by reference. It should be consulted for more detailed information on water systems and facilities within Tumwater.

Anywhere request for water service beyond the limits of existing water infrastructure is subject to the 1996 Thurston County Coordinated Water System Plan, as amended.

The six-year Capital Facilities Plan identifies funding for the Tumwater water system, and it is incorporated by reference.

2) Inventory

Existing water system facilities that serve this area include twelve active groundwater wells, three active and two inactive reservoirs in three pressure zones, three booster pump stations, and a pipeline distribution network with four pressure reducing valves. Tumwater owns and operates a satellite system, Lakeland Manor.

3) Level of Services Standards

The 2021 Water System Plan does not use the level of service to analyze system function and needs but uses system analysis and professional judgement to prioritize system improvements. That priority system is set out as follows from highest to lowest:

- Regulatory Compliance
- Health and Safety
- Water Quality – General Improvements
    - Reliability and Redundancy
    - Fire Flow and Pressure
    - Coordination with other Projects

4) Planned Projects, Costs, and Revenues

The Water System maintenance and upgrades are funded by Operation income, Connection Fees, and Revenue Bonds. Major projects in the 2024-2029 Capital Facilities Plan are found in Table LPP-12.

Table LPP-11. Planned Water System Projects, Costs, and Revenues in Tumwater.

Project	Plan	Revenue/Cost
Water Rights Acquisition	Water System Plan	Operating Income, Connections, and Revenue Bonds $6,400,000
Brewery Wellfield - Water Production Infrastructure and Well Decommissioning	Water System Plan	Operating Income, Connections, and Revenue Bonds $10,400,500 and 750,000
Southeast Reservoir & System Expansion	Water System Plan	Operating Income, Connections, and Revenue Bonds $26,872,222

Source: Tumwater 2024-2029 Capital Facilities Plan.

a) Water Rights Acquisition

This program includes funding for the purchase and processing of existing water rights to support system growth demands. Funding shown reserves funds for water right acquisitions as opportunities to acquire rights become available.

b) Brewery Wellfield – Water Production Infrastructure and Well Decommissioning

This project provides funding for the development of water production infrastructure necessary to put to beneficial use the water rights acquired from the former Brewery and funds to decommission the existing wells.

This project assumes that new wells will be developed as part of the Brewery Wellfield. Existing wells will be required to be decommissioned by WAC.

c) Southeast Reservoir and System Expansion

This program is intended to design and construct a new three-million-gallon reservoir on a property south of 93rd Avenue. This property has already been acquired for this purpose. This project would extend the piping along 93rd Avenue to extend to the reservoir located at the Preserve Development.

DRAFT

4. Other Publicly Operated Capital Facilities and Services

A. Introduction

Several services are provided by other service providers but are considered essential to serve growth and Tumwater reviews adequacy:

- Library Services
- School Facilities
- Sewage Treatment Facilities and Sanitary Sewer
- Solid Waste Management
- Transit Services

K. Library Services

1) Overview

Tumwater Timberland Library is a member of the Timberland Regional Library District. The district consists of 20-nine community libraries in five counties in southwest Washington State: Grays Harbor, Lewis, Mason, Pacific, and Thurston counties. The Administrative Service Center is in Tumwater. Books and other materials are exchanged freely with all member libraries within the district.

Tumwater Library began in 1965 as a storefront library in the Southgate Shopping Center. Tumwater has been a part of the Timberland Regional Library District since 1983. A 17,300 square-foot library, located adjacent to Tumwater City Hall on New Market Street, opened in March 1995.

2) Inventory

The Timberland Regional Library and the Timberland Regional Library Headquarters are located within Tumwater. Tumwater owns the building and Timberland Regional Library leases the space from the city.

3) Level of Services Standards

The Timberland Regional Library updates their Strategic Plan every two years. The 2024-2025 Plan outlines strategic directions for services and mission, values, and vision.

Timberland Regional Library wants to assist and improve digital literacy across generations and continue to be a low barrier access point to technology, including charging, printing, and access to Wi-Fi. This helps support opportunities for learning and employment.

Timberland Regional Library wants to improve communication and outreach to increase awareness of existing services, meaningfully engage with BIPOC and Tribal communities, and communicate and receive feedback for continuous learning and improvement.

Finally, Timberland Regional Library wants to support school-aged youth. This will be done by creating appealing spaces for kids of all ages to socialize and access resources. These spaces will support programs and develop deeper connections with local schools and education providers.

DRAFT

4) Planned Projects, Costs, and Revenues

The Timberland Regional Library Issued a 2024 Annual Report and 2025 Budget, available on their website. The library system is funded by property taxes, timber, and other sources. The 2024 total Revenue was $26,884,484 and expenditures were $28,452,840.

At the beginning of 2025, the Tumwater Library started a remodel to modernize the library to include a new children's areas, improved spaces for all ages, and a layout that improves accessibility. The library will be modernized and updated to keep up with the growing needs and demands of the community with progressed internet and digital services. The updated space will include improved areas for families and children of all ages to gather and use.

For more information, please refer to the Timberland Regional Library 2024 Annual Report, 2024-2025 Strategic Plan, and current Budget available on Timberland Regional Library's website.

C. School Facilities

1) Overview

Tumwater has a modest role to play in school planning. Public schools are operated by local school districts and governed by state and federal laws and regulations.

The gap between available space and need increases when residential growth accelerates while the planning, financing, permitting and construction period for school construction has lengthened. As a result, school capacities typically lag behind the increase in housing. Schools are categorized as Elementary, Middle, and High Schools. There will be variations from district to district of grade configurations, class size, and curriculum based needs depending on the district's educational program.

State and federal funds provide a large part of school financing.

School districts raise additional funds from local property taxes. State laws set standards for service levels and facility development, such as the site size and enrollment. They also specify funding methods. These laws perform much of the role of a functional plan for schools. The Olympia and Tumwater School Districts' Capital Facilities Plans are found in the six-year Capital Facilities Plan appendix. These plans outline enrollment projections, level of service, financing, and more.

Tumwater works in cooperation with the Tumwater and Olympia School Districts to determine and plan for the needs of the districts in Tumwater's urban growth area for the 20-year planning period. The districts have provided information regarding proposed new school facility locations and site criteria.

Tumwater will work with the Tumwater School District to provide the facilities needed as population growth in Tumwater and its urban growth area occurs. Further, the annual update of Tumwater's six-year Capital Facilities Plan includes short-term needs for both Tumwater and Olympia School Districts, and it is incorporated as part of the Lands for Public Purposes Element by reference.

DRAFT

Tumwater and the school districts should meet regularly to formally discuss the district's capacity needs and evaluate siting options, including the need for new and upgraded schools to address capacity, location of expected new growth, zoning and anticipated growth, and issues such as location, configuration, joint use, and school capture areas.

Tumwater can help to achieve this goal by ensuring that the environment around existing and future school sites is properly conducive to their needs. Tumwater should consider the safety needs of schoolchildren and the need for school buildings to be appropriately accessible to their service areas. Additionally, Tumwater can ensure that school sites are planned for locations with adequate public facilities and services such as sewer, water, transportation, and law enforcement services.

2) Inventory

The Tumwater School District serves most of Tumwater. The Olympia School District serves small areas of Tumwater near the northeast City limit.

Currently, the Tumwater School District has six Elementary Schools, two Middle Schools, and four High Schools. Table LPP-13 below identifies each school facilities capacity or number of students a building can serve adequately, current enrollment number for each facility, and the surplus/deficit. A negative deficit depicts potential overcrowding, where the number of students is higher than the level of service the facility is designed to accommodate.

Unlike the Tumwater School District, which predicts growth and more enrollment over the next 20 years, the Olympia School district is forecasted to continually decrease by an average of one hundred students per year districtwide. Table LPP-13 shows the school capacity and 2024 headcount for Tumwater School District schools and Table LPP-14 shows the District Enrollment forecast through 2030. According to their Capital Facilities Plan, the District expects to need a new 600 capacity elementary school by the 2028-29 school year.

Table LPP-12- Tumwater School District Inventory, 2024.

Facility	Capacity	2024 Headcount	Surplus/Deficit
Elementary Schools	**2,684**	**2,688**	**-4**
Black Lake[1]	440	386	54
East Olympia[2]	440	563	-123

1. In Tumwater.
2. In unincorporated Thurston County.

Table LPP-13. Tumwater School District Enrollment Forecast, 2024.

	Sept.	Projected					
	2024	2025	2026	2027	2028	2029	2030
K-5 Headcount	***2,674***	*2,738*	*2,805*	*2,882*	*2,961*	*3,065*	***3,171***
6-8 Headcount	***1,414***	*1,436*	*1,458*	*1,480*	*1,503*	*1,556*	***1,609***
9-12 Headcount	***2,061***	*2,084*	*2,110*	*2,142*	*2,179*	*2,252*	***2,326***
TOTAL K-12	***6,149***	***6,258***	***6,373***	***6,504***	***6,643***	***6,873***	***7,106***

Source: Tumwater School District, 2024 – 2030 Capital Facilities Plan, Table 2 District Enrollment Forecast.

The total student population for the Tumwater School District in 2024 was 6,077 and is expected to increase to 7,106 by 2030.

3) Level of Services Standards

To determine the need for new schools and to account for special growth conditions within the district, Tumwater School District has developed a method to project student enrollment. This method relies upon growth projections supplied by Thurston Regional Planning Council, consultants, and experience within the district. Two factors require that these projections be updated yearly. They are varying kindergarten enrollment, and unanticipated student in-migration.

The number of students per household is a factor the district uses to plan for new schools. Data reporting the number of students per household, by type of house, number of bedrooms, and grade level is available from the U.S. Census. This information is published by the U.S. Department of Commerce, Bureau of Census and is titled "Demographic Multipliers for Common Configurations of Standard Housing Types for School-Age Children (by Grade Category)."

The district has adopted the multipliers for the Pacific Northwest Region as the standard for determining the number of students generated from new developments. The multipliers adopted by the district have been adjusted from the Census multipliers to reflect the actual grade breakdown in the District.

The School District utilizes a Boundary Committee to monitor enrollment in the district

and recommend modifications of attendance zones for elementary, middle, and high school sites. The Committee consists of staff and interested parents. The committee makes its recommendations to the School Board for actual adoption. The location of new elementary schools is based upon growth trends around existing schools and the location of new development. General areas are identified for the placement of a new elementary school because of the need to provide relief from overcrowding of existing elementary schools. The same is true for secondary schools.

Based on the Tumwater School District 2023-2029 Capital Facilities Plan, forecasted population and growth in the School District will require a new Elementary School by 2028.

Within the six year horizon, the Olympia district does not plan to construct or expand facilities to meet enrollment changes. The district is currently studying the need to remodel or make changes to facilities in conjunction with a committee of volunteers. As such the district has chosen to wait for the results of this work before making major plans to expand or remodel existing facilities.

4) Planned Projects, Costs, and Revenues

Please refer to each School Districts Capital Facilities Plan to see the forecasted projects and costs over the 2026-2031 timeframe.

D. Sewage Treatment Facilities and Sanitary Sewer System

1) Overview

Wastewater contains many pollutants and must be cleaned before the water is released back to the environment. Wastewater refers to any water that needs cleaning after it is used indoors – such as water from dish washing, laundry, baths/showers, toilets, and countless other sources. All wastewater produced in Tumwater that is part of the sanitary sewer system is managed and treated by LOTT Clean Water Alliance plant. LOTT provides sewage treatment for all regional wastewater flows within Tumwater, Lacey, Olympia and select areas of Thurston County. Tumwater installs and maintains over 120 miles of sewer pipes to get wastewater to our regional wastewater treatment plant in downtown Olympia.

There are two primary functions for wastewater management; collections and treatment. Tumwater manages the collection of the wastewater generated from developed properties to Tumwater's collection system. Through gravity, force mains and pump stations, wastewater is delivered to the LOTT Clean Water Alliance for treatment, disposal, and reclaimed water generation.

2) Inventory

Sanitary sewage treatment in Tumwater is provided by the LOTT Clean Water Alliance. The LOTT system is based on a joint agreement, and it was created to serve the sewage collection and treatment needs of the cities and urban growth areas in north Thurston County. Participating members include the cities of Lacey, Olympia, Tumwater, and Thurston County.

DRAFT

LOTT owns property in Tumwater that was originally purchased to site a future reclaimed water treatment plant and groundwater recharge facilities. However, the 2050 LOTT System Plan indicates those future facilities are likely not needed, and it may not be necessary for LOTT to retain ownership of those properties for utility purposes. LOTT owns reclaimed water pipelines and a storage tank in the Tumwater area, and supplies Class A reclaimed water to Tumwater for irrigation of public spaces such as the Tumwater Valley Golf Course.

Sanitary sewer systems for Tumwater are addressed in detail in the 2015 *Comprehensive Sanitary Sewer Plan*. The *Comprehensive Sanitary Sewer Plan* covers the existing and proposed sanitary sewer collection and conveyance system within City limits.

The *Comprehensive Sanitary Sewer Plan* and any subsequent updates to this plan are incorporated by reference. It should be consulted for information on sanitary sewer systems and facilities within Tumwater.

The *General Sewerage Plan* covers proposed sanitary sewer collection, conveyance, and treatment in the urban growth area. that is more detailed. This plan and any subsequent updates are incorporated by reference. It should be consulted for information on requirements for sanitary sewer development within the urban growth area.

The six-year Capital Facilities Plan identifies funding for the Tumwater sanitary sewer system, and it is incorporated by reference.

3) Level of Services Standards

Tumwater is in discussions with Thurston County, the cities of Olympia and Lacey, and LOTT on a plan to convert existing developments that are on septic systems to LOTT sewer lines. This is intended to reduce surface water and groundwater impacts from these existing systems.

As with the other Tumwater utility plans, a "level of service" method of identification and prioritization is not used. Instead, the plan quantifies overall wastewater management, and contains the following elements:

- An evaluation of the existing collection system to identify any deficiencies.
- An evaluation of future wastewater flows and alternatives to manage them and correct deficiencies.
- An evaluation of the Operations & Maintenance programs.
- Development of a capital program to meet recommendations of the plan, including the financial mechanisms to fund and sustain the utility.

Projects identified in the 2015 General Sewer Plan and Capital Facilities Plan include sewer infrastructure replacements with prioritized areas: Tumwater Hill, Labor & Industries, Capital Boulevard and Palermo well. These mains containing asbestos concrete were installed about sixty-five years ago.

The creation of a new regional Pump Station is planned for the growth areas of Tumwater, not identified in the Capital Facilities Plan. Location and timing of the new station would be dependent on development activity. Tumwater

DRAFT

funding and creation of a pump station would prevent development of on-site septic systems in areas of small developments, where connecting to sewer would not be financially feasible.

In 2023, the City Council adopted the Old Highway 99 Extension Plan. A project that would support the plan and future growth within Tumwater would be to extend sewers to serve southeast Tumwater. The first phase would extend a watermain through the limits of Old Highway 99 and the 79th Avenue roundabout project. The timing of this project is dependent on development activity.

4) Planned Projects, Costs, and Revenues

Major projects in the 2024-2029 Capital Facilities Plan are found in Table LPP-15.

Table LPP-14. Planned Sanitary Sewer Projects, Costs, and Revenues in Tumwater.

Project	Plan	Revenue/Cost
Seismic Resilience	2021 Water System Plan	Operating income, Connection fees $80,000
Annual Sewer Infrastructure Replacement Program	2015 Sewer Plan	Operating Income and Connection Fees $3,194,700
Regional Pump Station	2015 Sewer Plan	Operating Income and Connection Fees $1,745,000
Old Highway 99 Extension: 79th Avenue to 88th Avenue	2015 Sewer Plan	Operating Income and Connection Fees $1,095,000

Source: Tumwater Comprehensive Sanitary Sewer Plan.

E. Solid Waste Management

1) Overview

Thurston County operates the only solid waste disposal facility in Thurston County. Thurston County Solid Waste is responsible for receiving, processing, and safely disposing of the county's solid waste.

When disposed, this garbage is transferred to the Waste and Recovery Center, a state-of-the-art transfer station that opened in May 2000. The transfer station accommodates up to six hundred tons of waste per day. Garbage from the Waste and Recovery Center is loaded onto trucks, hauled to Centralia, and then placed on rail cars to be transported by train to the

Roosevelt Regional Landfill in Klickitat County. The Waste and Recovery Center replaces a landfill which operated on the site between 1972 and 2000.

The *Thurston County Solid Waste Management Plan* addresses waste management in all incorporated and unincorporated areas of Thurston County.

The *Thurston County Solid Waste Management Plan* is hereby incorporated by reference. It should be consulted for information on landfill siting and solid waste management for Tumwater and the urban growth area that is more detailed.

2) Inventory

Each year the solid waste disposal system is reviewed through the County's six-year Capital Facilities Plan. The County's six-year Capital Facilities Plan identifies those capital projects required to meet the policy goals and objectives in the *Thurston County Solid Waste Management Plan* and the *Thurston County Comprehensive Plan*, to comply with federal and state law, and address facility safety, operational, capacity, and obsolescence issues.

The project assessment objectively ranks projects based on:

- Ability to meet the level of service.
- Regulatory compliance
- Health and safety goals and policies
- Sustainability
- Technical feasibility
- Other associated costs

Projects are scheduled over a six-year period relative to their ranking.

Most waste generated within the county passes through the Thurston County Waste and Recovery Center prior to being sent for disposal or recovery. The Thurston County Waste and Recovery Center was built on the Hawks Prairie Landfill and was opened when the landfill closed in 2000. The landfill had served as the primary disposal facility in the county.

The Thurston County Waste and Recovery Center contains a collection of solid waste facilities, including a tollhouse, a recycling drop off center, a yard waste drop off facility, HazoHouse, a hazardous materials drop off center, and a transfer station. The facility is located just outside of Lacey in the northeastern part of the county along the I-5 corridor. In addition, there is a demonstration garden called the "Closed Loop Park." Thurston County provides space for Goodwill Industries for a collection center at the entrance to the facility.

On average, the Thurston County Waste and Recovery Center receives about 548 tons per day of municipal solid waste.

In addition to household solid waste, this includes:

- Sixty-three tons/day of plastic
- 148 tons/day of yard and food waste; and
- 450 tons/day of recyclable materials.

3) Pathways to Zero Waste

Despite new technologies and processes that have improved the ability of residents, businesses, and municipalities to handle, sort, and recycle materials, recycling volumes,

including yard and food waste, in Thurston County have not improved, and currently make up less than one percent of the total waste stream or four tons out of 550 tons per day. Solid waste management is an important contributor to greenhouse gas emissions, which Washington is bound by law to reduce by 20-five percent by 2020 below 1990 levels and eighty percent by 2050.

Regionally, Thurston County could not meet the 2020 goal of no net increase in total landfill waste per person. Solid waste collected per person is above the levels needed to reach the region's 2020 and 2035 targets. Waste collected on a per capita basis has increased from a low of 1,140 pounds per person in 2012 to 1,513 pounds per person in 2021.

The state Legislature passed organics management laws in 2022 and 2024. These laws aim to divert organic materials away from landfills through prevention, food rescue, and organics management facilities.

These actions will help Washington achieve its 2030 goal to reduce organic material in the landfill by seventy-five percent.

After July 1, 2024, new and updated local comprehensive solid waste management plans must address the new requirement to provide organic materials collection and management to residential and nonresidential customers. This includes siting new organic management facilities.

After Jan. 1, 2025, comprehensive plans for Thurston County jurisdictions must allow siting of organics management facilities to provide necessary capacity for organics collection.

4) Level of Services Standards

The total amount of garbage disposed of in Thurston County has increased each year since 2012 except 2023. In 2023, Thurston County produced nearly 227,000 tons of solid waste, or roughly 1,500 pounds of trash per county resident. The amount of trash per resident has also held steady in 2022 after increasing every year since 2012.

In 2023, just over 57,000 tons of waste was recycled including organics, about 20 percent of waste produced or 378 pounds per county resident.

Currently the Thurston County transfer station exceeds peak daily customer counts. Based on current and projected population growth and corresponding waste generation rates, the transfer station will need significant investment to construct improvements needed to address service demand. Specific project improvements include site reconfiguration, new scales and scale houses, repair infrastructure, and administrative operations building. A potential second site might be required.

The Infrastructure Management Plan recommended scheduled implementation of thirty-two solid waste capital infrastructure maintenance, repair, and replacement upgrades to the facilities over the planning horizon. Recommendations from the Infrastructure Management Plan were adopted in December 2019 for inclusion in the Thurston County Capital Facility Plan 2021-2026 which are updated on an annual basis for approval by the Board of County Commissioners.

Additional information on the Solid Waste Division capital facility projects and levels of

DRAFT

service can be found in the 2019, Thurston County Public Works, Solid Waste Facility Condition Assessment and Infrastructure Management Plan.

F. Transit Services

1) Overview

Intercity Transit is the business name for the Thurston County Public Transportation Benefit Area. The service boundary includes the urbanized areas of Lacey, Olympia, Tumwater, and Yelm. All Intercity Transit services must be provided within the Thurston County Public Transportation Benefit Area boundary except for the Vanpool and Express bus service, which serve commuters who either begin or end their commute in Thurston County.

a) Regional Transit Facilities and Services

The Intercity Transit Strategic Plan is the master planning document that defines Intercity Transit operations and transportation services offered. The plan, updated annually, highlights goals and policy positions, and capital program and services for a six-year period. It is based on population growth, regional development, and financial forecasting. The Intercity Transit Strategic Plan is hereby incorporated by reference.

2) Transit Service and Facilities Inventory

There are four Intercity Transit routes directly providing service to and from Tumwater: Local Routes 12, 13, 42, and 68. In 2020 Intercity Transit adopted Zero-Fare under Resolution 03-2019 on fixed-route and Dial-A-Lift for three additional years, beginning when the General Manager determines fixed route and Dial-A-Lift services have returned to March 2020 service levels, or until January 1, 2028, whichever is later.

In response to the COVID-19 pandemic, Intercity Transit significantly decreased its systemwide fixed-route bus service during 2020; according to the Transit Development Plan for years 2026-2031, Intercity Transit intends to complete restoration of service volumes. By the end of 2024 Intercity Transit had restored service to pre-pandemic 2019 amounts. There are two identified potential candidates for expanded service in Tumwater: Henderson Boulevard and Old Highway 99 between Tumwater Boulevard and River Drive. Currently there are 113 active bus stops in Tumwater.

a) Fixed Local Transit Routes

Route 12: Olympia to Tumwater, via Labor and Industries, Israel Road, Tumwater Middle School, Linwood Ave, South Puget Sound Community College, the County Courthouse, to the Olympia Transit Center.

- Weekdays: 30-minute peak and 60-minute off-peak service, 6:00 a.m. – 9:40 p.m.

5) Planned Projects, Costs, and Revenues

For planned projects, costs, and revenues, please refer to the most current version of the Thurston County Capital Facilities Plan.

DRAFT

- Weekends: 30-minute service from 7:30 a.m. – 9:40 p.m.

Route 13: Olympia to Tumwater, a trunk route via Capitol Blvd, Tumwater Square, and to Labor and Industries

- Weekdays: 15-minute service 6:15 a.m. – 5:45 p.m. then 30 to 60-minute service 6:15 p.m. – 9:40 p.m.
- Weekends: 30-minute service from 7:45 a.m. – 9:40 p.m. Saturdays and Sundays

Route 42: Olympia to Tumwater, a route via Deschutes Parkway to the Courthouse, South Puget Sound Community College, Quixote Village, and to Family and Juvenile Court to Black Lake and Cooper Point

- Weekdays only: 45- 6:11 a.m. to 7:34 p.m.

Route 68: Lacey, to Tumwater, to Capital Mall, a neighborhood collector via Lacey Transit Center to Lacey Boulevard, to the County Fairgrounds, To Ruddell Rd, to the Corp Center off College, Henderson Boulevard to Yelm Highway, Tumwater Square, to South Puget Sound Community College, to Capital Mall transfer station. Weekdays: 30-minute service 5:26 a.m. – 10:34 p.m.

- Saturdays and Sundays: 30-minute service from 6:56 a.m. – 1:34 p.m.

b) *Paratransit Service*

Dial-A-Lift: On-demand service at least 24-hour reservation for qualified mobility challenged clients: operates seven days a week throughout the service district following the same operating hours as fixed route service. The service covers up to ¾ mile up to one ½ miles within a fixed route.

c) *Commuter Vanpool Program*

Vanpool: Groups of three or more people lease a commuter van monthly to commute to/from work. A van group must originate in or end in Thurston County to qualify for its use. Intercity Transit currently has approximately 186 vanpools operating on weekdays throughout the Puget Sound area.

d) *Employment Assistance Program*

Village Vans: Federal and state funded programs offer two free programs: driver training/job skills and work-related transportation for low-income job seekers. Vans operate throughout Intercity Transit's service district. Program coordinates efforts with several service organizations and South Puget Sound Community College, including "WorkFirst Community Jobs."

e) *Capital Facilities in Tumwater*

Tumwater Square: Currently, two routes serve this transfer station on weekdays and weekends. Tumwater Square includes bus shelters and waiting areas on both sides of Cleveland Avenue, next to the Safeway grocery store. Routes 13 and 68 serve this stop.

State Office – Department of Labor and Industries: Intercity Transit maintains a stop at the main entrance to the Labor and Industries Building. Routes 12 and 13 serve this stop.

South Puget Sound Community College: InterCity Transit maintains two stops at the

DRAFT

community college, one at the main entrance and one off Barnes Boulevard. Routes 42, 43, and 44 serve this stop.

3) Level of Services Standards

The Intercity Transit Strategic Plan includes operational policy positions that guide the agency and its vision for public transportation service delivery in the region, including within Tumwater. The Plan outlines work for 2025 within Tumwater including seventeen bus stops to be enhanced with larger landing pads, shelter ready, and front and rear door accessible.

Intercity Transit states services and routes are dependent on population, growth, and demand. An issue for Tumwater is the road infrastructure and transit supportive public roadways for expanded routes.

By 2025 Intercity Plans to have more frequent and direct routes along busy corridors, meaning 15 minute interval routes. They also plan to have better connectivity between Tumwater schools, South Puget Sound Community College, Capitol Campus, and surrounding neighborhoods. Furthermore, IT has stated to expand its service by adding eighty new stops to meet growing areas of the community.

4) Planned Projects, Costs, and Revenues

The goal of the 2025-2030 Intercity Transit Strategic Plan is to implement capital improvements and a level of service that can be sustained for the near future.

For a complete breakdown of planned projects, costs, and budget please refer to Intercity Transit's most current Strategic Plan and Budget.

DRAFT

Appendix B New Capital Projects Equity Checklist

A. Describe the proposed action, policy, or decision and an expected timeline.

B. Describe the intended good outcomes of the proposal.

C. What unintended consequences could result from the implementation of this proposal? Consider outcomes from similar efforts in other places, and any concerns stakeholders raise.

D. Describe the impacted populations of this proposal. Consider intentional and unintentional impacts, as well as a variety of groups.

E. Describe other similar or complementary services already provided to the impacted populations?

F. Which Comprehensive Plan goals are addressed by the proposal?

G. What kind of information informed the development of the proposal?

1) Data.
   - Client or customer.
   - Demographic.
   - Expenditure or revenues.
   - Equity Index indicators.
   - Geography.
   - Service or program provider.
   - Other, please describe.

2) Stakeholder feedback.
   - Community-based organizations.
   - Private sector.
   - Government.
   - Tumwater-established board.
   - Community workgroup.
   - General public.
   - Tribal government.
   - Other, please describe.

3) Other, please describe.

H. If stakeholder engagement informed the proposal, what kind of engagement was used, and for whom?

1) Collaborated.

2) Consulted.

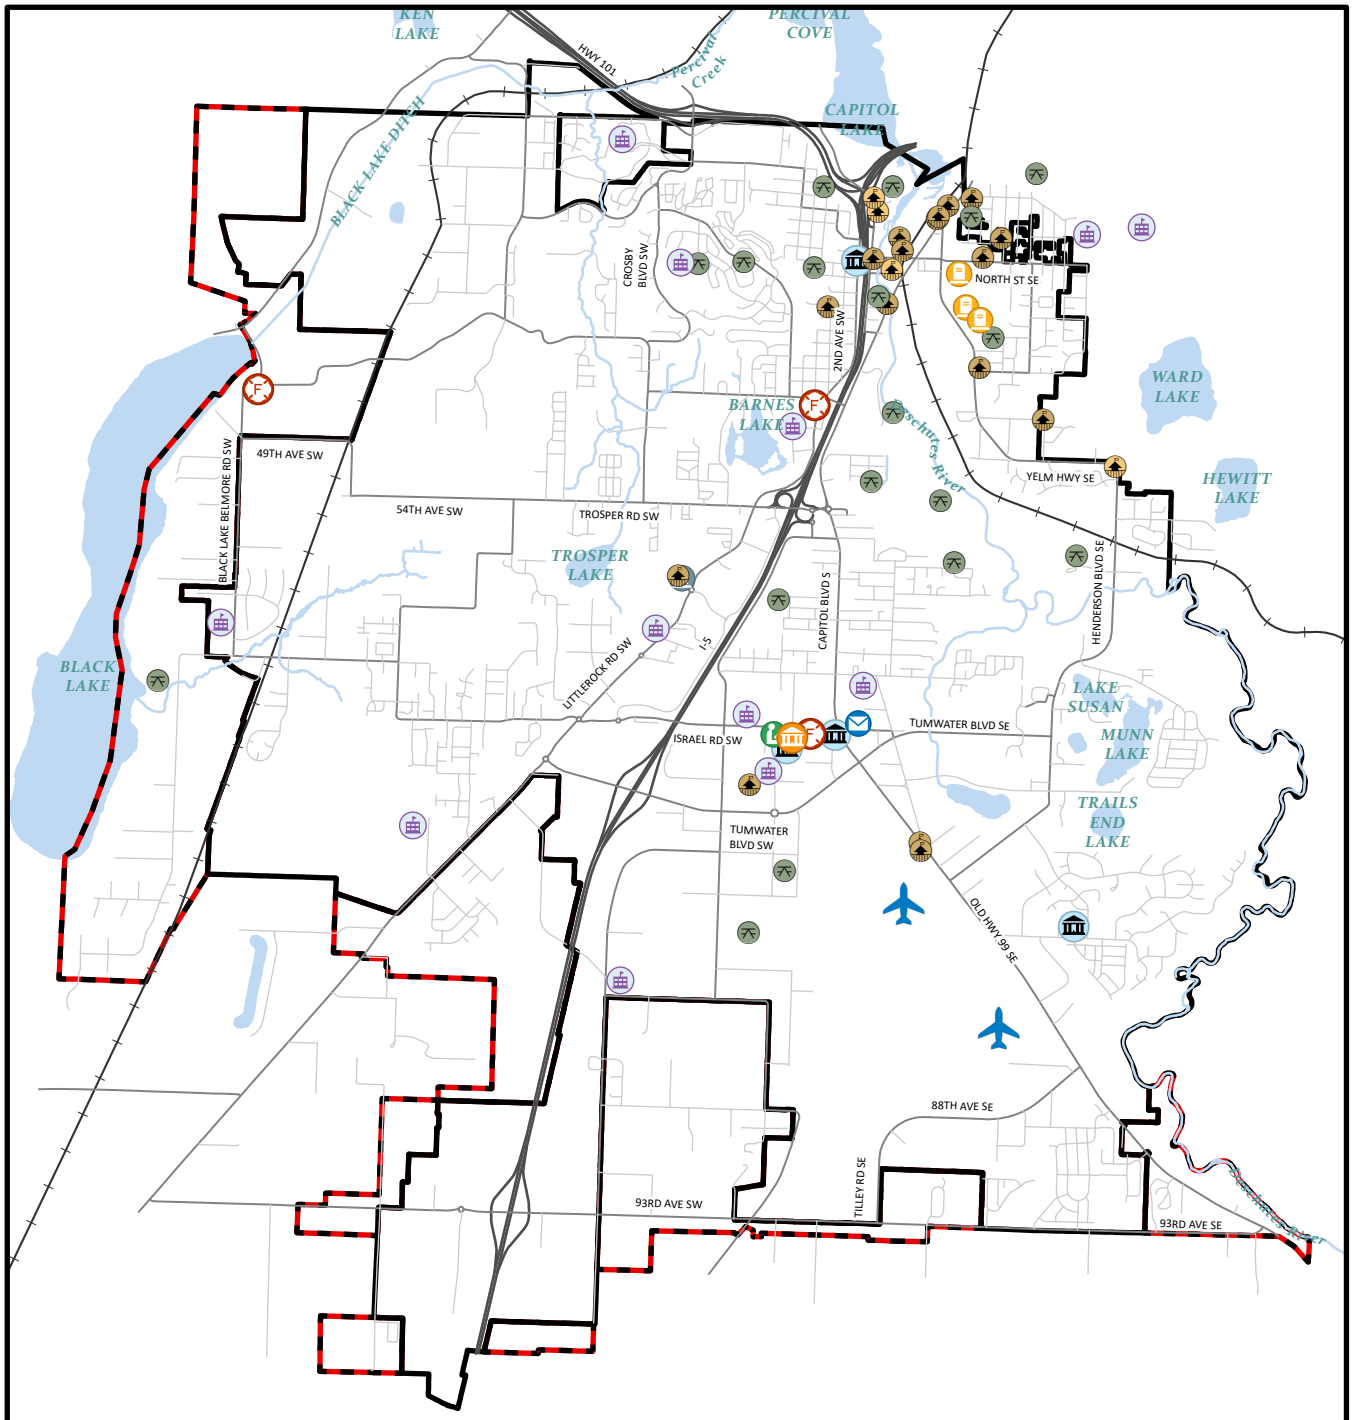
3) Informed.

I. If the proposal was informed by stakeholder engagement, describe the support for and concerns raised about the proposal.

J. If the proposal was not informed by stakeholder engagement, why? How might this exclusion affect the proposal and its consequences?

K. What disparities exist or could be created by the proposal? Consider various disparities, such as racial, geographic, gender, age, educational, income-based, language-based, ability-based, citizenship-status-based, sexual orientation-based, and more.

DRAFT



L. How does this proposal most effectively improve equitable outcomes in Tumwater?

M. Who will benefit from this proposal? Why are other groups excluded from benefits?

N. How will impacts be monitored after this proposal is implemented? Why were these metrics chosen?

O. Considering your responses to the prompts and questions above, are there any modifications or additions that could be made to the proposal to serve people more equitably? How feasible are these changes, and how might they be implemented?

DRAFT

1. Introduction

A. Background

The Transportation Plan is part of Tumwater's Comprehensive Plan. It was created to meet the state Growth Management Act (Chapter 36.70A RCW) requirements.

This section of the Transportation Plan specifies goals, policies, and actions meant to guide elected officials and Tumwater staff when considering transportation investments and changes. The goals, policies, and actions also serve to ensure coordination with separate Comprehensive Plan Elements, regional plans, and County-Wide Planning Policies. Additionally, they help implement certain actions within the Transportation Plan.

Part 1 – Goals Policies, and Implementation Actions establishes Tumwater's goals and policies to set forth a direction to support the provision of transportation facilities for development in Tumwater.

The goals and policies of the Transportation Plan are guided by the state Growth Management Act and the Thurston County County-Wide Planning Policies and the vision of a Tumwater. The Transportation Plan's goals and policies are coordinated with the other Elements and regional plans.

The Transportation Plan's goals and policies are the policy basis for the draft implementation actions in the Plan and those future actions that will be developed over the next 20 years which will be the foundation for Tumwater's annual work programs to address public services and facilities for development.

Part 2 – Technical Information provides the technical analysis of Tumwater transportation system and provides the basis for the goals, policies, and draft implementation actions in Part 1. Part 2 discusses the status and level of transportation facilities needs for Tumwater to support the 20-year growth projections for Tumwater.

B. How to Read this Part of the Transportation Plan

In Part 1, Chapters 2 and 3 discuss the Transportation Plan's connection to the goals of the state Growth Management Act and the Thurston County County-Wide Planning Policies.

Chapter 4 presents each goal with an explanation of how to read the tables and then presents each of Tumwater's transportation goals in detail with an explanation of the importance of each goal and how it helps to improve Tumwater's transportation system.

Appendix A contains the draft implementation actions, which are intended to be a source of annual work program items that serve to implement the goals and policies of the Transportation Plan.

The annual work programs will further refine the implementation actions prior to their being put into practice. It is expected that implementation actions will be further amended, added, or subtracted as needed over the course of the 20 year Comprehensive Plan as new opportunities

DRAFT

arise to meet the intent of the Transportation Plan's goals and policies.

DRAFT

2. Growth Management Act – Plan Goals

The State Growth Management Act (Chapter 36.70A RCW) requires that Tumwater demonstrate that each Element in its Comprehensive Plan meets the relevant fifteen planning goals contained within the Act. The fifteen goals guide the development and adoption of Tumwater's Comprehensive Plan and development regulations.

The following is a summary of how the Transportation Plan addresses the goals related to transportation.

3. ***Transportation.*** *Encourage efficient multimodal transportation systems that will reduce greenhouse gas emissions and per capita vehicle miles traveled, and are based on regional priorities and coordinated with county and city comprehensive plans.*

The Transportation goal was updated by the state legislature in 2023 to add reducing greenhouse gas emissions and per capita vehicle miles traveled. Achieving this goal will be done through a combination of goals, policies, and actions in the Land Use Element and Transportation Plan. The Land Use Element will contain goals, policies, and actions that ensure coordination with regional and local transportation plans. The Land Use Element will also propose residential, mixed-use, and neighborhood commercial land use designations that will encourage multi-modal, transit-oriented development. Coordination with the new Climate Element will also be required.

12. ***Public facilities and services.*** *Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.*

The Transportation Plan provides the basis for determining the transportation facilities that are necessary to support development shall be adequate to serve the development at the time the development is available for occupancy.

15. ***Climate change and resiliency****. Ensure that comprehensive plans, development regulations, and regional policies, plans, and strategies under RCW 36.70A.210 and chapter 47.80 RCW adapt to and mitigate the effects of a changing climate; support reductions in greenhouse gas emissions and per capita vehicle miles traveled; prepare for climate impact scenarios; foster resiliency to climate impacts and natural hazards; protect and enhance environmental, economic, and human health and safety; and advance environmental justice.*

The Conservation Element, Land Use Element, and Transportation Plan of the Comprehensive Plan will need to address this as a new goal in coordination with the new Climate Element. A new overarching Comprehensive Plan goal will address increasing climate resiliency by promoting sustainability, reducing pollution, promoting healthy habitats, and supporting clean air and water.

DRAFT

3. County-Wide Planning Policies

The Growth Management Act requires that comprehensive plans be consistent with the Thurston County County-Wide Planning Policies, which were last amended in 2025.

The following is a list of relevant policies that apply to the Transportation Plan. All County-Wide Planning Policies are adopted as Appendix B: *Thurston County County-Wide Planning Policies* as part of the Comprehensive Plan.

II. Urban Growth Areas

An overview of existing and proposed transportation facilities is found in Part 2: Technical Information of the Transportation Plan to assist with the assessment of transportation services in the urban growth area.

III. Promotion of Contiguous and Orderly Development, Provision of Urban Services, and Protection of Rural Areas

Part 2 – Technical Information provides the basis for siting and the future need for the expansion of transportation facilities that Tumwater provides.

IX. Transportation

The Transportation Plan is the primary inventory of the transportation system, and references to more in depth plans, and some long-term goals for improving multi-modal transit options, Part 2 – Technical Information provides additional detail.

DRAFT

4. Transportation Plan Goals and Policies

A. How to Read These Tables

The Transportation Plan's goals and policies are not in priority order.

Appendix A provides a list of the draft implementation actions by goal and policy that will be considered when developing annual work programs for implementing the Transportation Plan's goals and policies.

1) Department Leads

Implementation of the Transportation Plan's policies are associated with three different Tumwater departments:

CDD Community Development

TED Transportation & Engineering

2) Period

Each of the Transportation Plan's policies is associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

B. Growth Management Goals

Goal T-1 **Improve and maintain a complete, interconnected system that efficiently supports people walking, rolling, biking, accessing transit, and driving.**

Why is this Goal Important?

The Transportation Plan aims to create a safe, efficient, and multimodal transportation system that supports land use goals, reduces reliance on driving, allows dignity and independence for those unable to drive, and enhances options for walking, rolling, biking, and transit.

It emphasizes managing congestion, improving freight mobility, and developing a connected street grid to increase neighborhood accessibility.

The plan also focuses on expanding transit services, building low-stress bicycle and pedestrian networks, preserving rail corridors for future use, and ensuring access to general aviation facilities.

DRAFT

Policies		Lead	Period
T-1.1	Work toward a transportation system that provides for the safe and efficient movement of people and goods, supports adopted land use plans, reduces the need to drive, and provides alternative travel choices.	TED	Term of the Plan
T-1.2	Prioritize alternatives to vehicle capacity projects to address congestion, preserve an acceptable community scale for roadways, and minimize transportation impacts on active mode travelers.	TED	Term of the Plan
T-1.3	Decrease the number of trips made in single-occupancy vehicles through land use plans, development codes, and design standards that encourage walking, bicycling, transit use, and other alternatives to driving separately.	TED	Term of the Plan
T-1.4	Promote efficient, timely, and safe movement of freight within the region by planning for freight access to and from major freight destinations and implementing design standards to accommodate delivery trucks while minimizing heavy freight on local streets.	TED	Term of the Plan
T-1.5	Develop an interconnected grid of local streets to improve travel options, reduce congestion and vehicle miles traveled, and increase neighborhood connectivity.	TED	Term of the Plan
T-1.6	Advocate for Intercity Transit to provide reliable and effective transit options commensurate with Tumwater's evolving needs and follow Intercity Transit's transit level of service standard.	TED	Term of the Plan
T-1.7	Provide bicycle facilities with a level of service which meets or exceeds a Level of Traffic Stress 1 or 2 throughout Tumwater.	TED	Term of the Plan
T-1.8	Provide pedestrian facilities with a level of service that meets or exceeds a Level of Traffic Stress 1 or 2.	TED	Term of the Plan

DRAFT

	Policies	Lead	Period
T-1.9	Continue to pursue a Vehicle Level of Service Standard D except for the regional strategy corridors which can exceed adopted LOS standards.	TED	Term of the Plan
T-1.10	Ensure the continued long-term viability of existing and rail-banked rail lines for future freight and passenger rail travel.	TED	Term of the Plan
T-1.11	Allow for efficient access to the Port of Olympia's Olympia Regional Airport and New Market Industrial Center.	TED	Term of the Plan
T-1.12	Maintain active transportation infrastructure like sidewalks and bike lanes to make sure that vegetation and debris does not hinder the use of these facilities.	TED	Term of the Plan

Goal T-2 Prioritize safety and accessibility for all users.

Why is this Goal Important?

Tumwater's transportation policies focus on enhancing safety and accessibility for all users, especially vulnerable populations, by developing safe walking and biking routes, ensuring Americans with Disabilities Act compliance, and improving transit facilities.

Tumwater emphasizes designing complete streets that promote safe behavior, reduce traffic conflicts, and foster vibrant, walkable neighborhoods through thoughtful infrastructure elements like lighting and pedestrian amenities.

	Policies	Lead	Period
T-2.1	Design transportation infrastructure to encourage safe user behavior and prioritize safety improvement projects at locations with a history of serious injury or fatality collisions and/or risk factors for severe crashes especially where nonmotorized users are involved.	TED	Term of the Plan
T-2.2	Enhance the safety and security of those who use, operate, and maintain the transportation system.	TED	Term of the Plan

Policies		Lead	Period
T-2.3	Design and construct complete streets and roads based on the adoption of a 'Complete Streets Ordinance', which would encourage neighborhood-scale planning efforts to identify prioritized active transportation routes that enhance connectivity and walkability, especially to and from schools, transit connections, and activity centers.	TED	Term of the Plan
T-2.4	Explore strategies to reduce conflict points and optimize safety for all transportation system users.	TED	Term of the Plan
T-2.5	Create safe and vibrant neighborhoods with places that build community and encourage active travel through the provision of street lighting, pedestrian buffers, trees, benches, and other street elements that make walking safe and pleasant.	CDD TED	Term of the Plan
T-2.6	Provide safe and interconnected walk and bike routes to all schools in Tumwater and encourage their use.	TED	Term of the Plan
T-2.7	Support safe, convenient, and cost-effective transportation services for non-drivers, such as youth, elders, people with disabilities, and low-income populations.	TED	Term of the Plan

Goal T-3 Invest wisely to support a resilient and maintainable transportation system

Why is this Goal Important?

Tumwater's transportation strategy emphasizes resilience by retrofitting infrastructure and building future infrastructure wisely to withstand climate impacts and ensuring robust emergency response through a well-connected street grid.

Tumwater prioritizes maintenance and cost-effective operations by exploring innovative technologies and materials, while coordinating with various agencies to align transportation projects with land use and community goals.

Additionally, Tumwater seeks sustainable funding sources and requires new developments to contribute proportionately to transportation system improvements that support all modes of travel.

Policies		Lead	Period
T-3.1	Invest in transportation projects that provide lasting benefits and reflect the goals of the Comprehensive Plan, as reflected by the project prioritization criteria.	TED	Term of the Plan
T-3.2	Prioritize preventative maintenance programs, preservation, operation, and repair of the existing transportation system to minimize life-cycle costs.	TED	Term of the Plan
T-3.3	Use technology-based approaches to address transportation congestion, safety, efficiency, operations, and better integration of transportation modes.	TED	Term of the Plan
T-3.4	Require new developments to pay for their proportionate share of impacts on the transportation system.	TED	Term of the Plan
T-3.5	Develop effective transportation project performance measures consistent with community and regional objectives such as improved mobility and access, funding opportunities, improved environmental health, and improved safety.	TED	Term of the Plan
T-3.6	Secure adequate funding from all sources to implement the goals and policies that use transportation funding policies and investments to make development decisions predictable, fair, and cost-effective.	TED	Term of the Plan
T-3.7	Retrofit arterial routes and design all future connections for impacts associated with changing climate patterns and natural disasters to build resiliency.	TED	Term of the Plan

Goal T-4 Minimize impacts and advance environmental goals.

Why is this Goal Important?

Tumwater promotes compact, mixed-use development, transit access, and active transportation options to reduce vehicle miles traveled, enhance energy efficiency, and support public health.

Tumwater's transportation policies aim to protect the environment by minimizing impervious surfaces and employing low-impact

development techniques to manage stormwater runoff effectively.

Additionally, Tumwater is committed to environmental justice, ensuring that transportation initiatives do not disproportionately affect minority and low-income communities.

	Policies	Lead	Period
T-4.1	Develop a transportation system that supports compact, mixed-use development and related active transportation travel to reduce per capita vehicle miles travelled, increase energy efficiency, reduce environmental impacts, and encourage physical activity and community health.	TED	Term of the Plan
T-4.2	Increase use of low-impact development infrastructure projects that help capture, filter, store, and reuse stormwater runoff	TED	Term of the Plan
T-4.3	Review and amend local policies, rules, and management activities to eliminate potential negative impacts on fish and wildlife habitat and take advantage of opportunities to incorporate positive impacts	TED	Term of the Plan
T-4.4	Increase overall operating efficiency of the transportation system through the effective use of transportation demand management measures that reduce the need to drive alone.	TED	Term of the Plan
T-4.5	Promote the use of policy, alternative fuels, and technologies that reduce pollution, greenhouse gas emissions, and other environmental impacts from vehicles to reduce per capita vehicle miles travelled 27 percent through 2040 and 41 percent through 2050 compared to a 2022 baseline.	TED	Term of the Plan
T-4.6	Aim to shift at least five percent of travel currently undertaken by single occupancy vehicles to walking, five percent to biking, and five percent to transit.	TED	Term of the Plan

Policies		Lead	Period
T-4.7	**Consider environmental justice policies that protect minority populations and people with low incomes from discrimination and provide meaningful access to public process and information through Title VI requirements.**	TED	Term of the Plan
T-4.8	**Integrate transit into planning for new urban centers by supporting increased densities and the supply of housing in transit corridors**	CDD	Term of the Plan

Goal T-5 Build public support for transportation system improvements by incorporating robust outreach as part of plans and projects.

Why is this Goal Important?

Tumwater is committed to equitable transportation investments, striving for fair distribution of costs and benefits across all segments of the community.

Tumwater emphasizes inclusive public engagement in transportation planning, ensuring that all community members, including non-drivers, individuals with disabilities, and those with limited literacy—have opportunities to participate.

Additionally, Tumwater promotes public understanding of the connection between land use patterns and transportation choices to support informed decision-making.

Policies		Lead	Period
T-5.1	**Build a community of engaged, informed residents by providing broad-based, early, and continuing public involvement opportunities in all aspects of the transportation planning process.**	TED	Term of the Plan
T-5.2	**Participate in coordination activities at local, regional, state, tribal, and federal levels to address the condition or operations of the transportation system, including land use and public facility siting decisions.**	TED	Term of the Plan

Policies		Lead	Period
T-5.3	Present information and provide public participation opportunities for everyone, including people who do not drive, people with disabilities, and/or people with limited literacy skills.	TED	Term of the Plan
T-5.4	Expand coordination between the City and the school districts to better address transportation needs at the school districts' planning stage of new facilities.	TED	Term of the Plan
T-5.5	Ensure that transportation investments are shared equally amongst all segments of the community in terms of associated costs as well as the benefits derived from system performance and travel choices.	TED	Term of the Plan
T-5.6	Promote increased public understanding of the relationships between land use patterns and transportation choices facing Tumwater.	TED	Term of the Plan

DRAFT

Appendix A Draft Implementation Actions

Each of the Transportation Plan goals and policies in Chapter 4 will require Tumwater to take specific actions to implement over the course of the 20-year term of the Comprehensive Plan.

The draft implementation actions in the tables below were developed in coordination with the community, Tumwater staff, and other agencies. The implementation actions in the tables below are intended to serve as the start for developing annual Tumwater work programs.

As the Comprehensive Plan is put into action over the next twenty years, the draft implementation actions will change as new, unforeseen opportunities emerge: new ones may be added, proposed ones may be modified or replaced by other actions.

The draft implementations actions below are intended to be draft work program items that serve to implement the goals and policies of the Transportation Plan. The draft implementation actions will need further refinement before they are incorporated into annual Tumwater work programs.

A. How to Read These Tables

The Transportation Plan goals, policies, and the draft implementation actions associated with them are not in priority order.

Draft implementation actions that can only be undertaken by other entities are not included in this plan.

1) Department Leads

Implementation of the Transportation Plan's policies and implementation actions are associated with three different Tumwater departments:

CDD Community Development

PRD Parks, Recreation, and Facilities

TED Transportation & Engineering

2) Period

Each of the Transportation Plan's policies and the draft implementation actions are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate, based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

DRAFT

Goal T-1 Improve and maintain a complete, interconnected system that efficiently supports people walking, rolling, biking, accessing transit, and driving.

Policies and Implementation Actions		Lead	Period
T-1.1	**Work toward a transportation system that provides for the safe and efficient movement of people and goods, supports adopted land use plans, reduces the overall need to drive, and provides alternative travel choices.**	**TED**	**Term of the Plan**
T-1.2	**Prioritize alternatives to vehicle capacity projects to address congestion, preserve an acceptable community scale for roadways, and minimize transportation impacts on active mode travelers.**	**TED**	**Term of the Plan**
T-1.3	**Decrease the number of trips made in single-occupancy vehicles through land use plans, development codes, and design standards that encourage walking, bicycling, transit use, and other alternatives to driving separately.**	**TED**	**Term of the Plan**
T-1.3.1	Encourage employers to adopt transportation demand management strategies, such as subsidized transit passes, flexible work hours, and telecommuting options and adopt similar strategies for Tumwater staff to the extent possible.	**TED**	Term of the Plan
T-1.3.2	Consider charging for on-street parking in more walkable and higher density areas and reducing minimum parking requirements for new developments.	**TED**	Term of the Plan
T-1.3.3	Develop and track key performance indicators related to single occupancy vehicles usage, such as mode share percentages and vehicle miles traveled.	**TED**	Term of the Plan
T-1.4	**Promote efficient, timely, and safe movement of freight within the region by planning for freight access to and from major freight destinations and implementing design standards to accommodate delivery trucks while minimizing heavy freight on local streets.**	**TED**	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
T-1.4.1	Establish designated truck routes that direct heavy freight traffic away from residential areas.	TED	Term of the Plan
T-1.4.2	Adopt and enforce design guidelines that accommodate delivery trucks in urban planning, including appropriate turning radii, loading zones, and curbside management.	TED	Term of the Plan
T-1.4.3	Collaborate with regional stakeholders to identify and prioritize key freight corridors connecting major freight hubs, such as ports, distribution centers, and industrial zone districts.	TED	Term of the Plan
T-1.5	**Develop an interconnected grid of local streets to improve travel options, reduce congestion and vehicle miles traveled, and increase neighborhood connectivity.**	TED	**Term of the Plan**
T-1.5.1	Require developers to build complete grids, reduce or eliminate cul-de-sacs or dead-end streets, and connect active transportation paths between developments whenever possible.	TED	Term of the Plan
T-1.5.2	In cooperation with the Washington State Department of Transportation, pursue grant funding to study and build new active transportation connections across Interstate 5 or retrofit existing bridges to provide more active mode connections.	TED	Term of the Plan
T-1.6	**Advocate for Intercity Transit to provide reliable and effective transit options commensurate with Tumwater's evolving needs and follow Intercity Transit's transit level of service standard.**	TED	**Term of the Plan**
T-1.6.1	Advocate for more frequent transit service and more transit coverage in Tumwater with an emphasis on the Transit Priority Network.	TED	Term of the Plan
T-1.7	**Provide bicycle facilities with a level of service that meets or exceeds a Level of Traffic Stress 1 or 2 throughout Tumwater.**	TED	**Term of the Plan**

DRAFT

Policies and Implementation Actions		Lead	Period
T-1.7.1	Expand and connect bicycle networks, ensuring future corridor and intersection projects include elements such as protected bike lanes and safe crossings.	TED	Term of the Plan
T-1.7.2	Identify existing bike facilities which do not meet Level of Traffic Stress 2 standards and develop projects to mitigate them with an emphasis on the Bicycle Priority Network.	TED	Term of the Plan
T-1.7.3	Identify areas of expansion for Level of Traffic Stress 2 bike facilities based on distribution of activity centers and key destinations.	TED	Term of the Plan
T-1.7.4	Require bicycle parking facilities at schools, employment sites, activity centers, and multimodal locations like transit centers and park-and-rides.	TED	Term of the Plan
T-1.8	**Provide pedestrian facilities with a level of service that meets or exceeds a Level of Traffic Stress 1 or 2.**	TED	**Term of the Plan**
T-1.8.1	Provide frequent high quality pedestrian crossings along transit routes, and near activity centers and key destinations.	TED	Term of the Plan
T-1.8.2	Promote active transportation connections to shorten the length of trips and increase walkability by identifying locations that can benefit from better active transportation connections.	TED	Term of the Plan
T-1.8.3	Create a schedule to address pedestrian barriers to accessibility identified in the Americans with Disabilities Act Transition Plan.	TED	Term of the Plan
T-1.9	**Continue to pursue a Vehicle Level of Service Standard D except for the regional strategy corridors which can exceed adopted LOS standards.**	TED	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
T-1.10	**Ensure the continued long-term viability of existing and rail-banked rail lines for future freight and passenger rail travel.**	**TED**	**Term of the Plan**
T-1.10.1	Work with regional partners to position the Thurston Region for a commuter rail or high-speed rail connection in the future.	**TED**	Term of the Plan
T-1.10.2	Develop a detailed inventory of all active and railbanked rail corridors within Tumwater, assessing their current conditions, ownership status, and potential for future reactivation.	**TED**	Term of the Plan
T-1.10.3	Develop and implement agreements with trail sponsors and other interim users of railbanked corridors to ensure maintenance standards that facilitate potential future rail reactivation.	**TED**	Term of the Plan
T-1.11	**Allow for efficient access to the Port of Olympia's Olympia Regional Airport and New Market Industrial Center.**	**TED**	**Term of the Plan**
T-1.11.1	Ensure multimodal access to a future Olympia Regional Airport terminal is considered in the development of active transportation facilities.	**TED**	Term of the Plan
T-1.12	**Maintain active transportation infrastructure like sidewalks and bike lanes to make sure that vegetation and debris does not hinder the use of these facilities.**	**TED**	**Term of the Plan**
T-1.12.1	Work with adjacent property owners to maintain vegetation and remove debris.	**TED**	Term of the Plan
T-1.12.2	Develop a program to collaborate with residents to remove vegetation and debris blocking or reducing the functionality of active transportation infrastructure on Tumwater right of ways.	**TED**	Term of the Plan

Policies and Implementation Actions		Lead	Period
T-1.12.3	Provide easy ways for users to report and receive updates on all mode infrastructure maintenance concerns.	TED	Term of the Plan

Goal T-2 Prioritize safety and accessibility for all users.

Policies and Implementation Actions		Lead	Period
T-2.1	**Design transportation infrastructure to encourage safe user behavior and prioritize safety improvement projects at locations with a history of serious injury or fatality collisions and/or risk factors for severe crashes especially where nonmotorized users are involved.**	TED	**Term of the Plan**
T-2.1.1	Conduct regular safety audits using crash data and road safety audits to identify high-injury locations and corridors with risk factors such as poor lighting, high speeds, curves, or lack of safe crossings.	TED	Term of the Plan
T-2.1.2	Enhance signalized pedestrian crossings by install leading pedestrian intervals to allow pedestrians to begin crossing before vehicles receive a green light and use and maintain high visibility markings at key crossings.	TED	Term of the Plan
T-2.1.3	Adopt the Safe System Approach with a goal to eliminate traffic fatalities and serious injuries by designing streets to deter unsafe behavior and minimize crash severity.	TED	Term of the Plan
T-2.1.4	Improve driver behavior through targeted safety education and enforcement campaigns such as developing outreach materials and local campaigns focused on speed awareness, yielding at crosswalks, and the dangers of distracted or impaired driving.	TED	Term of the Plan
T-2.2	**Enhance the safety and security of those who use, operate, and maintain the transportation system.**	TED	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
T-2.2.1	Provide annual safety training to Transportation & Engineering and operations staff on traffic control, incident response, and working in live traffic environments.	TED	Term of the Plan
T-2.2.2	Use movable barriers, high-visibility signage, and vehicle-mounted protection for crews working in high-speed or high-volume traffic areas.	TED	Term of the Plan
T-2.2.3	Implement Crime Prevention through Environmental Design Principles by designing transportation spaces with open-sighted lines, signage, lighting, and minimal concealment areas.	TED	Term of the Plan
T-2.3	**Design and construct complete streets and roads based on the adoption of a 'Complete Streets Ordinance', which would encourage neighborhood-scale planning efforts to identify prioritized active transportation routes that enhance connectivity and walkability, especially to and from schools, transit connections, and activity centers.**	TED	**Term of the Plan**
T-2.3.1	Formalize a policy requiring all new and reconstructed roads to follow complete streets design principles, including sidewalks, nonmotorized facilities, street trees, lighting, and transit accommodations.	TED	Term of the Plan
T-2.3.2	Partner with residents and schools to identify barriers, gaps, and desired routes for walking and biking ,and other nonmotorized travel in neighborhoods.	TED	Term of the Plan
T-2.3.3	Establish local design standards for shared-use paths, traffic-calmed streets, and protected bike lanes that prioritize user comfort and safety.	TED	Term of the Plan
T-2.3.4	Use neighborhood input to support grant applications for sidewalk and crossing improvements.	TED	Term of the Plan
T-2.4	**Explore strategies to reduce conflict points and optimize safety for all transportation system users.**	TED	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
T-2.4.1	Use access management techniques such as minimum driveway spacing, corner clearance, and requiring shared driveways or access only from minor streets, when possible, to improve roadway capacity and operating efficiency as well as increase overall system safety by reducing conflict points.	TED	Term of the Plan
T-2.4.2	Develop a connected system vision that envisions active mode connection opportunities for dead ends and cul-de-sacs.	TED	Term of the Plan
T-2.5	**Create safe and vibrant neighborhoods with places that build community and encourage active travel through the provision of street lighting, pedestrian buffers, trees, benches, and other street elements that make walking safe and pleasant.**	TED	**Term of the Plan**
T-2.5.1	Develop and implement streetscape standards that define minimum requirements for street trees, pedestrian buffers, seating, lighting, and Americans with Disabilities Act compliant pathways.	TED CDD	Term of the Plan
T-2.5.2	Incorporate traffic calming measures such as speed humps, curb extensions, decorative crosswalks, and narrowed travel lanes to reduce vehicle speeds and prioritize pedestrian safety.	TED	Term of the Plan
T-2.5.3	Leverage placemaking measures such as integrating murals, sidewalk art, storytelling signs, and decorative lighting into neighborhood streetscapes.	TED	Term of the Plan
T-2.6	**Provide safe and interconnected walk and bike routes to all schools in Tumwater and encourage their use.**	TED	**Term of the Plan**
T-2.6.1	Identify potential bicycle connections and safe routes for biking to each school.	TED	Term of the Plan
T-2.6.2	Construct and maintain accessible sidewalks and frequent high quality crossing opportunities within an appropriate distance of every school.	TED	Term of the Plan

Policies and Implementation Actions		Lead	Period
T-2.6.3	Update and maintain maps of School Walking Routes and coordinate with schools to ensure timely updates and communications with school families.	TED	Term of the Plan
T-2.7	**Support safe, convenient, and cost-effective transportation services for non-drivers, such as youth, elders, people with disabilities, and low-income populations.**	TED	**Term of the Plan**
T-2.7.1	Ensure transportation system investments support the special travel needs of vulnerable road users, those with low incomes, and other affected groups through facility audits and prioritization of limited capital improvement funds.	TED	Term of the Plan
T-2.7.2	Ensure that all transportation facilities comply with the Americans with Disabilities Act (ADA) in accordance with Tumwater's ADA Transition Plan.	TED	Term of the Plan

Goal T-3 Invest wisely to support a resilient and maintainable transportation system.

Policies and Implementation Actions		Lead	Period
T-3.1	**Invest in transportation projects that provide lasting benefits and reflect the goals of the Comprehensive Plan, as reflected by the project prioritization criteria.**	TED	**Term of the Plan**
T-3.2	**Prioritize preventative maintenance programs, preservation, operation, and repair of the existing transportation system to minimize life-cycle costs.**	TED	**Term of the Plan**
T-3.2.1	Explore innovative programs that reduce infrastructure life-cycle costs or increase efficiency of service delivery, including use of new materials, technologies, and resource partnerships.	TED	Term of the Plan

Policies and Implementation Actions		Lead	Period
T-3.3	**Use technology-based approaches to address transportation congestion, safety, efficiency, operations, and better integration of transportation modes.**	**TED**	**Term of the Plan**
T-3.3.1	Create a Transportation Systems Maintenance and Operations Plan to identify opportunities for more efficiently operating the transportation system with fewer large capital investments.	**TED**	Term of the Plan
T-3.3.2	Deploy technologies such as variable message signs, speed monitoring displays, transit and emergency signal preemption, and adaptive traffic signal control to increase system efficiency.	**TED**	Term of the Plan
T-3.3.3	Use pedestrian-activated signals, accessible pedestrian signals, and lighting enhancements at high-risk crossings.	**TED**	Term of the Plan
T-3.3.4	Use GIS-based mapping and inventory assessments to track assets and infrastructure conditions. This includes roadways, bike facilities, sidewalks, shared use paths, lighting, signals, signs, and roadway stormwater infrastructure.	**TED**	Term of the Plan
T-3.4	**Require new developments to pay for their proportionate share of impacts on the transportation system.**	**CDD TED**	**Term of the Plan**
T-3.4.1	Regularly update Tumwater's traffic impact fee rates and project list to reflect current growth patterns and multimodal transportation priorities.	**CDD TED**	Term of the Plan
T-3.4.2	Require transportation impact studies to evaluate effects on all modes in accordance with Multimodal Level of Service guidelines including sidewalk demand, bike access, and transit stop needs.	**TED**	Term of the Plan
T-3.4.3	Ensure that development-driven improvements are consistent with Tumwater's Transportation Plan, Capital Facilities Plan, and Americans with Disabilities Act Transition Plan.	**CDD TED**	Term of the Plan

Policies and Implementation Actions		Lead	Period
T-3.4.4	Provide public summaries of transportation impact fees collected, where they were spent, and what transportation improvements were delivered.	TED	Term of the Plan
T-3.5	**Develop effective transportation project performance measures consistent with community and regional objectives such as improved mobility and access, funding opportunities, improved environmental health, and improved safety.**	TED	**Term of the Plan**
T-3.6	**Secure adequate funding from all sources to implement the goals and policies that use transportation funding policies and investments to make development decisions predictable, fair, and cost-effective.**	TED	**Term of the Plan**
T-3.7	**Retrofit arterial routes and design all future connections for impacts associated with changing climate patterns and natural disasters to build resiliency.**	TED	**Term of the Plan**
T-3.7.1	Prioritize coordination between transportation system and emergency response providers, building system redundancy through a well-connected street grid to support emergency response and reduce community disruption during disasters.	TED	Term of the Plan
T-3.7.2	Assess vulnerability of existing infrastructure by identifying roads, bridges, culverts, and transit infrastructure at high risk from flooding, landslides, wildfires, or extreme heat and prioritize arterial routes in this assessment.	TED	Term of the Plan
T-3.7.3	Implement capital projects that raise roadbeds, replace undersized culverts, or harden slopes along critical corridors subject to washouts or slides by designing new connections to be resilient to the impacts of climate change, and human or natural disasters.	TED	Term of the Plan
T-3.7.4	Coordinate with emergency management agencies to plan for and ensure critical transportation links remain operable during and after disasters.	TED	Term of the Plan

Goal T-4 Minimize impacts and advance environmental goals.

Policies and Implementation Actions		Lead	Period
T-4.1	**Develop a transportation system that supports compact, mixed-use development and related active transportation travel to reduce per capita vehicle miles travelled, increase energy efficiency, reduce environmental impacts, and encourage physical activity and community health.**	**TED**	**Term of the Plan**
T-4.1.1	Explore innovative programs that reduce infrastructure life-cycle costs or increase efficiency of transportation service delivery, including use of new materials, technologies, and resource partnerships.	**TED**	Term of the Plan
T-4.1.2	Expand sidewalks, protected bike lanes, multi-use trails, and pedestrian crossings in and around higher density zone districts.	**TED PRD**	Term of the Plan
T-4.1.3	Adopt measurable goals to reduce per capita vehicle miles traveled and embed those metrics in transportation project evaluation criteria.	**TED**	Term of the Plan
T-4.1.4	Identify critical investments in the transportation system that promote energy efficiency. For instance, use adaptive signal control technology to adjust traffic lights in real-time, reducing idling and stop-and-go driving on major corridors.	**TED**	Term of the Plan
T-4.2	**Increase use of low-impact development infrastructure projects that help capture, filter, store, and reuse stormwater runoff.**	**TED**	**Term of the Plan**
T-4.3	**Review and amend local policies, rules, and management activities to eliminate potential negative impacts on fish and wildlife habitat and take advantage of opportunities to incorporate positive impacts**	**TED**	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
T-4.4	**Increase overall operating efficiency of the transportation system through the effective use of transportation demand management measures that reduce the need to drive alone.**	**TED**	**Term of the Plan**
T-4.4.1	Promote car-sharing, e-bike programs, employer commuter incentives, and low-emission vehicle infrastructure in mixed-use districts.	**TED**	Term of the Plan
T-4.5	**Promote the use of policy, alternative fuels, and technologies that reduce pollution, greenhouse gas emissions, and other environmental impacts from vehicles to reduce per capita vehicle miles travelled 27 percent through 2040 and 41 percent through 2050 compared to a 2022 baseline.**	**TED**	**Term of the Plan**
T-4.5.1	Develop a detailed plan with measurable benchmarks and cross-departmental collaboration to reduce per capita vehicle miles traveled 27 percent by 2040 and 41 percent by 2050.	**TED**	Term of the Plan
T-4.5.2	Install public EV charging stations in civic centers, commercial areas, and near multifamily housing. Update development standards to require EV chargers or EV ready stalls be built in all new and majorly updated commercial and residential developments. Coordinate with utilities to support grid capacity.	**TED**	Term of the Plan
T-4.5.3	Replace City vehicles with electric, hybrid, or alternative fuel models as they reach end-of-life and install necessary charging infrastructure.	**TED**	Term of the Plan
T-4.5.4	Evaluate transportation capital investments using a greenhouse gas and vehicle miles traveled reduction framework to prioritize climate-beneficial projects.	**TED**	Term of the Plan
T-4.6	**Aim to shift at least five percent of travel currently undertaken by single occupancy vehicles to walking, five percent to biking, and five percent to transit.**	**TED**	**Term of the Plan**

Policies and Implementation Actions		Lead	Period
T-4.6.1	Conduct studies to understand current travel patterns and identify opportunities for reduction.	TED	Term of the Plan
T-4.6.2	Establish metrics to assess the effectiveness of implemented strategies over time.	TED	Term of the Plan
T-4.6.3	Increase vehicle occupancy to convert single occupancy vehicles to high occupancy vehicles and promote vanpools	TED	Term of the Plan
T-4.7	**Consider environmental justice policies that protect minority populations and people with low incomes from discrimination and provide meaningful access to public process and information through Title VI requirements.**	TED	**Term of the Plan**
T-4.8	**Integrate transit into planning for new urban centers by supporting increased densities and the supply of housing in transit corridors.**	CDD	**Term of the Plan**

Goal T-5 Build public support for transportation system improvements by incorporating robust outreach as part of plans and projects.

Policies and Implementation Actions		Lead	Period
T-5.1	**Build a community of engaged, informed residents by providing broad-based, early, and continuing public involvement opportunities in all aspects of the transportation planning process.**	TED	**Term of the Plan**
T-5.1.1	Create a formal Public Involvement Plan that outlines when and how the public will be engaged in each phase of transportation planning.	TED	Term of the Plan
T-5.1.2	Form a group of residents representing various interests (seniors, youth, business, accessibility, environment) to review and advise on projects.	TED	Term of the Plan

Policies and Implementation Actions		Lead	Period
T-5.1.3	Maintain an interactive and centralized digital platform with project updates, engagement opportunities, comment forms, and feedback summaries.	TED	Term of the Plan
T-5.2	**Participate in coordination activities at local, regional, state, tribal, and federal levels to address the condition or operations of the transportation system, including land use and public facility siting decisions.**	TED CDD	**Term of the Plan**
T-5.2.1	Participate in Healthy Kids Safe Streets meetings and regional events.	TED	Term of the Plan
T-5.3	**Present information and provide public participation opportunities for everyone, including people who do not drive, people with disabilities, and/or people with limited literacy skills.**	TED	**Term of the Plan**
T-5.3.1	Develop and distribute public information materials in multiple languages prevalent in the community and use plain language and graphics to ensure comprehension among individuals with varying literacy levels.	TED	Term of the Plan
T-5.3.2	Host public meetings in ADA-compliant venues and provide accommodations such as sign language interpreters, real-time captioning, and assistive listening devices when requested.	TED	Term of the Plan
T-5.3.3	Offer virtual meeting options with accessible features such as screen reader compatibility, live closed captioning, and user-friendly interfaces.	TED	Term of the Plan
T-5.3.4	Partner with local organizations that serve underrepresented populations to co-host events, disseminate information, and gather feedback.	TED	Term of the Plan
T-5.4	**Expand coordination between the City and the school districts to better address transportation needs at the school districts' planning stage of new facilities.**	TED	Term of the Plan

Policies and Implementation Actions		Lead	Period
T-5.5	**Ensure that transportation investments are shared equally amongst all segments of the community in terms of associated costs as well as the benefits derived from system performance and travel choices.**	**TED**	**Term of the Plan**
T-5.5.1	Integrate equity evaluations into the transportation project development process to assess how different population groups are affected by planned investments.	**TED**	Term of the Plan
T-5.5.2	Use data on income, race, mobility status, and access to services to direct investments toward areas with historically limited transportation investments.	**TED**	Term of the Plan
T-5.5.3	Embed equity scoring into transportation funding allocation processes.	**TED**	Term of the Plan
T-5.5.4	If applicable, coordinate with housing and land use departments to prevent displacement of residents due to rising land values or redevelopment near new transportation investments.	**TED**	Term of the Plan
T-5.6	**Promote increased public understanding of the relationships between land use patterns and transportation choices facing Tumwater.**	**TED**	**Term of the Plan**
T-5.6.1	Create workshops, seminars, and informational materials that explain the connection between land use and transportation choices.	**TED**	Term of the Plan
T-5.6.2	Implement interactive tools, such as online mapping applications, which allow residents to visualize how different land use scenarios impact transportation systems.	**TED**	Term of the Plan
T-5.6.3	Organize events such as town halls, open houses, and interactive exhibits focused on land use and transportation planning.	**TED**	Term of the Plan

Policies and Implementation Actions		Lead	Period
T-5.6.4	Use various communication platforms, including social media, newsletters, and Tumwater's website, to share information about land use and transportation initiatives.	TED	Term of the Plan

DRAFT

1. Introduction

A. Background

The Transportation Plan is part of Tumwater's Comprehensive Plan and was prepared in response to Washington State Growth Management Act (Chapter 36.70A RCW).

The Plan covers the 20-year planning period from 2025-2045, and guides transportation investments. Community values and broader community goals influence the direction to meet the community's needs emphasizing safety and accessibility and improving connectivity.

Tumwater is experiencing significant growth that is expected to continue over the next two decades. The Washington Growth Management Act includes legal requirements for Tumwater to plan for growth through regular Comprehensive Plan updates.

Part 2 of the Transportation Plan provides the technical analysis to address the requirements of RCW 36.70A.070(1) for transportation system planning. To plan for the next 20 years, growth estimates and land use assumptions from the Land Use Element form the basis of forecasts which point to infrastructure needs.

B. How to Read this Part of the Plan

Part 2 of the Transportation Plan is organized into the following chapters:

1. **Introduction**: Provides an overview of the plan.
2. **Transportation Planning Context**: Describes the current state of Tumwater's transportation network for all modes and identifies existing challenges and trends.

TRANSPORTATION

State requirements (WAC 365-196-435) that the Comprehensive Plan must meet include:

- Land use assumptions used in estimating travel.
- Estimated traffic impacts to state-owned transportation facilities.
- Facility and service needs, including air, water, and ground facilities and services, level of service standard for local and state owned facilities, specific actions to correct facilities that are out of compliance, 10 year traffic forecasts and identification of state and local needs.
- Analysis of funding capability, multiyear financing plan, and discussion of how shortfalls will be met.
- Intergovernmental coordination efforts, including an assessment of the impacts of adjacent jurisdictions.
- Demand-management strategies.
- Pedestrian and bicycle component to include collaborative efforts to identify and designate planned improvements and corridors that address and encourage enhanced community access and promote healthy lifestyles.
- The transportation plan, and the six-year plan required by RCW 35.77.010 must be consistent.

DRAFT

3. **Public Outreach**: Details outreach efforts as part of the update.
4. **Tumwater's Future Transportation System**: Details how Tumwater's transportation system is expected to operate in the future with only funded or very likely to be funded and completed projects and establishes Level of Service standards for each mode.
5. **Transportation Project List**: Provides a prioritized capital project list to help Tumwater work towards the future transportation vision.
6. **Implementation**: Evaluates Tumwater's projected financial capacity for transportation improvements and provides guidance on implementing the plan. It also includes non-capital measures to make Tumwater's transportation system more efficient.

C. Connections to Other Elements

The Transportation Plan works with the Land Use Element since the location of goods and services impacts how people access them. Similarly, the other Elements of the Comprehensive Plan also impact transportation by making demands of the system:

- More housing leads to greater congestion on roadways.
- Creating new parks and open spaces requires appropriate access to those places.
- Utilities are affected by the need to provide service for electric vehicles.

The Comprehensive Plan is an attempt to balance those demands with protection for natural areas and sustainable growth. For example, when considering where roadways should be widened, the Conservation Element provides information about critical areas which may constrain the location of transportation connections.

Coordination with all the Elements of the Comprehensive Plan is important to be able to ensure orderly, cost-efficient development that is phased outward from the urban core and corridors. All Elements of the Comprehensive Plan are consistent.

DRAFT

2. Transportation Planning Context

A. Partnering Agencies

As part of the planning process, Tumwater coordinated this update with planning efforts made by other agencies and government bodies that have an interest in the transportation system in Tumwater. These agencies included:

- Cities of Olympia, Lacey, and Yelm
- Intercity Transit
- Thurston County
- Thurston Regional Planning Council
- Washington State Department of Transportation

B. Existing Plans

1) Tumwater

a) Transportation Improvement Plan

Tumwater updates its Six Year Transportation Improvement Plan every year, as required by Washington State law. The Transportation Improvement Plan identifies near-term improvements to the transportation network and allocates funding for each year.

The Transportation Improvement Plan includes projects from Transportation Plan and other Tumwater subarea plans. The Transportation Improvement Plan is designed to provide a framework for prioritizing, scheduling, and implementing transportation projects in the near term. These projects include corridor and intersection improvements, investments in active transportation infrastructure, traffic calming programs, and maintenance.

b) Parks, Recreation and Open Space Plan

The Parks, Recreation and Open Space Plan (2016) includes projects that serve both recreational and transportation purposes, such as trails. Existing trails maintained by Tumwater include:

- Deschutes Valley Trail
- Historic Park / Tumwater Falls Trail – 1.2 miles of dirt, paved, and brick trail connecting to Capitol Lake Interpretive Park in the Deschutes Valley
- Palermo Watershed Trail – 0.7 miles of dirt path near Tumwater Valley Golf Course.
- Pioneer Park Trails – 2.1 miles of looping dirt and paved nature paths
- Tumwater Hill Trail – 0.5 miles of dirt nature path beginning at Ridgeview Court SW adjacent to Tumwater Hill Elementary School.
- Tyee Drive Trail – 0.2 miles of mixed use trail extending from BPA easement northward.

More information about the trail system is found in the Parks, Recreation and Open Space Plan.

DRAFT

c) Subarea Plans

Tumwater has adopted subarea plans that are a part of the Comprehensive Plan and were used as part of the development of the Transportation Plan:

- Black Hills Subarea Transportation Plan (2002)
- Capitol Boulevard Corridor Planning Project (2014)
- Littlerock Road Subarea Plan (2018)
- Old Highway 99 Corridor Study (2024)
- Town Center Street Design Plan (2004 and amended 2019)
- Tumwater Brewery District Plan (2020)

Details of some of the other subarea plans are discussed below.

i. Brewery District Plan

The Brewery District Plan, originally adopted in 2014 and amended in 2020, has four goals:

- Create a stronger sense of place by facilitating pedestrian access, establishing gathering places for residents, and fostering a distinct District identity.
- Improve transportation options, safety, and access within and across the District.
- Expand economic opportunity and activity.
- Improve the function and appearance of the built environment.

The Plan guides development that will improve transportation safety and access in the triangle of roads formed by Custer Way, Cleveland Avenue, and Capitol Boulevard.

ii. Capitol Boulevard Corridor Plan

The Capitol Boulevard Corridor Planning Project was adopted in 2015, and has three main goals:

- Improve the business conditions.
- Improve safety and expand transportation options for all users of the corridor including pedestrians, bicycles, and vehicles.
- Improve the aesthetic appeal of the corridor.

The Plan guides improvements to Tumwater's most traveled street, between the Southgate Shopping Center area and Israel Road.

2) Other Agencies' Plans

Other agency's plans were considered during the development of the Plan. Details of some of the other agency plans are discussed below.

a) Thurston Regional Planning Council Regional Transportation Plan

Tumwater's Transportation Plan must be consistent with the Regional Transportation Plan developed by the Thurston Regional Planning Council. The Regional Transportation Plan is a long-range transportation plan and is adopted every four years.

Tumwater collaborates with the Thurston Regional Planning Council to reach agreement on Level of Service standards, peak periods, and transportation system goals. The Regional Transportation Plan defined the following Tumwater projects that impact the movement of people and vehicles at the regional scale.

Projects pertaining to Tumwater identified in Appendix L of the plan include the following:

- Capacity projects (including multimodal improvements)
    - Capitol Boulevard – M Street to Israel Road
    - Henderson Boulevard corridor
    - Old Highway 99 improvements
    - Tumwater Boulevard – Interstate 5 interchange
- New connections and alignments
    - E Street extension
    - Tyee Drive extension.

b) Thurston Regional Trails Plan

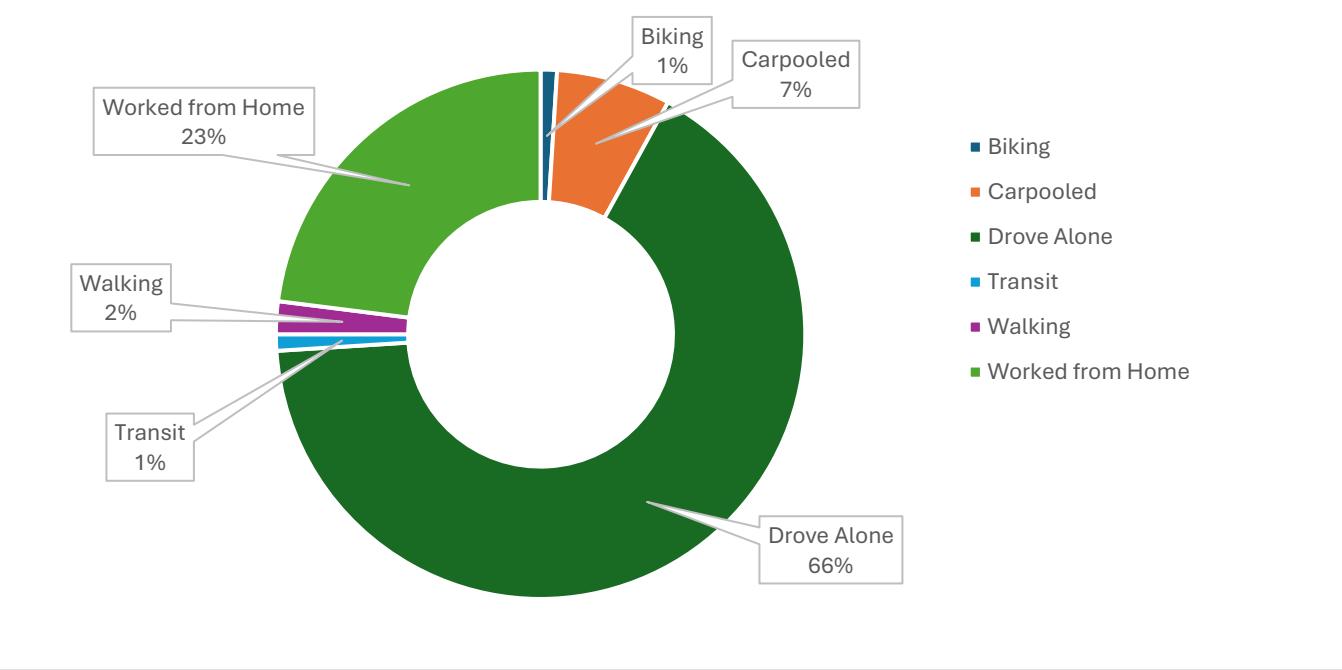
Adopted in 2023, the Thurston Regional Trails Plan establishes a comprehensive, well-connected non-motorized trail network that links all communities in the region.

Trails connect people to the outdoors, destinations such as Brewery Park, and economic opportunity.

The completion of the 0.8-mile segment of the Deschutes Valley Trail between Historical Park and Brewery Park at Tumwater Falls was the most recent milestone in the regional trail network. The following trail corridors, extensions, and system enhancements are included in the Regional Trails Plan:

- Capitol Lake to Belmore Trail Corridor
    - Black Lake Trail - conceptual (20+ years)
- Deschutes Valley Trail Corridor
    - Tumwater Valley Drive extension – planned (2026)
    - Pioneer Park extension – planned (20+ years)
- Tumwater to Downtown Olympia Union Pacific Line Corridor
    - East Olympia Trail – conceptual (20+ years)
    - Bonneville Power Administration Shared Use Path – conceptual (20+ years)
- Karen Fraser Woodland Trail Corridor
    - Olympia Phase 4 extension, Henderson to Tumwater – planned (20+ years)

C. Transportation Network Overview



Among the various travel options, vehicular travel is the current primary mode used in and around Tumwater, and the roadways must accommodate both local trips and regional travelers passing through.

The annual American Community Survey records information on trips to and from work. Between 2018 and 2023, the percentage of workers who primarily worked from home instead of commuting increased from 5.4 percent to 23 percent. Compared to non-work travel, work-based trips generally have a higher proportion of people driving alone (66 percent), while only seven percent of commuters choose carpooling. About two percent of commuting trips were on

DRAFT

foot, about one percent were by transit and less than one percent were by bicycle, as shown in Figure T-1.

Figure T-1. Share of Primary Travel Options for Commuting to Work.

Source: American Community Survey, 2023.

Though Tumwater has made significant investments in multimodal transportation, Figure T-1 indicates that additional work is needed to address increasing the multimodal share of the system. These could be gaps in connectivity for active transportation options like walking and bicycling. To learn more about the multimodal share of the system, Tumwater has created the Bicycling, Walking, & Rolling Plan found in Appendix C.

The Bicycling, Walking, & Rolling Plan evaluates the current transportation system, defines priorities, and provides a project list to increase the capacity of the system to allow active transportation that is safe and accessible for all users.

This section documents how Tumwater's roads and streets serve different modes and how residents and visitors experience Tumwater. It includes an inventory of motorized transportation facilities within Tumwater, including local and state roadways, transit facilities, and freight networks.

Inventories of the facilities related to active transportation modes, such as biking and walking can be found in the Bicycling, Walking, & Rolling Plan. This information is separate only to avoid duplication and should be considered integral to the transportation system as a whole.

The Thurston Regional Planning Council Regional Transportation Plan defines strategy corridors as congested roads where road widening is not a preferred option. Some of the reasons roads

cannot be widened include adjacent land uses are fully built out, adjacent lands have environmentally sensitive features, or the road has the maximum number of lanes.

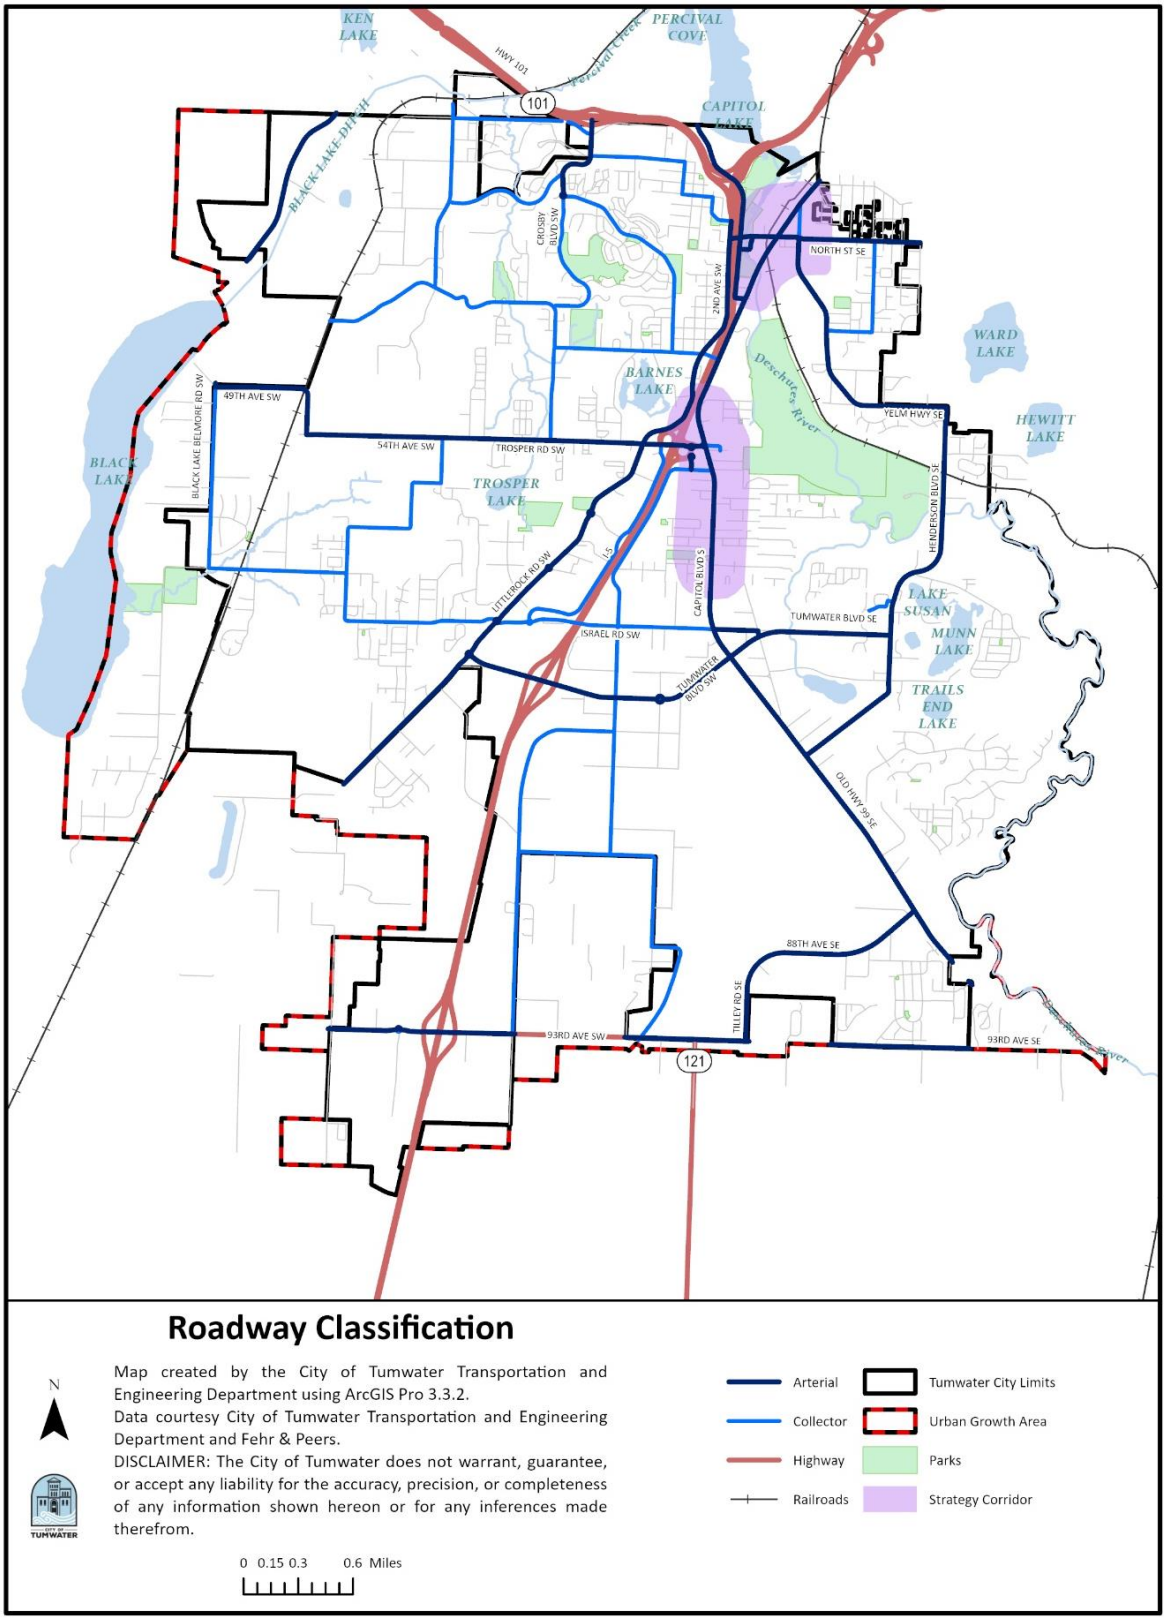
The Regional Transportation Plan includes several policies to designate strategy corridors. These policies support local action to identify and manage transportation in highly urbanized areas without widening roads. Regional Transportation Plan policies include:

> *1.c. Meet mobility, access, and economic goals in designated Strategy Corridors with an appropriate combination of investments, policies, and land use measures.*
>
> *9.h. Incorporate alternative strategies to address congestion where road widening and traffic control devices are not acceptable, particularly along Strategy Corridors.*
>
> *10.d. Support Intercity Transit's long-range plan, which emphasizes trunk and primary routes serving core areas along designated strategy corridors, with supportive land use and appropriate design standards developed by local jurisdictions*

The Regional Transportation Plan policies support a combination of multimodal transportation improvements and land use measures that attract more mixed-use, walkable, high-density development where alternatives to driving are most feasible as preferred solutions for strategy corridors.

Due to the increased density, peak hour vehicular congestion in these corridors is likely to exceed levels of service. Different approaches are required to maintain access and address congestion.

In urban areas, solutions can include:



- Increased transit service
- More sidewalks or bicycle facilities
- A complete and connected street grid
- Transportation technology measures that improve system operating efficiency
- Access management
- Parking management
- Incentives for employees to telework or carpool

Tumwater has identified two designated strategy corridors within the City, Capitol Boulevard SW and Cleveland Avenue SE/Yelm Highway SE. These are both arterials and are shown in Figure T-2 below.

Figure T-2 and Table T-1 show the types of roadways classifications in Tumwater.

DRAFT

Figure T-2. Tumwater Roadway Classification.

Source: Fehr & Peers, 2025.

Table T-1. Functional Classification of Roadways.

Functional Classification	Annual Average Daily Traffic Range	Description	Examples
Major Arterial	> 13,000	The highest functional classification carry the highest volumes, serve regional through trips, and connect Tumwater with the rest of the region.	Capitol Boulevard SE, Tumwater Boulevard
Minor Arterial	5,000 – 13,000	The next highest functional classification are designed for higher volumes provide inter-neighborhood connections.	93rd Avenue SW, Littlerock Road SW
Major Collectors	3,000 – 5,000	Major Collectors carry a higher volume and distribute trips between local roadways and arterials and serve as transition roadways to or from commercial and residential areas.	Barnes Boulevard, 88th Avenue SE
Minor Collectors	1,500 – 3,000	Minor Collectors distribute trips between local streets and arterials and serve as transition roadways to or from commercial and residential areas. They have lower volumes and can include select traffic calming elements to balance experience for all modes with vehicular mobility.	Center Street SW, Mottman Road SW
Local	< 1,500	Local streets are the lowest functional classification, providing circulation and access within residential neighborhoods.	12th Avenue SW, Glenwood Drive SW

Source: Fehr & Peers, 2025.
Note: Annual average daily traffic ranges are only one consideration when classifying roadways, other considerations include surrounding land uses, roadway usage, and access to property provided by each roadway.

D. Pedestrian & Bicycle Network

Every trip taken within the transportation system begins and ends with active transportation in the form of biking, walking, or rolling. The goal of moving people and goods often requires multiple modes for one trip.

Providing more options for active transportation is an important component of transportation planning as more than 25 percent of the travelling public does not have a driver's license and active transportation is a part of every trip.

Active transportation is a primary strategy for greenhouse gas reduction as vehicle exhaust is the second highest source of greenhouse gases in Thurston County according to the Thurston County 2022 Greenhouse Gas Emissions Analysis from Department of Commerce. As more people are accommodated by infrastructure that

supports active transportation, and less greenhouse gas emissions are produced. To that end, Tumwater has prioritized active transportation by creating a detailed Bicycling, Walking, & Rolling Plan for network improvements is included in Appendix C.

The Bicycling, Walking, & Rolling Plan includes baseline data about the existing conditions as to set the priority network for infrastructure improvements. This plan also sets mode shift targets and greenhouse gas emission reduction goals that support the Climate Element of the Comprehensive Plan.

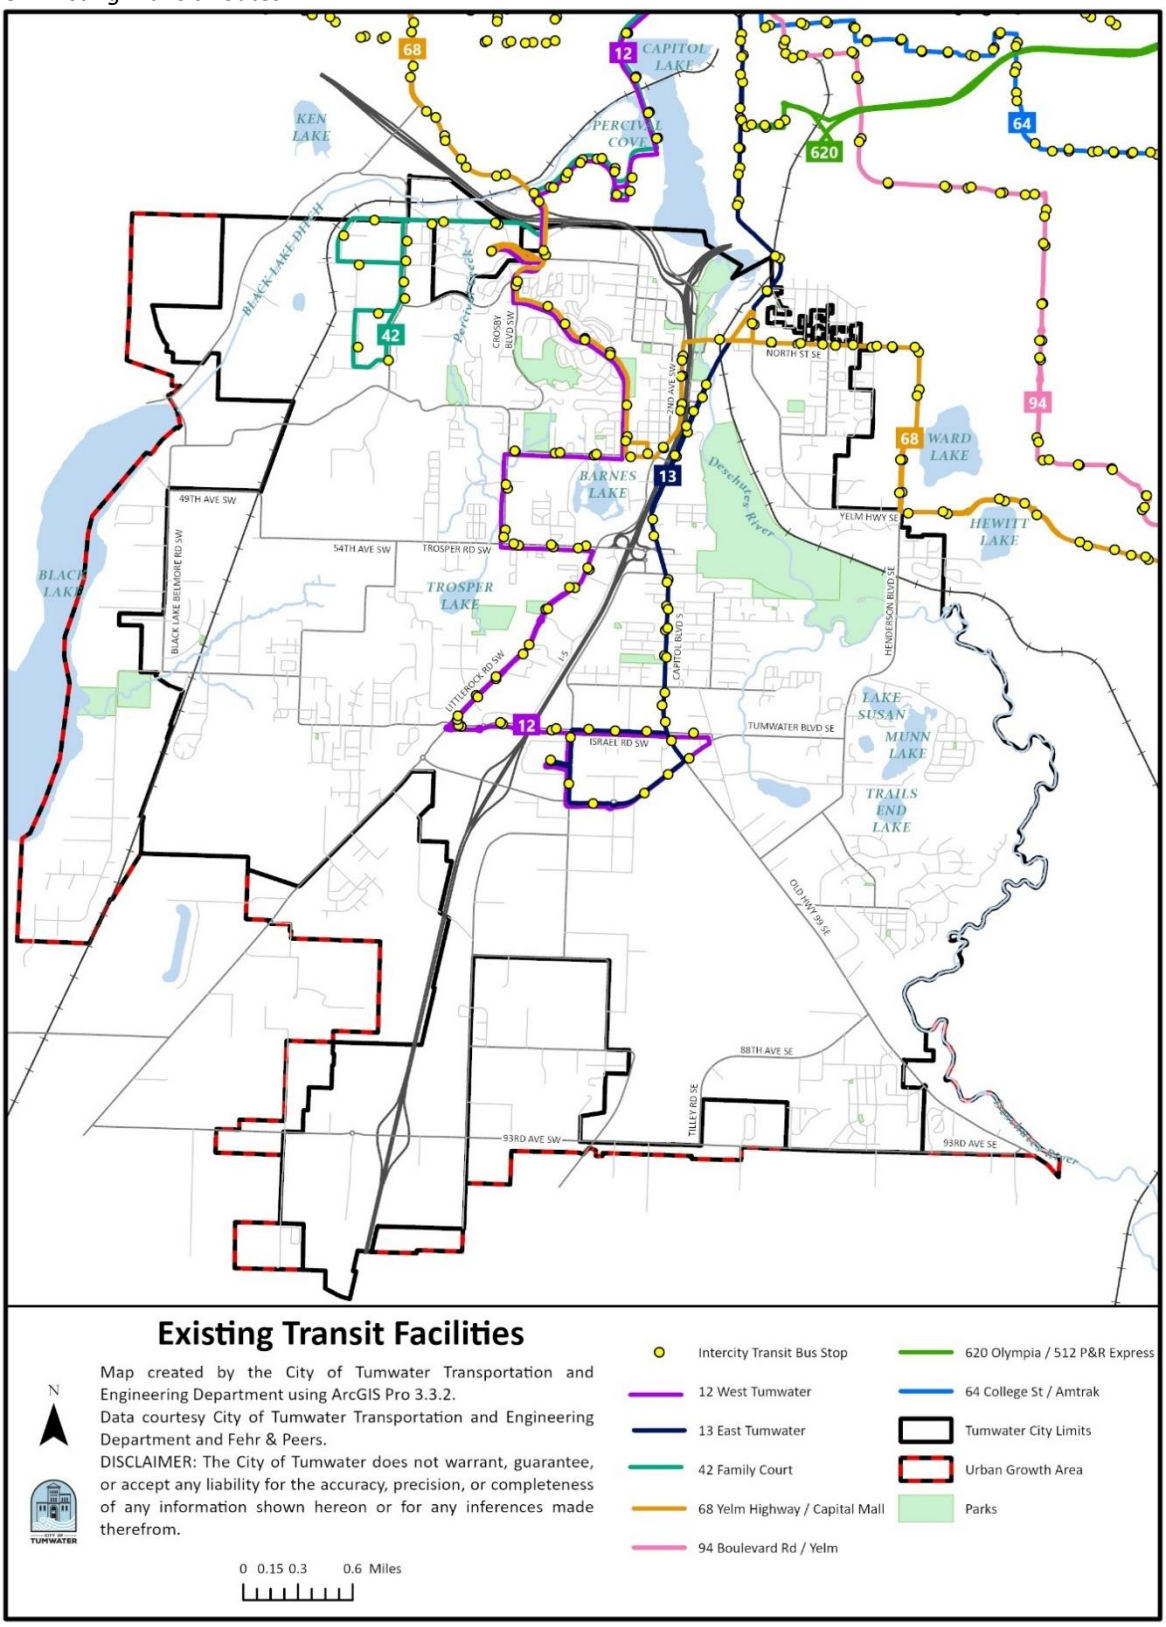
It is important to also include active transportation system information in the Transportation Plan as the transportation system is not complete without these components. Active transportation data is therefore woven throughout the Transportation Plan and included in both the Transportation Plan and the Bicycling, Walking, & Rolling Plan.

E. Transit Network

Intercity Transit provides free transit service through 71 buses with 19 local routes in the Tumwater, Olympia, Lacey, and Yelm areas. Intercity Transit also operates five express routes to Lakewood and Tacoma, offering connections to Pierce Transit and Sound Transit routes. Additionally, it connects to the Amtrak Station on Yelm Highway providing a connection to regional rail transit.

Four local transit routes currently serve the Tumwater area (Routes 12, 13, 42, and 68) as shown in Figure T-3. All Intercity Transit buses are equipped with bicycle racks, and all buses are wheelchair accessible.

In addition, Intercity Transit operates a paratransit service called “Dial-A-Lift” with 35 vans. Dial-A-Lift is a door-to-door, shared ride public transportation service for people with disabilities that prevent them from using fixed route bus service. Intercity Transit offers Dial-A-Lift service where and when fixed route buses operate, and it does not cover all of Tumwater. Additionally, eligibility constraints exist which include conditional and temporary eligibility.



Intercity Transit also maintains an extensive Village Vans program that helps those with transportation barriers to travel between work and home.

Tumwater’s only park-and-ride lot, co-located with the Department of Health parking lot at the corner of Bonniewood Drive and Israel Road, closed in 2016. While Routes 12 and 13 still service this area, Intercity Transit has not opened an alternate park-and-ride location in Tumwater.

In its 2023-2028 Transit Development Plan forecast, Intercity Transit expects to restore nearly all fixed-route and Dial-A-Lift services as well as expand the “Bus Rapid Transit-light” pilot on Marvin Road, a future segment of which includes connection to Tumwater. This draft plan includes frequency and span improvements along with relaunch of suspended routes.

DRAFT

F. Freight Network

Freight plays a critical role for businesses and residents in Tumwater who rely on freight shipped via trucks. Trucks range in size from light-duty commercial vans and single-unit trucks for package delivery and moving, to garbage trucks that navigate through neighborhoods, to large semi-truck trailers that connect local and regional businesses.

The Washington State Department of Transportation designates strategic freight corridors within the state as part of the Freight and Goods Transportation System. The classifications T-1 through T-5 shown in Table T-2 are based on annual freight tonnage moved along a corridor.

Figure T-4 illustrates Freight and Goods Transportation System freight corridors in Tumwater. Example freight corridors in Tumwater are also presented in Table T-2.

Mottman Road and Littlerock Road, for example, provide freight connections to Tumwater's general commercial zones. Trucks delivering wholesale and retail goods, business supplies, and building materials throughout Tumwater contribute to and are impacted by traffic congestion.

Tumwater partners with the Washington State Department of Transportation and regional agencies to maintain these freight routes and ensure system capacity standards are met. Designated Freight and Goods Transportation System routes aim to prevent heavy truck traffic on lower-volume streets and promote the use of adequately designed roadways.

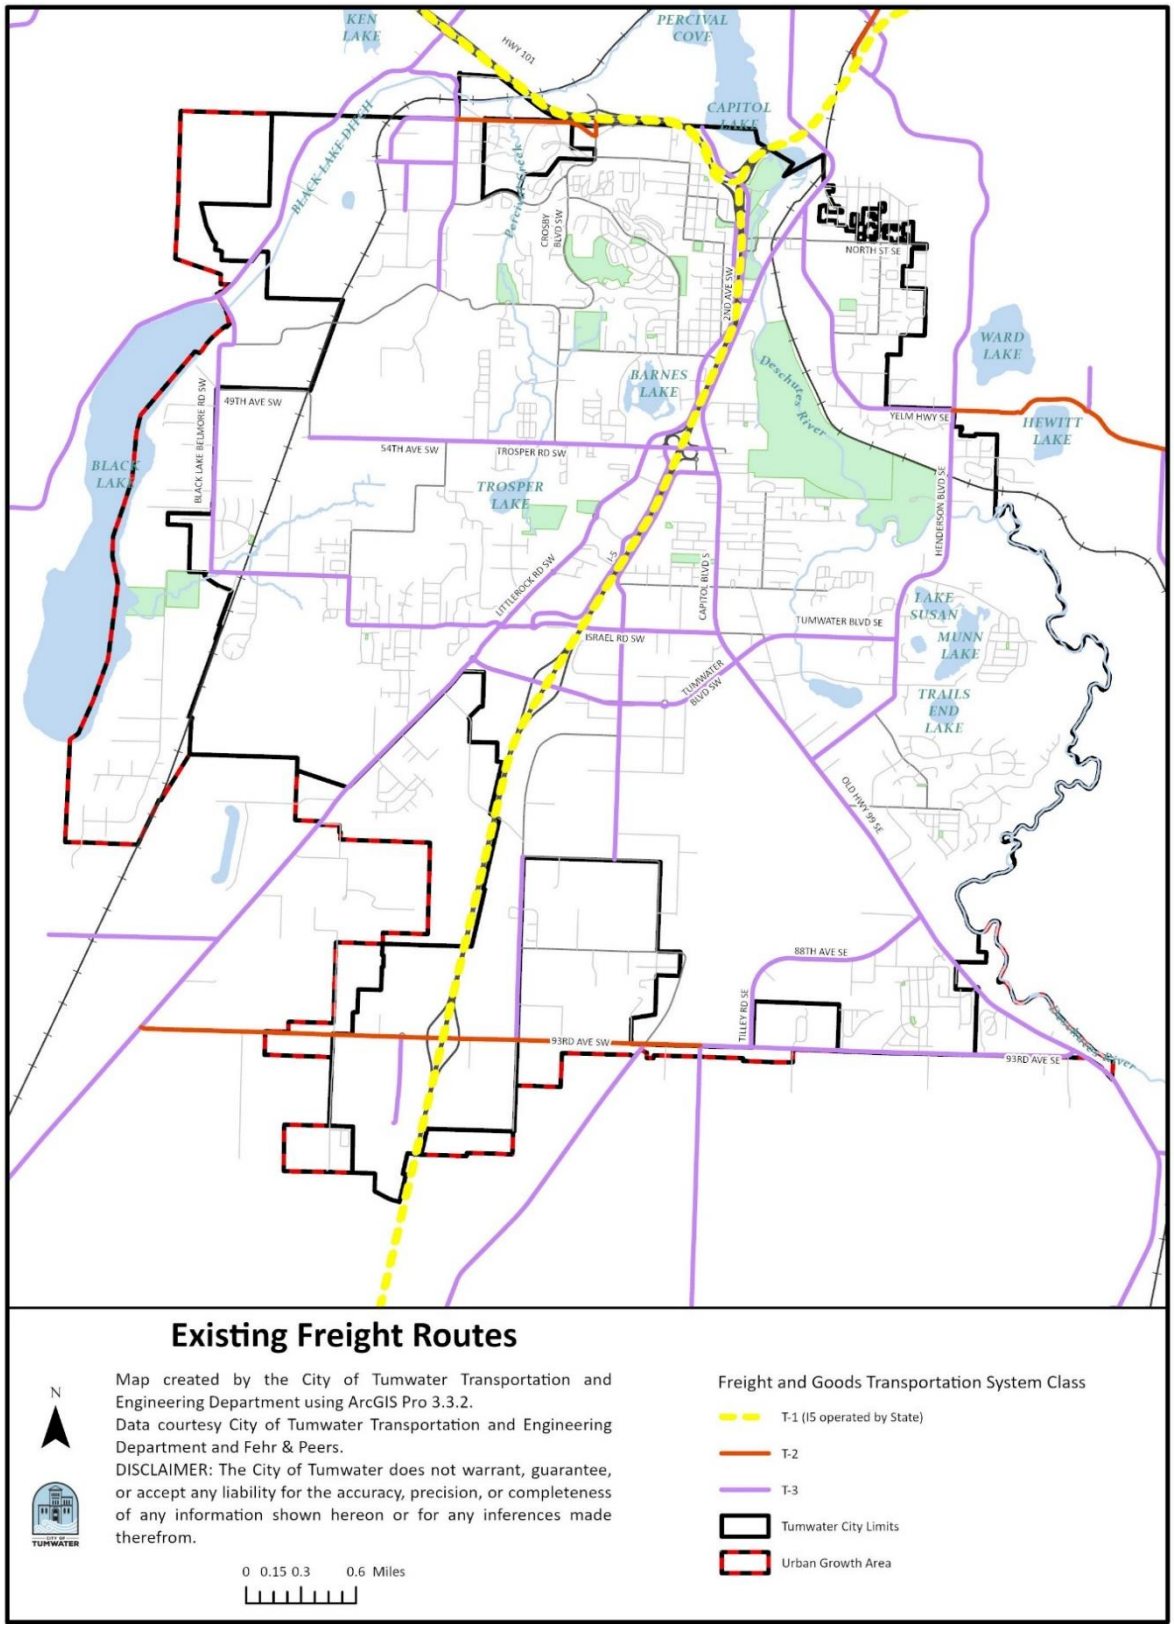

Table T-2. Washington State Department of Transportation Freight Corridor Classifications.

Freight Corridor	Description	Example in Tumwater
T-1	More than 10 million tons of freight per year	Interstate 5
T-2	4 million to 10 million tons per year	State Route 121, Mottman Road, Crosby Boulevard, Yelm Highway SE
T-3	300,000 to 4 million tons per year	Capitol Boulevard, Tumwater Boulevard
T-4	100,000 to 300,000 tons per year	49th Avenue SW
T-5	At least 20,000 tons in 60 days	No streets classified

G. Airports

Two airports are in the vicinity of Tumwater, the Olympia Regional Airport and Hoskins Field.

The Olympia Regional Airport is located entirely within Tumwater and serves as a hub for aviation services for the southern portion of the Seattle-Tacoma Metropolitan Area. The airport is owned and operated by the Port of Olympia and serves general aviation users. There are two runways and approximately 142 aircraft are based at the airport as of 2020.

Hoskins Field is a small private airstrip located approximately two miles east of Tumwater.

H. Roadway Network

As part of the Transportation Plan update, traffic operations were assessed at 40 intersections, including signalized, roundabout, and stop controlled intersections. These study intersections were selected in consultation with Tumwater staff and were previously evaluated as part of the 2016 Comprehensive Plan.

This section discusses the analysis of existing vehicle operations and evaluates how well the existing system serves both local and regional needs.

1) Delay & Level of Service

Intersection-level delay measured in seconds per vehicle and Level of Service (LOS) are the primary measures of intersection performance for the motorized vehicle traffic operations analysis. Descriptions of levels of services are found in Table T-3.

The Highway Capacity Manual defines delay as

> *"…brought about by the presence of a traffic control device including delay associated with vehicles slowing in advance of an intersection, the time spent stopped on an intersection approach, the time spent as vehicles move up in the queue, and the time needed for vehicles to accelerate to their desired speed."*

Level of service is a term that qualitatively describes the operating performance of an intersection and is a standard method for characterizing delay. For signalized, roundabout, and all-way stop control intersections, the Level of Service is based on the average delay for all approaches. For two-way stop control intersections, the direction or movement with the highest delay is reported. Level of service is reported on a scale from A to F, with A representing the lowest delays and F the highest.

Beyond travel time there are other impacts to the system which includes impact on air quality and collision rates.

Increased Crash Rates: Higher congestion levels lead to more frequent stop-and-go conditions, increasing the likelihood of some collisions. However, slower speeds experienced during congested times can lead to less severe crash forces, and therefore, fewer serious injury or fatality collisions.

Elevated Emissions: Vehicles experience more idling, acceleration, and deceleration in

congested conditions, resulting in higher emissions of pollutants such as carbon monoxide (CO), nitrogen oxides (NOx), and particulate matter (PM).

Table T-3. Level of Service Descriptions.

Level of Service (LOS)	Description	Signalized Intersections and Roundabouts Avg. Delay (sec/veh)[1]	Unsignalized Intersections Avg. Delay (sec/veh)[2]
A	***Free Flow / Insignificant Delay*** Extremely favorable progression. Individual users are virtually unaffected by others in the traffic stream.	< 10	< 10
B	***Stable Operations / Minimum Delays*** Good progression. The presence of other users in the traffic stream becomes noticeable.	10 to 20	10 to 15
C	***Stable Operations / Acceptable Delays*** Fair progression. The operation of individual users is affected by interactions with others in the traffic stream	20 to 35	15 to 25
D	***Approaching Unstable Flows / Tolerable Delays*** Marginal progression. Operating conditions are noticeably more constrained.	35 to 55	25 to 35
E	***Unstable Operations / Significant Delays Can Occur*** Poor progression. Operating conditions are at or near capacity.	55 to 80	35 to 50
F	***Forced, Unpredictable Flows / Excessive Delays*** Unacceptable progression with forced or breakdown of operating conditions.	> 80	> 50

Notes: 1 – Overall intersection LOS and average delay (seconds/vehicle) for all approaches.
2 – Worst movement LOS and delay (seconds/vehicle) only.

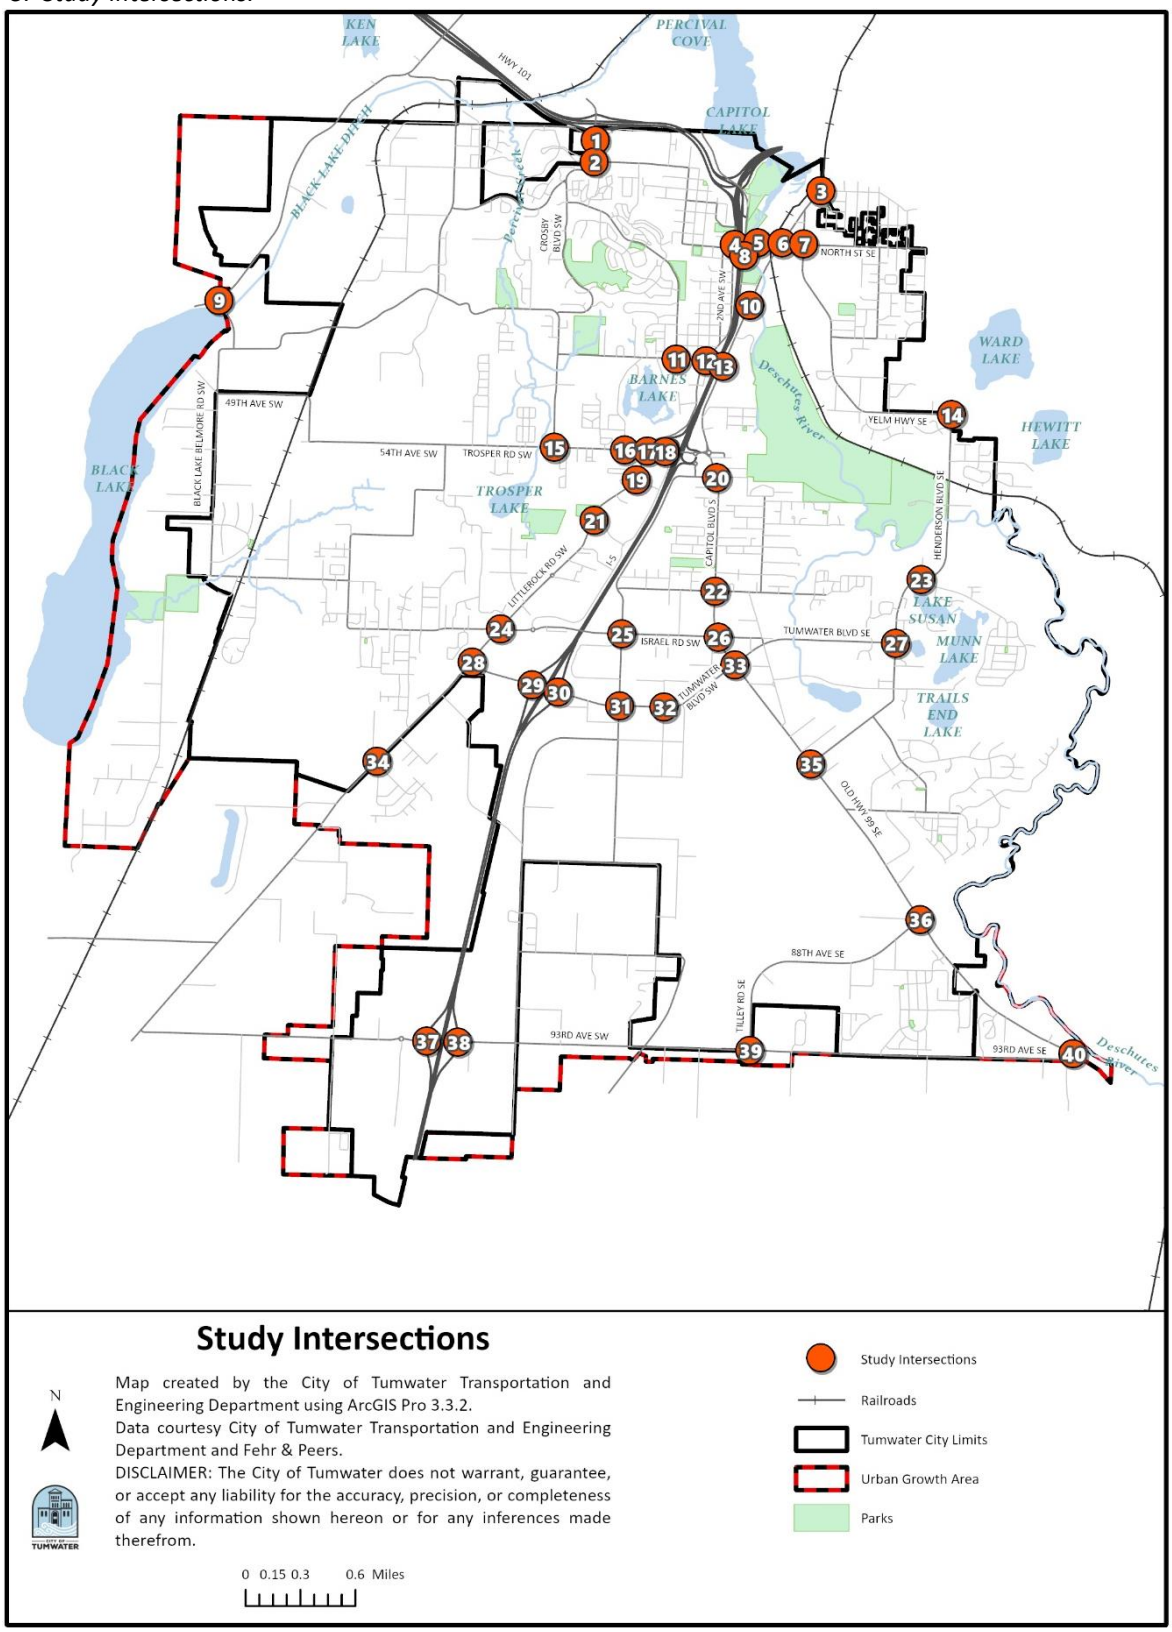
Source: Fehr & Peers, based on Highway Capacity Manual, 6th Edition.

Tumwater's Level of Service policy sets the following standards:

- Level of Service D for all other intersections and segments in Tumwater.

Level of Service standards do not apply to Strategy Corridors designated in the Regional Transportation Plan such as Capitol Boulevard SW and Cleveland Avenue SE/Yelm Highway SE.

The Washington Department of Transportation sets Level of Service standards for state-owned



highways, including interchanges. They have established a Level of Service D for state highways within urban areas.

Multimodal Level of Service (MMLOS) standards are identified in Chapter 2 Framework and Analysis of the Bicycling, Walking, & Rolling Plan in Appendix C.

The study intersections are shown in Figure T-5, and full details of the traffic operations analysis are included in Appendix B.

DRAFT

Figure T-5. Study Intersections.

Source: Fehr & Peers.

2) Traffic Operations Analysis Results

The results of the existing operations analysis are shown in Table T-4 and Figure T-6. Out of the 40 intersections analyzed, six did not meet Tumwater's Level of Service standard in 2024.

Notes: Source: Fehr & Peers, 2025.

- Intersections in **bold** do not meet their Level of Service standard.

- Abbreviations: LOS – Level of Service, AWSC – All Way Stop Control, TWSC – Two Way Stop Control, RAB – Roundabout, NBL – Northbound Left, NBT – Northbound Through, NBR – Northbound Right, WBL – Westbound Left, WBR – Westbound Right, SBL – Southbound Left, SBT – Southbound Through, SBR – Southbound Right.
- Two Way Stop Control and roundabout intersections have the worst movement noted in parentheses. The movement shown inside the parentheses indicates the worst-performing movement. For example, if it is NBL, it means the exclusive northbound left-turn lane has the worst movement. NBL/NBR indicates that the lane shared by both northbound left and northbound right turns has the worst movement.

DRAFT

Figure T-6. Existing Intersection Level of Service.

Source: Fehr & Peers, 2025.

3) Segment Analysis

Ten roadway segments shown in Table T-5 were studied for their volume to capacity (V/C) ratio considering a Level of Service standard of D. A value less than one indicates less volume compared to the theoretical capacity of a roadway operating at Level of Service D, while more than one indicates volumes over that theoretical capacity.

All segments except Custer Way between North 2nd Avenue Southwest and Capitol Boulevard Southwest were operating at an acceptable volume to capacity ratio. This is consistent with intersection operations as both Custer Way SW / North 2nd Avenue SW and Custer Way SW / Boston Street SW operate at Level of Service E.

DRAFT

Table T-5. Existing Volume / Capacity Ratios.

Road Segment	From	To	V/C Ratio NB	V/C Ratio SB	V/C Ratio EB	V/C Ratio WB
Deschutes Way	E Street SW	Boston Street SW	0.33	0.15	-	-
Custer Way	Capitol Boulevard SW	Cleveland Avenue SW	-	-	0.64	0.45
Custer Way	North 2nd Ave SW	Capitol Boulevard SW	-	-	**1.35**	**1.02**
Henderson Boulevard	Tumwater Boulevard SW	Yelm Highway SE	-	-	0.30	0.29
Cleveland Avenue SW	Custer Way	Yelm Highway SE	0.38	0.55	-	-
Old Highway 99 SE	Tumwater Boulevard SW	Henderson Boulevard SE	0.65	0.86	-	-
Old Highway 99 SE	Henderson Boulevard SE	88th Ave SE	0.62	0.91	-	-
Capitol Boulevard SW	Tumwater Boulevard SW	Linderson Avenue SW	0.38	0.42	-	-
Capitol Boulevard SW	Linderson Way SW	Linwood Way SW	0.26	0.31	-	-
Littlerock Road SW	Trosper Road SW	Kingswood Drive SW	0.30	0.35	-	-
Tumwater Boulevard	Capitol Boulevard SW	Linderson Way SW	-	-	0.36	0.52

Notes:

- Segments in **bold** do not meet their LOS threshold.
- Abbreviations: V/C – volume to capacity, NB – northbound, SB – southbound, EB – eastbound, WB – westbound.
- V/C Ratios were calculated based on the Florida Department of Transportation's QLOS Handbook using peak hour directional capacities associated with a threshold LOS D for different lane numbers in a suburban context.

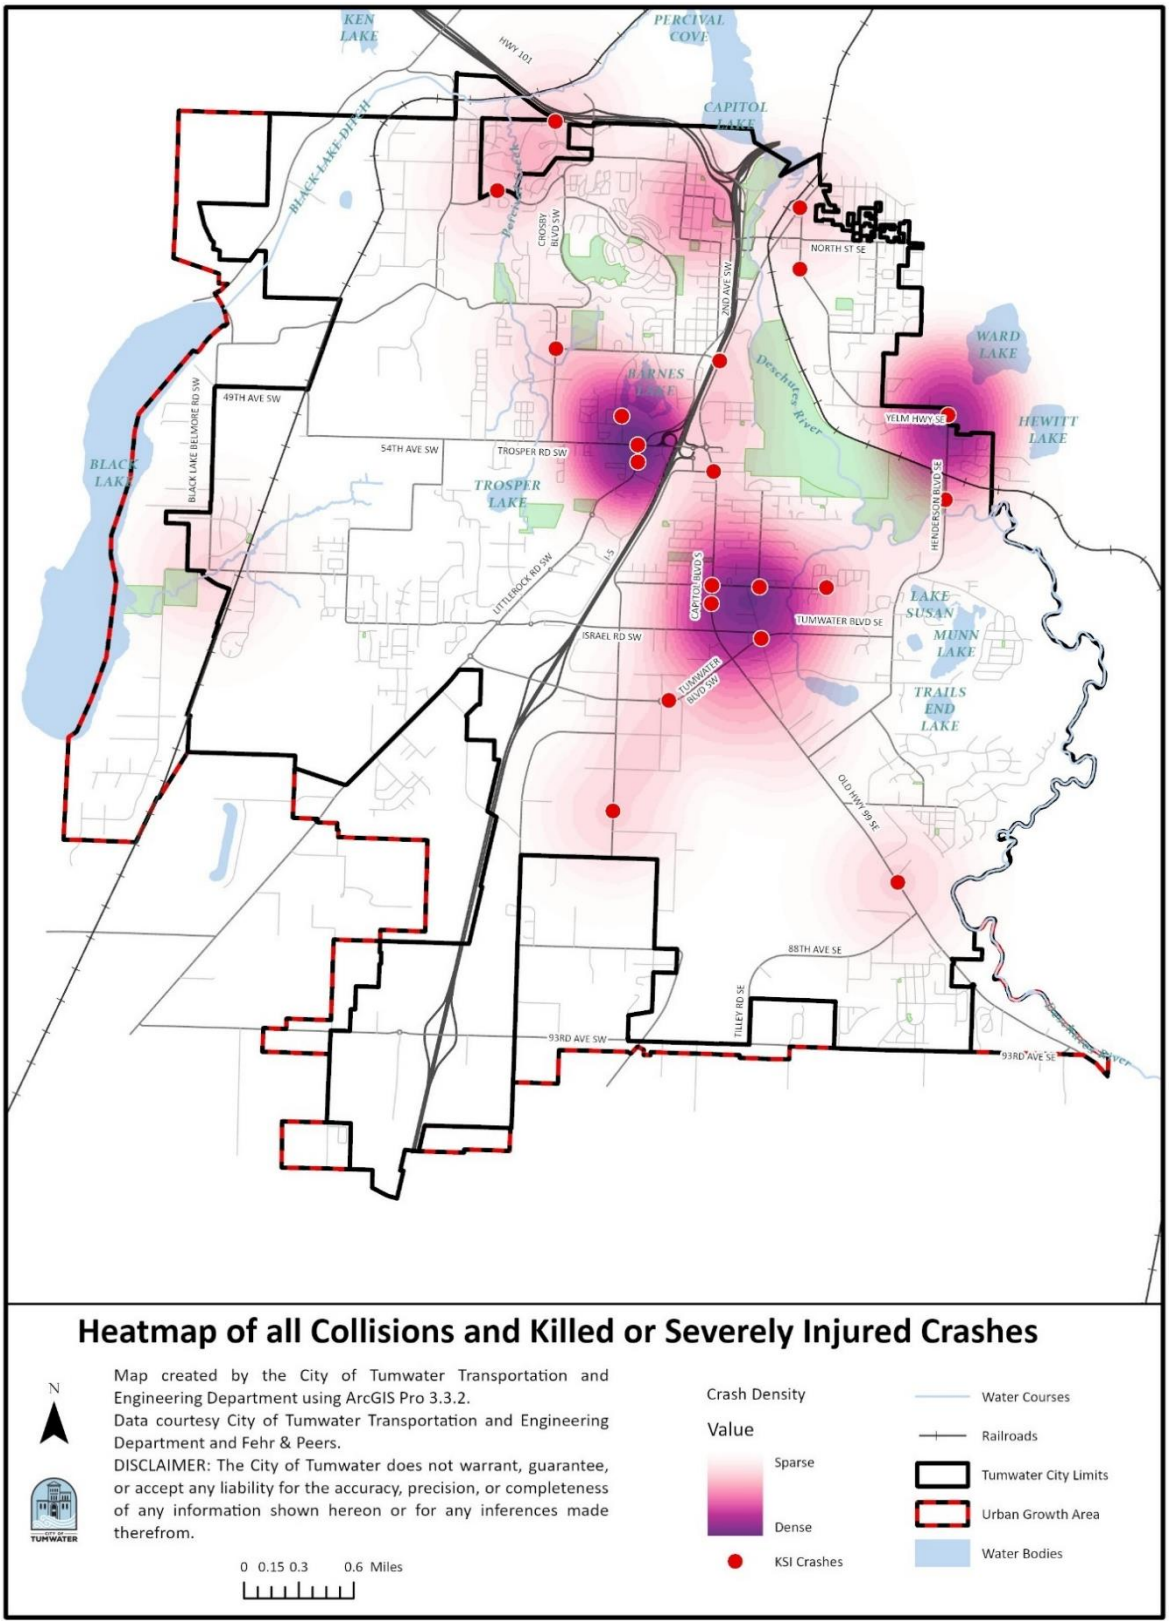
I. Safety

Collision data for Tumwater roads collated and cleaned by the Washington State Department of Transportation was used to identify safety hotspots and overall collision trends. Collisions on state routes such as US 101 or Interstate 5 are not considered as part of this analysis. The analysis covered a five-year period from January 2019 to December 2023, the most recent available data.

There were 1,447 reported collisions, of which 22 were serious injury collisions and four were fatal collisions. Pedestrians were in 28 collisions and bicyclists were in 24 collisions. Six pedestrians and one bicyclist were seriously injured, while four pedestrians were killed.

Between 2019 and 2023, Tumwater experienced nearly 1,500 collisions, with 26 of these resulting in a fatality or serious injury (Table T-6). Collisions where people are killed or seriously injured make up about two percent of collisions for all modes, while about 20 percent of collisions involving pedestrians and bicyclists resulted in serious injuries or fatalities. Because pedestrians and cyclists are not protected by advanced safety features that protect people inside cars, they are more vulnerable.

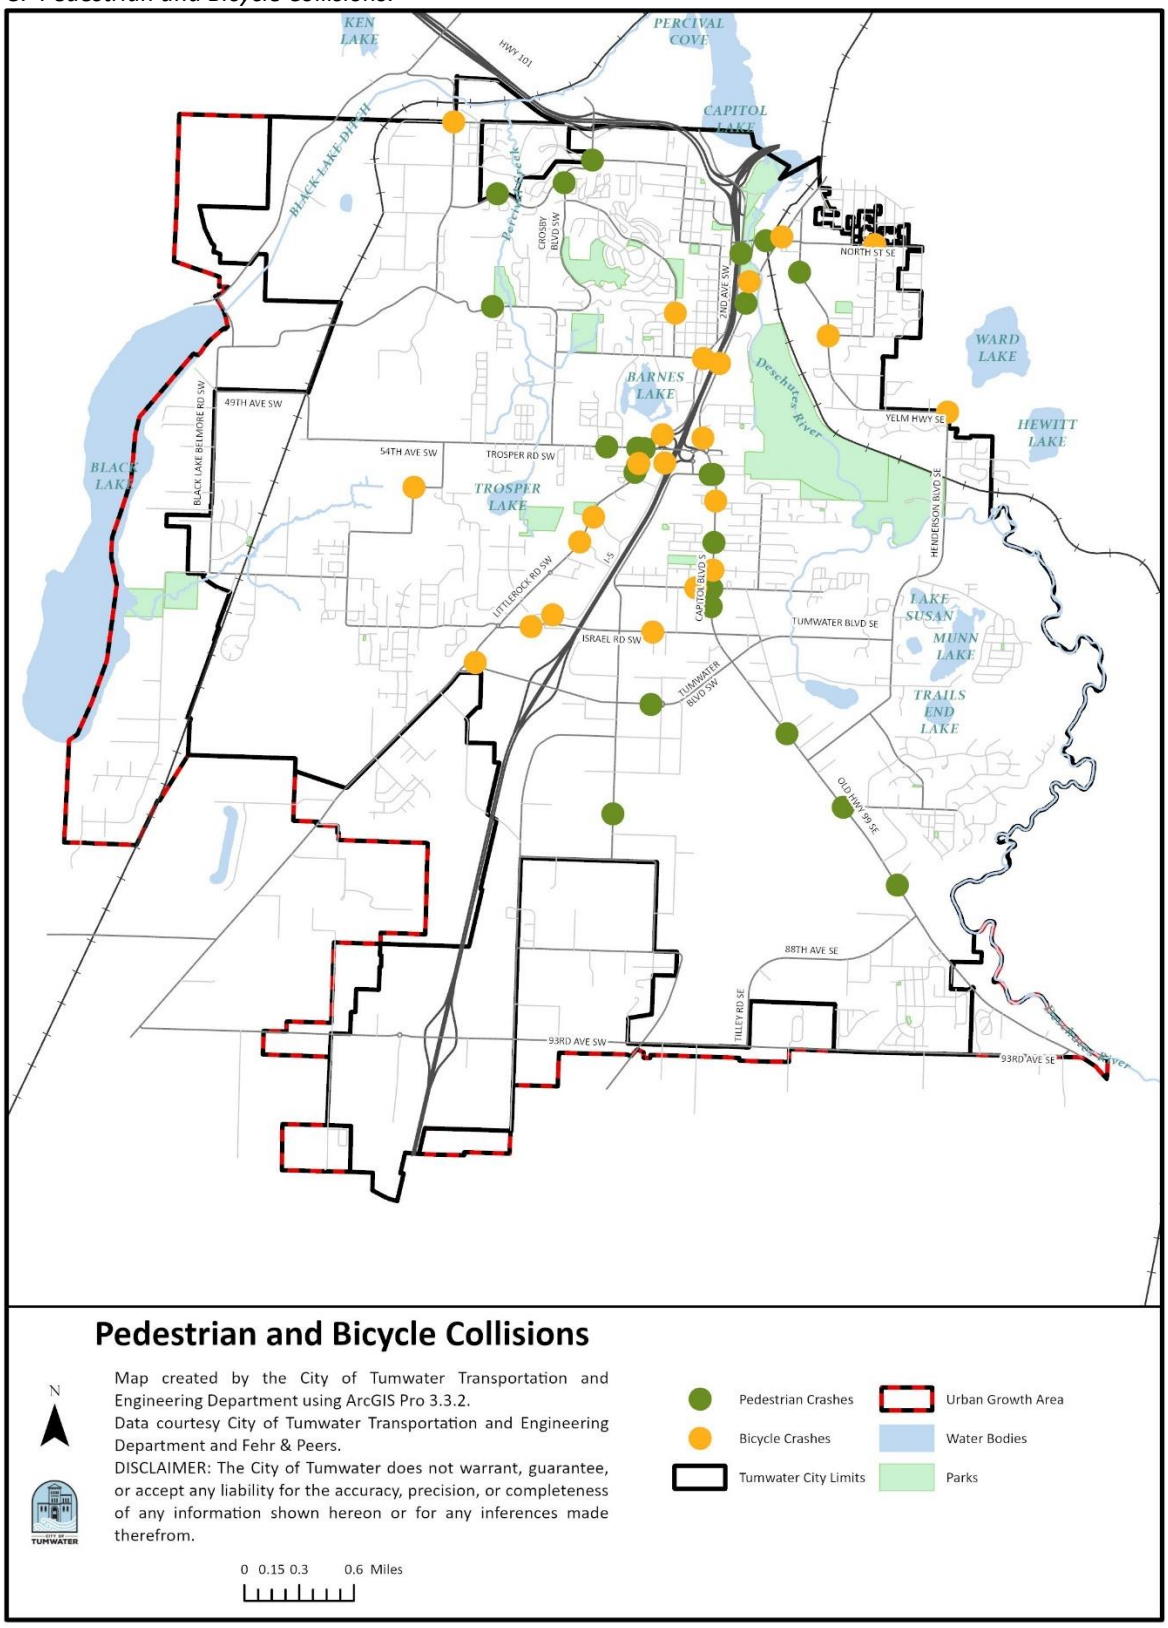
Figure T-7 displays a heat map of all collisions across the study area with darker regions indicating higher concentrations of collisions and points for each serious injury or fatal collision. All collisions are shown in Figure T-8.



Tumwater does not have a local road safety plan and is therefore not eligible for Highway Safety Improvement Program funding to address critical safety needs. Looking ahead, Tumwater may explore the development of a Comprehensive Safety Action Plan to help prioritize safety improvements through the safe systems approach.

Table T-6. Collisions by Injury Severity from January 2019 – December 2023.

Severity	Number of Collisions	Percentage of Collisions
All Collisions	**1,449**	**100%**
Property Damage Only	1,034	71%
Minor injury (Including Possible and Unknown Injuries)	389	27%
Serious Injury	22	1%
Fatality	4	<1%
Pedestrian Collisions	**24**	**1%**
Serious Injury Pedestrian Collisions	6	<1%
Fatal Pedestrian Collisions	4	<1%
Bicycle Collisions	**28**	**1%**
Serious Injury Bicycle Collisions	1	<1%
Fatal Bicycle Collisions	0	0%



Note: Does not include US 101 & Interstate 5 collisions.
Source: Fehr & Peers, 2025.

Figure T-7. Heatmap of all Collisions and Killed or Severely Injured Crashes.

Source: Fehr & Peers, 2025.

Figure T-8. Pedestrian and Bicycle Collisions.

Source: Fehr & Peers, 2025.

Tumwater has seen a gap in police reported data, which is the basis for the analysis above. Tumwater is developing a framework to collect more collision reports, with a particular focus on active transportation collisions which may not show up in police reports.

J. Current Trends & Opportunities

Tumwater is working to create an improved transportation network for all users. Understanding and addressing transportation trends, as documented in this section, and finding opportunities to realize Tumwater's transportation vision and goals will be key to improving transportation outcomes.

1) Active Transportation

Every trip taken within the transportation system begins and ends with active transportation. The goal of moving people and goods often requires multiple modes for one trip. Over 25 percent of the travelling public does not have a driver's license so providing more options for active transportation is a basic public service. Active transportation modes are connected to the rest of the system because of the impacts they have on the system overall.

Gaps in the current infrastructure make it difficult for people who do not drive to get from place to place. As the system provides more comfortable routes, those who choose to drive will also have the option to choose other modes.

Active transportation is a major strategy for greenhouse gas reduction as motorized vehicle exhaust is the second highest source of greenhouse gases in Thurston County. As more people are accommodated by infrastructure that supports active transportation, less greenhouse gas emissions are produced. To that end, Tumwater has prioritized active transportation by creating a detailed Bicycling, Walking, & Rolling Plan for network improvements is included in Appendix C.

The Bicycling, Walking, & Rolling Plan includes baseline data about the existing conditions as to set the priority network for infrastructure improvements. This plan also sets mode shift targets and greenhouse gas emission reduction goals that support the Climate Element of the Comprehensive Plan.

It is important to also include active transportation system information in the Transportation Plan as the transportation system is not complete without these components. Active transportation data is therefore woven throughout the Transportation Plan and included in both the Transportation Plan and the Bicycling, Walking, & Rolling Plan.

2) Americans with Disabilities Act Transition Plan

Tumwater adopted an Americans with Disabilities Act Transition Plan in 2021 to create a roadmap towards a fully accessible transportation system. The plan does not currently have a schedule for when these investments will be made.

3) Schools

Schools are a significant focus for improved multimodal access and transportation options that meet the needs of young people especially. Bicycling, Walking, & Rolling Plan specifically

DRAFT

names schools as key locations since they serve a large percentage of residents that cannot drive. Prioritizing vulnerable populations by providing safe facilities for active transportation is one way Tumwater can serve families with children.

The transportation networks surrounding schools can become congested before and after the school day, raising safety concerns due to the simultaneous use of various modes of transportation within a compressed timeframe.

Schools that do not have safe or accessible routes for people using active transportation generally experience more intense vehicle traffic in the peak periods. Many public schools in Tumwater do not effectively accommodate the current vehicle queuing demand for parent pick-up and drop-off, leading to congestion on streets. Air quality around schools is a growing concern, particularly due to vehicle idling during drop-off and pick-up times. This issue is closely linked to the prevalence and severity of childhood asthma, affecting students' health and academic performance.

4) Electric Vehicle Infrastructure

With electric vehicles becoming more common, Tumwater needs more vehicle charging infrastructure that can serve the needs of the existing fleet and encourage greater electric vehicle usage. In Tumwater, both battery only and plug-in hybrid registrations of electric vehicles have increased rapidly, from three in 2011 to 739 in 2024.[1] Electric vehicles can help reduce emissions in Tumwater and will help meet its greenhouse gas reduction goals to reduce locally generated emissions 85 percent below 2015 levels by 2050 in the Climate Element.

5) Network Connectivity

Few east-west arterials serve Tumwater because barriers like the Deschutes River, Interstate 5, and the Burlington Northern/Santa Fe Railroad limit connectivity result in an increase congestion. Low density developments and a lack of connectivity between subdivisions around Tumwater further exacerbate congestion. There is a need for greater connectivity for all modes between residences, commercial areas, and employment hubs.

Active transportation could be an alternative to driving on congested roadways, but the existing infrastructure between major areas of interest suffers from a disconnected roadway network and high stress facilities for both pedestrians and bicyclists as shown in Figure BWR-4 and Figure BWR-7 in Appendix C of the Bicycling, Walking, & Rolling Plan. Some high stress facilities suffer from limitations such as age of infrastructure, designations for preservation and environmental concerns. These factors will have to be considered in developing a connected low-stress active network.

6) Local & Regional Growth

Future development activities in Tumwater will include more industrial and commercial development to meet employment forecasts. Currently, the majority of Tumwater residential development consists of low-density single-family housing, but this will be changing over the

[1] https://data.wa.gov/Transportation/Electric-Vehicle-Registration-Activity-by-Year/tak8-xdcp.

DRAFT

course of the Plan as more middle and multifamily family is built to meet housing growth requirements and demand.

Growth outside Tumwater will also play a major role in the growing demands on Tumwater's transportation network. Tumwater is working to accommodate both local and regional growth, investing in improving opportunities to travel by all modes.

Tumwater cannot permit developments that would cause one or more Level of Service standards to fail unless adequate mitigations are funded.

DRAFT

3. Public Outreach

Outreach was completed in coordination with the overall Comprehensive Plan update, and included asking the community about their transportation priorities, locations of concern, and their day-to-day modal choices. A transportation focused outreach event was conducted in March 2025. Feedback was also solicited from the following as part of the adoption process for this plan:

- Area Agency on Aging
- Asian Pacific Islander Coalition
- Capital City Council for the Blind
- City Council
- Family Support Center of South Sound Intercity Transit
- People First of Thurston County
- Planning Commission
- Thurston County Developmental Disability Coalition
- Thurston Regional Planning Council

Map-based activities were undertaken at the March 2025 event, such as:

- Identifying locations where community members drove, walked, rolled, or bicycled.
- Identifying areas of concern and specific issues associated with the location.
- Rating transportation priorities to aid in the development of project prioritization criteria.

Feedback at the March 2025 event included:

1. **Driving:** Attendees identified frequent driving routes, including Tumwater Blvd SW at Interstate 5, Israel Rd SW, Henderson Blvd SE, Capitol Blvd SE, R.W. Johnson Blvd SW, Sapp Rd SW, Trosper Rd SW, Cleveland Ave SE, 66th Ave SW, and Littlerock Rd SW. Residents highlighted concerns such as high collision rates at Tumwater Blvd and Interstate 5, suggesting the need for a traffic signal or roundabout. Other issues include inadequate service at Custer Way, Capitol Blvd SE, and Cleveland Ave SE, and a proposal to convert the abandoned railroad south of Bonneville Power Authority power lines on the west side of Tumwater into a pedestrian and bicycle trail.
2. **Bicycling:** Attendees denoted popular bicycling areas like Custer Way, Capitol Blvd SE, Henderson Blvd SE, Kirsop Rd SW, 66th Ave SW, Black Lake Belmore Rd SW, Sapp Rd SW, and various local streets. Challenges for cyclists include inconsistent bicycle lanes, overgrown vegetation encroaching on bicycle paths, and dangerous intersections such as Henderson Blvd SW at the Deschutes River Bridge, where multiple bicycle collisions have occurred. Residents also expressed the need for wide bicycle lanes and improvements near the library.
3. **Walking:** Attendees marked common walking routes, including Cleveland Ave SE, 66th Ave SW, 70th Ave SW, Littlerock

DRAFT

Rd SW, Israel Rd SW, Linwood Ave SW, Kirsop Rd SW, and numerous former county roads in Tumwater that are now serving urban development. Pedestrian concerns focus on the lack of continuous sidewalks, insufficient crosswalks, and overgrown vegetation obstructing pathways, particularly near the roundabout by the church on Mottman Blvd SW. There was also a call for more neighborhood connections, raised crosswalks, and additional sidewalk amenities.

4. **Public Transit:** Attendees highlighted transit usage areas such as Black Lake Blvd SW, Mottman Blvd SW, Barnes Blvd SW, Capitol Blvd SE, 2nd Ave SW, Custer Way, Israel Rd SW, Rural Rd SW, and Littlerock Rd SW. Residents advocated for expanded bus services to all schools, additional buses for seniors, and new bus stops at locations like 93rd Ave SE and Snowdrop Ave SE and on 88th Ave SE. There was also an interest in improved transit access in underserved areas like Bush Prairie and Cleveland Ave SE.

DRAFT

4. Tumwater's Future Transportation System

A. Future Roadway Operations

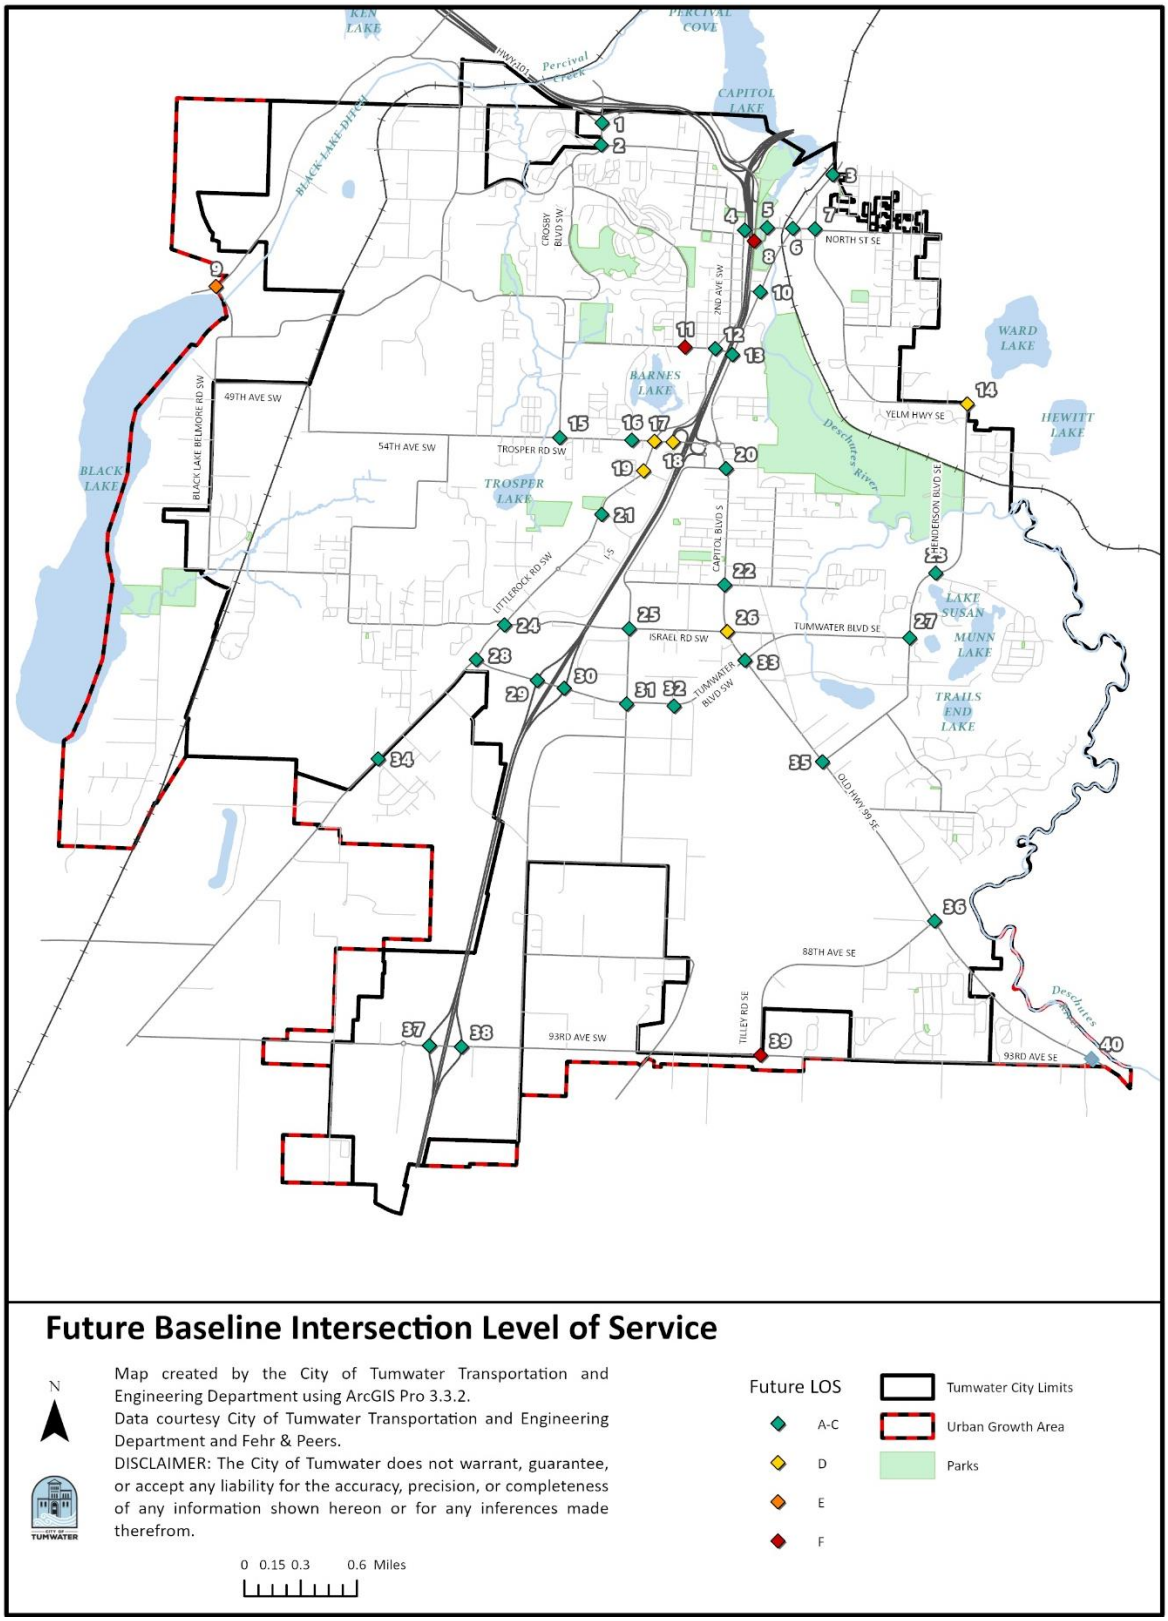
Based on growth forecasts within the region and Tumwater over the next two decades, future traffic volumes were forecast for the same study intersections shown in the Transportation Planning Context chapter.

The forecasts were based on the Thurston Regional Planning Council's travel demand model, which accounts for current conditions and future projected growth. The travel demand model incorporates forecasted growth both within Tumwater and throughout the region. The model was used to forecast vehicle volume growth for study intersections. The model does not provide active transportation trip forecasts, nor do any other widely available tools. The result of this analysis is shown in Figure T-9 and Table T-7.

To help the transportation system accommodate forecast growth, Tumwater has identified a set of baseline improvement projects. These projects primarily focus on the installation of roundabouts at several critical study intersections. In Table T-7, these locations are marked with an asterisk (*). These include:

- Custer Way SW / Boston Street SW
- Custer Way / Capitol Blvd SE
- Custer Way / North St SE / Cleveland Avenue SE
- Capitol Blvd SE / E St SE
- 2nd Avenue SW / Linwood Avenue SW
- Capitol Blvd SE / Dennis Street SE
- Linderson Way SW / Israel Rd SW
- Tumwater Blvd SE / Henderson Blvd SE
- Tumwater Boulevard SW / Interstate 5 southbound ramp
- Tumwater Boulevard SW / Interstate 5 northbound ramp
- Old Highway 99 SE / Henderson Boulevard SE

In addition, one location has been identified for signal installation, as listed below.



- Deschutes Way SW / Boston St SW

Under projected 2045 traffic volumes, these roundabout improvements are anticipated to operate at acceptable levels of service and maintain reasonable vehicle delays. However, a proposed signal is still expected to fail.

Despite these planned improvements, the analysis indicates that several other intersections are projected to fall below Tumwater's Level of Service standards by 2045. All of these underperforming intersections are currently stop-controlled, and without intervention, they are unlikely to accommodate future traffic demands effectively.

Notes:

- *Indicates that a baseline project is in place for the intersection.
- Intersections in **bold** do not meet their Level of Service standard.
- Abbreviations: LOS – Level of Service, AWSC – All Way Stop Control, TWSC – Two Way Stop Control, RAB – Roundabout, NBL – Northbound Left, NBT – Northbound Through, NBR – Northbound Right, WBL – Westbound Left, WBR – Westbound Right, SBL – Southbound Left, SBT – Southbound Through, SBR – Southbound Right.
- Two Way Stop Control and roundabout intersections have the worst movement noted in parentheses. The movement shown inside the parentheses indicates the worst-performing movement. For example, if it is NBL, it means the exclusive northbound left-turn lane has the worst movement. NBL/NBR indicates that the lane shared by both northbound left and northbound right turns has the worst movement.

Source: Fehr & Peers, 2025.

In addition to the intersection-level analysis, a future forecast volume to capacity (V/C) ratio assessment was conducted for the ten roadway segments previously studied. These volume to capacity ratios are presented in Table T-8 and provide a high-level screening of capacity constraints along key corridors within the study area.

Table T-8. Future Volume to Capacity Ratios.

Road Segment	From	To	V/C Ratio NB	V/C Ratio SB	V/C Ratio EB	V/C Ratio WB
Deschutes Way	E Street SW	Boston Street SW	0.33	0.15	-	-
Custer Way	Capitol Boulevard SW	Cleveland Avenue SW	-	-	0.64	0.45
Custer Way	North 2nd Ave SW	Capitol Boulevard SW	-	-	**1.35**	**1.02**

Road Segment	From	To	V/C Ratio NB	V/C Ratio SB	V/C Ratio EB	V/C Ratio WB
Henderson Boulevard	Tumwater Boulevard SW	Yelm Highway SE	-	-	0.30	0.29
Cleveland Avenue SW	Custer Way	Yelm Highway SE	0.38	0.55	-	-
Old Highway 99 SE	Tumwater Boulevard SW	Henderson Boulevard SE	0.65	0.86	-	-
Old Highway 99 SE	Henderson Boulevard SE	88th Ave SE	0.62	0.91	-	-
Capitol Boulevard SW	Tumwater Boulevard SW	Linderson Avenue SW	0.38	0.42	-	-
Capitol Boulevard SW	Linderson Way SW	Linwood Way SW	0.26	0.31	-	-

Tumwater Boulevard	Capitol Boulevard SW	Linderson Way SW	-	-	0.36	0.52

Note:

- Segments in **bold** do not meet their LOS threshold.
- V/C Ratios were calculated based on the Florida Department of Transportation QLOS Handbook using peak hour directional capacities associated with a threshold LOS D for different lane numbers in a suburban residential context.

Source: Thurston Regional Planning Council, 2025.

To better understand the effectiveness of the proposed mitigations, a future-year scenario was developed that reflects anticipated conditions in 2045 with proposed mitigations projects in place. This scenario includes additional projects that go beyond the baseline improvements to address intersections expected to operate below Tumwater's Level of Service standards.

Within this future condition, five intersections were identified as needing further enhancements to meet Tumwater's Level of Service standard. These intersections are:

- Deschutes Way SW / Boston Street SW
- Black Lake Boulevard SW / Black Lake Belmore Road SW
- 7th Avenue SW / Linwood Avenue SW
- 93rd Avenue SW / Tilley Road SW
- Old Highway 99 SE/ 93rd Avenue SE

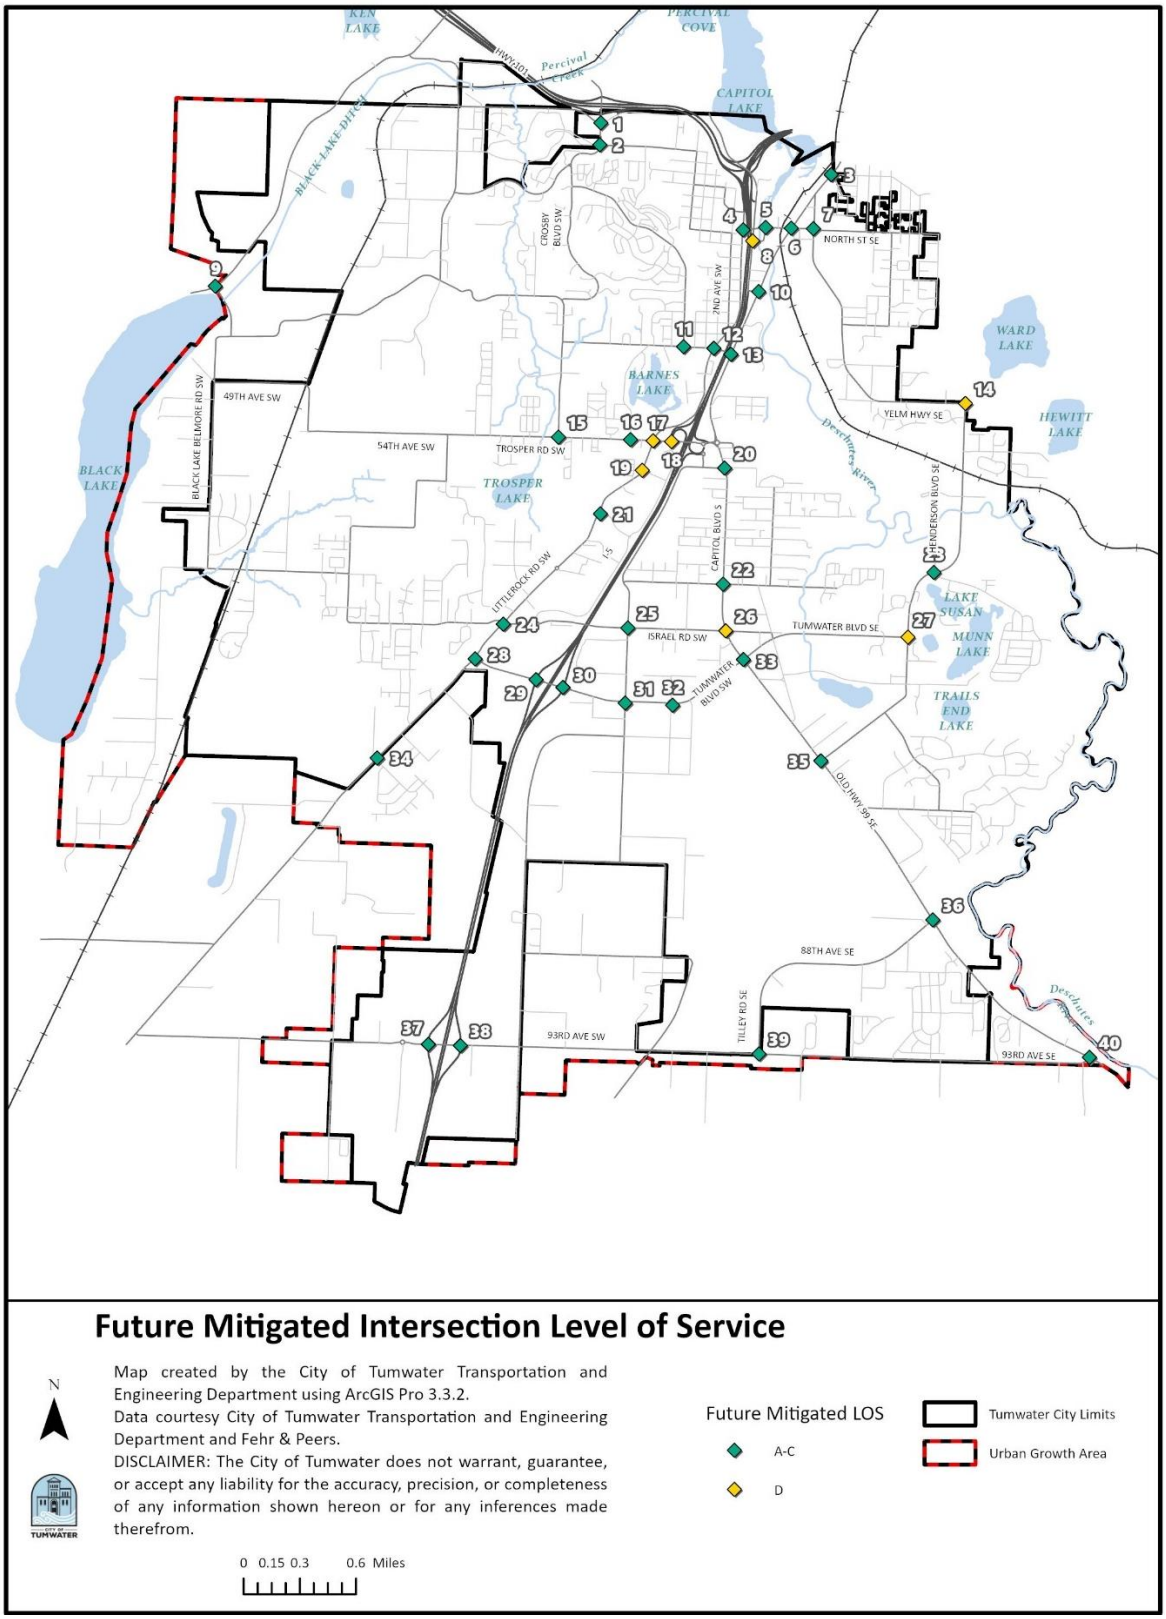
Currently, all these intersections are stop-controlled. For four of these locations, the proposed mitigation involves constructing roundabouts, which are expected to significantly improve operations and bring each intersection into compliance with Tumwater's established standards for delay and Level of Service.

The intersection of Deschutes Way SW / Boston Street SW requires a different approach due to its unique geometry and lack of space. Interstate 5 is just to the west of the intersection, and a bridge forms the east leg of this intersection. At this location, a baseline project installs a traffic signal.

However, the operational analysis indicates that a signal alone would not be sufficient to bring the intersection to an acceptable Level of Service. To address this, a dedicated westbound right-turn lane could be added in conjunction with the signal. This combined improvement would help resolve capacity issues and ensure that the intersection performs adequately under 2045 traffic conditions.

The results of this mitigation scenario are presented in Table T-9 and illustrated in Figure T-10. The analysis shows that with these additional projects in place, study intersections are expected to operate within Tumwater's adopted Level of Service standards.

Table T-9. Future Mitigated Intersection Delay and Level of Service.



#	Intersection Name	Control	Level of Service Standard	Future Baseline LOS/Delay (seconds/vehicle)	Future Mitigated LOS/Delay (seconds/vehicle)
8	Deschutes Way / Boston St	Signal**	D	**F/97**	D/53
9	Black Lake Blvd / Black Lake Belmore Rd	RAB**	D	**E/57 (WBL/WBR)**	A/6
11	7th Ave / Linwood Ave	RAB**	D	**F/64 (SBL/SBT/SBR)**	A/3
39	93rd Ave / Tilley Rd SW	RAB**	D	**F/150+ (NBL/NBR)**	A/7
40	Old Hwy 99 / 93rd Ave	RAB**	D	**F/72 (NBL)**	A/9

Notes:

- *Indicates that baseline project is planned for the intersection
- **Indicate that non-baseline mitigation project is planned for the intersection.
- Intersections in **bold** do not meet their Level of Service standard.
- Abbreviations: LOS – Level of Service, AWSC – All Way Stop Control, TWSC – Two Way Stop Control, RAB – Roundabout, NBL – Northbound Left, NBR – Northbound Right, WBL – Westbound Left, WBR – Westbound Right, SBL – Southbound Left, SBT – Southbound Through, SBR – Southbound Right.
- Two Way Stop Control and roundabout intersections have the worst movement noted in parentheses. The movement shown inside the parentheses indicates the worst-performing movement. For example, if it is NBL, it means the exclusive northbound left-turn lane has the worst movement. NBL/NBR indicates that the lane shared by both northbound left and northbound right turns has the worst movement.

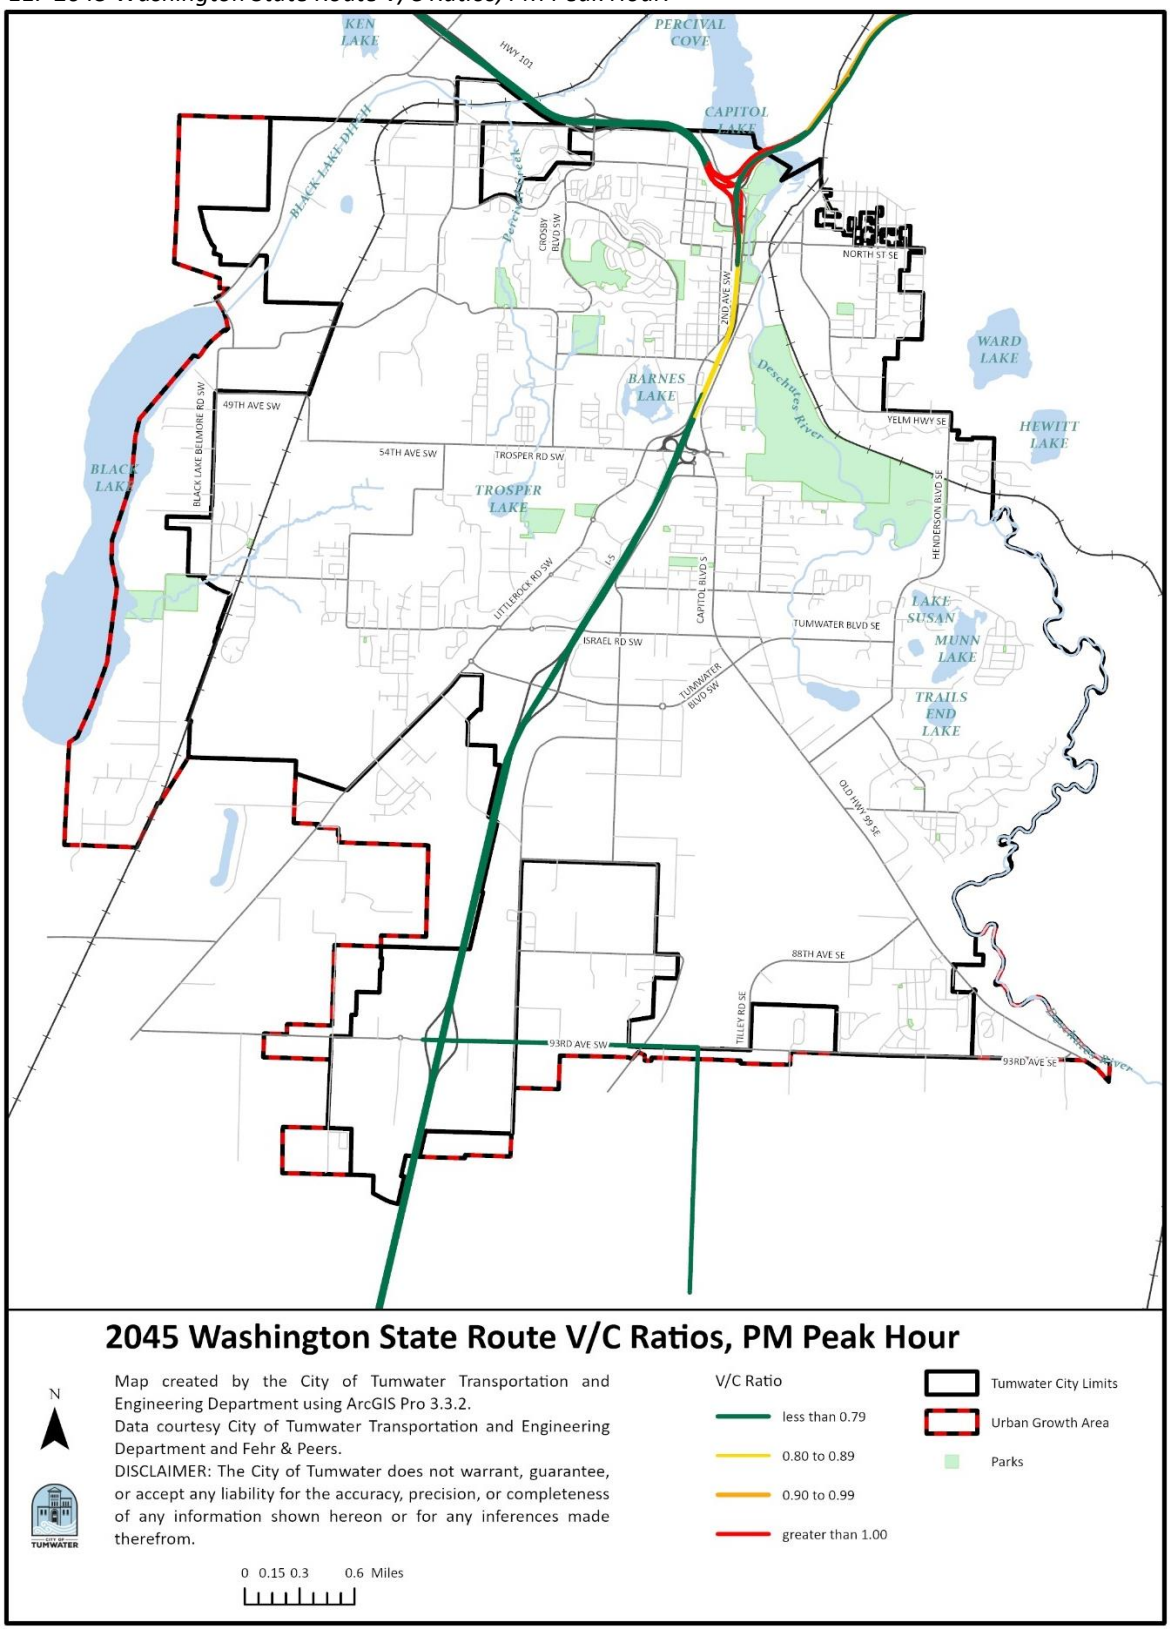
B. State Facilities



1) Segment Capacity Analysis

To evaluate the overall performance of Washington State Department of Transportation operated facilities within the city limits, including Interstate 5, US 101, and SR 121, the volume to capacity ratio was used as a primary metric for analyzing existing and future traffic conditions. Figure T-11 illustrates the projected volume to capacity ratios for state route segments within Tumwater under forecasted 2045 conditions. This analysis was based on forecast volume to capacity ratios from the Thurston Regional Planning Council's 2045 Tumwater Travel Demand Model.

Based on the PM peak hour analysis, the junction where Interstate 5 and US 101 converge is projected to experience significant congestion, with a volume to capacity ratio exceeding 1.0. This indicates that traffic demand will surpass available roadway capacity, primarily due to the complex merging maneuvers required as vehicles transition between the two major highways. These merging conflicts are expected to contribute to slower travel speeds and increased delays at the interchange.

DRAFT

Figure T-11. 2045 Washington State Route V/C Ratios, PM Peak Hour.

Source: Thurston Regional Planning Council and Fehr & Peers, 2025.

2) Intersections

In addition to the volume to capacity ratio analysis conducted at the segment level for all Washington State managed facilities within Tumwater, an intersection-level analysis was performed to evaluate operations at key locations adjacent to these corridors. This analysis focused on intersections that serve as primary access points to and from the freeway system, particularly those that connect directly to Interstate 5 on-ramps and off-ramps.

Given the importance of Interstate 5 as a major north-south transportation corridor through Tumwater, evaluating the operational performance of these access intersections is critical for understanding how efficiently traffic can enter and exit the freeway under future conditions.

The Washington State Department of Transportation has adopted a Level of Service standard of D or better for these intersections. Currently, the southbound Interstate 5 off-ramp at Tumwater Boulevard is signalized, while the northbound ramp is controlled by a two-way stop control.

With continued growth in traffic demand expected over the coming decades and to maintain acceptable operations, roundabouts are planned at both ramp terminals at the Tumwater Boulevard interchange. These improvements are scheduled to be implemented by the year 2045.

As summarized in Table T-10-10, all intersections that provide connections to Interstate 5 within the study area are anticipated to operate at or above the Level of Service D standard under projected 2045 conditions, indicating that the planned improvements will effectively mitigate future delays and maintain acceptable levels of service.

Table T-10. 2045 Interstate 5 Intersection Impacts, PM Peak Hour.

Intersection Name	Control	Level of Service (LOS) Standard	Future Baseline LOS/ Delay (seconds/vehicle)
Interstate 5 SB Ramps / Tyee Dr SW / Trosper Rd SW	Signal	D	D/42
Interstate 5 SB Ramps / Tumwater Blvd SW	Signal*	D	A/9
Interstate 5 NB Ramp / Tumwater Blvd SW	TWSC*	D	A/5
Interstate 5 SB Ramps / 93rd Ave SW	Signal	D	B/15
Interstate 5 NB Ramps / 93rd Ave SW	Signal	D	A/5

Note:
- *Indicates the baseline project for converting the intersection to a roundabout.
- **Bold** indicates that the intersection is failing.

Source: Fehr & Peers, 2025.

3) Multimodal Facilities

There are three state routes that pass through Tumwater. These include the Interstate 5 and US 101, which are both limited access freeway facilities that exclusively serve vehicles and transit. In addition, small segments of SR 121 traverse Tumwater. Portions of SR 121 include sidewalks, but there are no dedicated bicycle facilities.

Planning for active transportation routes across these freeways is a focus of the Brewery District Plan. Custer Way is one of the only crossing points and the facilities have a high level of traffic stress as shown in Figure BWR-4 of the Bicycling, Walking, & Rolling Plan in Appendix C.

A pedestrian and bicycle bridge over Interstate 5 also connects Dennis Street SW and Bishop Rd SW providing access to Tumwater High School commercial and mixed use developments on Tyee Drive SW.

The project team used the TRPC regional travel model to understand how expected growth in Tumwater and the region will add trips to the regional roadway network, including both streets in Tumwater and Washington State facilities.

The modeling did not find that expected development in Tumwater will add significantly to regional walking or transit trips on state facilities, thus Tumwater's planned growth is not expected to have any multimodal impacts on state routes. Washington State and Tumwater should continue to work together to require multimodal frontage improvements along SR 121 as parcels are developed.

C. Priority Networks

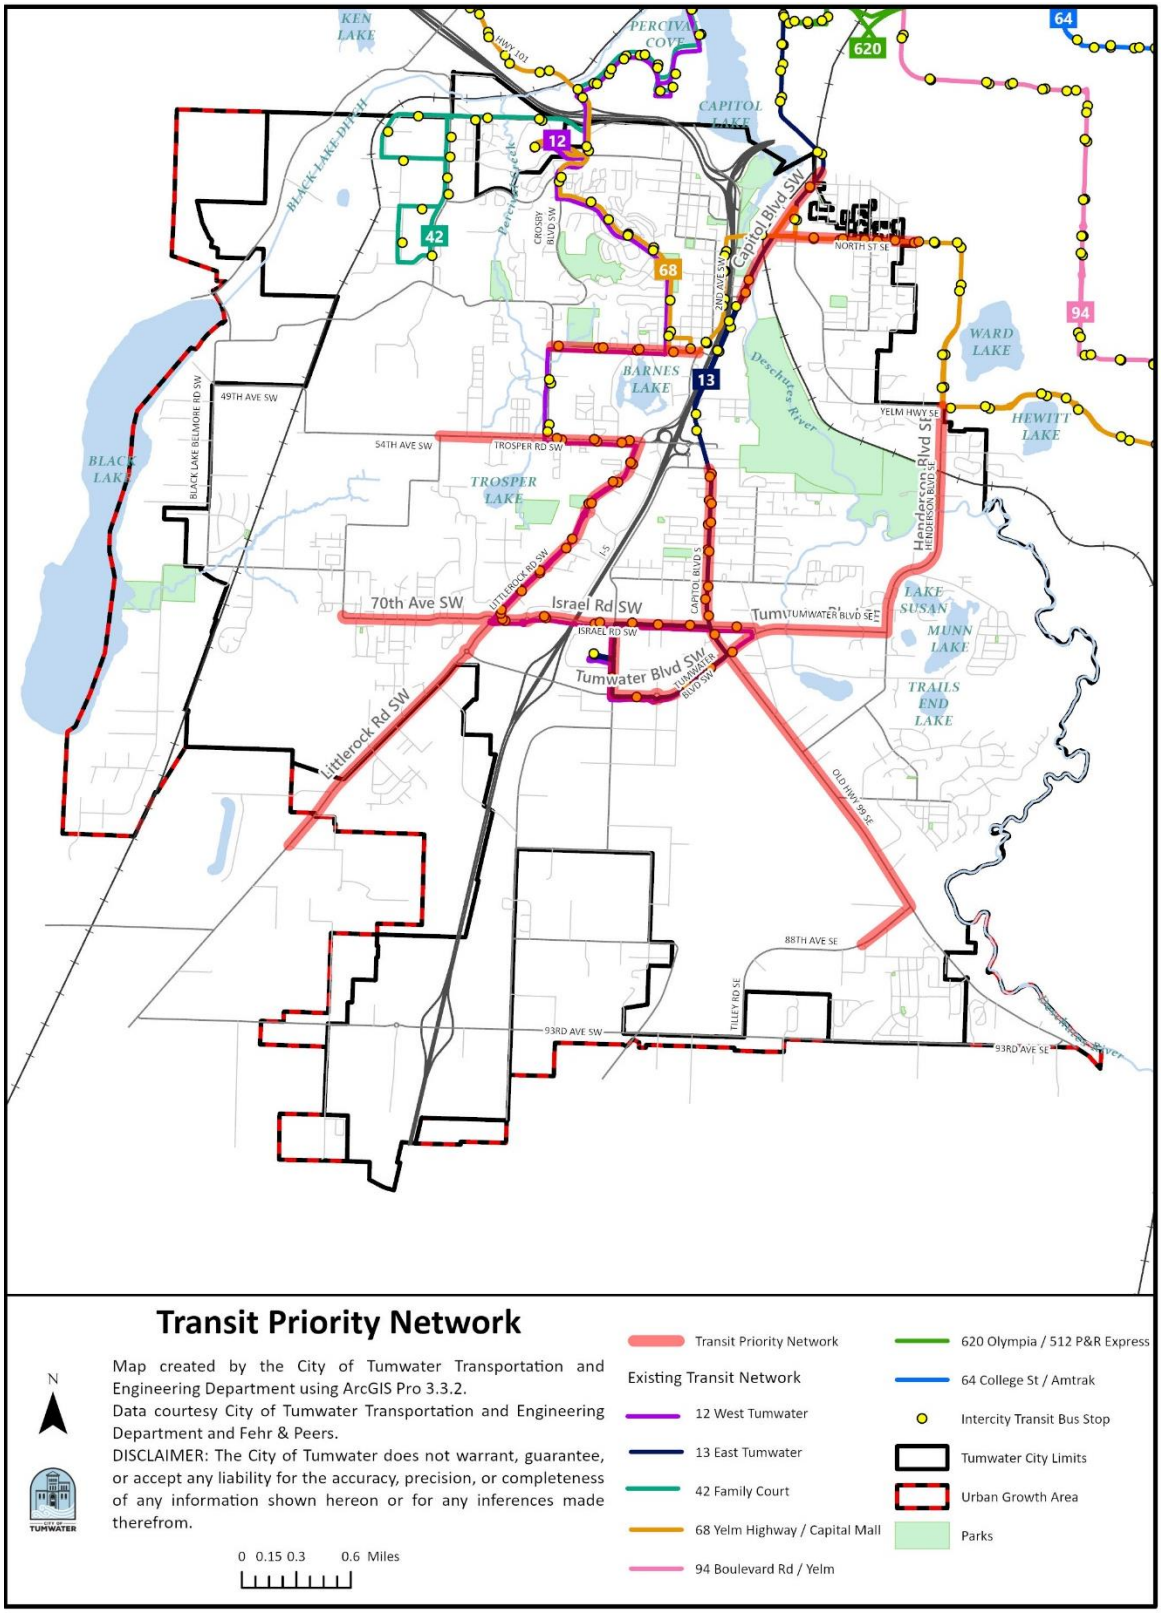
Tumwater's transportation priority networks identify the areas where prioritized improvements should be considered to enhance the layered multimodal network. Multimodal priority networks are centered on designing transportation systems that prioritize accessibility for the diverse needs of all users—pedestrians, cyclists, drivers, transit riders, and freight. Improvements for active transportation are prioritized based on the analysis in the Bicycling, Walking, & Rolling Plan. Improvements for vehicle use are prioritized based on Level of Service analysis results as discussed in the previous section.

Using a layered network strategy, modal emphasis is assigned to different streets, ensuring that each mode of transportation is accommodated effectively. This method acknowledges that while all travelers need to be accommodated within a community, no single street can serve all modes equally.

Other considerations like environmental constraints such as wetlands, protected species, cultural resources limit the feasibility of adding new infrastructure. This is the case for Kirsop Road SW, where community members have requested active transportation infrastructure. Unfortunately, sidewalks have been deemed infeasible in this area due to wetlands.

A wholistic approach to priority networks and advocating for more frequent and higher quality transit service as part of the transit priority network will provide Tumwater with more options for more people. The priority networks concentrate investments in the densest areas

DRAFT



and help fill in missing gaps so that more people can travel safely.

Since Tumwater does not directly administer transit services, the transit priority network shown in Figure T-12 reflects areas of future density growth which may benefit from transit service. The priority network does not solely reflect existing transit route locations. Tumwater can advocate for new or improved transit services covering these areas.

The freight priority network shown in Figure T-13 reflects locations classified according to Washington State Department of Transportation Freight Corridor Classifications in Table T-2 where T-1 is for highest freight volume, only applies to state-controlled facilities such as Interstate 5 and US 101 within Tumwater, T-2 is high volume freight routes on Tumwater streets, and T-3 is medium volume routes on Tumwater streets. Since T-1 facilities are state operated, the links do not fall directly under Tumwater's priority network. Tumwater will prioritize freight operations on routes classified as T-2 as well as select T-3 routes close to identified employment clusters.

5. 20-Year Project List

The previous chapter described Tumwater's vision for accommodating travel for everyone in the community, a framework of guidelines for different modes of travel, and Level of Service standards to achieve this vision.

This chapter describes the Transportation Plan's prioritized project list, which if built, would provide a safer and more complete transportation system.

A. Project Development

During the development of this plan, many transportation needs and project ideas to meet those needs were identified across Tumwater. They came from a variety of sources, including projects carried forward from prior plans, ideas suggested during in-person and online engagement, projects that address locations with high collision rates, and technical analysis comparing existing infrastructure to the planning guidelines and Level of Service standards described in the previous chapters (i.e., network gaps).

Given funding challenges, it was critical to prioritize those projects that do the most to advance Tumwater's transportation goals and build a more accessible system. As such, projects were scored based on the criteria identified below in Table T-11-11.

Table T-11: Project Prioritization Criteria.

	Plan Goal	Metrics	Points
1	**Develop and maintain an integrated network (11 points maximum)**	**Improving Comfort** - Project constructs a level of traffic stress 1 or 2 facility for walkers or bicyclers *(Project can improve existing facility or create new facility)*	**+3**
		Improving Connections - Project constructs walk or bicycle improvements that connect or improve access to key destination hotspots which include schools, business clusters, and parks or transit routes	**+3**
		Reduces Congestion - Project addresses a location with an existing or forecast vehicle Level of Service failure	**+3**
		Enhancing the Network- Project creates a new motorized vehicle route, enhances the street grid, or closes a bicycle or walk gap	**+2**
2	**Ensure safer outcomes and quality of life (11 points maximum)**	**Safer Active Transportation Outcomes** - Project location with a reported pedestrian or bicyclist collision in the most recent five years of crash data	**+3**
		Less Severe Collisions- Project location with a reported serious injury or fatality collision in the most recent five years of crash data (any mode)	**+3**

	Plan Goal	Metrics	Points
		Safer Schools - Project includes walk or bicycle improvements within Tumwater School District Walking Zones	**+3**
		Better Streetscapes - Project includes more comfortable active transportation facilities such as landscape buffers, benches, and pedestrian scale lighting	**+2**
3	**Prioritize Strategic Investments (10 points maximum)**	**Interagency Coordination** - Project includes funding from another agency or is highly eligible for grants	**+3**
		System Maintenance - Project replaces infrastructure nearing end of life or lowers life cycle costs compared to existing conditions	**+4**
		Impact Based Funding - Project provides additional capacity (any mode) and could be eligible for transportation impact fees	**+3**
4	**Lessen adverse effects (6 points maximum)**	**Mode Shift** - Project encourages shorter trips or shift to bicycling, walking, rolling, or transit	**+6**
5	**Build public support (12 points maximum)**	**Citywide Concerns** - Project location identified as a specific concern by Tumwater residents	**+4**
		Enhanced Outreach – Project will seek public input early and often during the development and design phases	**+4**
		Underinvested Zones – Project is in an area which has been historically underinvested	**+4**
		Maximum Possible Score	**50**

Source: Fehr & Peers, 2025.

B. Project Lists

Transportation projects have been separated into two lists. Projects listed below in Table T-12 are designed to have the greatest impact on traffic flow and safety. The Bicycling, Walking, & Rolling Plan in Appendix C contains the projects that are designed to have the greatest impact on the active transportation system. Each list includes a description, the primary impact mode, cost, and prioritization scores.

While separated, these projects compete for resources and are prioritized using the same criteria. Multimodal projects identified in the Bicycling, Walking, & Rolling Plan found in Appendix C are numbered separately with the identifier BWR. Project priority maps show both active transportation and motorized vehicle projects and their priority category.

To improve efficiencies in implementation, most projects will correspond to improvements pertaining to multiple modes. These projects are summarized in Table T-12. They are also shown in Figure T-14 (Low priority), Figure T-15 (Medium priority), and Figure T-16 (High priority).

The transportation improvements identified as part of this planning process far exceed forecasted transportation funding over the next

two decades as discussed in the following section.

Table T-12. 20-Year Motorized Vehicle Transportation Project List.

Project ID	Title	Description	Mode	Cost ($)	Priority
V-1	Tyee Dr SW – Israel Rd SW to Tumwater Blvd SW	Construct 5 lanes ext. or 3 lanes if roundabout nodes, including intersection improvements at Tumwater Blvd SW	Motorized Vehicle / Bicycle	4,000,000	Medium
V-2	Tyee Dr SW – Tumwater Blvd SW to Prine Dr SW	Construct 5 lanes ext. or 3 lanes if roundabout nodes, including intersection improvements at Prine Dr SW	Motorized Vehicle / Bicycle	3,000,000	Medium
V-3	Tyee Dr SW – Prine Dr SW to Littlerock Rd SW Brenden St SW	Construct 3 lane extension	Motorized Vehicle / Bicycle	7,400,000	Medium
V-4	Tumwater Blvd SW – Interstate 5 Interchange	Install roundabout and wider bridge	Motorized Vehicle / Bicycle	23,000,000	Low
V-5	Tumwater Blvd SW – Interstate 5 SB ramps to Tyee Dr SW	Widen to 5 lanes	Motorized Vehicle / Bicycle	3,500,000	Medium
V-6	Old Highway 99 – 88th Ave SE to 93rd Ave SE	Widen to 3 lanes	Motorized Vehicle	2,500,000	Low
V-7	Henderson Blvd SE – Tumwater Blvd SE to Old Hwy 99 SE	Widen to 3 lanes	Motorized Vehicle	4,000,000	Medium
V-8	73rd Ave SW – Prine Dr Ext SW to 73rd Ave SW / 66th Ave SW Connector	Construct 2 lane road	Motorized Vehicle / Bicycle	2,000,000	Medium

Project ID	Title	Description	Mode	Cost ($)	Priority
V-9	SR 121 (93rd Ave SW) – Interstate 5 NB Ramps to Kimmie St SW	Widen to 5 lanes, including roundabout at Kimmie St SW	Motorized Vehicle / Bicycle	7,000,000	Medium
V-10	SR 121 (93rd Ave SW) – Interstate 5 Interchange Construction	Widen bridge to 5 lanes and install roundabouts at on and off ramps	Motorized Vehicle / Bicycle	20,000,000	Medium
V-11	6th Ave SE – T St SE to Lee St SE	Construct 2 lane road	Motorized Vehicle / Bicycle	1,500,000	Medium
V-12	Odegard Rd SW – Littlerock Rd SW to Tyee Dr SW	Construct 2 lane road with on-street parking	Motorized Vehicle / Bicycle	200,000	Medium
V-13	Bishop Rd SW – Littlerock Rd SW to Tyee Dr SW	Construct 2 lane road with on-street parking	Motorized Vehicle / Bicycle	500,000	Medium
V-14	New Market St SW -- Tumwater Blvd SW to Israel Rd SW	Construct 2 lane road with on-street parking	Motorized Vehicle / Bicycle	3,000,000	Medium
V-15	Town Center Connector – Tumwater Blvd SW to Israel Rd SW	Construct 2 lane road with on-street parking	Motorized Vehicle / Bicycle	1,000,000	Medium
V-16	Deschutes Way SW at Boston St SW	Install traffic signal	Intersection	500,000	Low
V-17	Brewery District Projects	Included projects listed below – V-19 to V-22	Road	N/A	
V-18	Boston St SW at Custer Way SW	Install roundabout	Intersection	6,500,000	Low
V-19	Cleveland Ave SE at Custer Way / North St SE	Install roundabout	Intersection	7,000,000	Low
V-20	Capitol Boulevard SE/ Carlyon Ave	Install roundabout	Intersection	4,000,000	Low
V-21	Capitol Blvd SE / Cleveland Ave SE	Install roundabout	Intersection	4,500,000	Medium

Project ID	Title	Description	Mode	Cost ($)	Priority
V-22	Capitol Blvd SE / Custer Way	Install roundabout	Intersection	7,000,000	Medium
V-23	E St SE Connection – Capitol Blvd SE to Cleveland Ave	Construct 4 lane road across Tumwater Valley, including E St SE and Cleveland Ave SE intersections	Road	60,000,000	Low
V-24	Linwood Ave SW at 2nd Ave SE	Install roundabout	Intersection	5,000,000	Low
V-25	Trosper Rd SW at 2nd Ave SW / Littlerock Rd SW	Install roundabout	Intersection	6,000,000	Medium
V-26	Trosper Rd SW at Tyee Dr SW / SB Interstate 5 Ramps	Install roundabout	Intersection	6,000,000	Medium
V-27	T St at Capitol Blvd SE	Install roundabout	Intersection	6,000,000	Medium
V-28	X St at Capitol Blvd SE	Install roundabout	Intersection	7,000,000	Low
V-29	Dennis St at Capitol Blvd SE	Install roundabout	Intersection	6,000,000	Medium
V-30	Old Hwy 99 SE at 79th Ave SE	Install roundabout	Intersection	5,000,000	Low
V-31	Trosper Rd SW Capacity Study from Littlerock Rd SW to Interstate 5	Study to determine roadway capacity	Road	400,000	Low
V-32	Tumwater Blvd SE at Henderson Blvd SE Intersection Improvements	Install intersection improvements	Intersection	3,000,000	Low
V-33	Littlerock Rd SW and 77th Way SW Roundabout	Install roundabout	Intersection	5,000,000	Low
V-34	Black Lake Belmore SW at Black Lake Blvd SW	Install roundabout	Intersection	5,000,000	Low

Project ID	Title	Description	Mode	Cost ($)	Priority
V-35	Henderson Blvd SE Corridor SE – Yelm Hwy SE to Tumwater Blvd SE	Widen road to 4/5 lane section, widen bridge over Deschutes River, install intersection improvements and pedestrian facilities	Road	24,000,000	Medium
A	Multimodal Improvements Program	Various locations throughout Tumwater. Intent is to create a safer and more inviting multimodal transportation system. Specific projects developed as a part of the six-year Transportation Improvement Plan process.	Programmatic	16,500,000	High
B	Safe Routes to School Projects	Improve pedestrian and bicyclist safety near schools. Projects include sidewalks, lighting, flashing beacons, signage, markings, and other measures. Project details developed as a part of the six-year Transportation Improvement Plan process.	Programmatic	2,000,000	Medium
C	Pavement Maintenance Program	This program is designed to preserve and enhance the condition of roads, sidewalks, and other paved surfaces	Road	20,000,000	Medium

6. Implementation

A. Funding Overview

A key part of Washington State's Growth Management Act is making sure transportation planning is financially responsible. To meet this goal, Tumwater's list of transportation projects must fit within its budget. This means focusing on maintaining and operating existing roads and infrastructure as well as newer projects needed to accommodate growth.

To make sure the plan is realistic, Tumwater studied past trends in revenue and spending as shown in Table T-13. This helped estimate how much money will likely be available for both new projects and day-to-day operations over the next 20 years. By using this information, Tumwater can plan projects it can afford, as required by the Growth Management Act. A shortfall is expected since the needs are greater than the resources.

To deal with future funding challenges, Tumwater will also look for ways to close the gap between how much money is needed and how much is expected to be available. This might include:

- **Enhancing Revenue from Existing Sources**: Tumwater is evaluating adjustments to current revenue streams, such as transportation impact fees, to ensure that new developments contribute proportionally to infrastructure needs.
- **Adopting New Revenue Mechanisms**: Exploring innovative funding avenues, such as bonds and sales taxes to generate dedicated funds for transportation projects.
- **Implementing Transportation Demand Management Strategies**: Reducing vehicle trips is crucial. Programs like Washington's Commute Trip Reduction law encourage large employers to develop plans that decrease single-occupancy vehicle commutes, thereby reducing traffic congestion and environmental impact.

By integrating these strategies, Tumwater aims to create a sustainable, efficient, and safe transportation system that meets future demands while addressing current fiscal constraints.

Most projects have active transportation components such as street crossings and sidewalks; however some are specific to support active transportation. Discussion about funding for these projects including separate funding sources have been included in the Bicycling, Walking, & Rolling Plan to support the projects designed to have a greater impact on active transportation.

DRAFT

Table T-13. Current Funding Sources and Revenue Estimates Over the Horizon Year.

Fund Source	20 – Year Estimate
Base Utility Tax (0.8% of the 12%)	$20,715,000
Motor Vehicle Fuel and Multimodal Transportation Tax	$4,095,000
Real Estate Excise Tax (0.05%)	$27,487,000
Retail Sales & Use Tax	$36,943,000
Interest Income	$1,050,000
Grants	$70,902,000
Transportation Benefit District	$,943,000
Transportation Impact Fees	$39,337,000
SEPA Mitigation	$14,026,000
Total Revenue Over 20 Years	**$214,555,000**
Annual Average Revenue	**$10,730,000**
Total Capital Expenditure Over 20 Years	**$212,000,000**
Annual Average Expenditure	**$10,600,000**
Annual Shortfall	**$130,000**

Source: City of Tumwater.

B. Revenue Sources

1) Transportation Benefit District

Transportation infrastructure is one of Tumwater's most valuable investments. The Transportation Benefit District was formed in 2014 to designate a dedicated source for transportation funding, and in 2015, Tumwater voters approved a sales tax increase of 0.2 percent for a period of ten years. The funding is used to preserve, maintain and expand the transportation infrastructure within city limits.

Since 2015, the Transportation Benefit District has funded:

- More than 100 lane miles of road improvements.
- More than 100 new curb ramps
- Almost 50,000 tons of asphalt for Tumwater roads.

The dedicated funding provided by the Transportation Benefit District makes it possible for Tumwater to proactively repair and preserve roads before they deteriorate to a point that would require costly pavement replacement. In this way, Transportation Benefit District funding is an investment in road quality and safety that saves money eventually.

Additionally, the taxes collected through the Transportation Benefit District have so far helped to secure $6 million in grants, often through matches with available funds.

2) Real Estate Excise Tax

A key revenue source that feeds Capital Projects is the Real Estate Excise Tax , which is applied to

all real estate sales based on the full selling price, including liens, mortgages, and debts used in the purchase. This tax is charged on the gross sales price of real property.

The first 0.25 percent of the Real Estate Excise Tax must be used for capital projects listed in Tumwater's Capital Facilities Plan, including infrastructure such as streets, sidewalks, lighting, traffic signals, water and sewer systems, parks, public safety buildings, trails, libraries, and other civic facilities. The second 0.25 percent, available only to cities required to plan under the Growth Management Act, helps cover costs related to the Growth Management Act and can fund similar projects, though it excludes land acquisition.

3) Transportation Impact Fees

Since 1990, Washington State law (RCW 82.02.050) has allowed jurisdictions to establish transportation impact fee programs to fund capacity projects needed to support growth. Tumwater collects transportation impact fees from developers to help finance public infrastructure projects that benefit new developments, such as roads and sidewalks. These fees are used to mitigate the impact of new developments on existing transportation infrastructure.

The primary goal of Transportation Impact Fees is to have new developments "pay their own way," reducing the financial burden on existing taxpayers. By collecting these fees, municipalities can finance capital improvements that add capacity like adding lanes to existing roads, constructing new roadways, or constructing new active transportation facilities. These fees are typically assessed during the development approval process and collected when building permits are issued. The amount charged often depends on factors such as the type and size of the development and its projected impact on the transportation network.

4) Base Utility Tax

Tumwater assesses a six percent utility tax upon every person, firm or corporation engaged in or carrying on a business of land line and cellular telephones, pagers, telegraph, electrical energy, natural gas, brokered natural gas, solid waste, water, sanitary sewer, and storm drainage. The details surrounding the tax are discussed in the Tumwater Municipal Code, Chapter 3.28.

5) Motor Vehicle Fuel & Multimodal Transportation Tax

Funds are provided from Washington State for transportation purposes and are distributed to cities quarterly. Multimodal Transportation Tax is provided by RCW 47.66.070 and is funded by a variety of taxes and grants including but not limited to Motor Vehicle Excise Tax, Mass Transit Distributions and Retail Sales Taxes.

Motor Vehicle Fuel Tax is an excise tax on the sale of fuel and is used for transportation. As of July 1, 2025, the tax rate for gas in Washington State is 55.4 cents per gallon with 8.33 percent distributed to incorporated cities based on a formula considering population and annual road costs.

6) Retail Sales & Use Tax

The Sales Tax in Tumwater is 9.7 percent on most items including fuel. Tumwater receives 0.8415 percent of the sales tax on each dollar. Portions

DRAFT

of this tax are utilized for transportation infrastructure development and funding. An additional 0.2 percent sales tax goes to fund Tumwater street and sidewalk maintenance. Tumwater voters approved this new tax on April 28, 2015, and it went into effect on October 1, 2015.

C. Options to Increase Revenue

1) Commercial Parking Tax

Cities in Washington State can impose taxes on commercial parking operations, either by charging businesses directly or by adding fees for customers at the point of sale. While there is no cap on the tax rate itself, the revenue generated must be allocated exclusively for transportation-related purposes.

For instance, Seattle increased its commercial parking tax rate to 14.5 percent as of July 1, 2022. Other cities, like SeaTac, implement a per-transaction fee, which was $3.99 in 2024 and rose to $4.13 in 2025

2) Local Improvement Districts

Local Improvement Districts are special financing mechanisms that municipalities can establish to fund capital projects benefiting specific areas. Property owners within these districts are assessed fees proportional to the benefits they receive from the improvements.

The formation of a Local Improvement District does not require a public vote but does necessitate a demonstration of financial feasibility. Moreover, if property owners responsible for at least 60 percent of the total assessment costs formally protest, the district's formation can be halted.

3) General Obligation Bonds

Municipalities have the option to issue bonds to finance public projects:

- **Limited Tax General Obligation Bonds**: These do not require voter approval and are repaid from Tumwater's general fund.
- **Unlimited Tax General Obligation Bonds**: These require voter approval and are repaid through additional property taxes.

Washington State law limits the total general obligation debt a city can incur to 2.5 percent of its assessed property value, with limited tax general obligation bonds capped at 1.5 percent. Exceeding these limits can impact a city's credit rating, so it is advisable to utilize less than two-thirds of the available debt capacity to maintain financial stability.

DRAFT

D. Transportation Demand Management

1) Background

This plan has thus far focused on completing Tumwater's multimodal transportation network via the layered network approach. The network proposed for each mode represents the supply side of the transportation network. On the opposite side of the coin is the demand for the multimodal transportation network. The demand side is addressed with transportation demand management.

The concept of transportation demand management has evolved from a focus on commuters and strategies for reducing single occupancy vehicle demand at peak times to a focus on maximizing the modal choices of all travelers and trip types. This new focus includes a broader set of diverse strategies.

The Federal Highway Administration defines transportation demand management as:

> *"Providing travelers, regardless of whether they drive alone, with travel choices, such as work location, route, time of travel and mode. In the broadest sense, demand management is defined as providing travelers with effective choices to improve travel reliability."*

The emphasis for transportation demand management is on personal mobility rather than vehicular mobility. Transportation demand management strives to treat roadway, transit, bicycle facilities, and sidewalk capacity as valuable, limited assets to be carefully managed.

Transportation demand management strategies that strive to manage the demand on the limited multimodal transportation network include encouraging ride sharing such as car- and vanpooling; providing active transportation subsidies (e.g., stipends for bicycles or running shoes); providing telecommuting, flex schedules, and compressed work weeks; and enforcing parking fees or restrictions.

Other transportation demand management strategies can range from simple marketing programs to complex land use decisions. Tumwater land use policies can reduce dependence on private motorized vehicle travel by focusing growth in specific locations and changing land use development patterns. Land use densities, mixed-use activity, urban design, transit station areas, and other concentrated points of activity support frequent transit service and pedestrian facilities.

Tumwater's transportation demand management program is focused on maximizing multimodal options for all trip types and travelers.

2) Transportation Demand Management Strategies

There are various ways that commuters can travel to work, and individuals can travel for other purposes that reduce the number of single occupancy vehicle trips:

- **Rideshare Programs** – Tumwater can partner with Intercity Transit or other private car share providers for rideshare solutions primarily for commute trips, though other trip purposes such as to school are being explored. Typically, vanpool programs require a minimum

DRAFT

number of individuals per vehicle with similar commutes.

- **Walking/Bicycling/Rolling** – Every trip begins and ends with walking or rolling, even if using a vehicle for most of the trip. The existing pedestrian network supports walking for some trip types, particularly in areas with higher density and a mixture of land uses. Bicycling can be a viable mode for commuters who live further than walking distance from transit services and whose schedules are too inflexible to use vanpool programs. Other forms of rolling like wheelchairs, skateboards, and e -scooters can use a mix of pedestrian and bicycle networks.

  As pedestrian and bicycling networks are constructed and development occurs in dense, mixed-use areas, these modal options are anticipated to be increasingly viable and popular. Many of the prioritized projects, policies, and actions in this plan provide guidance and next steps to both construct the pedestrian and bicycling networks and increase the attractiveness and viability of walking and bicycling as travel options.

- **Alternative Work Schedules** – Alternative work schedule options are beneficial to both employees and employers. Businesses can provide coverage for additional hours, and employees are able to work their schedules around transit and vanpool and ridesharing availability. Alternative schedules include flextime, compressed work weeks, and staggered shifts.

- **Telecommuting and Remote Working** – In the Puget Sound region, full-time and part-time telecommuting has increased over the last decade. The COVID pandemic forced many businesses, non-profits, and government agencies to quickly implement telework for employees that can work remotely. To facilitate this shift, unique solutions were implemented to address technology and resource barriers. Many businesses, non-profits, and government agencies are likely to have significantly higher levels of teleworking than before the pandemic due to the widespread development of these programs.

E. Vehicle Miles Traveled Reduction Targets & Mode Shift

1) Vehicle Miles Traveled Reduction Targets

Based on guidance from the Washington State Department of Commerce[2] and the Washington State Department of Transportation[3], vehicle miles traveled targets should focus on per capita reductions. These targets must align with long-term planning horizons.

Progress must be monitored every five years, tracking both per capita vehicle miles traveled and the implementation of reduction strategies

[2] https://www.commerce.wa.gov/growth-management/climate-planning/.

[3] https://wsdot.wa.gov/sites/default/files/2023-06/VMT-Targets-Final-Report-June2023.pdf.

DRAFT

and policies. The targets should also align with regional plans.

The Washington State Department of Commerce's Greenhouse Gas Emissions Forecast and Scenario Planning Tool (Thurston County) includes an analysis of ways to reach the overarching goal of net-zero emissions by 2050. That tool sets the following reduction targets, compared to a 2022 baseline:

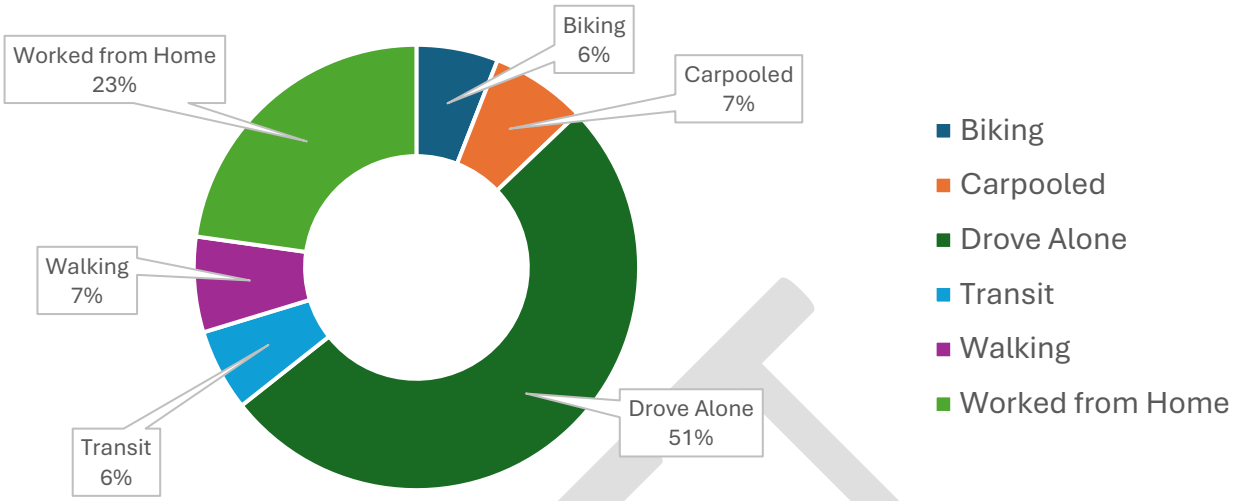
- Reduce per capita vehicle miles traveled by 27 percent through 2040.
- Reduce per capita vehicle miles traveled by 41 percent through 2050.

Tumwater is setting the same goals as the Department of Commerce tool.

The Department of Commerce has provided a menu of measures[4] to help reduce per capita vehicle miles traveled, with a selection included below:

- Shift modes from motorized vehicles to transit, walking or bicycling.
- Increase vehicle occupancy to convert single occupancy vehicles to high occupancy vehicles and promote vanpools.
- Travel less through telecommuting, trip chaining and employing tools such as a compressed work week, parking, and more compact land development.
- Adjusting zoning laws to allow for more diverse and higher-density housing options.
- Promoting development patterns that support public transit usage.
- Encouraging higher-density housing near employment centers and transit hubs to reduce travel distances.
- Conducting studies to understand current travel patterns and identify opportunities for reduction.
- Establishing metrics to assess the effectiveness of implemented strategies over time.

2) Mode Shift Targets



To achieve this plan's greenhouse gas and vehicle miles traveled reduction targets, some trips will need to shift from single occupancy vehicle trips to more efficient modes. These modes include carpooling (high occupancy vehicles), transit, and active transportation modes like walking, bicycling, and rolling.

Current data from the Census Bureau as shown in Figure T-1 illustrates that most work trips in Tumwater are taken by car, with most being single occupancy vehicles.

Tumwater is setting a goal to shift five percent of all single occupancy vehicle trips to walking, five percent to bicycling, and three percent to transit as shown in Figure T-17.

[4]https://experience.arcgis.com/experience/dd012fae9fad4a309b0d89e3c13016e5/page/Basic/

Figure T-17. Tumwater's 2045 Mode Shift Goals.

Encouraging and effectuating mode shift is difficult, but can be done through a combination of strategies:

- Creating more walkable and bikeable communities by building a connected low stress network.
- Reducing or eliminating parking minimums.
- Charging for parking in higher density areas with transit and active mode networks.
- Increasing transit frequency and coverage.
- Increasing job and residential density.
- Integrating affordable and below market rate housing.
- Provide ridesharing program.
- Provide end of trip bicycle facilities.
- Provide employer-sponsored van pool.
- Price workplace parking.
- Implement housing and employment parking cash-out.
- Provide electric vehicle charging infrastructure.
- Implement transit-supportive roadway improvements.
- Supporting bus rapid transit.

Appendix A – Foundational Documents

Table T-14 identifies the foundational planning documents that form the basis for the Transportation Plan within the Comprehensive Plan.

Table T-14. Foundational Documents for the Transportation Plan.

Topic Index	Supporting Plans and Materials
Park and Trail Infrastructure	• Parks, Recreation, and Open Space Plan (2008/2016)
Regional Transportation	• Thurston Regional Trails Plan (2023) • What Moves You, 2050 Regional Transportation Plan, Thurston Regional Planning Council (2025)
Subarea Plans	• Black Hills Subarea Transportation Plan (2002) • Brewery District Plan (2020) • Capitol Boulevard Corridor Plan (2015) • Littlerock Road Subarea Plan (2018) • Old Highway 99 Corridor Study (2024) • Tumwater Town Center Street Design Plan (2019)
Transportation Projects	• Transportation Improvement Plan, 2026-31 (2025)

Appendix B – City of Tumwater Vehicle Operations Analysis Reports

The City of Tumwater Vehicle Operations Analysis Reports are attached as a separate document.

Appendix C – Bicycling, Walking, & Rolling Plan

The Bicycling, Walking, & Rolling Plan is attached as a separate document.

FEHR PEERS

Memorandum

Date: September 16, 2025

To: City of Tumwater

From: Siddharth Sivakumar & Daniel Dye, Fehr & Peers

Subject: City of Tumwater Vehicle Operations Analysis Reports

TC24-0105

The City of Tumwater is in the process of updating the Transportation Plan of its Comprehensive Plan with a planning horizon of 2045. This appendix provides outputs from the software platforms used for existing and future vehicle operations analysis.

Traffic Operations Methodology

To understand traffic operations in the City of Tumwater, the project team utilized Synchro traffic operations analysis software for signalized or stop controlled intersections, and SIDRA software for roundabouts. The existing conditions analysis was based on 2024 conditions, while future analysis was completed for forecast conditions in 2045. The analysis was carried out for the weekday PM peak hour (the highest volume hour between 4 PM and 6 PM). Two future scenarios were considered, a baseline scenario with planned intersection improvements and a mitigation scenario with additional improvements assumed for intersections that failed in the future baseline scenario.

The following pages have PM Peak Hour operations reports for the following scenarios:

1. Existing (2024)
2. Future (2045) Baseline
3. Future (2045) with Mitigation (only for the five intersections that failed in the above scenario)

Existing (2024)

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Intersection Summary	
HCM 6th Ctrl Delay, s/veh	28.1
HCM 6th LOS	C

Notes

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [SBR] is excluded from calculations of the approach delay and intersection delay.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

Site Level of Service (LOS) Method: Delay & Degree of Saturation (SIDRA). Site LOS Method is specified in the Parameter Settings dialog (Options tab).
Roundabout LOS Method: Same as Signalised Intersections.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
Intersection and Approach LOS values are based on average delay for all movements (v/c not used).
Roundabout Capacity Model: SIDRA HCM.
Delay Model: SIDRA Standard (Control Delay: Geometric Delay is included).
Queue Model: SIDRA queue estimation methods are used for Back of Queue and Queue at Start of Gap.
Gap-Acceptance Capacity Formula: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.
Arrival Flows used in performance calculations are adjusted to include any Initial Queued Demand and Upstream Capacity Constraint effects.

LTS – Level of Traffic Stress

DRAFT

1. Introduction

A. Vision

The purpose of the Tumwater Bicycling, Walking, & Rolling[1] Plan is to establish a strategy to improve city-wide bicycle and pedestrian facilities, making the community's active transportation network safe, accessible, and inviting for all users.

To achieve this, Tumwater will develop new or strengthen existing bicycling and walking connections to key destinations such as transit centers, activity centers, trails, schools, and employment sites. The strategy also prioritizes providing frequent, high quality crossing opportunities for active transportation users, especially along transit routes and in densely populated areas.

In Tumwater, historic development patterns and the rising popularity of cars changed the ways people connected to places and communities. Railroad connections and topography initially made it difficult to include downtown on major transportation lines without steep uphill climbs on the bluff east of Deschutes River Valley. These choices altered the economic conditions and slowed the growth of Tumwater's downtown.

The construction of Capitol Blvd in 1938 moved traffic away from the historic downtown. Then in the 1950s, the construction of Interstate 5 through the historic downtown bisected Tumwater and disconnected communities. The increasing convenience and popularity in motorized vehicle travel resulted in environmental concerns such as greenhouse gas emissions, air pollution, water runoff pollution, and noise pollution.

The Bicycling, Walking, & Rolling Plan prioritizes human-scale investments that connect people and communities, enhance the environment, and revitalize local economy. The projects and priorities in this plan are guided by community engagement, gap analysis, and the work of previous Tumwater plans.

B. Active Transportation

Active transportation includes any primarily human-powered mode of transportation such as walking, bicycling, using a mobility device like a wheelchair or scooter, roller skating, skateboarding, or using electric micromobility devices including e-bikes and e-scooters. It does not include motorcycles or larger and higher speed vehicles.

All trips start and end with active transportation, like walking, rolling, or bicycling to or from a private vehicle or a bus stop.

Active transportation contributes to a healthy, active community while reducing pollution and negative health impacts from driving. Active transportation is also an important part of a

[1] Rolling includes using mobility devices like wheelchairs or scooters, roller skating or skateboarding, and using electric micromobility devices.

DRAFT

successful transportation system, as it reduces roadway congestion.

The Interstate 5 and US 101 create major barriers to active transportation in Tumwater. Limited crossings, many without bike lanes and sidewalks, mean that people travelling without vehicles are at a distinct disadvantage. The terrain of Tumwater similarly presents obstacles as large elevation changes are difficult to traverse when using human powered modes.

C. Reasons for Investment

There are many reasons to prioritize investments in active transportation infrastructure. Improving the active transportation system increases the safety and accessibility for users, making it easier to use. Increasing the share of trips made by alternative transportation will help Tumwater improve community health, promote accessibility, and reach its per capita vehicle miles traveled reduction and mode shift goals.

1) Access

Travel choice is influenced by many factors including ability, socioeconomic status, and infrastructure. Active transportation investments promote accessibility by increasing transportation choices available to all members of the community regardless of ability or income. Developing a safe and complete active transportation network is essential in making this mode an accessible and inviting option to users.

People who do not or cannot drive may have no other choice but to use active transportation to get to school, work, and other key destinations. Based on a statewide study, it is likely that approximately 25 to 35 percent of Tumwater's residents are unable to Dr, either due to:

- Age (both young and old)
- The costs of purchasing, operating, and maintaining a car
- A disability or condition that prevents or limits driving
- Preference not to have a car
- Lack a driver's license[2]

In addition, people who tend to drive may be temporarily unable to drive due to car repairs or maintenance.

A lack of infrastructure allowing people to use active transportation safely and conveniently creates an access concern. A safe, and convenient active transportation network provides more travel choices to all residents, regardless of age or ability.

2) Community Health

Active transportation supports Tumwater's overall transportation system, promotes healthy lifestyles, improves air quality, and enhances economic conditions and community character.

Investment in active transportation infrastructure creates opportunities for people to build exercise into their daily routine. Active lifestyles reduce the risk of associated health conditions such as obesity, diabetes, and cardiovascular disease.

[2] https://leg.wa.gov/media/41gegl2v/nondriversstudyfinalreportsummaryreport.pdf.

Increasing the share of trips made by active transportation will help reduce vehicle trips and roadway congestion in Tumwater, reducing emissions and air pollution.

Air quality due to vehicle transportation is a significant area of focus for Tumwater. Pollution from vehicle transportation contributes to asthma and other respiratory illnesses and can make existing health conditions worse. People who live near heavy traffic roadways are exposed to higher levels of air pollution from diesel and gasoline exhaust.[3]

3) Vehicle Miles Traveled

Vehicle miles traveled is defined as the miles driven by cars on roads in Tumwater. Transportation is one of the largest contributors to greenhouse gas emissions in Tumwater, so reducing vehicle miles traveled is a key part of reaching Tumwater's greenhouse gas reduction goals.

Improving access for other modes of transportation can also reduce the need for expensive road capacity projects. Tumwater strives to achieve a 27 percent reduction in per capita vehicle miles traveled compared to 2022 base-year volumes by 2040 and a 41 percent reduction by 2050.

4) Mode Shift

Tumwater is committed to increasing the share of trips made by alternatives to driving alone and active transportation is an important part of achieving this goal. Tumwater has set goals of shifting 15 percent of single occupancy vehicle trips to walking, bicycling, and transit.

5) Transit

Many people who use active transportation also take transit as part of their trip to work, school, and other key destinations.

Intercity Transit operates four routes in Tumwater and is free and accessible to all users. Used in conjunction with active transportation, taking the bus connects people with a larger travel radius and more destinations. Intercity Transit buses are also equipped with bike racks, making transit a convenient option for people who bike to and from their bus stop.

Tumwater will continue to partner with Intercity Transit to ensure bus stops are accessible, safe, and convenient so people can easily transition from active transportation to taking the bus.

D. Partnering Agencies

Tumwater routinely coordinates with agencies and community groups on transportation.

For example, Tumwater works closely with Intercity Transit to ensure transit is accommodated on City roadways. Cross coordination also occurs between Tumwater and Thurston Regional Planning Council to implement the Regional Trails Plan and other regional transportation planning and projects.

[3] Health effects from diesel pollution - Washington State Department of Ecology

DRAFT

Tumwater will continue to seek opportunities to partner with neighboring jurisdictions to create more connectivity between boundaries. Tumwater will also explore partner with other agencies when applying for grants to make proposals more competitive.

Tumwater provided opportunities for key stakeholders to comment on this Bicycling, Walking, & Rolling Plan. The plan was reviewed and revised in coordination with the following community groups and government entities:

- Intercity Transit
- People First
- Puget Sound Asthma Coalition
- Thurston County
- Thurston County Developmental Disability Coalition
- Thurston Regional Planning Council
- Washington State Department of Transportation

DRAFT

2. Framework and Analysis

A. Existing Plans

Several plans provide active transportation infrastructure that meets community priorities. The plans below include Tumwater specific plans.

1) Tumwater Transportation Plan

The Tumwater Transportation Plan serves as a guide for improvement and expansion of the transportation system to meet demands through a horizon year of 2045 and includes the Bicycling, Walking, and Rolling Plan as Appendix B. There are a number of Subarea Plans that are incorporated into the Transportation Plan update and project list development.

2) Parks, Recreation and Open Space Plan

The Parks, Recreation and Open Space Plan (2016) includes projects that serve both recreational and transportation purposes, such as trails. Existing trails maintained by Tumwater include:

- Deschutes Valley Trail
- Historic Park / Tumwater Falls Trail – 0.6 miles of dirt, paved, and brick trail connecting to Capitol Lake Interpretive Park in the Deschutes Valley
- Palermo Watershed Trail – 0.7 miles of dirt path near Tumwater Valley Golf Course.
- Pioneer Park Trails – 2.1 miles of looping dirt and paved nature paths
- Tumwater Hill Trail – 0.5 miles of dirt nature path beginning at Ridgeview Court SW adjacent to Tumwater Hill Elementary School.
- Tyee Drive Trail – 0.2 miles of mixed use trail extending from BPA easement northward.

More information about the trail system is found in the Parks, Recreation and Open Space Plan.

3) Americans with Disabilities Act Transition Plan Update

The purpose of the Americans with Disabilities Act Transition Plan is to ensure that Tumwater continues to create reasonable accessible paths of travel in the public right-of-way for everyone, including people with disabilities.

Tumwater conducted a self-assessment in 2020, inventorying sidewalks and noting deficiencies. Updated in 2021, the plan discusses methods Tumwater uses to identify, evaluate, and remove barriers. Barrier removal is prioritized based upon public input, location, condition, and cost effectiveness. A schedule for correcting these deficiencies as funding is available is needed.

4) Brewery District Plan

The Brewery District is centered around the former Olympia Brewery. This district is one of the oldest parts of Tumwater.

The Brewery District Plan aims to guide redevelopment in the area to improve transportation safety and access. Originally adopted in 2014 and amended in 2020, the plan has four goals:

DRAFT

- Create a stronger sense of place by facilitating pedestrian access, establishing gathering places for residents, and fostering a distinct District identity.
- Improve transportation options, safety, and access within and across the District.
- Expand economic opportunity and activity.
- Improve the function and appearance of the built environment.

Improving alternative transportation is a priority both within the Brewery District and on the streets that connect the Brewery District to other parts of Tumwater. Connections to the district are part of the bicycle priority network shown in Figure BWR-11.

5) Capitol Blvd Corridor Plan

The Capitol Blvd Corridor is Tumwater's most traveled St, developed primarily in the 1950s and 1960s. It is located between the Southgate Shopping Center area and Israel Rd.

The Capital Blvd Corridor Plan was adopted in 2015 and has three main goals:

- Improve the business conditions.
- Improve safety and expand transportation options for all users of the corridor including pedestrians, bicycles, and vehicles.
- Improve the aesthetic appeal of the corridor as a whole.

This corridor is part of the bicycle priority network shown in Figure BWR-11.

6) Old Highway 99 Corridor Plan

Old Highway 99 Corridor Plan addresses the development and improvement of Old Highway 99 from 79th Ave to 93rd Ave.

The Plan incorporated land use, environmental, and transportation considerations as necessary to determine preferred alignment, cross sections, intersection control, stormwater strategies, mitigation strategies, right-of-way needs, implementation strategies, and future project estimates.

The Plan was adopted in 2024 and is used to prioritize projects, including projects that improve active transportation along the corridor.

7) Regional Plans

Connections throughout the region are essential to provide effective services for those traveling in Tumwater. Regional plans were considered during the development of the Plan. Details of some of the other agency plans are discussed below.

Thurston Regional Planning Council Regional Trails Plan

The goal of the Thurston Regional Trails Plan is to establish a comprehensive, well-connected non-motorized trail network that links all communities throughout the region. Eight government entities own and operate the region's major trails.

As of 2023, 14 major trail corridors in the region provide over 57 miles of trails. These trail corridors help connect people to the outdoors for recreation and provide a safe and convenient way to travel to key destinations and economic opportunities.

The Thurston Regional Trails Plan outlines the proposed trail projects that will expand the regional trail system, enhance the current system, and increase connections within the trail network.

In Thurston Regional Planning Council's 2021 "Connect. Explore. Move. How do you trail?" survey, 20 percent of respondents used trails for commuting to work, school, or errands.[4] Respondents selected the following trails to prioritize in the next 20 years:

- **Deschutes Valley Trail** – connecting Tumwater and Olympia along the Deschutes River
- **Gate Belmore Trail** – connecting Tumwater and Olympia with Rochester and the Chehalis Reservation
- **Karen Fraser Woodland Trail Extension** – connecting Olympia southwest to Tumwater

The completion of the 0.8-mile segment of the Deschutes Valley Trail between Historical Park and Brewery Park at Tumwater Falls was the most recent milestone in the regional trail network.

The following trail corridors, extensions, and system enhancements are included in the Regional Trails Plan:

- **Capitol Lake to Belmore Trail Corridor**
  - Black Lake Trail – conceptual (20+ years)
- **Deschutes Valley Trail Corridor**
  - Tumwater Valley Dr extension – planned (2026)
  - Pioneer Park extension – planned (20+ years)
- **Tumwater to Downtown Olympia Union Pacific Line Corridor**
  - East Olympia Trail – conceptual (20+ years)
  - Bonneville Power Administration Shared Use Path – conceptual (20+ years)
- **Karen Fraser Woodland Trail Corridor**
  - Olympia Phase 4 extension, Henderson to Tumwater – planned (20+ years)

B. Key Destinations & Origins

Understanding where people want to travel is a key component to developing a transportation system that works for users.

For active transportation it is important to consider people using the system to access daily needs and connections to transit since they may not have other transportation options. Access to public education is also critical since very few of the people accessing those services can drive alone and congestion near schools for pick up and drop off is an increasing concern.

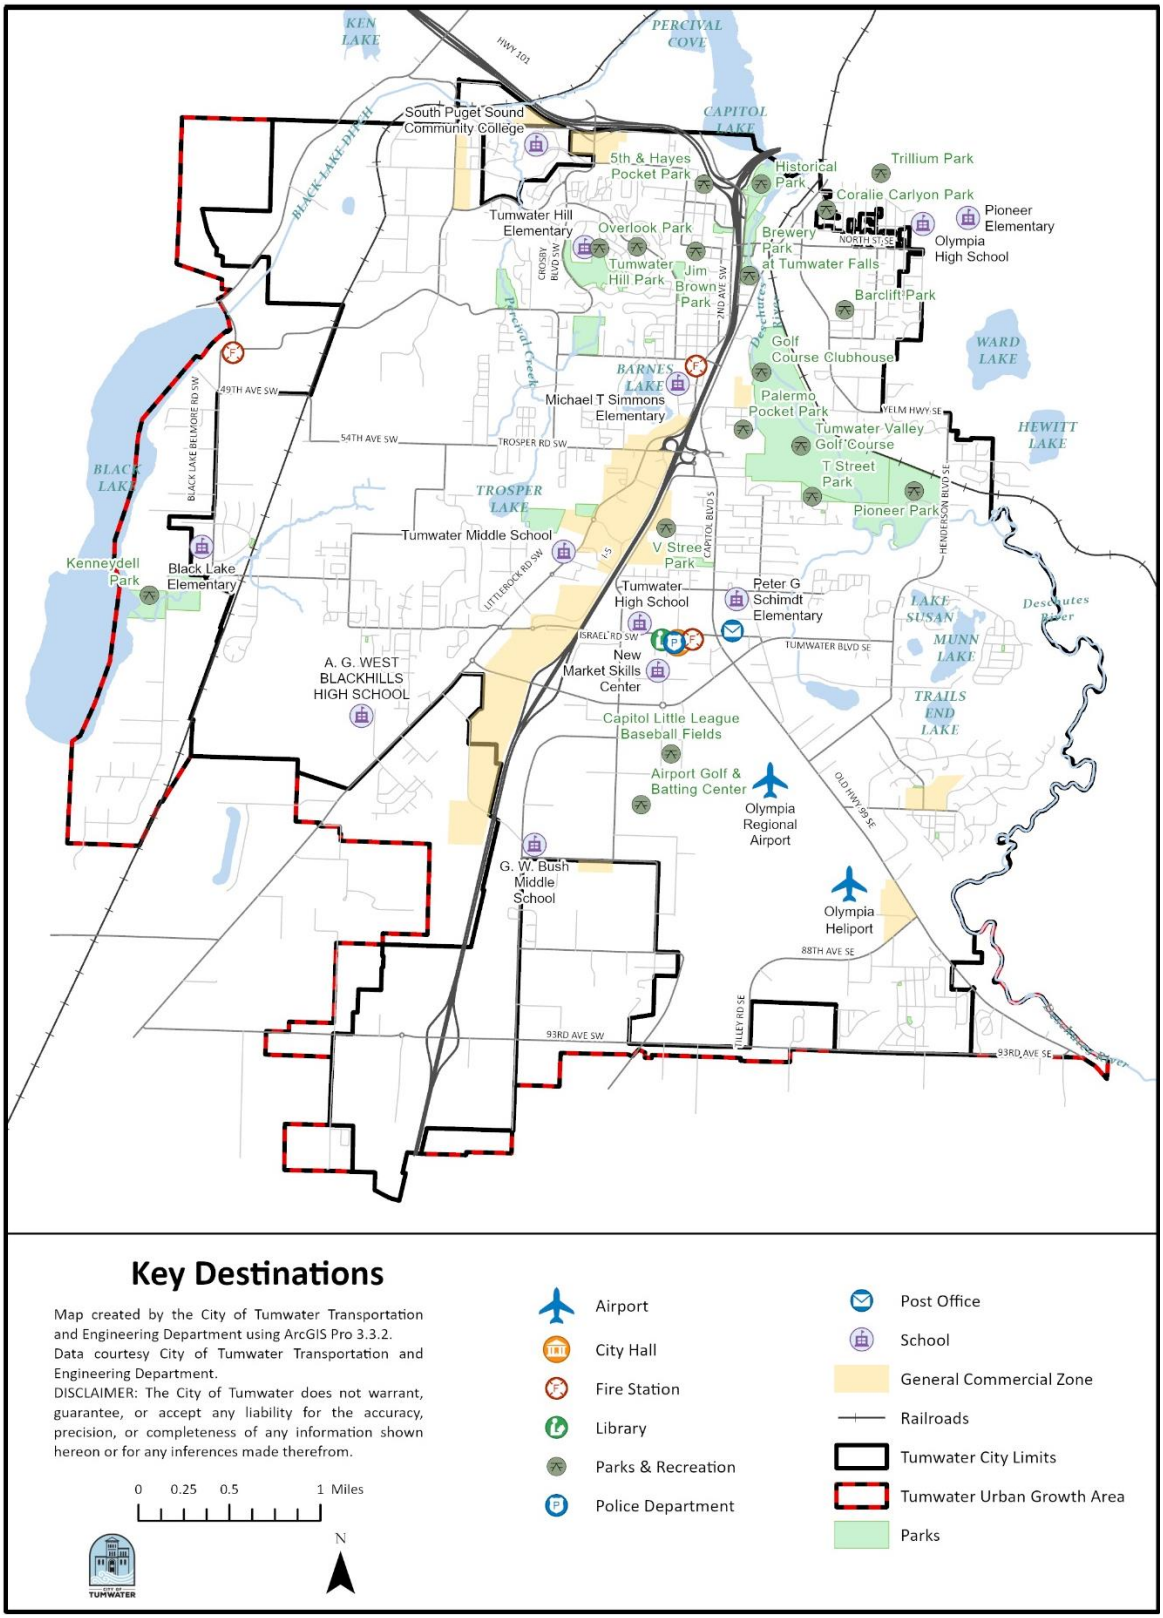
Key destinations are shown in Figure BWR-1 and described in more detail below.

[4]https://www.trpc.org/DocumentCenter/View/12180/Regional-Trails-Plan-FINAL---December-2023.

DRAFT

1) Schools

The Tumwater School District served 6,328 students as of 2025. The district includes ten K-12 schools within Tumwater's city limits.



- A.G. West Black Hills High School
- Black Lake Elementary School
- Cascadia High School
- George Bush Middle School
- Michael T. Simmons Elementary School
- New Market Skills Center
- Peter G. Schmidt Elementary School
- Tumwater High School
- Tumwater Hill Elementary School
- Tumwater Middle School

2) South Puget Sound Community College

Located in Olympia on Tumwater's northwest border, South Puget Sound Community College serves 6,000 students. The college is connected to Tumwater by designated bike routes as well as several Intercity Transit routes.

DRAFT

Figure BWR-1. Key Destinations in Tumwater.

Source: City of Tumwater Transportation and Engineering Department, 2025.

3) Libraries

The Tumwater Timberland Library offers resources available to anyone with a library card.

The library provides computer access, meeting rooms, study spaces, and events, as well as books and other media. The library is also one of two locations that act as a cooling and warming center during inclement weather.

4) Food Banks

There are seven locations that function as food banks and serve Tumwater residents during certain hours[5]:

- Littlerock United Methodist Church
- Lutheran Church of the Good Shepherd
- Mountain View Church
- Northstar Church of God
- South Puget Sound Community College
- Tumwater Senior Center
- Tumwater United Methodist Church

5) Parks & Recreation

Tumwater operates 12 parks and recreation facilities, including neighborhood parks, waterfront parks, sports facilities, and trails. Parks are large attractions for active transportation users.

- **5th and Hayes Pocket Park**. This small neighborhood park features a basketball court and a playground.
- **Barclift Park**. This park has the following amenities: basketball court, picnic areas, playground, restroom, tennis court, and trails.
- **Deschutes Valley Park**. This park features picnic areas, a playground, and restrooms.
- **Tumwater Historical Park.** At 17 acres, this is one of the largest parks in Tumwater. Amenities include barbeque grills, boat launch, picnic areas, a large playground, restroom, rentable shelter, and trails.
- **Isabella Bush Park**. This park contains trails and wetlands.
- **Jim Brown Park**. This neighborhood park features basketball courts, picnic areas, a playground, and tennis courts.
- **Overlook Point Park**. This park offers picnic areas and viewpoints.
- **Palermo Pocket Park**. This neighborhood park has basketball courts and a playground.
- **Pioneer Park**. One of the largest parks in Tumwater, Pioneer Park, has the following amenities: barbeque grills, baseball field, horseshoe pits, picnic areas, a playground, restrooms, rentable shelter, soccer fields, trails, and volleyball courts.
- **Tumwater Hill Park**. This park has a baseball field, picnic areas, restroom, and trails.
- **Tumwater Valley Municipal Park**. This golf course offers 20 holes of

[5] https://tcfb.org/services/locations/pick-up/.

championship-caliber golf and a ten-acre driving range.

- **V St Park**. This small neighborhood park has a basketball court and a playground.

6) ASHHO Cultural Community Center

The ASHHO Cultural Community Center is a private event center used for meetings, conferences, retreats, fundraising events, parties, and markets.

7) Olympia Regional Airport

Operated by the Port of Olympia, the Olympia Regional Airport and the associated New Market Industrial Center covers 845 acres and supports over 500 jobs. The general aviation airport has two runways and offers aircraft service and maintenance, flight instruction, and hangar space.

Commercial passenger airline service is anticipated by not currently available, but charter flight service is offered. Shuttle services are available to transport passengers to Seattle-Tacoma International Airport.

C. Level of Traffic Stress

Tumwater is adopting new multimodal Level of Service metrics as part of the Transportation Plan update. These metrics show where the transportation system has strengths and opportunities for improvement. While congestion and delay are used to measure vehicle level of service, different multimodal level of service metrics are used for active transportation.

Level of Traffic Stress (LTS) provides a quantifiable tool to gauge the comfort and safety of active transportation infrastructure. Level of traffic stress ranges from 1, where a wide range of users feel safe and comfortable, to 4, representing the highest Level of Traffic Stress where most users feel uncomfortable and will likely not choose to walk or bicycle.

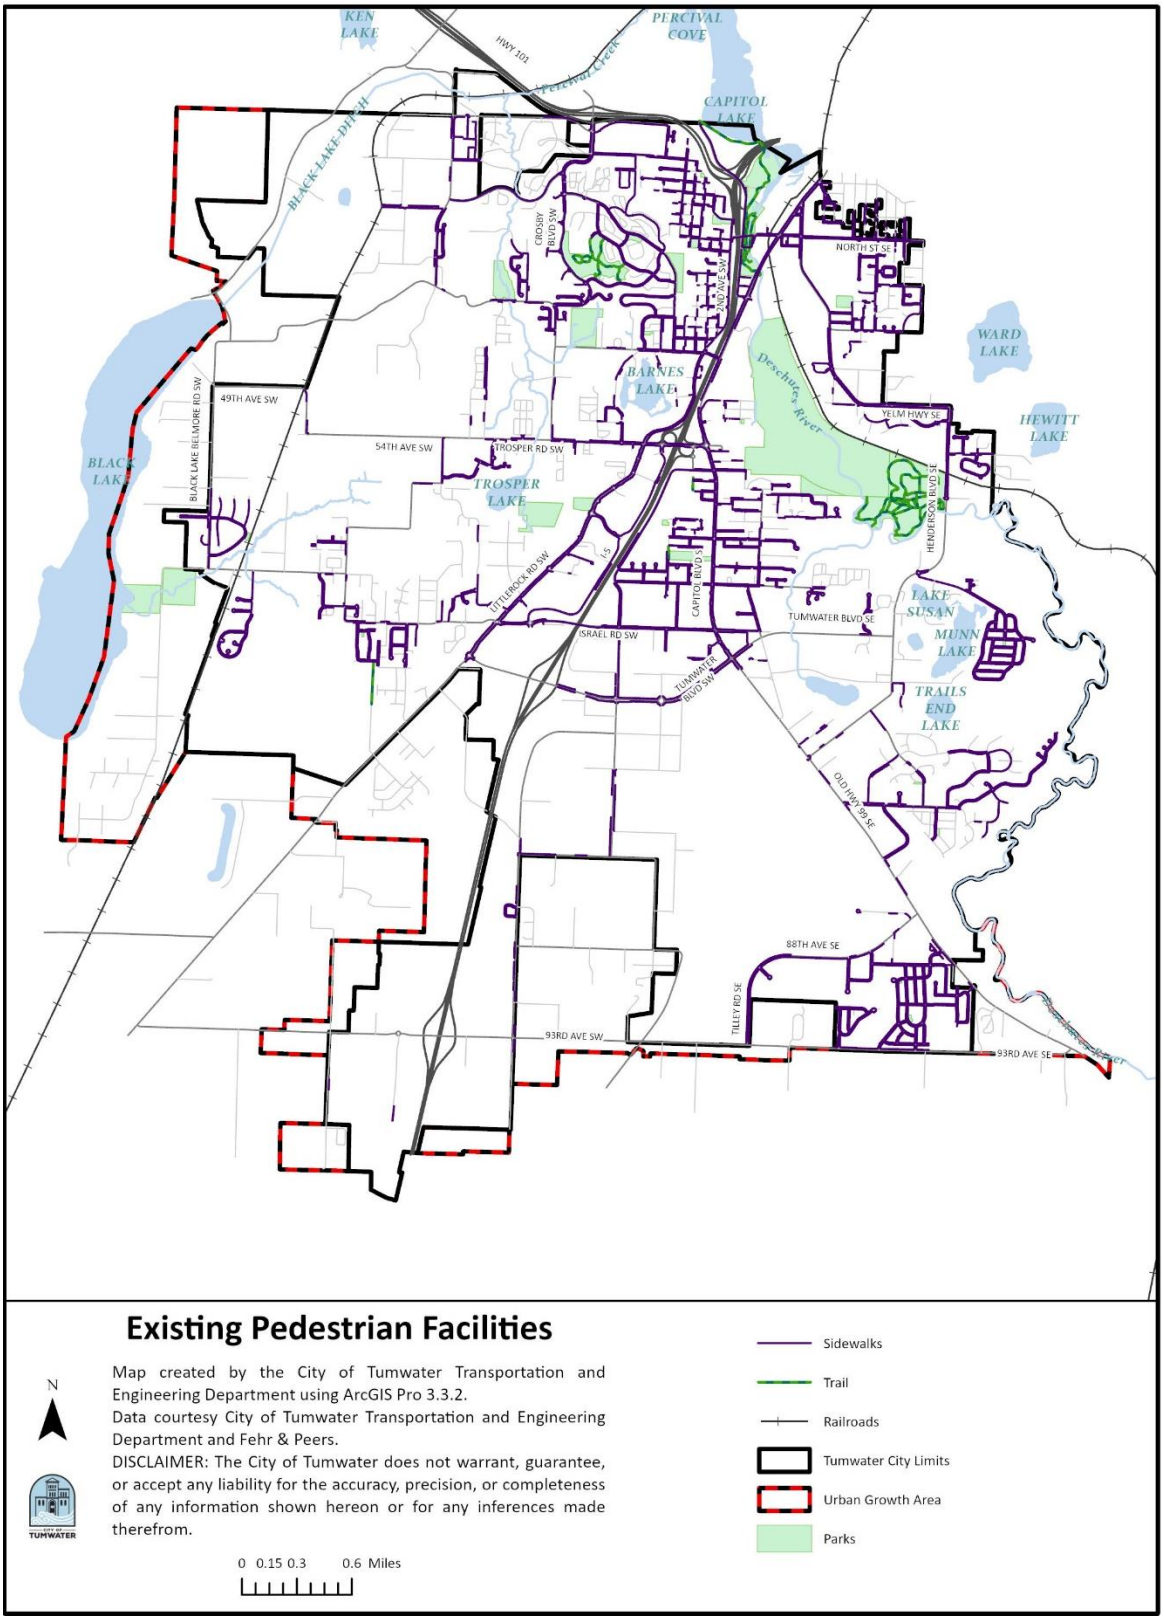
Figure BWR-2 illustrates all four levels of traffic stress.

Figure BWR-2. Level of Traffic Stress Breakdown.

Source: Fehr & Peers, 2025.

It is important to note that while levels of traffic stress 3 and 4 feel uncomfortable to most users, some people have no choice but to use active transportation on these facilities. Tumwater is committed to achieving a Level of Traffic Stress of 1 or 2 on its roadways. Achieving this goal will improve comfort for people who already use active transportation and will make active transportation a more attractive option for people who have a choice of transportation modes.

Given that levels of traffic stress for bicycling and walking are influenced by different factors, the breakdown for bike and pedestrian levels of traffic stress varies slightly.



D. Pedestrian Network Analysis: Gaps

Pedestrian facilities in Tumwater consist of sidewalks and shared-use trails. Sidewalks are available along many arterials, streets within the central business district, and in newer subdivisions. However, older residential areas often have incomplete or poorly maintained sidewalks. Tumwater has a total of 70 road miles with sidewalks of which roughly 33 miles are complete with pedestrian facilities on both sides of the St.

Figure BWR- 3 shows the existing pedestrian facilities in Tumwater.

DRAFT

Figure BWR-3. Existing Pedestrian Facilities.

Source: Fehr & Peers, 2025.

1) Pedestrian Level of Traffic Stress

Pedestrian Level of Traffic Stress is based on the roadway classification and presence of pedestrian facilities. Table BWR-1 illustrates the breakdown of pedestrian level of stress values while Figure BWR-4 shows how Level of Traffic Stress values apply to the pedestrian network throughout Tumwater.

Major arterials typically receive a score of 2 given the presence of sidewalks on both sides of the St. Where there are no pedestrian facilities, a score of 4 is assigned.

It is important to note that Pedestrian Level of Traffic Stress is limited to the variables shown in the table and does not consider sidewalk condition and necessary maintenance, presence of a landscaped buffer, or other important characteristics.

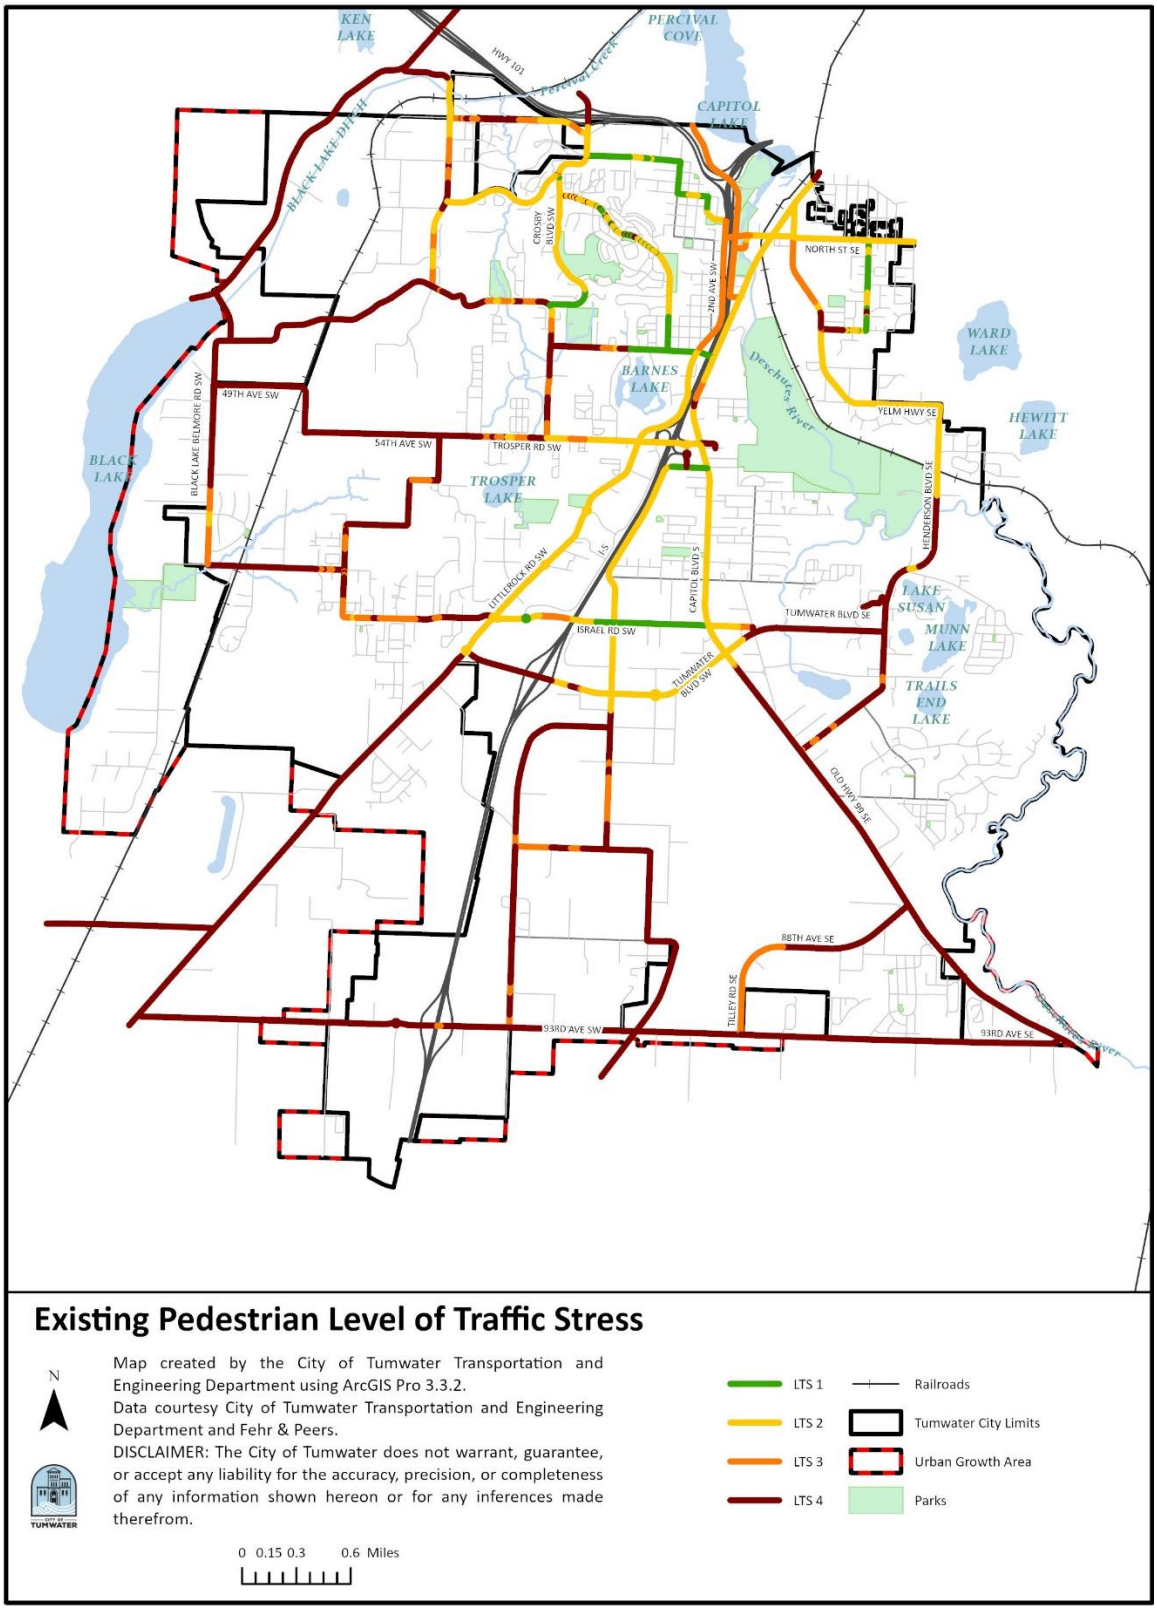


Table BWR-1. Pedestrian Level of Traffic Stress Classifications for Different Facilities.

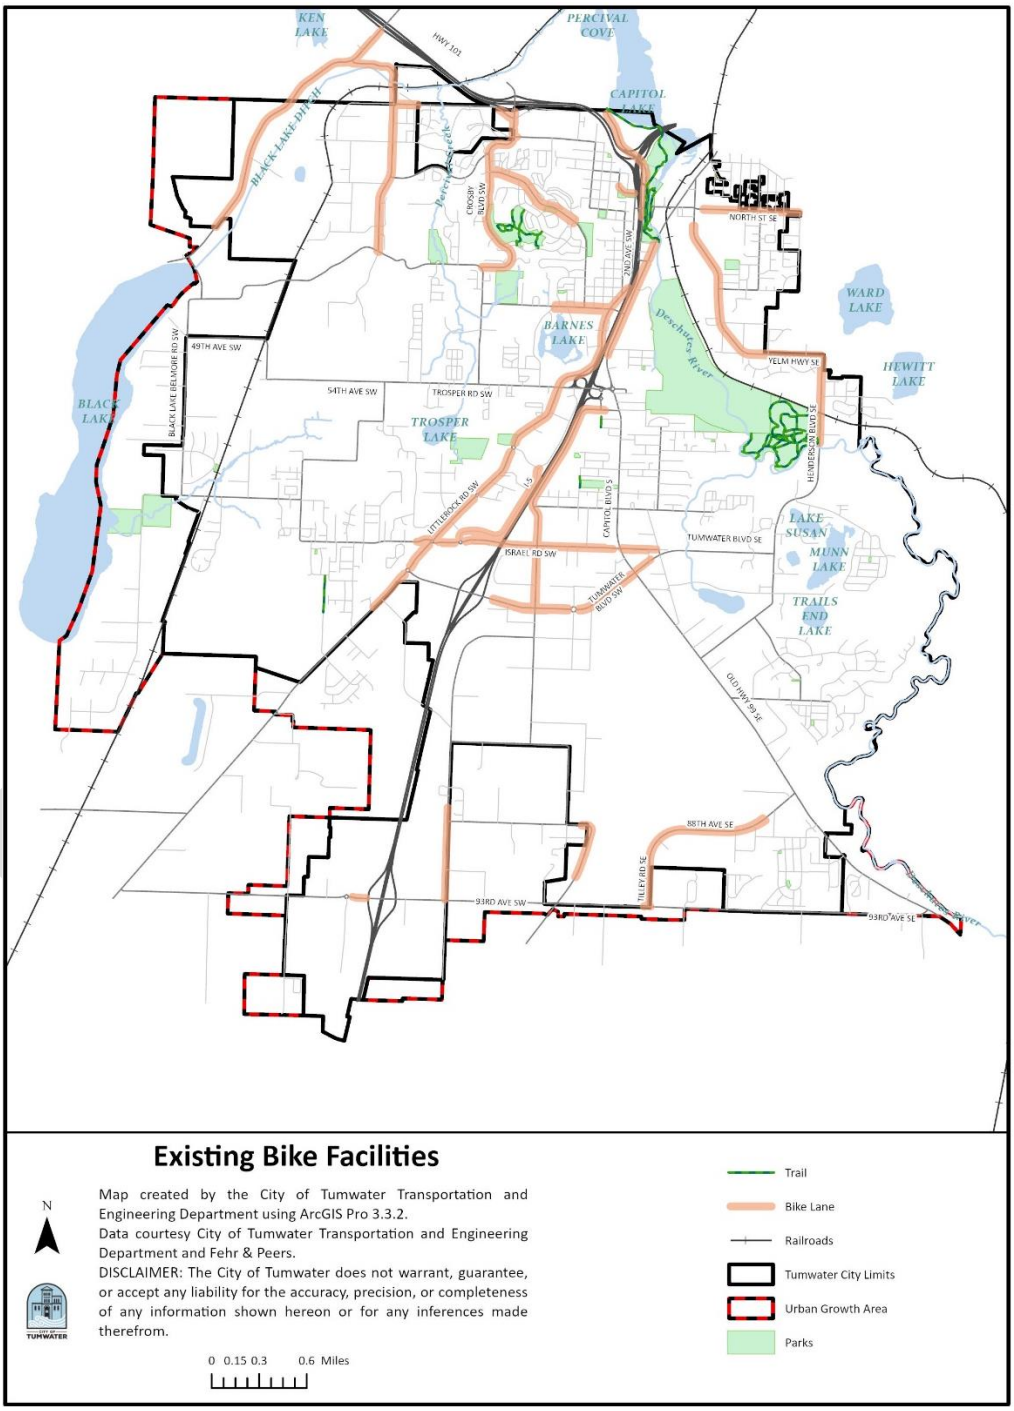
Roadway Classification	No Pedestrian Facility	Sidewalk One Side	Sidewalk Both Sides	Separated Path/Trail
Local	4	2	1	1
Collector	4	2	2	1
Arterial	4	3	2	1

Source: Fehr & Peers, 2025.

DRAFT

Figure BWR-4. Existing Pedestrian Level of Traffic Stress.



Source: Fehr & Peers, 2025.

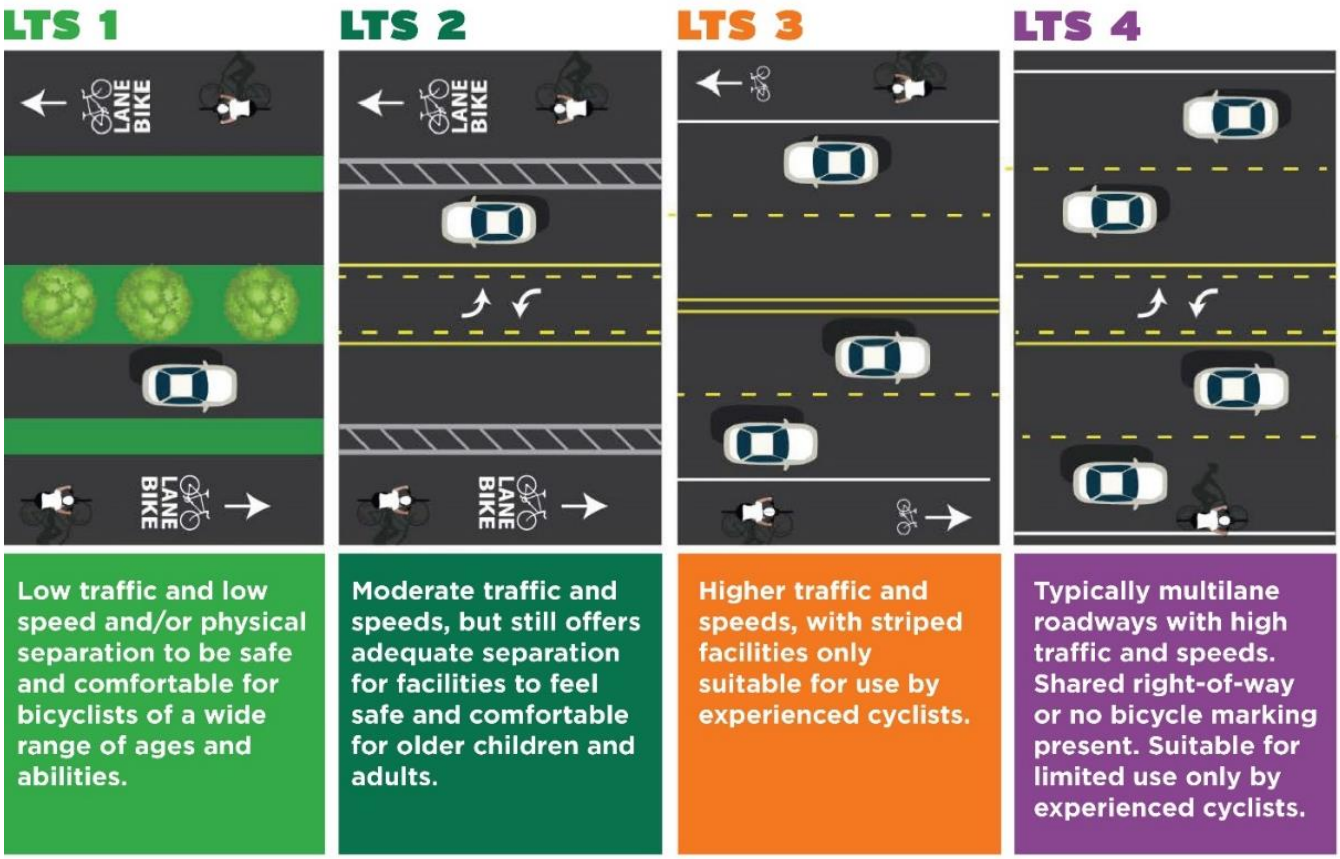
E. Bicycle Network Analysis: Gaps & Level of Traffic Stress

The bicycle network within Tumwater primarily consists of bike lanes and shared-use trails as shown in Figure BWR-5. Of the 87 total miles in the bike network, about 27 miles (31 percent) are complete with bike facilities on both sides of the street.

Figure BWR-5. Existing Bicycle Facilities.

Source: Fehr & Peers, 2025.

2) Bicycle Level of Traffic Stress



The way bicycle Level of Traffic Stress is determined is shown in Figure BWR-6**.** It incorporates factors such as posted speed limit, annual average daily vehicle traffic volume, and type of bicycle facility. Although features like buffered bike lanes and separated bike lanes are absent in Tumwater today, they are included for future reference.

Facilities like shared-use paths consistently receive a score of 1, as they are entirely separated from the roadway and are not affected by vehicular traffic. Striped bike lanes, which are common in Tumwater, score from 1 to 4 depending on the roadway speed limit and traffic volume.

Table BWR-2 and Figure BWR-7 shows the Level of Traffic Stress for bicycle facilities in Tumwater. This is further explained in Table BWR-3 which shows examples of bike facilities, and the Level of Traffic Stress score they receive.

The analysis shows the gaps within both the bicycle and pedestrian networks. However, it is crucial to acknowledge that both pedestrian and bicycle Level of Traffic Stress assessments lack considerations for factors such as maintenance, actual driver speeds as opposed to posted speed limits, roadway crossings, and facility width, which are crucial in ensuring optimal user experiences. Thus, any formulation of future bike and pedestrian projects in Tumwater should use the maps as a reference and holistically address these additional considerations.

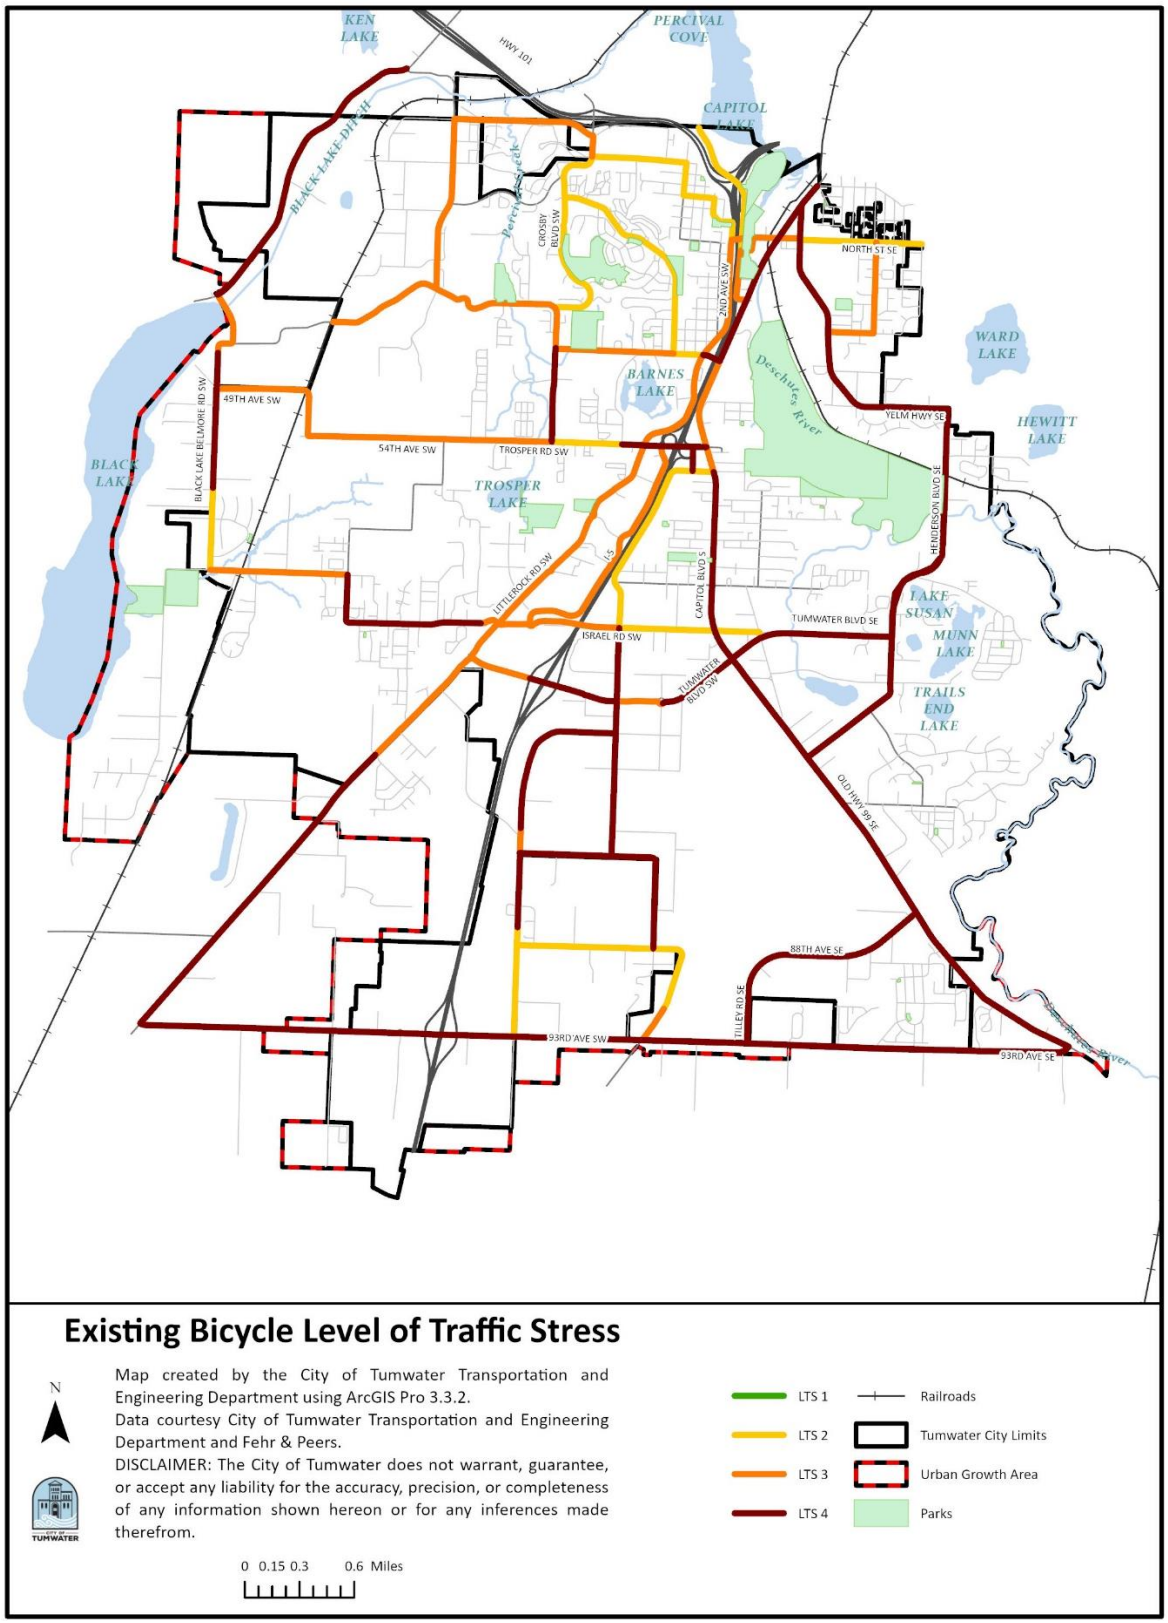
Table BWR-3. Bicycle Facility Types.



Facility Type	Description	Example
Off-Corridor Bike Network	Bike boulevards are low-volume and low-speed streets that prioritize bike travel. They incorporate signage, pavement markings, and traffic calming tools to improve the comfort and connectivity of the bike roadway network. Bike boulevards offer an alternative to bicycling on busy streets with high traffic volumes. Many bike boulevards couple speed management strategies with bike route signage to create safer streets.	
Striped Bike Lane	A conventional bike lane is a striped lane on a roadway that is designated for exclusive use by people riding bikes. Conventional bike lanes include pavement markings indicating one-way bike use. These facilities are established along roadways where there is current or anticipated bike demand and where it would be unsafe for bicyclists to ride in the travel lane.	

Facility Type	Description	Example
Buffered Bike Lane (Horizontal)	Buffered bike lanes are conventional bike lanes paired with a designated buffer space separating the bike lane from the adjacent motor vehicle travel lane and/or parking lane. These facilities are established along roadways with high travel speeds, volumes, and/or truck traffic.	
Separated Bike Lane (Vertical)	Separated bike lanes (vertical) are buffered bike lanes with vertical elements that provide further separation from motor vehicle traffic. Common vertical elements are vertical curbs, a painted buffer with planter boxes, parked cars, or a fixed barrier. These facilities keep motorists from crossing into the bike lane and to minimize maintenance costs due to decreased motor vehicle wear. They may be especially appropriate for curvy streets, areas with high drop off/pick up activity, and higher speed streets with few driveways and cross streets.	 Source: NACTO, 2019.[6]
Physically Separated Bikeway / Shared Use Paths	Physically separated bikeways are paths distinct from the sidewalks. These include shared use paths, which are paved trails for the exclusive use of pedestrians, cyclists, skaters, and other active transportation users. They are wide enough for two-way travel. They are typically separated from motorized vehicular traffic by an open space, barrier, curb, or exist in an independent corridor. They can also be one-way bike facilities separate from – but adjacent to – the sidewalk.

3. The Future Network

A. Active Transportation in the Community

The goal of the future active transportation network in Tumwater is to provide safe, accessible and convenient active transportation routes so that all users of the transportation system have opportunities to travel to work, school, healthcare facilities, stores, and other key destinations.

Tumwater has an established network of pedestrian and bicycle infrastructure, but significant gaps exist. Many streets lack pedestrian or bicycle facilities. Many roadways with bike lanes have high traffic volumes and high speeds.

Level of Traffic Stress 3 and 4 bicycle facilities likely deter users who could choose to use active transportation instead of driving a motorized vehicle. For those that have no other option, navigating Level of Traffic Stress 3 or 4 adds stress for the user and subjects them to uncomfortable conditions.

Tumwater's vision of expanding its active transportation network will help improve the connectivity of the existing active transportation network, increase the number of facilities with a Level of Traffic Stress of 1 or 2, and meet vehicle miles traveled targets. Active transportation could be an alternative to driving on congested roadways for many people, but the existing infrastructure between major areas of interest suffers from a disconnected network and low levels of comfort.

the comfort and convenience of active transportation facilities improve, people are more likely to choose to use active transportation rather than drive, thus reducing vehicle miles traveled. Active transportation infrastructure improvements will also help those who already use active transportation in Tumwater to feel more comfortable while traveling. More information about safety can be found in Chapter 2 of the Transportation Plan.

Locations with a significant focus for improved active transportation access include schools, libraries, state resource offices, and senior centers as these locations service a high proportion of people who do not drive. As Schools serve a high concentration of people who do not drive, making these priority locations for safety improvements.

The road networks surrounding schools can become congested before and after the school day, raising safety concerns due to the simultaneous use of various modes of transportation within a compressed timeframe. Schools that do not have accessible active transportation routes generally experience more intense vehicle traffic in the peak periods, leading to congestion on nearby roadways.

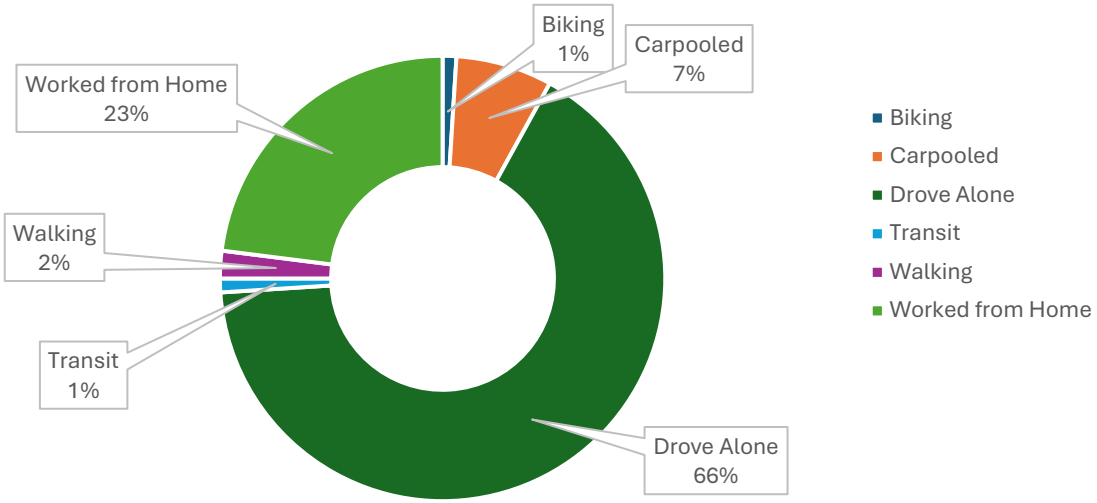
Air quality around schools is a growing concern, particularly due to vehicle idling during drop-off and pick-up times. This issue is closely linked to the prevalence and severity of childhood asthma, affecting students' health and academic performance. Tumwater will prioritize active transportation improvements near schools, so students and school employees have accessible and convenient options to use active transportation.

B. Public Outreach

Outreach was completed in coordination with the overall Comprehensive Plan update, and included asking the community about their transportation priorities, locations of concern, and their day-to-day modal choices. The March 2025 outreach event also included map-based activities where community members could identify locations where they use active transportation and identify areas of concern.

Attendees denoted popular bicycling areas like Custer Way SW, Capitol Blvd SE, Henderson Blvd SE, Kirsop Rd SW, 66th Ave SW, Black Lake Belmore Rd SW, Sapp Rd SW, and various local streets. Challenges for cyclists include inconsistent bike lanes, overgrown vegetation encroaching on bike paths, and dangerous intersections such as Henderson Blvd SE at Deschutes Bridge, where multiple bicycle collisions have occurred. Residents also expressed the need for wide bike lanes and improvements near the library.

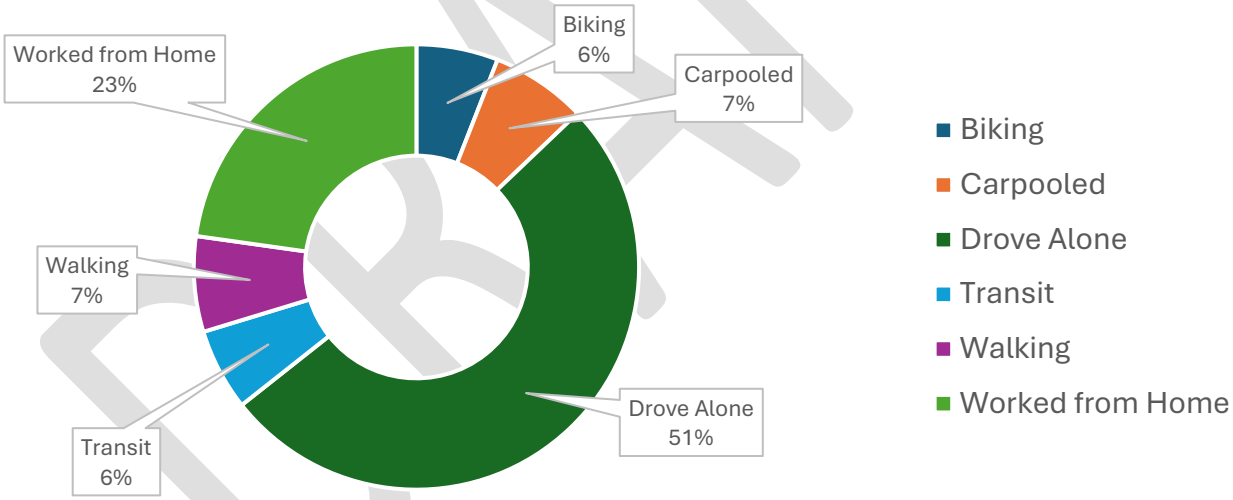
Attendees also marked common walking routes, including Cleveland Ave SE, 66th Ave SW, 70th Ave SW, Littlerock Rd SW, Israel Rd SW, Lindwood Ave SW, Kirsop Rd SW, and numerous local roads. Pedestrian concerns focus on the lack of continuous sidewalks, insufficient crosswalks, and overgrown vegetation obstructing pathways, particularly near the roundabout by the church on Mottman Blvd SW. There was also a call for more neighborhood connections, raised crosswalks, and pedestrian-level amenities like waste bins, streetlights, and benches.



C. Mode Shift

To achieve the Transportation Plan's safety, accessibility, and vehicle miles traveled reduction targets, some trips will need to shift from single occupancy vehicle trips to more efficient modes. These modes include carpooling, transit, and active transportation modes.

Current data in Figure BWR-8 shows that most trips in Tumwater are taken by car, with many being single occupancy vehicles. Tumwater is setting a goal to shift five percent of single occupancy vehicle trips to walking, five percent to bicycling, and five percent to transit as shown in Figure BWR-9.



DRAFT

Figure BWR-8. Share of Primary Travel Options for Commuting to Work.

Source: American Community Survey, 2023.

Figure BWR-9. Tumwater's 2045 Mode Shift Goals.

Effecting mode shift is difficult, but can be done through a combination of strategies:

- Creating more walkable and bikeable communities by building a connected low stress network.
- Reducing or eliminating parking minimums.
- Charging for parking in higher density areas with transit and active mode networks.
- Increasing job and residential density.
- Integrating affordable and below market rate housing.
- Providing ridesharing program.

- Providing end of trip bicycle facilities.
- Providing employer-sponsored van pool.
- Using paid workplace parking.
- Implementing housing and employment parking cash-out.
- Providing electric vehicle charging infrastructure.
- Implementing conventional carshare program.
- Implementing transit-supportive roadway improvements.

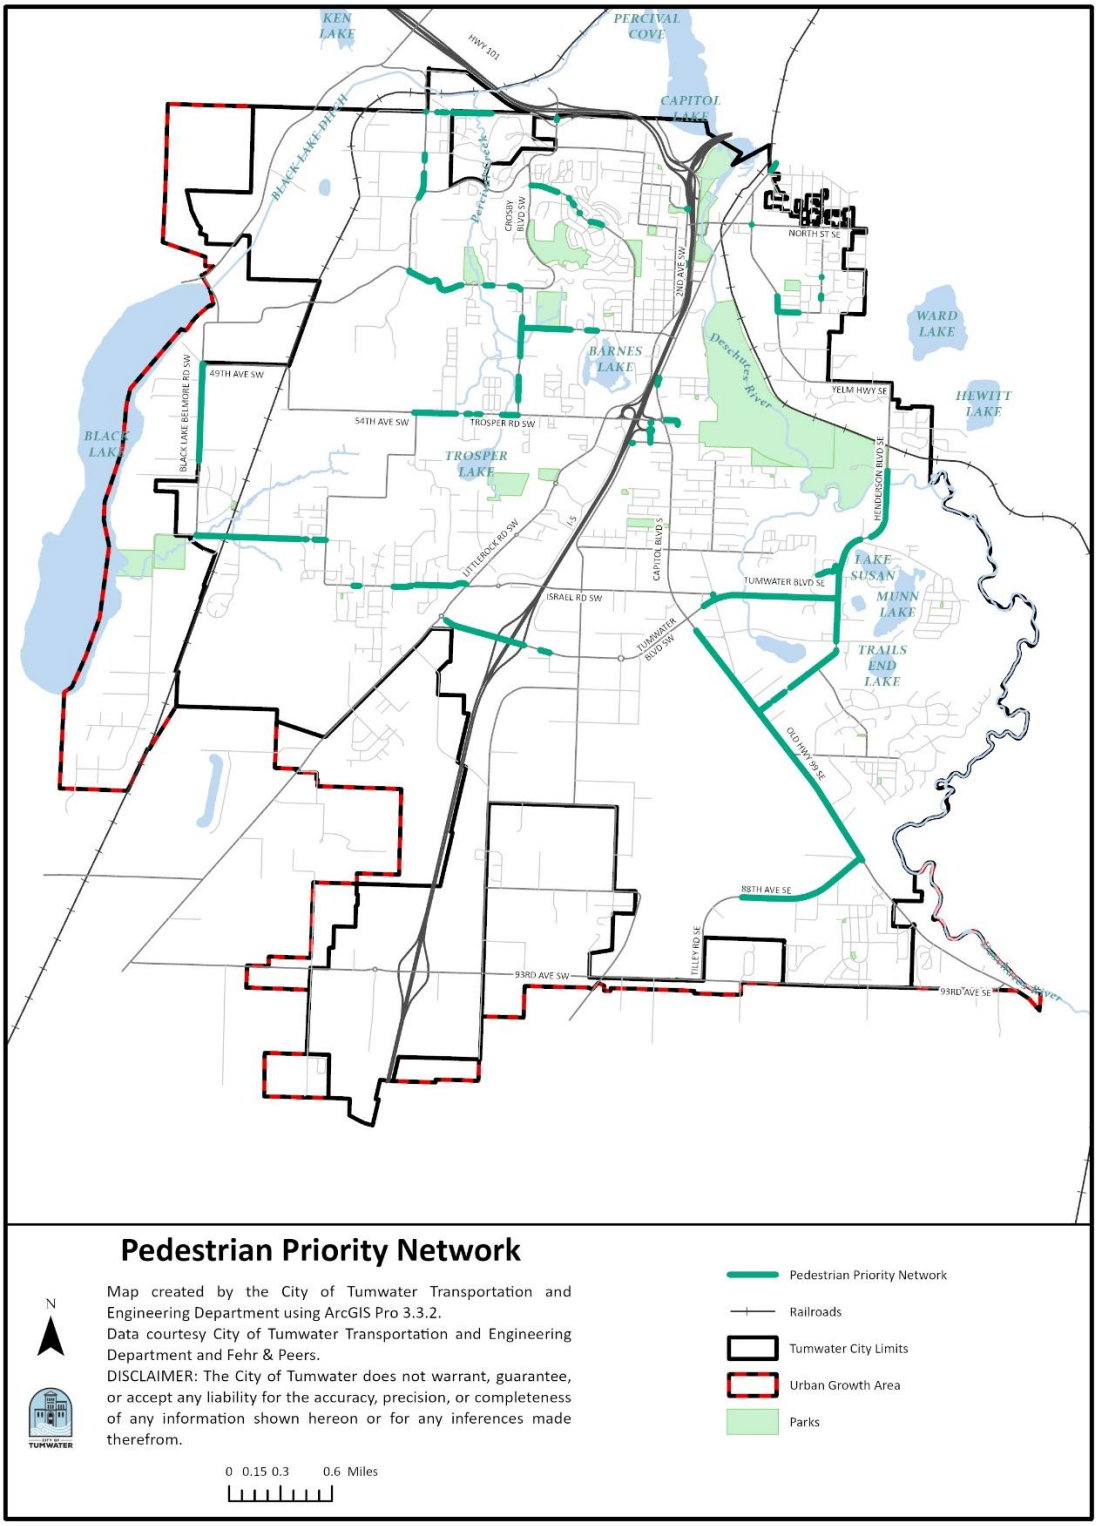
Multimodal infrastructure is necessary to support mode shift and travel outside of a personal vehicle. Individual bike and pedestrian projects do not substantially reduce vehicles miles traveled or lead to mode shifts on their own, but greater benefits are seen once a complete network is constructed.

The projects listed in Table BWR-4 combined with the current active transportation network contribute to a more complete multimodal network. These improvements will help Tumwater reach its mode shift targets.

D. Priority Networks & Near-Term Investments

Public input, gap analysis, previous plans and analysis, and key destinations were all considered in determining priority projects. Tumwater's priority networks identify areas of need to complete the layered multimodal network.

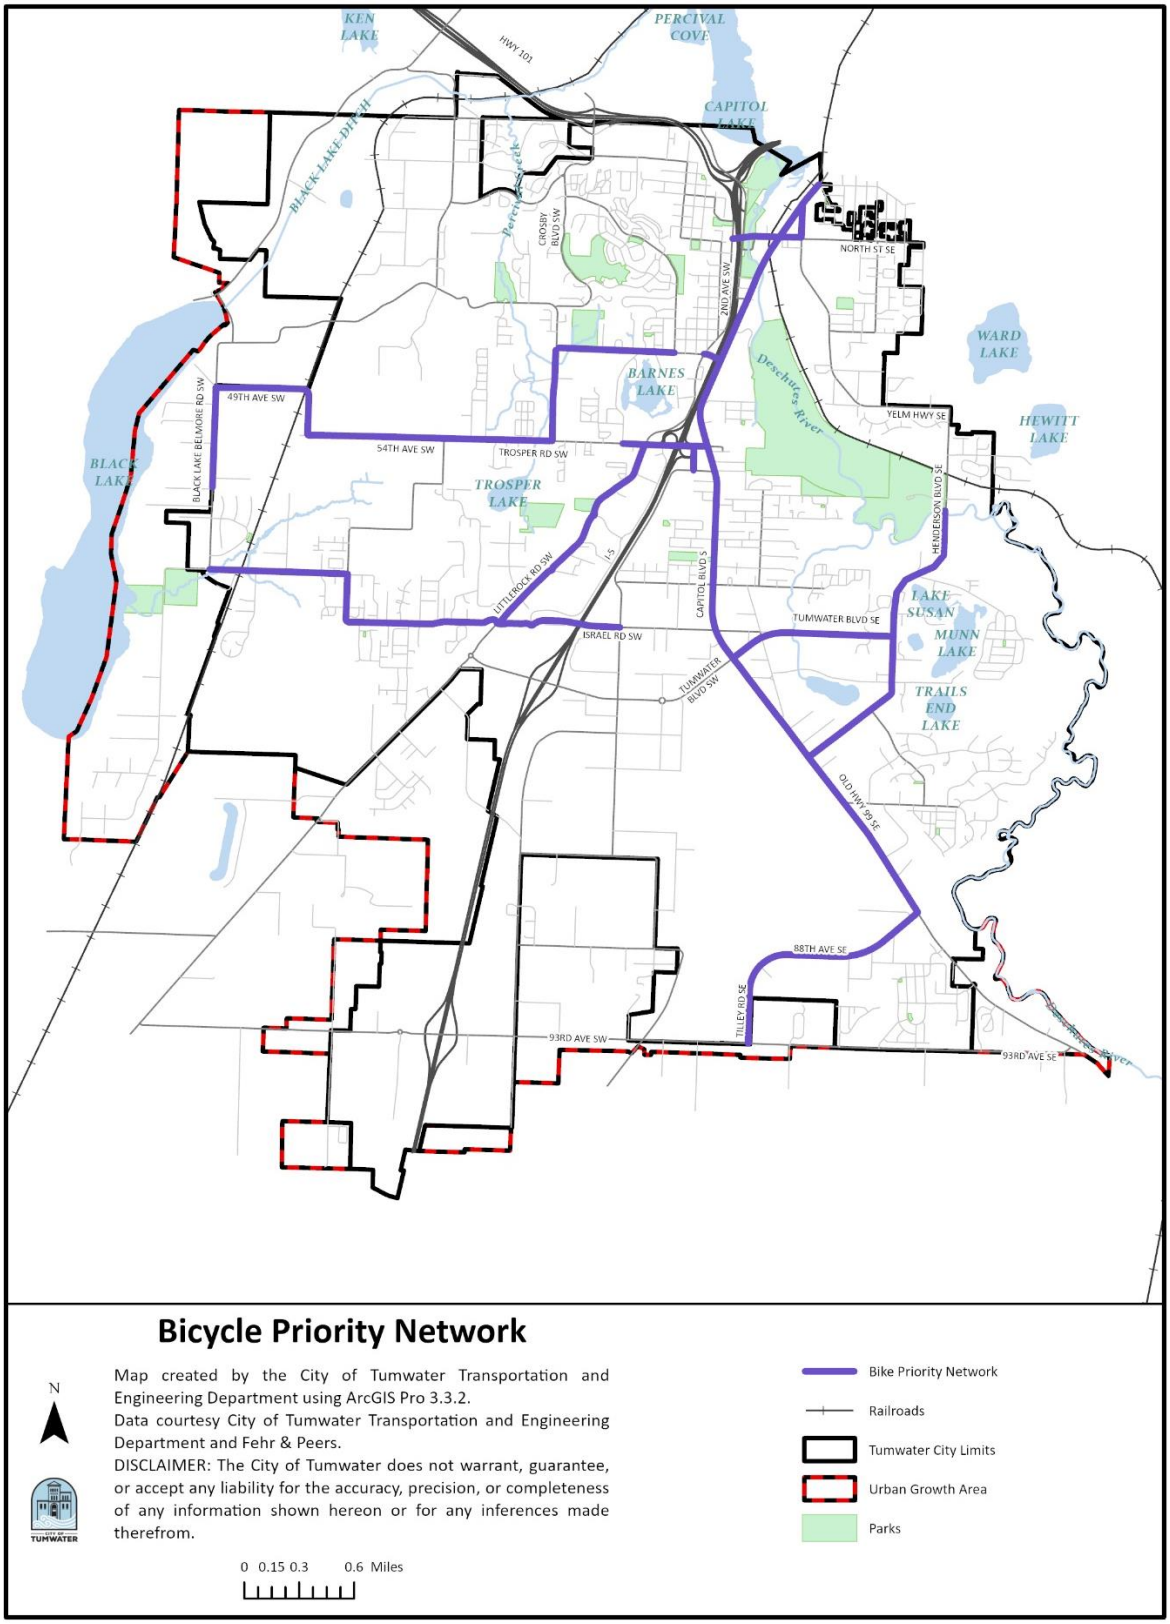
Multimodal priority networks promote the diverse needs of all users – pedestrians, cyclists, transit riders, and freight. By employing a layered network strategy, modal emphasis is assigned to different streets, ensuring that each mode of transportation is accommodated effectively. This method acknowledges that while all traveler types need to be accommodated within a community, no single road can serve all modes equally.



The priority network was developed using the following factors:

1. **Pedestrian and bicycle levels of traffic stress.** This data was analyzed for existing conditions to understand deficiencies. Streets with a Level of Traffic Stress of 3 or 4 will be further refined using locations with prominent network gaps and projected land use growth.
2. **Land use growth projected for 2045**. This data analyzed population, housing, and employment forecasts to determine opportunities to increase modal share.
3. **Network gaps and potential connectivity improvements.** This data demonstrates areas that prevent continuous travel to key locations such as those pointed out at public outreach events to improve connections between modes.

Building bicycle and pedestrian priority networks will provide Tumwater with a more accessible transportation system for all users. The priority networks concentrate investments in the densest areas and help fill in missing gaps



so that more people can safely travel outside of vehicles. The pedestrian priority network is shown in Figure BWR-10. The bicycle priority network is shown in Figure BWR-11.

Figure BWR-10. Pedestrian Priority Network.

Source: Fehr & Peers, 2025.

Figure BWR-11. Bicycle Priority Network.

Source: Fehr & Peers, 2025.

E. Active Transportation Projects

The list of long-term projects in Table BWR-4 was compiled from existing Tumwater plans and an analysis of gaps in the bike and pedestrian priority networks. Many of the projects listed below will achieve Tumwater's goal of Level of Traffic Stress 1 or 2 facilities. Some projects will only achieve a Level of Traffic Stress of 3 or 4.

These projects will need to be further refined before design work is completed to determine what type of facility can achieve the Level of Traffic Stress standard.

Table BWR-4. 20-Year Active Transportation Project List.

Project ID	Project Title	Project Description	Mode	Cost	Level of Traffic Stress
BWR-1	Mottman Rd SW Sidewalk and Bike Lane Improvements	Install sidewalk on the north side of Mottman Rd SW from the vicinity of Crosby Blvd SW to R.W. Johnson Blvd SW. Note that sidewalks and bike lanes will be added to both sides of Mottman Rd SW between Mottman Ct SW and R.W. Johnson Blvd SW during a pavement resurfacing project	Bike / Pedestrian	$1,900,000	Bike: 3 Ped: 2
BWR-2	76th Ave SW/ Kimmie St Bike Facilities	From 83rd Ave SW to 93rd Ave SW	Bike	$500,000	Bike: 3
BWR-3	83rd Ave Bike SW Facilities	From Kimmie St SW to Center St SW	Bike	$700,000	Bike: 4
BWR-4	Bonniewood Dr SE Bike Facilities	From Dennis St SE to Old Highway 99 SE	Bike	$1,200,000	Bike: 2
BWR-5	Black Lake-Belmore Rd SW Bike Lanes	From 66th Ave SW to Black Lake Blvd SW (some partial programmatic potential)	Bike	$4,000,000	Bike: 3
BWR-6	Linwood Ave SW Bike Facilities	From Sapp Rd SW to G St SW	Bike	$2,400,000	Bike: 3
BWR-7	88th Ave SW Bike Facilities	From just west of Cabot Dr SE to 85th Ave SE	Bike	$400,000	Bike: 4

Project ID	Project Title	Project Description	Mode	Cost	Level of Traffic Stress
BWR-8	Trosper Rd SW Bike Facilities	From Lake Park Dr SW to Rural Rd SW	Bike	$50,000	Bike: 2
BWR-9	Center St SW Bike Facilities	From Tumwater Blvd SW to 83rd Ave SW	Bike	$50,000	Bike: 3
BWR-10	Lake Park Dr SW Bike Facilities	From Linwood Ave SW to Trosper Rd SW	Bike	$200,000	Bike: 2
BWR-11	Vista Lp SW Bike Facilities	From Crosby Blvd SW to Barnes Blvd SW	Bike	$200,000	Bike: 2
BWR-12	12th Ave SW / Vista Lp SW Bike Facilities	From Barnes Rd SW to Irving St SW	Bike	$500,000	Bike: 2
BWR-13	Somerset Hill Rd SW Bike Facilities	From R.W. Johnson Blvd SW to Crosby Blvd SW. Consider widening existing 8' path to 12' in lieu of on-street bike facilities	Bike	$800,000	Bike: 1
BWR-14	Lee St / SW Boston Ave SW / Hazelhurst SW Bike Facilities	From Capitol Blvd SE to Elm St SE	Bike	$30,000	Bike: 2
BWR-15	7th Ave SW / Bates St SW / 3rd Ave SW Bike Facilities	From 2nd Ave SW to Crosby Blvd SW	Bike	$150,000	Bike: 2
BWR-16	Desoto St SW / 4th Ave SW / Ferry St SW Bike Facilities	From 7th Ave SW to 2nd Ave SW	Bike	$100,000	Bike: 2
BWR-17	X St SW Shared Bike Streets	Upgrade as necessary and sign with 'sharrows' X St SW, from Elm St SW to 7th Ave SW. (Programmatic potential)	Bike	$30,000	Bike: 3

Project ID	Project Title	Project Description	Mode	Cost	Level of Traffic Stress
BWR-18	New Pedestrian Connection from Linderson Way SW to Elm St SW, in vicinity of T St SW	Pedestrian facilities offering a direct route between Linderson Way SW and Elm St SW with a crossing at Capitol Way. Preferred route roughly aligns with T St SW and Pinehurst Dr SW	Pedestrian	$500,000	Ped: 1
BWR-19	Elm St SW Sidewalks	Completion of sidewalk facilities on Elm St SW between Pinehurst Dr SW and W St SW	Pedestrian	$160,000	Ped: 1
BWR-20	North-South Pedestrian Connection between X St SW and Dennis St SW	Create a new pedestrian / non-motorized connection through the future shared-use pathway on the BPA alignment to connect X St SW and Dennis St SW in the vicinity of Tumwater High School	Pedestrian	$300,000	Ped: 1
BWR-21	Trosper Rd SW -- Lake Park Dr SW to Rural Rd SW	Repurpose asphalt to provide 3 travel lanes and bike lanes	Motorized Vehicle / Bike	$225,000	Bike: 2
BWR-22	Old Highway 99 SE -- 73rd Ave SE to 88th Ave SE	Widen to 4 lanes with median, bike lanes and intersection improvements at Bonniewood Dr SE, Henderson Blvd SE, and 88th Ave SE	Motorized Vehicle / Bike	$22,000,000	Bike: 4
BWR-23	Capitol Blvd SE – Custer Way SE to Carlyon Ave SE	Reduce to 4 lanes, install bike lanes	Motorized Vehicle / Bike	$100,000	Bike: 3
BWR-24	Capitol Blvd SE – M St SW to Israel Rd SW	Reduce to 4 lanes, construct roundabouts at select intersections, install bike lanes, and construct median	Motorized Vehicle / Bike	$30,000,000	Bike: 3

Project ID	Project Title	Project Description	Mode	Cost	Level of Traffic Stress
BWR-25	2nd Ave SW Pedestrian and Bike Improvements	Identify gaps and add facilities to achieve Level of Traffic Stress 2	Bike / Pedestrian	$3,855,000	Bike: 2 Ped: 2
BWR-26	Rural Rd SW Shoulder Improvements	Widen shoulder and provide sidewalks to connect Sapp Rd SW to Trosper Rd SW.	Bike / Pedestrian	$500,000	Bike: 4 Ped: 4
BWR-27	66th Ave SW / 70th Ave SW Bike Lanes	From Black Lake-Belmore Rd SW to Littlerock Rd SW	Bike	$3,400,000	Bike: 3
BWR-28	70th Ave SW Pedestrian Improvements	Infill pedestrian sidewalk gaps to improve Level of Traffic Stress and provide critical connections	Pedestrian	3,000,000	Ped: 2
BWR-29	66th Ave SW Sidewalk Improvements	Infill pedestrian sidewalk gaps to improve Level of Traffic Stress and provide critical connections	Pedestrian	5,000,000	Ped: 2
BWR-30	88th Ave SW Sidewalk Improvements	Infill pedestrian sidewalk gaps to improve Level of Traffic Stress and provide critical connections	Pedestrian	2,100,000	Ped: 2
BWR-31	Tumwater Blvd SW Sidewalk Extension	Infill pedestrian sidewalk gaps to improve Level of Traffic Stress and provide critical east west connection	Pedestrian	2,000,000	Ped: 2
BWR-32	Rural Rd SW Sidewalk Development	Infill pedestrian sidewalk gaps to improve Level of Traffic Stress and provide critical connections	Pedestrian	2,500,000	Ped: 2
BWR-33	Linwood Ave SW Sidewalk Infill	Infill pedestrian sidewalk gaps to improve Level of Traffic Stress and provide critical connections	Pedestrian	200,000	Ped: 2

Project ID	Project Title	Project Description	Mode	Cost	Level of Traffic Stress
BWR-34	Tumwater Blvd SW Bike Lane Development	This project will convert wide lanes on Tumwater Blvd SW to bike lanes to improve the associated Level of Traffic Stress of the facility	Bike	16,800,000	Bike: 3
BWR-35	Deschutes Valley Trail	Phased Construction - Deschutes Valley Trail, from Pioneer Park (vicinity of Henderson Boulevard) to Tumwater Historical Park (Deschutes Parkway)	Pedestrian / Bike	$12,000,000	Ped:1, Bike:1
B	Safe Routes to School Projects	Improve pedestrian and bicyclist safety near schools. Projects include sidewalks, lighting, flashing beacons, signage, markings, and other measures. Project details developed as a part of the six-year Transportation Improvement Plan process.	Programmatic	$2,000,000	-

F. Funding Opportunities

There are many sources to help Tumwater pay for active transportation improvements, and these programs can and do change over time.

The funding opportunities below are a selection of external funding sources that may be a good match for Tumwater's active transportation improvements.

1) Transportation Improvement Board

The Transportation Improvement Board facilitates state investment in local transportation projects and distributes grant funding to cities and counties generated from the statewide gas tax. The Transportation Improvement Board offers several grant programs including the Active Transportation Program, which provides funding to improve pedestrian and cyclist safety, enhance

pedestrian and cyclist mobility connectivity, or improve the condition of existing facilities.[7]

2) Pedestrian & Bicycle Program

The Washington State Department of Transportation Pedestrian and Bicycle program awards funding for projects that enhance safety and mobility for people who walk or bike. The goal of the program is to eliminate fatal and serious injury pedestrian and bicyclist crashes, build connected low stress walk and bike networks, and increase walking and bicycling.

Two types of projects are eligible for this funding: construction projects and design-only projects. Design-only projects allow agencies the opportunity to engage with the community to develop projects that appeal to a wide range of users. The Active Transportation Programs Design Guide provides details for treatments intended to provide safer conditions for users of the active transportation network.

3) Safe Routes to School

The goal of the Safe Routes to School program is to improve the safety and mobility of children by enabling and encouraging them to use active transportation to school. This program provides funding for infrastructure projects within two miles of a school serving children in kindergarten through 12th grade. Construction, design-only, and education projects are all eligible for funding under this program.

4) Sandy Williams Connecting Communities Program

This program was established to improve active transportation connectivity in overburdened communities[8] along state and legacy highways. The program name honors Sandy Williams, a community activist who worked to reconnect her African American neighborhood after the construction of Interstate 90 divided the Spokane.

The focus of this program is on communities most affected by barriers to opportunity and environmental health disparities. This grant can be used to fund projects that enhance safety, comfort, and connectivity, making it easier for community members to access essential services and community spaces. Funding from this program can be used for planning, design, or construction, and can be used as a match for a federal grant award.

5) Transportation Alternatives Program

Transportation Alternatives projects encompass smaller-scale transportation projects such as pedestrian and bicycle facilities, recreational trail projects, and safe routes to school.

6) Active Transportation Infrastructure Investment Program.

This program is a competitive federal grant program for projects proving safe and connected active transportation facilities in active transportation networks or spines. The program

[7] https://www.tib.wa.gov/grants/grants.cfm

[8] https://experience.arcgis.com/experience/03cb82fc4a524e8c9723192e72c80a0e

awards both planning and design and construction grants.

Projects seeking planning and design grants must have costs of at least $100,000, and projects seeking construction grants must have total costs of at least $15 million to be eligible.[9] The goal of this grant is to integrate active transportation infrastructure with transit service to improve access and connectivity.

7) Surface Transportation Block Grant

Bicycle, pedestrian, and trail projects are eligible for funding under this flexible grant program. The Washington State Department of Transportation allocates Surface Transportation Block Grant funds to Metropolitan Planning Organizations and County Lead Agencies to select projects that align with regional priorities.[10]

G. Programmatic Improvements

While constructing active transportation infrastructure upgrades is an effective way to improve Tumwater's active transportation network, construction is costly and time intensive. Tumwater will explore other options to improve active transportation access and convenience. Some of these non-capital alternatives are explored below.

1) E-Bike Rebate Program

Many cities in the region have adopted e-bike rebate programs to help residents offset the cost of an e-bike. Tumwater can choose to open the program to all residents or restrict applicants to meet income qualifications. E-bikes present a faster, more comfortable and convenient alternative to standard bicycles, making bicycling a more appealing choice for some users of the transportation system.

2) Bike Share & Micromobility

Bike share programs involve renting bicycles from designated docking stations while e-scooter and dockless e-bike rentals are examples of shared micromobility options. These programs offer residents the option to bike and roll without the cost of purchasing, maintaining, and storing a bike or scooter. Bike shares and micromobility presents a convenient and affordable alternative to driving.

3) Bike Storage & Parking

Investing in bike racks, shelters, and lockers help make bicycling a more attractive and convenient option for cyclists. Offering bike storage and parking at key destinations like transit hubs, schools, and activity centers is an important aspect of bicycle infrastructure.

Guidelines could be created for bike parking, especially at key destinations and commercial areas. Bike storage with outlets would be especially beneficial to e-bike users who need to charge their bike before continuing their trip. Tumwater can also encourage employers and

[9] https://www.fhwa.dot.gov/environment/bicycle_pedestrian/atiip/.

[10] https://wsdot.wa.gov/business-wsdot/support-local-programs/funding-programs/surface-transportation-block-grant.

DRAFT

apartment buildings to offer secure bicycle parking for their employees.

4) Education

Education plays a crucial role in promoting safe and effective active transportation in cities. Educating users about road safety, traffic laws, and route selection can encourage participation.

Tumwater could establish a wayfinding plan for people who use active transportation and ensure proper distribution. Engagement with schools, community organizations, and businesses helps increase awareness, answer questions, and foster a culture that values active transportation as a transportation mode.

Tumwater can also take advantage of state and national initiatives like Bike Month or Walk, Bike, and Roll to School Day as educational opportunities.

5) Employer Partnerships

Tumwater could partner with employers to incentivize active transportation to work and encourage office buildings to provide showers and secure bicycle parking. Workplaces can also establish parking maximums, pricing strategies, and other policies that disincentivize driving alone to work or take an active role in the Commute Trip Reduction program, which affects worksites with at least 100 full-time employees who begin their shift between 6:00 – 9:00 am on weekdays.

6) Maintenance & Enforcement

Once bicycle and pedestrian facilities are built, Tumwater must ensure that they function as designed. There are several strategies Tumwater can employ to do this. Increase enforcement of parking restrictions in bike lanes. Properly maintain bike and pedestrian facilities by regularly cleaning up trash and debris, trimming vegetation, and removing obstacles. Tumwater can also develop speeding enforcement strategies on key bike connections.

DRAFT

1. Introduction

A. Background

The Utilities Element is part of Tumwater's Comprehensive Plan and was prepared in response to the Growth Management Act (Chapter 36.70A RCW). The Element meets the requirements of RCW 36.70A.070(4) for utilities elements that are found in Appendix B *State Requirements*.

Tumwater's Vision, Mission, and Belief Statements that provide overarching direction for the future of Tumwater are found in the Comprehensive Plan Summary.

The Utilities Element aligns and is consistent with the other elements of the Comprehensive Plan.

Part 1 – Goals Policies, and Implementation Actions establishes Tumwater's goals and policies that set forth a direction to create and maintain private utilities that support development in Tumwater.

The goals and policies of the Utilities Element are guided by the state Growth Management Act and the Thurston County County-Wide Planning Policies and the vision of a Tumwater. These goals and policies are coordinated with the other Elements and regional plans.

The Utilities Element supports the Land Use Element of the Comprehensive Plan by ensuring that the policies for provision of efficient and sustainable utilities to serve anticipated growth and development are consistent with the Land Use Element, which establishes the overall growth strategy for Tumwater and its urban growth area. Expansion of utility systems and services follows growth and the demand for reliable services.

The Utilities Element's goals and policies are the policy basis for those draft implementation actions in the Utilities Element and those future actions that will be developed over the next 20 years which will be the foundation for Tumwater's annual work programs to address private utilities and development.

Part 2 – Technical Information provides the background information on private utilities needed to support the twenty-year growth projections for Tumwater.

B. How to Read this Part of the Element

In Part 1, Chapters 2 and 3 discuss the Utility Element's connection to the goals of the state Growth Management Act and the Thurston County County-Wide Planning Policies.

Chapter 4 presents each goal with introductory text, and an explanation of the lead and timeline for each policy.

Appendix A contains the draft implementation actions, which are intended to be a source of annual work program items that serve to implement the goals and policies of the Utilities Element.

The annual work programs will further refine the implementation actions prior to their being put into practice. It is expected that implementation

DRAFT

actions will be further amended, added, or subtracted as needed over the course of the 20 year Comprehensive Plan as new opportunities arise to meet the intent of the Utilities Element's goals and policies.

DRAFT

2. Growth Management Act – Element Goals

Chapter 36.70A RCW requires that Tumwater show how the Utilities Element meets the relevant planning goals contained within the Act. The following is a listing of the applicable goals for the Utilities Element, and an analysis of how the Element addresses these goals:

1. ***Urban Growth***. *Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.*

   The Utilities Element has goals and policies that ensure that private utility services provided by the private sector, such as natural gas, electricity, or telecommunication services, are consistent with Tumwater's Comprehensive Plan and can support the community's growth and development as anticipated over the twenty-year planning period.

12. ***Public Facilities and Services***. *Ensure that those public facilities and services necessary to support development shall be adequate.*

The Utilities Element, as required by the Growth Management Act, includes an inventory of the general location of all existing and proposed private utility facilities and a description of the current capacity and the expected future capacity of each utility.

DRAFT

3. County-Wide Planning Policies

The Growth Management Act requires that Tumwater's Comprehensive Plan be consistent with the Thurston County County-Wide Planning Policies, as amended in 2025.

The following is a list of the relevant policies that apply to this Element. All County-Wide Planning Policies are adopted as Appendix B to the Comprehensive Plan. The relevant sections of the County-Wide Planning Policies to this Element are cited below.

I. General Policies

The Utilities Element contains goals, policies, and actions that address County-Wide Planning Policy 1.12. These goals, policies, and actions contribute to energy independence, economic stability, reduced climate impacts, and long-term household and community health.

II. Urban Growth Areas

The purpose of the Utilities Element is to plan the provision of private utilities to Tumwater and its urban growth area.

III. Promotion of Contiguous and Orderly Development, Provision of Urban Services, and Protection of Rural Areas

The Utilities Element seeks to find the most effective way to serve the greatest number of people at the lowest cost possible through examining how private utilities are currently provided, what providers have planned, and how future demand will shape utility distribution.

VII. Economic Development and Employment

In addition to the provision of natural gas and electricity, the Utility Element outlines the provision of telecommunication networks, which supports businesses of all types as internet access becomes increasingly vital to the success of a business.

IX. Transportation

Teleworking is supported by the provision of the internet as covered in Section 5.1.

X. Environmental Quality

Goals U-2 and U-4 of this element address reducing energy consumption and increasing energy generation from renewable sources to minimize Tumwater's carbon footprint.

DRAFT

4. Element Goals and Policies

A. How to Read These Tables

The Utilities Element's goals and policies are not in priority order.

Appendix A provides a list of the draft implementation actions by goal and policy that will be considered when developing annual work programs for implementing the Utilities Element's goals and policies.

1) Department Leads

Implementation of the Utilities Element's policies are associated with two different Tumwater departments:

CDD Community Development

TED Transportation & Engineering

2) Period

Each of the Utilities Element's policies and draft implementation actions are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

B. Growth Management Goals

Goal U-1 Promote efficiency when planning for and siting private utilities.

Goal U-1 establishes policies for Tumwater to work with private utility providers to reduce the cost and increase efficiency of providing service to the community.

1) Why is this Goal Important?

Goal U-1 contributes to energy independence, economic stability, reduced climate impacts, and long-term household and community health. Increased efficiency reduces costs to private utility providers that are in turn passed on to consumers in the form of reduced housing and service related costs.

	Policies	Lead	Period
U-1.1	**Coordinate with private utility providers to allow utilities to meet anticipated demand.**	**CDD TED**	Term of the Plan
U-1.2	**Be aware of public service obligations when a local review of private utility improvements occurs and process permits and**	**CDD TED**	Term of the Plan

	Policies	Lead	Period
	approvals for private utility facilities in a fair and timely manner, and in accordance with development regulations that foster predictability.		
U-1.3	**Locate private utility facilities near compatible adjacent land uses.**	**CDD TED**	Term of the Plan
U-1.4	**Encourage utilities to collocate or consolidate facilities within rights-of-way whenever feasible to protect health, safety, ensure reliability to the utility system, and reduce visual impacts.**	**TED**	Term of the Plan
U-1.5	**Provide timely notification to all affected private utilities prior to road construction or projects that may impact services.**	**TED**	Term of the Plan
U-1.6	**Review and approve related private utility permits as part of larger project review and approval processes whenever feasible.**	**CDD TED**	Term of the Plan
U-1.7	**Protect existing electrical transmission corridors and public rights-of-way to maintain their usefulness in meeting future utility and other public needs.**	**CDD TED**	Term of the Plan
U-1.8	**Coordinate with neighboring jurisdictions to ensure consistency of the respective Utility Elements to facilitate orderly private utility service.**	**CDD TED**	Term of the Plan

Goal U-2 Support enhancement of electricity generation, distribution, monitoring, and storage infrastructure serving Tumwater that uses clean technologies and practices.

Goal U-2 establishes policies for Tumwater to support the use of cleaner technologies and practices that enhance the electricity generation, distribution, monitoring, and storage infrastructure used to support Tumwater.

1) Why is this Goal Important?

Goal U-2 would protect the health of Tumwater residents by supporting the movement of energy systems to less polluting alternatives.

Policies		Lead	Period
U-2.1	**Monitor system or grid-scale energy storage innovations and use the experiences of communities that begin to deploy them to inform updates to Tumwater codes and permitting.**	**CDD**	Term of the Plan

Goal U-3 Support the efforts of private utility providers to ensure that vital utilities are created, operated, and maintained in a safe manner.

Goal U-3 establishes policies for Tumwater to support work with private utility providers to make sure that vital utilities function as intended.

1) Why is this Goal Important?

Goal U-3 would help to ensure that private utilities are available to Tumwater residents and community members and to reduce the number and effects of disruptions.

Policies		Lead	Period
U-3.1	**Coordinate with private utility providers to implement actions in the Natural Hazards Mitigation Plan to reduce service interruptions and provide services that are more dependable during hazard events.**	**CDD TED**	Term of the Plan
U-3.2	**Support undergrounding private utilities to increase public safety.**	**CDD TED**	Term of the Plan
U-3.3	**Encourage pipeline safety through public awareness and regulations.**	**CDD**	Term of the Plan
U-3.4	**Support private provider's actions to increase the safety of utilities infrastructure and operations through appropriate siting and maintenance.**	**CDD**	Term of the Plan

Appendix A – Draft Implementation Actions

Each of the Lands for Public Purposes Element goals and policies in Chapter 4 will require Tumwater to take specific actions to implement over the course of the 20 year term of the Comprehensive Plan.

The draft implementation actions in the tables below were developed in coordination with the stakeholders, the community, and Tumwater staff. The draft implementation actions in the tables below are intended to serve as the building blocks for developing the annual Tumwater work programs that will implement the goals and policies of the Utilities Element.

The draft implementation actions will need further refinement before they are incorporated into annual Tumwater work programs.

As the Comprehensive Plan is put into action over the next twenty years, the draft implementation actions will change as new, unforeseen opportunities emerge: new ones may be added, proposed ones may be modified or replaced by other actions.

1. How to Read These Tables

The Lands for Public Purposes Element goals, policies, and the implementation actions associated with them are not in priority order.

Draft implementation actions that can only be undertaken by other entities are not included in this plan.

a) Department Leads

Implementation of the Utilities Element's policies and implementation actions are associated with two different Tumwater departments:

CDD Community Development

TED Transportation & Engineering

b) Period

Each of the Utilities Element's policies and draft implementation actions are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

Goal U-1 Promote efficiency when planning for and siting private utilities.

Policies and Implementation Actions		Lead	Period
U-1.1	**Coordinate with private utility providers to allow utilities to meet anticipated demand.**	**CDD TED**	**Term of the Plan**
U-1.1.1	Provide growth projections to private utility providers to allow for utilities to be appropriately planned for and sized to meet anticipated demand.	**CDD**	Term of the Plan

Policies and Implementation Actions		Lead	Period
U-1.1.2	Notify private utility providers when project proposals for large developments are submitted to ensure adequate services will be provided.	CDD TED	Term of the Plan
U-1.1.3	Identify areas with disadvantaged populations and work with private utility providers to support extensions and updates to infrastructure in these areas.	CDD TED	2026-28
U-1.1.4	Explore ways to provide affordable, reliable services such as broadband and cable to communities with barriers with assistance from private utility providers.	CDD	2026-28
U-1.2	**Be aware of public service obligations when a local review of private utility improvements occurs and process permits and approvals for private utility facilities in a fair and timely manner, and in accordance with development regulations that foster predictability.**	CDD TED	**Term of the Plan**
U-1.3	**Locate private utility facilities near compatible adjacent land uses.**	CDD TED	**Term of the Plan**
U-1.3.1	Update Tumwater development regulations to address noise, odor, heat, and visual impacts of new private utility facilities on surrounding properties.	CDD TED	2026-28
U-1.4	**Encourage utilities to collocate or consolidate facilities within rights-of-way whenever feasible to protect health, safety, ensure reliability to the utility system, and reduce visual impacts.**	TED	**Term of the Plan**
U-1.5	**Provide timely notification to all affected private utilities prior to road construction or projects that may impact services.**	TED	**Term of the Plan**
U-1.5.1	Seek input from private utility providers when developing policies that affect their service and activities, such as street excavation, street obstructions, and fees.	TED	Term of the Plan

Policies and Implementation Actions		Lead	Period
U-1.5.2	Coordinate with private utilities providers on the design and timing of utilities trenching and street repair in public rights of way to reduce disruption.	TED	Term of the Plan
U-1.6	**Review and approve related private utility permits as part of larger project review and approval processes whenever feasible.**	**CDD TED**	**Term of the Plan**
U-1.7	**Protect existing electrical transmission corridors and public rights-of-way to maintain their usefulness in meeting future needs.**	**CDD TED**	**Term of the Plan**
U-1.8	**Coordinate with neighboring jurisdictions to ensure consistency of the respective Utility Elements to facilitate orderly private utility service.**	**CDD TED**	**Term of the Plan**
U-1.8.1	Coordinate with Thurston County and the cities of Lacey and Olympia when private, multijurisdictional private utility additions and improvements are being planned.	TED	2026-28

Goal U-2 Support enhancement of electricity generation, distribution, monitoring, and storage infrastructure located in Tumwater that uses clean technologies and practices.

Policies and Implementation Actions		Lead	Period
U-2.1	**Develop and implement policies which support the development of grid-scale energy storage adjacent to critical utility infrastructure and use the experiences of communities that begin to deploy them to inform updates to Tumwater codes and permitting.**	**CDD**	**Term of the Plan**
U-2.1.1	Collaborate with energy providers for the deployment and siting of such storage solutions.	CDD	2026-28

Goal U-3 Support the efforts of private utility providers to ensure that vital utilities are created, operated, and maintained in a safe manner.

Policies and Implementation Actions		Lead	Period
U-3.1	**Coordinate with private utility providers to implement actions in the Natural Hazards Mitigation Plan to reduce service interruptions and provide services that are more dependable during hazard events.**	**CDD TED**	**Term of the Plan**
U-3.1.1	Work with private utility providers to harden the existing electrical grid to reduce peak demand and maintain reliable energy, especially during extreme weather events.	**TED**	Term of the Plan
U-3.1.2	Refer to the most current Natural Hazards Mitigation Plan to identify areas where private utility providers should reinforce and harden their utilities to remain dependable during hazard events.	**TED**	Term of the Plan
U-3.2	**Support undergrounding private utilities to increase public safety.**	**CDD TED**	**Term of the Plan**
U-3.2.1	Identify areas at high risk for natural hazards and require that private utilities be placed underground as part of new development and redevelopment.	**CDD**	Term of the Plan
U-3.2.2	Develop and maintain a management plan, consistent with the Tumwater Municipal Code and the Engineering Development and Design Standards, for underground and overhead private utilities as part of Tumwater's franchise agreements.	**TED**	Term of the Plan
U-3.2.3	Support a change in state policies to increase the share of funding for undergrounding overhead wires to reduce power outages.	**CDD**	Term of the Plan
U-3.2.4	Work with private utility providers to utilize construction projects and infrastructure updates as an opportunity to install underground utilities.	**TED**	Term of the Plan

Policies and Implementation Actions		Lead	Period
U-3.2.5	Work with neighborhood associations to encourage the development of local improvement districts to provide funding for undergrounding existing private utilities.	CDD TED	Term of the Plan
U-3.3	**Encourage pipeline safety through public awareness and regulations.**	**CDD**	**Term of the Plan**
U-3.3.1	Adopt regulations that limit high-risk uses near pipelines to protect both the public and the pipelines themselves.	CDD	Term of the Plan
U-3.3.2	Support public education on pipeline safety and pipeline locations within Tumwater.	CDD	Term of the Plan
U-3.3.3	Discourage above-ground natural gas gate stations from being located in nonindustrial areas.	CDD	Term of the Plan
U-3.4	**Support private provider's actions to increase the safety of utilities infrastructure and operations through appropriate siting and maintenance.**	**CDD**	**Term of the Plan**
U-3.4.1	If permitting new large scale energy storage systems, ensure private utility facilities are located with compatible surrounding land uses with regard to the size of exposed apparatuses, the production of audible noise, and public health and safety.	CDD	2026-28
U-3.4.2	When a private provider proposes a large new scale energy storage system, require adequate safety and maintenance plans and documentation be provided as part of project review in accordance with federal and state regulations.	CDD	2026-28

1. Introduction

A. Background

The Utilities Element ensures that utility services provided by private suppliers are consistent with Tumwater's Comprehensive Plan and support the community's anticipated growth and development over the 20-year planning period.

The Utilities Element supports the Land Use Element of the Comprehensive Plan by ensuring that the policies for provision of efficient and sustainable utilities to serve anticipated growth and development are consistent with the Land Use Element, which establishes the overall growth strategy for Tumwater and its urban growth area. Expansion of utility systems and services follows growth and the demand for reliable services.

The Utilities Element aligns and is consistent with the Climate Element.

Goals and policies within this Element address private utilities such as:

- Natural gas
- Electricity
- Telephone
- Utility pipelines
- Cable television
- Wireless
- Broadband internet

Services that are provided by Tumwater or other public agencies such as water, wastewater, and waste management services are addressed in the Lands for Public Purposes Element.

As required by the Growth Management Act, the Utilities Element must include an inventory of the general location of all existing and proposed utility facilities and a description of the current capacity and the expected future capacity of each utility. This Element identifies ways of improving the quality of these services and includes policies that ensure utilities are coordinated with land use. Staff worked with private utility suppliers to anticipate future needs and areas of growth.

Tumwater will implement these policies through its franchise and master use agreements with the utilities and through the land use permit process.

Appendix A: *Foundational Documents* provides a list of the plans that provide the foundation for this element of the Comprehensive Plan.

The Utilities Plan incorporates a number of new issues as part of this update:

- Mitigating for the impacts of climate change.
- Supporting the development of infrastructure to enable the widespread integration of renewable energy sources and energy storage.
- Responding to rapidly changing technology and consumer needs, while maintaining a system of aging infrastructure.
- Creating resiliency to impacts of climate change and reliability of services.

DRAFT

B. How to Read this Part of the Element

Part 2 of the Utilities Element consists of the following chapters.

- **Chapter 1 – Introduction:** Discusses the State requirements for the Element and background.
- **Chapter 2 – Utilities Regulations**: Identifies the major pieces of legislation and organizations that are most prominent in the utilities sector.
- **Chapter 3 – Natural Gas**: Provides a summary of the private natural gas systems in Tumwater and a discussion of expected demand.
- **Chapter 4 – Electricity**: Provides a summary of the private electricity systems in Tumwater and a discussion of expected demand.
- **Chapter 5 – Natural Gas and Fuel Pipelines**: Provides a summary of the private natural gas and fuel pipelines in Tumwater.
- **Chapter 6 – Telecommunications**: Provides a summary of the telecommunications systems in Tumwater and a discussion of expected demand.
- **Appendix A – Foundational Documents**: Provides a list of the documents used to create the Utilities Element's Technical Summary.
- **Appendix B – Private Utility Contact Information –**Provides a list of the contact information for private utilities in Tumwater that was used in the development of the Utilities Element.

DRAFT

2. Utilities Regulations

Both public and private agencies are involved with regulation, coordination, production, delivery, and supply of services. This chapter identifies the major pieces of legislation and organizations that are most prominent in the utilities sector.

A. Federal Regulation

The Federal Energy Regulatory Commission is an independent commission working with the U.S. Department of Energy. The commission regulates the interstate transmission of natural gas, oil, and electricity, as well as licensing natural gas and hydropower generation projects.

The Federal Communications Commission regulates communication utilities in each cellular geographic service area, and in Tumwater and its urban growth area, there are several commission licensed providers. An independent U.S. government agency overseen by Congress, the commission is the United States' primary authority for communications laws, regulation, and technological innovation.

B. State Regulation

1) Utilities and Transportation Commission

The primary regulatory agency for most private utilities in the State is the Washington Utilities and Transportation Commission which was established by Title 80 RCW. The commission ensures that services of regulated companies are safe, available, dependable, and fairly priced. The commission regulates the rates, services, facilities, and practices of investor-owned electric utilities, telecommunications companies, natural gas and water companies, solid waste collection companies, and pipeline companies, among other things. The commission does not regulate the rates of broadband services, cellular, cable, or Internet service.

The commission defines electricity and standard telephone utilities as critical services that must be provided upon demand. To fulfill public service obligations, these utility providers must plan to extend or add to their facilities when needed. Natural gas is considered a utility of convenience. The commission prohibits utility providers from passing the cost of new construction onto the existing rate base.

As part of its mission to protect consumers, the commission maintains a call center for customer complaints at 1-888-333-9882 and coordinates the 811 Call Before You Dig line, a free service for locating utilities on public or private property that anyone can use.

2) Clean Energy Acts

Starting in 2019, the State Legislature has passed a set of bills setting an ambitious, multi-decade agenda that changes how electric and natural gas utilities acquire resources and provide energy services to state businesses and consumers.

DRAFT

Engrossed Second Substitute Senate Bill 5116 is known as the Clean Energy Transformation Act. Under the act, all electric utilities must generate 100 percent of their power from renewable or zero carbon resources. This also includes requirements for an equitable distribution of the benefits of clean energy and reductions in burdens of communities facing barriers and front line communities. Utility providers must demonstrate progress in making energy assistance available to low-income households.

In 2024 the State passed a bill to reduce the use of natural gas. House Bill 1589 incentivizes customers and pressures utility companies to move away from fossil fuels. Under state law, Puget Sound Energy must generate 80 percent of its energy from renewable energy sources by 2030 and 100 percent by 2045.

The act also contains provisions to safeguard consumers and prevent electric bills from rapidly increasing as a result of utilities' transition into clean energy sources. The Washington Utilities and Transportation Commission will review and monitor utilities' financial plans through an established rate case process.

These acts of legislation will shape Tumwater's future and change the way the community receives energy and utility services.

C. City Franchise Agreements

Franchise agreements are a non-exclusive right to occupy the public right-of-way.

Several private service providers are available in the community that provide television, cable, internet, and telephone services. Some companies lease underground broadband infrastructure conduit from Tumwater.

DRAFT

3. Natural Gas

Natural gas is a fossil fuel used to create heat. In a home, natural gas creates heat through furnaces, boilers, and space heaters. The gas is burned, creating energy. Residential, commercial, industrial uses may use natural gas for space heating, water heating, and cooling.

Puget Sound Energy serves all municipalities within Thurston, King, Pierce, Lewis, Snohomish, and Kittitas Counties. Tumwater has seen a 29 percent increase in natural gas usage amongst all sectors since 2016, though gas usage went down from 2022-2023.

How natural gas is distributed is explained in Chapter 5.

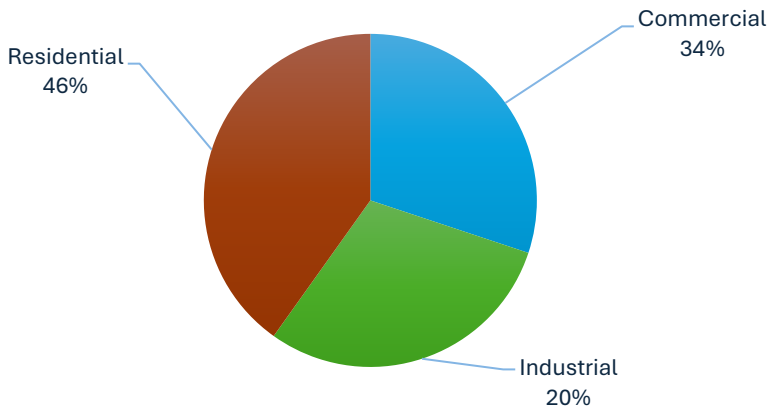
A. Systems Analysis

The Utilities and Transportation Commission requires Puget Sound Energy to maintain and serve natural gas based on demand. Extension of service is based on request and the results of a market analysis to determine if revenues from an extension will offset the cost of construction. Puget Sound Energy installs natural gas service to anyone who requests it. This keeps the existing ratepayers from financing improvements in other areas and limits service delivery of natural gas to new areas.

Natural gas is a private utility and Puget Sound Energy addresses gas infrastructure needs within the system in accordance with regulatory requirements and operating practices outlined in their Integrated Resource Plans. Over the next decade, Puget Sound Energy states they plan to modernize their natural gas system and focus on pipeline safety statewide.

According to the Puget Sound Energy rate department, the average house (using natural gas for both heat and hot water) consumes about 1,000 therms per year. Ten therms are equal to approximately one “mcf” (thousand cubic feet) of gas so 1,000 therms per house equals approximately 100,000 cubic feet of gas per household per year.

B. Supply



Natural Gas is supplied by pipelines. More information on how gas is supplied, and the general locations can be found in Chapter 5-Natural Gas and Fuel Pipelines.

C. Natural Gas Usage

Property owners in Tumwater used natural gas to create over 8.6 million therms of heat energy in 2023. Residential uses consumed more natural gas than commercial or industrial uses.

DRAFT

Figure U-1. Natural Gas Usage by Sector in Tumwater, 2023.

Source: Puget Sound Energy.
Notes: 2023 total natural gas usage was 8,616,398 Therms.

D. Demand

Puget Sound Energy does not have any major projects planned in Tumwater at this time, but new projects can be developed in the future at any time due to:

1. New or replacement of existing facilities to increased capacity requirements due to new building construction and conversion from alternate fuels.
2. Main replacement to facilitate improved maintenance of facilities.
3. Replacement or relocation of facilities due to municipal and state projects.

Statewide Puget Sound Energy plans to:

1. Build or upgrade seven gate or limit stations and 16 district regulator stations supplied by the Northwest Pipeline. These upgrades will increase capacity by handling more load.
2. Add about 24 miles of high-pressure main and 23 miles of intermediate-pressure main as demand grows in our service area.
3. Adress aging infrastructure and do ongoing maintenance.

These projects will help ensure reliable service and meet future demand for customers within Tumwater.

DRAFT

4. Electricity

The electricity that Puget Sound Energy delivers to customers is generated from hydroelectric dams, coal, natural gas, wind, and to a much smaller degree from nuclear, and other sources such as solar, biomass landfill gas, petroleum, and waste.

Residential customers are Puget Sound Energy's largest customer class, with approximately 88 percent share of electric customers in 2024. There is an expected growth rate of 1.1 percent per year over the next 20 years. Commercial customers are the second largest customer class and are expected to grow at an annual rate of 1.3 percent per year over the next 20 years. By 2045 there will be an estimated 1.57 million customers.

Puget Sound Energy builds, operates, and maintains an extensive electrical system consisting of generating plants, transmission lines, substations, and distribution systems.

The Bonneville Power Administration, a power-marketing agency of the U.S. Federal Government, owns and operates the principal high voltage bulk transmission lines serving the Puget Sound region that cross Tumwater. Puget Sound Energy relies on Bonneville Power Administration for bulk transmission services of power generated by federal hydro dams and Energy Northwest generators.

Puget Sound Energy is the largest utility producer of renewable energy in the state and has goals to reduce emissions from electric operations to be net zero by 2030 and beyond net zero carbon energy company by 2045.

A. Regulatory Context

The policies of the Western Electricity Coordinating Council and Northwest Power and Conservation Council coordinate Puget Sound Energy and the Bonneville Power Administration activities. The Federal Energy Regulatory Commission and the Washington Utilities and Transportation Commission provide regulation for the system. The role and structure of the Washington Utilities and Transportation Commission, which regulates all utilities, is described in Chapter 2. Organizations and regulations that are specific to electricity supply are described below.

1) Western Electricity Coordinating Council

Western Electricity Coordinating Council is responsible for coordinating electricity supply across the western United States. It covers all of the United States west of the Rockies and parts of Mexico and Canada. Its primary function is to coordinate wheeling of power between the regions and to provide safeguards in the national grid so that a power disturbance in one part of the country will not leave another region without power.

DRAFT

2) Northwest Power Pool

Northwest Power Pool is an integrated system of generating resources and transmission facilities owned by Northwest Utilities. The pool was formed in 1942 to coordinate sales and interchange of power within the region. Puget Sound Energy is a member of the Northwest Power Pool.

3) Northwest Power and Conservation Council

The Council was authorized by Congress in 1980 in the Northwest Power Act, giving the states of Idaho, Montana, Oregon, and Washington a greater voice in how we plan our energy future and protect our fish and wildlife resources.

The Council's primary responsibilities, along with developing a fish and wildlife program, is to create a 20-year, least-cost power plan for the Pacific Northwest and update it at least every five years. The plan includes an electricity demand forecast, electricity and natural gas price forecasts, an assessment of the cost of effective energy efficiency that can be acquired over the term of the plan, and a least-cost generating resources portfolio. The plan informs Bonneville's resource decision-making to meet its customers' electricity load requirements.

4) Western Interstate Energy Board

The Western Interstate Energy Board was created by the Western Interstate Nuclear Compact. It is an organization of governors and premiers of the eleven western states and three western Canadian provinces. The Board's purpose is to provide the instruments and framework for cooperative state efforts to enhance the economy of the West and contribute to the well-being of the region's people. Most of the Board's work is conducted through its three committees:

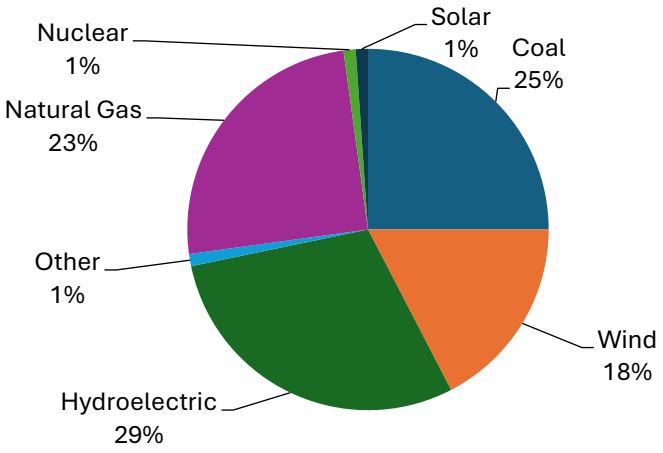
1. The High-Level Radioactive Waste Committee works with the U.S. Department of Energy to develop a safe and publicly acceptable system for transporting spent nuclear fuel and high-level radioactive waste under the Nuclear Waste Policy Act.
2. The Energy Minerals Reclamation Committee works to improve the administration of the Surface Mining Control and Reclamation Act in coal producing states.
3. The Committee on Regional Electric Power Cooperation works with the Western Conference of Public Service Commissioners to improve the efficiency of the western electric power system.

B. System Analysis

Puget Sound Energy is the electrical service provider for Tumwater. In Thurston County, Puget Sound Energy serves approximately 140,877 total electrical customers as of 2023. Puget Sound Energy is required to provide services to customers who apply and can be suitably furnished with available electricity.

DRAFT

C. Electricity Generation, Transmission, & Distribution



1) Generation

The first tier of Puget Sound Energy's electrical supply system is generation. Hydroelectric plants generate a sizable proportion of the electricity consumed in the Pacific Northwest. Much of the power comes from dams on the Columbia River to the east of the Cascades. Puget Sound Energy owns or has long term operating contracts on:

- 13 Hydroelectric plants.
- 3 Wind farms.
- 4 Solar resources.
- 2 Coal fired plants.
- 9 Natural gas-fired plants.
- 1 Battery Storage System.

Puget Sound Energy's two remaining coal fired sources will be shut down by 2025 to meet clean air standards, regulations, and goals in Washington and Montana. As shown in Figure U-2 shows the breakdown of the sources of electrical power generation in Tumwater.

Figure U-2. Sources of Electrical Power Generation in Tumwater, 2023.

Source: Puget Sound Energy.

2) Solar data

Tumwater is a SolSmart Silver designated community and is committed to going solar. Staff have created a streamlined permitting process so residents can quickly have solar panels installed on homes or at businesses. There are at least 270 solar energy systems installed citywide, six of which are commercial.

3) Transmission

The transmission system is the second tier in the electricity supply system. Puget Sound Energy's transmission system covers Thurston County and Tumwater. It is a grid, which provides a link between Bonneville Power Administration's Bulk Transmission System, the powerful transmission lines that feed energy from generating sources, to the smaller local feeder system, which

connects with customers throughout the service area.

Tumwater is included in a Puget Sound Energy service area, which also covers Thurston County. There is one power generation station in Centralia near the sub-area that feeds electricity into Puget Sound Energy's transmission system. Other sources of power outside this subarea flow through three transmission stations in Thurston County.

The distribution system is the third and final tier in the electricity supply system. Power is supplied from the transmission system into the Tumwater's local feeder system at five distribution sub-stations, three of which are located in the Tumwater and its urban growth area. The remaining two are located in Olympia and its urban growth area.

D. Demand

1) Local Level

Currently, Puget Sound Energy does not have any anticipated projects for the Tumwater. Unlike some other private utilities, providers of electricity such as Puget Sound Energy must provide electricity upon demand and in accordance with State and Utilities and Transportation Commission requirements. To meet service obligations, Puget Sound Energy extends or adds to its electric facilities when needed to keep up with demand. Puget Sound Energy owns, operates, and maintains all electric transmission and distribution substations, as well as the electrical transmission and distribution lines within Tumwater. Projects across Thurston County could help increase service capacity for new and existing Tumwater customers.

2) Regional Level

As the use of coal is phased out and more people are going electric; the region will need produce sources to meet the power demand. Over the next 20 years, the Northwest Power and Conservation Council forecasts the demand for electricity will be driven by many factors including economic growth, climate change, regional demographics, and expanding applications of electricity to reduce the use of fossil fuels. The council also predicts a quickly growing electric load in the transportation sector and for data centers. There will be a growth in renewable generation, the region will need to rethink how system capacity needs are measured and how and what resources can accomplish those needs.

3) State Level

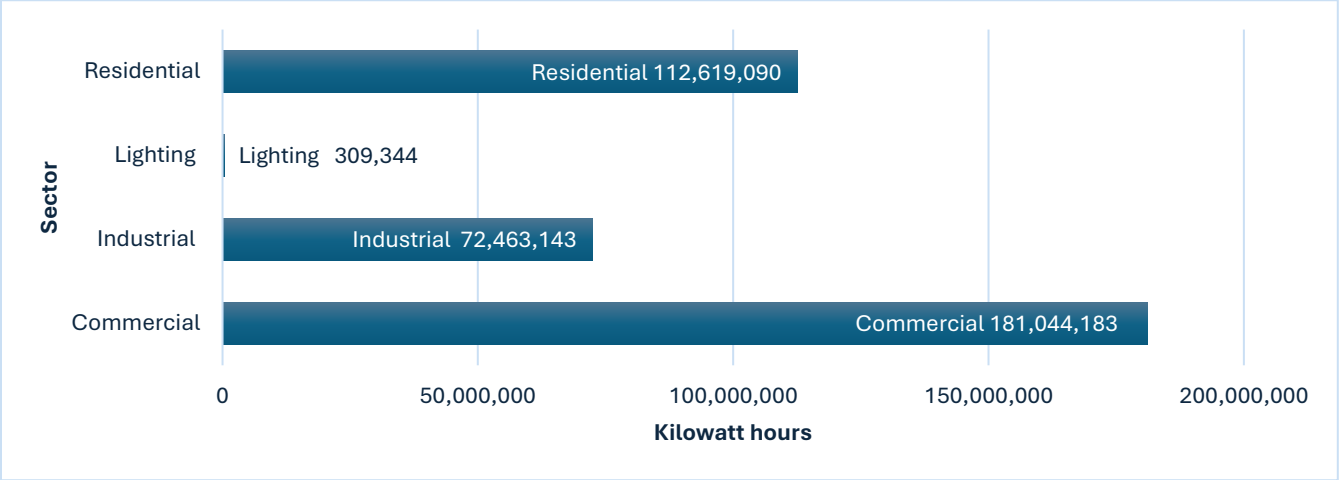
Programs to ensure a reliable and economic power system can be found in Puget Sound Energy's *2021 Integrated Resource Plan,* which forecasts conservation resources and supply-side resources to meet the growing needs of Puget Sound Energy customers over the next 20 years. Energy delivery system infrastructure planning is done on a ten-year basis, and those plans are updated continually as conditions, technologies, and customer behavior change. Although the IRP is not specific to Thurston County, Puget Sound Energy anticipates future

DRAFT

improvements will benefit their service network region wide.

a) Transmission

Puget Sound Energy anticipates building over 104 miles of new transmission lines (100 kV and above) and upgrading over 122 miles of existing transmission lines. In addition, Puget Sound Energy anticipates needing to add up to three 230 kV bulk power substations across their service area. These planned improvements do not include transmission needed to support the broader region or improvements needed as a result of providing interconnections for large generation resources.



b) Distribution

Puget Sound Energy anticipates the need to build approximately six to eight new distribution substations to serve load as the existing substation capacity is exceeded and another two to four new substations to serve specific point loads. They anticipate upgrading approximately three existing substations to replace aging infrastructure and adding additional capacity to serve local load growth. Puget Sound Energy will continue to work on improving the reliability of its worst performing circuits and installing smart ready equipment for increasing the resiliency of the grid.

c) Ongoing Maintenance

Puget Sound Energy anticipates the replacement of several major substation components because of ongoing inspection and diagnostics. Puget Sound Energy anticipates the replacement of its current aging and obsolete Automated Meter Reading communication system as well as its electric customer meters with Advanced Metering Infrastructure technology to enable smart grid enhancements and customer offerings in the future.

Figure U-3. Electricity Usage by Sector in Kilowatt-hours, Thurston County, 2023.[1]

Source: Puget Sound Energy.

[1] Puget Sound Energy, Energy Use Table, September 9, 2024

5. Natural Gas and Fuel Pipelines

Two major natural gas and fuel pipelines pass within the Tumwater and its urban growth area:

- Olympic Pipeline (2.8 miles long located within Tumwater)
- Williams Northwest Pipeline (2.5 miles long located within Tumwater)

A. Olympic Pipeline

The Olympic Pipeline spur was used to carry liquid fuels from Olympic Pipelines' main north-south pipeline east of Tumwater to a bulk storage tank facility at the corner of Linderson Way and Tumwater Boulevard. The lease for that bulk storage facility has lapsed and the facility has been removed. The spur pipeline and easement remain in place but is currently inactive. No plans are currently on file to relocate the bulk storage facility or reactivate this pipeline spur.

B. Williams Northwest Pipeline

The Williams Northwest Company pipeline conveys natural gas from Williams Northwest Company Pipeline main north-south pipeline east of Tumwater to the Satsop Business Park in Grays Harbor County. This pipeline consists of two parallel 16-inch diameter gas pipelines located within a right of way that pass through the southern portion of Tumwater and its urban growth area. This pipeline is active, and no further expansion of this pipeline is planned at this time.

C. Puget Sound Energy Natural Gas Pipelines

Puget Sound Energy maintains an extensive network of pipelines that distribute natural gas to customers throughout Tumwater.

The Williams Northwest Company supplies natural gas to Puget Sound Energy through four gate stations in the Olympia area.

1. Olympia Gate Station is located at Flying Carpet and Fir Tree. This gate station also serves the Cities of Olympia and Lacey.
2. Olympia Town Border Station is located at 42nd and Boulevard. This station also serves the Cities of Olympia and Lacey.
3. Littlerock Gate Station is located at 90th Lane SW and Littlerock Road.
4. Black Lake Gate Station is located at Delphi and 62nd Avenue SW.

Other additional gas facilities serving the City of Tumwater include the following:

- A six-inch gas main from Olympia Gate to the Capitol, serving about 5,000 residential customers.
- A four-inch West Olympia Main from Black Lake to Evergreen College serving about 1,600 residential customers.

DRAFT

- A four-inch main from Littlerock to Tumwater serving about 1,600 residential customers.

DRAFT

6. Telecommunication

The telecommunications industry continues to undergo large advances in technology. Cellular and optical fiber technology have changed the way telecommunications services are delivered. The telecommunications industry is expected to undergo significant changes in the coming years, driven by advancements in artificial intelligence, 5G, 6G, and other technologies while focusing on sustainability and ensuring infrastructure can support advancements and more customers.

A. Broadband

Broadband is a high speed internet connection that can be delivered through a variety of technologies, including cable, fiber-optic cable, digital subscriber line, and mobile wireless. A lack of broadband connectivity can increasingly have a negative impact on social and economic development by excluding those who lack broadband access. It is becoming an increasingly important utility since more educational, occupational, health care, public safety, communication, and entertainment opportunities are dependent on this service.

In Tumwater, nine service providers offer broadband connections over a variety of methods to both residences and businesses. CenturyLink and Xfinity are the leading providers in Tumwater. According to BroadbandNow, an organization that assesses broadband access, currently 51.9 percent of Tumwater has access to CenturyLink's digital subscriber lines, 98.2 percent has access to Xfinity services.

B. Digital Subscriber Line

Digital subscriber lines use existing telephone lines to connect to the internet, similar to dial-up, but still allows for simultaneous phone and internet usage.

C. Cable

Cable uses existing television cables to connect to the internet without interfering with the television signals.

D. Wireless

Wireless internet connections are broadcast over the airways via a ground station provider to antennas. This method requires a clear line of sight between the antenna and the ground station making it susceptible to weather conditions. Wireless is a method of communication that uses radio waves, light, or other methods to transmit data without wires. Wireless technology has become a key part of modern computing, allowing for more flexible and convenient interactions with devices.

E. Satellite

Satellite internet is a form of wireless internet that uses satellites to connect to the internet. In the future, satellite communication is expected to play a crucial role in providing widespread, high-speed internet access, especially in remote areas, by utilizing large constellations of small satellites in low Earth orbit, bridging the digital divide and offering reliable connectivity even in disaster situations; with advancements in technology allowing for faster speeds, lower latency, and more efficient use of spectrum.

Satellites receive and send signals to ground station satellites, whether it is a dish that connects to a modem or router, or a larger ground station that connects to fiber optic cables and internet.

F. Mobile

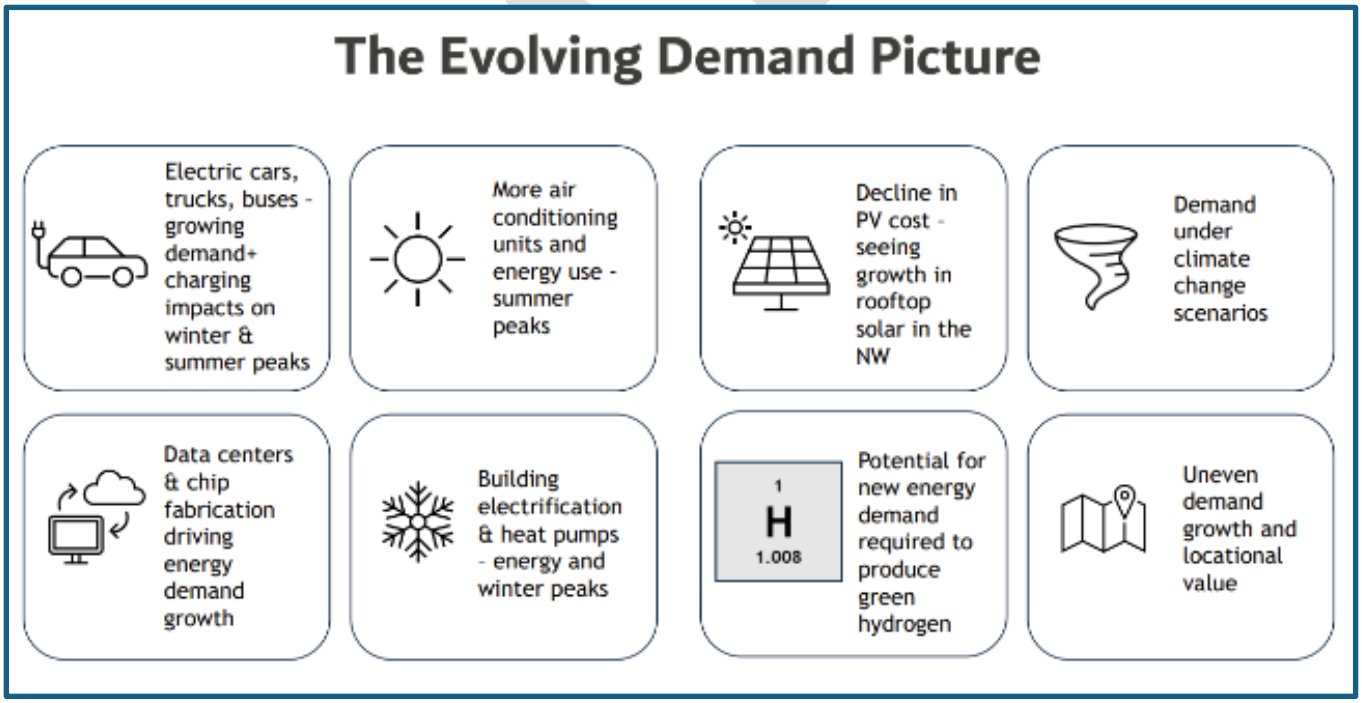
Most phones, tablets, and smart devices access the internet using the cellular phone network. Cellular networks use radio waves to enable wireless communication between devices through a network of cell towers.

G. Fiber Optic

Fiber optic technology uses thin glass fibers to convert electrical data signals into light for faster and more reliable connections. Fiber optic cables are less likely to experience outages and are more resistant to severe weather conditions compared to other types of cables. Tumwater has some fiber conduits and is currently planning how to best use these assets.

Many providers of digital subscriber line, cable, or satellite phone and television services use the same infrastructure to provide internet services.

DRAFT



7. Meeting Future Demand

In the six-county service area of Puget Sound Energy, an inflow of more than 898,000 new residents between 2024 and 2040 is expected to increase Puget Sound Energy's electric service territory population to almost 5.33 million by 2045.

As shown in Figure U-4, the demand for electricity is expected to increase with the addition of new customers, solar and renewable energy, electric vehicles, advancements in broadband services and technology, artificial intelligence and data storage, and climate change laws.

As we transition away from generating energy from nonrenewable sources and moving towards a more electric grid, we need to plan for the creation and storage of more power. This could mean more solar energy, wind farms, nuclear energy, and sitting battery energy storage systems. The changes in how we generate energy will affect the ability to meet demand for electricity during different seasons and times of day.

Figure U-4. Long Term Load Forecasting, 2024.

Source: Northwest Power and Conservation Council.

Additionally, housing and employment is expected to grow at an average annual rate of 0.46 percent between 2024 and 2045. Manufacturing employment is expected to decline annually by 0.32 percent on average between 2024 and 2050, and local employers are expected to create about 205,681 jobs between 2024 and 2045, driven by growth in the commercial sector.

Growth in Tumwater follows closely with growth trends in other parts of the Puget Sound Energy service area. There were 27,030 jobs in Tumwater and its urban growth area in 2017. As shown in Table U-1, over the 20-year period of the Comprehensive Plan, Tumwater is projected to add an additional 10,730 jobs for a 54 percent gain in total employment primarily in the areas of government, professional services, and retail. The biggest changes in employment occur in manufacturing, construction, and retail trade.

These projections form the basis of the utility forecast for Tumwater, helping ensure adequate services are in place and identify potential changes or adjustments needed.

Table U-1. Tumwater and Urban Growth Area 20-Year Population Projection.

	2020 Population[2]	2045 Population	Population Increase
Tumwater	25,573	37,380	11,807
Urban Growth Area	3,134	8,690	5,556
Combined Areas	**28,707**	**46,070**	**17,360**

8. Potential Impacts Of Climate Change

There are at least two ways in which climate change can affect utility demand and availability. First, long-term changes in temperature will alter electricity demand and change precipitation patterns, river flows, and hydroelectric generation. Second, policies enacted to reduce greenhouse gases will affect future resource choices. Greenhouse gases come from burning fossil fuels for heat and energy, which in turn causes global warming.

Tumwater is experiencing warmer summers, wetter and warmer fall and winters, and increased wildfire risks, impacting power and energy reliability. Lower summer streamflow can reduce summer hydropower resources and energy production. Increased wildfires could interrupt or damage power generation facilities and energy transmission and distribution infrastructure.

The summer of 2024 in the Pacific Northwest set a record for peak seasonal power demand in July, higher than the record set in the 2021 heat dome event in June. In a cold snap that hit in January 2024, the Northwest set the record for winter peak demand at 35,500 MW. These record-breaking events impact the grid and costs to the consumer.

No single sector or fuel type can provide the needed emission reductions to slow temperature increases. Limiting overall global warming requires largely phasing out coal use by 2025, reducing CO2 emissions from industry by 75–90 percent by 2050 (relative to 2010), supplying most electricity from renewables and significantly enhancing energy efficiency.

It will be critical for the private sector, public sector, and the individual to do their part to help reduce greenhouse gas emissions and use renewable energy. More information on climate change and what Tumwater is doing to address it can be found in the Climate Element, the 2023 Natural Hazard Mitigation Plan, the Thurston Climate Mitigation Plan, and the Thurston Climate Adaption Plan.

FROM: Erika Smith-Erickson, Housing and Land Use Planner, Brad Medrud, Community Development Director, and Sharon Lumbantobing, Deputy Community Development Director

DATE: December 16, 2025

SUBJECT: Ordinance No. O2025-011, 2025 Development Code Periodic Update

---

1) Recommended Action:

Adopt Ordinance No. O2025-011, 2025 Development Code Periodic Update.

This ordinance was recommended for adoption by the Planning Commission after a public hearing on December 9, 2025.

---

2) Background:

On a ten-year cycle, the City must conduct a Growth Management Act periodic update of its Comprehensive Plan and related development regulations. For the current cycle, the City is required to complete work on the periodic update by December 31, 2025.

Ordinance No. O2025-011, 2025 Development Code Periodic Update, amends the Tumwater Municipal Code, the Zoning Map for Tumwater and its Urban Growth Area, and the Tumwater Citywide Design Guidelines to ensure consistency with the 2025 Comprehensive Plan update. Under House Bill 5558, Tumwater must adopt development regulations that implement new state-mandated housing changes by December 31, 2025. A separate ordinance will be presented to the City Council before June 30, 2026, containing additional, broader code updates supporting the 2025 Comprehensive Plan update.

The Planning Commission held a briefing on the ordinance on October 28, 2025, a work session on November 10, 2025, and a public hearing on December 9, 2025. Following the public hearing and deliberations on December 9, 2025, the Planning Commission recommended approval of the Comprehensive Plan periodic update ordinance to the City Council.

The City Council and the Planning Commission discussed the Planning Commission's recommendation at a joint work session on December 9, 2025, and the City Council placed the ordinance on the City Council's December 16, 2025, consideration calendar.

---

3) Policy Support:

Policy H-2.1 Provide sufficient, suitably zoned land for development of all housing types to accommodate the future needs for each type of housing, including single-family detached dwellings, accessory dwelling units, townhouses, duplexes, triplexes, fourplexes, multi-family dwellings, cottage housing, senior housing, roominghouses, group housing, and manufactured homes in manufactured home parks and on single lots.

---

4) Alternatives:

2025 Development Code Periodic Update – Ordinance No. O2025-011

On a ten-year cycle, Tumwater is required to conduct a periodic update of its Comprehensive Plan and related development regulations. For the current cycle, the City is required to complete work on the periodic update by December 31, 2025. Work on this update began in October 2022 and continued through this year.

The updated development codes, City Zoning Map, and City Wide Design Guidelines address State required amendments related to middle housing, parking for housing, and religious sponsored housing.

The City Council will be asked to adopt Ordinance No. O2025-011, 2025 Development Code Periodic Update, based on the Planning Commission's recommendation after a public hearing on December 9, 2025.

Contents

1 – Summary 1
2 – Amendment Criteria 2
3 – Public Approval Process 2
4 – Public Notification 3
5 – Conclusions 3
6 – Planning Commission Recommendation 3
7 – Effect of the Development Periodic Update 3

1 – Summary

Ordinance No. O2025-011 contains state required housing related amendments to the Tumwater Municipal Code, the Zoning Map for Tumwater and its Urban Growth Area, and the Tumwater

Citywide Design Guidelines that need to be completed by December 31, 2025, to meet state requirements as part of the 2025 Comprehensive Plan and Development Code periodic update. City staff have been working with the community, Planning Commission, and City Council on the Development Code periodic update since the fall of 2022.

The Development Code serves as the regulatory basis for accommodating growth within the City and was prepared was prepared in accordance with the Growth Management Act (Chapter 36.70A RCW).

2 – Text Amendment Review Process

The periodic update to the Development Code is subject to the Plan amendment review process below from TMC 18.60.020:

> *A. Proposed text amendments, or comprehensive plan amendments and associated requests for rezone shall first be heard by the planning commission and the recommendation of the planning commission shall be forwarded to the city council. The city shall hold a public hearing on any such proposed amendments.*
>
> *[…]*

3 – Public Approval Process

An Environmental Checklist for a non-project action was prepared on October 10, 2025, under the State Environmental Policy Act (Chapter 43.21C RCW), pursuant to Chapter 197-11 WAC, and a Determination of Non-Significance was issued in October 17, 2025. The comment period on the determination ended October 31, 2025, and the appeal period ended November 6, 2025.

The ordinance was sent to the State Department of Commerce on October 13, 2025, for their required 60-day Notice of Intent review before the proposed periodic update is adopted, in accordance with RCW 36.70A.106. State Department of Commerce provided their draft comments on the ordinance on November 14, 2025, and staff provided their responses on November 20, 2025, which are included as amendments in the ordinance. The 60-day Notice of Intent review period ended December 12, 2025.

The Planning Commission was briefed on the ordinance October 28, 2025, held a work session on November 10, 2025, and held a public hearing and deliberation on December 9, 2025. After the hearing, the Planning Commission made a recommendation for the City Council to adopt Ordinance No. O2025-011, 2025 Development Code Periodic Update.

At a Joint City Council and Planning Commission work session on December 9, 2025, Commissioners and Councilmembers reviewed the Planning Commission's recommendation on both the 2025 Comprehensive Plan and Development Code update ordinances. The City Council is scheduled to consider Ordinance No. O2025-011 at their December 16, 2025, meeting.

4 – Public Notification

A Notice of Public Hearing for the Planning Commission was posted on November 30, 2025. The notice was published as a press release, distributed to interested individuals and entities that have requested such notices, and published in The Olympian.

5 – Conclusions

1. The Development Code periodic update meets the review and approval criteria found in TMC 18.60.020(A).
2. The Development Code periodic update is consistent with the goals of the Washington State Growth Management Act and the updated Comprehensive Plan.

6 – Planning Commission Recommendation

The Planning Commission recommends approval of the Development Code periodic update by Ordinance No. O2025-0011 to reflect current information and requirements.

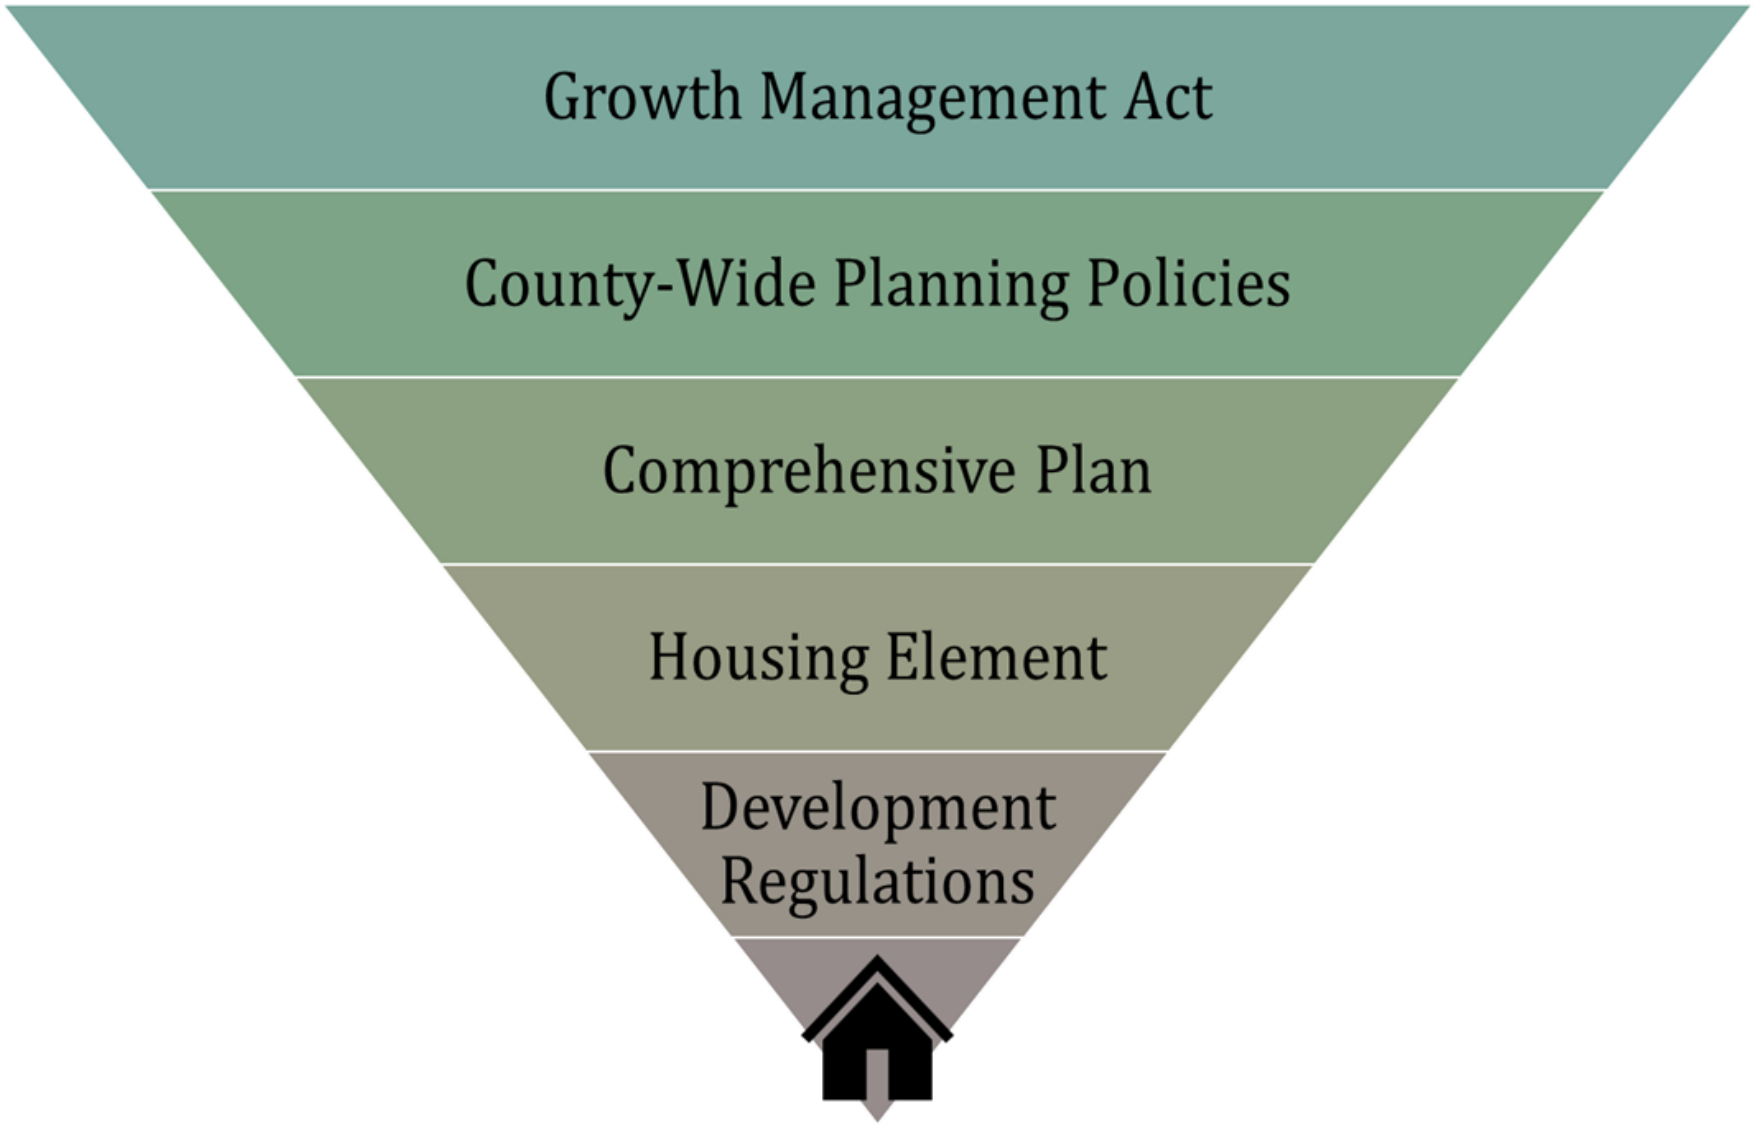
7 – Effect of the Development Periodic Update

The proposal amends the Tumwater Municipal Code, the Zoning Map for Tumwater and its Urban Growth Area, and the Tumwater Citywide Design Guidelines as shown in Ordinance No. O2025-011.

Attachment B

Ordinance No. O2025-011
2025 Development Code Update

Balancing Nature and Community:
Tumwater's Path to Sustainable Growth



City Council, December 16, 2025

Intent

Adopt Ordinance No. O2025-011, 2025 Development Code Periodic Update as recommended by the Planning Commission

Relationship to the Housing Element

What are Development Regulations?

Development Regulations

Development regulations identify what, where, and how a proposal can happen in Tumwater

This includes what permits required, how to create lots, what housing types are allowed, what are the bulk and dimensional requirements

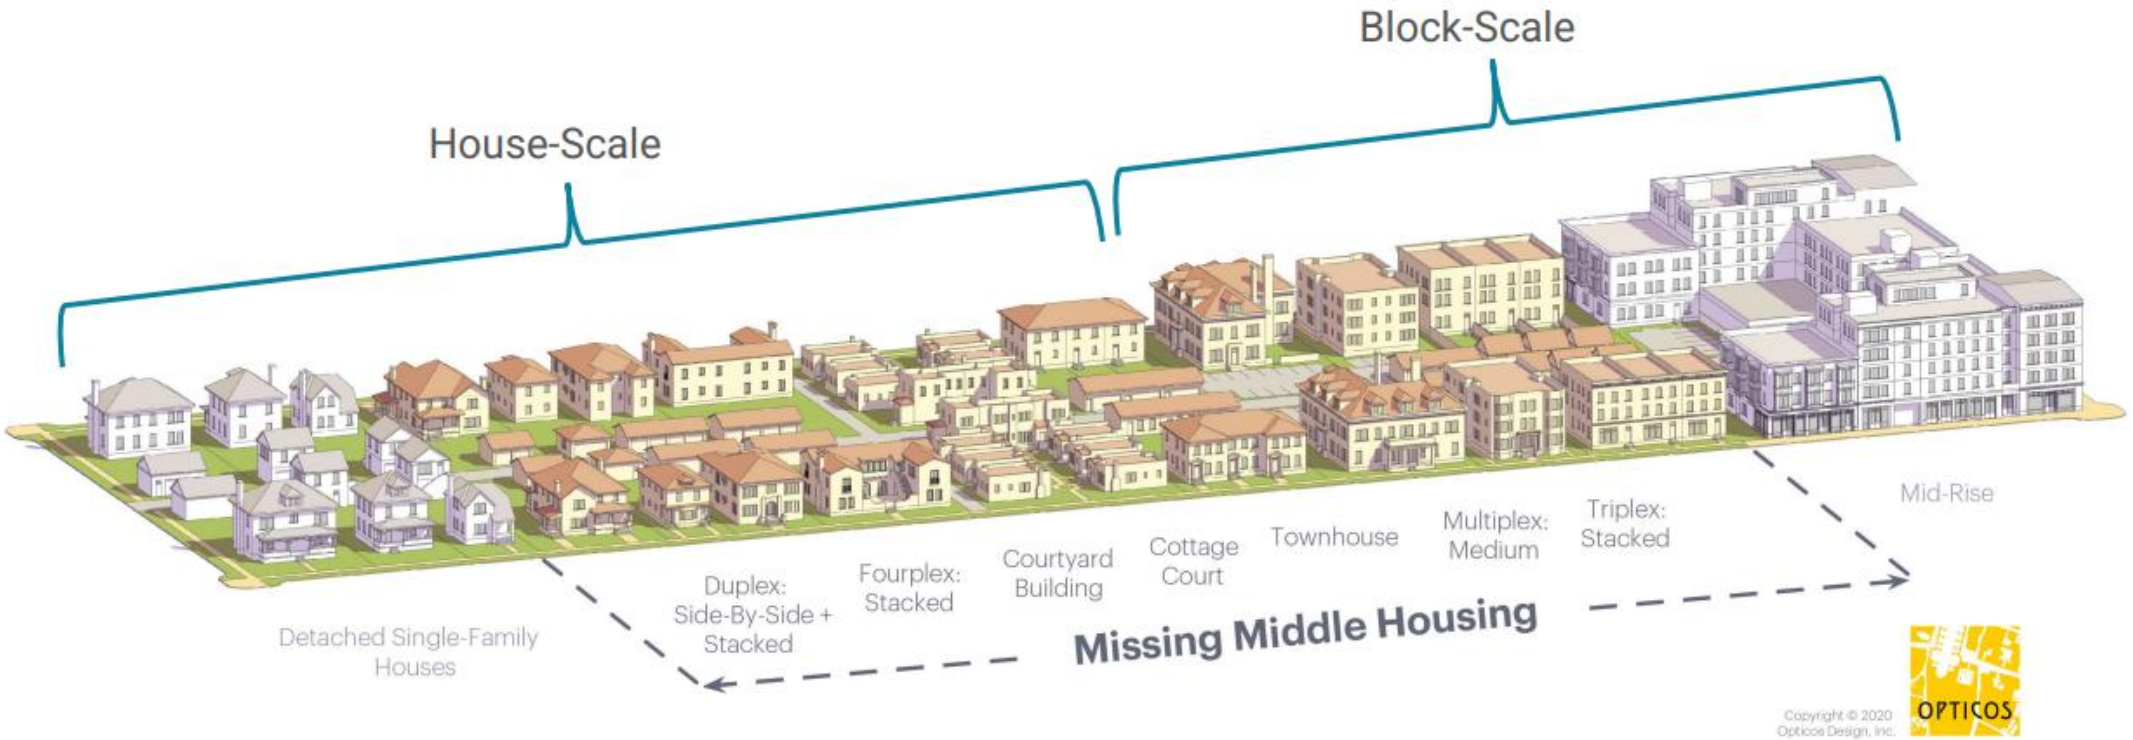
The Citywide Design Guidelines ensure attractive, functional development

Zoning Map

Based on the Citywide Future Land Use Map, the Tumwater's Zoning Map establishes the location and boundaries of the zone districts that allow specific uses and intensities

What zone district a proposed project is in determines the kind of development regulations that apply

Specific Housing Related Amendments



1. Middle housing
2. Accessory dwelling units
3. Co-housing
4. Parking for housing
5. Religious organization housing
6. Design review for housing

Conclusions

The Ordinance No. O2025-011 meets the relevant review and approval criteria found in TMC 18.60.025(B)

Planning Commission Recommendation

After a public hearing on December 9, 2025, the Planning Commission recommended that the City Council approve the Development Code periodic update by Ordinance No. O2025-011

Requested Action

Adopt Ordinance No. O2025-011, Development Code Periodic Update

ORDINANCE NO. O2025-011

AN ORDINANCE of the City Council of the City of Tumwater, Washington, relating to planning under the Growth Management Act, Chapter 36.70A RCW, of the State of Washington, amending Titles 3, 5, 11, 14, 15, 17, and 18, and the Tumwater City-Wide Zoning Map as more particularly described herein; declaring an emergency and establishing an effective date.

WHEREAS, during 2023, 2024, and 2025, staff gathered information on proposed amendments to the Tumwater Municipal Code to meet state requirements as part of the 2025 Comprehensive Plan and Development Code update process to be considered collectively; and

WHEREAS, the City is required to plan under the Growth Management Act, Chapter 36.70A RCW; and

WHEREAS, this ordinance meets the goals and requirements of the Growth Management Act, Chapter 36.70A RCW; and

WHEREAS, the proposed text and map amendments are consistent with the City's Comprehensive Plan; and

WHEREAS, the City engaged the community through public briefings, work sessions, and meetings with the Planning Commission, the Public Works Committee, the General Government Committee, and the City Council.

WHEREAS, the City has adopted the Comprehensive Plan periodic update in accordance with the Growth Management Act, Chapter 36.70A RCW; and

WHEREAS, due to the State deadline to adopt the required 2025 Development Code update; the City Council finds a public emergency exists; and

WHEREAS, the Attorney General *Advisory Memorandum and Recommended Process for Evaluating Proposed Regulatory or Administrative Actions to Avoid Unconstitutional Takings of Private Property* (October 2024) was reviewed and utilized by the City in objectively evaluating the proposed amendments; and

WHEREAS, the ordinance was sent to the Washington State Department of Commerce on October 13, 2025, at least sixty days before the proposed code amendments were adopted, in accordance with RCW 36.70A.106; and

WHEREAS, an Environmental Checklist for a non-project action was prepared under the State Environmental Policy Act, Chapter 43.21C RCW,

pursuant to Chapter 197-11 WAC on October 10, 2025, and a Determination of Non-Significance (DNS) was issued on October 17, 2025; and

WHEREAS, the Planning Commission, General Government Committee, and City Council were briefed on various components of the proposed text and map amendments over the course of 2023, 2024, and 2025; and

WHEREAS, the Planning Commission had a briefing on the ordinance on October 28, 2025, and held a work session on the ordinance on November 10, 2025; and

WHEREAS, the Planning Commission held a public hearing on the ordinance on December 9, 2025; and

WHEREAS, following the public hearing and deliberations, the Planning Commission recommended approval of the ordinance by the City Council; and

WHEREAS, the City Council and the Planning Commission had a joint work session to discuss the Planning Commission's recommendation on the ordinance on December 9, 2025; and

WHEREAS, the City Council considered the ordinance on December 16, 2025; and

WHEREAS, the City Council finds that the provisions of this ordinance are in the best interest of and protect the health, safety, and welfare of the residents of the City.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF TUMWATER, STATE OF WASHINGTON, DOES ORDAIN AS FOLLOWS:

Section 1. Section TMC 3.50.020, Definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

3.50.020 Definitions.

The following words and terms shall have the following meanings for the purposes of this title, unless the context clearly requires otherwise. Terms otherwise not defined herein shall be defined pursuant to RCW 82.02.090, or given their usual and customary meaning.

A. "Act" means the Growth Management Act, Chapter 17, Laws of 1990, First Extraordinary Session, Chapter 36.70A RCW et seq., and Chapter 32, Laws of 1991, First Special Session, RCW 82.02.050 et seq., as now in existence or as hereafter amended.

B. "Building permit" means the permit required for new construction and additions pursuant to TMC Chapter 15.04. The term "building permit," as used herein, shall not be deemed to include:

Permits required for the remodeling, rehabilitation, or other improvements to an existing structure or for rebuilding a damaged or destroyed structure, provided there is no increase in the applicable unit of measure (i.e., for nonresidential construction) or number of dwelling units (for residential construction) resulting therefrom.

C. "Capital facilities" means the facilities or improvements included in the currently adopted city of Tumwater capital facilities plan.

D. "Capital facilities plan" means the city of Tumwater capital facilities plan element of the comprehensive plan adopted pursuant to Chapter 36.70A RCW, and such plan as amended.

E. "City" means the city of Tumwater.

F. "City of Tumwater transportation plan" means the transportation plan element of the comprehensive plan adopted pursuant to Chapter 35.63 RCW, or any amendment thereto, and such plan as amended.

G. "Cottage housing" means residential units on a lot with a common open space that either: (A) is owned in common; or (B) has units owned as condominium units with property owned in common and a minimum of twenty percent of the property as open space.

~~G~~H. "Council" means the city council of Tumwater.

~~H~~I. "Department" means the department of community development.

~~I~~J. "Development activity" means any construction or expansion of a building, structure, or use, any change in use of a building or structure, or any change in the use of land that creates additional demand and need for public facilities.

~~J~~K. "Development approval" means any written authorization from the city which authorizes the commencement of a development activity.

~~K~~L. "Direct access improvements" means frontage improvements and other roadway construction required by city of Tumwater ordinance or other access improvements necessary for approval of a development activity.

~~L~~M. "Director" means the director of community development or the director's designee.

N. "Duplex" means a building designed for and used exclusively for occupancy by two families independent of each other where both dwelling units are located on the same lot and are completely separated from each other by an unpierced wall extending from ground to roof or an unpierced ceiling and floor extending from exterior wall to exterior wall, except for common stairwell or garage exterior to both dwelling units.

~~M~~O. "Encumber" means to reserve, set aside or otherwise earmark the impact fees in order to pay for commitments, contractual obligations or other liabilities incurred for public facilities.

~~N~~P. "Fire impact fee rate study" means the rate study for impact fees for fire protection facilities dated January 8, 2003, which is incorporated herein by reference, a copy of which is on file with the city clerk.

~~O~~Q. "Hearing examiner" means the land use hearing examiner who acts on behalf of the council in considering and applying land use regulatory codes as provided under TMC Chapter 2.58.

~~P~~R. "Impact fee" means the fee levied pursuant to this chapter as a condition of issuance of a building permit or development approval. "Impact fee" does not include a reasonable permit or application fee and does not preclude a SEPA mitigation fee.

~~Q~~S. "Impact fee account" or "account" means the account established for each type of public facility for which impact fees are collected. Such account shall be established pursuant to TMC 3.50.080 and shall comply with the requirements of RCW 82.02.060.

~~R~~T. "Impact fee schedule" means the fee schedules set forth in TMC 3.50.125, 3.50.130 and 3.50.135, as reflected in the currently adopted and amended fee resolution.

~~S~~U. "Independent fee calculation" means the traffic engineering calculation, the fire protection facilities calculation, and/or economic documentation prepared by a feepayer to support the assessment of an impact fee other than by the use of the impact fee schedules.

~~T~~V. "Interest" means the interest rate earned by the city on an impact fee account.

W. "Middle housing" means buildings that are compatible in scale, form, and character with single-family detached dwellings that contain two to four attached or stacked dwelling units including duplexes, triplexes, quadplexes, and stacked flats, as well as townhouses or cottage housing with three or more dwelling units.

X. "Olympia School District study" means the Olympia School District rate study for interim impact fees for school facilities for adoption by the city of Olympia, the city of Tumwater and Thurston County, Washington, and such study as amended, which is incorporated herein by reference, a copy of which is on file with the city clerk. For the purpose of this chapter, the Olympia School District study applies only to those properties within the city of Tumwater that lie within Olympia School District No. 111.

~~U~~Y. "Owner" means the owner of record of real property, or a person with an unrestricted written option to purchase property; provided, that if the real property is being purchased under a recorded real estate contract, the purchaser shall be considered the owner of the real property.

~~V~~Z. "Project improvements" means site improvements and facilities that are planned and designed to provide service for a particular development or users of the project, and are not system improvements. No improvement or facility included in a capital facilities plan approved by the council shall be considered a project improvement.

~~W~~AA. "Public facilities" means public streets and roads, Tumwater School District No. 33 infrastructure, and Olympia School District No. 111 infrastructure.

BB. "Quadplex" means a building designed for and used exclusively for occupancy by four families independent of each other where all four dwelling units are located on the same lot and are completely separated from each other, except for common stairwells or garages.

~~X~~CC. "Road" means a right-of-way that affords the principal means of access to abutting property, and its accompanying signalization improvements, including an avenue, place, way, drive, lane, boulevard, highway, street, and other thoroughfare, except an alley.

~~Y. "Transportation impact fee program" means the city of Tumwater transportation impact fee program, as adopted by the city council and as hereafter amended, a copy of which is on file with the city clerk.~~

~~Z. "Olympia School District study" means the Olympia School District rate study for interim impact fees for school facilities for adoption by the city of Olympia, the city of Tumwater and Thurston County, Washington, and such study as amended, which is incorporated herein by reference, a copy of which is on file with the city clerk. For the purpose of this chapter, the Olympia School District study applies only to those properties within the city of Tumwater that lie within Olympia School District No. 111.~~

DD. "Single-family detached dwelling" means a building that is not attached in any way to another dwelling unit or structure that provides complete, independent living facilities for a family.

~~AA~~EE. "Square footage" means the square footage of the gross floor area of the development.

FF. "Stacked flat" means dwelling units in a residential building of no more than three stories in which each floor may be separately rented or owned as one dwelling unit.

~~BB~~GG. "State" means the state of Washington.

~~CC~~HH. "System improvements" means public facilities that are included in the capital facilities plan and are designed to provide service within the community at large, in contrast to project improvements.

~~DD~~II. "TMC" means the Tumwater Municipal Code.

JJ. "Townhouse" means one of a line or row of three or more dwelling units attached one to the other, having common walls between individual units, generally two stories in height (and sometimes three). Each unit occupies the space between common walls from the lowest level to the roof, where common walls are the property lines between units and that have a yard or public or private street, alleys, pathways, or similar feature which the public has a right of use on not less than two sides.

KK. "Transportation impact fee program" means the city of Tumwater transportation impact fee program, as adopted by the city council and as hereafter amended, a copy of which is on file with the city clerk.

LL. "Triplex" means a building designed for and used exclusively for occupancy by three families independent of each other where all three dwelling units are located on the same lot and are completely separated from each other, except for common stairwells or garages.

~~EE~~MM. "Tumwater School District study" means the 2004 Tumwater School District No. 33 Capital Facilities Plan 2004-2010, and such future plan, as amended, for adoption by the city of Tumwater, and Thurston County, Washington, which is incorporated herein by reference, a copy of which is on file with the city clerk. For the purpose of this chapter, the Tumwater School District study applies only to those properties within the city of Tumwater that lie within Tumwater School District No. 33.

(Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-008, Amended, 05/04/2010; Ord. O2007-024, Amended, 03/18/2008; Ord. O2004-026, Amended, 01/04/2005; Ord. O2002-029, Amended, 04/01/2003; Ord. O99-024, Amended, 12/21/1999; Ord. O96-027, Amended, 10/15/1996; Ord. O94-038, Amended, 12/06/1994; Ord. 1333, Added, 10/20/1992)

Section 2. Section TMC 5.75.010, Definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

5.75.010 Definitions.

Unless the context clearly requires otherwise, the definitions in this section apply throughout this chapter:

"Assisted housing development" means a multifamily rental housing development that either receives government assistance and is defined as federally assisted housing in RCW 59.28.020, or receives other federal, state, or local government assistance and is subject to use restrictions.

"Change of use" means (1) the conversion of any dwelling unit from a residential use to a nonresidential use; (2) conversion from one type of residential use to another type of residential use, such as a conversion to an adult family home, residential care facility, group foster home, senior housing facility, emergency housing or shelter, or transitional housing as defined in TMC Chapter 18.04; or (3) the removal of use restrictions, including those in an assisted housing development; provided,

that an owner displacing a tenant so that the owner or immediate family member can occupy the rental dwelling unit shall not constitute a change of use. Any "change of use" as provided herein requires displacement of a tenant.

"Days" means calendar days unless otherwise provided.

"Demolition" means the destruction of any dwelling unit. Any "demolition" as provided herein requires displacement of a tenant.

"Deposit" means a refundable payment or deposit of money, however designated, the primary function of which is to secure performance of a rental agreement or any part of a rental agreement. A deposit does not include a fee.

"Director" means the director of the community development department, or the director's designee, as it exists or is hereinafter amended.

"Displacement" or "displaced" means the demolition, substantial rehabilitation, or change of use requiring existing tenants to vacate the dwelling unit, but shall not include the relocation of a tenant from one dwelling unit to another dwelling unit with the tenant's consent.

"Dwelling unit" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means a structure or part of a structure used as a home, residence, or sleeping place by one, two, or more persons maintaining a common household, including, but not limited to, single-family detached, ~~residences and multiplexes~~, middle housing, and ~~apartment buildings~~multifamily dwellings, and manufactured or mobile homes.

"Housing costs" means the compensation or fees paid or charged, usually periodically, for the use of any property, land, buildings, or equipment for residential purposes. For purposes of this chapter, housing costs include the basic rent charge, but do not include utility charges based on usage and the tenant has agreed in the rental agreement to pay, unless the obligation to pay those charges is itself a change in the terms of the rental agreement.

"Immediate family member" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and includes state registered domestic partner, spouse, parents, grandparents, children, including foster children, siblings, and in-laws.

"Landlord" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means the owner, lessor, or sublessor of the dwelling unit or the property of which it is a part, and in addition means any person designated as representative of the owner, lessor, or sublessor including, but not limited to, an agent, a resident manager, or a designated property manager.

"Owner" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means one or more persons, or entities, jointly or severally, in whom is vested:

1. All or any part of the real title to property; or

2. All or part of the beneficial ownership, and a right to present use and enjoyment of the property.

"Property" or "rental property" means all dwelling units on a contiguous quantity of land managed by the same landlord as a single, rental complex.

"Rent" or "rental amount" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means recurring and periodic charges identified in the rental agreement for the use and occupancy of the premises, which may include charges for utilities. Except as provided in RCW 59.18.283(3), these terms do not include nonrecurring charges for costs incurred due to late payment, damages, deposits, legal costs, or other fees, including attorneys' fees.

"Rental agreement" or "lease" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means all agreements that establish or modify the terms, conditions, rules, regulations, or any other provisions concerning the use and occupancy of a dwelling unit.

"Substantial rehabilitation" is defined under RCW 59.18.200, as it exists or is hereinafter amended, and means extensive structural repair or extensive remodeling and requires a building, electrical, plumbing, or mechanical permit for the tenant's dwelling unit at issue. Any "substantial rehabilitation" as provided herein requires displacement of a tenant.

"Tenant" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means any person who is permitted to occupy a dwelling unit primarily for living or dwelling purposes under a rental agreement and includes those persons who are considered to be tenants under the state RLTA, Chapter 59.18 RCW and those tenants whose living arrangements are exempted from the state RLTA under RCW 59.18.040(3). For purposes of this chapter, "tenant" shall not include the owner of a dwelling unit or members of the owner's immediate family.

(Ord. O2022-012, Added, 12/06/2022)

Section 3. Section TMC 5.80.010, Definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

5.80.010 Definitions.

For the purpose of this chapter, the following words or phrases have the meanings prescribed below:

"Accessory dwelling unit" means a dwelling unit that is an accessory use or structure subordinate to a ~~single-family detached dwelling~~principal residential structure subject to the general land use regulations found in TMC 18.42.010.

"Building" means any structure having a roof, but excluding all forms of vehicles, even though immobilized. (See "structure," TMC 18.04.180.)

"Building code" means the code promulgated by the International Conference of Building Officials, as adopted by the city council of the city.

"Business license" means a business license as required by Chapter 5.04 TMC.

"Director" means the director of the community development department, or the director's designee, as it exists or it is hereinafter amended.

"Dwelling, single-family detached" means a building that is not attached in any way to another dwelling unit or structure providing complete, independent living facilities for a family.

"Emergency housing" means temporary indoor accommodations for individuals or families who are homeless or at imminent risk of becoming homeless that are intended to address the basic health, food, clothing, and personal hygiene needs of individuals or families. Emergency housing may provide individual rooms for sleeping and may have communal bathrooms and kitchen and dining areas. Emergency housing may or may not require occupants to enter into a lease or an occupancy agreement.

"Emergency shelter" means a facility that provides a temporary indoor shelter for individuals or families who are currently homeless. Emergency shelter may provide a mixture of individual rooms and common areas for sleeping and may have communal bathrooms and kitchen and dining areas. Emergency shelter may not require occupants to enter into a lease or an occupancy agreement. Emergency shelter facilities may include day cooling and warming centers that do not provide overnight accommodations.

"Landlord" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means the property owner, lessor, or sublessor of the dwelling unit or the property of which it is a part, and in addition means any person designated as representative of the property owner, lessor, or sublessor including, but not limited to, an agent, a resident manager, or a designated property manager.

"Manufactured home" means a single-family dwelling or duplex built according to the Department of Housing and Urban Development Manufactured Home Construction and Safety Standards Act, which is a national, preemptive building code. A manufactured home does not meet the criteria to be classified as a "designated manufactured home." See also "designated manufactured home" and "new manufactured home," TMC 18.04.040 and 18.04.140.

"Manufactured home, designated" means a manufactured home constructed after June 15, 1976, in accordance with state and federal requirements for manufactured homes, which: (1) is comprised of at least two fully enclosed parallel sections each of not less than twelve feet wide by thirty-six feet long; (2) was originally constructed with and now has a composition or wood shake or shingle, coated metal, or similar roof of nominal three-to-twelve pitch; and (3) has exterior siding similar in appearance to siding materials commonly used on conventional site-built single-family ~~residences~~detached dwellings. See also "manufactured home" and "new manufactured home."

"Manufactured home, new" means any manufactured home required to be titled under RCW Title 46, which has not been previously titled to a retail purchaser, and is not a used mobile home as defined in RCW 82.45.032(2). See also "designated manufactured home" and "manufactured home," TMC 18.04.040 and 18.04.130.

"Mobile home" means a factory-built dwelling built prior to June 15, 1976, to standards other than the United States Department of Housing and Urban Development (HUD) Code, and acceptable under applicable state codes in effect at the time of construction or introduction of the home into the state. Mobile homes have not been built since introduction of the HUD Manufactured Home Construction and Safety Standards Act.

"Permanent supportive housing" means subsidized, leased housing with no limit on length of stay that prioritizes people who need comprehensive support services to retain tenancy and utilizes admissions practices designed to use lower barriers to entry than would be typical for other subsidized or unsubsidized rental housing, especially related to rental history, criminal history, and personal behaviors. Permanent supportive housing is paired with on-site or off-site voluntary services designed to support a person living with a complex and disabling behavioral health or physical health condition who was experiencing homelessness or was at imminent risk of homelessness prior to moving into housing to retain their housing and be a successful tenant in a housing arrangement, improve the resident's health status, and connect the resident of the housing with community-based health care, treatment, or employment services. Permanent supportive housing is subject to all of the rights and responsibilities defined in Chapter 59.18 RCW, Residential Landlord-Tenant Act.

"Property" or "rental property" means all dwelling units on a contiguous quantity of land managed by the same landlord as a single, rental complex.

"Property owner" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means one or more persons, or entities, jointly or severally, in whom is vested:

1. All or any part of the real title to property; or
2. All or part of the beneficial ownership, and a right to present use and enjoyment of the property.

"Rental unit" means a residential housing unit occupied or rented by a tenant or available for rent by a tenant.

"Residential housing unit" means any building or part of a building in the city of Tumwater that is used or may be used as a home, residence, or sleeping place by one or more persons, including but not limited to single-family detached dwellings, accessory dwelling units, designated manufactured homes, manufactured homes, new manufactured homes, mobile homes, duplexes, triplexes, quadplexes~~fourplexes~~, stacked flats, townhouses, ~~rowhouses,~~ cottage housing, multifamily dwellings,

apartment buildings, high-rise residential, condominiums, and similar living accommodations.

"Tenant" is defined under RCW 59.18.030, as it exists or is hereinafter amended, and means any person who is permitted to occupy a dwelling unit primarily for living or dwelling purposes under a rental agreement and includes those persons who are considered to be tenants under the state RLTA, Chapter 59.18 RCW and those tenants whose living arrangements are exempted from the state RLTA under RCW 59.18.040(3). For purposes of this chapter, "tenant" shall not include the property owner of a dwelling unit or members of the property owner's immediate family.

"Transitional housing" means housing providing stability for residents for a limited time period, usually two weeks to twenty-four months, to allow them to recover from a crisis such as homelessness or domestic violence before transitioning into permanent housing. Transitional housing often offers supportive services, which enable a person to transition to an independent living situation.

(Ord. O2022-014, Added, 02/07/2023)

Section 4. Section TMC 5.80.030, Scope, of the Tumwater Municipal Code is hereby amended to read as follows:

5.80.030 Scope.

A. Business License Required. As a condition of operation, each and every property owner or landlord renting or leasing a residential housing unit within the city limits shall, in accordance with Chapter 5.04 TMC, obtain and maintain a business license.

B. Exempt Residential Housing Units. This chapter does not apply to the following residential housing units:

1. Single-family detached dwellings, accessory dwelling unit, duplexes, triplexes, ~~or fourplexes~~quadplexes, or stacked flats;

2. Manufactured home parks and townhouse and cottage housing developments less than five units in size;

3. Units unavailable for rent;

4. Housing accommodations in a hotel, motel, bed and breakfast, short-term rental, or other similar transient lodging;

5. Housing accommodations at an institution, whether public or private, where residence is merely incidental to detention or the provision of medical, religious, educational, recreational, or similar services, including but not limited to adult family homes, educational facilities, residential care facilities, group foster homes, assisted and independent senior housing facilities, convalescent centers, rest homes, nursing homes, prisons, jails, or other correctional facilities, monasteries and convents, mental health facilities, and hospitals;

6. Designated manufactured homes, manufactured homes, new manufactured homes, and mobile homes;

7. Emergency housing, emergency shelters, and transitional housing;

8. Permanent supportive housing and rental units that a government unit, agency, or authority owns, operates, or manages, or that are specifically exempted from such a registration requirement by state or federal law or administrative regulation. This exemption does not apply once the governmental ownership, operation, or management is discontinued;

9. Accessory dwelling units; and

10. Condominiums ~~and townhomes or rowhouses~~.

C. Penalty for Not Obtaining Business License. In addition to the penalties set forth elsewhere in TMC, there shall be assessed a penalty of $100.00 per day for each day that a residential housing unit operates without a valid and current business license for the first ten days of noncompliance with this chapter, and up to $400.00 per day for each day in excess of ten days of noncompliance with this chapter.

D. Display of Required Information. Information required by TMC 5.75.030(B) shall be posted on the inside of each residential housing unit or in a common area; provided, that the director may establish by rule one or more alternative or additional methods for conveying the information to tenants.

E. The business license period shall be consistent with the period established under TMC 5.04.050. A fee as established in Chapter 5.04 TMC shall accompany any application for a license required by this chapter. Business license applications for residential rental housing shall comply with the requirements of TMC 5.04.040.

F. Denial or Revocation of License.

1. A business license issued to a residential rental housing unit or units may be denied or revoked for the following reasons:

a. The applicant or registration holder has failed to comply with any of the provisions of this chapter;

b. The applicant or registration holder is in default of any fee due to the city under this chapter;

c. Any reason set forth in TMC 5.04.030;

d. The property is subject to a notice of violation for a code violation, which has been deemed committed or found to have been committed pursuant to TMC or the Revised Code of Washington.

2. The denial or revocation of a business license for a residential rental housing unit or units shall comply with the business license revocation procedures set forth in TMC 5.04.030.

3. If a business license issued for a residential rental housing unit(s) is revoked, or an application for a license is denied, the landlord will be granted a business license only after:

a. Any and all deficiencies on which the revocation or denial was based have been corrected;

b. The applicant pays a license fee as determined by city code.

4. Tenant relocation assistance shall be provided as required by RCW 59.18.085, and pursuant to the process set forth therein.

(Ord. O2022-014, Added, 02/07/2023)

Section 5. Section TMC 11.20.080, Development standards for attached wireless communication facilities, of the Tumwater Municipal Code is hereby amended to read as follows:

11.20.080 Development standards for attached wireless communication facilities.

A. Attached WCFs Allowed. Attached WCFs are permitted uses in all zone districts, except the CBC~~,~~ capitol boulevard community; HC~~,~~ historic commercial; GB~~,~~ greenbelt; OS~~,~~ open space; and MHP~~,~~ manufactured home park zone districts; and it is prohibited to attach a nonaccessory WCF on a single-family or ~~two-family~~middle housing dwelling.

B. Types of attached WCFs include, but are not limited to, WCFs and transmission equipment affixed to or located within the wall or mounted on the top of an existing or replacement structure, base station, or other similar structure not constructed specifically to support an antenna.

C. Design Requirements.

1. Camouflage Required. Attached WCFs shall be designed to blend into the architecture of the building or structure on which placed through the use of color and camouflage design techniques, except where color is otherwise dictated by applicable law.

2. Attachment to Trees Prohibited. It is prohibited to use any tree as a support for any attached WCFs; or to use any tree to attach any metal guy or cable supporting any attached antenna.

3. Colocation. Where feasible, construction of new attached WCFs on existing structures shall be designed, engineered, and constructed to facilitate colocation of additional WCFs by other WCF providers on the same structure.

D. Setbacks for Attached Facilities. Attached WCFs shall conform to the following setback requirements:

1. Property Lines and Required Yards. WCFs and transmission equipment mounted on building walls or roofs shall not extend over property lines nor into

required front, side, or rear yard areas; provided, that the development review committee may approve an encroachment into a required yard up to two feet for an antenna mounted on the face or wall of a building or structure if the antenna is camouflaged to blend into the architecture of the building or structure on which placed.

2. Antennas Mounted Atop Structures. Antennas on rooftops or atop water tanks shall be set back horizontally from the vertical edge of the structure one foot for every foot of elevation above the roof or tank. Whenever practical, antennas on rooftops must be either located or camouflaged so as not to be visible from adjacent rights-of-way.

E. Maximum Heights. Except for colocations as required by federal law with respect to an eligible facilities request, and WCFs in the right-of-way which are addressed in TMC 11.20.095, attached WCFs in any zone district shall not exceed the maximum height allowed for structures in the same zone district by TMC Title 18; except that WCFs mounted on rooftops which are at or near the maximum allowable height may extend above the height limit upon approval of an administrative deviation pursuant to provisions of TMC 11.20.170.

(Ord. O2018-025, Amended, 12/18/2018; Ord. O2011-002, Amended, 03/01/2011; Ord. O2004-009, Amended, 12/07/2004; Ord. O97-018, Added, 06/17/1997)

Section 6. Section TMC 11.20.090, Development standards for wireless communication towers, of the Tumwater Municipal Code is hereby amended to read as follows:

11.20.090 Development standards for wireless communication towers.

A. Conditional Use Permit Required. Wireless communication towers are permitted by conditional use permit in all zone districts,

1. Except in:

a. Prohibited Zone Districts. No wireless communication towers are allowed in the NC~~,~~ neighborhood commercial; CBC~~,~~ capitol boulevard community; TC~~,~~ town center; HC~~,~~ historic commercial; BD~~,~~ brewery district; GB~~,~~ greenbelt; and OS~~,~~ open space, zone districts; and

b. Permitted Zone Districts. Wireless communication towers in the LI~~,~~ light industrial; HI~~,~~ heavy industrial; and ARI~~,~~ airport related industrial zone districts are allowed as permitted uses (see TMC 11.20.030(D)).

2. However, no conditional use permit shall be required for colocation of WCFs on existing wireless communication towers or base stations; provided, that:

a. For colocations that are not an eligible facilities request, the colocation does not result in an increase in height of the existing support structure, and the proposed addition otherwise complies with standards described in this chapter; or

b. For colocations that involve an eligible facilities request, the request complies with the applicable provisions of this title and federal law.

Emergency communications towers deemed essential facilities under TMC Chapter 18.56 can be sited in any zone district and follow the conditional use permit approval process.

B. Design Requirements.

1. Color and Camouflage Required. Wireless communication towers and related facilities shall be designed to blend into the surrounding environment with camouflage and concealment techniques wherever possible, except where color is otherwise dictated by applicable law.

2. Attachment to Trees Prohibited. It is prohibited to use any tree as a support for any wireless communication towers; or to use any tree to attach any metal guy or cable supporting any wireless communication towers.

3. Colocation. Whenever practical new wireless communication towers shall be designed, engineered, and constructed to facilitate colocation of WCFs on the same structure.

C. Setbacks for Wireless Communication Towers. Wireless communication towers shall conform to the following setback requirements:

1. Rights-of-Way. Wireless communication towers shall be set back from all rights-of-way a distance no less than one foot for every foot of wireless communication tower height.

2. Residential Properties. Wireless communication towers shall be set back from all adjacent properties in the RSR, residential/sensitive resource; ~~SFL, single-family low-density residential; SFM, single-family~~ LDR ~~medium~~ low density residential; ~~MFM, multifamily~~MDR medium density residential; ~~MFH, multifamily~~HDR high density residential; and MHP~~,~~ manufactured home park zone districts a distance no less than two feet for every foot of wireless communication tower height.

3. Nonresidential Properties. Wireless communication towers shall be set back from all adjacent properties in the NC~~,~~ neighborhood commercial; CS~~,~~ community services; MU~~,~~ mixed use; CBC~~,~~ capitol boulevard community; GC~~,~~ general commercial; TC~~,~~ town center; LI~~,~~ light industrial; HI~~,~~ heavy industrial; HC~~,~~ historic commercial; GB~~,~~ greenbelt; OS~~,~~ open space; and ARI~~,~~ airport related industry zone districts a distance no less than one foot for every foot of wireless communication tower height.

Provided however, that the minimum setback may be reduced upon approval of an administrative deviation pursuant to provisions of TMC 11.20.170.

D. Maximum Heights. Wireless communication towers in any zone district exclusive of industrial zone districts shall not exceed the maximum allowable heights for buildings in the same zone district by TMC Title 18 or fifty feet,

whichever is less; provided, however, that the maximum allowable height may be increased upon approval of an administrative deviation pursuant to provisions of TMC 11.20.170. The maximum allowable height for wireless communication towers shall be one hundred feet in the LI~~,~~ light industrial; HI~~,~~ heavy industrial; and ARI~~,~~ airport related industry zone districts; provided, however, that wireless communication towers shall not penetrate imaginary airspace surfaces as defined by Title 14 of the Code of Federal Regulations, Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department.

E. Separation Between Facilities. Except for the LI~~,~~ light industrial; HI~~,~~ heavy industrial; and ARI~~,~~ airport related industry zone districts, no new wireless communication towers may be constructed within one thousand three hundred twenty feet of any other wireless communication tower except upon approval of an administrative deviation pursuant to provisions of TMC 11.20.170.

F. WCF Accessory Structures and Equipment. The shelter or cabinet used to house radio electronics equipment and the associated cabling connecting the equipment shelter or cabinet to the wireless communication tower shall be concealed, screened, camouflaged, or placed underground.

G. Landscaping and Tree Protection. Applications for development of a site for wireless communication towers shall include tree protection and landscaping plans to assure that:

1. Trees and other vegetation are retained and adequately protected pursuant to provisions of TMC Chapter 16.08.

2. To the greatest extent feasible, existing trees and other vegetation and new landscaping are utilized to screen WCFs, related buildings, and transmission equipment from view from adjacent properties and rights-of-way.

3. Applicable landscaping and buffering requirements of TMC Title 18 are met.

(Ord. O2018-025, Amended, 12/18/2018; Ord. O2018-007, Amended, 10/16/2018; Ord. O2011-002, Amended, 03/01/2011; Ord. O2004-009, Amended, 12/07/2004; Ord. O97-018, Added, 06/17/1997)

Section 7. Section TMC 11.20.100, Additional conditional use permit and administrative approval criteria for WCF antennas and wireless communication towers, of the Tumwater Municipal Code is hereby amended to read as follows:

11.20.100 Additional conditional use permit and administrative approval criteria for WCF antennas and wireless communication towers.

In addition to the conditional use permit criteria specified in TMC Chapter 18.56, the following specific criteria shall be met before a conditional use permit or administrative approval for a WCF can be granted:

A. Visual Impact.

1. Except in connection with an eligible facilities request, antennas may not exceed the height limitations of TMC 11.20.095(I).

2. Site location and development shall preserve the preexisting character of the surrounding buildings and land uses and the zone district to the extent consistent with the function of the communications equipment. Wireless communication towers shall be integrated through location and design to blend in with the existing characteristics of the site to the extent practical. Existing on-site vegetation shall be preserved or improved, and disturbance of the existing topography shall be minimized, unless such disturbance would result in less visual impact of the site to the surrounding area.

3. Accessory equipment used to house WCF should be located within buildings or placed underground when practically or technically feasible. When they cannot be located in buildings or underground, equipment shelters or cabinets shall be screened and landscaped in conformance with buffer requirements specified in TMC Chapter 18.47.

B. Noise. No wireless communication equipment shall be operated to produce noise levels above the decibel (dB) levels described in TMC Chapter 8.08. Backup generators shall only be used during power outages and for testing and maintenance purposes. Testing and maintenance shall only take place on weekdays between the hours of 8:00 a.m. and 6:00 p.m.

C. Lighting. A wireless communication tower or other structure to which a WCF is attached shall not be lighted except to the extent required by federal and state aviation or telecommunications agencies.

D. Electromagnetic Radio Frequency Emissions. Federal law provides that the federal government has sole jurisdiction to regulate in the field of radio frequency (RF) emissions.

1. WCF shall not be conditioned nor denied based on RF impacts.

2. Applicants for WCF permits shall be required to provide information as required in the application certifying compliance with federal standards.

E. Air Navigation Height Limitation. In addition to height limitations imposed elsewhere in this title, no wireless communication tower or other WCF may pierce the civil airport imaginary surface of the Olympia regional airport, pursuant to Federal Aviation Administration, Title 14, Part 77 rules, without express support by the FAA and the Port of Olympia.

F. Access to Site. WCF sites shall be fenced by a security fence not less than six feet in height to prevent access to areas of the site, transmission equipment, wireless communication towers, or related structures. Base stations such as buildings and similar structures used for telecommunications equipment facilities and accessory equipment shall be locked and secured to prevent unauthorized entry. Wireless communication towers and base stations shall be designed with anti-climbing features to prevent climbing by intruders.

G. Site Identification. WCF sites shall be identified by means of a sign no larger than two square feet affixed to the equipment building or fence enclosure which identifies each firm using the site and provides a contact name and telephone number.

H. Structural Requirements. WCFs shall not cause applicable wind and dead load standards of the building code as adopted in TMC Title 15 to be exceeded.

I. View Obstruction. WCFs shall be located as to minimize the obstruction of scenic views from residential zone districts, such as RSR~~,~~ residential/sensitive resource; ~~SFL, single-family low density residential; SFM, single-family~~LDR ~~medium~~ low density residential; ~~MFM, multifamily~~MDR medium density residential; ~~MFH, multifamily~~ HDR high density residential; and MHP~~,~~ manufactured home park zone districts. Determinations of the significance of potential view obstructions shall be based on submittal materials and field examinations by city staff during review processes, and, except for those applications subject to administrative review only, approvals shall consider comments from owners and/or residents of affected properties.

(Ord. O2018-025, Amended, 12/18/2018; Ord. O2010-017, Amended, 12/21/2010; Ord. O97-024, Amended, 03/03/1998; Ord. O97-018, Added, 06/17/1997)

Section 8. Section TMC 11.20.170, Administrative deviations – Variances from standards, of the Tumwater Municipal Code is hereby amended to read as follows:

11.20.170 Administrative deviations – Variances from standards.

A. Administrative Deviations. The development standards contained in this chapter establish basic parameters for compliance. Some of these parameters, as specified in subsection C of this section, may be varied from by administrative deviation.

B. Basis for Administrative Deviation. Administrative deviations may be granted in cases where the final approval authority finds that strict adherence to height, size, setback, separation, or other standards for WCFs:

1. Prohibits or has the effect of prohibiting the provision of personal wireless services;

2. Results in conditions contrary to the purposes of WCFs specified in TMC 11.20.010(B) or otherwise renders compliance impractical; or

3. Creates unnecessary hardship to the owners or users of lands or buildings or providers of wireless communications services, then the final approval authority may approve an administrative deviation varying from requirements and standards.

C. Final Approval Authority.

1. Accessory Wireless Communication Antennas. Final approval authority for administrative deviation of accessory wireless communication antennas is the director based on findings of the development review committee after completion of a feasibility review.

2. WCFs Except Wireless Communication Towers. Final approval authority for administrative deviation of any WCF that is not a wireless communication tower is the director based on findings of the development review committee after completion of administrative site plan review.

3. Final approval authority for administrative deviation of a wireless communication tower is the hearing examiner based on findings from a public hearing on a conditional use permit, except in industrial zone districts. In the LI, light industrial; HI, heavy industrial; and ARI, airport related industry zone districts, the final approval authority is the director based on findings of the development review committee after completion of administrative site plan review.

D. Scope of Administrative Deviations. The administrative deviation process for WCFs applies to:

1. Height, size, or use limits described in TMC 11.20.070(B) for accessory wireless communication antennas;

2. Setbacks, maximum height, size, or separation requirements for other WCFs; or

3. Any other location standard, colocation requirement, or other regulatory provisions of this chapter, when considered in conjunction with applicant's site specific request, where the final approval authority finds such provisions inconsistent with purposes of these regulations or contrary to requirements of the federal or state law.

Approval of a request for administrative deviation shall be narrowly construed and shall be based on an evaluation of the operational needs of the wireless communications provider, alternative locations, alternative existing facilities upon which a proposed antenna array might be located, and colocation opportunities on existing support wireless communication towers within one-half mile of the proposed site. Evidence shall demonstrate that no practical alternative is reasonably available to the applicant.

E. Necessary Findings for Granting of an Administrative Deviation. An administrative deviation may be granted by the final approval authority for WCFs upon findings of fact, as follows:

1. Nonresidential Properties. WCFs on properties in nonresidential zone districts (NC, neighborhood commercial; CS, community services; MU, mixed use; GC, general commercial; TC, town center; LI, light industrial; HI, heavy industrial; HC, historic commercial; BD, brewery district; GB, greenbelt; OS, open space; or ARI, airport related industry zone districts) may exceed

applicable limits contained in this chapter by administrative deviation based on findings of each of the following that a proposed WCF:

a. Is the least height and proximity to adjacent properties necessary to provide the coverage or capacity by the communications service provider and to achieve the purposes of TMC 11.20.010(B);

b. Employs all reasonable measures to provide visual mitigation that screen the facility from views of adjacent residences or undeveloped residential properties;

c. Will not produce noise, vibration, odors, or illumination that will adversely impact other properties in the vicinity;

d. By means of design or location, does not present a hazard to adjacent properties; and

e. Does not penetrate imaginary airspace surfaces as defined by Title 14 of the Code of Federal Regulations, Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department. Alternatively, an applicant may provide a written "no hazard determination" from the FAA with respect to the proposed modification.

f. For reductions of setbacks for WCFs, the structure is designed and engineered, in the event of structural failure, not to fall beyond the radius of the reduced setback; and

g. Does not otherwise result in significant adverse impact on the property on which the facility is located, on other properties in the vicinity, or on the community in general.

h. For WCFs in the rights-of-way, does not exceed the height limits permitted by this code by more than fifteen feet, does not propose attachments which will negatively impact views including views from a residential structure, does not propose accessory or transmission equipment to be located above ground separate from the pole in a manner that would negatively impact traffic flow or create other public safety concerns, and would not violate any code provisions related to noise.

2. Residential Properties. WCFs on properties in residential zone districts (RSR~~,~~ residential/sensitive resource; ~~SFL, single-family~~LDR low density residential; ~~SFM, single-family medium density residential; MFM, multifamily~~MDR medium density residential; ~~MFH, multifamily~~HDR high density residential; and MHP~~,~~ manufactured home park) may exceed applicable limits contained in this chapter by administrative deviation based on findings of each of the following that a proposed antenna, wireless communication tower, and related structure or equipment:

a. Each of the above findings necessary for facilities in nonresidential zone districts applies; and provided further, that

b. The final approval authority may hold the applicant for an administrative deviation at a proposed site in a residential zone district to a higher standard than in nonresidential zone districts to demonstrate visual mitigation, elimination of potential adverse impacts, and protection of health and safety necessary to preserve the residential character of the vicinity.

(Ord. O2018-025, Amended, 12/18/2018; Ord. O2011-002, Amended, 03/01/2011; Ord. O2004-009, Amended, 12/07/2004; Ord. O97-018, Added, 06/17/1997)

Section 9. Section TMC 14.14.020, Preapplication conference, of the Tumwater Municipal Code is hereby amended to read as follows:

14.14.020 Preapplication conference.

A. A land use permit application shall not be accepted for processing until the applicant has scheduled and attended a preapplication conference with the development review committee, except in the case of minor development proposals such as fences, small detached buildings, and individual single-~~family residences~~family detached dwellings and middle housing~~, duplexes, triplexes, and quadplexes~~.

B. The purpose of the preapplication conference is to enable the applicant to present the project proposal to the development review committee and to understand the intent, standards, and provisions of the applicable development regulations that will be required of land use permit applications.

C. The objective of the preapplication conference is to analyze and identify potential issues and develop the proposal toward submittal of land use permit applications to eliminate as many potential problems as possible in order for land use permit applications to be processed without delay or undue expense.

D. At the preapplication conference, the applicant shall present to the development review committee preliminary studies or conceptual sketches which contain in a rough and approximate manner based on the information required in the preapplication conference application.

E. At the preapplication conference, the development review committee shall make available all pertinent information related to the project area.

F. The preapplication conference should take place prior to detailed work by the applicant's engineer or surveyor. Discussion topics at conferences would include such things as:

1. The comprehensive plan and subarea plans;
2. The shoreline master program;
3. The regulatory requirements of the following titles:

a. This title, Development Code Administration;

b. TMC Title 15, Buildings and Construction;

c. TMC Title 16, Environment;

d. TMC Title 17, Land Division, if applicable; and

e. TMC Title 18, Zoning;

4. Transportation requirements:

a. The transportation plan and transportation concurrency;

b. Sidewalk requirements;

c. Bike paths; and

d. Bus stops;

5. Utilities:

a. Availability of sewer and water; and

b. Need for utility extension or oversizing;

6. Phasing of off-site requirements such as sidewalks, streetlights, traffic signals, utilities, or improvement of adjacent streets;

7. Latecomer charges;

8. Storm drainage and erosion control;

9. Citywide design guidelines;

10. Other city requirements and permits;

11. Features of the development, and the rationale behind them;

12. If the applicant owns adjacent land, the possibilities of future development shall be discussed; and

13. Application review process and timelines.

G. The development review committee will provide the applicant with written comments on how the proposed project conforms to city policies and regulations, which will include a list of all the materials needed to make land use permit applications procedurally complete and the requirements for land use permit approval.

H. The development review committee will evaluate whether a proposed project has potential to significantly affect the character or environment of an area; and in such cases, will encourage the development proponent to participate in additional notification efforts including, but not limited to, a public information meeting with members of the public potentially affected by the proposal.

I. Applications for preapplication conferences shall be scheduled for specific time periods on the development review committee agenda each week.

J. Preapplication conferences shall be public meetings and meeting notices shall be posted on the city's website and sent to parties on the city's public notice list.

K. The director may waive the requirement for a preapplication conference in individual cases if the department and the applicant agree in writing that a proposal is ready for land use permit application submittal.

(Ord. O2024-005, Added, 12/03/2024)

Section 10. Section TMC 15.01.050, Time limitation of application, of the Tumwater Municipal Code is hereby amended to read as follows:

15.01.050 Time limitation of application.

A. Applications that are submitted for review under TMC Title 15 for which no permit is issued within one hundred eighty days following the date of the application shall expire by limitation unless extended.

B. Plans and other data submitted for review for expired applications may thereafter be returned to the applicant or destroyed by the building official in accordance with state law.

C. Applicant response to building official review comments.

1. Applications in review shall be canceled for inactivity if an applicant fails to substantially respond within ninety days to the building official's written request for revisions, corrections, actions, or additional information.

2. The building official may extend the applicant's response period for revisions, corrections, actions, or additional information if requested in writing by the applicant within ninety days of the date of the city's written request or prior to expiration of the first extension.

D. Extension requests.

1. The building official may extend the time limitation of an application in review and the applicant's response period, if the building official determines that any of the following conditions exist:

a. Extenuating circumstances when requested by the applicant in writing prior to the expiration, which shows that circumstances beyond the control of the applicant have prevented action from being taken and provides a schedule with specific target dates for submitting the full revisions, corrections or other information needed by the building official. Such extensions shall be up to one hundred and eighty days; or

b. After the building official has deemed the application "approved for issuance," which is when the permit is ready to be issued, but required permit fees have been paid. Such extensions shall be for up to ninety days;

3. No application in review shall be extended more than two times.

4. An application extension fee shall be paid by the applicant at the time an extension is requested. The fee shall be paid in accordance with the fee schedule established by resolution of the Tumwater city council.

5. Applications in review that have been extended by the building official shall be canceled for inactivity if an applicant fails to substantially respond to the building official's written request for revisions, corrections, actions, or additional information by the end of the extension period and a new application will be required.

~~Applications for which no permit is issued within one hundred eighty days following the date of the application or completion of the initial plan review shall expire by limitation, and plans and other data submitted for review may thereafter be returned to the applicant or destroyed by the building official. The building official may extend the time for action by the applicant for a period not exceeding one hundred eighty days on written request by the applicant showing that circumstances beyond the control of the applicant have prevented action from being taken. An application extension fee shall be paid at the time the extension is requested. The fee shall be paid in accordance with the fee schedule established by resolution of the Tumwater city council. No application shall be extended more than two times. In order to renew action on an application after expiration, the applicant shall resubmit plans and pay a new application fee. For purposes of this section, the application fee shall be the plan review fee collected at the time the application is submitted for review. When the application does not require the submittal of plans for plan review, the application fee shall be paid in accordance with the fee schedule established by resolution of the Tumwater city council.~~

(Ord. O2010-017, Added, 12/21/2010)

Section 11. Section TMC 15.01.060, Expiration, of the Tumwater Municipal Code is hereby amended to read as follows:

15.01.060 Permit e~~E~~xpiration.

A. Every permit issued by the building official under the provisions of this code shall expire by limitation and become null and void if the building or work authorized by such permit is not commenced within one hundred eighty days from the date of such permit, or if the building or work authorized by such permit is suspended or abandoned at any time or if no required inspections have been approved after the work is commenced for a period of one hundred eighty days.

1. Before such work can be recommenced, a new permit shall be first obtained to do so, and the fee therefor shall be one-half the amount required for a new permit for such work, provided no changes have been made or will be made in the original plans and specifications for such work; and provided further, that such suspension or abandonment has not exceeded one year.

2. Permits that have not been renewed under the provisions of this section and have not been active for one year from date of last action shall be deemed expired and new applications and permits will be required.

B. Any permittee holding an unexpired permit may apply for an extension of time within which work may commence under that permit.

1. The building official may extend the time for action by the permittee for a period not exceeding one hundred eighty days on written request by the permittee showing that circumstances beyond the control of the permittee have prevented action from being taken.

2. No permit shall be extended more than twice.

3. The fee for extension of a permit shall be paid in accordance with the fee schedule established by resolution of the Tumwater city council.

(Ord. O2010-017, Added, 12/21/2010)

Section 12. Section TMC 17.12.040, Minimum lot size, of the Tumwater Municipal Code is hereby amended to read as follows:

17.12.040 Minimum lot size.

Lots or tracts shall conform to the size requirements set forth in the zon~~e~~ing district unless dedicated or restricted by covenant for open space, park, recreational or other community or public use. ~~In subdivisions intended for single-family dwelling units or townhouse/rowhouse development (as defined in TMC Chapter 18.04), a separate lot or tract shall be provided for each dwelling unit, not including accessory dwelling units.~~ If the land division is submitted in phases/divisions of development, each phase/division submitted for approval shall meet all provisions of this section.

(Ord. O96-008, Amended, 11/05/1996; Ord. 1308, Added, 10/15/1991)

Section 13. Section TMC 17.12.200, Underground utilities, of the Tumwater Municipal Code is hereby amended to read as follows:

17.12.200 Underground utilities.

A. Purpose. This section establishes the minimum requirements and procedures for the underground installation and relocation of electrical and communication facilities within the city of Tumwater. It is the policy of the city to require the underground installation of all new and relocated electrical and communication facilities, with certain minor exceptions.

B. Applicability.

1. All new facilities shall be installed underground.

2. All existing overhead utilities shall be installed or relocated underground if:

a. Ten or more dwelling units are being created;

b. Frontage improvements are required and the cumulative frontage length where existing overhead utilities exist is over two hundred linear feet for properties in the LDR low density residential, ~~SFL single-family low density residential, SFM single-family~~MDR medium density residential, and RSR residential/sensitive resource zone districts or one hundred linear feet for properties in other zone districts; or

c. The existing overhead utility is reconstructed, relocated, replaced, upgraded, or enhanced.

C. Any deviation or exception must be determined pursuant to TMC Chapter 17.28.

(Ord. O2023-012, Amended, 02/06/2024; Ord. 1308, Added, 10/15/1991)

Section 14. Section TMC 17.12.210, Park and open space area standards for divisions of land, of the Tumwater Municipal Code is hereby amended to read as follows:

17.12.210 Park and open space area standards for divisions of land.

A. For residential subdivisions ~~in which the majority of the dwelling units will be duplexes or single-family detached dwellings,~~ a minimum of ~~ten percent of the total gross site area shall be set aside for park and open space area.~~

~~B. For residential subdivisions in which the majority of the dwelling units will be fourplexes, multifamily dwellings, roominghouses, rowhouses, townhomes, or triplexes, a minimum of~~ fifteen percent of the gross site area shall be set aside for park and open space area.

~~C~~B. For subdivisions or binding site plans that will contain mixed use development, a minimum of fifteen percent of the gross site area shall be set aside for park and open space area.

~~D~~C. For new commercial or industrial binding site plans, short plats, and subdivisions of ten acres or more, a minimum of five percent of the gross site area shall be set aside for park and open space area. A commercial or industrial binding site plan, short plat, or subdivision that includes a master plan that provides for a park or open space area meeting the intent of this provision shall be considered to have fulfilled this requirement.

~~E~~D. For the purpose of calculation of the park and open space area, the park and open space area shall be separate and distinct from required yards, setbacks, and landscaped areas.

~~F~~E. The community development director in consultation with the parks and recreation director may accept a fee in lieu for park and open space area subject to the following:

1. The fee in lieu for park and open space area is only allowed where the amount of land required for park or open space area in the division of land is smaller than one acre in size and consists of:

a. Less than or equal to any combination of forty dwelling units or less in duplexes or single-family detached dwellings;

b. Less than or equal to any combination of sixty dwelling units in co-living housing,~~fourplex,~~ multifamily dwellings, quadplexes, ~~roominghouses,~~ rowhouses, stacked flats, ~~townhomes~~ townhouses, or triplex dwellings;

c. Less than or equal to sixty residential dwelling units included in a mixed use development; or

d. Any commercial or industrial subdivision, short plat, or binding site plan smaller than twenty acres in size.

2. When determining whether to accept a fee in lieu for park and open space area, the community development director in consultation with the parks and recreation director shall consider the following:

a. The availability of other existing or planned public park within one-half mile of the subdivision, short plat, or binding site plan;

b. Whether the other existing or planned public park is or will be accessible from the subdivision, short plat, or binding site plan by sidewalk or paved pedestrian path; and

c. The overall public benefit of accepting a fee instead of the land for park and open space area.

3. The fee shall be based on an assessed valuation of the portion of the subdivision, short plat, or binding site plan that would otherwise be required to be set aside.

4. The fee shall be paid prior to the recording of the subdivision, short plat, or binding site plan.

~~G~~F. For all residential subdivisions, at least fifty percent of the area set aside for park and open space area must be for active recreation, with the remainder set aside for passive recreation. For all nonresidential subdivisions, all the area set aside for park and open space area may be for passive recreation.

1. The following areas may be counted towards fulfilling the active recreation requirements:

a. Children's play equipment, such as slides, swings, and play structures;

b. A paved hard court for activities such as basketball, tennis, or pickleball;

c. Athletic fields for activities such as soccer or baseball and similar team sports;

d. Multiuse trails for pedestrians and bicycles meeting WSDOT multiuse trail design standards;

e. A flat, open lawn area with a surface suitable for unstructured active play;

f. Community gardens as defined in TMC 18.04.030, C definitions; and

g. Other similar active recreation facilities if approved by the community development director in consultation with the parks and recreation director.

2. That portion of stormwater ponds with active recreation facilities anticipated to be usable at least six months of the year may be counted towards fulfilling the active recreation requirement, provided these facilities are consistent with the drainage design and erosion control manual for Tumwater.

3. The following areas may be counted towards fulfilling the passive recreation requirements:

a. Facilities for walking, such as unpaved trails;

b. Landscaped areas with benches and other amenities;

c. Picnicking facilities, such as picnic tables and shelters;

d. Public plazas;

e. Vegetated decks and rooftops, provided the deck or rooftop is accessible to all residents and employees of the subdivision, short plat, or binding site plan;

f. Stormwater ponds with perimeter trails or year-round water features consistent with the drainage design and erosion control manual for Tumwater;

g. Tree protection areas preserved under TMC Chapter 16.08, provided access is provided within these areas via an unpaved trail consistent with the regulatory requirements for these areas;

h. Wetland buffers under TMC Chapter 16.28, wellhead protection areas under TMC Chapter 16.26, and special flood hazard areas under TMC Chapter 18.38, provided access is provided within these areas via an unpaved trail consistent with the regulatory requirements for these areas; and

i. Other similar passive recreation facilities if approved by the community development director in consultation with the parks and recreation director.

~~H~~G. The park and open space area shall have convenient access for residents or employees of the subdivision, short plat, or binding site plan and the park and open space area shall be consolidated to provide maximum access, visibility, usability, minimization of impacts to residential uses, and ease of maintenance. These requirements may be waived by the community development director upon a finding that the residents or employees of the subdivision, short plat, or binding site

plan would receive a greater benefit if the required park and open space area were provided in another configuration due to the size of the division of land, unique topographic conditions, or other factors determined by the community development director.

~~I~~H. The park and open space area shall be designed and placed in consideration of existing and potential park and open space areas on adjacent parcels to allow for consolidation or provision of future opportunities for consolidation of park and open space areas.

~~J~~I. Except where removal is required to meet active recreation requirements in this chapter, existing trees and significant native vegetation shall be retained in park and open space areas unless an alternate landscaping plan for such areas is required or approved by the community development director.

~~K~~J. Park and open space areas shall be held in single ownership where such ownership assumes full responsibility for maintenance and operation, or held in common ownership by all of the owners in the subdivision, short plat, or binding site plan through a property owners' association or similar organization. As a condition of approval, the city may require or choose to accept dedication, when the park and open space area set aside is one or more of the following:

1. Greater than two acres.
2. Adjacent to an established or future city park or school grounds.
3. Includes public access to a body of water, wetland, critical habitat, or other environmentally sensitive area.
4. If the city determines it is in the public interest to accept land for park and open space area.

~~L~~K. Maintenance of park and open space areas shall be provided for as described in TMC Chapter 17.22.

(Ord. O2020-015, Amended, 02/16/2021; amended during 2011 reformat; O2011-002, Amended, 03/01/2011; Ord. O96-021, Added, 12/02/1997)

Section 15. Section TMC 18.04.010, A definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.010 A definitions.

"A-board sign" or "sandwich board sign" means a portable sign consisting of two sign faces hinged at the top and separated at the bottom to make itself standing.

"Accessory building, structure, use" means the use of land, a subordinate building or structure, or a portion of a principal building or structure, such use being secondary or incidental to a permitted use, building, or structure.

"Accessory dwelling unit" means a dwelling unit that is an accessory use or structure subordinate to a principal residential structure ~~single-family detached dwelling~~ subject to the general land use regulations found in TMC 18.42.010.

"Accessory wireless communication antenna" means a ground mounted (freestanding) or building mounted (attached) antenna for the sole use of residents, patrons of a business, or other occupants of property for the original transmission or final reception of communications or data as an accessory to a permitted use on the property on which the antenna is located. Types of accessory wireless communication antennas include:

A. "Category I (radio and television)" means "receive-only" radio and television antennas, or parabolic ("dish") antennas not exceeding one meter (approximately thirty-nine and one-half inches) in diameter, usually supported by a single pole, post, or mast, with an antenna height not exceeding fifteen feet above grade for freestanding antennas or ten feet above the height of the building upon which mounted for attached antennas;

B. "Category II (amateur radio antenna)" means "send and receive" citizen band radio antennas or similar antennas operated by a federally licensed amateur ("ham") radio operator at a dwelling, with an antenna height not exceeding the maximum height for buildings on the property upon which the antenna is located, except as provided otherwise in TMC 11.20.070(F);

C. "Category III (accessory mobile antenna device)" means an antenna including, but not limited to, mobile test antennas and global positioning satellite (GPS) equipment, or mobile radio or television antennas which are less than twelve inches in height or width, excluding the support structure; or

D. "Category IV (minor telecommunications antenna)" means "send and receive" data transmission or communication antennas or parabolic (dish) antennas (other than Category I and II antennas) not exceeding one meter (approximately thirty-nine and one-half inches) in diameter, usually supported by a single pole, post, or mast, with an antenna height not exceeding fifteen feet above grade for freestanding antennas or the height of the building upon which mounted for attached antennas, and including small cell wireless facility antennas that meet the size requirements set forth in TMC Chapter 11.20.

Provided, however, that accessory wireless communications antennas or support structures shall be subject to the provisions of TMC Chapter 11.20, Wireless Communication Facilities, generally, and specifically to the location and landscaping requirements of TMC 11.20.070.

"Administrative official" means a duly appointed officer of the city or his appointed representative charged with the administration of building and occupancy permits, and for the interpretation and enforcement of this title.

"Adult family home" means the regular family abode of a person or persons who are providing personal care, room and board, under a license issued pursuant to RCW

70.128.060, to more than one but not more than six adults who are not related by blood or marriage to the person or persons providing the services; except that a maximum of eight adults may be permitted if the Washington State Department of Social and Health Services determines that the home and the provider are capable of meeting standards and qualifications provided for by law (RCW 70.128.010).

"Administrative design review" means a land use permit review process whereby a design review application is reviewed, approved, or denied by the director of community development or their designee based solely on objective design standards found in the citywide design guidelines without an open recording hearing, unless such review is part of a consolidated review and decision process pursuant to TMC Title 14 Development Code Administration, otherwise required by state or federal law, or the structure is a designated landmark or historic district established under the city's preservation ordinance. A city will utilize the process found in the citywide design guidelines to consider, recommend, or approve requests for deviations.

"Advertising vehicle" means any vehicle or trailer placed on a public right-of-way, on public property, or on private property, having attached thereto or located thereon any sign or advertising device which advertises a product, business or service, or directs people to a business or activity located on the same or nearby property or any premises. This provision is not to be construed as prohibiting the identification of a firm or its principal products on a vehicle operated during the normal course of business. Franchised buses or taxis are specifically excluded from this definition.

"Affordable housing" means, unless the context clearly indicates otherwise, residential housing whose monthly costs, including utilities other than telephone, do not exceed thirty percent of the monthly income of a household whose income is: (A) For rental housing, 60 percent of the median household income adjusted for household size, for the county where the household is located, as reported by the United States department of housing and urban development; or (B) For owner-occupied housing, 80 percent of the median household income adjusted for household size, for the county where the household is located, as reported by the United States department of housing and urban development.

"Agriculture" means the use of land for agricultural purposes, including farming, dairying, pasturage agriculture, horticulture, floriculture, viticulture, beekeeping, and animal and poultry husbandry and the necessary accessory uses for selling, packing, treating, or storing the produce; provided, however, that the operation of any such accessory uses shall be secondary. The term "agriculture" shall not include the operation or maintenance of a commercial stockyard or feed lot.

"Airport fueling facility" means a centralized aviation fuel storage facility where aviation fuel is transferred to aboveground storage tanks and various types of aircraft are fueled.

"Alley" means a public or private way, at the rear or side of property, permanently reserved as a secondary means of vehicular or pedestrian access to a property. Alleys are not considered streets for the purpose of calculating setbacks.

"Alterations" means any repair, reconstruction, or improvement of a structure, the cost of which does not equal or exceed fifty percent of the market value of the structure.

"Amendment" means any change, modification, deletion, or addition to the wording, text, or substance of the zoning ordinance, or any modification, deletion or addition to the application of the zoning ordinance to property within the city, including any alteration in the boundaries of the zone when adopted by the city council.

"Animal clinic" or "animal hospital" means any medical facility except those designed and used for the care of human beings, maintained by or for the use of licensed veterinarians in the diagnosis, treatment, and prevention of animal diseases and ailments.

"Aquaculture" means activities relating to the fishing or harvesting of wild and planted fish stock for recreational and commercial purposes.

"Arcade" means a covered walk with shops along one side and a line of arches or columns on the other side.

"Articulation" means a design emphasis placed on a particular architectural feature through the use of one or more of the following: special details or materials; changes in building plane (recessed or extended from building surface); contrasting materials; or decorative artwork.

"Attached wireless communication facility" is a wireless communication facility that is affixed to an existing structure other than a wireless communication support structure. Examples of attached wireless communication facilities include antennas affixed to or erected upon existing buildings, water tanks, or other existing structures.

"Auto repair facilities" means any area of land, including the structures thereon, that is used for major auto repairs including, but not limited to, engine or transmission overhaul and replacement, collision services such as auto body and frame repair and painting, and the general servicing and replacement of parts. "Auto repair facilities" shall not include businesses which exclusively perform minor servicing such as oil changes, car washes, tire installation services, stereo installation, etc.

"Automobile service station" means any area of land, including the structures thereon, that is used for the sale of gasoline or other motor fuels, oils, lubricants, and auto accessories, including but not limited to transmission and lube service, tire sales, electric vehicle charging stations, and car washes as an accessory use; and which may or may not include washing, lubricating, and other minor servicing as accessory uses with the exception of automobile body work.

"Automobile wrecking" means the dismantling or wrecking of used motor vehicles or the storage, sale or dumping of dismantled or wrecked vehicles or their parts. The presence on any lot or parcel of land of five or more motor vehicles, which for a period exceeding thirty days have not been capable of operating under their own power, and from which parts have been or are to be removed for reuse or sale, shall constitute prima facie evidence of an automobile wrecking yard.

"Aviation use" means any runway, taxiway, connector, apron or heliport designed for the landing and taking off of aircraft, transfer of passengers and/or cargo, surface access, and other support facilities typically associated with airports, including: hangars, control towers, communication and maintenance facilities, operations area, airport fueling facilities, fixed-based operators (FBO) and passenger and cargo terminals (including retail and eating and drinking establishments located within a terminal or FBO building).

"Awning" means a rigid structure affixed to a building that extends over windows, sidewalks, or doors.

"Awning, illuminated" means a structure affixed to a building that extends over windows, sidewalks, or doors, which is designed to be illuminated from within.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-007, Amended, 11/05/2018; Ord. O2018-007, Amended, 10/16/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2017-014, Amended, 07/18/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2010-029, Amended, 06/07/2011; Ord. O2008-017, Added, 10/21/2008; Ord. O2004-009, Added, 12/07/2004; Ord. O2002-019, Amended, 01/07/2003; Ord. O97-019, Added, 06/17/1997; Ord. O95-037, Added, 12/05/1995; Ord. O95-035, Amended, 12/19/1995; Ord. 1289, Added, 06/04/1991; Ord. 883, Added, 05/06/1984. Formerly 18.04.010 – 18.04.042)

Section 16. Section TMC 18.04.020, B definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.020 B definitions.

"Banner" means any sign of lightweight fabric or similar material with no enclosing framework or electrical components that is supported or anchored on two or more edges or at all four corners, or along either one edge or two corners with weights installed that reduce the reaction of the sign to wind.

"Base flood elevation" means the elevation above mean sea level, expressed in feet, as published on flood insurance rate maps produced by the Federal Emergency Management Agency, which represents the crest of a flood that has a one percent chance of occurring in any given year.

"Bed and breakfast" means a lodging facility where four or fewer guest rooms are provided to travelers and guests by a resident operator for a fee by prearrangement for a period of less than two weeks. A breakfast and/or light snacks may be served to those renting rooms in the bed and breakfast. No cooking facilities are provided

in the individual rooms. Not included in this definition are institutions housing persons under legal restraint or requiring medical attention or care.

~~Boardinghouse. See "roominghouse," TMC 18.04.170.~~

"Buffer" means an area of land or a structure used or created for the purpose of insulating or separating a structure or land use from other land uses or structures, in such a manner as to reduce or mitigate any adverse impacts of one or the other.

"Buildable area" means that portion of the land that remains after the required yards have been excluded from the building site.

"Building" means any structure having a roof, but excluding all forms of vehicles, even though immobilized. (See "structure," TMC 18.04.180.)

"Building code" means the code promulgated by the International Conference of Building Officials, as adopted by the city council of the city.

"Building coverage" means the amount or percentage of ground area covered or occupied by buildings, usually expressed in square feet or percentage of the lot.

"Building height" or "structure height" means the vertical distance from grade plane elevation as determined by the International Building Code according to TMC Chapter 15.04 to the average height of the highest roof surface excluding any chimney, antenna or other similar vertical appurtenances.

"Building line" means the outer edge of that portion of a building or structure nearest a property line.

"Building site" means a total horizontal area within the property lines, excluding external streets, public or private.

"Business" means any person, firm or corporation which operates any store or place for the sale of goods, services, wares or merchandise, at retail or at wholesale, within the corporate limits of the city. Each such store or place shall be considered a separate business, even though more than one such store or place is owned by the same person, firm or corporation.

"Business day" means any day other than Saturday, Sunday, or a legal holiday.

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2017-003, Amended, 04/18/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2001-012, Amended, 03/19/2002; Ord. O2000-024, Amended, 02/06/2001; Ord. O95-035, Amended, 12/19/1995; Ord. 883, Added, 05/06/1984. Formerly 18.04.045 – 18.04.100)

Section 17. Section TMC 18.04.030, C definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.030 C definitions.

"Camp facility" means an area or tract of land on which accommodations for temporary occupancy are located or may be placed, including cabins, lodges, tents,

amphitheaters and areas and equipment for active and passive recreational uses, and which is primarily used for recreational purposes and retains an open air or natural character.

“Campground” or “recreational vehicle park” means any parcel of land under private or public ownership in which any sites are offered for rent or lease for the purpose of overnight camping in a recreational vehicle, tent, teepee, shelter or other accommodations for enjoying an outdoor experience. A campground designed to accommodate recreational vehicles may be considered to be a recreational vehicle park. A campground or recreational vehicle park shall not be considered to be a facility designed to accommodate mobile homes as defined in TMC 18.04.130.

“Canopy” means a permanent roof-like structure that projects outwards from a building and is attached to and supported by a building.

“Caretaker dwelling” means a single-family dwelling unit accessory to a park, cemetery, golf course or camping facility use for occupancy by the owner/caretaker.

“Carwash” means a lot on which motor vehicles are washed and waxed, either by the patron or by others using machinery specially designed for that purpose.

“Cemetery” means land used or intended to be used for the burial of human and animal remains and dedicated for cemetery purposes, including columbariums, crematories, mausoleums, and mortuaries when operated in conjunction with and within the boundaries of such cemetery.

“Child day care center” means a person or agency that provides care for thirteen or more children during part of the twenty-four-hour day.

“Child mini-day care center” means a person or agency providing care during part of the twenty-four-hour day to twelve or fewer children in a facility other than the family abode of the person or persons under whose direct care the children are placed.

“Church” means a building wherein persons regularly assemble for religious worship and which is primarily used for such purposes, and those accessory activities as are customarily associated therewith.

“Civic center complex” means a prominent land development within the city that is constructed to be a public focal point or center containing two or more public and/or governmental buildings.

“Club” means an organization of persons for some common purpose but not including groups organized primarily to render a service which is customarily carried on as a business, or which is operated for profit.

“Clustered subdivision” means a subdivision development in which building lots are smaller and placed closer together than conventional development in order to preserve the remaining undeveloped land as open space and/or recreational land. Density requirements for clustered subdivisions are described in the text for the applicable zon~~cing~~ district.

"Co-living housing" means a type of residential development with sleeping units that are independently rented and lockable and provide living and sleeping space, and residents share kitchen facilities with other sleeping units in the building. Also known as congregate living facilities, single room occupancy, rooming house, boarding house, lodging house, and residential suites.

"Commercial park" or "industrial park" means a multiple building complex.

"Community center" means a city-owned facility that provides recreational activities and programs for senior citizens, youth, general community and similar groups. The facility may contain classroom/multipurpose areas, a gymnasium, kitchen facilities, conference room, swimming pool (indoor or outdoor), office and administration space, and outdoor facilities similar to those found in parks (sports courts/fields, picnic areas, trails, parking, etc.).

"Community development department" means the department charged with the administration of the building and occupancy permits and for the interpretation of the zoning ordinance codified in this title. The director of the community development department will also be recognized as the administrative official and city planner.

"Community garden" means land managed by a public or nonprofit organization, or a group of individuals, that is used to grow edible plants and harvest food or ornamental crops from them for donation, sale, or use by those cultivating the land and their households. The majority of the products grown and produced from the community garden must be edible. "Community garden" does not include "collective garden" under Chapter 181, Laws of 2011 (E2SSB 5073).

"Conditional uses" means certain uses which because of special requirements or unusual characteristics related to the subject property, or because of possible detrimental effects on surrounding properties, may be permitted in use districts if found under the conditional use section, and after the granting of a conditional use permit by the hearing examiner. Conditional uses require a special degree of control to make such uses consistent with and compatible to other existing or permissible uses in the same zone district or zone districts.

Convalescent Center. See "rest home," "~~boardinghouse~~co-living housing" and "group foster home," TMC 18.04.170, 18.04.020 and 18.04.070.

Corner Lot. See "lot, corner," TMC 18.04.120.

"Cornice" means a horizontal projection that crowns or completes a building or parking structure.

"Corporate flag" means a flag that carries a logo, trademark, or corporate seal of a company or organization and does not carry another commercial message.

"Correctional facility" means: (A) a state or local government operated facility which provides for physical restriction of residents; (B) a facility to which persons are sentenced for a specific period of time by the court.

"Cottage housing ~~development~~" means detached residential units on a lot with a common open space that either: (A) is owned in common; or (B) has units owned as condominium units with property owned in common and a minimum of twenty percent of the property as open space.~~a grouping of smaller than average detached single-family dwellings clustered around a common area and developed with a coherent plan for the entire site~~.

"Crematory" means a furnace or place of incineration of a corpse, whether human or animal.

"Cross-dock facility" means a type of motor freight terminal or warehouse distribution center with loading docks on opposite sides of a relatively shallow structure designed for the purpose of quick loading, sorting, or unloading from one vehicle to another (i.e., materials from one truck at a loading dock are unloaded, sorted, and reloaded onto one or more trucks).

"Cultural resources" is physical evidence or place of past human activity, site, object, landscape, structure; or a site, structure, landscape, object or natural feature of significance to a group of people traditionally associated with it.

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2017-023, Amended, 07/17/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2017-008, Amended, 09/05/2017; Ord. O2017-006, Amended, 07/18/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2010-029, Added, 06/07/2011; Ord. O2002-019, Amended, 01/07/2003; Ord. O2001-020, Added, 05/07/2002; Ord. O95-035, Amended, 12/19/1995; Ord. 883, Added, 05/06/1984. Formerly 18.04.105 – 18.04.150)

Section 18. Section TMC 18.04.040, D definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.040 D definitions.

"Density" means the permissible number of dwelling units that may be developed on a specific amount of land area measured in number of dwelling units per acre.

"Designated manufactured home" means a manufactured home constructed after June 15, 1976, in accordance with state and federal requirements for manufactured homes, which: (A) is comprised of at least two fully enclosed parallel sections each of not less than twelve feet wide by thirty-six feet long; (B) was originally constructed with and now has a composition or wood shake or shingle, coated metal, or similar roof of nominal three-to-twelve pitch; and (C) has exterior siding similar in appearance to siding materials commonly used on conventional site-built single-family ~~residences~~detached dwellings. See also "manufactured home" and "new manufactured home."

"Detached dwelling" means a dwelling surrounded on all sides by open space.

"Development" means any manmade change to improved or unimproved real estate, including, but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavating or drilling operations.

"Director of community development" means the department manager who is responsible for all aspects of city development services. The director of community development is responsible for all actions of the community development department, including the administration of the city's land use and related ordinances, interpreting laws on a case-by-case basis, and preparing reports for policy making bodies.

"District" or "zone district" means a portion of the incorporated area of the city within which certain regulations and requirements or various combinations thereof apply under the provisions of this title.

"Duplex" means a building designed for and used exclusively for occupancy by two families independent of each other where both dwelling units are located on the same lot and are completely separated from each other by an unpierced wall extending from ground to roof or an unpierced ceiling and floor extending from exterior wall to exterior wall, except for common stairwell or garage exterior to both dwelling units.

"Dwelling" or "dwelling unit" means a building or a portion thereof designed for occupancy by one family for residential purposes, having kitchen and bathroom facilities, and on a permanent foundation. A dwelling used as a rental unit shall not be rented for less than thirty consecutive days at a time.

"Dwelling unit allowance" means the total number of dwelling units, including accessory dwelling units, allowed on a lot, regardless of lot size.

~~"Dwelling, multifamily" means a building designed and used for occupancy by five or more families all living independent of each other and where all dwelling units are located on the same lot.~~

~~"Dwelling, single-family detached" means a building that is not attached in any way to another dwelling unit or structure providing complete, independent living facilities for a family.~~

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2017-022, Amended, 12/05/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-017, Amended, 12/21/2010; Ord. O2005-011, Added, 07/05/2005; Ord. O2000-004, Amended, 07/18/2000; Ord. O95-035, Amended, 12/19/1995; Ord. 883, Added, 05/06/1984. Formerly 18.04.155 – 18.04.190)

Section 19. Section TMC 18.04.060, F definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.060 F definitions.

"Facade" means any portion of an exterior elevation of a building extending from the grade of the building to the top of the parapet wall or eaves, for the entire width of the building elevation.~~any exterior wall of a building~~ or parking structure.

"Family" means an individual or two or more persons, related by blood, marriage or adoption, or two or more persons with functional disabilities as defined in TMC

Chapter 18.53, or a group of unrelated persons, living together to share a single dwelling unit.

“Family child care home” means a facility in the family residence of the licensee providing regularly scheduled care for twelve or fewer children, within a birth-through-eleven-years-of-age range exclusively, for periods less than twenty-four hours.

“Farmers market” means a group of individual vendors primarily selling locally grown produce and products. This use typically is seasonal, may be temporary, and set up on closed streets or on portions of sites used for other primary uses.

“Fascia” means any relatively narrow vertical surface that is projected, or cantilevered, or supported on columns, or on an element other than a wall below.

“Feather flag” means a freestanding vertical sign consisting of a semi-rigid membrane or a loose poly knit, cloth, plastic, or similar material sign face that is attached to a harpoon-style pole or staff driven into the ground for support, or having a crossbar base suitable for standing or weighting the sign securely on a hard surface.

“Fence” means a wall or barrier for the purpose of enclosing space or separating parcels of land. “Fence” includes hedges and/or similar plantings.

“Fenestration” means the arrangement and design of windows and doors in a building or parking structure.

“Flag” means a piece of cloth hoisted on a pole permanently affixed to the ground or displayed using a pole bracket permanently affixed to a building. If any single dimension of a flag is more than three times greater than any other single dimension, for the purposes of this chapter such flag is classified and regulated as a banner, regardless of how it is anchored or supported.

Flood. As related to a stream, “flood” means a temporary rise in a stream’s flow, accompanied by a rise in water level that results in water overtopping its banks and inundating areas adjacent to the channel.

“Floodplain” means the area (usually lowlands) adjoining the channel of a river, stream or watercourse, or ocean, lake, or other body of standing water, which has been or may be covered by floodwater.

“Floodplain, five-hundred-year” or “five-hundred-year floodplain” means the areas which are subject to a 0.2 percent or greater chance of flooding in any year. These areas are identified as the “B” and “X” zones on the Flood Insurance Rate Maps from the Federal Emergency Management Agency. The “five-hundred-year floodplain” is usually lowlands adjoining the channel of a river, stream or watercourse, or ocean, lake, or other body of standing water.

“Floodplain, one-hundred-year” or “one-hundred-year floodplain” means the areas outside of the floodway which are subject to a one percent or greater chance of flooding in any given year. These areas are identified as the A, AE, AH, AO, A1-30,

or A99 zZones on the Flood Insurance Rate Maps produced by the Federal Emergency Management Agency. The "one-hundred-year floodplain" is usually located within the lowlands adjoining the channel of a river, stream or watercourse, or ocean, lake, or other body of standing water.

"Floodproofing" means a combination of structural provisions, changes or adjustments to properties and structures subject to flooding, primarily for the reduction or elimination of flood damages to properties, water and sanitary facilities, structures and contents.

"Floodway" means the channel of a stream and adjacent land areas which are required to carry the discharge of a flood event that has a one percent chance of being equaled or exceeded in any given year. The "floodway" is designated on Flood Boundary and Floodway Maps from the Federal Emergency Management Agency. The "floodway" is usually characterized by water moving with a definite velocity and current during a flood event and a difference in soil conditions or vegetative ground cover when compared to other portions of the floodplain.

"Floor area ratio (FAR)" is determined by dividing the gross floor area of all buildings on a lot by the area of that lot. For example, a floor area ratio of two to one means two square feet of floor area for every one square foot of site area.

"Food truck or trailer" means a truck or trailer that is licensed as a vehicle, approved by the Washington State Department of Labor and Industries, and bears their insignia to serve, vend, or provide food or nonalcoholic beverages for human consumption, where people work inside, customers stand on the outside and do not go inside, is self-contained, is no more than eight and one-half feet wide, has an electrical system one hundred twenty volts or greater, has a self-contained water or drain system, and has a propane gas piping system.

"Food truck or trailer court" means one permanent location, such as a parking lot, plaza, or lot, where four or more food trucks or trailers are approved to operate at one time.

~~"Fourplex" means a building designed for and used exclusively for occupancy by four families independent of each other where all four dwelling units are located on the same lot and are completely separated from each other, except for common stairwells or garages.~~

"Freestanding sign" means any sign that is supported by one or more uprights, poles, or braces permanently in or upon the ground and not an integral part of, or attached to, a building.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2019-020, Amended, 11/19/2019; Ord. O2017-007, Amended, 11/05/2018; Ord. O2013-013, Amended, 10/01/2013; Ord. O2010-029, Added, 06/07/2011; Ord. O2003-001, Amended, 02/18/2003; Ord. O2002-019, Added, 01/07/2003; Ord. O2000-024, Amended, 02/06/2001; Ord. O95-035, Amended, 12/19/1995; Ord. 1289, Amended,

06/04/1991; Ord. 1288, Added, 06/04/1991; Ord. 883, Added, 05/06/1984. Formerly 18.04.204 – 18.04.240)

Section 20. Section TMC 18.04.120, L definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.120 L definitions.

"Loading space" means an off-street space on the same lot with a building or group of buildings for temporary parking of a commercial vehicle while loading or unloading merchandise or materials.

"Lot" means a parcel of land occupied or intended to be occupied by a main building or group of such buildings and accessory buildings, or utilized for the principal use and uses accessory thereto, together with such open spaces as are required under the provisions of this title.

"Lot area" means the total land space or area contained within the boundary lines of any lot, tract, or parcel of land, and may be expressed in square feet or acres.

"Lot, corner" means a lot that has frontage on or abuts two or more intersecting streets. (See TMC 18.04.230.)

"Lot coverage" means the amount or percentage of ground area covered or occupied by impervious surface(s) usually expressed in square feet or percentage of land on the lot.

"Lot depth" means the horizontal distance between the front lot line and the rear lot line measured within the lot boundaries.

"Lot, interior" means a lot that has frontage on one street only. (See TMC 18.04.230.)

"Lot of record" means a lot as shown on an officially recorded plat or subdivision, or a parcel of land officially recorded as a unit of property, and is described in metes and bounds.

"Lot, panhandle" means an interior lot having at least ten feet of frontage on one street only. (See TMC 18.04.230.)

"Lot, through" means a lot that fronts on two parallel or nearly parallel streets, other than a corner lot. (See TMC 18.04.230.)

"Lot width" means the width of the lot measured at the front building line.

"Low impact development" means a stormwater and land use management strategy that strives to mimic predisturbance hydrologic processes of infiltration, filtration, storage, evaporation and transpiration by emphasizing conservation, use of on-site natural features, site planning, and distributed stormwater management practices that are integrated into a project design.

"Low-income households" mean households with income less than or equal to eighty percent and more than fifty percent of Thurston County's median household income as determined by the Office of Financial Management.

"Lowest floor" means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood-resistant enclosure, useable solely for parking of vehicles, building access or storage, in an area other than a basement area, is not considered a building's lowest floor; provided, that such enclosure is not built so as to render the structure in violation of all applicable nonelevation design requirements.

(Ord. O2017-022, Amended, 12/05/2017; Ord. O2017-003, Amended, 04/18/2017; Ord. O2016-037, Amended, 01/03/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2005-011, Amended, 07/05/2005; Ord. O95-035, Amended, 12/19/1995; Ord. 883, Added, 05/06/1984. Formerly 18.04.305 – 18.04.355)

Section 21. Section TMC 18.04.130, M definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.130 M definitions.

"Major transit stop" means (A) a stop on a high capacity transportation system funded or expanded under the provisions of chapter 81.104 RCW; (B), commuter rail stops; (C) stops on rail or fixed guideway systems; (D) stops on bus rapid transit routes, including those stops that are under construction, or (E) stops for a bus or other transit mode providing actual fixed route service at intervals of at least 15 minutes for at least five hours during the peak hours of operation on weekdays. Section E of the definition is applicable only to accessory dwelling units and co-living housing.

"Mansard roof" means a roof or roof-like facade with a slope of sixty degrees or more from the horizontal and architecturally able to be treated as a building wall.

"Manufactured home" means a single-family dwelling built according to the Department of Housing and Urban Development Manufactured Home Construction and Safety Standards Act, which is a national, preemptive building code. A manufactured home does not meet the criteria to be classified as a "designated manufactured home." See also "designated manufactured home" and "new manufactured home," TMC 18.04.040 and 18.04.140.

"Manufactured home park" means any real property lot which is rented or held out for rent to others for the placement of three or more manufactured homes, designated manufactured homes, or new manufactured homes for the primary purpose of production of income, except where such real property lot is rented or held out for rent for seasonal recreational purposes only and is not intended for year-round occupancy.

"Marijuana processor" means a person licensed by the State Liquor and Cannabis Board to process marijuana into useable marijuana and marijuana-infused products, package and label useable marijuana and marijuana-infused products for

sale in retail outlets, and sell useable marijuana and marijuana-infused products at wholesale to marijuana retailers.

"Marijuana producer" means a person licensed by the State Liquor and Cannabis Board to produce and sell marijuana at wholesale to marijuana processors and other marijuana producers.

"Marijuana retailer" means a person licensed by the State Liquor and Cannabis Board to sell useable marijuana and marijuana-infused products in a retail outlet.

"Marquee" means a roof-like structure made of solid materials, projecting over an entrance to a building and connected to the wall with no columnar support. The front of the marquee is often hung from chains or rods extending out from the face of the building.

"Massing" means the physical bulk or volume of a building or parking structure. In architectural terms, a single mass building is a single geometric form such as rectangular or square, and may include a simple roof form with no variation in the roofline. Massing refers to variation in the mass and may involve multiple masses joined together.

"Mean sea level" means the average height of the sea for all stages of the tide.

"Medical clinic" means a place where medical or dental care is provided to persons on an outpatient basis by professionals in the health care field.

"Mental health facilities" means medical facilities offering assistance to persons afflicted with mental disease including but not limited to congregate care facilities; adult residential treatment facilities; evaluation and treatment centers.

"Middle housing" means buildings that are compatible in scale, form, and character with single-family detached dwellings that contain two to four attached or stacked dwelling units including duplexes, triplexes, quadplexes, and stacked flats, as well as townhouses or cottage housing with three or more dwelling units.

"Mineral extraction" means the removal of minerals, including, but not limited to, sand, gravel, shale, rock, coal, soil, peat or clay, from an excavation in the earth. This shall not include the following:

A. Excavation and grading at building construction sites where such construction is authorized by a valid building permit; or

B. Excavation and grading in public rights-of-way for the purpose of on-site road construction, or in private rights-of-way for the same purpose if authorized by the public works department.

"Ministorage facilities" means a storage facility providing garages, rooms, closets and lockers for rent on an individual basis, usually by month.

"Mixed use" is characterized by:

A. Complementary land uses – land uses that are at least compatible and, preferably, work together for mutual benefit (e.g., personal commercial services that serve adjacent residences).

B. Convenient pedestrian connections.

"Mixed use development" means the development of a parcel or structure with one or more different land uses, such as a combination of residential, office, manufacturing, retail, public, or entertainment in a single or physically integrated group of structures.

"Mixed use structure" means a building that includes an appropriate combination of multiple uses located inside a single structure. A mixed use structure is characterized as a structure where a variety of different living activities (live, work, shop and play) are in close proximity (walking distance) to residents. A mixed use structure can be vertical in nature, meaning a single structure with retail, service or commercial and office uses on the ground floor, and residential, senior housing facilities and office uses on the floors above. A mixed use structure can also be horizontal in nature, meaning a single structure that provides retail, service, commercial or office uses in the portion of the building fronting the street with attached residential, senior housing facilities or office uses behind.

"Mobile home" means a factory-built dwelling built prior to June 15, 1976, to standards other than the United States Department of Housing and Urban Development (HUD) Code, and acceptable under applicable state codes in effect at the time of construction or introduction of the home into the state. Mobile homes have not been built since introduction of the HUD Manufactured Home Construction and Safety Standards Act.

"Mobile home park" means any real property lot which is rented or held out for rent to others for the placement of three or more mobile homes for the primary purpose of production of income, except where such real property lot is rented or held out for rent for seasonal recreational purposes only and is not intended for year-round occupancy.

"Modular unit" means a factory-fabricated transportable building unit designed to be used by itself or to be incorporated with similar units at a building site into a modular structure to be used for residential, commercial, educational, or industrial purposes. A modular unit shall be built to comply with the building code as adopted in TMC Title 15.

"Monument sign" means a freestanding sign in which the entire bottom of the sign is mounted on and permanently attached to the ground. A monument sign shall not be more than six feet in height.

Motel. See "hotel" or "motel," TMC 18.04.080.

"Motor freight terminal" means a facility used for either (A) the loading, unloading, dispensing, receiving, interchanging, gathering, or otherwise physically handling freight for shipment or (B) exchanging freight by motor carriers between vehicles.

Motor freight terminals include but are not limited to cross-dock operations. Motor freight terminals do not include mail or package delivery services and buildings with twelve or fewer loading docks.

"Motor vehicle sales facility" means any area of land, including the structures thereon, that is used for the display, sale, rental, or leasing of operable motorized vehicles, including but not limited to automobiles, RVs and boats, and related nonmotorized vehicles such as trailers, and which may or may not include on-site service and repair facilities. This definition does not include motorsport vehicles, which are defined separately in this section.

"Motorsports facility" means any area of land, including the structures thereon, that contains a raceway, racetrack, or course for motorized vehicles.

"Motorsports sales facility" means any area of land, including the structures thereon, that is used for the display, sale, rental, or leasing of motorsport vehicles; and which may or may not include on-site service and repair facilities. Motorsport vehicles include, but are not limited to: all-terrain vehicles (ATVs), motorcycles (both street legal and off-road), three-wheelers, four-wheelers, jet skis and other similar personal watercraft, and snowmobiles.

"Multifamily Dwelling" means a building containing five or more residential dwelling units and where all dwelling units are located on the same lot.

~~Multifamily Dwelling. See "dwelling, multifamily," TMC 18.04.040.~~

"Multiple building complex" means a group of two or more commercial or industrial structures sharing a common development plan.

"Multiple tenant building" means a single structure housing two or more commercial or industrial businesses that share the same lot, access and/or parking facilities.

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2017-023, Amended, 07/17/2018; Ord. O2013-013, Amended, 10/01/2013; Ord. O2012-003, Added, 07/17/2012; Ord. O2010-017, Amended, 12/21/2010; Ord. O2008-017, Added, 10/21/2008; Ord. O2008-016, Added, 09/16/2008; Ord. O2005-011, Amended, 07/05/2005; Ord. O2003-001, Added, 02/18/2003; Ord. O2002-019, Added, 01/07/2003; Ord. O95-035, Amended, 12/19/1995; Ord. 1157, Amended, 06/21/1988; Ord. 883, Added, 05/06/1984. Formerly 18.04.356 – 18.04.390)

Section 22. Section TMC 18.04.140, N definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.140 N definitions.

"Neighborhood community center" means a facility which shall provide services of a social and cultural nature to the neighborhood in which it is located. It shall be owned and operated by a public agency or by an association which is organized and operated on a nonprofit basis. Although food, meals and beverages may be served on

such premises, provided adequate facilities are available, this definition shall not include dormitories.

"Neighborhood-oriented commercial center" means no more than three commercial land uses located on one lot or contiguous lots within a predominantly residential area. A neighborhood-oriented commercial center consists only of retail and/or service uses oriented to serve residents of the immediate neighborhood and is designed and operated to minimize impact on surrounding residences.

"New construction" means structures for which the start of construction commenced on or after the effective date of the ordinance codified in this title, as amended.

"New manufactured home" means any manufactured home required to be titled under RCW Title 46, which has not been previously titled to a retail purchaser, and is not a used mobile home as defined in RCW 82.45.032(2). See also "designated manufactured home" and "manufactured home," TMC 18.04.040 and 18.04.130.

"Nonconforming building" or "nonconforming use" means a building or use, lawfully existing on the effective date of the ordinance codified in this title, which does not conform with the regulations of the zon~~e~~ing district in which is it located.

"Nonionizing electromagnetic radiation (NIER)" means electromagnetic radiation unable to cause ionization, emitted at frequencies between one-hundredth MHz and one hundred thousand MHz.

"Nurseries or greenhouses" means land or greenhouses used to raise flowers, shrubs, trees and plants for retail or wholesale.

"Nursery school" means an institution primarily engaged in educational work with preschool children and in which no child is enrolled on a regular basis for more than eight hours per day.

Nursing Home. See "~~boardinghouse~~co-living housing," "group foster home," and "rest home," TMC 18.04.020, 18.04.070 and 18.04.170.

(Ord. O2013-013, Amended, 10/01/2013; Ord. O2005-011, Added, 07/05/2005; Ord. O95-035, Amended, 12/19/1995; Ord. 1144, Amended, 01/05/1988; Ord. 883, Added, 05/06/1984. Formerly 18.04.395 – 18.04.410)

Section 23. Section TMC 18.04.160, P definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.160 P definitions.

Panhandle Lot. See "lot, panhandle," TMC 18.04.120.

"Parapet" means a low protective wall along the edge of a roof or balcony.

"Parcel" means a tract or plot of land of any size, which may or may not be subdivided or improved.

"Park and ride facility" means a parking structure or surface parking lot intended primarily for use by persons riding transit or carpooling and that is owned or

operated by either Intercity Transit or another entity with the concurrence of Intercity Transit.

“Parking lot” means an open area, other than a street or alley, whether privately or publicly owned, which is used for the parking of more than four automobiles and is available to the public.

“Parking space” means an area that is improved, maintained, and used for the sole purpose of temporary accommodation of a motor vehicle, and having access to a public street or alley. (See Figure 18.50.060(A) for parking space design standards.)

“Parking structure” means a structure of two or more stories, whether privately or publicly owned, which is used for the parking of more than four automobiles.

“Pedestrian-oriented sign” means any sign intended to attract pedestrian traffic that is at a ninety-degree angle to the adjacent building face. The sign may either be suspended beneath a pedestrian weather protection structure or be attached to and project from the building wall.

“Pedestrian plaza or courtyard” means an area between a building or parking structure and a public right-of-way which promotes visual and pedestrian access onto the site and which provides pedestrian-oriented amenities and landscaping to enhance the public’s use of the space.

“Pennants” means any lightweight plastic, fabric, or other material, whether or not containing a message of any kind, suspended from a rope, wire, string, or other device, usually in series, designed to move in the wind.

“Pergola” means an open structure usually consisting of parallel colonnades supporting a roof of beams and crossing rafters or trellis work (similar to an arbor).

“Permanent affordable housing” means a project in which all or a portion of the residential dwelling units within the project are set aside for or are occupied by low-income households for a term of at least fifty years. Permanent affordable housing shall have costs, including utilities other than telephone, that do not exceed thirty percent of the monthly income of a household whose income does not exceed sixty percent of median household income for rental housing and eighty percent of the median household income for owner-occupied housing adjusted for household size in Thurston County, as reported by the United States Department of Housing and Urban Development. The applicant shall record a covenant or deed restriction that ensures the continuing rental or ownership of units subject to these affordability requirements consistent with the conditions in chapter 84.14 RCW for a period of no less than 50 years. The covenant or deed restriction shall address criteria and policies to maintain public benefit if the property is converted to a use other than that which continues to provide for permanently affordable housing.

“Permanent supportive housing” means subsidized, leased housing with no limit on length of stay that prioritizes people who need comprehensive support services to retain tenancy and utilizes admissions practices designed to use lower barriers to entry than would be typical for other subsidized or unsubsidized rental housing,

especially related to rental history, criminal history, and personal behaviors. Permanent supportive housing is paired with on-site or off-site voluntary services designed to support a person living with a complex and disabling behavioral health or physical health condition who was experiencing homelessness or was at imminent risk of homelessness prior to moving into housing to retain their housing and be a successful tenant in a housing arrangement, improve the resident's health status, and connect the resident of the housing with community-based health care, treatment, or employment services. Permanent supportive housing is subject to all of the rights and responsibilities defined in Chapter 59.18 RCW, Residential Landlord-Tenant Act.

"Permitted use" means any authorized use allowed alone or in conjunction with other uses in a specified zon~~ing~~ district and subject to the limitations of the regulations of such use district.

"Personal service" means a business which is neither the practice of a profession, nor dealing primarily with the sale of products as stock-in-trade on the premises. Such businesses include, but are not limited to, barber and beauty shops, tailoring, shoe repairing, photographic studios, tanning parlors, and pet grooming and obedience training.

"Planned unit development" means any development, whether residential, commercial, or industrial, which is approved and developed in accordance with the terms of this title.

"Point-of-purchase sign" means any exterior sign placed at the location of purchase.

"Precision instrument runway" means a runway that is designed to provide an approach path for exact alignment and descent of an aircraft on final approach using vertical and horizontal navigational aid equipment.

"Preschool/child care facility" means an activity which would regularly provide care, whether for compensation or not, to a group of four or more but less than twelve children, twelve years of age or under, who are not related to the occupant of the facility.

"Principal residential structure" means the single-family detached dwelling or middle housing located on the same lot as an accessory dwelling unit. If the single-family detached dwelling meets the accessory dwelling unit size provisions in TMC 18.04.010, it can be reclassified as an accessory dwelling unit, and a new single-family detached dwelling or middle housing can be designated as the principal residential structure during or after subsequent development.

"Prisons and prerelease facilities" means a public facility for the incarceration of people convicted of felony crimes serving a court imposed sentence. This includes minimum security facilities which house inmates with less than three years remaining to serve who meet stringent public safety placement criteria established by the Department of Corrections, medium security facilities which have strict security standards including a fenced and patrolled perimeter, and high security

facilities which offer the greatest level of security to minimize the potential for escape.

“Private clubs and lodges” means a building in which members of a community or association may gather for social, educational, or cultural activities.

“Private post-secondary education facility” means a privately owned facility that provides a curriculum of post-secondary academic instruction including technical schools, junior colleges, colleges, and universities.

“Profession” means an occupation which is distinguishable from other occupations by virtue of characteristics traditionally associated with its practice and/or with the conduct of the practitioner. A profession is the body of such qualified persons of one specific occupation or field. It conducts business on a client/appointment rather than customer/sales basis. A professional client relationship would stress the professional in an advisory and counseling rather than purely transacting role.

“Professional office” means an office used or suitable for use by a profession or professional having great skill in that particular profession and who receives compensation for the performance of that profession.

“Professional service” means a business which is operated by a profession or professional who receives compensation for the performance of that profession on an appointment/client basis rather than customer/sales basis. A professional client relationship would stress the professional in an advisory and counseling rather than purely transacting role. Such businesses include, but are not limited to, law firms, architecture and/or engineering firms, real estate agencies, mortgage brokerages, accounting firms, and insurance agencies.

“Public building” means any structure or facility owned or leased, and principally used, by a governmental agency.

“Public facade” means any side of a commercial building having a doorway open for regular ingress and egress by customers. For purposes of determining sign size allowances on multiple tenant facilities having individual entrances for businesses, the “public facade” of a particular business shall mean that portion of the total public facade upon which the business has frontage.

“Public utility” means any person, firm or corporation, municipal department, board or commission, duly authorized to furnish to the public, under federal, state or municipal authority, services such as gas, steam, electricity, sewage disposal, water supply, communication or telegraph facilities.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2017-007, Amended, 11/05/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2004-009, Amended, 12/07/2004; Ord. O2002-019, Amended, 01/07/2003; Ord. O2001-012, Amended, 03/19/2002; Ord. O98-009, Amended, 10/20/1998; Ord. O95-035, Amended, 12/19/1995; Ord. 1399, Added, 11/16/1993; Ord. 883, Added, 05/06/1984. Formerly 18.04.430 – 18.04.490)

Section 24. A new Section TMC 18.04.165, Q definitions, is hereby added to the Tumwater Municipal Code to read as follows:

18.04.165 Q definitions.

"Quadplex" means one building designed for and used exclusively for occupancy by four families independent of each other where all four dwelling units are located on the same lot and are completely separated from each other, except for common stairwells or garages.

Section 25. Section TMC 18.04.170, R definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.170 R definitions.

"Radiation machine" means any device capable of producing ionizing radiation except those which produce radiation only from radioactive material.

"Radioactive material" means any material (solid, liquid or gas) which emits radiation spontaneously.

"Recreation, active" means leisure activities, usually performed with others, often requiring equipment and taking place at prescribed places, sites or fields. The term "active recreation" includes, but is not limited to, swimming, tennis and other court games, baseball and other field sports, golf and playground activities.

"Recreation facilities" means public or private facilities for use by the general public such as boat or yacht clubs, docks, swimming pools, athletic clubs, golf and country clubs. Recreation facilities shall not include intensive recreation uses such as race tracks or amusement parks.

"Recreation, passive" means low-intensity recreational uses or activities including, but not limited to, viewpoints, unpaved trails, limited picnic facilities, hiking, nature study, photography and fishing.

"Recycling collection center" means a collection point for small recyclable items and materials, such as cans, bottles, newspapers, secondhand goods and used motor oil. Activities of a recycling collection center are limited to sorting, compacting and transferring.

"Religious organization" means the federally protected practice of a recognized religious assembly, school, or institution that owns or controls real property and includes, but is not limited to, churches, mosques, synagogues, temples, nondenominational ministries, interdenominational and ecumenical organizations, mission organizations, faith-based social agencies, and other entities whose principal purpose is the study, practice, or advancement of religion.

"Residential care facility" means a facility, licensed by the state, that cares for at least five but not more than fifteen people with functional disabilities, that has not been licensed as an adult family home pursuant to RCW 70.128.060.

"Rest home," "convalescent home," "nursing home," etc., mean a home operated similarly to co-living housing~~a boarding home~~ but not restricted to any number of guests or guestrooms, and the operator of which is licensed by the state to give special care or supervision to his or her charges; and in which nursing, dietary, and other personal services are furnished to convalescents, invalids and aged persons. (See TMC 18.04.020 and 18.04.070.)

"Retail sales" means the selling of goods or merchandise and related services to the general public for personal or household consumption. Services shall be secondary to the sale of goods and merchandise at the establishment. The retail sales establishment is usually a place of business and is engaged in activity to attract the general public to buy goods.

"Rezone" means a change in zoning classification of an area from one use district to another.

"Ribbons" has the same meaning as pennants.

"Riding academy" means any establishment where horses are kept for riding, driving, or stabling for compensation, or as an accessory use in the operation of a club, association, ranch, or similar establishment.

"Risk potential activity" or "risk potential facility," in accordance with RCW 71.09.020, means an activity or facility that provides a higher incidence of risk to the public from persons conditionally released from the special commitment center. Risk potential activities and facilities include: public and private schools, school bus stops, licensed day care and licensed preschool facilities, public parks, publicly dedicated trails, sports fields, playgrounds, recreational and community centers, churches, synagogues, temples, mosques, public libraries, and others identified by the Department of Social and Health Services following the hearings on a potential site required in RCW 71.09.315. For purposes of this chapter, "school bus stops" does not include bus stops established primarily for public transit.

"Roof" means a structural covering over any portion of a building or structure including projections beyond the walls or supports of the building or structure.

"Roofline" means where a wall meets the roof.

~~"Roominghouse" means a dwelling unit having only one kitchen and used for the lodging (with or without meals) for compensation of persons other than the related family members or operator of such dwelling unit. A roominghouse that is rented for less than thirty consecutive days at a time requires a business license per TMC Chapter 5.04. A roominghouse may allow for an unlimited stay, unlike a bed and breakfast which is limited to two weeks.~~

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2003-001, Amended, 02/18/2003; Ord. O2002-013, Added, 08/20/2002; Ord. O2001-012, Amended, 03/19/2002; Ord. O95-035, Amended, 12/19/1995; Ord. 1307, Amended, 11/05/1991; Ord. 1289, Added, 06/04/1991; Ord. 883, Added, 05/06/1984. Formerly 18.04.491 – 18.04.520)

Section 26. Section TMC 18.04.180, S definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.180 S definitions.

"School" means an institution of learning, whether public or private, which offers instruction in those courses of study required by the Washington Education Code or which is maintained pursuant to standards set by the State Board of Education. This definition includes a nursery school, kindergarten, elementary school, junior high school, senior high school or any special institution of education, but it does not include a vocational or professional institution of higher education, including a community or junior college, or university.

"Screening" means a continuous fence or wall supplemented with landscaping, or an evergreen hedge, or combination thereof, that effectively provides a sight-obscuring and sound-absorbing buffer.

"Secure community transition facility" means a residential facility for persons civilly committed and conditionally released to a less restrictive alternative pursuant to Chapter 71.09 RCW. A secure community transition facility has supervision and security, and either provides or ensures the provision of sex offender treatment services. Secure community transition facilities include but are not limited to the facilities established pursuant to RCW 71.09.250 and any community-based facilities established under Chapter 71.09 RCW and operated by the Secretary of Social and Health Services or the Secretary's designee or under contract with the Secretary.

"Senior housing facility, assisted" or "assisted senior housing facility" means an assisted living facility, which is an establishment which provides living quarters and a variety of limited personal care and supportive health care to persons fifty-five years of age or older in accordance with 42 U.S.C. 3607 who are unable to live independently, but who do not need the skilled nursing care of a rest home, nursing home, or convalescent center. These facilities may consist of individual dwelling units of a barrier-free design, with separate bathroom facilities and a full kitchen. The facility may provide a minimal amount of supportive health care monitoring, such as assistance with medication, but is limited to health care services that do not require state or federal licensing. These facilities may have a communal dining area, recreation facilities (such as a library, lounge, or game room), laundry facilities, and open space.

"Senior housing facility, independent" or "independent senior housing facility" means an independent living facility consisting of dwellings designed for and occupied by persons fifty-five years of age or older in accordance with 42 U.S.C. 3607. These facilities may consist of individual dwelling units of a barrier-free design, with separate bathroom facilities and a full kitchen. These facilities may have a communal dining area, recreation facilities (such as a library, lounge, or game room), laundry facilities, and open space. No nursing staff or assisted living staff is provided in an independent living facility.

Service Station. See “automobile service station,” TMC 18.04.010.

“Setback” means the minimum required distance between the property line and building line subject to the limitations provided in TMC 18.42.040.

“Sewage treatment facilities” means sanitary sewer treatment services provided by a municipality or a special purpose district not including individual or community wastewater treatment systems.

“Sexually oriented businesses” means adult arcades, adult bookstores, adult novelty stores, adult video stores, adult cabarets, adult motion picture theaters, adult theaters, sexual encounter establishments, semi-nude model studios, escort agencies and adult motels. “Sexually oriented businesses” includes those businesses defined as follows:

A. “Adult arcade” means an establishment where, for any form of consideration, one or more still or motion picture projectors, slide projectors, or similar machines, or other image producing machines, for viewing by five or fewer persons each, are used to show films, motion pictures, video cassettes, slides, or other photographic reproductions which are characterized by the depiction or description of specified sexual activities or specified anatomical areas.

B. “Adult bookstore, adult novelty store, or adult video store” means a commercial establishment which has as a significant or substantial portion of its stock-in-trade or a significant or substantial portion of its revenues or devotes a significant or substantial portion of its interior business or advertising to the sale or rental for any form of consideration of any one or more of the following:

1. Books, magazines, periodicals or other printed matter, or photographs, films, motion pictures, video cassettes, slides, or other visual representations which are characterized by the depiction or description of specified sexual activities or specified anatomical areas; or

2. An establishment may have other principal business purposes that do not involve the offering for sale or rental of materials depicting or describing specified sexual activities or specified anatomical areas, and still be categorized as an adult bookstore, adult novelty store, or adult video store. Such other business purposes will not serve to exempt such establishments from being categorized as an adult bookstore, adult novelty store, or adult video store so long as one of its principal business purposes is offering for sale or rental, for some form of consideration, the specified materials which depict or describe specified anatomical areas or specified sexual activities.

3. Video stores that sell and/or rent only video tapes or other photographic reproductions and associated equipment shall come within this definition as specified by Ordinance No. O94-020 if twenty percent or more of its stock-in-trade or revenues comes from the rental or sale of video tapes or other photographic reproductions or associated equipment which are characterized by

the depiction or description of specified sexual activities or specified anatomical areas.

C. "Adult cabaret" means a nightclub, bar, restaurant, or similar commercial establishment, whether or not alcoholic beverages are served, which features: (1) persons who appear nude or semi-nude; (2) live performances which are characterized by the exposure of specified anatomical areas or by specified sexual activities; or (3) films, motion pictures, video cassettes, slides, or other photographic reproductions which are characterized by the depiction or description of specified sexual activities or specified anatomical areas.

D. "Adult motel" means a hotel, motel or similar commercial establishment which:

1. Offers accommodation to the public for any form of consideration and provides patrons with closed-circuit television transmissions, films, motion pictures, video cassettes, slides, or other photographic reproductions which are characterized by the depiction or description of specified sexual activities or specified anatomical areas, and has a sign visible from the public right-of-way which advertises the availability of this adult type of photographic reproductions; or

2. Offers a sleeping room for rent for a period of time that is less than twenty-four hours; or

3. Allows a tenant or occupant of a sleeping room to subrent the room for a period of time that is less than twenty-four hours.

E. "Adult motion picture theater" means a commercial establishment where films, motion pictures, video cassettes, slides, or similar photographic reproductions characterized by the depiction or description of specified anatomical areas or specified sexual activities are regularly shown for any form of consideration.

F. "Adult theater" means a theater, concert hall, auditorium, or similar commercial establishment which, for any form of consideration, regularly features persons who appear nude or semi-nude, or live performances which are characterized by the exposure of specified anatomical areas or specified sexual activities.

G. "Escort agency" means a person or business association who furnishes, offers to furnish, or advertises to furnish escorts as one of its primary business purposes for a fee, tip, or other consideration.

H. "Nude or semi-nude model studio" means any place where a person, who appears nude or semi-nude or displays specified anatomical areas, is provided for money or any form of consideration to be observed, sketched, drawn, painted, sculptured, photographed, or similarly depicted by other persons; provided, however, such uses if exempt under Ordinance No. O94-020 shall also be exempt from the provisions of the ordinance codified in this section.

(Note: Ordinance No. O94-020 which regulates the operation of sexually oriented businesses provides exemptions for the following activities:

1. Persons appearing in a state of nudity or semi-nudity in a modeling class operated by:

a. A proprietary school, licensed by the state of Washington; a college, junior college, or university supported entirely or partly by taxation.

b. A private college or university approved by a national accrediting association, which maintains and operates educational programs in which credits are transferable to a college, junior college or university supported entirely or partly by taxation.)

I. "Sexual encounter establishment" means a business or commercial establishment that, as one of its primary business purposes, offers for any form of consideration a place where two or more persons may congregate, associate, or consort for the purpose of specified sexual activities or the exposure of specified anatomical areas or activities when one or more persons are semi-nude. The definition of a sexually oriented business shall not include an establishment where a medical practitioner, psychologist, psychiatrist, or similar professional person licensed by the state engages in medically approved and recognized sexual therapy.

"Shopping center" means a group of retail and service establishments clustered on a contiguous site, designed and built as a unit or organized as a unified and coordinated shopping area.

"Shoreline" means a line determined by the ordinary high-water mark, as defined in the Shoreline Management Act of 1971 as follows:

Ordinary high-water mark on all lakes, streams, and tidal water is that mark that will be found by examining the beds and banks and ascertaining where the presence and action of waters are so common and usual, and so long continued in ordinary years, as to mark upon the soil a character distinct from that of the abutting upland, in respect to vegetation, as that condition exists on the effective date of this chapter or as it may naturally change thereafter; provided, that in any area where the ordinary high-water mark cannot be found, the ordinary high-water mark adjoining saltwater shall be the line of mean higher high tide and the ordinary high-water mark adjoining freshwater shall be the line of mean high water.

(Or, as shown by markings of water surface contaminants on rocks, bulkheads, pilings, or other relatively permanent structure or natural feature.)

"Sign" means any visual communication device, structure, or fixture that generally utilizes graphics, symbols, numbers, or words to convey information.

"Sign of an official nature" means any sign posted by or required to be posted by a governmental agency that is necessary to protect and regulate the public health, safety, or welfare. Examples of such signs include traffic or pedestrian directional

and control signs, public safety warnings or hazards signs, street banners and street pole banners in compliance with the Tumwater street banner and street pole banner policies, and official public notice signs.

"Sign structure" means any structure that supports or is capable of supporting any sign defined in this code.

"Single-family detached dwelling" means a building that is not attached in any way to another dwelling unit or structure that provides complete, independent living facilities for a family.

Solar Energy System.

A. "Solar energy system" means any device or combination of devices or elements which rely upon direct sunlight as an energy source, including, but not limited to, any substance or device which collects sunlight for use in:

1. The heating or cooling of a structure or building;
2. The heating or pumping of water;
3. Industrial, commercial, or agricultural processes; or
4. The generation of electricity.

B. A solar energy system may be used for purposes in addition to the collection of solar energy. These uses include, but are not limited to, serving as a structural member or part of a roof of a building or structure and serving as a window or wall. (See TMC 18.04.050.)

"Solid waste handling facilities" means facilities that receive, process, transfer, collect, or dispose of residential, industrial and commercial solid waste as defined by Chapter 70.95 RCW.

"Source of nonionizing electromagnetic radiation" means an RF facility emitting between one-hundredth MHz and one hundred thousand MHz of effective radiated power of more than or equal to one thousand watts.

"Sponsoring agency" means a church or faith based organization that joins in an application with a host agency for a city temporary use permit and assumes responsibility for providing basic services and support to temporary emergency homeless encampment residents, such as hot meals and coordination of other needed donations and services.

"Stacked flat" means a residential building of no more than three stories in which each floor is one dwelling unit and the dwelling units may be separately rented or owned.

"State education facilities" means education facilities that are of a statewide nature including but not limited to state colleges, universities and community colleges.

"Story" means that portion of a building represented by space between the top surface of any floor and the top surface of the floor next above, except the topmost

story shall have the ceiling or roof above as the top surface of the floor next above. The height of a story shall be measured by the vertical distance between the top surfaces.

“Stream” shall mean all types of natural surface watercourses, including but not limited to rivers and creeks, that convey perennial or intermittent flows derived from precipitation runoff and/or groundwater discharge.

“Streamers” has the same meaning as pennants.

“Street” means any public thoroughfare or right-of-way which affords the principal means of access to abutting property.

“Street banner” means a banner that is suspended over a city street and mounted on either side to city-owned banner mounting facilities in compliance with the Tumwater street banner and street pole banner policies.

“Street pole banner” means a banner that protrudes over a public walkway or street and that is mounted to a government-owned pole located within the public right-of-way such as a light pole. Such banners must comply with the Tumwater street banner and street pole banner policies.

“Structure” means a manmade object of any kind, which is built or constructed, or any piece of work built up or composed of parts joined together in some definite manner and affixed to the earth. (See TMC 18.04.020.)

“Structure, landscaping” means a fence, wall, trellis, statue or other similar landscaping or ornamental object.

Substantial Improvement.

A. “Substantial improvement” means any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds fifty percent of the market value of the structure, either:

1. Before the improvement or repairs are started; or

2. Before the damage occurred, if the structure has been damaged and is being restored.

B. This definition does not apply to:

1. Any project for improvement of a structure to comply with existing state or local health, sanitary or safety code specifications which are solely necessary to assure safe living conditions; or

2. Any alteration of a structure listed on the National Register of Historic Places or State Inventory of Historic Places.

“Support facilities” means facilities such as streets, roads, highways, sidewalks, street lighting systems, traffic signals, fire stations, electrical switching substations, electrical power transmission towers, natural gas pipelines, telephone exchanges, natural gas gate stations and regulating stations, domestic water systems, storm

and sanitary sewer systems, and wells or well fields, all of which are continuously related to public (or private) services.

"Supportive housing facilities" means a collective term for the following housing types: emergency housing, emergency shelters, permanent supportive housing, and transitional housing, as defined in TMC Chapter 18.04.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2019-007, Amended, 09/03/2019; Ord. O2017-007, Amended, 11/05/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2013-013, Amended, 10/01/2013; Ord. O2007-017, Added, 12/18/2007; Ord. O2006-019, Amended, 08/15/2006; Ord. O2002-013, Added, 08/20/2002; Ord. O98-001, Added, 09/15/1998; Ord. O95-035, Amended, 12/19/1995; Ord. O94-014, Added, 07/09/1994; Ord. 1144, Amended, 01/05/1988; Ord. 883, Added, 05/06/1984. Formerly 18.04.525 – 18.04.595)

Section 27. Section TMC 18.04.190, T definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.190 T definitions.

"Tavern" means an establishment where beer and/or wine is served to the public in accordance with a tavern license issued by the Washington State Liquor Control Board pursuant to RCW 66.24.330.

"Temporary sign" means any sign, banner, pennant, valance, or advertising display constructed of cloth, canvas, light fabric, cardboard, or other light materials, with or without frames, not permanently mounted to the ground or a structure and displayed for a limited period.

Through Lot. See "lot, through," TMC 18.04.120.

"Townhouse" ~~or "rowhouse"~~ means one of a line or row of three or more dwelling units attached one to the other, having common walls between individual units, generally two stories in height (and sometimes three). Each unit occupies the space between common walls from the lowest level to the roof, where common walls are the property lines between units and that have a yard or public or private street, alleys, pathways, or similar feature on not less than two sides.

"Tract" means a lot usually held in common ownership by an association, or reserved for future development.

Trailer. See "mobile home" and "travel trailer," TMC 18.04.130 and this section.

"Transitional housing" means housing providing stability for residents for a limited time period, usually two weeks to twenty-four months, to allow them to recover from a crisis such as homelessness or domestic violence before transitioning into permanent housing. Transitional housing often offers supportive services, which enable a person to transition to an independent living situation.

"Translucent panels" means a method of illuminating signs in which the light source is obscured from view by a panel that allows light to pass through but diffuses it so that the lighting source cannot be distinguished.

"Transmission tower" means a structure that is constructed above ground or water, or is attached to or on top of another structure, and is intended to support an antenna and accessory equipment, or which is itself an antenna.

"Transportation facilities, large scale or regional," means transportation facilities that are meant to serve Thurston County and/or the Puget Sound region as a whole that include but are not limited to heavy rail terminals, storage and maintenance facilities and large scale bus terminals, storage and maintenance facilities.

"Transportation terminal" means a facility which serves primarily as a transfer point for changing from one mode of transportation to another.

"Travel trailer" means a vehicular, portable structure built on a chassis and designed to be used for temporary occupancy for travel, recreational or vacation purposes, or for intermittent road use, but not for permanent residential use. It shall have a visible manufacturer's certification tag showing it to be a travel trailer. A travel trailer is a structure that will not meet the requirements of the building code as adopted by TMC Title 15, and for the purpose of this title, a travel trailer shall not be deemed a mobile home.

"Triplex" means a building designed for and used exclusively for occupancy by three families independent of each other where all three dwelling units are located on the same lot and are completely separated from each other, except for common stairwells or garages.

"Truck stop" or "travel center" means a commercial facility that provides refueling, rest area, day or overnight parking and/or accommodation, maintenance of commercial vehicles, food, and other services for drivers traveling on the interstate highway system for personal, business, commercial, recreational, or other purposes. The vehicles serviced by a truck stop or travel center may include but are not limited to semi-trucks, haulers, recreational vehicles, campers, and automobiles.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2020-003, Amended, 09/15/2020; Ord. O2019-019, Amended, 07/23/2019; Ord. O2019-018, Amended, 04/02/2019; Ord. O2017-007, Amended, 11/05/2018; Ord. O2013-013, Amended, 10/01/2013; Ord. O2010-017, Amended, 12/21/2010; Ord. O2001-020, Added, 05/07/2002; Ord. O95-035, Amended, 12/19/1995; Ord. 1144, Amended, 01/05/1988; Ord. 883, Added, 05/06/1984. Formerly 18.04.597 – 18.04.620)

Section 28. Section TMC 18.04.210, V definitions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.04.210 V definitions.

"Valance" means the leading edge or vertical surface of an awning or canopy.

"Variance" means a modification of the regulations because of the unusual nature, shape, exceptional topographic conditions, or extraordinary situation or conditions connected with a specific piece of property, where the literal enforcement of this title would pose undue hardship on the applicant in carrying out the spirit or intent of this title.

"Very low-income households" mean households with income less than or equal to fifty percent of Thurston County's median household income as determined by the Office of Financial Management.

"Visual runway" means a runway intended solely for the operation of aircraft using visual approach procedures.

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2013-013, Amended, 10/01/2013; Ord. O2004-009, Amended, 12/07/2004; Ord. O95-035, Amended, 12/19/1995; Ord. 883, Added, 05/06/1984. Formerly 18.04.640 – 18.04.641)

Section 29. Section TMC 18.06.010, Districts designated, of the Tumwater Municipal Code is hereby amended to read as follows:

18.06.010 Districts designated.

In order to carry out the provisions of this title, the city is divided into the following districts:

A. RSR~~,~~ residential/sensitive resource zone district;

B. ~~SFL, single-family~~LDR low density residential zone district;

~~C. SFM, single-family medium density residential zone district;~~

C~~D~~. ~~MFM, multifamily~~MDR medium density residential zone district;

D~~E~~. ~~MFH, multifamily~~HDR high density residential zone district;

E~~F~~. NC~~,~~ neighborhood commercial zone district;

F~~G~~. MU~~,~~ mixed use zone district;

G~~H~~. GC~~,~~ general commercial zone district;

H~~I~~. ARI~~,~~ airport related industry zone district;

I~~J~~. LI~~,~~ light industrial zone district;

J~~K~~. HI~~,~~ heavy industrial zone district;

K~~L~~. HC~~,~~ historic commercial zone district;

L~~M~~. GB~~,~~ greenbelt zone district;

M~~N~~. OS~~,~~ open space zone district;

N~~O~~. AP~~,~~ airport (overlay zone district);

O~~P~~. PUD~~,~~ planned unit development (overlay zone district);

P~~Q~~. FP~~,~~ floodplain (overlay zone district);

QR. AQP~~,~~ aquifer protection (overlay zone district);

RS. CS~~,~~ community services zone district;

ST. TC~~,~~ town center zone district;

TU. MUO~~,~~ mixed use overlay zone district;

UV. GCO~~,~~ general commercial overlay zone district;

VW. MHP~~,~~ manufactured home park zone district;

WX. CBC~~,~~ Capitol Boulevard Community zone district;

XY. BD~~,~~ brewery district zone district.

(Ord. O2017-017, Amended, 09/19/2017; Ord. O2014-007, Amended, 07/15/2014; Ord. O2013-025, Amended, 01/07/2014; Ord. O2008-009, Amended, 02/17/2009; Ord. O2001-020, Amended, 05/07/2002; Ord. LEGEND

P = Permitted Use

C = Conditional Use

RSR = Residential/Sensitive Resource

~~SFL~~ LDR = ~~Single-Family~~ Low Density Residential

~~SFM = Single-Family Medium Density Residential~~

~~MFM~~ MDR = ~~Multifamily~~ Medium Density Residential

~~MFH~~ HDR = ~~Multifamily~~ High Density Residential

MHP = Manufactured Home Park

Table 18.07.010 Footnotes:

(1) "Bed and breakfasts" with only one guest room are a permitted use but a public notice that an application has been submitted shall be sent to immediate neighbors. Administrative decisions may be appealed pursuant to TMC Chapter 14.12.

~~(2) "Duplexes" are allowed in the residential/sensitive resource (RSR) and single-family low-density residential (SFL) zone districts on individual lots legally established before or on April 15, 2021. Duplexes shall not occupy more than twenty percent of the total lots in a new short plat or subdivision, which was legally established after April 15, 2021. In such cases, the community development director shall have the discretion to alter the percentage in order to allow the new short plat~~

~~or subdivision to meet minimum required densities due to topography or other special conditions related to the site, such as critical areas.~~

~~(3) "Duplexes" are allowed in the single-family medium density residential (SFM) zone district on individual lots legally established before or on April 15, 2021. Duplexes shall not occupy more than thirty percent of the total lots in a new short plat or subdivision, which was legally established after April 15, 2021. In such cases, the community development director shall have the discretion to alter the percentage in order to allow the new short plat or subdivision to meet minimum required densities due to topography or other special conditions related to the site, such as critical areas.~~

(~~4~~2) Single-family detached dwellings constructed after April 15, 2021, are not allowed in the ~~multifamily medium density residential (MFM)~~MDR medium density residential zone district.

~~(5) "Townhouses and rowhouses" are allowed within a residential planned unit development in the single family medium density residential (SFM) zone district.~~

Table 18.07.010 Explanatory Notes:

1. If the box is shaded, the use is not allowed in that zone district.
2. Accessory uses are listed in each zone district chapter.

(Ord. O2024-005, Amended, 12/03/2024; Ord. O2022-013, Amended, 10/04/2022; Ord. O2022-006, Amended, 08/01/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. LEGEND

P = Permitted Use

C = Conditional Use

NC = Neighborhood Commercial

CS = Community Services

MU = Mixed Use

CBC = Capitol Boulevard Community

GC = General Commercial

HC = Historic Commercial

TC = Town Center

Table 18.07.020 Footnotes:

(1) See TMC 18.23.020 for specific requirements for uses in the TC Town Center subdistricts.

(2) Automobile service stations are a conditional use for all parcels in the MU mixed use ~~(MU)~~ zone district in the city, except for those parcels in the MU mixed use ~~(MU)~~ zone district located on the north side of Israel Road SW between Littlerock Road SW and Tyee Drive SW where the use is prohibited.

(3) Mixed use structures subject to the size limitations for individual uses and TMC 18.18.050(D) and the density requirements for residential use in the NC neighborhood commercial ~~(NC)~~ zone district.

(4) Recreational facilities occupying no more than three thousand square feet in floor area in the NC neighborhood commercial ~~(NC)~~ zone district.

(5) Multifamily residential use as part of a mixed use development is allowed with a minimum density of four dwelling units per net acre and a maximum density of eight dwelling units per net acre, which is calculated by averaging the densities of all of the different types of housing provided within the development in accordance with TMC 18.14.050(B), excluding the area of the building and parking associated with the commercial development.

(6) Restaurants are a permitted use for all parcels in the MU mixed use ~~(MU)~~ zone district in the city, except for those parcels in the MU mixed use ~~(MU)~~ zone district located on the north side of Israel Road SW between Littlerock Road SW and Tyee Drive SW. In that location, restaurants without drive-through windows are allowed, but restaurants with drive-through windows are prohibited.

(7) Restaurants without drive-in windows occupying no more than three thousand square feet in floor area and drive-through espresso stands/coffee shops occupying no more than five hundred square feet in floor area in the NC neighborhood commercial ~~(NC)~~ zone district.

(8) Restaurants (without drive-through windows) are a permitted use for those parcels in the MU mixed use ~~(MU)~~ zone district located on the north side of Israel Road SW between Littlerock Road SW and Tyee Drive SW.

(9) Except temporary expansions of schools, such as portable classrooms.

(10) Taverns, cocktail lounges occupying no more than three thousand square feet in floor area in the NC neighborhood commercial ~~(NC)~~ zone district.

Table 18.07.020 Explanatory Notes:

1. If the box is shaded, the use is not allowed in that zone district.

2. Accessory uses are listed in each zoned district chapter.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2019-020, Amended, 11/19/2019; Ord. O2018-029, Amended, 01/15/2019; Ord. Section 32. Section TMC 18.08.020, Permitted Uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.08.020 Permitted uses.

Permitted uses in the RSR residential/sensitive resource zone district are as follows:

A. Single-family detached dwellings;

B. Duplexes ~~are allowed on individual lots legally established before or on April 15, 2021. Duplexes shall not occupy more than twenty percent of the total lots in a new short plat or subdivision which was legally established after April 15, 2021. In such cases, the community development director shall have the discretion to alter the percentage in order to allow the new short plat or subdivision to meet minimum required densities due to topography or other special conditions related to the site, such as critical areas~~;

C. Cottage housing;

D. Designated manufactured homes on single lots of record, in accordance with the provisions of TMC Chapter 18.48;

E. Parks, trails, open space areas, and other related passive recreation facilities;

F. Wildlife refuges and forest preserves;

G. Support facilities;

H. Family child care home; child mini-day care center, subject to TMC Chapter 18.52;

I. Adult family homes, residential care facilities;

J. The housing, care and keeping of animals consistent with the requirements of TMC Chapter 6.08;

K. Agriculture up to thirty acres in size, subject to TMC 18.42.070;

L. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family or ~~two-family~~middle housing dwelling;*

M. Community gardens;

N. Permanent supportive housing, subject to TMC 18.42.150;

O. Transitional housing, subject to TMC 18.42.150.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2005-011, Amended, 07/05/2005; Ord. O2000-004, Amended, 07/18/2000; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Amended, 12/19/1995; Ord. O95-014, Added, 07/18/1995)

Section 33. Chapter TMC 18.10, SFL single-family low density residential zone district, of the Tumwater Municipal Code is hereby deleted in its entirety as follows:

~~**Chapter 18.10**~~

~~**SFL SINGLE-FAMILY LOW DENSITY RESIDENTIAL ZONE DISTRICT**~~

~~Sections:~~
~~18.10.010 Intent.~~
~~18.10.020 Permitted uses.~~
~~18.10.030 Accessory uses.~~
~~18.10.040 Conditional uses.~~
~~18.10.050 Development standards.~~

~~18.10.060 Conversion plans.~~
~~18.10.070 Screening and buffering requirements.~~

~~18.10.010 Intent.~~

~~The intent of the single-family low density residential (SFL) zone district is to:~~

~~A. Preserve and establish peaceful low density neighborhoods in which owner-occupied single- family structures are the dominant form of dwelling unit;~~

~~B. Provide designated areas in which a minimum net density of four units per acre and a maximum net density of seven units per acre apply to promote the efficient use of land;~~

~~C. Guide residential development in such a manner as to encourage and plan for the availability of public services and community facilities such as utilities, police and fire protection, streets, schools, parks and recreation;~~

~~D. Encourage development of attractive residential areas that provide a sense of community, establish a pedestrian-friendly atmosphere and contain a variety of housing types;~~

~~E. Ensure that development without municipal utilities is at a density and in a configuration that enables cost effective urban density in-fill development when municipal utilities become available.~~

~~(Ord. O95-035, Added, 12/19/1995)~~

~~18.10.020 Permitted uses.~~

~~Permitted uses in the SFL district are as follows:~~

~~A. Single-family detached dwellings;~~

~~B. Cottage housing;~~

~~C. Designated manufactured homes on single lots of record, in accordance with the provisions of TMC Chapter 18.48;~~

~~D. Parks, trails, open space areas, and recreational facilities;~~

~~E. Support facilities;~~

~~F. Planned unit developments;~~

~~G. Family child care home; child mini-day care center, subject to TMC Chapter 18.52;~~

~~H. Adult family homes, residential care facilities;~~

~~I. Duplexes are allowed on individual lots legally established before or on April 15, 2021. Duplexes shall not occupy more than twenty percent of the total lots in a new short plat or subdivision, which was legally established after April 15, 2021. In such cases, the community development director shall have the discretion to alter the percentage in order to allow the new short plat or subdivision to meet minimum~~

required densities due to topography or other special conditions related to the site, such as critical areas;

J. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family or two-family dwelling;*

K. Agriculture up to thirty acres in size, subject to TMC 18.42.070;

L. Community gardens;

M. The housing, care and keeping of animals consistent with the requirements of TMC Chapter 6.08;

N. Wildlife refuges and forest preserves;

O. Permanent supportive housing, subject to TMC 18.42.150;

P. Transitional housing, subject to TMC 18.42.150.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-005, Amended, 09/07/2010; Ord. O2005-011, Amended, 07/05/2005; Ord. O2000-004, Amended, 07/18/2000; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.10.030 Accessory uses.

Accessory uses in the SFL district are as follows:

A. Storage sheds, toolsheds, greenhouses, subject to TMC 18.42.015;

B. Detached garages or carports, subject to TMC 18.42.015;

C. Home occupations, subject to TMC 18.42.030;

D. Noncommercial recreational structures, which could include but are not limited to swimming pools and recreational ball courts;

E. Energy systems;

F. Accessory dwelling unit, in accordance with the provisions of TMC 18.42.010;

G. Accessory wireless communication antenna;*

H. Electric vehicle infrastructure;

I. Supportive housing facilities such as emergency housing, emergency shelters, permanent supportive housing, and transitional housing are permitted as an accessory use only as part of a permitted church use. Such supportive housing

facilities shall not to exceed twenty percent of the total building square footage of a church use and are subject to the requirements of TMC 18.42.150.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2018-025, Amended, 12/18/2018; Ord. O2018-007, Amended, 10/16/2018; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-015, Amended, 09/07/2010; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.10.040 Conditional uses.

Conditional uses in the SFL zone district are as follows:

A. Churches;

B. Wireless communication towers;*

C. Cemeteries;

D. Child day care center;

E. Schools;

F. Neighborhood community center;

G. Neighborhood-oriented commercial center;

H. The following essential public facilities:

1. Emergency communications towers and antennas;*

I. Group foster homes;

J. Bed and breakfasts;**

K. Temporary expansions of schools, such as portable classrooms.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

**Bed and breakfasts with only one guest room are permitted uses but a public notice that an application has been submitted shall be sent to immediate neighbors. Administrative decisions may be appealed pursuant to TMC Chapter 14.12.

(Ord. O2024-005, Amended, 12/03/2024; Ord. O2019-007, Amended, 09/03/2019; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2001-012, Amended, 03/19/2002; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.10.050 Development standards.

Development in the SFL zone district must meet the following requirements:

~~A. Site Area. All land divisions are subject to the lot size provisions of this section; provided, that all land divisions must meet the following density requirements:~~

~~1. Minimum: four dwelling units per acre.~~

~~a. In situations where density requirements and lot size, shape, topography, or location result in a subdivision that cannot possibly meet the density requirements, a reduction in minimum density (i.e., an increase in maximum lot size) may be granted by the community development director if all of the following criteria can be met:~~

~~i. The lot to be subdivided must be less than or equal to three-fourths acre in total area.~~

~~ii. The reduction in minimum density may not result in more than one additional single-family dwelling. The reduction in density will not result in a density that is less than eighty-five percent of the minimum density required in the applicable zoning district.~~

~~iii. The conditions unique to the site (size, shape, topography, etc.) are not the result of actions by the applicant.~~

~~iv. In no event may a reduction in density be granted if it would result in a use that would not be allowed as a permitted use, accessory use, or conditional use in the district in which the property is located.~~

~~2. Maximum: seven dwelling units per acre, except that any density greater than six dwelling units per acre shall be obtained only by purchase of transfer of development rights in accordance with TMC Chapter 18.57. Provided, if a land division is subject to the clustering provisions of subsection E of this section and not subject to the wetland protection standards of TMC Chapter 16.28, the maximum density shall be no greater than one hundred twenty-five percent of the maximum density that would otherwise be allowed.~~

~~B. Density Calculation. The calculation of the density requirements in subsection A of this section is based on the portion of the site that contains lots devoted to residential and associated uses (e.g., dwelling units; private community clubs; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:~~

~~1. Land that is required to be set aside for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of park and open space areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations.~~

~~2. Land that is intended for future phases of development created in accordance with TMC 18.10.060.~~

3. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment, and infiltration facilities).

C. Division of Land Not on Public Sanitary Sewer. Division of land in areas without sewer must occur in a manner that maintains long-term potential to achieve minimum required densities and efficient provision of sewer once sewer becomes available. For a proposed division of land not required to be served by the extension of public sewer at the time of approval, a conversion plan shall be submitted in accordance with TMC 18.10.060 for the entire property, and the proposed land division shall be subject to the following:

1. For land division of an existing lot of record created prior to September 15, 1998:

a. Any division creating two lots shall not be subject to the minimum density requirements of subsection A of this section, provided one of the lots created is at least five acres in size. A note must be included on the recorded land division that future land divisions shall meet minimum density requirements of subsection A of this section in each phase of development.

b. Any division creating more than two lots shall meet the minimum density requirements of subsection A of this section in each phase of development.

D. Lot Size Requirements.

1. Maximum: none;

2. Minimum: three thousand two hundred square feet;

3. Lot width: fifty feet, minimum, except if there is an alley located adjacent to a side property line the minimum lot width shall be forty feet.

E. Clustered Subdivision. Any site in this zone district may be subdivided as a clustered subdivision; provided, that a clustered subdivision must meet all other provisions of this chapter and the following criteria:

1. Cluster subdivision shall not be allowed in subdivisions containing less than five acres.

2. Cluster subdivision shall meet the overall density requirements as set forth in this chapter.

3. For the purposes of this chapter, the minimum lot size for the SFL zone district shall be divided into the gross area of land being subdivided to ascertain the total number of lots that will be allowed by this procedure.

4. Individual lot sizes may be reduced by no more than twenty-five percent of the minimum lot size of the SFL zone district.

5. All such lot reductions shall be compensated for by an equivalent amount of land area in open space to be preserved and maintained for recreation or conservation purposes.

6. Individual lot depth and width requirements in the SFL zone district may be reduced by not more than twenty percent.

7. All other development regulations and use limitations remain in full force and effect.

F. Lots Located Adjacent to a Wetland. Lots located adjacent to a wetland and/or wetland buffer shall be encouraged to be as large as practicable within the allowances of this section and the physical conditions of the site.

G. Lot coverage, maximum impervious surface: sixty percent of total area of the lot.

H. Structure height: thirty-five feet, maximum; provided, however, that no structure shall penetrate imaginary airspace surfaces as defined by 14 C.F.R. Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department.

I. Yards.*

1. Front: ten feet minimum from frontage property line.

a. Driveways in front yards of single-family dwellings and duplexes must be a minimum of eighteen feet in length as measured along the shortest edge of the driveway starting from the front property line;

2. Side: five feet from property line, minimum;

3. Rear: twenty feet from property line, minimum. Exceptions: Structures on existing lots of record with rear structural setbacks or rear yards between five and twenty feet shall be considered conforming. Accessory dwelling units may be located a minimum of five feet from property line. Storage, garden, or tool sheds two hundred square feet or less in area, and residential mechanical equipment, may be located a minimum of five feet from property line.

J. Yards Exception. Any side or rear yard, not abutting on a public or private street, may be reduced to zero, provided:

1. That the yard area reduced by this procedure is added to the required setback on the opposite side of the site;

2. The opposite side yard setback is no less than ten feet after the yard area has been added as described in subsection (J)(1) of this section;

3. Where zero yard setback is used, the abutting site must be held under the same ownership at the time of initial construction or the owners of the abutting property(ies) record agreements or deed restrictions providing maintenance access and consent in writing to such zero yard setback;

4. The adjacent setback for such abutting property(ies) is not less than ten feet.

K. Park and Open Space Area. A new subdivision in this zone district shall set aside land for park and open space area as specified in TMC 17.12.210 and the citywide design guidelines.

*See Diagram 18.04.670, Yard Determination Diagram, in TMC 18.04.230, Y definitions.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2020-015, Amended, 02/16/2021; Ord. O2020-003, Amended, 09/15/2020; Ord. O2018-007, Amended, 10/16/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2016-037, Amended, 01/03/2017; Ord. O2011-002, Amended, 03/01/2011; Ord. O2008-017, Amended, 10/21/2008; Ord. O2004-009, Amended, 12/07/2004; Ord. O2000-004, Amended, 07/18/2000; Ord. O98-009, Amended, 10/20/1998; Ord. O98-001, Amended, 09/15/1998; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

18.10.060 Conversion plans.

A. For any land division that is submitted in phases of development, and for any development where sewer is not available or that does not meet the density requirements of TMC 18.10.050(A), the approval shall be contingent upon the following:

1. The lots created by the land division for residential and associated uses (e.g., dwelling units; private community clubs and recreation areas; stormwater detention, treatment and infiltration) shall meet the applicable requirements of TMC 18.10.050.

2. A conversion plan must be submitted for the entire property which demonstrates that the property can be subsequently subdivided to create sufficient lots to achieve the minimum densities necessary to comply with TMC 18.10.050. Such conversion plan shall depict a schematic lot layout, approximate location of utility easements, and potential street access and an internal circulation system consistent with city transportation policies. Conversion plans shall not be required to be stamped by an engineer or surveyor, and may be included as part of a drawing or plan submitted for the land division application. Simultaneous with the filing of the conversion plan, the applicant will be required to record with the county auditor, in a form acceptable to the city attorney, a document to be placed in the chain of title of the property giving constructive notice of the special density requirements relating to the property. This conversion plan will not bind future phases of development of the site to anything except the obligation to meet the overall density requirements of the entire property. Acceptance of a conversion plan by the city or county does not, by itself, constitute approval of, nor the granting of vested rights to, a future phase of development.

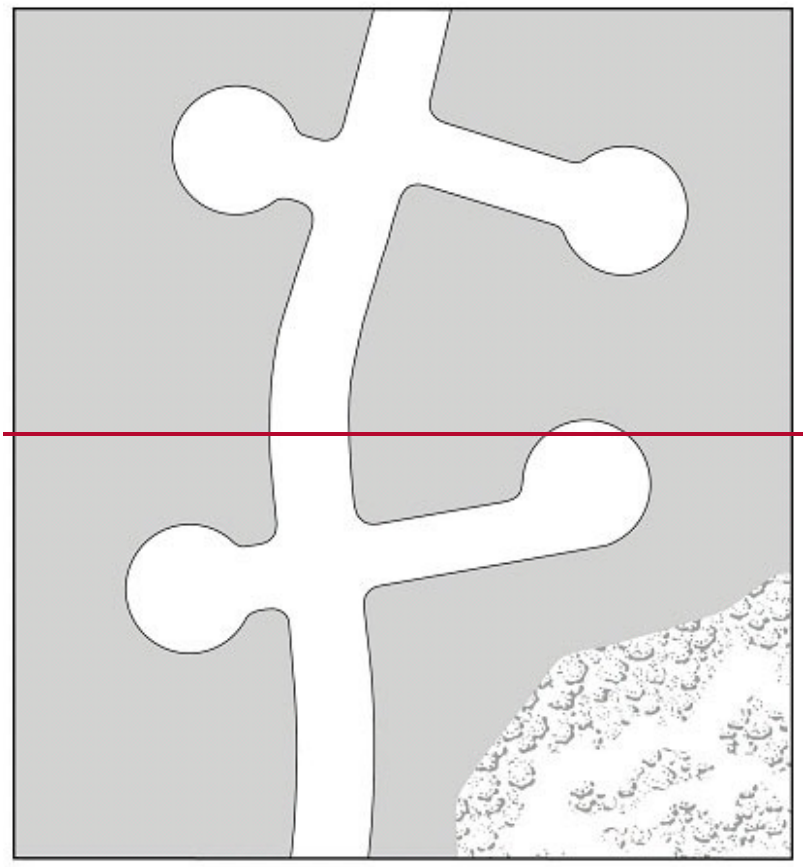
(Note: The purpose of the conversion plan is to ensure that the entire property can be ultimately developed at the residential densities required for this zone district,

not to limit future development to a specified development scheme. Recognizing that some property subject to this requirement may not be redeveloped in the near future, the time and cost involved in preparing and obtaining approval of a conversion plan should be kept to a minimum.)

B. A permit to construct any single-family dwelling on a lot of record that is greater than one acre in size shall be contingent on the submission of a conversion plan which demonstrates that the remainder of the lot may be subsequently subdivided to create sufficient lots to achieve the minimum densities necessary to comply with TMC 18.10.050. Such conversion plan shall meet all of the provisions of subsection (A)(2) of this section.

(Ord. O98-001, Amended, 09/15/1998; Ord. O95-035, Added, 12/19/1995)

18.10.070 Screening and buffering requirements.



Buffering should be provided between this zoning district and areas in the light industrial zoning district. Buffering should be equally shared between the abutting industrial and residential developments, unless one of the uses is already developed as of January 1, 1996. If the residential use already exists, no further buffering should be required of the residential property owner. If the industrial use already exists, the residential use will be required to install buffering measures.

(Ord. O97-024, Amended, 03/03/1998; Ord. O95-035, Added, 12/19/1995)

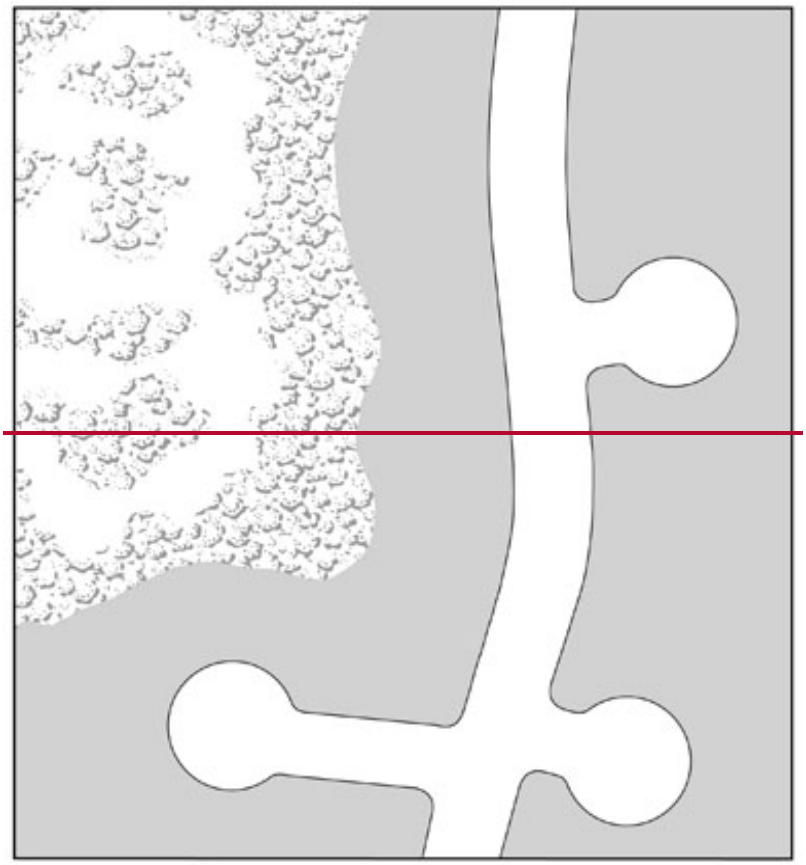
TMC 18.10.050(A) and (B)

EXAMPLE DENSITY TRANSFER CALCULATION #1

Single-Family Low Density Residential Zone (4 – 7 DU/ACRE)

~~10 acres~~	~~Total Area of Land~~	
~~1 acre~~	~~Critical Area (e.g., wetland or dedicated open space) (@ 6 DU/acre = 6 DU)~~	
~~2 acres~~	~~Road Rights of Way~~	
~~= 7 acres~~	~~Net Developable Land (including stormwater facilities) (max. density @ 6 DU/acre = 42 DU)~~	

~~Density Transfer Calculation~~



~~Max. allowable density with transfer: 42 DU x 1.25 = 52 DU | Lesser number =~~

~~Density transfer from critical area (excluding wetlands): 42 DU + 6 DU = 48 DU | total DUs permitted (48)~~

~~TMC 18.10.050(A) and (B)~~

~~EXAMPLE DENSITY TRANSFER CALCULATION #2~~

Single-Family Low Density Residential Zone (4 – 7 DU/ACRE)

10 acres	Total Area of Land	
3.5 acres	Critical Area (e.g., wetland or dedicated open space) (@ 6 DU/acre = 21 DU)	
1.5 acres	Road Rights-of-Way	
= 5 acres	Net Developable Land (including stormwater facilities) (max. density @ 6 DU/acre = 30 DU)	

Density Transfer Calculation

Max. allowable density with transfer: 30 DU x 1.25 = 37 DU| Lesser number =

Density transfer from critical area (excluding wetlands): 30 DU + 21 DU = 51 DU| total DUs permitted (37)

Section 34. Chapter TMC 18.12, SFM single-family medium density residential zone district, of the Tumwater Municipal Code is hereby amended to read as follows:

Chapter 18.12

~~SFM SINGLE-FAMILY MEDIUM~~LDR LOW DENSITY RESIDENTIAL ZONE DISTRICT

Sections:

18.12.010 Intent.
18.12.020 Permitted uses.
18.12.030 Accessory uses.
18.12.040 Conditional uses.
18.12.050 Development standards.
18.12.060 Conversion plans.
18.12.070 Screening and buffering requirements.

18.12.010 Intent.

The intent of the ~~single-family medium~~LDR low density residential ~~(SFM)~~ zone district is to:

A. Provide for a high standard of development for residential areas of ~~moderate~~ low density ~~in which single-family housing is the primary form of development~~;

B. Provide designated areas in which a minimum net density of six units per acre and a maximum net density of nine units per acre apply to promote the efficient use of land;

C. Guide residential development in such a manner as to encourage and plan for the availability of public services and community facilities such as utilities, police and fire protection, streets, schools, parks, and recreation;

D. Encourage development of attractive residential areas that provide a sense of community, establish a pedestrian-friendly atmosphere, and contain a variety of housing types;

E. Ensure that development without municipal utilities is at a density and in a configuration that enables cost effective urban density in-fill development when municipal utilities become available.

(Ord. O95-035, Added, 12/19/1995)

18.12.020 Permitted uses.

Permitted uses in the ~~SFM~~ LDR low density residential district are as follows:

A. Single-family detached dwellings;

B. Duplexes;

C. Triplexes;

D. Quadplexes;

E. Stacked flats;

FB. Townhouses ~~and rowhouses, within a residential planned unit development~~;

~~C. Duplexes are allowed on individual lots legally established before or on April 15, 2021. Duplexes shall not occupy more than thirty percent of the total lots in a new short plat or subdivision which was legally established after April 15, 2021. In such cases, the community development director shall have the discretion to alter the percentage in order to allow the new short plat or subdivision to meet minimum required densities due to topography or other special conditions related to the site, such as critical areas;~~

GD. Cottage housing;

HE. Designated manufactured homes on single lots of record, in accordance with the provisions of TMC Chapter 18.48;

IF. Parks, trails, open space areas, and recreational facilities;

JG. Support facilities;

KH. Planned unit developments;

LI. Family child care home; child mini-day care center, subject to TMC Chapter 18.52;

MJ. Adult family homes, residential care facilities;

NK. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

OL. Agriculture up to thirty acres in size, subject to TMC 18.42.070;

PM. Community gardens;

QN. The housing, care and keeping of animals consistent with the requirements of TMC Chapter 6.08;

RO. Wildlife refuges and forest preserves;

SP. Permanent supportive housing, subject to TMC 18.42.150;

TQ. Transitional housing, subject to TMC 18.42.150.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-005, Amended, 09/07/2010; Ord. O2005-011, Amended, 07/05/2005; Ord. O2000-004, Amended, 07/18/2000; Ord.

O98-009, Amended, 10/20/1998; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.12.030 Accessory uses.

Accessory uses in the ~~SFM~~ LDR low density residential district are as follows:

A. Storage sheds, toolsheds, greenhouses, subject to TMC 18.42.015;

B. Detached garages or carports, subject to TMC 18.42.015;

C. Home occupations, subject to TMC 18.42.030;

D. Noncommercial recreational structures, which could include but are not limited to swimming pools and recreational ball courts;

E. Energy systems;

F. Accessory dwelling units, in accordance with the provisions of TMC 18.42.010;

G. Accessory wireless communication antenna;*

H. Electric vehicle infrastructure;

I. Supportive housing facilities such as emergency housing, emergency shelters, permanent supportive housing, and transitional housing are permitted as an accessory use only as part of a permitted church use. Such supportive housing facilities shall not exceed twenty percent of the total building square footage of a church use and are subject to the requirements of TMC 18.42.150.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2018-025, Amended, 12/18/2018; Ord. O2018-007, Amended, 10/16/2018; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-015, Amended, 09/07/2010; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.12.040 Conditional uses.

Conditional uses in the ~~SFM~~ LDR low density residential zone district are as follows:

A. Churches;

B. Wireless communication towers;*

C. Cemeteries;

D. Child day care center;

E. Schools;

F. Neighborhood community center;

G. Neighborhood-oriented commercial center;

H. Private clubs and lodges;

I. The following essential public facilities:

1. Emergency communications towers and antennas;*

J. Group foster homes;

K. Bed and breakfasts;**

L. Temporary expansions of schools, such as portable classrooms.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

**Bed and breakfasts with only one guest room are permitted uses but a public notice that an application has been submitted shall be sent to immediate neighbors. Administrative decisions may be appealed pursuant to TMC Chapter 14.12.

(Ord. O2024-005, Amended, 12/03/2024; Ord. O2019-007, Amended, 09/03/2019; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2001-012, Amended, 03/19/2002; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.12.050 Development standards.

Development in the ~~SFM~~ LDR low density residential zone district must meet the following requirements:

A. Site Area. All land divisions are subject to the lot size provisions of this section; provided, that all land divisions must meet the following density requirements:

1. Minimum: six dwelling units per acre:

a. In situations where density requirements and lot size, shape, topography, or location result in a subdivision that cannot possibly meet the density requirements, a reduction in minimum density (i.e., an increase in maximum lot size) may be granted by the community development director if all of the following criteria can be met:

i. The lot to be subdivided must be less than or equal to one-half acre in total area.

ii. The reduction in minimum density may not result in more than one additional single-family detached dwelling.

iii. The reduction in density will not result in a density that is less than eighty-five percent of the minimum density required in the applicable zon~~c~~ing district.

iv. The conditions unique to the site (size, shape, topography, etc.) are not the result of actions by the applicant.

v. In no event may a reduction in density be granted if it would result in a use that would not be allowed as a permitted use, accessory use, or conditional use in the district in which the property is located.

2. Maximum: nine dwelling units per acre.~~, except that any density greater than eight dwelling units per acre shall be obtained only by~~The purchase of transfer of development rights in accordance with TMC Chapter 18.57 would allow a maximum density of ten dwelling units per acre. Provided, if a land division is subject to the clustering provisions of subsection ~~E~~ F of this section and not subject to the wetland protection standards of TMC Chapter 16.28, the maximum density shall be no greater than one hundred twenty-five percent of the maximum density that would otherwise be allowed.

B. Density Calculation. The calculation of the density requirements in subsection A of this section is based on the portion of the site that contains lots devoted to residential and associated uses (e.g., dwelling units; private community clubs; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

1. Land that is required to be set aside for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of park and open space areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations;

2. Land that is intended for future phases of development created in accordance with TMC 18.12.060;

3. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment, and infiltration facilities).

C. Division of Land Not on Public Sanitary Sewer. Division of land in areas without sewer must occur in a manner that maintains long-term potential to achieve minimum required densities and efficient provision of sewer once sewer becomes available. For a proposed division of land not required to be served by the extension of public sewer at the time of approval, a conversion plan shall be submitted in accordance with TMC 18.12.060 for the entire property, and the proposed land division shall be subject to the following:

1. For land division of an existing lot of record created prior to September 15, 1998:

a. Any division creating two lots shall not be subject to the minimum density requirements of subsection A of this section, provided one of the lots created is at least five acres in size. A note must be included on the recorded

land division that future land divisions shall meet minimum density requirements of subsection A of this section in each phase of development.

b. Any division creating more than two lots shall meet the minimum density requirements of subsection A of this section in each phase of development.

D. Dwelling Unit Allowance.

1. Density on individual lots in the LDR low density residential zone district can be exceeded to meet the dwelling unit allowance as follows:

a. Allow up to two dwelling units per lot.

b. Allow up to four dwelling units per lot if at least one dwelling unit on the lot is permanently affordable housing that meets the requirements of TMC 18.12.050(D)(6).

2. Two accessory dwelling units are allowed on all principal lots and are subject to the same regulations as a principal unit.

3. Accessory dwelling units count towards the dwelling unit allowance.

4. The standards of TMC 18.12.050(D) do not apply to lots less than 1,000 square feet.

5. A sleeping unit in co-living housing is calculated as one-quarter of a dwelling unit for purposes of calculating density.

6. To qualify for additional units under the affordable housing provisions of TMC 18.12.050(D)(1)(b), the required number of affordable housing dwelling units shall meet the permanently affordable housing standards in TMC 18.42.170.

E~~D~~. Lot Size Requirements.

1. Maximum: none;

2. Minimum: three thousand two hundred square feet. Minimum for a townhouse development consisting of at least three attached townhouses: two thousand square feet;

3. Lot width: fifty feet, minimum, except if there is an alley located adjacent to a side property line the minimum lot width shall be forty feet. Townhouses can be decreased to a minimum 20 feet lot width.

F~~E~~. Clustered Subdivision. Any site in this zone district may be subdivided as a clustered subdivision; provided, that a clustered subdivision must meet all other provisions of this chapter and the following criteria:

1. Cluster subdivision shall not be allowed in subdivisions containing less than five acres.

2. Cluster subdivision shall meet the overall density requirements as set forth in this chapter.

3. For the purposes of this chapter, the minimum lot size for the ~~SFM~~ LDR low density residential zone district shall be divided into the gross area of land being subdivided to ascertain the total number of lots that will be allowed by this procedure.

4. Individual lot sizes may be reduced by no more than twenty-five percent of the minimum lot size of the ~~SFM~~ LDR low density residential zone district.

5. All such lot reductions shall be compensated for by an equivalent amount of land area in open space to be preserved and maintained for recreation or conservation purposes.

6. Individual lot depth and width requirements in the ~~SFM~~ LDR low density residential zone district may be reduced by not more than twenty percent.

7. All other development regulations and use limitations remain in full force and effect.

~~F~~G. Lots Located Adjacent to a Wetland. Lots located adjacent to a wetland and/or wetland buffer shall be encouraged to be as large as practicable within the allowances of this section and the physical conditions of the site.

~~G~~H. Lot coverage, maximum impervious surface: seventy percent of total area of the lot.

~~H~~I. Structure height: thirty-five feet, maximum; provided, however, that no structure shall penetrate imaginary airspace surfaces as defined by 14 C.F.R. Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department.

~~I~~J. Yards.*

1. Front: ten feet minimum from frontage property line:

   a. Driveways in front yards of single-family detached dwellings and ~~duplexes~~ middle housing must be a minimum of eighteen feet in length as measured along the shortest edge of the driveway starting from the front property line;

2. Side: five feet from property line, minimum; provided, that side yards may be reduced to zero where the number of lots created is equal to the unit density allowance in TMC 18.12.050(D) or where a townhouse attached to another townhouse;

3. Rear: twenty feet from property line, minimum. Exceptions: Structures on existing lots of record with rear structural setbacks or rear yards between five and twenty feet shall be considered conforming. ~~Accessory dwelling units may be located a minimum of five feet from property line.~~ Storage, garden, or tool sheds

two hundred square feet or less in area, and residential mechanical equipment, may be located a minimum of five feet from property line. Rear setbacks for second dwelling units, including accessory dwelling units, may be reduced to a minimum of five feet.

4. Alley: eighteen feet if proposing a driveway; if no driveway is proposed minimum five feet from rear property line.

~~J~~K. Yards Exception. Any side or rear yard, not abutting on a public or private street, may be reduced to zero, provided:

1. That the yard area reduced by this procedure is added to the required setback on the opposite side of the site;

2. The opposite side yard setback is no less than ten feet after the yard area has been added, as described in subsection (J)(1) of this section;

3. Where zero yard setback is used, the abutting site must be held under the same ownership at the time of initial construction or the owners of the abutting property(ies) record agreements or deed restrictions providing maintenance access and consent in writing to such zero yard setback;

4. The adjacent setback for such abutting property(ies) is not less than ten feet.

~~K~~L. Park and Open Space Area. A new subdivision in this zone district shall set aside land for park and open space area as specified in TMC 17.12.210 and the citywide design guidelines.

*See Diagram 18.04.670, Yard Determination Diagram, in TMC 18.04.230, Y definitions.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2020-015, Amended, 02/16/2021; Ord. O2020-003, Amended, 09/15/2020; Ord. O2018-007, Amended, 10/16/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2016-037, Amended, 01/03/2017; Ord. O2011-002, Amended, 03/01/2011; Ord. O2008-017, Amended, 10/21/2008; Ord. O2004-009, Amended, 12/07/2004; Ord. O2000-004, Amended, 07/18/2000; Ord. O98-009, Amended, 10/20/1998; Ord. O98-001, Amended, 09/15/1998; Ord. O97-027, Amended, 03/03/1998; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

18.12.060 Conversion plans.

A. For any land division that is submitted in phases of development, and for any development where sewer is not available or that does not meet the minimum density requirements of TMC 18.12.050(A), the approval shall be contingent upon the following:

1. The lots created by the land division for residential and associated uses (e.g., dwelling units; private community clubs and recreation areas; stormwater detention, treatment and infiltration) shall meet the applicable requirements of TMC 18.12.050.

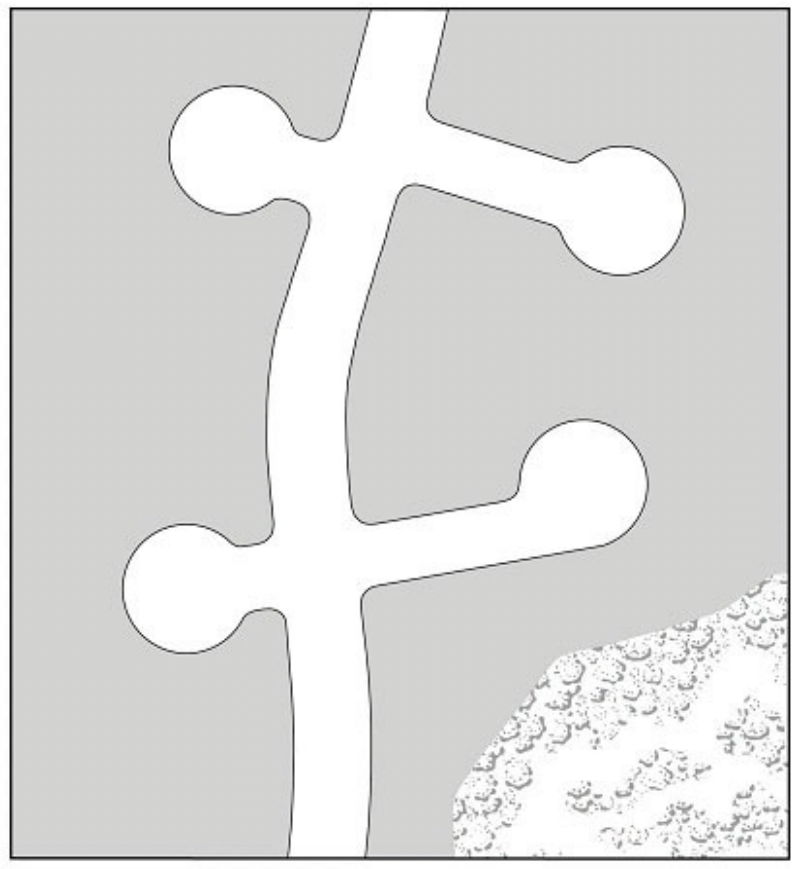
2. A conversion plan must be submitted for the entire property which demonstrates that the property can be subsequently subdivided to create sufficient lots to achieve the minimum densities necessary to comply with TMC 18.12.050. Such conversion plan shall depict a schematic lot layout, approximate location of utility easements, and potential street access and an internal circulation system consistent with city transportation policies. Conversion plans shall not be required to be stamped by an engineer or surveyor, and may be included as part of a drawing or plan submitted for the land division application. Simultaneous with the filing of the conversion plan, the applicant will be required to record with the county auditor, in a form acceptable to the city attorney, a document to be placed in the chain of title of the property giving constructive notice of the special density requirements relating to property. This conversion plan will not bind future phases of development of the site to anything except the obligation to meet the overall density requirements of the entire property. Acceptance of a conversion plan by the city or county does not, by itself, constitute approval of, nor the granting of vested rights to, a future phase of development.

(Note: The purpose of the conversion plan is to ensure that the entire property can be ultimately developed at the residential densities required for this zone district, not to limit future development to a specified development scheme. Recognizing that some property subject to this requirement may not be redeveloped in the near future, the time and cost involved in preparing and obtaining approval of a conversion plan should be kept to a minimum.)

B. A permit to construct any single-family detached dwelling on a lot of record that is greater than one acre in size shall be contingent on the submission of a conversion plan which demonstrates that the remainder of the lot may be subsequently subdivided to create sufficient lots to achieve the minimum densities necessary to comply with TMC 18.12.050. Such conversion plan shall meet all of the provisions of subsection (A)(2) of this section.

(Ord. O98-001, Amended, 09/15/1998; Ord. O95-035, Added, 12/19/1995)

18.12.070 Screening and buffering requirements.



Buffering should be provided between this zonecing district and areas in the LI light industrial zonecing district. Buffering should be equally shared between the abutting industrial and residential developments, unless one of the uses is already developed as of January 1, 1996. If the residential use already exists, no further buffering should be required of the residential property owner. If the industrial use already exists, the residential use will be required to install buffering measures.

(Ord. O97-024, Amended, 03/03/1998; Ord. O95-035, Added, 12/19/1995)

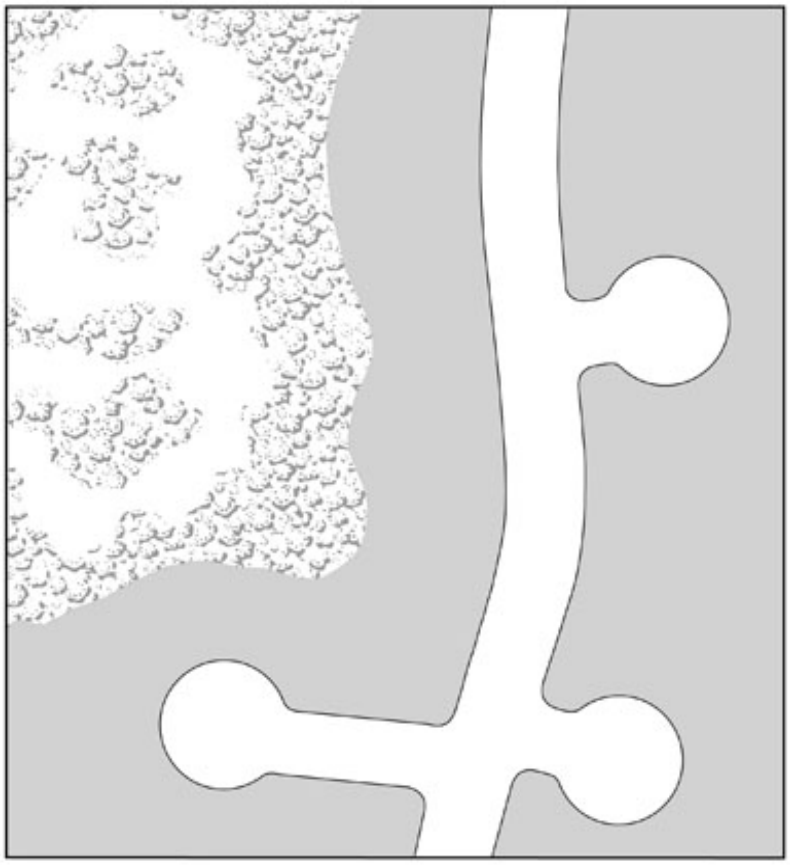
TMC 18.12.050(A) and (B)

EXAMPLE DENSITY TRANSFER CALCULATION #1

Single-Family MediumLDR Low Density Residential Zone District (6 – 9 DU/ACRE)

10 acres	Total Area of Land	
- 1 acre	Critical Area (e.g., wetland or dedicated open space) (@ 8 DU/acre = 8 DU)	
- 2 acres	Road Rights-of-Way	
= 7 acres	Net Developable Land (including stormwater facilities) (max. density @ 8 DU/acre = 56 DU)	

Density Transfer Calculation



Maximum~~.~~ allowable density with transfer: ~~56~~ 63 ~~DU~~ dwelling units x 1.25 = ~~70~~ 78.75 dwelling units~~DU~~ | Lesser number =

Density transfer from critical area (excluding wetlands): ~~56~~ 63 dwelling units~~DU~~ + ~~8~~ 9 dwelling units~~DU~~ = ~~64~~ 72 dwelling units ~~DU~~ | total dwelling units ~~DUs~~ permitted (~~64~~72)

TMC 18.12.050(A) and (B)

EXAMPLE DENSITY TRANSFER CALCULATION #2

~~Single-Family Medium~~LDR Low Density Residential Zone District (6 – 9 DU/ACRE)

10 acres	Total Area of Land	
- 3.5 acres	Critical Area (e.g., wetland or dedicated open space) (@ 8 DU/acre = 28 DU)	
- 1.5 acres	Road Rights-of-Way

Maximum~~.~~ allowable density with transfer: ~~40~~ 45 ~~DU~~ dwelling units x 1.25 = ~~50~~ 56.25 dwelling units~~DU~~ | Lesser number =

Density transfer from critical area (excluding wetlands): ~~40~~ 45 dwelling units ~~DU~~ + 28 dwelling units~~DU~~ = ~~68~~ 73 dwelling units ~~DU~~ | total dwelling units~~DUs~~ permitted (~~50~~56.25)

Section 35. Chapter TMC 18.14, MFM multifamily medium density residential zone district, of the Tumwater Municipal Code is hereby amended to read as follows:

Chapter 18.14

~~MFM MULTIFAMILY~~MDR MEDIUM DENSITY RESIDENTIAL ZONE DISTRICT

Sections:

18.14.010 Intent.
18.14.020 Permitted uses.
18.14.030 Accessory uses.
18.14.040 Conditional uses.
18.14.050 Development standards.
18.14.060 Conversion plans.
18.14.070 Screening and buffering requirements.

18.14.010 Intent.

The intent of the ~~multifamily~~ MDR medium density residential ~~(MFM)~~ zone district is to:

A. Provide for a high standard of development for residential areas of medium density including both ~~single-family~~middle and multifamily housing;

B. Provide designated areas in which a minimum net density of ~~nine~~ ten units per acre and a maximum net density of nineteen~~fifteen~~ units per acre with the potential maximum net density of twenty four units per acre if permanently affordable dwelling units are included ~~apply~~ to promote the efficient use of land;

C. Guide medium density residential development in such a manner as to encourage and plan for the availability of public services and community facilities such as utilities, police and fire protection, streets, public transit, schools, parks, and recreation;

D. Encourage development of attractive residential areas that provide a sense of community, establish a pedestrian-friendly atmosphere, and contain a variety of housing types;

E. Ensure that development without municipal utilities is at a density and in a configuration that enables cost effective urban density in-fill development when municipal utilities become available.

(Ord. O95-035, Added, 12/19/1995)

18.14.020 Permitted uses.

Permitted uses in the ~~MFM~~ MDR medium density residential zone district are as follows:

A. Single-family detached dwellings which were legally established prior to April 15, 2021;*

B. Duplexes;

C. Triplexes;

D. Quadplexes~~Fourplexes~~;

E. Stacked flats;

F~~E~~. Townhouses ~~and rowhouses~~;

~~F~~G. Multifamily dwellings;

~~G~~H. Cottage housing;

I. Co-living housing;

~~J~~H. Designated manufactured homes on single lots of record, and in designated manufactured home parks, in accordance with the provisions of TMC Chapter 18.48;

~~I~~K. Designated manufactured home parks;

L~~J~~. Senior housing facilities, independent;

M~~K~~. Parks, trails, open space areas, and recreational facilities;

N~~L~~. Support facilities;

O~~M~~. Planned unit developments;

P~~N~~. Family child care home; child mini-day care center, subject to TMC Chapter 18.52;

Q~~O~~. Adult family homes, residential care facilities;

R~~P~~. Any combination of the permitted uses listed in this section may be combined on one site, in accordance with the provisions of TMC 18.14.050;

S~~Q~~. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;**

T~~R~~. Bed and breakfasts;

U~~S~~. Agriculture uses up to thirty acres in size which were established prior to January 1, 2011, subject to TMC 18.42.070;

V~~T~~. Community gardens;

W~~U~~. The housing, care and keeping of animals consistent with the requirements of TMC Chapter 6.08;

XV. Wildlife refuges and forest preserves;

YW. Permanent supportive housing, subject to TMC 18.42.150;

ZX. Transitional housing, subject to TMC 18.42.150.

~~*Single-family detached dwellings constructed after April 15, 2021, are not allowed in the multifamily medium density residential (MFM) zone district.~~

**Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-006, Amended, 08/01/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2020-003, Amended, 09/15/2020; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-005, Amended, 09/07/2010; Ord. O2005-011, Amended, 07/05/2005; Ord. O2001-012, Amended, 03/19/2002; Ord. O2000-004, Amended, 07/18/2000; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.14.030 Accessory uses.

Accessory uses in the ~~MFM~~ MDR medium density residential zone district are as follows:

A. Storage sheds, toolsheds, greenhouses;

B. Private parking garages or carports;

C. Home occupations, subject to TMC 18.42.030;

D. Noncommercial recreational structures, which could include but are not limited to swimming pools and recreational ball courts;

E. Energy systems;

F. Accessory dwelling units, in accordance with the provisions of TMC 18.42.010;

G. ~~Boardinghouses and roominghouses~~Co-living housing;

GH. Neighborhood community center;

HI. Accessory wireless communication antenna;*

IJ. Electric vehicle infrastructure;

JK. Supportive housing facilities such as emergency housing, emergency shelters, permanent supportive housing, and transitional housing are permitted as an accessory use only as part of a permitted church use. Such supportive housing facilities shall not exceed twenty percent of the total building square footage of a church use and are subject to the requirements of TMC 18.42.150.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and

approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2018-025, Amended, 12/18/2018; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-015, Amended, 09/07/2010; Ord. O97-019, Amended, 06/17/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

18.14.040 Conditional uses.

Conditional uses in the ~~MFM~~ MDR medium density residential zone district are as follows:

A. Churches;

B. Wireless communication towers;*

C. Cemeteries;

D. Child day care center;

E. Schools;

F. Neighborhood community center as a primary use;

G. Neighborhood-oriented commercial center;

H. Private clubs and lodges;

I. Medical clinics or hospitals;

J. The following essential public facilities:

1. Emergency communications towers and antennas;*

2. Mental health facilities (including but not limited to congregate care facilities; adult residential treatment facilities; evaluation and treatment centers);

3. Inpatient facilities including substance abuse facilities (including but not limited to: intensive inpatient facilities; long-term residential drug treatment facilities; recovery house facilities);

K. Group foster homes;

L. Recreational vehicle parks;

M. Senior housing facilities, assisted;

N. Temporary expansions of schools, such as portable classrooms.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2000-004, Amended, 07/18/2000; Ord.

O97-019, Amended, 06/17/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

18.14.050 Development standards.

Development in the ~~MFM~~ MDR medium density residential zone district must meet the following requirements:

A. Site Area. All residential developments must meet the following density requirements:

1. Minimum: ~~nine~~ ten dwelling units per acre;

2. Maximum: ~~fifteen~~ nineteen dwelling units per acre~~, except that any density greater than fourteen dwelling units per acre shall be obtained only by~~. The purchase of transfer of development rights in accordance with TMC Chapter 18.57 would allow a maximum density of twenty dwelling units per acre. ~~Note:~~ Projects that provide two permanently affordable housing units in the ~~MFM~~ MDR medium density residential zone district would be allowed an increase of one additional dwelling unit ~~on top of the~~above the maximum current density of nineteen dwelling units per acre~~with a transfer of development rights~~ up to a maximum increase in density of five dwellings unit per acre. This would create a new maximum density of twenty-four dwelling units per acre in the ~~MFM~~ MDR medium density residential zone district for projects providing permanently affordable housing units. Projects providing permanently affordable housing units by this method would have to be part of a new multifamily housing project that provides ten or more dwelling units and meet the requirements of TMC 18.42.140.

B. Density Calculation. The calculation of the density requirements in subsection A of this section is based on the portion of the site devoted to residential and associated uses (e.g., dwelling units; private community clubs; open space; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

1. Land that is required to be set aside for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of park and open space areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations;

2. Land that is intended for future phases of development created in accordance with TMC 18.14.060;

3. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment, and infiltration facilities).

C. Division of Land Not on Public Sanitary Sewer. Division of land in areas without sewer must occur in a manner that maintains long-term potential to achieve minimum required densities and efficient provision of sewer once sewer becomes available. For a proposed division of land not required to be served by the extension of public sewer at the time of approval, a conversion plan shall be submitted in accordance with TMC 18.14.060 for the entire property, and the proposed land division shall be subject to the following:

1. For land division of an existing lot of record created prior to September 15, 1998:

a. Any division creating two lots shall not be subject to the minimum density requirements of subsection A of this section, provided one of the lots created is at least five acres in size. A note must be included on the recorded land division that future land divisions shall meet minimum density requirements of subsection A of this section in each phase of development.

b. Any division creating more than two lots shall meet the minimum density requirements of subsection A of this section in each phase of development.

D. Dwelling Unit Allowance.

1. Density on individual lots in the MDR medium density residential zone district can be exceeded to meet the dwelling unit allowance as follows:

a. Allow up to two dwelling units per lot.

b. Allow up to four dwelling units per lot if at least one dwelling unit on the lot is permanently affordable housing that meets the requirements of TMC 18.14.050(D)(6).

2. Two accessory dwelling units are allowed on all principal lots and are subject to the same regulations as a principal unit.

3. Accessory dwelling units count towards the dwelling unit allowance.

4. The standards of TMC 18.14.050(D) do not apply to lots less than 1,000 square feet.

5. A sleeping unit in co-living housing is calculated as one-quarter of a dwelling unit for purposes of calculating density.

6. To qualify for additional units under the affordable housing provisions of TMC 18.14.050(D)(1)(b), the required number of affordable housing dwelling units shall meet the permanently affordable housing standards in TMC 18.42.170.

ED. Lot coverage, maximum impervious surface: seventy percent of total area of the lot.

FE. Structure height: forty feet, maximum; provided, however, that no structure shall penetrate imaginary airspace surfaces as defined by 14 C.F.R. Part 77. A map

that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department.

GF. Yards.*

1. Front: ten feet minimum from frontage property line.

a. Driveways in front yards of any dwelling units must be a minimum of eighteen feet in length as measured along the shortest edge of the driveway starting from the front property line.

2. Side: five feet from property line, minimum; provided, that side yards for may be reduced to zero where the number of lots created is equal to the unit density allowance in TMC 18.14.050(D) or where a townhouse attached to another townhousetownhomes and rowhouses may be reduced to zero where attached.

3. Rear: five feet from property line, minimum.

Where any structures or portions of structures, except for single-family detached dwellings, are adjacent to any the single family RSR residential/sensitive resource and LDR low density residential zoneing districts, the minimum setback shall be twenty feet. Where structures are constructed over one story, except for single-family dwellings, the setback from the adjacent property line or lines shall be increased by ten feet for every story above the ground level story of the proposed new building, and shall be completely screened from view in accordance with TMC Chapter 18.47.

HG. Yards Exception. Any side or rear yard, not abutting on a public or private street, may be reduced to zero, provided:

1. That the yard area reduced by this procedure is added to the required setback on the opposite side of the site;

2. The opposite side yard setback is no less than ten feet after the yard area has been added as described in subsection (F)(1) of this section;

3. Where zero yard setback is used, the abutting site must be held under the same ownership at the time of initial construction or the owners of the abutting property(ies) record agreements or deed restrictions providing maintenance access and consent in writing to such zero yard setback;

4. The adjacent setback for such abutting property(ies) is not less than ten feet.

IH. Park and Open Space Area. New development in this zone district shall set aside land for park and open space area as specified in TMC 17.12.210 and 18.42.130 and the citywide design guidelines.

*See Diagram 18.04.670, Yard Determination Diagram, in TMC 18.04.230, Y definitions.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2020-015, Amended, 02/16/2021; Ord. O2018-007, Amended, 10/16/2018; Ord. O2016-037, Amended, 01/03/2017; Ord.

O2011-002, Amended, 03/01/2011; Ord. O2008-017, Amended, 10/21/2008; Ord. O2004-009, Amended, 12/07/2004; Ord. O2000-004, Amended, 07/18/2000; Ord. O98-009, Amended, 10/20/1998; Ord. O98-001, Amended, 09/15/1998; Ord. O97-027, Amended, 03/03/1998; Ord. O97-024, Amended, 03/03/1998; Ord. O96-021, Amended, 12/02/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

18.14.060 Conversion plans.

A. For any land division that is submitted in phases of development, and for any development where sewer is not available or that does not meet the minimum density requirements of TMC 18.14.050(A), the approval shall be contingent upon the following:

1. The lots created by the land division for residential and associated uses (e.g., dwelling units; private community clubs and recreation areas; stormwater detention, treatment and infiltration) shall meet the applicable requirements of TMC 18.14.050.

2. A conversion plan must be submitted for the entire property which demonstrates that the property can be subsequently subdivided to create sufficient lots to achieve the minimum densities necessary to comply with TMC 18.14.050. Such conversion plan shall depict a schematic lot layout, approximate location of utility easements, and potential street access and an internal circulation system consistent with city transportation policies. Conversion plans shall not be required to be stamped by an engineer or surveyor, and may be included as part of a drawing or plan submitted for the land division application. Simultaneous with the filing of the conversion plan, the applicant will be required to record with the county auditor, in a form acceptable to the city attorney, a document to be placed in the chain of title of the property giving constructive notice of the special density requirements relating to the property. This conversion plan will not bind future phases of development of the site to anything except the obligation to meet the overall density requirements of the entire property. Acceptance of a conversion plan by the city or county does not, by itself, constitute approval of, nor the granting of vested rights to, a future phase of development.

(Note: The purpose of the conversion plan is to ensure that the entire property can be ultimately developed at the residential densities required for this zone district, not to limit future development to a specified development scheme. Recognizing that some property subject to this requirement may not be redeveloped in the near future, the time and cost involved in preparing and obtaining approval of a conversion plan should be kept to a minimum.)

B. A permit to construct any single-family detached dwelling on a lot of record that is greater than one acre in size shall be contingent on the submission of a conversion plan which demonstrates that the remainder of the lot may be subsequently subdivided to create sufficient lots to achieve the minimum densities

necessary to comply with TMC 18.14.050. Such conversion plan shall meet all of the provisions of subsection (A)(2) of this section.

(Ord. O98-001, Amended, 09/15/1998; Ord. O95-035, Added, 12/19/1995)

18.14.070 Screening and buffering requirements.

Buffering should be provided between this zone~~ing~~ district and areas in the LI light industrial zone~~ing~~ district. Buffering should be equally shared between the abutting industrial and residential developments, unless one of the uses is already developed as of January 1, 1996. If the residential use already exists, no further buffering should be required of the residential property owner. If the industrial use already exists, the residential use will be required to install buffering measures as outlined in TMC Chapter 18.47.

(Ord. O97-024, Amended, 03/03/1998; Ord. O95-035, Added, 12/19/1995)

Section 36. Chapter TMC 18.16, MFH multifamily high density residential zone district, of the Tumwater Municipal Code is hereby amended to read as follows:

Chapter 18.16

~~MFH MULTIFAMILY~~HDR HIGH DENSITY RESIDENTIAL ZONE DISTRICT

Sections:

18.16.010 Intent.
18.16.020 Permitted uses.
18.16.030 Accessory uses.
18.16.040 Conditional uses.
18.16.050 Development standards.
18.16.060 Conversion plans.
18.16.070 Screening and buffering requirements.

18.16.010 Intent.

The intent of the ~~multifamily~~ HDR high density residential ~~(MFH)~~ zone district is to:

A. Provide for a high standard of development for multifamily residential areas of high density;

B. Provide designated areas in which a minimum net density of ~~fourteen~~ twenty units per acre ~~and~~ with no~~a~~ maximum net density ~~of twenty-nine units per acre~~ apply to promote the efficient use of land and promote mass transit opportunities;

C. Guide high density residential development in such a manner as to encourage and plan for the availability of public services and community facilities such as utilities, police and fire protection, streets, public transit, schools, parks and recreation;

D. Encourage development of attractive residential areas that provide a sense of community and establish a pedestrian-friendly atmosphere;

E. Ensure that development without municipal utilities is at a density and in a configuration that enables cost effective urban density in-fill development when municipal utilities become available.

(Ord. O95-035, Added, 12/19/1995)

18.16.020 Permitted uses.

Permitted uses in the ~~MFH~~ HDR high density residential zone district are as follows:

A. Triplexes;

B. Quadplexes~~Fourplexes~~;

C. Stack flats;

~~C~~D. Multifamily dwellings;

E. Co-living housing;

~~D~~F. Parks, trails, open space areas, and recreational facilities;

~~E~~G. Support facilities;

~~F~~H. Planned unit developments;

~~G~~I. Family child care home; child mini-day care center, subject to TMC Chapter 18.52;

~~H~~J. Adult family homes, residential care facilities;

~~I~~K. Senior housing facilities, independent;

~~J~~L. Any combination of the permitted uses listed in this section may be combined on one site, in accordance with the provisions of TMC 18.16.050;

~~K~~M. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

~~L~~N. Townhouses~~ and rowhouses~~;

~~M~~O. Community gardens;

~~N~~P. Wildlife refuges and forest preserves;

~~O~~Q. Permanent supportive housing, subject to TMC 18.42.150;

~~P~~R. Transitional housing, subject to TMC 18.42.150.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-006, Amended, 08/01/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-025, Amended, 12/18/2018; Ord.

O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-005, Amended, 09/07/2010; Ord. O98-001, Amended, 09/15/1998; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

18.16.030 Accessory uses.

Accessory uses in the ~~MFH~~ HDR high density residential zone district are as follows:

A. Storage sheds, toolsheds, greenhouses;

B. Private parking garages or carports;

C. Home occupations, as approved by the director of community development;

D. Noncommercial recreational structures, which could include but are not limited to swimming pools and recreational ball courts;

E. Energy systems;

F. Accessory dwelling units, in accordance with the provisions of TMC 18.42.010, where there is an existing single-family detached dwelling unit, which was legally established prior to January 1, 1996;

G. ~~Boardinghouses and roominghouses~~Co-living housing;

H. Neighborhood community center;

I. Accessory wireless communication antenna;*

J. Electric vehicle infrastructure;

K. Supportive housing facilities such as emergency housing, emergency shelters, permanent supportive housing, and transitional housing are permitted as an accessory use only as part of a permitted church use. Such supportive housing facilities shall not exceed twenty percent of the total building square footage of a church use and are subject to the requirements of TMC 18.42.150.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2018-025, Amended, 12/18/2018; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-015, Amended, 09/07/2010; Ord. O97-019, Amended, 06/17/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

18.16.040 Conditional uses.

Conditional uses in the ~~MFH~~ HDR high density residential zone district are as follows:

A. Churches;

B. Wireless communication towers;*

C. Cemeteries;

D. Child day care center;

E. Schools;

F. Neighborhood community center as a primary use;

G. Neighborhood-oriented commercial center;

H. Private clubs and lodges;

I. Medical clinics or hospitals;

J. The following essential public facilities:

1. Emergency communications towers and antennas;*

2. Mental health facilities (including but not limited to congregate care facilities; adult residential treatment facilities; evaluation and treatment centers);

3. Inpatient facilities including substance abuse facilities (including but not limited to: intensive inpatient facilities; long-term residential drug treatment facilities; recovery house facilities);

K. Group foster homes;

L. Senior housing facilities, assisted;

M. Temporary expansions of schools, such as portable classrooms.

*Emergency communication towers and antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O98-001, Amended, 09/15/1998; Ord. O97-019, Amended, 06/17/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

18.16.050 Development standards.

Development in the ~~MFH~~ HDR high density residential zone district must meet the following requirements:

A. Site Area. All residential developments must meet the following density requirements:

1. Minimum: ~~fourteen~~ twenty dwelling units per acre;

2. Maximum: ~~twenty-nine dwelling units per acre, except that any density greater than twenty-five dwelling units per acre shall be obtained only by purchase of transfer of development rights in accordance with TMC Chapter~~

~~18.57. Note: Projects that provide two permanently affordable housing units in the MFH zone district would be allowed an increase of one additional dwelling unit on top of the maximum current density with a transfer of development rights up to a maximum increase in density of ten dwelling units per acre. This would create a new maximum density of thirty-nine dwelling units per acre in the MFH zone district. Projects providing permanently affordable housing units by this method would have to be part of a new multifamily housing project that provides ten or more dwelling units and meet the requirements of TMC 18.42.140~~No maximum dwelling units per acre.

B. Density Calculation. The calculation of the density requirements in subsection A of this section is based on the portion of the site devoted to residential and associated uses (e.g., dwelling units; private community clubs; open space; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

1. Land that is required to be set aside for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads; provided, that portion of park and open space areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations.

2. Land that is intended for future phases of development created in accordance with TMC 18.16.060.

3. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment, and infiltration facilities).

C. Division of Land Not on Public Sanitary Sewer. Division of land in areas without sewer must occur in a manner that maintains long-term potential to achieve minimum required densities and efficient provision of sewer once sewer becomes available. For a proposed division of land not required to be served by the extension of public sewer at the time of approval, a conversion plan shall be submitted in accordance with TMC 18.16.060 for the entire property, and the proposed land division shall be subject to the following:

1. For land division of an existing lot of record created prior to September 15, 1998:

a. Any division creating two lots shall not be subject to the minimum density requirements of subsection A of this section, provided one of the lots created is at least five acres in size. A note must be included on the recorded land division that future land divisions shall meet minimum density requirements of subsection A of this section in each phase of development.

b. Any division creating more than two lots shall meet the minimum density requirements of subsection A of this section in each phase of development.

D. Dwelling Unit Allowance.

1. Density on individual lots in the HDR high density residential zone district can be exceeded the dwelling unit allowance as follows:

a. Allow up to two dwelling units per lot.

b. Allow up to four dwelling units per lot if at least one dwelling unit on the lot is permanently affordable housing that meets the requirements of TMC 18.16.050(D)(5).

2. Accessory dwelling units count towards dwelling unit allowance.

3. The standards of TMC 18.16.050(D) do not apply to lots less than 1,000 square feet.

4. A sleeping unit in co-living housing is calculated as one-quarter of a dwelling unit for purposes of calculating density.

5. To qualify for additional units under the affordable housing provisions of TMC 18.16.050(D)(1)(b), the required number of affordable housing dwelling units shall meet the permanently affordable housing standards in TMC 18.42.170.

~~D~~E. Lot coverage, maximum impervious surface: seventy percent of the total area of the lot.

~~E~~F. Structure height: fifty feet or five stories, whichever is less; provided, however, that no structure shall penetrate imaginary airspace surfaces as defined by 14 C.F.R. Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department. Note: New multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units would be allowed a maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty feet. Projects providing permanently affordable housing units by this method would have to meet the requirements of TMC 18.42.140;

~~F~~G. Yards.*

1. Front: ten feet minimum from frontage property line;

a. Driveways in front yards of any dwelling units must be a minimum of eighteen feet in length as measured along the shortest edge of the driveway starting from the front property line;

2. Side: five feet from property line, minimum;

3. Rear: five feet from property line, minimum.

Where any structures or portions of structures are adjacent to ~~any single-family~~the RSR residential/sensitive resource and LDR low density residential zon~~e~~~~ing~~ district~~s~~, the minimum setback shall be twenty feet. Where structures are constructed over one story, the setback from the adjacent property line or lines shall be increased by ten feet for every story above the ground level story of the proposed new building, and shall be completely screened from view in accordance with TMC Chapter 18.47.

~~G~~H. Park and Open Space Area. New development in this zone district shall set aside land for park and open space as specified in TMC 17.12.210 and 18.42.130 and the citywide design guidelines.

*See Diagram 18.04.670, Yard Determination Diagram, in TMC 18.04.230, Y definitions.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2020-015, Amended, 02/16/2021; Ord. O2016-037, Amended, 01/03/2017; Ord. O2011-002, Amended, 03/01/2011; Ord. O2010-005, Amended, 09/07/2010; Ord. O2004-009, Amended, 12/07/2004; Ord. O2000-004, Amended, 07/18/2000; Ord. O98-009, Amended, 10/20/1998; Ord. O98-001, Amended, 09/15/1998; Ord. O97-024, Amended, 03/03/1998; Ord. O97-027, Amended, 03/03/1998; Ord. O96-021, Amended, 12/02/1997; Ord. O96-022, Amended, 12/19/1996; Ord. O95-035, Added, 12/19/1995)

18.16.060 Conversion plans.

For any land division that is submitted in phases of development, and for any development where sewer is not available or that does not meet the minimum density requirements of TMC 18.16.050(A), the approval shall be contingent upon the following:

A. The development (e.g., dwelling units; private community clubs and recreation areas; stormwater detention, treatment and infiltration) shall meet the applicable requirements of TMC 18.16.050.

B. A conversion plan must be submitted for the entire property which demonstrates that the property can be subsequently subdivided to create sufficient lots to achieve the minimum densities necessary to comply with TMC 18.16.050. Such conversion plan shall depict a schematic lot layout, approximate location of utility easements, and potential street access and an internal circulation system consistent with city transportation policies. Conversion plans shall not be required to be stamped by an engineer or surveyor, and may be included as part of a drawing or plan submitted for the land division application. Simultaneous with the filing of the conversion plan, the applicant will be required to record with the county auditor, in a form acceptable to the city attorney, a document to be placed in the chain of title of the property giving constructive notice of the special density requirements relating to the property. This conversion plan will not bind future phases of development of the site to anything except the obligation to meet the overall density requirements of the entire property. Acceptance of a conversion plan

by the city or county does not, by itself, constitute approval of, nor the granting of vested rights to, a future phase of development.

(Note: The purpose of the conversion plan is to ensure that the entire property can be ultimately developed at the residential densities required for this zone district, not to limit future development to a specified development scheme. Recognizing that some property subject to this requirement may not be redeveloped in the near future, the time and cost involved in preparing and obtaining approval of a conversion plan should be kept to a minimum.)

(Ord. O98-001, Amended, 09/15/1998; Ord. O95-035, Added, 12/19/1995)

18.16.070 Screening and buffering requirements.

Buffering should be provided between this zone~~cing~~ district and areas in the LI light industrial zone~~cing~~ district. Buffering should be equally shared between the abutting industrial and residential developments, unless one of the uses is already developed as of January 1, 1996. If the residential use already exists, no further buffering should be required of the residential property owner. If the industrial use already exists, the residential use will be required to install buffering measures as outlined in TMC Chapter 18.47.

(Ord. O97-024, Amended, 03/03/1998; Ord. O95-035, Added, 12/17/1995)

Section 37. Section TMC 18.18.020, Permitted uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.18.020 Permitted uses.

Permitted uses in the NC neighborhood commercial zone district are as follows:

A. Personal services;

B. Professional services;

C. Recreational facilities occupying no more than three thousand square feet in floor area;

D. Support facilities;

E. Post office, library, museum, art gallery;

F. Parks and open space areas;

G. Planned unit development;

H. Retail sales occupying no more than three thousand square feet in floor area and for which operating hours are limited to between 6:00 a.m. and 10:00 p.m.;

I. Medical clinics;

J. Child day care center, child mini-day care center;

K. Adult family homes, residential care facilities;

L. All uses which were legally established prior to January 1, 1996, except where there is a cessation of the use for three or more years;

M. Restaurants without drive-in windows occupying no more than three thousand square feet in floor area;

N. Offices;

O. Family child care homes;

P. Mixed use structures subject to the size limitations for individual uses and TMC 18.18.050(D) and the density requirements for residential use in the NC district found in subsection W of this section;

Q. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

R. Electric vehicle infrastructure;

S. Community gardens;

T. Farmers markets;

U. Centers for senior citizens, youth, general community, and similar groups;

V. Temporary expansions of schools, such as portable classrooms;

W. Multifamily residential use as part of a mixed use development with a minimum density of ~~four~~ six dwelling units per net acre and a maximum density of ~~eight~~ nine dwelling units per net acre, which is calculated by averaging the densities of all of the different types of housing provided within the development in accordance with TMC 18.14.050(B), excluding the area of the building and parking associated with the commercial development;

X. Drive-through espresso stands/coffee shops occupying no more than five hundred square feet in floor area;

Y. Food trucks or trailers in accordance with TMC 18.42.120;

Z. Food truck or trailer courts in accordance with TMC 18.42.120;

AA. Senior housing facilities, independent;

BB. Permanent supportive housing, subject to TMC 18.42.150;

CC. Transitional housing, subject to TMC 18.42.150;

DD. Optometry clinics.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-19, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2019-020, Amended, 11/19/2019; Ord. O2018-029, Amended, 01/15/2019; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2010-015, Amended, 09/07/2010; Ord. O97-019, Amended, 06/17/1997; Ord. O95-035, Added, 12/19/1995)

Section 38. Section TMC 18.18.050, Development standards, of the Tumwater Municipal Code is hereby amended to read as follows:

18.18.050 Development standards.

Development in the NC district must meet the following requirements:

A. Site area: minimum of one acre.

B. No more than eighty-five percent of the square footage of the site may be covered by buildings and parking.

C. Structure height: thirty-five feet; provided, however, that no structure shall penetrate imaginary airspace surfaces as defined by 14 CFR Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department.

D. Maximum Building Size (Gross Square Feet).

1. The maximum individual building size shall be five thousand for single use; ten thousand for mixed use with residential on the second floor and above.

2. The combined size of all buildings on an individual site shall not exceed ten thousand gross square feet or fifteen percent of the gross site area, whichever is greater.

E. Yards.*

1. Front: the minimum setback shall be ten feet from frontage property line. The maximum setback shall be fifteen feet from the abutting right-of-way;

2. Side: five feet from property line, or if on an alley located to the side, the setback shall be ten feet from the side property line;

3. Rear: five feet, or if an alley is located to the rear, the setback shall be ten feet from the rear property line.

Where structures or portions of structures are adjacent to the RSR residential/sensitive area or LDR low density residential zone ~~, SFL, or SFM zoning~~ districts, and where structures are constructed over one story, the structural setback from the adjacent property line or lines shall be increased by ten feet for every story above the ground level story of the proposed new building, and shall be screened from view in accordance with TMC Chapter 18.47.

F. Pedestrian Access.

1. An on-site pedestrian circulation system, which links the street and the primary entrance(s) of the structure(s), shall be provided. Sidewalks or pedestrian ways must connect the required pedestrian system to existing pedestrian systems on adjacent developments if adequate safety and security can be maintained.

2. Sidewalks shall be required and constructed according to the city's road development standards.

3. Where the pedestrian circulation system crosses driveways, parking areas, and loading areas, it must be clearly identifiable, through the use of elevation changes, speed bumps, a different paving material, or other similar method approved by the community development director. Striping may be permitted only in conjunction with at least one of the preceding methods.

4. Lighting for parking lots and pedestrian ways shall be provided to ensure personal safety. Lighting shall be integrated into the architectural character both in terms of illumination and fixtures. Site lighting shall be directed downward and inward or other techniques may be utilized to minimize impacts on off-site uses.

G. Park and Open Space Area. New development in this district shall set aside land for park and open space area as specified in TMC 17.12.210 and 18.42.130 and the citywide design guidelines.

*See Diagram 18.04.670, Yard Determination Diagram, in TMC 18.04.230, Y definitions.

(Ord. O2020-015, Amended, 02/16/2021; Ord. O2018-029, Amended, 01/15/2019; Ord. O2011-002, Amended, 03/01/2011; Ord. O2004-009, Amended, 12/07/2004; Ord. O2000-004, Amended, 07/18/2000; Ord. O98-009, Amended, 10/20/1998; Ord. O97-024, Amended, 03/03/1998; Ord. O96-022, Amended, 12/19/1996; Ord. O95-035, Added, 12/17/1995)

Section 39. Section TMC 18.19.020, Permitted uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.19.020 Permitted uses.

Uses permitted in the CS community services zone district are as follows:

A. General offices;

B. Schools;

C. Community center;

D. Parks and open space areas;

E. Personal services;

F. Entertainment facilities;

G. Recreational facilities;

H. Post office, parcel delivery facility;

I. Museum, library, art gallery;

J. Child day care center; child mini-day care center;

K. Group foster homes;

L. Support facilities;

M. Family child care home;

N. General retail sales limited to fifteen thousand square feet or less;

O. Planned unit development;

P. Restaurants;

Q. Parking structures;

R. Parking lots as separate, primary uses are permitted. The proposed parking lot shall exclusively serve specifically identified uses in or adjacent to the district to accommodate shared employee or customer parking or off-site employee parking. The uses served by the lot may change over time. Parking lots are prohibited on corner lots;

S. Park and ride lots;

T. All uses which were legally established prior to January 1, 1997, except where there is a cessation of the use for three or more years;

U. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

V. Adult family homes, residential care facilities;

W. Electric vehicle infrastructure;

X. Community gardens;

Y. Farmers markets;

Z. Centers for senior citizens, youth, general community, and similar groups;

AA. Civic center complex;

BB. Taverns, cocktail lounges;

CC. Wildlife refuges and forest preserves;

DD. Temporary expansions of schools, such as portable classrooms;

EE. Food trucks or trailers in accordance with TMC 18.42.120;

FF. Food truck or trailer courts in accordance with TMC 18.42.120;

GG. Permanent supportive housing, subject to TMC 18.42.150;

HH. Transitional housing, subject to TMC 18.42.150;

II. Professional services;

JJ. Optometry clinics.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2019-020, Amended, 11/19/2019; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2010-015, Amended, 09/07/2010; Ord. O2001-020, Amended, 05/07/2002; Ord. O97-019, Amended, 06/17/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

Section 40. Section TMC 18.20.030, Permitted uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.20.030 Permitted uses.

Uses permitted in the MU mixed use zone district are as follows:

A. Professional services;

B. Retail sales;

C. General offices;

D. Support facilities;

E. Parks, open space areas and recreational facilities;

F. Restaurants;*

G. Restaurants (without drive-through windows);**

H. Post offices;

I. Motels, hotels;

J. Planned unit development (PUD) (see TMC Chapter 18.36);

K. Medical clinics;

L. Child day care center; child mini-day care center;

M. Adult family homes, residential care facilities;

N. Group foster homes;

O. Private clubs and lodges;

P. Family child care home;

Q. All residential uses, provided the minimum density standards in TMC 18.20.060 are met;

R. Personal services;

S. Used motor oil recycling collection point;

T. Nurseries, retail;

U. Museum, library, art gallery;

V. All uses not permitted which were legally established prior to January 1, 1996, except where there is a cessation of the use for three or more years;

W. Civic center complex;

X. Centers for senior citizens, youth, general community, and similar groups;

Y. Entertainment facilities;

Z. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;***

AA. Senior housing facilities, independent and assisted;

BB. Electric vehicle infrastructure;

CC. Community gardens;

DD. Farmers markets;

EE. Animal clinics or hospitals;

FF. Churches;

GG. Civic center complex;

HH. Convalescent centers, rest homes, nursing homes;

II. Taverns, cocktail lounges;

JJ. Temporary expansions of schools, such as portable classrooms;

KK. Food trucks or trailers in accordance with TMC 18.42.120;

LL. Food truck or trailer courts in accordance with TMC 18.42.120;

MM. Cottage housing;

NN. Permanent supportive housing, subject to TMC 18.42.150;

OO. Transitional housing, subject to TMC 18.42.150;

PP. Emergency housing, subject to TMC 18.42.150;

QQ. Emergency shelter, subject to TMC 18.42.150;

RR. Optometry clinics.

*Restaurants are a permitted use for all parcels in the MU mixed use ~~(MU)~~ zone district in the city, except for those parcels in the MU mixed use ~~(MU)~~ zone district located on the north side of Israel Road SW between Littlerock Road SW and Tyee

Drive SW. In that location, restaurants without drive-through windows are allowed, but restaurants with drive-through windows are prohibited.

**Restaurants (without drive-through windows) are a permitted use for those parcels in the MU mixed use ~~(MU)~~ zone district located on the north side of Israel Road SW between Littlerock Road SW and Tyee Drive SW.

***Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2019-020, Amended, 11/19/2019; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-024, Amended, 01/16/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2010-015, Amended, 09/07/2010;

O2000-004, Amended, 07/18/2000; Ord. O97-019, Amended, 06/17/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

Section 41. Section TMC 18.20.060, Development standards, of the Tumwater Municipal Code is hereby amended to read as follows:

18.20.060 Development standards.

Development in the MU mixed use zone district is intended to achieve a human-scale, pedestrian- and transit-oriented environment and must meet the following requirements:

A. Densities. All development including but not limited to development which includes commercial and residential uses within the same building or on the same lot shall be required to meet the provisions of either subsection (A)(1) or (2) of this section.

1. Commercial.

   a. A minimum floor area ratio (FAR) of 0.25 or a total of one-fourth square foot of gross area per one square foot of site area is required.

   b. The maximum floor area ratio (FAR) shall be 2.0 or a total of two square feet of gross area per one square foot of site area.

   c. A commercial structure shall be no more than fifty thousand square feet gross floor area. This requirement may be waived by the community development director based upon a finding that the proposed use can conform to other requirements of the mixed use zone, is designed to accommodate the pedestrian emphasis, incorporates residential uses, and is compatible and complementary to surrounding uses in the zone.

2. Residential.

a. A minimum average density of ~~fourteen~~ twenty dwelling units per net acre is required. This is calculated by averaging the densities of all of the different types of housing provided within the development.

B. Impervious Coverage and Open Space. No more than eighty-five percent of the square footage of the site may be covered by impervious surface. The site must be landscaped in accordance with TMC Chapter 18.47.

C. Setbacks and Yard Area.

1. Front: no minimum.

2. Side: no minimum.

3. Rear: no minimum.

Where any structures or portions of structures, containing any permitted, accessory and/or conditional use allowed by this chapter, are adjacent to ~~any single-family~~the RSR residential/sensitive resource and LDR low ~~or single-family medium~~ density residential zon~~e~~ing districts, the minimum setback shall be twenty feet and shall be screened from view in accordance with TMC Chapter 18.47.

D. Open Storage. Open storage is prohibited with the exception of retail nurseries. Long-term parking of operational company cars, light trucks, and vans within parking lots shall not be construed to be open storage.

E. Conversion of Existing Structures. An existing residential structure may be converted to a commercial or office use if the structure is brought into conformance with the building code for such uses and all site plan review standards can be met, with the exception of setbacks of existing buildings.

F. Building Height. Buildings shall not be constructed over fifty feet or five stories, whichever is less, except as provided in subsection (F)(1) of this section; provided, however, that no structure shall penetrate imaginary airspace surfaces as defined by 14 C.F.R. Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department. Note: New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units would be allowed an additional maximum building height increase of ten feet or one story, whichever is less, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty feet or six stories, whichever is less. Projects providing permanently affordable housing units by this method would have to meet the requirements of TMC 18.42.140.

1. Minimum Conditions.

a. Drawings shall be submitted illustrating, in both plan view and elevation, the shadows that would be cast by the proposed building or structure at noon on December 21 (winter solstice). No building or structure will be permitted that is shown by these drawings to cast a shadow onto any

other property that is greater than the shadow that would be cast by a hypothetical building fifty feet in height on the south lot line of the shaded property. The solar setback of a proposed structure is calculated using the following formula:

Solar setback = (H - M) / (0.40 + P)

H = height (in feet of highest shade-producing point of structure)

M = maximum allowable height for buildings and structures in zon~~c~~ing district

0.40 = tangent of sun altitude on December 21

P = north/south slope of lot (in percent)

2. Exterior walls of the proposed building shall include windows whenever possible. Where the construction of a windowless wall is necessitated by adopted building codes, the exterior facing of the wall shall be articulated on each story of the building with architectural features such as cornices or other projections, recesses, different building materials, awnings, signs, or other similar features that provide visual relief.

3. The exterior of the building's ground floor shall be visually separated from upper floors through the use of architectural features such as awnings, cornices, distinct but compatible facade materials or lighting, or other similar methods.

4. The site design for the proposed building or structure shall include an outdoor plaza, park, or landscaped area that shall be designed and maintained for public use.

G. Signs. The requirements of TMC Chapter 18.44 applicable to the MU mixed use zone district must be met.

H. Pedestrian Access.

1. An on-site pedestrian circulation system which links the street and the primary entrance(s) of the structure(s) shall be provided. Sidewalks or pedestrian ways must connect the required pedestrian system to existing pedestrian systems on adjacent developments if adequate safety and security can be maintained. Convenient pedestrian access to transit stops shall be provided.

2. Sidewalks, walkways or pedestrian systems shall be required and constructed according to the city's road development standards or as approved by the community development director.

3. Where the pedestrian circulation system crosses driveways, parking areas, and loading areas, it must be clearly identifiable, through the use of elevation changes, speed bumps, a different paving material, or other similar method approved by the community development director. Striping may be permitted only in conjunction with at least one of the preceding methods.

Lighting for parking lots and pedestrian ways shall be provided to ensure personal safety. Lighting shall be integrated into the architectural character in terms of both illumination and fixtures. Site lighting shall be directed downward and inward or other techniques may be utilized to minimize impacts on off-site uses.

I. Park and Open Space Area. New development in this zone district shall set aside land for park and open space area as specified in TMC 17.12.210 and 18.42.130 and the citywide design guidelines.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2020-015, Amended, 02/16/2021; Ord. O2017-006, Amended, 07/18/2017; Ord. O2016-037, Amended, 01/03/2017; Ord. O2011-002, Amended, 03/01/2011; Ord. O2004-009, Amended, 12/07/2004; Ord. O98-009, Amended, 10/20/1998; Ord. O97-024, Amended, 03/03/1998; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

Section 42. Section TMC 18.21.060, Development standards, of the Tumwater Municipal Code is hereby amended to read as follows:

18.21.060 Development standards.

Development standards in the CBC Capitol Boulevard Community zone district are intended to achieve a human-scale, pedestrian- and transit-oriented environment:

A. For properties located in the CBC Capitol Boulevard Community zone – North Trosper district, illustrated in Figure 18.21.070.1, all development, except for those exceptions listed in TMC 18.21.070, shall meet the following. Subdivision of lots cannot be used to subvert this requirement.

1. All development on lots containing only commercial uses shall meet the following:

a. A minimum floor area ratio (FAR) of 0.4 or a total of forty square feet of gross area per one hundred square feet of site area is required.

b. The maximum floor area ratio (FAR) shall be 4.0 or a total of four hundred square feet of gross area per one hundred square feet of site area.

2. All development on lots containing only residential uses shall have an average net density of at least thirty dwelling units per net acre. This is calculated by dividing the number of units on the site by the total area of the site. Where the site includes through streets or access ways used by the general public, those streets are not counted as part of the site area.

3. Mixed use development containing both residential and nonresidential uses shall have a minimum floor area ratio (FAR) of 0.25 or a total of twenty-five square feet of gross floor area per one hundred square feet of site area.

4. Inter-Site Connectivity. Better vehicle and pedestrian circulation is a high priority in this area, so connecting parking lots, drives, walkways, and accessways within and between properties is required. Such access may be in the form of a dedicated or private alley, connected or shared parking lots, shared

driveways, or similar features. The intent of this requirement is to provide greater connectivity to facilitate future access to all properties and relieve congestion caused by multiple driveways on Capitol Boulevard. The director may require that such through access be provided by rearranging site features.

5. Maximum Heights. Structures are allowed up to sixty-five feet in height in the North Trosper district except for the areas between Linda Street and Lee Street on the east side of Capitol Boulevard where structure height shall be limited to fifty feet. Note: New mixed use or multifamily projects with a total of thirty or more dwelling units in the North Trosper district that provide thirty percent of those units as permanently affordable housing units would be allowed an additional maximum building height increase of ten feet, subject to other neighborhood compatibility height restrictions in TMC Chapter 18.21 and imaginary airspace surface limitations. This would create a new maximum height limit of seventy-five feet in the North Trosper district except for the areas between Linda Street and Lee Street on the east side of Capitol Boulevard where structure height shall be limited to fifty feet. Projects providing permanently affordable housing units by this method would have to meet the requirements of TMC 18.42.140.

B. For properties in the CBC Capitol Boulevard Community zone district North Neighborhood Center and CBC Capitol Boulevard Community zone South Neighborhood Center illustrated on map Figure 18.21.070.1, all new development, except for those exceptions listed in TMC 18.21.070, must meet the following:

1. Properties greater than two acres in size must include both commercial and residential uses that meet the following:

a. The floor area ratio for commercial portions of the development must be at least 0.4 FAR.

b. The minimum density of residential development is thirty dwelling units per acre for residential portions of the site.

c. For uses that are mixed vertically (e.g., residential over commercial uses in the same building), these minimum density and FAR requirements do not apply.

2. Properties two acres in size and smaller but greater than half-acre in size must include one of the following:

a. For development consisting of solely commercial uses, a minimum floor area ratio (FAR) of 0.4 (a total of forty square feet of gross area per one hundred square feet of site area).

b. For development consisting of both commercial and residential uses, no minimum FAR applies.

3. Properties less than half-acre in size do not have to comply with the above requirements.

4. Maximum Heights. Structures are limited to sixty-five feet maximum height in the North Neighborhood Center and are limited to fifty feet in the South Neighborhood Center (see Figure 18.21.070.1).

a. New multifamily or mixed use projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the North Neighborhood Center district would be allowed a maximum building height increase of ten feet, subject to other neighborhood compatibility height restrictions in TMC Chapter 18.21 and imaginary airspace surface limitations. This would create a new maximum height limit of seventy-five feet in the North Neighborhood Center district. Projects providing permanently affordable housing units by this method would have to meet the requirements of TMC 18.42.140.

b. For properties larger than ten acres in size, portions of buildings that are within forty-five feet of properties in ~~single-family~~the LDR low density residential zone district~~s~~ shall be limited to twenty-five feet in height.

C. The requirements of subsections A and B of this section may be modified for a particular development application by the community development director based upon a finding that the proposed development can conform to other requirements of the CBC Capitol Boulevard Community zone district, is designed to accommodate the pedestrian emphasis, incorporates residential uses, and is compatible and complementary to surrounding uses in the district. Any departures from the provisions of this section must meet the intent of this section (i.e., supporting a mixed use district with transit supportive land use intensities, excellent pedestrian, bicycle and local vehicular circulation, pedestrian amenities and open space) to a degree at least as significant as the standards in subsections A and B of this section.

D. Landscaping and Open Space. Developments must meet the requirements for landscaping and open space as specified in the Capitol Boulevard Community zone design guidelines.

E. Setbacks and Yard Area.

1. Front: All development must be set back from the curb line at least twelve feet in order to provide for sidewalks and landscaping with street trees. Additionally, buildings and other structures and landscaping must be located so that they do not create a hazard by obstructing motorists' or pedestrians' visibility (infringement of the sight triangle).

2. Side: no minimum.

3. Rear: no minimum except as required for landscaping, emergency access, visibility needed for safety and inter-site connectivity (see Capitol Boulevard Community zone design guideline B.3.1).

F. Where any structures or portions of structures containing any permitted, accessory and/or conditional use allowed by this chapter are adjacent to the LDR

low density ~~any single-family~~ residential zone district~~s~~, the minimum setback shall be twenty feet and shall be screened from view in accordance with TMC Chapter 18.47.

1. For buildings on the south side of the Department of Transportation site that abut the residential homes on Pinehurst Street, the setback for buildings shall be twenty-five feet and shall be screened from view in accordance with TMC Chapter 18.47.

G. Open Storage. Open storage is prohibited. Long-term parking of operational company cars, light trucks, and vans within parking lots accessory to the main use shall not be construed to be open storage.

H. Conversion of Existing Structures. An existing residential structure may be converted to a commercial or office use within the existing footprint of the structure without triggering the FAR or minimum residential density requirements if the structure is brought into conformance with the building code for such uses, and all site plan review and public works standards including right-of-way frontage improvement requirements can be met, with the exception of setbacks of existing buildings.

I. Building/Structure Step Back and Height. Structures are limited to fifty feet in height in the CBC Capitol Boulevard Community zone district, except as allowed specifically in subsections A and B of this section.

For properties adjacent to ~~a single-family~~the LDR low density residential zone district, the following step back requirements shall be met:

1. Portions of structures less than forty-five feet away from ~~a single-family~~the LDR low density residential zone district may be up to thirty-five feet in height.

2. Portions of structures at least forty-five feet away from the LDR low density ~~a single-family~~ residential zone district may be up to forty-five feet in height.

3. Portions of structures at least fifty-five feet away from the LDR low density ~~a single-family~~ residential zone district may be up to fifty-five feet in height.

4. Portions of structures at least sixty-five feet away from the LDR low density ~~a single-family~~ residential zone district may be up to sixty-five feet in height.

See Figure 18.21.060.F.1.

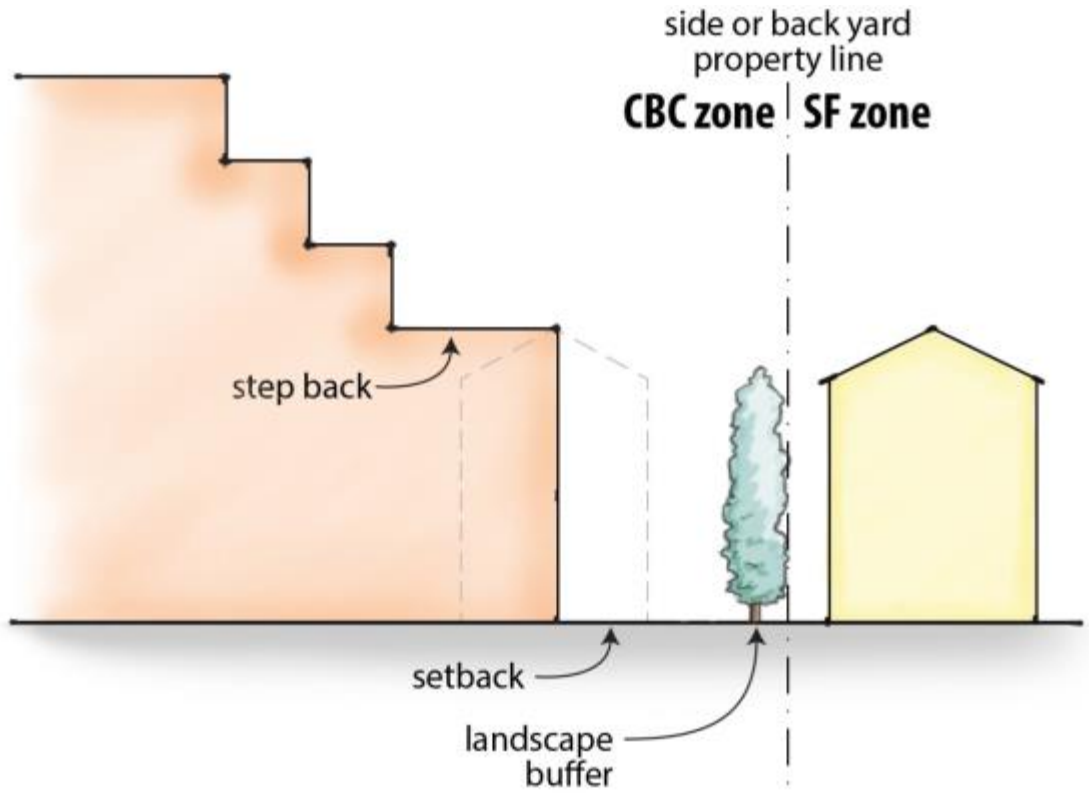

Figure 18.21.060.F.1 Building Step Back and Setback Examples

J. Signs. Signs must meet the requirements of TMC Chapter 18.44.

K. Pedestrian Access.

1. An on-site pedestrian circulation system which links the street and the primary entrance(s) of the structure(s) and the parking areas with the buildings shall be provided. Sidewalks or pedestrian ways must connect the required pedestrian system to existing pedestrian systems on adjacent developments. Convenient pedestrian access to transit stops shall be provided as approved by the community development director.

2. Sidewalks, walkways or pedestrian systems on public property shall be required and constructed according to the city's road development standards.

3. Where the pedestrian circulation system crosses driveways, parking areas, and loading areas, pedestrian surfaces must be clearly identifiable through the use of elevation changes, speed bumps, a different paving material, or other similar method approved by the community development director. Striping may be permitted only in conjunction with at least one of the preceding methods.

L. Lighting for parking lots and pedestrian ways shall be provided to ensure personal safety. Lighting shall be integrated into the architectural character, both in terms of illumination and fixtures. Site lighting shall meet the standards of TMC 18.40.035, Exterior illumination.

M. Drive-through facilities for food and beverages constructed after January 1, 2013, are not permitted in the South Neighborhood Center and are not permitted north of "T" Street in the North Neighborhood Center as shown in Figure 18.21.070.1. Where drive-through facilities are allowed, they shall meet the standards in TMC Chapter 18.50 and TMC 18.43.020.

N. Notwithstanding the requirements in TMC 18.50.070, the number of required parking spaces for multifamily dwellings shall not be more than one off-street space per studio apartment, one and one-half spaces per one- to two-bedroom dwelling unit, two spaces per three- or more bedroom dwelling units, and one guest space for every ten units.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2013-025, Added, 01/07/2014)

Section 43. Section TMC 18.22.020, Permitted uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.22.020 Permitted uses.

Uses permitted in the GC general commercial zone district are as follows:

A. Professional services;

B. General retail sales;

C. General offices;

D. Appliance equipment repair;

E. Support facilities;

F. Parks and open space areas;

G. Recreational facilities;

H. Restaurants;

I. Automobile service stations including car washes;

J. Post offices;

K. Motels, hotels;

L. Planned unit developments (PUD);

M. Medical clinics;

N. Child day care center, child mini-day care center;

O. Adult family homes, residential care facilities;

P. Group foster homes;

Q. Private clubs and lodges;

R. Family child care home;

S. Mixed use structures;

T. The following multifamily residential:

1. Multifamily residential structures with a minimum density of forty dwelling units per acre that are part of a mixed use development in the same structure or site.

2. Multifamily residential structures consisting of a minimum of three and a maximum of four stories on sites within one-quarter mile of a degree-granting state education facility. A minimum density of fourteen dwelling units per acre shall be provided. Calculation of density is based on the portion of the site devoted to residential and associated uses (e.g., dwelling units; private community clubs; open space; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

a. Land that is required to be dedicated for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of park and open space areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations.

b. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment and infiltration facilities);

U. Personal services;

V. Used motor oil recycling collection point;

W. Parking lots as separate, primary uses are permitted. The proposed parking lot shall exclusively serve specifically identified uses in or adjacent to the district to accommodate shared employee or customer parking or off-site employee parking. The uses served by the lot may change over time;

X. Parking structures;

Y. Park and ride lots;

Z. Museum, library, art gallery;

AA. Recreational vehicle parks;

BB. Riding academies;

CC. Entertainment facilities;

DD. Nurseries, retail;

EE. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

FF. Equipment rental and sales facilities;

GG. Motorsports sales facility, provided outdoor displays or visible storage of vehicles does not cover an area larger than ten percent of the gross floor area of the facility;

HH. Electric vehicle infrastructure;

II. Community gardens;

JJ. Farmers markets;

KK. Marijuana retailer;

LL. Motor vehicle sales facilities located west of Interstate 5 and south of Bishop Road subject to the requirements set forth in TMC 18.42.090;

MM. Breweries, wineries, distilleries;

NN. Auto repair facilities;

OO. Churches;

PP. Temporary expansions of schools, such as portable classrooms;

QQ. Animal clinics or hospitals;

RR. Convalescent centers, rest homes, nursing homes;

SS. Movie theaters, playhouses and similar performance and assembly facilities;

TT. Senior housing facilities, independent and assisted;

UU. Taverns, cocktail lounges;

VV. Food trucks or trailers in accordance with TMC 18.42.120;

WW. Food truck or trailer courts in accordance with TMC 18.42.120;

XX. Permanent supportive housing, subject to TMC 18.42.150;

YY. Transitional housing, subject to TMC 18.42.150;

ZZ. Emergency housing, subject to TMC 18.42.150;

AAA. Emergency shelter, subject to TMC 18.42.150;

BBB. Optometry clinics.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

Section 44. Section TMC 18.23.010, Intent, of the Tumwater Municipal Code is hereby amended to read as follows:

18.23.010 Intent.

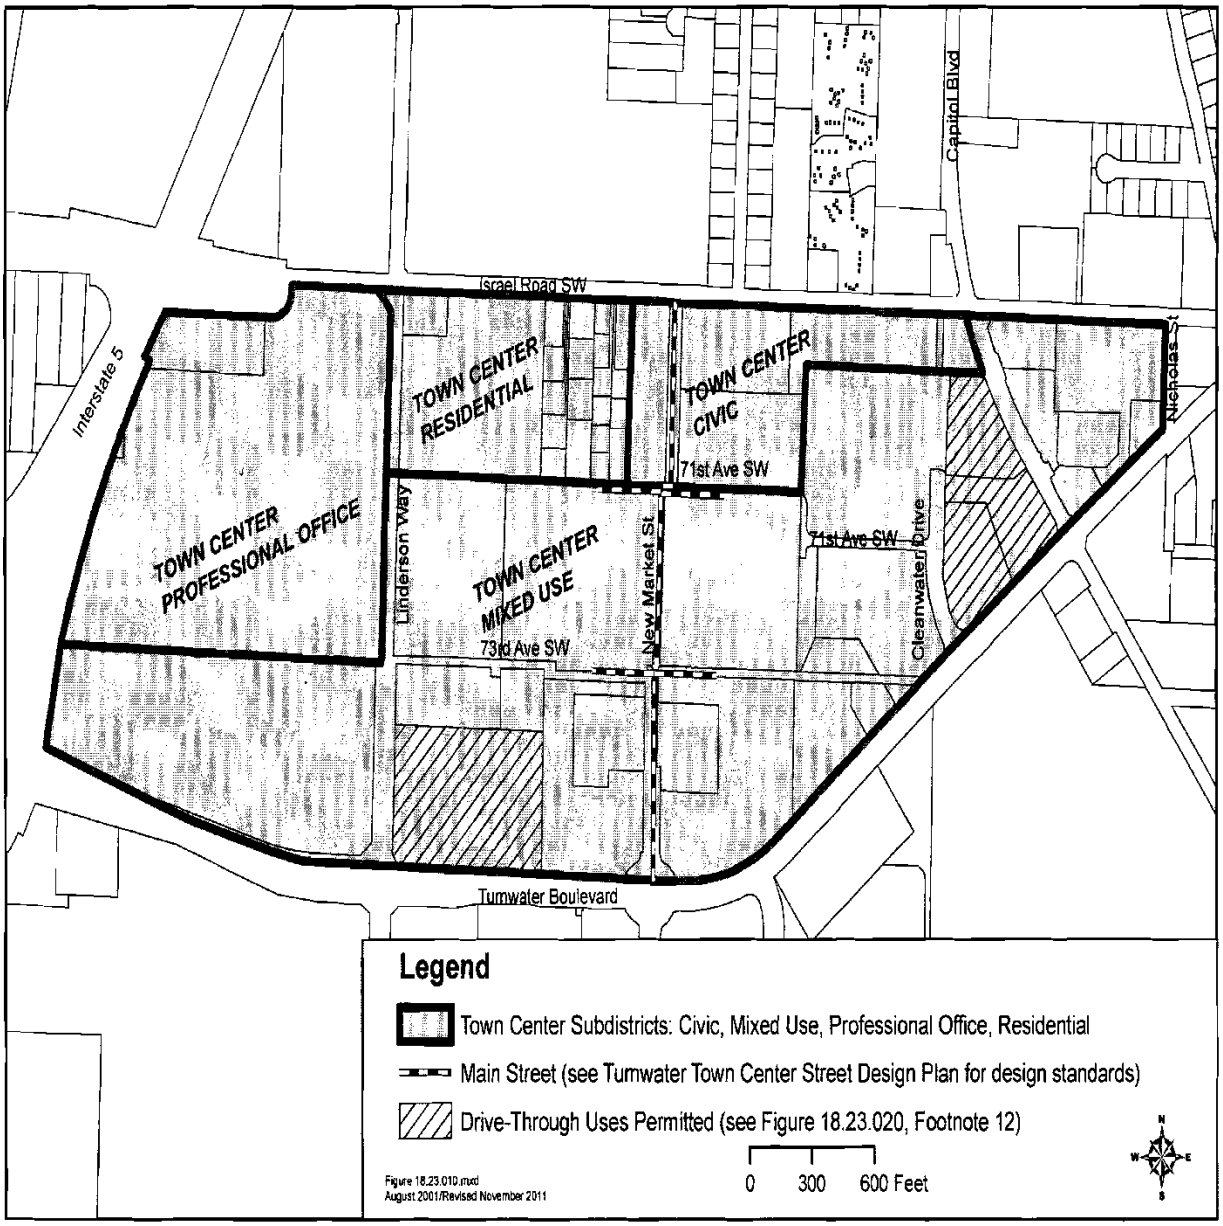
The intent of the TC town center ~~(TC)~~ zone district is to create a mixed use, urban density, transit-supported town center. The area should consist of multistory buildings oriented to create convenient pedestrian and transit access. Use of public gathering areas, shared parking facilities and public walkways that connect uses within the town center are envisioned. Development should occur in a manner that is consistent with the goals and policies set forth in the Tumwater comprehensive plan. The TC town center zone district consists of the following subdistricts (Figure 18.23.010):

A. Town Center Mixed Use. The intent of the town center mixed use subdistrict is to provide mixed retail, office and residential uses at a level of intensity sufficient to support transit-oriented development and services and to provide a focus for the town center. Mixed use can include: development of a parcel or structure with one or more different land uses, such as a combination of residential, office, retail, public, or entertainment in a single or physically integrated group of structures. A broad mix of land uses are allowed in this subdistrict, including retail, personal and professional services, restaurants, entertainment, lodging, community facilities and residential. Along designated main streets (Figure 18.23.010), ground floor retail sales, personal services and restaurants are encouraged with residential uses, professional services and general offices on the upper stories.

B. Town Center Professional Office. The intent of the town center professional office subdistrict is to provide for employment growth in government, professional, business, health and personal services. Complementary retail sales within an office structure are allowed.

C. Town Center Civic. The intent of the town center civic subdistrict is to provide for civic uses that provide identity and focus for the Tumwater town center.

D. Town Center Residential. The intent of the town center residential subdistrict is to provide for a high quality, high density living environment within walking distance of jobs, shopping and public transportation. A mix of housing choices is encouraged to create a variety in residential opportunities.



The intent of the design standards in this chapter is:

A. To design buildings to promote an architecturally appealing environment. Design emphasis should be given to the pedestrian through the provision of structural and facade elements that encourage pedestrian activity and maximize the infusion of natural light.

B. To design parking structures to blend with adjacent developments. Emphasize attractive design features that minimize the obtrusiveness of the parking use and encourage architectural compatibility with adjacent development. Structures should be well lighted and create a feeling of openness and safety.

C. To encourage design elements that convey the historical theme of Tumwater. Pitched or mansard metal roofs, decorative brick facades, and ornamental towers with pitched roofs and decorative cornices are examples of design elements that reflect the history of Tumwater. Several of these elements are incorporated into the designs of civic and commercial buildings along Israel Road, including Tumwater City Hall, Tumwater Headquarters Fire Station, and the Tumwater Timberland Library.

D. To create streets that provide a sense of enclosure, activity, safety, and interest, and are attractive to pedestrians.

(Ord. O2011-006, Amended, 11/15/2011; Ord. O2006-034; Amended, 07/17/2007; Ord. O2002-019, Amended, 01/07/2002; Ord. O2001-020, Added, 05/07/2002)

Section 45. Section TMC 18.23.015, Applicability of design standards, of the Tumwater Municipal Code is hereby amended to read as follows:

18.23.015 Applicability of design standards.

A. The design standards in TMC 18.23.040 and 18.23.050 apply to:

1. Any new building or parking structure or expansion of an existing building or parking structure that amounts to or exceeds either four thousand square feet or twenty-five percent of the assessed valuation of the existing building or parking structure within any thirty-six-month period; provided, that these

standards shall not apply to single-family detached dwellings, ~~duplexes~~ middle housing, and accessory uses associated with single-family detached dwellings and ~~duplexes~~middle housing; and

2. Exterior remodels or alterations to all buildings and parking structures except for single-family detached dwellings, ~~duplexes~~ middle housing, and accessory uses associated with single-family detached dwellings and ~~duplexes~~middle housing. Only the portions of the building or site being altered or added to shall be required to comply with the design standards. Even if otherwise applying, these standards do not apply to remodels or alterations that do not change the exterior appearance of the building or parking structure.

B. These design standards supplement requirements described in other sections of this chapter. Where these design standards conflict with other requirements contained in TMC Title 18 (Zoning), Tumwater development standards or the International Building Code (IBC) or its successor, those requirements shall apply, except that these design standards shall supersede design review guidelines in TMC Chapter 18.43 where conflicts may occur.

C. Standards may include options and illustrations of methods in which the intent of the standard can be achieved. The options provided are not intended to be all inclusive and other equal or better design techniques, as approved by the community development director, may be used to satisfy the design standard.

(Ord. O2011-002, Amended, 03/01/2011; Ord. O2002-019, Added, 01/07/2003)

Section 46. Section TMC 18.23.020, Uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.23.020 Uses.

Land uses allowed for each subdistrict are listed in Figure 18.23.020. Permitted uses are identified with a "P," conditional uses with a "C," and accessory uses with an "A."

Figure 18.23.020

LAND USES	TOWN CENTER ZONE SUBDISTRICTS

Figure 18.23.020 Footnotes:

(1) Emergency communication antennas and wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore both uses are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(2) Any alteration to the site or building that requires a conditional use permit shall meet the minimum conditions provided in TMC Chapter 18.56. An application for a conditional use permit shall be processed pursuant to TMC Title 14, Development Code Administration, and TMC Chapter 2.58, Hearing Examiner.

(3) Cocktail lounges are also permitted as accessory uses within restaurants.

(4) The cumulative amount of future expansions shall not exceed fifty percent of the covered floor space existing on January 1, 2000, for each site. See TMC Chapter 18.56.

(5) Antennas must be affixed to or erected upon existing buildings, water tanks or other existing structures. Antennas shall not be affixed to a wireless communication support structure. Emergency communication towers are not permitted.

(6) Motorized go-cart facilities are not permitted.

(7) See TMC 18.23.040(F) for surface parking lot siting requirements on properties fronting main streets.

(8) In the Town Center Mixed Use subdistrict, a parking structure may be located along a main street, provided the portion of the first floor fronting the main street is designed to accommodate a use allowed by this chapter other than parking.

(9) Restaurants may be allowed as accessory uses within a general or professional office building in the Town Center Professional Office subdistrict.

(10) Restaurants and retail sales are allowed as accessory uses in the Town Center Residential subdistrict when located on the first floor of a multistory residential building, provided the gross floor area dedicated to restaurant and/or retail sales use shall not exceed one thousand five hundred square feet per building or twenty-five percent of the first floor of each building, whichever is greater, and provided the residential portion of the development meets the density standards described in TMC 18.23.030.

(11) Electrical switching substations, electrical power transmission towers, natural gas pipelines, natural gas gate stations and regulating stations, and park and ride facilities are not permitted.

(12) Drive-through uses for espresso stands less than five hundred square feet in floor area, pharmacies, and banks and credit unions are allowed in the areas specified on Figure 18.23.010. Properties with drive-through uses in the TC Town Center zone district shall not have direct vehicular access onto either Capitol Boulevard or Tumwater Boulevard. The director may allow temporary vehicular access to Capitol Boulevard in order to accommodate changes to the street grid. Drive-through uses shall also meet the drive-through design guidelines of TMC Chapter 18.43. Where conflicts occur between this chapter and TMC Chapter 18.43, the more restrictive requirement shall apply.

(13) Food truck or trailer courts are subject to the requirements of TMC 18.42.120.

(14) Food trucks or trailers are subject to the requirements of TMC 18.42.120.

(15) Supportive housing facilities such as emergency housing, emergency shelters, permanent supportive housing, and transitional housing are subject to the requirements of TMC 18.42.150.

(16) Supportive housing facilities such as emergency housing, emergency shelters, permanent supportive housing, and transitional housing are permitted as an accessory use only as part of a permitted church use. Such supportive housing facilities shall not exceed twenty percent of the total building square footage of a church use and are subject to the requirements of TMC 18.42.150.

Figure 18.23.020 Explanatory Note:

1. If the box is shaded, the use is not allowed in that zone district.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2019-020, Amended, 11/19/2019; Ord. O2019-007, Amended, 09/03/2019; Ord. Section 47. Section TMC 18.23.030, Development standards – General, of the Tumwater Municipal Code is hereby amended to read as follows:

18.23.030 Development standards – General.

A. Airspace Surfaces. A series of imaginary airspace surfaces surround the Olympia Regional Airport. Except as necessary and incidental to airport operations, no structure or tree shall penetrate airspace surfaces as defined by 14 C.F.R. Part 77. See Figure 18.23.030A for additional information regarding airspace surfaces. The purpose of Figure 18.23.030A is to provide a visual description of airspace surfaces and may not be relied upon as determinative of the extent to which a structure may penetrate an airspace surface. A map that provides sufficient detailed information on ground and imaginary airspace surface elevations to be determinative is available for inspection in the community development department.

Nothing in this chapter shall diminish the responsibility of project proponents to submit a Notice of Construction or Alteration to the Federal Aviation Administration if required in accordance with Subpart B of Federal Aviation Regulations Part 77, "Objects Affecting Navigable Airspace."

B. Densities.

1. Town Center Mixed Use Subdistrict.

a. Minimum floor area ratio: none.

b. Maximum floor area ratio (FAR): 2.0 or a total of two square feet of gross floor area per one square foot of site area. The maximum FAR applies to the gross floor area of all buildings on the site, excluding parking structures and residential dwelling units. The community development director may administratively allow the FAR to be increased up to 3.0 if fifty percent of the additional FAR is for retail use.

2. Town Center Residential Subdistrict.

a. Minimum density: thirty dwelling units per acre.

b. Maximum density: none.

c. Density Calculation. Calculation of density is based on the portion of the site devoted to residential and associated uses (e.g., dwelling units; private community clubs, open space; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

i. Land that is required to be dedicated for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of open space/park areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations.

ii. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment and infiltration facilities).

C. Structure height: see Figure 18.23.030.

D. Setbacks. Minimum setbacks from property lines are provided in Figure 18.23.030. A maximum setback as described in TMC 18.23.050 applies to developments in the town center mixed use subdistrict with frontage on main streets identified in Figure 18.23.010.

E. Lot Coverage. No maximum, except adequate space must be provided for required parking, yards, landscaping and open space.

F. Open Storage. Open storage is prohibited. Long-term parking of operational company cars, light trucks, and vans within parking lots shall not be construed to be open storage.

G. Signs. Requirements of TMC Chapter 18.44 shall be met.

H. Off-Street Parking. Requirements of TMC Chapter 18.50 shall be met.

I. Fencing and Landscaping. Requirements of TMC Chapters 18.46 and 18.47 shall be met.

J. Design Review Guidelines. Requirements of TMC Chapter 18.43 shall be met; provided, that the design standards in this chapter shall supersede design guidelines in TMC Chapter 18.43 where conflicts may occur.

K. Pedestrian Access.

1. An on-site pedestrian circulation system that links the street and the primary entrance(s) of the structure(s) shall be provided. Sidewalks or pedestrian ways must connect the required pedestrian system to existing pedestrian systems on adjacent developments if adequate safety and security can be maintained. Convenient pedestrian access to transit stops shall be provided.

2. Sidewalks, walkways or pedestrian systems shall be required and constructed according to the city of Tumwater development guide.

3. Where the pedestrian circulation system crosses driveways, parking areas, and loading areas, it must be clearly identifiable, through the use of elevation changes, speed bumps, or a different paving material as approved by the community development director.

4. Lighting for parking lots and pedestrian ways shall be provided to ensure personal safety. Such lighting shall be integrated into the architectural character both in terms of illumination and fixtures. Lighting for parking lots shall meet the requirements of TMC 18.50.060(K). Lighting for pedestrian ways shall be shielded and be directed downward and inward or other techniques may be utilized to minimize impacts on off-site uses.

Figure 18.23.030 Maximum height and minimum setbacks

Subdistrict	Height	Front Setback[5]	Side Setback[5]	Rear Setback[5]
Town Center Mixed Use	65 Feet[1,6]	0 Feet[2]	0 Feet[4]	0 Feet[4]
Town Center Professional Office	100 Feet[1]	0 Feet	0 Feet[4]	0 Feet[4]
Town Center Residential	55 Feet[1,7]	0 Feet	0 Feet[5]	0 Feet[5]
Town Center Civic	65 Feet[1]	0 Feet	0 Feet[4]	0 Feet[4]

Figure 18.23.030 Notes:

(1) See subsection A of this section for additional height restrictions.

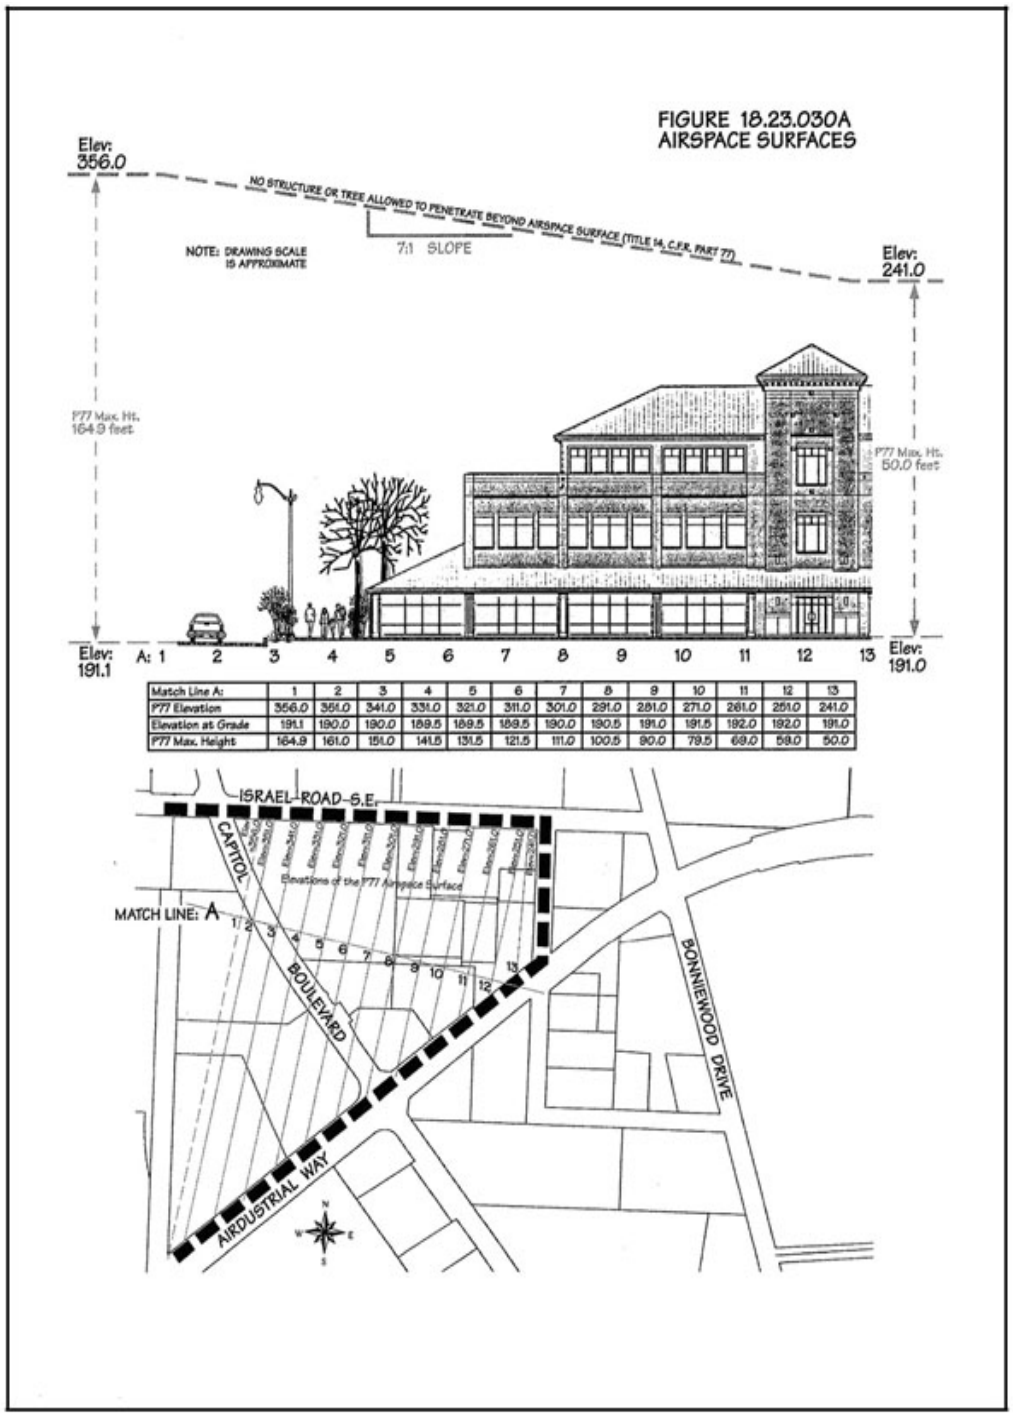
(2) See TMC 18.23.050(A) for the maximum setback requirement for properties with frontage on main streets.

(3) See TMC 18.04.230 for setback diagram.

(4) Where any structures or portions of structures within the town center mixed use, professional office or civic subdistrict, containing any permitted, accessory and/or conditional use allowed by this chapter, are adjacent to the town center residential subdistrict, the minimum setback shall be ten feet and shall be screened in accordance with TMC Chapter 18.47.

(5) Where any structures or portions of structures within the residential subdistrict, containing any permitted, accessory and/or conditional use allowed by this chapter, are adjacent to the town center mixed use, professional office or civic subdistrict, the minimum setback shall be five feet and shall be screened in accordance with TMC Chapter 18.47.

(6) The maximum structure height of sixty-five feet in the town center mixed use subdistrict may be increased to eighty-five feet if residential development is incorporated into the overall site plan. Residential development may be incorporated in any one of the following ways:



a. Six or more residential dwelling units may be located on any floor of the building proposed for a height increase; or

b. Six or more residential dwelling units may be located within a separate building or buildings physically integrated with and adjacent to the building proposed for a height increase, except that ~~detached~~ single-family detached dwellings and ~~duplexes~~ middle housing of less than six residential dwelling units are not permitted; or

c. The entire top floor of the building proposed for a height increase is dedicated to residential use. The applicant shall determine the number of residential units; or

d. Twenty or more permanently affordable housing units are located on any floor of the building proposed for a height increase. Projects providing permanently affordable housing units by this method would have to be a part of a new mixed use housing project that meets the requirements of TMC 18.42.140.

(7) New mixed use or multifamily projects with a total of thirty or more dwelling units in the Town Center Residential subdistrict that provide thirty percent of those units as permanently affordable housing units would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty-five feet in the Town Center Residential subdistrict. Projects providing permanently affordable housing units by this method would have to meet the requirements of TMC 18.42.140.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2011-002, Amended, 03/01/2011; Ord. O2006-034, Amended, 07/17/2007; Ord. O2001-020, Added, 05/07/2002)

Section 48. Section TMC 18.24.020, Permitted uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.24.020 Permitted uses.

Permitted uses in the LI light industrial zone district are as follows:

A. All uses having to do with buying and selling, or of a general commercial nature;

B. Wholesaling, manufacturing, assembling, repairing, fabricating, or other handling of products and equipment;

C. Warehouse distribution centers, subject to the requirements of TMC 18.42.110;

D. Recreational facilities;

E. Support facilities;

F. Parks, open space areas and recreational facilities;

G. Transportation terminal facilities;

H. Planned unit developments not including residential uses;

I. Post offices;

J. Park and ride facilities;

K. Schools, ninth grade and above;

L. Off-site hazardous waste treatment and storage facilities:

1. Off-site treatment and storage facilities must be located a minimum of two hundred fifty feet from surface water, residential zone districts, and public gathering places;

2. Off-site treatment and storage facilities are subject to the state siting criteria adopted pursuant to the requirements of Chapter 70.105 RCW;

M. Child day care center, child mini-day care center;

N. Sexually oriented businesses as defined in TMC Chapter 18.04 subject to the provisions of TMC 18.42.050;

O. Nurseries, retail or wholesale;

P. Museum, library, art gallery;

Q. Transit facilities;

R. Family childcare homes;

S. Motor pools and transit facilities;

T. Automobile service stations;

U. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

V. Wireless communication towers;*

W. Motor vehicle sales facilities, subject to the requirements set forth in TMC Chapter 18.42;

X. Equipment rental and sales facilities;

Y. Motorsports facility – indoor;

Z. Motorsports sales facility;

AA. Auto repair facilities;

BB. Crematories;

CC. Electric vehicle infrastructure;

DD. Agriculture;

EE. Community gardens;

FF. Farmers markets;

GG. Marijuana retailer;

HH. Breweries, wineries, distilleries, and associated restaurants;

II. Taverns, cocktail lounges;

JJ. Animal clinics or hospitals;

KK. Kennels;

LL. Offices;

MM. Mini-storage;

NN. Wildlife refuges and forest preserves;

OO. Temporary expansions of schools, such as portable classrooms;

PP. Restaurants;

QQ. Cross-dock facilities, fifty thousand square feet or smaller in size;

RR. Motor freight terminals, fifty thousand square feet or smaller in size;

SS. Warehousing, nondistribution, two hundred thousand square feet or smaller in size;

TT. Warehousing, nondistribution, larger than two hundred thousand square feet in size, subject to the requirements of TMC 18.42.110;

UU. Truck stops or travel centers;**

VV. Food trucks or trailers in accordance with TMC 18.42.120;

WW. Food truck or trailer courts in accordance with TMC 18.42.120;

XX. Optometry clinics;

YY. Personal services;

ZZ. Professional services.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

** Truck stops or travel centers are limited to an area within one-half mile of the Interstate 5 and 93rd Avenue SW interchange.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2019-020, Amended, 11/19/2019; Ord. O2019-019, Amended, 07/23/2019; Ord. O2019-018, Amended, 04/02/2019; Ord. O2018-025, Amended, 12/18/2018; Ord. Section 49. Section TMC 18.25.020, Permitted uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.25.020 Permitted uses.

Industrial activities, which can be accomplished within the performance standards established within the requirements of TMC Chapter 18.40, Environmental Performance Standards, are permitted.

Examples of permitted uses in the HI heavy industrial zone district are as follows:

A. All industrial activities involving the manufacture, assembly, bulk storage, processing, repair, recycling or servicing of goods or products;

B. Retail sale of goods or products manufactured on the premises, or utilized in manufacturing, repairing or servicing activities which are permitted in this district;

C. Mineral extraction;

D. Support facilities;

E. Transportation terminal facilities;

F. Planned unit developments not including residential uses;

G. Off-site hazardous waste treatment and storage facilities;

H. Park and ride facilities;

I. Automobile service stations;

J. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

K. Wireless communication towers;*

L. Crematories;

M. Electric vehicle infrastructure;

N. Community gardens;

O. Farmers markets;

P. Equipment rental and sales;

Q. Cross-dock facilities fifty thousand square feet or smaller in size;

R. Motor freight terminals fifty thousand square feet or smaller in size;

S. Warehousing, nondistribution, two hundred thousand square feet or smaller in size;

T. Food trucks or trailers in accordance with TMC 18.42.120;

U. Food truck or trailer courts in accordance with TMC 18.42.120.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

(Ord. O2019-020, Amended, 11/19/2019; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-023, Amended, 07/17/2018; Ord. O2017-006, Amended, 07/18/2017; Ord. O2010-029, Amended, 06/07/2011; Ord. O2010-015, Amended, 09/07/2010; Ord. O2008-017, Amended, 10/21/2008; Ord. O97-025, Amended, 12/02/1997; Ord. O97-019, Amended, 06/17/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Added, 12/19/1995)

Section 50. Section TMC 18.30.050, Conditional uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.30.050 Conditional uses.

Conditional uses in the GB greenbelt zone district are as follows:

A. Structures as an accessory use to agricultural uses;

B. Single-family ~~residence~~ detached dwelling located outside of the one-hundred-year floodplain on a parcel no smaller than five acres;

C. Transitional housing in a single-family ~~residence~~ detached dwelling located outside of the one-hundred-year floodplain on a parcel no smaller than five acres, subject to TMC 18.42.150;

D. Adult family homes and residential care facilities in a single-family detached dwelling~~residence~~ located outside of the one-hundred-year floodplain on a parcel no smaller than five acres.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O2017-006, Amended, 07/18/2017; Ord. O95-035, Added, 12/19/1995)

Section 51. Section TMC 18.31.040, Conditional uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.31.040 Conditional uses.

A. Single-family detached dwelling~~residence~~ located outside of the one-hundred-year floodplain on a parcel no smaller than five acres;

B. Campgrounds, recreational vehicle parks;

C. Transitional housing in a single-family detached dwelling~~residence~~ located outside of the one-hundred-year floodplain on a parcel no smaller than five acres, subject to TMC 18.42.150;

D. Adult family homes and residential care facilities in a single-family detached dwelling~~residence~~ located outside of the one-hundred-year floodplain on a parcel no smaller than five acres.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2021-019, Amended, 01/18/2022; Ord. O95-035, Added, 12/19/1995)

Section 52. Section TMC 18.34.020, Permitted uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.34.020 Permitted uses.

Permitted uses in the ARI airport related industry zone district are as follows:

A. Aviation and aviation-related uses;

B. Wholesaling, manufacturing, assembling, repairing, fabricating, or other handling of products and equipment;

C. Warehouse distribution centers, subject to the requirements of TMC 18.42.110;

D. General retail;

E. Offices;

F. Aviation fueling facilities;

G. Motor pool and equipment parking;

H. Park and ride facilities;

I. Transit facilities;

J. The raising of crops, including trees;

K. Hotel/motel and conference facilities;

L. Support facilities;

M. Parks, open space areas, and recreational facilities;

N. Post offices;

O. Child day care center, child mini-day care center;

P. Schools on parcels abutting residential zone ~~s~~districts and outside of the airport hazard area subject to the provisions of TMC Chapter 18.56;

Q. Sexually oriented businesses subject to the provisions of TMC 18.42.050;

R. Retail and wholesale nurseries or greenhouses;

S. Museums, libraries, art galleries;

T. Transportation terminal facilities;

U. Restaurants;

V. Automobile service stations;

W. Attached wireless communication facilities, except that it is prohibited to attach a nonaccessory wireless communication antenna on a single-family detached or ~~two-family~~middle housing dwelling;*

X. Wireless communication towers;*

Y. Motor vehicle sales facilities, subject to the requirements set forth in TMC Chapter 18.42;

Z. Equipment rental and sales facilities;

AA. Motorsports facility – indoor;

BB. Motorsports sales facility;

CC. Auto repair facilities;

DD. Crematories;

EE. Electric vehicle infrastructure;

FF. Agriculture;

GG. Community gardens;

HH. Farmers markets;

II. Marijuana retailer;

JJ. Breweries, wineries, distilleries;

KK. Kennels;

LL. Mini-storage;

MM. Wildlife refuges and forest preserves;

NN. Temporary expansions of schools, such as portable classrooms;

OO. Cross-dock facilities, fifty thousand square feet or smaller in size;

PP. Motor freight terminals, fifty thousand square feet or smaller in size;

QQ. Warehousing, nondistribution, two hundred thousand square feet or smaller in size;

RR. Warehousing, nondistribution, larger than two hundred thousand square feet in size, subject to the requirements of TMC 18.42.110;

SS. Energy systems;

TT. Food trucks or trailers in accordance with TMC 18.42.120;

UU. Food truck or trailer courts in accordance with TMC 18.42.120;

VV. Permanent supportive housing, subject to TMC 18.42.150;

WW. Transitional housing, subject to TMC 18.42.150;

XX. Emergency housing, subject to TMC 18.42.150;

YY. Emergency shelter, subject to TMC 18.42.150;

ZZ. Planned unit developments not including residential uses;

AAA. Optometry clinics;

BBB. Personal services;

CCC. Professional services.

*Wireless communication facilities are subject to Federal Aviation Administration (FAA) standards and approval, and furthermore are subject to provisions for wireless communication facilities in TMC Chapter 11.20, Wireless Communication Facilities.

Section 53. Section TMC 18.36.080, Public and private streets, of the Tumwater Municipal Code is hereby amended to read as follows:

18.36.080 Public and private streets.

A. Public streets shall be required in a planned unit development except as allowed in subsection B of this section.

B. Private Streets.

1. A private street may only serve four or fewer residential dwelling units, unless all of the dwelling units meet the federal definition of low income, then the private street may serve up to nine ~~detached~~ single-family detached dwellings or up to thirty-five ~~attached single-family~~middle housing, or multifamily dwelling units.

2. A private street may serve up to four businesses on separate parcels, or up to four businesses situated on one parcel.

3. The private street must meet the minimum design standards and requirements for private streets in the Tumwater development guide.

(Ord. O2022-006, Added, 08/01/2022)

Section 54. Section TMC 18.40.035, Exterior illumination, of the Tumwater Municipal Code is hereby amended to read as follows:

18.40.035 Exterior illumination.

These regulations apply to outdoor artificial light sources, including lights on the exterior of buildings or other structures, installed underneath canopies, pole-mounted, freestanding and ground lights, as well as nonresidential interior lights.

A. For the purposes of regulating lighting in this section and elsewhere in this title, the following terms shall be defined as stated:

1. "Business-zoned property" means any property ~~zoned~~ in the NC neighborhood commercial, CS community services, MU mixed use, GC general commercial, TC town center (TC town center mixed use, professional office, and civic subdistricts), ~~CD,~~ HC historic commercial, GB greenbelt, OS open space, LI light industrial, HI heavy industrial, CBC capitol boulevard corridor, BD brewery district, and ARI airport related industry zone districts.

2. "Foot-candle" means a measure of illuminance (or light intensity) on a surface equal to one lumen per square foot.

3. "Fully shielded fixture" means exterior lighting that is shielded or constructed so that all light emitted is projected below a horizontal plane running through the lowest part of the fixture as determined by a photometric test or certified by the manufacturer.

4. "Glare" means an intensity of light that due to the brightness of the light source diminishes the observer's ability to see, and in extreme cases may cause visual discomfort or momentary blindness.

5. "Light trespass" means the light emanating from one property (measured at the property line) intruding onto an adjacent property or public right-of-way.

6. "Lumen" means a unit of classification used to quantify the amount of light energy produced by a lamp. Lumen output of most lamps is listed on the packaging. For example, a sixty-watt incandescent lamp produces approximately eight hundred fifty lumens while a fifty-five-watt low-pressure sodium lamp produces approximately eight thousand lumens.

7. "Opaque" means not allowing light to pass through; not transparent or translucent.

8. "Partially shielded" means the luminaire incorporates a translucent barrier, the "partial shield" around the lamp that allows some light to pass through the barrier while concealing the lamp from the viewer.

9. "Residential-zoned property" means any property ~~zoned~~ in the RSR residential/sensitive resource, ~~SFL, SFM, MFM, MFH~~LDR low density residential, MDR medium density residential, HDR high density residential, and TC town center (TC town center residential subdistrict) zone districts.

10. "Translucent" means allowing light to pass, but diffusing it such that the light source cannot be distinguished.

B. Exterior Lighting Standards. Exterior artificial light sources shall conform to the following requirements:

1. Light fixtures shall be used in a manner such that light is directed downward, and not outward or upward.

2. Light fixtures shall be fully shielded.

a. Fixtures on business-zoned properties that are mounted to the underside of structures such as canopies, awnings, etc. (such as those found at gas stations, drive-through facilities, service stations, and parking structures) shall be flush mounted to the canopy so that the lens does not protrude below the surface to which it is mounted. In instances where the canopy is not thick enough to accommodate a flush-mount fixture, a fully shielded fixture may be utilized and mounted to the surface.

3. Exterior lighting shall not blink, flash, fluctuate, be intermittent, or change color or intensity.

4. Illuminated signs and advertising devices shall also comply with provisions of TMC 18.44.080 and 18.44.170. Where conflict occurs, the more stringent standards shall apply.

5. Parking lot lighting shall also comply with provisions in TMC 18.50.060. Where conflict occurs, the more stringent standards shall apply.

6. Exterior lighting on business-zoned properties shall be turned off at the close of business or 10:00 p.m., whichever is later. However, lighting which is

necessary for after business hours work by employees and lighting that is necessary for security systems to function properly may be utilized at any time provided the lighting is the minimum necessary and is turned off when it is no longer needed or being used.

7. Light trespass shall comply with the provisions of subsection D of this section.

8. Illumination of government flags is allowed provided the light fixtures are equipped with shields and louvers to control the beam spread and to prevent light trespass and glare.

9. Low voltage landscape lighting (thirty volts or less) is allowed provided it is partially shielded (upward-oriented spot/flood lights are not allowed) and does not violate the light trespass standards of subsection D of this section. Rope-style lighting of any voltage is also allowed for residential properties provided it meets the light trespass standards of subsection D of this section.

C. Application Required.

1. A basic lighting plan shall be submitted to the community development department along with building permit applications that involve the installation or replacement of exterior lighting. The basic lighting plan shall include, but not be limited to, descriptions, illustrations, or photos of the types of lighting fixtures to be installed, a statement or description of how the fixtures comply with the regulations, and descriptions or depictions of the locations of the proposed lighting fixtures. The basic lighting plan shall also include statements that the applicant will design their project to comply with the exterior lighting regulations, and the applicant will make any changes necessary to come into compliance with the regulations before their occupancy permit is issued. The basic lighting plan must be signed by the applicant(s) or their authorized agent(s).

2. For nonresidential development proposals that are four thousand square feet or larger, the community development director (or his/her designee) may require a photometric lighting plan instead of the basic lighting plan. The photometric plan, application, and a fee as specified by the most current fee resolution adopted by the Tumwater city council shall be submitted along with a building permit application. The photometric lighting plan must specify how the project lighting, including both freestanding and building-mounted lighting, complies with the applicable requirements of the Tumwater Municipal Code including this chapter. The photometric lighting plan shall also include the requirements listed for the basic lighting plan as shown in subsection (C)(1) of this section. Where requirements overlap or conflict, the more stringent shall apply.

D. Light Trespass. All light fixtures used on a premises shall be installed and maintained to prevent light trespass, measured at the property line of the originating property (light source), that exceeds one-tenth foot-candle illuminating

adjacent to residential-zoned property or one-half foot-candle illuminating adjacent to business-zoned property or public rights-of-way.

E. Exceptions. The restrictions on exterior lighting in subsections B, C and D of this section shall not apply to:

1. Light fixtures on structures listed in the Tumwater, or Washington State, or National historic registers (as defined in TMC Chapter 2.62) that are important in defining the overall historic character of the structure or building.

2. Projection equipment for outdoor movie theaters and outdoor movie events.

3. Security floodlights with motion detectors and daytime cutoffs that comply with the light trespass standards of subsection D of this section; provided, that the duration of activation by the motion sensor does not exceed sixty seconds. Light trespass at the property line may be diminished to acceptable levels by using lower wattage bulbs, downward and inward orientation, opaque or translucent shielding, or combinations thereof.

4. Seasonal decorations illuminated no longer than sixty days.

5. Lights on moving vehicles.

6. Sports field lighting.

7. Navigation lights (such as airports, heliports, or tower lighting required by the Federal Aviation Administration).

8. Temporary emergency lighting (such as fire, police, repair workers).

9. Traffic control signals and devices.

10. Exterior lighting approved by the community development director for temporary or periodic events (e.g., special events, nighttime construction, etc.). Searchlights, lighting displays lasting longer than seven days in any calendar year, and any lighting displays that cause any direct glare into or upon any building other than the building to which the display may be related are all prohibited.

11. Light sources lawfully installed prior to the effective date of these regulations.

12. Public streetlights are exempt only from the light trespass standards of subsection D of this section.

(Ord. O2018-007, Amended, 10/16/2018; Ord. O2014-007, Amended, 07/15/2014; Ord. O2011-002, Amended, 03/01/2011; Ord. O2009-001, Added, 11/02/2009)

Section 55. Section TMC 18.42.010, Accessory dwelling units, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.010 Accessory dwelling units.

It is the specific purpose and intent of allowing accessory dwelling units within ~~all~~ the RSR residential/sensitive resource, LDR low density residential, MDR medium density, HDR high density residential, and BD brewery district ~~residential~~ zone districts, to provide the opportunity and encouragement for the development of small housing units designed, in particular, to meet the housing needs of persons of low and moderate incomes who might otherwise have difficulty finding homes within Tumwater. Furthermore, it is the purpose and intent of this provision to allow the more efficient use of Tumwater's existing stock of dwellings and accessory buildings to provide economic support of present resident families of limited income, and to protect and preserve property values. To help achieve these goals and to promote the other objectives of this title, the following specific standards are set forth for such accessory dwelling unit uses:

A. There shall be no more than ~~one~~ two accessory dwelling units per lot in conjunction with a ~~single-family~~principal residential structure.

B. An accessory dwelling unit may be attached to, created within, or detached from a new or existing principal ~~primary single-family dwelling unit~~residential structure.

C. Off-street parking shall be provided according to the standards set forth in TMC Chapter 18.50.

~~D. An accessory dwelling unit shall be designed to maintain the appearance of the main building of the single-family residence.~~

~~1. If the accessory dwelling unit extends beyond the current footprint of the principal residence, such an addition shall be consistent with the existing roof pitch, siding, and windows.~~

~~2. If an accessory unit is detached from the main building, it must also be consistent with the existing roof pitch, siding, and windows of the principal residence.~~

~~3. The primary entrance to an accessory dwelling unit are encouraged to not be visible from the yard on the same side of the lot on which the primary entrance to the primary single-family dwelling unit is located.~~

~~E~~D. To ensure that the accessory dwelling unit is clearly secondary to the principal residential structure~~primary dwelling unit~~, the floor area for the accessory dwelling unit shall in no case exceed ~~eight hundred~~one thousand square feet of finished living space excluding garages, unfinished attics, or unfinished basements nor be less than the International Building Code minimum residential building square footage for finished living space~~, and the accessory dwelling unit shall contain no more than two bedrooms~~. Garages shall be not more than three hundred square feet in size for ~~single story~~ accessory dwelling units ~~and four hundred square feet in size for two story accessory dwelling units~~.

~~F. No more than one family, as defined in TMC Chapter 18.04, shall be allowed to occupy an accessory dwelling unit.~~

E~~G~~. An accessory dwelling unit, together with the principal residential structure ~~primary single-family dwelling unit~~ with which it is associated, shall conform to the provisions of this chapter and all other applicable codes and ordinances.

F. An accessory dwelling unit that is separate from a garage may be sited on the rear lot line if the rear lot line abuts a public alley.

G. Non-conforming structures legally established prior to December 16, 2025, may be converted into an accessory dwelling unit regardless of setbacks or lot coverage requirements. Conversions within non-conforming structures may not be expanded beyond the existing footprint. Such conversions must meet the size requirements of section D.

H. Accessory dwelling units may be sold independently from the principal residential structure upon approval and completion of a condominium or unit lot subdivision.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2018-007, Amended, 10/16/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2013-025, Amended, 01/07/2014; Ord. O2000-004, Amended, 07/18/2000; Ord. O99-001, Amended, 04/20/1999; Ord. O97-025, Amended, 12/02/1997; Ord. O95-035, Added, 12/19/1995)

Section 56. Section TMC 18.42.015, Buildings or structures for storage, agricultural uses, detached garages, or carports in residential zone districts, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.015 Buildings or structures for storage, agricultural uses, detached garages, or carports in residential zone districts.

It is the specific purpose and intent to allow accessory buildings or structures for storage, agricultural uses, detached garages, or carports in specific residential zone districts (RSR residential/sensitive resource, ~~SFL single-family~~LDR low density residential, ~~SFM single-family medium density residential,~~ BD brewery district, GB greenbelt, OS open space, and MHP manufactured home park zone districts), subject to the following restrictions.

A. The total square-footage of the footprints of all buildings or structures used for storage, agricultural uses, detached garages, or carports on lots less than two acres in size shall not be larger in square-footage than the footprint of the principal building or structure.

B. The total square-footage of the footprint of nonagricultural storage buildings or structures, detached garages, or carports on lots two acres or greater in size shall not be larger in square-footage than three thousand square feet.

C. For residential zone districts other than in the RSR residential/sensitive resource zone district, the total square-footage of the footprint of all buildings or structures used for agriculture on lots two acres or greater in size shall not be larger in square-footage than twenty thousand square feet.

D. In the RSR residential/sensitive resource zone district, the total square-footage of the footprints of agricultural buildings or structures on lots two acres or greater in size shall not be greater than the maximum impervious surface for lots allowed in TMC 18.08.050(G) and Table 18.08.050.

(Ord. O2018-007, Added, 10/16/2018)

Section 57. Section TMC 18.42.070, Agriculture, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.070 Agriculture.

A. Agriculture uses are allowed within the ARI airport related industry, LI light industrial, RSR residential/sensitive resource, ~~SFL, SFM and MFM~~LDR low density residential, and MDR medium density residential zone districts provided they are thirty acres or less in size and meet the following requirements:

1. The number and types of animals shall meet the requirements of TMC Chapter 6.08.

2. For the purposes of determining the total number of "animal units" allowed on a site (as defined in TMC 16.26.020(B)), acres are to be calculated in accordance with subsection B of this section.

3. On-site sales shall consist primarily of products produced on site by the agriculture use; except for lots less than two acres in size where all products sold must be produced on site by the agriculture use.

4. Signs shall meet the requirements listed in TMC Chapter 18.44.

5. Fences shall meet the requirements listed in TMC Chapter 18.46.

6. All agricultural uses shall adhere to the required best management practices (BMPs) and other provisions described in the city of Tumwater drainage design and erosion control manual. In the event the city has determined the agricultural uses cause a detrimental impact to water quality, additional best management practices may be required at the direction of the public works director or designee, including cessation of uses, as necessary to restore water quality and protect public health.

B. Acreage Calculation. The size of agriculture uses is calculated by measuring the area of a lot less the portion of the lot that is undevelopable due to critical areas, existing development, or other site conditions that make utilizing that portion of the lot unfeasible for agriculture or activities related to agriculture including product storage, sales, processing, etc. The acreage total includes contiguous parcels that are also being utilized by the same agriculture operation. In instances where urban farms utilize parcels that are not contiguous, they are to be considered separate uses for the size calculation. For the purposes of this calculation, lots on opposite sides of a public right-of-way are not to be considered contiguous.

(Ord. O2017-014, Amended, 07/18/2017; Ord. O2010-029, Added, 06/07/2011)

Section 58. Section TMC 18.42.080, Marijuana businesses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.080 Marijuana businesses.

A. Conditions of Approval. Marijuana businesses may be permitted but only if the following conditions are met:

1. Marijuana Producer. A marijuana producer shall be a conditional use in LI light industrial and ARI airport related industry zone districts and shall be subject to the following requirements:

a. Meet Washington State licensing requirements (Chapter 314-55 WAC);

b. Comply with all building, fire safety, health code, and business licensing requirements;

c. Lot size, building size, setbacks and lot coverage conform to the standards of the zone district except if the structure is a legal nonconforming structure;

d. Signage, if any, will conform to TMC Chapter 18.44;

e. Be within a fully enclosed secure indoor structure;

f. All buildings must be equipped with ventilation/air filtration systems so that no odors are detectable at the property line;

g. All buildings associated with the production of marijuana must be set back a minimum of three hundred feet from RSR residential/sensitive resource, LDR low density residential, MDR medium density residential, HDR high density residential, ~~SFL, SFM, MFM, MFH,~~ MU mixed use, CBC capitol boulevard corridor, TC town center, BD brewery district, GB greenbelt, OS open space, and MHP manufactured home park zone districts; and

h. The city may suspend or revoke conditional use permits based on a finding that the provisions of this section have not been met.

2. Marijuana Processor. A marijuana processor shall be a conditional use in the LI light industrial and ARI airport related industry zone districts and shall be subject to the following requirements:

a. Meet Washington State licensing requirements (Chapter 314-55 WAC);

b. Comply with all building, fire safety, health code and business licensing requirements;

c. Lot size, building size, setbacks and lot coverage conform to the standards of the zone district except if the structure is a legal nonconforming structure;

d. Signage, if any, will conform to TMC Chapter 18.44;

e. Be within a fully enclosed secure indoor structure;

f. All buildings must be equipped with ventilation/air filtration systems so that no odors are detectable at the property line;

g. All buildings associated with the production of marijuana must be set back a minimum of three hundred feet from RSR residential/sensitive resource, LDR low density residential, MDR medium density residential, HDR high density residential, ~~SFL, SFM, MFM, MFH,~~ MU mixed use, CBC capitol boulevard corridor, TC town center, BD brewery district, GB greenbelt, OS open space, and MHP manufacture home park zone districts; and

h. The city may suspend or revoke conditional use permits based on a finding that the provisions of this section have not been met.

3. Marijuana Retailer. A marijuana retailer shall be a permitted use in the GC general commercial, LI light industrial, and ARI airport related industry zone districts and shall be subject to the following requirements:

a. Meet Washington State licensing requirements (Chapter 314-55 WAC);

b. Comply with all building, fire safety, health code and business licensing requirements;

c. Lot size, building size, setbacks and lot coverage conform to the standards of the zone district except if the structure is a legal nonconforming structure;

d. Signage, if any, will conform to TMC Chapter 18.44.

(Ord. O2017-006, Amended, 07/18/2017; Ord. O2013-013, Added, 10/01/2013)

Section 59. Section TMC 18.42.100, Single-family uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.100 Single-family uses.

In the RSR residential/sensitive resource ~~(RSR), single-family low density residential (SFL), and single-family medium density residential (SFM)~~ zone district~~s~~, only one single-family ~~residence~~ detached dwelling or duplex as ~~a primary use~~the principal residential structure is allowed per legal parcel, unless the project is processed as a planned unit development. If permitted in the zone district, ~~an~~ accessory dwelling unit~~s~~ ~~is~~ are allowed in accordance with TMC 18.42.010.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2017-022, Added, 12/05/2017)

Section 60. Section TMC 18.42.110, Warehouses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.110 Warehouses.

A. Minimum Conditions.

1. Location Criteria.

a. Warehouse distribution centers regardless of size and nondistribution warehouses larger than two hundred thousand square feet in size must be located:

i. Within the crosshatched areas as shown in either Figure 18.42.110(A) or (B);

ii. More than one thousand feet from an urban residential zone district (RSR residential/sensitive resource ~~(RSR)~~, ~~single-family~~ LDR low density residential ~~(SFL)~~, ~~single-family medium-density residential (SFM), multifamily~~ MDR medium density residential ~~(MFM)~~, ~~multifamily~~ HDR high density residential ~~(MFH)~~, or MHP manufactured home park ~~(MHP)~~); and

iii. More than three hundred feet from a Thurston County rural residential zone district.

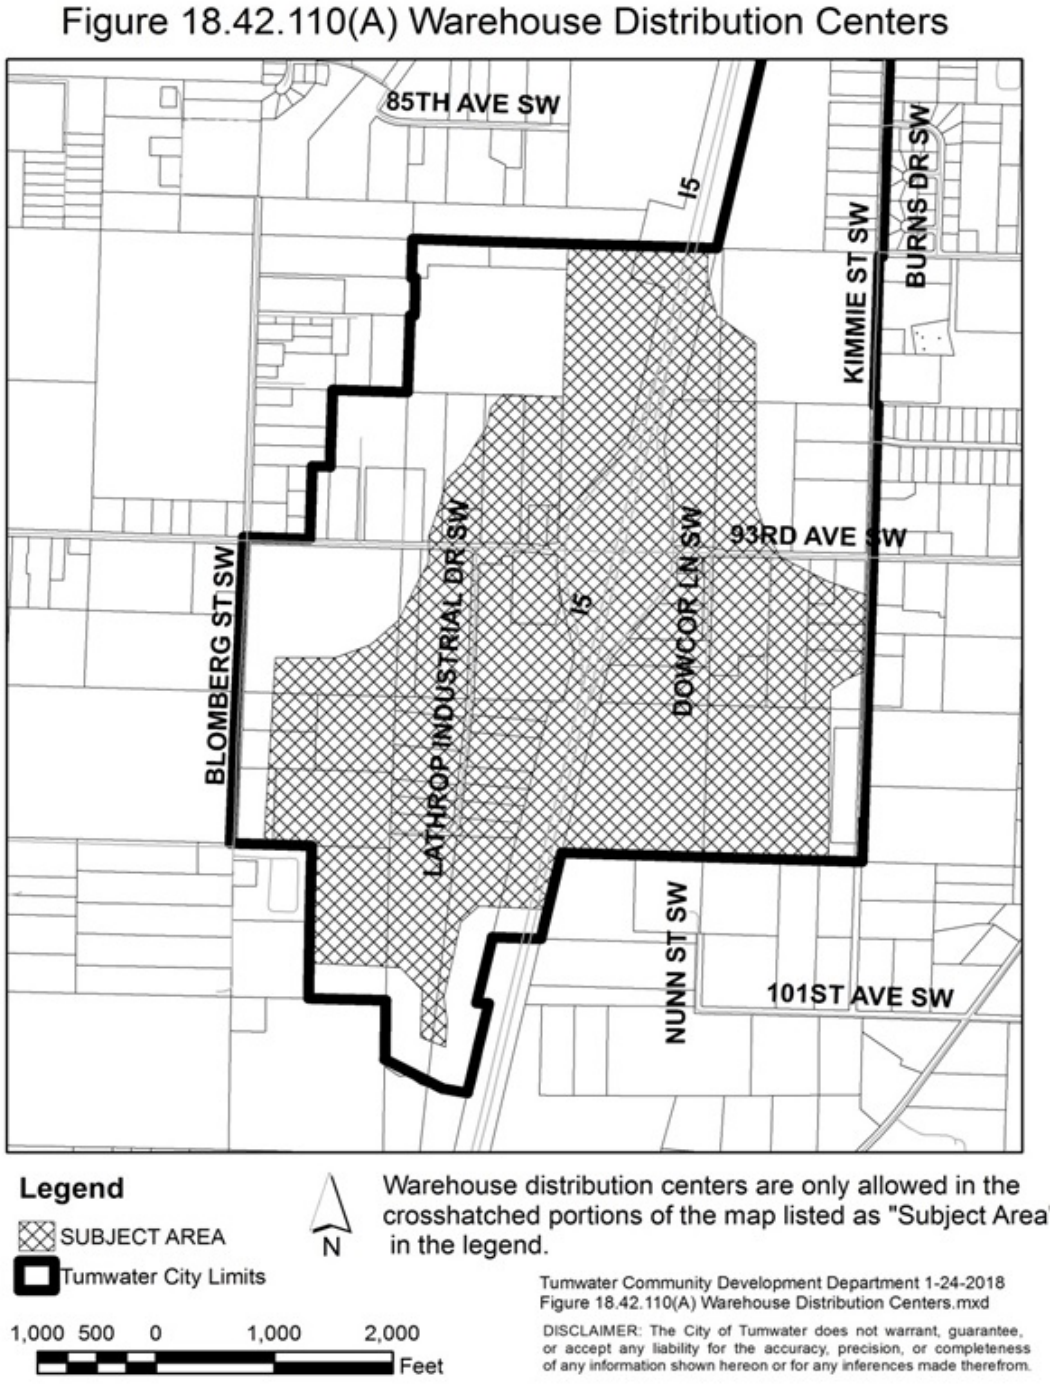
The restrictions in the location criteria above apply to buildings, truck loading and maneuvering areas, truck parking, and container/trailer or other storage. Accessory facilities, such as required stormwater facilities, landscaping and open space areas, automobile parking, and truck access routes, may be within the buffer areas described in the location criteria subject to the other buffering and setback requirements of the Tumwater Municipal Code.

If there is a question regarding the boundaries of the location criteria, the more restrictive criteria shall apply; and

b. Warehouse distribution centers regardless of size and nondistribution warehousing larger than two hundred thousand square feet in size must have a truck access route from a designated truck access point on the site to Interstate 5. The route from the access point on the site to Interstate 5 shall not be bordered on either side by properties with an urban residential zone district classification (RSR residential/sensitive resource ~~(RSR)~~, ~~single-family~~ LDR low density residential ~~(SFL)~~, ~~single-family medium-density residential (SFM), multifamily~~ MDR medium density residential ~~(MFM)~~, ~~multifamily~~ HDR high density residential ~~(MFH)~~, or MHP manufactured home park ~~(MHP)~~).

2. No off-street parking or loading areas will be allowed in any required yard area.

Figure 18.42.110(A) Warehouse distribution centers – 93rd Avenue.



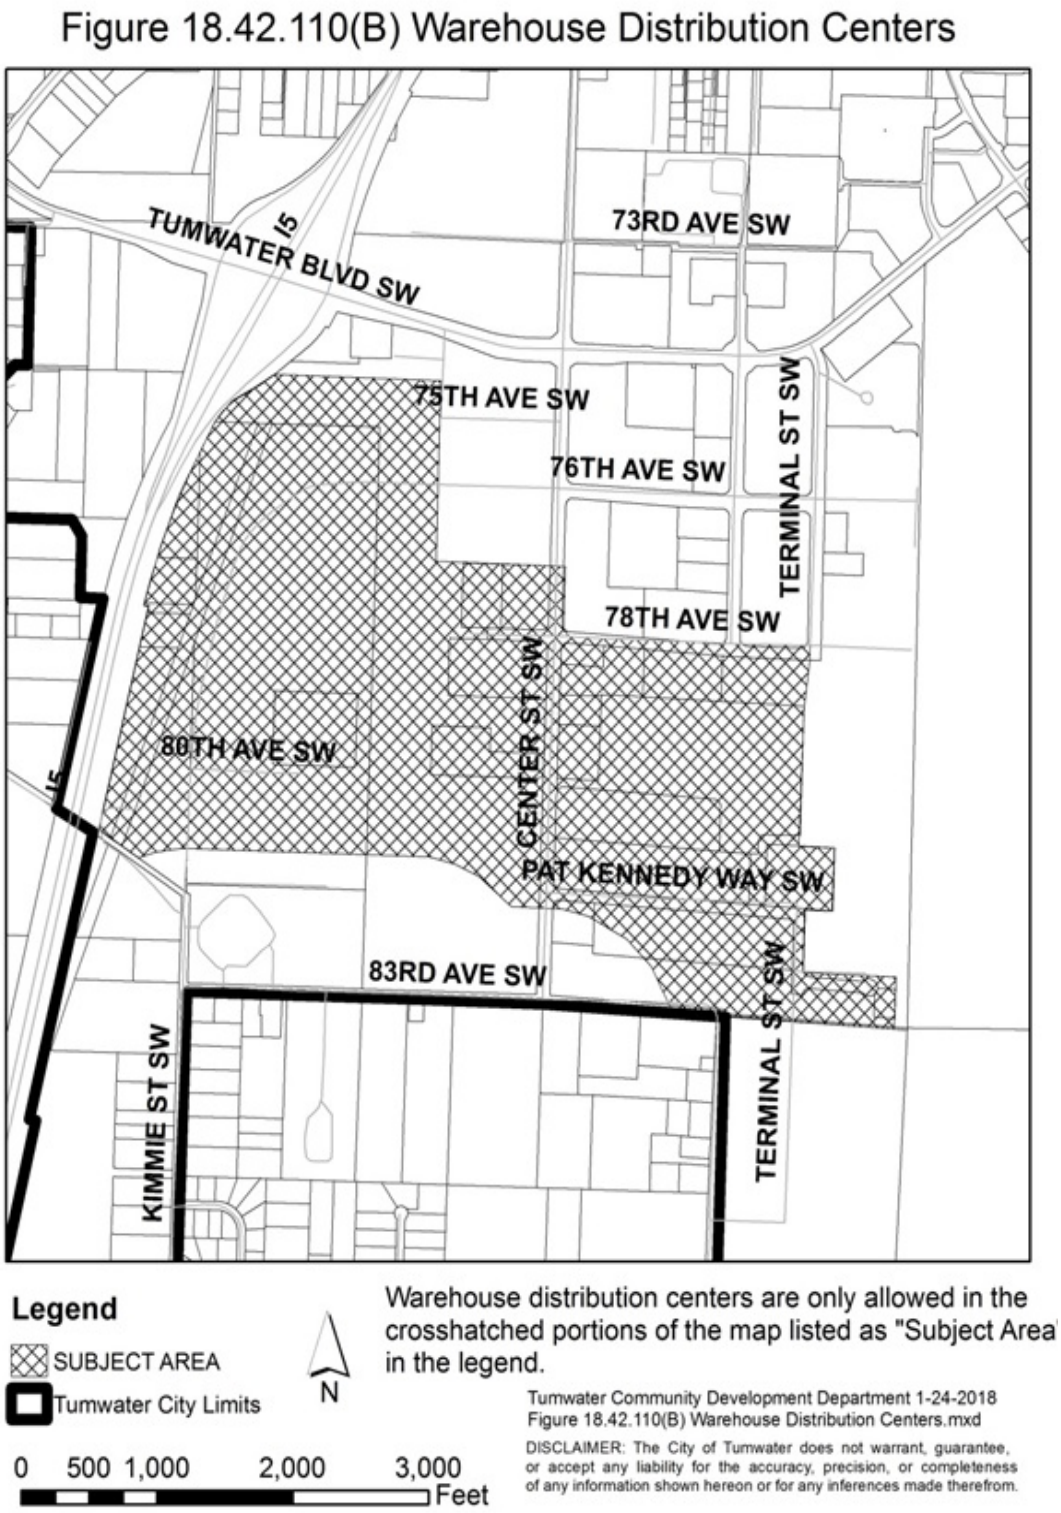


Figure 18.42.110(B) Warehouse distribution centers – ARI Airport related industry zone district.

(Ord. O2017-023, Added, 07/17/2018)

Section 61. Section TMC 18.42.130, Park and open space area standards for development without divisions of land, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.130 Park and open space area standards for development without divisions of land.

A. For new residential developments in which the majority of the dwelling units will be multifamily dwellings ~~or roominghouses~~, ~~or~~ five or more ~~dwelling units as rowhouses or townhomes~~townhouses, or manufactured home parks with five or more dwelling units, and the land is not being divided, a minimum of fifteen percent of the gross site area shall be set aside for park and open space area.

B. For new developments that will contain mixed use development, a minimum of fifteen percent of the gross site area shall be set aside for park and open space area.

C. For new commercial or industrial development of ten acres or more where land is not being divided, a minimum of five percent of the gross site area shall be set aside for park and open space area. A commercial or industrial land development that is part of an approved master plan providing for a park or open space area meeting the intent of this provision shall be considered to have fulfilled this requirement.

D. For the purpose of calculation of the park and open space area, the park and open space area shall be separate and distinct from required yards, setbacks, and landscaped areas.

E. The community development director in consultation with the parks and recreation director may accept a fee in lieu for park and open space area subject to the following:

1. The fee in lieu for park and open space area is only allowed where the amount of land required to be set aside for park or open space area in the development is smaller than one acre in size and the development consists of:

   a. Less than or equal to any combination of sixty dwelling units in multifamily, ~~roominghouses, rowhouses, townhomes~~ townhouses, or manufactured home park developments;

   b. Less than or equal to sixty residential dwelling units included in a mixed use development; or

   c. Any commercial or industrial development smaller than twenty acres in size.

2. When determining whether to accept a fee in lieu for park and open space area, the community development director in consultation with the parks and recreation director shall consider the following:

   a. The availability of other existing or planned public park within one-half mile of the development;

b. Whether the other existing or planned public park is or will be accessible from the development by sidewalk or paved pedestrian path; and

c. The overall public benefit of accepting a fee instead of the land for park and open space area.

3. The fee shall be based on an assessed valuation of the portion of the development that would otherwise be required to be set aside.

4. The fee shall be paid prior to any building permit being issued for the development.

F. For all new residential developments in which the majority of the dwelling units will be multifamily dwellings ~~or roominghouses~~, ~~or~~ five or more ~~dwelling units as rowhouses, townhomes~~townhouses, or manufactured home parks with five or more dwelling units, and the land is not being divided, at least fifty percent of the area set aside for park and open space area must be for active recreation, with the remainder set aside for passive recreation. For all nonresidential subdivisions, all the area set aside for park and open space area must be for passive recreation.

1. The following areas may be counted towards fulfilling the active recreation requirements:

a. Children's play equipment, such as slides, swings, and play structures;

b. A paved hard court for activities such as basketball, tennis, or pickleball;

c. Athletic fields for activities such as soccer or baseball and similar team sports;

d. Multiuse trails for pedestrians and bicycles meeting WSDOT multiuse trail design standards;

e. A flat, open lawn area with a surface suitable for unstructured active play;

f. Community gardens as defined in TMC 18.04.030, C definitions; and

g. Other similar active recreation facilities if approved by the community development director in consultation with the parks and recreation director.

2. That portion of stormwater ponds with active recreation facilities anticipated to be useable at least six months of the year may be counted towards fulfilling the active recreation requirement, provided these facilities are consistent with the drainage design and erosion control manual for Tumwater.

3. The following areas may be counted towards fulfilling the passive recreation requirements:

a. Facilities for walking, such as unpaved trails;

b. Landscaped areas with benches and other amenities;

c. Picnicking facilities, such as picnic tables and shelters;

d. Public plazas;

e. Vegetated desks and rooftops, provided the desk or rooftop is accessible to all residents and employees of the development;

f. Stormwater ponds with perimeter trails or year-round water features consistent with the drainage design and erosion control manual for Tumwater;

g. Tree protection areas preserved under TMC Chapter 16.08, provided access is provided within these areas via a trail consistent with the regulatory requirements for these areas;

h. Wetland buffers under TMC Chapter 16.28, wellhead protection areas under TMC Chapter 16.26, and special flood hazard areas under TMC Chapter 18.38, provided access is provided within these areas via a trail consistent with the regulatory requirements for these areas; and

i. Other similar passive recreation facilities if approved by the community development director in consultation with the parks and recreation director.

G. The park and open space area shall have convenient access for residents or employees of the development and the park and open space area shall be consolidated to provide maximum access, visibility, usability, minimization of impacts to residential uses, and ease of maintenance. These requirements may be waived by the community development director upon a finding that the residents or employees of the development would receive a greater benefit if the required park and open space area were provided in another configuration due to the size of the development, unique topographic conditions, or other factors determined by the community development director.

H. The park and open space area shall be designed and placed in consideration of existing and potential park and open space areas on adjacent parcels to allow for consolidation or provision of future opportunities for consolidation of park and open space areas.

I. Except where removal is required to meet active recreation requirements in this chapter, existing trees and significant native vegetation shall be retained in park and open space areas unless an alternate landscaping plan for such areas is required or approved by the community development director.

J. Park and open space areas shall be held in single ownership where such ownership assumes full responsibility for maintenance and operation, or held in common ownership by all of the owners in the development through a property owners' association or similar organization. As a condition of approval, the city may require or choose to accept dedication, when the park and open space area set aside is one or more of the following:

1. Greater than two acres.

2. Adjacent to an established or future city park or school grounds.

3. Includes public access to a body of water, wetland, important fish/wildlife habitat, or other environmentally sensitive area.

4. If the city determines it is in the public interest to accept land for park and open space area.

K. The owner of the park and open space area shall maintain it in a manner consistent with its purpose. Amenities such as those listed in subsections (F)(1) and (F)(3) of this section shall be maintained and kept in a clean, safe, and usable condition.

(Ord. O2023-012, Amended, 02/06/2024; Ord. O2020-015, Added, 02/16/2021)

Section 62. Section TMC 18.42.140, Permanently affordable housing incentives, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.140 Permanently affordable housing incentives.

A. Purpose. The purpose of this section is to provide incentives for~~to developers to provide the public benefit of~~ permanently affordable housing to help achieve comprehensive plan goals by:

1. Defining in quantified terms how providing permanently affordable housing can be used to earn incentives;

2. Providing rules and formulas for computing incentives earned; and

3. Providing a review process to allow for evaluation of proposed incentives and the permanently affordable housing offered to earn them, and to give the public opportunities to review and comment.

B. Density Incentives.

1. Permitted Locations of Density Incentives. Density incentives to provide permanently affordable housing shall be used only on sites served by public sewers and only in ~~the following zone districts:~~

~~a.~~ MDR M~~Multifamily m~~edium density residential ~~(MFM)~~ zone district.~~;~~ ~~and~~

~~b. Multifamily high density residential (MFH) zone district.~~

2. Permanently Affordable Housing Density Incentives.

a. The amount of permanently affordable housing eligible to earn density incentives and the maximum incentives to be earned are set forth in Table 18.42.140(B)(1) or in Table 18.42.140(B)(2) for permanent affordable housing projects located on real property owned or controlled by a religious organization. Density incentives are expressed as additional bonus dwelling units (or fractions of dwelling units) earned per amount of permanently affordable housing provided. Where a range is specified, the earned credit will be determined by the community development director during project review.

b. Residential development in ~~multifamily~~ MDR medium density residential ~~(MFM) and multifamily high density residential (MFH)~~ zone district~~s~~ with property-specific development standards shall be eligible to earn density incentives as set forth in Table 18.42.140(B)(1) or in Table 18.42.140(B)(2) for permanent affordable housing projects located on real property owned or controlled by a religious organization when the permanently affordable housing provided exceeds the basic development standards of this title.

Table 18.42.140(B)(1)

Permanently Affordable Housing Earning Density Incentives

Permanently Affordable Housing Provided	**Density Incentive**
Dwelling units consisting of rental housing that are permanently priced to serve very low-income and low-income households, which are part of a new multifamily housing project that provides a total of ten or more dwelling units. Very low-income households are defined as households with income less than or equal to fifty percent of Thurston County's median household income as determined by the Office of Financial Management. Low-income households are defined as households with income less than or equal to eighty percent and more than fifty percent of Thurston County's median household income as determined by the Office of Financial Management.	**MDR m~~Multifamily m~~edium density residential ~~(MFM)~~ zone district:** Projects that provide two permanently affordable housing units would be allowed an increase of one additional dwelling unit on top of the maximum current density with a transfer of development rights up to a maximum increase in density of five dwellings unit per acre. This would create a new maximum density of twenty-four dwelling units per acre in the ~~multifamily~~ MDR medium density residential ~~(MFM)~~ zone district for projects providing permanently affordable housing units. ~~**Multifamily high density residential (MFH) zone district:** Projects that provide two permanently affordable housing units would be allowed an increase of one additional dwelling unit on top of the maximum current density with a transfer of development rights up to a maximum increase in density of ten dwelling units per acre. This would create a new maximum density of thirty-nine dwelling units per acre in the multifamily high density residential (MFH) zone district~~.

Table 18.42.140(B)(2)

Permanently Affordable Housing Earning Density Incentives for Housing Projects Located on Real Property Owned or Controlled by a Religious Organization

Permanently Affordable Housing Provided	**Density Incentive**
Dwelling units consisting of rental housing located on real property owned or controlled by a religious organization that are permanently priced to serve very low-income and low-income households, which are part of a new multifamily housing project that provides a total of ten or more dwelling units. Very low-income households are defined as households with income less than or equal to fifty percent of Thurston County's median household income as determined by the Office of Financial Management. Low-income households are defined as households with income less than or equal to eighty percent and more than fifty percent of Thurston County's median household income as	**MDR medium density residential zone district:** Projects that provide two permanently affordable housing units would be allowed an increase of one additional dwelling unit on top of the maximum current density with a transfer of development rights up to a maximum increase in density of ten dwellings unit per acre. This would create a new maximum density of twenty-nine dwelling units per acre in the MDR medium density residential zone district for projects providing permanently affordable housing units.

Permanently Affordable Housing Provided	Density Incentive
determined by the Office of Financial Management.	

3. Rules for Calculating Total Permitted Permanently Affordable Housing Units. The total dwelling units permitted through density incentives review shall be calculated using the following steps:

a. Calculate the number of dwellings permitted by the base density of the site in accordance with TMC Chapter 18.14 ~~or 18.16~~;

b. Calculate the total number of bonus dwelling units earned by providing the permanently affordable housing listed in Table 18.42.140(B);

c. Add the number of bonus dwelling units earned to the number of dwelling units permitted by the base density;

d. Round fractional dwelling units down to the nearest whole number; and

e. On sites with more than one zone district or zone district density, the maximum density shall be calculated for the site area of each zone district. Bonus units may be reallocated within the zone district in the same manner set forth for base units in TMC 18.42.140.

C. Building Height Incentives.

1. Permitted Locations of Building Height Incentives. Permanently affordable housing building height incentives shall be used only on sites served by public sewers and only in the following zone districts:

a. MU Mixed use ~~(MU)~~ and GC general commercial ~~(GC)~~ zone districts;

b. The CBC Capitol Boulevard community ~~(CBC)~~ – North Trosper and North Neighborhood Center districts;

c. The TC town center ~~(TC)~~ residential and mixed use subdistricts; ~~and~~

d. The BD brewery district Knoll, Valley, Bluff, Triangle, Deschutes, and Bates neighborhood north subdistricts; and

e. The HDR high density residential zone district.

2. Permanently Affordable Housing Building Height Incentives.

a. The amount of permanently affordable housing eligible to earn building height incentives and the maximum incentives to be earned are set forth in Table 18.42.140(C)(1) or in Table 18.42.140(C)(2) for permanent affordable housing projects located on real property owned or controlled by a religious organization. Building height incentives are expressed as additional bonus feet or stories in height earned per amount of permanently affordable housing provided.

b. Residential development in the MU mixed use ~~(MU)~~ and GC general commercial ~~(GC)~~ zone districts; CBC Capitol Boulevard community ~~(CBC)~~ –

North Trosper and North Neighborhood Center districts; TC town center ~~(TC)~~ mixed use and residential subdistricts; ~~and~~ the BD brewery district Knoll, Valley, Bluff, Triangle, Deschutes, and Bates neighborhood north subdistricts; and HDR high density residential zone district with property-specific development standards shall be eligible to earn building height incentives as set forth in Table 18.42.140(C) when the permanently affordable housing provided exceeds the basic development standards of this title.

Table 18.42.140(C)

Permanently Affordable Housing Earning Building Height Incentives

Permanently Affordable Housing Provided	**Building Height Incentive**
Dwelling units consisting of rental housing that are permanently priced to serve very low-income and low-income households, which are part of a new mixed use or multifamily housing project. Very low-income households are defined as households with income less than or equal to fifty percent of Thurston County's median household income as determined by the Office of Financial Management. Low-income households are defined as households with income less than or equal to eighty percent and more than fifty percent of Thurston County's median household income as determined by the Office of Financial Management.	**MU mixed use ~~(MU)~~ zone district:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the MU mixed use ~~(MU)~~ zone district would be allowed an additional maximum building height increase of ten feet or one story, whichever is less, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty feet or six stories, whichever is less, in the zone district. **GC general commercial ~~(GC)~~ zone district:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the GC general commercial ~~(GC)~~ zone district would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of seventy-five feet in the zone district. **CBC Capitol Boulevard community ~~(CBC)~~ – North Trosper district:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the North Trosper district would be allowed an additional maximum building height increase of ten feet, subject to other neighborhood compatibility height restrictions in TMC Chapter 18.21 and imaginary airspace surface limitations. This would create a new maximum height limit of seventy-five feet in the district except for the areas between Linda Street and Lee Street on the east side of Capitol Boulevard where structure height shall be limited to fifty feet. **CBC capitol Boulevard community ~~(CBC)~~ – North Neighborhood Center district:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the North Neighborhood Center district would be allowed an additional maximum building height increase of ten feet, subject to other neighborhood compatibility height restrictions in TMC Chapter 18.21 and imaginary airspace surface limitations. This would create a new maximum height limit of seventy-five feet in the district. **TC town center ~~(TC)~~ mixed use subdistrict:** The maximum structure height of sixty-five feet in the town center mixed use subdistrict may be increased to eighty-five feet if twenty or more permanently affordable housing units are located on any floor of a mixed use building proposed for a height increase in the subdistrict. **TC town center ~~(TC)~~ residential subdistrict:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the town center residential subdistrict would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty-five feet in the subdistrict. **BD brewery district Knoll subdistrict:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those

Permanently Affordable Housing Provided	Building Height Incentive
	units as permanently affordable housing units in the Knoll subdistrict would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of eighty-five feet in the subdistrict. **BD brewery district Valley subdistrict:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the Valley subdistrict would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty feet height in the subdistrict. **BD brewery district Bluff subdistrict:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the Bluff subdistrict would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of fifty feet in the subdistrict. **BD brewery district Triangle subdistrict:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the Triangle subdistrict would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty-five feet in the subdistrict. **BD brewery district Deschutes subdistrict:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the Deschutes subdistrict would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty-five feet in the subdistrict. **BD brewery district Bates Neighborhood North subdistrict:** New mixed use or multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the Bates Neighborhood North subdistrict would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of fifty-five feet in the subdistrict. **HDR high density residential zone district:** New multifamily projects with a total of thirty or more dwelling units that provide thirty percent of those units as permanently affordable housing units in the HDR high density residential zone district would be allowed an additional maximum building height increase of ten feet, subject to imaginary airspace surface limitations. This would create a new maximum height limit of sixty feet in the zone district.

3. On sites with more than one zone district, the maximum building height shall be calculated for the site area of each zone district. Bonus units may be reallocated within the zone district in the same manner set forth for base units in this section.

D. Types of Permanently Affordable Housing Units Provided.

1. Where five or more permanently affordable housing units are provided, the ratio of permanently affordable housing units that are studio, one-bedroom, or two-bedroom or larger units shall be as follows:

a. Studio Units. One out of five units provided or twenty percent of the units provided.

b. One-Bedroom Units. Two out of five units provided or forty percent of the units provided.

c. Two-Bedroom or Larger Units. Two out of five units provided or forty percent of the units provided.

d. In determining the ratio of units where the remaining number of units are not a factor of five, the permanently affordable housing units provided shall be one-bedroom or larger units.

2. Where four or fewer permanently affordable housing units are provided, all permanently affordable housing units shall be one-bedroom or larger units.

E. Income Levels for Permanently Affordable Housing Units Provided.

1. Where five or more permanently affordable housing units are provided, the ratio of permanently affordable housing units that are for very-low income or low-income households shall be as follows:

a. Very Low-income Households. Three out of five units provided or sixty percent of the units provided.

b. Low-Income Households. Two out of five units provided or forty percent of the units provided.

c. In determining the ratio of units where the remaining number of units are not a factor of five, the permanently affordable housing units provided shall be for very low-income households.

2. Where four or fewer permanently affordable housing units are provided, all permanently affordable housing units shall be for very low-income households.

F. Limit on the Number of Permanently Affordable Housing Units.

1. No more than forty-five percent of the dwelling units in a permanently affordable housing development shall be permanently affordable housing units.

2. Exemptions.

a. Nonprofit affordable housing developers, religious organizations, and housing authorities that are defined as a "nonprofit entity" under RCW 84.36.560(f) are not subject to this limit.

G. Additional Development Standards.

1. Density and building height incentive developments shall provide one off-street parking space per unit of permanently affordable housing and otherwise provide parking consistent with TMC Chapter 18.50.

2. Density and building height incentive developments shall provide permanently affordable housing units of a similar size and scale as the rest of the development's units.

H. Review Process.

1. A developer who wishes to propose a permanently affordable housing project with incentives subject to this section shall file a complete application with the director that includes the following:

a. A completed city of Tumwater application form setting forth the grounds for the permanently affordable housing project with incentives;

b. Preliminary floor and site plans of the proposed project;

c. Verification by oath or affirmation of the information submitted; and

d. The required fees as established by resolution of the city council.

2. All density or building height incentives developments shall be reviewed concurrently with a primary development to consider the proposed site plan and methods used to earn extra density or building height as follows:

a. For the purpose of this section, a primary development is defined as a subdivision or short subdivision, or site plan review;

b. When the primary development requires a public hearing, the public hearing on the primary development shall serve as the hearing on the density or building height incentives development, and the hearing examiner shall make a consolidated decision on the proposed development and use of density or building height incentives;

c. When the primary development does not require a public hearing, the director shall administratively make a consolidated decision on the proposed development and use of density or building height incentives; and

d. The notice for the density or building height incentives development also shall include the development's proposed density or building height and a general description of the public benefits offered to earn extra density or building height.

3. Permanently affordable housing development agreement. Prior to issuance of a building permit for any dwelling unit in a development for which permanently affordable housing bonus units have been awarded, the developer and property owner shall enter into a permanently affordable housing development agreement with the city to guarantee their continued use and availability to very low-income and low-income households. The terms and conditions of the agreement shall run with the land, be noticed to title, shall be binding upon the successor in interest of the developer and property owner, and shall be recorded in the office of the Thurston County recorder. The agreement shall include the following provisions:

a. The deeds to the designated units shall contain language stating that the units shall be maintained as permanently affordable housing consistent with this section, and detailing the income level being served, rent levels, and requirements for reporting to the city.

b. The deeds to the designated units shall state that the developer, property owner, or his/her successor in interest shall not sell, rent, lease, sublet, assign, or otherwise transfer any interests in the permanently affordable housing unit without the written approval of the city confirming the continued use of the designated units for very low-income and low-income households.

c. The city shall have the authority to enter into other agreements with the developer, property owner, or purchasers of the permanently affordable housing units as may be necessary to assure that the required dwelling units are continuously occupied by eligible households.

I. Approval Process.

1. The director may approve the application for the permanently affordable housing project with incentives if he/she finds that:

a. The proposed permanently affordable housing project with incentives meets all the requirements of this section.

b. The proposed project is or will be, at the time of completion, in conformance with all local plans and regulations that apply at the time the application is approved.

c. The developer has completed the following items:

i. For each permanently affordable housing bonus unit, covenants and deed restrictions shall be recorded in the office of the Thurston County recorder that specifies the income level being served, rent levels, and requirements for reporting to the city and shall be recorded at final project approval.

ii. The permanently affordable housing development agreement shall be recorded in the office of the Thurston County recorder.

d. The developer has complied with all standards and guidelines adopted by the city under this title.

J. Minor Adjustments in Final Site Plans.

1. When issuing building permits for an approved density or building height incentives developments, the department may allow minor adjustments in the approved site plan involving the location or dimensions of buildings or landscaping, provided such adjustments shall not:

a. Increase the number of dwelling units;

b. Decrease the amount of perimeter landscaping (if any);

c. Decrease residential parking facilities (unless the number of dwelling units is decreased);

d. Locate structures closer to any site boundary line; or

e. Change the locations of any points of ingress and egress to the site.

K. Annual Compliance Review.

1. Within thirty calendar days after the first anniversary of the date of the certificate of occupancy for the project and each year thereafter, the property owner shall file a notarized declaration with the director indicating the following:

a. A statement of occupancy and vacancy of the permanently affordable housing multifamily units during the previous year;

b. A certification that the property continues to be in compliance with the permanently affordable housing development agreement with the city and this chapter and, if applicable, that the property has been in compliance with the affordable housing requirements as described in subsection (I)(1)(c)(i) of this section since the date of the certificate of occupancy for project;

c. A description of any subsequent improvements or changes to the property; and

d. Any additional information requested by the city in regards to the permanently affordable housing units.

2. City staff may also conduct on-site verification of the declaration.

3. Failure to submit the annual declaration or to comply with the permanently affordable housing development agreement and covenants and deed restrictions shall result in an enforcement action by the city.

(Ord. O2020-005, Added, 03/16/2021)

Section 63. Section 18.42.150, Supportive housing facilities standards, of the Tumwater Municipal Code is hereby amended to read as follows:

18.42.150 Supportive housing facilities standards.

A. Purpose and Applicability. The purpose of this section is to establish reasonable standards for the safe operation and appropriate siting of supportive housing facilities within the city, to protect the public health and safety for both supportive housing facility residents and the broader community.

As defined in TMC 18.04.180, "supportive housing facilities" includes emergency housing, emergency shelters, permanent supportive housing, and transitional housing in buildings or other permanent structures.

B. Performance Standards.

1. General Requirements for All Supportive Housing Facilities.

a. General.

i. When a site includes more than one type of supportive housing facility, the more restrictive requirements of this section shall apply.

ii. Specific needs of each supportive housing facility will be reviewed through the development review process in TMC Title 14.

iii. The community development director may modify one or more of the standards in this subsection, only when the applicant submits a description of the standard to be modified and demonstrates how the modification would result in a safe supportive housing facility and benefit the community under the specific circumstances of the application. In considering whether the modification should be granted, the community development director shall first consider the effects on the health and safety of supportive housing facility residents and the neighboring communities. Modifications will not be granted if they would result in adverse impact on residents of the supportive housing facility and/or neighboring communities. The applicant must demonstrate the benefits of the modifications to the community development director.

iv. All supportive housing facilities must comply with the provisions of the building and construction code under TMC Title 15 including Americans with Disabilities Act requirements.

b. Site and Transit.

i. Supportive housing facilities shall match the bulk and scale of residential uses allowed in the zone district where the supportive housing facility is located. The design, construction, appearance, physical integrity, and maintenance of the supportive housing facility shall provide an environment that is attractive, sustainable, functional, appropriate for the surrounding community, and conducive to tenants' stability.

ii. If provided, exterior lighting must comply with the standards in TMC 18.40.035 and elsewhere in this title and be directed downward, and glare must be contained within the supportive housing facility site to limit the impact on neighboring properties.

iii. The use shall meet landscaping and off-street parking standards in TMC Chapters 18.47 and 18.50.

iv. A description of transit, pedestrian, and bicycle access from the subject site to services must be provided at time of application by the sponsor and/or managing agency.

c. Separation and Distance Conditions. Supportive housing facilities shall meet the following separation and distance conditions:

i. Different types of supportive housing facilities may collocate on the same property with the same or different sponsors or managing agencies.

ii. With the exception of collocated supportive housing facilities on the same property described in subsection (B)(1)(c)(i) of this section, no supportive housing facility shall be located closer than four hundred feet

to another supportive housing facility whether such supportive housing facility is located within or outside the city limits. The distance shall be measured by following a straight line from the nearest point of public entry into the structure, which will house the proposed emergency housing and shelter to the nearest point of public entry into the structure housing another supportive housing facility. In the case of any supportive housing facility utilizing leased area or facilities, "property line" shall refer only to such leased area or facility.

d. Supportive Housing Facility Operations.

i. The sponsor or managing agency shall comply with all federal, state, and local laws and regulations, including Thurston County Department of Health regulations. The sponsor or managing agency shall be subject to inspections by local agencies and/or departments to ensure compliance and shall implement all directives resulting therefrom within the specified time.

ii. The sponsor or managing agency must provide an operation plan at the time of the application that adequately addresses the following elements:

(A) Twenty-four hours emergency contact information;

(B) Roles and responsibilities of key staff;

(C) Site/facility management, including security policies and an emergency management plan;

(D) Site/facility maintenance, including provisions for a regular trash patrol in the immediate vicinity of the site;

(E) Occupancy policies, including resident responsibilities and a code of conduct that address, at a minimum, the use or sale of alcohol and illegal drugs, threatening or unsafe behavior, and weapon possession;

(F) Provision for human and social services, including staffing plan, credentials or certification, and outcome measures;

(G) Outreach with surrounding property owners and residents and ongoing good neighbor policy; and

(H) Procedures for maintaining accurate and complete records.

(I) Provide a minimum and maximum time limit for occupation for transitional housing in the range of two weeks to twenty-four months. If the proposed time limit for the use is outside this range, the applicant shall follow the modification process in subsection (B)(1)(a)(iii) of this section.

iii. Sponsors or managing agencies shall demonstrate applicable experience providing similar services to people experiencing homelessness.

iv. Sponsors or managing agencies shall demonstrate a stable funding source for the supportive housing facility and any on-site or off-site human and social services offered as part of the operations plan.

v. Managing agencies and the Tumwater police department shall establish reasonable requirements for appropriate coordination with the subject supportive housing facility and its residents.

2. Additional Requirements for Emergency Housing and Emergency Shelters. In addition to the requirements under subsection (B)(1) of this section, emergency housing and emergency shelters are required to comply with the following:

a. Facility Standards. In all zone districts, no less than the minimum area per occupant established by the building code is allowed, up to eighty residents.

b. Facility Operations.

i. Trash receptacles must be provided in multiple locations throughout the facility and site.

ii. No children under the age of eighteen are allowed to stay overnight in the facility, unless accompanied by a parent or guardian, or unless the facility is licensed to provide services to this population. If a child under the age of eighteen without a parent or guardian present attempts to stay in a facility not specifically licensed for providing housing to youth, the sponsor and/or managing agency shall immediately contact Child Protective Services and actively endeavor to find alternative housing for the child.

iii. No person under court supervision or under sex offender registration requirements can receive services from a provider, unless providing such services is consistent with the laws, regulations, and/or supervisory requirements related to such persons.

c. Facility Services.

i. Residents shall have access to the following services on site; if not provided on site, transportation shall be provided:

(A) For all supportive housing facilities, medical services, including mental and behavioral health counseling.

(B) For emergency housing facilities, access to resources on obtaining permanent housing and access to employment and education assistance.

(C) For emergency shelter facilities, substance abuse assistance.

ii. All functions associated with the facility, including adequate waiting space, must take place within a building or on the site proposed to house the facility.

iii. The number of toilets and other hygiene facilities required for each facility will be determined by the building official on a case-by-case basis in consultation with the Thurston County health department after a review of factors such as the potential number and composition of residents.

iv. Facilities serving more than five residents shall have dedicated spaces for residents to meet with service providers.

v. The sponsor or managing agency shall coordinate with the homelessness service providers for referrals to their program and with other providers of facilities and services for people experiencing homelessness to encourage access to all appropriate services for their residents.

3. Additional Requirements for Permanent Supportive and Transitional Housing. In addition to the requirements under subsection (B)(1) of this section, permanent supportive housing and transitional housing are required to comply with the following:

a. Facility Standards.

i. In the RSR residential/sensitive resource, ~~SFL single family~~LDR low density residential, ~~SFM single-family medium density residential,~~ and MHP manufactured home park zone districts, the following additional standards apply to permanent supportive and transitional housing:

(A) Occupancy Limits. Permanent supportive and transitional housing shall be limited by the minimum area per occupant established by the building code for a single-family detached residence.

(B) Occupancy Limit Exceptions. Additionally, special exceptions to the limit on the number of occupants of a permanent supportive and transitional housing may be granted for persons with disabilities.

(C) Appearance. Permanent supportive and transitional housing are required to be a housing type allowed in the underlying zone district~~single-family structure compatible with the surrounding area~~.

(D) Parking. Any parking spaces in excess of two shall be screened from public streets.

(E) ~~The single-family housing~~The appropriate design standards of the citywide design guidelines shall apply to all facilities.

ii. In the ~~MFM multifamily~~MDR medium density residential and ~~MFH multifamily~~HDR high density residential~~,~~ zone districts, the following additional standards apply to permanent supportive housing:

(A) Appearance. Permanent supportive housing facilities are required to maintain residential character.

(B) Individual facilities shall not have more than forty dwelling units and are subject to the density standards of residential uses allowed in the zone district where the facility is located.

(C) The multifamily housing design standards of the citywide design guidelines shall apply to all facilities with more than five dwelling units.

b. Facility Services.

i. All residents shall have access to appropriate cooking and hygiene facilities.

ii. Facilities serving more than five dwelling units shall have dedicated spaces for residents to meet with service providers.

iii. Residents shall have access to the following services on site or shall be provided transportation to such services by the sponsor or managing agency:

(A) Medical services, including mental and behavioral health counseling.

(B) Employment and education assistance.

(Ord. O2021-019, Added, 01/18/2022)

Section 64. A new Section TMC 18.42.160, Conversion of existing structures into residential use, is hereby added to the Tumwater Municipal Code to read as follows:

18.42.160 Conversion of existing structures into residential use.

A. Purpose.

1. The purpose of this section is to establish reasonable standards for the conversion of existing commercial, industrial, or institutional structures to residential structures or mixed use structures that include residential use to increase housing supply.

B. Definition.

1. "Existing commercial, industrial, or institutional structure" means a legally permitted structure that received a Certificate of Occupancy at least three years prior to the application for conversion.

C. Applicability.

1. This section is applicable to existing commercial, industrial, or institutional structures located in the MDR medium density residential, HDR high density residential, NC neighborhood commercial, MU mixed use, CBC Capitol Boulevard Corridor, GC general commercial, TC town center, HC historic commercial, and BD brewery district zone districts that allow multifamily residential as a permitted use.

D. Standards. Conversion of an existing commercial, industrial, or institutional structure to residential structure or mixed use structure that includes residential use shall meet the following requirements.

1. Density may be increased by no more than fifty percent above the underlying zone district maximum density if the conversion is constructed entirely within the envelope of the existing structure.

2. Existing parking must be retained unless the proposed conversion exceeds the minimum parking requirements for residential and applicable non-residential uses and then existing parking above the minimum parking requirements may be removed.

3. Conversions within the MU mixed use or GC general commercial zone districts must be mixed use with a residential use.

4. The existing structure must meet the development standards that are applicable to multifamily or mixed use development in the zone district.

5. Changes to the exterior design may be required if necessary for health and safety of the use of the interior of the structure.

6. Space being converted into residential use must meet the requirements of TMC Title 15.

7. Conversions within the existing building footprint are exempt from the traffic study requirements of TMC Chapter 15.48 and the environmental policy requirements of TMC Chapter 16.04.

Section 65. A new Section TMC 18.42.170, Permanently affordable housing provisions, is hereby added to the Tumwater Municipal Code to read as follows:

TMC 18.42.170 Permanently affordable housing provisions.

A. Permanently affordable dwelling units shall meet the definition of affordable housing in TMC 18.04.010;

B. Such dwelling units shall be maintained as affordable housing for a period of no less than 50 years;

C. A covenant or deed restriction approved by the city shall be recorded by the property owner that ensures the rental or ownership of units subject to these affordability requirements will remain consistent with the conditions in chapter 84.14 RCW for a period of no less than 50 years, and shall address criteria and

policies to maintain public benefit if the property is converted to a use other than that which continues to provide for permanently affordable housing; and

D. Dwelling units dedicated as affordable housing shall:

1. Be provided in a range of sizes comparable to other units in the project;

2. Contain the same proportion of the number of bedrooms in affordable units as the other dwelling units within the project; and

3. Be distributed throughout the project and have substantially the same functionality as the other units in the development.

Section 66. Section TMC 18.44.070, Exemptions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.44.070 Exemptions.

The following signs are exempt from the permit requirements of this chapter, and shall not be included in the computation of sign size area for regulated signs. This shall not be construed as relieving the owner of the sign from the responsibility of its erection and maintenance and its compliance with any other applicable law or ordinance. Exempt signs are:

A. Signs associated with active construction posted during the construction period, and thirty days after an occupancy permit has been issued, subject to the following:

1. One unilluminated, double-faced sign is permitted for each public street upon which the project fronts;

2. No sign shall exceed thirty-two square feet in area or ten feet in height, or be located closer than thirty feet from the property line of the adjoining property; and

3. Signs must be removed by the date of first occupancy of the premises or one year after placement of the sign, whichever occurs first;

B. 1. Signs up to eight square feet in area that are posted on developed residential property or buildings actively for sale, lease, or rental, limited to one sign per street frontage. Signs must be removed within thirty days of the sale, lease, or rental process being completed; and

2. Signs up to thirty-two square feet in area that are posted on undeveloped residential property or commercial or industrial property or buildings actively for sale, lease, or rental, limited to one sign per street frontage. Signs must be removed within thirty days of the sale, lease, or rental process being completed;

C. Traffic control signs established by the Manual on Uniform Traffic Control Devices (MUTCD), installed by a government entity, or authorized by the public works department;

D. Plaques, tablets, or inscriptions not exceeding four square feet in area, attached flat against a building, stationary and not lighted; provided, that not more than one such sign shall be allowed on any face of a building;

E. Flags flown from a permanent flagpole or pole bracket:

1. For flags and permanent flagpoles in residential zone districts (~~SFL single-family~~LDR low density residential, ~~SFM single-family medium density residential, MFM multifamily~~MDR medium density residential, ~~MFH multifamily~~ HDR high density residential, and MHP manufactured home park zone districts) flags are limited to twenty-four square feet in area and permanent poles are limited to twenty-five feet in height; and

2. In all other zone districts, flags are limited to ninety-six square feet in area and permanent flagpoles are limited to fifty feet in height. Flags larger than forty square feet in area must be at least one hundred feet away from residential zone districts (~~SFL single-family~~LDR low density residential, ~~SFM single-family medium density residential, MFM multifamily~~MDR medium density residential, ~~MFH multifamily~~MFH high density residential, and MHP manufactured home park zone districts);

F. Signs within a ballpark or other similar recreational facility and are intended to be primarily viewed from within that facility;

G. Noncommercial signs that are carried and not permanently or temporarily affixed;

H. Temporary noncommercial signs, including noncommercial A-frame signs, subject to the following:

1. The maximum height of freestanding signs shall be four feet;

2. Building mounted signs shall not be displayed above the roofline;

3. Signs shall not exceed six square feet in area in residential zone districts (RSR residential/sensitive resource, ~~SFL single-family~~LDR low density residential, ~~SFM single-family medium density residential, MFM multifamily~~MDR medium density residential, ~~MFH multifamily~~HDR high density residential, and MHP manufactured home park zone districts) and the temporary sign area limits for commercial and industrial zone districts found in TMC 18.44.150;

4. Signs shall not be placed within the rights-of-way or block the sight distance of motorists;

5. Signs shall not be illuminated internally or externally;

6. Signs shall not incorporate or include flags, spinners, pennants, ribbons, balloons, or similar devices;

7. Signs placed on the inside of windows shall not exceed fifty percent of the area of the window on which they are displayed in aggregate; and

8. Signs may be displayed for up to one hundred and twenty days in any calendar year;

I. Pennants, streamers, ribbons, motionless air-filled figures, or motionless gas-filled figures, subject to the following restrictions:

1. Such displays shall conform to the height restrictions for permitted signs; and

2. Such displays shall be allowed for a period not to exceed fourteen days in any calendar year;

J. Signs not intended to be viewed from and not readable from a public right-of-way;

K. Window merchandise displays;

L. Point-of-purchase displays;

M. Official or legal notices issued and posted by any public agency or court;

N. Historic plaques marking sites on Tumwater's Register of Historic Places under TMC Chapter 2.62;

O. Gravestones;

P. Signs painted directly on or attached to an operable motor vehicle operating in the normal course of business; and

Q. Signs of an official nature.

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2014-020, Amended, 11/18/2014; Ord. O95-035, Amended, 12/19/1995; Ord. O94-018, Amended, 07/19/1994; Ord. 1254, Amended, 02/05/1991; Ord. 883, Added, 05/06/1984)

Section 67. Section TMC 18.44.090, Existing signs, of the Tumwater Municipal Code is hereby amended to read as follows:

18.44.090 Existing signs.

Any existing sign may continue to be in operation and be maintained after the effective date of the ordinance codified in this chapter and shall be a legal nonconforming sign provided:

A. The burden of establishing a sign to be legally nonconforming under this section rests upon the person or persons, firm or corporation claiming legal status for a sign.

B. A nonconforming sign may not be structurally altered or relocated. However, if such alteration or relocation is required as a result of government action, then said action is exempt.

C. Changes in the sign face wording of a nonconforming sign shall not be deemed an alteration under this section.

D. A nonconforming sign will cease to be a legal nonconforming sign if improvements are made to the property on which the sign is located amounting to twenty-five percent or greater of the assessed valuation of the property within any twelve-month period. Improvements to single-family detached dwellings shall be exempt from this requirement. Improvements made to any residential structure due to fire, earthquake, or storm damage, or other natural disasters shall be exempt from this requirement.

E. Any permanent nonconforming sign located in an area annexed into the city after January 1, 1996, shall be brought into compliance within five years of the date of annexation. Any temporary nonconforming sign located in an area annexed into the city after January 1, 1996, shall be brought into compliance within ninety days of the date of annexation.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O95-035, Amended, 12/19/1995; Ord. O94-018, Amended, 07/19/1994; Ord. 883, Added, 05/06/1984)

Section 68. Section TMC 18.44.140, Residential zone districts, of the Tumwater Municipal Code is hereby amended to read as follows:

18.44.140 Residential zone districts.

The following regulations shall apply to all residential zone districts (RSR residential/sensitive resource, ~~SFL single-family~~LDR low density residential, ~~SFM single-family medium density residential, MFM multifamily~~MDR medium density residential, ~~MFH multifamily~~HDR high density residential, and MHP manufactured home park zone districts):

A. Individual residences are allowed signs that when combined do not exceed six square feet in area;

B. A monument sign of up to thirty-two square feet in area may be permitted for each street frontage for a multiple-unit residential building of five units or more;

C. A monument sign of up to thirty-two square feet in area may be permitted for single-family detached dwelling and middle housing residential developments of five units or more at each entrance;

D. Any sign located within the front or side yard area shall comply with fence height regulations, as outlined in TMC Chapter 18.46;

E. One sign having a total of twelve square feet in area may be permitted for each nonresidential and nongovernmental use per parcel, except home occupations, which are limited by subsection A of this section;

F. In all residential zone districts, the height of any freestanding sign shall not exceed six feet;

G. Agriculture uses on lots less than one acre in size are allowed a single sign, twelve square feet in area. Agriculture uses on lots one acre and larger are allowed a single sign thirty-two square feet in area for each street frontage; and

H. Schools, public buildings, and churches located in residential zone districts are allowed up to fifty-five square feet of signage. Signs may be freestanding or wall mounted. The allowed square footage may be applied to more than one sign, but the overall amount may not exceed fifty-five square feet.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2017-007, Amended, 11/05/2018; Ord. O2014-020, Amended, 11/18/2014; Ord. O2010-029, Amended, 06/07/2011; Ord. O95-035, Amended, 12/19/1995; Ord. O94-018, Amended, 07/19/1994; Ord. 883, Added, 05/06/1984)

Section 69. Section TMC 18.44.150, Commercial and industrial zone districts, of the Tumwater Municipal Code is hereby amended to read as follows:

18.44.150 Commercial and industrial zone districts.

A. The following general regulations shall apply to the following zone districts: NC neighborhood commercial, CS community services, MU mixed use, GC general commercial, LI light industrial, HI heavy industrial, ARI airport related industry, TC town center, CBC capitol boulevard community, and BD brewery district:

1. Any sign located within the front yard area shall comply with fence height regulations, as outlined in TMC Chapter 18.46;

2. Signs shall be located at least two feet from the curb line or a service drive or travel lane;

3. All wall signs shall be flush against the building and shall not project above the roofline;

4. No freestanding sign shall be permitted to be higher than the principal building on the lot; provided, that no sign shall be higher than thirty feet; and provided also, that the height of any freestanding sign shall be limited to the heights set forth within each zon~~eing~~ district; and

5. No permanent window sign affixed to or incorporated into an exterior window shall exceed twenty-five percent of each window area.

B. The following specific regulations shall apply to signs in the NC neighborhood commercial zone district:

1. Signs shall be limited to a total of eighty square feet in area on all faces of all permanent freestanding signs; provided that no one sign face is larger than fifty percent of the total allowable sign area;

2. Wall signs shall be limited to an area not to exceed twenty percent of the public facade; provided, that the total area of signs on an individual public facade or other wall of a building does not exceed fifty percent of the sign area allowed for freestanding signs;

3. Twenty-five square feet in area shall be allowed for temporary signs; however, the temporary sign allowance shall be included in the signage amounts allowed for permanent signs;

4. No freestanding sign shall be higher than ten feet; and

5. The following specific regulations shall apply to pedestrian-oriented signs in the NC neighborhood commercial zone district:

a. Such signs shall not exceed eight square feet in area per sign face; provided, that such signs located below a pedestrian weather protection structure shall not exceed four square feet in area;

b. One such sign is allowed for each public entry of the first floor use onto the adjacent street;

c. The bottom of any sign of this type shall be at least nine feet above the sidewalk and shall not contain commercial messages other than the name of the use or business;

d. The maximum height of a pedestrian-oriented sign shall not exceed fifteen feet above the sidewalk; and

e. A pedestrian-oriented sign shall not be free-swinging and must not extend horizontally beyond the limits of a pedestrian weather protection structure.

C. The following specific regulations shall apply to signs in the CS community service and TC town center zone districts:

1. Signs shall be limited to a total of one hundred forty square feet in area on all faces of all permanent freestanding signs; provided, that no one sign face is larger than fifty percent of the total allowable sign area;

2. Wall signs shall be limited to an area not to exceed twenty percent of the public facade; provided, that the total area of signs on an individual public facade or other wall of a building does not exceed fifty percent of the sign area allowed for freestanding signs;

3. Freestanding signs are limited to monument signs only, and no freestanding sign shall be higher than six feet except within the TC town center civic subdistrict where they can be a maximum of eight feet tall as long as proper sight distances are met, which shall be shown on an engineered drawing and stamped by a professional engineer; and

4. The following specific regulations shall apply to pedestrian-oriented signs in the CS community service zone district:

a. Such signs shall not exceed eight square feet in area per sign face; provided, that such signs located below a pedestrian weather protection structure shall not exceed four square feet in area;

b. One such sign is allowed for each public entry of the first floor use onto the adjacent street;

c. The bottom of any sign of this type shall be at least nine feet above the sidewalk and shall not contain commercial messages other than the name of the use or business;

d. The maximum height of a pedestrian-oriented sign shall not exceed fifteen feet above the sidewalk; and

e. A pedestrian-oriented sign shall not be free-swinging and must not extend horizontally beyond the limits of a pedestrian weather protection structure.

D. The following specific regulations shall apply to signs in the MU mixed use, GC general commercial, LI light industrial, CBC capitol boulevard community, BD brewery district, and HI heavy industrial zone districts:

1. Signs shall be limited to a total of two hundred square feet in area on all faces of all permanent freestanding signs; provided, that no one sign face is larger than fifty percent of the total allowable sign area;

2. Wall signs shall be limited to an area not to exceed twenty percent of the public facade; provided, that the total area of signs on an individual public facade or other wall of a building does not exceed fifty percent of the sign area allowed for freestanding signs;

3. Seventy-five square feet in area shall be allowed for temporary signs; however, the temporary sign allowance shall be included in the signage amounts allowed for permanent signs;

4. No freestanding sign shall be higher than thirty feet; and

5. The following specific regulations shall apply to pedestrian-oriented signs in the MU mixed use, GC general commercial, LI light industrial, CBC capitol boulevard community, BD brewery district, and HI heavy industrial zone districts:

a. Signs shall not exceed eight square feet in area per sign face; provided, that such signs located below a pedestrian weather protection structure shall not exceed four square feet in area;

b. One such sign is allowed for each public entry of the first floor use onto the adjacent street;

c. The bottom of any sign of this type shall be at least nine feet above the sidewalk and shall not contain commercial messages other than the name of the use or business;

d. The maximum height of a pedestrian-oriented sign shall not exceed fifteen feet above the sidewalk; and

e. A pedestrian-oriented sign shall not be free-swinging and must not extend horizontally beyond the limits of a pedestrian weather protection structure.

E. The following specific regulations shall apply to signs in the ARI airport related industry zone district:

1. Signs shall be limited to a total of two hundred square feet in area on all faces of all permanent freestanding signs; provided, that no one sign face is larger than fifty percent of the total allowable sign area;

2. Wall signs shall be limited to an area not to exceed twenty percent of the public facade; provided, that the total area of signs on an individual public facade or other wall of a building does not exceed fifty percent of the sign area allowed for freestanding signs;

3. Twenty-five square feet in area shall be allowed for temporary signs; however, the temporary sign allowance shall be included in the signage amounts allowed for permanent signs; and

4. No freestanding sign shall be higher than thirty feet.

F. Illuminated awnings may be used in place of building-mounted signs in any commercial or industrial zone district, subject to the following restrictions:

1. Illuminated awnings shall not cover more than thirty-three percent of the face of any building;

2. Illuminated awnings shall not be placed higher than the first story of any building; and

3. Illuminated awnings shall conform to the hours of illumination set forth in TMC 18.44.170(D).

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2014-007, Amended, 07/15/2014; Ord. O2006-034, Amended, 07/17/2007; Ord. O2001-020, Amended, 05/07/2002; Ord. O97-025, Amended, 12/02/1997; Ord. HI	75 s.f.	200 s.f.			30 ft.		OPTIONAL

NOTES:

1. On corner lots, signs located within fifteen feet of the intersection of property lines abutting the street are limited to thirty-six inches in height above grade.

2. The height of any freestanding sign may not exceed the height of the principal building.

3. The temporary sign allowance shall be included in the amounts allowed for permanent signs.

4. Maximum allowable sign areas may be increased within multiple building complexes or in multiple tenant buildings pursuant to TMC 18.44.155.

5. Signs on product dispensers and vending machines are included in the maximum allowed for freestanding signs.

Section 71. Section TMC 18.44.170, Exterior lighting, of the Tumwater Municipal Code is hereby amended to read as follows:

18.44.170 Exterior lighting.

The use of exterior lighting shall be subject to the following regulations:

A. In conjunction with any commercial use, an exterior light source shall not be located above the building height of the nearest commercial building to which the light pertains;

B. Light that either prevents or tends to prevent proper interpretation of traffic-control lighting or signs shall not be permitted; and

C. Signs may be illuminated except that such illumination shall not blink, fluctuate, or move. Light rays shall directly shine only upon the sign or upon the property within the premises.

D. In the NC neighborhood commercial, MU mixed use, TC town center, and the CS community service zone districts, signs may be illuminated during the actual hours of operation of the business on the property on which the sign is located, or until 10:00 p.m., whichever is later.

E. In the GC general commercial zone district, lighted signs located within two hundred feet of and visible from the RSR residential/sensitive resource, ~~SFL single-family low~~LDR density residential, ~~SFM single-family medium density residential,~~

~~MFM multifamily~~MDR medium density residential, ~~MFH multifamily~~HDR high density residential, or MHP manufactured home park zon~~eing~~ districts that are illuminated by incandescent, fluorescent, neon, or similar lighting sources shall either (1) be turned off at the close of business or 10:00 p.m., whichever is later, or (2) shielded by use of indirect lighting or translucent panels.

(Ord. O2017-007, Amended, 11/05/2018; Ord. O2001-020, Amended, 05/07/2002; Ord. O2000-004, Amended, 07/18/2000; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Amended, 12/19/1995; Ord. O94-018, Amended, 07/19/1994; Ord. 883, Added, 05/06/1984)

Section 72. Section TMC 18.47.050, Types of landscaping, of the Tumwater Municipal Code is hereby amended to read as follows:

18.47.050 Types of landscaping.

All multifamily residential, commercial, and industrial projects shall be required to provide landscaping that satisfies the functions and specific requirements of this section. Single-family ~~housing~~detached dwellings, individual manufactured homes ~~(~~not part of a manufactured home park~~)~~, and ~~duplex~~ middle housing are specifically exempted from the requirements of this chapter.

A. Type 1 Landscaping – Sight Barrier Buffers.

1. Purpose. To provide a very dense sight barrier and physical barrier to significantly separate abutting incompatible zone districts (see Table 18.47). Landscaping of this type shall be used around the perimeter of the site, except where access for autos and pedestrians is required. Zone districts separated by public streets are not considered abutting and do not require vegetative separation in accordance with this section, except for proposed land uses listed under subsection C of this section that require type 1 landscaping on all sides.

2. Description.

a. A minimum of ten feet in width shall be required for each planting area.

b. A screen of at least six feet in height at time of planting, that results in a noise and sight obscuring buffer that is any one or a combination of the following methods:

i. A solid row of evergreen trees or shrubs.

ii. A solid row of evergreen trees and shrubs planted on an earthen berm an average of three feet high along its midline.

iii. A combination of trees or shrubs and fencing (metal or wood) or wall (brick, masonry or textured concrete).

c. Trees and shrubs should be spaced to grow together within four years from planting, and ground cover be provided to attain seventy-five percent coverage within four years.

B. Type 2 Landscaping – Visual Separation Buffers.

1. Purpose. To provide visual separation of compatible uses so as to soften the appearance of streets, parking areas and building elevation (see Table 18.47). Landscaping of this type may be used around the perimeter of the site, except where auto and pedestrian access is required. Zone districts separated by public streets are not considered abutting and do not require vegetative separation in accordance with this section, except for proposed land uses listed under subsections (C)(3) and (4) of this section that require type 2 landscaping on all sides. See TMC 18.47.020(F) for additional requirements that pertain to type 2 landscaping.

2. Description.

a. Trees shall be any combination of deciduous and evergreen (with no more than fifty percent being deciduous). One tree shall be provided for each twenty-five lineal feet of landscaped area.

b. A minimum planting area of eight feet in width shall be required.

c. Evergreen shrubs and ground cover must provide seventy-five percent coverage of the designated area within four years from planting.

C. Planting Requirements for Specific Uses.

1. The following uses require type 1 landscaping on all sides when located aboveground and not housed within a building or accessory to another use; and if located outside the public right-of-way:

a. Utility substation;

b. Sewage pumping station;

c. Water distribution facility;

d. Wireless communication tower; and

e. Wireless communication facility.

2. The following uses require type 1 landscaping on all sides not abutting a public street:

a. Medical clinic or hospital;

b. Mental health facility;

c. Inpatient facility;

d. Campgrounds/RV park;

e. Transportation facility, large scale or regional; and

f. Prison, jail, other corrections facilities, juvenile detention facility.

Note: Landscaping within fenced security areas and parking lots of facilities listed under subsection (C)(2)(f) of this section should not exceed a height of

twenty-four inches at maturity. Proposed landscaping plans should be reviewed by facility personnel to ensure landscaping does not interfere with facility security measures.

3. The following uses require type 2 landscaping on all sides:

a. School;

b. Church;

c. Neighborhood community center;

d. Emergency housing and emergency shelter; and

e. Permanent supportive housing and transitional shelter.

4. The following uses require type 2 landscaping on all sides. Type 1 landscaping must be used in place of type 2 landscaping for any side bordering a mixed use zon~~e~~ing district or any residential zon~~e~~ing district:

a. Industrial uses (wholesaling, manufacturing, assembling, storing, repairing, fabricating and distribution of goods and other handling of products and equipment) within the LI Light Industrial and ARI Airport Related Industry zon~~e~~ing districts.

D. Landscaping between Parking Lots and Public Rights-of-Way.

1. Purpose. To provide visual relief and separation of parking areas from public rights-of-way. The following requirements apply to all parking lots located adjacent to a public right-of-way, except those provided for, and on the same lots with, single-family detached dwellings and middle housing, and except for those land uses listed in subsection C of this section, which require type 1 landscaping on all sides. When a parking lot in any zone is located adjacent to a public right-of-way, a landscape strip as described below shall be provided on the property between the parking lot and the right-of-way. The landscaped strip may not include any paved area except pedestrian sidewalks or trails which cross the landscaped strip. Pedestrian access may be required to facilitate transit usage. Shrubs must be maintained at a maximum height of thirty-six inches. Any of the following landscaped strip treatments may be used singly or in combination:

a. Provide a minimum ten-foot-wide landscape strip between the right-of-way and the parking lot to be planted with a minimum of one shade tree and ten shrubs per thirty-five linear feet of frontage, excluding driveway openings.

b. Provide a berm, the top of which is at least two and one-half feet higher than the elevation of the adjacent parking lot pavement. The slope of the berm shall not exceed thirty-three percent for lawn areas. Berms planted with ground covers and shrubs may be steeper. However, no slope shall exceed fifty percent. Berms should be graded to appear smooth, rounded, naturalistic forms. Avoid narrow bumps, which result from creating too much

height for width of the space. Plant with a minimum of one shade tree and five shrubs per thirty-five linear feet of frontage, excluding driveway openings.

c. Provide a minimum six-foot-wide landscaped strip and a minimum three-foot grade drop from the right-of-way line to the adjacent parking lot pavement. Plant the resulting embankment with a minimum of one shade tree and five shrubs per thirty-five linear feet of frontage, excluding driveway openings. Ground cover or low shrubs shall be planted to attain seventy-five percent coverage within four years.

d. Provide a minimum five-foot-wide landscaped strip between the right-of-way line and the parking lot, with a minimum three-foot-high brick, stone or finished concrete wall to screen the parking lot. The wall shall be located adjacent to but entirely outside the five-foot landscaped strip. Plant with a minimum of one shade tree per thirty-five linear feet of frontage, excluding driveway openings.

e. Provide a minimum twenty-five-foot-wide strip of existing native vegetation, unless the creation of such a strip creates a hazard of existing trees as determined by a certified landscaper or forester.

E. Parking Area Interior Buffers.

1. Purpose. To provide visual relief and shade in parking areas. All parking areas with more than ten parking spaces are required to have landscaping as provided below.

2. Description.

a. Design.

i. Live planting material shall be provided throughout each landscaping area, and may be any combination of grass, shrubs and trees that provide the desired effect of providing visual relief and green space within the parking area.

ii. Each planting area shall contain at least one tree. Up to one hundred percent of the trees proposed for the planning area may be deciduous.

iii. Landscaping islands must be placed in every parking row at a maximum spacing of every ten parking spaces. Landscaping islands shall be a minimum of eight feet in width and shall extend the length of the parking stall. The minimum required width may be reduced for landscaping islands located in angled parking areas. In cases where no more than two parking rows wide are proposed for the entire parking lot, the maximum spacing requirement (ten spaces) may be varied as part of the site plan review process provided the total requirements for total landscaping area are met.

iv. To provide for vehicle overhang, curbs need to be located at least three feet from the trunk of the tree.

b. Required Amount.

i. If the parking area contains more than ten but no more than fifty parking spaces, at least seventeen and one-half square feet of landscape development must be provided for each parking stall proposed.

ii. If the area contains more than fifty but no more than one hundred parking spaces, at least twenty-five square feet landscape development must be provided for each parking stall proposed.

iii. If the parking area contains more than one hundred spaces, at least thirty-five square feet of landscape development must be provided for each parking stall proposed.

The above requirements are considered a minimum. Additional landscape area may be necessary to meet design requirements above.

F. Street Buffers.

1. Purpose. Provide visual relief along pedestrian corridors and to separate pedestrians from streets.

2. Description. Shall be in accordance with the development guide manual.

G. Outdoor Storage Buffers.

1. Purpose. Provide visual relief surrounding storage areas.

2. Description. A storage yard in connection with a permitted commercial or industrial use shall require visual screening from adjacent properties and public rights-of-way. Visual screening shall be required to consist of a continuous fence, wall, evergreen hedge, landscape planting or combination thereof so as to effectively screen the storage yard which it encloses, and be maintained in good condition. In cases where the physical characteristics of the parcel or surrounding parcels make actual screening from adjacent properties impossible or unreasonable, this requirement may be completely or partially waived by the hearing examiner after public hearing and review as required by the variance process.

H. Stormwater Facility Buffers.

1. Purpose. Provide buffers around aboveground stormwater detention/retention areas.

2. Description. The buffers must be provided according to the standards referenced and adopted in TMC Chapter 13.12.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2018-025, Amended, 12/18/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2008-014, Amended, 10/21/2008; Ord. O99-001, Amended, 04/20/1999; Ord. O97-024, Added, 03/03/1998)

Section 73. Section TMC 18.47.020, General requirements, and Table TMC 18.47, Required landscaping matrix, of the Tumwater Municipal Code is hereby amended to read as follows:

* Code reviser's note: A scrivener's error in the prior zoning code included the wrong requirements for buffers between MFM/MFH and MFM/MFM, an error that was inadvertently duplicated in Ordinance O2014-007. The Required Landscaping Matrix has been updated to include the correct provisions.

(Ord. O2018-007, Amended, 10/16/2018; Ord. O2014-007, Amended, 07/15/2014)

Section 74. Section TMC 18.48.150, Residential structures – Standards for designated manufactured homes, of the Tumwater Municipal Code is hereby amended to read as follows:

18.48.150 Residential structures – Standards for designated manufactured homes.

Any designated manufactured home that is used for residential purposes must meet the following standards:

A. Be comprised of at least two parallel sections each of not less than twelve feet wide by thirty-six feet long, except in the following instances:

1. The home is being installed as an accessory dwelling unit in accordance with TMC Chapter 18.42.

2. The home will be replacing an existing mobile home inside an existing mobile home park and the lot or space is too small to accommodate a designated manufactured home as described in this subsection A.

B. Be constructed with and now have a composition or wood shake or shingle, coated metal, or similar roof of nominal three-to-twelve pitch; and

C. Have exterior siding similar in appearance to siding materials commonly used on conventional site-built single-family ~~residences~~detached dwellings; and

D. Be set upon a permanent foundation, as specified by the manufacturer, and have the space from the bottom of the home to the ground enclosed by concrete or an approved concrete product which can be either load-bearing or decorative; and

E. Comply with all local design standards applicable to all other homes within the neighborhood in which the home is to be located; and

F. Be thermally equivalent to the energy code as adopted by TMC Title 15.

(Ord. O2010-017, Amended, 12/21/2010; Ord. O2005-011, Amended, 07/05/2005; Ord. O2001-012, Amended, 03/19/2002; Ord. O97-025, Amended, 12/02/1997; Ord. O95-035, Added, 12/19/1995)

Section 75. Section TMC 18.49.010, Intent, of the Tumwater Municipal Code is hereby amended to read as follows:

18.49.010 Intent.

The MHP manufactured home park ~~(MHP)~~ zone district is established to promote residential development that is high density, ~~single-family~~residential in character and developed to offer a choice in land tenancy. The MHP zone is intended to provide sufficient land for manufactured homes in manufactured home parks.

(Ord. O2008-009, Added, 02/17/2009)

Section 76. Section TMC 18.49.050, Development standards, of the Tumwater Municipal Code is hereby amended to read as follows:

18.49.050 Development standards.

Development in the MHP manufactured home park zone district must meet the following requirements:

A. Site Area. All residential developments (except for the use listed in TMC 18.49.020(D)) must meet the following density requirements:

1. Minimum: six dwelling units per acre;

2. Maximum: nine dwelling units per acre., ~~except that any density greater than eight dwelling units per acre shall be obtained only by~~ The purchase of transfer of development rights in accordance with TMC Chapter 18.57 would allow a maximum density of ten dwelling units per acre.

B. Density Calculation. The calculation of the density requirements in subsection A of this section is based on the portion of the site devoted to residential and associated uses (e.g., dwelling units; private community clubs; open space; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

1. Land that is required to be set aside for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of park and open space areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations.

2. Land that is intended for future phases of development.

3. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to support facilities (except for stormwater detention, treatment, and infiltration facilities).

C. Land coverage, maximum impervious surface: eighty-five percent of total area of the parcel.

D. Structure height: forty feet, maximum; provided, that no structure shall penetrate imaginary airspace surfaces as defined by 14 C.F.R. Part 77. A map that provides detailed information on ground and imaginary airspace surface elevations is available for inspection in the community development department.

E. Yards.*

1. Front: ten feet minimum from frontage property line.

a. Driveways in front yards on property lines abutting a public right-of-way must be a minimum of eighteen feet in length as measured along the shortest edge of the driveway starting from the front property line.

2. Side: five feet from property line, minimum.

3. Rear: five feet from property line, minimum.

Where structures are constructed over one story, the setback from the adjacent property line or lines shall be increased by ten feet for every story above the ground level story of the proposed new building, and shall be completely screened from view in accordance with TMC Chapter 18.47.

F. Park and Open Space Area. New development in the MHP manufactured home park zone district shall set aside land for park and open space area as specified in TMC 17.12.210 and 18.42.130 and the citywide design guidelines.

*See Diagram 18.04.670, Yard Determination Diagram, in TMC 18.04.230, Y definitions.

(Ord. O2020-015, Amended, 02/16/2021; Ord. O2016-037, Amended, 01/03/2017; Ord. O2011-002, Amended, 03/01/2011; Ord. O2008-009, Added, 02/17/2009)

Section 77. Section TMC 18.50.020, Parking, loading and bicycle facility general regulations, of the Tumwater Municipal Code is hereby amended to read as follows:

18.50.020 Parking, loading and bicycle facility general regulations.

A. Off-street parking, loading spaces, and bicycle facilities shall be provided in accordance with the provisions of this chapter when any of the following situations occur. These provisions apply to all uses and structures in all land use districts unless otherwise specified by this chapter.

1. When a principal or accessory building, except a storage shed smaller than five hundred square feet in the GB green-belt, OS open space, RSR residential/sensitive resource, ~~SFL single-family low density residential, or SFM~~

~~single-family medium~~ LDR low density residential zone districts, is erected, relocated, or expanded.

~~2. When a principal or accessory building, except a storage shed smaller than five hundred square feet in the GB green belt, OS open space, RSR residential/sensitive resource, SFL single-family low density residential, or SFM single-family medium density residential zone districts, is relocated or expanded.~~

~~3~~2. When a use is changed to one requiring more or less parking or loading spaces.

B. Required Plans. Building permits and city business licenses shall not be issued until there is an approved site plan identifying parking and loading facilities in accordance with this chapter.

C. Unlawful Removal. Parking, loading, and bicycle facilities meeting the requirements of this chapter shall not be discontinued unless alternative facilities are established. These facilities shall not be reduced in total unless approved alternatives are provided in compliance with this chapter, or a change in occupancy or use of a premises has occurred which results in a reduction of required parking.

D. Use of Facility. The property owner is responsible for ensuring that parking and loading facilities are only used by persons or uses for which the facilities are provided, including shared, combined, or leased parking.

E. Off-Site Parking. Parking lots may be established as a separate and primary land use in zone districts where they are listed as permitted or conditional uses.

F. Location. Off-street parking facilities may be provided either on site or within a one-quarter mile (one thousand three hundred twenty feet) walk of the primary entrance to the building unless otherwise specified. Off-street parking spaces shall not be allowed within yard areas except for residential off-street parking as provided in TMC 18.50.030(C) or ten feet from the property line in the front yard setback of the LI light industrial zone district.

G. Unlisted Uses. Any use clearly similar to any of the uses listed in TMC 18.50.070 as determined by the community development director shall meet the requirement for such use. If a similarity of use is not apparent, the community development director may require a parking demand study or determine the standards that should be applied to the use in question.

H. When the number of required parking spaces or bicycle spaces for a particular use or building results in a fractional space, any fraction less than one-half shall be disregarded and any fraction of one-half or greater shall be counted as one space, except for on-street credit wherein fractions shall be disregarded.

I. Maintenance. It shall be the duty of the owner(s) of a required parking area to maintain the area in a safe condition and in compliance with TMC 18.50.060.

J. Penalty. Any person found to have violated any of the provisions of this chapter shall be deemed to have committed a class 1 civil infraction pursuant to TMC Chapter 1.10.

Provided further, each day of continuing violation shall be considered a separate and distinct civil infraction.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2017-022, Amended, 12/05/2017; Ord. O2014-008, Amended, 10/07/2014; Ord. O2011-002, Amended, 03/01/2011; Ord. O98-009, Amended, 10/20/1998; Ord. O97-015, Added, 03/03/1998)

Section 78. Section TMC 18.50.030, Residential off-street parking, of the Tumwater Municipal Code is hereby amended to read as follows:

18.50.030 Residential off-street parking.

A. Required residential off-street parking spaces shall consist of an uncovered parking area, garage, carport, or combination thereof; and shall be located on the premises they are intended to serve.

B. Required parking spaces and driveways shall have a hard surface approved by the city, such as concrete, asphalt, or turfstone, except that driveways served by gravel roadways, and auxiliary parking spaces in excess of required parking, may be surfaced with gravel.

1. Gravel parking areas and driveways shall be designed to not track material into the public right-of-way to the satisfaction of the community development director and shall have a hard surface apron, a minimum of five feet wide adjacent to hard-surfaced public roads.

2. Existing lots of record one acre or larger in size, located in a residential zone district, and legally established prior to December 31, 1998, shall have the option of using gravel as a surface material for off-street parking spaces and driveways.

3. Existing lots of record located in a residential zone district with existing gravel parking areas legally established prior to December 31, 2025, shall have the option to continue using existing gravel parking areas as a surface material for off-street parking spaces and driveways up to a maximum of six spaces. ~~Gravel parking areas and driveways shall be designed to not track material into the public right-of-way to the satisfaction of the community development director and shall have a hard surface apron a minimum of five feet wide adjacent to hard-surfaced public roads.~~

C. Off-street parking spaces for single-family ~~units and duplexes~~ and middle housing dwellings shall not be allowed within required yard areas, except within an approved driveway which is at least five feet from the adjoining property line or shared with the neighboring lots.

D. Parking spaces in tandem, which is defined as having two or more vehicles, one in front of or behind the others with a single means of ingress and egress, shall

count towards meeting minimum parking requirements at a rate of one space for every twenty linear feet with any necessary provisions for turning radius.

E. Off-street parking shall not be required for a residential project if compliance with the tree retention requirements of TMC 16.08 would otherwise make a proposed residential development or redevelopment infeasible.

F. Existing off-street residential parking spaces that do not conform to the requirements of this section by June 6, 2024, are not required to be modified or resized, except for compliance with the Americans with Disabilities Act. Existing paved parking lots are not required to change the size of existing parking spaces during resurfacing if doing so will be more costly or require significant reconfiguration of the parking space locations.

(Ord. O2014-008, Amended, 10/07/2014; Ord. O97-015, Added, 03/03/1998)

Section 79. Section TMC 18.50.060, Off-street parking areas – Design requirements, of the Tumwater Municipal Code is hereby amended to read as follows:

18.50.060 Off-street parking areas – Design requirements.

The following requirements shall apply to off-street parking areas accommodating four or more vehicles excluding single-family residential and ~~duplexes~~middle housing:

A. Each parking area shall be designed to enable ingress and egress without requiring the vehicle to back over sidewalks, onto any roadway with a speed limit over twenty-five miles per hour, or onto a roadway that may pose inherent risks to traffic and safety to be determined by the public works director.

B. Parking areas shall be designed to:

1. Utilize ninety-degree parking if most efficient;

2. Orient parking rows perpendicular to the building to enhance pedestrian safety when possible;

3. Define stalls with white, or otherwise visible and uniform, striping a minimum of four inches wide to facilitate movement and maintain an orderly parking arrangement;

4. Minimize unnecessary impervious surfaces; and

5. Ensure access to public transportation through the design of internal roadways, parking areas, and pedestrian paths.

C. Parking facilities should provide for pedestrian accessibility between uses for transportation efficiency.

D. Sidewalks or walkways shall be designed to ensure pedestrian safety by separating any driveway or parking area from a building or roadway. Parking

spaces must utilize approved wheel stops to prevent vehicle overhang of a sidewalk or walkway. (See interlock reduction in Figure 18.50.060(A).)

E. The surface of all parking and vehicle maneuvering areas shall have an approved hard surface such as asphalt, concrete or turfstone unless a hard surface would interfere with proper operations (such as agricultural uses) or some industrial uses such as a heavy equipment rental facility, general contractor equipment yard, and product lay-down yards associated with uses such as manufacturing, building material sales, and plant nurseries. Parking or maneuvering areas that do not use an approved hard surface shall use an approved prepared surface, such as gravel. Prepared surfaces shall be designed to not track material into the public right-of-way to the satisfaction of the community development director and shall have a hard surface apron a minimum of twenty feet wide adjacent to hard-surfaced public roads.

F. Landscaped islands or dividers shall be required at the end of parking bays to clearly define traffic and turning patterns.

G. Parking facilities shall comply with the landscaping provisions set forth in TMC Chapter 18.47.

H. Parking facilities shall be designed and maintained in accordance with the parking standards in Figures 18.50.060(A) and 18.50.060(B).

Figure 18.50.060(A)

REQUIRED PARKING DESIGN STANDARDS[1]					
Angle	Stall Width (A)	Stall Depth (B)[2]	Aisle Width (C)[3]	Parking Module Width (D)	Interlock Reduction (E)
45°	9' – 0"	17' – 4"	12' – 3"	46' – 11"	2' – 0"
50°	9' – 0"	18' – 4"	12' – 9"	49' – 5"	1' – 10"
55°	9' – 0"	18' – 6"	13' – 3"	50' – 3"	1' – 7"
60°	9' – 0"	18' – 10"	14' – 3"	51' – 11"	1' – 4"

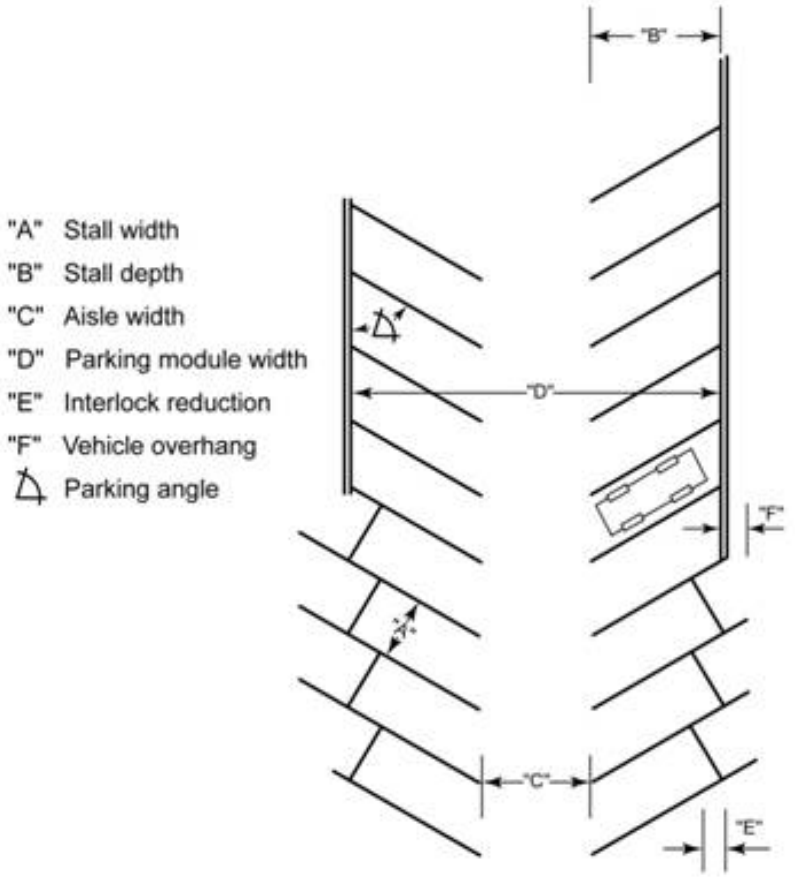
90°	9' – 0"	18' – 0"	22' – 6"	58' – 6"	N/A

NOTES



( ) Definitions for letters in parentheses appear in Figure 18.50.060(B).

1. Parking spaces for residential uses may not be required to exceed eight feet by twenty feet, except for parking required for people with disabilities;

2. For accessible parking standards, refer to TMC Chapter 15.04.

3. If parking aisle also serves as a required fire lane, the minimum unobstructed width shall be twenty feet.

Figure 18.50.060(B)

I. Accessible parking shall be provided in accordance with the building code, TMC Chapter 15.04.

J. Required High Occupancy Vehicles. All employers required to operate high occupancy vehicles (HOV) shall mark the closest parking spaces to the building "Reserved for HOV." These spaces shall not displace required accessible parking.

K. Parking lot lighting not exceeding twenty-four feet in height is required to provide safe access for pedestrians unless otherwise specified. All outdoor artificial light sources shall comply with TMC 18.40.035, Exterior illumination.

L. Employers with one hundred or more employees which use an administrative modification specified by TMC 18.50.075(B) to increase parking must meet the following design elements:

1. Double the amount of interior landscaping required under TMC Chapter 18.47 within the parking lot. Fifty percent of this requirement, if proven to be maintained, may be Grasscrete, Turfblock or other drivable pervious surface

within areas receiving sporadic use: usually the furthest from the building entrance.

2. Purchase and install a transit shelter to meet Intercity Transit operation needs unless already available within one-quarter mile and on the same side of the right-of-way as a primary entrance to the building. Intercity Transit may waive this requirement if it finds it impractical or may change the distance depending on density or demand.

3. Construct a transit pullout if subsection (L)(2) of this section is used, and if Intercity Transit finds it practical.

4. If transit requirements in subsections (L)(2) and (L)(3) of this section are deemed impractical or infeasible, credit may be given for other Intercity Transit or Thurston Regional Planning Council demand management strategies to the satisfaction of the community development director.

5. Construct a covered bicycle rack with secure bicycle lockers in accordance with TMC 18.50.120.

6. In those instances where site constraints impede these design elements, written findings of fact shall be made identifying site and project constraints, and shall be identified in the final project approval letter.

(Ord. O2017-022, Amended, 12/05/2017; Ord. O2014-008, Amended, 10/07/2014; Ord. O2010-017, Amended, 12/21/2010; Ord. O97-015, Added, 03/03/1998)

Section 80. Section TMC 18.50.070, Off-street parking space standards, of the Tumwater Municipal Code is hereby amended to read as follows:

18.50.070 Off-street parking space standards.

A. Off-street parking spaces shall be calculated using the standards outlined in Figure 18.50.070(A). Standards represent minimum and maximum numbers unless otherwise noted. Standards may be modified in accordance with TMC 18.50.075.

Figure 18.50.070(A)

RESIDENTIAL	NUMBER OF PRESCRIBED SPACES
Single-family dwelling and designated manufactured homes	Minimum of 2.0 spaces per dwelling unit.
Accessory dwelling	1.0 space per dwelling unit, if no on-street parking is available within 300 feet of the unit. Off-street parking is not required if an accessory dwelling unit is within one-half mile walking distance of a major transit stop.
Studio apartment	1.0 space per dwelling unit.
Multifamily dwelling	Minimum of 1.5 spaces per 1 – 2 bedroom dwelling unit, 2.0 spaces per 3+ bedroom dwelling units, plus 1.0 guest space for every 10 units.[1]
Middle housing	Minimum of 2.0 spaces per dwelling unit if lot is 6,000 square feet or larger, minimum of 1.0 space per dwelling unit is lot is less than 6,000 square feet.[2] Off-street parking

	is not required if a middle housing dwelling is within one-half mile walking distance of a major transit stop.
Senior housing	1.0 space per 2 bedroom unit plus 1.0 guest spaces for every 10 units.
Co-living housing	0.25 spaces per sleeping unit. Off-street parking is not required if a co-living housing facility is within one-half mile walking distance of a major transit stop.
Bed and breakfasts	1.0 space for each guest bedroom and 2.0 spaces for the operator.
Group foster home	1.0 space for each staff member plus 1.0 space for every 5 residents. Additionally, 1.0 space shall be provided for each vehicle used in connection with the facility.
Adult family home	1.0 space in addition to the space(s) required for the residential unit.
Residential care facility	1.0 space for each staff member plus 1.0 space for every 5 residents. Additionally, 1.0 space shall be provided for each vehicle used in connection with the facility.
Designated manufactured home park	1.0 spaces per lot or unit, whichever is greater. In addition, if recreation facilities are provided, 1.0 space per 10 units or lots, whichever is greater.
Home occupation	1.0 space for each employee outside of the immediate family in addition to the spaces required for the dwelling unit. If the occupation requires any customers and/or clients to visit the premises, at least 2.0 additional spaces shall be provided.

(1) Can be reduced to 1.0 spaces per 1 – 2 bedroom dwelling unit and 1.5 spaces per 3+ bedroom unit if within one-half mile of a transit stop by sidewalk or paved path.
(2) Before any zero lot line subdivisions or lot splits.

COMMERCIAL	NUMBER OF PRESCRIBED SPACES
Banks with drive-through windows/ATM units	3.0 per 1,000 square feet.
Beauty salon, barber shop	See Retail use.
Carpet and furniture showrooms	1.25 spaces per 1,000 square feet of gross showroom floor area. Each store shall have a minimum of 4.0 spaces.
Family child care home, child mini-day care center, child day care center	1.0 space for each staff member plus 1.0 space per 10 children. A facility located in a family residence must also provide required parking for a dwelling unit.
Hardware and building materials retailer	2.75 spaces per 1,000 square feet.
Hotel and motel	1.0 space for each room or suite and 1.0 space per manager's unit. Banquet and meeting rooms shall provide 6.0 spaces for 1,000 square feet of seating area. Restaurants are figured separately.
Laundromat, dry cleaner	See Retail use.
Market, shopping center, and large retail/wholesale outlet	Less than 20,000 square feet = 3.5 spaces per 1,000 square feet of gross floor area. Greater than 20,000 square feet = 3.25 spaces per 1,000 square feet of gross floor area.
Mini-storage facility	1.0 space for every 100 storage units and 2.0 spaces for permanent on-site managers with a minimum of 3.0 spaces for all facilities, regardless of size.
Mixed use	Shared or combined parking standards shall be used to calculate needed parking. This calculation is based upon

	the gross leasable area for each shop or business and does not include atriums, foyers, hallways, courts, maintenance areas, etc. See Shared and combined parking facilities, TMC 18.50.090.
Mortuary and funeral parlor	1.0 space per 75 square feet of assembly area or 13.0 stalls per 1,000 square feet of gross area, whichever is greater.
Offices, general	Gross floor area up to 2,000 square feet = 4.0 spaces per 1,000 square feet. GFA 2,001 to 7,500 square feet = 3.3 spaces per 1,000 square feet. GFA 7,501 to 40,000 square feet = 2.8 spaces per 1,000 square feet. GFA greater than 40,000 square feet = 2.5 spaces per 1,000 square feet.
Offices, government	3.5 spaces per 1,000 square feet.
Retail use	3.5 spaces per 1,000 square feet.
Automotive services (e.g., tire installation, lubrication, repair)	The community development director may require a parking demand study or determine the standards that should be applied to the use in question.
Warehouse distribution center, cross-dock facility, or motor freight terminal	1.0 space per 2,000 square feet, or the community development director may require a parking demand study or determine the standards that should be applied to the use in question.
Warehouse, storage	10,000 square feet or less = 1.0 space per 2,000 square feet. 10,001 to 20,000 square feet = 10.0 spaces plus 0.75 spaces for each additional 2,000 square feet. Over 20,000 square feet = 18.0 spaces plus 0.5 space for each additional 2,000 square feet; or the community development director may require a parking demand study or determine the standards that should be applied to the use in question.

RESTAURANT	**NUMBER OF PRESCRIBED SPACES**
Drive-up stands (espresso, etc.)	2.0 spaces plus 1 lane for each drive-up window with stacking space for 3 vehicles. See TMC 18.43.020 for additional stacking lane requirements.
Cafe, bar, and other drinking establishments	10.0 spaces per 1,000 square feet.
Car hop (auto-borne customers served outside of building only)	1.0 space per 15 square feet.
Fast food	10.0 spaces per 1,000 square feet plus 1 lane for each drive-up window. See TMC 18.43.020 for stacking lane requirements.
Restaurant with seats	1.0 space per 100 square feet of dining area.

INDUSTRIAL	**NUMBER OF PRESCRIBED SPACES**
Manufacturing use	1.0 space for each employee on the largest shift, with a minimum of 5.0 spaces, or the community development director may require a parking demand study or determine the standards that should be applied to the use in question.

EDUCATIONAL	**NUMBER OF PRESCRIBED SPACES**

Elementary and middle schools	1.0 space per 6 students at design capacity.
High school	1.25 spaces per classroom or office, plus 1.0 space per 4 students. Public assembly areas, such as auditoriums, stadiums, etc., that are primary uses may be considered a separate use.
Library and museum	5.0 spaces per 1,000 square feet of public floor area.

HEALTHCARE	NUMBER OF PRESCRIBED SPACES
Nursing home, congregate care, rest home, hospice care home and mental health facility	1.0 space per 4 regular beds, plus 1.0 space for every regular employee on the largest shift.
Medical clinics	5.0 spaces per 1,000 square feet.
Emergency housing, emergency shelter, permanent supportive housing, and transitional shelter	A parking plan based on population served and projected needs should be submitted and approved by the community development director.

PLACES OF ASSEMBLY	NUMBER OF PRESCRIBED SPACES
Church	1.0 space per 4 seats or 1.0 space per 6 feet of bench or other seating. 6.0 spaces per 1,000 square feet of assembly area where seats or pews are not provided or when circumstances warrant increased parking, such as a church which attracts a large, regional congregation or one which has multiple functions. See Shared and combined parking facilities, TMC 18.50.090.
Private club or lodge	6.0 spaces per 1,000 square feet.
Theater and auditorium	1.0 space per 4.5 fixed seats. If the theater or auditorium is a component of a larger commercial development, the above parking standard may be modified to account for shared or combined parking; TMC 18.50.090.
Theater and auditorium without fixed seats	1.0 space per 3 permitted occupants.

RECREATION AND AMUSEMENT	NUMBER OF PRESCRIBED SPACES
Bowling alley	5.0 spaces per alley.
Health club	5.0 spaces per 1,000 square feet.
Skating rink and other commercial recreation	5.0 spaces per 1,000 square feet.

B. Parking spaces provided within a parking structure or underneath a building shall be exempt from maximum parking requirements.

C. All vehicle parking standards are based on gross square feet of building area, unless otherwise noted.

~~D. Preexisting Conditions.~~

~~1. Uses legally established on or before December 31, 1998, that have an insufficient number of parking spaces to comply with this chapter shall be considered in compliance with vehicular requirements for this chapter. Required bicycle facilities must still be provided.~~

~~2. If a use legally established on or before December 31, 1998, changes or expands, the additional parking that would be required as a result of the change or expansion will still be required at the rate specified in this chapter. For example:~~

~~A use providing eight spaces instead of the ten required by code and which meets the requirements of this chapter is thus in compliance. If the use changes or expands to one that would require twenty spaces (ten more than the current use) the parking generator is required to provide only ten more spaces instead of the twelve spaces that would otherwise be required.~~

~~E~~D. Up to fifteen percent of off-street parking stalls may be compact stalls. Compact stalls shall be eight feet in width by seventeen feet in length.

E. Additional standards for residential parking:

1. Parking spaces that count towards minimum parking requirements may be enclosed or unenclosed.

2. Parking spaces in tandem must count towards meeting minimum parking requirements at a rate of one space for every twenty linear feet with any necessary provisions for turning radius. For purposes of this subsection, "tandem" is defined as having two or more vehicles, one in front of or behind the others with a single means of ingress and egress.

3. Existence of legally nonconforming gravel surfacing in existing designated parking areas may be used to meet parking standards, up to a maximum of six parking spaces.

4. Parking spaces may not be required to exceed eight feet by twenty feet in the required parking design standards (Figure 18.50.060(A)), except for required parking for people with disabilities; and

5. If compliance with tree retention requirements would otherwise make a proposed residential development or redevelopment infeasible, off street parking requirements are waived.

6. Existing parking spaces that do not conform to the requirements of this section by December 16, 2025, are not required to be modified or resized, except for compliance with the Americans with disabilities act. Existing paved parking lots are not required to change the size of existing parking spaces during resurfacing if doing so will be more costly or require significant reconfiguration of the parking space locations.

(Ord. O2021-019, Amended, 01/18/2022; Ord. O2020-005, Amended, 03/16/2021; Ord. O2017-023, Amended, 07/17/2018; Ord. O2017-022, Amended, 12/05/2017; Ord. O2016-037, Amended, 01/03/2017; Ord. O2014-008, Amended, 10/07/2014; Ord. O2011-006, Amended, 11/15/2011; Ord. O97-015, Added, 03/03/1998)

Section 81. Section TMC 18.50.120, Required bicycle facilities, of the Tumwater Municipal Code is hereby amended to read as follows:

18.50.120 Required bicycle facilities.

The following requirements shall apply to any off-street parking area designed to accommodate ten or more vehicles and any ~~non-single-family/duplex~~ middle housing or multifamily development over ~~three~~ four thousand square feet. This requirement excludes auxiliary buildings that are not a primary arrival location for employees, visitors, or residents, such as storage buildings.

A. Bicycle parking spaces shall be provided in accordance with Figure 18.50.120(A).

Figure 18.50.120(A)

Required Bicycle Parking Spaces	
Short-term (class 2) bicycle facilities:	
Parking areas or buildings with less than 150 vehicular parking spaces	2 spaces or 5% of vehicular spaces, whichever is greater
Parking areas or buildings with 150 or more vehicular parking spaces	8 spaces or 3% of vehicular spaces, whichever is greater
Residential uses	2 spaces or 1 space per 4 units, whichever is greater
Long-term (class 1) bicycle facilities:	
Commercial, industrial, and institutional uses or parking areas providing 50 or more vehicular parking spaces	1 space per 50 vehicular spaces, plus 1 space per 100 additional vehicular spaces
Residential uses	1 space per 4 units

B. Bicycle facilities satisfying Figure 18.50.120(A) shall meet the following requirements. Bicycle facilities provided in excess of Figure 18.50.120(A) shall only be required to meet subsections (A)(4) through (A)(6) of this section:

1. Covered to protect bicycles from weather;

2. Visible from primary entrances or provide signs indicating location;

3. Illuminated;

4. Secure to protect bicycles from theft through the use of racks, cages, lockers, or other approved methods;

5. Located within one hundred feet of primary entrances for employees, visitors, or residents unless combined with other uses on site for convenience, in which case bicycle facilities shall be located within two hundred feet of a primary entrance. Bicycle facilities should be located no farther away from the main entrance than the nearest nonaccessible space;

6. Accessible for bicycles, defined as the following:

   a. Provide proper maneuvering space (usually a minimum of twenty-four inches) between landscaping, buildings, and other obstructions;

   b. Not interfere with means of ingress or egress from the building; and

c. Accessible without using stairs.

~~B~~C. Short-term (class 2) bicycle facilities shall provide a secure and quickly accessible space to lock a bicycle to a bicycle rack.

1. Racks shall enable the use of a U-lock between the bicycle frame and the rack. Additionally, racks shall support the bicycle frame in two or more places (e.g., "inverted U").

2. Racks shall provide a bicycle parking space equal to twenty-two inches by six feet, unless placed side to side, in which case they may be placed thirty-six inches apart.

3. Prohibited racks include grid/comb/wheelbenders which only secure a wheel, and wave/ribbon racks.

4. Encouraged racks include inverted "U," "A," post and loop racks, and security rails.

5. Long-term bicycle facilities provided in excess of the minimum requirements shall serve to meet up to fifty percent of short-term bicycle facility requirements at the request of the land owner.

~~C~~D. Long-term (class 1) bicycle facilities shall protect bicycles and their components from theft, unauthorized access, and weather. Examples include a lockable bike cage or class 1 bicycle lockers.

1. Each bicycle must be able to be individually locked or secured unless the facility is designed to only be used by an individual or family (such as in a private garage). If racks are used, they must be compliant with subsection B of this section.

2. Bicycle lockers are encouraged, but no site should depend solely on bicycle lockers for long-term storage. Bicycle lockers should have a see-through window or view-hole to discourage improper use.

3. Each residential unit shall have access to the required long-term bicycle space.

4. Long-term bicycle facilities shall be provided as specified in Figure 18.50.120(A).

~~D~~E. All major employers or major worksites as defined by RCW 70.94.524 shall provide a minimum of one shower and changing facility per gender.

~~E~~F. Administrative Modification. If, in the judgment of the community development director, required bicycle facilities are demonstrated by the applicant to be excessive for a particular development given its use (such as with a residential care facility or rest home), or if there are unusual circumstances which preclude the establishment of required bicycle facilities, the community development director may allow reduced standards. Administrative decisions may be appealed pursuant to TMC Chapter 14.12.

(Ord. O2024-005, Amended, 12/03/2024; Ord. O2022-013, Amended, 10/04/2022; Ord. O2014-008, Added, 10/07/2014)

Figure 18.50.060(A)

REQUIRED PARKING DESIGN STANDARDS					
Angle	Stall Width (A)	*Stall Depth (B)	**Aisle Width (C)	Parking Module Width (D)	Interlock Reduction (E)

Figure 18.50.060(B)

~~(Ord. O2014-008, Amended, 10/07/2014)~~

~~Figure 18.50.070(A)~~

~~RESIDENTIAL~~	~~NUMBER OF PRESCRIBED SPACES~~
~~Single family dwelling (includes duplex and townhouse and designated manufactured homes)~~	~~Minimum of 2.0 spaces per dwelling unit.~~
~~Accessory dwelling~~	~~1.0 space per dwelling unit, if no on-street parking is available within 300 feet of the unit.~~
~~Studio apartment~~	~~1.0 space per dwelling unit.~~
~~Multifamily dwelling~~	~~1.5 spaces per 1—2 bedroom dwelling unit, 2.0 spaces per 3+ bedroom dwelling units, plus 1.0 guest space for every 10 units.[1]~~
~~Triplex and fourplex~~	~~1.5 spaces per 1—2 bedroom dwelling unit, 2.0 spaces per 3+ bedroom dwelling units, plus 1.0 guest space for every 10 units.[1]~~
~~Senior citizen apartment~~	~~1.0 space per 2 bedroom unit plus 1.0 guest spaces for every 10 units.~~
~~Rooming/boarding house and bed and breakfasts~~	~~1.0 space for each guest bedroom and 2.0 spaces for the operator.~~
~~Group foster home~~	~~1.0 space for each staff member plus 1.0 space for every 5 residents. Additionally, 1.0 space shall be provided for each vehicle used in connection with the facility.~~

Adult family home	1.0 space in addition to the space(s) required for the residential unit.
Residential care facility	1.0 space for each staff member plus 1.0 space for every 5 residents. Additionally, 1.0 space shall be provided for each vehicle used in connection with the facility.
Designated manufactured home park	1.0 spaces per lot or unit, whichever is greater. In addition, if recreation facilities are provided, 1.0 space per 10 units or lots, whichever is greater.
Home occupation	1.0 space for each employee outside of the immediate family in addition to the spaces required for the dwelling unit. If the occupation requires any customers and/or clients to visit the premises, at least 2.0 additional spaces shall be provided.

(1) Can be reduced to 1.0 spaces per 1 – 2 bedroom dwelling unit and 1.5 spaces per 3+ bedroom unit if within one-half mile of a transit stop by sidewalk or paved path.

COMMERCIAL	NUMBER OF PRESCRIBED SPACES
Banks with drive-through windows/ATM units	3.0 per 1,000 square feet.
Beauty salon, barber shop	See Retail use.
Carpet and furniture showrooms	1.25 spaces per 1,000 square feet of gross showroom floor area. Each store shall have a minimum of 4.0 spaces.
Family child care home, child mini-day care center, child day care center	1.0 space for each staff member plus 1.0 space per 10 children. A facility located in a family residence must also provide required parking for a dwelling unit.
Hardware and building materials retailer	2.75 spaces per 1,000 square feet.
Hotel and motel	1.0 space for each room or suite and 1.0 space per manager's unit. Banquet and meeting rooms shall provide 6.0 spaces for 1,000 square feet of seating area. Restaurants are figured separately.
Laundromat, dry cleaner	See Retail use.
Market, shopping center, and large retail/wholesale outlet	Less than 20,000 square feet = 3.5 spaces per 1,000 square feet of gross floor area. Greater than 20,000 square feet = 3.25 spaces per 1,000 square feet of gross floor area.
Mini storage facility	1.0 space for every 100 storage units and 2.0 spaces for permanent on-site managers with a minimum of 3.0 spaces for all facilities, regardless of size.
Mixed use	Shared or combined parking standards shall be used to calculate needed parking. This calculation is based upon the gross leasable area for each shop or business and does not include atriums, foyers, hallways, courts, maintenance areas, etc. See Shared and combined parking facilities, TMC 18.50.090.
Mortuary and funeral parlor	1.0 space per 75 square feet of assembly area or 13.0 stalls per 1,000 square feet of gross area, whichever is greater.
Offices, general	Gross floor area up to 2,000 square feet = 4.0 spaces per 1,000 square feet. GFA 2,001 to 7,500 square feet = 3.3 spaces per 1,000 square feet. GFA 7,501 to 40,000 square feet = 2.8 spaces per 1,000 square feet. GFA greater than 40,000 square feet = 2.5 spaces per 1,000 square feet.

Offices, government	3.5 spaces per 1,000 square feet.
Retail use	3.5 spaces per 1,000 square feet.
Automotive services (e.g., tire installation, lubrication, repair)	The community development director may require a parking demand study or determine the standards that should be applied to the use in question.
Warehouse distribution center, cross dock facility, or motor freight terminal	1.0 space per 2,000 square feet, or the community development director may require a parking demand study or determine the standards that should be applied to the use in question.
Warehouse, storage	10,000 square feet or less = 1.0 space per 2,000 square feet, 10,001 to 20,000 square feet = 10.0 spaces plus 0.75 spaces for each additional 2,000 square feet, Over 20,000 square feet = 18.0 spaces plus 0.5 space for each additional 2,000 square feet; or the community development director may require a parking demand study or determine the standards that should be applied to the use in question.

RESTAURANT	NUMBER OF PRESCRIBED SPACES
Drive up stands (espresso, etc.)	2.0 spaces plus 1 lane for each drive up window with stacking space for 3 vehicles. See TMC 18.43.020 for additional stacking lane requirements.
Cafe, bar and other drinking establishments	10.0 spaces per 1,000 square feet.
Car hop (auto borne customers served outside of building only)	1.0 space per 15 square feet.
Fast food	10.0 spaces per 1,000 square feet plus 1 lane for each drive-up window. See TMC 18.43.020 for stacking lane requirements.
Restaurant with seats	1.0 space per 100 square feet of dining area.

INDUSTRIAL	NUMBER OF PRESCRIBED SPACES
Manufacturing use	1.0 space for each employee on the largest shift, with a minimum of 5.0 spaces, or the community development director may require a parking demand study or determine the standards that should be applied to the use in question.

EDUCATIONAL	NUMBER OF PRESCRIBED SPACES
Elementary and middle schools	1.0 space per 6 students at design capacity.
High school	1.25 spaces per classroom or office, plus 1.0 space per 4 students. Public assembly areas, such as auditoriums, stadiums, etc., that are primary uses may be considered a separate use.
Library and museum	5.0 spaces per 1,000 square feet of public floor area.

HEALTHCARE	NUMBER OF PRESCRIBED SPACES
Nursing home, congregate care, rest home, hospice care home and mental health facility	1.0 space per 4 regular beds, plus 1.0 space for every regular employee on the largest shift.
Medical clinics	5.0 spaces per 1,000 square feet.

Emergency housing, emergency shelter, permanent supportive housing, and transitional shelter	A parking plan based on population served and projected needs should be submitted and approved by the community development director.

PLACES OF ASSEMBLY	NUMBER OF PRESCRIBED SPACES
Church	1.0 space per 4 seats or 1.0 space per 6 feet of bench or other seating. 6.0 spaces per 1,000 square feet of assembly area where seats or pews are not provided or when circumstances warrant increased parking, such as a church which attracts a large, regional congregation or one which has multiple functions. See Shared and combined parking facilities, TMC 18.50.090.
Private club or lodge	6.0 spaces per 1,000 square feet.
Theater and auditorium	1.0 space per 4.5 fixed seats. If the theater or auditorium is a component of a larger commercial development, the above parking standard may be modified to account for shared or combined parking; TMC 18.50.090.
Theater and auditorium without fixed seats	1.0 space per 3 permitted occupants.

RECREATION AND AMUSEMENT	NUMBER OF PRESCRIBED SPACES
Bowling alley	5.0 spaces per alley.
Health club	5.0 spaces per 1,000 square feet.
Skating rink and other commercial recreation	5.0 spaces per 1,000 square feet.

Figure 18.50.120(A)

Required Bicycle Parking Spaces	
Short-term (class 2) bicycle facilities:	
Parking areas or buildings with less than 150 vehicular parking spaces	2 spaces or 5% of vehicular spaces, whichever is greater
Parking areas or buildings with 150 or more vehicular parking spaces	8 spaces or 3% of vehicular spaces, whichever is greater
Residential uses	2 spaces or 1 space per 4 units, whichever is greater
Long-term (class 1) bicycle facilities:	
Commercial, industrial, and institutional uses or parking areas providing 50 or more vehicular parking spaces	1 space per 50 vehicular spaces, plus 1 space per 100 additional vehicular spaces
Residential uses	1 space per 4 units

(Ord. O2014-008, Added, 10/07/2014)

Section 82. Chapter TMC 18.51, Cottage housing, of the Tumwater Municipal Code is hereby amended to read as follows:

Chapter 18.51

COTTAGE HOUSING

Sections:
18.51.010 Intent.
18.51.020 Where permitted.
18.51.030 Development standards.

18.51.010 Intent.
It is the intent of this chapter to:

A. Provide opportunities for small, detached single-family housing types, clustered around an open space.

B. Provide traditional cottage amenities and proportions to ensure that cottage housing developments contribute to the overall community character.

C. Provide centrally located and functional common open space that fosters a sense of community.

D. Provide semi-private areas around the individual dwellings to enable diversity in landscape design and foster a sense of ownership.

E. Ensure minimal visual impact from vehicular use and storage areas for residents of the cottage housing development, as well as adjacent properties, and maintain a ~~single-family~~low density residential character along public streets.

F. Take advantage of existing natural features on the site including topography and vegetation, where desirable.

G. Provide the opportunity for more affordable housing units.

H. Promote conservation of natural resources by clustering smaller dwelling units.

I. Provide energy-efficient dwelling units.

J. Provide more opportunity for infill development.

K. Provide incentives for green building certification and support low-impact development.

(Ord. O2017-002, Added, 02/21/2017)

18.51.020 Where permitted.
Cottage housing development shall be permitted in the following zone districts, consistent with the development standards in this chapter and those contained within the Citywide Design Guidelines:

A. RSR r~~R~~esidential/sensitive resource ~~(RSR)~~.

B. LDR ~~Single-family~~ low density residential ~~(SFL)~~.

~~C. Single-family medium density residential (SFM).~~

~~D~~C. MDR ~~Multifamily~~ medium density residential ~~(MFM)~~.

~~E~~D. MU Mixed use ~~(MU)~~.

~~F~~E. Triangle subdistrict of the BD brewery district.

~~G~~F. Bates south subdistrict of the BD brewery district.

~~H~~G. Bluff subdistrict of the BD brewery district.

~~I~~H. Deschutes subdistrict of the BD brewery district.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2017-002, Added, 02/21/2017)

18.51.030 Development standards.

A. Conflicts. Both the requirements of this chapter and those in the Citywide Design Guidelines are to be used for cottage developments. In instances where requirements conflict, the Citywide Design Guidelines requirements shall prevail.

~~1. Planned Unit Development (PUD). If the cottage housing development is processed as a PUD, the standards for open space, parking, setbacks, and minimum distance between structures as specified in the Citywide Design Guidelines shall apply.~~

B. Density. The density of the underlying zone governs unless a density increase is granted as provided in this chapter. The requirement for transfer of development rights (TDR) shall not apply to cottage developments.

1. Density Increases. The city may allow up to two cottage units for each regular dwelling unit allowed in the underlying zone district.

C. Cottage Clusters. Developments shall contain a minimum of four and a maximum of twelve dwellings located in a cluster to encourage a sense of community among the residents. A development site may contain more than one cottage cluster. The density bonus for clustering found in the underlying zone districts shall not apply to cottage developments.

D. Floor Area. The maximum allowed gross floor area is one thousand two hundred fifty square feet per dwelling. Floor area does not include covered porches, detached garages, areas accessible only by ladders (e.g., lofts (IRC 311.4)), or accessory structures. Maximum footprint shall not exceed one thousand square feet.

~~1. Cottages in the single-family low density zone district may not be smaller than five hundred square feet in size.~~

~~2~~1. One accessory structure (excluding detached garages, carports, accessory dwelling units, or structures related directly to the use of the common open space area) is allowed per dwelling unit. This accessory structure may not exceed one hundred twenty square feet in size.

~~3~~2. One garage or carport (either detached or attached), not to exceed two hundred fifty square feet, is allowed per dwelling unit. Attached garages and carports must meet the requirements contained in the Citywide Design Guidelines.

E. Platting. A cottage development may be completed through a land division and a planned unit development.

1. Covenants, conditions and restrictions (CC&Rs) shall be submitted at the same time and in the same manner as required of any land division. In addition, CC&Rs for cottage developments shall address ownership and maintenance responsibilities, including but not limited to the following: the common open space areas, common drainage facilities, parking areas, and private roads. They shall also reflect the regulatory requirements regarding the minimum spacing requirements between structures (both primary and accessory) in effect at the time of final approval of the land division.

F. Design. Cottages are subject to the design criteria in the Citywide Design Guidelines, this chapter, and TMC Chapter 18.43. Where there are conflicts between the Citywide Design Guidelines, TMC Chapter 18.43, and the standards in this chapter, the standards of the Citywide Design Guidelines shall prevail.

G. Parking Requirements. The minimum required number of parking spaces is one per dwelling.

1. Mixed use developments shall provide no less than one parking space per dwelling. The nonresidential portion of the development shall provide parking in accordance with the off-street parking requirements of TMC Chapter 18.50.

H. Utility Elements. Utility meters and heating/cooling/ventilation equipment shall be located/designed to minimize visual impacts from the street and common areas.

I. Existing Nonconforming Structure.

1. On a lot to be used for a cottage housing development, an existing ~~detached~~ single-family ~~residential structure~~detached dwelling, which may be nonconforming with respect to the standards of this chapter, shall be permitted to remain, provided the house and any accessory structures are not enlarged and the development meets the standards herein. The existing dwelling shall be included in determining the allowable density for the site.

J. Accessory Dwelling Units.

~~1. There shall be no more than one accessory dwelling unit for every five primary dwelling units.~~

1~~2~~. An accessory dwelling unit may be attached to or detached from a new or existing ~~primary single-family~~principal residential structure ~~dwelling unit~~.

~~3~~2. The accessory dwelling unit will require one parking space, which is in addition to any off-street spaces required for the ~~primary single-family dwelling~~principal residential structure ~~unit~~.

~~4. The primary entrance to an accessory dwelling unit shall not be visible from the yard on the same side of the lot on which the primary entrance to the primary single-family dwelling unit is located.~~

~~5~~3. To ensure that the accessory dwelling unit is clearly secondary to the ~~primary dwelling~~principal ~~unit~~residential structure, the floor area for the accessory dwelling unit in no case shall exceed ~~five hundred~~one thousand square feet, and the accessory dwelling unit shall contain no more than two bedrooms.

6. The number and location of accessory dwelling units for a cottage housing development shall be limited to those shown on the original approved site plan for the development.

K. Open space.

1. Open space shall be provided equal to a minimum 20 percent of the lot size.

2. Required open space may include common open space, private open space, setbacks, critical areas, and other open space.

3. At least one outdoor common open space shall be provided.

(Ord. O2017-002, Added, 02/21/2017)

Section 83. Section TMC 18.52.020, Family child care home, of the Tumwater Municipal Code is hereby amended to read as follows:

18.52.020 Family child care home.

A family child care home shall be a permitted use in all zon~~e~~ing districts permitting residences and shall be subject to the following requirements:

A. Meet Washington State child day care licensing requirements;

B. Comply with all building, fire safety, health code and business licensing requirements;

C. Lot size, building size, setbacks and lot coverage conform to the standards of the zon~~e~~ing district except if the structure is a legal nonconforming structure;

D. Signage, if any, will conform to TMC Chapter 18.44;

E. No structural or decorative alteration which will alter the ~~single-family~~ character of an existing or proposed residential structure or be incompatible with surrounding residences is permitted.

(Ord. O95-035, Amended, 12/19/1995; Ord. 1288, Added, 06/04/1991)

Section 84. Section TMC 18.52.040, Child day care center, of the Tumwater Municipal Code is hereby amended to read as follows:

18.52.040 Child day care center.

A child day care center may be allowed in the designated zon~~e~~ing districts as follows:

A. A child day care center may be allowed in RSR residential/sensitive resource, ~~SFL, SFM, MFM, MFH~~LDR low density residential, MDR medium density

residential, HDR high density residential, or HI ~~zoning~~ heavy industrial HI zone districts only upon issuance of a conditional use permit pursuant to TMC Chapter 18.56 and subject to the following requirements:

1. Meet Washington State child day care licensing requirements;
2. Install an approved fire sprinkler system;
3. Possess a valid child day care business license from the city;
4. No structural or decorative alteration, which will alter the residential character of an existing residential structure used for a child care center, is permitted. Any new or remodeled structure must be designed to be compatible with the residential character of the surrounding neighborhood;
5. Be located so that access streets and parking and/or loading areas are sufficient to accommodate safely the number of vehicle trips associated with the day care use.

B. A child care center is a permitted use in TC town center, NC neighborhood commercial, MU mixed use, GC general commercial, CS community services, LI light industrial, HC historic commercial, and ARI airport related industry zone~~ing~~ districts subject to the following requirements:

1. Meet Washington State child care licensing requirements;
2. Install an approved fire sprinkler system;
3. Possess a valid child day care business license from the city.

C. Limitations in Use of a Family Residence. No child day care center shall be located in a private family residence unless the portion of the residence where the children have access is used exclusively for the children during the hours the center is in operation, or is separate from the usual living quarters of the family.

(Ord. O2017-017, Amended, 09/19/2017; Ord. O2017-006, Amended, 07/18/2017; Ord. O2001-020, Amended, 05/07/2002; Ord. O97-025, Amended, 12/02/1997; Ord. O95-035, Amended, 12/19/1995; Ord. 1288, Added, 06/04/1991)

Section 85. Section TMC 18.53.020, Adult family home, of the Tumwater Municipal Code is hereby amended to read as follows:

18.53.020 Adult family home.

An adult family home shall be a permitted use in the following zon~~e~~~~ing~~ districts: GB greenbelt, OS open space, RSR residential/sensitive resource, ~~SFL, SFM, MFM, MFH,~~LDR low density residential, MDR medium density residential, HDR high density residential, MHP manufactured home park, CBC capitol boulevard corridor, BD brewery district, NC neighborhood commercial, MU mixed use, GC general commercial, CS community services, HC historic commercial, and TC town center.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O2017-006, Amended, 07/18/2017; Ord. O97-025, Amended, 12/02/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Amended, 12/19/1995; Ord. 1289, Added, 06/04/1991)

Section 86. Section TMC 18.53.030, Residential care facility, of the Tumwater Municipal Code is hereby amended to read as follows:

18.53.030 Residential care facility.

A residential care facility shall be a permitted use in the following zon~~eing~~ districts: GB greenbelt, OS open space, RSR residential/sensitive resource, LDR low density residential, MDR medium density residential, HDR high density residential, MHP manufactured home park, CBC capitol boulevard corridor, BD brewery district, NC neighborhood commercial, MU mixed use, GC general commercial, CS community services, HC historic commercial, and TC town center.~~GB, OS, RSR, SFL, SFM, MFM, MFH, MHP, CBC, BD, NC, MU, GC, CS, HC, and TC~~.

(Ord. O2022-013, Amended, 10/04/2022; Ord. O97-025, Amended, 12/02/1997; Ord. O96-022, Amended, 12/17/1996; Ord. O95-035, Amended, 12/19/1995; Ord. 1289, Added, 06/04/1991)

Section 87. Section TMC 18.54.040, Nonconforming lots of record, of the Tumwater Municipal Code is hereby amended to read as follows:

18.54.040 Nonconforming lots of record.

In any district in which single-family detached dwellings are permitted, a single-family detached dwelling and customary accessory buildings may be erected on any single lot of record at the effective date of adoption or amendment of the ordinance codified in this title, notwithstanding limitations imposed by other provisions of this title. This provision shall apply even though such lot fails to meet the requirements for area that may be generally applicable in the zone district. All other requirements of the district other than lot area shall still apply to the lot. A request to vary from the ordinance requirement may only be granted by decision of the hearing examiner.

(Ord. O95-035, Amended, 12/19/1995; Ord. 1259, Amended, 11/06/1991; Ord. 883, Added, 05/06/1984)

Section 88. Section TMC 18.55.020, Applicability, of the Tumwater Municipal Code is hereby amended to read as follows:

18.55.020 Applicability.

A. Site plan elements subject to this chapter include, but are not limited to:

1. Site layout;
2. Building orientation;
3. Pedestrian and vehicular access;
4. Signage;

5. Landscaping and natural features of the site;

6. Integration of stormwater management techniques;

7. Screening and buffering;

8. Parking and loading arrangements, and illumination; and

9. Design review.

B. Site planning is the horizontal and vertical arrangement of the elements in subsection A of this section that is compatible with the city's comprehensive plan and regulations, and the physical characteristics of a site and the surrounding area.

C. Site plan review shall be required in the following instances:

1. Construction or expansion of new facilities or structures, except for individual single-family detached dwellings, cottage houses, duplexes, triplexes, quadplexes, townhouses, and stacked units; or

2. Where, in the opinion of the director, the magnitude and character of the project is sufficiently complex to warrant site plan review, or the project could result in an adverse effect on adjacent properties or the subject property or other public facilities if not planned early and carefully.

(Ord. O2024-005, Added, 12/03/2024)

Section 89. Section TMC 18.55.030, Exemptions, of the Tumwater Municipal Code is hereby amended to read as follows:

18.55.030 Exemptions.

A. Site plan review shall not be required for remodeling existing buildings or structures provided:

1. The alterations conform with any prior approved site plan review approval; or

2. The alterations do not modify the existing site layout.

B. The following types of uses are not exempt from site plan review unless they meet the conditions of subsection A of this section:

1. Individual single-family detached dwellings, cottage houses, duplexes, triplexes, ~~or~~ quadplexes townhouses, and stacked units located on property with critical areas; or

2. Two or more single-family detached dwellings, cottage houses, duplexes, triplexes, ~~or~~ quadplexes, townhouses, and stacked units built on the same lot.

(Ord. O2024-005, Added, 12/03/2024)

Section 90. Section TMC 18.56.140, "E" uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.56.140 "E" uses.

"Essential public facilities"

A. The following uses are considered essential public facilities, which shall require a conditional use permit as indicated in each individual zone. Additionally, the siting process outlined in subsection B of this section shall be followed.

1. Airports.

2. State education facilities.

3. Large scale state or regional transportation facilities.

4. Prisons, jails, and other correctional facilities (including but not limited to: jails; juvenile detention facilities; prisons and prerelease facilities; work release facilities).

5. Solid waste handling facilities.

6. Inpatient facilities including substance abuse facilities (including but not limited to: intensive inpatient facilities; long-term residential drug treatment facilities; recovery house facilities).

7. Mental health facilities (including but not limited to: congregate care facilities; adult residential treatment facilities; evaluation and treatment centers).

8. Sewage treatment facilities (not including individual or community wastewater treatment systems).

9. Emergency communication towers and antennas.

10. Secure community transition facilities.

B. Essential public facilities identified as conditional uses in the zon~~ing~~ district shall be subject, at a minimum, to the following requirements:

1. Essential public facilities classified as follows:

a. Type One. Multicounty facilities. These are major facilities serving or potentially affecting more than one county. These facilities include, but are not limited to, regional transportation facilities, such as regional airports; state correction facilities; and state education facilities.

b. Type Two. These are local or interlocal facilities serving or potentially affecting residents or property in more than one jurisdiction. They could include, but are not limited to, county jails, county landfills, organic material management facilities, community colleges, sewage treatment facilities, emergency communication towers and antennas, secure community transition facilities, and inpatient facilities (e.g., substance abuse facilities, mental health facilities, and group homes).

(Note: Such facilities, which would not have impacts beyond the jurisdiction in which they are proposed to be located, would be type three facilities.)

c. Type Three. These are facilities serving or potentially affecting only the jurisdiction in which they are proposed to be located.

In order to enable the city to determine the project's classification, the applicant shall identify the proposed service area of the facility and the approximate area within which the proposed project could potentially have adverse impacts, such as increased traffic, public safety risks, noise, glare, emissions, or other environmental impacts.

2. Provide early notification and involvement of affected citizens and jurisdictions as follows:

a. Type One and Two Facilities. At least ninety days before submitting an application for a type one or type two essential public facility, the prospective applicant shall notify the affected public and jurisdictions of the general type and nature of the proposal, identify sites under consideration for accommodating the proposed facility, and identify opportunities to comment on the proposal. Applications for specific projects shall not be considered complete in the absence of proof of a published notice regarding the proposed project in a newspaper of general circulation in the affected area. This notice shall include the information described above and shall be published at least ninety days prior to the submission of the application.

It is expected that an environmental impact statement may be required for most type one and type two facilities in accordance with the SEPA environmental review process.

The Thurston Regional Planning Council may provide the project sponsor and affected jurisdictions with their comments or recommendations regarding alternative project locations during this ninety-day period.

(Note: The purpose of this provision is to enable potentially affected jurisdictions and the public to review and comment collectively on alternative sites for major facilities before the project sponsor has made their siting decision.)

b. Type Three Facilities. Type three essential public facilities are subject to the city's standard notification requirements for conditional uses.

3. Should any of the above-listed facilities be proposed to be sited in the city, they should be consistent with the intent of the underlying zoning of the proposed site.

4. Essential public facilities shall not have any probable significant adverse impact on critical areas or resource lands, except for lineal facilities, such as

highways, where no feasible alternative exists (adapted from county-wide Policy 5.2(a)).

5. Major public facilities, which generate substantial traffic, should be sited near major transportation corridors (adapted from county-wide Policy 5.2(b)).

6. Applicants for type one essential public facilities shall provide an analysis of the alternative sites considered for the proposed facility. This analysis shall include the following:

a. An evaluation of the site's capability to meet basic siting criteria for the proposed facility, such as size, physical characteristics, access, and availability of necessary utilities and support services;

b. An explanation of the need for the proposed facility in the proposed location;

c. The site's relationship to the service area and the distribution of other similar public facilities within the service area or jurisdiction, whichever is larger; and

d. A general description of the relative environmental, traffic, and social impacts associated with locating the proposed facility at the alternative sites, which meet the applicant's basic siting criteria. The applicant shall also identify proposed mitigation measures to alleviate or minimize significant potential impacts.

The applicant shall also briefly describe the process used to identify and evaluate the alternative sites.

7. The proposed project shall comply with all applicable provisions of the comprehensive plan, zoning ordinance, and other city regulations.

C. The following tables shall denote Tumwater's policies for siting and expansion of essential public facilities within existing zone districts: See Figures 18.56.140(A) and (B).

Figure 18.56.140(A) Footnotes:

"C" means conditional use; "P" means permitted use.

Shaded areas mean use is not permitted.

Figure 18.56.140(A) Explanatory Notes:

(1) In the TC town center zone district, emergency communication antennas must be affixed to or erected upon existing buildings, water tanks or other existing structures. Antennas shall not be affixed to a wireless communication support structure. Emergency communication towers are not permitted.

(2) "Secure community transition facilities" shall meet the following conditions:

A. Minimum Conditions.

1. Location.

a. In no case may a secure community transition facility be sited adjacent to, immediately across a street or parking lot from, or within the line of sight of risk potential activities or facilities in existence at the time a site is listed for consideration. "Within the line of sight" means that it is possible to reasonably visually distinguish and recognize individuals;

b. In no case may a secure community transition facility be sited within three hundred feet of a residential zone~~ing~~ district;

c. Secure community transition facilities are permitted as a conditional use in the LI light industrial zone~~ing~~ district excluding LI light industrial zone districts north of Sapp Road Southwest and west of Crosby Boulevard Southwest;

2. Compliance with Statutory Requirements. The applicant shall provide verification from the Department of Social and Health Services that the proposed facility complies with all applicable state regulations and

requirements pursuant to Chapter 71.09 RCW. Where the requirements of this section conflict with the state requirements, the state requirements shall be adhered to over this section;

3. A maximum of three beds for sexually violent predators may be located within any secure community transition facility.

B. Process Requirements. In addition to the standard public notification requirements, all property owners and residents within one-half mile of the proposed project site shall be sent notice of the public hearing regarding the requested conditional use.

(3) "Juvenile detention facilities" shall meet the following conditions:

A. Minimum Conditions.

1. Location.

a. Buildings accommodating juvenile detention facilities shall not be located closer than two hundred feet from the boundary of a district in which the use is not allowed as a conditional use;

b. Juvenile detention facilities shall be located such that outside law enforcement officers can respond to a call for assistance within five minutes under typical conditions;

c. Advance life support service, as defined in RCW 18.73.030(19), must be available within five minutes under typical conditions;

2. Security.

a. The applicant shall submit a security plan, reviewed by the police chief, which at a minimum complies with applicable American Corrections Association's security standards for juvenile detention facilities. This plan shall identify staffing levels and scheduling, building security, and escape search plan, and provisions for immediate public notification of escapes;

3. Design.

a. Size. Juvenile detention facilities with capacity for up to seventy-five inmates shall be located on a site of at least five acres. Sites shall contain an additional four acres for each additional fifty-bed increase in capacity above this threshold;

b. Setbacks. The facility shall be set back at least seventy-five feet from public rights-of-way and property lines;

4. Landscaping/Buffers.

a. The applicant shall submit a landscaping plan, which serves to maintain or enhance the character of the area without jeopardizing security. This plan shall incorporate at least a twenty-five-foot landscaping buffer along public rights-of-way;

b. The applicant shall install an eight-foot-high fence in character with the neighborhood between the facilities and all property boundaries, with the exception of the landscaped street frontage, which effectively screens the site from adjacent properties. The hearing examiner may waive or lessen this requirement if he/she determines that, due to existing site features or the type of character of adjoining uses, the privacy and security of the occupants of adjoining properties can be maintained in the absence of a fence or with a lower fence;

c. Barbed wire topped fencing shall not be visible from public rights-of-way;

d. Outdoor activity areas located in residential districts shall not be visible from public rights-of-way or adjacent properties;

5. Noise.

a. The hearing examiner may require conditions to minimize potential noise impacts including, but not limited to, altering the locations of outdoor use areas and noise-generating facilities, and installations of noise reducing elements such as walls, berms, and landscaping;

6. Access.

a. Juvenile detention facilities shall have direct access to an arterial or collector unless the hearing examiner determines that access via lesser classifications of street would not be detrimental to neighborhood character and would not increase public safety risks.

B. Process Requirements. Property owners within one thousand four hundred feet of the proposed project site shall be sent notice of the public hearing regarding the requested conditional use.

(4) "Work release facilities" shall meet the following conditions:

A. Minimum Conditions.

1. General Requirements.

a. The applicant shall provide verification from the Department of Corrections (DOC) that the proposed facility complies with DOC standards and applicable state and local regulations;

b. The site must be within one-quarter mile of public transportation or an alternative transportation program, approved by the hearing examiner, must be provided to serve the needs of the facility's occupants;

2. Location.

a. Work release facilities shall not be located closer than five hundred feet from the boundary of a district in which the use is not allowed as a conditional use;

b. Setbacks. The facility shall be set back at least seventy-five feet from public rights-of-way and property lines;

c. Landscaping/Buffers.

i. The applicant shall submit a landscaping plan, which serves to maintain or enhance the character of the area without jeopardizing security. This plan shall incorporate at least a twenty-five-foot landscaping buffer along public rights-of-way;

ii. The applicant shall install an eight-foot-high fence in character with the neighborhood between the facilities and all property boundaries, with the exception of the landscaped street frontage, which effectively screens the site from adjacent properties. The hearing examiner may waive or lessen this requirement if he/she determines that, due to existing site features or the type of character of adjoining uses, the privacy and security of the occupants of adjoining properties can be maintained in the absence of a fence or with a lower fence;

d. Noise.

i. The hearing examiner may require conditions to minimize potential noise impacts including, but not limited to, altering the locations of outdoor use areas and noise generating facilities, and installations of noise reducing elements such as walls, berms, and landscaping;

e. Access.

i. The proposed site shall have direct access to an arterial or collector unless the hearing examiner determines that access via a lesser classification of street would not be detrimental to neighborhood character and would not increase public safety risks.

B. Process Requirements. Property owners within one thousand four hundred feet of the proposed project site shall be sent notice of the public hearing regarding the requested conditional use.

Section 91. Section TMC 18.56.280, "S" uses, of the Tumwater Municipal Code is hereby amended to read as follows:

18.56.280 "S" uses.

"Schools"

A. Minimum Condition.

1. Twenty-five-foot setback on front, side, and rear yards. No off-street parking or loading area will be allowed in any required yard area.

"Senior housing facilities, assisted"

A. Senior housing facilities, assisted are permitted as conditional uses in the ~~MFH multifamily~~HDR high density residential zone district provided they meet minimum conditions (B)(1) through (4) of this section. Senior housing facilities,

assisted are also permitted as conditional uses in the ~~MFM multifamily~~MDR medium density residential and NC neighborhood commercial zone districts provided they meet minimum conditions (B)(1) through (3) of this section.

B. Minimum Conditions.

1. The minimum site area shall be adequate to provide the required parking, yards, and at least one off-street emergency loading space;

2. No off-street parking or loading areas will be allowed in any required yard area, as defined by the applicable zon~~ing~~ district's density regulations section;

3. Off-street parking shall be in accordance with TMC Chapter 18.50; provided, that the use shall not be eligible for an administrative modification to increase the number of required off-street parking stalls;

4. The proposed use shall not be subject to the transfer of development rights requirements of TMC 18.16.050 if total lot coverage of buildings does not exceed sixty percent of the total area of the lot.

"Storage, manufacture or sale of highly volatile or extremely hazardous substances and off-site hazardous waste treatment and storage facilities"

A. Minimum Conditions.

1. No handling of explosives or radioactive materials that present a potential public health or safety hazard;

2. Site of volatile or hazardous materials may be subject to additional setbacks as appropriate to ensure protection of residential areas, groundwater supplies, and concentrations of people;

3. The city may impose reasonable conditions to assure the public health and safety. Such conditions may include restrictions in hours of operation, transportation routing, material handling, site location, and other operation functions.

(Ord. O2020-005, Amended, 03/16/2021; Ord. O2017-006, Amended, 07/18/2017; Ord. O2013-025, Amended, 01/07/2014; Ord. O2008-009, Amended, 02/17/2009; Ord. O2002-013, Added, 08/20/2002; Ord. O95-035, Amended, 12/19/1995; Ord. 1095, Added, 01/20/1987; Ord. 883, Added, 05/06/1984)

Section 92. Section TMC 18.59.050, Homeless encampments, of the Tumwater Municipal Code is hereby amended to read as follows:

18.59.050 Homeless encampments.

A. Who May Apply. Homeless encampments shall be permitted only as an accommodation of religious exercise by a host agency and sponsoring agency on

property owned or controlled by the religious organization. Each host agency and sponsoring agency shall jointly apply for a permit under this section and shall jointly certify compliance with all applicable requirements for approval and conditions of this chapter and the application.

B. Definition. A homeless encampment as an accommodation of religious exercise by a host agency and sponsoring agency may include temporary uses limited to an outdoor encampment, an indoor overnight shelter, a tiny house village, or a vehicle resident safe parking.

~~B~~C. Applicable Procedures. A homeless encampment permit is a Type I ~~n~~ administrative ~~determination~~decision under TMC 14.12.010. In addition to the requirements ~~for administrative determinations~~ found elsewhere in this code, the following additional procedures apply:

1. Advance Notice Required. The sponsoring agency shall notify the city of the proposed homeless encampment a minimum of thirty days in advance of the proposed date of establishment for the homeless encampment. The advance notification shall contain the following information:

a. The date the homeless encampment intends to encamp;

b. The length of encampment;

c. The maximum number of residents proposed;

d. The host location; ~~and~~

e. The names of the host and sponsoring agencies; and~~.~~

f. A closure plan.

2. Public Meeting Required. The sponsoring agency shall conduct at least one public information meeting within, or as close to, the neighborhood where the proposed homeless encampment will be located, a minimum of two weeks prior to the issuance of the temporary use permit application. The time and location of the meeting shall be agreed upon between the city and sponsoring agency. All property owners within three hundred feet of the proposed homeless encampment shall be notified by mail a minimum of fourteen days in advance of the meeting by the sponsoring agency. In lieu of notice by mail, and with the approval of the city ~~of Tumwater~~, an alternative means of notice may be provided that is reasonably calculated to notify the neighboring property owners within three hundred feet of the proposed encampment. These time periods may run concurrently with the time requirements in subsection (~~B~~C)(1) of this section.

3. Signs Required. The applicant shall provide notice of the application within the same timeframe identified above by posting two signs or placards on the site or in a location immediately adjacent to the site that provides visibility to motorists using adjacent streets. The director shall establish standards for size,

color, layout, design, working, placement, and timing of installation and removal of the signs or placards.

4. Liability. Pursuant to RCW 35A.21.360(8), an appointed or elected public official, public employee, or public agency as defined in RCW 4.24.470 is immune from civil liability for (a) damages arising from the permitting decisions for a temporary encampment for the homeless and (b) any conduct or unlawful activity that may occur as a result of the temporary encampment for the homeless.

5. Restrictions on Homeless Served. Pursuant to RCW 35A.21.360(9), a religious organization hosting a homeless encampment that receives funds from any government agency may not refuse to host any resident or prospective resident because of age, sex, marital status, sexual orientation, race, creed, color, national origin, honorably discharged veteran or military status, or the presence of any sensory, mental, or physical disability or the use of a trained dog guide or service animal by a person with a disability, as these terms are defined in RCW 49.60.040.

~~C~~D. Homeless Encampment – Criteria and ~~/~~Requirements for Approval. The community development director or designee may issue a temporary and revocable permit for a homeless encampment subject to the following criteria and requirements:

1. Site Criteria.

a. General.

i. If the sponsoring agency is not the host agency of the site, the sponsoring agency shall submit a written agreement from the host agency allowing the homeless encampment.

~~b~~ii. The property must be sufficient in size to accommodate the ~~tents and~~ necessary on-site facilities, including but not limited to the following:

(A)~~i.~~ Sanitary portable toilets in the number required to meet capacity guidelines;

(B)~~ii.~~ Hand washing stations by the toilets and by the food areas;

(C)~~iii.~~ Refuse receptacles and regular garbage disposal; and

(D)~~iv.~~ Food tent and security tent.

~~c~~iii. The host and sponsoring agencies shall provide an adequate water source to the homeless encampment, as approved by the city.

~~d~~iv. No homeless encampment shall be located within a sensitive/critical area or its buffer as defined under TMC Title 16.

~~e~~v. No permanent structures will be constructed for the homeless encampment.

~~f~~vi. No more than forty residents shall be allowed. The city may further limit the number of residents as site conditions related to health and safety dictate.

~~g~~vii. Adequate on-site parking shall be provided for the homeless encampment. No off-site parking will be allowed. The number of vehicles used by homeless encampment residents shall be provided. Except for vehicle resident safe parking meeting the requirements of TMC 18.59.050(D)(2)(c), i~~I~~f the homeless encampment is located on a site with another use, it shall be shown that the homeless encampment parking will not create a shortage of on-site parking for the other use(s) on the property.

viii~~h~~. The homeless encampment shall be located within one-quarter mile of a bus stop with seven days per week service, whenever possible. If not located within one-quarter mile of a bus stop, the sponsoring agency must demonstrate the ability for residents to obtain access to the nearest public transportation stop (such as carpools or shuttle buses).

ix~~i~~. The homeless encampment shall be adequately buffered and screened from adjacent right-of-way and residential properties. Screening shall be a minimum height of six feet and may include, but is not limited to, a combination of fencing, landscaping, or the placement of the homeless encampment and facilities related to the encampment behind buildings. The type of screening shall be approved by the city.

~~j~~x. All sanitary portable toilets shall be screened from adjacent properties and rights-of-way. The type of screening shall be approved by the city and may include, but is not limited to, a combination of fencing and/or landscaping.

~~2.~~b. Applicable to Specific Homeless Encampment Types.

i. Indoor Overnight Shelters. A religious organization may host temporary small houses on land owned or controlled by the religious organization, subject to the following:

(A) A memorandum of understanding between the host religious organization and the city with a renewable one-year duration;

(B) Maintenance of a maximum unit square footage of one hundred twenty square feet, with units set at least six feet apart;

(C) Electricity and heat, if provided, must be inspected by the city;

(D) Space heaters, if provided, must be approved by the building and fire official;

(E) Doors and windows must be included and be lockable, with a recommendation that the managing agency and host religious organization also possess keys;

(F) Each unit must have a fire extinguisher;

(G) Adequate restrooms must be provided, including restrooms solely for families if present, along with handwashing and potable running water to be available if not provided within the individual units, including accommodating black water;

(H) A recommendation for the host religious organization to partner with regional homeless service providers to develop pathways to permanent housing; and

(I) Spaces used for overnight indoor shelters must have either a fire suppression system or at least two accessible exits due to lack of sprinklers or other fire-related concerns, except that:

(1) If the building and fire official finds that fire-related concerns associated with an indoor overnight shelter pose an imminent danger to persons within the shelter, the city may revoke the permit; and

(2) The host religious organization must enter into a memorandum of understanding for fire safety that includes building and fire official inspections, an outline for appropriate emergency procedures, a determination of the most viable means to evacuate occupants from inside the host site with appropriate illuminated exit signage, panic bar exit doors, and a completed fire watch agreement indicating:

(i) Posted safe means of egress;

(ii) Operable smoke detectors, carbon monoxide detectors as necessary, and fire extinguishers; or

(iii) A plan for monitors who spend the night awake and are familiar with emergency protocols, who have suitable communication devices, and who know how to contact the city fire department;

ii. Tiny House Villages. A religious organization may host temporary small houses on land owned or controlled by the religious organization, subject to the following:

(A) A memorandum of understanding between the host religious organization and the city with a renewable one-year duration;

(B) Maintaining a maximum unit square footage of one hundred twenty square feet, with units set at least six feet apart;

(C) Electricity and heat, if provided, must be inspected by the local jurisdiction;

(D) Space heaters, if provided, must be approved by the local fire authority;

(E) Doors and windows must be included and be lockable, with a recommendation that the managing agency and host religious organization also possess keys;

(F) Each unit must have a fire extinguisher;

(G) Adequate restrooms must be provided, including restrooms solely for families if present, along with handwashing and potable running water to be available if not provided within the individual units, including accommodating black water; and

(H) A recommendation for the host religious organization to partner with regional homeless service providers to develop pathways to permanent housing.

iii. Vehicle Resident Safe Parking. A religious organization may host any other congregationally sponsored uses and the parking to support those uses to provide services for people who are homeless during the hosting, except for:

(A) No less than one parking space may be devoted to safe parking per ten on-site parking spaces and no more than two safe parking spaces per ten on-site parking spaces;

(B) Restroom access must be provided either within the buildings on the property or through use of portable facilities, with the provision for proper disposal of waste if recreational vehicles are hosted; and

(C) Religious organizations providing spaces for safe parking must continue to abide by any existing on-site parking minimum requirement so that the provision of safe parking spaces does not reduce the total number of available parking spaces below the minimum number of spaces required by the city;

2. Security.

a. An operations and security plan for the homeless encampment shall be submitted to the city at the time of application.

b. The host agency shall provide to all residents of the homeless encampment a code of conduct for living at the homeless encampment. A copy of the code of conduct shall be submitted to the city at the time of application and shall be in substantially the following form or address the following issues:

i. Possession or use of illegal drugs is not permitted.

ii. No alcohol is permitted.

iii. No weapons are permitted.

iv. All knives over three and one-half inches must be turned in to the encampment manager for safekeeping.

v. No violence is permitted.

vi. No open flames are permitted, except within a common cooking facility if approved in advance by the fire department.

vii. No trespassing into private property in the surrounding neighborhood is permitted.

viii. No loitering in the surrounding neighborhood is permitted.

ix. No littering on the homeless encampment site or in the surrounding neighborhood is permitted.

Nothing in this section shall prohibit the host agency, sponsoring agency or encampment manager from imposing and enforcing additional code of conduct conditions not otherwise inconsistent with this section.

c. All homeless encampment residents must sign an agreement to abide by the code of conduct and failure to do so shall result in the noncompliant resident's immediate and permanent expulsion from the property.

d. The sponsoring agency shall keep a log of all people who stay overnight in the encampment, including names and birth dates, and dates of stay. Logs shall be kept a minimum of six months.

e. The sponsoring agency shall take all reasonable and legal steps to obtain verifiable ID, such as a driver's license, government-issued identification card, military identification, or passport from prospective and existing encampment residents.

f. The sponsoring agency will use identification to obtain sex offender and warrant checks from the Washington State Patrol.

i. If said warrant and sex offender checks reveal either (1) an existing or outstanding warrant from any jurisdiction in the United States for the arrest of the individual who is the subject of the check; or (2) the subject of the check is a sex offender, required to register with the county sheriff or their county of residence pursuant to RCW 9A.44.130, then the sponsoring agency will reject the subject of the check for residency to the homeless encampment or eject the subject of the check if that person is already a homeless encampment resident.

ii. The sponsoring agency shall immediately contact the police department if the reason for rejection or ejection of an individual from the homeless encampment is an active warrant or if, in the opinion of the on-duty designated representative or the on-duty security staff, the rejected/ejected person is a potential threat to the community.

g. The sponsoring agency shall self-police and self-manage its residents and flatly prohibit alcohol, drugs, weapons, fighting, and abuse of any kind, littering or disturbing the neighbors while located on the property.

h. The sponsoring agency will appoint a designated representative to serve "on-duty" at all times to serve as a point of contact for city of Tumwater police and will orient the police as to how the security tent operates. The names of the on-duty designated representatives will be posted daily in the security tent. The city shall provide contact numbers of nonemergency personnel which shall be posted at the security tent.

3. Timing.

a. The duration of the homeless encampment shall not exceed ~~one hundred eighty days.~~six months.

b. No additional homeless encampments ~~may~~ shall be allowed on the same parcel of property in ~~any twelve~~the three-month period beginning on the date the temporary permit homeless encampment expires ~~locates on~~and the homeless encampment is no longer on a parcel of property.

c. ~~No more than one homeless encampment may be located in the city at any time.~~Outdoor encampments by religious organizations shall not be located within one thousand feet of another outdoor encampment hosted by a religious organization.

4. Health and Safety.

a. The homeless encampment shall conform to the following fire requirements:

i. There shall be no open flames permitted, with the exception of propane heating within a common cooking facility if approved in advance by the fire department;

ii. No heating appliances within ~~the~~ individual tents are allowed;

iii. A common tent may provide community cooking facilities and services including cooking appliances for the camp, if approved by the host agency, the health department, and the fire department. No cooking appliances are allowed in individual tents;

iv. An adequate number and appropriate rating of fire extinguishers shall be provided as approved by the fire department;

v. Adequate access for fire and emergency medical apparatus shall be provided. This shall be determined by the fire department;

vi. Adequate separation between tents and other structures shall be maintained as determined by the fire department; and

vii. Electrical service shall be in accordance with recognized and accepted practice. Electrical cords are not to be strung together and any cords used must be approved for exterior use.

b. The sponsoring and host agencies shall permit inspections by city staff and the Thurston County health department at reasonable times without prior notice of compliance with the conditions of this permit.

6. Director's Decision.

a. Purpose. The director shall review the proposal for compliance with the provisions of this chapter and all other applicable law; to ensure that the health, safety and welfare of the citizens of the city are preserved; and to provide an expedient and reasonable land use review process for decisions and interpretations of this chapter.

b. Director Authority. The director may modify the submittal requirements as deemed appropriate.

c. Notice of Decision. The director shall notify the sponsoring and host agencies of his or her decision to approve, modify or deny the application within a timely manner, but not prior to fourteen days after the public meeting.

7. Termination. If the sponsoring agency fails to take action against a resident who violates the terms and conditions of this permit, it may result in immediate termination of the permit. If the city learns of uncontrolled violence or acts of undisciplined violence by residents of the encampment and the sponsoring agency has not adequately addressed the situation, the temporary use permit may be immediately terminated.

8. Revocation. Upon determination that there has been a violation of any approval criteria or condition of application, the director may give written notice to the permit holder describing the alleged violation. Residents of the encampment shall be notified of the revocation notice by the sponsoring agency within two days of receipt of the notice from the director. Within fourteen days of the mailing of notice of violation, the permit holder shall show cause why the permit should not be revoked. At the end of the fourteen-day period, the director shall sustain or revoke the permit. When a temporary homeless encampment permit is revoked, the director shall notify the permit holder by certified mail of the revocation and the findings upon which the revocation is based. Residents must vacate the site within forty-eight hours from the receipt of the notification. Appeals of decisions to revoke a temporary encampment permit shall be to Thurston County superior court.

(Ord. O2011-014, Amended, 12/20/2011; Ord. O2011-002, Amended, 03/01/2011; Ord. O2007-017, Added, 12/18/2008)

Section 93. City-Wide Zoning Map Adoption. The City Council of the City of Tumwater hereby adopts the amended City of Tumwater City-Wide Zoning Map as shown in Exhibit A attached hereto and incorporated herein by reference.

Section 94. Citywide Design Guidelines Adoption. The City Council of the City of Tumwater hereby adopts the City of Tumwater Citywide Design Guidelines as shown in Exhibit B attached hereto and incorporated herein by reference.

Section 95. Corrections. The City Clerk and codifiers of this ordinance are authorized to make necessary corrections to this ordinance including, but not limited to, the correction of scrivener/clerical errors, references, ordinance numbering, section/subsection numbers, and any references thereto.

Section 96. Ratification. Any act consistent with the authority and prior to the effective date of this ordinance is hereby ratified and affirmed.

Section 97. Severability. The provisions of this ordinance are declared separate and severable. The invalidity of any clause, sentence, paragraph, subdivision, section, or portion of this ordinance or the invalidity of the application thereof to any person or circumstance, shall not affect the validity of the remainder of the ordinance, or the validity of its application to other persons or circumstances.

Section 98. **Declaration of Emergency – Effective Date**. For the reasons set forth above, and to promote the objectives stated herein, the City Council finds that a public emergency exists, necessitating that this ordinance take effect immediately upon its passage by unanimous vote of the City Council in order to protect the public health, safety, property, and general welfare. This ordinance shall take effect and be in force immediately upon unanimous passage by the City Council.

Section 99. **Alternative Effective Date**. If this Ordinance does not become effective immediately as provided in Section 98, then this Ordinance shall become effective thirty days after passage, approval, and publication as provided by law.

DRAFT

1.A. Administrative

1.A.1. Purpose

The general purpose of these Citywide Design Guidelines (Guidelines) is to implement the City's Comprehensive Plan vision. More specifically, the purposes of these Guidelines are to:

- Provide clear objectives for those embarking on the planning and design of development projects within Tumwater;
- Ensure attractive, functional development;
- Promote social and economic vitality;
- Foster safety and comfort through design;
- Promote compact, walkable development patterns;
- Promote original and high quality design;
- Enhance the character and function of Tumwater's streets;
- Promote building and site design that fits into the context of established neighborhoods;
- Promote sustainable design principles;
- Promote design that enhances the "sense of place" for neighborhoods;
- Increase the awareness of design considerations amongst the Tumwater community; and
- Maintain and enhance property values through appropriate aesthetic and functional design considerations.

1.A.2. Administrative Procedures

The City of Tumwater Community Development Director (Director) or designee will administer the Tumwater Citywide Design Guidelines (Guidelines), lead the review process, and ensure that new development meets their intent. The review of a development project application with respect to the Guidelines will be the same as, and concurrent with, project review with respect to the zoning provisions. The Director may modify the mandatory requirements of this chapter upon a showing by the applicant that the modified requirement will equally or better meet the intent of the design guideline to be modified. The Director may waive compliance with selected parts of these guidelines where it has been determined infeasible to apply them.

1.A.3. Applicability

a. The Guidelines apply to:

- All new commercial, mixed use, residential, industrial, and institutional development not already addressed by the design guidelines for the Brewery District, Capitol Boulevard Corridor and Tumwater Town Center;
- Additions to existing buildings that increase gross floor area by 1,000 square feet or more or increase gross floor area by 50 percent or more require conformance for the new portion of the structure and the area of the site that must be modified as a result of the expansion. This could include walkways, driveways, parking, signage, etc.).
    - The Director may waive compliance with selected parts of these guidelines where it is infeasible to apply them to these situations. However, the design should make the existing structure less non-conforming. For example, expansions to an existing building would not be required to move all existing parking behind the existing building. However, reconfiguring the existing parking areas to include trees, vegetative strips and pathways (see 2.D.1.2. and 2.D.2.1), and providing screening between the parking and street (see 2.D.2.2.) would be less non-conforming and consistent with the intent of these guidelines, and
- Exterior modifications of existing structures such as facade changes, windows, awnings, signage, etc., shall comply with the design guidelines. The Director may waive selected parts of these guidelines where such changes would jeopardize the structural integrity of the existing structure or significantly conflict with the existing architecture.

b. The Guidelines are organized into the following chapters:

- Chapter 2. Commercial, Mixed Use, and Multifamily
- Chapter 3. Industrial
- Chapter 4. Institutional
- Chapter 5. Middle Housing, Single-Family Detached Dwellings, and Accessory Dwelling Units
- Chapter 6. Definitions

A development must comply with the chapter that addresses its land use type. For instance, a multifamily development must comply with Chapter 2, and an industrial development must comply with Chapter 3. If a development has multiple uses, it must comply with all chapters addressing its uses.

c. Exemptions

The following projects are exempted from the provisions of these Guidelines:

- Projects within subareas that have their own guidelines (e.g., CBC Capitol Boulevard

Corridor, BD Brewery District , and TC Tumwater Town Center zone districts);

- Construction underground, which will not leave any permanent structure that extends above the surface after completion;
- Utilities in the public right-of-way;
- Repair and maintenance work on buildings, landscaping (including relatively minor replacement of plants other than trees), or grounds (including parking lots), which does not significantly alter the appearance or function of the building, landscaping, or grounds (e.g., window replacement);
- Interior remodeling work;
- Temporary uses and structures as defined by the Tumwater Municipal Code (TMC); and
- Routine siding, roof maintenance, and repair that does not modify the building structure.
- Properties being developed in the Historic Commercial (HC) zone district.

d. Relation to other Tumwater Municipal Code sections. These guidelines augment other provisions in the Tumwater Municipal Code. For example, requirements for construction of sidewalks are addressed in TMC 12.12. These guidelines do not automatically supersede other Tumwater Municipal Code provisions. In the case of apparent conflict between these Citywide Guidelines and other Tumwater Municipal Code provisions or adjoining special subdistricts (BD Brewery District, CBC Capitol Boulevard Corridor, and TC Tumwater Town Center), the Director shall determine the applicability of these guidelines based on the objectives of public health, safety, and welfare, direction from the Comprehensive Plan, and the guidelines' intent.

1.A.4. How the Guidelines are Applied

Most sections include the following elements:

a. Intent statements, which are overarching objectives and should be used to assist with discretionary decision-making;

b. Standards use words such as "shall," "must," and "is/are required," signifying required actions;

c. The use of the word "should" means that the provision is required unless there is a compelling reason to the contrary;

d. The use of words such as "is/are recommended," signifying voluntary measures; and

e. Exceptions, which allow for flexibility to accommodate site-specific issues while still requiring the design to meet the intent of the design standards/guidelines.

1.A.5. Coordination with Transportation

Transportation system improvements and these design guidelines are intended to work in concert to improve Tumwater's public space for walking, biking, taking transit, driving, social gathering, and aesthetic appeal. In particular, to support the goals of these design guidelines, City planning and transportation staff collaborated to identify the following neighborhood center/gateway locations to be considered for on street parking (refer to the Street Designations Maps):

Map #1 – Tumwater Hill

Map #2 – Cleveland Ave

Map #3 – Lamberts Corner: (Black Lake)

Map #4 – Trosper Rd and Littlerock Rd

Map #5 – 70th Ave SW and Kirsop Rd SW

Map #6 – Littlerock Rd at Israel Road

Map #7 – Littlerock Rd at Tumwater Middle School and BPA Easement

Map #8 – Town Center

Map #9 – Henderson Blvd SE and Tumwater Blvd SE

Map #10 – Littlerock Rd at Black Hills High School

1.A.6. Organization of the Citywide Guidelines

These guidelines are organized into sections roughly arranged in the sequence of decisions made during the design process. That is, they consider first the larger site layout parameters that determine the size and configuration of the major project elements such as buildings, parking, and circulation. The second section addresses the site design features such as pathways and landscaping that further refine the site layout. The third section covers building design elements that are usually addressed after the larger site elements and building footprints have been determined.

DRAFT

2.A. Applicability

This chapter applies to commercial, mixed-use, and multifamily development, as defined in Tumwater Municipal Code Title 18, Zoning. Also see **Chapter 1 Section A Applicability**.

2.B. Site Planning

2.B.1. Dimensional Standards

Table 2.B.1-1 Dimensional standards.

Standard	Requirement
Multifamily - Minimum Open Space	150 square feet of on-site open space per multifamily dwelling unit
Non-Residential - Minimum Open Space	Open space equal to at least 1% of the ground floor non-residential building footprint plus 1% of the "site area."
Pathways thru Parking	At least every four rows or at least every 180 feet
Landscaping in Common Parking Areas	Lots with 20 or more parking stalls require one tree for every 10 parking stalls and planting areas of 20 square feet per parking stall
Garages	Within 10 feet of sidewalk edge, must include screening

2.B.2. Relationship to Street Front

INTENT:

- To create an active, safe pedestrian environment throughout Tumwater, and especially in key, designated areas.
- To design sites and orient buildings to enhance the property's visibility, attractiveness, and interaction with its adjoining streetscape.
- To establish a visual identity for Tumwater's neighborhood centers.
- To create a hierarchy of streets and block fronts.

SUMMARY AND APPLICABILITY:

The maps in **Appendix A: Street Designations** designate streets as Pedestrian-Oriented Streets (blue

lines) and Signature Roads (purple lines). This section summarizes the purpose and guidelines for these street designations.

Pedestrian-Oriented Streets

Pedestrian-Oriented Streets are intended to be the most vibrant and activated areas in the city. Storefronts or other active ground floors enclose the street to create the sense of an outdoor room. These are also often designated at street corners to anchor neighborhoods with human-scale development.

Special street front guidelines apply to Pedestrian-Oriented Streets, as stated in **Guidelines 2.B.2.1** through **2.B.2.7** below**.** Properties on Pedestrian-Oriented Streets must adhere to the basic citywide design guidelines, the **Section 2.B.2 Pedestrian-Oriented Streets** street front guidelines, and the following guidelines with special provisions for Pedestrian-Oriented Streets:

- **2.C.2.1 Pedestrian-Oriented Open Space** (where buildings are set back from the right-of-way);
- **2.E.4.1 Pedestrian-Oriented Facades**;
- **2.E.5.1 Buildings Corners**; and
- **2.E.6.1 Building Design Details**.

In addition, **2.E.3.1 Scale of Large Buildings**, **2.E.7.1.e Building Materials**, and **2.E.9.1.h Principal Building Entrances** have heightened requirements for Pedestrian-Oriented Streets.

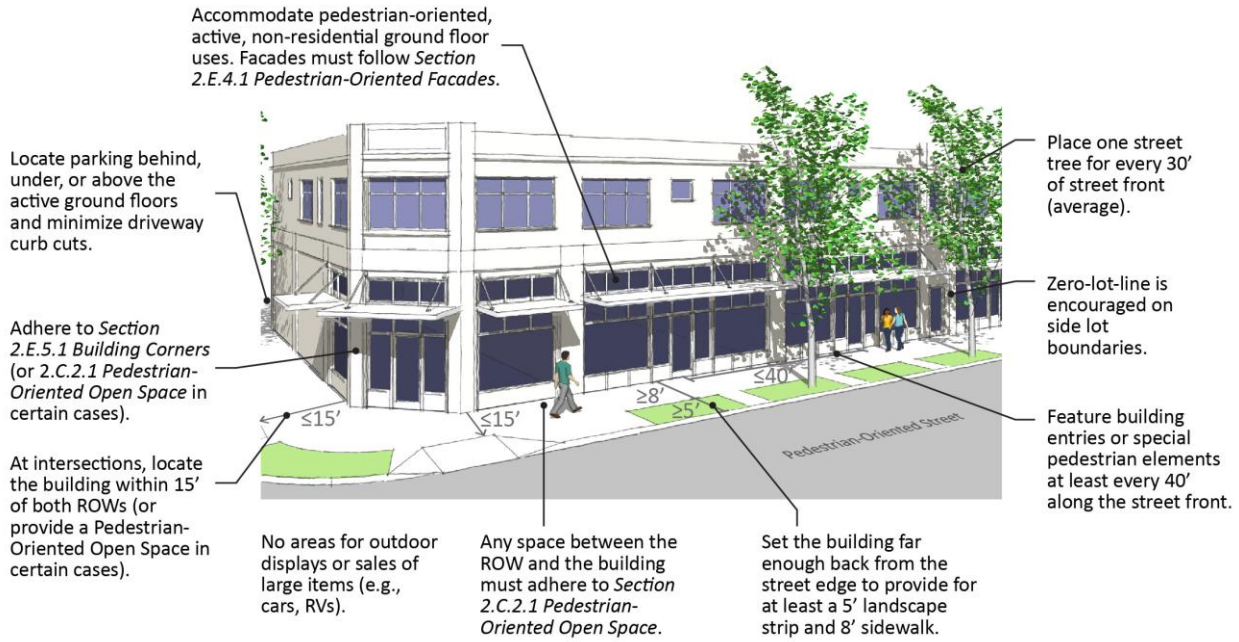

Figure 2.B.2-1. Pedestrian-Oriented Street requirements summary.

Signature Roads

This designation supports a diversity of development edges that contribute to the visual character of the

street, enhance the pedestrian environment, and connect to the lively corners at the Pedestrian - Oriented Streets. In residential areas, it ensures that residential units have a relationship to the street, making the street comfortable and safe for pedestrians and residents. In commercial and mixed-use areas, it maintains an attractive development edge relatively close to the right-of-way.

Special street front guidelines apply to Signature Roads, as stated in the **2.8.2.1** through **2.8.2.7** standards below. These allow slightly more flexibility than a Pedestrian-Oriented Street while being more specific than the basic guidelines. Properties on Signature Roads must adhere to the basic citywide design guidelines, the Section **2.8.2 Signature Roads** street front standards, and the special provisions for Signature Roads in **2.E.5.1 Building Corners**. In addition, **2.E.3.1 Scale of Large Buildings** has heightened requirements for Signature Roads.

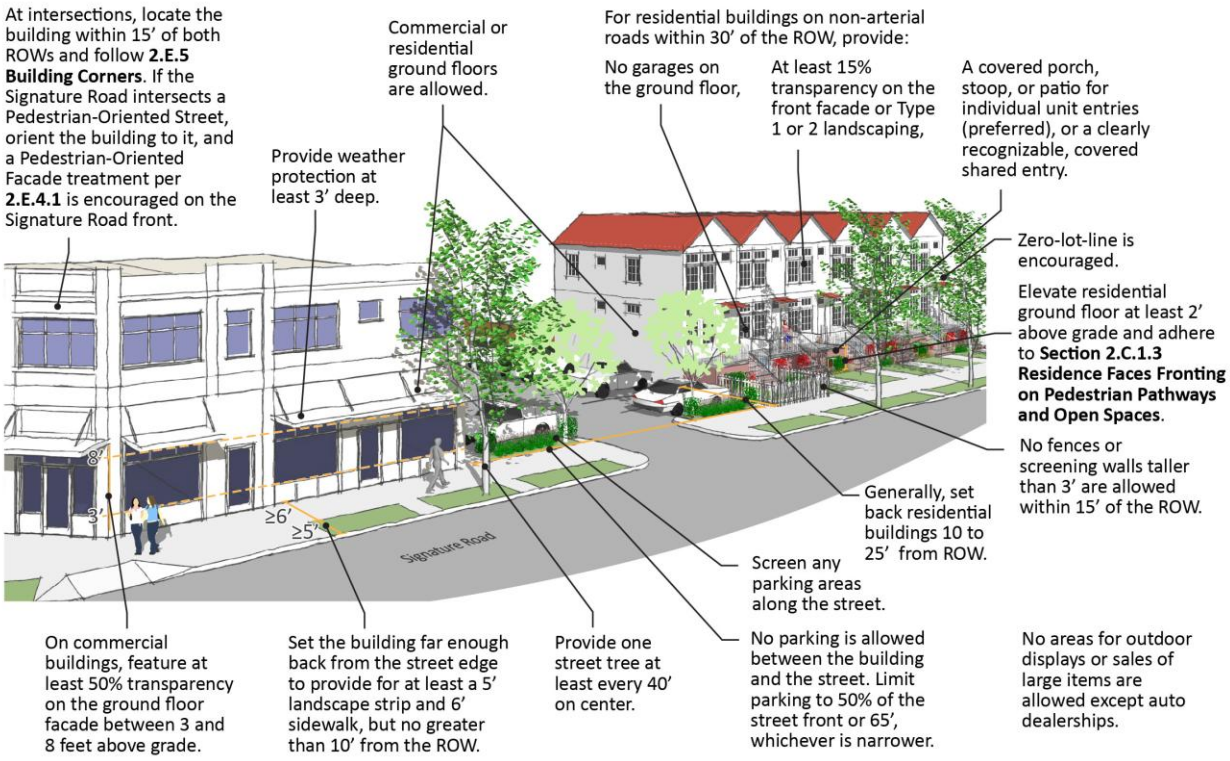

Figure 2.B.2-1. Signature Road requirements summary.

STANDARDS/GUIDELINES:

2.B.2.1. Ground floor uses

a. On **Pedestrian-Oriented Streets**, active ground floors with pedestrian-oriented nonresidential uses are required. Ground floors may include retail, restaurants, office, innovation spaces (e.g., "makers spaces" and small business incubators), galleries, sports clubs, hotel lobbies, and other commercial uses.

b. On **Signature Roads**, ground floors may be commercial or residential.

2.B.2.2. Appearance

a. On **Pedestrian-Oriented Streets**, development must adhere to the following:

(1) Ground floors must feature:

i. Pedestrian-Oriented Facades per **Section 2.E.4.1** along the street,

ii. Building or storefront entries, small open spaces, or special features approved by the Director at least every 40 feet along the street front may suffice instead of entries per the Director's determination, and

iii. Areas between the street right-of-way and the front building façade must be a Pedestrian-Oriented Open Space per **Section 2.C.2.1.**

(2) Areas for outdoor displays or sales of large items (e.g., cars, RVs) are prohibited. Outdoor displays that are returned to the building's interior (e.g., sidewalk displays) are acceptable.

(3) Unpainted chain link fences are prohibited. Also see TMC 18.46 fence standards.

b. On **Signature Roads,** development must adhere to the following:

(1) **Commercial** building facades facing the Road(s) and located within 15 feet of the right-of-way must feature:

i. At least 50% transparency on the ground floor façade between 3 and 8 feet above grade, and

ii. Weather protection at least 4 feet deep.

(2) **Residential** buildings on **non-arterials** located within 30 feet of the right-of-way must feature (note, the following are in addition to the guidelines that all residential buildings follow, such as **2.C.1.3 Residence Faces Fronting on Pedestrian Pathways and Open Spaces)**:

i. No garages or storage space along the front façade on the ground floor,

ii. At least 15% transparency on the front façade or Type 1 or Type 2 landscaping per TMC 18.47.040,

iii. A covered porch, stoop, or patio for individual unit entries (preferred), or a clearly recognizable, covered shared entry.

(3) Areas for outdoor displays or sales of large items are prohibited, except auto dealerships and similar facilities are allowed.

(4) No fences or screening walls taller than 3 feet are allowed within 15 feet of the right-of-way. Also see TMC 18.46 fence standards.

(5) Unpainted chain link fences are prohibited in front yards.

2.B.2.3. Parking orientation

a. On **Pedestrian-Oriented Streets**, all parking must be located behind, underneath, or above

active ground floors and accessible via an alley or shared driveway (if available) to minimize curb cuts on the Pedestrian-Oriented Street.

b. On Signature Roads, all parking must be located beside, behind, underneath, or above the ground floor uses facing the street (i.e., no parking is allowed between the building and the street). Parking is limited to 50% of the street front or 65 feet, whichever is narrower. Any parking areas along the street must be screened (see **Section 2.D.2.2).**

c. On all other streets and roads, minimizing large parking lots between the building front and the street is encouraged but not required.

d. On-site parking may be supplemented with on-street parking along the development frontage, where consistent with the City's Transportation Plan and authorized by the Transportation & Engineering Director.

2.B.2.4. Corners

a. On **Pedestrian-Oriented Streets** at a street and/or trail intersection, a building must be located within 15 feet of both rights-of-way and follow **Section 2.E.S Building Corners**. Alternatively, a Pedestrian-Oriented Open Space (see **Section 2.C.2.1**) may be provided on one corner of the intersection unless the Director determines that additional corners are appropriate for public space.

b. On **Signature Roads** at a street and/or trail intersection, a building must be located within 15 feet of both rights-of-way and follow the **2.E.S Building Corners** standards. If the Signature Road intersects a Pedestrian-Oriented Street or trail, the building must orient toward the Pedestrian-Oriented Street or trail, and additional **Pedestrian-Oriented Facade (2.E.4.1)** treatment is encouraged on the Signature Road front.

2.B.2.5. Space between building and street edge

Note, also see TMC Title 18 for setback requirements.

a. On **Pedestrian-Oriented Streets,** development setbacks are as follows:

   (1) Front minimum: Enough to allow for 13-foot for a sidewalk and planting area (i.e., space between building façade and edge of street). (See **2.8.1.6 Streetscape** below for more detail.)

   (2) Side: Zero-lot-line is encouraged.

b. On **Signature Roads,** development setbacks are as follows:

   (1) **Commercial and mixed-use** building requirements:

      i. Front maximum: 10 feet from the right-of-way.

      ii. Front minimum: Enough to allow for 11-foot for a sidewalk and planting area (i.e., space between building façade and edge of street). (See **2.8.1.6 Streetscape** below for more detail.)

(2) **Multifamily residential** building requirements:

i. Front maximum: 25 feet (10 to 15 feet is preferred)

ii. Front minimum: 10 feet (unless Director approves a design that accomplishes the public to private transition goals in a narrower or no setback (e.g., with a recessed entry and ground floor windows above eye level)). Note, porches and stoops may protrude into the setback.

iii. Side: Zero-lot-line is encouraged in multifamily zones.

(3) **Exceptions:** Departures from maximum setbacks may be allowed to preserve existing large trees.

2.B.2.6. Streetscape

a. On **Pedestrian-Oriented Streets,** development must adhere to the following streetscape standards:

(1) Landscape strip between sidewalk and street:

i. Minimum 5 feet unless the Director determines that trees in grates meet the intent of buffering pedestrians from the street and enclosing the street with trees. The Director will identify the street edge if there is none existing or if there is a planned street improvement.

ii. The planting strip must include at least one street tree for every 30 feet of street front (average) and ground cover or shrubs conforming to standards in **Section 2.C.3.2**.

(2) Sidewalk: Minimum 8 feet clear walking space. If a building that is more than 3 stories tall abuts the sidewalk, there must be either an additional 3 foot vegetative strip between the sidewalk and the building, or the sidewalk width increased 3 additional feet.

b. On **Signature Roads,** development must adhere to the following streetscape standards:

(1) Landscape strip between sidewalk and street:

i. Minimum 5 feet unless the Director determines that trees in grates meet the intent of buffering pedestrians from the street and enclosing the street with trees. The Director will identify the street edge if there is none existing or if there is a planned street improvement.

ii. Street trees provided at least every 40 feet (average) on center.

(2) Sidewalk: Minimum 6 feet clear walking space. If a building that is more than 3 stories tall abuts the sidewalk, there must be either an additional 3 foot vegetative strip between the sidewalk and the building, or the sidewalk width increased 3 additional feet.

DRAFT

2.B.2.7. Public to private transition

a. On **Signature Roads,** residential ground floors with individual unit entries (in addition to adhering to **Section 2.C.1.3 Residence Faces Fronting on Pedestrian Pathways and Open Spaces)** must be raised at least 2 feet above the sidewalk grade and basement unit floors must be at least 2 feet below the sidewalk grade unless the Director determines it is infeasible.

2.B.3. Pedestrian Circulation - Site Planning

INTENT:

- To improve the pedestrian environment by making it easier, safer, and more comfortable to walk between businesses and residences, on street sidewalks, to transit stops, and through parking areas.
- To provide pedestrian facilities such as sidewalks, crosswalks, and bus shelters connecting all modes of transportation.
- To provide convenient pedestrian circulation connecting all on-site activities to adjacent pedestrian routes and streets.
- To provide access to transit and services.

STANDARDS/GUIDELINES:

2.B.3.1. Pedestrian circulation in non-residential and mixed-use projects

Provide safe, convenient, and universally accessible pedestrian circulation for all users. Specifically:

a. Where feasible, provide pedestrian access onto the site from all streets on which the use is located.

b. Buildings must include universally accessible, convenient, clearly identified pedestrian entries.

c. Building entrances must be oriented to and visible from a public right-of-way unless the entrance is oriented to a publicly accessible open space. In either case, a clear pedestrian route must connect the public right-of-way and primary building entrances.

DRAFT

d. For developments with multiple buildings, provide for pedestrian circulation between all buildings and conform to guidelines in **Section 2.C.1**.

Figure 2.B.3.1-1. Provide pedestrian access to the site from the street.

e. New commercial developments must provide direct pedestrian access to adjacent properties if the Director determines it is feasible and desirable. The intent of this requirement is to allow for pedestrian access between adjacent commercial developments. Direct pedestrian access to an abutting residential, industrial, or other zone is not required unless the Director determines it benefits both uses.

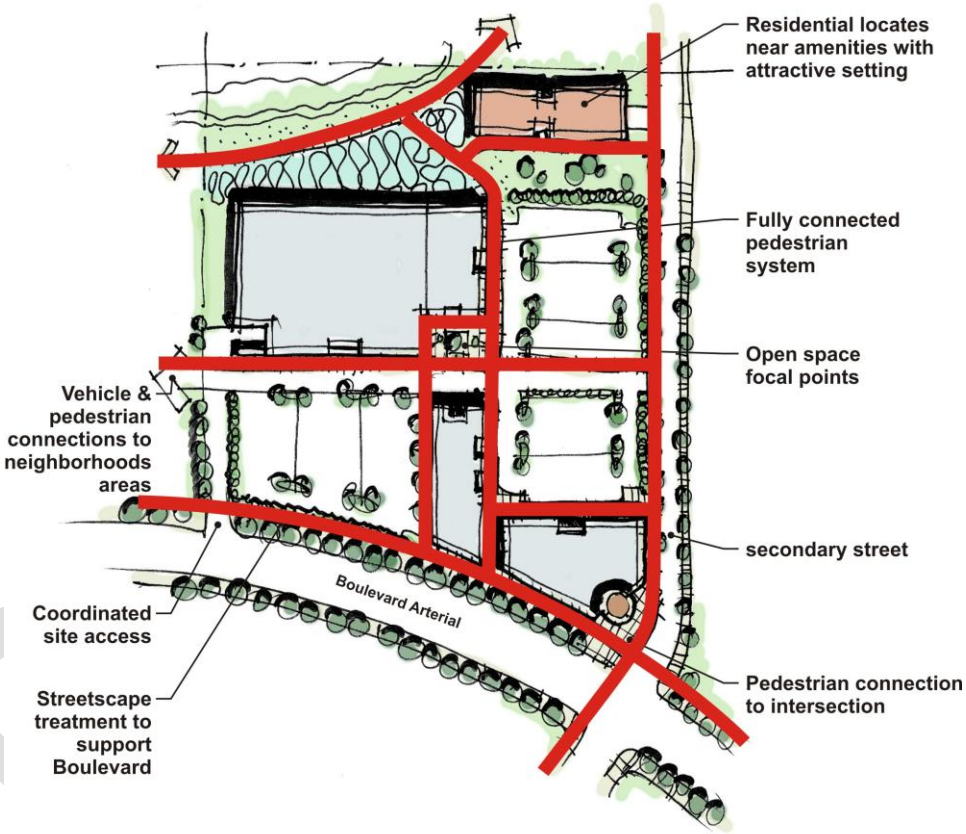

Figure 2.8.3.1-2. internal and external pedestrian connections are important.

f. Direct pedestrian access shall be provided to adjacent publicly accessible parks, open space, and trails, and transit, rideshare and bicycle storage facilities.

g. New developments shall provide for the opportunity for future pedestrian connections to adjacent properties through the use of pathway stub-outs, building configuration, and parking area layout. Remodels of existing facilities are encouraged to provide these opportunities, where feasible.

h. Shared pedestrian access, if provided in close proximity to the street, is allowed. One scenario where this would likely be used is where two buildings are built abutting each other and their entrances are directly next to each other at the lot line. The pedestrian

access between the two could be a shared inset building entrance area that both businesses can use while still having individual doors to each structure.

Also see **Section 2.C Pedestrian Access, Amenities, and Open Space Design** and **2.B.4** below.

2.B.3.2. Pedestrian circulation in multifamily residential development

a. Pathways between dwelling units and the street are required. Such pathways between the street and buildings fronting on the street should be in a straight line. Exceptions may be allowed by the Director where steep slopes prevent a direct connection or where an indirect route would enhance the design and/or use of a common open space.

Figure 2.B.3.2-1. Direct pathways between the street and dwelling units are required.

b. The pedestrian circulation system shall connect all main entrances on the site. For townhouses or other residential units fronting the street, the sidewalk may be used to meet this standard. For multifamily developments, pedestrian connections to other areas of the site, such as parking areas, recreational areas, common outdoor areas, and any pedestrian amenities shall be required.

c. Direct pedestrian access shall be provided to adjacent publicly accessible parks, open space, and trails, and transit, rideshare and bicycle storage facilities.

d. External stairways or elevated walkways which provide pedestrian access to dwelling units located above the ground floor are prohibited. The director may allow exceptions for external stairways or walkways located in or facing interior courtyard areas provided they do not compromise visual access from dwelling units into the courtyard. This is not intended to prohibit skywalks or pedestrian bridges between buildings.

Figure 2.B.3.2-2. Elevated external walkways such as this are not allowed.

2.B.3.3. Adequate sidewalks and landscape along street

Pedestrian-Oriented Streets and Signature Roads must adhere to **2.B.1.6 Streetscape**.

Development along other streets must provide for frontage improvements consistent with the City's Transportation Plan.

2.B.4. Vehicular Access and Circulation

INTENT:

- To provide better connectivity between sites for more efficient circulation and to ease congestion.
- To minimize cut-through traffic in residential neighborhoods.
- To provide safe and convenient vehicular access routes through large areas by connecting public and/or private roadways and access-ways.
- To enhance the visual character of interior access roads.
- To minimize conflicts with pedestrian circulation and activity.
- To enhance the safety and function of public streets.
- To provide access management on congested streets; i.e., to reduce turning movements that increase congestion and reduce safety.
- To support transit services.

STANDARDS/GUIDELINES:

See also **Section 2.D. Parking Design** and **Guideline 2.B.1.3 Parking Orientation** for standards related to parking lot location.

2.B.4.1. Inter-site Connectivity

The provision of through vehicle access connections between commercially or non-residentially zoned properties is required except in rare instances where the Director determines whether it is infeasible or undesirable. Such access may be in the form of a dedicated or private alley, connected or shared parking lots, shared driveways, or similar features. The intent of this guideline is to provide greater connectivity to facilitate future access to all properties and provide better vehicular circulation. This guideline is not required if the Director determines that such a vehicle connection would significantly hamper safe pedestrian movement.

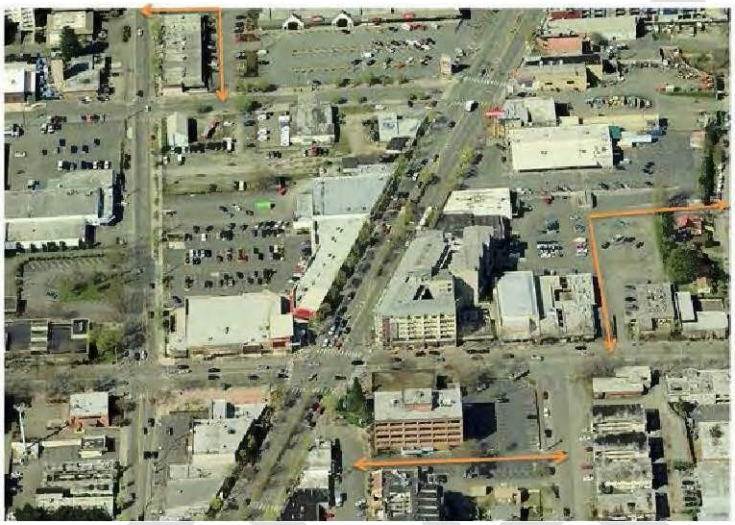

Figure 2.B.4.1-1. Joint parking with shared access (orange arrows) has been an important asset for Lake City Way businesses.

2.B.4.2. Internal Roadways and Vehicular Circulation

a. Provide street trees and sidewalks on all internal access streets (i.e., through vehicle access connections on sites with any dimension 400 feet or greater) to increase their function and appearance. For **non-residential** development, sidewalks on internal streets must have at least 8 feet of clear walking width with planting strips between the sidewalk and street edge at least 4 feet wide and 1 street tree for every 30 feet of street frontage. Sidewalks are required on both sides of the street unless alternative continuous pedestrian access is available for all buildings. If on-street parking is provided and rainwater drainage treated elsewhere, then the planting strip may be in the form of tree pits within the pavement but there must be at least 50 square feet of planting area or permeable pavement per tree to support root functions. The Director may require wider sidewalks in situations with high pedestrian volumes. For projects that include multifamily residential development, sidewalks on internal streets must have at least 5 feet of clear walking width with at least 4-foot wide planting strips between the sidewalk and the street edge and one street tree for every 30 feet of street frontage.

See **Section 2.F.1** regarding lighting.

Figure 2.8.4.2-1. Two internal road examples. Juanita Village's internal roadways (left) are one model for circulation on large sites. Note the on-street parking, crosswalks, wide sidewalks, street trees, signage, and pedestrian lighting. The example on the right features a narrower road section with pedestrian amenities and crossing.

b. Include traffic calming measures such as small traffic circles, raised crosswalks and curb extensions (sidewalk bulbs) to reduce vehicle speed and increase safety.

c. Primary vehicular access to corner lots shall be located sufficiently distant from the intersections to minimize traffic conflicts.

d. The Director may require modification of proposed vehicle access points and internal circulation in order to minimize the potential for cut-through traffic in residential neighborhoods. Specifically, access connecting nearby roads may be required.

Figure 2.8.4.2-2 pedestrian-oriented access streets are usually needed to provide good circulation to and through large sites.

2.B.4.3. Drive-Through Facilities

Where allowed drive through facilities (e.g., drive-up windows) must comply with the standards in TMC 18.43.075.

2.B.5. Lots with Multiple Buildings or with a Total Area Greater than 2 Acres

INTENT:

- To create integrated development plans and phasing strategies.
- To reduce negative impacts to adjacent properties.
- To enhance pedestrian and vehicular circulation.
- To encourage transit use.
- To provide usable open space.
- To create focal points for pedestrian activity for developments.
- To enhance the visual character of the community.

STANDARDS/GUIDELINES:

2.B.5.1. Unified Site Plans

Development at sites with two or more buildings or properties larger than 2 acres in area shall demonstrate that the project is based on a unified site plan that meets the following criteria:

a. Incorporates open space and landscaping as a unifying element.

b. Provides pedestrian paths or walkways connecting all businesses and the entries of multiple buildings.

c. Provides safe, efficient internal vehicular circulation that does not isolate the buildings.

d. Integrates any required open space as a central or unifying element.

e. Takes advantage of special on-site or nearby features.

DRAFT

*Figure 2.B.5.1-1 An example of a site plan illustrating requirements of **Guideline 2.8.4.1**.*

f. To achieve direct, safe, and comfortable pedestrian connections, building entrances must not be focused around a central parking area but be connected by a pathway system and/or open space(s), unless the Director determines this is infeasible or undesirable (e.g., on small sites with 40 or less parking stalls).

g. A development may provide a major public entry serving several shops rather than providing a separate storefront entry for all shops. If the development employs the combined-entry option, then it must be at least 15 feet wide, with special entry features such as weather protection and pedestrian lighting.

h. Also see **Guideline 2.B.8.1 Non-Residential Open Space** requirements.

2.B.6. Service Areas and Mechanical Equipment

INTENT:

- To minimize adverse visual, olfactory, or auditory impacts of mechanical equipment, utility cabinets and service areas at ground and roof levels.
- To provide adequate, durable, well-maintained, and accessible service and equipment areas.
- To protect residential uses and adjacent properties from impacts due to location and utilization of service areas.

DRAFT

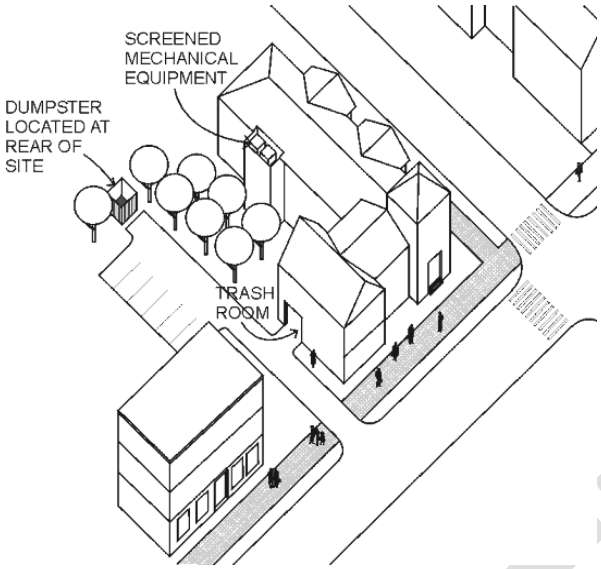

Figure 2.B.6.1-1. Locate service elements to reduce impacts on the residential and pedestrian environment, and provide appropriate enclosure.

STANDARDS/GUIDELINES:

2.B.6.1. Service Areas, Utilities, and Mechanical Equipment

Reduce impacts of refuse containers and storage areas through the following implementation measures:

a. Service areas (loading docks, trash dumpsters, compactors, recycling areas, electrical panels, and mechanical equipment areas) shall be located to avoid negative visual, auditory (noise), olfactory, or physical impacts on the street environment and adjacent residentially zoned properties. The City may require evidence that such elements will not significantly impact neighboring properties or public areas. (For example, the City may require noise damping specifications for fans near residential zones.) Service areas shall be sited for alley access if available.

b. Exterior loading areas for commercial uses shall not be located within 20 feet of property in the RSR Residential/Sensitive Resource or LDR Low Density Residential zone district unless the Director finds such a restriction does not allow feasible development. In such cases, the areas and drives will be separated from the residential lot by a masonry wall at least 8 feet high. Internal service areas may be located across the street from the RSR Residential/Sensitive Resource or LDR Low Density Residential zone district.

c. Service areas must not be visible from the sidewalk and adjacent properties. Where the City finds that the only option for locating a service area is either visible from a public right-of-way or space or from an adjacent property, the area must be screened with either landscape or structural screening measures provided in **Section 2.B.6.2**.

d. Ground-mounted mechanical equipment must be located and screened to minimize

visual and noise impacts to pedestrians on streets and adjoining properties

e. Roof-mounted mechanical equipment must be located and screened so the equipment is not visible from the ground level of adjacent streets or properties within 20 feet of the structure. Match the color of roof mounted equipment with the exposed color of the roof to minimize visual impacts when equipment is visible from higher elevations nearby. If the adjacent street or properties are topographically higher than the lot ground level so that complete screening is not feasible, equipment location and screening should be used to hide the equipment to the maximum extent practical.

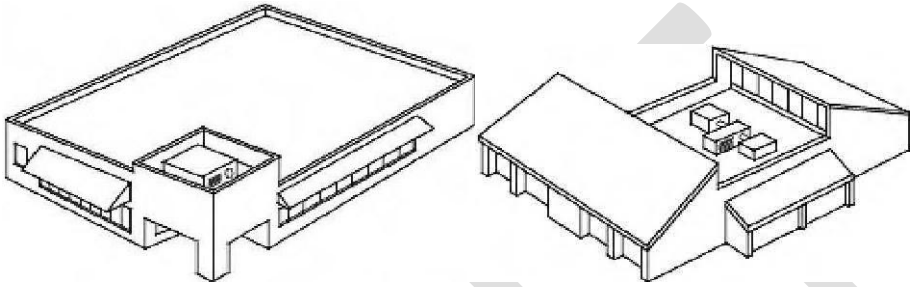

Figure 2.8.6.1-2. Examples of how to screen roof-mounted mechanical equipment.

f. Locate and screen utility meters, electrical conduit, and other service and utilities apparatus so they are not visible from adjoining properties and nearby streets.

   Other provisions of **Section 2.B.5** notwithstanding, service areas used by residents shall be located to avoid entrapment areas and other conditions where personal security is a problem. The Director may require pedestrian-scale lighting or other measures to enhance security.

   While exterior service areas must be screened, screening requirements may be reduced by the Director at access points for service areas inside buildings.

   In addition to the required screening, art work such as paint schemes or coverings that help to blend the equipment into the background may also be utilized.

g. Locate and/or shield noise producing mechanical equipment such as fans, heat pumps, etc. to meet State law provisions (WAC 173-60).

h. All service connections and on-site utilities including wires and pipes must be located underground. Meters may be attached to buildings. Project proponents are required to coordinate with the local electric utility provider to locate electrical service facilities in the least obtrusive way.

Figure 2.B.6.1-3. Place utility meters in less visible locations. Note that this example is acceptable on a service alley but not near a street or residential walkway.

2.B.6.2. Screening of Service Areas and Mechanical Equipment

Where screening of service areas is called for, adhere to the following:

a. A structural enclosure shall be constructed of masonry, heavy-gauge metal, or decay-resistant composite wood and have a roof. The walls must be sufficient to provide full screening from the affected roadway or use. The enclosure may use overlapping walls to screen dumpsters and other materials (see photos). Gates shall be made of heavy-gauge, site-obscuring material.

b. Collection points shall be located and configured so that the enclosure gate swing does not obstruct pedestrian or vehicle traffic, or does not require that a hauling truck project into any public right-of-way.

c. The service area shall be paved.

d. Weather protection of recyclables, trash, and compost/yard waste shall be ensured by using weather-proof containers or by providing a roof over the storage area.

e. In addition to the required screening, art work such as paint schemes or coverings that help to blend the equipment into the background may also be utilized.

DRAFT

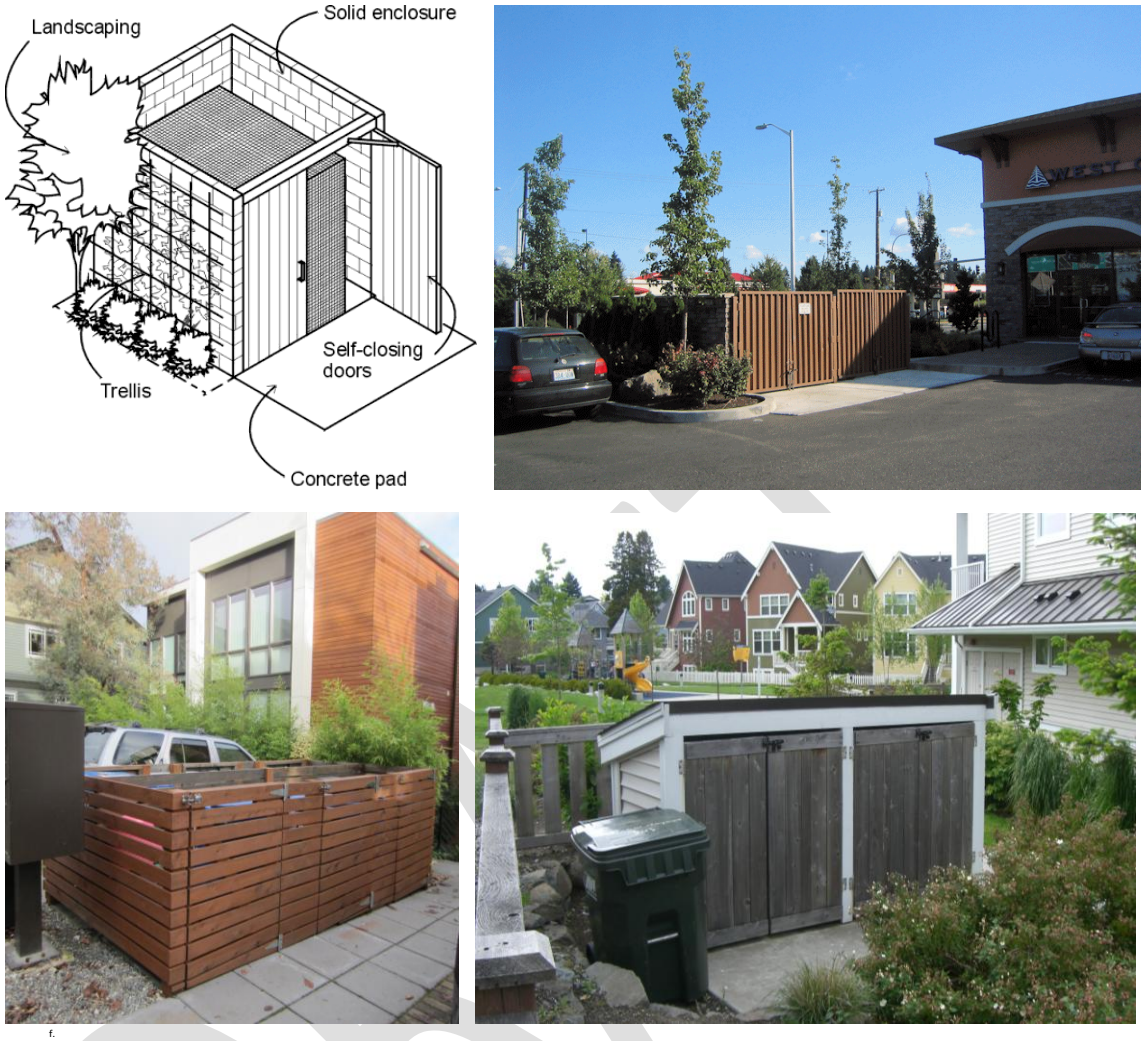

Figure2.8.6.2-1. Examples of acceptable dumpster enclosures.

2.B.7. Stormwater Facility Planning

INTENT:

- To comply with stormwater management requirements as outlined in the Tumwater Drainage Manual and the City's NPDES permit, which requires Low Impact Development measures to be applied unless it is documented to be infeasible.
- To integrate low impact development stormwater management/water quality systems into the site design as an amenity.
- To reduce the economic burden of stormwater management systems on developments.
- To encourage creative use and cost-effective stormwater management solutions for new development.

STANDARDS/GUIDELINES:

2.B.7.1. Compliance with City Stormwater Manual.

Adhere to the City of Tumwater Stormwater Management (SWM) standards in TMC 13.12.020. The following guidelines are intended to supplement the SWM regulations.

2.B.7.2. Integration of Stormwater Facilities into Site Design

Where feasible, integrate biofiltration swales, rain gardens, stormwater planters, and other low impact development stormwater management measures into the overall site design. Manage stormwater as close to its origin as possible by utilizing small scale, distributed hydrologic controls. Locate them so they do not impede pedestrian circulation. Examples of filtration methods are listed below:

a. Incorporate the biofiltration system, including low-impact development (LID) features, as part of the landscape features of the development. If the biofiltration system is incorporated into the landscaping of the site's open space, then, upon approval of the Director, the stormwater facility may be counted as part of the required open space or landscaping.

b. Maximize retention of native forest cover and vegetation and restore disturbed vegetation to intercept, evaporate and transpire precipitation.

c. Preserve permeable, native soil, and enhance disturbed soil to store and infiltrate stormwater.

Figure 2.8.7.1-1 A preferred method of handling stormwater is through retention systems, such as rain gardens, incorporated as site amenities. Other low-impact development techniques are encouraged, and in many cases, required.

d. Locate biofiltration swales, ponds, or other approved biofiltration systems as part of a landscape screen.

e. Where topography is favorable, locate the biofiltration swale, wet pond, or other

approved biofiltration system within the paved parking or service area to, and integrate it into the required internal parking area landscaping. Consider use of permeable pavements and asphalts to reduce impervious areas.

f. Use native, drought tolerant plants and/or appropriate plant species as approved by the Director.

g. Include the stormwater facility as an amenity.

Figure 2.8.7.1-2. Example flow control system incorporated into the site design as an amenity, High Point West, Seattle

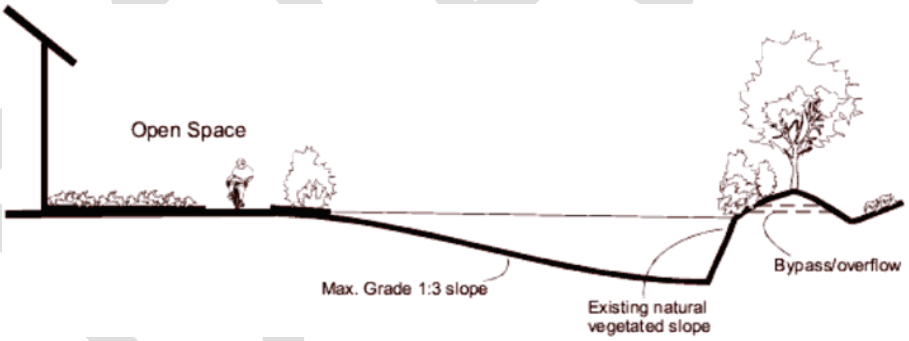

Figure 2.B.6.1-3. Examples of stormwater facilities treated as amenities.

2.B.8. Multifamily Open Space

INTENT:

- To create useable space that is suitable for leisure or recreational activities for residents.
- To create open space that contributes to the residential setting.

STANDARDS/GUIDELINES:

2.B.8.1. Amount of Required Multifamily Residential Open Space

All multifamily residential development must provide 150 square feet of on-site open space per dwelling unit. Acceptable types of open space include:

a. **Common Open Space**. Where accessible to all residents, common outdoor open space may count for up to one hundred percent of the required open space. "Common outdoor open space" includes landscaped courtyards or decks, entrance plazas, gardens with pathways, children's play areas, pools, water features, accessible areas used for stormwater retention or other multipurpose recreational and/or green spaces. Special requirements for common open spaces include the following:

   (1) Required setback areas shall not count toward the open space requirement.

   (2) Space shall have a minimum dimension of fifteen feet to provide functional leisure or recreational activity.

   (3) Space shall feature paths or walkable lawns, landscaping, seating, lighting, play structures, sports courts, or other pedestrian amenities to make the area more functional and enjoyable for a range of users.

   (4) Common space shall be separated from ground level windows, streets, service areas and parking lots with landscaping, low-level fencing, and/or other treatments as approved by the city that enhance safety and privacy for both the common open space and dwelling units.

   (5) The space should be oriented to receive sunlight, face east, west or preferably south, when possible.

   (6) The space must be accessible from the dwelling units and, as appropriate, from public streets and sidewalks. The space must be oriented to encourage activity from local residents.

DRAFT

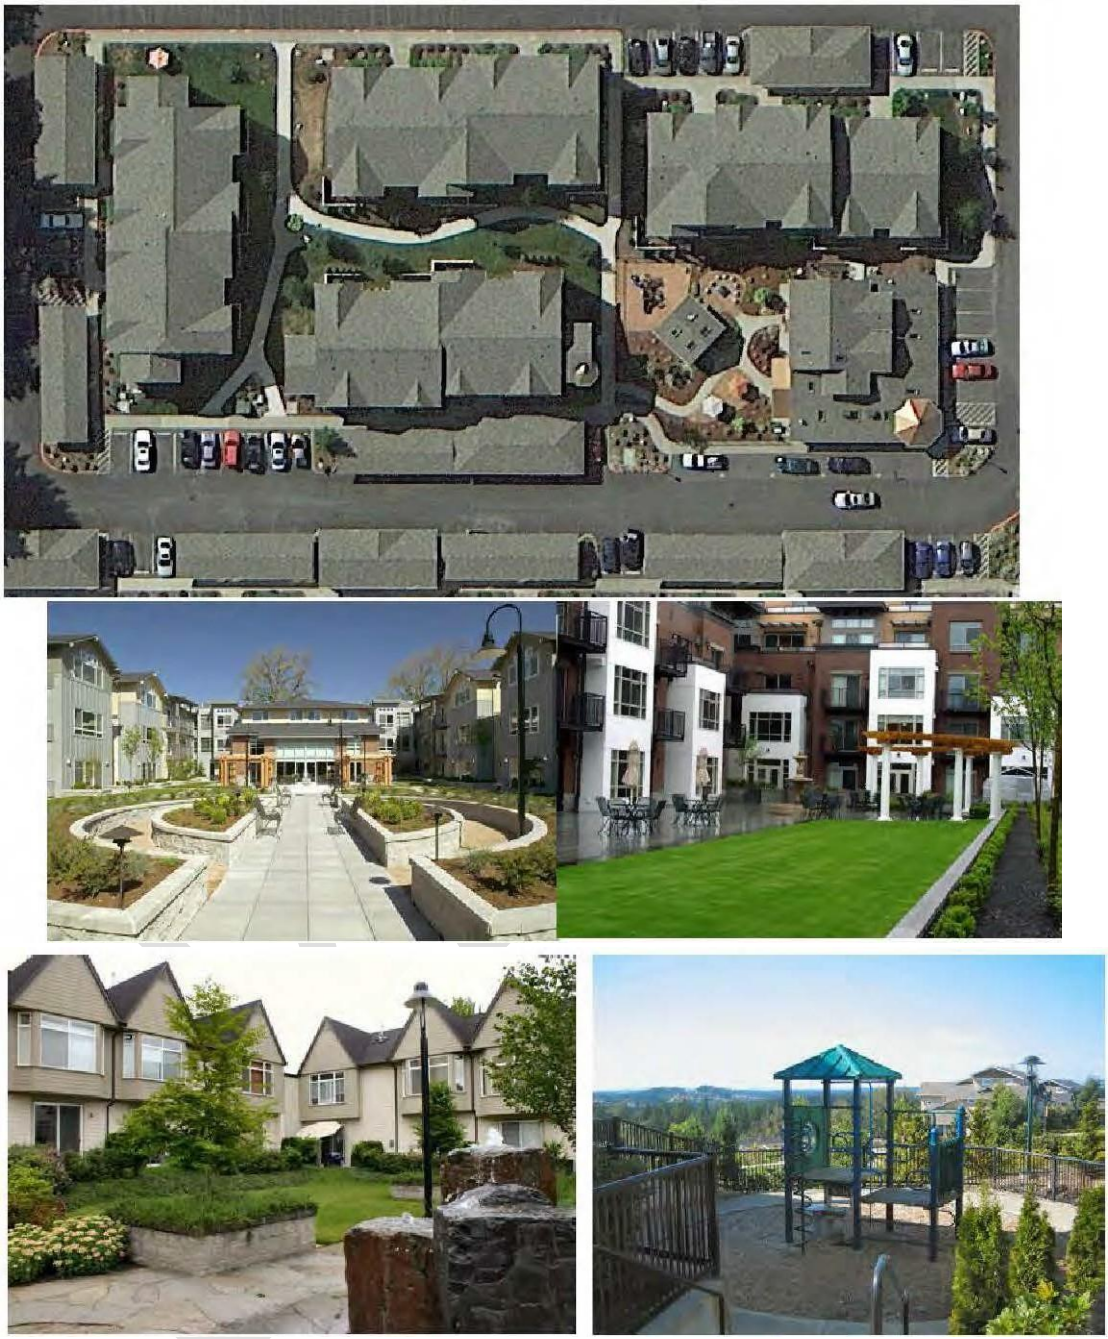

Figure 2.8.8.1-1. Good examples of common open space, including street level courtyards (pictures on top and right), a children's play area (lower left), and a pedestrian corridor (top and upper left).

b. **Balconies**. Individual balconies or patios may be used for up to fifty percent of the required open space. To qualify as open space, balconies or patios must be at least thirty- five square feet, with no dimension less than five feet.

c. **Rooftop Decks and Terraces**. Decks and terraces may be used to meet up to fifty percent of the required open space, provided the following conditions are met:

(1) Space must be accessible to all dwelling units and ADA-compliant.

(2) Space must provide amenities such as seating areas, landscaping, and/or other features that encourage use as determined by the city.

(3) Space must feature surfacing which enables residents to use the open space.

(4) Space must incorporate features that provide for the safety of residents, such as enclosures and appropriate lighting levels.

d. On-site indoor recreation areas may be used to meet up to twenty-five percent of the required open space provided the following conditions are met.

(1) Space must be accessible (ADA) and walkable to all dwelling units.

(2) The space is designed for and includes equipment for a recreational use (e.g., exercise, group functions, etc.).

e. Natural areas, wetlands, and buffers with mature vegetation may count for up to 50% of the required open space provided access is provided within these areas via a trail consistent with the regulatory requirements for these areas.

2.B.9. Non-Residential Open Space

INTENT:

- To enhance the development character and attractiveness of non-residential development.
- To increase pedestrian activity and amenity for shoppers
- To mitigate the impacts of large commercial development, which can be auto-oriented, anti-pedestrian, and incompatible with the desired, mixed-use character of the mixed use zones.

STANDARDS/GUIDELINES:

2.B.9.1. Non-Residential Open Space Requirements

New developments with non-residential uses on sites with a total site area greater than 1 acre must provide open space equal to at least 1% of the ground floor non-residential building footprint plus 1% of the "site area." The open space may be in the form of Pedestrian-Oriented Open Space (**Guideline 2.C.2.1**), garden, play area or other open space feature that serves both as a visual amenity and a place for human activity. Portions of sidewalks that are wider than 12' and which meet the standards of Pedestrian-Oriented Open Space may be counted toward this requirement. For this specific guideline, "Site area" includes all land needed for the non-residential portion of the project including parking, service areas, access and required landscaping. The intent of this guideline is to provide for some outdoor space for activities or amenities that enhance the commercial activities, such as outdoor eating areas, display areas, seating, etc.

Figure 2.B.8.1-1. Well-designed non-residential open space can be an important business attraction or employee amenity.

2.B.10. Site Planning for Security

INTENT:

- To increase personal safety and property security.

STANDARDS/GUIDELINES:

2.B.10.1. Prohibitions

In site development planning, avoid:

a. Entrapment areas, where a person could become trapped with no exit route. Provide two means of egress from all outdoor spaces. Ensure entrapment conditions are avoided in the design of rooftop decks.

b. Areas that are dark or not visible from a public space or right-of-way.

c. Vegetation and fences that restrict visibility into occupiable open space, pathways and building entries.

DRAFT

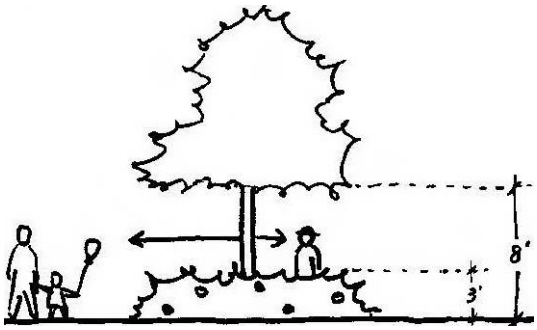

Figure 2.8.10.1-1. Keep landscaping open between 3 feet and B feet above grade where there is the need for visibility.

d. Buildings, vegetation, or other objects (e.g., a storage enclosure) that block visibility into a space or provide places to hide.

e. Screens or landscaping that blocks motorists' views of pedestrians crossing streets, driveways, and vehicular circulation areas.

f. Where visibility is necessary to avoid creating an unsecure area to reduce the potential for pedestrian/vehicle collisions, do not plant vegetation that will obstruct views between 3 feet and 8 feet above the ground. (**See Figure 2.B.10.1-1.**)

Figure 2.B.9.1-2. Fences that prevent visibility from public ROW and open spaces can decrease security.

2.B.10.2. Desirable Elements

In the planning of the site and design of buildings and site elements, to the extent feasible provide for:

a. "Passive surveillance," the ability of people occupying buildings and public spaces to view all parts of accessible spaces.

b. Security and pedestrian lighting per **Guideline 2.F.1.1**.

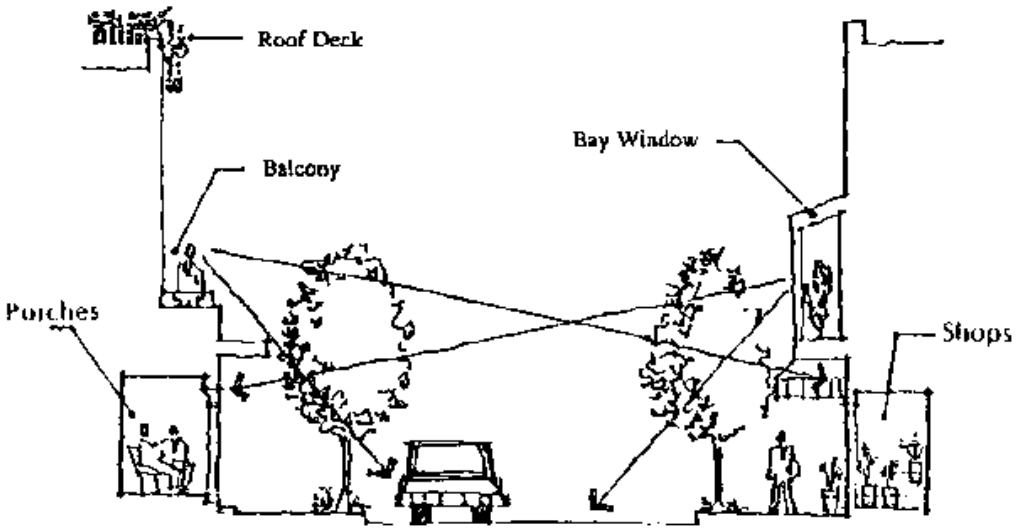

Figure 2.8.10.2-1. Passive surveillance or the ability of people in buildings or traveling along roadways to see outdoor spaces and increases security.

c. Appropriate natural access control, that is, features that delineate where the general public should not enter without an invitation. For example, a low fence or hedge can indicate that people should not enter a yard or open space except through a gate or opening. Access control should not limit visibility or passive surveillance.

d. Defining territory. This means clearly indicating through site planning and design measures what parts of the site are open to the public and what parts are not. For example, in commercial development, pedestrian-oriented elements and walkways indicate that the public is welcome but fenced areas with a gate do not. Also, well maintained sites indicate that someone cares for the site and tends to discourage crime.

Figure 2.8.10.2-2. This residential complex incorporates passive surveillance, territorial definition, and good visibility and lighting to provide a more secure pathway and open space.

2.C. Pedestrian Access, Amenities, and Open Space Design

2.C.1. Internal Pedestrian Paths and Circulation

INTENT:

- To provide safe and direct pedestrian access that accommodates all pedestrians, minimizes conflicts between pedestrians and vehicular traffic, and provides pedestrian connections to neighborhoods.
- To accommodate non-competitive/non-commuter bicycle riders who use bicycles on short trips for exercise, recreation, and convenience.
- To provide attractive internal pedestrian routes that promote walking and enhance the character of the area.

STANDARDS/GUIDELINES:

2.C.1.1. Pedestrian Circulation - General Design

Figure 2.C.1.1-1. An example of an attractive pedestrian connection through a multi-family development.

a. For safety and access, landscaping shall not block visibility to and from a path, especially where it approaches a roadway or driveway.

b. Internal Pedestrian pathways (i.e., sidewalks and paths) shall be separated from structures at least 3 feet for landscaping except where the adjacent building features a pedestrian- oriented façade per **Section 2.E.4**. The Director may consider other treatments to provide attractive pathways. Examples include sculptural, mosaic, bas-relief artwork, or other decorative treatments that meet the guidelines intent. (Figure 2.C.1.1-1 provides one example.)

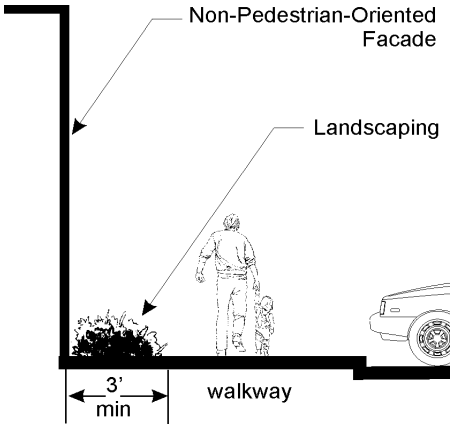

Figure 2.C.1.1-2 Provide landscaping between walkways and structures.

Figure 2.C.1.1-3. Wall treatment to provide interest along a walkway.

c. For interior pathways, the applicant must demonstrate to the Director's satisfaction that the proposed pathway is of sufficient width to accommodate the anticipated number of users. For example, a 10- to 12-foot wide sidewalk can accommodate two couples passing one another. An 8-foot wide sidewalk will accommodate three persons walking abreast, while a 6-foot wide sidewalk will allow two individuals to pass comfortably. Along a commercial façade with ground floor entries, the pathway must provide for at least an 8 feet wide clear walking path. In residential areas, pathways must provide at least a minimum of 5 feet clear walking path. If the pathway is between a façade with a primary building entry and a parking lot, see **Guideline 2.C.1.2** below.

d. Pathways must be American with Disabilities Act (ADA) compliant.

2.C.1.2. Pedestrian Circulation where Facades Face Parking Areas

In commercial settings where a building's main entrance faces onto a parking area rather than the street, provide wide pathways adjacent to the façades of retail and mixed-use buildings. Pathways along the front façade of mixed-use and retail buildings 100 feet or more in length (measured along the façade) that are not located adjacent to a street must be at least 12 feet wide to allow for 8 feet minimum unobstructed width and landscaping and include the following:

DRAFT

Figure 2.C.1.2-1. Example of a successful pedestrian sidewalk between parking lot and storefront.

a. Trees, as approved by the Director, must be placed at an average of 30 feet on-center and placed in grates. Breaks in the tree coverage will be allowed near major building entries to enhance visibility. However, no less than 1 tree per 60 lineal feet of building façade must be provided.

b. Planting strips may be used between any vehicle access or parking area and the pathway, provided that the required trees are included and the pathway is at least 8 feet in width, the combined pathway and planting strip is at least 12 feet in width, and pedestrian paths provide access (i.e., cross the planting strip) between parking areas and the sidewalk at least every 20 feet. (See **Figure 2.C.1.2-1**.)

c. Lighting must conform to **Section 2.F.1 Site Lighting**.

2.C.1.3. Residence Faces Fronting on Pedestrian Pathways and Open Spaces

The objective of this guideline is to ensure compatibility between publicly accessible spaces (e.g., sidewalks, paths, trails, parks, and common open spaces) and abutting residences. A delineated public to private transition provides privacy and security for residents, recreational opportunities for open space users, and attractive and safe public areas and residences. The guidelines apply to buildings facing public and private pathways but not necessarily to pathways to service areas.

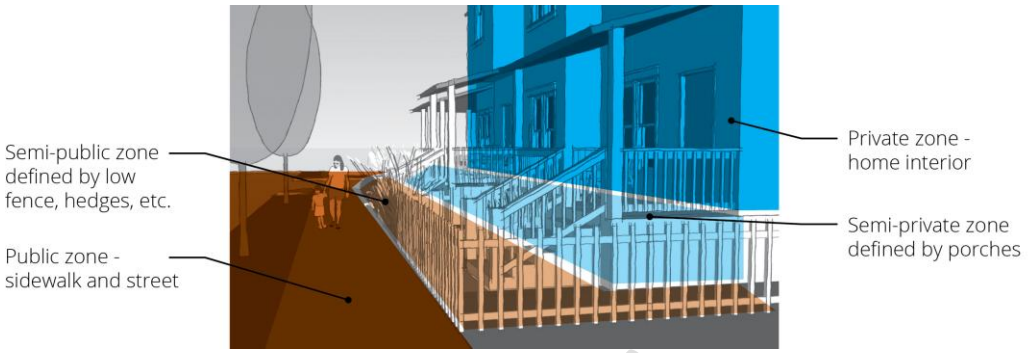

Figure 2.C.1.3-1. A combination of low fences or landscaping and porches, stoops, or patios define the transition from public to private space.

a. For residences with ground floor living spaces facing the publicly accessible space the building must feature at least one (and is encouraged to feature multiple) of the public/private space transition elements described below:

(1) **Deck or porch option**. Provide at least a 60 square foot porch or deck raised at least 1 foot above grade. The porch or deck must be at least 6 feet wide, measured perpendicular to the house face. (The deck may be recessed into the house floor plan so that deck does not extend from the house face a full 6 feet.) A low fence, rail, or planting 2 feet to 4 feet high is encouraged. A porch roof or weather protection is optional.

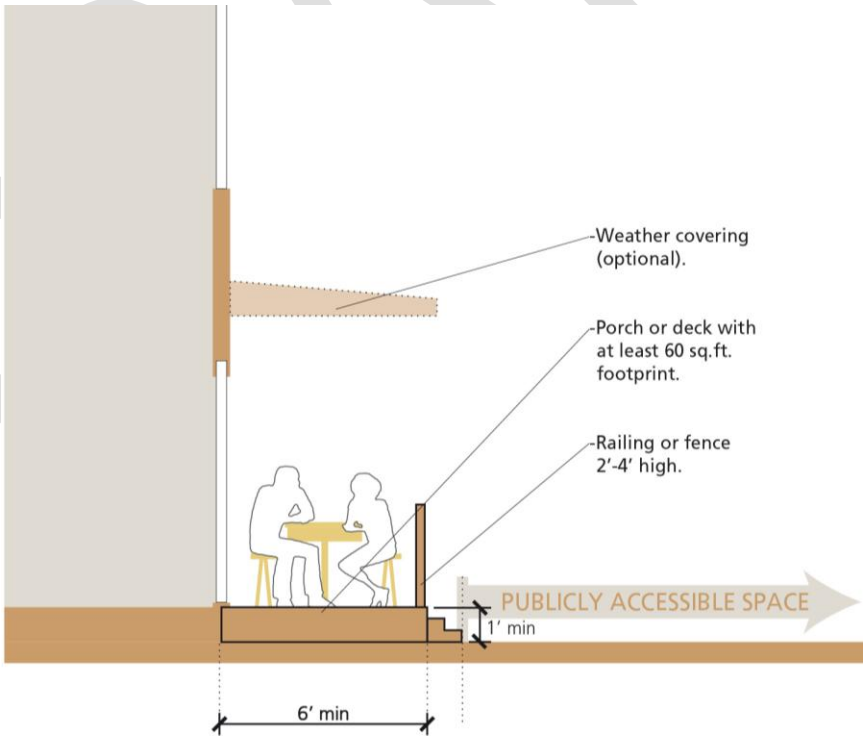

Figure 2.C.1.3-2. Deck or porch option for residence/publicly accessible space transition.

Figure 2.C.1.3-3. The porches and landscaping elements provide a graceful and inviting transition from the public space to the private realm.

(2) **Private open space option**. Provide at least a 10 foot wide private open space along the face of the residence. The space may be paved or landscaped. A fence, planting, or other landscape feature 2 to 4 feet high shall be provided.

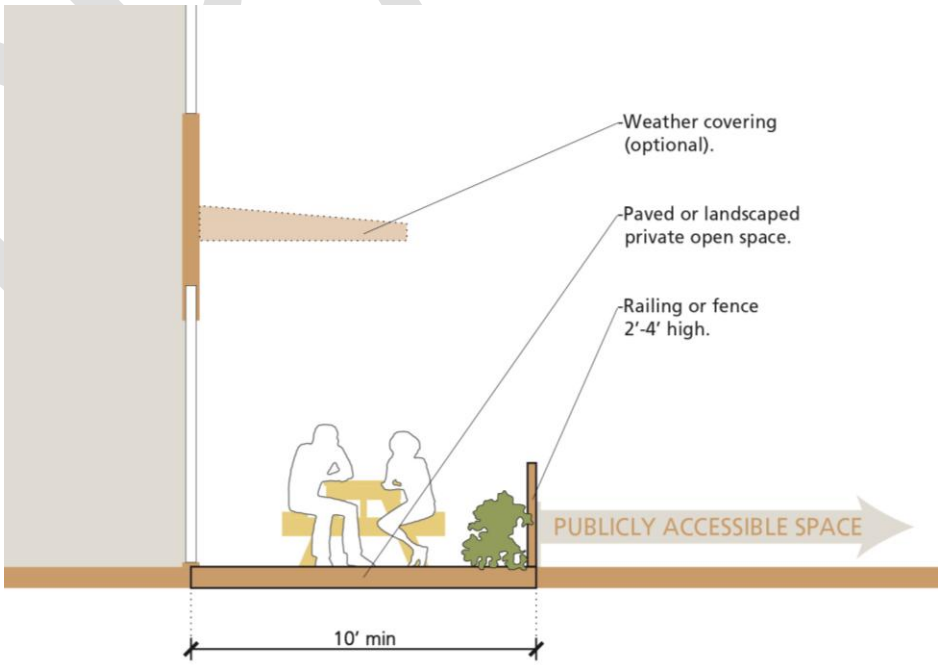

Figure 2.C.1.3-4. Private open space option for residence/publicly accessible space transition.

Figure 2.C.1.3-5. Example of private back yards facing common open space in High Point, Seattle. Short fences delineate the transition from the semi-public open space to the semi-private back yard.

Figure 2.C.1.3-6. Private back yards are distinguished from the public park with plantings and short fences at this Columbus, OH park.

(3) **Raised ground floor.** Raise the ground floor 2 to 8 feet above the pathway grade. If basement units with access from the pathway are provided, lower basement units are at least 2 feet below the pathway grade. If this option is used, at least 50% of the units must be ADA accessible.

Figure 2.C.1.3-7. Raising the ground floor of residential units a few feet above grade adds privacy because pedestrians walking on the adjacent sidewalk cannot look directly into the living spaces. A small porch or stoop provides an intimate transition between public and private realms.

(4) **Landscaped area**. For multifamily buildings with shared entries, an option is to provide a landscaped area at least 10 feet wide along the face of the building. The plantings must reach 3 feet high within three years after planting. If the residence's ground floor is at least 3 feet above the pathway grade, then the landscaped area may be reduced to 4 feet wide. This landscaped area option is not appropriate for individual ground-related units unless combined with one or more of the measures above**.**

Figure 2.C.1.3-8. Raised ground floor, porches, and landscaping signify the transition from public to private space, Rainier Vista, Seattle (image: Google Earth).

(5) **Other** transition design measure(s) that adequately protects the privacy and comfort of the residential unit and the attractiveness and usefulness of the pathway at least as effectively as option 1 through 4 above, as determined by the Director.

b. For residences that do not have ground floor living spaces facing the publicly accessible space, there should be at least a 5 foot planting strip along the base of the building with shrubs and small trees planted to form a continuous screen, at least 6' tall (three years after planting) along the building façade. The residence must have upper story windows or a balcony facing the open space, and there must be no "blank walls" facing the open space on any floor, except the ground floor when screened with the plantings as noted above.

The landscaped area may be counted as open space except in the case of the multi-functional common open space as required in **Guideline 2.8.7.1.a**.

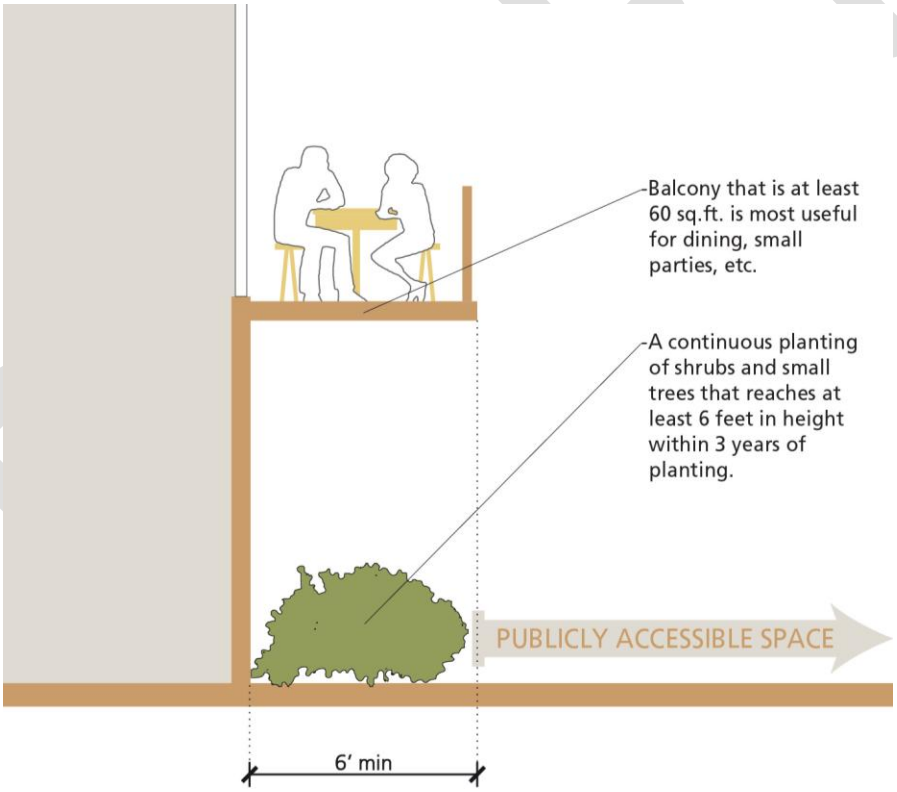

Figure 2.C.1.3-9. Planting requirements for residences without a ground floor living space fronting a publicly accessible space.

2.C.2. Pedestrian-Oriented Open Space

INTENT:

- To provide a variety of pedestrian areas to accommodate customers on Pedestrian-Oriented Streets.
- To provide safe, attractive, and usable open spaces that promote pedestrian activity and recreation.

STANDARDS/GUIDELINES:

2.C.2.1. Pedestrian-Oriented Open Space

Where Pedestrian-Oriented Open Space is provided, including, but not limited to, areas required in these guidelines (see **Guidelines 2.B.1.1**, **2.B.8.1**, **2.E.2.1**, and **2.E.9.1**) or in TMC Title 18, Zoning, design the open space according to the following criteria. If sidewalks are wider than the required minimum width, the additional sidewalk width may be counted as Pedestrian-Oriented Open Space.

a. Required Pedestrian-Oriented Open Space features:

(1) Visual and pedestrian access (including ADA compliant access) into the site from a street, private access road, or non-vehicular courtyard.

(2) Visual access from some dwelling units and/or commercial areas (i.e., maximize "eyes on the open space").

(3) Paved walking surfaces of either concrete or approved unit paving.

(4) Lighting must conform to **Section 2.F.1 Site Lighting**.

(5) Spaces must be located in or adjacent to areas with significant pedestrian traffic to provide interest and security, such as adjacent to or visible from a building entry.

(6) At least 2 feet of seating area (a bench or ledge at least 16 inches deep and appropriate seating height) or one individual seat per 60 square feet of plaza area or open space.

(7) Landscaping components that add visual interest and do not act as a visual barrier. This could include planting beds, potted plants, or both.

b. Desirable Pedestrian-Oriented Open Space features:

(1) Pedestrian amenities, such as a water feature, site furniture, artwork, drinking fountains, kiosks, or other similar features.

(2) Adjacent buildings with transparent window and doors covering 75 percent of the façade between 2 feet and 8 feet above the ground level.

(3) Solar access at least during noon and afternoon hours during winter, and appropriate shade during summer.

(4) Pedestrian weather protection, alcoves, seating, or other features along building edges to allow for outdoor seating areas and a planted buffer.

c. A Pedestrian-Oriented Open Space must not have:

(1) Asphalt or gravel pavement.

(2) Adjacent parking areas or service areas (e.g., trash areas) that are not separated with landscaping, as described in **2.D.2.2**.

(3) Adjacent chain-link fences.

(4) Adjacent "blank walls" without "blank wall treatment."

(5) Outdoor storage that does not contribute to the pedestrian-oriented environment.

(6) Vehicle travel through the area.

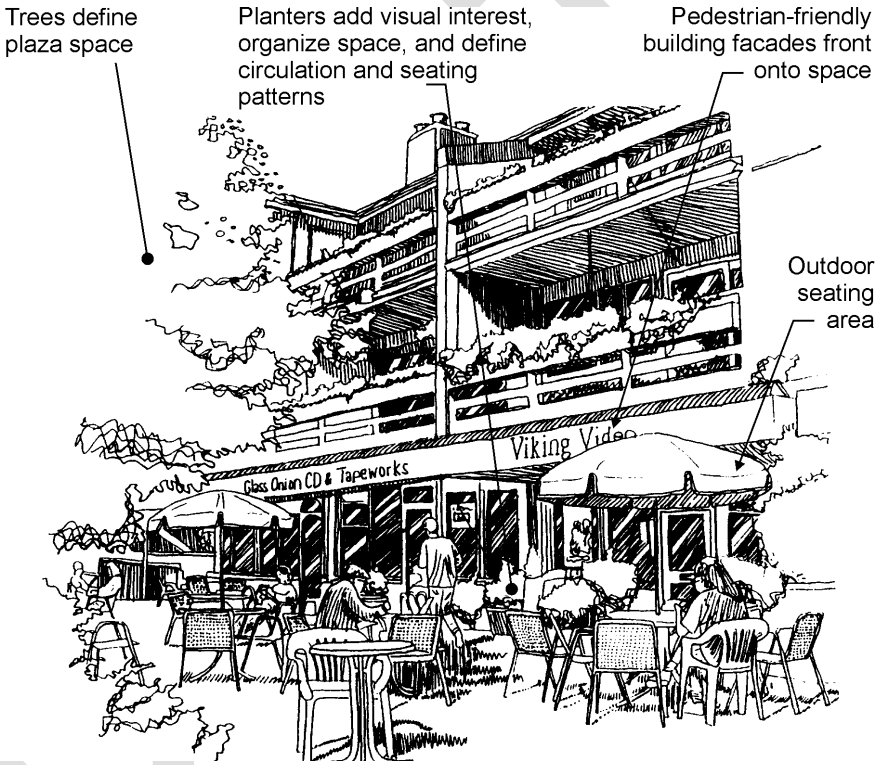

Figure 2.C.2.1-1. Example of a small Pedestrian-Oriented Open Space.

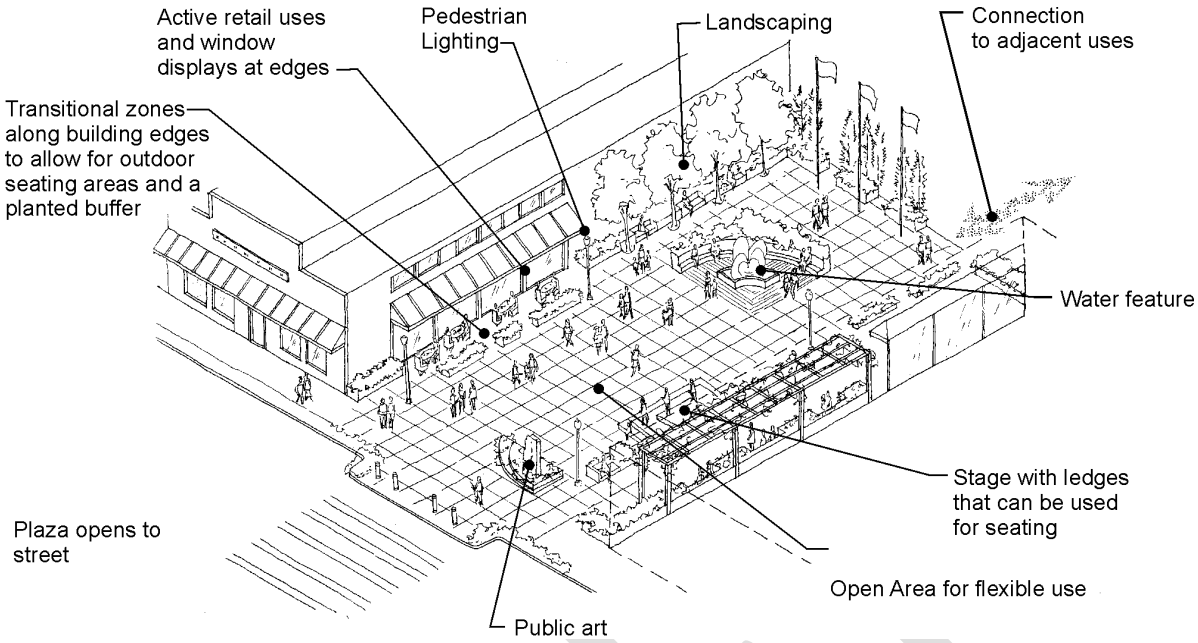

Figure 2.C.2.1-2. Example of a large Pedestrian-Oriented Open Space.

2.C.3. Site Landscaping

INTENT:

- To encourage the abundant use of landscaping in site and development design to improve site aesthetics, enhance the pedestrian experience, and increase environmental quality.
- To reduce surface water runoff by percolating water through landscaped areas.
- To maintain and improve privacy for residential zones.
- To enhance buildings and open spaces.
- To make adjacent uses more compatible
- To provide visual relief from roadways, parking areas, and the built environment.

STANDARDS/GUIDELINES:

2.C.3.1. Reference to TMC 18.47

The landscaping standards of TMC 18.47 shall apply. These standards are intended to supplement those standards.

2.C.3.2. Landscaping- General standards for all landscape areas

All new landscape areas proposed for a development shall be subject to the following provisions:

a. Berms shall not exceed a slope of two horizontal feet to one vertical foot (2:1).

b. Group plants that have similar water use characteristics.

c. Plant selection shall consider adaptability to sun exposure, soil conditions, and the topography of the planting area. Preservation of existing vegetation is encouraged.

d. Install no plants included in the Thurston County Noxious Weed list.

e. All plants shall conform to American Association of Nurserymen (AAN) grades and standards as published in the "American Standard for Nursery Stock" manual; provided that existing healthy vegetation used to augment new plantings shall not be required to meet the standards of this manual.

f. Street trees and trees internal to the development shall conform to the standards in the Tumwater Comprehensive Street Tree Plan and Title X tree protection ordinance.

g. When the width of any landscape strip is 20 feet or greater, the required trees shall be staggered in two or more rows.

h. Shrubs shall be dwarf varieties unless demonstrated that other varieties can thrive if maintained at 42 inches. Shrubs shall also be as follows:

   (1) At least an MN container Class No. 2 size at time of planting in Type II, Ill, and parking area landscaping;

   (2) At least 24 inches in height at the time of planting for Type I landscaping; and

   (3) Shrubs shall be perennials.

i. Groundcovers shall be planted and spaced to result in total coverage of the majority of the required landscape area within three years.

j. All fences shall be placed on the inward side of any required perimeter landscaping along the street frontage. That is, place the required landscaping to face the public street or open space. Exception: Where the fence separates a public street from a required common open space, the Director will determine which side the landscaping is to be installed.

k. Required street landscaping may be placed within City of Tumwater street rights-of-way subject to the permission of the City of Tumwater Transportation & Engineering Director.

l. Required street landscaping may be placed within Washington State rights-of-way subject to permission of the Washington State Department of Transportation.

m. New landscape material provided for vegetation restoration or mitigation requirements and within areas of undisturbed vegetation or within the protected area of significant trees shall give preference to utilizing western Washington native plant species.

n. Per TMC 18.47.020 required landscaping must comply with intersection sight obstruction requirements (Chapter 4 of the Tumwater Land Development Guide Manual).

2.C.3.3. Landscaping- Plan design, design review, and installation

A landscape plan must be submitted to the Director that complies with TMC 18.47, and the standards contained in **Section 2.C.3** of these standards. Where conflicts occur, these standards control.

2.C.3.4. Maintenance

a. All landscaping shall be maintained for the life of the project, including water conservation practices for turf grass such as annual aeration and dethatching, top dressing and over seeding;

b. All landscape materials shall be properly pruned trimmed as necessary to maintain a healthy growing condition or to prevent primary limb failure;

c. With the exception of dead, diseased or damaged trees specifically retained to provide wildlife habitat, other dead, diseased, damaged, topped, or stolen plantings shall be replaced within three months or during the next planting season if the loss does not occur in a planting season; and

d. Landscape areas shall be kept free of trash, mulched, and weeded.

2.C.3.5. Landscape character

a. Tumwater's signature landscape setting is characterized by large, mature conifer and oak trees surrounded by relatively flat expanses of grass or low vegetation, such as at the civic campus around City Hall and the Fred Meyer and Costco vicinity on Littlerock Road. The community has indicated that this landscape is very important to the city's visual quality and design identity so that maintaining existing mature evergreen trees and including existing and new evergreens in site development is an important objective. The Director may require that development proposals be modified to conserve healthy evergreen trees. When appropriate, the Director may also relax other standards such as setbacks and geometric requirements in order to promote the retention of mature trees.

   The applicant shall meet setback and root protection requirements as deemed necessary by the Director to maintain the tree's health.

Figure 2.C.3.5-1. Informal clusters of mature conifer trees area signature element of Tumwater's

landscape and are well-suited to the area's glacial soils.

b. Where possible, minimize the disturbance of native vegetation and soils. Native soil retention may be incorporated into low impact development (LID) measures for stormwater management.

c. Unless there is a compelling reason to the contrary, concentrate ornamental vegetation near pedestrian areas and building entries where it can be most appreciated.

d. As a general observation, Tumwater's landscape design character emphasizes naturalistic, informal layouts that are similar to early 20th century parks designed by the Olmsted Brothers.

e. Other design features associated with landscaped open space should emphasize pedestrian scale and qualities generally consistent with the features noted in **Section 2.C.2.1 Pedestrian-Oriented Open Space**.

2.D. Parking Area Design

2.D.1. Parking Area Design

INTENT:

- To provide safe and convenient pedestrian paths from the street sidewalk through parking areas to building entries in order to encourage pleasant walking experiences between businesses.
- To provide an inviting, pleasant pedestrian circulation system that integrates with parking and serves as access to nearby businesses.

STANDARDS/GUIDELINES:

Parking areas must comply with TMC 18.50 and the landscaping standards for parking areas in TMC 18.47. In addition to these requirements, parking areas must comply with the following standards.

2.D.1.1. Parking along street fronts

The following guidelines apply to parking lots adjacent to all other streets not designated as Pedestrian- Oriented Streets or Signature Roads:

a. Minimization of large parking lots between the building front is encouraged.

b. On-site parking may be supplemented with on street parking along the development frontage, where consistent with other City policies and regulations and authorized by the Transportation & Engineering Director.

2.D.1.2. Pathways through Parking Areas

Developments must provide specially marked or paved walkways through parking areas. Generally, walkways must be provided at least every four rows or at least every 180 feet. Where possible, align the pathways to connect with major building entries or other sidewalks, pathways, and destinations. The walkway must be at least wide enough for two shopping carts to pass one another. Generally this requires an unobstructed clear width excluding vehicle overhang of at least 4 feet for grocery stores but may be larger for big-box or building product stores. This will depend on the size of the shopping cart.

Figure 2.D.1.1-1. Parking area pathway examples. Note that clear pathway width must account for vehicle overhang.

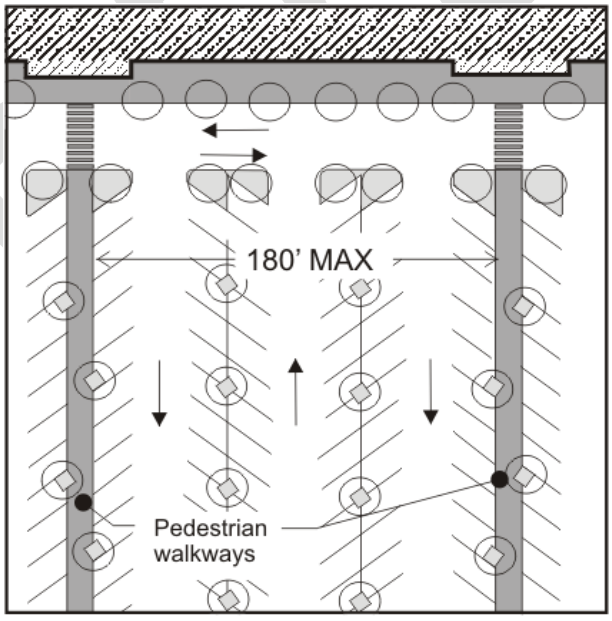

Figure 2.D.1.1-2. Example parking area pathway configuration.

2.D.2. Parking Area Landscaping

INTENT:

- To reduce the visual presence of parking on the City's streets, public space, and adjacent development.
- To increase tree canopy cover for environmental and aesthetic benefits.
- To improve water quality and improve stormwater management.

STANDARDS/GUIDELINES:

2.D.2.1. Interior Parking Area Landscaping

Parking area landscaping shall be provided within surface parking areas with 20 or more parking stalls for the purpose of providing shade, diminishing the visual impacts of large, paved areas, and providing stormwater management. Permeable asphalt, concrete and pavers, and island and planter strips designed to work as rain gardens for stormwater management, with sloped grading and curb cuts are encouraged. Surface parking areas shall be as follows:

a. Developments with common parking areas with more than 20 stalls shall provide planting areas at the rate of 20 square feet per parking stall.

b. Trees shall be provided and distributed throughout the parking area at a rate of one tree for every 10 parking stalls. Existing trees may be counted to satisfy this requirement. Mature conifer trees over 24 inches in caliper may count as 2 trees.

c. The maximum distance between any parking stall and landscaping shall be no more than 100 feet.

d. Permanent curbs or structural barriers shall be provided to protect the plantings from vehicle overhang and curb cuts shall be provided in these barriers to allow surface water to flow into landscaped areas.

e. Parking area landscaping shall consist of:

   (1) Canopy-type deciduous trees, coniferous trees, broadleaf evergreen trees, evergreen shrubs, perennials, and groundcovers planted in islands or strips.

   (2) Shrubs planted at a rate of one per 20 square feet of landscaped area and maintained at a height of no more than 42 inches.

   (3) Plantings contained in planting islands or strips having an area of at least 100 square feet and with a narrow dimension of no less than five feet.

   (4) Groundcover pursuant to **Section 2.C.3.2**.

f. Landscaping shall be maintained at heights for safe visibility between vehicles and pedestrians.

2.D.2.2. Parking Area Screening

Parking area screening shall be provided between the sidewalk and parking areas, with either a or

bas follows:

a. Any of the alternatives identified in TMC 18.47.D, or those listed in "b" below.

b. Provide a planting bed, at least 5 feet wide, that incorporates a low wall (approximately 3 feet tall) and/or trellis. The planting bed shall be in front of the wall, provide irrigation and feature the following plantings:

   (1) A mix of deciduous and evergreen trees generally interspersed throughout the landscape strip and spaced to create a continuous canopy. Alternatively, a trellis and shrubs, as in **Figure 2.D.2.2-1**, may be substituted for the trees.

   (2) Unless the trellis option is chosen, trees are provided at the rate of one per 25 linear feet of landscape strip and spaced no more than 30 feet apart on center.

   (3) Shrubs provided at the rate of one per 20 square feet of landscape strip and spaced no more than 8 feet apart on center.

   (4) Perennials per **Section 2.C.3.2**.

   (5) Groundcover per **Section 2.C.3.2**.

   The wall shall be constructed of brick, stone, decorative concrete or concrete block, or other permanent material that provides visual interest and helps to define the street edge as determined by the Director. (See **Figure 2.D.2.2-1** for an example). The wall and bed must be relatively continuous but may feature breaks at key points for pedestrian access.

Figure 2.D.2.2-1. Parking area planting buffer with low wall and trellis.

2.D.2.3. Standards for Auto Dealerships and Other Large Product Sales and Permanent Outdoor Display

The intent of guidelines for auto dealerships and other large product sales such as boats and mobile homes is to:

- Allow businesses to display products to travelers along the roadway.
- Allow businesses to maintain a corporate or product brand identity (e.g.: car manufacturer).
- Ensure that streets are attractive for pedestrians and motorists.
- Provide easy access to and from the site while maintaining pedestrian, bicycle, and vehicle safety.

This shall be accomplished through the following guidelines:

a. Outdoor display areas fronting a street must feature an edge separation between the display area and the public right-of-way that includes one or more of the following treatments:

   (1) A raised display area with a wall of rockery that provides a visual separation and visibility to the product from the street.

   (2) A low masonry wall or rockery at least 18" high. Walls must be of concrete with an architectural finish or masonry such as brick or stone work or architecturally treated concrete masonry units.

   (3) A continuous hedge or landscaped berm at least 18" high.

   (4) A railing or metal fence (not chain link) approved by the Director.

   (5) Other measures to provide a distinct visual and physical separation between the sidewalk and the display area.

Figure 2.D.2.3-1. The appearance of auto display areas is largely determined by the edge condition at the sidewalk.

DRAFT

Figure 2.D.2.3-2. Auto display areas can be enhanced by a slight grade change.

Figure 2.D.2.3-3. An attractive auto display area with a low wall and slight grade change. Note the architectural treatment of the masonry wall.

b. No untreated blank walls or unscreened service areas shall be located along any public street frontage.

c. The area fronting an arterial must feature one or a combination of the following:

- Pedestrian-Oriented Open Space or landscaping.
- The business's show room or office.
- Product display area.

d. Buildings located within 15 feet of the principal street right-of-way must feature transparency (window or glass area) on at least 50 percent of the ground floor façade facing any public street between 2 feet and 8 feet above the grade. Businesses are encouraged to locate show rooms close to the right-of-way and to incorporate identity (e.g.: an auto make or brand) or distinctive elements into the showroom architecture.

DRAFT

Figure 2.D.2.3-4. Auto showrooms may feature distinctive architecture that exemplifies the quality of their products.

e. Provide sidewalks, street trees, and planting strips as required by the TMC. The Director may approve street tree species that allow visibility into the site (e.g., columnar trees or trees that can be trimmed up).

f. Building entries must have a direct pedestrian pathway to the public sidewalk.

g. Outdoor display areas are not considered parking areas.

2.E. Building Design

2.E.1. Building Design - Character

GENERAL NOTES:

- Many of these building design guidelines call for a building to feature one or more elements from a menu of items. In these cases, a single element, feature, or detail may satisfy multiple objectives. For example, a specially designed or fabricated covered entry with attractive detailing might be counted toward requirements for human scale, building corners, and building details.
- The terms "decorative" and "ornamental" are not necessarily meant to mean "characterized by traditional patterns, nonstructural elements, or applied markings." Elements may be considered "decorative," "ornamental," or "special" if they extend beyond the typical level of quality, use materials or forms in an unusual way, or show special architectural consideration. The Director shall determine what elements are "ornamental," "decorative," or "special."

INTENT:

- To provide building design that has a high level of design quality and creates comfortable human environments.

- To incorporate design treatments which add interest and reduce the scale of large buildings.
- To encourage building design that is within the historic character of Tumwater but responsive to site conditions.
- To encourage functional, durable, and environmentally responsible buildings.
- To enhance Tumwater's design identity.

GUIDELINES:

2.E.1.1. Architectural Character

Tumwater's architectural character and design identity predominantly reflects the middle-class heritage with the residential vernacular corresponding to major periods of growth in the 1930s, 1950s, 1970s, and 2000s.

Although it is a historic community with a long history in Washington, there are a small number of 19th century houses and structures and no defined historic downtown. The existing architectural character is framed by the historically influenced styled non-residential buildings including the brewery, civic campus, and new government office buildings. These buildings all feature traditional materials, generally brick and stucco, and traditional forms such as gable roofs, multiple windows (rather than large expanses of glass), arches, towers, and enhanced entries.

There are also some prominent Art Deco era structures in Tumwater, notably the Capitol Boulevard Bridge and the original WSDOT buildings that could serve as a stylistic reference. Historically, Highway 99 through the City had a unique architectural style that flourished from the 1930s to 1970s. Only a few examples remain, including the former Jakes Auto Sales and the South Pacific Restaurant.

On the other hand, as a growing community, Tumwater will need to encourage new building types and technologies as the city evolves over time. And the other important design characteristic noted by public participants in the preparation of these design guidelines is the signature landscape palette consisting of large conifer trees surrounded by low lying and native vegetation or ornamental landscaping near pedestrian-oriented areas and building entries. There was also the desire to see indigenous materials, such as basalt stone and timber, integrated into designs. These observations are the basis for the following guidelines.

a. The architectural design of new development must reflect and add to Tumwater's design character in one or more of the three ways described below.

   (1) Incorporate distinctive and substantial landscaping to enhance the building's setting. In this approach, the landscaping or site features must be the predominant visual element and the building forms and character be relatively subdued. Retention of a substantial number of large trees, especially native trees such as conifers, is one means to accomplish the objectives of this approach. Another might be to install landscape features that are more than required by **Section 2.C.2** and include Pedestrian-Oriented Open Space to the

extent that those elements and human activity become the dominant visual features.

Extensive landscaping and subdued forms will likely be the most appropriate approach for industrial buildings.

Figure 2.E.1.1-1. A successful application of approach 1: substantial landscaping.

(2) Reflect the traditional style of architecture by featuring gabled roofs, traditionally scaled and vertically oriented windows, use of brick (at least on the ground floor) covered entries with porches or other weather protection, break-up of large building facades, and rectilinear or circular forms. This approach is typified by brewery, civic campus, and new government office buildings. Buildings that reflect Art Deco styling with flat surfaces, linear detailing and building elements, and geometric forms may also be appropriate. Similarly, on the Capitol Blvd. Corridor, designs that build on the historic Highway 99 architecture may be appropriate for certain uses which can build on that history.

Figure 2.E.1.1-2. The WSDOT building on Capitol Boulevard and Tumwater Bridge Totems exemplify Art Deco architecture from the early to mid-20th century.

Figure 2.E.1.1-3. An application of approach 2: Traditional forms and materials. Note that this example does not meet Guideline 2.C.1.2 Pedestrian Circulation where facades face parking lots.

(3) Feature contemporary forms and architectural treatments that respond to the uniqueness of the site and building use. If this approach is used, the building materials must be of demonstrably high quality, the design exhibit a high level of application of the guidelines in **Section 2.E**, and indigenous materials used as primary materials or accents. Standardized buildings such as gas stations, commercial stores, chain restaurants, and other buildings that are not specifically designed for the site do not qualify for this approach.

Figure 2.E.1.1-4. A successful application of approach 3: Contemporary forms and treatments. This example relates to its surroundings by using materials and colors compatible with adjacent buildings, breaking down the building's massing consistent with surrounding single story buildings, including a pedestrian street front to respond to its "main street" location, and fronting on wide, comfortable sidewalks.

b. At least one of the three approaches described above must be achieved. The Director will determine whether or not the proposal meets the objectives.

2.E.1.2. Corporate identity building elements

Corporate signature elements, such as decorated roofs and exterior colors and treatments, which do not meet these guidelines, are not acceptable. The Director may require revisions to the building design if they determines that the corporate element is inconsistent with the intent of these guidelines or detracts from Tumwater's general character.

Yard ornaments or sculptures that are part of a business identity, logo, mascot, or brand are not acceptable except as allowed under Chapter 18.44 Signs. The Director will determine if such an ornament or sculpture is considered a sign.

The ornaments or sculptures must provide a high degree of craftsmanship and resistant to deterioration or weathering. No more than 1 yard ornament or sculpture (site feature) is allowed per 50' of street frontage, unless approved by the Director on the basis of following criteria:

a. The site features also serve as furniture or pedestrian amenity.

b. The site features are unique to the site (not a standardized or manufactured element available for purchase.)

c. The design of the features is integrated into the site, either through consistent landscaping around the elements or through a character or materials that reflect the primary structure.

*Figure 2.E.1.2-1 This development does not meet the requirements of **Guideline 2.E.1**.2 because the building color and yard ornaments are part of a business "brand."*

2.E.2. Human Scale Elements

INTENT:

- To encourage the use of building components that relate to the size of the human body.
- To add visual interest to buildings.

STANDARDS/GUIDELINES:

2.E.2.1. Human Scale Elements

"Human scale" addresses the relationship between a building and the human body. Generally, buildings attain a good human scale when they feature elements or characteristics that are sized to fit human activities, such as doors, porches, and balconies.

a. Incorporate a minimum of four human scale building elements into new buildings and structures.

Human scale measures include:

(1) Balconies or decks in upper stories, at least one balcony or deck per upper floor on the façades facing streets, provided they are integrated into the architecture of the building.

(2) Bay windows or other window treatments that extend out from the building face;

(3) At least 100 square feet of Pedestrian-Oriented Open Space, as described in **Section 2.C.2**, for each 100 lineal feet of building façade;

(4) First floor individual windows, generally less than 32 square feet per pane and separated from the windows by at least a 6" molding;

(5) A porch or covered entry;

(6) Spatially defining building elements, such as a trellis, overhang, canopy, or other element, which defines space that can be occupied by people;

(7) Upper story setbacks, provided one or more of the upper stories are set back from the face of the building at least 6 feet;

(8) Placement of smaller building elements near the entry on pedestrian-oriented street fronts of large buildings (**Figure 2.E.2.1-2** illustrates how human scale can be achieved using elements such as multiple canopies, an extended cafe area, and upper deck);

(9) Landscaping components that meet these guidelines;

(10) Public art that incorporates elements of a normal human scale (e.g.: life size sculpture);

(11) Pedestrian scale lighting with mounting heights less than 15'; and

(12) Other elements that the Director determines meet the intent of these guidelines.

DRAFT

Figure 2.E.2.1-1. Examples of balconies that have been integrated into the architecture of the building.

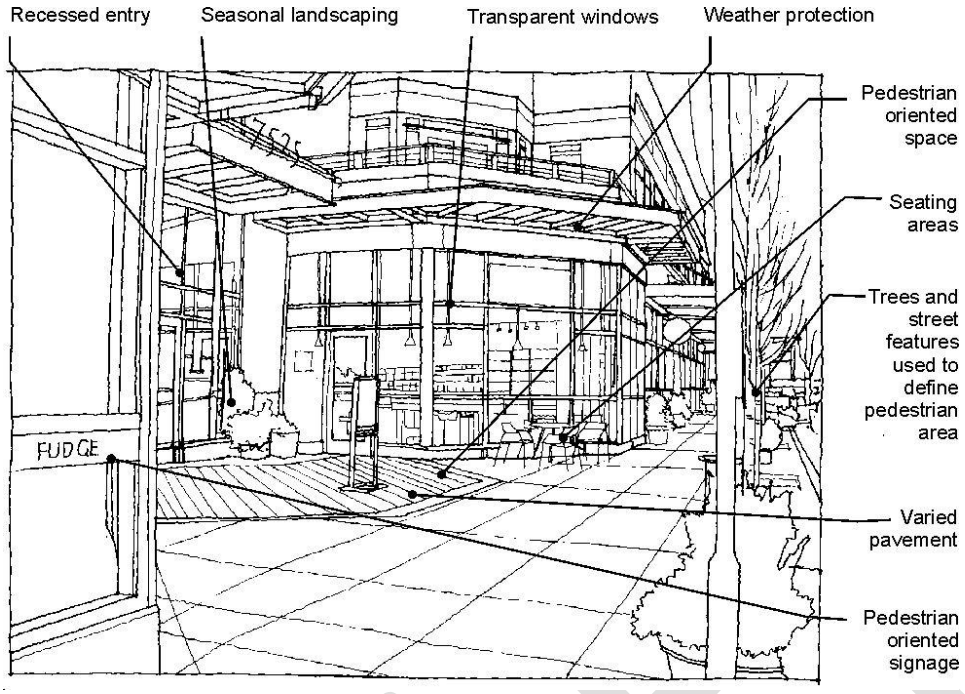

Figure 2.E.2.1-2. Illustrating a variety of human scale components on a building.

Figure 2.E.2.1-3. This mixed-use building incorporates decks, upper level setbacks, trellises, and landscaping to meet human scale guidelines.

2.E.3. Architectural Scale

INTENT:

- To encourage architectural scale of development that is compatible with nearby areas.
- To add visual interest to buildings.

NOTE:

- **Architectural scale** is the perceived height and bulk of a building relative to that of neighboring buildings. A building has "good architectural scale" if its visual size is relatively similar to its neighbors.
- **Modulation** is a stepping back or projecting forward of portions of a building face, within specified intervals of building width and depth, as a means of breaking up the apparent bulk of a structure's continuous exterior walls.
- **Articulation** is visually breaking up a building façade into intervals by including repetitive features, such as broken rooflines, chimneys, entrances, distinctive window patterns, street trees, and modulation.

STANDARDS/GUIDELINES:

2.E.3.1. Scale of Large Buildings

All new buildings over three stories or over 5,000 square feet in gross building footprint or with facades longer than 100 feet measured horizontally along the street front shall provide at least three modulation and/or articulation features as described below along any façade that is visible from a street, residential zone, or pedestrian pathway. The "articulation interval" at which the repetitive element repeats should not be greater than 60 feet.

a. Horizontal building modulation. The depth of the modulation must be at least 2 feet when tied to a change in the roofline and at least S feet in other situations. Balconies may be used to qualify for this option, provided they have a floor area of at least 40 square feet, are integrated with the architecture of the building, and project at least 2 feet from the building façade.

Figure 2.E.3.1-1. Mixed-use building with modulation to increase its interest and human scale.

b. Vertical building modulation. Minimum depth and width of modulation is 18 inches and 4 feet (respectively) if tied to a change in color or building material and/or roofline modulation as defined below. Otherwise, minimum depth of modulation is 10 feet and minimum width for each modulation is 15 feet. Balconies may not be used to meet this modulation option unless they are recessed or projected from the façade and integrated with the building's architecture as determined by the Director. For example, "cave" balconies or balconies that appear to be "tacked on" to the façade will not quality for this option.

c. Modulated roof line. Buildings may qualify for this option by modulating the roof line of all façade visible from a street, park, or pedestrian pathway consistent with the following standards:

    (1) For flat roofs or façade with a horizontal fascia or parapet, change the roofline so that no un-modulated segment of roof exceeds 60 feet. Minimum vertical dimension of roof line modulation is the greater of 2 feet or 0.1 multiplied by the wall height (finish grade to top of wall);

    (2) For gable, hipped, or shed roofs, a slope of at least 3 feet vertical to 12 feet horizontal; or

    (3) Other roof forms such as arched, vaulted, dormer, or saw-toothed may satisfy this design standard if the individual segments of the roof with no change in slope or discontinuity are less than 60 feet in width (measured horizontally).

d. Repeating distinctive window patterns at intervals less than the articulation interval.

e. Providing a porch, patio, deck, or covered entry for each articulation interval.

f. Changing the roofline by alternating dormers, stepped roofs, gables, or changing roof textures on certain features such as metal roofs on towers and dormers to reinforce the modulation or articulation interval.

g. Changing materials with a change in building plane.

h. Providing lighting fixtures, trellises, trees, or other landscape feature within each interval.

DRAFT

Figure 2.E.3.1-2. Example of a well-articulated building. Note how the awnings, window divisions, pilasters columns and cornice line all serve to divide up the façade into smaller segments without disrupting the unity of the overall design.

The Director may increase or decrease the 60-foot interval for modulation and articulation to better match surrounding structures or to implement an adopted subarea plan.

Figure 2.E.3.1-3. This development uses a variety of roof forms and heights and variations in roof textures by using metal hip roofs, different weather protection features, changing building materials and colors, and a modest amount of horizontal building modulation to reduce the overall architectural scale into smaller "storefront" components.

Figure 2.E.3.1-4. Industrial buildings can achieve an appropriate architectural scale through façade modulation and articulation, emphasis on the entrance, window patterns, and landscaping.

2.E.4. Pedestrian-Oriented Facades and Weather Protection

INTENT:

- To create a safe, attractive, welcoming pedestrian environment.
- To enhance retail activity.

STANDARDS/GUIDELINES:

2.E.4.1. Pedestrian-Oriented Facades

Where Pedestrian-Oriented Facades are required (see **Guideline 2.B.1.2.a.(l)i)**, the building shall meet the following:

a. Transparent window areas or window displays or a combination of sculptural, mosaic, or bas-relief artwork and transparent window areas or window displays over at least 75 percent of the ground floor façade between 2 feet and 8 feet above grade. Transparent windows counting toward this requirement must remain transparent for the life of the building. The windows may look into the building's interior or be configured as merchandise display windows. The building must be designed so that the windows satisfying the requirement for Pedestrian-Oriented Facades do not look into service or storage areas or other unsightly rooms.

   Exception: Temporary window painting is allowed.

DRAFT

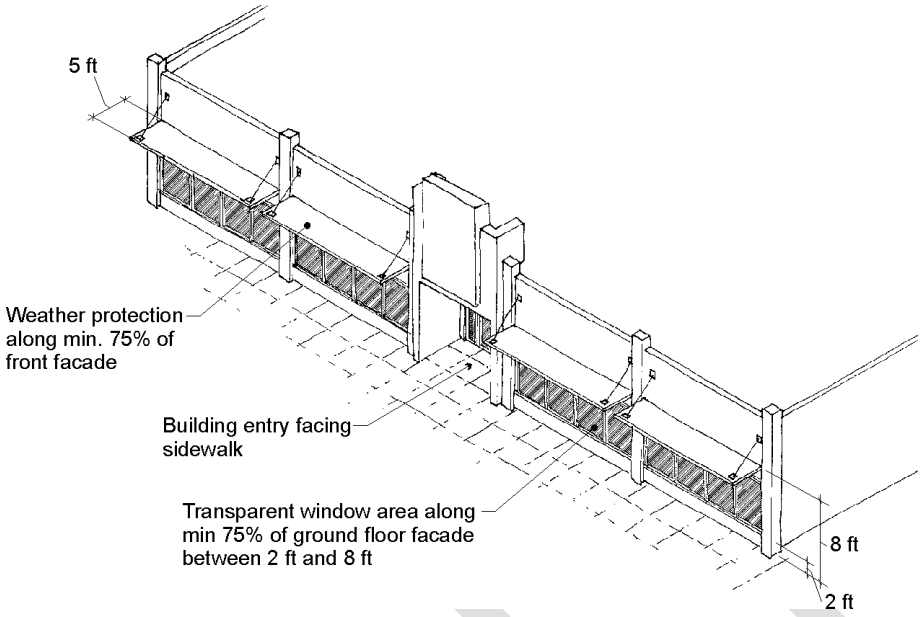

Figure 2.E.4.1-1. An example of a pedestrian-oriented façade.

b. A primary building entry facing the street front. (See **Section 2.E.9** for entry enhancement requirements.)

c. Weather protection is at least 5 feet wide over at least 75 percent of the front facade.

2.E.4.2. Pedestrian Weather Protection

Provide pedestrian weather protection in public spaces such as transit stops, building entries, and along display windows, specifically:

a. Weather protection at least 5 feet deep is required over the entries of each primary building, individual business, and individual residence. This may include a recessed entry, canopy, porch, marquee, or building overhang.

DRAFT

Figure 2.E.4.2-1. Provide weather protection over building entries.

b. Canopies, awnings, or other similar weather protection features shall not be higher than 15 feet above the ground elevation at the highest point or lower than 8 feet at the lowest point.

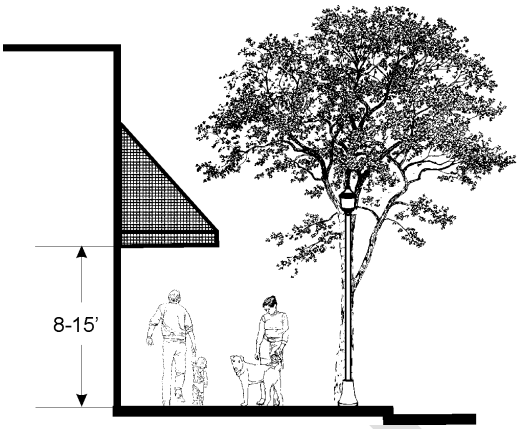

Figure 2.E.4.2-2. Height standards for weather protection features.

c. The color, material, and configuration of the pedestrian coverings shall be as approved by the Director. To encourage design elements that convey the historical theme of Tumwater, pitched or mansard metal roofs, decorative brick facades, and ornamental towers with pitched roofs and decorative cornices are examples of design elements that reflect the history of Tumwater. Several of these elements are incorporated into the designs of State office buildings along the southern end of Capitol Boulevard. Coverings with visible corrugated metal or corrugated fiberglass are not permitted unless approved by the Director. Fabric and rigid metal awnings are acceptable if they meet the applicable standards. All lettering, color and graphics on pedestrian coverings must conform to the TMC 18.44 and these guidelines.

d. Multi-tenant retail buildings are encouraged to use a variety of weather protection features to emphasize individual storefronts and reduce the architectural scale of the building. **Figure 2.E.4.2-3** provides unacceptable and better examples.

DRAFT

Figure 2.E.4.2-3. The continuous canopy on top is monotonous and deemphasizes individual storefronts. The bottom example provides a variety of weather protection features and represents a more desirable example.

2.E.5. Building Corners

INTENT:

- To create visual interest and increased activity at public street corners especially where they include Pedestrian-Oriented Streets or Signature Roads.

STANDARDS/GUIDELINES:

2.E.5.1. Building Corners

Architecturally accentuate building corners at street intersections. All new buildings located at intersections with Pedestrian-Oriented Streets or Signature Roads shall employ three or more of the following design elements or treatments to the building corner facing the intersection:

a. A corner entrance to courtyard, building lobby, atrium, or pedestrian pathway.

b. A significant corner bay window or turret.

c. Roof deck or balconies on upper stories.

d. Building core setback "notch" or curved façade surfaces.

e. Sculpture or artwork, either bas-relief, figurative, or distinctive use of materials as part of the building.

f. Change of materials.

g. Corner windows.

h. Special lighting.

i. Significant feature such as a clock or flag pole.

j. Special treatment of the pedestrian weather protection canopy at the corner of the building.

k. Other similar treatment or element approved by the Director.

Figure 2.E.5.1-1. To emphasize its street corner location, this building uses a cropped corner, change in building materials, decorative façade elements, and a modulated roofline.

2.E.6. Building Design Details

INTENT:

- To ensure that buildings have design interest at all observable distances, especially individual elements (e.g., texture of materials, quality of finishes, small building elements, and artwork) viewed from closer than 60 feet.
- To enhance the character and identity of new development.
- To enhance the pedestrian environment.
- To encourage creativity in the design of storefronts.

STANDARDS/GUIDELINES:

2.E.6.1. Design Details

All new buildings and individual storefronts shall include on the façades at least three of the following design features:

a. Distinctive rooflines, such as an ornamental molding, entablature, frieze, or other roofline device visible from the ground level. If the roofline decoration is in the form of a linear molding or board, then the molding or board must be at least 8" wide.

b. Special treatment of windows and doors, other than standard metal molding/framing details, around all ground floor windows and doors, decorative glazing, or door designs.

c. Decorative light fixtures with a diffuse, visible light source or unusual fixture that meet the outdoor lighting standards in TMC 18.40.035 Exterior illumination.

d. Decorative building materials, such as decorative masonry, shingle, brick, or stone.

e. Individualized patterns or continuous wood details, such as fancy butt shingles (a shingle with the butt end machined in some pattern, typically to form geometric designs), decorative moldings, brackets, trim or lattice work, ceramic tile, stone, glass block, carrera glass, or similar materials.

   The applicant must submit architectural drawings and material samples for approval.

f. Use of a landscaping treatment as part of the building's design, such as planters or wall trellises.

Figure 2.E.6.1-1. The use of different building materials, window treatments, and roofline overhang, trellis, lights, and exposed structural members adds to the visual interest of this building. The outdoor space and plantings also increase the project's visual interest and add human scale.

g. Decorative or special railings, grill work, or landscape guards.

h. Landscaped trellises, canopies, or weather protection.

i. Decorative artwork, which may be freestanding or attached to the building and may be in the form of mosaic mural, bas-relief sculpture, light sculpture, water sculpture, fountain, free standing sculpture, art in pavement, or other similar artwork. Painted murals or graphics on signs or awnings do not qualify.

j. Sculptural or hand-crafted signs such as those with solid raised letters.

k. Special building elements, such as pilasters, entablatures, wainscots, canopies, or marquees that exhibit nonstandard designs.

l. Other similar features or treatment that satisfies the Intent of the Guidelines as approved by the Director.

Figure 2.E.6.1-2. The multifamily building provides a number of details that enhance the pedestrian environment, including decorative railing, different siding treatments, window trim, balconies, eave detailing, lights, and opportunities for individual landscaping.

2.E.6.2. Multifamily Residential Window Details

The facades of multifamily residential buildings and residential portions of mixed use buildings facing the street shall employ techniques to recess or project individual windows above the ground floor at least two inches from the façade or incorporate window trim at least four inches in width that features color that contrasts with the base building color. Exceptions will be considered by the Director where buildings employ other distinctive window or façade treatment that adds visual interest to the building.

Figure 2.E.6.2-1. Acceptable (left and center examples) and unacceptable (right example) window treatments.

2.E.7. Materials

INTENT:

- To encourage the use of a variety of high-quality compatible materials that will upgrade Tumwater's visual image.

STANDARDS/GUIDELINES:

2.E.7.1. Materials

The following are allowed only with special detailing, as described below:

a. Metal siding. When used as a siding material over more than 25 percent of a building's façade visible from a public street, pathway, or park, metal siding must:

(1) Have a matte finish in a neutral or earth tone such as buff, gray, beige, tan, cream, white, or a dulled color, such as barn-red, blue-gray, burgundy, ocher, or other color specifically approved by the Director.

(2) Include two or more of the following elements:

i. Visible window and door trim painted or finished in a complementary color.

ii. Color and edge trim that cover exposed edges of the sheet metal panels.

iii. A base of masonry, stone, or other approved permanent material extending up to at least 2 feet above grade that is durable and satisfies the Intent of the Guidelines. (The intent is to provide more durable materials near grade level.)

iv. Other detail/color combinations for metal siding approved by the Director, provided design quality and permanence meet the intent of this section.

b. Concrete block walls. Concrete block construction used over 25 percent of a building façade visible from a public roadway, pathway, or park must be architecturally treated in one or more of the following ways:

(1) Use of textured blocks with surfaces such as split face or grooved.

(2) Use of other masonry types, such as brick, glass block, or tile in conjunction with concrete blocks.

(3) Use of decorative coursing to break up blank wall areas.

(4) Use of matching colored mortar where color is an element of architectural treatment for any of the options above.

(5) Other treatment approved by the Director.

c. Requirements for stucco, stucco-like, and similar troweled finishes:

(1) To avoid deterioration, the finish material must be trimmed and/or sheltered

from extreme weather by roof overhangs or other methods.

(2) The finish material may only be used in conjunction with other approved building materials.

d. Any material that is subject to damage and deterioration from human contact or landscape elements is prohibited within 2 vertical feet of the sidewalk or ground level or in areas that are especially subject to vandalism such as areas with low visibility. In these areas, a more durable finish material such as brick, concrete, or concrete block should be used.

Figure 2.E.7.1-1. This storefront effectively combines stucco-like material and concrete block with wood trim and metal detailing.

e. Use of flat sheet materials such as fiber cement panels (e.g., HardiePanel) is not allowed on ground floor facades facing Pedestrian-Oriented Streets. This is because the panels do not provide human scale surfaces or textures or refined details.

Figure 2.E.7.1-2. Fiber cement panels and similar materials are allowed when providing human scale details like this vertical siding.

f. Prohibited materials:

(1) Mirrored glass.

(2) Corrugated fiberglass.

(3) Chain link fencing within SO feet of a building's public entrance (except for temporary purposes such as a construction site).

(4) Crushed colored rock or tumbled glass.

(5) Any sheet materials, such as wood or metal siding, with exposed edges or unfinished edges, or made of nondurable materials.

(6) Any spray-on materials (e.g.: shot-crete) not specifically approved by the Director.

(7) Non-durable materials subject to deterioration if exposed to weather such as most plastic and synthetic materials or materials that are particularly vulnerable to vandalism. Project applicants wishing to use synthetic materials must submit samples and product description information to the Director for approval. The Director will not accept such materials unless its durability and appropriateness is demonstrated.

2.E.8. Blank Walls

INTENT:

- To reduce the visual impact of large, undifferentiated walls.
- To reduce the apparent size of large walls through the use of various architectural and landscaping treatments.
- To enhance the character and identity of Tumwater's commercial areas.
- To ensure that all visible sides of buildings provide visual interest.

STANDARDS/GUIDELINES:

2.E.8.1. Blank Walls

All blank walls (see Definitions in **Section 2.G**) except backs of buildings/service areas and places not easily visible from pedestrian places shall be treated in one or more of the following measures:

a. Install a vertical trellis in front of the wall with climbing vines or plant materials. For large blank wall areas, the trellis must be used in conjunction with other treatments described below;

b. Provide a landscaped planting bed or a raised planter bed in front of the wall of sufficient size to support. Plant materials that will obscure or screen at least SO percent of the wall's surface within 4 years;

c. Provide artwork (mosaic, mural, sculpture, relief, etc.) over at least SO percent of the

blank wall surface;

d. Other method as approved by the Director. For example, landscaping or other treatments may not be necessary on a wall that employs high quality building materials (such as brick) and provides desirable visual interest.

e. Special architectural lighting, subject to **Section 2.F.1** and Tumwater Municipal Code, may be used to highlight a successful treatment if such lighting complies with **Section 2.F** below.

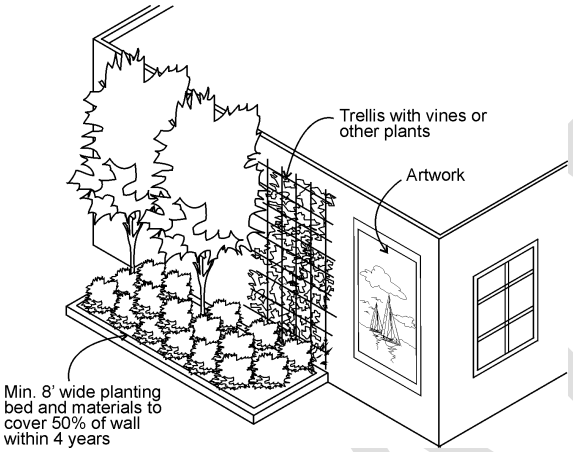

Figure 2.E.8.1-1. Blank wall treatments.

Figure 2.E.8.1-2. Terraced planting beds, artwork and landscaping can effectively treat a blank wall.

2.E.9. Building Entrances

INTENT:

- To ensure that buildings and businesses are inviting and accessible.
- To encourage pedestrian activity.
- To highlight and accentuate the entrance.

STANDARDS/GUIDELINES:

2.E.9.1. Principal Building Entrances

The principal building entrances (i.e., the building entrance used by commercial customers, residents, or visitors) of all buildings shall feature all of the following improvements:

a. Pedestrian covering. Building entrances must be covered by at least 50 square feet of pedestrian weather protection. Entries may satisfy this requirement by being set back into the building façade.

b. Lighting. Lighting shall conform to **Section 2.F.1**.

c. Building or business name. Entries must be identified with respect to building and/or business.

d. Visibility. Building entrances must be visible from the roadway and major public pedestrian pathway.

e. Transparency. Entries must feature glass doors, windows, or glazing (window area) near the door so that the visitor and occupant can view people opening the door from the other side (not required for entries leading directly to a single residential unit within a multifamily building).

f. Security. To the extent feasible, entries must be visible from areas with high pedestrian activity or where residents can view the entry (passive surveillance).

g. Address number.

h. Architectural or artwork enhancements. Building entrances must be enhanced by one or more of the following measures. Entrances on Pedestrian-Oriented Streets must feature two of the following measures.

    (1) Special or ornamental doors, windows, or other architectural elements.

    (2) Special paving or materials (e.g., decorative tile work).

    (3) Special architectural lighting subject to **Section 2.F.1** and Tumwater Municipal Code.

    (4) Landscaping.

    (5) Artwork.

    (6) Adjacent Pedestrian-Oriented Open Space.

    (7) Other enhancements approved by the Director.

DRAFT

Figure 2.E.9.1-1. Entrances enhanced by details and materials, complex architectural elements, site features, and lettering.

2.E.9.2. Secondary Public Access for Commercial Buildings

Although these Guidelines require businesses on Pedestrian-Oriented Streets to front on streets rather than parking areas, a large number of customers use the "secondary" entry off of a parking area. Such businesses that have secondary public access shall comply with the following measures to enhance secondary public access (applies only to entries used by the public):

a. Weather protection at least 3 feet deep is required over each secondary entry.

b. A sign may be applied to the awning provided that the sign complies with other regulations and guidelines.

c. Lighting shall conform to **Section 2.F.1 Site Lighting**.

d. One or more of the design elements noted in **Guideline 2.E.9.1.h** above must be incorporated within or adjacent to the secondary entry.

Figure 2.E.9.2-1. Example of secondary public access. Note the planters, window sign, and awning.

2.E.10. Parking Garage Design

INTENT:

- To minimize negative visual impacts of parking garages.

STANDARDS/GUIDELINES:

2.E.10.1. Parking Garage Design

a. Parking garages must be designed to obscure the view of parked cars at the ground level.

b. Where the garage wall is built within 10 feet of the sidewalk edge, the façade shall incorporate a combination of artwork, grillwork, special building material or treatment/design, and/or other treatments as approved by the City that enhance the pedestrian environment. Small setbacks with terraced landscaping elements can be particularly effective in softening the appearance of a parking garage.

c. Upper-level parking garages must use articulation treatments that break up the massing of the garage and add visual interest.

d. Alternatively, parking garages screened from public roadways by a building (i.e.: a building located between the garage and the public street)(a) and (b) above do not apply.

See **Figures 2.E.10.1-1** through **2.E.10.1-3** on the following page, for example parking garage treatments.

Figure 2.E.10.1-1. The side of this parking garage includes decorative grillwork, and a raised brick planter to enhance the pedestrian environment.

Figure 2.E.10.1-2. This building uses openings on its second level parking area to resemble windows.

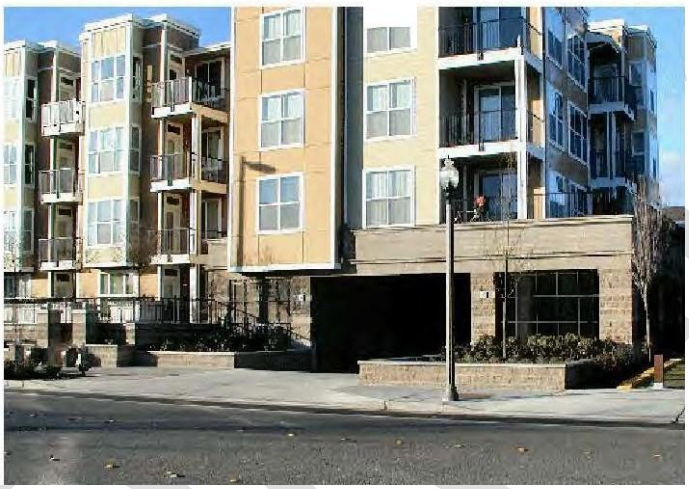

Figure 2.E.10.1-3. Design parking garages to obscure the view of parked cars. Note the landscaping that separates the garage from pedestrians.

2.F. Lighting

2.F.1. Site Lighting

INTENT:

- To encourage the use of lighting as an integral design component to enhance buildings, landscaping, or other site features.
- To increase night sky visibility and to reduce the general illumination of the sky.
- To reduce horizontal light glare and vertical light trespass from a development onto adjacent parcels and natural features.

- To use lighting in conjunction with other security methods to increase site safety.
- To prevent the use of lighting for advertising purposes.

STANDARDS/GUIDELINES:

2.F.1.1. Site Lighting Levels

a. All publicly accessible areas shall be lighted with levels as follows:

   (1) Low or non-pedestrian and vehicular traffic areas - minimum 0.2 foot-candles, maximum 4 foot-candles;

   (2) Moderate or high volume pedestrian areas and building entries - minimum 1 foot- candle, maximum 5 foot-candles, preferred average 2 foot-candles;

   (3) Public parking lots - minimum 1 foot-candle, maximum 4 foot-candles; and

   (4) Gas station pump area - maximum 5 foot-candles.

b. Lighting shall be provided at consistent levels, with an average lighting level to minimum lighting level uniformity ratio no less than 3:1, to create gradual transitions between varying levels of lighting and between lit areas and unlit areas. Highly contrasting pools of light and dark areas shall be avoided.

c. Pedestrian lighting shall have a maximum height of 15 feet.

   Exception: For commercial and industrial uses where outdoor storage of goods and products is the primary method of displaying such goods and products, site lighting levels shall comply with TMC 18.40.035.

2.F.1.2. Light Quality and Shielding

a. Parking area lighting fixtures shall be fully shielded; dark sky rated and mounted no more than 20 feet above the ground, with lower fixtures preferable so as to maintain a human scale.

b. Exterior lighting must comply with TMC 18.40.35: Exterior Illumination

   Exception: For commercial and industrial uses where outdoor storage of goods and products is the primary method of displaying such goods and products, site lighting height shall comply with TMC 18.50.

2.F.1.3. Architectural Lighting

a. Steady, non-flashing lighting of building features, artwork, and special landscape elements may be allowed, subject to the findings of the Director that the light causes no significant adverse impact.

3.D.1. Parking Area Design 26
3.D.2. Parking Area Landscaping 28

3.E. Building Design 30

3.E.1. Building Design - Character 30
3.E.2. Human Scale Elements 33
3.E.3. Architectural Scale 34
3.E.4. Materials 36
3.E.5. Blank walls 38
3.E.6. Building Entrances 39

3.F. Lighting 41

3.F.1. Site Lighting 41

3.A. Applicability

This chapter applies to industrial uses. Also see **Chapter 1 Section A Applicability**.

3.B. Site Planning

3.B.1. Dimensional Standards

Table 3B.1-1 Dimensional guidelines for industrial:

Standard	Requirement
Building Modulation	Buildings over 3 stories or 100 feet of horizontal street front shall include 2 modulation features.
Horizontal Building Modulation	Balconies may qualify with a floor area of at least 40 square feet, are integrated with the architecture of the building, and project at least 2 feet from the building façade.
Sidewalk	ADA Compliant
Landscape Strip	5-foot minimum landscape strip between the sidewalk and the street with street trees provided at least every 30 feet (average) on center
Setbacks (to exterior property lines)	11 and 20 feet from the street edge if appropriate and within 15 ft. of ROW on corners
Parking	Limited to 50% of the street front or 130 feet, whichever is greater on signature roads

3.B.2. Relationship to Street Front

INTENT:

- To create an active, safe pedestrian environment throughout Tumwater even in the city's working settings.
- To design sites and orient buildings to enhance the property's visibility, attractiveness, and interaction with its adjoining streetscape.
- To establish a visual identity for Tumwater's industrial areas.
- To create a hierarchy of streets and block fronts.

SUMMARY AND APPLICABILITY

The maps in **Appendix A: Street Designations** designate streets as Pedestrian-Oriented Streets (blue lines) and Signature Roads (purple lines). This section summarizes the purpose and guidelines for these street designations.

Signature Roads

This designation supports a diversity of development edges that contribute to the visual character of the street, enhance the pedestrian environment, and connect to the lively corners at the Pedestrian-Oriented Streets. Only a few industrial zones are located along Signature Roads: the Airport Related and Light Industrial zones along Tumwater Blvd and the Light Industrial zone along Cleveland Ave near the Brewery District. As important gateway roads for Tumwater and connectors to current and future neighborhood centers, these Signature Road guidelines maintain an active development edge relatively close to the right-of-way while allowing for industrial uses. If light industrial uses are allowed in commercial or mixed used zones, these Signature Roads guidelines also ensure that more flexible standards appropriate to industrial uses apply than the **Chapter 2 Commercial, Mixed use, and Multifamily** Signature Road guidelines.

Special street front guidelines apply to Signature Roads, as stated in the **3.B.2.1** through **3.B.2.5 standards** below. In addition to the basic citywide design guidelines and the 3.B.1 Signature Roads street front standards, Signature Roads must adhere to **3.D.2.2 Parking Area Screening.**

STANDARDS/GUIDELINES:

3.B.2.1. Appearance

a. On Signature Roads, development must adhere to the following:

   (1) The primary building entrance and any associated offices and/or sales areas shall be located on the front elevation.

   (2) Building facades facing the street(s) and located within 15 feet of the ROW must feature:

i. At least 15% transparency on the ground floor façade between 3 and 8 feet above grade (unless determined by the Director to be infeasible or undesirable for the particular industrial use). If indoor activities (e.g., cabinetry, welding) are safe for viewing from the sidewalk, garage doors may count toward this if they are opened regularly.

ii. Weather protection at least 4 feet deep if the façade abuts a sidewalk.

(3) No fences or screening walls taller than 4 feet are allowed within 15 feet of the right-of-way unless required for safety, as demonstrated by appropriate documentation from the applicant. Also see TMC 18.46 fence standards.

(4) Unpainted chain link fences are prohibited.

Figure 3.B.2.1-1. This building would meet the guidelines if it oriented its main entrance to the street.

3.B.2.2. Parking Orientation

a. On Signature Roads, all parking must be located beside, behind, underneath, or above the ground floor use facing the street (i.e., no parking is allowed between the building and the street). Parking is limited to 50% of the street front or 130 feet, whichever is greater. Any parking areas along the street must be screened (see **Section 3.D.2.2**).

b. On all other streets the following guidelines apply:

(1) Minimization of large parking lots between the building front and street is encouraged.

(2) On-site parking may be supplemented with on street parking along the development frontage, where consistent with other City policies and regulations and authorized by the Public Works Director.

3.B.2.3. Corners

a. On Signature Roads, at a street and/or trail intersection, a building must be located within 15 feet of both right-of-ways (unless determined infeasible by the Director).

3.B.2.4. Space between Building and Street Edge

a. On Signature Roads, light industrial buildings are encouraged to locate closer to the street than TMC 18.24.050 typically allows. Buildings may be set back between 11 and 20 feet

from the street edge if appropriate. If it is infeasible for the particular use to locate closer to the street, TMC buffering and landscape requirements apply.

3.B.2.5. Streetscape

a. Development must adhere to the following streetscape standards, especially on Signature Roads:

(1) Landscape strip between sidewalk and street:

i. Minimum 5 feet

ii. Street trees provided at least every 30 feet (average) on center

(2) Sidewalk: ADA Compliant

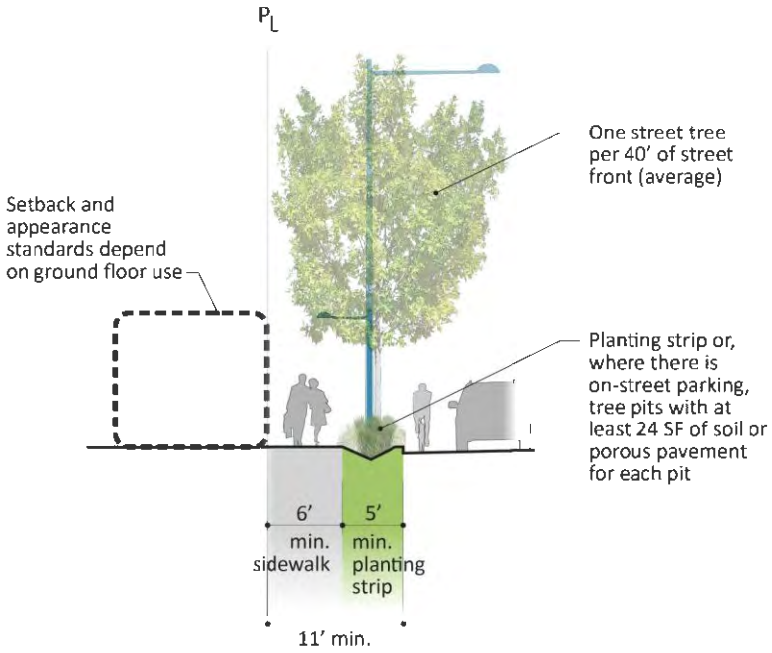

Figure 3.B.2.5-1. Signature Roads streetscape requirements

3.B.3. Pedestrian Circulation – Site Planning

INTENT:

- To improve the pedestrian environment by making it easier, safer, and more comfortable to walk between businesses and residences, on street sidewalks, to transit stops, and through parking areas.
- To provide pedestrian facilities such as sidewalks, crosswalks, and bus shelters connecting to all modes of transportation.
- To provide convenient pedestrian circulation connecting all on-site activities to adjacent pedestrian routes and streets.
- To provide access to transit and services.

STANDARDS/GUIDELINES:

3.B.3.1. Pedestrian Circulation in Industrial Settings

Provide safe, convenient and universally accessible pedestrian circulation for all users. Specifically:

a. Where feasible, provide pedestrian access onto the site from all streets on which the use is located.

b. Buildings must include universally accessible, convenient, clearly identified pedestrian entries.

c. For developments with multiple buildings, provide for pedestrian circulation between all buildings and conform to guidelines in **Section 3.C.1**.

Figure 3.B.3.1-1. Direct pedestrian access is provided to the principle entrance from the street.

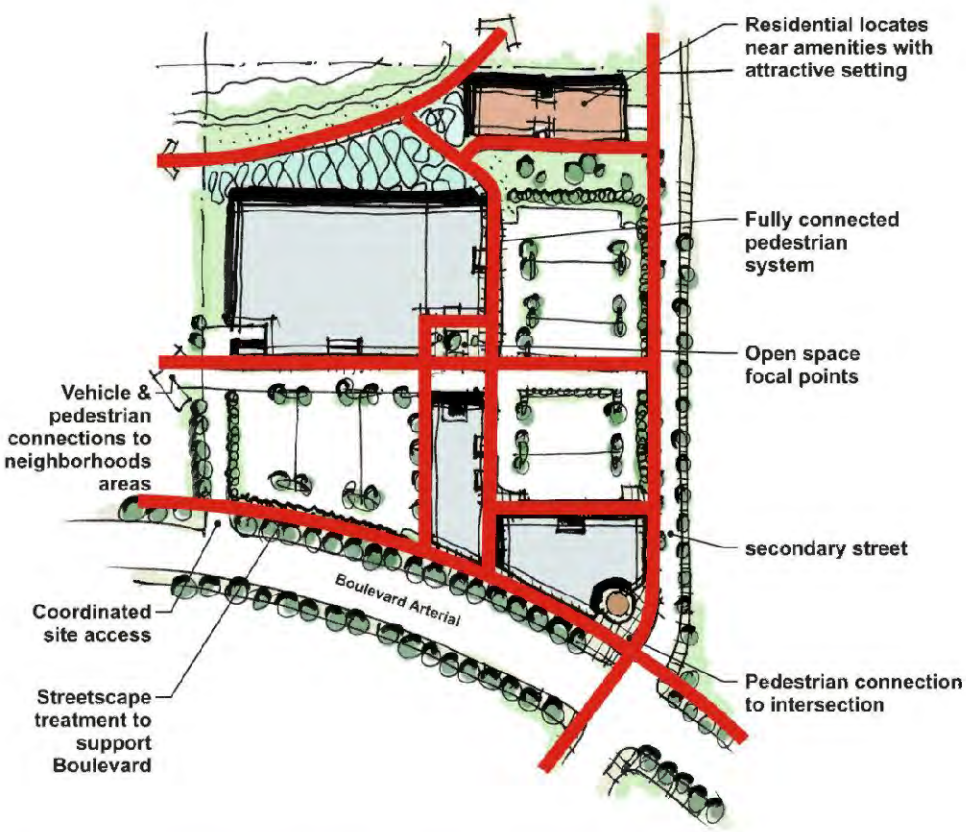

Figure 3.B.3.1-2. Internal and external pedestrian connections are important.

d. Provide direct pedestrian access to transit, rideshare and bicycle storage facilities.

e. New developments shall provide for the opportunity for future pedestrian connections to adjacent properties through the use of pathway stub-outs, building configuration, and parking area layout.

See also **Section 3.C Pedestrian Circulation – Site Planning** and **3.B.4** below.

3.B.3.2. Adequate Sidewalks and Landscape along Street

Development must provide for:

a. A 4-foot minimum landscape strip between the sidewalk and the street with street trees provided at least every 40 feet (average) on center, and

b. A 5 foot minimum sidewalk.

Signature Roads must adhere to **3.B.1.5 Streetscape**.

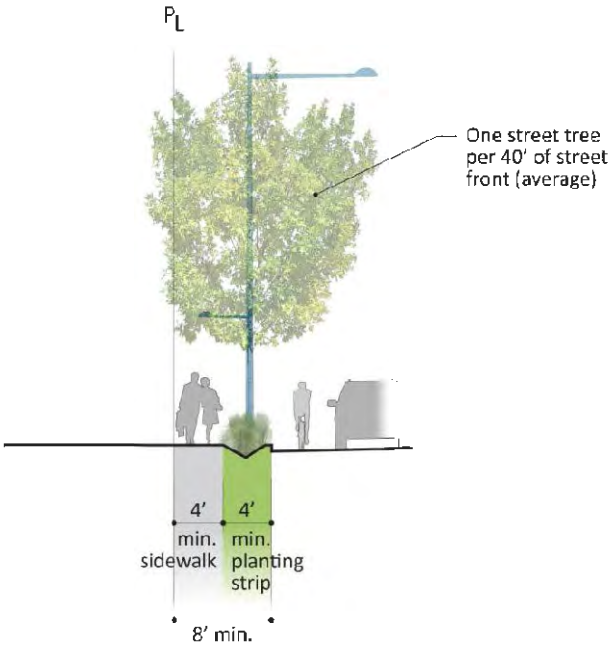

Figure 3.B.3.2-1. Other Streets streetscape requirements

3.B.4. Vehicular Access and Circulation

INTENT:

- To provide better connectivity between sites for more efficient circulation and to ease congestion.
- To minimize cut-through traffic in residential neighborhoods.
- To provide safe and convenient vehicular access routes through large areas by connecting public and/or private roadways and access-ways.
- To enhance the visual character of interior access roads.
- To minimize conflicts with pedestrian circulation and activity.
- To enhance the safety and function of public streets.
- To provide access management on congested streets; i.e., to reduce turning movements that increase congestion and reduce safety.
- To support transit services.

STANDARDS/GUIDELINES:

See also **Section 3.D Parking Area Design and Guideline 3.B.1.2 Parking Orientation** for standards related to parking lot location.

3.B.4.1. Inter-site Connectivity

The provision of through vehicle access connections between non-residentially zoned properties is required except in rare instances where the Director determines it is infeasible or undesirable. Such access may be in the form of a dedicated or private alley, connected or shared parking lots, shared driveways, or similar features. The intent of this guideline is to provide greater connectivity to facilitate future access to all properties and provide better vehicular circulation. This guideline is not required if the Director determines that such a vehicle connection would significantly hamper safe pedestrian movement.

3.B.4.2. Internal Roadways and Vehicular Circulation

a. Provide street trees and sidewalks on all internal access streets where through vehicle access connections have dimensions of 400 feet or greater to increase their function and appearance. In industrial zones, sidewalks must be ADA compliant with planting strips at least 5 feet wide and 1 street tree for every 30 feet of street frontage. Sidewalks are required on both sides of the street unless alternative continuous pedestrian access is available for all buildings. If on-street parking is provided and rainwater drainage treated elsewhere, then the planting strip may be replaced with tree pits within the pavement but there must be at least 50 square feet of planting area or permeable pavement per tree to support root functions. The Director may require wider sidewalks in situations with high pedestrian volumes.

   See **Section 3.F.1** regarding lighting.

b. Include traffic calming measures such as small traffic circles, raised crosswalks and curb extensions (sidewalk bulbs) to reduce vehicle speed and increase safety.

c. Primary vehicular access to corner lots shall be located sufficiently distant from the intersections to minimize traffic conflicts.

d. Combining driveway access point to parking lots and reducing the number of curb cuts is encouraged.

e. The Director may require modification of proposed vehicle access points and internal circulation in order to minimize the potential for cut-through traffic in residential neighborhoods. Specifically, access connecting nearby roads may be required.

Figure 3.B.4.2-1. Pedestrian-oriented access streets are usually needed to provide good circulation to and through large sites.

3.B.5. Lots with Multiple Buildings or with a Total Area Greater than 2 Acres

INTENT:

- To create integrated development plans and phasing strategies.
- To reduce negative impacts to adjacent properties.
- To enhance pedestrian and vehicular circulation.
- To encourage transit use.
- To provide usable open space.
- To create focal points for pedestrian activity for developments.
- To enhance the visual character of the community.

STANDARDS/GUIDELINES:

3.B.5.1. Unifying Site Planning Concept

Development at sites with two or more buildings or properties larger than 2 acres in area shall demonstrate that the project is based on a unifying site planning concept that meets the following criteria:

a. Incorporates open space and landscaping as a unifying element.

b. Provides pedestrian paths or walkways connecting all businesses and the entries of multiple buildings.

c. Provides for safe, efficient internal vehicular circulation that does not isolate the buildings.

d. Integrates any required open space as a central or unifying element.

e. Takes advantage of special on-site or nearby features.

Figure 3.B.5.1-1. An example of a site plan illustrating requirements of Guideline 3.B.4.1.

3.B.6. Loading, Service Areas and Mechanical Equipment

INTENT:

- To minimize adverse visual, olfactory, or auditory impacts of mechanical equipment, utility cabinets and service areas at ground and roof levels.
- To provide adequate, durable, well-maintained, and accessible service and equipment areas.
- To protect residential uses and adjacent properties from impacts due to location and utilization of service areas.

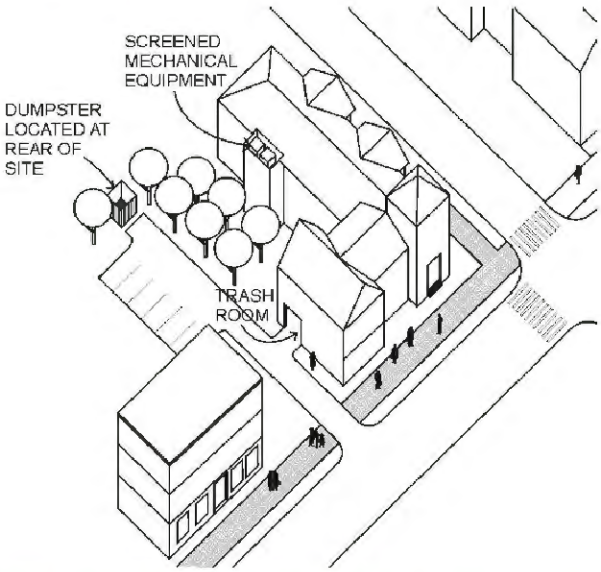

Figure 3.B.6.1-1. Locate service elements to reduce impacts on the residential and pedestrian environment, and provide appropriate enclosure.

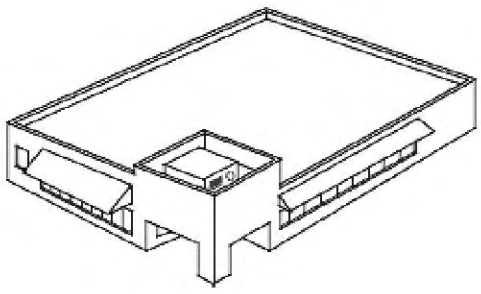
STANDARDS/GUIDELINES:

3.B.6.1. Loading, Service Areas, Utilities and Mechanical Equipment

Reduce impacts of refuse containers and storage areas through the following implementation measures:



a. No loading or servicing should be conducted between a building and any public street. Loading bays shall be located on a building elevation not facing a Signature Road, and should not locate on an elevation facing a public street. For sites where loading bays must face a public street, the Director will determine the street appropriate for loading bays proximity. Other service areas (trash dumpsters, compactors, recycling areas, electrical panels, and mechanical equipment areas) shall be located to avoid negative visual, auditory (noise), olfactory, or physical impacts on the street environment and adjacent residentially zoned properties. The City may require evidence that such elements will not significantly impact neighboring properties or public areas. (For example, the City may require noise damping specifications for fans near residential zones.) Service areas shall be sited for alley access if available.

b. Exterior loading areas shall not be located within 20 feet of a single family residentially zoned property, unless the Director finds such a restriction does not allow feasible development. In such cases, the areas and drives will be separated from the residential lot by a masonry wall at least 8 feet high. Internal service areas may be located across the street from a single family residential zone.

c. Service areas must not be visible from the sidewalk and adjacent properties. Where the City finds that the only option for locating a service area is either visible from a public right-of-way or space or from an adjacent property, the area must be screened with either landscape or structural screening measures provided in **Section 3.B.5.2**.

d. Ground-mounted mechanical equipment must be located and screened to minimize visual and noise impacts to pedestrians on streets and adjoining properties

e. Roof-mounted mechanical equipment must be located and screened so the equipment is not visible from the ground level of adjacent streets or properties within 20 feet of the structure. If the adjacent street or properties are topographically higher than the industrial lot ground level so that complete screening is not feasible, equipment location and screening should be used to hide the equipment to the maximum extent practical. Match the color of roof mounted equipment with the exposed color of the roof to minimize visual impacts when equipment is visible from higher elevations nearby.

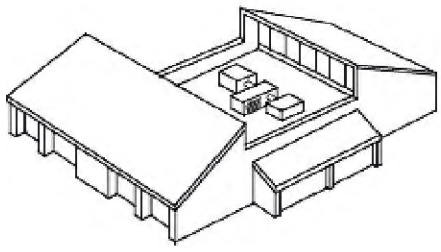


Figure 3.B.6.1-2. Examples of how to screen roof-mounted mechanical equipment.

f. Locate and screen utility meters, electrical conduit, and other service and utilities apparatus so they are not visible from adjoining properties and nearby streets.

   While exterior service areas must be screened, screening requirements may be reduced by the Director at access points for service areas inside buildings.

g. Locate and/or shield noise producing mechanical equipment such as fans, heat pumps, etc to meet State law provisions (WAC 173-60).

h. All on-site utilities and service connections including wires and pipes must be located underground. Meters may be attached to buildings. Project proponents are required to coordinate with the local electric utility provider to locate electrical service facilities in the least obtrusive way.

3.B.6.2. Screening of Service Areas and Mechanical Equipment

Where screening of service areas is called for, adhere to the following:

a. A structural enclosure shall be constructed of masonry, heavy-gauge metal, or decay resistant composite wood and have a roof. The walls must be sufficient to provide full screening from the affected roadway or use. The enclosure may use overlapping walls to screen dumpsters and other materials. Gates shall be made of heavy-gauge, site obscuring material.

b. Collection points shall be located and configured so that the enclosure gate swing does not obstruct pedestrian or vehicle traffic, or does not require that a hauling truck project into any public right-of-way.

c. The service area shall be paved.

d. Weather protection of recyclables, trash, and compost/yard waste shall be ensured by using weather-proof containers or by providing a roof over the storage area.

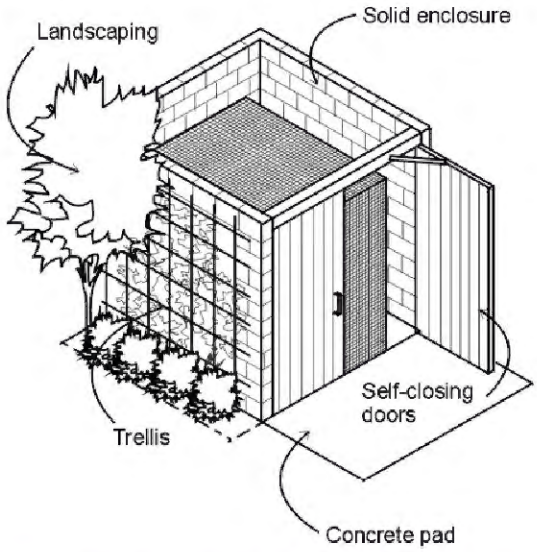

Figure 3.B.6.2-1. Examples of acceptable dumpster enclosures.

3.B.7. Stormwater Facility Planning

INTENT:

- To comply with stormwater management requirements as outlined in the Tumwater Drainage Manual and the City's NPDES permit, which requires Low Impact Development measures to be applied unless it is documented to be infeasible.
- To integrate low impact development stormwater management/water quality systems into the site design as an amenity.
- To reduce the economic burden of stormwater management systems on developments.
- To encourage creative use and cost-effective stormwater management solutions for new development.

STANDARDS/GUIDELINES:

3.B.7.1. Compliance with City Stormwater Manual

Adhere to the City of Tumwater Stormwater Management (SWM) standards in TMC 13.12.020. The following guidelines are intended to supplement the SWM regulations.

3.B.7.2. Integration of Stormwater Facilities into Site Design

Where feasible, integrate biofiltration swales, rain gardens, stormwater planters, and other low impact development stormwater management measures into the overall site design. Manage stormwater as close to its origin as possible by utilizing small scale, distributed hydrologic controls. Locate them so they don't impede pedestrian circulation. Examples of filtration methods are listed below:

a. Incorporate the biofiltration system, including low-impact development (LID) features, as part of the landscape features of the development. If the biofiltration system is incorporated into the landscaping of the site's open space, then, upon approval of the

Director, the stormwater facility may be counted as part of the required open space or landscaping.

b. Maximize retention of native forest cover and vegetation and restore disturbed vegetation to intercept, evaporate and transpire precipitation.

c. Preserve permeable, native soil, and enhance disturbed soil to store and infiltrate stormwater.

d. Reduce hard surfaces, total impervious surface areas and increase retention of native vegetation.

Figure 3.B.7.2-1. A preferred method of handling stormwater is through retention systems, such as rain gardens, incorporated as site amenities. Other low-impact development techniques are encouraged, and in many cases, required.

e. Locate biofiltration swales, ponds, or other approved biofiltration systems as part of a landscape screen.

f. Where topography is favorable, locate the biofiltration swale, wet pond, or other approved biofiltration system within the paved parking or service area to, and integrate it into the required internal parking area landscaping. Consider use of permeable pavements and asphalts to reduce impervious areas.

g. Use native, drought tolerant plants and/or appropriate plant species as approved by the Director.

h. Include the stormwater facility as an amenity.

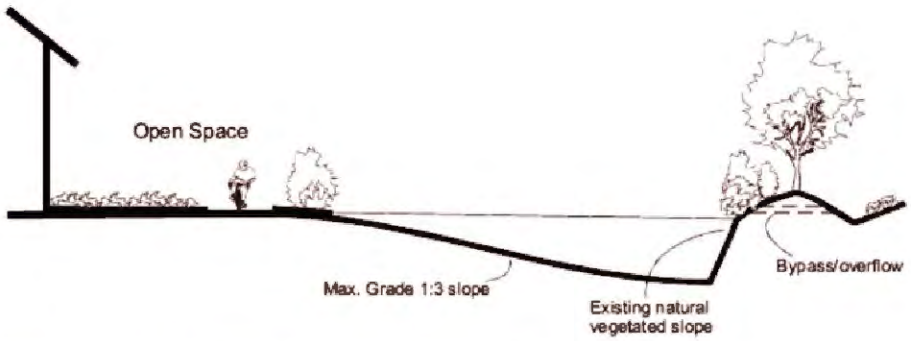

Figure 3.B.7.2-2. Examples of stormwater facilities treated as amenities.

3.B.8. Site Planning for Security

INTENT:

- To increase personal safety and property security.

STANDARDS/GUIDELINES:

3.B.8.1. Prohibitions

In site development planning, avoid:

a. Entrapment areas, where a person could become trapped with no exit route. Provide two means of egress from all outdoor spaces. Ensure entrapment conditions are avoided in the design of rooftop decks.

b. Areas that are dark or not visible from a public space or right-of-way.

c. Vegetation and fences that restrict visibility into occupiable open space, pathways and building entries.

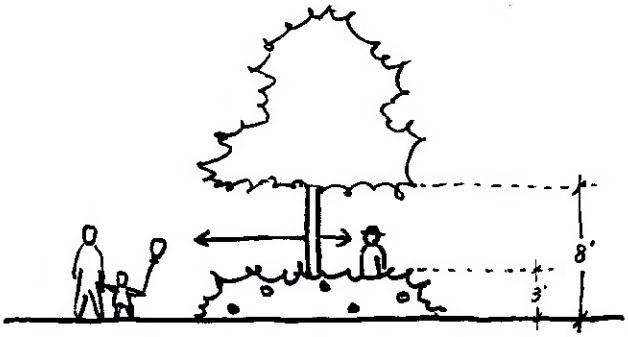

Figure 3.B.8.1-1. Keep landscaping open between 3 feet and 8 feet above grade where there is the need for visibility.

d. Buildings, vegetation, or other objects (e.g., a storage enclosure) that block visibility into a space or provide places to hide.

e. Screens or landscaping that blocks motorists' views of pedestrians crossing streets, driveways, and vehicular circulation areas.

f. Where visibility is necessary to avoid creating an unsecure area to reduce the potential for pedestrian/vehicle collisions, do not plant vegetation that will obstruct views between 3 feet and 8 feet above the ground. (See **Figure 3.B.8.1-1.)**

3.B.8.2. Desirable Elements

In the planning of the site and design of buildings and site elements, to the extent feasible provide for:

a. "Passive surveillance," the ability of people occupying buildings and public spaces to view all parts of accessible spaces.

b. Security and pedestrian lighting per **Guideline 3.F.1.1**.

c. Appropriate natural access control, that is, features that delineate where the general public should not enter without an invitation. For example, a low fence or hedge can indicate that people should not enter an open space except through a gate or opening. Access control should not limit visibility or passive surveillance.

d. Defining territory. This means clearly indicating through site planning and design measures what parts of the site are open to the public and what parts are not. For example, pedestrian-oriented elements and walkways indicate that the public is welcome but fenced areas with a gate do not. Also, well maintained sites indicate that someone cares for the site and tends to discourage crime.

3.C. Pedestrian Access, Amenities, and Open Space Design

3.C.1. Internal Pedestrian Paths and Circulation

INTENT:

- To provide safe and direct pedestrian access that accommodates all pedestrians, minimizes conflicts between pedestrians and vehicular traffic, and provides pedestrian connections to neighborhoods.
- To accommodate non-competitive/non-commuter bicycle riders who use bicycles on short trips for exercise, recreation and convenience.
- To provide attractive internal pedestrian routes that promote walking and enhance the character of the area.

STANDARDS/GUIDELINES:

3.C.1.1. Pedestrian Circulation – General Design

Figure 3.C.1.1-1. An example of an attractive pedestrian connection through a business park.

a. For safety and access, landscaping shall not block visibility to and from a path, especially where it approaches a roadway or driveway.

b. Pedestrian walks should be separated from structures at least 3 feet for landscaping except where the adjacent building features a transparent windows or artistic displays over at least 75 percent of the ground floor façade between 2 feet and 8 feet above grade, and weather protection at least 5 feet deep along at least 75 percent of the façade.
.

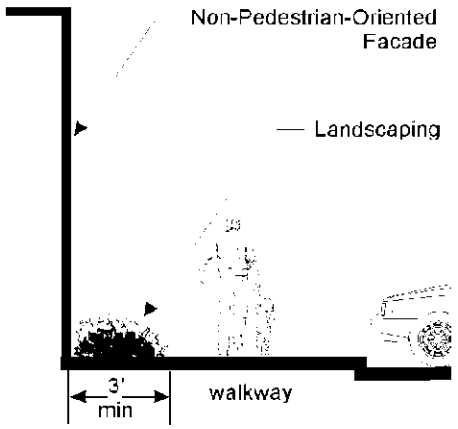

Figure 3.C.1.1-2 Provide landscaping between walkways and structures

c. For interior pathways, the applicant must demonstrate to the Director's satisfaction that the proposed walkway is of sufficient width to accommodate the anticipated number of users. For example, a 10- to 12-foot wide pathway can accommodate two couples passing one another. An 8-foot wide pathway will accommodate three persons walking abreast, while a 6-foot wide pathway will allow two individuals to pass comfortably. if a sidewalk abuts a building façade that has a ground floor entry, the pathway (i.e., sidewalk) must be at least 8 feet wide.

d. Pathways must be American with Disabilities Act (ADA) compliant.

3.C.2. Pedestrian-Oriented Open Space

INTENT:

- To provide a variety of pedestrian areas to accommodate employees and visitors.
- To provide safe, attractive, and usable open spaces that promote pedestrian activity and recreation.

STANDARDS/GUIDELINES:

3.C.2.1. Pedestrian-Oriented Open Space

Where Pedestrian-Oriented Open Space is provided, design the open space according to the following criteria. If sidewalks are wider than the required minimum width, the additional sidewalk width may be counted as Pedestrian-Oriented Open Space.

a. Required Pedestrian-Oriented Open Space features:

(1) Visual and pedestrian access (including ADA compliant access) into the site from a street, private access road, or non-vehicular courtyard.

(2) Visual access from some dwelling units and/or commercial areas (i.e., maximize "eyes on the open space").

(3) Paved walking surfaces of either concrete or approved unit paving.

(4) Lighting must conform to **Section 3.F.1 Site Lighting**.

(5) Spaces must be located in or adjacent to areas with significant pedestrian traffic to provide interest and security, such as adjacent to or visible from a building entry.

(6) At least 2 feet of seating area (a bench or ledge at least 16 inches deep and appropriate seating height) or one individual seat per 60 square feet of plaza area or open space.

(7) Landscaping components that add visual interest and do not act as a visual barrier. This could include planting beds, potted plants, or both.

b. Desirable Pedestrian-Oriented Open Space features:

(1) Pedestrian amenities, such as a water feature, site furniture, artwork, drinking fountains, kiosks, or other similar features.

(2) Adjacent buildings with transparent window and doors covering 75 percent of the façade between 2 feet and 8 feet above the ground level.

(3) Solar access at least during noon and afternoon hours during winter, and appropriate shade during summer.

(4) Pedestrian weather protection, alcoves, seating, or other features along building edges to allow for outdoor seating areas and a planted buffer.

c. A Pedestrian-Oriented Open Space must not have:

(1) Asphalt or gravel pavement.

(2) Adjacent parking areas or service areas (e.g., trash areas) that are not separated with landscaping, as described in **3.D.2.2**.

(3) Adjacent chain-link fences.

(4) Adjacent "blank walls" without "blank wall treatment."

(5) Outdoor storage that does not contribute to the pedestrian-oriented environment.

(6) Vehicle travel through the area.

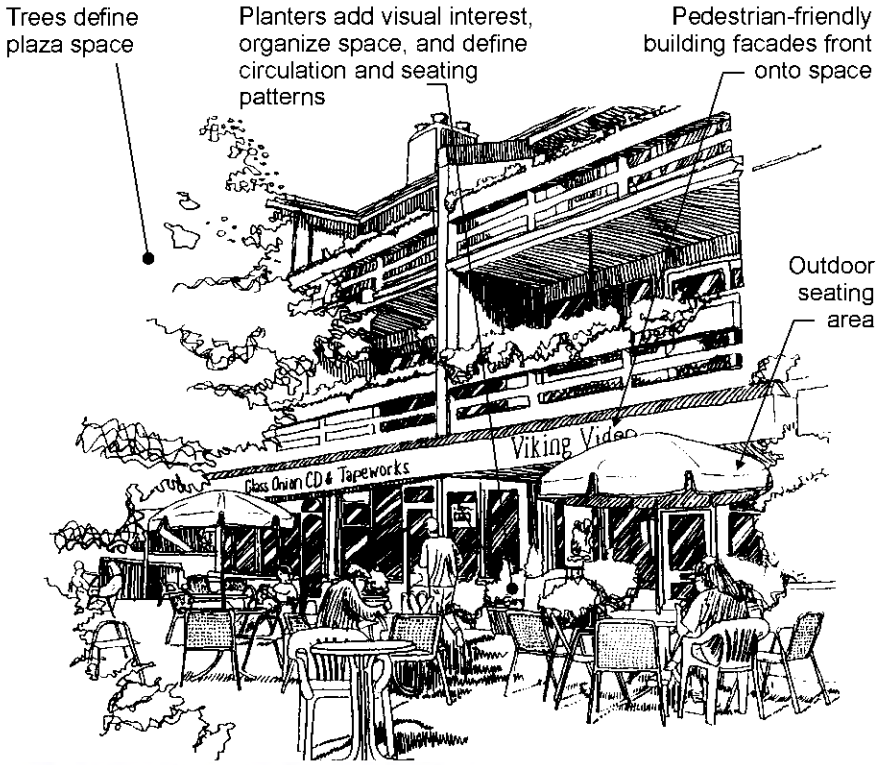

Figure 3.C.2.1-1. Example of a small Pedestrian-Oriented Open Space.

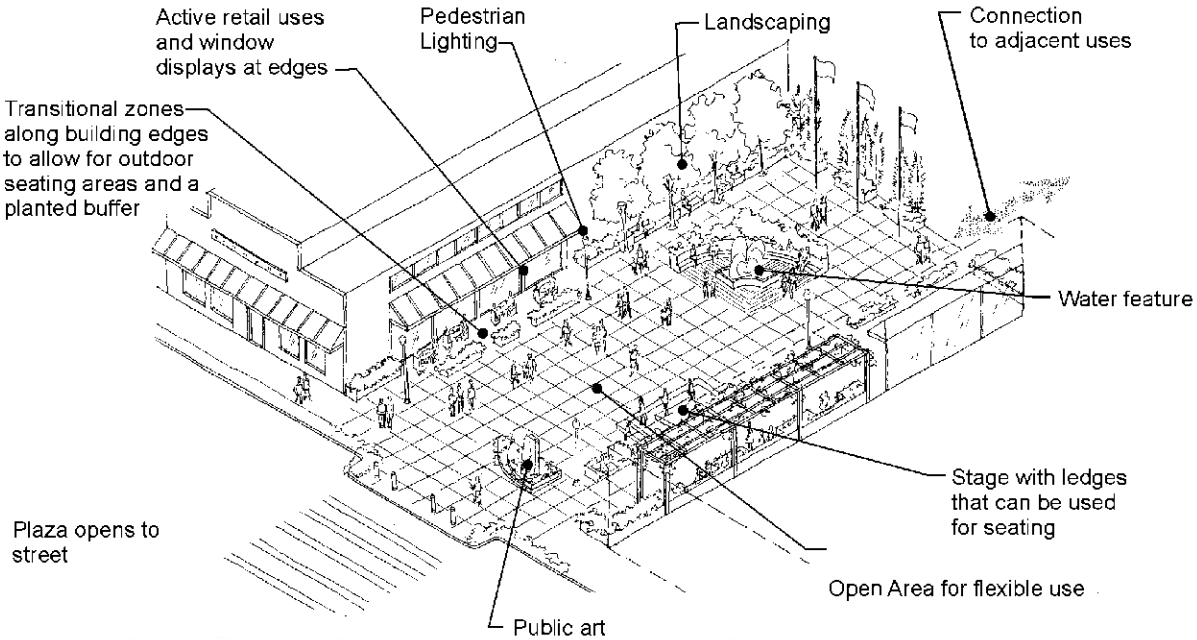

Figure 3.C.2.1-2. Example of a large Pedestrian-Oriented Open Space.

3.C.2.2. Pedestrian Circulation Where Facades Face Parking Areas

Where a building's main entrance faces onto a parking area rather than the street, provide wide pathways adjacent to the façades. Pathways along the front façade of buildings 100 feet or more in length (measured along the façade) that are not located adjacent to a street must be at least 6 feet wide and include the following:

a. Trees, as approved by the Director, must be placed at an average of 30 feet on-center and placed in grates or landscaped area. Breaks in the tree coverage will be allowed near major building entries to enhance visibility. However, no less than 1 tree per 60 lineal feet of building façade must be provided.
b. Lighting must conform to **Section 3.F.1**.

Figure 3.C.2.2-1. Example of a successful pedestrian sidewalk between parking lot and building entry.

3.C.3. Site Landscaping

INTENT:

- To encourage the abundant use of landscaping in site and development design to improve site aesthetics, enhance the pedestrian experience, and increase environmental quality.
- To reduce surface water runoff by percolating water through landscaped areas.
- To maintain and improve privacy for residential zones.
- To enhance buildings and open spaces.
- To make adjacent uses more compatible
- To provide visual relief from roadways, parking areas, and the built environment.

STANDARDS/GUIDELINES:

3.C.3.1. Reference to TMC 18.47

The landscaping standards of TMC 18.47 shall apply. These standards are intended to supplement those standards.

3.C.3.2. Landscaping – General Standards for All Landscape Areas

All new landscape areas proposed for a development shall be subject to the following provisions:

a. Berms shall not exceed a slope of two horizontal feet to one vertical foot (2:1).
b. Group plants having similar water use characteristics.

c. Plant selection shall consider adaptability to sun exposure, soil conditions, and the topography of the planting area. Preservation of existing vegetation is encouraged.

d. Install no plants included in the Thurston County Noxious Weed list.

e. All plants shall conform to American Association of Nurserymen (AAN) grades and standards as published in the "American Standard for Nursery Stock" manual; provided that existing healthy vegetation used to augment new plantings shall not be required to meet the standards of this manual.

f. Street trees and trees internal to the development shall conform to the standards in the Tumwater Comprehensive Street Tree Plan.

g. When the width of any landscape strip is 20 feet or greater, the required trees shall be staggered in two or more rows.

h. Shrubs shall be dwarf varieties unless demonstrated that other varieties can thrive if maintained at 42 inches. Shrubs shall also be as follows:

   (1) At least an AAN container Class No. 2 size at time of planting in Type II and III and parking area landscaping;

   (2) At least 24 inches in height at the time of planting for Type I landscaping; and

i. Shrubs shall be perennials.

j. Groundcovers shall be planted and spaced to result in total coverage of the majority of the required landscape area within three years.

k. All fences shall be placed on the inward side of any required perimeter landscaping along the street frontage. That is, place the required landscaping to face the public street or open space. Exception: Where the fence separates a public street from a required common open space, the Director will determine on which side the landscaping is to be installed.

l. Required street landscaping may be placed within City of Tumwater street rights-of-way subject to the permission of the City of Tumwater director of public works.

m. Required street landscaping may be placed within Washington State rights-of-way subject to permission of the Washington State Department of Transportation.

n. New landscape material provided for vegetation restoration or mitigation requirements and within areas of undisturbed vegetation or within the protected area of significant trees shall give preference to utilizing western Washington native plant species.

3.C.3.3. Landscaping – Plan Design, Design Review, and Installation

A landscape plan must be submitted to the Director that complies with TMC 18.47 and the standards contained in **Section 3.C.3** of these standards. Where conflicts occur, the Director determines which standards control.

3.C.3.4. Maintenance

a. All landscaping shall be maintained for the life of the project, including water conservation practices for turf grass such as annual aeration and dethatching, top dressing and over seeding;

b. All landscape materials shall be properly pruned by a trained specialist and trimmed as necessary to maintain a healthy growing condition or to prevent primary limb failure;

c. With the exception of dead, diseased or damaged trees specifically retained to provide wildlife habitat, other dead, diseased, damaged, topped, or stolen plantings shall be replaced within three months or during the next planting season if the loss does not occur in a planting season; and

d. Landscape areas shall be kept free of trash, mulched, and weeded.

3.C.3.5. Landscape Character

a. Tumwater's signature landscape setting is characterized by large, mature conifer trees surrounded by relatively flat expanses of grass or low vegetation, such as at the civic campus around City Hall and the Fred Meyer and Costco vicinity on Littlerock Road. The community has indicated that this landscape is very important to the city's visual quality and design identity so that maintaining existing mature evergreen trees and including existing and new evergreens in site development is an important objective. The Director may require that development proposals be modified to conserve healthy evergreen trees. When appropriate, the Director may also relax other standards such as setbacks and geometric requirements in order to promote the retention of mature trees.

The applicant shall meet setback and root protection requirements as deemed necessary by the Director to maintain the tree's health.

Figure 3.C.3.5-1. Informal clusters of mature conifer trees are a signature element of Tumwater's landscape and are well-suited to the area's glacial soils.

b. Where possible, minimize the disturbance of native vegetation and soils. Native soil retention may be incorporated into low impact development (LID) measures for stormwater management.

c. Unless there is a compelling reason to the contrary, concentrate ornamental vegetation near pedestrian areas and building entries where it can be most appreciated.

d. As a general observation, Tumwater's landscape design character emphasizes naturalistic, informal layouts that are similar to early 20th century parks designed by the Olmsted Brothers.

e. Other design features associated with landscaped open space should emphasize pedestrian scale and qualities generally consistent with the features noted in **Section 3.C.2.1 Pedestrian-Oriented Open Space**.

3.D. Parking Area Design

3.D.1. Parking Area Design

INTENT:

- To provide safe and convenient pedestrian paths from the street sidewalk through parking areas to building entries in order to encourage pleasant walking experiences between businesses.
- To provide safe pedestrian circulation system that integrates with parking and serves as access to nearby businesses.

STANDARDS/GUIDELINES:

Parking areas must comply with TMC 18.50 and the landscaping standards for parking areas in TMC 18.47. In addition to these requirements, parking areas must comply with the following standards.

3.D.1.1. Pathways Through Parking Areas

Developments must provide specially marked or paved walkways through parking areas. Generally, walkways must be provided at least every four rows or at least every 180 feet. Where possible, align the pathways to connect with major building entries or other sidewalks, pathways, and destinations. The walkway must be at least 4 feet wide (clear) excluding vehicle overhang or wider to accommodate devices specific to the use.

Figure 3.D.1.1-1. Parking area pathway examples. Note that clear pathway width must account for vehicle overhang.

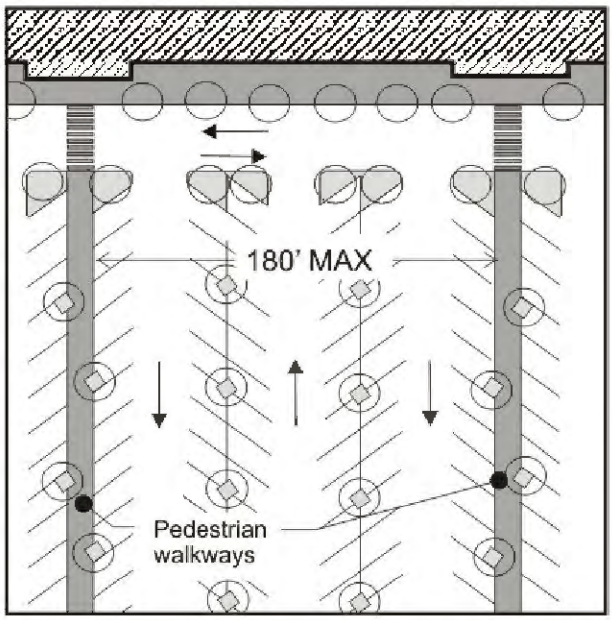

Figure 3.D.1.1-2. Example parking area pathway configuration.

3.D.1.2. Location of Parking

When possible, off-street passenger vehicle parking should be located away from the loading and service areas to minimize conflicts.

3.D.2. Parking Area Landscaping

INTENT:

- To reduce the visual presence of parking on the City's streets, public space and adjacent development.
- To increase tree canopy cover for environmental and aesthetic benefits.
- To improve water quality and improve stormwater management.

STANDARDS/GUIDELINES:

3.D.2.1. Interior Parking Area Landscaping

Parking area landscaping shall be provided within surface parking areas with 20 or more parking stalls for the purpose of providing shade, diminishing the visual impacts of large paved areas, and providing stormwater management. Permeable asphalt, concrete and pavers, and island and planter strips designed to work as rain gardens for stormwater management, with sloped grading and curb cuts are encouraged. Surface parking areas shall be as follows:

a. Developments with common parking areas with more than 20 stalls shall provide planting areas at the rate of 20 square feet per parking stall;

b. Trees shall be provided and distributed throughout the parking area at a rate of one tree for every 10 parking stalls. Existing trees may be counted to satisfy this requirement. Mature conifer trees over 24 inches in caliper may count as 2 trees.

c. The maximum distance between any parking stall and landscaping shall be no more than 100 feet;

d. Permanent curbs or structural barriers shall be provided to protect the plantings from vehicle overhang and curb cuts shall be provided in these barriers to allow surface water to flow into landscaped areas.

e. Parking area landscaping shall consist of:

   (1) Canopy-type deciduous trees, coniferous trees, broadleaf evergreen trees, evergreen shrubs, perennials, and groundcovers planted in islands or strips;

   (2) Shrubs planted at a rate of one per 20 square feet of landscaped area and maintained at a height of no more than 42 inches;

   (3) Plantings contained in planting islands or strips having an area of at least 100 square feet and with a narrow dimension of no less than five feet;

   (4) Groundcover pursuant to **Guideline 3.C.3.2.** And,

f. Landscaping shall be maintained at heights for safe visibility between vehicles and pedestrians.

3.D.2.2. Parking Area Screening

On Signature Roads, parking area screening shall be provided between the sidewalk and parking areas with either a or b as follows:

a. Any of the alternatives identified in TMC 18.47.D, or those listed in "b" below;

b. Provide a planting bed, at least 5 feet wide, that incorporates a low wall (approximately 3 feet tall) and/or trellis. The planting bed shall be in front of the wall, provide irrigation and feature the following plantings:

   (1) A mix of deciduous and evergreen trees generally interspersed throughout the landscape strip and spaced to create a continuous canopy. Alternatively, a trellis and shrubs, as in **Figure 3.D.2.2-1**, may be substituted for the trees.

   (2) Unless the trellis option is chosen, trees provided at the rate of one per 25 linear feet of landscape strip and spaced no more than 30 feet apart on center.

   (3) Shrubs provided at the rate of one per 20 square feet of landscape strip and spaced no more than 8 feet apart on center.

   (4) Perennials per **Guideline 3.C.3.2**.

   (5) Groundcover per **Guideline 3.C.3.2**.

   The wall shall be constructed of brick, stone, decorative concrete or concrete block, or other permanent material that provides visual interest and helps to define the street edge as determined by the Director. (See **Figure 3.D.2.2-1** for an example). The wall and bed must be relatively continuous but may feature breaks at key points for pedestrian access.

Figure 3.D.2.2-1. Parking area planting buffer with low wall and trellis.

3.E. Building Design

3.E.1. Building Design - Character

GENERAL NOTES:

- Many of these building design guidelines call for a building to feature one or more elements from a menu of items. In these cases, a single element, feature, or detail may satisfy multiple objectives. For example, a specially designed or fabricated covered entry with attractive detailing might be counted toward requirements for human scale, building corners, and building details.
- The terms "decorative" and "ornamental" are not necessarily meant to mean "characterized by traditional patterns, nonstructural elements, or applied markings." Elements may be considered "decorative," "ornamental," or "special" if they extend beyond the typical level of quality, use materials or forms in an unusual way, or show special architectural consideration. The Director shall determine what elements are "ornamental," "decorative," or "special."

INTENT:

- To incorporate design treatments which add interest and reduce the scale of large buildings.
- To encourage functional, durable, and environmentally responsible buildings.
- To provide building design that creates safe and relatively comfortable human environments.

GUIDELINES:

3.E.1.1. Architectural Character

Unique Tumwater characteristics should inspire the building design. See the **Chapter 2 Commercial and Residential Section 2.E.1.1 Architectural Character** for a description of these characteristics. Some notable features are a signature landscape palette consisting of large conifer trees surrounded by low lying and native vegetation or ornamental landscaping and indigenous materials, such as basalt stone and timber, integrated into designs.

a. The architectural design of new development is required on Signature Roads and encouraged on other streets to reflect and add to Tumwater's design character in one or more of the three ways described below. The Director will determine whether or not the proposal meets the objectives.

(1) Incorporate distinctive and substantial landscaping to enhance the building's setting. In this approach, the landscaping or site features must be the predominant visual element and the building forms and character be relatively subdued. Retention of a substantial number of large trees, especially native trees

such as conifers, is one means to accomplish the objectives of this approach. Another might be to install landscape features that include Pedestrian-Oriented Open Space (see **Guideline 3.C.2.1**) to the extent that those elements and human activity become the dominant visual features. Extensive landscaping and subdued forms will likely be the most appropriate approach for industrial buildings.

Figure 3.E.1.1-1. A successful application of approach 1: substantial landscaping.

(2) Reflect the traditional style of architecture by featuring gabled roofs, traditionally scaled and vertically oriented windows, use of brick (at least on the ground floor) covered entries with porches or other weather protection, break-up of large building facades, and rectilinear or circular forms. This approach is typified by brewery, civic campus and new government office buildings. Buildings that reflect Art Deco styling with flat surfaces, linear detailing and building elements, and geometric forms may also be appropriate. Similarly, on the Capitol Blvd Corridor, designs that build on the historic Highway 99 architecture may be appropriate for certain uses which can build on that history.

Figure 3.E.1.1-2. Traditional industrial uses in the region often utilized gabled roofs, clerestory lighting, and local materials (left) This character can be used in contemporary buildings as well (right).

(3) Feature contemporary forms and architectural treatments that respond to the uniqueness of the site and building use. If this approach is used, the building materials must be of demonstrably high quality, the design exhibit a high level of

application of the guidelines in **Section 3.E**, and indigenous materials used as primary materials or accents.

Figure 3.E.1.1-3. A successful application of approach 3: Contemporary forms and treatments. This example relates to its surroundings by using materials and colors compatible with adjacent buildings and breaking down the building's massing by providing human scale elements and articulating features..

3.E.1.2. Corporate Identity Building Elements

Corporate signature elements, such as decorated roofs and exterior colors and treatments, that do not meet these guidelines are not acceptable. The Director may require revisions to the building design if (s)he determines that the corporate element is inconsistent with the intent of these guidelines or detracts from Tumwater's general character.

Figure 3.E.1.2-1 This development does not meet the requirements of 3.E.1.2 because the building color and yard ornaments are part of a business "brand".

3.E.2. Human Scale Elements

INTENT:

- To encourage the use of building components that relate to the size of the human body.
- To add visual interest to buildings, particularly around areas where pedestrians are expected such as building entries.

STANDARDS/GUIDELINES:

3.E.2.1. Human Scale Elements

"Human scale" addresses the relationship between a building and the human body. Generally, buildings attain a good human scale when they feature elements or characteristics that are sized to fit human activities, such as doors and windows. While industrial buildings by their nature are not "pedestrian oriented," areas where pedestrian activity is likely, such as main entries, should feature some elements that provide pedestrian scale.

a. Incorporate a minimum of three human scale building elements into new buildings and structures near the main building entry or areas where pedestrians are expected.

Human scale measures include:

(1) Spatially defining building elements, such as a trellis, overhang, canopy, or other element, that defines space that can be occupied by people;

(2) Public art that incorporates elements of a normal human scale (e.g., life size sculpture);

(3) First floor windows;

(4) Placement of smaller building elements near the principle entry;

(5) Landscaping elements that meet these guidelines;

(6) At least 100 square feet of Pedestrian-Oriented Open Space, as described in **Guideline 3.C.2.1**, for each 100 lineal feet of building façade;

(7) A covered entry;

(8) Upper story setbacks, provided one or more of the upper stories are set back from the face of the building at least 6 feet;

(9) Pedestrian scale lighting with mounting heights less than 15';

(10) Window treatments that extend out from the building face;

(11) Balconies or decks in upper stories; and

(12) Other elements that the Director determines meet the intent of these guidelines.

3.E.3. Architectural Scale

INTENT:

- To encourage architectural scale of development that is compatible with nearby areas.
- To add visual interest to buildings.

Note:

- **Architectural scale** is the perceived height and bulk of a building relative to that of neighboring buildings. A building has "good architectural scale" if its visual size is relatively similar to its neighbors.
- **Modulation** is a stepping back or projecting forward of portions of a building face, within specified intervals of building width and depth, as a means of breaking up the apparent bulk of a structure's continuous exterior walls.
- **Articulation** is visually breaking up a building façade into intervals by including repetitive features, such as broken rooflines, chimneys, entrances, distinctive window patterns, street trees, and modulation.

STANDARDS/GUIDELINES:

3.E.3.1. Scale of Large Buildings

New buildings over three stories or with facades longer than 100 feet measured horizontally along the street front shall provide at least two modulation and/or articulation features as described below along any façade that is visible from a street, residential zone or pedestrian pathway. Unless there is a compelling reason to the contrary the "articulation interval" at which the repetitive element repeats should not be greater than 100 feet.

a. Horizontal building modulation. The depth of the modulation must be at least 2 feet when tied to a change in the roofline and at least 5 feet in other situations. Balconies may be used to qualify for this option, provided they have a floor area of at least 40 square feet, are integrated with the architecture of the building, and project at least 2 feet from the building façade.

Figure 3.E.3.1-1. Building with modulation to increase its interest and human scale.

Figure 3.E.3.1-2. Industrial building with vertical modulation created by functional elements.

b. Vertical building modulation. Minimum depth and width of modulation is 18 inches and 4 feet (respectively) if tied to a change in color or building material and/or roofline modulation as defined below. Otherwise, minimum depth of modulation is 10 feet and minimum width for each modulation is 15 feet. Balconies may not be used to meet this modulation option unless they are recessed or projected from the façade and integrated with the building's architecture as determined by the Director. For example, "cave" balconies or balconies that appear to be "tacked on" to the façade will not quality for this option.

c. Modulated roof line. Buildings may qualify for this option by modulating the roof line of all façades visible from a street, park, or pedestrian pathway consistent with the following standards:

   (1) For flat roofs or façades with a horizontal fascia or parapet, change the roofline so that no un-modulated segment of roof exceeds 60 feet. Minimum vertical dimension of roof line modulation is the greater of 2 feet or 0.1 multiplied by the wall height (finish grade to top of wall);

   (2) For gable, hipped, or shed roofs, a slope of at least 3 feet vertical to 12 feet horizontal; or

   (3) Other roof forms such as arched, vaulted, dormer, or saw-toothed may satisfy this design standard if the individual segments of the roof with no change in slope or discontinuity are less than 60 feet in width (measured horizontally).

d. Repeating window patterns at intervals less than the articulation interval.

e. Providing a patio, deck, or covered entry for each articulation interval.

f. Changing the roofline by alternating dormers, stepped roofs, gables, or changing roof textures on certain features such as metal roofs on towers and dormers to reinforce the modulation or articulation interval.

g. Changing materials with a change in building plane.

h. Providing lighting fixtures, trellises, trees, or other landscape feature within each interval.

Figure 3.E.3.1-3. Lighting and landscaping help to articulate this industrial building.

The Director may increase or decrease the 60-foot interval for modulation and articulation to better match surrounding structures or to implement an adopted subarea plan.

Figure 3.E.3.1-4. Industrial buildings can achieve an appropriate architectural scale through façade modulation and articulation, emphasis on the entrance, window patterns and landscaping.

3.E.4. Materials

INTENT:

- To encourage the use of a variety of high-quality compatible materials that will upgrade Tumwater's visual image.

STANDARDS/GUIDELINES:

3.E.4.1. Materials

The following are allowed only with special detailing, as described below:

a. Metal siding. When used as a siding material over more than 25 percent of a building's façade visible from a public street, pathway, or park, metal siding must:

(1) Have a matte finish in a neutral or earth tone such as buff, gray, beige, tan, cream, white, or a dulled color, such as barn-red, blue-gray, burgundy, ocher, or other color specifically approved by the Director.

(2) Include two or more of the following elements:

i. Visible window and door trim painted or finished in a complementary color.

ii. Color and edge trim that cover exposed edges of the sheet metal panels.

iii. A base of masonry, stone, or other approved permanent material extending up to at least 2 feet above grade that is durable and satisfies the Intent of the Guidelines. (The intent is to provide more durable materials near grade level.)

iv. Other detail/color combinations for metal siding approved by the Director, provided design quality and permanence meet the intent of this section.

b. Concrete block walls. Concrete block construction used over 25 percent of a building façade visible from a public roadway, pathway, or park must be architecturally treated in one or more of the following ways:

(1) Use of textured blocks with surfaces such as split face or grooved.

(2) Use of other masonry types, such as brick, glass block, or tile in conjunction with concrete blocks.

(3) Use of decorative coursing to break up blank wall areas.

(4) Use of matching colored mortar where color is an element of architectural treatment for any of the options above.

(5) Other treatment approved by the Director.

c. Requirements for stucco, stucco-like and similar troweled finishes:

(1) To avoid deterioration, the finish material must be trimmed and/or sheltered from extreme weather by roof overhangs or other methods.

(2) The finish material may only be used in conjunction with other approved building materials.

(3) Any material that is subject to damage and deterioration from human contact is prohibited within 2 vertical feet of the sidewalk or ground level or in areas that are especially subject to vandalism such as areas with low visibility. In these areas, a more durable finish material such as brick, concrete or concrete block should be used.

Figure 3.E.4.1-1. This storefront effectively combines stucco-like material and concrete block with wood trim and metal detailing.

d. Prohibited materials:

(1) Mirrored glass.

(2) Corrugated fiberglass.

(3) Chain link fencing within 50 feet of a public ROW or residential zone

(4) Crushed colored rock or tumbled glass.

(5) Any sheet materials, such as wood or metal siding, with exposed edges or unfinished edges, or made of nondurable materials. (Industrial panel systems such as Hardie Plank are acceptable)

(6) Any spray-on materials (e.g.: shot-crete) not specifically approved by the Director.

(7) Non-durable materials subject to deterioration if exposed to weather such as most plastics and synthetic materials or materials that are particularly vulnerable to vandalism.

3.E.5. Blank walls

INTENT:

- To reduce the visual impact of large, undifferentiated walls.
- To reduce the apparent size of large walls through the use of various architectural and landscaping treatments.
- To enhance Tumwater's character and identity.
- To ensure that all visible sides of buildings provide visual interest.

STANDARDS/GUIDELINES:

3.E.5.1. Blank Walls

All blank walls (see **Chapter 7 Definition**s) except backs of buildings/service areas and places not easily visible from pedestrian places, shall be treated in one or more of the following measures:

a. Install a vertical trellis in front of the wall with climbing vines or plant materials. For large blank wall areas, the trellis must be used in conjunction with other treatments described below;

b. Provide a landscaped planting bed or a raised planter bed in front of the wall of sufficient size to support. Plant materials that will obscure or screen at least 20 percent of the wall's surface within 4 years;

c. Provide artwork (mosaic, mural, sculpture, relief, etc.) over at least 20 percent of the blank wall surface;

d. Other method as approved by the Director. For example, landscaping or other treatments may not be necessary on a wall that employs high quality building materials (such as brick) and provides desirable visual interest.

e. Special architectural lighting, subject to **Section 3.F.1** and TMC, may be used to highlight a successful treatment if such lighting complies with **Section 3.F.1** below.

3.E.6. Building Entrances

INTENT:

- To ensure that buildings and businesses are inviting and accessible.
- To encourage pedestrian activity.
- To highlight and accentuate the entrance.

STANDARDS/GUIDELINES:

3.E.6.1. Principal Building Entrances

The principal building entrances (i.e., the building entrance used by employees, customers, or visitors) of all buildings shall feature all of the following improvements:

a. Pedestrian covering. Building entrances must be covered by at least 50 square feet of pedestrian weather protection. Entries may satisfy this requirement by being set back into the building façade.

b. Lighting. Lighting shall conform to **Section 3.F.1**.

c. Building or business name. Entries must be identified with respect to building and/or business.

d. Visibility. Building entrances must be visible from the roadway and major public pedestrian pathway.

e. Transparency. Entries must feature glass doors, windows, or glazing (window area) near the door so that the visitor and occupant can view people opening the door from the other side.

f. Security. To the extent feasible, entries must be visible from areas with high pedestrian activity or where residents can view the entry (passive surveillance).

g. Address number.

h. Architectural or artwork enhancements. Building entrances must be enhanced by one or more of the following measures. Entrances on Pedestrian-Oriented Streets must feature two of the following measures.

(1) Special or ornamental doors, windows, or other architectural elements.

(2) Special paving or materials (e.g., decorative tile work).

(3) Special architectural lighting subject to **Section 3.F.1** and TMC.

(4) Landscaping.

(5) Artwork.

(6) Adjacent Pedestrian-Oriented Open Space (see **Guideline 3.C.2.1**).

(7) Other enhancements approved by the Director.

Figure 3.E.6.1-1. An industrial scaled entrance enhanced by details, lighting landscaping and materials.

3.E.6.2. Secondary Public Access

Although these Guidelines require businesses on Signature Roads to front on streets rather than parking areas, a "secondary" entry off of a parking area may be used. Such businesses that have secondary public access shall comply with the following measures to enhance secondary public access (applies only to entries used by the public):

a. Weather protection at least 4 feet deep is required over each secondary entry.

b. A sign may be applied to the awning provided that the sign complies with other regulations and guidelines.

c. Lighting shall conform to section **3.F.1 Site Lighting**.

d. One or more of the design elements noted in **3.E.6.2** above must be incorporated within or adjacent to the secondary entry.

Figure 3.E.6.2-1. Example of secondary public access. Note the outdoor seating, landscaping, and weather protection.

3.F. Lighting

3.F.1. Site Lighting

INTENT:

- To encourage the use of lighting as an integral design component to enhance buildings, landscaping, or other site features.
- To increase night sky visibility and to reduce the general illumination of the sky.
- To reduce horizontal light glare and vertical light trespass from a development onto adjacent parcels and natural features.
- To use lighting in conjunction with other security methods to increase site safety.
- To prevent the use of lighting for advertising purposes.

STANDARDS/GUIDELINES:

3.F.1.1. Site Lighting Levels, Consistent with Illuminating Engineering Society of North America (IES) Standards

a. All publicly accessible areas shall be lighted with levels as follows:

(1) Low or non-pedestrian and vehicular traffic areas – minimum 0.2 foot-candles, maximum 4 foot-candles;

(2) Moderate or high volume pedestrian areas and building entries – minimum 1 foot-candle, maximum 5 foot-candles, preferred average 2 foot-candles;

(3) Public parking lots – minimum 1 foot-candle, maximum 4 foot–candles; and

(4) Gas station pump area – maximum 5 foot-candles.

b. Lighting shall be provided at consistent levels, with an average lighting level to minimum lighting level uniformity ratio no less than 3:1, to create gradual transitions between varying levels of lighting and between lit areas and unlit areas. Highly contrasting pools of light and dark areas shall be avoided.

c. Pedestrian lighting shall have a maximum height of 15 feet.

Exception: For commercial and industrial uses where outdoor storage of goods and products is the primary method of display of such good and products, site lighting levels shall comply with TMC 18.40.035.

3.F.1.2. Light Quality and Shielding, Consistent with US Department of Energy, Guide to FEMP-Designated Parking Lot Lighting

a. Parking area lighting fixtures shall be fully shielded; dark sky rated and mounted in accordance with IES Standards, with lower fixtures preferable so as to maintain a human scale.

b. Exterior lighting must also comply with TMC 18.40.35: Exterior Illumination

c. If lighting at maximum allowed levels, lighting must be dimmed between 10pm and 5am to the minimum or average levels described in **Guideline 3.F.1.1.a**. above.

d. Pedestrian lighting shall have a maximum height of 15 feet.

3.F.1.3. Architectural Lighting

a. The lighting of building features, artwork, and special landscape elements may be allowed, subject to the findings of the Director that the light causes no significant adverse impact.

4.A. Applicability

This chapter applies to institutional uses, including educational, health, religious, correctional, military, and public (i.e., library, fire, police, and City Hall) facilities. It does not include public works facilities of an industrial nature (e.g., water treatment plants and substations).

Also see Chapter 1 Section A. Applicability.

4.B. Site Planning

4.B.1. Relationship to Street Front

INTENT:

- To create an active, safe pedestrian environment throughout Tumwater, and especially in key, designated areas (described in "Summary and Applicability" below).
- To design sites and orient buildings to enhance the property's visibility, attractiveness, and interaction with its adjoining streetscape.
- To establish a visual identity for Tumwater's neighborhood centers.
- To create a hierarchy of streets and block fronts.

SUMMARY AND APPLICABILITY

The maps in **Appendix A: Street Designations** designate streets as Pedestrian-Oriented Streets (blue lines) and Signature Roads (purple lines). This section summarizes the purpose and guidelines for these street designations.

Pedestrian-Oriented Streets

Pedestrian-Oriented Streets are intended to be the most vibrant and activated areas in the city. Storefronts or other active ground floors enclose the street to create the sense of an outdoor room. These are also often designated at street corners to anchor neighborhoods with human-scale development.

Special street front guidelines apply to Pedestrian-Oriented Streets, as stated in **Guidelines 4.B.1.1** through **4.B.1.6**. Properties on Pedestrian-Oriented Streets must adhere to the basic citywide design guidelines, the **4.B.1 Relationship to Street Front** guidelines, and the special provisions for Pedestrian-Oriented Streets in **4.C.2.1 Pedestrian-Oriented Open Space** (where buildings are set back from the right-of-way). In addition, **4.E.4.1 Principal Building Entrances** have heightened requirements for Pedestrian-Oriented Streets.

Signature Roads

This designation supports a diversity of development edges that contribute to the visual character of the street, enhance the pedestrian environment, and connect to the lively corners at the Pedestrian-

Oriented Streets. In residential areas, it ensures that residential units have a relationship to the street, making the street comfortable and safe for pedestrians and residents. In commercial and mixed-use areas, it maintains an attractive development edge relatively close to the right-of-way.

Special street front guidelines apply to Signature Roads, as stated in **Section 4.B.1** below. These allow slightly more flexibility than a Pedestrian-Oriented Street while being more specific than the basic guidelines. Properties on Signature Roads must adhere to the basic citywide design guidelines and the Signature Roads street front standards in **4.B.1 Relationship to Street Front**.

STANDARDS/GUIDELINES:

4.B.1.1. Ground Floor Uses

a. On Pedestrian-Oriented Streets, active ground floors are required facing the street (e.g., storage areas and parking structures cannot face the street).

b. On Signature Roads, active ground floors are required facing the street (e.g., storage areas and parking structures cannot face the street).

4.B.1.2. Appearance

a. On Pedestrian-Oriented Streets, development must adhere to the following:

   (1) The primary building entrance shall be located on the front elevation.

   (2) Areas between the street right-of-way and the front building façade must be a Pedestrian-Oriented Open Space per **Section 4.C.2.1**.

   (3) Building façades facing the street(s) and located within 15 feet of the ROW must feature:

      i. At least 15% transparency on the ground floor façade between 3 and 8 feet above grade (unless determined by the Director to be infeasible or undesirable for the particular use).

      ii. Weather protection at least 4 feet deep.

   (4) Refer to TMC 18.46 for fence requirements.

b. On Signature Roads, development must adhere to the following:

   (1) The primary building entrance shall be located on the front elevation.

   (2) Building façades facing the street(s) and located within 15 feet of the ROW must feature:

      i. At least 50% transparency on the ground floor façade between 3 and 8 feet above grade (unless determined by the Director to be infeasible or undesirable for the particular use), and

      ii. Weather protection at least 3 feet deep.

   (3) Refer to TMC 18.46 for fence requirements.

4.B.1.3. Parking Orientation

a. On Pedestrian-Oriented Streets, all parking must be located behind, underneath, or above active ground floors and accessible via an alley or shared driveway (if applicable) to minimize curb cuts on the Pedestrian-Oriented Street.

b. On Signature Roads, all parking must be located beside, behind, underneath, or above the ground floor use facing the street (i.e., no parking is allowed between the building and the street) unless an alternative orientation is approved by the Director based on a demonstrated functional need and character enhancement of the street (e.g., through extensive landscaping). Parking is limited to 50% of the street front or 65 feet, whichever is narrower, unless an alternative is approved by the Director (based on functional need and enhanced character). Any parking areas along the street must be screened (see **Guideline 4.D.2.2**).

c. On all other streets, the following guidelines apply:

(1) Minimization of large parking lots between the building front and the street is encouraged.

(2) On-site parking may be supplemented with on street parking along the development frontage if consistent with City policies and regulations and approved by the Public Works Director.

4.B.1.4. Corners

a. On Pedestrian-Oriented Streets at a street and/or trail intersection, a building must be located within 15 feet of both ROWs, unless the Director determines that necessary functions are inhibited. Alternatively, a Pedestrian-Oriented Open Space (see **Section 4.C.2**) may be provided on one corner of the intersection unless the Director determines that additional corners are appropriate for public space.

b. On Signature Roads at a street and/or trail intersection, a building must be located within 15 feet of both ROWs, unless the Director determines that necessary functions are inhibited. If the Signature Road intersects a Pedestrian-Oriented Street, the building must orient toward the Pedestrian-Oriented Street.

4.B.1.5. Space between Building and Street Edge

Note, also see TMC Title 18 for setback requirements.

a. On Pedestrian-Oriented Streets, the building should be set as close to the ROW as possible while far enough back from the street edge to allow for a 13-foot sidewalk and planting area. (See **4.B.1.6. Streetscape** below for more detail.)

b. On Signature Roads, building location requirements are as follows:

(1) Front maximum: 10 feet from the right-of-way unless a Pedestrian-Oriented Open Space **(Section 4.C.2)** is provided between the building and the right-of-way.

(2) Front minimum: Enough to allow for an 11-foot sidewalk and planting area (i.e., space between building façade and edge of street). (See **4.B.1.6. Streetscape** below for more detail.)

(3) **Exceptions:** Departures from maximum setbacks may be allowed to preserve existing large trees.

4.B.1.6. Streetscape

a. On Pedestrian-Oriented Streets, development must adhere to the following streetscape standards:

(1) Landscape strip between sidewalk and street:

i. Minimum 5 feet unless the space is constrained and the Director determines that trees in grates meet the intent of buffering pedestrians from the street and enclosing the street with trees. The Director will identify the street edge if there is none existing or if there is a planned street improvement.

ii. The planting strip must include at least one street tree for every 30 feet of street front (average) and ground cover or shrubs conforming to standards in **Section 4.C.3.2**.

(2) Sidewalk: Minimum 8 feet. Wider sidewalks encouraged.

b. On Signature Roads, development must adhere to the following streetscape standards:

(1) Landscape strip between sidewalk and street:

i. Minimum 5 feet

ii. Street trees provided at least every 40 feet (average) on center

(2) Sidewalk: Minimum 6 feet. Wider sidewalks encouraged.

4.B.2. Pedestrian Circulation – Site Planning

INTENT:

- To improve the pedestrian environment by making it easier, safer, and more comfortable to walk between businesses and residences, on street sidewalks, to transit stops, and through parking areas.
- To provide pedestrian facilities such as sidewalks, crosswalks, and bus shelters connecting to all modes of transportation.
- To provide convenient pedestrian circulation connecting all on-site activities to adjacent pedestrian routes and streets.
- To provide access to transit and services.

STANDARDS/GUIDELINES:

4.B.2.1. Pedestrian Circulation

Provide safe, convenient and universally accessible pedestrian circulation for all users. Specifically:

a. Where feasible, provide pedestrian access onto the site from all streets on which the use is located.

b. Buildings must include universally accessible, convenient, clearly identified pedestrian entries.

c. Building entrances must be oriented to and visible from a public right-of-way unless the entrance is oriented to a publicly accessible open space. In either case, a clear pedestrian route must connect the public ROW and primary building entrances.

Figure 4.B.2.1-1. Good example of a clearly identified entrance and pedestrian access from the public street (image: AIA Southwest Washington).

d. For developments with multiple buildings, provide for pedestrian circulation between all buildings and conform to guidelines in **Section 4.C.1**.

e. New developments must provide direct pedestrian access to adjacent properties if the Director determines it is feasible and desirable. Direct pedestrian access to an abutting residential or industrial zone is not required unless the Director determines it benefits both uses.

f. Provide direct pedestrian access to transit, rideshare, and bicycle storage facilities.

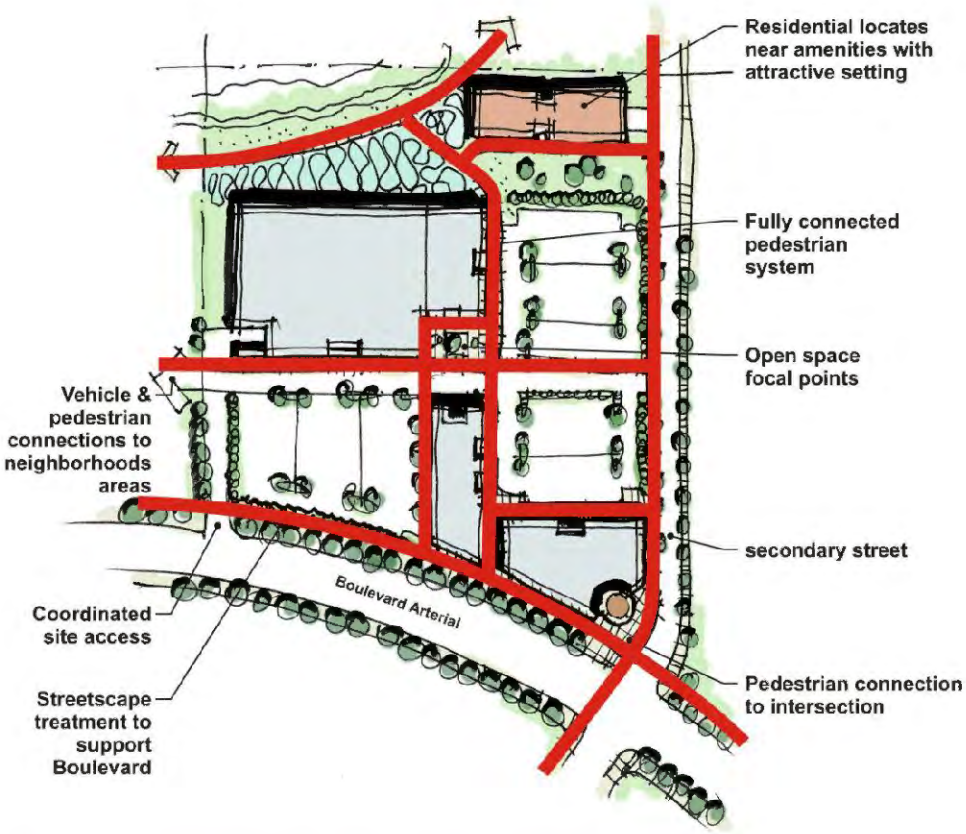

Figure 4.B.2.1-2. Internal and external pedestrian connections are important.

Figure 4.B.2.1-3. Internal pedestrian path connects Green River Community College to retail and parking.

g. New developments shall provide for the opportunity for future pedestrian connections to adjacent properties through the use of pathway stub-outs, building configuration, and parking area layout.

h. Shared pedestrian access, if provided in close proximity to the street, is allowed. One scenario where this would likely be used is where two buildings are built abutting each other and their entrances are directly next to each other at the lot line. The pedestrian access between the two could be a shared inset building entrance area that both businesses can use while still having individual doors to each structure.

See also **Section 4.C Pedestrian Access, Amenities, and Open Space Design**.

4.B.2.2. Adequate Sidewalks and Landscape along Street

On streets other than Pedestrian-Oriented Streets or Signature Roads, development must provide for:

a. A 4-foot minimum landscape strip between the sidewalk and the street with street trees provided at least every 40 feet (average) on center, and

b. A 5-foot minimum sidewalk.

Pedestrian-Oriented Streets and Signature Roads must adhere to **Guideline 4.B.1.6 Streetscape**.

4.B.3. Vehicular Access and Circulation

INTENT:

- To provide better connectivity between sites for more efficient circulation and to ease congestion.
- To minimize cut-through traffic in residential neighborhoods.
- To provide safe and convenient vehicular access routes through large areas by connecting public and/or private roadways and access-ways.
- To enhance the visual character of interior access roads.
- To minimize conflicts with pedestrian circulation and activity.
- To enhance the safety and function of public streets.
- To provide access management on congested streets; i.e., to reduce turning movements that increase congestion and reduce safety.
- To support transit services.

STANDARDS/GUIDELINES:

See also **Section 4.D Parking Area Design** and **Guideline 4.B.1.3** for standards related to parking lot location.

4.B.3.1. Inter-site Connectivity

The provision of through vehicle access connections between non-residentially zoned properties is required except in rare instances where the Director determines it is infeasible or undesirable. Such access may be in the form of a dedicated or private alley, connected or shared parking lots, shared driveways, or similar features. The intent of this guideline is to provide greater connectivity to facilitate

future access to all properties and provide better vehicular circulation. This guideline is not required if the Director determines that such a vehicle connection would significantly hamper safe pedestrian movement.

Figure 4.B.3.1-1. Good example of an institutional campus with inter-site circulation (image: UIS Campus Master Plan).

4.B.3.2. Internal Roadways and Vehicular Circulation

a. Provide street trees and sidewalks on all internal access and private through streets on sites with any dimension 400 feet or greater to increase their function and appearance. Sidewalks widths must be at least 5 feet wide with planting strips at least 4 feet wide and 1 street tree for every 40 feet of street frontage. The Director may require wider sidewalks in situations with high pedestrian volumes (e.g., schools). Sidewalks are required on both sides of the street unless alternative continuous pedestrian access is available for all buildings. If on-street parking is provided and rainwater drainage treated elsewhere, then the planting strip may be replaced with tree pits within the pavement but there must be at least 50 square feet of planting area or permeable pavement per tree to support root functions.

   See **Section 4.F** regarding lighting.

b. Include traffic calming measures such as small traffic circles, raised crosswalks and curb extensions (sidewalk bulbs) to reduce vehicle speed and increase safety.

c. Primary vehicular access to corner lots shall be located sufficiently distant from the intersections to minimize traffic conflicts.

d. The Director may require modification of proposed vehicle access points and internal circulation in order to minimize the potential for cut-through traffic in residential neighborhoods. Specifically, access connecting nearby roads may be required.

Figure 4.B.3.2-1. Pedestrian-oriented access roads are usually needed to provide good circulation to and through large sites.

4.B.4. Service Areas and Mechanical Equipment

INTENT:

- To minimize adverse visual, olfactory, or auditory impacts of mechanical equipment, utility cabinets and service areas at ground and roof levels.
- To provide adequate, durable, well-maintained, and accessible service and equipment areas.
- To protect residential uses and adjacent properties from impacts due to location and utilization of service areas.

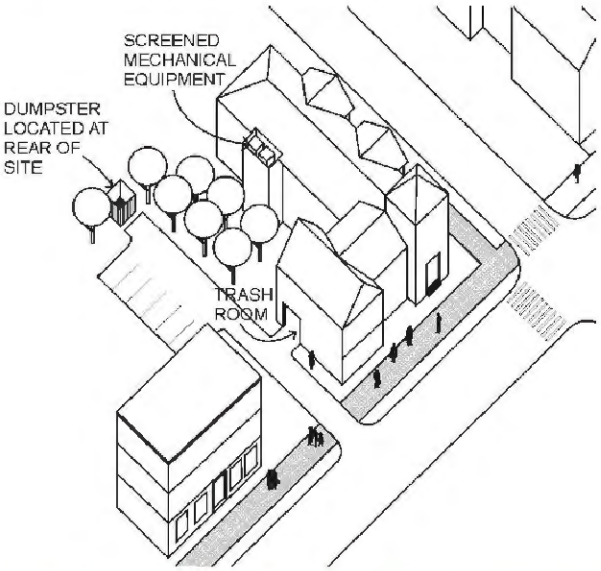

Figure 4.B.4-1. Locate service elements to reduce impacts on the residential and pedestrian environment, and provide appropriate enclosure.

STANDARDS/GUIDELINES:

4.B.4.1. Service Areas, Utilities, and Mechanical Equipment

Reduce impacts of refuse containers and storage areas through the following implementation measures:

a. Service areas (loading docks, trash dumpsters, compactors, recycling areas, electrical panels, and mechanical equipment areas) shall be located to avoid negative visual, auditory (noise), olfactory, or physical impacts on the street environment and adjacent residentially zoned properties. The City may require evidence that such elements will not significantly impact neighboring properties or public areas. (For example, the City may require noise damping specifications for fans near residential zones.) Service areas shall be sited for alley access if available.

b. Exterior loading areas shall not be located within 20 feet of a single family residentially zoned property, unless the Director finds such a restriction does not allow feasible development. In such cases, the areas and drives will be separated from the residential lot by a masonry wall at least 8 feet high. Internal service areas may be located across the street from a single family residential zone.

c. Service areas must not be visible from the sidewalk and adjacent properties. Where the City finds that the only option for locating a service area is either visible from a public right-of-way or space or from an adjacent property, the area must be screened with either landscape or structural screening measures provided in **Section 4.B.4.2**.

d. Ground-mounted mechanical equipment must be located and screened to minimize visual and noise impacts to pedestrians on streets and adjoining properties

e. Roof-mounted mechanical equipment must be located and screened so the equipment is not visible from the ground level of adjacent streets or properties within 20 feet of the structure. If the adjacent street or properties are topographically higher than the industrial lot ground level so that complete screening is not feasible, equipment location and screen should be used to hide the equipment to the maximum extent practical, and screening should be used to hide the equipment to the maximum extent practical. Match the color of roof mounted equipment with the exposed color of the roof to minimize visual impacts when equipment is visible from higher elevations nearby. If the adjacent street or properties are topographically higher than the lot ground level so that complete screening is not feasible, equipment location and screening should be used to hide the equipment to the maximum extent practical.

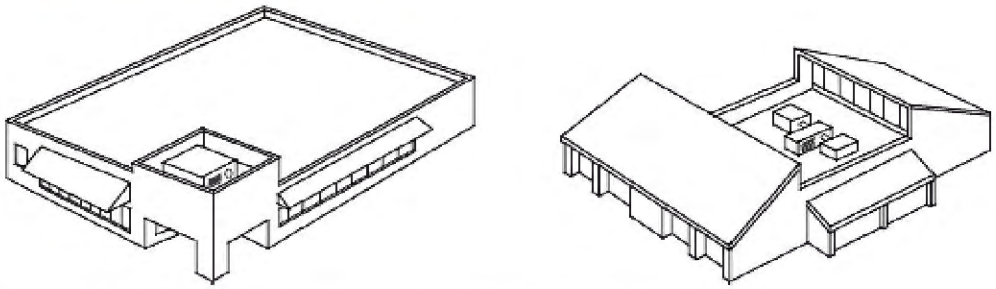

Figure 4.B.4.1-1. Examples of how to screen roof-mounted mechanical equipment.

f. Locate and screen utility meters, electrical conduit, and other service and utilities apparatus so they are not visible from adjoining properties and nearby streets.

Other provisions of **Section 4.B.4.1** notwithstanding, service areas used by residents shall be located to avoid entrapment areas and other conditions where personal security is a problem. The Director may require pedestrian-scaled lighting or other measures to enhance security.

While exterior service areas must be screened, screening requirements may be reduced by the Director at access points for service areas inside buildings.

In addition to the required screening, art work such as paint schemes or coverings that help to blend the equipment into the background may also be utilized.

g. Locate and/or shield noise producing mechanical equipment such as fans, heat pumps, etc to meet State law provisions (WAC 173-60).

h. All on-site utilities including wires and pipes must be located underground. Meters may be attached to buildings. Project proponents are required to coordinate with the local electric utility provider to locate electrical service facilities in the least obtrusive way.

4.B.4.2. Screening of Service Areas and Mechanical Equipment

Where screening of service areas is called for, adhere to the following:

a. A structural enclosure shall be constructed of masonry, heavy-gauge metal, or decay resistant composite wood and have a roof. The walls must be sufficient to provide full screening from the affected roadway or use. The enclosure may use overlapping walls to screen dumpsters and other materials (see photos). Gates shall be made of heavy-gauge, site obscuring material.

b. Collection points shall be located and configured so that the enclosure gate swing does not obstruct pedestrian or vehicle traffic, or does not require that a hauling truck project into any public right-of-way.

c. The service area shall be paved.

d. Weather protection of recyclables, trash, and compost/yard waste shall be ensured by using weather-proof containers or by providing a roof over the storage area.

e. In addition to the required screening, art work such as paint schemes or coverings that help to blend the equipment into the background may also be utilized.

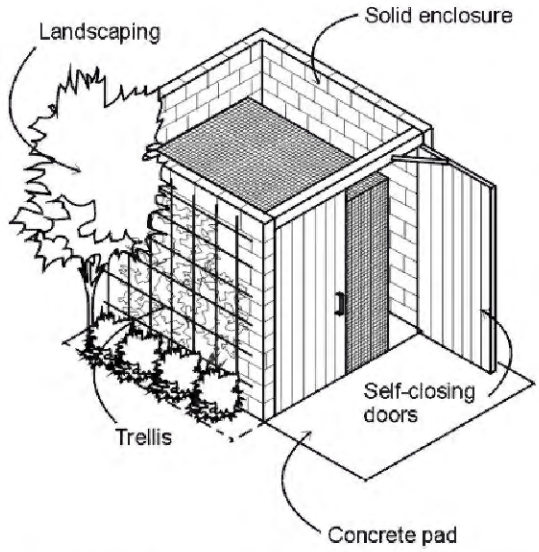

Figure 4.B.4.2-1. Examples of acceptable dumpster enclosures.

4.B.5. Stormwater Facility Planning

INTENT:

- To comply with stormwater management requirements as outlined in the Tumwater Drainage Manual and the City's NPDES permit, which requires Low Impact Development measures to be applied unless it is documented to be infeasible.
- To integrate low impact development stormwater management/water quality systems into the site design as an amenity.
- To reduce the economic burden of stormwater management systems on developments.
- To encourage creative use and cost-effective stormwater management solutions for new development.

STANDARDS/GUIDELINES:

4.B.5.1. Compliance with City Stormwater Manual.

Adhere to the City of Tumwater Stormwater Management standards in TMC 13.12.020. The following guidelines are intended to supplement the SWM regulations.

4.B.5.2. Integration of Stormwater Facilities into Site Design

Where feasible, integrate biofiltration swales, rain gardens, stormwater planters, and other low impact development stormwater management measures into the overall site design. Manage stormwater as close to its origin as possible by utilizing small scale, distributed hydrologic controls. Locate them so they don't impede pedestrian circulation. Examples of filtration methods are listed below:

a. Incorporate the biofiltration system, including low-impact development (LID) features, as part of the landscape features of the development. If the biofiltration system is incorporated into the landscaping of the site's open space, then, upon approval of the

Director, the stormwater facility may be counted as part of the required open space or landscaping.

b. Maximize retention of native forest cover and vegetation and restore disturbed vegetation to intercept, evaporate and transpire precipitation.

c. Preserve permeable, native soil, and enhance disturbed soil to store and infiltrate stormwater.

d. Reduce hard surfaces, total impervious surface areas and increase retention of native vegetation.

Figure 4.B.5.2-1. A preferred method of handling stormwater is through retention systems, such as rain gardens, incorporated as site amenities. Other low-impact development techniques are encouraged, and in many cases, required (image: AIA).

Figure 4.B.5.2-2. Green roofs can be used to hold and treat rainwater in ways that mimic natural systems.

e. Locate biofiltration swales, ponds, or other approved biofiltration systems as part of a landscape screen.

f. Where topography is favorable, locate the biofiltration swale, wet pond, or other approved biofiltration system within the paved parking or service area to, and integrate it into the required internal parking area landscaping. Consider use of permeable pavements and asphalts to reduce impervious areas.

g. Use native, drought tolerant plants and/or appropriate plant species as approved by the Director.

h. Include the stormwater facility as an amenity.

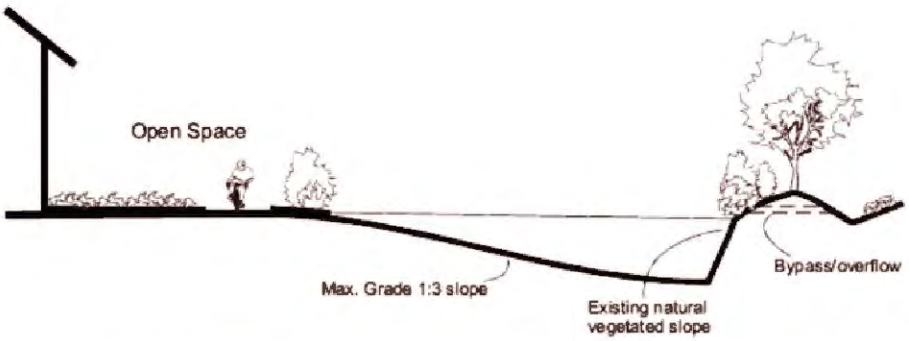

Figure 4.B.5.2-3. Examples of stormwater facilities treated as amenities (top left image: ASLA, top right: Albert Vecerka/Esto).

4.B.6. Site Planning for Security

INTENT:

- To increase personal safety and property security.

STANDARDS/GUIDELINES:

4.B.6.1. Prohibitions

In site development planning, avoid:

a. Entrapment areas, where a person could become trapped with no exit route. Provide two means of egress from all outdoor spaces. Ensure entrapment conditions are avoided in the design of rooftop decks.

b. Areas that are dark or not visible from a public space or right-of-way.

c. Vegetation and fences that restrict visibility into occupiable open space, pathways and building entries.

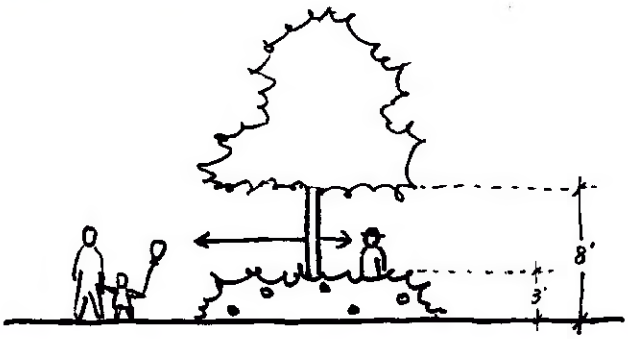

Figure 4.B.6.1-1. Keep landscaping open between 3 feet and 8 feet above grade where there is the need for visibility.

d. Buildings, vegetation, or other objects (e.g., a storage enclosure) that block visibility into a space or provide places to hide.

e. Screens or landscaping that blocks motorists' views of pedestrians crossing streets, driveways, and vehicular circulation areas.

f. Where visibility is necessary to avoid creating an unsecure area to reduce the potential for pedestrian/vehicle collisions, do not plant vegetation that will obstruct views between 3 feet and 8 feet above the ground. (See **Figure 4.B.6.1-1.**)

4.B.6.2. Desirable Elements

In the planning of the site and design of buildings and site elements, to the extent feasible provide for:

a. "Passive surveillance," the ability of people occupying buildings and public spaces to view all parts of accessible spaces.

b. Security and pedestrian lighting per **Guideline 4.F.1.1.**

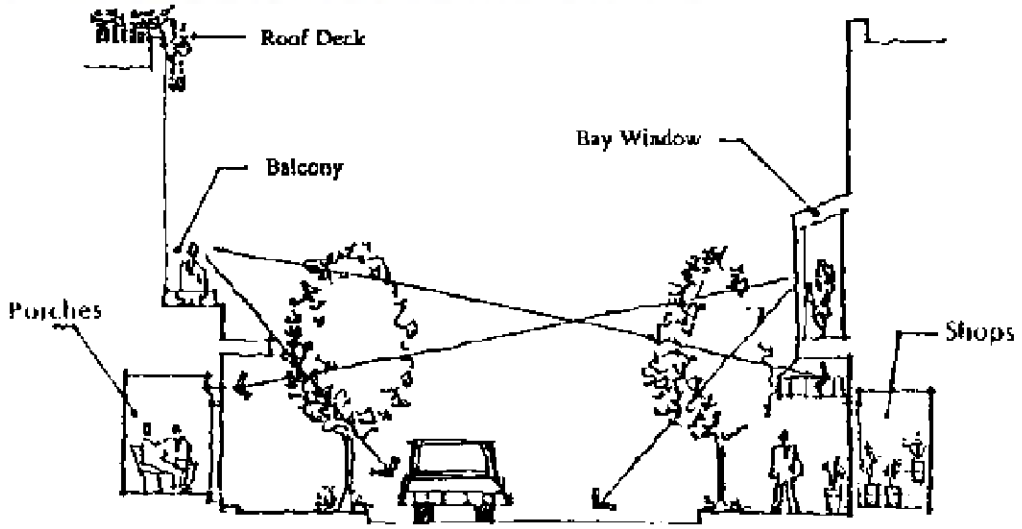

Figure 4.B.6.2-1. Passive surveillance or the ability of people in buildings or traveling along roadways to see outdoor spaces, increases security.

c. Appropriate natural access control, that is, features that delineate where the general public should not enter without an invitation. For example, a low fence or hedge can indicate that people should not enter a yard or open space except through a gate or opening. Access control should not limit visibility or passive surveillance.

d. Defining territory. This means clearly indicating through site planning and design measures what parts of the site are open to the public and what parts are not. For example, pedestrian-oriented elements and walkways indicate that the public is welcome but fenced areas with a gate do not. Also, well maintained sites indicate that someone cares for the site and tends to discourage crime.

4.B.6.2-2. Green River Community College incorporates passive surveillance, territorial definition, active ground floors, and good visibility and lighting to provide a secure open space in front of their building.

4.C. Pedestrian Access, Amenities, and Open Space Design

4.C.1. Internal Pedestrian Paths and Circulation

INTENT:

- To provide safe and direct pedestrian access that accommodates all pedestrians, minimizes conflicts between pedestrians and vehicular traffic, and provides pedestrian connections to neighborhoods.
- To accommodate non-competitive/non-commuter bicycle riders who use bicycles on short trips for exercise, recreation and convenience.
- To provide attractive internal pedestrian routes that promote walking and enhance the character of the area.

STANDARDS/GUIDELINES:

4.C.1.1. Pedestrian Circulation – General Design

a. For safety and access, landscaping shall not block visibility to and from a path, especially where it approaches a roadway or driveway.

b. Pedestrian walks shall be separated from structures at least 3 feet for landscaping except where the adjacent building features a Pedestrian-Oriented Façade per **Section 4.E.2**. The Director may consider other treatments to provide attractive pathways. Examples include sculptural, mosaic, bas-relief artwork, or other decorative treatments that meet the guidelines intent.

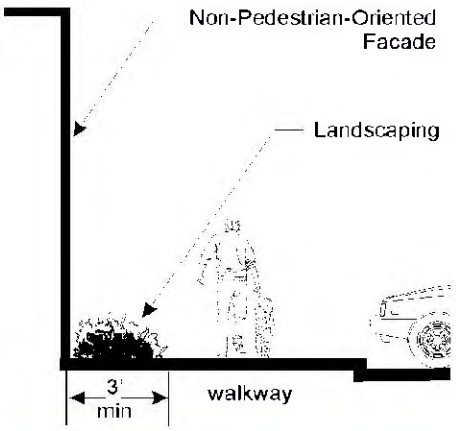

Figure 4.C.1.1-1 Provide landscaping between walkways and structures except in front of Pedestrian-Oriented Façades.

Figure 4.C.1.1-2. This university interior pathway features landscaping and seating on one side, a Pedestrian-Oriented Façade on the other, and special pedestrian lighting (image: Northwest Metabolomics Medical Research Center).

Figure 4.C.1.1-3. Snoqualmie City Hall uses landscaping that also treats stormwater between the street and building and street trees in grates to provide a pleasant pedestrian path to the entrance.

c. For interior pathways, the applicant must demonstrate to the Director's satisfaction that the proposed walkway is of sufficient width to accommodate the anticipated number of users. For example, a 10- to 12-foot wide pathway can accommodate two couples passing one another. An 8 foot wide pathway will accommodate three persons walking abreast, while a 6-foot wide pathway will allow two individuals to pass comfortably. If a sidewalk abuts a building façade that has a ground floor entry, the pathway (i.e. sidewalk) must be at least 8 feet wide.

d. Public pathways must be American with Disabilities Act (ADA) compliant.

e. When a pedestrian path is between the façade and a parking area, trees, as approved by the Director, must be placed at an average of 30 feet on-center. Breaks in the tree coverage will be allowed near major building entries to enhance visibility. However, no less than 1 tree per 60 lineal feet of building façade must be provided.

f. Lighting must conform to **Section 4.F.1.**

4.C.2. Pedestrian-Oriented Open Space

INTENT:

- To provide a variety of pedestrian areas to accommodate customers on Pedestrian-Oriented Streets.
- To provide safe, attractive, and usable open spaces that promote pedestrian activity and recreation.

STANDARDS/GUIDELINES:

4.C.2.1. Pedestrian-Oriented Open Space

Where "Pedestrian-Oriented Open Space" is provided, including, but not limited to, areas required in these guidelines (see **Section 4.B.1 Relationship to Street Front**) or in Title 18 TMC, design the open space according to the following criteria. If sidewalks are wider than the required minimum width, the additional sidewalk width may be counted as Pedestrian-Oriented Open Space.

a. Required Pedestrian-Oriented Open Space features:

(1) Visual and pedestrian access (including ADA compliant access) into the open space from a street, private access road, or non-vehicular courtyard.

(2) Visual access from the interior of the building (i.e., maximize "eyes on the space").

(3) Paved walking surfaces of either concrete or approved unit paving.

(4) Lighting must conform to **Section 4.F.1 Site Lighting**.

(5) Spaces must be located in or adjacent to areas with significant pedestrian traffic to provide interest and security, such as adjacent to or visible from a building entry.

Figure 4.C.2.1-1. This college provides a plaza with seating and trees in a high use pedestrian area (image: Perkins+Will).

(6) At least 2 feet of seating area (a bench or ledge at least 16 inches deep and appropriate seating height) or one individual seat per 60 square feet of plaza area or open space.

(7) Landscaping components that add visual interest and do not act as a visual barrier. This could include planting beds, potted plants, or both.

b. Desirable Pedestrian-Oriented Open Space features:

(1) Pedestrian amenities, such as a water feature, site furniture, artwork, drinking fountains, kiosks, or other similar features.

(2) Adjacent buildings with transparent window and doors covering 75 percent of the façade between 2 feet and 8 feet above the ground level.

(3) Solar access at least during noon and afternoon hours during winter, and appropriate shade during summer.

(4) Pedestrian weather protection, alcoves, seating, or other features along building edges to allow for outdoor seating areas and a planted buffer.

c. A Pedestrian-Oriented Open Space must not have:

(1) Asphalt or gravel pavement.

(2) Adjacent parking areas or service areas (e.g., trash areas) that are not separated with landscaping, as described in **4.D.2.2 and 4.B.4.2.**

(3) Adjacent chain-link fences.

(4) Adjacent "blank walls" without "blank wall treatment."

(5) Outdoor storage that does not contribute to the pedestrian-oriented environment.

(6) Vehicle travel through the area.

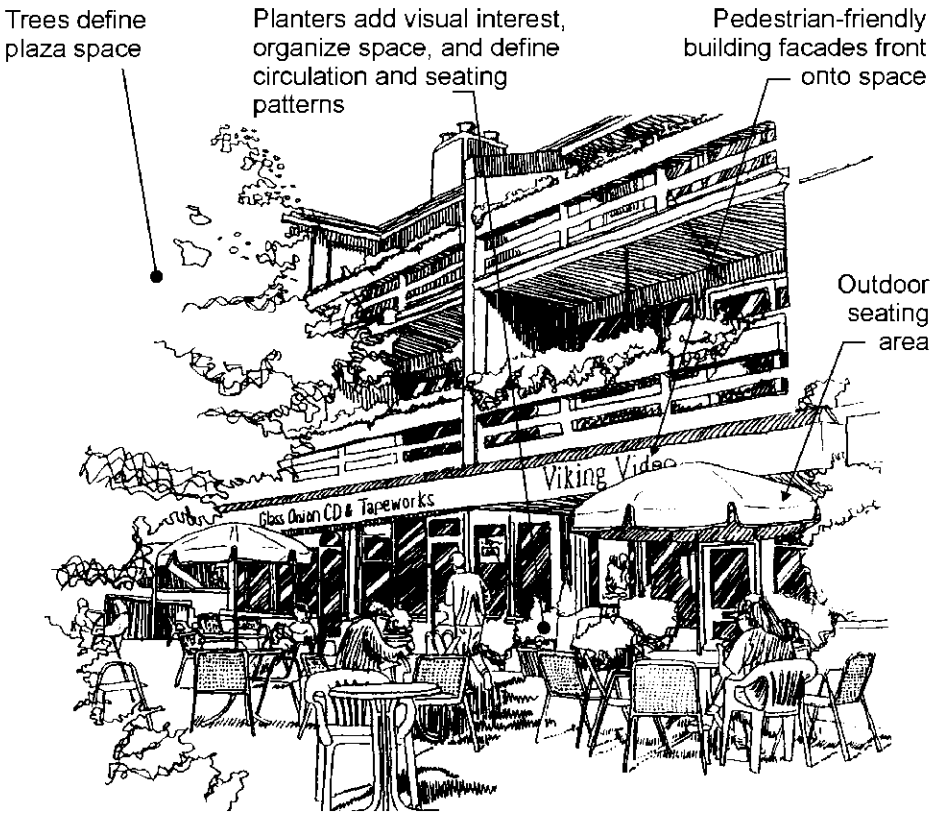

Figure 4.C.2.1-2. Example of a small Pedestrian-Oriented Open Space.

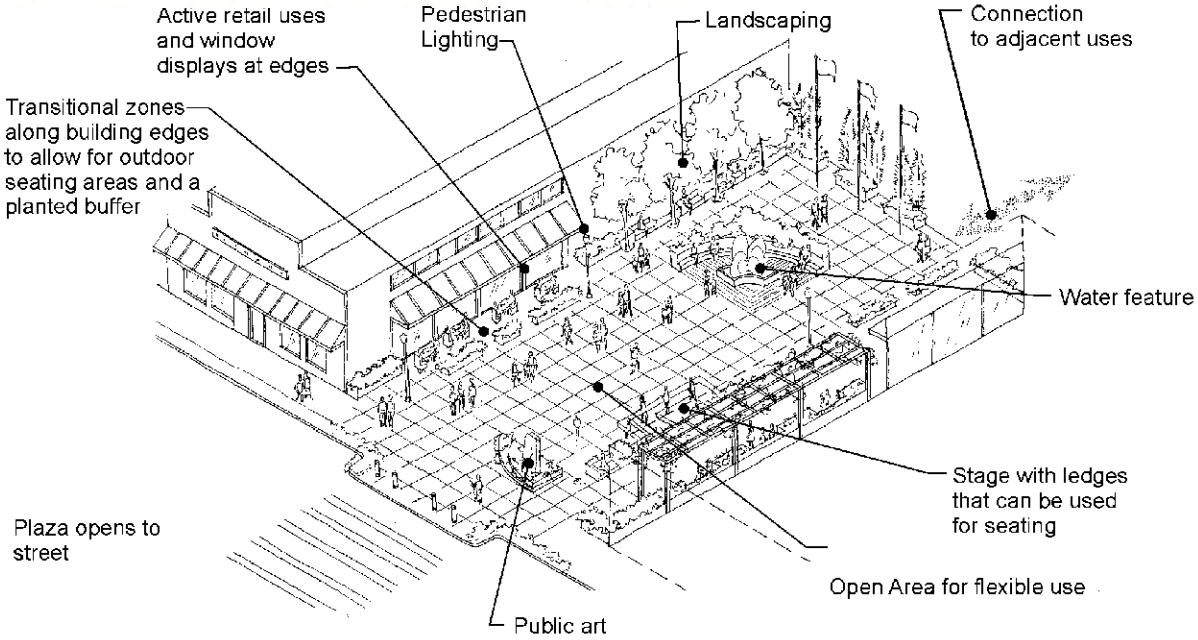

Figure 4.C.2.1-3. Example of a large Pedestrian-Oriented Open Space.

4.C.3. Site Landscaping

INTENT:

- To encourage the abundant use of landscaping in site and development design to improve site aesthetics, enhance the pedestrian experience, and increase environmental quality.
- To reduce surface water runoff by percolating water through landscaped areas.
- To maintain and improve privacy for residential zones.
- To enhance buildings and open spaces.
- To make adjacent uses more compatible
- To provide visual relief from roadways, parking areas, and the built environment.

STANDARDS/GUIDELINES:

4.C.3.1. Reference to TMC 18.47

The landscaping standards of TMC 18.47 shall apply. These standards are intended to supplement those standards.

4.C.3.2. Landscaping – General standards for all landscape areas

All new landscape areas proposed for a development shall be subject to the following provisions:

a. Berms shall not exceed a slope of two horizontal feet to one vertical foot (2:1).

b. Group plants having similar water use characteristics.

c. Plant selection shall consider adaptability to sun exposure, soil conditions, and the topography of the planting area. Preservation of existing vegetation is encouraged.

d. Install no plants included in the Thurston County Noxious Weed list.

e. All plants shall conform to American Association of Nurserymen (AAN) grades and standards as published in the "American Standard for Nursery Stock" manual; provided that existing healthy vegetation used to augment new plantings shall not be required to meet the standards of this manual.

f. Street trees and trees internal to the development shall conform to the standards in the Tumwater Comprehensive Street Tree Plan.

g. When the width of any landscape strip is 20 feet or greater, the required trees shall be staggered in two or more rows.

h. Shrubs shall be dwarf varieties unless demonstrated that other varieties can thrive if maintained at 42 inches. Shrubs shall also be as follows:

   (1) At least an AAN container Class No. 2 size at time of planting in Type II, III and parking area landscaping;

   (2) At least 24 inches in height at the time of planting for Type I landscaping; and

i. Shrubs shall be perennials.

j. Groundcovers shall be planted and spaced to result in total coverage of the majority of the required landscape area within three years.

k. All fences shall be placed on the inward side of any required perimeter landscaping along the street frontage. That is, place the required landscaping to face the public street or open space. Exception: Where the fence separates a public street from a required common open space, the Director will determine on which side the landscaping is to be installed.

l. Required street landscaping may be placed within City of Tumwater street rights-of-way subject to the permission of the City of Tumwater director of public works.

m. Required street landscaping may be placed within Washington State rights-of-way subject to permission of the Washington State Department of Transportation.

n. New landscape material provided for vegetation restoration or mitigation requirements and within areas of undisturbed vegetation or within the protected area of significant trees shall give preference to utilizing western Washington native plant species.

4.C.3.3. Landscaping – Plan Design, Design Review, and Installation

A landscape plan must be submitted to the Director that complies with TMC 18.47 and the standards contained in **Section 4.C.3** of these standards. Where conflicts occur, these standards control.

4.C.3.4. Maintenance

a. All landscaping shall be maintained for the life of the project, including water conservation practices for turf grass such as annual aeration and dethatching, top dressing and over seeding;

b. All landscape materials shall be properly pruned by a trained specialist and trimmed as necessary to maintain a healthy growing condition or to prevent primary limb failure;

c. Plantings next to buildings shall be trimmed to provide at least 12 inches of clear space between the building and vegetation.

d. With the exception of dead, diseased or damaged trees specifically retained to provide wildlife habitat, other dead, diseased, damaged, topped, or stolen plantings shall be replaced within three months or during the next planting season if the loss does not occur in a planting season; and

e. Landscape areas shall be kept free of trash, mulched, and weeded.

4.C.3.5. Landscape Character

a. Tumwater's signature landscape setting is characterized by large, mature conifer trees surrounded by relatively flat expanses of grass or low vegetation, such as at the civic campus around City Hall and the Fred Meyer and Costco vicinity on Littlerock Road. The community has indicated that this landscape is very important to the city's visual quality and design identity so that maintaining existing mature evergreen trees and including

existing and new evergreens in site development is an important objective. The Director may require that development proposals be modified to conserve large (8 inch diameter or larger), healthy evergreen trees. When appropriate, the Director may also relax other standards such as setbacks and geometric requirements in order to promote the retention of mature trees.

The applicant shall meet setback and root protection requirements as deemed necessary by the Director to maintain the tree's health.

Figure 4.C.3.5-1. Informal clusters of mature conifer trees are a signature element of Tumwater's landscape and are well-suited to the area's glacial soils.

b. Where possible, minimize the disturbance of native vegetation and soils. Native soil retention may be incorporated into low impact development (LID) measures for stormwater management.

c. Unless there is a compelling reason to the contrary, concentrate ornamental vegetation near pedestrian areas and building entries where it can be most appreciated.

d. As a general observation, Tumwater's landscape design character emphasizes naturalistic, informal layouts that are similar to early 20th century parks designed by the Olmsted Brothers.

e. Other design features associated with landscaped open space should emphasize pedestrian scale and qualities generally consistent with the features noted in **Section 4.C.2.1 Pedestrian-Oriented Open Space**.

4.D. Parking Area Design

4.D.1. Parking Area Design

INTENT:

- To provide safe and convenient pedestrian paths from the street sidewalk through parking areas to building entries in order to encourage pleasant walking experiences between businesses.
- To provide an inviting, pleasant pedestrian circulation system that integrates with parking and serves as access to nearby businesses.

STANDARDS/GUIDELINES:

Parking areas must comply with TMC 18.50 and the landscaping standards for parking areas in TMC 18.47. In addition to these requirements, parking areas must comply with the following standards.

4.D.1.1. Parking along Street Fronts

Parking lots may occupy up to 50% of the street front or 130 feet, whichever is greater, unless an alternative orientation is approved by the Director based on a demonstrated functional need and character enhancement of the street (e.g., through extensive landscaping). Pedestrian-Oriented Streets and Signature Roads must follow **4.B.1.3 Parking Orientation**.

4.D.1.2. Pathways through Parking Areas

Developments must provide specially marked or paved walkways through parking areas. Generally, walkways must be provided at least every four rows or at least every 180 feet. Where possible, align the pathways to connect with major building entries or other sidewalks, pathways, and destinations. The walkway must be at least 4 feet wide (clear) excluding vehicle overhang.

Figure 4.D.1.2-1. Parking area pathway examples.

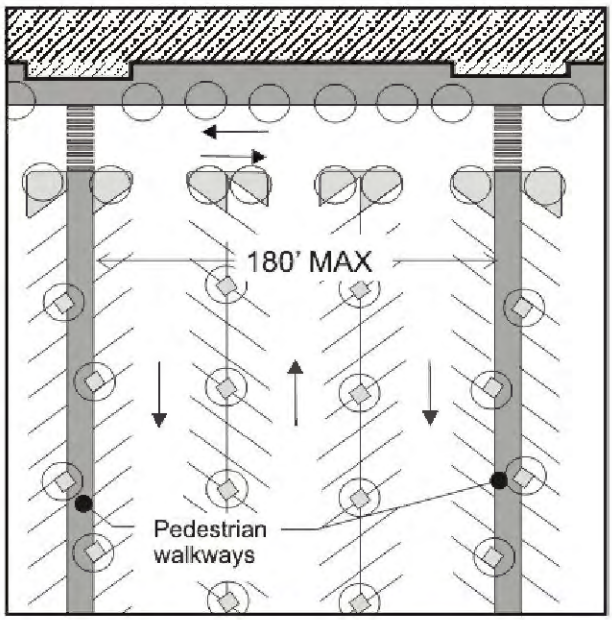

Figure 4.D.1.2-2. Sample parking area pathway configuration.

4.D.2. Parking Area Landscaping

INTENT:

- To reduce the visual presence of parking on the City's streets, public space and adjacent development.
- To increase tree canopy cover for environmental and aesthetic benefits.
- To improve water quality and improve stormwater management.

STANDARDS/GUIDELINES:

4.D.2.1. Interior Parking Area Landscaping

Parking area landscaping shall be provided within surface parking areas with 20 or more parking stalls for the purpose of providing shade, diminishing the visual impacts of large paved areas, and providing stormwater management. Permeable asphalt, concrete and pavers, and island and planter strips designed to work as rain gardens for stormwater management, with sloped grading and curb cuts are encouraged. Surface parking areas shall be as follows:

a. Developments with common parking areas with more than 20 stalls shall provide planting areas at the rate of 20 square feet per parking stall;

b. Trees shall be provided and distributed throughout the parking area at a rate of one tree for every 10 parking stalls. Existing trees may be counted to satisfy this requirement. Mature conifer trees over 24 inches in caliper may count as 2 trees.

c. The maximum distance between any parking stall and landscaping shall be no more than 100 feet;

d. Permanent curbs or structural barriers shall be provided to protect the plantings from vehicle overhang and curb cuts shall be provided in these barriers to allow surface water to flow into landscaped areas.

e. Parking area landscaping shall consist of:

(1) Canopy-type deciduous trees, coniferous trees, broadleaf evergreen trees, evergreen shrubs, perennials, and groundcovers planted in islands or strips. Once trees have matured to a sufficient height, the bottom branches shall be trimmed to an 8 foot height to provide for visibility for security and light to lower vegetation;

(2) Shrubs planted at a rate of one per 20 square feet of landscaped area and maintained at a height of no more than 42 inches;

(3) Plantings contained in planting islands or strips having an area of at least 100 square feet and with a narrow dimension of no less than five feet;

(4) Groundcover pursuant to **Section 4.C.3.2**. And,

Figure 4.D.2.1-1. A Portland Middle School's parking area landscaping also serves stormwater purposes.

f. Landscaping shall be maintained at heights for safe visibility between vehicles and pedestrians.

4.D.2.2. Parking Area Screening

Parking area screening shall be provided between the sidewalk and parking areas, with either a or b as follows:

a. Any of the alternatives identified in TMC 18.47.D, or those listed in "b" below;

b. Provide a 5-foot wide planting bed, at least 5 feet wide, that incorporates a continuous low wall (approximately 3 feet tall) and/or trellis. The planting bed shall be in front of the wall, provide irrigation and feature the following plantings:

   (1) A mix of deciduous and evergreen trees generally interspersed throughout the landscape strip and spaced to create a continuous canopy. Alternatively, a trellis and shrubs, as in **Figure 4.D.2.2-1**, may be substituted for the trees.

   (2) Unless the trellis option is chosen, trees provided at the rate of one per 25 linear feet of landscape strip and spaced no more than 30 feet apart on center.

   (3) Shrubs provided at the rate of one per 20 square feet of landscape strip and spaced no more than 8 feet apart on center.

   (4) Perennials per **Section 4.C.3.2**.

   (5) Groundcover per **Section 4.C.3.2**.

   The wall shall be constructed of brick, stone, decorative concrete or concrete block, or other permanent material that provides visual interest and helps to define the street edge as determined by the Director. (See **Figure 4.D.2.2-1** for an example). The wall and bed must be relatively continuous but may feature breaks at key points for pedestrian access.

Figure 4.D.2.2-1. Parking area planting buffer with low wall and trellis.

4.E. Building Design

4.E.1. Building Design - Character

GENERAL NOTES:

- Many of these building design guidelines call for a building to feature one or more elements from a menu of items. In these cases, a single element, feature, or detail may satisfy multiple objectives. For example, a specially designed or fabricated covered entry with attractive detailing might be counted toward requirements for human scale, building corners, and building details.
- The terms "decorative" and "ornamental" are not necessarily meant to mean "characterized by traditional patterns, nonstructural elements, or applied markings." Elements may be considered "decorative," "ornamental," or "special" if they extend beyond the typical level of quality, use materials or forms in an unusual way, or show special architectural consideration. The Director shall determine what elements are "ornamental," "decorative," or "special."

INTENT:

- To provide building design that has a high level of design quality and creates comfortable human environments.
- To incorporate design treatments which add interest and reduce the scale of large buildings.
- To encourage building design that is within the historic character of Tumwater but responsive to site conditions.
- To encourage functional, durable, and environmentally responsible buildings.
- To enhance Tumwater's design identity.

GUIDELINES:

4.E.1.1. Architectural Character

Tumwater's architectural character and design identity predominantly reflects the middle-class heritage with the residential vernacular corresponding to major periods of growth in the 1930's, 1950's, 1970's, and 2000's. Although a historic community with a long-history in Washington, there are a small number of 19th century houses and structures and no defined historic downtown. The existing architectural character is framed by the historically influenced non-residential buildings including the brewery, civic campus and new government office buildings. These buildings all feature traditional materials, generally brick and stucco, and traditional forms such as gable roofs, multiple windows (rather than large expanses of glass), arches, towers, and enhanced entries. There are also some prominent Art Deco era structures in Tumwater, notably the Capitol Boulevard Bridge and the original WSDOT buildings that could serve as a stylistic reference. Historically, Highway 99 through the City had a unique architectural style that flourished from the 1930's to 1970's. Only a few examples remain, including the former Jakes

Auto Sales and the South Pacific Restaurant. On the other hand, as a growing community, Tumwater will need to encourage new building types and technologies as the city evolves over time. And, the other important design characteristic noted by public participants in the preparation of these design guidelines is the signature landscape palette consisting of large conifer trees surrounded by low lying and native vegetation or ornamental landscaping near pedestrian-oriented areas and building entries. There was also desire to see indigenous materials, such as basalt stone and timber, integrated into designs. These observations are the basis for the following guidelines.

a. The architectural design of new development must reflect and add to Tumwater's design character in one or more of the three ways described below.

(1) Incorporate distinctive and substantial landscaping to enhance the building's setting. In this approach, the landscaping or site features must be the predominant visual element and the building forms and character be relatively subdued. Retention of a substantial number of large trees, especially native trees such as conifers, is one means to accomplish the objectives of this approach. Another might be to install landscape features that are more than required by **Section 4.C.3.2** and include pedestrian-oriented open space to the extent that those elements and human activity become the dominant visual features. Extensive landscaping and subdued forms will likely be the most appropriate approach for industrial buildings.

Figure 4.E.1.1-1. A successful application of approach 1: substantial landscaping.

(2) Reflect the traditional style of architecture by featuring gabled roofs, traditionally scaled and vertically oriented windows, use of brick (at least on the ground floor) covered entries with porches or other weather protection, break-up of large building façades, and rectilinear or circular forms. This approach is typified by brewery, civic campus and new government office buildings. Buildings that reflect Art Deco styling with flat surfaces, linear detailing and building elements, and geometric forms may also be appropriate. Similarly, on the Capitol Blvd. Corridor, designs that build on the historic Highway 99 architecture may be appropriate for certain uses which can build on that history.

Figure 4.E.1.1-2. Tumwater City Hall exemplifies approach 2: traditional forms and materials (image: KOMO News).

(3) Feature contemporary forms and architectural treatments that respond to the uniqueness of the site and building use. If this approach is used, the building materials must be of demonstrably high quality, the design exhibit a high level of application of the guidelines in **Section 4.E Building Design**, and indigenous materials used as primary materials or accents.

Figure 4.E.1.1-3. A successful application of approach 3: contemporary forms and treatments (image: Mike Jensen).

b. At least one of the three approaches described above must be achieved. The Director will determine whether or not the proposal meets the objectives.

4.E.2. Pedestrian-Oriented Façades

INTENT:

- To create a safe, attractive, welcoming pedestrian environment.

STANDARDS/GUIDELINES:

4.E.2.1. Pedestrian-Oriented Façades

Where Pedestrian-Oriented Façades are used, the building shall meet the following:

a. Transparent window areas or window displays or a combination of sculptural, mosaic, or bas-relief artwork and transparent window areas or window displays over at least 75 percent of the ground floor façade between 2 feet and 8 feet above grade. The windows may look into the building's interior or be configured as display windows. The building must be designed so that the windows satisfying the requirement for Pedestrian-Oriented Façades do not look into service or storage areas or other unsightly rooms.

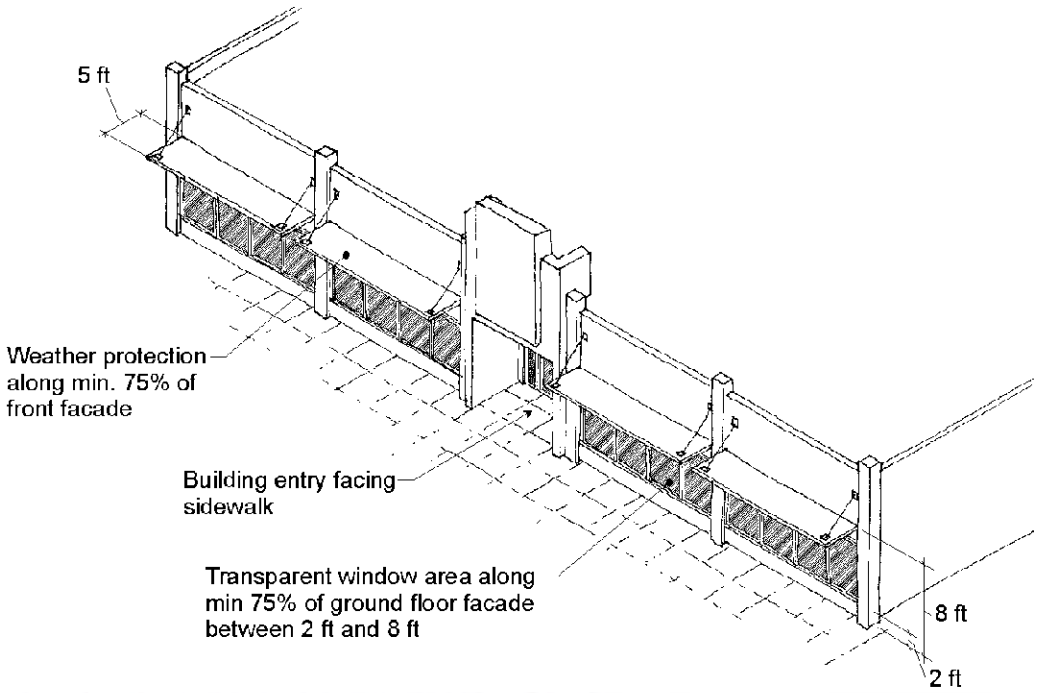

Figure 4.E.2.1-1. An example of a pedestrian-oriented façade.

a. A primary building entry facing the streetfront. (See **Section 4.E.4** for entry enhancement requirements.)

b. Weather protection at least 5 feet wide over at least 65 percent of the front façade.

4.E.3. Blank Walls

INTENT:

- To reduce the visual impact of large, undifferentiated walls.
- To reduce the apparent size of large walls through the use of various architectural and landscaping treatments.
- To ensure that all visible sides of buildings provide visual interest.

STANDARDS/GUIDELINES:

4.E.3.1. Blank Walls

All blank walls (see **Chapter 7 Definitions**) within 50 feet of the street, pedestrian pathway, park, or adjacent property, and also visible from that street, pedestrian pathway, park, or adjacent property, shall be treated in one or more of the following measures:

a. Install a vertical trellis in front of the wall with climbing vines or plant materials. For large blank wall areas, the trellis must be used in conjunction with other treatments described below;

b. Provide a landscaped planting bed, large container plants, or a raised planter bed in front of the wall of sufficient size to support plant materials that will obscure or screen at least 50 percent of the wall's surface within 4 years;

c. Provide artwork (mosaic, mural, sculpture, relief, etc.) over at least 50 percent of the blank wall surface;

d. Other method as approved by the Director. For example, landscaping or other treatments may not be necessary on a wall that employs high quality building materials (such as brick) and provides desirable visual interest.

e. Special architectural lighting, subject to **Section 4.F.1** and TMC, may be used to highlight a successful treatment.

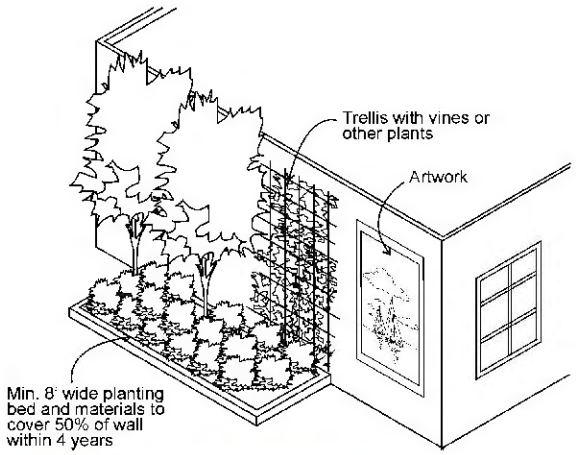

Figure 4.E.3.1-1. Blank wall treatments.

Figure 4.E.3.1-2. Terraced planting beds, artwork and landscaping can effectively treat a blank wall.

4.E.4. Building Entrances

INTENT:

- To ensure that buildings are inviting and accessible.
- To encourage pedestrian activity.
- To highlight and accentuate the entrance.

STANDARDS/GUIDELINES:

4.E.4.1. Principal Building Entrances

The principal building entrances (i.e., the building entrance used by visitors, employees, students, etc.) of all buildings shall feature all of the following improvements:

a. Pedestrian covering. Building entrances must be covered by at least 50 square feet of pedestrian weather protection. Entries may satisfy this requirement by being set back into the building façade.

b. Lighting. Lighting shall conform to **4.F.1. Site Lighting.**

c. Building or business name. Entries must be identified with respect to building and/or business.

d. Visibility. Building entrances must be visible from the roadway and major public pedestrian pathway.

e. Transparency. Entries must feature glass doors, windows, or glazing (window area) near the door so that the visitor and occupant can view people opening the door from the other side.

f. Security. To the extent feasible, entries must be visible from areas with high pedestrian activity or where residents can view the entry (passive surveillance).

g. Address number.

h. Architectural or artwork enhancements. Building entrances must be enhanced by one or more of the following measures. Entrances on Pedestrian-Oriented Streets must feature two of the following measures.

(1) Special or ornamental doors, windows, or other architectural elements.

(2) Special paving or materials (e.g., decorative tile work).

(3) Special architectural lighting subject to **4.F.1 Site Lighting** and TMC.

(4) Landscaping.

(5) Artwork.

(6) Adjacent Pedestrian-Oriented Open Space.

(7) Other enhancements approved by the Director.

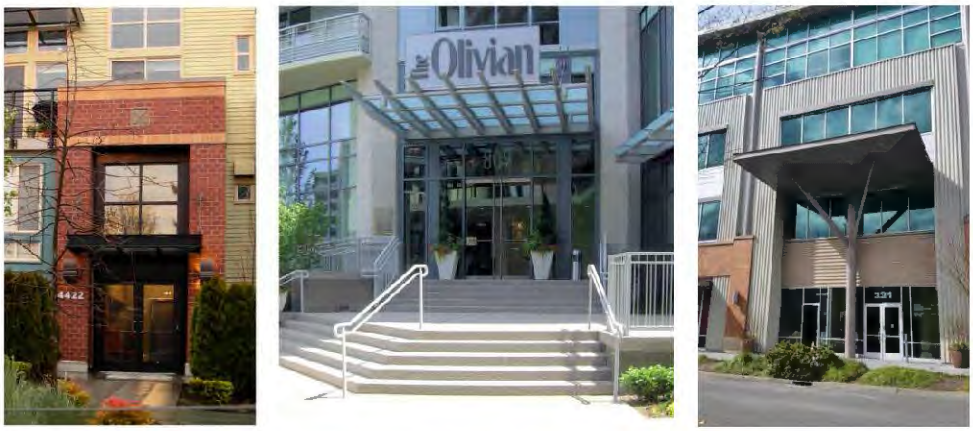

Figure 4.E.4.1-1 Entrances enhanced by details and materials, complex architectural elements, site features and lettering.

4.E.4.2. Secondary Public Access

Although these Guidelines require businesses on Pedestrian-Oriented Streets to front on streets rather than parking areas, a large number of customers use the "secondary" entry off of a parking area. Such businesses that have secondary public access shall comply with the following measures to enhance secondary public access (applies only to entries used by the public):

a. Weather protection at least 4 feet deep is required over each secondary entry.

b. A sign may be applied to the awning provided that the sign complies with other regulations and guidelines.

c. Lighting shall conform to section **4.F.1 Site Lighting**.

d. One or more of the design elements noted in **4.E.4.1.h** above must be incorporated within or adjacent to the secondary entry.

Figure 4.E.4.2-1. Example of secondary public access. Note the planters, window sign, and awning.

4.F. Lighting

4.F.1. Site Lighting

INTENT:

- To encourage the use of lighting as an integral design component to enhance buildings, landscaping, or other site features.
- To increase night sky visibility and to reduce the general illumination of the sky.
- To reduce horizontal light glare and vertical light trespass from a development onto adjacent parcels and natural features.
- To use lighting in conjunction with other security methods to increase site safety.
- To prevent the use of lighting for advertising purposes.

STANDARDS/GUIDELINES:

4.F.1.1. Site Lighting Levels

a. All publicly accessible areas shall be lighted with average minimum and maximum levels as follows:

   (1) Low or non-pedestrian and vehicular traffic areas – minimum 0.2 foot-candles, maximum 4 foot-candles;

   (2) Moderate or high volume pedestrian areas and building entries – minimum 1 foot-candle, maximum 5 foot-candles, preferred average 2 foot-candles;

   (3) Parking lots – minimum 1 foot-candle (private lots minimum 0.2 foot-candles), and maximum 4 foot–candles.

b. Lighting shall be provided at consistent levels, with an average lighting level to minimum lighting level uniformity ratio no less than 3:1, to create gradual transitions between varying levels of lighting and between lit areas and unlit areas. Highly contrasting pools of light and dark areas shall be avoided.

c. Pedestrian lighting shall have a maximum height of 15 feet.

4.F.1.2. Light Quality and Shielding

a. Parking area lighting fixtures shall be fully shielded; dark sky rated and mounted no more than 20 feet above the ground, with lower fixtures preferable so as to maintain a human scale.

b. Exterior lighting must comply with TMC 18.40.35: Exterior Illumination

4.F.1.3. Architectural Lighting

a. The lighting of building features, artwork, and special landscape elements may be allowed, subject to the findings of the Director that the light causes no significant adverse impact.

DRAFT

5.A. Administrative

5.A.1. Applicability

This chapter applies to cottage housing uses. Cottage housing refers to clusters of small detached dwelling units arranged around a common open space. Cottage housing development shall be permitted in the following zones, consistent with the development standards in this chapter:

A. Single Family Low Density Residential (SFL 4-7 dwellings per acre).

B. Single Family Medium Density Residential (SFM 6-9 dwellings per acre).

Multi-Family Medium Density Residential (MFM 9-15 dwellings per acre).

C. Multi-Family High Density Residential (MFH 14-29 dwellings per acre.).

D. Mixed Use (MU).

Also see **Chapter 1 Section A. Applicability**.

Figure 5.A.1-1. Cottage housing examples.

5.A.2. Intent

1. To provide an opportunity for small, detached housing types clustered around a common open space;
2. To ensure that cottage developments contribute to the overall character of residential areas;
3. To provide for centrally located and functional common open space that fosters a sense of community;
4. To provide for semi-private area around individual cottages to enable diversity in landscape design and foster a sense of ownership;
5. To minimize visual impacts of parking areas on the street and adjacent properties and the visual setting for the development; and
6. To promote conservation of resources by providing for clusters of small dwelling units on a

property;.

7. To Pprovide the opportunity for more affordable housing units;.
8. To Pprovide energy efficient dwelling units;.
9. To Pprovide more opportunity for infill development; and.
10. To Pprovide incentives for green building certified and low-impact development.

5.A.3. Lot Configuration

Cottages may be configured as condominiums or fee-simple lots provided they meet the standards herein.

DRAFT

5.B. Density and Dimensional Standards

5.B.1. Dimensional Standards

Table 5.B.1-1 Dimensional standards for cottages:

Standard	Requirement
Maximum floor area, excluding porches, garages, areas accessible only by ladders, or accessory structures	1,200 SF
Maximum footprint	1,000 SF
Minimum common space (See subsection C.4 below for more info)	300 SF/unit
Minimum private open space (See subsection C.5 below for more info)	200 SF/unit
Maximum height for cottages	26 35 ft. (all parts of the roof above 18 ft. shall be pitched with a minimum roof slope of 6:12)
Maximum height for cottages accessory structures	18 ft.
Setbacks (to exterior property lines)	See TMC 18.42.040
Minimum distance between structures (Including accessory structures)	10 ft.
Minimum parking spaces per cottage:	See TMC 18.50
Balconies	Minimum depth 4 ft
Porches	Minimum depth 4 ft
Patios and Decks	Minimum depth 6 ft
For a balcony or porch to qualify as open space	Minimum dimensions 8 ft X 8 ft

DRAFT

5.C. Site Design Standards

5.C.1. Residence Orientation

Cottage housing developments shall generally be oriented in a "cluster" or group of residences around a common open space or landscaped pathway, or along a publically accessible street to encourage a sense of community among the residents. Clusters must contain a minimum of 4 and a maximum of 12 cottages. A development site may contain more than one cottage housing cluster.

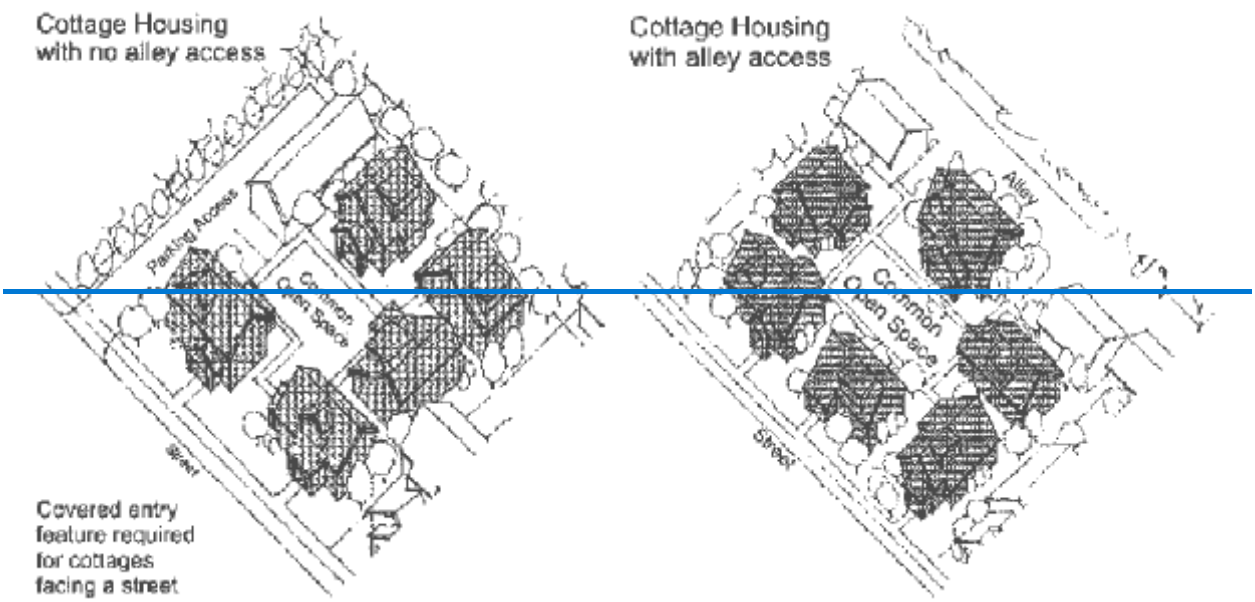

Figure 5.C.1-1. Typical cottage housing layouts.

5.C.2. Parking and Driveway Location and Design

1. Parking shall be located on the same property as the cottage development;
2. Where lots abut an alley, the garage or off-street parking area shall take access from the alley unless the Director finds that there is a compelling reason to the contrary;

Figure 5.C.2-1. Vehicle access from an alley is preferred.

3. Parking areas shall be located to the side or rear of cottage clusters and not between a street and cottages, except where the parking is from an alley. Parking is prohibited in the front and interior setback areas;
4. Parking and vehicular areas shall be screened from public street and adjacent residential uses by landscaping conforming to TMC 18.50. The director may consider alternative landscaping techniques provided they effectively mitigate views into the parking area from the street or adjacent residential uses and enhance the visual setting for the development;
5. Parking shall be located in clusters of not more than 10 to 12 adjoining uncovered spaces (except where adjacent to an alley). The Director may consider alternate configurations provided they improve the visual setting for development;

Figure 5.C.2-2. Vehicle access from a shared drive.

DRAFT

6. Garages may be attached to individual cottages provided all other standards herein are met and the footprint of the ground floor, including garage, does not exceed 1,000 square feet. Such garages shall be located away from the common open spaces; and

7. No more than one driveway per cottage cluster shall be permitted, except where clusters front onto an alley or more than one street.

5.C.3. Pedestrian Circulation

1. Pathways between dwelling units and the street are required. Such pathways between the street and buildings fronting on the street should be in a straight line. Exceptions may be allowed by the Director where steep slopes prevent a direct connection or where an indirect route would enhance the design and/or use of a common open space.

Figure 5.C.3-1. Direct pathways between the street and dwelling units are required.

2. The pedestrian circulation system shall connect all main entrances on the site. For townhouses or other residential units fronting the street, the sidewalk may be used to meet this standard.

3. Direct pedestrian access shall be provided to adjacent publicly accessible parks, open space, and trails, and transit, rideshare and bicycle storage facilities.

Figure 5.C.3-2, An example of an attractive pedestrian connection through a cottage housing development.

4. For safety and access, landscaping shall not block visibility to and from a path, especially where it approaches a roadway or driveway.
5. Pedestrian walks shall be separated from structures at least 3 feet for landscaping.
6. Public pathways must be at least 4' wide and meet American with Disabilities Act (ADA) standards.

Cottage Entry Requirements

All cottages shall feature a roofed porch at least 60 square feet in size with a minimum dimension of five feet on any side facing the street and/or common open space.

Community Building

- A cottage housing development shall contain no more than one community building.
- A community building shall have no more than 2,400 square feet of net floor area, excluding attached garages.
- A community building shall have no minimum off-street parking requirement.

Open Space Requirements

Open space shall be provided equal to a minimum of 20 percent of the lot size. This may include

common open space, private open space, setbacks, critical areas, and other open space.

5.C.4. Common Open Space Requirements

At least one outdoor common open space is required.

1. Open space shall abut at least 50 percent of the cottages in a cottage housing development;

1. Open space shall have cottages abutting on at least 2 sides. At least half of cottage units in the development shall abut a common open space and have the primary entrance facing the common open space;

2. Cottages shall be oriented around and have the main entry from the common open space or the most important path or street;

2. Cottages shall be within 60 feet walking distance of the common open space;

3. Open space shall include at least 1 courtyard, plaza, garden, or other central open space, with access to all units. The minimum dimensions of this open space are 15 feet by 20 feet, and

There shall be at least 300 square feet of common open space per unit. Each common open space shall have a minimum dimension of 15 feet on any side;

Parking areas and vehicular areas shall not qualify as common open space; and

3. Critical areas and their buffers, including steep slopes, shall not qualify as common open space.

4.

DRAFT

5.C.5. Required Private Open Space

All residential units must include at least 200 square feet of private open space adjacent to the residence that usable and conducive open space for passive human activities such as dining, resting, sun bathing, gardening or picnicking. The open space may consist of a porch, balcony, garden, patio, roof deck or similar feature. The smallest dimension of the open space (deck, patio, etc.) must not be less than 6 feet. Above grade balconies must be at least 4 feet wide in the smallest dimension.

Figure 5.C.5-1. Common open space may accommodate a variety of uses and feature a variety of landscape elements and characters.

5.C.6. Stormwater Facility Planning

1. Compliance with City Stormwater Manual. Adhere to the City of Tumwater Stormwater Management (SWM) standards in TMC 13.12.020. The following guidelines are intended to supplement the SWM regulations.

2. Integration of Stormwater Facilities into Site Design. Where feasible, integrate biofiltration swales, rain gardens, stormwater planters, and other low impact development stormwater

management measures into the overall site design. Manage stormwater as close to its origin as possible by utilizing small scale, distributed hydrologic controls. Locate them so they don't impede pedestrian circulation. Examples of filtration methods are listed below:

a. Incorporate the biofiltration system, including low-impact development (LID) features, as part of the landscape features of the development. If the biofiltration system is incorporated into the landscaping of the site's open space, then, upon approval of the Director, the stormwater facility may be counted as part of the required open space or landscaping.

b. Maximize retention of native forest cover and vegetation and restore disturbed vegetation to intercept, evaporate and transpire precipitation.

Figure 5.C.6-1. A preferred method of handling stormwater is through retention systems, such as rain gardens, incorporated as site amenities. Other /ow-impact development techniques are encouraged, and in many cases, required.

c. Preserve permeable, native soil, and enhance disturbed soil to store and infiltrate stormwater.

d. Reduce hard surfaces, total impervious surface areas, and increase retention of native vegetation.

e. Locate biofiltration swales, ponds, or other approved biofiltration systems as part of a landscape screen.

f. Where topography is favorable, locate the biofiltration swale, wet pond, or other approved biofiltration system within the paved parking or service area to, and integrate it into the required internal parking area landscaping. Consider use of permeable pavements and asphalts to reduce impervious areas.

g. Use native, drought tolerant plants and/or appropriate plant species as approved by the Director.

h. Include the stormwater facility as an amenity.

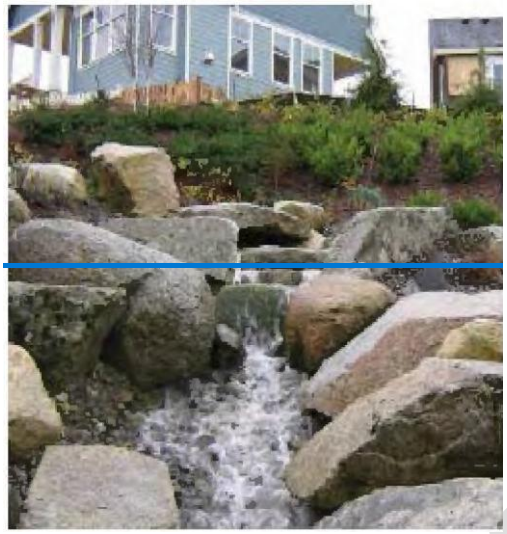

Figure 5.C.6-2. Example now control system incorporated into the site design as an amenity, High Point West, Seattle.

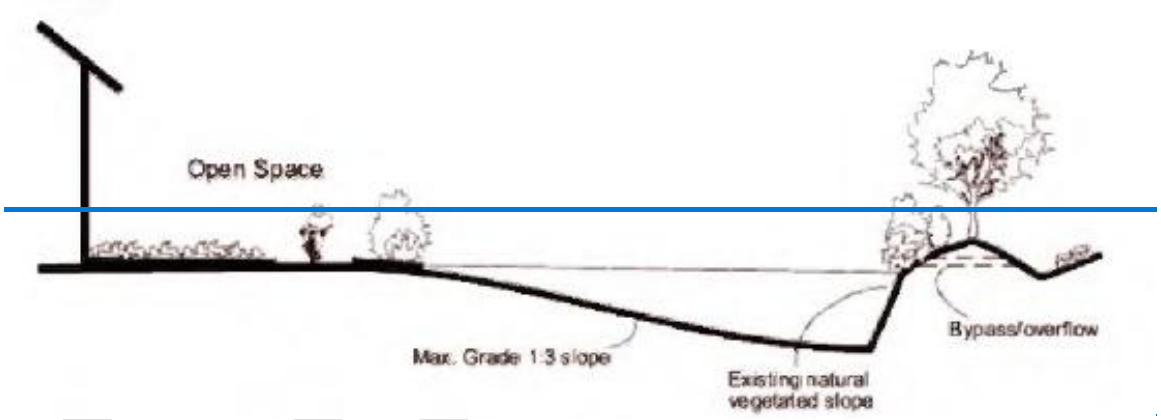

Figure 5.C.6-3. Grading to allow stormwater facilities to be treated as an amenity.

5.C.7. Landscape Design and Materials

1. Reference to TMC 18.47. The landscaping standards of TMC 18.47 shall apply. These standards are intended to supplement those standards.
2. Landscaping - General Standards for All Landscape Areas. All new landscape areas proposed for a development shall be subject to the following provisions:
    a. Berms shall not exceed a slope of two horizontal feet to one vertical foot (2:1).
    b. Group plants having similar water use characteristics.
    c. Plant selection shall consider adaptability to sun exposure, soil conditions, and the topography of the planting area. Preservation of existing vegetation is encouraged.

d. Install no plants included in the Thurston County Noxious Weed list.

e. All plants shall conform to American Association of Nurserymen (AAN) grades and standards as published in the "American Standard for Nursery Stock" manual; provided that existing healthy vegetation used to augment new plantings shall not be required to meet the standards of this manual.

f. Street trees and trees internal to the development shall conform to the standards in the Tumwater Comprehensive Street Tree Plan and Title 16.08 Protection of Trees and Vegetation.

g. New landscape material provided for vegetation restoration or mitigation requirements and within areas of undisturbed vegetation or within the protected area of significant trees shall give preference to utilizing western Washington native plant species.

h. Shrubs shall be dwarf varieties unless demonstrated that other varieties can thrive if maintained at 42 inches. Shrubs shall also be as follows:

i. At least an MN container Class No. 2 size at time of planting in Type II, III and parking area landscaping;

j. At least 24 inches in height at the time of planting for Type I landscaping; and

k. Shrubs shall be perennials.

l. Groundcovers shall be planted and spaced to result in total coverage of the majority of the required landscape area within three years.

m. All fences shall be placed on the inward side of any required perimeter landscaping along the street frontage. That is, place the required landscaping to face the public street or open space. Exception: Where the fence separates a public street from a required common open space, the Director will determine which side the landscaping is to be installed.

n. Required street landscaping may be placed within City of Tumwater street rights-of- way subject to the permission of the City of Tumwater Director of Public Works.

o. Required street landscaping may be placed within Washington State rights-of-way subject to permission of the Washington State Department of Transportation.

3. Landscaping- Plan Design, Design Review, and Installation. A landscape plan must be submitted to the Director that complies with TMC 18.47 and the standards contained in Section S.C.7 of these standards. Where conflicts occur, these standards control. The required landscaping shall be installed no later than three months after issuance of a certificate of occupancy for the project or project phase. However, the time limit for compliance may be extended to allow installation of such required landscaping during the next appropriate planting season.

4. Maintenance

a. All landscaping shall be maintained for the life of the project, including water

conservation practices for turf grass such as annual aeration and dethatching, top dressing and over seeding;

b. All landscape materials shall be properly pruned and trimmed as necessary to maintain a healthy growing condition or to prevent primary limb failure;

c. With the exception of dead, diseased or damaged trees specifically retained to provide wildlife habitat, other dead, diseased, damaged, topped, or stolen plantings shall be replaced within three months or during the next planting season if the loss does not occur in a planting season; and

d. Landscape areas shall be kept free of trash, mulched, and weeded.

5. Landscape Character

a. Tumwater's signature landscape setting is characterized by large, mature conifer and oak trees surrounded by relatively flat expanses of grass or low vegetation, such as at the civic campus around City Hall and the Fred Meyer and Costco vicinity on Littlerock Road. The community has indicated that this landscape is very important to the city's visual quality and design identity so that maintaining existing mature evergreen trees and including existing and new evergreens in site development is an important objective. The Director may require that development proposals be modified to conserve healthy evergreen trees. When appropriate, the Director may also relax other standards such as setbacks and geometric requirements in order to promote the retention of mature trees.

The applicant shall meet setback and root protection requirements as deemed necessary by the Director to maintain the tree's health.

Figure 5.C.7-1. Informal clusters of mature conifer trees are a signature element of Tumwater's landscape and are well-suited to the area's glacial soils.

b. Where possible, minimize the disturbance of native vegetation and soils. Native soil retention may be incorporated into low impact development (LID) measures for stormwater management.

c. Unless there is a compelling reason to the contrary, concentrate ornamental vegetation

DRAFT

near pedestrian areas and building entries where it can be most appreciated.

d. As a general observation, Tumwater's landscape design character emphasizes naturalistic, informal layouts that are similar to early 20th century parks designed by the Olmsted Brothers.

e. Other design features associated with landscaped open space should emphasize pedestrian scale and qualities generally consistent with these guidelines.

5.C.8. Site Lighting

1. Site Lighting Levels

a. All publicly accessible areas shall be lighted with levels as follows:

(1) Low or non-pedestrian and vehicular traffic areas - minimum 0.2 foot-candles, maximum 4 foot-candles;

(2) Pedestrian areas and building entries - minimum 1 foot-candle, maximum 5 foot- candles, preferred average 2 foot-candles;

(3) Public parking lots - minimum 1 foot-candle, maximum 4 foot-candles; and

b. Lighting shall be provided at consistent levels, with an average lighting level to minimum lighting level uniformity ratio no less than 3:1, to create gradual transitions between varying levels of lighting and between lit areas and unlit areas. Highly contrasting pools of light and dark areas shall be avoided.

c. Pedestrian lighting shall have a maximum height of 15 feet.

2. Light Quality and Shielding, Consistent with US Department of Energy, Guide to FEMP-Designated Parking Lot Lighting

a. Parking area lighting fixtures shall be fully shielded; dark sky rated and mounted in accordance with IES Standards, with lower fixtures preferable so as to maintain a human scale.

b. Exterior lighting must also comply with TMC 18.40.35: Exterior Illumination

5.C.9. Site Planning for Security

1. In site development planning, avoid:

a. Entrapment areas, where a person could become trapped with no exit route. Provide two means of egress from all outdoor spaces. Ensure entrapment conditions are avoided in the design of rooftop decks.

b. Areas that are dark or not visible from a public space or right-of-way.

DRAFT

c. Vegetation and fences that restrict visibility into occupiable open space, pathways and building entries.

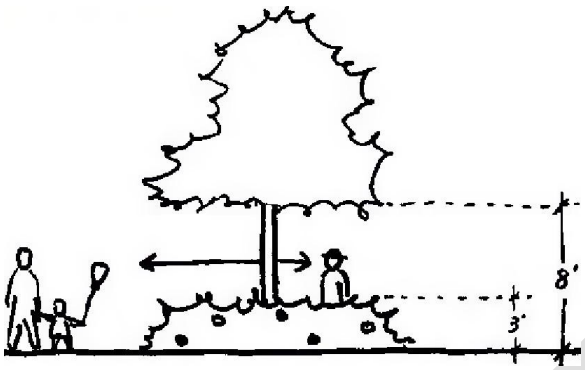

Figure 5.C.9-1. Keep landscaping open between 3 feet and 8 feet above grade where there is the need for visibility.

d. Buildings, vegetation, or other objects (e.g., a storage enclosure) that block visibility into a space or provide places to hide.

e. Screens or landscaping that blocks motorists' views of pedestrians crossing streets, driveways, and vehicular circulation areas.

2. Where visibility is necessary to avoid creating an unsecure area to reduce the potential for pedestrian/vehicle collisions, do not plant vegetation that will obstruct views between 3 feet and 8 feet above the ground. (**See Figure 5.C.9-1**.)

Figure 5.C.9-2. Fences that prevent visibility from public ROW and open spaces can decrease security.

3. In the planning of the site and design of buildings and site elements, to the extent feasible provide for:

a. "Passive surveillance," the ability of people occupying buildings and public spaces to view all parts of accessible spaces.

b. Security and pedestrian lighting per Guideline 5.0.7.

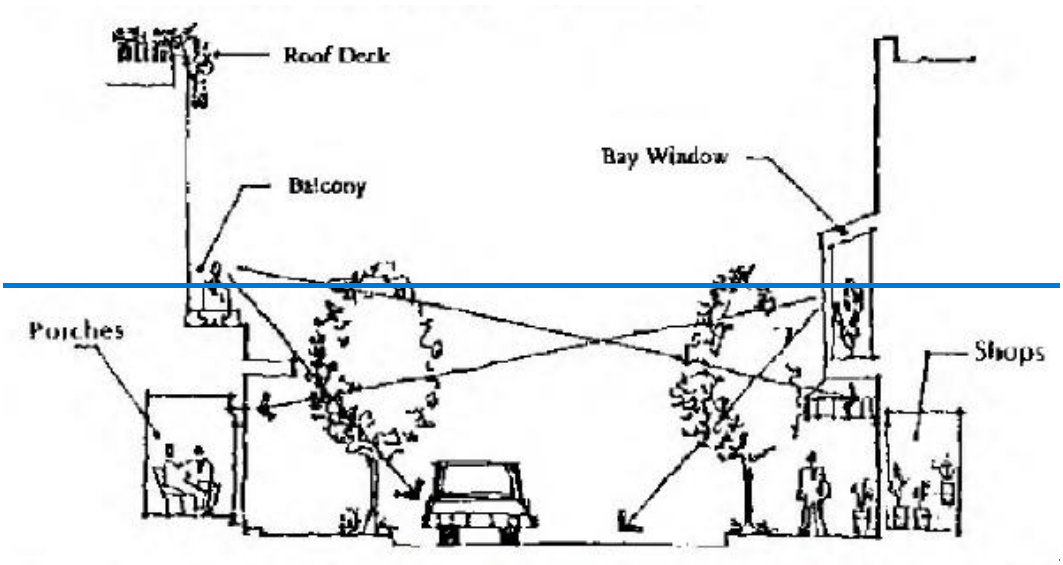

Figure 5.C.9-3. Passive surveillance or the ability of people in buildings or traveling along roadways to see outdoor spaces, increases security,

c. Appropriate natural access control, that is, features that delineate where the general public should not enter without an invitation. For example, a low fence or hedge can indicate that people should not enter a yard or open space except through a gate or opening. Access control should not limit visibility or passive surveillance.

d. Defining territory. This means clearly indicating through site planning and design measures what parts of the site are open to the public and what parts are not. For example, in commercial development, pedestrian-oriented elements and walkways indicate that the public is welcome but fenced areas with a gate do not. Also, well maintained sites indicate that someone cares for the site and tends to discourage crime.

Figure 5.C.9.4. This residential complex incorporates passive surveillance, territorial definition, and good visibility and lighting to provide a more secure pathway and open

space.

5.D. Building Design Standards

5.D.1. Windows on the Street

At least 10 percent transparency is required on facades (all vertical surfaces) of all cottages facing the street and common open space. For facades facing north, the amount of transparency may be reduced to 8 percent.

For cottages, transparency shall be calculated as follows:

> % transparency = area (square feet) of transparent surfaces on the side of the cottage area divided by the façade area (square feet) of the same side cottage, excluding eaves and exposed foundation.

Transparent surfaces include window panes that are mostly clear. (Decorative treatments such as stained glass are allowed.) Mullions do not count against the transparent area of a window.

5.D.2. Porches

Cottage facades facing the common open space, common pathway or street shall feature a roofed porch at least 40 square feet in size with a minimum dimension of 4 feet on any side. The porch area may be counted as required private open space if it has minimum dimensions of 8 feet by 8 feet to enable sitting and other activities.

5.D.3. Covered Entry and Visual Interest

Cottage facades facing a public street, common pathway or common open space shall provide:

1. A covered entry feature (with a minimum dimension of 6 feet by 6 feet) visible from the street;
2. At least 10 feet of landscaped open space between the residence and the street o pathway; and
3. At least 2 architectural details, such as:
    a. Decorative lighting;
    b. Decorative trim;
    c. Special door;
    d. Trellis or decorative building element; and/or
    e. Bay window.
    f. Similar feature approved by the Director.

DRAFT

5.D.4. Character and Diversity

Cottages and accessory buildings within a particular cluster shall be designed within the same "family" of architectural styles. This shall be accomplished by incorporating building elements of similar character. Examples of such elements include:

1. Similar building/roof form and pitch;
2. Similar siding materials;
3. Similar porch detailing; and/or
4. Similar window trim;

A diversity of cottages can be achieved within a "family" of styles by:

1. Alternating porch styles (such as roof forms);
2. Alternating siding details on facades and/or roof gables; and/or
3. Different siding color.

5.D.5. Residential Window Details

The facades of residential buildings and residential portions of mixed use buildings facing the street shall employ techniques to recess or project individual windows above the ground floor at least two inches from the façade or incorporate window trim at least four inches in width that features color that contrasts with the base building color. Exceptions will be considered by the Director where buildings employ other distinctive window or façade treatment that adds visual interest to the building.

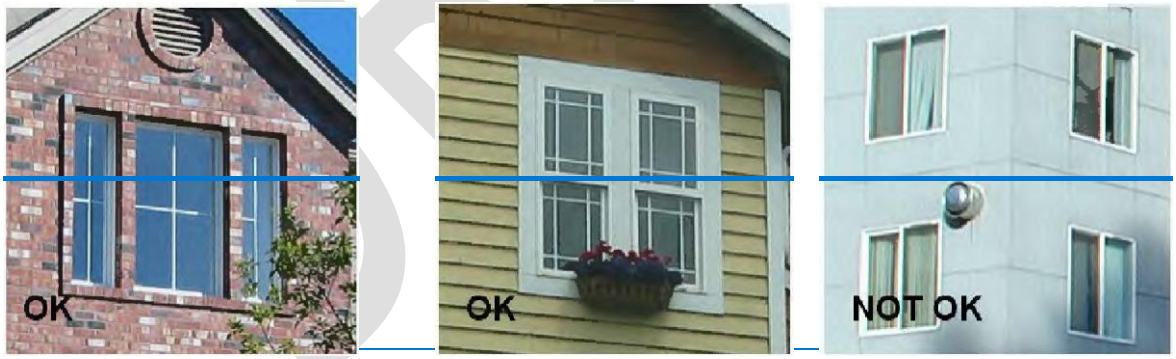

Figure 5.0.5-1 Acceptable (left and center examples) and unacceptable (right example) window treatments.

5.D.6. Materials

1. The following are allowed only with special detailing, as described below:
    a. Metal siding. When used as a siding material over more than 25 percent of a building's façade visible from a public street, pathway, or park, metal siding must:

(1) Have a matte finish in a neutral or earth tone such as buff, gray, beige, tan, cream, white, or a dulled color, such as barn red, blue gray, burgundy, ocher, or other color specifically approved by the Director.

(2) Include two or more of the following elements:

- Visible window and door trim painted or finished in a complementary color.
- Color and edge trim that cover exposed edges of the sheet metal panels.
- A base of masonry, stone, or other approved permanent material extending up to at least 2 feet above grade that is durable and satisfies the Intent of the Guidelines. (The intent is to provide more durable materials near grade level.)
- Other detail/color combinations for metal siding approved by the Director, provided design quality and permanence meet the intent of this section.

b. Concrete block walls. Concrete block construction used over 25 percent of a building façade visible from a public roadway, pathway, or park must be architecturally treated in one or more of the following ways:

(1) Use of textured blocks with surfaces such as split face or grooved.

(2) Use of other masonry types, such as brick, glass block, or tile in conjunction with concrete blocks.

(3) Use of decorative coursing to break up blank wall areas.

(4) Use of matching colored mortar where color is an element of architectural treatment for any of the options above.

(5) Other treatment approved by the Director.

c. Requirements for stucco, stucco-like, and similar troweled finishes:

(1) To avoid deterioration, the finish material must be trimmed and/or sheltered from extreme weather by roof overhangs or other methods.

(2) The finish material may only be used in conjunction with other approved building materials.

d. Any material that is subject to damage and deterioration from human contact or landscape elements is prohibited within 2 vertical feet of the sidewalk or ground level or in areas that are especially subject to vandalism such as areas with low visibility. In these areas, a more durable finish material such as brick, concrete, or concrete block should be used.

e. Use of flat sheet materials such as fiber cement panels (e.g., Hardie Panel) is not allowed on ground floor facades facing Pedestrian-Oriented Streets. This is because the panels do not provide human scale surfaces or textures or refined details.

DRAFT

Figure 5.D.6-1. An example of acceptable materials with detailing and textures.

f. Prohibited materials:

(1) Mirrored glass.

(2) Corrugated fiberglass.

(3) Chain link fencing within 50 feet of a building's public entrance (except for temporary purposes such as a construction site).

(4) Crushed colored rock or tumbled glass.

(5) Any sheet materials, such as wood or metal siding, with exposed edges or unfinished edges, or made of nondurable materials.

(6) Any spray-on materials (e.g.: shotcrete) not specifically approved by the Director.

(7) Non-durable materials subject to deterioration if exposed to weather such as most plastic and synthetic materials or materials that are particularly vulnerable to vandalism. Project applicants wishing to use synthetic materials such as vinyl siding must submit samples and product description information to the Director for approval. The Director will not accept such materials unless its durability and appropriateness is demonstrated.

5.D.7. Architectural Lighting

Steady, non-flashing lighting of building features, artwork, and special landscape elements may be allowed, subject to the findings of the Director that the light causes no significant adverse impact.

DRAFT

5.A Administrative

5.A.1 Applicability

This chapter applies to new middle housing, single family detached dwellings, and accessory dwelling units. Additions to these types of residences shall not increase the level of non-conformance to these guidelines.

5.A.2 Intent

1. Provide more opportunities for a variety of lower intensity housing types in existing and new neighborhoods;
2. Promote the compatibility, livability, and environmental quality of lower density residential neighborhoods;
3. Reduce the emphasis of garages, driveways, and parking areas as major visual elements along the street;
4. Maintain safety for pedestrians and to create a more welcoming and interesting streetscape;
5. Provide clear and accessible pedestrian routes between buildings and streets and usable yard space for residents;
6. Conserve resources by allowing multiple dwelling units on a property;
7. Provide the opportunity for more affordable housing units and more opportunities for infill development; and
8. Implement cottage housing as provided by state law.

5.A.3 Lot Configuration

New middle housing, single family detached dwellings, and accessory dwelling units may be configured as condominiums or fee-simple lots provided they meet the standards herein.

DRAFT

5.B Density and Dimensional Standards

5.B.1 Dimensional Standards

Table 5.B.1-1 Dimensional standards for middle housing, single family detached dwellings, and accessory dwelling units:

Standard	Requirement
Minimum common space	400 square feet/unit for middle housing and single family detached dwellings. Not required for accessory dwelling units.
Minimum private open space	200 square feet/unit
Pedestrian Access	Minimum three feet wide and separate from driveway(s). Pedestrian access should be combined, where possible, for sites with more than one dwelling unit.
Open Space	Ten percent of lot size, not in front yard, and minimum 12 feet on all sides. Not required for infill development without subdivision.
Setbacks (to exterior property lines)	See TMC 18.42.040: Yards - Setbacks
Garages	Set back from the public street at least five feet further than the enclosed portion of the residential structure unless the structure is set back from the street at least 80 feet. Driveways and curb cuts should be combined to the maximum extent for sites with more than one dwelling unit.
Balconies	Minimum depth four feet/unit
Porches	Minimum depth six feet/unit for middle housing, single family detached dwellings. Minimum depth four feet/unit for cottage housing.
Patios and Decks	Minimum depth six feet/unit

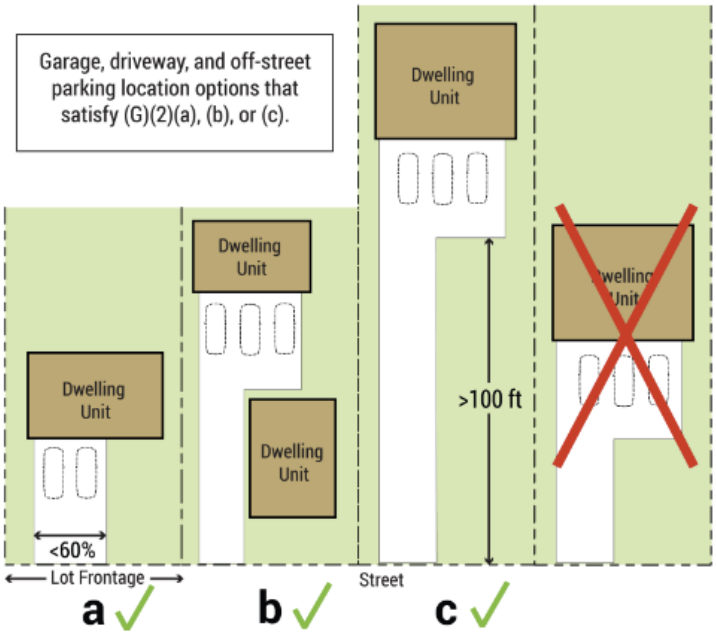
DRAFT

Standard	Requirement
Maximum floor area for cottage houses, excluding porches, garages, areas accessible only by ladders, or accessory structures	1,200 square feet
Maximum footprint for cottage houses, excluding porches, garages, areas accessible only by ladders, or accessory structures	1,000 square feet
Maximum floor area for accessory dwelling, excluding porches, garages, areas accessible only by ladders, or accessory structures	1,000 square feet

DRAFT

5.C Site Design Standards

5.C.1 Parking and Driveway Location, Design, and Standards



1. Parking shall be located on the same lot as the middle housing structure, single family detached dwelling, or accessory dwelling unit.
2. No more than one driveway per lot shall be permitted, except where there are more than one residential unit and development fronts onto an alley or more than one street, up to a maximum of two driveways.
3. Where lots abut an alley, the garage or off-street parking area shall take access from the alley unless the Director finds that there is a compelling reason to the contrary.

Figure 5.C.1-1. Vehicle access from an alley is preferred.

4. Lots without access to an alley and taking vehicular access from a street shall meet the following standards:
    a. Garages, carports, driveways, and off-street parking areas shall not be located between a building and a street, except when any of the following conditions are met:
        (1) The combined width of all garages, carports, driveways, and off-street parking areas does not exceed a total of 60 percent of the length of the street frontage property line. This standard applies to structures and not individual units;
        (2) The garage, carport, driveway, or off-street parking area is separated from the street property line by a dwelling; or
        (3) The garage, carport, driveway, or off-street parking is located more than 100 feet from a street.

DRAFT

b. All detached garages and carports shall not protrude beyond the front building façade.

c. Requirements for driveway separation and access from collector streets and arterial streets shall apply.

5. Where a new driveway on a street is permitted, the following standard applies:

   a. No more than one driveway per dwelling unit.

   b. Driveways and curb cuts should be combined to the maximum extent for sites with more than one dwelling unit.

5.C.2 Pedestrian Circulation

1. Clear and obvious pedestrian access between a dwelling unit and the sidewalk and street are required, except for flag lots and other non-traditional lot shapes, which are subject to Director approval.
2. Such walkways between a dwelling unit and the sidewalk and street should be constructed in the most efficient path for the site and combined where possible for sites with more than one dwelling unit.
3. The walkway must be at least three feet wide and separate from the driveway.
4. Exceptions may be allowed by the Director where steep slopes prevent a direct connection or where an indirect route would enhance the design and/or use of a common open space.

Figure 5.C.2-1. Direct walkways between the street and dwelling units are required.

5. The pedestrian circulation system shall connect all main entrances on the site. For townhouses or other residential units that abut the street, the sidewalk may be used to meet this standard.
6. For safety and access, landscaping shall not block visibility to and from a walkway, especially where it approaches a roadway or driveway.
7. Walkways shall be separated from structures and driveways by at least three feet for landscaping.
8. Public walkways must meet the development guide regulations and American with Disabilities Act (ADA) standards.

5.C.3 Minimum Useable Open Space

1. Cottage housing open space requirements are addressed in Section 5.D.8.2.
2. Aside from cottage housing, which is regulated under 5.D.8.2 and accessory dwelling units which are not required to meet open space requirements, all new middle housing and single family detached dwellings shall allow for a contiguous open space equivalent to ten percent of the lot size, excluding area within an adjacent alley, easement, or public right-of-way.
3. Such open space shall not be located within the front yard, unless it is a covered porch that is counted as part of the required open space requirements in Section 5.D.2.
4. The required open space shall feature a minimum dimension of 12 feet on all sides. For example, a 6,000 square foot lot would require a contiguous open space of at least 600 square feet in area.
5. Driveways shall not count in the calculations for usable open space. However, yard setbacks,

decks, and covered areas (such as a covered patio or outdoor cooking area) may be included.

6. Additions to middle housing and single family detached dwellings shall not create or increase any non-conformity with this standard.
7. Adding an accessory dwelling unit to a property shall not increase any non-conformity with this standard.

5.C.4 Stormwater Facility Planning

1. Compliance with City Stormwater Manual. Adhere to the City of Tumwater Stormwater Management standards in TMC 13.12.020: Stormwater Management. The following guidelines are intended to supplement the stormwater management regulations.
2. Integration of Stormwater Facilities into Site Design. Where feasible, integrate biofiltration swales, rain gardens, stormwater planters, and other low impact development stormwater management measures into the overall site design. Manage stormwater as close to its origin as possible by utilizing small scale, distributed hydrologic controls. Locate them so they do not impede pedestrian circulation. Examples of filtration methods are listed below:
    a. Incorporate the biofiltration system, including low-impact development (LID) features, as part of the landscape features of the development. If the biofiltration system is incorporated into the landscaping of the site's open space, then, upon approval of the Director, the stormwater facility may be counted as 25% of the required open space or landscaping.
    b. Maximize retention of native forest cover and vegetation and restore disturbed vegetation to intercept, evaporate and transpire precipitation.

Figure 5.C.4-1. A preferred method of handling stormwater is through retention systems, such as rain gardens, incorporated as site amenities. Other low-impact development

techniques are encouraged, and in many cases, required.

c. Preserve permeable, native soil, and enhance disturbed soil to store and infiltrate stormwater.

d. Reduce hard surfaces, total impervious surface areas, and increase retention of native vegetation.

e. Locate biofiltration swales, ponds, or other approved biofiltration systems as part of a landscape screen.

f. Where topography is favorable, locate the biofiltration swale, wet pond, or other approved biofiltration system within the paved parking or service area to, and integrate it into the required internal parking area landscaping. Consider the use of permeable pavements and asphalts to reduce impervious areas.

g. Use native, drought tolerant plants and/or appropriate plant species as approved by the Director.

h. Include the stormwater facility as an amenity.

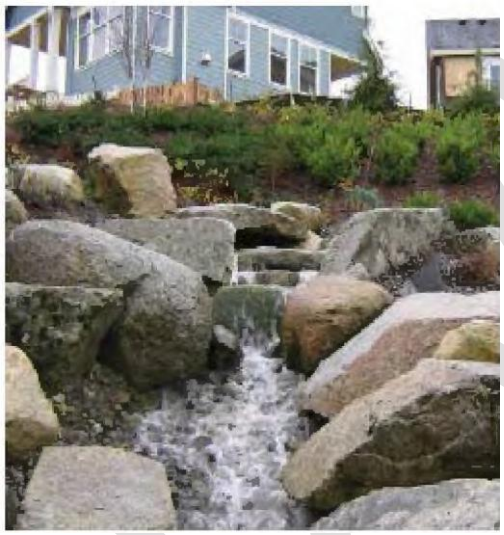


Figure 5.C.4-2. Example now control system incorporated into the site design as an amenity, High Point West, Seattle.

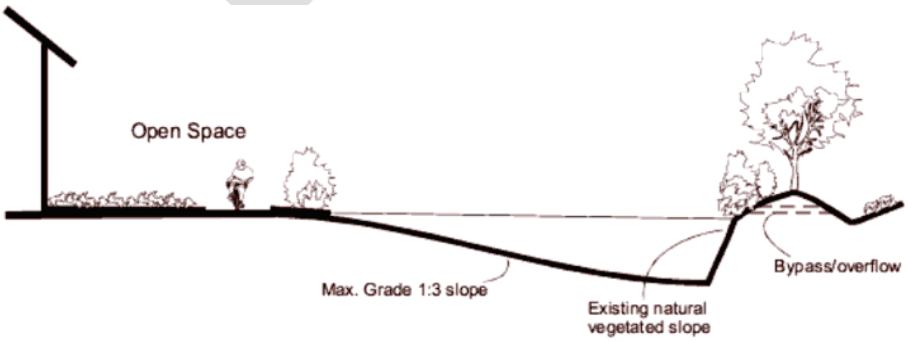

Figure 5.C.4-3. Grading to allow stormwater facilities to be treated as an amenity.

5.C.5 Site Lighting

1. Site Lighting Levels
    a. All publicly accessible areas shall be lighted with levels as follows:
        (1) Low or non-pedestrian and vehicular traffic areas - minimum 0.2 foot-candles, maximum four foot-candles;
        (2) Pedestrian areas and building entries - minimum one foot-candle, maximum five foot- candles, preferred average two foot-candles;
        (3) Public parking lots - minimum one foot-candle, maximum four foot-candles; and
    b. Lighting shall be provided at consistent levels, with an average lighting level to minimum lighting level uniformity ratio no less than 3:1, to create gradual transitions between varying levels of lighting and between lit areas and unlit areas. Highly contrasting pools of light and dark areas shall be avoided.
    c. Pedestrian lighting shall have a maximum height of 15 feet.
    d. Solar or high efficiency lighting is encouraged where feasible.
2. Light Quality and Shielding, Consistent with US Department of Energy, Guide to FEMP - Designated Parking Lot Lighting
    a. Parking area lighting fixtures shall be fully shielded; dark sky rated and mounted in accordance with IES Standards, with lower fixtures preferable so as to maintain a human scale.
    b. Exterior lighting must also comply with TMC 18.40.35: Exterior Illumination

5.D Building Design Standards

5.D.1 Windows on the Street

1 At least ten percent transparency is required on façades (all vertical surfaces) of all residential units facing a street.

2 Transparency shall be calculated as follows:

% transparency = area (square feet) of transparent surfaces on the side of the residential unit area divided by the façade area (square feet) of the same side residential unit, excluding eaves and exposed foundation.

3 Transparent surfaces include windowpanes that are mostly clear.

4 Decorative treatments such as stained glass are allowed.

5 Mullions do not count against the transparent area of a window.

5.D.2 Covered Porch and Visual Interest

Middle housing and single family detached dwellings façades facing the street or a common open space or walkway shall provide:

1. At least one roofed porch at least 60 square feet in size with a minimum dimension of six feet on any side.
    a. The porch area may be counted as part of the required open space if it has minimum dimensions of eight feet by eight feet to enable sitting and other activities.
    b. Covered entries may project up to six feet into the front yard.
2. No more than three homes of the same variety are allowed to be constructed next to each other in order to avoid monotony of design.
3. At least ten feet of landscaped open space between the façades of middle housing or single family detached dwellings and the street or walkway; and
4. At least two architectural details, such as:
    a. Decorative lighting;
    b. Decorative trim;
    c. Special door;
    d. Trellis or decorative building element; and/or
    e. Bay window.
    f. Similar feature approved by the Director.

5.D.3 Character and Diversity

Residential units on the same lot shall be designed within the same "family" of architectural styles. This shall be accomplished by incorporating building elements of similar character. Examples of such elements include:

1. Similar building/roof form and pitch;
2. Similar siding materials;
3. Similar porch detailing; and/or
4. Similar window trim;

A diversity of residential styles can be achieved within a "family" of styles by:

DRAFT

1. Alternating porch styles (such as roof forms);
2. Alternating siding details on façades and/or roof gables; and/or
3. Different siding color.

5.D.4 Residential Window Details

The façades of residential buildings facing the street shall employ techniques to recess or project individual windows above the ground floor at least two inches from the façade or incorporate window trim at least four inches in width that features color that contrasts with the base building color. Exceptions will be considered by the Director where buildings employ other distinctive window or façade treatment that adds visual interest to the building.

Figure 5.D.4-1. Acceptable (left and center examples) and unacceptable (right example) window treatments.

5.D.5 Materials

1. The following are allowed only with special detailing, as described below:
    a. Metal siding. When used as a siding material over more than 25 percent of a building's façade visible from a public street, walkway, or park, metal siding must:
        (1) Have a matte finish in a neutral or earth tone such as buff, gray, beige, tan, cream, white, or a dulled color, such as barn-red, blue-gray, burgundy, ocher, or other color specifically approved by the Director.
        (2) Include two or more of the following elements:
            - Visible window and door trim painted or finished in a complementary color.
            - Color and edge trim that cover exposed edges of the sheet metal panels.
            - A base of masonry, stone, or other approved permanent material extending up to at least two feet above grade that is durable and satisfies the Intent of the Guidelines. The intent is to provide more durable materials near grade

level.

- Other detail/color combinations for metal siding approved by the Director, provided design quality and permanence meet the intent of this section.

Figure 5.D.5-1. Acceptable matte finish metal siding examples in a neutral/earth tone (left example) and in a dulled blue- gray tone (right example).

Figure 5.D.5-2. Visible window trim painted or finished in a complementary color. Note that the windows in the brick building on the left are recessed from the façade while the windows in the middle images include trim. The image on the right includes no trim or recess/projection and would not be permitted.

Figure 5.D.5-3. Residence with color and edge trim that cover exposed edges of sheet metal panels.

Figure 5.D.5-4. Structures with a base of stone (left) or masonry (center) extending up to at least two feet above grade. Example on the right includes metal siding all the way to the ground, which is prohibited.

b. Concrete block walls. Concrete block construction used over 25 percent of a building façade visible from a public roadway, walkway, or park must be architecturally treated in one or more of the following ways:

(1) Use of textured blocks with surfaces such as split face or grooved.

- Acceptable and unacceptable concrete block examples. The left example uses a mixture of split-faced colored concrete block and smooth-faced concrete block, together comprising just under 50 percent of the whole facade. The large expanse of smooth-faced concrete block on the right is not desirable. (Source: Ellensburg Municipal Code of Ordinances Design Guidelines)

(2) Use of other masonry types, such as brick, glass block, or tile in conjunction with concrete blocks.

(3) Use of decorative coursing to break up blank wall areas.

(4) Use of matching colored mortar where color is an element of architectural treatment for any of the options above.

(5) Other treatment approved by the Director.

DRAFT

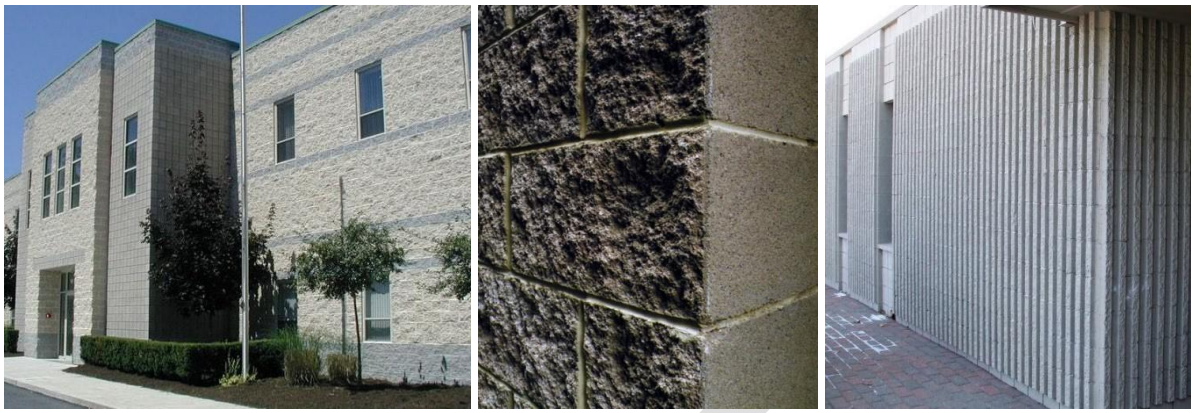

Figure 5.D.5-5. Acceptable concrete block textures, including a mixture of split-faced concrete block and smooth-faced concrete block (left and middle examples) and fluted or grooved concrete block (right example).

Figure 5.D.5-6. Acceptable architectural treatments for concrete block construction, including the use of brick in conjunction with concrete block (left example), decorative coursing (middle example), and matching colored mortar (right example).

c. Requirements for stucco, stucco-like, and similar troweled finishes:

(1) To avoid deterioration, the finished material must be trimmed and/or sheltered from extreme weather by roof overhangs or other methods.

(2) The finished material may only be used in conjunction with other approved building materials.

Figure 5.D.5-7. Acceptable examples of stucco finishes with roof overhangs and in conjunction with other materials.

d. Use of flat sheet materials such as fiber cement panels (e.g., Hardie Panel) is not allowed on ground floor façades facing Pedestrian-Oriented Streets. This is because the panels do not provide human scale surfaces or textures or refined details.

Figure 5.D.5-8. Acceptable examples illustrating the use of fiber cement panels with a different pedestrian-scale material on the ground floor façade (left and middle examples). The example on the right uses fiber cement panels on the ground floor façade, which is not acceptable.

e. Prohibited materials:

(1) Mirrored glass.

(2) Corrugated fiberglass.

(3) Crushed colored rock or tumbled glass.

(4) Any sheet materials, such as wood or metal siding, with exposed edges or unfinished edges, or made of nondurable materials.

(5) Any spray-on materials (e.g.: shotcrete) not specifically approved by the Director.

(6) Non-durable materials subject to deterioration if exposed to weather such as most plastic and synthetic materials or materials that are particularly vulnerable

to vandalism. Project applicants wishing to use synthetic materials such as vinyl siding must submit samples and product description information to the Director for approval. The Director will not accept such materials unless its durability and appropriateness is demonstrated.

5.D.6 Architectural Lighting

Steady, non-flashing lighting of building features, artwork, and special landscape elements may be allowed, subject to the findings of the Director that the light causes no significant adverse impact. Lighting shall meet lighting requirements within TMC 18.40.035.

5.D.7 Garage Placement and Design

1. Garages must be set back from the public street at least five feet further than the enclosed portion of the residential structure unless the structure is set back from the street at least 80 feet.

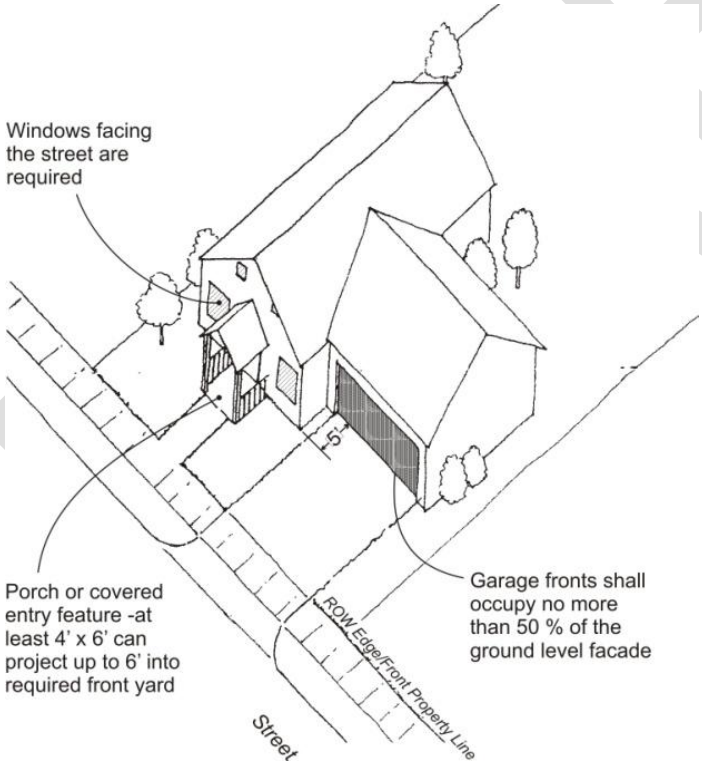

Figure 5.D.7-1. Street facing design requirements.

2. The garage doors shall occupy no more than 50 percent of the ground-level façade facing the street.

   Exception: garage doors may exceed this limit up to a maximum of 65 percent of the ground level façade facing the street provided at least two of the following design details are

incorporated:

a. A decorative trellis over the entire garage door(s);

b. A window or windows are placed above the garage on a second story or attic space under roofline;

c. A balcony or second story that extends out over the garage at least two feet in front of the garage doors;

d. Utilizing all single vehicle car doors as an alternative to wider garage doors suitable for two car garages;

e. Multi-paned or decorative windows on the garage door;

f. Uniquely paneled or decorative details on the garage door. Standard square panels on a garage door will not qualify as a decorative detail; or

g. Other design techniques that meet the intent, as determined by the Director.

Figure 5.D.7-2. Garage design detail examples.

3. Townhome style units can have the garage flush with the façade of the home and shall not protrude in front of the façade.
4. Garages constructed off of alleys do not need to meet the requirements listed in 5.D.7.2 above.

5.D.8 Cottage Housing

The following are additional guidelines that apply to cottage housing developments.

5.D.8.1 Community Building

1. A cottage housing development shall contain no more than one community building.
2. A community building is required for cottage housing developments. Written justification of the building's size should be provided with the design guideline narrative to analyze the needs of the proposed development.
3. A community building shall have no minimum off-street parking requirement.

5.D.8.2 Open Space Requirements

1. Open space shall be provided equal to a minimum of 20 percent of the lot size. This may include common open space, private open space, setbacks, critical areas, and other open space.
2. Common Open Space Requirements

DRAFT

Figure 5.D.8.2-1. Common open space may accommodate a variety of uses and feature a variety of landscape elements and characters.

a. At least one outdoor common open space is required.

b. At least half of the residential units in the development shall abut a common open space;

c. Residential units shall be oriented around and have the main entry from the common open space or the most important walkway or street;

d. There shall be at least 300 square feet of common open space per residential unit. Each common open space shall have a minimum dimension of 15 feet on any side;

e. Parking areas and vehicular areas shall not qualify as common open space; and

f. Critical areas and their buffers, including steep slopes, shall not qualify as common open space.

3. Required Private Open Space

a. All residential units must include at least 200 square feet of private open space adjacent to the residential unit that is usable and conducive open space for passive human activities such as dining, resting, sunbathing, gardening, or picnicking.

b. The private open space may consist of a porch, balcony, garden, patio, roof deck, or similar features.

c. The smallest dimension of the open space (deck, patio, etc.) must not be less than six feet.

d. Above grade balconies must be at least four feet wide in the smallest dimension.

DRAFT

CHAPTER 6:

Definitions

DRAFT VERSION SEPTEMBER 22, 2025

December 2025

Ordinance No. O2025-011

CITY OF TUMWATER

NOTE: These definitions apply to these design guidelines only and not to other sections of the Tumwater Municipal Code.

Access Street. A private street that is independent of parking area circulation and connects public rights-of-way or provides primary access to and within a site.

Architectural scale is the perceived height and bulk of a building relative to that of neighboring buildings. A building has "good architectural scale" if its visual size is relatively similar to its neighbors.

Art, Artwork. A device, element, or feature whose primary purpose is to express, enhance, or illustrate aesthetic quality, feeling, physical entity, idea, local condition, historical or mythical happening, or cultural or social value. Examples of artwork include sculpture, bas-relief sculpture, mural, or unique specially crafted lighting, furniture, pavement, landscaping, or architectural treatment that is intended primarily, but not necessarily exclusively, for aesthetic purpose. Signs, upon approval by the Director, may be considered artwork provided they exhibit an exceptionally high level of craftsmanship, special material, or construction, and include decorative devices or design elements that are not necessary to convey information about the business or product. Signs that are primarily names or logos are not considered art.

Balcony. An outdoor space built as an above-ground platform projecting from the wall of a building and enclosed by a parapet or railing.

Bas-relief. A sculptural carving, embossing, or casting that projects very little from the background.

Bay Window. A window that protrudes from the main exterior wall. Typically, the bay contains a surface which lies parallel to the exterior wall, and two surfaces which extend perpendicularly or diagonally out from the exterior wall. To qualify as a bay, the bay must contain a window pane which extends at least 60 percent of the length and 35 percent of the height of the surface of the bay which lies parallel to the exterior wall. There need not be windows in the surface which extend out from the exterior wall.

Blank Walls. Walls subject to "blank wall" requirements meet the following criteria:

- Any wall or portion of a wall that has a surface area of 400 square feet of vertical surface without a window, door, or building modulation or other architectural feature.
- Any ground level wall surface or section of a wall over 4 feet in height at ground level that is longer than 15 feet as measured horizontally without having a ground level window or door lying wholly or in part within that 15-foot section.

Courtyard. A landscaped space enclosed on at least three sides by a single structure.

Curb Cut. A depression in the curb for the purpose of accommodating a driveway that provides vehicular access between private property and the street.

Deck. An outdoor space built as an above-ground platform projecting from the wall of a building and connected to the ground by structural supports.

Director. The Tumwater Community Development Director or their designee.

Exterior Insulation and Finish System (EIFS): EIFS is an exterior wall cladding that utilizes rigid insulation

boards on the exterior of the wall sheathing with a plaster appearance exterior skin.

Feasible. For the purpose of these guidelines, an action or element is "feasible" if it can be accomplished within standard construction and development practices, as determined by the Director. Generally, an action or element is considered infeasible only if it is physically impossible, if the action causes immitigable significant adverse impacts or unsafe conditions, or if it substantially alters the intent of the project. An element or action may be considered feasible even if it raises the cost of that aspect or element of the project.

Frontage. As used in the code, frontage refers to the length of a property line along a street.

Front Yard. The area between the street and the nearest building façade.

Gross Floor Area. The sum of all at or above grade building floor areas measured at the exterior walls, including covered exterior areas such as porches or covered parking areas or decks. If the building includes more than one story, the floor area of upper stories is calculated as part of Gross Floor Area. Awnings or canopies along building fronts less than 8 feet in width (measure perpendicularly to the building front) are not counted as Gross Floor Area.

Horizontal Modulation. Refers to upper level building step backs. For example, this could include a building where two floors of the building front directly on the sidewalk, but the third floor is set back a distance from the front façade, and thus it may not even be visible from the sidewalk and portions of the street below.

Landscaping. An area is considered to be landscaped if it is:

- Planted with vegetation in the form of hardy trees, shrubs, or grass or evergreen ground cover maintained in good condition.
- Occupied by sculptures, fountains or pools, benches, or other outdoor furnishings.
- Occupied by such recreational facilities as playground equipment, swimming pools, game courts, etc.

Modulation. In the Guidelines, modulation is a stepping back or projecting forward of portions of a building face within specified intervals of building width and depth, as a means of breaking up the apparent bulk of a structure's continuous exterior walls.

Pedestrian-Oriented Façades. Ground floor façades which meet the requirements of E.4.1 Pedestrian-Oriented Façades (e.g., transparency along at least 75 percent of the ground floor façade between 2 and 8 feet above the sidewalk).

Pedestrian-Oriented Open Space. An area between a building and a street, access road, an area along a pedestrian path, or other open space such as plaza or outdoor seating area which promotes visual and pedestrian access onto the site, and which provides pedestrian-oriented amenities and landscaping to enhance the public's use of the space for passive activities such as resting, reading, picnicking, etc. See **Section C.2**.

Pedestrian-Oriented Use (or Business). A commercial enterprise whose customers commonly arrive by foot; or whose signage, advertising, window display, and entryways are oriented toward pedestrian

traffic. Pedestrian-oriented businesses may include restaurants, retail shops, personal service businesses, travel services, banks (except drive-through windows), and similar establishments.

Scale, Human. The perceived size of a building relative to a human being. A building is considered to have "good" human scale if there is an expression of human activity or use that indicates the building's size. For example, traditionally sized doors, windows, and balconies are elements that respond to the size of the human body, so these elements in a building indicate a building's overall size.

Scale, Architectural. The perceived relative height and bulk of a building relative to that of neighboring buildings. A building's apparent height and bulk may be reduced by modulating façades.

Site. The legal property parcel or lot on which the development is to be constructed. If the development involves more than one parcel or lot, then all are considered part of the "site."

Streetscape. The streetscape is the visual character of a street as determined by various elements such as structures, greenery, open space, views.

TMC. Tumwater Municipal Code.

Vertical Modulation. A stepping back or projecting forward vertical walls of a building face, within specified intervals of building width and depth, as a means of breaking up the apparent bulk of a structure's continuous exterior walls.

6.B.4 Driveway Standards.....6

6.B.5 Minimum Useable Open Space.....7

6.A. Administrative

6.A.1. Applicability

This chapter applies to new single family residences. Additions to existing single family residences shall not increase the level of non-conformance to these guidelines.

6.A.2. Intent

1. To maintain the livability, design compatibility, and environmental quality of single family neighborhoods.
2. To maintain "eyes on the street" for safety to pedestrians and to create a more welcoming and interesting streetscape;
3. To deemphasize garages and driveways as major visual elements along the street; and
4. To provide usable yard space for residents.
5. To enhance the character of the street;

6.B. Design Guidelines

6.B.1. Dimensional Standards

Table 6B.1-1 Dimensional standards for single family:

Standard	Requirement
Minimum common space	400 SF/unit
Minimum private open space	200 SF/unit
Pedestrian Access	Min. 3 ft. wide and separate from driveway
Open Space	10% of lot size, not in front yard, and min. 12 ft. on all sides
Setbacks (to exterior property lines)	See TMC 18.42.040
Garages	Set back from the public street at least 5' further than the enclosed portion of the house unless the house is set back from the street at least 80 feet.
~~Parking/Driveway Curb Cut~~	~~10 ft. wide~~
Balconies	Minimum depth 4 ft
Porches	Minimum depth 4 ft
Patios and Decks	Minimum depth 6 ft

6.B.2 Entries and Façade Transparency

1. Clear and obvious pedestrian access between the public sidewalk and the building entry is required for new homes, except for flag lots and other non-traditional lot shapes. The path or walkway must be at least 3 feet wide and separate from the driveway. Porous pavement or pavers are encouraged.
2. All new houses shall provide an entry weather protection (porch, etc) with a minimum area of 6 feet by 6 feet. Covered entries may project up to 6 feet into the front yard.
3. At least 8 percent of the front façade (all vertical surfaces facing the street) shall include transparent windows or doors.

6.B.3 Garages Placement and Design

4. Where lots abut an alley, the garage or off-street parking area must to take access from the alley unless the Director finds that there is a compelling reason to make an exception (such as a steep slope or setback requirement makes alley access infeasible.

5. Garages must be set back from the public street at least 5' further than the enclosed portion of the house unless the house is set back from the street at least 80 feet.

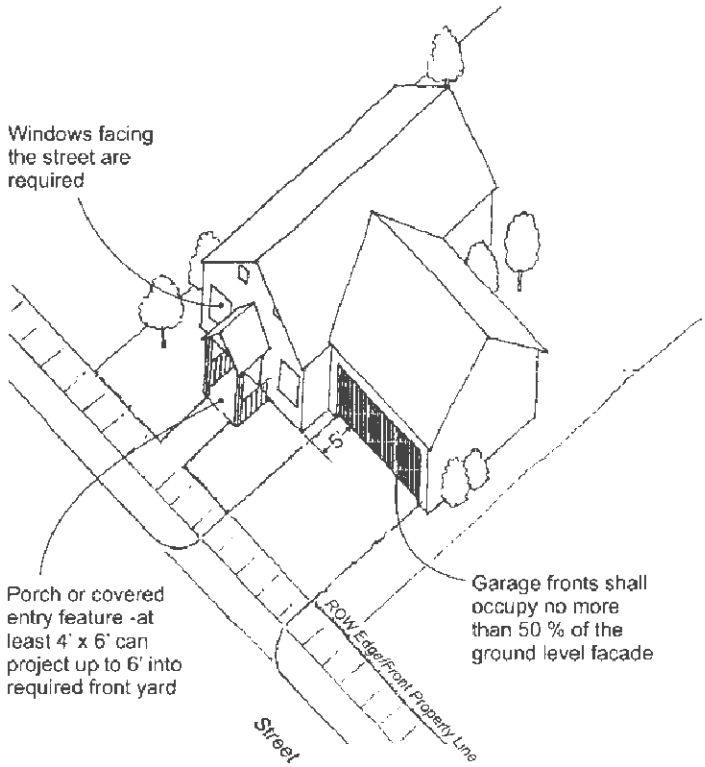

Figure 6.B.3-1. Single family design requirements.

6. The garage doors shall occupy no more than 50 percent of the ground-level façade facing the street.

   Exception: garage doors may exceed this limit up to a maximum of 65 percent of the ground level façade facing the street provided at least 2 of the following design details are incorporated:

   a. A decorative trellis over the entire garage door(s);

   b. A window or windows are placed above the garage on a second story or attic space under roofline;

   c. A balcony or second story that extends out over the garage at least 2' in front of the garage doors;

   d. Utilizing all single vehicle car doors as an alternative to wider garage doors suitable for two car garages;

   e. Multi-paned or decorative windows on the garage door;

   f. Uniquely paneled or decorative details on the garage door. Standard square panels on a garage door will not qualify as a decorative detail; or

   g. Other design techniques that meet the intent, as determined by the Director.

Figure 6.B.3-2. Garage design detail examples.

6.B.4 Driveway Standards

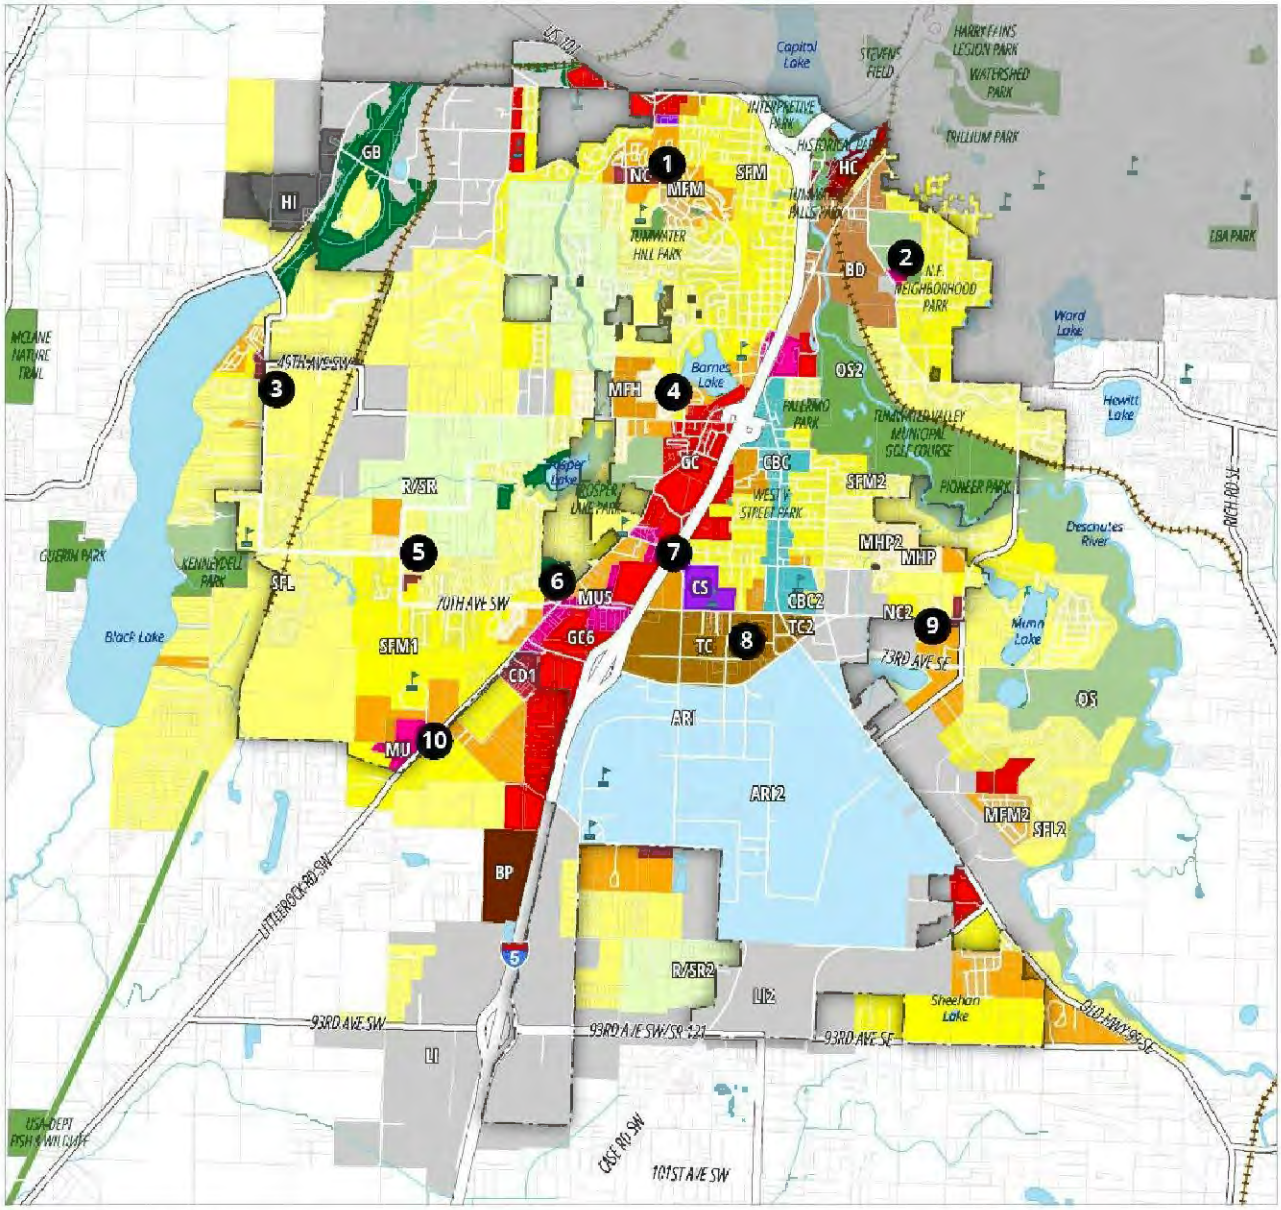
Where a new driveway off of a street is permitted, the following standards apply:

7. No more than one driveway per dwelling unit; ~~and~~

8. ~~Driveway curb cuts for individual lots may be up to 10 feet in width. To accommodate this requirement~~, ~~tandem parking configurations may be used for 2-car garages in single family structures not to exceed 36 feet in length.~~

The width of properties with non-parallel side lot lines shall be determined at the plane of the garage door when determining conformance with the standards above.

Figure 6.B.4-1. Tandem garage design detail example.



6.B.5 Minimum Useable Open Space

All new single-family residences shall provide a contiguous open space equivalent to 10 percent of the lot size (excluding area within an adjacent alley, easement or public right-of-way). Such open space shall not be located within the front yard. The required open space shall feature a minimum dimension of 12 feet on all sides. For example, a 6,000 square foot lot would require a contiguous open space of at least 600 square feet in area. Driveways shall not count in the calculations for usable open space. However, yard setbacks, decks and covered areas (such as a covered patio or outdoor cooking area) may be included.

Single family additions shall not create or increase any non-conformity with this standard.

TO: City Council

FROM: Karen Kirkpatrick, City Attorney

DATE: December 16, 2025

SUBJECT: Timberland Library Agreement Amendment 1

---

1) Recommended Action:

Authorize the Mayor to sign the First Amendment to Agreement Between the City of Tumwater and Timberland Regional Library.

---

2) Background:

The City and Timberland Regional Library entered into an agreement effective November 3, 2015, whereby the City agreed to provide and maintain the Tumwater Library facility and Timberland Regional Library agreed to provide public library services. The original term of the Agreement was for ten years, but could be extended for additional five-year terms or, upon expiration of the term, the Library would have thirty days to remove its property from the Tumwater Library. The City and the Library desire to continue providing library services and are currently negotiating the terms of a five-year renewal. This Amendment is extending the original term out to June 30, 2026 to allow time for those negotiations to continue.

---

3) Policy Support:

Partnership – we work in partnership with residents, businesses, community organizations, and governments to address challenges and advance shared goals.

---

4) Alternatives:

- ❑ Propose an alternate amendment.
- ❑ Not sign the amendment and terminate the agreement with the library.

---

5) Fiscal Notes:

N/A

---

6) Attachments:

A. First Amendment to Agreement Between the City of Tumwater and Timberland Regional Library.

Exhibit A

FIRST AMENDMENT
TO
AGREEMENT BETWEEN THE CITY OF TUMWATER
AND
TIMBERLAND REGIONAL LIBRARY

This First Amendment ("Amendment") is dated effective this 3rd day of November, 2025 and is entered into by and between the CITY OF TUMWATER, a Washington municipal corporation ("CITY"), and Timberland Regional Library ("LIBRARY"), an intercounty rural library district.

A. The CITY and the LIBRARY entered into an Agreement dated effective November 3, 2015, whereby the CITY agreed to maintain the Tumwater Library facility and the LIBRARY agreed to provide public library services ("Agreement").

B. Section 14 of the Agreement provided that the Agreement may only be modified by written instrument signed by the parties.

C. Section 17 of the Agreement provided that the original term of the Agreement was ten (10) years from the date of execution thereof (November 3, 2025), but may be extended for additional five (5) year extensions or, upon expiration of the term, the LIBRARY shall have thirty (30) days to complete removal of its property from the Tumwater Library.

D. The CITY and LIBRARY desire to continue providing library services in the Tumwater Library facility and do not wish to terminate the Agreement.

E. The CITY and the LIBRARY desire to amend the Agreement to continue the services described therein by extending the term of the Agreement by approximately seven months to allow time to negotiate the terms of a 5-year renewal.

NOW, THEREFORE, the parties agree to the following terms and conditions:

1. TERM.

Section 17 of the Agreement shall be amended to read as follows:

> 17. Term and Termination. The term of this Agreement shall end on June 30, 2026, unless terminated sooner. The Agreement may be extended for additional five (5) year extension terms upon mutual

written agreement of the parties. The Agreement may be terminated at any time by mutual execution of such written termination as may be negotiated between the parties or as may be required if the City becomes no longer annexed to the Library district.

2. FULL FORCE AND EFFECT.

All other terms and conditions of the Agreement not modified by this Amendment shall remain in full force and effect.

DATED the effective date set forth above.
