Hybrid Meeting Information
The public are welcome to attend in person, by telephone or online via Zoom.

Watch Online
Go to http://www.zoom.us/join and enter the Webinar ID 850 1626 9234 and Passcode 006777.

Listen by Telephone
Call (253) 215-8782, listen for the prompts and enter the Webinar ID 850 1626 9234 and Passcode 006777.

Public and Written Comment
Attend in person to give public comment or register by 6:45 p.m. the day of the meeting to provide public comment using the web-based meeting platform: https://us02web.zoom.us/webinar/register/WN_TYteVu57Q5aKb0F_TYZrWA

After registering, you will receive a confirmation email with a login to join the online meeting.

As an alternative, prior to the meeting, the public may submit comments by sending an email to council@ci.tumwater.wa.us, no later than 5:00 p.m. on the day of the meeting. Comments are submitted directly to the Mayor and City Councilmembers and will not be read individually into the record of the meeting.

Post Meeting
Video of this meeting will be recorded and posted on our City Meeting page: https://tumwater-wa.municodemeetings.com.

Accommodations
The City of Tumwater takes pride in ensuring that people with disabilities are able to take part in, and benefit from, the range of public programs, services, and activities offered by the City. To request an accommodation or alternate format of communication, please contact the City's ADA Coordinator directly, call (360) 754-4129 or email ADACoordinator@ci.tumwater.wa.us. For vision or hearing impaired services, please contact the Washington State Relay Services at 7-1-1 or 1-(800)-833-6384.

MEETING MINUTES

TUMWATER CITY COUNCIL WORK SESSION
November 25, 2025

CONVENE: 6:00 p.m.

PRESENT: Mayor Debbie Sullivan and Councilmembers Peter Agabi, Michael Althauser, Joan Cathey, Leatta Dahlhoff, Angela Jefferson, Eileen Swarthout, and Kelly Von Holtz.

Staff: City Administrator Lisa Parks, City Attorney Karen Kirkpatrick, Fire Chief Brian Hurley, Finance Director Troy Niemeyer, Information Technology Director Lance Inman, Communication Director Jason Wettstein, Water Resources & Sustainability Director Dan Smith, Deputy Police Chief Carlos Quiles, Jr., Associate Planner Dana Bowers, Deputy Community Development Director Sharon Lumbantobing, and Deputy City Clerk Tracie Core.

PRESENTATION OF PROCLAMATION: CONFEDERATED TRIBES OF THE CHEHALIS RESERVATION

Mayor Sullivan presented Chairman Klatush from the Chehalis Tribe, who was unable to attend the November 3rd City Council meeting, a Proclamation declaring the month of November 2025 as American Indian Heritage Month. The proclamation encourages people to celebrate the rich culture of Indigenous people, honor their sacrifices, acknowledge the unique challenges Native people face, historically and in the present and recognize their continued significance in our community.

Chairman Klatush in turn presented Mayor Sullivan and the Council a Chehalis Tribal Flag and fresh salmon that was just caught that morning to thank them for their partnership with the tribe.

INTERCITY TRANSIT'S MAY 2026 SYSTEM REDESIGN

Planner Bowers introduced General Manager Emily Bergkamp and Planning Deputy Director Rob LaFontaine with Intercity

Transit who shared a presentation on their transit expansion project.

The presentation covered a three-phase redesign process of the transit system to include the following:

- Phase 1, May 2025 – Expanded service hours and increased frequency.
- Phase 2, September 2025 – Introduction of two new commuter routes.
- Phase 3, May 2026 - New Crosstown BRT-Lite line, as well as a replacement of most existing local routes.

COUNCIL POSITION NO. 1 SELECTION PROCESS

Administrator Parks congratulated Councilmember Dahlhoff being elected as the new Mayor effective January 1, 2026. Her council seat will become vacant when she assumes the mayoral role. Per the statute the City Council has 90 days from the vacancy date to appoint a replacement.

Administrator Parks shared that she will be gone in early December and in her absence, City Attorney Kirkpatrick will be overseeing the process for filling the vacancy. Direction was requested from the Council as to the process, timeline, changes to the application form, and list of interview questions.

Attorney Kirkpatrick presented an aggressive timeline for the Council Position No. 1 selection process and after a brief discussion, Council agreed they would like to follow the expedited timeline so a new council member can be sworn in at the January 20, 2026 Council meeting.

The Council Position No. 1 selection process will be placed on the considerations calendar for the December 2, 2025, City Council meeting.

MAYOR/CITY ADMINISTRATOR's REPORT:

Administrator Parks shared details of a Fire Department recruitment event taking place on December 3, 2025. She also shared that Santa stops will be happening throughout the month of December and the Christmas Tree lighting will be held on Saturday, December 6, 2025. Administrator Parks also shared that businesses and multi-property owners can apply for EV charging stations grants through the State Department of Commerce until December 18, 2025. Lastly, she reminded

everyone that the city will be closed November 27th and 28th due to the Thanksgiving holiday.

Mayor Sullivan shared that on this day back on November 25, 1869, the City of Tumwater was created and today is Tumwater's 156th anniversary. She also reminded council members that on December 9, 2025, the council work session will be a joint work session with the Planning Commission and will start at approximately 6:30 p.m following the regular Planning Commission meeting

ADJOURNMENT: **With there being no further business, Mayor Sullivan adjourned the meeting at 7:15 p.m.**

Prepared by Tracie Core, Deputy City Clerk

MEETING MINUTES

TUMWATER CITY COUNCIL
December 2, 2025

CONVENE: 7:00 p.m.

PRESENT: Mayor Debbie Sullivan and Councilmembers Peter Agabi, Michael Althauser, Joan Cathey, Leatta Dahlhoff, Angela Jefferson, Eileen Swarthout and Kelly Von Holtz.

Staff: City Administrator Lisa Parks, Assistant City Administrator Kelly Adams, City Attorney Karen Kirkpatrick, Fire Chief Brian Hurley, Finance Director Troy Niemeyer, Information Technology Director Lance Inman, Parks and Recreation Director Chuck Denney, Police Chief Jay Mason, Brandon Hicks, Transportation & Engineering Director, Water Resources and Sustainability Director Dan Smith, Communications Director Jason Wettstein, Deputy Community Development Director Sharon Lumbantobing, Associate Planner Dana Bowers and City Clerk Melody Valiant.

Others: Franida Maudsley, Sacajawea Chapter Daughters of the American Revolution

SPECIAL ITEMS:

UNION PIONEER CALVARY CEMETERY HEADSTONE RESTORATION PRESENTATION:

Mayor Sullivan introduced Franida Maudsley with the Sacajawea Chapter Daughters of the American Revolution who has been working over the last year on restoring headstones at the Union Pioneer Calvary Cemetery. Franida talked about why it was important to the Chapter to preserve the headstones, and she emphasized the importance of preservation to prevent further deterioration.

She shared all the tools and cleaners they used to restore, raise, level and straighten the headstones. The group will return this

summer to continue their work in the cemetery. Councilmembers thanked them for the dedication and hard work to preserving Tumwater history.

COMMUNITY CENTER PUBLIC OUTREACH PROCESS:

Director Denney recapped the September 23, 2025, Work session where Barker, Rinker, Seacat Architecture came to discuss with the Council potential locations and designs for the Community Center. They had recommended two potential locations and discussed the pros and cons of each. The locations were a Washington State Department of Transportation (WSDOT) site located at 5202 Capitol Boulevard SE and Kimmie & 80th Street which is owned by the Port of Olympia.

Since the Kimmie and 80th street location was a new consideration, it was determined that there needed to be more discussion and public outreach before making a decision. Director Denney outlined what would be done over the next few months including a discussion at the January Parks and Recreation commission meeting, followed by a discussion the next week at the Community Center Steering Committee and lastly a February 4, 2026, public open house to get community input. Directory Denney said after all that occurs they will then come back again to the Council for a discussion and to select the location for the Community Center.

PUBLIC COMMENT:

Public comment was given by residents Farr and Kitabayashi.

CONSENT CALENDAR:

a. Approval of Minutes: City Council, November 18, 2025
b. Payment of Vouchers
c. Service Provider Agreement with Fehr & Peers for Vehicle Miles Traveled Gap Analysis
d. Service Provider Agreement with Carollo Engineers for the 2025 Sanitary Sewer Comprehensive Plan Update
e. Technical Services Agreement with King County for Regional Collaboration for Better Resilience Outcomes in the Puget Sound Basin

MOTION:

Councilmember Jefferson, moved, seconded by Councilmember Von Holtz, to approve the Consent Calendar as published. A voice vote approved the motion unanimously.

PUBLIC HEARING:

RESOLUTION NO. R2025-020, CRAFT DISTRICT DEVELOPMENT AGREEMENT AMENDMENT NO. 4:

Director Hicks presented Resolution No. R2025-020, Craft District Development Agreement Amendment No. 4. The Craft District is located off Capitol Boulevard and is centered on craft brewing, distilling, cider-making, restaurants, retail, office space, and a 1,000-person amphitheater that has not been constructed yet. The amendment will extend the agreement until December 31, 2026, and is needed due to lending constraints, market uncertainty and tenant demands.

Staff recommends that pursuant to testimony at the public hearing, the City Council adopt Resolution No. R2025-020, Craft District Development Agreement Amendment No. 4.

Mayor Sullivan opened and closed the public hearing at 7:46 p.m.

There was no public testimony.

MOTION:

Councilmember Swarthout, moved, seconded by Councilmember Agabi, to adopt Resolution No. R2025-020, Craft District Development Agreement Amendment No. 4. A voice vote approved the motion unanimously.

ORDINANCE NO. O2025-015, EMINENT DOMAIN FOR X STREET:

Director Hicks presented Ordinance No. O2025-015, Eminent Domain for the X Street roundabout which is the 4th project being implemented from the Capital Corridor plan which was a plan that was worked on from 2013-2017 with lots of public outreach and engagement.

The purpose of the project is to relieve congestion, improve safety, make multi-modal improvements and help revitalize the corridor. The total cost of the project is $6.8 million with the City receiving $5.4 million in grant funding towards it. Construction of the roundabout is scheduled for 2026. Director Hicks talked about why roundabouts are chosen over a signaled light including that they are safer, better for multi-modal transportation, more cost effective for long term maintenance and better capacity for vehicles.

Director Hicks explained how the eminent domain process works and highlighted the properties that would need to be acquisitioned. Councilmembers asked questions about how the

process works for the property owner's including potential lost revenue, construction and relocation. Staff is recommending that the City Council adopts Ordinance O2025-025-015, Eminent Domain for X Street.

MOTION: **Councilmember Jefferson, moved, seconded by Councilmember Von Hotlz, to adopt Ordinance No. O2025-015, Eminent Domain for X Street. A voice vote approved the motion unanimously.**

ORDINANCE NO. O2025-009, 2025 COMPREHENSIVE PLAN AMENDMENTS:

Planner Bowers presented Ordinance No. O2025-009, 2025 Comprehensive Plan amendments which includes the 2026-2031 Capital Facilities plan (CFP). The Capital Facilities Plan coordinates resources over the next six years to complete high priority projects.

The plan is updated biannually, and is updated through a Comprehensive plan amendment process. The Council suspended Comprehensive Amendments from 2022-2025, but this amendment is allowed because it's a City sponsored amendment and a required element of the Comprehensive plan.

The Planning Commission held a public hearing in October and recommended the ordinance be approved. Next the General Government Committee was briefed on the ordinance. Staff is recommending that the City Council adopt Ordinance O2025-025-009, 2025 Comprehensive Plan Amendments.

MOTION: **Councilmember Althauser, moved, seconded by Councilmember Von Holtz, to adopt Ordinance No. O2025-009, 2025 Comprehensive Plan Amendments. A voice vote approved the motion unanimously.**

QUARTERLY BUDGET UPDATE:

Director Niemeyer presented a quarterly budget update.

He updated the Council on the following:

- Sales Tax
- Public Safety Sales Tax
- B&O Tax
- Building Permits
- General Fund Revenues & Expenditures
- Water and Sewer Revenues & Expenditures
- Economy Upsides and Risks

- K-Shaped Economy

Directory Niemeyer talked about a K-Shaped economy where certain industries rebound strongly while others continue to struggle. Council asked questions to see if there are ways to check in with industries struggling to recover in Tumwater such as hotels and restaurants.

COUNCIL POSITION NO. 1 SELECTION PROCESS:

Attorney Kirkpatrick presented the Council Position No. 1 selection process that had been discussed at last week's work session. The interview questions were updated as Council had requested. Councilmembers thanked staff for their hard work incorporating everything they wanted added to the questions for the interviews and they liked the process as presented.

Applications will be accepted from December 8 to December 22nd, 2025, at noon and interviews will be held on January 10, 2026, at Tumwater City Hall. The person selected will be sworn in on January 20, 2026, preceding the regular council meeting.

MOTION

Councilmember Swarthout, moved, seconded by Councilmember Agabi, to approve the Council Position No. 1 selection process. A voice vote approved the motion unanimously.

COMMITTEE REPORTS:

PUBLIC HEALTH & SAFETY:
Peter Agabi

The committee has not met. The next meeting is scheduled for December 9, 2025, and they will be discussing the following items:

- T-2 Remodel Update

GENERAL GOVERNMENT:
Michael Althauser

The committee has not met. The next scheduled meeting has been cancelled. Councilmember Cathey thanked Councilmember Althauser for his years serving as the chair for the committee.

PUBLIC WORKS:
Eileen Swarthout

The next meeting is scheduled for December 4, 2025, and they will be discussing the following items:

- Sustainability Division 2026 Work Program
- R2025-018, Fee Resolution Update

- SPA with MTN2COAST for On-Call Services Amendment No. 1

BUDGET & FINANCE: ***Debbie Sullivan***

The Budget & Finance Committee has not met. The next scheduled meeting has been cancelled due to the Christmas holiday.

MAYOR/CITY ADMINISTRATOR's REPORT:

Administrator Parks said there would be rolling night-time lane closures at the Capitol Boulevard bridge to evaluate future maintenance decisions. She also shared lots of community events that were coming up including Santa stops and the Christmas Tree lighting on December 6, 2025. She also informed Council that she would be out of the office on vacation and in her absence Chief Hurley and Assistant Administrator Adams would be covering her duties.

Mayor Sullivan attended a Thurston Economic Development (EDC) meeting and talked about an upcoming Innovation Expo Conference sponsored by the Thurston EDC. She also reminded everyone that next week's Work Session is joint with the Planning Commission and it will begin at approximately 6:30 p.m. following the regular Planning Commission meeting.

COUNCILMEMBER REPORTS:

Councilmembers Agabi, Jefferson and Von Holtz gave reports.

Councilmembers Althauser, Cathey, Dahlhoff and Swarthout had nothing to report.

ADJOURNMENT:

With there being no further business, Mayor Sullivan adjourned the meeting at 8:56 p.m.

Prepared by Melody Valiant, City Clerk

SUBJECT: Resolution No. R2025-021, Surplus Property

---

1) Recommended Action:

Adopt Resolution R2025-021 Declaring Property as Surplus.

---

2) Background:

The surplus items include 6 ER&R vehicles, 7 Police vehicles, 3 TED Admin vehicles, and 5 Golf Maintenance equipment.

All items have been taken out of service or will be taken out of service and replaced according to their useful lives or have become obsolete.

---

3) Policy Support:

Refine and sustain a great organization.

---

4) Alternatives:

- ❑ Adopt the Resolution.
- ❑ Don't adopt the Resolution

---

5) Fiscal Notes:

No significant impact. Most items are owned by the Equipment Rental Fund and are sold, disposed, or auctioned off where appropriate. Replacement cost for ER&R items is included in the internal rental rates. The replacement of all other items is budgeted by each department if necessary.

---

A. Resolution R2025-021 Declaring Property as Surplus with attached Exhibit A List of the items to be surplused

Attachment "A"

RESOLUTION NO. R2025-021

A RESOLUTION of the City Council of the City of Tumwater, Washington declaring the property itemized on the attached Exhibit A surplus to the City's needs, so that it can be disposed of in accordance with Washington State Law.

WHEREAS, the Asset Manager has determined that the items on the attached Exhibit A, currently owned by the City of Tumwater by purchase, property seizure, or unclaimed property are not needed by the City for current operations; and

WHEREAS, it is the City's policy to dispose of surplus property in accordance with RCW 35A.11.010, RCW63.32.010, and other applicable Washington State laws, rules and regulations.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUMWATER AS FOLLOWS:

Section 1. **Surplus Declaration**. The property itemized on the attached Exhibit A is hereby declared surplus to the needs of the City of Tumwater, and it shall be auctioned, sold, traded, donated, or otherwise disposed of in accordance with the provisions of Washington State laws, rules and regulations.

Section 2. **Ratification**. Any act consistent with the authority and prior to the effective date of this Resolution is hereby ratified and affirmed.

Section 3. **Severability.** The provisions of this Resolution are declared separate and severable. The invalidity of any clause, sentence, paragraph, subdivision, section, or portion of this Resolution or the invalidity of the application thereof to any person or circumstance, shall not affect the validity of the remainder of the Resolution, or the validity of its application to other persons or circumstances.

Section 4. **Effective Date.** This Resolution shall become effective immediately upon adoption and signature as provided by law.

RESOLVED this 16th day of December 2025.

SUBJECT: Service Provider Agreement with MTN2COAST for On-Call Services Amendment No. 1

---

1) Recommended Action:

Authorize the Mayor to sign the Service Provider Agreement with MTN2COAST for On-Call Services Amendment No. 1.

This agreement was recommended for approval on the consent calendar at the December 4, 2025 Public Works Committee meeting.

---

2) Background:

The original Agreement for $49,000 was signed on December 5, 2024.

The First Amendment extends the agreement until December 31, 2026, which provides on-call survey services. This First Amendment increases the not-to-exceed amount to $124,000.00 to cover anticipated costs in 2026.

---

3) Policy Support:

Council Strategic Goals and Priorities:

C. Create and Maintain a Transportation System Safe for All Modes of Travel.

---

4) Alternatives:

- ❑ Do not approve the Agreement

---

5) Fiscal Notes:

Fees charged for this agreement will be allocated to the appropriate City fund, dependent upon the work completed.

---

A. Service Provider Agreement with MTN2COAST for On-Call Services Amendment No. 1

Attachment A

FIRST AMENDMENT
TO
SERVICE PROVIDER AGREEMENT
FOR
ON-CALL SURVEY SERVICES

This First Amendment ("Amendment") is dated effective this _____day of_____, 20_____, and is entered into by and between the CITY OF TUMWATER, a Washington municipal corporation ("CITY"), and MTN2COAST, LLC, a Washington limited liability corporation ("SERVICE PROVIDER").

A. The CITY and the SERVICE PROVIDER entered into a Service Provider Agreement dated effective December 5, 2024, whereby the SERVICE PROVIDER agreed to provide on-call survey services ("Agreement").

B. Section 14 of the Agreement provided that the Agreement may only be amended by written agreement signed by the parties.

C. The CITY and the SERVICE PROVIDER desire to amend the Agreement to continue the services described in Section 1 of the Agreement by extending the term of the Agreement, increasing the compensation paid to the SERVICE PROVIDER, and adjusting the rates to reflect the SERVICE PROVIDER's current pricing.

NOW, THEREFORE, the parties agree to the following terms and conditions:

1. TERM.

Section 2 of the Agreement shall be amended to extend the term of the Agreement until December 31, 2026.

2. COMPENSATION.

In consideration of the SERVICE PROVIDER continuing to provide the services described in Section 1 of the Agreement during the extended term of the Agreement, Section 4.C. shall be amended to increase the hourly rates for services performed in 2026 as described in Exhibit A-1 and increase the compensation paid to the SERVICE PROVIDER by an additional amount not to exceed Seventy-Five Thousand and 00/100 Dollars ($75,000.00). The total amount payable to the SERVICE PROVIDER pursuant to the original Agreement and this First Amendment shall be an amount not to exceed One-Hundred Twenty-Four Thousand and 00/100 Dollars ($124,000.00).

3. FULL FORCE AND EFFECT.

All other terms and conditions of the Agreement not modified by this Amendment shall remain in full force and effect.

DATED the effective date set forth above.

My appointment expires:_____

TO: City Council

FROM: Jay Mason, Chief of Police

DATE: December 16, 2025

SUBJECT: Purchasing Contract with Axon Enterprises for Body Worn and Vehicle Cameras

---

1) Recommended Action:

Authorize the Mayor to sign the agreement with the Axon Enterprises for body worn and vehicle cameras.

The agreement was recommended for approval on the consent calendar at the December 9, 2025 Public Health and Safety meeting.

---

2) Background:

The use of body-worn cameras (BWC) is becoming more prevalent among law enforcement agencies in Washington State and specifically within Thurston County. The Tumwater Police Department has had in-car cameras for 25+ years and has continuously assessed the value of adding BWCs for the last ten years. In the Police Strategic Growth Plan, the Department intended to add body cameras in early 2027. However, as part of the budget process, the Department was funded in the 2025-2026 biennium for this project. During 2025, the Department hired staff to procure and manage a camera system to include new in-car cameras and BWCs. Staffing to manage the anticipated increase in public disclosure is occurring at this time. In 2025, the Department also evaluated BWC/in-car camera systems to determine which would best meet the needs of both officers and administrative staff.

The police department has been evaluating body worn and vehicle camera systems for the last several months. After evaluating three systems, a team of commissioned and non-commissioned staff determined that the Axon system best meets the needs of the police department. The State of Washington has a Master Contract with Axon that allows the City to piggy-back on the contract. The attached documents are the contract documents from the State and the binding quote for the set of equipment the City will purchase from Axon. The contract will run for five years, with equipment replacement occurring at month 30 to ensure the equipment remains current. Equipment replacement is included in the five year contract cost.

---

3) Policy Support:

2026-2032 Strategic Priority: *"Provide and Sustain Quality Public Safety Services"*

---

4) Alternatives:

Reject the contract and direct the police department to select a new vendor.

---

5) Fiscal Notes:

The annual cost of the contract is $156,548.80.

OKLAHOMA AND NASPO VALUEPOINT MASTER AGREEMENT AWARD

SUMMARY

1. Scope of Work Defined. The goal of this Master Agreement is to provide State(s) requirements for competitive proposals along with value-added solutions which allow State and Local Governments to easily equip their public safety transportation equipment and employees with the best competitive pricing, cutting edge technology, and superior customer services without the need for individual competitive proposals.

   With the volatile speed of technology designs, growing demands and unique customizable configurations, these product categories shall remain flexible and may be redefined during the life of this contract.

   Note: the following items will not be included in this contract award: *Body Armor, LED Light Bars, Public Safety Radios, Radar, and Lidar Equipment.* These items are on separate NASPO ValuePoint Master Agreements.

2. Master Agreement Order of Precedence. Any Order placed under this Master Agreement shall consist of the following documents:

   (1) Participating Entity's Participating Addendum ("PA")
   (2) Oklahoma NASPO ValuePoint Master Agreement Award
      a. Summary
      b. NASPO ValuePoint Master Agreement Terms and Conditions, inclusive of any terms proposed by Contractor and accepted by the Lead State
      c. Oklahoma Terms and Conditions
      d. Service Level Agreement
      e. Price and Cost Proposal
   (3) A Purchase Order issued against the Master Agreement
   (4) The Solicitation; and
   (5) Contractor's response to the Solicitation, including but not limited to Contractor's Terms and Conditions Contained in Response, as revised and accepted by the Lead State.

These documents shall be read to be consistent and complementary. Any conflict among these documents shall be resolved by giving priority to these documents in the order listed above. Contractor terms and conditions that apply to this Master Agreement are only those that are expressly accepted by the Lead State and must be in writing and attached to this Master Agreement as an Exhibit or Attachment.

3. Except for information deemed confidential by the State pursuant to applicable law, rule, regulation or policy, the parties agree Contract terms and information are not confidential and are disclosable without further approval of or notice to Supplier.

Master Agreement Number: OK-MA-145-21-100

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

ATTACHMENT A
NASPO VALUEPOINT MASTER AGREEMENT TERMS AND CONDITIONS

I. Definitions

1.1 **Acceptance** means acceptance of goods and services as set forth in Section IX of this Master Agreement.

1.2 **Contractor** means a party to this Master Agreement, whether a person or entity, that delivers goods or performs services under the terms set forth in this Master Agreement.

1.3 **Embedded Software** means one or more software applications which permanently reside on a computing device.

1.4 **Intellectual Property** means any and all patents, copyrights, service marks, trademarks, trade secrets, trade names, patentable inventions, or other similar proprietary rights, in tangible or intangible form, and all rights, title, and interest therein.

1.5 **Lead State** means the State centrally administering any resulting Master Agreement(s) who is a party to this Master Agreement.

1.6 **Master Agreement** means the underlying agreement executed by and between the Lead State, acting in cooperation with NASPO ValuePoint, and the Contractor, as now or hereafter amended.

1.7 **NASPO ValuePoint** is a division of the National Association of State Procurement Officials ("NASPO"), a 501(c)(3) limited liability company. NASPO ValuePoint facilitates administration of the NASPO cooperative group contracting consortium of state chief procurement officials for the benefit of state departments, institutions, agencies, and political subdivisions and other eligible entities (i.e., colleges, school districts, counties, cities, some nonprofit organizations, etc.) for all states, the District of Columbia, and territories of the United States. NASPO ValuePoint is identified in the Master Agreement as the recipient of reports and may perform contract administration functions relating to collecting and receiving reports, as well as other contract administration functions as assigned by the Lead State.

1.8 **Order** or **Purchase Order** means any purchase order, sales order, contract, or other document used by a Purchasing Entity to order the Products.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

1.9 **Participating Addendum** means a bilateral agreement executed by a Contractor and a Participating Entity incorporating this Master Agreement and any additional Participating Entity-specific language or other requirements (*e.g.*, ordering procedures specific to the Participating Entity, entity-specific terms and conditions, etc.).

1.10 **Participating Entity** means a state (as well as the District of Columbia and US territories), city, county, district, other political subdivision of a State, or a nonprofit organization under the laws of some states properly authorized to enter into a Participating Addendum, that has executed a Participating Addendum.

1.11 **Participating State** means a state that has executed a Participating Addendum or has indicated an intent to execute a Participating Addendum.

1.12 **Product** or **Products and Services** means any equipment, software (including embedded software), documentation, service, or other deliverable supplied or created by the Contractor pursuant to this Master Agreement. The term Product includes goods and services.

1.13 **Purchasing Entity** means a state (as well as the District of Columbia and US territories), city, county, district, other political subdivision of a State, or a nonprofit organization under the laws of some states if authorized by a Participating Addendum, that issues a Purchase Order against the Master Agreement and becomes financially committed to the purchase.

II. Term of Master Agreement

2.1 **Initial Term.** The initial term of this Master Agreement is for two (2) years. The term of this Master Agreement may be amended beyond the initial term for three (3) additional years at the Lead State's discretion and by mutual agreement and upon review of requirements of Participating Entities, current market conditions, and Contractor performance.

2.2 **Amendment Limitations.** The terms of this Master Agreement will not be waived, altered, modified, supplemented, or amended in any manner whatsoever without prior written agreement of the Lead State and Contractor.

2.3 **Amendment Term.** The term of the Master Agreement may be amended past the initial term and stated renewal periods for a reasonable period if in the judgment of the Lead State a follow-on competitive procurement will be unavoidably delayed (despite good faith efforts) beyond the planned date of execution of the follow-on master agreement. This subsection will not be deemed to limit the authority of a Lead State under its state law to otherwise negotiate contract extensions.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

III. Order of Precedence

3.1 Order. Any Order placed under this Master Agreement will consist of the following documents:

3.1.1 A Participating Entity's Participating Addendum ("PA").

3.1.2 NASPO ValuePoint Master Agreement, including all attachments thereto.

3.1.3 A Purchase Order or Scope of Work/Specifications issued against the Master Agreement.

3.1.4 The Solicitation or, if separately executed after award, the Lead State's bilateral agreement that integrates applicable provisions.

3.1.5 Contractor's response to the Solicitation, as revised (if permitted) and accepted by the Lead State.

3.2 Conflict. These documents will be read to be consistent and complementary. Any conflict among these documents will be resolved by giving priority to these documents in the order listed above. Contractor terms and conditions that apply to this Master Agreement are only those that are expressly accepted by the Lead State and must be in writing and attached to this Master Agreement as an Exhibit or Attachment.

3.3 Participating Addenda. Participating Addenda will not be construed to dimmish, modify, or otherwise derogate any provisions in this Master Agreement between the Lead State and Contractor. Participating Addenda will not include a term of agreement that exceeds the term of the Master Agreement.

IV. Participants and Scope

4.1 Requirement for a Participating Addendum. Contractor may not deliver Products under this Master Agreement until a Participating Addendum acceptable to the Participating Entity and Contractor is executed.

4.2 Applicability of Master Agreement. NASPO ValuePoint Master Agreement Terms and Conditions are applicable to any Order by a Participating Entity (and other Purchasing Entities covered by their Participating Addendum), except to the extent altered, modified, supplemented or amended by a Participating Addendum, subject to Section III. For the purposes of illustration and not limitation, this authority may apply to unique delivery and invoicing requirements, confidentiality requirements, defaults on Orders, governing law and venue relating to Orders by a Participating Entity, indemnification, and insurance requirements. Statutory or constitutional requirements relating to availability of funds may require specific language in some Participating Addenda in order to comply with applicable law. The expectation is that these alterations, modifications, supplements, or amendments will be addressed in the Participating Addendum or, with the consent of the Purchasing Entity and Contractor, may be included in the ordering

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

document (*e.g.*, purchase order or contract) used by the Purchasing Entity to place the Order.

4.3 Authorized Use. Use of specific NASPO ValuePoint Master Agreements by state agencies, political subdivisions and other Participating Entities is subject to applicable state law and the approval of the respective State Chief Procurement Official. Issues of interpretation and eligibility for participation are solely within the authority of the respective State Chief Procurement Official.

4.4 Obligated Entities. Obligations under this Master Agreement are limited to those Participating Entities who have signed a Participating Addendum and Purchasing Entities within the scope of those Participating Addenda. States or other entities permitted to participate may use an informal competitive process to determine which Master Agreements to participate in through execution of a Participating Addendum. Participating Entities incur no financial obligations on behalf of other Purchasing Entities.

4.5 Notice of Participating Addendum. Contractor shall email a fully executed PDF copy of each Participating Addendum to pa@naspovaluepoint.org to support documentation of participation and posting in appropriate databases.

4.6 Eligibility for a Participating Addendum. Eligible entities who are not states may under some circumstances sign their own Participating Addendum, subject to the consent of the Chief Procurement Official of the state where the entity is located. Coordinate requests for such participation through NASPO ValuePoint. Any permission to participate through execution of a Participating Addendum is not a determination that procurement authority exists; the entity must ensure that they have the requisite procurement authority to execute a Participating Addendum.

4.7 Prohibition on Resale. Subject to any specific conditions included in the solicitation or Contractor's proposal as accepted by the Lead State, or as explicitly permitted in a Participating Addendum, Purchasing Entities may not resell Products purchased under this Master Agreement. Absent any such condition or explicit permission, this limitation does not prohibit: payments by employees of a Purchasing Entity for Products; sales of Products to the general public as surplus property; and fees associated with inventory transactions with other governmental or nonprofit entities and consistent with a Purchasing Entity's laws and regulations. Any sale or transfer permitted by this subsection must be consistent with license rights granted for use of intellectual property.

4.8 Individual Customers. Except as may otherwise be agreed to by the Purchasing Entity and Contractor, each Purchasing Entity shall follow the terms and conditions of the Master Agreement and applicable Participating Addendum and will have the same rights and responsibilities for their purchases as the Lead State has in the Master Agreement and as the Participating Entity has in the Participating Addendum, including but

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

not limited to any indemnity or right to recover any costs as such right is defined in the Master Agreement and applicable Participating Addendum for their purchases. Each Purchasing Entity will be responsible for its own charges, fees, and liabilities. The Contractor will apply the charges and invoice each Purchasing Entity individually.

4.9 Release of Information. Throughout the duration of this Master Agreement, Contractor must secure from the Lead State prior approval for the release of information that pertains to the potential work or activities covered by the Master Agreement. This limitation does not preclude publication about the award of the Master Agreement or marketing activities consistent with any proposed and accepted marketing plan.

4.10 No Representations. The Contractor shall not make any representations of NASPO ValuePoint, the Lead State, any Participating Entity, or any Purchasing Entity's opinion or position as to the quality or effectiveness of the services that are the subject of this Master Agreement without prior written consent.

V. NASPO ValuePoint Provisions

5.1 Applicability. NASPO ValuePoint is not a party to the Master Agreement. The terms set forth in Section V are for the benefit of NASPO ValuePoint as a third-party beneficiary of this Master Agreement.

5.2 Administrative Fees

5.2.1 NASPO ValuePoint Fee. Contractor shall pay to NASPO ValuePoint, or its assignee, a NASPO ValuePoint Administrative Fee of one-quarter of one percent (0.25% or 0.0025) no later than sixty (60) days following the end of each calendar quarter. The NASPO ValuePoint Administrative Fee must be submitted quarterly and is based on all sales of products and services under the Master Agreement (less any charges for taxes or shipping). The NASPO ValuePoint Administrative Fee is not negotiable. This fee is to be included as part of the pricing submitted with a vendor's response to the Lead State's solicitation.

5.2.2 State Imposed Fees. Some states may require an additional fee be paid directly to the state on purchases made by Purchasing Entities within that state. For all such requests, the fee rate or amount, payment method and schedule for such reports and payments will be incorporated into the applicable Participating Addendum. Unless agreed to in writing by the state, Contractor may not adjust the Master Agreement pricing to include the state fee for purchases made by Purchasing Entities within the jurisdiction of the state. No such agreement will affect the NASPO ValuePoint Administrative Fee percentage, or the prices paid by Purchasing Entities outside the jurisdiction of the state requesting the additional fee.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

5.3 NASPO ValuePoint Summary and Detailed Usage Reports

5.3.1 Summary Sales Data. The Contractor shall submit quarterly sales reports directly to NASPO ValuePoint using the NASPO ValuePoint Quarterly Sales/Administrative Fee Reporting Tool found at http://calculator.naspovaluepoint.org. All sales made under this Master Agreement must be reported as cumulative totals by state. Contractor must submit a report for each quarter, including quarters during which a Contractor has no sales, in which case this will be indicated in the Reporting Tool. Reports must be submitted no later than thirty (30) days following the end of the calendar quarter (as specified in the reporting tool).

5.3.2 Detailed Sales Data. Contractor shall also report detailed sales data by: (1) state; (2) entity/customer type, *e.g.* local government, higher education, K12, non-profit; (3) Purchasing Entity name; (4) Purchasing Entity bill-to and ship-to locations; (4) Purchasing Entity and Contractor Purchase Order identifier/number(s); (5) Purchase Order Type (e.g. sales order, credit, return, upgrade, determined by industry practices); (6) Purchase Order date; (7) Ship Date; (8) and line item description, including product number if used. The report must be submitted in any form required by the solicitation. Reports are due on a quarterly basis and must be received by the Lead State and NASPO ValuePoint Cooperative Development Team no later than thirty (30) days after the end of the reporting period. Reports must be delivered to the Lead State and to the NASPO ValuePoint Cooperative Development Team electronically through a designated portal or other method as determined by the Lead State and NASPO ValuePoint. Detailed sales data reports must include sales information for all sales under Participating Addenda executed under this Master Agreement.

5.3.3 Reporting on Personal Use. Reportable sales for the summary sales data report and detailed sales data report includes sales to employees for personal use where authorized by the solicitation and the Participating Addendum. Report data for employees should be limited to ONLY the state and entity ((state and agency, city, county, school district, etc.) under whose authority the employee is purchasing Product for personal use and the amount of sales. No personal identification numbers (*e.g.*, names, addresses, social security numbers or any other numerical identifier) may be submitted with any report.

5.3.4 Executive Summary. Contractor shall provide the NASPO ValuePoint Cooperative Development Coordinator with an executive summary each quarter that includes, at a minimum, a list of states with an active Participating Addendum, states that Contractor is in negotiations with and any Participating Addendum roll out or implementation activities and issues. NASPO ValuePoint

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Cooperative Development Coordinator and Contractor will determine the format and content of the executive summary. The executive summary is due thirty (30) days after the conclusion of each calendar quarter.

5.3.5 Use of Data. Timely submission of these reports is a material requirement of the Master Agreement. The recipient of the reports will have exclusive ownership of the media containing the reports. The Lead State and NASPO ValuePoint shall have a perpetual, irrevocable, non-exclusive, royalty free, transferable right to display, modify, copy, and otherwise use reports, data and information provided under this section.

5.4 NASPO ValuePoint Cooperative Program Marketing, Training, and Performance Review

5.4.1 Staff Education. Contractor shall work cooperatively with NASPO ValuePoint personnel. Contractor shall present plans to NASPO ValuePoint for the education of Contractor's contract administrator(s) and sales/marketing workforce regarding the Master Agreement contract, including the competitive nature of NASPO ValuePoint procurements, the master agreement and participating addendum process, and the manner in which eligible entities can participate in the Master Agreement.

5.4.2 Onboarding Plan. Upon request by NASPO ValuePoint, Contractor shall, as Participating Addendums are executed, provide plans to launch the program for the Participating Entity. Plans will include time frames to launch the agreement and confirmation that the Contractor's website has been updated to properly reflect the scope and terms of the Master Agreement as available to the Participating Entity and eligible Purchasing Entities.

5.4.3 Annual Contract Performance Review. Contractor shall participate in an annual contract performance review with the Lead State and NASPO ValuePoint, which may at the discretion of the Lead State be held in person and which may include a discussion of marketing action plans, target strategies, marketing materials, Contractor reporting, and timeliness of payment of administration fees.

5.4.4 Use of NASPO ValuePoint Logo. The NASPO ValuePoint logos may not be used by Contractor in sales and marketing until a separate logo use agreement is executed with NASPO ValuePoint.

5.4.5 Most Favored Customer. Contractor shall, within thirty (30) days of their effective date, to notify the Lead State and NASPO ValuePoint of any contractual most-favored-customer provisions in third-party contracts or agreements that may affect the promotion of this Master Agreements or whose terms provide for adjustments to

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

future rates or pricing based on rates, pricing in, or Orders from this Master Agreement. Upon request of the Lead State or NASPO ValuePoint, Contractor shall provide a copy of any such provisions.

5.5 Cancellation. In consultation with NASPO ValuePoint, the Lead State may, in its discretion, cancel the Master Agreement or not exercise an option to renew when utilization of Contractor's Master Agreement does not warrant further administration of the Master Agreement. The Lead State may also exercise its right to not renew the Master Agreement if vendor fails to record or report revenue for three consecutive quarters, upon 60-calendar day written notice to the Contractor. Cancellation based on nonuse or under-utilization will not occur sooner than [two years] after execution of the Master Agreement. This subsection does not limit the discretionary right of either the Lead State or Contractor to cancel the Master Agreement or terminate for default subject to the terms herein. This subsection also does not limit any right of the Lead State to cancel the Master Agreement under applicable laws.

5.6 Canadian Participation. Subject to the approval of Contractor, any Canadian provincial government or provincially funded entity in Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island, Quebec, or Saskatchewan, and territorial government or territorial government funded entity in the Northwest Territories, Nunavut, or Yukon, including municipalities, universities, community colleges, school boards, health authorities, housing authorities, agencies, boards, commissions, and crown corporations, may be eligible to use Contractor's Master Agreement.

5.7 Additional Agreement with NASPO. Upon request by NASPO ValuePoint, awarded Contractor shall enter into a direct contractual relationship with NASPO ValuePoint related to Contractor's obligations to NASPO ValuePoint under the terms of the Master Agreement, the terms of which shall be the same or similar (and not less favorable) than the terms set forth in the Master Agreement.

VI. Pricing, Payment & Leasing

6.1 Pricing. The prices contained in this Master Agreement or offered under this Master Agreement represent the not-to-exceed price to any Purchasing Entity.

6.1.1 All prices and rates must be guaranteed for the initial term of the Master Agreement.

6.1.2 Following the initial term of the Master Agreement, any request for a price or rate adjustment must be for an equal guarantee period and must be made at least 30 days prior to the effective date.

6.1.3 Requests for a price or rate adjustment must include sufficient documentation supporting the request. Any adjustment or

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

amendment to the Master Agreement will not be effective unless approved in writing by the Lead State.

6.1.4 No retroactive adjustments to prices or rates will be allowed.

6.2 Payment. Unless otherwise agreed upon in a Participating Addendum or Order, Payment after Acceptance will be made within thirty (30) days following the date the entire order is delivered or the date a correct invoice is received, whichever is later. After 45 days the Contractor may assess overdue account charges up to a maximum rate of one percent per month on the outstanding balance, unless a different late payment amount is specified in a Participating Addendum or Order, or otherwise prescribed by applicable law. Payments will be remitted in the manner specified in the Participating Addendum or Order. Payments may be made via a purchasing card with no additional charge.

6.3 Leasing or Alternative Financing Methods. The procurement and other applicable laws of some Purchasing Entities may permit the use of leasing or alternative financing methods for the acquisition of Products under this Master Agreement. Where the terms and conditions are not otherwise prescribed in an applicable Participating Addendum, the terms, and conditions for leasing or alternative financing methods are subject to negotiation between the Contractor and Purchasing Entity.

VII. Ordering

7.1 Order Numbers. Master Agreement order and purchase order numbers must be clearly shown on all acknowledgments, packing slips, invoices, and on all correspondence.

7.2 Quotes. Purchasing Entities may define entity-specific or project-specific requirements and informally compete the requirement among companies having a Master Agreement on an “as needed” basis. This procedure may also be used when requirements are aggregated, or other firm commitments may be made to achieve reductions in pricing. This procedure may be modified in Participating Addenda and adapted to the Purchasing Entity’s rules and policies. The Purchasing Entity may in its sole discretion determine which Master Agreement Contractors should be solicited for a quote. The Purchasing Entity may select the quote that it considers most advantageous, cost, and other factors considered.

7.3 Applicable Rules. Each Purchasing Entity will identify and utilize its own appropriate purchasing procedure and documentation. Contractor is expected to become familiar with the Purchasing Entities’ rules, policies, and procedures regarding the ordering of supplies and/or services contemplated by this Master Agreement.

7.4 Required Documentation. Contractor shall not begin work without a valid Purchase Order or other appropriate commitment document under the law of the Purchasing Entity.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

7.5 Term of Purchase. Orders may be placed consistent with the terms of this Master Agreement and applicable Participating Addendum during the term of the Master Agreement and Participating Addendum.

7.5.1 Orders must be placed pursuant to this Master Agreement prior to the termination date thereof but may have a delivery date or performance period up to 120 days past the then-current termination date of this Master Agreement.

7.5.2 Notwithstanding the previous, Orders must also comply with the terms of the applicable Participating Addendum, which may further restrict the period during which Orders may be placed or delivered.

7.5.3 Financial obligations of Purchasing Entities payable after the current applicable fiscal year are contingent upon agency funds for that purpose being appropriated, budgeted, and otherwise made available.

7.5.4 Notwithstanding the expiration, cancellation or termination of this Master Agreement, Contractor shall perform in accordance with the terms of any Orders then outstanding at the time of such expiration or termination. Contractor shall not honor any Orders placed after the expiration, cancellation, or termination of this Master Agreement, or in any manner inconsistent with this Master Agreement's terms.

7.5.5 Orders for any separate indefinite quantity, task order, or other form of indefinite delivery order arrangement priced against this Master Agreement may not be placed after the expiration or termination of this Master Agreement, notwithstanding the term of any such indefinite delivery order agreement.

7.6 Order Form Requirements. All Orders pursuant to this Master Agreement, at a minimum, must include:

7.6.1 The services or supplies being delivered.

7.6.2 A shipping address and other delivery requirements, if any.

7.6.3 A billing addresses.

7.6.4 Purchasing Entity contact information.

7.6.5 Pricing consistent with this Master Agreement and applicable Participating Addendum and as may be adjusted by agreement of the Purchasing Entity and Contractor.

7.6.6 A not-to-exceed total for the products or services being ordered; and

7.6.7 The Master Agreement number or the applicable Participating Addendum number, provided the Participating Addendum references the Master Agreement number.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

7.7 Communication. All communications concerning administration of Orders placed must be furnished solely to the authorized purchasing agent within the Purchasing Entity's purchasing office, or to such other individual identified in writing in the Order.

7.8 Contract Provisions for Orders Utilizing Federal Funds. Pursuant to Appendix II to 2 Code of Federal Regulations (CFR) Part 200, Contract Provisions for Non-Federal Entity Contracts Under Federal Awards, Orders funded with federal funds may have additional contractual requirements or certifications that must be satisfied at the time the Order is placed or upon delivery. These federal requirements may be proposed by Participating Entities in Participating Addenda and Purchasing Entities for incorporation in Orders placed under this Master Agreement.

VIII. Shipping and Delivery

8.1 Shipping Terms. All deliveries will be F.O.B. destination, freight pre-paid, with all transportation and handling charges paid by the Contractor.

8.1.1 Notwithstanding the above, responsibility and liability for loss or damage will remain the Contractor's until final inspection and acceptance when responsibility will pass to the Purchasing Entity except as to latent defects, fraud, and Contractor's warranty obligations.

8.2 Minimum Shipping. The minimum shipment amount, if any, must be contained in the Master Agreement. Any order for less than the specified amount is to be shipped with the freight prepaid and added as a separate item on the invoice. Any portion of an Order to be shipped without transportation charges that is back ordered will be shipped without charge.

8.3 Inside Deliveries. To the extent applicable, all deliveries will be "Inside Deliveries" as designated by a representative of the Purchasing Entity placing the Order. Inside Delivery refers to a delivery to a location other than a loading dock, front lobby, or reception area. Specific delivery instructions will be noted on the order form or Purchase Order. Costs to repair any damage to the building interior (*e.g.*, scratched walls, damage to the freight elevator, etc.) caused by Contractor or Contractor's carrier will be the responsibility of the Contractor. Immediately upon becoming aware of such damage, Contractor shall notify the Purchasing Entity placing the Order.

8.4 Packaging. All products must be delivered in the manufacturer's standard package. Costs must include all packing and/or crating charges. Cases must be of durable construction, in good condition, properly labeled and suitable in every respect for storage and handling of contents. Each shipping carton must be marked with the commodity, brand, quantity, item code number and the Purchasing Entity's Purchase Order number.

IX. Inspection and Acceptance

9.1 Laws and Regulations. Any and all Products offered and furnished must comply fully with all applicable Federal, State, and local laws and regulations.

9.2 Applicability. Unless otherwise specified in the Master Agreement, Participating Addendum, or ordering document, the terms of this Section IX will apply. This section is not intended to limit rights and remedies under the applicable commercial code.

9.3 Inspection. All Products are subject to inspection at reasonable times and places before Acceptance. Contractor shall provide right of access to the Lead State, or to any other authorized agent or official of the Lead State or other Participating or Purchasing Entity, at reasonable times, to monitor and evaluate performance, compliance, and/or quality assurance requirements under this Master Agreement.

9.3.1 Products that do not meet specifications may be rejected. Failure to reject upon receipt, however, does not relieve the contractor of liability for material (nonconformity that substantial impairs value) latent or hidden defects subsequently revealed when goods are put to use.

9.3.2 Acceptance of such goods may be revoked in accordance with the provisions of the applicable commercial code, and the Contractor is liable for any resulting expense incurred by the Purchasing Entity related to the preparation and shipping of Product rejected and returned, or for which Acceptance is revoked.

9.4 Failure to Conform. If any services do not conform to contract requirements, the Purchasing Entity may require the Contractor to perform the services again in conformity with contract requirements, at no increase in Order amount. When defects cannot be corrected by re-performance, the Purchasing Entity may require the Contractor to take necessary action to ensure that future performance conforms to contract requirements and reduce the contract price to reflect the reduced value of services performed.

9.5 Acceptance Testing. Purchasing Entity may establish a process, in keeping with industry standards, to ascertaining whether the Product meets the standard of performance or specifications prior to Acceptance by the Purchasing Entity.

9.5.1 The Acceptance Testing period will be thirty (30) calendar days, unless otherwise specified, starting from the day after the Product is delivered or, if installed by Contractor, the day after the Product is installed and Contractor certifies that the Product is ready for Acceptance Testing.

9.5.2 If the Product does not meet the standard of performance or specifications during the initial period of Acceptance Testing,

Purchasing Entity may, at its discretion, continue Acceptance Testing on a day-to-day basis until the standard of performance is met.

9.5.3 Upon rejection, the Contractor will have fifteen (15) calendar days to cure. If after the cure period, the Product still has not met the standard of performance or specifications, the Purchasing Entity may, at its option: (a) declare Contractor to be in breach and terminate the Order; (b) demand replacement Product from Contractor at no additional cost to Purchasing Entity; or, (c) continue the cure period for an additional time period agreed upon by the Purchasing Entity and the Contractor.

9.5.4 Contractor shall pay all costs related to the preparation and shipping of Product returned pursuant to the section.

9.5.5 No Product will be deemed Accepted and no charges will be paid until the standard of performance or specification is met.

X. Warranty

10.1 Applicability. Unless otherwise specified in the Master Agreement, Participating Addendum, or ordering document, the terms of this Section X will apply.

10.2 Warranty. The Contractor warrants for a period of one year from the date of Acceptance that: (a) the Product performs according to all specific claims that the Contractor made in its response to the solicitation, (b) the Product is suitable for the ordinary purposes for which such Product is used, (c) the Product is suitable for any special purposes identified in the solicitation or for which the Purchasing Entity has relied on the Contractor's skill or judgment, (d) the Product is designed and manufactured in a commercially reasonable manner, and (e) the Product is free of defects.

10.3 Breach of Warranty. Upon breach of the warranty set forth above, the Contractor will repair or replace (at no charge to the Purchasing Entity) the Product whose nonconformance is discovered and made known to the Contractor. If the repaired and/or replaced Product proves to be inadequate, or fails of its essential purpose, the Contractor will refund the full amount of any payments that have been made.

10.4 Rights Reserved. The rights and remedies of the parties under this warranty are in addition to any other rights and remedies of the parties provided by law or equity, including, without limitation, actual damages, and, as applicable and awarded under the law, to a prevailing party, reasonable attorneys' fees and costs.

10.5 Warranty Period Start Date. The warranty period will begin upon Acceptance, as set forth in Section IX.

XI. Product Title

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

11.1 Conveyance of Title. Upon Acceptance by the Purchasing Entity, Contractor shall convey to Purchasing Entity title to the Product free and clear of all liens, encumbrances, or other security interests.

11.2 Embedded Software. Transfer of title to the Product must include an irrevocable and perpetual license to use any Embedded Software in the Product. If Purchasing Entity subsequently transfers title of the Product to another entity, Purchasing Entity shall have the right to transfer the license to use the Embedded Software with the transfer of Product title. A subsequent transfer of this software license will be at no additional cost or charge to either Purchasing Entity or Purchasing Entity's transferee.

11.3 License of Pre-Existing Intellectual Property. Contractor grants to the Purchasing Entity a nonexclusive, perpetual, royalty-free, irrevocable, license to use, publish, translate, reproduce, transfer with any sale of tangible media or Product, perform, display, and dispose of the Intellectual Property, and its derivatives, used or delivered under this Master Agreement, but not created under it ("Pre-existing Intellectual Property"). The Contractor shall be responsible for ensuring that this license is consistent with any third-party rights in the Pre-existing Intellectual Property.

XII. Indemnification

12.1 General Indemnification. The Contractor shall defend, indemnify and hold harmless NASPO, NASPO ValuePoint, the Lead State, Participating Entities, and Purchasing Entities, along with their officers and employees, from and against third-party claims, damages or causes of action including reasonable attorneys' fees and related costs for any death, injury, or damage to tangible property arising from any act, error, or omission of the Contractor, its employees or subcontractors or volunteers, at any tier, relating to performance under this Master Agreement.

12.2 Intellectual Property Indemnification. The Contractor shall defend, indemnify and hold harmless NASPO, NASPO ValuePoint, the Lead State, Participating Entities, Purchasing Entities, along with their officers and employees ("Indemnified Party"), from and against claims, damages or causes of action including reasonable attorneys' fees and related costs arising out of the claim that the Product or its use infringes Intellectual Property rights of another person or entity ("Intellectual Property Claim").

12.2.1 The Contractor's obligations under this section will not extend to any combination of the Product with any other product, system or method, unless the Product, system or method is:

12.2.1.1 provided by the Contractor or the Contractor's subsidiaries or affiliates.

12.2.1.2 specified by the Contractor to work with the Product.

12.2.1.3 reasonably required to use the Product in its intended manner, and the infringement could not have been

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

avoided by substituting another reasonably available product, system, or method capable of performing the same function; or

12.2.1.4 reasonably expected to be used in combination with the Product.

12.2.2 The Indemnified Party shall notify the Contractor within a reasonable time after receiving notice of an Intellectual Property Claim. Even if the Indemnified Party fails to provide reasonable notice, the Contractor shall not be relieved from its obligations unless the Contractor can demonstrate that it was prejudiced in defending the Intellectual Property Claim resulting in increased expenses or loss to the Contractor. If the Contractor promptly and reasonably investigates and defends any Intellectual Property Claim, it shall have control over the defense and settlement of the Intellectual Property Claim. However, the Indemnified Party must consent in writing for any money damages or obligations for which it may be responsible.

12.2.3 The Indemnified Party shall furnish, at the Contractor's reasonable request and expense, information, and assistance necessary for such defense. If the Contractor fails to vigorously pursue the defense or settlement of the Intellectual Property Claim, the Indemnified Party may assume the defense or settlement of the Intellectual Property Claim and the Contractor shall be liable for all costs and expenses, including reasonable attorneys' fees and related costs, incurred by the Indemnified Party in the pursuit of the Intellectual Property Claim.

12.2.4 Unless otherwise set forth herein, Section 12.2 is not subject to any limitations of liability in this Master Agreement or in any other document executed in conjunction with this Master Agreement.

XIII. Insurance

13.1 Term. Contractor shall, during the term of this Master Agreement, maintain in full force and effect, the insurance described in this section. A Participating Entity may negotiate alternative Insurance requirements in their Participating Addendum.

13.2 Class. Contractor shall acquire such insurance from an insurance carrier or carriers licensed to conduct business in each Participating Entity's state and having a rating of A-, Class VII or better, in the most recently published edition of A.M. Best's Insurance Reports. Failure to buy and maintain the required insurance may result in this Master Agreement's termination or, at a Participating Entity's option, result in termination of its Participating Addendum.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

13.3 Coverage. Coverage must be written on an occurrence basis. The minimum acceptable limits will be as indicated below:

13.3.1 Contractor shall maintain Commercial General Liability insurance covering premises operations, independent contractors, products and completed operations, blanket contractual liability, personal injury (including death), advertising liability, and property damage, with a limit of not less than $1 million per occurrence and $2 million general aggregate;

13.3.2 Contractor must comply with any applicable State Workers Compensation or Employers Liability Insurance requirements.

13.4 Notice of Cancellation. Contractor shall pay premiums on all insurance policies. Contractor shall provide notice to a Participating Entity who is a state within five (5) business days after Contractor is first aware of expiration, cancellation or nonrenewal of such policy or is first aware that cancellation is threatened or expiration, nonrenewal or expiration otherwise may occur.

13.5 Notice of Endorsement. Prior to commencement of performance, Contractor shall provide to the Lead State a written endorsement to the Contractor's general liability insurance policy or other documentary evidence acceptable to the Lead State that (1) provides that written notice of cancellation will be delivered in accordance with the policy provisions, and (2) provides that the Contractor's liability insurance policy will be primary, with any liability insurance of any Participating State as secondary and noncontributory.

13.6 Participating Entities. Contractor shall provide to Participating States and Participating Entities the same insurance obligations and documentation as those specified in Section XIII, except the endorsement is provided to the applicable Participating State or Participating Entity.

13.7 Furnishing of Certificates. Contractor shall furnish to the Lead State copies of certificates of all required insurance in a form sufficient to show required coverage within thirty (30) calendar days of the execution of this Master Agreement and prior to performing any work. Copies of renewal certificates of all required insurance will be furnished within thirty (30) days after any renewal date to the applicable state Participating Entity. Failure to provide evidence of coverage may, at the sole option of the Lead State, or any Participating Entity, result in this Master Agreement's termination or the termination of any Participating Addendum.

13.8 Disclaimer. Insurance coverage and limits will not limit Contractor's liability and obligations under this Master Agreement, any Participating Addendum, or any Purchase Order.

XIV. General Provisions

14.1 Records Administration and Audit

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

14.1.1 The Contractor shall maintain books, records, documents, and other evidence pertaining to this Master Agreement and Orders placed by Purchasing Entities under it to the extent and in such detail as will adequately reflect performance and administration of payments and fees. Contractor shall permit the Lead State, a Participating Entity, a Purchasing Entity, the federal government (including its grant awarding entities and the U.S. Comptroller General), and any other duly authorized agent of a governmental agency, to audit, inspect, examine, copy and/or transcribe Contractor's books, documents, papers and records directly pertinent to this Master Agreement or orders placed by a Purchasing Entity under it for the purpose of making audits, examinations, excerpts, and transcriptions. This right will survive for a period of six (6) years following termination of this Agreement or final payment for any order placed by a Purchasing Entity against this Master Agreement, whichever is later, or such longer period as is required by the Purchasing Entity's state statutes, to assure compliance with the terms hereof or to evaluate performance hereunder.

14.1.2 Without limiting any other remedy available to any governmental entity, the Contractor shall reimburse the applicable Lead State, Participating Entity, or Purchasing Entity for any overpayments inconsistent with the terms of the Master Agreement or Orders or underpayment of fees found as a result of the examination of the Contractor's records.

14.1.3 The rights and obligations herein exist in addition to any quality assurance obligation in the Master Agreement that requires the Contractor to self-audit contract obligations and that permits the Lead State to review compliance with those obligations.

14.2 Confidentiality, Non-Disclosure, and Injunctive Relief

14.2.1 **Confidentiality.** Contractor acknowledges that it and its employees or agents may, in the course of providing a Product under this Master Agreement, be exposed to or acquire information that is confidential to Purchasing Entity or Purchasing Entity's clients.

14.2.1.1 Any and all information of any form that is marked as confidential or would by its nature be deemed confidential obtained by Contractor or its employees or agents in the performance of this Master Agreement, including but not necessarily limited to (1) any Purchasing Entity's records, (2) personnel records, and (3) information concerning individuals, is confidential information of Purchasing Entity ("Confidential Information").

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

14.2.1.2 Any reports or other documents or items (including software) that result from the use of the Confidential Information by Contractor shall be treated in the same manner as the Confidential Information.

14.2.1.3 Confidential Information does not include information that (1) is or becomes (other than by disclosure by Contractor) publicly known; (2) is furnished by Purchasing Entity to others without restrictions similar to those imposed by this Master Agreement; (3) is rightfully in Contractor's possession without the obligation of nondisclosure prior to the time of its disclosure under this Master Agreement; (4) is obtained from a source other than Purchasing Entity without the obligation of confidentiality, (5) is disclosed with the written consent of Purchasing Entity; or (6) is independently developed by employees, agents or subcontractors of Contractor who can be shown to have had no access to the Confidential Information.

14.2.2 Non-Disclosure. Contractor shall hold Confidential Information in confidence, using at least the industry standard of confidentiality, and shall not copy, reproduce, sell, assign, license, market, transfer or otherwise dispose of, give, or disclose Confidential Information to third parties or use Confidential Information for any purposes whatsoever other than what is necessary to the performance of Orders placed under this Master Agreement.

14.2.2.1 Contractor shall advise each of its employees and agents of their obligations to keep Confidential Information confidential. Contractor shall use commercially reasonable efforts to assist Purchasing Entity in identifying and preventing any unauthorized use or disclosure of any Confidential Information.

14.2.2.2 Without limiting the generality of the foregoing, Contractor shall advise Purchasing Entity, applicable Participating Entity, and the Lead State immediately if Contractor learns or has reason to believe that any person who has had access to Confidential Information has violated or intends to violate the terms of this Master Agreement, and Contractor shall at its expense cooperate with Purchasing Entity in seeking injunctive or other equitable relief in the name of Purchasing Entity or Contractor against any such person.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

14.2.2.3 Except as directed by Purchasing Entity, Contractor will not at any time during or after the term of this Master Agreement disclose, directly or indirectly, any Confidential Information to any person, except in accordance with this Master Agreement, and that upon termination of this Master Agreement or at Purchasing Entity's request, Contractor shall turn over to Purchasing Entity all documents, papers, and other matter in Contractor's possession that embody Confidential Information.

14.2.2.4 Notwithstanding the foregoing, Contractor may keep one copy of such Confidential Information necessary for quality assurance, audits, and evidence of the performance of this Master Agreement.

14.2.3 **Injunctive Relief.** Contractor acknowledges that Contractor's breach of Section 14.2 would cause irreparable injury to the Purchasing Entity that cannot be inadequately compensated in monetary damages. Accordingly, Purchasing Entity may seek and obtain injunctive relief against the breach or threatened breach of the foregoing undertakings, in addition to any other legal remedies that may be available. Contractor acknowledges and agrees that the covenants contained herein are necessary for the protection of the legitimate business interests of Purchasing Entity and are reasonable in scope and content.

14.2.4 **Purchasing Entity Law.** These provisions will be applicable only to extent they are not in conflict with the applicable public disclosure laws of any Purchasing Entity.

14.2.5 **NASPO ValuePoint.** The rights granted to Purchasing Entities and Contractor's obligations under this section will also extend to NASPO ValuePoint's Confidential Information, including but not limited to Participating Addenda, Orders or transaction data relating to Orders under this Master Agreement that identify the entity/customer, Order dates, line-item descriptions and volumes, and prices/rates. This provision does not apply to disclosure to the Lead State, a Participating State, or any governmental entity exercising an audit, inspection, or examination pursuant to this Master Agreement. To the extent permitted by law, Contractor shall notify the Lead State of the identify of any entity seeking access to the Confidential Information described in this subsection.

14.2.6 **Public Information.** This Master Agreement and all related documents are subject to disclosure pursuant to the Lead State's public information laws.

14.3 Assignment/Subcontracts

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

14.3.1 Contractor shall not assign, sell, transfer, subcontract or sublet rights, or delegate responsibilities under this Master Agreement, in whole or in part, without the prior written approval of the Lead State.

14.3.2 The Lead State reserves the right to assign any rights or duties, including written assignment of contract administration duties, to NASPO ValuePoint and other third parties.

14.4 Changes in Contractor Representation. The Contractor must, within ten (10) calendar days, notify the Lead State in writing of any changes in the Contractor's key administrative personnel managing the Master Agreement. The Lead State reserves the right to approve or reject changes in key personnel, as identified in the Contractor's proposal. The Contractor shall propose replacement key personnel having substantially equal or better education, training, and experience as was possessed by the key person proposed and evaluated in the Contractor's proposal.

14.5 Independent Contractor. Contractor is an independent contractor. Contractor has no authorization, express or implied, to bind the Lead State, Participating States, other Participating Entities, or Purchasing Entities to any agreements, settlements, liability or understanding whatsoever, and shall not to hold itself out as agent except as expressly set forth herein or as expressly set forth in an applicable Participating Addendum or Order.

14.6 Cancellation. Unless otherwise set forth herein, this Master Agreement may be canceled by either party upon sixty (60) days' written notice prior to the effective date of the cancellation. Further, any Participating Entity may cancel its participation upon thirty (30) days' written notice, unless otherwise limited or stated in the Participating Addendum. Cancellation may be in whole or in part. Any cancellation under this provision will not affect the rights and obligations attending Orders outstanding at the time of cancellation, including any right of a Purchasing Entity to indemnification by the Contractor, rights of payment for Products delivered and accepted, rights attending any warranty or default in performance in association with any Order, and requirements for records administration and audit. Cancellation of the Master Agreement due to Contractor default may be immediate.

14.7 Force Majeure. Neither party to this Master Agreement shall be held responsible for delay or default caused by fire, riot, unusually severe weather, other acts of God, or acts of war which are beyond that party's reasonable control. The Lead State may terminate this Master Agreement upon determining such delay or default will reasonably prevent successful performance of the Master Agreement.

14.8 Defaults and Remedies

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

14.8.1 The occurrence of any of the following events will be an event of default under this Master Agreement:

14.8.1.1 Nonperformance of contractual requirements.

14.8.1.2 A material breach of any term or condition of this Master Agreement.

14.8.1.3 Any certification, representation, or warranty by Contractor in response to the solicitation or in this Master Agreement that proves to be untrue or materially misleading.

14.8.1.4 Institution of proceedings under any bankruptcy, insolvency, reorganization or similar law, by or against Contractor, or the appointment of a receiver or similar officer for Contractor or any of its property, which is not vacated or fully stayed within thirty (30) calendar days after the institution or occurrence thereof; or

14.8.1.5 Any default specified in another section of this Master Agreement.

14.8.2 Upon the occurrence of an event of default, the Lead State shall issue a written notice of default, identifying the nature of the default, and providing a period of fifteen (15) calendar days in which Contractor shall have an opportunity to cure the default. The Lead State shall not be required to provide advance written notice or a cure period and may immediately terminate this Master Agreement in whole or in part if the Lead State, in its sole discretion, determines that it is reasonably necessary to preserve public safety or prevent immediate public crisis. Time allowed for cure will not diminish or eliminate Contractor's liability for damages, including liquidated damages to the extent provided for under this Master Agreement.

14.8.3 If Contractor is afforded an opportunity to cure and fails to cure the default within the period specified in the written notice of default, Contractor shall be in breach of its obligations under this Master Agreement and the Lead State shall have the right to exercise any or all of the following remedies:

14.8.3.1 Any remedy provided by law.

14.8.3.2 Termination of this Master Agreement and any related Contracts or portions thereof.

14.8.3.3 Assessment of liquidated damages as provided in this Master Agreement.

14.8.3.4 Suspension of Contractor from being able to respond to future bid solicitations.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

14.8.3.5 Suspension of Contractor's performance; and

14.8.3.6 Withholding of payment until the default is remedied.

14.8.4 Unless otherwise specified in the Participating Addendum, in the event of a default under a Participating Addendum, a Participating Entity shall provide a written notice of default as described in this section and shall have all of the rights and remedies under this paragraph regarding its participation in the Master Agreement, in addition to those set forth in its Participating Addendum. Unless otherwise specified in an Order, a Purchasing Entity shall provide written notice of default as described in this section and have all of the rights and remedies under this paragraph and any applicable Participating Addendum with respect to an Order placed by the Purchasing Entity. Nothing in these Master Agreement Terms and Conditions will be construed to limit the rights and remedies available to a Purchasing Entity under the applicable commercial code.

14.9 Waiver of Breach. Failure of the Lead State, Participating Entity, or Purchasing Entity to declare a default or enforce any rights and remedies will not operate as a waiver under this Master Agreement, any Participating Addendum, or any Purchase Order. Any waiver by the Lead State, Participating Entity, or Purchasing Entity must be in writing. Waiver by the Lead State or Participating Entity of any default, right or remedy under this Master Agreement or Participating Addendum, or by Purchasing Entity with respect to any Purchase Order, or breach of any terms or requirements of this Master Agreement, a Participating Addendum, or Purchase Order will not be construed or operate as a waiver of any subsequent default or breach of such term or requirement, or of any other term or requirement under this Master Agreement, any Participating Addendum, or any Purchase Order.

14.10 Debarment. The Contractor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in public procurement or contracting by any governmental department or agency. This certification represents a recurring certification made at the time any Order is placed under this Master Agreement. If the Contractor cannot certify this statement, attach a written explanation for review by the Lead State.

14.11 No Waiver of Sovereign Immunity

14.11.1 In no event will this Master Agreement, any Participating Addendum or any contract or any Purchase Order issued thereunder, or any act of the Lead State, a Participating Entity, or a Purchasing Entity be a waiver of any form of defense or immunity, whether sovereign immunity, governmental immunity, immunity based on the Eleventh Amendment to the Constitution

of the United States or otherwise, from any claim or from the jurisdiction of any court.

14.11.2 This section applies to a claim brought against the Participating Entities who are states only to the extent Congress has appropriately abrogated the state's sovereign immunity and is not consent by the state to be sued in federal court. This section is also not a waiver by the state of any form of immunity, including but not limited to sovereign immunity and immunity based on the Eleventh Amendment to the Constitution of the United States.

14.12 Governing Law and Venue

14.12.1 The procurement, evaluation, and award of the Master Agreement will be governed by and construed in accordance with the laws of the Lead State sponsoring and administering the procurement. The construction and effect of the Master Agreement after award will be governed by the law of the state serving as Lead State. The construction and effect of any Participating Addendum or Order against the Master Agreement will be governed by and construed in accordance with the laws of the Participating Entity's or Purchasing Entity's state.

14.12.2 Unless otherwise specified in the RFP, the venue for any protest, claim, dispute or action relating to the procurement, evaluation, and award is in the state serving as Lead State. Venue for any claim, dispute or action concerning the terms of the Master Agreement will be in the state serving as Lead State. Venue for any claim, dispute, or action concerning any Order placed against the Master Agreement or the effect of a Participating Addendum will be in the Purchasing Entity's state.

14.12.3 If a claim is brought in a federal forum, then it must be brought and adjudicated solely and exclusively within the United States District Court for (in decreasing order of priority): the Lead State for claims relating to the procurement, evaluation, award, or contract performance or administration if the Lead State is a party; a Participating State if a named party; the state where the Participating Entity or Purchasing Entity is located if either is a named party.

14.13 Assignment of Antitrust Rights. Contractor irrevocably assigns to a Participating Entity who is a state any claim for relief or cause of action which the Contractor now has or which may accrue to the Contractor in the future by reason of any violation of state or federal antitrust laws (15 U.S.C. § 1-15 or a Participating Entity's state antitrust provisions), as now in effect and as may be amended from time to time, in connection with any goods or services provided in that state for the purpose of carrying out the Contractor's obligations under this Master Agreement or Participating

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Addendum, including, at the Participating Entity's option, the right to control any such litigation on such claim for relief or cause of action.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

OKLAHOMA
Office of Management
& Enterprise Services

EXHIBIT B

STATE OF OKLAHOMA GENERAL TERMS

This State of Oklahoma General Terms ("General Terms") is a Contract Document in connection with a Contract awarded by the Office of Management and Enterprise Services on behalf of the State of Oklahoma.

In addition to other terms contained in an applicable Contract Document, Supplier and State agree to the following General Terms:

1 Scope and Contract Renewal

1.1 Supplier may not add products or services to its offerings under the Contract without the State's prior written approval. Such request may require a competitive bid of the additional products or services. If the need arises for goods or services outside the scope of the Contract, Supplier shall contact the State.

1.2 At no time during the performance of the Contract shall the Supplier have the authority to obligate any Customer for payment for any products or services (a) when a corresponding encumbering document is not signed or (b) over and above an awarded Contract amount. Likewise, Supplier is not entitled to compensation for a product or service provided by or on behalf of Supplier that is neither requested nor accepted as satisfactory.

1.3 If applicable, prior to any Contract renewal, the State shall subjectively consider the value of the Contract to the State, the Supplier's performance under the Contract, and shall review certain other factors, including but not limited to the: a) terms and conditions of Contract Documents to determine validity with current State and other applicable statutes and rules; b) current pricing and discounts offered by Supplier; and c) current products, services and support offered by Supplier. If the State determines changes to the Contract are required as a condition precedent to renewal, the State and Supplier will cooperate in good faith to evidence such required changes in an Addendum. Further, any request for a price increase in connection with a renewal or

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

otherwise will be conditioned on the Supplier providing appropriate documentation supporting the request.

1.4 The State may extend the Contract for ninety (90) days beyond a final renewal term at the Contract compensation rate for the extended period. If the State exercises such option to extend ninety (90) days, the State shall notify the Supplier in writing prior to Contract end date. The State, at its sole option and to the extent allowable by law, may choose to exercise subsequent ninety (90) day extensions at the Contract pricing rate, to facilitate the finalization of related terms and conditions of a new award or as needed for transition to a new Supplier.

1.5 Supplier understands that supplier registration expires annually and, pursuant to OAC 260:115-3-3, Supplier shall maintain its supplier registration with the State as a precondition to a renewal of the Contract.

2 Contract Effectiveness and Order of Priority

2.1 Unless specifically agreed in writing otherwise, the Contract is effective upon the date last signed by the parties. Supplier shall not commence work, commit funds, incur costs, or in any way act to obligate the State until the Contract is effective.

2.2 Contract Documents shall be read to be consistent and complementary. Any conflict among the Contract Documents shall be resolved by giving priority to Contract Documents in the following order of precedence:

A. any Addendum;

B. any applicable Solicitation;

C. any Contract-specific terms contained in a Contract Document including, without limitation, information technology terms and terms specific to a statewide Contract or a State agency Contract;

D. the terms contained in this Contract Document;

E. any successful Bid as may be amended through negotiation and to the extent the Bid does not otherwise conflict with the Solicitation or applicable law;

F. any statement of work, work order, or other similar ordering document as applicable; and

G. other mutually agreed Contract Documents.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

2.3 If there is a conflict between the terms contained in this Contract Document or in Contract-specific terms and an agreement provided by or on behalf of Supplier including but not limited to linked or supplemental documents which alter or diminish the rights of Customer or the State, the conflicting terms provided by Supplier shall not take priority over this Contract Document or Acquisition-specific terms. In no event will any linked document alter or override such referenced terms except as specifically agreed in an Addendum.

2.4 Any Contract Document shall be legibly written in ink or typed. All Contract transactions, and any Contract Document related thereto, may be conducted by electronic means pursuant to the Oklahoma Uniform Electronic Transactions Act.

3 Modification of Contract Terms and Contract Documents

3.1 The Contract may only be modified, amended, or expanded by an Addendum. Any change to the Contract, including the addition of work or materials, the revision of payment terms, or the substitution of work or materials made unilaterally by the Supplier, is a material breach of the Contract. Unless otherwise specified by applicable law or rules, such changes, including without limitation, any unauthorized written Contract modification, shall be void and without effect and the Supplier shall not be entitled to any claim under the Contract based on those changes. No oral statement of any person shall modify or otherwise affect the terms, conditions, or specifications stated in the Contract.

3.2 Any additional terms on an ordering document provided by Supplier are of no effect and are void unless mutually executed. OMES bears no liability for performance, payment or failure thereof by the Supplier or by a Customer other than OMES in connection with an Acquisition.

4 Definitions

In addition to any defined terms set forth elsewhere in the Contract, the Oklahoma Central Purchasing Act and the Oklahoma Administrative Code, Title 260, the parties agree that, when used in the Contract, the following terms are defined as set forth below and may be used in the singular or plural form:

4.1 **Acquisition** means items, products, materials, supplies, services and equipment acquired by purchase, lease purchase, lease with option to purchase, value provided or rental under the Contract.

4.2 **Addendum** means a mutually executed, written modification to a Contract Document.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

4.3 **Amendment** means a written change, addition, correction or revision to the Solicitation.

4.4 **Bid** means an offer a Bidder submits in response to the Solicitation.

4.5 **Bidder** means an individual or business entity that submits a Bid in response to the Solicitation.

4.6 **Contract** means the written, mutually agreed and binding legal relationship resulting from the Contract Documents and an appropriate encumbering document as may be amended from time to time, which evidences the final agreement between the parties with respect to the subject matter of the Contract.

4.7 **Contract Document** means this document; any master or enterprise agreement terms entered into between the parties that are mutually agreed to be applicable to the Contract; any Solicitation; any Contract-specific terms; any Supplier's Bid as may be negotiated; any statement of work, work order, or other similar mutually executed ordering document; other mutually executed documents and any Addendum.

4.8 **Customer** means the entity receiving goods or services contemplated by the Contract.

4.9 **Debarment** means action taken by a debarring official under federal or state law or regulations to exclude any business entity from inclusion on the Supplier list; bidding; offering to bid; providing a quote; receiving an award of contract with the State and may also result in cancellation of existing contracts with the State.

4.10 **Destination** means delivered to the receiving dock or other point specified in the applicable Contract Document.

4.11 **Indemnified Parties** means the State and Customer and/or its officers, directors, agents, employees, representatives, contractors, assignees and designees thereof.

4.12 **Inspection** means examining and testing an Acquisition (including, when appropriate, raw materials, components, and intermediate assemblies) to determine whether the Acquisition meets Contract requirements.

4.13 **Moral Rights** means any and all rights of paternity or integrity of the Work Product and the right to object to any modification, translation or use of the Work Product and any similar rights existing under the judicial or statutory law

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

of any country in the world or under any treaty, regardless of whether or not such right is denominated or referred to as a moral right.

4.14 **OAC** means the Oklahoma Administrative Code.

4.15 **OMES** means the Office of Management and Enterprise Services.

4.16 **Solicitation** means the document inviting Bids for the Acquisition referenced in the Contract and any amendments thereto.

4.17 **State** means the government of the state of Oklahoma, its employees and authorized representatives, including without limitation any department, agency, or other unit of the government of the state of Oklahoma.

4.18 **Supplier** means the Bidder with whom the State enters into the Contract awarded pursuant to the Solicitation or the business entity or individual that is a party to the Contract with the State.

4.19 **Suspension** means action taken by a suspending official under federal or state law or regulations to suspend a Supplier from inclusion on the Supplier list; be eligible to submit Bids to State agencies and be awarded a contract by a State agency subject to the Central Purchasing Act.

4.20 **Supplier Confidential Information** means certain confidential and proprietary information of Supplier that is clearly marked as confidential and agreed by the State Purchasing Director or Customer, as applicable, but does not include information excluded from confidentiality in provisions of the Contract or the Oklahoma Open Records Act.

4.21 **Work Product** means any and all deliverables produced by Supplier under a statement of work or similar Contract Document issued pursuant to this Contract, including any and all tangible or intangible items or things that have been or will be prepared, created, developed, invented or conceived at any time following the Contract effective date including but not limited to any (i) works of authorship (such as manuals, instructions, printed material, graphics, artwork, images, illustrations, photographs, computer programs, computer software, scripts, object code, source code or other programming code, HTML code, flow charts, notes, outlines, lists, compilations, manuscripts, writings, pictorial materials, schematics, formulae, processes, algorithms, data, information, multimedia files, text web pages or web sites, other written or machine readable expression of such works fixed in any tangible media, and all other copyrightable works), (ii) trademarks, service marks, trade dress, trade names, logos, or other indicia of source or origin, (iii) ideas, designs, concepts, personality rights, methods, processes, techniques, apparatuses, inventions,

formulas, discoveries, or improvements, including any patents, trade secrets and know-how, (iv) domain names, (v) any copies, and similar or derivative works to any of the foregoing, (vi) all documentation and materials related to any of the foregoing, (vii) all other goods, services or deliverables to be provided by or on behalf of Supplier under the Contract and (vii) all Intellectual Property Rights in any of the foregoing, and which are or were created, prepared, developed, invented or conceived for the use of benefit of Customer in connection with this Contract or with funds appropriated by or for Customer or Customer's benefit (a) by any Supplier personnel or Customer personnel or (b) any Customer personnel who then became personnel to Supplier or any of its affiliates or subcontractors, where, although creation or reduction-to-practice is completed while the person is affiliated with Supplier or its personnel, any portion of same was created, invented or conceived by such person while affiliated with Customer.

5 Pricing

5.1 Pursuant to 68 O.S. §§ 1352, 1356, and 1404, State agencies are exempt from the assessment of State sales, use, and excise taxes. Further, State agencies and political subdivisions of the State are exempt from Federal Excise Taxes pursuant to Title 26 of the United States Code. Any taxes of any nature whatsoever payable by the Supplier shall not be reimbursed.

5.2 Pursuant to 74 O.S. §85.40, all travel expenses of Supplier must be included in the total Acquisition price.

5.3 The price of a product offered under the Contract shall include and Supplier shall prepay all shipping, packaging, delivery and handling fees. All product deliveries will be free on board Customer's Destination. No additional fees shall be charged by Supplier for standard shipping and handling. If Customer requests expedited or special delivery, Customer may be responsible for any charges for expedited or special delivery.

6 Ordering, Inspection, and Acceptance

6.1 Any product or service furnished under the Contract shall be ordered by issuance of a valid purchase order or other appropriate payment mechanism, including a pre-encumbrance, or by use of a valid Purchase Card. All orders and transactions are governed by the terms and conditions of the Contract. Any purchase order or other applicable payment mechanism dated prior to termination or expiration of the Contract shall be performed unless mutually agreed in writing otherwise.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

6.2 Services will be performed in accordance with industry best practices and are subject to acceptance by the Customer. Notwithstanding any other provision in the Contract, deemed acceptance of a service or associated deliverable shall not apply automatically upon receipt of a deliverable or upon provision of a service.

Supplier warrants and represents that a product or deliverable furnished by or through the Supplier shall individually, and where specified by Supplier to perform as a system, be substantially uninterrupted and error-free in operation and guaranteed against faulty material and workmanship for a warranty period of the greater of ninety (90) days from the date of acceptance or the maximum allowed by the manufacturer. A defect in a product or deliverable furnished by or through the Supplier shall be repaired or replaced by Supplier at no additional cost or expense to the Customer if such defect occurs during the warranty period.

Any product to be delivered pursuant to the Contract shall be subject to final inspection and acceptance by the Customer at Destination. The Customer assumes no responsibility for a product until accepted by the Customer. Title and risk of loss or damage to a product shall be the responsibility of the Supplier until accepted. The Supplier shall be responsible for filing, processing, and collecting any and all damage claims accruing prior to acceptance.

Pursuant to OAC 260:115-9-5, payment for an Acquisition does not constitute final acceptance of the Acquisition. If subsequent inspection affirms that the Acquisition does not meet or exceed the specifications of the order or that the Acquisition has a latent defect, the Supplier shall be notified as soon as is reasonably practicable. The Supplier shall retrieve and replace the Acquisition at Supplier's expense or, if unable to replace, shall issue a refund to Customer. Refund under this section shall not be an exclusive remedy.

6.3 Supplier shall deliver products and services on or before the required date specified in a Contract Document. Failure to deliver timely may result in liquidated damages as set forth in the applicable Contract Document. Deviations, substitutions, or changes in a product or service, including changes of personnel directly providing services, shall not be made unless expressly authorized in writing by the Customer. Any substitution of personnel directly providing services shall be a person of comparable or greater skills, education and experience for performing the services as the person being replaced. Additionally, Supplier shall provide staff sufficiently experienced and able to

perform with respect to any transitional services provided by Supplier in connection with termination or expiration of the Contract.

6.4 Product warranty and return policies and terms provided under any Contract Document will not be more restrictive or more costly than warranty and return policies and terms for other similarly situated customers for a like product.

7 Invoices and Payment

7.1 Supplier shall be paid upon submission of a proper invoice(s) at the prices stipulated in the Contract in accordance with 74 O.S. §85.44B which requires that payment be made only after products have been provided and accepted or services rendered and accepted.

The following terms additionally apply:

A. An invoice shall contain the purchase order number, description of products or services provided and the dates of such provision.

B. Failure to provide a timely and proper invoice may result in delay of processing the invoice for payment. Proper invoice is defined at OAC 260:10-1-2.

C. Payment of all fees under the Contract shall be due NET 45 days. Payment and interest on late payments are governed by 62 O.S. §34.72. Such interest is the sole and exclusive remedy for late payments by a State agency and no other late fees are authorized to be assessed pursuant to Oklahoma law.

D. The date from which an applicable early payment discount time is calculated shall be from the receipt date of a proper invoice. There is no obligation, however, to utilize an early payment discount.

E. If an overpayment or underpayment has been made to Supplier any subsequent payments to Supplier under the Contract may be adjusted to correct the account. A written explanation of the adjustment will be issued to Supplier.

F. Supplier shall have no right of setoff.

G. Because funds are typically dedicated to a particular fiscal year, an invoice will be paid only when timely submitted, which shall in no instance be later than six (6) months after the end of the fiscal year in which the goods are provided or services performed.

H. The Supplier shall accept payment by Purchase Card as allowed by Oklahoma law.

8 Maintenance of Insurance, Payment of Taxes, and Workers' Compensation

8.1 As a condition of this Contract, Supplier shall procure at its own expense, and provide proof of, insurance coverage with the applicable liability limits set forth below and any approved subcontractor of Supplier shall procure and provide proof of the same coverage. The required insurance shall be underwritten by an insurance carrier with an A.M. Best rating of A- or better.

Such proof of coverage shall additionally be provided to the Customer if services will be provided by any of Supplier's employees, agents or subcontractors at any Customer premises and/or employer vehicles will be used in connection with performance of Supplier's obligations under the Contract. Supplier may not commence performance hereunder until such proof has been provided. Additionally, Supplier shall ensure each insurance policy includes a thirty (30) day notice of cancellation and name the State and its agencies as certificate holder and shall promptly provide proof to the State of any renewals, additions, or changes to such insurance coverage. Supplier's obligation to maintain insurance coverage under the Contract is a continuing obligation until Supplier has no further obligation under the Contract. Any combination of primary and excess or umbrella insurance may be used to satisfy the limits of coverage for Commercial General Liability, Auto Liability and Employers' Liability. Unless agreed between the parties and approved by the State Purchasing Director, the minimum acceptable insurance limits of liability are as follows:

A. Workers' Compensation and Employer's Liability Insurance in accordance with and to the extent required by applicable law;

B. Commercial General Liability Insurance covering the risks of personal injury, bodily injury (including death) and property damage, including coverage for contractual liability, with a limit of liability of not less than $5,000,000 per occurrence;

C. Automobile Liability Insurance with limits of liability of not less than $5,000,000 combined single limit each accident;

D. Directors and Officers Insurance which shall include Employment Practices Liability as well as Consultant's Computer Errors and Omissions Coverage, if information technology services are provided under the Contract, with limits not less than $5,000,000 per occurrence;

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

E. Security and Privacy Liability insurance, including coverage for failure to protect confidential information and failure of the security of Supplier's computer systems that results in unauthorized access to Customer data with limits $5,000,000 per occurrence; and

F. Additional coverage required in writing in connection with a particular Acquisition.

8.2 Supplier shall be entirely responsible during the existence of the Contract for the liability and payment of taxes payable by or assessed to Supplier or its employees, agents and subcontractors of whatever kind, in connection with the Contract. Supplier further agrees to comply with all state and federal laws applicable to any such persons, including laws regarding wages, taxes, insurance, and Workers' Compensation. Neither Customer nor the State shall be liable to the Supplier, its employees, agents, or others for the payment of taxes or the provision of unemployment insurance and/or Workers' Compensation or any benefit available to a State or Customer employee.

8.3 Supplier agrees to indemnify Customer, the State, and its employees, agents, representatives, contractors, and assignees for any and all liability, actions, claims, demands, or suits, and all related costs and expenses (including without limitation reasonable attorneys' fees and costs required to establish the right to indemnification) relating to tax liability, unemployment insurance and/or Workers' Compensation in connection with its performance under the Contract.

9 Compliance with Applicable Laws

9.1 As long as Supplier has an obligation under the terms of the Contract and in connection with performance of its obligations, the Supplier represents its present compliance, and shall have an ongoing obligation to comply, with all applicable federal, State, and local laws, rules, regulations, ordinances, and orders, as amended, including but not limited to the following:

A. Drug-Free Workplace Act of 1988 set forth at 41 U.S.C. §81.

B. Section 306 of the Clean Air Act, Section 508 of the Clean Water Act, Executive Order 11738, and Environmental Protection Agency Regulations which prohibit the use of facilities included on the EPA List of Violating Facilities under nonexempt federal contracts, grants or loans;

C. Prospective participant requirements set at 45 C.F.R. part 76 in connection with Debarment, Suspension and other responsibility matters;

D. 1964 Civil Rights Act, Title IX of the Education Amendment of 1972, Section 504 of the Rehabilitation Act of 1973, Americans with Disabilities Act of 1990, and Executive Orders 11246 and 11375;

E. Anti-Lobbying Law set forth at 31 U.S.C. §1325 and as implemented at 45 C.F.R. part 93;

F. Requirements of Internal Revenue Service Publication 1075 regarding use, access and disclosure of Federal Tax Information (as defined therein);

G. Obtaining certified independent audits conducted in accordance with Government Auditing Standards and Office of Management and Budget Uniform Guidance, 2 CFR 200 Subpart F §200.500 et seq. with approval and work paper examination rights of the applicable procuring entity;

H. Requirements of the Oklahoma Taxpayer and Citizen Protection Act of 2007, 25 O.S. §1312 and applicable federal immigration laws and regulations and be registered and participate in the Status Verification System. The Status Verification System is defined at 25 O.S. §1312, includes but is not limited to the free Employment Verification Program (E-Verify) through the Department of Homeland Security, and is available at **www.dhs.gov/E-Verify**;

I. Requirements of the Health Insurance Portability and Accountability Act of 1996; Health Information Technology for Economic and Clinical Health Act; Payment Card Industry Security Standards; Criminal Justice Information System Security Policy and Security Addendum; and Family Educational Rights and Privacy Act; and

J. Be registered as a business entity licensed to do business in the State, have obtained a sales tax permit, and be current on franchise tax payments to the State, as applicable.

9.2 The Supplier's employees, agents and subcontractors shall adhere to applicable Customer policies including, but not limited to acceptable use of Internet and electronic mail, facility and data security, press releases, and public relations. As applicable, the Supplier shall adhere to the State Information Security Policy, Procedures, Guidelines set forth at

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

https://omes.ok.gov/sites/g/files/gmc316/f/InfoSecPPG_0.pdf. Supplier is responsible for reviewing and relaying such policies covering the above to the Supplier's employees, agents and subcontractors.

9.3 At no additional cost to Customer, the Supplier shall maintain all applicable licenses and permits required in association with its obligations under the Contract.

9.4 In addition to compliance under subsection 9.1 above, Supplier shall have a continuing obligation to comply with applicable Customer-specific mandatory contract provisions required in connection with the receipt of federal funds or other funding source.

9.5 The Supplier is responsible to review and inform its employees, agents, and subcontractors who provide a product or perform a service under the Contract of the Supplier's obligations under the Contract and Supplier certifies that its employees and each such subcontractor shall comply with minimum requirements and applicable provisions of the Contract. At the request of the State, Supplier shall promptly provide adequate evidence that such persons are its employees, agents or approved subcontractors and have been informed of their obligations under the Contract.

9.6 As applicable, Supplier agrees to comply with the Governor's Executive Orders related to the use of any tobacco product, electronic cigarette or vaping device on any and all properties owned, leased, or contracted for use by the State, including but not limited to all buildings, land and vehicles owned, leased, or contracted for use by agencies or instrumentalities of the State.

9.7 The execution, delivery and performance of the Contract and any ancillary documents by Supplier will not, to the best of Supplier's knowledge, violate, conflict with, or result in a breach of any provision of, or constitute a default (or an event which, with notice or lapse of time or both, would constitute a default) under, or result in the termination of, any written contract or other instrument between Supplier and any third party.

9.8 Supplier represents that it has the ability to pay its debts when due and it does not anticipate the filing of a voluntary or involuntary bankruptcy petition or appointment of a receiver, liquidator or trustee.

9.9 Supplier represents that, to the best of its knowledge, any litigation or claim or any threat thereof involving Supplier has been disclosed in writing to the State and Supplier is not aware of any other litigation, claim or threat thereof.

9.10 If services provided by Supplier include delivery of an electronic communication, Supplier shall ensure such communication and any associated support documents are compliant with Section 508 of the Federal Rehabilitation Act and with State standards regarding accessibility. Should any communication or associated support documents be non-compliant, Supplier shall correct and re-deliver such communication immediately upon discovery or notice, at no additional cost to the State. Additionally, as part of compliance with accessibility requirements where documents are only provided in non-electronic format, Supplier shall promptly provide such communication and any associated support documents in an alternate format usable by individuals with disabilities upon request and at no additional cost, which may originate from an intended recipient or from the State.

10 Audits and Records Clause

10.1 As used in this clause and pursuant to 67 O.S. §203, "record" includes a document, book, paper, photograph, microfilm, computer tape, disk, record, sound recording, film recording, video record, accounting procedures and practices, and other data, regardless of type and regardless of whether such items are in written form, in the form of computer data, or in any other form. Supplier agrees any pertinent federal or State agency or governing entity of a Customer shall have the right to examine and audit, at no additional cost to a Customer, all records relevant to the execution and performance of the Contract except, unless otherwise agreed, costs of Supplier that comprise pricing under the Contract.

10.2 The Supplier is required to retain records relative to the Contract for the duration of the Contract and for a period of seven (7) years following completion or termination of an Acquisition unless otherwise indicated in the Contract terms. If a claim, audit, litigation or other action involving such records is started before the end of the seven-year period, the records are required to be maintained for two (2) years from the date that all issues arising out of the action are resolved, or until the end of the seven (7) year retention period, whichever is later.

10.3 Pursuant to 74 O.S. §85.41, if professional services are provided hereunder, all items of the Supplier that relate to the professional services are subject to examination by the State agency, State Auditor and Inspector and the State Purchasing Director.

11 Confidentiality

11.1 The Supplier shall maintain strict security of all State and citizen data and records entrusted to it or to which the Supplier gains access, in accordance with

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

and subject to applicable federal and State laws, rules, regulations, and policies and shall use any such data and records only as necessary for Supplier to perform its obligations under the Contract. The Supplier further agrees to evidence such confidentiality obligation in a separate writing if required under such applicable federal or State laws, rules and regulations. The Supplier warrants and represents that such information shall not be sold, assigned, conveyed, provided, released, disseminated or otherwise disclosed by Supplier, its employees, officers, directors, subsidiaries, affiliates, agents, representatives, assigns, subcontractors, independent contractors, successor or any other persons or entities without Customer's prior express written permission. Supplier shall instruct all such persons and entities that the confidential information shall not be disclosed or used without the Customer's prior express written approval except as necessary for Supplier to render services under the Contract. The Supplier further warrants that it has a tested and proven system in effect designed to protect all confidential information.

11.2 Supplier shall establish, maintain and enforce agreements with all such persons and entities that have access to State and citizen data and records to fulfill Supplier's duties and obligations under the Contract and to specifically prohibit any sale, assignment, conveyance, provision, release, dissemination or other disclosure of any State or citizen data or records except as required by law or allowed by written prior approval of the Customer.

11.3 Supplier shall immediately report to the Customer any and all unauthorized use, appropriation, sale, assignment, conveyance, provision, release, access, acquisition, disclosure or other dissemination of any State or citizen data or records of which it or its parent company, subsidiaries, affiliates, employees, officers, directors, assignees, agents, representatives, independent contractors, and subcontractors is aware or have knowledge or reasonable should have knowledge. The Supplier shall also promptly furnish to Customer full details of the unauthorized use, appropriation, sale, assignment, conveyance, provision, release, access, acquisition, disclosure or other dissemination, or attempt thereof, and use its best efforts to assist the Customer in investigating or preventing the reoccurrence of such event in the future. The Supplier shall cooperate with the Customer in connection with any litigation and investigation deemed necessary by the Customer to protect any State or citizen data and records and shall bear all costs associated with the investigation, response and recovery in connection with any breach of State or citizen data or records including but not limited to credit monitoring services with a term of at least three (3) years, all notice-related costs and toll free telephone call center services.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

11.4 Supplier further agrees to promptly prevent a reoccurrence of any unauthorized use, appropriation, sale, assignment, conveyance, provision, release, access, acquisition, disclosure or other dissemination of State or citizen data and records.

11.5 Supplier acknowledges that any improper use, appropriation, sale, assignment, conveyance, provision, release, access, acquisition, disclosure or other dissemination of any State data or records to others may cause immediate and irreparable harm to the Customer and certain beneficiaries and may violate state or federal laws and regulations. If the Supplier or its affiliates, parent company, subsidiaries, employees, officers, directors, assignees, agents, representatives, independent contractors, and subcontractors improperly use, appropriate, sell, assign, convey, provide, release, access, acquire, disclose or otherwise disseminate such confidential information to any person or entity in violation of the Contract, the Customer will immediately be entitled to injunctive relief and/or any other rights or remedies available under this Contract, at equity or pursuant to applicable statutory, regulatory, and common law without a cure period.

11.6 The Supplier shall immediately forward to the State Purchasing Director, and any other applicable person listed in the Notices section(s) of the Contract, any request by a third party for data or records in the possession of the Supplier or any subcontractor or to which the Supplier or subcontractor has access and Supplier shall fully cooperate with all efforts to protect the security and confidentiality of such data or records in response to a third party request.

11.7 Customer may be provided access to Supplier Confidential Information. State agencies are subject to the Oklahoma Open Records Act and Supplier acknowledges information marked confidential information will be disclosed to the extent permitted under the Open Records Act and in accordance with this section. Nothing herein is intended to waive the State Purchasing Director's authority under OAC 260:115-3-9 in connection with Bid information requested to be held confidential by a Bidder. Notwithstanding the foregoing, Supplier Confidential Information shall not include information that: (i) is or becomes generally known or available by public disclosure, commercial use or otherwise and is not in contravention of this Contract; (ii) is known and has been reduced to tangible form by the receiving party before the time of disclosure for the first time under this Contract and without other obligations of confidentiality; (iii) is independently developed without the use of any of Supplier Confidential Information; (iv) is lawfully obtained from a third party (without any confidentiality obligation) who has the right to make such disclosure or (v) résumé, pricing or marketing materials provided to the State. In addition, the obligations in this section shall not apply to the extent

that the applicable law or regulation requires disclosure of Supplier Confidential Information, provided that the Customer provides reasonable written notice, pursuant to Contract notice provisions, to the Supplier so that the Supplier may promptly seek a protective order or other appropriate remedy.

12 Conflict of Interest

In addition to any requirement of law or of a professional code of ethics or conduct, the Supplier, its employees, agents and subcontractors are required to disclose any outside activity or interest that conflicts or may conflict with the best interest of the State. Prompt disclosure is required under this section if the activity or interest is related, directly or indirectly, to any person or entity currently under contract with or seeking to do business with the State, its employees or any other third-party individual or entity awarded a contract with the State. Further, as long as the Supplier has an obligation under the Contract, any plan, preparation or engagement in any such activity or interest shall not occur without prior written approval of the State. Any conflict of interest shall, at the sole discretion of the State, be grounds for partial or whole termination of the Contract.

13 Assignment and Permitted Subcontractors

13.1 Supplier's obligations under the Contract may not be assigned or transferred to any other person or entity without the prior written consent of the State which may be withheld at the State's sole discretion. Should Supplier assign its rights to payment, in whole or in part, under the Contract, Supplier shall provide the State and all affected Customers with written notice of the assignment. Such written notice shall be delivered timely and contain details sufficient for affected Customers to perform payment obligations without any delay caused by the assignment.

13.2 Notwithstanding the foregoing, the Contract may be assigned by Supplier to any corporation or other entity in connection with a merger, consolidation, sale of all equity interests of the Supplier, or a sale of all or substantially all of the assets of the Supplier to which the Contract relates. In any such case, said corporation or other entity shall by operation of law or expressly in writing assume all obligations of the Supplier as fully as if it had been originally made a party to the Contract. Supplier shall give the State and all affected Customers prior written notice of said assignment. Any assignment or delegation in violation of this subsection shall be void.

13.3 If the Supplier is permitted to utilize subcontractors in support of the Contract, the Supplier shall remain solely responsible for its obligations under the terms of the Contract, for its actions and omissions and those of its agents, employees and subcontractors and for payments to such persons or entities. Prior to a

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

subcontractor being utilized by the Supplier, the Supplier shall obtain written approval of the State of such subcontractor and each employee, as applicable to a particular Acquisition, of such subcontractor proposed for use by the Supplier. Such approval is within the sole discretion of the State. Any proposed subcontractor shall be identified by entity name, and by employee name, if required by the particular Acquisition, in the applicable proposal and shall include the nature of the services to be performed. As part of the approval request, the Supplier shall provide a copy of a written agreement executed by the Supplier and subcontractor setting forth that such subcontractor is bound by and agrees, as applicable, to perform the same covenants and be subject to the same conditions and make identical certifications to the same facts and criteria, as the Supplier under the terms of all applicable Contract Documents. Supplier agrees that maintaining such agreement with any subcontractor and obtaining prior written approval by the State of any subcontractor and associated employees shall be a continuing obligation. The State further reserves the right to revoke approval of a subcontractor or an employee thereof in instances of poor performance, misconduct or for other similar reasons.

13.4 All payments under the Contract shall be made directly to the Supplier, except as provided in subsection A above regarding the Supplier's assignment of payment. No payment shall be made to the Supplier for performance by unapproved or disapproved employees of the Supplier or a subcontractor.

13.5 Rights and obligations of the State or a Customer under the terms of this Contract may be assigned or transferred, at no additional cost, to other Customer entities.

14 Background Checks and Criminal History Investigations

Prior to the commencement of any services, background checks and criminal history investigations of the Supplier's employees and subcontractors who will be providing services may be required and, if so, the required information shall be provided to the State in a timely manner. Supplier's access to facilities, data and information may be withheld prior to completion of background verification acceptable to the State. The costs of additional background checks beyond Supplier's normal hiring practices shall be the responsibility of the Customer unless such additional background checks are required solely because Supplier will not provide results of its otherwise acceptable normal background checks; in such an instance, Supplier shall pay for the additional background checks. Supplier will coordinate with the State and its employees to complete the necessary background checks and criminal history investigations. Should any employee or subcontractor of the Supplier who will be providing services under the Contract not be acceptable as a result of the background check or criminal history investigation, the Customer may require replacement of the employee or

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

subcontractor in question and, if no suitable replacement is made within a reasonable time, terminate the purchase order or other payment mechanism associated with the project or services.

15 Patents and Copyrights

Without exception, a product or deliverable price shall include all royalties or costs owed by the Supplier to any third party arising from the use of a patent, intellectual property, copyright or other property right held by such third party. Should any third party threaten or make a claim that any portion of a product or service provided by Supplier under the Contract infringes that party's patent, intellectual property, copyright or other property right, Supplier shall enable each affected Customer to legally continue to use, or modify for use, the portion of the product or service at issue or replace such potentially infringing product, or re-perform or redeliver in the case of a service, with at least a functional non-infringing equivalent. Supplier's duty under this section shall extend to include any other product or service rendered materially unusable as intended due to replacement or modification of the product or service at issue. If the Supplier determines that none of these alternatives are reasonably available, the State shall return such portion of the product or deliverable at issue to the Supplier, upon written request, in exchange for a refund of the price paid for such returned goods as well as a refund or reimbursement, if applicable, of the cost of any other product or deliverable rendered materially unusable as intended due to removal of the portion of product or deliverable at issue. Any remedy provided under this section is not an exclusive remedy and is not intended to operate as a waiver of legal or equitable remedies because of acceptance of relief provided by Supplier.

16 Indemnification

16.1 Acts or Omissions

A. Supplier shall defend and indemnify the Indemnified Parties, as applicable, for any and all liability, claims, damages, losses, costs, expenses, demands, suits and actions of third parties (including without limitation reasonable attorneys' fees and costs required to establish the right to indemnification) arising out of, or resulting from any action or claim for bodily injury, death, or property damage brought against any of the Indemnified parties to the extent arising from any negligent act or omission or willful misconduct of the Supplier or its agents, employees, or subcontractors in the execution or performance of the Contract.

B. To the extent Supplier is found liable for loss, damage, or destruction of any property of Customer due to negligence, misconduct, wrongful act, or omission on the part of the Supplier, its employees, agents,

representatives, or subcontractors, the Supplier and Customer shall use best efforts to mutually negotiate an equitable settlement amount to repair or replace the property unless such loss, damage or destruction is of such a magnitude that repair or replacement is not a reasonable option. Such amount shall be invoiced to, and is payable by, Supplier sixty (60) calendar days after the date of Supplier's receipt of an invoice for the negotiated settlement amount.

16.2 Infringement

Supplier shall indemnify the Indemnified Parties, as applicable, for all liability, claims, damages, losses, costs, expenses, demands, suits and actions of third parties (including without limitation reasonable attorneys' fees and costs required to establish the right to indemnification) arising from or in connection with Supplier's breach of its representations and warranties in the Contract or alleged infringement of any patent, intellectual property, copyright or other property right in connection with a product or service provided under the Contract. Supplier's duty under this section is reduced to the extent a claimed infringement results from: (a) a Customer's or user's content; (b) modifications by Customer or third party to a product delivered under the Contract or combinations of the product with any non-Supplier-provided services or products unless Supplier recommended or participated in such modification or combination; (c) use of a product or service by Customer in violation of the Contract unless done so at the direction of Supplier, or (d) a non-Supplier product that has not been provided to the State by, through or on behalf of Supplier as opposed to its combination with products Supplier provides to or develops for the State or a Customer as a system.

16.3 Notice and Cooperation

In connection with indemnification obligations under the Contract, the parties agree to furnish prompt written notice to each other of any third-party claim. Any Customer affected by the claim will reasonably cooperate with Supplier and defense of the claim to the extent its interests are aligned with Supplier. Supplier shall use counsel reasonably experienced in the subject matter at issue and will not settle a claim without the written consent of the party being defended, which consent will not be unreasonably withheld or delayed, except that no consent will be required to settle a claim against Indemnified Parties that are not a State agency, where relief against the Indemnified Parties is limited to monetary damages that are paid by the defending party under indemnification provisions of the Contract.

16.4 Coordination of Defense

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

In connection with indemnification obligations under the Contract, when a State agency is a named defendant in any filed or threatened lawsuit, the defense of the State agency shall be coordinated by the Attorney General of Oklahoma, or the Attorney General may authorize the Supplier to control the defense and any related settlement negotiations; provided, however, Supplier shall not agree to any settlement of claims against the State without obtaining advance written concurrence from the Attorney General. If the Attorney General does not authorize sole control of the defense and settlement negotiations to Supplier, Supplier shall have authorization to equally participate in any proceeding related to the indemnity obligation under the Contract and shall remain responsible to indemnify the applicable Indemnified Parties.

16.5 Limitation of Liability

A. With respect to any claim or cause of action arising under or related to the Contract, neither the State nor any Customer shall be liable to Supplier for lost profits, lost sales or business expenditures, investments, or commitments in connection with any business, loss of any goodwill, or for any other indirect, incidental, punitive, special or consequential damages, even if advised of the possibility of such damages.

B. Notwithstanding anything to the contrary in the Contract, no provision shall limit damages, expenses, costs, actions, claims, and liabilities arising from or related to property damage, bodily injury or death caused by Supplier or its employees, agents or subcontractors; indemnity, security or confidentiality obligations under the Contract; the bad faith, negligence, intentional misconduct or other acts for which applicable law does not allow exemption from liability of Supplier or its employees, agents or subcontractors.

C. The limitation of liability and disclaimers set forth in the Contract will apply regardless of whether Customer has accepted a product or service. The parties agree that Supplier has set its fees and entered into the Contract in reliance on the disclaimers and limitations set forth herein, that the same reflect an allocation of risk between the parties and form an essential basis of the bargain between the parties. These limitations shall apply notwithstanding any failure of essential purpose of any limited remedy.

17 Termination for Funding Insufficiency

17.1 Notwithstanding anything to the contrary in any Contract Document, the State may terminate the Contract in whole or in part if funds sufficient to pay obligations under the Contract are not appropriated or received from an intended third-party funding source. In the event of such insufficiency, Supplier will be provided at least fifteen (15) calendar days' written notice of termination. Any partial termination of the Contract under this section shall not be construed as a waiver of, and shall not affect, the rights and obligations of any party regarding portions of the Contract that are not terminated. The determination by the State of insufficient funding shall be accepted by, and shall be final and binding on, the Supplier.

17.2 Upon receipt of notice of a termination, Supplier shall immediately comply with the notice terms and take all necessary steps to minimize the incurrence of costs allocable to the work affected by the notice. If a purchase order or other payment mechanism has been issued and a product or service has been accepted as satisfactory prior to the effective date of termination, the termination does not relieve an obligation to pay for the product or service but there shall not be any liability for further payments ordinarily due under the Contract or for any damages or other amounts caused by or associated with such termination. Any amount paid to Supplier in the form of prepaid fees that are unused when the Contractor certain obligations are terminated shall be refunded.

17.3 The State's exercise of its right to terminate the Contract under this section shall not be considered a default or breach under the Contract or relieve the Supplier of any liability for claims arising under the Contract.

18 Termination for Cause

18.1 Supplier may terminate the Contract if (i) it has provided the State with written notice of material breach and (ii) the State fails to cure such material breach within thirty (30) days of receipt of written notice. If there is more than one Customer, material breach by a Customer does not give rise to a claim of material breach as grounds for termination by Supplier of the Contract as a whole. The State may terminate the Contract in whole or in part if (i) it has provided Supplier with written notice of material breach, and (ii) Supplier fails to cure such material breach within thirty (30) days of receipt of written notice. Any partial termination of the Contract under this section shall not be construed as a waiver of, and shall not affect, the rights and obligations of any party regarding portions of the Contract that are not terminated.

18.2 The State may terminate the Contract in whole or in part immediately without a thirty (30) day written notice to Supplier if (i) Supplier fails to comply with

confidentiality, privacy, security, environmental or safety requirements applicable to Supplier's performance or obligations under the Contract; (ii) Supplier's material breach is reasonably determined to be an impediment to the function of the State and detrimental to the State or to cause a condition precluding the thirty (30) day notice or (iii) when the State determines that an administrative error in connection with award of the Contract occurred prior to Contract performance.

18.3 Upon receipt of notice of a termination, Supplier shall immediately comply with the notice terms and take all necessary steps to minimize the incurrence of costs allocable to the work affected by the notice. If a purchase order or other payment mechanism has been issued and a product or service has been accepted as satisfactory prior to the effective date of termination, the termination does not relieve an obligation to pay for the product or service but there shall not be any liability for further payments ordinarily due under the Contract or for any damages or other amounts caused by or associated with such termination. Such termination is not an exclusive remedy but is in addition to any other rights and remedies provided for by law. Any amount paid to Supplier in the form of prepaid fees that are unused when the Contract or certain obligations are terminated shall be refunded. Termination of the Contract under this section, in whole or in part, shall not relieve the Supplier of liability for claims arising under the Contract.

18.4 The Supplier's repeated failure to provide an acceptable product or service; Supplier's unilateral revision of linked or supplemental terms that have a materially adverse impact on a Customer's rights or obligations under the Contract (except as required by a governmental authority); actual or anticipated failure of Supplier to perform its obligations under the Contract; Supplier's inability to pay its debts when due; assignment for the benefit of Supplier's creditors; or voluntary or involuntary appointment of a receiver or filing of bankruptcy of Supplier shall constitute a material breach of the Supplier's obligations, which may result in partial or whole termination of the Contract. This subsection is not intended as an exhaustive list of material breach conditions. Termination may also result from other instances of failure to adhere to the Contract provisions and for other reasons provided for by applicable law, rules or regulations; without limitation, OAC 260:115-9-9 is an example.

19 Termination for Convenience

19.1 The State may terminate the Contract, in whole or in part, for convenience if it is determined that termination is in the State's best interest. In the event of a termination for convenience, Supplier will be provided at least thirty (30) days'

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

written notice of termination. Any partial termination of the Contract shall not be construed as a waiver of, and shall not affect, the rights and obligations of any party regarding portions of the Contract that remain in effect.

19.2 Upon receipt of notice of such termination, Supplier shall immediately comply with the notice terms and take all necessary steps to minimize the incurrence of costs allocable to the work affected by the notice. If a purchase order or other payment mechanism has been issued and a product or service has been accepted as satisfactory prior to the effective date of termination, the termination does not relieve an obligation to pay for the product or service but there shall not be any liability for further payments ordinarily due under the Contract or for any damages or other amounts caused by or associated with such termination. Such termination shall not be an exclusive remedy but shall be in addition to any other rights and remedies provided for by law. Any amount paid to Supplier in the form of prepaid fees that are unused when the Contract or certain obligations are terminated shall be refunded. Termination of the Contract under this section, in whole or in part, shall not relieve the Supplier of liability for claims arising under the Contract.

20 Suspension of Supplier

20.1 Supplier may be subject to Suspension without advance notice and may additionally be suspended from activities under the Contract if Supplier fails to comply with confidentiality, privacy, security, environmental or safety requirements applicable to Supplier's performance or obligations under the Contract.

20.2 Upon receipt of a notice pursuant to this section, Supplier shall immediately comply with the notice terms and take all necessary steps to minimize the incurrence of costs allocable to the work affected by the notice. If a purchase order or other payment mechanism has been issued and a product or service has been accepted as satisfactory prior to receipt of notice by Supplier, the Suspension does not relieve an obligation to pay for the product or service but there shall not be any liability for further payments ordinarily due under the Contract during a period of Suspension or suspended activity or for any damages or other amounts caused by or associated with such Suspension or suspended activity. A right exercised under this section shall not be an exclusive remedy but shall be in addition to any other rights and remedies provided for by law. Any amount paid to Supplier in the form of prepaid fees attributable to a period of Suspension or suspended activity shall be refunded.

20.3 Such Suspension may be removed, or suspended activity may resume, at the earlier of such time as a formal notice is issued that authorizes the resumption

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

of performance under the Contract or at such time as a purchase order or other appropriate encumbrance document is issued. This subsection is not intended to operate as an affirmative statement that such resumption will occur.

21 Certification Regarding Debarment, Suspension, and Other Responsibility Matters

The certification made by Supplier with respect to Debarment, Suspension, certain indictments, convictions, civil judgments and terminated public contracts is a material representation of fact upon which reliance was placed when entering into the Contract. A determination that Supplier knowingly rendered an erroneous certification, in addition to other available remedies, may result in whole or partial termination of the Contract for Supplier's default. Additionally, Supplier shall promptly provide written notice to the State Purchasing Director if the certification becomes erroneous due to changed circumstances.

22 Certification Regarding State Employees Prohibition From Fulfilling Services

Pursuant to 74 O.S. § 85.42, the Supplier certifies that no person involved in any manner in development of the Contract employed by the State shall be employed to fulfill any services provided under the Contract.

23 Force Majeure

23.1 Either party shall be temporarily excused from performance to the extent delayed as a result of unforeseen causes beyond its reasonable control including fire or other similar casualty, act of God, strike or labor dispute, war or other violence, or any law, order or requirement of any governmental agency or authority provided the party experiencing the force majeure event has prudently and promptly acted to take any and all steps within the party's control to ensure continued performance and to shorten duration of the event. If a party's performance of its obligations is materially hindered as a result of a force majeure event, such party shall promptly notify the other party of its best reasonable assessment of the nature and duration of the force majeure event and steps it is taking, and plans to take, to mitigate the effects of the force majeure event. The party shall use commercially reasonable best efforts to continue performance to the extent possible during such event and resume full performance as soon as reasonably practicable.

23.2 Subject to the conditions set forth above, non-performance as a result of a force majeure event shall not be deemed a default. However, a purchase order or other payment mechanism may be terminated if Supplier cannot cause delivery of a product or service in a timely manner to meet the business needs of Customer. Supplier is not entitled to payment for products or services not

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

received and, therefore, amounts payable to Supplier during the force majeure event shall be equitably adjusted downward.

23.3 Notwithstanding the foregoing or any other provision in the Contract, (i) the following are not a force majeure event under the Contract: (a) shutdowns, disruptions or malfunctions in Supplier's system or any of Supplier's telecommunication or internet services other than as a result of general and widespread internet or telecommunications failures that are not limited to Supplier's systems or (b) the delay or failure of Supplier or subcontractor personnel to perform any obligation of Supplier hereunder unless such delay or failure to perform is itself by reason of a force majeure event and (ii) no force majeure event modifies or excuses Supplier's obligations related to confidentiality, indemnification, data security or breach notification obligations set forth herein.

24 Security of Property and Personnel

In connection with Supplier's performance under the Contract, Supplier may have access to Customer personnel, premises, data, records, equipment and other property. Supplier shall use commercially reasonable best efforts to preserve the safety and security of such personnel, premises, data, records, equipment, and other property of Customer. Supplier shall be responsible for damage to such property to the extent such damage is caused by its employees or subcontractors and shall be responsible for loss of Customer property in its possession, regardless of cause. If Supplier fails to comply with Customer's security requirements, Supplier is subject to immediate suspension of work as well as termination of the associated purchase order or other payment mechanism.

25 Notices

All notices, approvals or requests allowed or required by the terms of any Contract Document shall be in writing, reference the Contract with specificity and deemed delivered upon receipt or upon refusal of the intended party to accept receipt of the notice. In addition to other notice requirements in the Contract and the designated Supplier contact provided in a successful Bid, notices shall be sent to the State at the physical address set forth below. Notice information may be updated in writing to the other party as necessary. Notwithstanding any other provision of the Contract, confidentiality, breach and termination-related notices shall not be delivered solely via e-mail.

If sent to the State:
State Purchasing Director
5005 North Lincoln Boulevard, Suite 300

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Oklahoma City, Oklahoma 73105

With a copy, which shall not constitute notice, to:
Purchasing Division Deputy General Counsel
5005 North Lincoln Boulevard, Suite 300
Oklahoma City, Oklahoma 73105

26 Miscellaneous

26.1 Choice of Law and Venue

Any claim, dispute, or litigation relating to the Contract Documents, in the singular or in the aggregate, shall be governed by the laws of the State without regard to application of choice of law principles. Pursuant to 74 O.S. §85.14, where federal granted funds are involved, applicable federal laws, rules and regulations shall govern to the extent necessary to insure benefit of such federal funds to the State. Venue for any action, claim, dispute, or litigation relating in any way to the Contract Documents, shall be in Oklahoma County, Oklahoma.

26.2 No Guarantee of Products or Services Required

The State shall not guarantee any minimum or maximum amount of Supplier products or services required under the Contract.

26.3 Employment Relationship

The Contract does not create an employment relationship. Individuals providing products or performing services pursuant to the Contract are not employees of the State or Customer and, accordingly are not eligible for any rights or benefits whatsoever accruing to such employees.

26.4 Transition Services

If transition services are needed at the time of Contract expiration or termination, Supplier shall provide such services on a month-to-month basis, at the contract rate or other mutually agreed rate. Supplier shall provide a proposed transition plan, upon request, and cooperate with any successor supplier and with establishing a mutually agreeable transition plan. Failure to cooperate may be documented as poor performance of Supplier.

26.5 Publicity

The existence of the Contract or any Acquisition is in no way an endorsement of Supplier, the products or services and shall not be so construed by Supplier

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

in any advertising or publicity materials. Supplier agrees to submit to the State all advertising, sales, promotion, and other publicity matters relating to the Contract wherein the name of the State or any Customer is mentioned or language used from which, in the State's judgment, an endorsement may be inferred or implied. Supplier further agrees not to publish or use such advertising, sales promotion, or publicity matter or release any informational pamphlets, notices, press releases, research reports, or similar public notices concerning the Contract or any Acquisition hereunder without obtaining the prior written approval of the State.

26.6 Open Records Act

Supplier acknowledges that all State agencies and certain other Customers are subject to the Oklahoma Open Records Act set forth at 51 O.S. §24A-1 *et seq*. Supplier also acknowledges that compliance with the Oklahoma Open Records Act and all opinions of the Oklahoma Attorney General concerning the Act is required.

26.7 Failure to Enforce

Failure by the State or a Customer at any time to enforce a provision of, or exercise a right under, the Contract shall not be construed as a waiver of any such provision. Such failure to enforce or exercise shall not affect the validity of any Contract Document, or any part thereof, or the right of the State or a Customer to enforce any provision of, or exercise any right under, the Contract at any time in accordance with its terms. Likewise, a waiver of a breach of any provision of a Contract Document shall not affect or waive a subsequent breach of the same provision or a breach of any other provision in the Contract.

26.8 Mutual Responsibilities

A. No party to the Contract grants the other the right to use any trademarks, trade names, other designations in any promotion or publication without the express written consent by the other party.

B. The Contract is a non-exclusive contract and each party is free to enter into similar agreements with others.

C. The Customer and Supplier each grant the other only the licenses and rights specified in the Contract and all other rights and interests are expressly reserved.

D. The Customer and Supplier shall reasonably cooperate with each other and any Supplier to which the provision of a product and/or service

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

under the Contract may be transitioned after termination or expiration of the Contract.

E. Except as otherwise set forth herein, where approval, acceptance, consent, or similar action by a party is required under the Contract, such action shall not be unreasonably delayed or withheld.

26.9 Invalid Term or Condition

To the extent any term or condition in the Contract conflicts with a compulsory applicable State or United States law or regulation, such Contract term or condition is void and unenforceable. By executing any Contract Document which contains a conflicting term or condition, no representation or warranty is made regarding the enforceability of such term or condition. Likewise, any applicable State or federal law or regulation which conflicts with the Contract or any non-conflicting applicable State or federal law or regulation is not waived.

26.10 Severability

If any provision of a Contract Document, or the application of any term or condition to any party or circumstances, is held invalid or unenforceable for any reason, the remaining provisions shall continue to be valid and enforceable and the application of such provision to other parties or circumstances shall remain valid and in full force and effect. If a court finds that any provision of this contract is invalid or unenforceable, but that by limiting such provision it would become valid and enforceable, then such provision shall be deemed to be written, construed, and enforced as so limited.

26.11 Section Headings

The headings used in any Contract Document are for convenience only and do not constitute terms of the Contract.

26.12 Sovereign Immunity

Notwithstanding any provision in the Contract, the Contract is entered into subject to the State's Constitution, statutes, common law, regulations, and the doctrine of sovereign immunity, none of which are waived by the State nor any other right or defense available to the State.

26.13 Survival

As applicable, performance under all license, subscription, service agreements, statements of work, transition plans and other similar Contract Documents

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

entered into between the parties under the terms of the Contract shall survive Contract expiration. Additionally, rights and obligations under the Contract which by their nature should survive including, without limitation, certain payment obligations invoiced prior to expiration or termination; confidentiality obligations; security incident and data breach obligations and indemnification obligations, remain in effect after expiration or termination of the Contract.

26.14 Entire Agreement

The Contract Documents taken together as a whole constitute the entire agreement between the parties. No statement, promise, condition, understanding, inducement or representation, oral or written, expressed or implied, which is not contained in a Contract Document shall be binding or valid. The Supplier's representations and certifications, including any completed electronically, are incorporated by reference into the Contract.

26.15 Gratuities

The Contract may be immediately terminated, in whole or in part, by written notice if it is determined that the Supplier, its employee, agent, or another representative violated any federal, State or local law, rule or ordinance by offering or giving a gratuity to any State employee directly involved in the Contract. In addition, Suspension or Debarment of the Supplier may result from such a violation.

26.16 Import/Export Controls

Neither party will use, distribute, transfer or transmit any equipment, services, software or technical information provided under the Contract (even if incorporated into other products) except in compliance with all applicable import and export laws, conventions and regulations.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

EXHIBIT C

STATE OF OKLAHOMA INFORMATION TECHNOLOGY TERMS

The parties further agree to the following terms ("Information Technology Terms"), as applicable, for any Acquisition of products or services with an information technology or telecommunication component. Pursuant to the Oklahoma Information Technology Consolidation and Coordination Act, OMES-Information Services ("OMES-IS") is designated to purchase information technology and telecommunication products and services on behalf of the State. The Act directs OMES-IS to acquire necessary hardware, software and services and to authorize the use by other State agencies. OMES, as the owner of information technology and telecommunication assets and contracts on behalf of the State, allows other State agencies to use the assets while retaining ownership and the right to reassign the assets, at no additional cost, upon written notification to Supplier. OMES-IS is the data custodian for State agency data; however, such data is owned by the respective State agency.

1 Definitions

1.1 **COTS** means software that is commercial off the shelf.

1.2 **Customer Data** means all data supplied by or on behalf of a Customer in connection with the Contract, excluding any confidential information of Supplier.

1.3 **Data Breach** means the unauthorized access by an unauthorized person that results in the use, disclosure or theft of Customer Data.

1.4 **Host** includes the terms **Hosted** or **Hosting** and means the accessing, processing or storing of Customer Data.

1.5 **Intellectual Property Rights** means the worldwide legal rights or interests evidenced by or embodied in any idea, design, concept, personality right, method, process, technique, apparatus, invention, discovery or improvement including any patents, trade secrets and know-how; any work of authorship including any copyrights, Moral Rights or neighboring rights; any trademark, service mark, trade dress, trade name or other indicia of source or origin; domain name registrations; and any other proprietary or similar rights. Intellectual Property Rights of a party also includes all worldwide legal rights or interests that the party may have acquired by assignment or license with the right to grant sublicenses.

1.6 **Moral Rights** means any and all rights of paternity or integrity of the Work Product and the right to object to any modification, translation or use of the Work Product and any similar rights existing under the judicial or statutory law of any country in the world or under any treaty, regardless of whether or not such right is denominated or referred to as a moral right.

1.7 **Non-Public Data** means Customer Data, other than Personal Data, that is not subject to distribution to the public as public information. It is deemed to be sensitive and confidential

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

by Customer because it contains information that is exempt by statute, ordinance or administrative rule from access by the general public as public information. Non-Public Data includes any data deemed confidential pursuant to the Contract, otherwise identified by Customer as Non-Public Data, or that a reasonable person would deem confidential.

1.8 **Personal Data** means Customer Data that contains 1) any combination of an individual's name, social security numbers, driver's license, state/federal identification number, account number, credit or debit card number and/or 2) data subject to protection under a federal, state or local law, rule, regulation or ordinance.

1.9 **Security Incident** means the attempted or successful unauthorized access, use, disclosure, modification, or destruction of information or interference with the Hosted environment used to perform the services.

1.10 **State CIO** means the State Chief Information Officer or authorized designee.

1.11 **Supplier Intellectual Property** means all tangible or intangible items or things, including the Intellectual Property Rights therein, created or developed by Supplier and identified in writing as such (a) prior to providing any services or Work Product to Customer and prior to receiving any documents, materials, information or funding from or on behalf of a Customer relating to the services or Work Product, or (b) after the effective date of the Contract if such tangible or intangible items or things were independently developed by Supplier outside Supplier's provision of services or Work Product for Customer under the Contract and were not created, prepared, developed, invented or conceived by any Customer personnel who then became personnel to Supplier or any of its affiliates or subcontractors, where, although creation or reduction-to-practice is completed while the person is affiliated with Supplier or its personnel, any portion of same was created, invented or conceived by such person while affiliated with Customer.

1.12 **Third Party Intellectual Property** means the Intellectual Property Rights of any third party that is not a party to the Contract, and that is not directly or indirectly providing any goods or services to a Customer under the Contract.

1.13 **Work Product** means any and all deliverables produced by Supplier for Customer under a statement of work issued pursuant to the Contract, including any and all tangible or intangible items or things that have been or will be prepared, created, developed, invented or conceived at any time following the effective date of the Contract, including but not limited to any (i) works of authorship (such as manuals, instructions, printed material, graphics, artwork, images, illustrations, photographs, computer programs, computer software, scripts, object code, source code or other programming code, HTML code, flow charts, notes, outlines, lists, compilations, manuscripts, writings, pictorial materials, schematics, formulae, processes, algorithms, data, information, multimedia files, text web pages or web sites, other written or machine readable expression of such works fixed in any tangible media, and all other copyrightable works), (i) trademarks, service marks, trade dress, trade names, logos, or other indicia of source or origin, (iii) ideas, designs, concepts,

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

personality rights, methods, processes, techniques, apparatuses, inventions, formulas, discoveries, or improvements, including any patents, trade secrets and know-how, (iv) domain names, (v) any copies, and similar or derivative works to any of the foregoing, (vi) all documentation and materials related to any of the foregoing, (vii) all other goods, services or deliverables to be provided to Customer under the Contract or statement of work, and (vii) all Intellectual Property Rights in any of the foregoing, and which are or were created, prepared, developed, invented or conceived for the use of benefit of Customer in connection with this Contract or a statement of work, or with funds appropriated by or for Customer or Customer's benefit: (a) by any Supplier personnel or Customer personnel, or (b) any Customer personnel who then became personnel to Supplier or any of its affiliates or subcontractors, where, although creation or reduction-to-practice is completed while the person is affiliated with Supplier or its personnel, any portion of same was created, invented or conceived by such person while affiliated with Customer.

2 Termination of Maintenance and Support Services

Customer may terminate maintenance or support services without an adjustment charge, provided any of the following circumstances occur:

2.1 Customer removes the product for which the services are provided, from productive use or;

2.2 The location at which the services are provided is no longer controlled by Customer (for example, because of statutory or regulatory changes or the sale or closing of a facility).

If Customer chooses to renew maintenance or support after maintenance has lapsed, Customer may choose to pay the additional fee, if any, associated with renewing a license after such maintenance or support has lapsed, or to purchase a new license. Any amount paid to Supplier in the form of prepaid fees that are unused when services under the Contract or purchase order are terminated shall be refunded to Customer.

3 Compliance and Electronic and Information Technology Accessibility

State procurement of information technology is subject to certain federal and State laws, rules and regulations related to information technology accessibility, including but not limited to Oklahoma Information Technology Accessibility Standards ("Standards") set forth at https://omes.ok.gov/services/information-services/accessibility-standards. Supplier shall provide a Voluntary Product Accessibility Template ("VPAT") describing accessibility compliance via a URL linking to the VPAT and shall update the VPAT as necessary in order to allow a Customer to obtain current VPAT information as required by State law. If products require development or customization, additional requirements and documentation may be required and compliance shall be necessary by Supplier. Such requirements may be stated in appropriate documents including but not limited to a statement of work, riders, agreement, purchase order or Addendum.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

All representations contained in the VPAT provided will be relied upon by the State or a Customer, as applicable, for accessibility compliance purposes.

4 Media Ownership (Disk Drive and/or Memory Chip Ownership)

4.1 Any disk drives and memory cards purchased with or included for use in leased or purchased products under the Contract remain the property of the Customer.

4.2 Personal information may be retained within electronic media devices and components; therefore, electronic media shall not be released either between Customers or for the resale, of refurbished equipment that has been in use by a Customer, by the Supplier to the general public or other entities. This provision applies to replacement devices and components, whether purchased or leased, supplied by Supplier, its agents or subcontractors during the downtime (repair) of products purchased or leased through the Contract. If a device is removed from a location for repairs, the Customer shall have sole discretion, prior to removal, to determine and implement sufficient safeguards (such as a record of hard drive serial numbers) to protect personal information that may be stored within the hard drive or memory of the device.

5 Offshore Services

No offshore services are provided for under the Contract. State data shall not be used or accessed internationally for troubleshooting or any other use not specifically provided for herein without the prior written permission, which may be withheld in the State's sole discretion, from the appropriate authorized representative of the State. Notwithstanding the above, back office administrative functions of the Supplier may be located offshore and the follow-the-sun support model may be used by the Supplier to the extent allowed by law applicable to any Customer data being accessed or used.

6 Compliance with Technology Policies

6.1 The Supplier agrees to adhere to the State of Oklahoma "Information Security Policy, Procedures, and Guidelines" available at https://omes.ok.gov/s/g/files/gmc316/f/InfoSecPPG_0.pdf.

Supplier's employees and subcontractors shall adhere to the applicable State IT Standard Methodologies and Templates including but not limited to Project Management, Business Analysis, System Analysis, Enterprise and IT Architecture, Quality, Application and Security Methodologies and Templates as set forth at http://eclipse.omes.ok.gov.

6.2 Supplier shall comply with applicable Federal Information Processing Standards including, without limitation, FIPS 200, FIPS 140-2 or successor standards and all recommendations from the National Institute of Standards and Technology. The confidentiality of Customer Data shall be protected and maintained in accordance with these standards as well as other applicable Customer standards.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

6.3 Supplier shall comply with the CJIS Security Policy as more particularly described at Appendix 2 attached hereto and incorporated herein.

7 Emerging Technologies

The State of Oklahoma reserves the right to enter into an Addendum to the Contract at any time to allow for emerging technologies not identified elsewhere in the Contract Documents if there are repeated requests for such emerging technology or the State determines it is warranted to add such technology.

8 Extension Right

In addition to extension rights of the State set forth in the Contract, the State CIO reserves the right to extend any Contract if the State CIO determines such extension to be in the best interest of the State.

9 Source Code Escrow

Pursuant to 62 O.S. § 34.31, if customized computer software is developed or modified exclusively for a State agency, the Supplier has a continuing obligation to comply with such law and place the source code for such software and any modifications thereto into escrow with an independent third party escrow agent. Supplier shall pay all fees charged by the escrow agent and enter into an escrow agreement, the terms of which are subject to the prior written approval of the State, including terms that provide the State receives ownership of all escrowed source code upon the occurrence of any of the following:

9.1 A bona fide material default of the obligations of the Supplier under the agreement with the applicable Customer;

9.2 An assignment by the Supplier for the benefit of its creditors;

9.3 A failure by the Supplier to pay, or an admission by the Supplier of its inability to pay, its debts as they mature;

9.4 The filing of a petition in bankruptcy by or against the Supplier when such petition is not dismissed within sixty (60) days of the filing date;

9.5 The appointment of a receiver, liquidator or trustee appointed for any substantial part of the Supplier's property;

9.6 The inability or unwillingness of the Supplier to provide the maintenance and support services in accordance with the agreement with the agency;

9.7 Supplier's ceasing of maintenance and support of the software; or

9.8 Such other condition as may be statutorily imposed by the future amendment or enactment of applicable Oklahoma law.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

10 Commercial Off The Shelf Software

If Supplier specifies terms and conditions or clauses in an electronic license, subscription, maintenance, support or similar agreement that conflict with the terms of this Contract, the additional terms and conditions or conflicting clauses shall not be binding on the State and the provisions of this Contract shall prevail.

11 Ownership Rights

Any software developed by the Supplier under the terms of the Contract is for the sole and exclusive use of the State including but not limited to the right to use, reproduce, re-use, alter, modify, edit, or change the software as it sees fit and for any purpose. Moreover, except with regard to any deliverable based on Supplier Intellectual Property, the State shall be deemed the sole and exclusive owner of all right, title, and interest therein, including but not limited to all source data, information and materials furnished to the State, together with all plans, system analysis, and design specifications and drawings, completed programs and documentation thereof, reports and listing, all data and test procedures and all other items pertaining to the work and services to be performed pursuant to this Contract including all copyright and proprietary rights relating thereto. With respect to Supplier Intellectual Property, the Supplier grants the State, for no additional consideration, a perpetual, irrevocable, royalty-free license, solely for the internal business use of the State, to use, copy, modify, display, perform, transmit and prepare derivative works of Supplier Intellectual Property embodied in or delivered to the State in conjunction with the products.

Except for any Supplier Intellectual Property, all work performed by the Supplier of developing, modifying or customizing software and any related supporting documentation shall be considered as Work for Hire (as defined under the U.S. copyright laws) and, as such, shall be owned by and for the benefit of State.

In the event that it should be determined that any portion of such software or related supporting documentation does not qualify as “Work for Hire”, Supplier hereby irrevocably grants to the State, for no additional consideration, a non-exclusive, irrevocable, royalty-free license to use, copy, modify, display, perform, transmit and prepare derivative works of any such software and any Supplier Intellectual Property embodied in or delivered to the State in conjunction with the products.

Supplier shall assist the State and its agents, upon request, in preparing U.S. and foreign copyright, trademark, and/or patent applications covering software developed, modified or customized for the State. Supplier shall sign any such applications, upon request, and deliver them to the State. The State shall bear all expenses that incurred in connection with such copyright, trademark, and/or patent applications.

If any Acquisition pursuant to this Contract is funded wholly or in part with federal funds, the source code and all associated software and related documentation owned by the State may be

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

shared with other publicly funded agencies at the discretion of the State without permission from or additional compensation to the Supplier.

12 Intellectual Property Ownership

The following terms apply to ownership and rights related to Intellectual Property:

12.1 As between Supplier and Customer, the Work Product and Intellectual Property Rights therein are and shall be owned exclusively by Customer, and not Supplier. Supplier specifically agrees that the Work Product shall be considered "works made for hire" and that the Work Product shall, upon creation, be owned exclusively by Customer. To the extent that the Work Product, under applicable law, may not be considered works made for hire, Supplier hereby agrees that all right, title and interest in and to all ownership rights and all Intellectual Property Rights in the Work Product is hereby effectively transferred, granted, conveyed, assigned and relinquished exclusively to Customer, without the necessity of any further consideration, and Customer shall be entitled to obtain and hold in its own name all Intellectual Property Rights in and to the Work Product. Supplier acknowledges that Supplier and Customer do not intend Supplier to be a joint author of the Work Product within the meaning of the Copyright Act of 1976. Customer shall have access, during normal business hours (Monday through Friday, 8:00 a.m. to 5:00 p.m.) and upon reasonable prior notice to Supplier, to all Supplier materials, premises and computer files containing the Work Product. Supplier and Customer, as appropriate, will cooperate with one another and execute such other documents as may be reasonably appropriate to achieve the objectives herein. No license or other right is granted under the Contract to any Third Party Intellectual Property, except as may be incorporated in the Work Product by Supplier.

12.2 Supplier, upon request and without further consideration, shall perform any acts that may be deemed reasonably necessary or desirable by Customer to evidence more fully the transfer of ownership and/or registration of all Intellectual Property Rights in all Work Product to Customer to the fullest extent possible including, but not limited to, the execution, acknowledgement and delivery of such further documents in a form determined by Customer. In the event Customer shall be unable to obtain Supplier's signature due to the dissolution of Supplier or Supplier's failure to respond to Customer's repeated requests for such signature on any document reasonably necessary for any purpose set forth in the foregoing sentence, Supplier hereby irrevocably designates and appoints Customer and its duly authorized officers and agents as Supplier's agent and Supplier's attorney-in-fact to act for and in Supplier's behalf and stead to execute and file any such document and to do all other lawfully permitted acts to further any such purpose with the same force and effect as if executed and delivered by Supplier, provided however that no such grant of right to Customer is applicable if Supplier fails to execute any document due to a good faith dispute by Supplier with respect to such document. It is understood that such power is coupled with an interest and is therefore irrevocable. Customer shall have the full and sole power to prosecute such applications and to take all other action concerning the Work Product, and Supplier shall cooperate, at Customer's sole expense, in the preparation and

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

prosecution of all such applications and in any legal actions and proceedings concerning the Work Product.

12.3 Supplier hereby irrevocably and forever waives, and agrees never to assert, any Moral Rights in or to the Work Product which Supplier may now have or which may accrue to Supplier's benefit under U.S. or foreign copyright or other laws and any and all other residual rights and benefits which arise under any other applicable law now in force or hereafter enacted. Supplier acknowledges the receipt of equitable compensation for its assignment and waiver of such Moral Rights.

12.4 All documents, information and materials forwarded to Supplier by Customer for use in and preparation of the Work Product shall be deemed the confidential information of Customer, subject to the license granted by Customer to Supplier hereunder. Supplier shall not otherwise use, disclose, or permit any third party to use or obtain the Work Product, or any portion thereof, in any manner without the prior written approval of Customer.

12.5 These provisions are intended to protect Customer's proprietary rights pertaining to the Work Product and the Intellectual Property Rights therein and any misuse of such rights would cause substantial and irreparable harm to Customer's business. Therefore, Supplier acknowledges and stipulates that a court of competent jurisdiction may immediately enjoin a material breach of the Supplier's obligations with respect to confidentiality provisions of the Contract and the Work Product and a Customer's Intellectual Property Rights, upon a request by Customer, without requiring proof of irreparable injury, as same is presumed.

12.6 Upon the request of Customer, but in any event upon termination or expiration of this Contract or a statement of work, Supplier shall surrender to Customer all documents and things pertaining to the Work Product, generated or developed by Supplier or furnished by Customer to Supplier, including all materials embodying the Work Product, any Customer confidential information and Intellectual Property Rights in such Work Product, regardless of whether complete or incomplete. This section is intended to apply to all Work Product as well as to all documents and things furnished to Supplier by Customer or by anyone else that pertains to the Work Product.

12.7 Customer hereby grants to Supplier a non-transferable, non-exclusive, royalty-free, fully paid license to use any Work Product solely as necessary to provide services to Customer. Except as provided in this section, neither Supplier nor any subcontractor shall have the right to use the Work Product in connection with the provision of services to its other customers without the prior written consent of Customer, which consent may be withheld in Customer's sole discretion.

12.8 To the extent that any Third Party Intellectual Property is embodied or reflected in the Work Product or is necessary to provide services, Supplier shall obtain from the applicable third party for the Customer's benefit, an irrevocable, perpetual, non-exclusive, worldwide, royalty-free license, solely for Customer's internal business purposes; likewise, with respect to any Supplier Intellectual Property embodied or reflected in the Work Product or

necessary to provide services, Supplier grants to Customer an irrevocable, perpetual, non-exclusive, worldwide, royalty-free license, solely for the Customer's internal business purposes. Each such license shall allow the applicable Customer to (i) use, copy, modify, display, perform (by any means), transmit and prepare derivative works of any Third Party Intellectual Property or Supplier Intellectual Property embodied in or delivered to Customer in conjunction with the Work Product and (ii) authorize others to do any or all of the foregoing. Supplier agrees to notify Customer on delivery of the Work Product or services if such materials include any Third Party Intellectual Property. The foregoing license includes the right to sublicense third parties, solely for the purpose of engaging such third parties to assist or carry out Customer's internal business use of the Work Product. Except for the preceding license, all rights in Supplier Intellectual Property remain in Supplier. On request, Supplier shall provide Customer with documentation indicating a third party's written approval for Supplier to use any Third Party Intellectual Property that may be embodied or reflected in the Work Product.

12.9 Supplier agrees that it shall have written agreement(s) that are consistent with the provisions hereof related to Work Product and Intellectual Property Rights with any employees, agents, consultants, contractors or subcontractors providing services or Work Product pursuant to the Contract, prior to the provision of such services or Work Product and that it shall maintain such written agreements at all times during performance of this Contract which are sufficient to support all performance and grants of rights by Supplier. Copies of such agreements shall be provided to the Customer promptly upon request.

12.10 To the extent not inconsistent with Customer's rights in the Work Product or other provisions, nothing in this Contract shall preclude Supplier from developing for itself, or for others, materials which are competitive with those produced as a result of the services provided under the Contract, provided that no Work Product is utilized, and no Intellectual Property Rights of Customer therein are infringed by such competitive materials. To the extent that Supplier wishes to use the Work Product or acquire licensed rights in certain Intellectual Property Rights of Customer therein in order to offer competitive goods or services to third parties, Supplier and Customer agree to negotiate in good faith regarding an appropriate license and royalty agreement to allow for such.

12.11 If any Acquisition pursuant to the Contract is funded wholly or in part with federal funds, the source code and all associated software and related documentation and materials owned by a Customer may be shared with other publicly funded agencies at the discretion of such Customer without permission from or additional compensation to the Supplier.

13 Hosting Services

13.1 If Supplier or its subcontractor, affiliate or any other person or entity providing products or services under the Contract Hosts Customer Data in connection with an Acquisition, the provisions of Appendix 1, attached hereto and incorporated herein, apply to such Acquisition.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

13.2 If the Hosting of Customer Data by Supplier or its subcontractor, affiliate or any other person or entity providing products or services under the Contract contributes to or directly causes a Data Breach, Supplier shall be responsible for the obligations set forth in Appendix 1 related to breach reporting requirements and associated costs. Likewise if such Hosting contributes to or directly causes a Security Incident, Supplier shall be responsible for the obligations set forth in Appendix 1, as applicable.

14 Change Management

When a scheduled change is made to products or services provided to a Customer that impacts the Customer's system related to such product or service, Supplier shall provide two (2) weeks' prior written notice of such change. When the change is an emergency change, Supplier shall provide twenty-four (24) hours' prior written notice of the change. Repeated failure to provide such notice may be an evaluation factor (as indicative of Supplier's past performance) upon renewal or if future bids submitted by Supplier are evaluated by the State.

15 Service Level Deficiency

In addition to other terms of the Contract, in instances of the Supplier's repeated failure to provide an acceptable level of service or meet service level agreement metrics, service credits shall be provided by Supplier and may be used as an offset to payment due.

16 Notices

In addition to notice requirements under the terms of the Contract otherwise, the following individuals shall also be provided the request, approval or notice, as applicable:

Chief Information Officer
3115 N. Lincoln Blvd
Oklahoma City, OK 73105

With a copy, which shall not constitute notice, to:
Information Services Deputy Counsel
3115 North Lincoln Boulevard
Oklahoma City, Oklahoma 73105

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Appendix 1 to State of Oklahoma Information Technology Terms

The parties agree to the following provisions in connection with any Customer Data accessed, processed or stored by or on behalf of the Supplier and the obligations, representations and warranties set forth below shall continue as long as the Supplier has an obligation under the Contract

A. Customer Data

1. Customer will be responsible for the accuracy and completeness of all Customer Data provided to Supplier by Customer. Customer shall retain exclusive ownership of all Customer Data. Non-Public Data and Personal Data shall be deemed to be Customer's confidential information. Supplier shall restrict access to Customer Data to their employees with a need to know (and advise such employees of the confidentiality and non-disclosure obligations assumed herein).

2. Supplier shall promptly notify the Customer upon receipt of any requests from unauthorized third parties which in any way might reasonably require access to Customer Data or Customer's use of the Hosted environment. Supplier shall notify the Customer by the fastest means available and also in writing pursuant to Contract notice provisions and the notice provision herein. Except to the extent required by law, Supplier shall not respond to subpoenas, service or process, Freedom of Information Act or other open records requests, and other legal request related to Customer without first notifying the Customer and obtaining the Customer's prior approval, which shall not be unreasonably withheld, of Supplier's proposed responses. Supplier agrees to provide its completed responses to the Customer with adequate time for Customer review, revision and approval.

3. Supplier will use commercially reasonable efforts to prevent the loss of or damage to Customer Data in its possession and will maintain commercially reasonable back-up procedures and copies to facilitate the reconstruction of any Customer Data that may be lost or damaged by Supplier. Supplier will promptly notify Customer of any loss, damage to, or unauthorized access of Customer Data. Supplier will use commercially reasonable efforts to reconstruct any Customer Data that has been lost or damaged by Supplier as a result of its negligence or willful misconduct. If Customer Data is lost or damaged for reasons other than as a result of Supplier's negligence or willful misconduct, Supplier, at the Customer's expense, will, at the request of the State, use commercially reasonable efforts to reconstruct any Customer Data lost or damaged.

B. Data Security

1. Supplier will use commercially reasonable efforts, consistent with industry standards, to provide security for the Hosted environment and Customer Data and to protect against both unauthorized access to the Hosting environment, and unauthorized communications between the Hosting environment and the Customer's browser. Supplier shall implement and maintain appropriate administrative, technical and organizational security measures to safeguard against unauthorized access, disclosure or theft of Personal Data and Non-Public

Data. Such security measures shall be in accordance with recognized industry practice and not less stringent than the measures the service provider applies to its own personal data and non-public data of similar kind.

2. All Personal Data and Non-public Data shall be encrypted at rest and in transit with controlled access. Unless otherwise stipulated, the service provider is responsible for encryption of Personal Data.

3. Supplier represents and warrants to the Customer that the Hosting equipment and environment will be routinely checked with a commercially available, industry standard software application with up-to-date virus definitions. Supplier will regularly update the virus definitions to ensure that the definitions are as up-to-date as is commercially reasonable. Supplier will promptly purge all viruses discovered during virus checks. If there is a reasonable basis to believe that a virus may have been transmitted to Customer by Supplier, Supplier will promptly notify Customer of such possibility in a writing that states the nature of the virus, the date on which transmission may have occurred, and the means Supplier has used to remediate the virus. Should the virus propagate to Customer's IT infrastructure, Supplier is responsible for costs incurred by Customer for Customer to remediate the virus.

4. Supplier shall provide its services to Customer and its users solely from data centers in the U.S. Storage of Customer Data at rest shall be located solely in data centers in the U.S. Supplier shall not allow its personnel or contractors to store Customer Data on portable devices, including personal computers, except for devices that are used and kept only at its U.S. data centers. Supplier shall permit its personnel and contractors to access Customer Data remotely only as required to fulfill Supplier's obligations under the Contract.

5. Supplier shall allow the Customer to audit conformance to the Contract terms. The Customer may perform this audit or contract with a third party at its discretion and at Customer's expense.

6. Supplier shall perform an independent audit of its data centers at least annually at its expense and provide a redacted version of the audit report upon request. Supplier may remove its proprietary information from the redacted version. A Service Organization Control (SOC) 2 audit report or approved equivalent sets the minimum level of a third-party audit.

7. Any remedies provided in this Appendix are not exclusive and are in addition to other rights and remedies available under the terms of the Contract, at law or in equity.

C. Security Assessment

1. The State requires any entity or third-party Supplier Hosting Oklahoma Customer Data to submit to a State Certification and Accreditation Review process to assess initial security risk. Supplier submitted to the review and met the State's minimum security standards at time the Contract was executed. Failure to maintain the State's minimum security standards

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

during the term of the contract, including renewals, constitutes a material breach. Upon request, the Supplier shall provide updated data security information in connection with a potential renewal. If information provided in the security risk assessment changes, Supplier shall promptly notify the State and include in such notification the updated information; provided, however, Supplier shall make no change that results in lessened data protection or increased data security risk. Failure to provide the notice required by this section or maintain the level of security required in the Contract constitutes a material breach by Supplier and may result in a whole or partial termination of the Contract.

2. Any Hosting entity change must be approved in writing prior to such change. To the extent Supplier requests a different sub-contractor than the third-party Hosting Supplier already approved by the State, the different sub-contractor is subject to the State's approval. Supplier agrees not to migrate State's data or otherwise utilize the different third-party Hosting Supplier in connection with key business functions that are Supplier's obligations under the contract until the State approves the third-party Hosting Supplier's State Certification and Accreditation Review, which approval shall not be unreasonably withheld or delayed. In the event the third-party Hosting Supplier does not meet the State's requirements under the State Certification and Accreditation Review, Supplier acknowledges and agrees it will not utilize the third-party Supplier in connection with key business functions that are Supplier's obligations under the contract, until such third party meets such requirements.

D. **Security Incident or Data Breach Notification:** Supplier shall inform Customer of any Security Incident or Data Breach.

1. Supplier may need to communicate with outside parties regarding a Security Incident, which may include contacting law enforcement, fielding media inquiries and seeking external expertise as mutually agreed upon, defined by law or contained in the Contract. If a Security Incident involves Customer Data, Supplier will coordinate with Customer prior to any such communication.

2. Supplier shall report a Security Incident to the Customer identified contact set forth herein within five (5) days of discovery of the Security Incident or within a shorter notice period required by applicable law or regulation (i.e. HIPAA requires notice to be provided within 24 hours).

3. Supplier shall:

a. Maintain processes and procedures to identify, respond to and analyze Security Incidents;

b. Make summary information regarding such procedures available to Customer at Customer's request;

c. Mitigate, to the extent practicable, harmful effects of Security Incidents that are known to Supplier; and

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

d. Document all Security Incidents and their outcomes.

4. If Supplier has reasonable belief or actual knowledge of a Data Breach, Supplier shall (1) promptly notify the appropriate Customer identified contact set forth herein within 24 hours or sooner, unless shorter time is required by applicable law, and (2) take commercially reasonable measures to address the Data Breach in a timely manner.

E. Breach Responsibilities: This section only applies when a Data Breach occurs with respect to Personal Data or Non-Public Data within the possession or control of Supplier.

1. Supplier shall (1) cooperate with Customer as reasonably requested by Customer to investigate and resolve the Data Breach, (2) promptly implement necessary remedial measures, if necessary, and (3) document responsive actions taken related to the Data Breach, including any post-incident review of events and actions taken to make changes in business practices in providing the services, if necessary.

2. Unless otherwise stipulated, if a Data Breach is a direct result of Supplier's breach of its obligation to encrypt Personal Data and Non-Public Data or otherwise prevent its release, Supplier shall bear the costs associated with (1) the investigation and resolution of the Data Breach; (2) notifications to individuals, regulators or others required by state law; (3) credit monitoring services required by state or federal law; (4) a website or toll-free numbers and call center for affected individuals required by state law – all not to exceed the agency per record per person cost calculated for data breaches in the United States on the most recent Cost of Data breach Study: Global Analysis published by the Ponemon Institute at the time of the data breach; and (5) complete all corrective actions as reasonably determined by Supplier based on root cause.

3. If a Data Breach is a direct result of Supplier's breach of its obligations to encrypt Personal Data and Non-Public Data or otherwise prevent its release, Supplier shall indemnify and hold harmless the Customer against all penalties assessed to Indemnified Parties by governmental authorities in connection with the Data Breach.

F. Notices

In addition to notice requirements under the terms of the Contract and those set forth above, a request, an approval or a notice in connection with this Appendix provided by Supplier shall be provided to:

Chief Information Security Officer

3115 N. Lincoln Blvd

Oklahoma City, OK 73105

and

servicedesk@omes.ok.gov.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

G. Supplier Representations and Warranties

Supplier represents and warrants the following:

1. The product and services provided in connection with Hosting services do not infringe a third party's patent or copyright or other intellectual property rights.

2. Supplier will protect Customer's Non-Public Data and Personal Data from unauthorized dissemination and use with the same degree of care that each such party uses to protect its own confidential information and, in any event, will use no less than a reasonable degree of care in protecting such confidential information.

3. The execution, delivery and performance of the Contract and any ancillary documents and the consummation of the transactions contemplated by the Contract or any ancillary documents by Supplier will not violate, conflict with, or result in a breach of any provision of, or constitute a default (or an event which, with notice or lapse of time or both, would constitute a default) under, or result in the termination of, any written contract or other instrument between Supplier and any third parties retained or utilized by Supplier to provide goods or services for the benefit of the Customer.

4. Supplier shall not knowingly upload, store, post, e-mail or otherwise transmit, distribute, publish or disseminate to or though the Hosting environment any material that contains software viruses, malware or other surreptitious code designed to interrupt, destroy or limit the functionality of any computer software or hardware or telecommunications equipment or circumvent any "copy-protected" devices, or any other harmful or disruptive program.

H. Indemnity

Supplier agrees to defend, indemnify and hold the State, its officers, directors, employees, and agents harmless from all liabilities, claims, damages, losses, costs, expenses, demands, suits and actions (including without limitation reasonable attorneys' fees and costs required to establish the right to indemnification), excluding damages that are the sole fault of Customer, arising from or in connection with Supplier's breach of its express representations and warranties in these Information Technology Terms and the Contract. If a third party claims that any portion of the products or services provided by Supplier under the terms of another Contract Document or these Information Technology Terms infringes that party's patent or copyright, Supplier shall defend, indemnify and hold harmless the State and Customer against the claim at Supplier's expense and pay all related costs, damages, and attorney's fees incurred by or assessed to, the State and/or Customer. The State and/or Customer shall promptly notify Supplier of any third party claims and to the extent authorized by the Attorney General of the State, allow Supplier to control the defense and any related settlement negotiations. If the Attorney General of the State does not authorize sole control of the defense and settlement negotiations to Supplier, Supplier shall be granted authorization to equally participate in any proceeding related to this section but Supplier shall remain responsible to indemnify Customer and the State for all associated costs, damages and fees incurred by or assessed to the State and/or Customer. Should the software become, or in Supplier's

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

opinion, be likely to become the subject of a claim or an injunction preventing its use as contemplated in connection with Hosting services, Supplier may, at its option (i) procure for the State the right to continue using the software or (ii) replace or modify the software with a like or similar product so that it becomes non-infringing.

I. Termination, Expiration and Suspension of Service

1. During any period of service suspension, Supplier shall not take any action to intentionally disclose, alter or erase any Customer Data.

2. In the event of a termination or expiration of the Contract, the parties further agree:

Supplier shall implement an orderly return of Customer Data in a format specified by the Customer and, as determined by the Customer:

a. return the Customer Data to Customer at no additional cost, at a time agreed to by the parties and the subsequent secure disposal of State Data;

b. transitioned to a different Supplier at a mutually agreed cost and in accordance with a mutually agreed data transition plan and the subsequent secure disposal of State Data or

c. a combination of the two immediately preceding options.

3. Supplier shall not take any action to intentionally erase any Customer Data for a period of:

a. 10 days after the effective date of termination, if the termination is in accordance with the contract period;

b. 30 days after the effective date of termination, if the termination is for convenience; or

c. 60 days after the effective date of termination, if the termination is for cause.

After such period, Supplier shall, unless legally prohibited or otherwise stipulated, delete all Customer Data in its systems or otherwise in its possession or under its control.

4. The State shall be entitled to any post termination or expiration assistance generally made available with respect to the services.

5. Disposal by Supplier of Customer Data in all of its forms, such as disk, CD/DVD, backup tape and paper, when requested by the Customer, shall be performed in a secure manner. Data shall be permanently deleted and shall not be recoverable, according to National Institute of Standards and Technology (NIST)-approved methods. Certificates of destruction shall be provided to Customer within thirty (30) calendar day of its request for disposal of data.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Appendix 2 to State of Oklahoma Information Technology Terms

INTRODUCTION

The use and maintenance of all items of software or equipment offered for purchase herein must be in compliance with the most current version of the U.S. Department of Justice, Federal Bureau of Investigation ("FBI"), Criminal Justice Information Services (CJIS) Division's CJIS Security Policy ("CJIS Security Policy" or "Security Policy" herein).

The Entity or Affiliate acquiring the data or system is hereby ultimately responsible for compliance with the CJIS Security Policy and will be subject to an audit by the State of Oklahoma CJIS Systems Officer ("CSO") and the FBI CJIS Division's Audit Staff.

CJIS SECURITY POLICY REQUIREMENTS GENERALLY

The CJIS Security Policy outlines a number of administrative, procedural, and technical controls agencies must have in place to protect Criminal Justice Information ("CJI"). Our experience is that agencies will generally have many of the administrative and procedural controls in place but will need to implement additional technical safeguards in order to be in complete compliance with the mandate. A Criminal Justice Agency ("CJA") and certain other governmental agencies procuring technology equipment and services that could be used in hosting or connecting or transmitting or receiving CJI data may need to use the check list herein to make sure that the software, equipment, location, security, and persons having the ability to access CJI will meet the CJIS requirements per the then current CJIS Security Policy. A completed Appendix H to said Security Policy will need to be signed by Vendor or a 3rd party if it has access to CJI, such as incident to the maintenance or support of the purchased hardware or software within which resides CJI. **Per Appendix "A" to said Security Policy, "access to CJI is the physical or logical (electronic) ability, right or privilege to view, modify or make use of CJI."**

DIRECTIVE CONCERNING ACCESS TO CRIMINAL JUSTICE INFORMATION AND TO HARDWARE OR SOFTWARE WHICH INTERACTS WITH CJI and CERTIFICATION

The FBI CJIS Division provides state-of-the-art identification and information services to the local, state, tribal, federal, and international criminal justice communities for criminal justice purposes, as well as the noncriminal justice communities for noncriminal justice purposes.

This Directive primarily concerns access to CJI and access to hardware and software in the use, retention, transmission, reception, and hosting of CJI for criminal justice purposes and not for noncriminal justice purposes. In that regard, this Directive is not only applicable to such data, but also to the hardware and software interacting with such data, their location(s), and persons having the ability to access such data. The CJIS data applicable to the Security Policy is the data described as such in said Policy **plus all data transmitted over the Oklahoma Law Enforcement Telecommunications System ("OLETS") which is operated by DPS.**

In order to have access to CJI or to the aforesaid hardware or software, the vendor must be familiar with the FBI CJIS Security Policy, including but not limited to the following portions of said Security Policy:

1. the Definitions and Acronyms in §3 & Appendices "A" & "B";

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

2. the general policies in §4;
3. the Policies in §5;
4. the appropriate forms in Appendices "D", "E", "F" & "H"; and
5. the Supplemental Guidance in Appendices "J" & "K".

This FBI Security Policy is located and may be downloaded at: https://www.fbi.gov/services/cjis/cjis-security-policy-resource-center.

By executing the Contract to which this Directive is attached, the vendor hereby CERTIFIES that the foregoing directive has and will be followed, including but not limited to full compliance with the FBI CJIS Security Policy, as amended and as applicable.

EXHIBIT D

OKLAHOMA STATEWIDE CONTRACT TERMS

1. Statewide Contract Type

1.1 The Contract is a non-mandatory statewide contract for use by State agencies. Additionally, the Contract may be used by any governmental entity specified as a political subdivision of the State pursuant to the Governmental Tort Claims Act including any associated institution, instrumentality, board, commission, committee, department or other entity designated to act on behalf of the political subdivision; a state, county or local governmental entity in its state of origin; and entities authorized to utilize contracts by the State via a multistate or multigovernmental contract.

1.2 The Contract is a firm, fixed price contract for indefinite delivery and quantity for the Acquisitions available under the Contract.

2. Orders and Addendums

2.1 Unless mutually agreed in writing otherwise, orders shall be placed directly with the Supplier by issuance of written purchase orders or by Purchase Card by state agencies and other authorized entities. All orders are subject to the Contract terms and any order dated prior to Contract expiration shall be performed. Delivery to multiple destinations may be required.

2.2 Any ordering document shall be effective between Supplier and the Customer only and shall not be an Addendum to the Contract in its entirety or apply to any Acquisition by another Customer.

2.3 Additional terms added to a Contract Document by a Customer shall be effective if the additional terms do not conflict with the General Terms and are acceptable to Supplier. However, an Addendum to the Contract shall be signed by the State Purchasing Director or designee. Regarding information technology and telecommunications contracts, pursuant to 62 O.S., §34.11.1, the Chief Information Officer acts as the Information Technology and Telecommunications Purchasing Director.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

3. Termination for Funding Insufficiency

In addition to Contract terms relating to termination due to insufficient funding, a Customer may terminate any purchase order or other payment mechanism if funds sufficient to pay obligations under the Contract are not appropriated or received from an intended third-party funding source. The determination by the Customer of insufficient funding shall be accepted by, and shall be final and binding on, the Supplier.

4. Termination for Cause

In addition to Contract terms relating to termination for cause, a customer may terminate its obligations, in whole or in part, to Supplier if it has provided Supplier with written notice of material breach and Supplier fails to cure such material breach within thirty (30) days of receipt of written notice. The Customer may also terminate a purchase order or other payment mechanism or Supplier's activities under the Contract immediately without a thirty (30) day written notice to Supplier, if Supplier fails to comply with confidentiality, privacy, security, environmental or safety requirements if such non-compliance relates or may relate to Supplier provision of products or services to the Customer or if Supplier's material breach is reasonably determined (i) to be an impediment to the function of the Customer and detrimental to the Customer, or (ii) when conditions preclude the thirty (30) day notice.

5. Termination for Convenience

In addition to any termination for convenience provisions in the Contract, a Customer may terminate a purchase order or other payment mechanism for convenience if it is determined that termination is in the Customer's best interest. Supplier will be provided at least thirty (30) days' written notice of termination.

6. Contract Management Fee and Usage Report

6.1 Pursuant to 74 O.S. § 85.33A, the State assesses a contract management fee on all transactions under a statewide contract. The payment of such fee will be calculated for all transactions, net of returns and the Supplier has no right of setoff against such fee regardless of the payment status of any Customer or any aggregate accounts receivable percentage. Supplier acknowledges and agrees that all prices quoted under any statewide contract shall include the contract management fee and the contract

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

management fee shall not be reflected as a separate line item in Supplier's billing. The State reserves the right to change this fee upward or downward upon sixty (60) calendar days' written notice to Supplier without further requirement for an Addendum.

6.2 While Supplier is the awardee of a statewide contract, transactions that occur under the terms of the statewide contract are subject to a one percent (1%) contract management fee to be paid by Supplier. Supplier shall submit a Contract Usage Report on a quarterly basis for each contract using a form provided by the State and such report shall include applicable information for each transaction. Reports shall include usage of the statewide contract by every Customer during the applicable quarter. A singular report provided late will not be considered a breach of the statewide contract; provided, however, repeated failure to submit accurate quarterly usage reports and submit timely payments may result in suspension or termination, in whole or in part, of the Contract.

6.3 All Contract Usage Reports shall meet the following criteria:

i. Electronic submission in Microsoft Excel format to **strategic.sourcing@omes.ok.gov**;

ii. Quarterly submission regardless of whether there were transactions under the Contract during the applicable quarterly reporting period;

iii. Submission no later than forty-five (45) days following the end of each calendar quarter;

iv. Contract quarterly reporting periods shall be as follows:

a. January 01 through March 31;

b. April 01 through June 30;

c. July 01 through September 30; and

d. October 01 through December 31.

v. Reports must include the following information:

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

a. Procuring entity;
b. Order date;
c. Purchase Order number or note that the transaction was paid by Purchase Card;
d. City in which products or services were received or specific office or subdivision title;
e. Product manufacturer or type of service;
f. Manufacturer item number, if applicable;
g. Product description;
h. General product category, if applicable;
i. Quantity;
j. Unit list price or MSRP, as applicable;
k. Unit price charged to the purchasing entity; and
l. Other Contract usage information requested by the State.

6.4 Payment of the contract management fee shall be delivered to the following address within forty-five (45) calendar days after the end of each quarterly reporting period:

State of Oklahoma
Office of Management and Enterprise Services, Central Purchasing
2401 North Lincoln Boulevard, Suite 116
Oklahoma City, Oklahoma 73105

To ensure payment is properly accounted for, Supplier shall provide the following information with payment: (i) reference to the applicable Contract Usage Report and quarterly reporting period and (ii) the applicable statewide contract number(s) and the amount of the contract management fee being paid for each contract number.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Negotiated Exceptions and Additional Terms
STATE OF OKLAHOMA CONTRACT WITH AXON ENTERPRISE, INC.

RESULTING FROM SOLICITATION NO. OK-MA-145-21

Negotiated Exceptions and Additional Terms to the Solicitation

The Solicitation is hereby amended to include the terms as set forth below and supersedes all prior terms submitted by **Axon Enterprise, Inc.** discussed by the parties, or the terms in the exhibits or attachments in the NASPO ValuePoint Master Agreement.

Requested Exceptions and Additional Terms not addressed below are declined by the State of Oklahoma.

Term & Section	Language
Exhibit A, NASPO ValuePoint Master Agreement Terms and Conditions, Definitions, Participating Addendum, Section 2.1	**This section is deleted in its entirety and replaced with the following:** **Initial Term.** The initial term of this Master Agreement ~~is for two~~ shall begin on the date of award and run through June 30, 2025. The term of this Master Agreement may be amended beyond the initial term for three (3) additional years at the Lead State's discretion and by mutual agreement and upon review of requirements of Participating Entities, current market conditions, and Contractor performance.
Attachment A, NASPO ValuePoint Master Agreement Terms and Conditions ('Terms and Conditions'), Order of Precedence (Section 3.1, pg 3)	**This subsection shall be deleted in its entirety**
Attachment A, Terms and Conditions, Most Favored Customer (Section 5.4.5, pg 7)	**This subsection is deleted in its entirety and replaced with the following provision:** **5.4.5** Contractor shall, within a reasonable period of time of their effective date, notify the Lead State and NASPO ValuePoint of any contractual most-favored-customer provisions in third party contracts or agreement that may affect the promotion of this Master Agreement or whose terms provide for adjustments to future rates or pricing based on rates, pricing in, or Orders from this Master Agreement. Upon request of the Lead State or NASPO ValuePoint, Contractor shall provide a copy of any such provisions.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Attachment A, Terms and Conditions, Pricing (Section 6.1.1 through 6.1.3, pg 8)	**This subsection is deleted in its entirety and replaced with the following provision:** **6.1.1** All prices and rates must be guaranteed for the initial term of the Master Agreement. **6.1.2** Following the initial term of the Master Agreement~~,~~ any request for a price or rate adjustment must be for an equal guarantee period and must be made at least 30 days prior to the effective date. **6.1.3** Requests for a price or rate adjustment must include sufficient documentation supporting the request. Any adjustment or amendment to the Master Agreement will not be effective unless approved in writing by the Lead State
Attachment A, Terms and Conditions, Payment (Section 6.2, pg 9)	**This subsection is deleted in its entirety and replaced with the following provision:** **6.2 Payment.** Unless otherwise agreed upon in a Participating Addendum or Order, Payment after Acceptance will be made within thirty (30) days following the date the goods are delivered or the date a correct invoice is received, whichever is later. After 45 days the Contractor may assess overdue account charges up to a maximum rate of one percent per month on the outstanding balance, unless a different late payment amount is specified in a Participating Addendum or Order, or otherwise prescribed by applicable law. Payments will be remitted in the manner specified in the Participating Addendum or Order. Payments may be made via a purchasing card with no additional charge.
Attachment A, Terms and Conditions, Shipping Terms (Section 8.1.1, pg 11)	**This subsection is deleted in its entirety and replaced with the following provision:** Notwithstanding the above, responsibility and liability for loss or damage will remain the Contractor's until delivery to the Purchasing Entity when responsibility will pass to the Purchasing Entity except as to latent defects, fraud, and Contractor's warranty obligations.
Attachment A, Terms and Conditions, Inspection (Section 9.3.2, pg 12)	**This subsection shall be deleted in its entirety**
Attachment A, Terms and Conditions, Acceptance Testing	**This subsection is deleted in its entirety and replaced with the following provision:** **9.5.1** The Acceptance Testing period will be fifteen (15) calendar days, unless otherwise specified starting from the day after the Product is delivered or, if installed by Contractor, the day after

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

(Section 9.5.1 through 9.5.5, pg 12)	the Product is installed and Contractor certifies that the Product is ready for Acceptance Testing. **9.5.2** If the Product does not conform to specifications during the initial period of Acceptance Testing, Purchasing Entity may, at its discretion, reject the Product. **9.5.3** Upon rejection, the Contractor will have fifteen (15) calendar days to cure. If after the cure period, the Product still has not met the standard of performance or specifications, the Purchasing Entity may, at its option: (a) declare Contractor to be in breach and terminate the Order; (b) demand replacement Product from Contractor at no additional cost to Purchasing Entity; or, (c) continue the cure period for an additional time period agreed upon by the Purchasing Entity and the Contractor. **9.5.4** Contractor shall pay all costs related to the preparation and shipping of Product returned pursuant to the section. **9.5.5** Products which are not rejected within the timeframe specified herein shall be deemed Accepted for all purpose under the Agreement. Products which are found to be non-conforming after this timeframe shall be handled in accordance with the Contractor's warranty procedure.
Attachment A, Terms and Conditions, Warranty (Section 10.2, pg 13)	**This subsection is deleted in its entirety and replaced with the following provision:** **10.2 Warranty.** The Contractor warrants for a period of one year upon arrival of the product at the point of delivery (a) the Product performs according to all specific claims that the Contractor made in its response to the solicitation, (b) the Product is suitable for the ordinary purposes for which such Product is used, (c) the Product is suitable for any special purposes identified in the solicitation, (d) the Product is designed and manufactured in a commercially reasonable manner, and (e) the Product is free of defects in workmanship and materials.
Attachment A, Terms and Conditions, Warranty (Section 10.5, pg 13)	**This subsection is deleted in its entirety and replaced with the following provision:** **10.5 Warranty Period Start Date.** The warranty period will begin upon arrival of the product at the point of delivery.
Attachment A, Terms and	**This subsection is deleted in its entirety and replaced with the following provision:**

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Conditions, Conveyance of Title (Section 11.1, pg 14)	**11.1 Conveyance of Title.** Upon delivery to the Purchasing Entity, Contractor shall convey to Purchasing Entity title to the Product free and clear of all liens, encumbrances, or other security interests.
Attachment A, Terms and Conditions, General Indemnification (Section 12.1, pg 14)	**This subsection is deleted in its entirety and replaced with the following provision:** **12.1 General Indemnification.** The Contractor shall defend, indemnify and hold harmless NASPO, NASPO ValuePoint, the Lead State, Participating Entities, and Purchasing Entities, along with their officers and employees (the "Indemnified Parties"), from and against third-party claims, damages or causes of action including reasonable attorneys' fees and related costs for any death, injury, or damage to tangible property arising from any negligent act, error, or omission of the Contractor, its employees or subcontractors or volunteers, at any tier, relating to performance under this Master Agreement, except to the extent such claim arises out of the gross negligence or willful misconduct of an Indemnified Party.
Attachment A, Terms and Conditions, Intellectual Property Indemnification (Section 13.4, pg 16)	**This subsection is deleted in its entirety and replaced with the following provision:** **13.4 Notice of Cancellation.** Contractor shall pay premiums on all insurance policies. Contractor shall provide notice to a Participating Entity who is a state within thirty (30) days after Contractor is first aware of expiration, cancellation or nonrenewal of such policy or is first aware that cancellation is threatened or expiration, nonrenewal or expiration otherwise may occur which would result in reduction of coverage below limits specified herein.
Attachment A, Terms and Conditions, Records Administration and Audit (Section 14.1.1, pg 17)	**This subsection is deleted in its entirety and replaced with the following provision:** **14.1.1** The Contractor shall maintain books, records, documents, and other evidence pertaining to this Master Agreement and Orders placed by Purchasing Entities under it which shall reflect performance and administration of payments and fees; such records shall be those which Contractor maintains in its ordinary course of business. Contractor shall permit the Lead State, a Participating Entity, a Purchasing Entity, the federal government (including its grant awarding entities and the U.S. Comptroller General), and any other duly authorized agent of a governmental agency, to audit, inspect, examine, copy and/or transcribe Contractor's books, documents, papers and records directly pertinent to this Master Agreement or orders placed by a Purchasing Entity under it for the

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	purpose of making audits, examinations, excerpts, and transcriptions. This right will survive for a period of three (3) years following termination of this Agreement or final payment for any order placed by a Purchasing Entity against this Master Agreement, whichever is later, or such longer period as is required by the Purchasing Entity's state statutes, to assure compliance with the terms hereof or to evaluate performance hereunder. Such audit shall occur only once in any twelve month period at a time and place mutually agreed between the parties during normal business hours.
Attachment A, Terms and Conditions, Confidentiality, Non-Disclosure, and Injunctive Relief (Section 14.2.2.3, pg 17)	**This subsection is deleted in its entirety and replaced with the following provision:** **14.2.2.3** Except as directed by Purchasing Entity, Contractor will not at any time during or after the term of this Master Agreement disclose, directly or indirectly, any Confidential Information to any person, except in accordance with this Master Agreement, and that upon termination of this Master Agreement or at Purchasing Entity's request, Contractor shall turn over to Purchasing Entity all documents, papers, and other matter in Contractor's possession that embody Confidential Information.
Attachment A, Terms and Conditions, Records Administration and Audit (Section 14.3.1, pg 20)	**This subsection is deleted in its entirety and replaced with the following provision:** **14.3.1** Contractor shall not assign, sell, transfer, subcontract or sublet rights, or delegate responsibilities under this Master Agreement, in whole or in part, without the written approval of the Lead State. Such approval shall not be unreasonably withheld. For the avoidance of doubt, the Lead State retains the right to terminate or cancel the Contract if this section is violated by Contractor.
Attachment A, Terms and Conditions, Cancellation (Section 14.6, pg 20)	**This subsection is deleted in its entirety and replaced with the following provision:** **14.6 Cancellation.** Unless otherwise set forth herein, this Master Agreement may be canceled by either party upon sixty (60) days' written notice prior to the effective date of the cancellation. Further, any Participating Entity may cancel its participation upon thirty (30) days' written notice, unless otherwise limited or stated in the Participating Addendum. Cancellation may be in whole or in part. Any cancellation under this provision will not affect the rights and obligations attending Orders outstanding at the time of cancellation, including any right of a Purchasing Entity to indemnification by the Contractor, rights of payment for Products delivered and accepted, including for Products delivered on a delayed payment schedule, rights attending any warranty or default in performance in association with any Order, and requirements for records administration and

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	audit. Cancellation of the Master Agreement due to Contractor default may be immediate
Attachment A, Terms and Conditions, Default and Remedies (Section 14.8.2, pg 21)	**This subsection is deleted in its entirety and replaced with the following provision:** **14.8.2** Upon the occurrence of an event of default, the Lead State shall issue a written notice of default, identifying the nature of the default, and providing a period of thirty (30) calendar days in which Contractor shall have an opportunity to cure the default. The Lead State shall not be required to provide advance written notice or a cure period and may immediately terminate this Master Agreement in whole or in part if the Lead State, in its sole discretion, determines that it is reasonably necessary to preserve public safety or prevent immediate public crisis. Time allowed for cure will not diminish or eliminate Contractor's liability for damages, including liquidated damages to the extent provided for under this Master Agreement.
Attachment A, Terms and Conditions, Limitation of Liability, new Subsection 14.14	**Subsection 14.14 is added to the Contract as follows:** A. To the extent permitted by law, Contractor's cumulative liability to NASPO ValuePoint, Lead State, Participating Entity and any Purchasing Entity for any loss or damage resulting from any claim, demand, or action under this Agreement shall be limited, as applied to each party individually, to the greater of (a) the amount paid by Purchasing Entity to Contractor in the twelve months preceding the claim; or (b) one million dollars ($1,000,000.00) however caused, whether for breach of warranty or contract, negligence, strict liability, tort or any other legal theory. The foregoing limitation of liability shall not apply to claims that are subject to this Master Agreement's general indemnification and intellectual property indemnification obligations. B. Notwithstanding anything to the contrary in the Agreement, no provision shall limit Contractor's liability for actual direct damages, expenses, costs, actions, claims, and liabilities arising from or related the bad faith, gross negligence, intentional misconduct or other acts for which applicable law does not allow exemption from liability of Contractor or its employees, agents or subcontractors. To the extent permitted by law, Supplier's liability to NASPO ValuePoint, Lead State, Participating Entity Purchasing Entity for damages, expenses, costs, actions, claims, and liabilities arising from or related to property damage, bodily injury or death, indemnity, security or confidentiality obligations

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	under the Contract shall be subject to a limitation of liability of ten million dollars ($10,000,000.00) but only as applied to each party individually. C. In connection with Contractor's performance under the Agreement, Contractor may have access to NASPO ValuePoint, Lead State, Participating Entity and Purchasing Entity's personnel, premises, data, records, equipment and other property. Contractor shall use commercially reasonable efforts to preserve the safety and security of such personnel, premises, data, records, equipment, and other property of NASPO ValuePoint, Lead State, Participating Entity and Purchasing Entity. . Contractor shall be responsible for damage to such intangible, real or personal property to the extent such damage is caused by its employees' or subcontractors' breach of this Agreement, and shall be responsible for loss of NASPO ValuePoint, Lead State, Participating Entity and Purchasing Entity real or tangible personal property in its possession, regardless of cause, but in no case will Supplier's liability exceed ten million dollars ($10,000,000.00) as applied to each party individually. If Contractor fails to comply with NASPO ValuePoint's, Lead State's, Participating Entity's or Purchasing Entity's security requirements, Contractor is subject to immediate suspension of work as well as termination of the associated purchase order or other payment mechanism.
Exhibit B, State of Oklahoma General Terms ('General Terms') Order of Precedence (Section 2.2, pg 2 of 29)	**This subsection shall be deleted in its entirety.**
Exhibit B, General Terms, Ordering, Inspection, and Acceptance (Section 6.2-6.4, pg 7 of 29)	**This subsection is deleted in its entirety and replaced with the following provision:** **6.2** Services will be performed in accordance with industry best practices and are subject to acceptance by the Customer. Notwithstanding any other provision in the Contract, deemed acceptance of a service or associated deliverable shall not apply automatically upon receipt of a deliverable or upon provision of a service. Supplier warrants and represents that a product or deliverable furnished by or through the Supplier shall individually, and where specified by Supplier to perform as a system, be substantially uninterrupted and error-free in operation and guaranteed against faulty

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	material and workmanship for a warranty period of the greater of ninety (90) days from the date of delivery or the maximum allowed by the manufacturer. A defect in a product or deliverable furnished by or through the Supplier shall be repaired or replaced by Supplier at no additional cost or expense to the Customer if such defect occurs during the warranty period. Any product to be delivered pursuant to the Contract shall be subject to final inspection and acceptance by the Customer at Destination within fifteen (15) days of delivery, or such longer time as may be agreed upon between Customer and Supplier. Title and risk of loss or damage to a product shall be the responsibility of the Supplier until accepted. The Supplier shall be responsible for filing, processing, and collecting any and all damage claims accruing prior to acceptance. Pursuant to OAC 260:115-9-1, payment for an Acquisition does not constitute final acceptance of the Acquisition. If subsequent inspection affirms that the Acquisition does not meet or exceed the specifications of the order or that the Acquisition has a latent defect, the Supplier shall be notified as soon as is reasonably practicable. The Supplier shall retrieve and repair or replace the Acquisition at Supplier's expense–or, if unable to replace, shall issue a refund to Customer. Refund under this section shall not be an exclusive remedy. **6.3** Supplier shall deliver products and services on or before the required date specified in a Contract Document. Deviations, substitutions, or changes in a product or service, including changes of personnel directly providing services, shall not be made unless expressly authorized in writing by the Customer. Any substitution of personnel directly providing services shall be a person of comparable or greater skills, education and experience for performing the services as the person being replaced. Additionally, Supplier shall provide staff sufficiently experienced and able to perform with respect to any transitional services provided by Supplier in connection with termination or expiration of the Contract. 6.4 Product warranty and return policies will not be more restrictive than warranty and return policies for other similarly situated customers for a like product.
Exhibit B, General Terms, Audit and Records Clause (Section 10.1, pg 13 of 29)	**This subsection is deleted in its entirety and replaced with the following provision:** 10.1 As used in this clause and pursuant to 67 O.S. §203, "record" includes a document, book, paper, photograph, microfilm, computer tape, disk, record, sound recording, film recording, video record, accounting procedures and practices, and other data, regardless of type

	and regardless of whether such items are in written form, in the form of computer data, or in any other form Supplier agrees any pertinent federal or State agency or governing entity of a Customer shall have the right to examine and audit, at no additional cost to a Customer all records relevant to the performance of and amounts charged under the Contract except, unless otherwise agreed, costs of Supplier that comprise pricing under the Contract. Such audit shall occur only once in the Customer's then current fiscal period and at a reasonable location and time selected by Customer during normal business hours. The Supplier is required to retain records relative to the Contract for the duration of the Contract and for a period of seven (7)years following completion or termination of an Acquisition unless otherwise indicated in the Contract terms. If a claim, audit, litigation or other action involving such records is started before the end of the seven-year period, the records are required to be maintained for two (2) years from the date that all issues arising out of the action are resolved, or until the end of the seven (7) year retention period, whichever is later.
Exhibit B, General Terms, Confidentiality (Section 11.3, pg 14 of 29)	**This subsection is deleted in its entirety and replaced with the following provision:** 11.3 Supplier shall report to the Customer within 48 hours or sooner, unless a shorter time is required by applicable law, any and all unauthorized use, appropriation, sale, assignment, conveyance, provision, release, access, acquisition, disclosure or other dissemination of any State or citizen data or records of which it or its parent company, subsidiaries, affiliates, employees, officers, directors, assignees, agents, representatives, independent contractors, and subcontractors is aware or have knowledge or reasonable should have knowledge. The Supplier shall also promptly furnish to Customer full details of the unauthorized use, appropriation, sale, assignment, conveyance, provision, release, access, acquisition, disclosure or other dissemination, or attempt thereof, and use its best efforts to assist the Customer in investigating or preventing the reoccurrence of such event in the future. The Supplier shall cooperate with the Customer in connection with any litigation and investigation deemed necessary by the Customer to protect any State or citizen data and records and shall bear all reasonable costs associated with the investigation, response and recovery in connection with any breach of State or citizen data or records including but not limited to credit monitoring services with a term of at least three (3) years that are required by applicable law, all notice-related costs and toll free telephone call center services.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Exhibit B, General Terms, Confidentiality (Section 11.6, pg 14 of 29)	**This subsection is deleted in its entirety and replaced with the following provision:** **11.6** The Supplier shall within 3 business days forward to the State Purchasing Director, and any other applicable person listed in the Notices section(s) of the Contract, any request by a third party for data or records in the possession of the Supplier or any subcontractor or to which the Supplier or subcontractor has access and Supplier shall fully cooperate with all efforts to protect the security and confidentiality of such data or records in response to a third party request.
Exhibit B, General Terms, Assignment and Permitted Subcontractors (Section 13.2, 13.3 pg 16 of 29)	**Subsections 13.2 and 13.3 are deleted in their entirety and replaced with the following provisions:** **13.2** Notwithstanding the foregoing, the Contract may be assigned by Supplier to any corporation or other entity in connection with a merger, consolidation, sale of all equity interests of the Supplier, or a sale of all or substantially all of the assets of the Supplier to which the Contract relates. In any such case, said corporation or other entity shall by operation of law or expressly in writing assume all obligations of the Supplier as fully as if it had been originally made a party to the Contract. Supplier shall give the State and all affected Customers prompt written notice of said assignment. Any assignment or delegation in violation of this subsection shall be void. **13.3** If the Supplier is permitted to utilize subcontractors in support of the Contract, the Supplier shall remain solely responsible for its obligations under the terms of the Contract, for its actions and omissions and those of its agents, employees and subcontractors and for payments to such persons or entities. Prior to a subcontractor being utilized by the Supplier, the Supplier shall obtain written approval of the State of such subcontractor and each employee, as applicable to a particular Acquisition, of such subcontractor proposed for use by the Supplier. Such approval is within the sole discretion of the State. Any proposed subcontractor shall be identified by entity name, and by employee name, if required by the particular Acquisition, in the applicable proposal and shall include the nature of the services to be performed. As part of the approval request, the Supplier shall provide written notice to the State that Supplier has a written agreement with the subcontractor to comply, as applicable, with the terms of the Contract Documents. Supplier agrees that providing the written notice,

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	maintaining such an agreement with the subcontractor and obtaining prior written approval by the State of any subcontractor or associated employees shall be a continuing obligation. The State further reserves the right to revoke approval of a subcontractor or an employee thereof in instances of poor performance, misconduct or for other similar reasons.
Exhibit B, General Terms, Limitation of Liability (Section 16.5, pg 20 of 29)	**B. This subsection is deleted in its entirety**
Exhibit B, General Terms, Security of Property and Personnel (Section 24, pg 25 of 29)	**This subsection is deleted in its entirety.**
Exhibit C, State of Oklahoma Information Technology Terms ("IT Terms"), Security Incident (Section 1.9, Page 2)	**Section 9.1 is deleted in its entirety and replaced with the following:** **Security Incident** means the reasonable suspicion of or successful unauthorized access, use, disclosure, modification, or destruction of information or interference with the Hosted environment used to perform the services.
Exhibit C, State of Oklahoma Information Technology Terms ("IT Terms"), Source Code Escrow (Section 1.11, Page 2)	**This subsection is deleted in its entirety and replaced with the following.** **Supplier Intellectual Property** means all tangible or intangible items or things, including the Intellectual Property Rights therein, created or developed by Supplier and identified in writing as such prior to providing any services or Work Product to Customer and prior to receiving any documents, materials, information or funding from or on behalf of a Customer relating to the services or Work Product, including any derivatives thereof developed after the effective date of the Contract.
Exhibit C, State of Oklahoma Information Technology Terms ("IT Terms"), Source	**This subsection is deleted in its entirety and replaced with the following:** **Source Code Escrow** State and Supplier agree that Supplier will not provide Customer

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Code Escrow (Section 9, Page 5)	customized computer software developed or modified exclusively for a state agency or the State under this Contract. Should Supplier and State explicitly agree, in writing, in a separate agreement, to the acquisition of customized computer software developed or modified exclusively, then the following terms will apply: Pursuant to 62 O.S. § 34.31, if customized computer software is developed or modified exclusively for a State agency, the Supplier has a continuing obligation to comply with such law and place the source code for such software and any modifications thereto into escrow with an independent third party escrow agent. Supplier shall pay all fees charged by the escrow agent and enter into an escrow agreement, the terms of which are subject to the prior written approval of the State, including terms that provide the State receives ownership of all escrowed source code upon the occurrence of any of the following: **9.1** A bona fide material default of the obligations of the Supplier under the agreement with the applicable Customer; **9.2** An assignment by the Supplier for the benefit of its creditors; **9.3** A failure by the Supplier to pay, or an admission by the Supplier of its inability to pay, its debts as they mature; **9.4** The filing of a petition in bankruptcy by or against the Supplier when such petition is not dismissed within sixty (60) days of the filing date; **9.5** The appointment of a receiver, liquidator or trustee appointed for any substantial part of the Supplier's property; **9.6** The inability or unwillingness of the Supplier to provide the maintenance and support services in accordance with the agreement with the agency; **9.7** Supplier's ceasing of maintenance and support of the software; or **9.8** Such other condition as may be statutorily imposed

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	by the future amendment or enactment of applicable Oklahoma law.
Exhibit C, IT Terms, Ownership Rights & Intellectual Property Ownership (Sections 11-12, Pages 6-9)	**12 Intellectual Property Ownership** The following terms apply to ownership and rights related to Intellectual Property: **12.1** State and Supplier agree that Supplier will not provide Customer Work Product developed or modified exclusively for a Customer. Supplier and State will address, in a separate written agreement, to the acquisition of Work Product developed or modified exclusively for a Customer. Notwithstanding the foregoing, Customer shall retain Intellectual Property Rights in its own preexisting intellectual property. No license or other right is granted under the Contract to any Third Party Intellectual Property, except as may be incorporated in the Work Product by Supplier. 12.2 To the extent that any Third Party Intellectual Property is embodied or reflected in the Work Product or is necessary to provide services, Supplier shall obtain from the applicable third party for the Customer's benefit, an irrevocable, perpetual, non-exclusive, worldwide, royalty-free license, solely for Customer's internal business purposes; likewise, with respect to any Supplier Intellectual Property embodied or reflected in the Work Product or necessary to provide services, Supplier grants to Customer an irrevocable, perpetual, non- exclusive, worldwide, royalty-free license, solely for the Customer's internal business purposes. Each such license shall allow the applicable Customer to (i) use, copy, modify, display, perform (by any means), transmit and prepare derivative works of any Third Party Intellectual Property or Supplier Intellectual Property embodied in or delivered to Customer in conjunction with the Work Product and (ii) authorize others to do any or all of the foregoing. Supplier agrees to notify Customer on delivery of the Work Product or services if such materials include any Third Party Intellectual Property. The foregoing license includes the right to sublicense third parties, solely for the purpose of engaging such third parties to assist or carry out Customer's internal business use of the Work Product. Except for the preceding license, all rights in Supplier

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	Intellectual Property remain in Supplier. On request, Supplier shall provide Customer with documentation indicating a third party's written approval for Supplier to use any Third Party Intellectual Property that may be embodied or reflected in the Work Product. 12.3 Supplier agrees that it shall have written agreement(s) that are consistent with the provisions hereof related to Work Product and Intellectual Property Rights with any employees, agents, consultants, contractors or subcontractors providing services or Work Product pursuant to the Contract, prior to the provision of such services or Work Product and that it shall maintain such written agreements at all times during performance of this Contract which are sufficient to support all performance and grants of rights by Supplier. 12.4 To the extent not inconsistent with Customer's rights in the Work Product or other provisions, nothing in this Contract shall preclude Supplier from developing for itself, or for others, materials which are competitive with those produced as a result of the services provided under the Contract, provided that no Intellectual Property Rights of Customer therein are infringed by such competitive materials. To the extent that Supplier wishes to use the Work Intellectual Property Rights of Customer therein in order to offer competitive goods or services to third parties, Supplier and Customer agree to negotiate in good faith regarding an appropriate license and royalty agreement to allow for such. 12.5 If any Acquisition pursuant to the Contract is funded wholly or in part with federal funds, the source code and all associated software and related documentation and materials owned by a Customer may be shared with other publicly funded agencies at the discretion of such Customer without permission from or additional compensation to the Supplier.
Exhibit C, IT Terms, Change Management (Section 14, Page 10)	**This subsection is deleted in its entirety and replaced with the following:** When a scheduled change is made to products or services provided to a Customer that impacts the Customer's system related to such

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

	product or service, Supplier shall provide written advance notice of such change as addressed in Axon's Service Offerings Agreement.
Administrative and Technical Response Requirements, Returns Due to User Error. (Section 2.2.11, page 16)	**This subsection is deleted in its entirety and replaced with the following:** Authorized Users may return unopened items ordered in error for up to thirty (30) calendar days from delivery. Authorized Users must identify the product and obtain written agreement from Supplier to return the unopened items. Such agreement shall not be unreasonably withheld. All returns of unopened items should be provided free-of-charge to Authorized User if scheduled at a normal delivery schedule. Otherwise, Authorized Users should be responsible for all costs associated with the preparation and shipment to Suppliers nearest location. No additional charges are allowed, including restocking fees.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Master Services and Purchasing Agreement between Axon and Agency

This Master Services and Purchasing Agreement ("**Agreement**") is between Axon Enterprise, Inc., a Delaware corporation ("**Axon**"), and the agency on the Quote ("**Agency**"). Axon and Agency are each a "**Party**" and collectively "**Parties**". The Master Agreement, including this Agreement, govern Agency's purchase and use of the Axon Devices and Services detailed in the Quote Appendix ("**Quote**"). It is the intent of the Parties that the Master Agreement acts as a master agreement governing all subsequent purchases by Agency for the same Axon products and services in the Quote. The Parties therefore agree as follows:

1 Definitions.

"**Axon Cloud Services**" means Axon's web services for Axon Evidence, Axon Records, Axon Dispatch, and interactions between Evidence.com and Axon Devices or Axon client software. Axon Cloud Service excludes third-party applications, hardware warranties, and my.evidence.com.

"**Axon Device**" means all hardware provided by Axon under this Agreement.

"**Quote**" means an offer to sell and is only valid for devices and services on the quote at the specified prices.. Orders are subject to prior credit approval. Shipping dates are estimates only. Typographical errors may occur in any offer by Axon, and Axon reserves the right to notify Agency of the error and to modify or cancel any orders resulting from such errors.

"**Services**" means all services provided by Axon under this Agreement, including software, Axon Cloud Services, and professional services.

2 Intentionally Omitted

3 Intentionally Omitted.

4 Taxes. Taxes are addressed in the Participating Entity's or the Participating State's Participating Addendum.

5 Intentionally Omitted.

6 Intentionally Omitted.

7 Warranty.

7.1 Hardware Limited Warranty. Axon warrants that Axon-manufactured Devices are free from defects in workmanship and materials for 1 year from the date of Agency's receipt, except Signal Sidearm, which Axon warrants for 30 months from the date of Agency's receipt. Axon warrants its Axon-manufactured accessories for 90-days from the date of Agency's receipt. Used conducted energy weapon ("**CEW**") cartridges are deemed to have operated properly. Extended warranties run from the expiration of the 1-year hardware warranty through the extended warranty term. Non-Axon manufactured Devices are not covered by Axon's warranty. Agency should contact the manufacturer for support of non-Axon manufactured Devices.

7.2 Claims. If Axon receives a valid warranty claim for an Axon manufactured Device during the warranty term, Axon's will repair or replace the Device with the same or like Device. A replacement Axon Device will be new or like new. Axon will warrant the replacement Axon Device for the longer of (a) the remaining warranty of the original Axon Device or (b) 90-days from the date of repair or replacement.

If Agency exchanges a device or part from Axon, the replacement item becomes Agency's property, and the replaced item becomes Axon's property. Before delivering an Axon Device for service, Agency must upload Axon Device data to Axon Evidence or download it and retain a copy. Axon, to the extent permitted by applicable law, is not responsible for any loss of software, data, or other information contained in storage media or any part of the Axon Device sent to Axon for service.

7.3 **Spare Axon Devices**. For qualified purchases, Axon may provide Agency a predetermined number of spare Axon Devices as detailed in the Quote ("**Spare Axon Devices**"). Spare Axon Devices are intended to replace broken or non-functioning units while Agency submits the broken or non-functioning units, through Axon's warranty return process. Axon will repair or replace the unit with a replacement Axon Device. Title and risk of loss for all Spare Axon Devices shall pass to Agency in accordance with the Master Agreement. Axon assumes no liability or obligation in the event Agency does not utilize Spare Axon Devices for the intended purpose.

7.4 **Limitations**. Axon's warranty excludes damage related to: (a) failure to follow Axon Device use instructions; (b) Axon Devices used with equipment not manufactured or recommended by Axon; (c) abuse, misuse, or intentional damage to Axon Device; (d) Axon Devices repaired or modified by persons other than Axon without Axon's written permission; or (f) Axon Devices with a defaced or removed serial number.

7.4.1 Intentionally Omitted.

7.4.2 Intentionally Omitted

8 **Statement of Work**. Certain Axon Devices and Services, including Axon Interview Room, Axon Channel Services, and Axon Fleet, may require a Statement of Work that details Axon's Service deliverables ("**SOW**"). In the event Axon provides an SOW to Agency, Axon is only responsible to perform Services described in the SOW. Additional services are out of scope. The Parties must document scope changes in a written and signed change order. Changes may require an equitable adjustment in fees or schedule. The SOW is incorporated into this Agreement by reference.

9 **Axon Device Warnings**. See www.axon.com/legal for the most current Axon Device warnings.

10 **Design Changes**. Axon may make design changes to any Axon Device or Service without notifying Agency or making the same change to Axon Devices and Services previously purchased by Agency. Such changes will not reduce functionality of the Axon Device or Service purchased by Agency.

11 **Bundled Offerings**. Some offerings in bundled offerings may not be generally available at the time of Agency's purchase. Axon will not provide a refund, credit, or additional discount beyond what is in the Quote due to a delay of availability or Agency's election not to utilize any portion of an Axon bundle.

12 **Intentionally Omitted**

13 **Intentionally Omitted**

14 **IP Rights**. Axon owns and reserves all right, title, and interest in Axon devices and services and suggestions to Axon, including all related intellectual property rights. Agency will not cause any Axon proprietary rights to be violated.

15 **Intentionally Omitted**

16 **Agency Responsibilities**. Agency is responsible for (a) Agency's use of Axon Devices; (b) breach of this Agreement or violation of applicable law by Agency or an Agency end user; and (c) a dispute between Agency and a third-party over Agency's use of Axon Devices.

17 **Termination**.

17.1 Intentionally Omitted

17.2 Intentionally Omitted

17.3 **Effect of Termination**. Upon termination of this Agreement, Agency rights immediately terminate. Agency remains responsible for all fees incurred before the effective date of termination. If Agency purchases Axon Devices for less than the manufacturer's suggested retail price established in the Master Agreement ("MSRP") and Agency terminates this Agreement before the end of the Term

for a reason other than due to Axon's failure to cure a material breach or default then, Axon will invoice Agency the difference between the MSRP for Axon Devices received, including any Spare Axon Devices, and amounts paid towards those Axon Devices. Agency may request a termination breakdown of the MSRP charges should Agency chose to termination for convenience. Agency may make a request for this information at any time prior to execution or during the Agreement or after termination. Only if terminating for non-appropriation, Agency may return Axon Devices to Axon within 30 days of termination. MSRP is the standalone price of the individual Axon Device at the time of sale as established in the Master Agreement. For bundled Axon Devices, MSRP is the standalone price of all individual components.

18 Intentionally Omitted

19 General.

19.1 Intentionally Omitted

19.2 Intentionally Omitted

19.3 Intentionally Omitted

19.4 Non-Discrimination. Neither Party nor its employees will discriminate against any person based any class protected by applicable law.

19.5 Export Compliance. Each Party will comply with all import and export control laws and regulations.

19.6 Intentionally Omitted

19.7 Intentionally Omitted

19.8 Intentionally Omitted

19.9 Survival. The following sections will survive termination: Payment, Warranty, Axon Device Warnings, Indemnification, IP Rights, and Agency Responsibilities.

19.10 Intentionally Omitted

19.11 Notices. All notices must be in English. Notices posted on Agency's Axon Evidence site are effective upon posting. Notices by email are effective on the sent date of the email. Notices by personal delivery are effective immediately. Contact information for notices:

Axon Cloud Services Terms of Use Appendix

1 **Definitions**.
"Agency Content" is data uploaded into, ingested by, or created in Axon Cloud Services within Agency's tenant, including media or multimedia uploaded into Axon Cloud Services by Agency. Agency Content includes Evidence but excludes Non-Content Data.

"**Evidence**" is media or multimedia uploaded into Axon Evidence as 'evidence' by an Agency. Evidence is a subset of Agency Content.

"**Non-Content Data**" is data, configuration, and usage information about Agency's Axon Cloud Services tenant, Axon Devices and client software, and users that is transmitted or generated when using Axon Devices. Non-Content Data includes data about users captured during account management and customer support activities. Non-Content Data does not include Agency Content.

"**Personal Data**" means any information relating to an identified or identifiable natural person. An identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.

2 **Access**. Upon Axon granting Agency a subscription to Axon Cloud Services, Agency may access and use Axon Cloud Services to store and manage Agency Content. Agency may not exceed more end users than the Quote specifies. Axon Air requires an Axon Evidence subscription for each drone operator. For Axon Evidence Lite, Agency may access and use Axon Evidence only to store and manage TASER CEW and TASER CAM data ("**TASER Data**"). Agency may not upload non-TASER Data to Axon Evidence Lite.

3 **Agency Owns Agency Content**. Agency controls and owns all right, title, and interest in Agency Content. Except as outlined herein, Axon obtains no interest in Agency Content, and Agency Content is not Axon's business records. Agency is solely responsible for uploading, sharing, managing, and deleting Agency Content. Axon will only have access to Agency Content for the limited purposes set forth herein. Agency agrees to allow Axon access to Agency Content to (a) perform troubleshooting, maintenance, or diagnostic screenings; and (b) enforce this Agreement or policies governing use of the Axon products.

4 **Security**. Axon will implement commercially reasonable and appropriate measures to secure Agency Content against accidental or unlawful loss, access or disclosure. Axon will maintain a comprehensive information security program to protect Axon Cloud Services and Agency Content including logical, physical access, vulnerability, risk, and configuration management; incident monitoring and response; encryption of uploaded digital evidence; security education; and data protection. Axon agrees to the Federal Bureau of Investigation Criminal Justice Information Services Security Addendum.

5 **Agency Responsibilities**. Agency is responsible for (a) ensuring Agency owns Agency Content; (b) ensuring no Agency Content or Agency end user's use of Agency Content or Axon Cloud Services violates this Agreement or applicable laws; and (c) maintaining necessary computer equipment and Internet connections for use of Axon Cloud Services. If Agency becomes aware of any violation of this Agreement by an end user, Agency will immediately terminate that end user's access to Axon Cloud Services.

Agency will also maintain the security of end user names and passwords and security and access by end users to Agency Content. Agency is responsible for ensuring the configuration and utilization of Axon Cloud Services meet applicable Agency regulation and standards. Agency may not sell, transfer, or sublicense access to any other entity or person. Agency shall contact Axon immediately

if an unauthorized party may be using Agency's account or Agency Content, or if account information is lost or stolen.

To the extent Agency uses the Axon Cloud Services to interact with YouTube®, such use may be governed by the YouTube Terms of Service, available at https://www.youtube.com/static?template=terms.

6 **Privacy**. Agency's use of Axon Cloud Services is subject to the Axon Cloud Services Privacy Policy attached hereto as Exhibit E Agency agrees to allow Axon access to Non-Content Data from Agency to (a) perform troubleshooting, maintenance, or diagnostic screenings; (b) provide, develop, improve, and support current and future Axon products and related services; and (c) enforce this Agreement or policies governing the use of Axon products.

7 **Axon Body 3 Wi-Fi Positioning**. Axon Body 3 cameras offer a feature to enhance location services where GPS/GNSS signals may not be available, for instance, within buildings or underground. Agency administrators can manage their choice to use this service within the administrative features of Axon Cloud Services. If Agency chooses to use this service, Axon must also enable the usage of the feature for Agency's Axon Cloud Services tenant. Agency will not see this option with Axon Cloud Services unless Axon has enabled Wi-Fi Positioning for Agency's Axon Cloud Services tenant. When Wi-Fi Positioning is enabled by both Axon and Agency, Non-Content and Personal Data will be sent to Skyhook Holdings, Inc. ("**Skyhook"**) to facilitate the Wi-Fi Positioning functionality. Data controlled by Skyhook is outside the scope of the Axon Cloud Services Privacy Policy and is subject to the Skyhook Services Privacy Policy.

8 **Storage**. For Axon Unlimited Device Storage subscriptions, Agency may store unlimited data in Agency's Axon Evidence account only if data originates from Axon Capture or the applicable Axon Device. Axon may charge Agency additional fees for exceeding purchased storage amounts. Axon may place Agency Content that Agency has not viewed or accessed for 6 months into archival storage. Agency Content in archival storage will not have immediate availability and may take up to 24 hours to access.

9 **Location of Storage**. Axon may transfer Agency Content to third-party subcontractors for storage. Axon will determine the locations of data centers for storage of Agency Content. For United States agencies, Axon will ensure all Agency Content stored in Axon Cloud Services remains within the United States. Ownership of Agency Content remains with Agency.

10 **Suspension**. Axon may temporarily suspend Agency's or any end user's right to access or use any portion or all of Axon Cloud Services immediately upon notice, if Agency or end user's use of or registration for Axon Cloud Services may (a) pose a security risk to Axon Cloud Services or any third-party; (b) adversely impact Axon Cloud Services , the systems, or content of any other customer; (c) subject Axon, or Axon's affiliates; or (d) be fraudulent.

Agency remains responsible for all fees incurred through suspension but Axon will continue to provide services including security of Agency Content. Axon will not delete Agency Content because of suspension, except as specified in this Agreement.

11 **Axon Cloud Services Warranty**. Axon disclaims any warranties or responsibility for data corruption or errors that occur before Agency uploads data to Axon Cloud Services.

12 **Axon Records**. Axon Records is the software-as-a-service product that is generally available at the time Agency purchases an OSP 7 bundle. During Agency's Axon Records Subscription Term, Agency will be entitled to receive Axon's Update and Upgrade releases on an if-and-when available basis.

The Axon Records Subscription Term will end upon the completion of the Axon Records

Subscription as documented in the Quote, or if purchased as part of an OSP 7 bundle, upon competition of the OSP 7 Term ("**Axon Records Subscription**")

An "**Update**" is a generally available release of Axon Records that Axon makes available from time to time. An "**Upgrade**" includes (i) new versions of Axon Records that enhance features and functionality, as solely determined by Axon; and/or (ii) new versions of Axon Records that provide additional features or perform additional functions. Upgrades exclude new products that Axon introduces and markets as distinct products or applications.

New or additional Axon products and applications, as well as any Axon professional services needed to configure Axon Records, are not included. If Agency purchases Axon Records as part of a bundled offering, the Axon Record subscription begins on the later of the (1) start date of that bundled offering, or (2) date Axon provisions Axon Records to Agency.

13 **Axon Cloud Services Restrictions**. Agency and Agency end users (including employees, contractors, agents, officers, volunteers, and directors), may not, or may not attempt to:

13.1 copy, modify, tamper with, repair, or create derivative works of any part of Axon Cloud Services;

13.2 reverse engineer, disassemble, or decompile Axon Cloud Services or apply any process to derive any source code included in Axon Cloud Services, or allow others to do the same;

13.3 access or use Axon Cloud Services with the intent to gain unauthorized access, avoid incurring fees or exceeding usage limits or quotas;

13.4 use trade secret information contained in Axon Cloud Services, except as expressly permitted in this Agreement;

13.5 access Axon Cloud Services to build a competitive device or service or copy any features, functions, or graphics of Axon Cloud Services;

13.6 remove, alter, or obscure any confidentiality or proprietary rights notices (including copyright and trademark notices) of Axon's or Axon's licensors on or within Axon Cloud Services; or

13.7 use Axon Cloud Services to store or transmit infringing, libelous, or other unlawful or tortious material; to store or transmit material in violation of third-party privacy rights; or to store or transmit malicious code.

14 **After Termination**. Axon will not delete Agency Content for 90-days following termination. There will be no functionality of Axon Cloud Services during these 90-days other than the ability to retrieve Agency Content. Agency will not incur additional fees if Agency downloads Agency Content from Axon Cloud Services during this time. Axon has no obligation to maintain or provide Agency Content after these 90-days and will thereafter, unless legally prohibited, delete all Agency Content. Upon request, Axon will provide written proof that Axon successfully deleted and fully removed all Agency Content from Axon Cloud Services.

15 **Post-Termination Assistance**. Axon will provide Agency with the same post-termination data retrieval assistance that Axon generally makes available to all customers. Requests for Axon to provide additional assistance in downloading or transferring Agency Content, including requests for Axon's data egress service, will result in additional fees and Axon will not warrant or guarantee data integrity or readability in the external system.

16 **U.S. Government Rights**. If Agency is a U.S. Federal department or using Axon Cloud Services on behalf of a U.S. Federal department, Axon Cloud Services is provided as a "commercial item," "commercial computer software," "commercial computer software documentation," and "technical data", as defined in the Federal Acquisition Regulation and Defense Federal Acquisition Regulation Supplement. If Agency is using Axon Cloud Services on behalf of the U.S. Government and these terms fail to meet the U.S. Government's needs or are inconsistent in any respect with federal law, Agency will immediately discontinue use of Axon Cloud Services.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

17 **Survival**. Upon any termination of this Agreement, the following sections in this Appendix will survive: Agency Owns Agency Content, Storage, Axon Cloud Services Warranty, and Axon Cloud Services Restrictions.

Professional Services Appendix

1 **Utilization of Services**. Intentionally Omitted

2 **Body-Worn Camera Full Service (BWC Full Service)**. BWC Full Service includes advance remote project planning and configuration support and up to 4 consecutive days of on-site service and a professional services manager to work with Agency to assess Agency's deployment and determine which on-site services are appropriate. If Agency requires more than 4 consecutive on-site days, Agency must purchase additional days. BWC Full Service options include:

System set up and configuration • Instructor-led setup of Axon View on smartphones (if applicable) • Configure categories and custom roles based on Agency need • Register cameras to Agency domain • Troubleshoot IT issues with Axon Evidence and Axon Dock ("**Dock**") access • One on-site session included
Dock configuration • Work with Agency to decide the ideal location of Docks and set configurations on Dock • Authenticate Dock with Axon Evidence using admin credentials from Agency • On-site assistance, not to include physical mounting of docks
Best practice implementation planning session • Provide considerations for the establishment of video policy and system operations best practices based on Axon's observations with other agencies • Discuss the importance of entering metadata in the field for organization purposes and other best practice for digital data management • Provide referrals of other agencies using the Axon camera devices and Axon Evidence • Recommend rollout plan based on review of shift schedules
System Admin and troubleshooting training sessions Step-by-step explanation and assistance for Agency's configuration of security, roles & permissions, categories & retention, and other specific settings for Axon Evidence
Axon instructor training (Train the Trainer) Training for Agency's in-house instructors who can support Agency's Axon camera and Axon Evidence training needs after Axon has fulfilled its contractual on-site obligations
Evidence sharing training Tailored workflow instruction for Investigative Units on sharing Cases and Evidence with local prosecuting agencies
End user go-live training and support sessions • Assistance with device set up and configuration • Training on device use, Axon Evidence, and Evidence Sync
Implementation document packet Axon Evidence administrator guides, camera implementation guides, network setup guide, sample policies, and categories & roles guide
Post go-live review

3 **Body-Worn Camera Starter Service (BWC Starter)**. BWC Starter includes advance remote project planning and configuration support and one day of on-site Services and a professional services manager to work closely with Agency to assess Agency's deployment and determine which Services are appropriate. If Agency requires more than 1 day of on-site Services, Agency must purchase additional on-site Services. The BWC Starter options include:

System set up and configuration (Remote Support) • Instructor-led setup of Axon View on smartphones (if applicable) • Configure categories & custom roles based on Agency need • Troubleshoot IT issues with Axon Evidence and Axon Dock ("**Dock**") access
Dock configuration • Work with Agency to decide the ideal location of Dock setup and set configurations on Dock • Authenticate Dock with Axon Evidence using "Administrator" credentials from Agency • Does not include physical mounting of docks
Axon instructor training (Train the Trainer) Training for Agency's in-house instructors who can support Agency's Axon camera and Axon Evidence training needs after Axon's has fulfilled its contracted on-site obligations
End user go-live training and support sessions • Assistance with device set up and configuration • Training on device use, Axon Evidence, and Evidence Sync
Implementation document packet Axon Evidence administrator guides, camera implementation guides, network setup guide, sample policies, and categories & roles guide

4 **Body-Worn Camera Virtual 1-Day Service (BWC Virtual)**. BWC Virtual includes all items in the BWC Starter Service Package, except one day of on-site services.

5 **CEW Services Packages**. CEW Services Packages are detailed below:

System set up and configuration • Configure Axon Evidence categories & custom roles based on Agency need. • Troubleshoot IT issues with Axon Evidence. • Register users and assign roles in Axon Evidence. • **For the CEW Full Service Package**: On-site assistance included • **For the CEW Starter Package**: Virtual assistance included
Dedicated Project Manager Assignment of specific Axon representative for all aspects of planning the rollout (Project Manager). Ideally, Project Manager will be assigned to Agency 4–6 weeks before rollout
Best practice implementation planning session to include: • Provide considerations for the establishment of CEW policy and system operations best practices based on Axon's observations with other agencies • Discuss the importance of entering metadata and best practices for digital data management • Provide referrals to other agencies using TASER CEWs and Axon Evidence • **For the CEW Full Service Package:** On-site assistance included • **For the CEW Starter Package:** Virtual assistance included
System Admin and troubleshooting training sessions On-site sessions providing a step-by-step explanation and assistance for Agency's configuration of security, roles & permissions, categories & retention, and other specific settings for Axon Evidence
Axon Evidence Instructor training • Provide training on the Axon Evidence to educate instructors who can support Agency's subsequent Axon Evidence training needs. • **For the CEW Full Service Package:** Training for up to 3 individuals at Agency • **For the CEW Starter Package:** Training for up to 1 individual at Agency

TASER CEW inspection and device assignment Axon's on-site professional services team will perform functions check on all new TASER CEW Smart weapons and assign them to a user on Axon Evidence.
Post go-live review **For the CEW Full Service Package**: On-site assistance included. **For the CEW Starter Package**: Virtual assistance included.

6 **Smart Weapon Transition Service**. The Smart Weapon Transition Service includes:

Archival of CEW Firing Logs Axon's on-site professional services team will upload CEW firing logs to Axon Evidence from all TASER CEW Smart Weapons that Agency is replacing with newer Smart Weapon models.
Return of Old Weapons Axon's on-site professional service team will ship all old weapons back to Axon's headquarters. Axon will provide Agency with a Certificate of Destruction

*Note: CEW Full Service packages for TASER 7 include Smart Weapon Transition Service instead of 1-Day Device Specific Instructor Course.

7 **Signal Sidearm Installation Service**. If Agency purchases Signal Sidearm Installation Service, Axon will provide one day of on-site Services and one professional services manager and will cover the installation of up 100 Signal Sidearm devices per package purchased. Agency is responsible for providing an appropriate work area and ensuring all holsters that will have Signal Sidearm installed onto them are available on the agreed-upon installation date(s). Installation includes:

Removal of existing connection screws that affix a holster to a holster mount
Proper placement of the Signal Sidearm Mounting Plate between the holster and the mount
Reattachment of the holster to the mount using appropriate screws
Functional testing of Signal Sidearm device

8 **Out of Scope Services**. Axon is only responsible to perform the professional services described in the Quote and this Appendix. Any additional professional services are out of scope. The Parties must document scope changes in a written and signed change order. Changes may require an equitable adjustment in the charges or schedule.

9 **Delivery of Services**. Axon personnel will work Monday through Friday, 8:30 a.m. to 5:30 p.m., except holidays. Axon will perform all on-site tasks over a consecutive timeframe. Axon will not charge Agency travel time by Axon personnel to Agency premises as work hours.

10 **Access Computer Systems to Perform Services**. Agency authorizes Axon to access relevant Agency computers and networks, solely for performing the Services. Axon will work to identify as soon as reasonably practicable resources and information Axon expects to use and will provide an initial itemized list to Agency. Agency is responsible for and assumes the risk of any problems, delays, losses, claims, or expenses resulting from the content, accuracy, completeness, and consistency of all data, materials, and information supplied by Agency.

11 **Site Preparation**. Axon will provide a hardcopy or digital copy of current user documentation for the Axon Devices ("**User Documentation**"). User Documentation will include all required environmental specifications for the professional Services and Axon Devices to operate per the Axon Device User Documentation. Before installation of Axon Devices (whether performed by Agency or Axon), Agency must prepare the location(s) where Axon Devices are to be installed ("**Installation Site**") per the environmental specifications in the Axon Device User Documentation. Following installation, Agency must maintain the Installation Site per the environmental specifications. If Axon modifies Axon Device User Documentation for any Axon Devices under this Agreement, Axon will provide the update to Agency when Axon generally releases it

12 **Acceptance**. When Axon completes professional Services, Axon will present an acceptance form ("**Acceptance Form**") to Agency. Agency will sign the Acceptance Form acknowledging completion. If Agency reasonably believes Axon did not complete the professional Services in conformance with the Master Agreement, Agency must notify Axon in writing of the specific reasons for rejection within 15 calendar days from delivery of the Acceptance Form. Axon will address the issues and re-present the Acceptance Form for signature. If Axon does not receive the signed Acceptance Form or written notification of reasons for rejection within 15 calendar days of delivery of the Acceptance Form, Axon will deem Agency to have accepted the professional Services.

13 **Agency Network**. For work performed by Axon transiting or making use of Agency's network, Agency is solely responsible for maintenance and functionality of the network. To the extent permitted by applicable law, in no event will Axon be liable for loss, damage, or corruption of Agency's network from any cause.

Technology Assurance Plan Appendix

If Technology Assurance Plan ("**TAP**") or a bundle including TAP is on the Quote, this appendix applies.

1 **TAP Warranty**. The TAP warranty is an extended warranty that starts at the end of the 1-year Hardware Limited Warranty.

2 **Officer Safety Plan**. If Agency purchases an Officer Safety Plan ("**OSP**"), Agency will receive the deliverables detailed in the Quote. Agency will accept or reject the TASER CEW and accessories as provided in Master Agreement.

3 **OSP 7 Term**. OSP 7 begins after Axon ships the Axon Body 3 or TASER 7 hardware to Agency. If Axon ships in the first half of the month, OSP 7 starts the 1st of the following month. If Axon ships in the second half of the month, OSP 7 starts the 15th of the following month ("**OSP 7 Term**").

4 **TAP BWC Upgrade**. If Agency has no outstanding payment obligations and purchased TAP, Axon will provide Agency a new Axon body-worn camera ("**BWC Upgrade**") as scheduled in the Quote. If Agency purchased TAP Axon will provide a BWC Upgrade that is the same or like Axon Device, at Axon's option. Axon makes no guarantee the BWC Upgrade will utilize the same accessories or Axon Dock.

5 **TAP Dock Upgrade**. If Agency has no outstanding payment obligations and purchased TAP, Axon will provide Agency a new Axon Dock as scheduled in the Quote ("**Dock Upgrade**"). Accessories associated with any Dock Upgrades are subject to change at Axon discretion. Dock Upgrades will only include a new Axon Dock bay configuration unless a new Axon Dock core is required for BWC compatibility. If Agency originally purchased a single-bay Axon Dock, the Dock Upgrade will be a single-bay Axon Dock model that is the same or like Axon Device, at Axon's option. If Agency originally purchased a multi-bay Axon Dock, the Dock Upgrade will be a multi-bay Axon Dock that is the same or like Axon Device, at Axon's option.

6 **Upgrade Delay**. Axon may ship the BWC and Dock Upgrades as scheduled in the Quote without prior confirmation from Agency unless the Parties agree in writing otherwise at least 90 days in advance. Axon may ship the final BWC and Dock Upgrade as scheduled in the Quote 60 days before the end of the Subscription Term without prior confirmation from Agency.

7 **Upgrade Change**. If Agency wants to change Axon Device models for the offered BWC or Dock Upgrade, Agency must pay the price difference between the MSRP in the Master Agreement for the offered BWC or Dock Upgrade and the MSRP in the Master Agreement for the model desired. If the model Agency desires has an MSRP less than the MSRP of the offered BWC Upgrade or Dock Upgrade, Axon will not provide a refund. The MSRP is the MSRP in effect in the Master Agreement at the time of the upgrade.

8 **Return of Original Axon Device**. Within 30 days of receiving a BWC or Dock Upgrade, Agency must return the original Axon Devices to Axon or destroy the Axon Devices and provide a certificate of destruction to Axon including serial numbers for the destroyed Axon Devices. If Agency does not return or destroy the Axon Devices, Axon will deactivate the serial numbers for the Axon Devices received by Agency.

9 **Termination**. If Agency's payment for TAP, OSP, or Axon Evidence is more than 45 days past due, Axon may terminate TAP or OSP. Once TAP or OSP terminates for any reason:

9.1 TAP and OSP coverage terminate as of the date of termination.

9.2 Axon will not and has no obligation to provide the Upgrade Models.

9.3 Agency must make any missed payments due to the termination before Agency may purchase any future TAP or OSP.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

TASER 7 Appendix

This TASER 7 Appendix applies to Agency's TASER 7, OSP 7, or OSP 7 Plus purchase from Axon.

1 **Duty Cartridge Replenishment Plan**. If the Quote includes "**Duty Cartridge Replenishment Plan**", Agency must purchase the plan for each CEW user. A CEW user includes officers that use a CEW in the line of duty and those that only use a CEW for training. Agency may not resell cartridges received. Axon will only replace cartridges used in the line of duty.

2 **Training**. If the Quote includes a training voucher, Agency must use the voucher within 1 year of issuance, or the voucher will be void. Axon will issue Agency a voucher annually beginning on the start of the TASER Subscription Term. The voucher has no cash value. Agency cannot exchange it for another device or service. Unless stated in the Quote, the voucher does not include travel expenses and will be Agency's responsibility. If the Quote includes Axon Online Training or Virtual Reality Content Empathy Development for Autism/Schizophrenia (collectively, "**Training Content**"), Agency may access Training Content. Axon will deliver all Training Content electronically.

3 **Extended Warranty**. If the Quote includes an extended warranty, the extended warranty coverage period warranty will be for a 5-year term, which includes the hardware manufacturer's warranty plus the 4-year extended term.

4 **Trade-in**. If the Quote contains a discount on CEW-related line items, including items related to OSP, then that discount may only be applied as a trade-in credit, and Agency must return used hardware and accessories associated with the discount ("**Trade-In Units**") to Axon. Agency must ship batteries via ground shipping. Axon will pay shipping costs of the return. If Axon does not receive Trade-In Units within the timeframe below, Axon will invoice Agency the value of the trade-in credit. Agency may not destroy Trade-In Units and receive a trade-in credit.

Agency Size	Days to Return from Start Date of TASER 7 Subscription
Less than 100 officers	30 days
100 to 499 officers	90 days
500+ officers	180 days

5 **TASER 7 Subscription Term**. The TASER 7 Subscription Term for a standalone TASER 7 purchase begins on shipment of the TASER 7 hardware. The TASER 7 Subscription Term for OSP 7 begins on the OSP 7 Start date.

6 **Access Rights**. Upon Axon granting Agency a TASER 7 Axon Evidence subscription, Agency may access and use Axon Evidence for the storage and management of data from TASER 7 CEW devices during the TASER 7 Subscription Term. Agency may not upload any non-TASER 7 data or any other files to Axon Evidence. Agency may not exceed the number of end users than the Quote specifies.

7 **Privacy.** Axon will not disclose Agency Content or any information about Agency except as compelled by a court or administrative body or required by any law or regulation. Axon will give notice if any disclosure request is received for Agency Content, so Agency may file an objection with the court or administrative body.

8 **Termination**. If payment for TASER 7 is more than 30 days past due, Axon may terminate Agency's TASER 7 plan by notifying Agency. Upon termination for any reason, then as of the date of termination:

8.1 TASER 7 extended warranties and access to Training Content will terminate. No refunds will be given.

8.2 Axon will invoice Agency the remaining MSRP for TASER 7 products received before termination. If terminating for non-appropriations, Axon will not invoice Agency if Agency returns the CEW, rechargeable battery, holster, dock, core, training suits, and unused cartridges to Axon within 30 days of the date of termination.

8.3 Agency will be responsible for payment of any missed payments due to the termination before being allowed to purchase any future TASER 7 plan.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

TASER 10 Appendix

This TASER 10 Appendix applies to Agency's TASER 10, OSP 10, OSP Plus, or OSP 10 Plus Premium purchase from Axon, if applicable.

1. **Duty Cartridge Replenishment Plan**. If the Quote includes "**Duty Cartridge Replenishment Plan**", Agency must purchase the plan for each CEW user. A CEW user includes officers that use a CEW in the line of duty and those that only use a CEW for training. Agency may not resell cartridges received. Axon will only replace cartridges used in the line of duty.
2. **Training**. If the Quote includes a training voucher, Agency must use the voucher within 1 year of issuance, or the voucher will be void. Axon will issue Agency a voucher annually beginning on the start of the TASER Subscription Term. The voucher has no cash value. Agency cannot exchange it for another device or service. Unless stated in the Quote, the voucher does not include travel expenses and will be Agency's responsibility only to the extent permitted by applicable law. If the Quote includes Axon Online Training or Virtual Reality Content Empathy Development for Autism/Schizophrenia (collectively, "**Training Content**"), Agency may access Training Content. Axon will deliver all Training Content electronically.
3. **Extended Warranty**. If the Quote includes an extended warranty, the extended warranty coverage period warranty will be for a 5-year term, which includes the hardware manufacturer's warranty plus the 4-year extended term.
4. **Trade-in**. If the Quote contains a discount on CEW-related line items, including items related to OSP, then that discount may only be applied as a trade-in credit, and Agency must return used hardware and accessories associated with the discount ("**Trade-In Units**") to Axon. Agency must ship batteries via ground shipping. Axon will pay shipping costs of the return. If Axon does not receive Trade-In Units within the timeframe below, Axon will invoice Agency the value of the trade-in credit. Agency may not destroy Trade-In Units and receive a trade-in credit.

Agency Size	Days to Return from Start Date of TASER 10 Subscription
Less than 100 officers	60 days
100 to 499 officers	90 days
500+ officers	180 days

5. **TASER 10 Subscription Term**. The TASER 10 Subscription Term for a standalone TASER 10 purchase begins on delivery of the TASER 10 hardware. The TASER 10 Subscription Term for OSP 10 begins on the OSP 10 Start date.
6. **Access Rights**. Upon Axon granting Agency a TASER 10 Axon Evidence subscription, Agency may access and use Axon Evidence for the storage and management of data from TASER 10 CEW devices during the TASER 10 Subscription Term. Agency may not exceed the number of end users than the Quote specifies.
7. **Agency Warranty.** If Agency is located in the US, Agency warrants and acknowledges that TASER 10 is classified as a firearm and is being acquired for official Agency use pursuant to a law enforcement agency transfer under the Gun Control Act of 1968.
8. **Purchase Order.** To comply with applicable laws and regulations, Customer must provide a purchase order to Axon prior to shipment of TASER 10.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Auto-Tagging Appendix

1 **Scope.** Axon Auto-Tagging consists of the development of a module to allow Axon Evidence to interact with Agency's Computer-Aided Dispatch ("**CAD**") or Records Management Systems ("**RMS**"). This allows end users to auto-populate Axon video meta-data with a case ID, category, and location-based on data maintained in Agency's CAD or RMS.

2 **Support**. For thirty days after completing Auto-Tagging Services, Axon will provide up to 5 hours of remote support at no additional charge. Axon will provide free support due to a change in Axon Evidence, so long as long as Agency maintains an Axon Evidence and Auto-Tagging subscription. Axon will not provide support if a change is required because Agency changes its CAD or RMS.

3 **Changes**. Axon is only responsible to perform the Services in this Appendix. Any additional Services are out of scope. The Parties must document scope changes in a written and signed change order. Changes may require an equitable adjustment in fees or schedule.

4 **Agency Responsibilities**. Axon's performance of Auto-Tagging Services requires Agency to:

- **4.1** Make available relevant systems, including Agency's current CAD or RMS, for assessment by Axon (including remote access if possible);
- **4.2** Make required modifications, upgrades or alterations to Agency's hardware, facilities, systems and networks related to Axon's performance of Auto-Tagging Services;
- **4.3** Provide access to the premises where Axon is performing Auto-Tagging Services, subject to Agency safety and security restrictions, and allow Axon to enter and exit the premises with laptops and materials needed to perform Auto-Tagging Services;
- **4.4** Provide all infrastructure and software information (TCP/IP addresses, node names, network configuration) necessary for Axon to provide Auto-Tagging Services;
- **4.5** Promptly install and implement any software updates provided by Axon;
- **4.6** Ensure that all appropriate data backups are performed;
- **4.7** Provide assistance, participation, and approvals in testing Auto-Tagging Services;
- **4.8** Provide Axon with remote access to Agency's Axon Evidence account when required;
- **4.9** Notify Axon of any network or machine maintenance that may impact the performance of the module at Agency; and
- **4.10** Ensure reasonable availability of knowledgeable staff and personnel to provide timely, accurate, complete, and up-to-date documentation and information to Axon.

5 **Access to Systems**. Agency authorizes Axon to access Agency's relevant computers, network systems, and CAD or RMS solely for performing Auto-Tagging Services. Axon will work diligently to identify as soon as reasonably practicable resources and information Axon expects to use and will provide an initial list to Agency. Agency is responsible for and assumes the risk of any problems, delays, losses, claims, or expenses resulting from the content, accuracy, completeness, and consistency of all data, materials, and information supplied by Agency.

AXON

Master Services and Purchasing Agreement

Axon Fleet Appendix

1 **Agency Responsibilities**. Agency must ensure its infrastructure and vehicles adhere to the minimum requirements to operate Axon Fleet 2 or Axon Fleet 3 (collectively, "Axon Fleet") as established by Axon during the qualifier call and on-site assessment at Agency and in any technical qualifying questions. If Agency's representations are inaccurate, the Quote is subject to change.

2 **Cradlepoint**. If Agency purchases Cradlepoint Enterprise Cloud Manager, Agency will comply with Cradlepoint's end user license agreement. The term of the Cradlepoint license may differ from the Axon Evidence Subscription. If Agency requires Cradlepoint support, Agency will contact Cradlepoint directly.

3 **Third-party Installer**. Axon will not be liable for the failure of Axon Fleet hardware to operate per specifications if such failure results from installation not performed by, or as directed by Axon.

4 **Wireless Offload Server.**

4.1 **License Grant**. Axon grants Agency a non-exclusive, royalty-free, worldwide, perpetual license to use Wireless Offload Server ("**WOS**"). "Use" means storing, loading, installing, or executing WOS solely for data communication with Axon Devices for the number of licenses purchased. The WOS term begins upon the start of the Axon Evidence Subscription.

4.2 **Restrictions**. Agency may not: (a) modify, alter, tamper with, repair, or create derivative works of WOS; (b) reverse engineer, disassemble, or decompile WOS, apply any process to derive the source code of WOS, or allow others to do so; (c) access or use WOS to avoid incurring fees or exceeding usage limits; (d) copy WOS in whole or part; (e) use trade secret information contained in WOS; (f) resell, rent, loan or sublicense WOS; (g) access WOS to build a competitive device or service or copy any features, functions or graphics of WOS; or (h) remove, alter or obscure any confidentiality or proprietary rights notices (including copyright and trademark notices) of Axon or Axon's licensors on or within WOS.

4.3 **Updates**. If Agency purchases WOS maintenance, Axon will make updates and error corrections to WOS ("**WOS Updates**") available electronically via the Internet or media as determined by Axon. Agency is responsible for establishing and maintaining adequate Internet access to receive WOS Updates and maintaining computer equipment necessary for use of WOS. The Quote will detail the maintenance term.

4.4 **WOS Support**. Upon request by Axon, Agency will provide Axon with necessary access to Agency's store and forward servers solely for troubleshooting and maintenance.

5 **Axon Vehicle Software.**

5.1 **License Grant**. Axon grants Agency a non-exclusive, royalty-free, worldwide, perpetual license to use ViewXL or Dashboard (collectively, "Axon Vehicle Software".) "Use" means storing, loading, installing, or executing Axon Vehicle Software solely for data communication with Axon Devices. The Axon Vehicle Software term begins upon the start of the Axon Evidence Subscription.

5.2 **Restrictions**. Agency may not: (a) modify, alter, tamper with, repair, or create derivative works of Axon Vehicle Software; (b) reverse engineer, disassemble, or decompile Axon Vehicle Software, apply any process to derive the source code of Axon Vehicle Software, or allow others to do so; (c) access or use Axon Vehicle Software to avoid incurring fees or exceeding usage limits; (d) copy Axon Vehicle Software in whole or part; (e) use trade secret information contained in Axon Vehicle Software; (f) resell, rent, loan or sublicense Axon Vehicle Software; (g) access Axon Vehicle Software to build a competitive device or service or copy any features, functions or graphics of Axon Vehicle Software; or (h)

remove, alter or obscure any confidentiality or proprietary rights notices (including copyright and trademark notices) of Axon or Axon's licensors on or within Axon Vehicle Software.

6 **Axon Fleet Upgrade**. If Agency has no outstanding payment obligations and has purchased the "Fleet Technology Assurance Plan" (Fleet TAP), Axon will provide Agency with the same or like model of Fleet hardware ("Fleet Upgrade") as schedule on the Quote.

If Agency would like to change models for the Axon Fleet Upgrade, Agency must pay the difference between the MSRP for the offered Axon Fleet Upgrade and the MSRP for the model desired. The MSRP is the MSRP in effect at the time of the upgrade. Agency is responsible for the removal of previously installed hardware and installation of the Axon Fleet Upgrade.

Within 30 days of receiving the Axon Fleet Upgrade, Agency must return the original Axon Devices to Axon or destroy the Axon Devices and provide a certificate of destruction to Axon, including serial numbers of the destroyed Axon Devices. If Agency does not destroy or return the Axon Devices to Axon, Axon will deactivate the serial numbers for the Axon Devices received by Agency.

7 **Privacy.** Axon will not disclose Agency Content or any information about Agency except as compelled by a court or administrative body or required by any law or regulation. Axon will give notice if any disclosure request is received for Agency Content, so Agency may file an objection with the court or administrative body.

8 **Axon Fleet Termination.** Axon may terminate Agency's Fleet subscription for non-payment. Upon any termination:

8.1 Axon Fleet subscription coverage terminates.

8.2 Axon will not and has no obligation to provide the Axon Fleet Upgrade.

8.3 Agency will be responsible for payment of any missed payments due to the termination before being allowed to purchase any future Fleet TAP.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Respond Appendix

This Axon Respond Appendix applies to both Axon Respond and Axon Respond Plus.

1 **Axon Respond Subscription Term**. If Agency purchases Axon Respond as part of a bundled offering, the Axon Respond subscription begins on the later of the (1) start date of that bundled offering, or (2) date Axon provisions Axon Respond to Agency.

If Agency purchases Axon Respond as a standalone, the Axon Respond subscription begins the later of the (1) date Axon provisions Axon Respond to Agency, or (2) first day of the month following the Effective Date.

The Axon Respond subscription term will end upon the completion of the Axon Evidence Subscription associated with Axon Respond.

2 **Scope of Axon Respond**. The scope of Axon Respond is to assist Agency with real-time situational awareness during critical incidents to improve officer safety, effectiveness, and awareness. In the event Agency uses Axon Respond outside this scope, Axon may initiate good-faith discussions with Agency on upgrading Agency's Axon Respond to better meet Agency's needs.

3 **Axon Body 3 LTE Requirements**. Axon Respond is only available and usable with an LTE enabled body-worn camera. Axon is not liable if Agency utilizes the LTE device outside of the coverage area or if the LTE carrier is unavailable. LTE coverage is only available in the United States, including any U.S. territories. Axon may utilize a carrier of Axon's choice to provide LTE service. Axon may change LTE carriers during the Term without Agency's consent, but will provide Agency notice of said change.

4 **Axon Fleet 3 LTE Requirements.** Axon Respond is only available and usable with a Fleet 3 system configured with LTE modem and service. Agency is responsible for providing LTE service for the modem. Coverage and availability of LTE service is subject to Agency's LTE carrier.

5 **Axon Respond Service Limitations**. Agency acknowledges that LTE service is made available only within the operating range of the networks. Service may be temporarily refused, interrupted, or limited because of: (a) facilities limitations; (b) transmission limitations caused by atmospheric, terrain, other natural or artificial conditions adversely affecting transmission, weak batteries, system overcapacity, movement outside a service area or gaps in coverage in a service area and other causes reasonably outside of the carrier's control such as intentional or negligent acts of third parties that damage or impair the network or disrupt service; or (c) equipment modifications, upgrades, relocations, repairs, and other similar activities necessary for the proper or improved operation of service.

With regard to Axon Body 3, Partner networks are made available as-is and the carrier makes no warranties or representations as to the availability or quality of roaming service provided by carrier partners, and the carrier will not be liable in any capacity for any errors, outages, or failures of carrier partner networks. Agency expressly understands and agrees that it has no contractual relationship whatsoever with the underlying wireless service provider or its affiliates or contractors and Agency is not a third-party beneficiary of any agreement between Axon and the underlying carrier.

6 **Termination**. Upon termination of this Agreement, or if Agency stops paying for Axon Respond or bundles that include Axon Respond, Axon will end Aware services, including any Axon-provided LTE service.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Add-on Services Appendix

This Appendix applies to Axon Citizen for Communities, Axon Redaction Assistant, and Axon Performance.

1 **Subscription Term**. If Agency purchases Axon Citizen for Communities, Axon Redaction Assistant, or Axon Performance as part of OSP 7, the subscription begins on the later of the (1) start date of the OSP 7 Term, or (2) date Axon provisions Axon Citizen for Communities, Axon Redaction Assistant, or Axon Performance to Agency.

If Agency purchases Axon Citizen for Communities, Axon Redaction Assistant, or Axon Performance as a standalone, the subscription begins the later of the (1) date Axon provisions Axon Citizen for Communities, Axon Redaction Assistant, or Axon Performance to Agency, or (2) first day of the month following the Effective Date.

The subscription term will end upon the completion of the Axon Evidence Subscription associated with the add-on.

2 **Axon Citizen Storage**. For Axon Citizen, Agency may store an unlimited amount of data submitted through the public portal ("**Portal Content**"), within Agency's Axon Evidence instance. The post-termination provisions outlined in the Axon Cloud Services Terms of Use Appendix also apply to Portal Content.

3 **Performance Auto-Tagging Data**. In order to provide some features of Axon Performance to Agency, Axon will need to store call for service data from Agency's CAD or RMS.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Auto-Transcribe Appendix

This Appendix applies to Axon Auto-Transcribe.

1) **Subscription Term.** If Agency purchases Axon Auto-Transcribe as part of a bundle or Axon Cloud Services subscription, the subscription begins on the later of the (1) start date of the bundle or Axon Cloud Services license term, or (2) date Axon provisions Axon Auto-Transcribe to Agency. If Agency purchases Axon Auto-Transcribe minutes as a standalone, the subscription begins on the date Axon provisions Axon Auto-Transcribe to Agency.

   Axon Auto-Transcribe minutes expire one year after being provisioned to Agency by Axon.

   If Agency cancels Auto-Transcribe services, any amounts owed by the Parties will be based on the amount of time passed under the annual subscription, rather than on the number of minutes used, regardless of usage. For clarity, Axon will divide the annual subscription cost by the number of months that have passed. Axon will utilize full months that have passed, partial months will not be counted. For example, if six (6) months have passed then Agency will only owe for six (6) months.

2) **Auto-Transcribe A-La-Carte Minutes.** Upon Axon granting Agency a set number of minutes, Agency may utilize Axon Auto-Transcribe, subject to the number of minutes allowed on the Quote. Agency will not have the ability to roll over unused minutes to future Auto-Transcribe terms. Axon may charge Agency additional fees for exceeding the number of purchased minutes.

3) **Axon Auto-Transcribe On-Demand.** Upon Axon granting Agency an On-Demand subscription to Axon Auto-Transcribe, Agency may utilize Axon Auto-Transcribe with no limit on the number of minutes. The scope of Axon Auto-Transcribe On-Demand is to assist Agency with reviewing and transcribing individual evidence items. In the event Agency uses Axon Auto-Transcribe On-Demand outside this scope, Axon may initiate good-faith discussions with Agency on upgrading Agency's Axon Auto-Transcribe On-Demand to better meet Agency's needs.

4) **Warranty.** Axon does not warrant the accuracy of Axon Auto-Transcribe.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Virtual Reality Content Terms of Use Appendix

1 **Term**. The Quote will detail the duration of the Virtual Reality Content license.

2 **Headsets**. Agency may purchase additional virtual reality headsets from Axon. In the event Agency decides to purchase additional virtual reality headsets for use with Axon's Virtual Reality Content, Agency must purchase those headsets from Axon.

3 **License Restrictions**. If Agency utilizes more users than stated in this Agreement, Agency must purchase additional Virtual Reality Content licenses from Axon. Agency may not use Virtual Reality Content for any purpose other than as expressly permitted by this Agreement. Agency may not:

- **3.1** modify, tamper with, repair, or otherwise create derivative works of Virtual Reality Content;
- **3.2** reverse engineer, disassemble, or decompile Virtual Reality Content or apply any process to derive the source code of Virtual Reality Content, or allow others to do the same;
- **3.3** copy Virtual Reality Content in whole or part, except as expressly permitted in this Agreement;
- **3.4** use trade secret information contained in Virtual Reality Content;
- **3.5** resell, rent, loan or sublicense Virtual Reality Content;
- **3.6** access Virtual Reality Content to build a competitive device or service or copy any features, functions, or graphics of Virtual Reality Content; or
- **3.7** remove, alter, or obscure any confidentiality or proprietary rights notices (including copyright and trademark notices) of Axon or Axon's licensors on or within Virtual Reality Content or any copies of Virtual Reality Content.

4 **Intentionally Omitted**

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Commander™ Software Appendix

5 **License**. Axon owns all executable instructions, images, icons, sound, and text in Commander. All rights are reserved to Axon. Axon grants a non-exclusive, royalty-free, worldwide right and license to use Commander. "Use" means storing, loading, installing, or executing Commander exclusively for data communication with an Axon Device. Agency may use Commander in a networked environment on computers other than the computer it installs Commander on, so long as each execution of Commander is for data communication with an Axon Device. Agency may make copies of Commander for archival purposes only. Agency shall retain all copyright, trademark, and proprietary notices in Commander on all copies or adaptations.

6 **Term**. The Quote will detail the duration of the Commander license, as well as any maintenance. The term will begin upon installation of Commander by Axon.

7 **License Restrictions**. Agency may not use Commander for any purpose other than as expressly permitted by this Agreement. Agency may not:

7.1 modify, tamper with, repair, or otherwise create derivative works of Commander;
7.2 reverse engineer, disassemble, or decompile Commander or apply any process to derive the source code of Commander, or allow others to do the same;
7.3 access or use Commander to avoid incurring fees or exceeding usage limits or quotas;
7.4 copy Commander in whole or part, except as expressly permitted in this Agreement;
7.5 use trade secret information contained in Commander;
7.6 resell, rent, loan or sublicense Commander;
7.7 access Commander to build a competitive device or service or copy any features, functions, or graphics of Commander; or
7.8 remove, alter, or obscure any confidentiality or proprietary rights notices (including copyright and trademark notices) of Axon or Axon's licensors on or within Commander or any copies of Commander.

8 **Support**. Axon may make available updates and error corrections ("**Updates**") to Commander. Axon will provide Updates electronically via the Internet or media as determined by Axon. Agency is responsible for establishing and maintaining adequate access to the Internet to receive Updates. Agency is responsible for maintaining the computer equipment necessary to use Commander. Axon may provide technical support of a prior release/version of Commander for 6 months from when Axon made the subsequent release/version available.

9 **Termination**. Upon termination, Axon may disable Agency's right to login to Axon Commander.

Axon Application Programming Interface Appendix

1 Definitions.
"**API Client**" means the software that acts as the interface between Agency's computer and the server, which is already developed or to be developed by Agency.

"**API Interface**" means software implemented by Agency to configure Agency's independent API Client Software to operate in conjunction with the API Service for Agency's authorized Use.

"**Axon Evidence Partner API, API or AXON API**" (collectively "**API Service**") means Axon's API which provides a programmatic means to access data in Agency's Axon Evidence account or integrate Agency's Axon Evidence account with other systems.

"**Use**" means any operation on Agency's data enabled by the supported API functionality.

2 Purpose and License.
2.1 Agency may use API Service and data made available through API Service, in connection with an API Client developed by Agency. Axon may monitor Agency's use of API Service to ensure quality, improve Axon devices and services, and verify compliance with this Agreement. Agency agrees to not interfere with such monitoring or obscure from Axon Agency's use of API Service. Agency will not use API Service for commercial use.
2.2 Axon grants Agency a non-exclusive, non-transferable, non-sublicensable, worldwide, revocable right and license during the Term to use API Service, solely for Agency's Use in connection with Agency's API Client.
2.3 Axon reserves the right to set limitations on Agency's use of the API Service, such as a quota on operations, to ensure stability and availability of Axon's API. Axon will use reasonable efforts to accommodate use beyond the designated limits.

3 Configuration. Agency will work independently to configure Agency's API Client with API Service for Agency's applicable Use. Agency will be required to provide certain information (such as identification or contact details) as part of the registration. Registration information provided to Axon must be accurate. Agency will inform Axon promptly of any updates. Upon Agency's registration, Axon will provide documentation outlining API Service information.

4 Agency Responsibilities. When using API Service, Agency and its end users may not:
4.1 use API Service in any way other than as expressly permitted under this Agreement;
4.2 use in any way that results in, or could result in, any security breach to Axon;
4.3 perform an action with the intent of introducing any viruses, worms, defect, Trojan horses, malware, or any items of a destructive nature to Axon Devices and Services;
4.4 interfere with, modify, disrupt or disable features or functionality of API Service or the servers or networks providing API Service;
4.5 reverse engineer, decompile, disassemble, or translate or attempt to extract the source code from API Service or any related software;
4.6 create an API Interface that functions substantially the same as API Service and offer it for use by third parties;
4.7 provide use of API Service on a service bureau, rental or managed services basis or permit other individuals or entities to create links to API Service;
4.8 frame or mirror API Service on any other server, or wireless or Internet-based device;
4.9 make available to a third-party, any token, key, password or other login credentials to API Service;
4.10 take any action or inaction resulting in illegal, unauthorized or improper purposes; or disclose Axon's API manual.

5 API Content. All content related to API Service, other than Agency Content or Agency's API Client

content, is considered Axon's API Content, including:

5.1 the design, structure and naming of API Service fields in all responses and requests;

5.2 the resources available within API Service for which Agency takes actions on, such as evidence, cases, users, or reports; and

5.3 the structure of and relationship of API Service resources; and

5.4 the design of API Service, in any part or as a whole.

6 **Prohibitions on API Content**. Neither Agency nor its end users will use API content returned from the API Interface to:

6.1 scrape, build databases, or otherwise create permanent copies of such content, or keep cached copies longer than permitted by the cache header;

6.2 copy, translate, modify, create a derivative work of, sell, lease, lend, convey, distribute, publicly display, or sublicense to any third-party;

6.3 misrepresent the source or ownership; or

6.4 remove, alter, or obscure any confidentiality or proprietary rights notices (including copyright and trademark notices).

7 **API Updates**. Axon may update or modify the API Service from time to time ("**API Update**"). Agency is required to implement and use the most current version of API Service and to make any applicable changes to Agency's API Client required as a result of such API Update. API Updates may adversely affect how Agency's API Client access or communicate with API Service or the API Interface. Each API Client must contain means for Agency to update API Client to the most current version of API Service. Axon will provide support for 1 year following the release of an API Update for all depreciated API Service versions.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Advanced User Management Appendix

1 **Scope**. Advanced User Management allows Agency to (a) utilize bulk user creation and management, (b) automate user creation and management through System for Cross-domain Identity Management ("**SCIM**"), and (c) automate group creation and management through SCIM.

2 **Advanced User Management Configuration**. Agency will work independently to configure Agency's Advanced User Management for Agency's applicable Use. Upon request, Axon will provide general guidance to Agency, including documentation that details the setup and configuration process.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Channel Services Appendix

1 **Definitions**.
"**Axon Digital Evidence Management System**" means Axon Evidence or Axon Commander, as specified in the attached Channel Services Statement of Work.

"**Active Channel**" means a third-party system that is continuously communicating with an Axon Digital Evidence Management System.

"**Inactive Channel**" means a third-party system that will have a one-time communication to an Axon Digital Evidence Management System.

2 **Scope**. Agency currently has a third-party system or data repository from which Agency desires to share data with Axon Digital Evidence Management. Axon will facilitate the transfer of Agency's third-party data into an Axon Digital Evidence Management System or the transfer of Agency data out of an Axon Digital Evidence Management System as defined in the Channel Services Statement of Work ("**Channel Services SOW**"). Channel Services will not delete any Agency Content. Agency is responsible for verifying all necessary data is migrated correctly and retained per Agency policy.

3 **Purpose and Use**. Agency is responsible for verifying Agency has the right to share data from and provide access to third-party system as it relates to the Services described in this Appendix and the Channel Services SOW. For Active Channels, Agency is responsible for any changes to a third-party system that may affect the functionality of the channel service. Any additional work required for the continuation of the Service may require additional fees. An Axon Field Engineer may require access to Agency's network and systems to perform the Services described in the Channel Services SOW. Agency is responsible for facilitating this access per all laws and policies applicable to Agency.

4 **Project Management**. Axon will assign a Project Manager to work closely with Agency's project manager and project team members and will be responsible for completing the tasks required to meet all contract deliverables on time and budget.

5 **Warranty.** Axon warrants that it will perform the Channel Services in a good and workmanlike manner.

6 **Monitoring**. Axon may monitor Agency's use of Channel Services to ensure quality, improve Axon devices and services, prepare invoices based on the total amount of data migrated, and verify compliance with this Agreement. Agency agrees not to interfere with such monitoring or obscure from Axon Agency's use of channel services.

7 **Agency's Responsibilities.** Axon's successful performance of the Channel Services requires Agency:

7.1 Make available its relevant systems for assessment by Axon (including making these systems available to Axon via remote access);

7.2 Provide access to the building facilities and where Axon is to perform the Channel Services, subject to safety and security restrictions imposed by the Agency (including providing security passes or other necessary documentation to Axon representatives performing the Channel Services permitting them to enter and exit Agency premises with laptop personal computers and any other materials needed to perform the Channel Services);

7.3 Provide all necessary infrastructure and software information (TCP/IP addresses, node names, and network configuration) for Axon to provide the Channel Services;

7.4 Ensure all appropriate data backups are performed;

7.5 Provide Axon with remote access to the Agency's network and third-party systems when required for Axon to perform the Channel Services;

7.6 Notify Axon of any network or machine maintenance that may impact the performance of

the Channel Services; and

7.7 Ensure the reasonable availability by phone or email of knowledgeable staff, personnel, system administrators, and operators to provide timely, accurate, complete, and up-to-date documentation and information to Axon (these contacts are to provide background information and clarification of information required to perform the Channel Services).

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Support Engineer Appendix

1 **Axon Support Engineer Payment.** Axon will invoice for Axon Support Engineer ("**ASE**") services, as outlined in the Quote, when the Axon Support Engineer commences work on-site at Agency.

2 **Full-Time ASE Scope of Services.**

2.1 A Full-Time ASE will work on-site four (4) days per week.

2.2 Agency's Axon sales representative and Axon's Agency Success team will work with Agency to define its support needs and ensure the Full-Time ASE has skills to align with those needs. There may be up to a 6-month waiting period before the Full-Time ASE can work on-site, depending upon Agency's needs and availability of a Full-Time ASE.

2.3 The purchase of Full-Time ASE Services includes 2 complimentary Axon Accelerate tickets per year of the Agreement, so long as the ASE has started work at Agency, and Agency is current on all payments for the Full-Time ASE Service.

The Full-Time ASE Service options are listed below:

Ongoing System Set-up and Configuration • Assisting with assigning cameras and registering docks • Maintaining Agency's Axon Evidence account • Connecting Agency to "Early Access" programs for new devices
Account Maintenance • Conducting on-site training on new features and devices for Agency leadership team(s) • Thoroughly documenting issues and workflows and suggesting new workflows to improve the effectiveness of the Axon program • Conducting weekly meetings to cover current issues and program status
Data Analysis • Providing on-demand Axon usage data to identify trends and insights for improving daily workflows • Comparing Agency's Axon usage and trends to peers to establish best practices • Proactively monitoring the health of Axon equipment and coordinating returns when needed
Direct Support • Providing on-site, tier 1 and tier 2 technical support for Axon devices • Proactively monitoring the health of Axon equipment • Creating and monitoring RMAs on-site • Providing Axon app support • Monitoring and testing new firmware and workflows before they are released to Agency's production environment
Agency Advocacy • Coordinating bi-annual voice of customer meetings with Axon's Device Management team • Recording and tracking Agency feature requests and major bugs

3 **Regional ASE Scope of Services**

3.1 A Regional ASE will work on-site for 3 consecutive days per quarter. Agency must schedule the on-site days at least 2 weeks in advance. The Regional ASE will also be available by phone and email during regular business hours up to 8 hours per week.

3.2 There may be up to a 6-month waiting period before Axon assigns a Regional ASE to Agency, depending upon the availability of a Regional ASE.

3.3 The purchase of Regional ASE Services includes 2 complimentary Axon Accelerate tickets per year of the Agreement, so long as the ASE has started work at Agency and Agency is current on all payments for the Regional ASE Service.

The Regional ASE service options are listed below:

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Account Maintenance • Conducting remote training on new features and devices for Agency's leadership • Thoroughly documenting issues and workflows and suggesting new workflows to improve the effectiveness of the Axon program • Conducting weekly conference calls to cover current issues and program status • Visiting Agency quarterly (up to 3 consecutive days) to perform a quarterly business review, discuss Agency's goals for your Axon program, and continue to ensure a successful deployment of Axon devices
Direct Support • Providing remote, tier 1 and tier 2 technical support for Axon devices • Creating and monitoring RMAs remotely
Data Analysis • Providing quarterly Axon usage data to identify trends and program efficiency opportunities • Comparing an Agency's Axon usage and trends to peers to establish best practices • Proactively monitoring the health of Axon equipment and coordinating returns when needed
Agency Advocacy • Coordinating bi-yearly Voice of Agency meetings with Device Management team • Recording and tracking Agency feature requests and major bugs

4 **Out of Scope Services.** The ASE is responsible to perform only the Services described in this Appendix. Any additional Services discussed or implied that are not defined explicitly in this Appendix will be considered out of the scope.

5 **ASE Leave Time**. The ASE will be allowed up 7 days of sick leave and up to 15 days of vacation time per each calendar year. The ASE will work with Agency to coordinate any time off and will provide Agency with at least 2 weeks' notice before utilizing any vacation days.

Part 1 – Axon Evidence Service Level Agreement

This Service Level Agreement (**SLA**) identifies the Axon Evidence Service Offerings and the expected level of services between Axon[1] (**Axon, us** or **we**) and users of Service Offerings (**Customer** or **you**). Unless otherwise provided in this SLA, this SLA is subject to the terms of the purchase agreement, or other similar agreement, if any, between Axon and Customer. This SLA applies separately to each Customer using Service Offerings. By using Service Offerings, you agree that you understand this SLA and you accept and agree to be bound by the following terms and conditions If there are adverse material changes to this SLA, we will inform you by directly sending you a notification. We encourage you to periodically review the most current version of the Axon Cloud Services Maintenance Schedule by visiting: https://www.axon.com/products/axon-evidence/maintenance-schedule.

Definitions

- **"Axon Cloud Services"** means Axon's web services for Axon Evidence, Axon Records, Axon Dispatch, and interactions between Evidence.com and Axon devices or Axon client software. Axon Cloud Service excludes third-party applications, hardware warranties, and my.evidence.com.
- **"Downtime"** means periods of time, measured in minutes, in which the Service Offering is Unavailable to you. "Downtime" does not include Scheduled Downtime and does not include Unavailability of the Service Offering due to limitations described under the section Exclusions.
- **"Incident"** means a disruption of Service Offerings during which the Customer experiences Downtime.
- **"Maximum Available Minutes"** means the total amount of accumulated minutes during a Service Month for the Service Offering.
- **"Monthly Uptime Percentage"** means (Maximum Available Minutes - Downtime) / Maximum Available Minutes * 100.
- **"Scheduled Downtime"** means periods of time, measured in minutes, in which the Service Offering is unavailable to Customer, which fall within scheduled routine maintenance or planned maintenance timeframes.
- **"Service Month"** means a calendar month at Coordinated Universal Time (UTC).
- **"Service Credits"** means credits received by users of Service Offerings in the event that the service level objectives are not achieved.
- **"Service Offerings"** means all Axon Evidence services provided by Axon pursuant to this SLA.

[1] "Axon" refers to the Axon entity that you are in a contractual agreement with for the provision of Axon Cloud Services, including but not limited to Axon Public Safety UK Limited, Axon Public Safety Germany SE, etc.

- **"Unavailable"** and **"Unavailability"** means a situation where the Service Offering does not allow for the upload of evidence files, viewing of evidence files or interactive login by an end-user.

Service Level Objective

Axon will use commercially reasonable efforts to make the Service Offerings available 99.99% of the time. Guaranteed service level & Service Credits:

Monthly Uptime Percentage	Service Credit in Days
Less than 99.9%	3
Less than 99.0%	7

Requesting Service Credits

In order for Axon to consider a claim for Service Credits, you must submit the claim to Axon Customer Support (https://www.axon.com/contact)including all information necessary for us to validate the claim, including but not limited to: (i) a detailed description of the Incident; (ii) information regarding the time and duration of the Incident; (iii) the number and location(s) of affected users (if applicable); and (iv) descriptions of your attempts to resolve the Incident at the time of occurrence.

Service Maintenance

- Maintenance will take place according to the prevailing Axon Cloud Services Maintenance Schedule: https://www.axon.com/products/axon-evidence/maintenance-schedule.
- Maintenance periods may periodically result in the Service Offerings being Unavailable to you. Downtime falling within scheduled routine or planned maintenance is Scheduled Downtime and is not eligible for Service Credits.
- Emergency maintenance may have less than a 24-hour notification period. Emergency maintenance may be performed at any time, with or without notice as deemed necessary by Axon. Emergency maintenance falling outside scheduled routine or planned maintenance is eligible for Service Credits.
- Axon will make available updates as released by Axon to the Axon Cloud Services. The Customer is responsible for maintaining the computer equipment and internet connections necessary for use of Axon Cloud Services.
- For the support of Android & iOS Applications, including Axon View, Axon Device Manager, and Axon Capture, Axon will use reasonable efforts to continue supporting previous version of such applications for 45 days after the change. In the event the Customer does not update

their Android/iOS application to the most current version within 45 days of release, Axon may disable the application or force updates to the non-supported application.

Terms

Axon must receive the claim within one month of the end of the month in which the Incident that is the subject of the claim occurred. For example, if the Incident occurred on February 12th, we must receive the claim and all required information by March 31st.

We will evaluate all information reasonably available to us and make a good faith determination of whether a Service Credit is owed. We will use commercially reasonable efforts to process claims during the subsequent month and within forty-five days of receipt. If we determine that a Service Credit is owed to you, we will apply the Service Credit to the end of your Service Offering subscription term. Service Credits may not be exchanged for or converted to monetary amounts.

Exclusions

This SLA does not apply to any unavailability, suspension or termination of the Service Offerings, or any other Axon Evidence performance issues: (a) caused by factors outside of our reasonable control, including any force majeure event, terrorism, sabotage, virus attack or Customer internet access and related problems beyond the demarcation point of the Service Offerings (including Domain Name Server issues outside our direct control); (b) that result from any actions or inactions of you or a third party; (c) that result from your communication delays, including wrong, bad or missing data, improperly formatted, organized or transmitted data received from you, or any other data issues related to the communication or data received from or through you; (d) that result from your equipment, software or other technology and/or third party equipment, software or other technology (other than third party equipment within our direct control); (e) that result from any maintenance as provided for pursuant to this SLA; or (f) arising from our suspension and termination of your right to use the Service Offerings in accordance with the agreement for the provision of Axon Evidence between you and Axon.

Planned Maintenance

Axon may schedule and plan maintenance windows outside of the timeframes detailed in “Scheduled Routine Maintenance”.

Scheduled Routine Maintenance: routine maintenance is scheduled on the fourth Tuesday of each month in Pacific Time (PT)*. Axon reserves the right to change this schedule, provided that changes shall be posted on Axon’s Cloud Services Maintenance Schedule athttps://www.axon.com/products/axon-evidence/maintenance-schedule:

DEPLOYMENT	DAY OF WEEK (PT)	PACIFIC TIME (PT)*	COORDINATED UNIVERSAL TIME (UTC)
Australia**	Tuesday	02:00 - 05:00	10:00 - 12:00
Brazil	Tuesday	10:00 - 11:00	17:00 - 19:00
European Union	Tuesday	13:00 - 14:00	20:00 - 22:00
United Kingdom**	Tuesday	14:00 - 15:00	21:00 - 23:00
Canada	Tuesday	16:00 - 17:00	23:00 - 01:00***
United States - Federal Region	Tuesday	17:00 - 18:00	00:00 - 02:00****
United States	Tuesday	21:00 - 22:00	04:00 - 06:00****

* Pacific Time (PT) observes daylight savings. UTC time data is reflective of maintenance windows regardless of daylight savings observation. Refer to UTC to calculate local time of maintenance.
** Maintenance performed on UK and AU a week after the fourth Tuesday of each month
*** Time period includes time on Wednesday in UTC
**** Time period is on Wednesday in UTC

Emergency Maintenance

Patches and emergency releases are used to deliver ad-hoc application fixes and are typically seamless to customers. Whenever possible, patches and emergency releases are deployed during off-peak hours and without Downtime. Emergency releases are conducted on an as-needed basis and can occur any day of the week.

Axon Device Firmware Updates

Firmware updates and enhancements to Axon devices are pushed from Axon Cloud Services. Customer interaction is not required. Updates are retrieved, installed and validated during the normal device charging and data transfer process. Firmware updates are systemically rolled out to customers in waves.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Notification of Maintenance

Notification of upcoming routine maintenance is not provided in advance unless there has been a change to the Scheduled Routine Maintenance. Approximately one (1) week prior to the routine maintenance, release notes are provided to Axon Evidence customer administrators.

If planned maintenance is required, Axon will communicate via email to Axon Evidence Customer administrators at least one (1) week in advance.

In the event of scheduled routine or planned maintenance that requires customer action (e.g. updating network settings), Axon will communicate via email at least sixty (60) days prior to the maintenance. Please Note: If emergency maintenance that requires customer action is necessary, Customers may be notified less than one (1) week in advance.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Part 2 - Customer Support Response Statement

Axon has implemented Incident response policies and practices for Axon devices and Axon Cloud Services, which follow industry best practice standards. Axon reserves the right to change the terms of these response policies.

Definitions

- "**Business Day**" means Monday to Friday 08:00 – 17:30, excluding public holidays.
- "**BOD**" means the Board of Directors
- **"Incident"** means a fault related to an Axon product or Axon Cloud Services experienced by the Customer.
- **"Targeted Response Time"** means the target timeframe for Axon to respond to Customer and/or escalate the Incident within the "*Axon Customer Support Solution".*
- **"Targeted Resolution Time"** means the target timeframe for the full resolution of the Incident. It excludes time delays caused by Customer or third parties outside of Axon's reasonable control.
- "**Workaround**" means a method for overcoming an Incident allowing the Customer to operate the core function of Axon devices and/or Axon Cloud Services.

Incident Classifications and Response Times

Incident Classification	Description	Targeted Response Time	Targeted Resolution Time	Customer Response Commitment
Severity 1	- Business critical function is down - Material impact to Customer's business - No Workaround exists	Less than 1 hour	Less than 24 hours	Customer shall remain accessible by phone for troubleshooting from the time a Severity 1 issue is logged until such time as it is resolved.
Severity 2	- Business critical function is impaired or degraded - There are time-sensitive issues that materially impact ongoing production - Workaround exists, but it is only temporary	1 Business Day	Less than 2 weeks	Customer shall remain accessible by phone or other electronic means for troubleshooting from the time a Severity 2 issue is logged until such time as it is resolved.
Severity 3	- Non-critical function down or impaired - Does not have significant current production impact - Performance is degraded	1 Business Day	Mutually agreed timeframe based on prioritization	

For Customers with 4 levels of Incident classification such as Critical, High, Medium and Low, Axon will recognize this and will consider the two highest categories as “Severity 1”. For example: Critical and High would be classed as a “Severity 1” Incident and managed accordingly.

Severity Level Determination

Customer shall reasonably self-diagnose each Incident and recommend to Axon an appropriate severity level designation. Axon shall validate your severity level designation or notify you of a proposed change to a higher or lower level with justification for the proposal. In the event of a conflict regarding the appropriate severity level designation, each party shall promptly escalate such conflict to its management team for resolution through consultation between the parties’ management, during which time the parties shall continue to handle the Incident support in accordance with Axon’s severity level designation. In the rare case a conflict requires a management discussion, both parties shall be available within one hour of the escalation.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Escalation

Escalation Level	Description	Escalation	Targeted Response Time	Targeted Resolution Time
Tier 1	**Basic technical or commercial issues - Non-time critical**	None	Less than 6 hours	Less than 1 business day
Tier 2	**Advanced technical or commercial issues - Non-time critical.**	BoD / Country Manager	Less than 4 hours	Less than 1 business day
Tier 3	**Technical or commercial issues - Time critical**	Country Manager to Axon BoD/Support Team	Less than 2 hours	Less than 1 business day

Exclusions

This Customer Support Response Statement does not apply to any unavailability, suspension, or termination of the Service Offerings caused by all the exclusion events under Part 1 of this document, nor to services or hardware not within Axon's control. Hardware warranty will be dependent on Customer's specific agreement with Axon and levels covered. Please see Part 3 for "Return of Merchandise Authorization".

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Part 3 – Return of Merchandise Authorization (RMA)

The *Axon Evidence Device Return Service* provides Customers with the ability to manage return merchandise authorization (RMA) requests within Axon Evidence.com. Authorized users will be able to create, update, save, submit, and track device returns for their agency in one place. Hardware warranty will be dependent on Customer's specific agreement with Axon and levels covered.

Targeted Replacement Time:

Axon aims to have replacement devices shipped to the Customer within 48 hours from receipt of the faulty device (excluding weekends or public holidays).

Exclusions

The Return of Merchandise Authorization does not apply to services or hardware not within Axon's control. Axon's customer support will provide detail on return times as soon as possible to the Customer's point of contact.

N.B. *TASER products (conducted electrical devices) are not covered under the terms of this Return of Merchandise Authorization. Customers are requested to contact Customer support directly to report a faulty TASER device.*

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

AXON CLOUD SERVICES PRIVACY POLICY

Last Updated: August 9th, 2021

*This Axon Cloud Services Privacy Policy ("**Policy**") applies only to the information that Axon Enterprise, Inc. ("**Axon**") collects and you or your employer (collectively, "**Customer**") provide to Axon in connection with Customer's use of Axon Cloud Services (as defined below). Axon's marketing sites and other public websites are governed by the Axon Privacy Policy. Usage of Axon Citizen is governed by the Axon Citizen Privacy Policy.*

Unless otherwise provided in this Policy, this Policy is subject to the terms of the Master Services Purchasing Agreement, or other similar agreement, if any, between Axon and Customer ("**Agreement**"). To the extent this Policy contains terms and conditions that differ from those contained in the Agreement, the Agreement shall control. A concept or principle covered in this Policy shall apply and be incorporated into all other provisions of the Agreement in which the concept or principle is also applicable, notwithstanding the absence of any specific cross-reference thereto. All capitalized and defined terms referenced, but not defined, in this Policy shall have the meanings assigned to them in the Agreement.

Axon complies with the EU-U.S. Privacy Shield Framework and the Swiss-U.S. Privacy Shield Framework ("Privacy Shield") as set forth by the U.S. Department of Commerce regarding the collection, use, and retention of personal information transferred from the European Union, the United Kingdom, and Switzerland to the United States in reliance on Privacy Shield. Axon has certified to the U.S. Department of Commerce that it adheres to the Privacy Shield Principles with respect to such information. If any conflict exists between the terms of this Policy and the Privacy Shield Principles, the Privacy Shield Principles shall govern. To learn more about the Privacy Shield program, and to view our certification, please visit https://www.privacyshield.gov/.

By using Axon Cloud Services, Customer acknowledges that Customer has read and understand this Policy and Customer agrees to be bound by its terms and conditions. Axon may occasionally update this Policy. When Axon posts changes, Axon will revise the "last updated" date at the top of this page. Customer's continued use of

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Cloud Services will signify Customer's agreement and acceptance to any such changes.

Definitions

- "**Axon Cloud Services**" means Axon's web services hosted on evidence.com including **Axon Evidence**, **Axon Records,** and **Axon Dispatch**, and other related offerings, including, without limitation, interactions between Axon Cloud Services and Axon Products (as defined below).
- "**Axon Products**" means:
  (1) Axon Cloud Services;
  (2) devices sold by Axon (including, without limitation, conducted energy weapons, cameras, sensors, and docking systems) (collectively, "**Axon Devices**");
  (3) other software offered by Axon (including, without limitation, Axon Capture, Axon Evidence SYNC, Axon Device Manager, Axon View, Axon Interview, Axon Commander, Axon Uploader XT, and Axon View XL) (collectively, "**Axon Client Applications**"); and
  (4) ancillary hardware, equipment, software, services, cloud-based services, documentation, and software maintenance releases and updates. Axon Products do not include any third-party applications, hardware, warranties, or the 'my.evidence.com' services.
- "**Customer Data**" means:
  (1) "Customer Content", which means data uploaded into, ingested by, or created in Axon Cloud Services within Customer's tenant, including, without limitation, media or multimedia uploaded into Axon Cloud Services by Customer ("Evidence"); and
  (2) "Non-Content Data", which means:
  (a) "Customer Entity and User Data", which means Personal Data and non-Personal Data regarding Customer's Axon Cloud Services tenant configuration and users;
  (b) "Customer Entity and User Service Interaction" Data which means data regarding Customer's interactions with Axon Cloud Services and Axon Client Applications;
  (c) "Service Operations and Security Data", which means data within service logs, metrics and events and vulnerability data, including, without limitation: (i) application, host, and infrastructure logs; (ii) Axon Device and Axon Client Application logs; (iii) service metrics and events logs; and (iv) web transaction logs;
  (d) "Account Data", which means information provided to Axon during sign-up, purchase, or administration of Axon Cloud

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Services, including, without limitation, the name, address, phone number, and email address Customer provides, as well as aggregated usage information related to Customer's account and administrative data associated with the account; and (e) "Support Data", which means the information Axon collects when Customer contacts or engages Axon for support, including, without limitation, information about hardware, software, and other details gathered related to the support incident, such as contact or authentication information, chat session personalization, information about the condition of the machine and the application when the fault occurred and during diagnostics, system and registry data about software installations and hardware configurations, and error-tracking files.

For purposes of clarity, Customer Content does not include Non-Content Data, and Non-Content Data does not include Customer Content.

- **"Data Controller"** means the natural or legal person, public authority, or any other body which alone or jointly with others determines the purposes and means of the processing of Personal Data (as defined below).
- **"Data Processor"** means a natural or legal person, public authority or any other body which processes Personal Data on behalf of the Data Controller.
- **"Data Exporter"** means the Data Controller who transfers the Personal Data.
- **"Data Importer"** means the Data Processor who agrees to receive from the Data Exporter Personal Data intended for processing on Data Exporter's behalf after the transfer in accordance with the Agreement and who is not subject to a third country's system ensuring adequate protection with in the meaning of the General Data Protection Regulation (EU) 2016/679 of the European Parliament ("**GDPR**")
- **"Personal Data"** means any information relating to an identified or identifiable natural person. An identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.
- "**Processing**" means any operation or set of operations which is performed on Personal Data or on sets of Personal Data, whether or not by automated means, such as collection, recording, organization, structuring, storage, adaptation or alteration, retrieval, consultation, use, disclosure by transmission,

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

dissemination or otherwise making available, alignment or combination, restriction, erasure or destruction.

- **“Sub-processor”** means any processor engaged by the Data Importer or by any other sub-processor of the Data Importer who agrees to receive from the Data Importer or from any other sub-processor of the Data Importer Personal Data exclusively intended for processing activities to be carried out on behalf of the Data Exporter after the transfer in accordance with its instructions, the terms of the Clauses and the terms of the written subcontract.

Axon's Role

Axon is a Data Processor of Customer Content. Customer controls and owns all right, title, and interest in and to Customer Content and Axon obtains no rights to the Customer Content. Customer is solely responsible for the uploading, sharing, withdrawal, management and deletion of Customer Content. Customer grants Axon limited access to Customer Content solely to provide and support Axon Cloud Services to and for Customer and Customer’s end-users. Customer represents and warrants to Axon that: (1) Customer owns Customer Content; (2) and Customer Content, and Customer’s end-users’ use of Customer Content and Axon Cloud Services, does not violate this Policy or applicable data protection laws and regulations.

Axon may also collect, control, and process Non-Content Data. Axon is a Data Controller for Non-Content Data. Axon collects, controls, and processes Non-Content Data to provide Axon Cloud Services and to support the overall delivery of Axon Products including business, operational, and security purposes. With Non-Content Data, Axon may analyze and report anonymized and aggregated data to communicate with external and internal stakeholders. In regard to Customer Entity & User Data, Axon is a Data Controller and Customer is an independent Data Controller, not a joint Data Controller with Customer.

Data Collection and Processing Activities

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

CUSTOMER CONTENT

Axon will only use Customer Content to provide Customer Axon Cloud Services. Axon will not use Customer Content for any advertising or similar commercial purposes.

Axon periodically upgrades or changes Axon Cloud Services to provide customers with new features and enhancements in alignment with the Axon Evidence Maintenance Schedule. Axon communicates such upgrades or changes to customers one week prior to release via mechanisms outlined in the Maintenance Schedule. Changes to Axon Cloud Services may increase the capabilities of the service and ways in which Customer Content can be processed.

NON-CONTENT DATA

Non-Content Data includes data, configuration, and usage information about customer's Axon Cloud Services tenant, Axon Devices, Axon Client Applications, and users that is transmitted or generated when using Axon Products. Non-Content Data includes the following:

Customer Entity And User Data

Customer Entity and User Data includes personal and non-personal data regarding Customer's Axon Cloud Services tenant configuration and users. Axon uses Customer Entity and User Data to: (1) provide Axon Cloud Services, including, without limitation, user authentication and authorization functionality; (2) improve the quality of Axon Products or provide enhanced functionality and features; (3) contact Customer to provide information about its account, tenant, subscriptions, billing, and updates to Axon Cloud Services, including, without limitation, information about new features, security and other technical issues; and (4) market our products or services to Customer via email, by sending promotional communication including targeted advertisements, or presenting a Customer with relevant offers.

Customer cannot unsubscribe from non-promotional communications
but may unsubscribe from promotional communications at any time.

Customer Entity and User Service Interaction Data

Customer Entity and User Service Interaction Data includes data regarding Customers' interactions with Axon Cloud Services and Axon Client Applications. Axon uses Customer Entity and User Service Interaction Data to improve the quality of Axon Products and provide enhanced functionality and features.

Service Operations and Security Data

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon uses Service Operations and Security Data to provide service operations and monitoring.

Account Data

Axon uses Account Data to provide Axon Cloud Services, manage Customer's accounts, market to, and communicate with Customer. Customer may unsubscribe from promotional communications at any time.

Support Data

Axon uses Support Data to resolve Customer's support incident, and to operate, improve, and personalize Axon Products. If Customer shares Customer Content to Axon in a support scenario, the Customer Content will be treated as Support Data but will only be used for resolving support incidents. Axon currently does not possess the capability to automatically delete Support Data from our support ticketing system. However, Axon is able to delete tickets that includes Support Data upon Agency's data deletion request via email to customerservice@axon.com. Legal restrictions may prevent Axon from deleting certain data temporarily.

Axon may provide support through phone, email, or online chat. With Customer's permission, Axon may use Guest Access ("GA") to temporarily navigate Customer's Axon Cloud Service's tenant to view data in order to resolve a support incident. Phone conversations, online chat sessions, or GA sessions with Axon support professionals may be recorded and/or monitored.

Server and Data Location

CUSTOMER CONTENT

Axon offers Axon Cloud Services in numerous geographic regions. Before creating an account in Axon Cloud Services, Customer determines where Axon will store Customer Content by designating an economic area.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

REGION CODE	ECONOMIC AREA	3RD PARTY INFRASTRUCTURE SUB-PROCESSORS	DATA CENTER LOCATION(S)
AU	Southeast Asia	Microsoft Azure	Canberra, ACT
LA	South America	Microsoft Azure	Sao Paulo, Brazil & Texas, United States
CA	Canada	Microsoft Azure	Toronto, ON & Quebec City, QC
EU	European Union	Amazon Web Services	Ireland *Starting Q2 2021, new customers will not be added to this region
EUR	European Union	Microsoft Azure	Netherlands, Ireland
UK	United Kingdom	Microsoft Azure and Amazon Web Services	London, England & Cardiff, Wales
US	United States	Microsoft Azure and Amazon Web Services	Texas & Virginia, United States
US	United States (Federal Region)	Microsoft Azure	Texas & Virginia, United States
ENT	Global	Microsoft Azure	Washington & Wyoming, United States

Axon ensures that all Customer Content in Axon Cloud Services remains within the selected economic area, including, without limitation, all backup data, replication sites, and disaster recovery sites. Customer selected economic areas can be determined through review of Customer's Axon Cloud Services URL. Customer URLs conform to the *<youragency>.<regioncode>.evidence.com* scheme with the exception of US customers where the scheme may exclude the region code and is *<youragency>.evidence.com*. US Federal customers conform to the scheme *<youragency>.us.evidence.com*

NON-CONTENT DATA

Customer Entity and User Data

Customer Entity and User Data is located in Customer's selected economic area for Customer Content. Customer Entity and User Data may be copied or transferred to the United States.

Customer Entity and User Service Interaction Data

Customer Entity and User Service Interaction Data is located in Customer's selected economic area for Customer Content and the United States.

Service Operations and Security Data

Service Operations and Security Data is located in Customer's selected economic area for Customer Content and the United States.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Account Data and Support Data

Account and Support data is located is in the United States and may be located in Customer's selected economic area for Customer Content.

Information Sharing

Axon may transfer data with its direct and indirect subsidiaries and Sub-processors, including, without limitation, service providers and other partners to support the overall delivery of Axon Products as described in “Data Collection and Processing Activities” section of this Policy.

Axon exercises commercially reasonable efforts in connection with contractual obligations to ensure its Sub-processors are compliant with all applicable data protection laws and regulations surrounding the Sub-processors access and scope of work in connection with Customer Content.

Customer consents to the transfer of Customer Content to Axon's Sub-processors for the purpose of storing Customer Content. Such Sub-processors responsible for storing Customer Content are contracted by Axon for data storage services. Ownership of Customer Content remains with Customer.

Axon may hire Sub-processors to provide or enhance Axon Products on its behalf. Axon will only permit any such Sub-processors to obtain Customer Content from Axon Cloud Services to deliver services to Axon and will be prohibited from using Customer Content for any other purpose. Axon may engage new Sub-processors. Axon will give Customer notice (by updating the website) of any new Sub-processor.

Prior to onboarding Sub-processors, Axon conducts an audit of the security and privacy practices of Sub-processors to ensure Sub-processors provide a level of security and privacy appropriate to its access to data and scope of services.

Under Privacy Shield's “Onward Transfer Principle”, Axon remains responsible for personal data that may be shared with Axon's Sub-processors.

Customer can transfer data from Axon Cloud Services to third parties. Customer must ensure data sharing agreements are in place with third parties to protect data throughout its lifecycle.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Axon Sub-Processors

Understand the server locations, data processed, and functions performed.
Axon maintains an up-to-date list of the names and locations of all Sub-processors. This list is below.

If you are a current Axon Cloud Services customer with a data processing agreement in place with Axon, you may subscribe to receive notifications of a new Sub-processor(s) before Axon authorizes any new Sub-processor to process personal data in connection with the provision of your service.

You can subscribe to receive email notifications for changes to Axon Cloud Services Sub-processor(s) by submitting a request here.

For a complete list of Axon Sub-Processors, click here.

TELECOMMUNICATION SUB-PROCESSORS

Axon Body 3 includes embedded cellular technologies used to connect to telecommunication networks in order to provide connectivity between Axon Body 3 and Axon Cloud Services. Cellular technologies enable Axon Aware services. Customer's Axon Body 3 cameras will send data to the respective Axon Cloud Services region selected telecommunications providers as needed to enable cellular connectivity. Data includes Personal Data, such as location data. For Axon Body 3, Axon manages all cellular registration and account management associated to the cellular subscription. Personal Data of Customers is not collected by Axon or telecommunications providers for the purposes of cellular account management.

Outlined below is the telecommunication sub-processors. In regions where there are more than one telecommunication sub-processor, Axon will manage customers' Axon Body 3 cellular registration.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

REGION CODE	ECONOMIC AREA	TELECOMMUNICATION SUB-PROCESSORS
AU	Southeast Asia	Telstra
LA	South America	TBD / TBA
CA	Canada	Telus
EU/EUR	European Union	T-Systems
UK	United Kingdom	BTEE
US	United States	Verizon and AT&T (FirstNet)
US	United States (Federal Region)	Verizon and AT&T (FirstNet)
ENT	Global	Verizon and AT&T (FirstNet)

Customer URLs conform to the *<youragency>.<regioncode>.evidence.com* scheme with the exception of US customers where the scheme may exclude the region code and is *<youragency>.evidence.com*. US Federal customers conform to the scheme *<youragency>.us.evidence.com*

Required Disclosures

Axon will not disclose Customer Content except as compelled by a court or administrative body or required by any law or regulation. Axon will notify Customer if any disclosure request is received for Customer Content so Customer may file an objection with the court or administrative body.

Customer's Access and Choice

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Customer Content

Customer can access Customer's tenant to manage Customer Content.

Non-Content Data

Within the scope of Axon's authorization to do so, and in accordance with Axon's commitment under the Privacy Shield, Axon will work with Customers to provide access to Personal Data about Customer that Axon or Sub-processors holds. Axon will also take reasonable steps to enable Customers to correct, amend, or delete Personal Data that is demonstrated to be inaccurate.

If at any time after registering an account on Axon Cloud Services you desire to update Personal Data you have shared with us, change your mind about sharing Personal Data with us, desire to cancel your Customer account, or request that Axon no longer use provided Personal Data to provide you services, please contact us at privacy@axon.com. We will retain and use Personal Data for as long as needed to provide you services, comply with our legal obligations, resolve disputes, and enforce our agreements.

Certain data processing is determined by Customer based on Axon Product usage, Customer network or device configuration, and administrative settings made available with Axon Cloud Services or Axon Client Applications:

Axon Body 3 WiFi Positioning

Axon Body 3 cameras offer customers a feature to enhance location services where GPS/GNSS signals may not be available, for instance within buildings or underground. Customer administrators can manage their choice to use this service within the administrative features of Axon Cloud Services. When WiFi Positioning is enabled, Non-Content and Personal Data including location, device and network information data will be sent to Skyhook Holdings, Inc (Skyhook) to facilitate the WiFi Positioning functionality. Skyhook will act as both a data sub-processor (as reflected in this policy) and as a data controller. Skyhook becomes a data sub-processor for Axon when Skyhook processes data from Axon Body 3 devices to determine a location. Skyhook acts a data controller when it collects data sent from Axon Body 3 cameras to maintain their services and to develop new products, services or datasets. Data controlled by Skyhook is outside the scope of the Axon Cloud Services Privacy Policy and is subject to the Skyhook Services Privacy Policy.

Client Push Notifications

Axon Products leverage push notification services made available by mobile operating system providers (i.e. Google’s Cloud Messaging and Apple’s Push Notification Service to deliver functional notifications to client applications. Push notification services can be managed by leveraging notification settings made available in both mobile applications and the mobile operating system.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

User Analytics

Customers can opt-out of user analytics tracking on Axon Cloud Services by disabling cookies or preventing Customer's browser or device from accepting new cookies. To prevent data from being collected by Mixpanel, network or device access to *.mixpanel.com should be blocked

Service Support

Mobile client application crash analytics are used provide Axon personnel insight to crashes when using Axon client applications. To opt out of crash reporting, network or device access to *.crashlytics.com should be blocked.

Geolocation Services

Geolocation services are critical to proper user functionality of many of Axon products. However, customers can chose to opt out of mapping and geolocation functionality by blocking network or device access to *.mapbox.com and *.arcgisonline.com

Data Security Measures

Axon is committed to help protect the security of Customer Data. Axon has established and implemented policies, programs, and procedures that are commercially reasonable and in compliance with applicable industry practices, including administrative, technical and physical safeguards to protect the confidentiality, integrity and security of Customer Content and Non-Content Data against unauthorized access, use, modification, disclosure or other misuse.

Axon will take appropriate steps to ensure compliance with the data security measures by its employees, contractors and Sub-processors, to the extent applicable to the respective scope of performance.

CONFIDENTIALITY

Customer Content and Non-Content Data is encrypted in transit over public networks. Customer Content is encrypted at rest in all Axon Cloud Service regions.

Axon protects all Customer Content and Non-Content Data with strong logical access control mechanisms to ensure only users with appropriate business needs have access

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

to data. Third-party specialized security firms periodically validate access control mechanisms. Access control lists are reviewed periodically by Axon.

INTEGRITY

As Evidence is ingested into Axon Cloud Services, a Secure Hash Algorithm (“SHA”) checksum is generated on the upload device and again upon ingestion into Axon Cloud Services. If the SHA checksum does not match, the upload will be reinitiated. Once upload of Evidence is successful, the SHA checksum is retained by Axon Cloud Services and is made viewable by users with access to the Evidence audit trail for the specific piece of Evidence. Tamper-proof audit trails are created automatically by Axon Cloud Services upon ingestion of any Evidence.

AVAILABILITY

Axon takes a comprehensive approach to ensure the availability of Axon Cloud Services. Axon replicates Customer Content over multiple systems to help to protect against accidental destruction or loss. Axon Cloud Services systems are designed to minimize single points of failure. Axon has designed and regularly plans and tests its business continuity planning and disaster recovery programs.

ISOLATION

Axon logically isolates Customer Content. Customer Content for an authenticated customer will not be displayed to another customer (unless Customers explicitly create a sharing relationship between their tenants or shared data between themselves). Centralized authentication systems are used across an Axon Cloud Service region to increase uniform data security.

Additional role-based access control is leveraged within Customer’s Axon Cloud Service tenant to define what users can interact with or access Customer Content. Customer solely manages the role based access control mechanisms within its Axon Cloud Services tenant.

Within the Axon Cloud Services supporting infrastructure, access is granted based on the principle of least privilege. All access must be approved by system owners and undergo at least quarterly user access reviews. Any shared computing or networking resource will undergo extensive hardening and is validated periodically to ensure appropriate isolation of Customer Content.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Non-Content Data is logically isolated within information systems such that only appropriate Axon personnel have access.

PERSONNEL

Axon personnel are required to conduct themselves in a manner consistent with applicable law, the company's guidelines regarding confidentiality, business ethics, acceptable usage, and professional standards. Axon personnel must complete security training upon hire in addition to annual and role-specific security training.

Axon personnel undergo an extensive background check process to the extent legally permissible and in accordance with applicable local labor laws and statutory regulations. Axon personnel supporting Axon Cloud Services are subject to additional role-specific security clearances or adjudication processes, including Criminal Justice Information Services background screening and national security clearances and vetting.

Data Breach

NOTIFICATION

If Axon becomes aware that Customer Data has been accessed, disclosed, altered, or destroyed by an unlawful or unauthorized party, Axon will notify relevant authorities and affected customers.

Within 48 hours of an incident confirmation, Axon will notify Customer administrators registered on Axon Cloud Services. Authorities will be notified through Axon's established channels and timelines. The notification will reasonably explain known facts, actions that have been taken, and make commitments regarding subsequent updates. Additional details are available in the Axon Cloud Services Security Incident Handling and Response Statement.

Data Portability, Migration, and

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Transfer Back Assistance

DATA PORTABILITY

Evidence uploaded to Axon Cloud Services is retained in original format. Evidence may be retrieved and downloaded by Customer from Axon Cloud Services to move data to an alternative information system. Evidence audit trails and system reports may also be downloaded in various industry-standard, non-proprietary formats.

DATA MIGRATION

In the event Customer's access to Axon Cloud Services is terminated, Axon will not delete any Customer Content during the 90 days following termination. During this 90-day period, Customer may retrieve Customer Content only if Customer has paid all amounts due (there will be no application functionality of the Axon Cloud Services during this 90-day period other than the ability for Customer to retrieve Customer Content). Customer will not incur any additional fees if Customer downloads Customer Content from Axon Cloud Services during this 90-day period. Axon has no obligation to maintain or provide any Customer Content after the 90-day period and thereafter, unless legally prohibited, may delete Customer Content upon termination as part of normal retention and data management instructions from customers. Upon written request, Axon will provide written proof that all Customer Content has been successfully deleted and removed from Axon Cloud Services.

POST-TERMINATION ASSISTANCE

Axon will provide Customer with the same post-termination data retrieval assistance that is generally made available to all customers. Requests for additional assistance to Customer in downloading or transferring Content will result in additional fees and Axon cannot warrant or guarantee data integrity or readability in the external systems.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

Data Retention, Restitution, and Deletion

Axon maintains internal disaster recovery and data retention policies in accordance with applicable laws and regulations. The disaster recovery plan relates to Axon's data and extends to Axon Cloud Services and Customer Content stored within. Axon's data retention policies relate to Axon's Non-Content data. Axon's data retention policies instruct for the secure disposal of Non-Content Data when such data is no longer necessary for the delivery and support of Axon product and services and in accordance with applicable regulations. As outlined below, Customer is responsible for adhering to its own retention policies and procedures.

Evidence Retention

Customer defines Evidence retention periods pursuant to Customer’s internal retention policies and procedures. Customer can establish its retention policies within Axon Cloud Services. Therefore, customer controls the retention and deletion of its Evidence within Axon Cloud Services. Axon Cloud Services can automate weekly messages summarizing upcoming agency-wide deletions to all customer Axon Cloud Services administrators. Customer users can receive a weekly message regarding Evidence uploaded within their user account to protect against accidental deletions. Customer can recover Evidence up to 7 days after Customer queues such Evidence for deletion. After this 7-day grace period, Axon Cloud Services initiates deletion of Evidence. Data deletion processing may occur asynchronously across storage systems and data centers. During and after data deletion processing, Evidence will not be recovered or recoverable by any party.

Accountability

As outlined herein, Axon is committed to maintaining compliance with relevant security and privacy standards to ensure the continued security, availability, integrity, confidentiality, and privacy of Axon Cloud Services and Customer Data stored within.

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

In addition to the security efforts outlined herein, Axon will maintain its ISO/IEC 27001:2013 certification or comparable assurances for Axon Cloud Services. Customers may review the certificate.

Social Media Publishing

Axon provides social media features that enable Customer's and their end users ("Users") to share Customer Content directly from the Evidence Detail page in Axon Evidence to social media websites ("Publish to Social Media Feature"). For example: when a User uploads a video directly to YouTube from Axon Evidence. This may include Customer Content such as video, audio, images or other types of media or multimedia; and the title, description and tags associated with those media. Customer Axon Evidence administrators can manage the enablement of this feature, for all Users, within the administrative functions of Axon Evidence. The use of this feature by Users may result in the collection or sharing of information about them, depending on the feature. The privacy and security practices of the social media website is not covered by this Policy, and Axon is not responsible for, or makes attestations regarding, their privacy or security practices. When Users enable the Publish to Social Media Feature, and/or publish content to a social media website using this feature, they acknowledge and agree to be bound by the terms of service and privacy policy(s), if applicable, of the social media website in which the Customer Content is published to. Axon encourages Users to review the terms of service and privacy policy(s) of the social media website, to make sure they understand the data that may be collected, used, and shared by the website.

- **Google LLC, (YouTube API Services)**: Axon uses YouTube's API services in connection with our Publish to Social Media Feature. When Users link, connect, or login ("Connect") their Google account(s) with Axon Evidence, they are agreeing to be bound by the YouTube Terms of Service (https://www.youtube.com/t/terms). In addition, they are directing Google to send Axon data as controlled by Google or as authorized by the User via their privacy settings at Google. Through YouTube's API services, Axon only accesses, collects, and stores a token which Axon uses to Connect the associated Google account(s) with Axon Evidence. The token is only used to enable a user to upload a video to YouTube and is not shared with external parties. Axon does not obtain or store the associated Google account(s) login credentials, through YouTube's API

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

services.

Google has settings that list which apps can connect to a Google account(s). When Users Connect an associated Google account(s) to Axon Evidence, Axon Evidence gets authorized in these settings as a connected site or app. If Users remove Axon Evidence from these settings, its access to the account is revoked. Users may revoke this access at any time by following the instructions here: https://help.axon.com/hc/en-us/articles/360052689392-Removing-Axon-Evidence-Access-to-Your-YouTube-Account. Revoking Axon Evidence access will prevent Users from publishing videos to YouTube from Axon Evidence.

Axon encourages Users to review YouTube's Terms of Service (https://www.youtube.com/t/terms) and Google's Privacy Policy (http://www.google.com/policies/privacy) to make sure they understand the data that may be collected, used, and shared by Google.

Insurance

Axon will maintain, during the term of the Agreement, a cyber-insurance policy and will furnish certificates of insurance following Customer's written request.

How to Contact Us

Axon commits to resolve complaints about Customer privacy and use of Axon Products. Complaints surrounding this Policy can be directed to Customer's local Axon representative or privacy@axon.com. If Customer has any questions or concerns regarding privacy and security of Customer Content or Axon's handling of Customer's Personal Data under Privacy Shield, please contact privacy@axon.com.

If Customer is an EU citizen and we are unable to satisfactorily resolve any complaint relating to the Privacy Shield, or if Axon fails to acknowledge Customer's complaint in a timely fashion, Customer can contact the relevant EU Data Protection Authorities (DPAs) or the Swiss Federal Data Protection and Information Commissioner (FDPIC). In certain circumstances, the Privacy Shield provides the right to invoke binding arbitration to resolve complaints not resolved by other means, as described in Annex I to the Privacy Shield Principles in each of the Privacy Shield Frameworks. Axon is

Envelope ID: F6119CB7-D198-4588-A136-B65FE2B441A2

subject to the investigatory and enforcement powers of the U.S. Federal Trade Commission.

Washington State Department of Enterprise Services

PARTICIPATING ADDENDUM
NASPO VALUEPOINT

PUBLIC SAFETY VIDEO SYSTEMS

Administered by the State of Oklahoma (hereinafter "Lead State")

MASTER AGREEMENT

Master Agreement No: OK-MA-145-21-100

Axon Enterprise, Inc.
(hereinafter "Contractor")
and
State of Washington
(hereinafter "Participating State")

WASHINGTON CONTRACT NO. 05720

This Participating Addendum for the above referenced Master Agreement ("Participating Addendum") is made and entered into by and between the State of Washington acting by and through the Department of Enterprise Services, a Washington State governmental agency ("Enterprise Services") and Axon Enterprise, Inc., a Delaware Corporation ("Contractor") and is dated and effective as of 5/15/2024 or the date of last signature, whichever is later. This Participating Addendum shall terminate upon the expiration or the termination of the Master Agreement, as amended, unless the Participating Addendum is terminated sooner in accordance with the terms set forth herein.

RECITALS

A. Pursuant to Legislative authorization codified in RCW 39.26.060, Enterprise Services, on behalf of the State of Washington, is authorized to participate in cooperative purchasing agreements to develop master agreements to procure goods and/or services and to make such competitively solicited and awarded contracts available to Washington state agencies and designated eligible purchasers consistent with terms and conditions set forth by Enterprise Services.

B. Enterprise Services timely provided public notice of the competitive solicitation process conducted by the above-referenced lead state through Washington's Electronic Business Solutions (WEBS) system.

C. The above-referenced Lead State, as part of its competitive solicitation process, evaluated all responses to its procurement and identified Contractor as an apparent successful bidder and awarded a Master Agreement to Contractor.

D. Enterprise Services has determined that participating in this Master Agreement is in the best interest of the State of Washington.

Envelope ID: 50681100-DBD8-4073-ABDB-D61C25601F04

E. The purpose of this Participating Addendum is to enable eligible purchasers, as defined herein, to utilize the Master Agreement as conditioned by this Participating Addendum.

AGREEMENT

NOW THEREFORE, in consideration of the mutual promises, covenants, and conditions set forth herein, the parties hereto hereby agree as follows:

1. SCOPE: This Participating Addendum covers the competitive procurement for Public Safety Video Systems led by the State of Oklahoma for use by state agencies and other entities located in the Participating State authorized by that state's statutes to utilize state contracts with the prior approval of the State's chief procurement official.

- Category 1: Body Worn Video Cameras and Recording Devices
- Category 2: Vehicle Mounted Video and Recording Devices
- Category 4: Interview/Interrogation Room Video and Recording
- Category 5: Video Storage, Data Security, Software and Peripherals

2. PARTICIPATION: Use of specific NASPO ValuePoint cooperative contracts by agencies, political subdivisions and other entities (including cooperatives) authorized by an individual state's statutes to use state contracts are subject to the prior approval of the respective State chief procurement official. Issues of interpretation and eligibility for participation are solely within the authority of the State chief procurement official. Pursuant to this Participating Addendum, the Master Agreement may be utilized by the following ("Purchasing Entities" or "Purchasers"):

(a) WASHINGTON STATE AGENCIES. All Washington state agencies, departments, offices, divisions, boards, and commissions.

(b) WASHINGTON STATE INSTITUTIONS OF HIGHER EDUCATION (COLLEGES). Any the following specific institutions of higher education in Washington:

1. State universities – i.e., University of Washington & Washington State University;
2. Regional universities – i.e., Central Washington University, Eastern Washington University, & Western Washington University
3. Evergreen State College;
4. Community colleges; and
5. Technical colleges.

(c) CONTRACT USAGE AGREEMENT PARTIES. The Master Agreement also may be utilized by any of the following types of entities that have executed a Contract Usage Agreement (CUA) with Enterprise Services:

- Political subdivisions (e.g., counties, cities, school districts, public utility districts, ports) in the State of Washington;
- Federal governmental agencies or entities;
- Public-benefit nonprofit corporations (i.e., § 501(c)(3) nonprofit corporations that receive federal, state, or local funding); and
- Federally-recognized Indian Tribes located in the State of Washington.

Envelope ID: 50681100-DBD8-4073-ABDB-D61C25601F04

By placing an order under this Participating Addendum, each Purchasing Entity agrees to be bound by the terms and conditions of this Participating Addendum, including the Master Agreement. Each Purchasing Entity shall be responsible for its compliance with such terms and conditions.

3. PARTICIPATING STATE MODIFICATIONS OR ADDITIONS TO MASTER AGREEMENT:

3.1. **WASHINGTON'S ELECTRONIC BUSINESS SOLUTIONS (WEBS) SYSTEM**: Within seven (7) days of execution of this Participating Addendum, Contractor shall register in the Washington State Department of Enterprise Services' Electronic Business Solutions (WEBS) System at WEBS. Contractor shall ensure that all of its information therein is current and accurate and that, throughout the term of the Master Agreement, Contractor shall maintain an accurate profile in WEBS.

3.2. **WASHINGTON'S STATEWIDE PAYEE DESK**: To be paid for contract sales, Contractors must register with Washington's Statewide Payee Desk. Washington state agencies cannot make payments to a contractor until it is registered. Registration materials are available here: Receiving Payment from the State.

3.3. **CONTRACT SALES REPORTING:** Contractor shall report total contract sales quarterly to Enterprise Services, as set forth below.

(a) REPORTING. Contractor shall report quarterly Contract sales in Enterprise Services' Contract Sales Reporting System. Enterprise Services will provide Contractor with a login password and a vendor number.

(b) DATA. Each sales report must identify every authorized Purchasing Entity by name as it is known to Enterprise Services and its total combined sales amount invoiced during the reporting period (i.e., sales of an entire agency or political subdivision, not its individual subsections). The "Miscellaneous" option may be used only with prior approval by Enterprise Services. Upon request, Contractor shall provide contact information for all authorized Purchasing Entities specified herein during the term of this Participating Addendum. Refer sales reporting questions to the Primary Contact set forth below. If there are no contract sales during the reporting period, Contractor must report zero sales.

(c) DUE DATES FOR CONTRACT SALES REPORTING. Quarterly Contract Sales Reports must be submitted electronically by the following deadlines for all sales invoiced during the applicable calendar quarter:

QUARTER	FOR SALES MADE IN CALENDAR QUARTER ENDING	CONTRACT SALES REPORT	
		DUE BY	PAST DUE
1	January 1 – March 31	April 30	May 1
2	April 1 – June 30	July 31	August 1
3	July 1 – September 30	October 31	November 1
4	October 1 – December 31	January 31	February 1

3.4. **VENDOR MANAGEMENT FEE**: Contractor shall pay to Enterprise Services a vendor management fee ("VMF") of 1.25 percent on the purchase price for all contract sales (the purchase price is the total invoice price less applicable sales tax) authorized by this Participating Addendum.

(a) The sum owed by Contractor to Enterprise Services as a result of the VMF is calculated as follows:

Amount owed to Enterprise Services = Total contract sales invoiced (not including sales tax) x .01250.

(b) The VMF must be rolled into Contractor's current pricing. The VMF must not be shown as a separate line item on any invoice unless specifically requested and approved by Enterprise Services.

(c) Enterprise Services will invoice Contractor quarterly based on contract sales reported by Contractor. Contractor shall not remit payment until it receives an invoice from Enterprise Services. Contractor's VMF payment to Enterprise Services must reference the following:

- Invoice number associated with payment
- This Washington Contract No.: **05720**
- The NASPO Master Agreement No.: **OK- MA-145-21-100**
- The year and quarter for which the VMF is being remitted, and
- Contractor's name as set forth in this Contract, if not already included on the face of the check.

(d) Contractor's failure accurately and timely to report total net sales, to submit timely usage reports, or to remit timely payment of the VMF to Enterprise Services, may be cause for Enterprise Services to suspend or terminate this Participating Addendum or exercise any other remedies as provided by law.

(e) Enterprise Services reserves the right, upon thirty (30) days advance written notice, to increase, reduce, or eliminate the VMF for subsequent purchases.

(f) For purposes of the VMF, the parties agree that the initial management fee is included in the pricing. Therefore, any increase or reduction of the management fee must be reflected in contract pricing commensurate with the adjustment.

3.5. **NONDISCRIMINATION.**

(a) NONDISCRIMINATION REQUIREMENT. During the term of this Participating Addendum, Contractor, including any subcontractor, shall not discriminate on the bases enumerated at RCW 49.60.530(3). In addition, Contractor, including any subcontractor, shall give written notice of this nondiscrimination requirement to any labor organizations with which Contractor, or subcontractor, has a collective bargaining or other agreement.

(b) OBLIGATION TO COOPERATE. Contractor, including any subcontractor, shall cooperate and comply with any Washington state agency investigation regarding any allegation that Contractor, including any subcontractor, has engaged in discrimination prohibited by this Participating Addendum pursuant to RCW 49.60.530(3).

(c) DEFAULT. Notwithstanding any provision to the contrary, Enterprise Services may suspend Contractor, including any subcontractor, upon notice of a failure to participate and cooperate with any state agency investigation into alleged discrimination prohibited by this Participating Addendum, pursuant to RCW 49.60.530(3). Any such suspension will remain in place until Enterprise Services receives notification that Contractor, including any subcontractor, is cooperating with the investigating state agency. In the event Contractor, or subcontractor, is

Envelope ID: 50681100-DBD8-4073-ABDB-D61C25601F04

determined to have engaged in discrimination identified at RCW 49.60.530(3), Enterprise Services may terminate this Participating Addendum in whole or in part, and Contractor, subcontractor, or both, may be referred for debarment as provided in RCW 39.26.200. Contractor or subcontractor may be given a reasonable time in which to cure this noncompliance, including implementing conditions consistent with any court-ordered injunctive relief or settlement agreement.

(d) REMEDIES FOR BREACH. Notwithstanding any provision to the contrary, in the event of termination or suspension for engaging in discrimination, Contractor, subcontractor, or both, shall be liable for damages as authorized by law including, but not limited to, any cost difference between the Participating Addendum and the replacement or cover contract, which damages are distinct from any penalties imposed under Chapter 49.60, RCW. Enterprise Services and/or Purchasing Entities shall have the right to deduct from any monies due to Contractor or subcontractor, or that thereafter become due, an amount for damages Contractor or subcontractor will owe Enterprise Services and/or Purchasing Entities for default under this provision.

3.6. **CONTRACTOR REPRESENTATIONS AND WARRANTIES**: Contractor makes each of the following representations and warranties as of the effective date of this Participating Addendum and at the time any order is placed pursuant to the Master Contract. If, at the time of any such order, Contractor cannot make such representations and warranties, Contractor shall not process any orders and shall, within three (3) business days notify Enterprise Services, in writing, of such breach.

(a) QUALIFIED TO DO BUSINESS. Contractor represents and warrants that Contractor is (a) in good standing; (b) qualified to do business in the State of Washington; and (c) registered with the Washington State Department of Revenue and the Washington Secretary of State.

(b) TAXES. Contractor represents and warrants that Contractor is current, in full compliance, and has paid all applicable taxes owed to the State of Washington.

(c) LICENSES; CERTIFICATIONS; AUTHORIZATIONS; & APPROVALS. Contractor represents and warrants that Contractor possesses and shall keep current during the term of this Contract all required licenses, certifications, permits, authorizations, and approvals necessary for Contractor's proper performance of this Contract.

(d) SALES TAX. Contractor represents and warrants that, for all sales to Purchasing Entities in the State of Washington, Contractor shall calculate, collect, and remit, as appropriate, the applicable state and local sales tax on all invoices.

(e) WAGE VIOLATIONS. Contractor represents and warrants that, during the term of this Master Contract and the three (3) year period immediately preceding the award of the Master Contract, it is not determined, by a final and binding citation and notice of assessment issued by the Washington Department of Labor and Industries or through a civil judgment entered by a court of limited or general jurisdiction, to be in willful violation of any provision of Washington state wage laws set forth in RCW 49.46, 49.48, or 49.52.

(f) CIVIL RIGHTS. Contractor represents and warrants that Contractor complies with all applicable requirements regarding civil rights. Such requirements prohibit discrimination against individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based

Envelope ID: 50681100-DBD8-4073-ABDB-D61C25601F04

on their race, color, religion, sex, sexual orientation, gender identity, or national origin.

(g) EXECUTIVE ORDER 18-03 – WORKERS' RIGHTS (MANDATORY INDIVIDUAL ARBITRATION). INTENTIONALLY OMITTED

(h) IT POLICY & SECURITY COMPLIANCE: Contractor represents and warrants, that to the extent the following applies to products provided under this Participating Addendum, that Contractor shall use commercially reasonable efforts to provide applicable supporting documentation and assist the Purchasing Entities with verifying that the products comply with the Washington statewide information technology policies and other local information technology polices as applicable to the Purchasing Entity. Policies applicable to the Washington State Agencies are located on the following website at https://watech.wa.gov/policies. Prior to final execution of a Washington State Agency's Order with a Contractor, the Contractor's solution(s) may be subject to a Security Design Review performed by Washington Technology Solutions (WaTech) to ensure compliance with the State IT security policies.

(i) DATA OWNERSHIP AND USE. Agency's Data ("Agency's Data") shall have the same meaning as "Agency Content" as defined under the Axon Cloud Services Terms of Use Appendix of the Master Agreement. Agency's Data is and shall remain the sole and exclusive property of Purchaser. Contractor shall: (a) keep and maintain Agency Data in strict confidence to avoid unauthorized access, use, disclosure, or loss; and, (b) not use, sell, rent, transfer, distribute, or otherwise disclose or make available Agency's Data for Contractor's own purposes or for the benefit of anyone other than Purchaser without Purchaser's prior written consent. All Agency's Data must be stored and transmitted only in the contiguous United States of America. Notwithstanding the foregoing, any data collected under this Agreement and/or the Master Agreement will comply with CJIS requirements, including CJIS Section 5.10.1.5 – Cloud Computing, and will not be used for Marketing or AI purposes outside of AI required for use of certain products (i.e., Redaction, Auto-Transcription, etc.) without the State's express written consent.

(j) Section 7 of the Axon Cloud Services Terms of Use Appendix, as incorporated under the Master Agreement, is hereby deleted, and replaced with the following for purposes of this Participation Agreement only:

- Axon Body 3 Wi-Fi Positioning. Axon Body 3 cameras offer a feature to enhance location services where GPS/GNSS signals may not be available, for instance, within buildings or underground. Agency administrators can manage their choice to use this service within the administrative features of Axon Cloud Services. If Agency chooses to use this service, Axon must also enable the usage of the feature for Agency's Axon Cloud Services tenant. Agency will not see this option with Axon Cloud Services unless Axon has enabled Wi-Fi Positioning for Agency's Axon Cloud Services tenant. Any Data sent by use of enabling Wi-Fi positioning will be governed by Axon's Cloud Services Appendix and Privacy Policy.

(k) RETURN OF DATA. Upon notice of termination of the Purchase Order, Purchaser shall extract/download Data in accordance with the Master Agreement. After all Data is returned, Contractor shall within ninety (90) days delete all Data from all Contractor's

systems in compliance with procedures established by the National Institute of Standards and Technology (NIST). Within the same time period, Contractor shall certify to Purchaser the Contractor has destroyed all Data disclosed to it under the Purchase Order.

(l) DATA BREACH. Contractor must have an incident response process that follows National Institute of Standards and Technology (NIST) standards and includes breach detection, breach notification and breach response. Upon discovery or reasonable belief of any access, destruction, loss, theft, use or disclosure of Purchaser's Data by an unauthorized party ("Data Breach"), Contractor shall notify Purchaser by the fastest means available and also in writing. Contractor shall provide such notification within forty-eight (48) hours after Contractor reasonably believes there has been such a Data Breach. Contractor shall quarantine the Data Breach, ensure secure access to Data, and restore Services as needed to comply with terms and conditions of this Participating Addendum. In the event of the Data Breach, Contractor agrees to comply with all applicable state and federal statutory provisions, including but not limited to Revised Code of Washington (RCW) 19.255.010 and RCW 42.56.590. Where notifications are required to the public or regulators, Contractor shall coordinate and cooperate with Purchaser in the development of a communication plan, and promptly and at no cost, provide advance copies of any notifications for Purchaser's review before disseminating. If a Data Breach occurs and is found to be the result of Contractor's acts, omissions or negligence, Contractor shall assume complete responsibility for notification of affected parties, and be liable for all associated costs incurred by Purchaser in responding to or recovering from the Data Breach.

(m) ACCESSIBILITY. Contractor represents and warrants it shall exercise commercially reasonable efforts to comply with the Washington State Standard 188.10 – Minimum Accessibility Standard located at https://watech.wa.gov/policies/minimum-accessibility-standard. Contractor shall regularly review its systems and at the commencement of this Contract, and annually thereafter, certify to Enterprise Services that Contractor's Services meet Standard 188.10

(n) LICENSE OF EMBEDDED SOFTWARE. Intentionally Omitted

(o) GREEN/SUSTAINABLE. Contractor agrees that Contractor shall endeavor to supply and deliver goods in alignment with the State of Washington's green/sustainability strategy which, at a minimum is designed to minimize the use of unnecessary product packaging, reduce the use of toxic chemicals, and offer Purchasers, where practicable, 'green products' that provide equivalent performance. Accordingly, Contractor should review the below list of applicable state policies and standards and use commercially reasonable efforts to meet these requirements when supplying goods and services under this Participating Addendum:

1. PROHIBITED MATERIALS
    a. Expanded polystyrene. Contractor shall adhere to Washington State Department of Ecology's ban on expanded polystyrene void filling packaging (packing peanuts). This will expand to additional expanded polystyrene products July 1, 2024.
2. PROCUREMENT PRIORITIES

a. Nonmercury-Added Products. State Agencies and institutions of higher education are encouraged to purchase products that contain no mercury or the least amount of mercury-added compounds or components where commercially available and economically feasible.

b. Electronics Products Purchasing Preference. State Agencies and institutions of higher education are encouraged to purchase applicable electronics (e.g., servers, computers and displays, imaging equipment, mobile phones, and televisions) with an EPEAT Registry listing at the Bronze level or higher, or products that meet another environmental standard that reduces the use of hazardous substances.

c. Polychlorinated Biphenyls (PCBs): State Agencies and institutions of higher education are encouraged to minimize the purchase of products with Polychlorinated biphenyls, commonly known as PCBs.

3.7. **CONTRACTOR'S SALES AUTHORITY; PURCHASE ORDERS; & INVOICES:**

(a) CONTRACTOR'S SALES AUTHORITY. Pursuant to this Participating Addendum, Contractor is authorized to provide only those goods/services set forth in the Master Agreement as conditioned by this Participating Addendum. Contractor shall not represent to any Purchaser hereunder that it has any authority to sell any other materials, supplies, services and/or equipment.

(b) INVOICES. Contractor must provide a properly completed invoice to Purchaser. All invoices are to be delivered to the address indicated in the purchase order. Each invoice must include the:

- Washington Contract Number 05720;
- Lead State Master Agreement Number OK-MA-145-21-100;
- Contractor's statewide vendor registration number assigned by the Washington State Office of Financial Management (OFM); and
- Applicable Purchaser's order number.

Invoices must be prominently annotated by the Contractor with all applicable volume discount(s).

3.8. **TERMINATION; EXPIRATION; SUSPENSION; & REMEDIES.**

(a) TERMINATION Except as expressly provided anywhere else in the Master Agreement, The Purchaser may terminate Purchase Orders with no penalties or charges from the Contractor as follows: (a) upon the mutual written agreement of the parties; (b) where the breach is not cured within thirty (30) calendar days after written notice of breach is delivered to the breaching party, unless a different time for cure is otherwise stated in the Purchase Order; and (c) as otherwise expressly provided for in the Purchase Order. The Purchase Orders shall terminate automatically and without further action if a party becomes insolvent or is placed in receivership, reorganization, liquidation, or bankruptcy. In addition to any other available remedies, the non-breaching party may terminate the Purchase Order as provided in subsection (b) below without further liability by written notice to the breaching party. A termination for breach will not affect rights or obligations accrued or owed before the effective

date of the termination notice.

(b) TERMINATION FOR NONAPPROPRIATION OR REDUCTION OF FUNDS OR CHANGES IN LAW. Enterprise Services may suspend or terminate this Participating Addendum and Purchasers may suspend or terminate applicable Purchase Orders, in whole or in part, at the sole discretion of Enterprise Services or, as applicable, Purchaser, if Enterprise Services or, as applicable, Purchaser reasonably determines that: (a) a change in Federal or State legislation or applicable laws materially affects the ability of either party to perform under the terms of this Participating Addendum or applicable Purchase Order; or (b) that a change in available funds affects Purchaser's ability to pay under the applicable Purchase Order. A change of available funds as used in this section includes, but is not limited to a change in Federal or State funding, whether as a result of a legislative act or by order of the President or the Governor. If a written notice is delivered under this provision, Purchaser will reimburse Contractor for Goods properly ordered and/or Services properly performed until the effective date of said notice. Except as stated in this provision, in the event of termination for nonappropriation or reduction of funds or changes in law, Purchaser will have no obligation or liability to Contractor.

(c) TERMINATION FOR PUBLIC CONVENIENCE. The Purchasers, for public convenience, may terminate the Purchase Order; Provided, however, that such termination for public convenience must, in the Purchaser's judgment, be in the best interest of the State of Washington; and Provided further, that such termination for public convenience shall only be effective upon sixty (60) calendar days prior written notice; and Provided further, subject to and in accordance with the Master Agreement, that termination for public convenience shall not relieve any Purchaser from payment for Goods/Services already ordered as of the effective date of such notice. Except as stated in this provision, in the event of such termination for public convenience, Purchaser shall have no obligation or liability to Contractor.

(d) PURCHASER OBLIGATIONS – EXPIRATION. Upon expiration of this Participating Addendum, Purchaser shall accept and take delivery of all outstanding and not yet fulfilled Purchase Orders and pay Contractor the price as set out in the Master Agreement.

(e) CONTRACTOR OBLIGATIONS – EXPIRATION OR TERMINATION. Upon expiration or termination of this Participating Addendum, Contractor shall: (a) continue to fulfill its warranty obligations with respect to any Goods and/or Services sold hereunder and all provisions of the Participating Addendum that, by their nature, would continue beyond the expiration, termination, or cancellation of the Participating Addendum shall so continue and survive; and (b) promptly return to Purchaser all keys, badges, and other materials supplied by Purchaser for the performance of any Purchase Order entered into pursuant to this Participating Addendum.

4. **LEASE AGREEMENTS:** This Participating Addendum does not authorize Contractor to lease or rent equipment to Purchaser.

5. **PRIMARY CONTACTS:** The primary contact individuals for this Participating Addendum are as follows (or their named successors):

Participating State	Contractor

Envelope ID: 50681100-DBD8-4073-ABDB-D61C25601F04

Attn: Jolene Haney
State of Washington
Washington Dept. of Enterprise Services
PO Box 41411
Olympia, WA 98504-1411
Tel: (360) 407-2218
Email: jolene.haney@des.wa.gov

Attn: Legal
Axon Enterprise, Inc.
17800 B, 85th Street
Scottsdale, AZ 95255
Tel: (480) 905-2000
Email: Contracts@axon.com

6. **SUBCONTRACTORS:** Subcontractors, referred to in the Master Agreements Sub-processors or third-party subcontractors, are not authorized to accept payment directly from Purchasers. Contractor shall not subcontract, assign, or otherwise transfer its obligations under the Master Agreement and this Participating Addendum without Enterprise Services' prior written consent. Violation of this condition shall constitute a material breach establishing grounds for termination of this Participating Addendum.

   a. SUBCONTRACTOR AUTHORIZATION. Contractor is authorized, upon approval by Enterprise Services (approval requirement shall not include Contractor's Sub-processor(s)), a list of which is located here: sub-processors-details (axon.com). As of the date of execution of this Participation Agreement, Contractor's sub-processors are Microsoft and AWS ("Contractor's Sub-processor(s)"). Enterprise Services may sign up to receive notice 30 days prior written notice of any updates to Contractor's sub-processors by registering at the following link: go.axon.com/l/636291/2020-09-11/42s1s9. If Enterprise Services notifies Contractor of any issue with a new sub-processor within the 30 day notice window, the Parties will work together to find a mutually acceptable path forward, to utilize its Subcontractors to provide service support to Purchasers hereunder; *provided*, however, that such participation shall be in accordance with the terms and conditions set forth in the Master Agreement and this Participating Addendum. Contractor shall maintain a list of such Subcontractors utilized for this Participating Addendum, and upon request, promptly provide Enterprise Services with such list and any updates. Enterprise Services reserves the right to review the list of Subcontractors and approve or deny participation of any Subcontractors.

   b. CONTRACTOR RESPONSIBILITY FOR SUBCONTRACTORS. Contractor shall be responsible to ensure that all applicable requirements of the Master Agreement (including, but not limited to, insurance requirements, indemnification, Washington state business registration, etc.) flow down to any and all Subcontractors used for providing services under this Purchasing Addendum, excluding Contractor's Sub-processor(s) Microsoft and AWS. In no event shall the existence of a subcontract between Contractor and its Subcontractor operate to release or reduce Contractor's liability to the Participating State or any Purchaser for any breach of the Master Agreement or this Participating Addendum. As to Participating State and Purchasers hereunder, Contractor shall have full and complete responsibility and liability for any act or omission by Contractor's Subcontractors.

   c. SMALL, DIVERSE, AND VETERAN BUSINESS INCLUSION GOALS. Contractor agrees to make commercially reasonable efforts to include WA Small, Veteran and OMWBE certified businesses as Subcontractors, as defined by RCW 39.26.010 (22a), RCW 39.26.010 (22b), and RCW 43.60A.190 (2)

7. **ORDERS:** Unless the parties to the applicable purchase order agree in writing that another contract or agreement applies to such order, any order placed by a Purchaser for goods/services available from

this Master Agreement that clearly references this Participating Addendum or the Master Agreement shall be deemed to be a sale under (and governed by the prices and other terms and conditions of) the Master Agreement as conditioned by this Participating Addendum. For avoidance of doubt, notwithstanding anything to the contrary, if an order issued prior to expiration or cancellation of this Participating Addendum it can extend no more than five (5) years beyond the expiration or termination of this Participating Addendum, and during that period the terms of the Participating Addendum in addition to those in the executed Master Agreement shall govern that order and continue until all obligations by both the Contractor and Purchaser are completed. Pricing during this period must be in accordance with the terms of the Participating Addendum in addition to those in the executed Master Agreement. Contractor must continue to pay VMF for any active subscription agreements after expiration of this Participating Addendum. If a quote or any ordering documents from the Contractor contain any automatic renewal provisions, they will be considered null and void. Upon the expiration of the initial term of the order, the order shall terminate upon the order termination the parties will have no further obligations to each other under the Master Agreement and this Participating Addendum.

8. **TRAVEL COSTS:** Travel costs, if any, must be approved by Purchaser and set forth in the Purchase Order; *Provided*, however, that any such costs must be in accordance with the Washington Office of Financial Management's State Administrative & Accounting Manual (SAAM).

9. **GENERAL**:

8.1. TIME IS OF THE ESSENCE. Time is of the essence for each and every provision of this Contract.

8.2. PUBLIC INFORMATION. This Participating Addendum, all related documents, and all records created as a result of the Participating Addendum and Cooperative Purchasing Contracts, are subject to public disclosure as required by Washington's Public Records Act, RCW chapter 42.56. Consistent with the Public Records Act, to the extent that any such Contractor document or record – in whole or in part – includes information exempted or protected from disclosure by the Public Records Act, Contractor may mark such document or record – the exempted or protected portions only – with the specific basis for protection under the Public Records Act. In the event that Enterprise Services receives a public records disclosure request that pertains to such properly marked documents or records, Enterprise Services shall notify Contractor of such disclosure request and of the date that the records will be released to the requester unless Contractor, at Contractor's sole expense, timely obtains a court order enjoining such disclosure. In the event Contractor fails to file a motion for a court order enjoining such disclosure, Enterprise Services shall release the requested documents on the date specified. Contractor's failure properly to identify exempted or protected information or timely respond after notice of request for public disclosure has been given shall be deemed a waiver by Contractor of any claim that such materials are protected or exempt from disclosure.

8.3. INTEGRATED AGREEMENT; MODIFICATION. This Participating Addendum and Master Agreement, together with its exhibits, set forth the entire agreement and understanding of the Parties with respect to the subject matter and supersedes all prior negotiations and representations. This Participating Addendum may not be modified except in writing signed by the Parties.

8.4. NO EFFECT OF PURCHASER AGREEMENT TERMS AND CONDITIONS. Where a Purchasing Entity is required to accept or made subject to any terms and conditions in procuring Goods or

Envelope ID: 50681100-DBD8-4073-ABDB-D61C25601F04

Services, such terms and conditions are not binding and shall have no force or effect as to the Goods and Services to the extent that such terms and conditions modify this Participating Addendum or the Master Agreement.

8.5. AUTHORITY. Each party to this Participating Addendum, and each individual signing on behalf of each party, hereby represents and warrants to the other that it has full power and authority to enter into this Participating Addendum and that its execution, delivery, and performance of this Participating Addendum has been fully authorized and approved, and that no further approvals or consents are required to bind such party.

8.6. ELECTRONIC SIGNATURES. An electronic signature or electronic record of this Participating Addendum or any other ancillary agreement shall be deemed to have the same legal effect as delivery of an original executed copy of this Participating Addendum or such other ancillary agreement for all purposes.

8.7. COUNTERPARTS. This Participating Addendum may be executed in one or more counterparts, each of which shall be deemed an original, and all of which counterparts together shall constitute the same instrument which may be sufficiently evidenced by one counterpart. Execution of this Participating Addendum at different times and places by the parties shall not affect the validity thereof so long as all the parties hereto execute a counterpart of this Participating Addendum.

EXECUTED as of the date and year first above written.

State of Washington Contracts & Procurement Division Department of Enterprise Services P.O. Box 41411 Olympia, WA 98504-1411	**PARTICIPATING ADDENDUM AMENDMENT**	
	Participating Addendum.:	05720
Axon Enterprise, Inc. 17800 B, 85th Street Scottsdale, AZ, 95255	Amendment No.:	First
	Effective Date:	November 1, 2024

FIRST AMENDMENT

TO

PARTICIPATING ADDENDUM NO. 05720

PUBLIC SAFETY VIDEO SYSTEMS

This First Amendment ("Amendment") to Participating Addendum No. 05720 is made and entered into by and between the State of Washington acting by and through the Department of Enterprise Services, a Washington State governmental agency ("Enterprise Services") and Axon Enterprise, Inc., a Delaware Corporation ("Contractor") and is dated as of November 1, 2024.

RECITALS

A. Enterprise Services and Contractor (collectively the "Parties") entered into that certain Participating Addendum No. 05720 dated effective as of 05/15/2024 ("Contract").

B. The Parties now desire to amend Section 9. (General Provisions) subsection numbering from 8.1 to 8.7 to numbering as subsection 9.1 to 9.7.

C. The Parties further desire to amend the Contract to include a 'pay equality provision' as required by the Washington State Legislature. *See* LAWS OF 2023, ch. 475, § 919(4).

D. The amendment set forth herein is within the scope of the Contract.

AGREEMENT

NOW THEREFORE, in consideration of the mutual covenants and agreements set forth herein, the Parties hereby agree to amend the Contract as follows:

1. PAY EQUALITY. The following provision is added to the end of section 3.6 (Contractor Representations and Warranties) as a new subsection:

   (p) WASHINGTON STATE PAY EQUALITY FOR 'SIMILARLY EMPLOYED' INDIVIDUALS. Contractor represents and warrants that, among Contractor's employees, 'similarly employed' individuals are compensated as equals. For purposes of this provision, employees are similarly employed if the individuals work for the same employer, the performance of the job requires comparable skill, effort, and responsibility, and the jobs are performed under similar working conditions. Job titles alone are

not determinative of whether employees are similarly employed. Contractor may allow differentials in compensation for Contractor's workers based in good faith on any of the following: a seniority system; a merit system; a system that measures earnings by quantity or quality of production; a bona fide job-related factor or factors; or a bona fide regional difference in compensation levels. A bona fide job-related factor or factors may include, but is not limited to, education, training, or experience that is: consistent with business necessity; not based on or derived from a gender-based differential; and accounts for the entire differential. A bona fide regional difference in compensation level must be consistent with business necessity; not based on or derived from a gender-based differential; and account for the entire differential. Notwithstanding any provision to the contrary, upon breach of warranty and Contractor's failure to provide satisfactory evidence of compliance within thirty (30) days, Enterprise Services may suspend or terminate this Contract and any Purchaser hereunder similarly may suspend or terminate its use of the Contract and/or any agreement entered into pursuant to this Contract.

2. NO CHANGE OTHER THAN AMENDMENT. Except as amended herein, the Contract is unaffected and remains in full force and effect.

3. INTEGRATED AGREEMENT; MODIFICATION. This Amendment constitutes the entire agreement and understanding of the Parties with respect to the subject matter and supersedes all prior negotiations and representations. In the event of any conflict between this Amendment and the Contract or any earlier amendment, this Amendment shall control and govern. This Amendment may not be modified except in writing signed by the Parties.

4. AUTHORITY. Each party to this Amendment, and each individual signing on behalf of each party, hereby represents and warrants to the other that it has full power and authority to enter into this Amendment and that its execution, delivery, and performance of this Amendment has been fully authorized and approved, and that no further approvals or consents are required to bind such party.

5. ELECTRONIC SIGNATURES. An electronic signature or electronic record of this Amendment or any other ancillary agreement shall be deemed to have the same legal effect as delivery of an original executed copy of this Amendment or such other ancillary agreement for all purposes.

6. COUNTERPARTS. This Amendment may be executed in one or more counterparts, each of which shall be deemed an original, and all of which counterparts together shall constitute the same instrument which may be sufficiently evidenced by one counterpart. Execution of this Amendment at different times and places by the parties shall not affect the validity thereof so long as all the parties hereto execute a counterpart of this Amendment.

EXECUTED AND EFFECTIVE as of the day and date first above written.

TO: City Council

FROM: Troy Niemeyer, Finance Director

DATE: December 16, 2025

SUBJECT: Resolution No. R2025-018, 2026 Fee Schedule

---

1) Recommended Action:

Adopt Resolution R2025-018, 2026 Fee Schedule via the City Council considerations calendar.

This resolution was recommended for adoption by the Public Works Committee at their December 4, 2025, meeting.

---

2) Background:

The City annually adjusts fees via fee resolution that applies to all City service areas as outlined in the attached memorandum and reflected in the 2026 Revised Fee Schedule.

---

3) Policy Support:

Be a Leader in Environmental Sustainability.
Refine and Sustain a Great Organization.
Purse Targeted Community Development Opportunities.
Create and Maintain a Transportation System Safe for All Modes of Travel.

---

4) Alternatives:

- ❑ Do not adopt the proposed fee changes.

---

5) Fiscal Notes:

Fees proposed will be effective January 1, 2026.

---

6) Attachments:

A. Memorandum RE: Resolution No. R2025-018 – Fee Schedule
B. 2026 Revised Fee Schedule – Redlined
C. Resolution No. R2025-018 with Exhibit A – 2026 Fee Schedule
D. 2025 Current Utility Rates & 2025 Proposed Rates Comparison

A

MEMORANDUM

TO: Debbie Sullivan, Mayor
City Council

FROM: Troy Niemeyer, Finance Director

DATE: December 2, 2025

RE: Resolution No. R2025-018 – 2026 Fee Schedule

The City annually updates the City fees for various services. This memo provides general background and justification for the proposed fee changes. General housekeeping edits have been made to update section language and references.

Table I – Business Licenses, Administrative & Publications

- No changes to any fees on this table.

Table II – Zoning, Land Division & Environmental

- **Park Impact Fees** – Updated housing type terms to add "Middle Housing", which includes duplexes, triplexes, quadplexes, and cottage housing.
- **Park Impact Fees (cont'd) -** Removed language regarding multi-family and "attached or detached" homes as a result of adding the new housing type "Middle Housing".
- **Transportation Concurrency –** Increased fees by 1.5%.

Table III – Building & Fire Safety

- **Building Code Fees –** "Middle Housing" housing type and associated fees added. See Table II changes for "Middle Housing" definition.

Table IV – Transportation, Engineering, Utilities & Utility Connections

- **Transportation & Engineering Licensing and Permit Fees** –Increased to reflect current rates.
- **Street & Alley Vacation -** New Hearing, Ordinance, and Adoption fee of $640.00 added.
- **Utility Connection Fees:**
    - Water fees increased by 9%
    - Sewer fees increased by 4%
    - LOTT Capacity Development Charge increased from $7,434.99 to $7,806.74.

Table V – Public Safety

- **Fire Alarm Systems –** 3rd alarm fee increased from $401.00 to $413.00.
- **Prescribed Burning –** Added a prescribed burn permit application fee of $220.00

Table VI – Recreation

- **Recreation Services** – Increased athletic field use fee from $20.00 to $22.00.
- **Public Events Permit** – Increased permit fee from $10.00 to $50.00.

Table VII – Utility Rates

- **Utility Rates**
    - Water rate increase of 5.5%
    - Sewer rate increase of 6.5%
    - Storm rate increase of 8%
- **Connection Fees**
    - Water fee increase of 9%
    - Sewer fee increase of 4%
- **Non-Residential Water Rates – per hundred cubic feet (~750 gallons)**
    - General Commercial - Increase from $3.54 to $3.73
    - Irrigation – Increase from $4.23 to $4.46
- **LOTT Wastewater Service Charge** – Increase of 3% to $48.95, per LOTT.

Table VIII – Utility Rebates & Incentives

- Table name changed from Life-line Program to Utility Rebates & Incentives for better clarity.
- **Life-line Program –** No changes to the program; all discounts remain at 50% for regular utility rates and associated fees.

	Multi-Family	$210.00		
	New Commercial Building			
	0 to 12,000 sq. ft.	$210.00		
	12,001 to 60,000 sq. ft.	$395.00		
	60,001 to 200,000 sq. ft.	$770.00		
	200,000 sq. ft. and over	$1,520.00		
	Remodels and Tenant Improvements	50% of the new commercial fee		
	Warehouses	50% of the new commerical building fee		
	GRADING PERMIT FEES			
	Grading Plan Review Fees			
	100 cubic yards or less (no cut\fill greater than 12 inches)	$47.00		
	101 to 500 cubic yards	$94.00		
	501 to 1,000 cubic yards	$187.00		
	1,001 to 5,000 cubic yards	$280.00		
	5,001 to 10,000 cubic yards	$374.00		
	10,001 to 100,000 cubic yards	$375.00 for 1st 10,000 cubic yards plus $24.50 for each additional 10,000 cubic yards or fraction thereof		

2026 Table III				
BUILDING & FIRE SAFETY				
	100,001 cubic yards or more	$1,000.00 for the 1st 100,000 cubic yards plus $13.25 for each additional 10,000 cubic yards or fraction thereof		
	Other Fees			
	Additional plans review required by changes, additions or revisions to approved plans (minimum charge - 1 hour)	$110.00 per hour		
	Grading Permit Fees			
Community Development	For the issuance of each permit	$30.00		
	100 cubic yards or less (no cut\fill greater than 12 inches)	$55.00		
	101 to 500 cubic yards	$170.00		
	501 to 1,000 cubic yards	$340.00		
	1,0001 to 5,000 cubic yards	$680.00		
	5,001 to 10,000 cubic yards	$1,360.00		
	10,001 cubic yards or more	$1,360.00 for 1st 10,000 cubic yards plus $42.50 for each additional 10,000 yards or fraction thereof		
	Certificates of Occupancy			
	°Temporary Certificates of Occupancy			
	-One or Two Family	$25.00		
	-Commercial/industrial/Multi-family	$100.00		
	-Renewal	$200.00		
	°Final Certificates of Occupancy			
Community Development	– One or Two-Family	No fee		
	– Commercial/Industrial/Multi-family	No fee		
	°Business License			
	– Request for Certificate of Occupancy	$110.00		
	Mechanical Code			
	• Mechanical Permit	Stand alone commercial mechanical permits based on valuation.		
	• Mechanical Plan Review	65% of permit fee		
	For the issuance of each permit	$40.00		
	For issuing each supplemental permit for which the original permit has not expired, been canceled or finaled.	$35.00		
	Unit Fee Schedule			
	Furnaces			
	For the installation or relocation of each forced air or gravity-type furnace, floor furnace, suspended heater, or burner, including ducts and vents attached to such appliance, up to and including 100,000 Btu/h	$25.00		
Community Development	For the installation or relocation of each forced air or gravity-type furnace, floor furnace, suspended heater, or burner, including ducts and vents attached to such an appliance over 100,000Btu/h	$30.00		
	Boilers, Compressors and Refrigeration Units			
	For the installation or relocation of each boiler or compressor to and including three horsepower or for each absorption system to and including 100,000 Btu/h	$25.00		
	For the installation or relocation of each boiler or compressor over three horsepower to and including 15 horsepower or for each absorption system over 100,000 Btu/h to and including 500,000 Btu/h	$40.00		
	For the installation or relocation of each boiler or compressor over 15 horsepower to and including 30 horsepower or for each absorption system over 500,000 Btu/h to and including 1,000,000Btu/h	$45.00		
	For the installation or relocation of each boiler or compressor over 30 horsepower to and including 50 horsepower, or for each absorption system over 1,000,000 Btu/h to and including 1,750,000 Btu/h	$65.00		
	For the installation or relocation of each boiler or compressor over 50 horsepower, or for each absorption system over 1,750,000 Btu/h	$110.00		
	Air Handlers			
	For each air-handling unit to 10,000 cubic feet per minute	$25.00		
	For each air-handling unit over 10,000 cubic feet per minute	$30.00		
	Photo-Voltaic Solar Panels			
	Roof mounted; One-and-Two Family Dwellings	$260.00		
	Photo-Voltaic Solar Panels; Commercial	Based on valuation and the fee schedule		
	Evaporative Coolers			
	For each evaporative cooler other than the portable type	$20.00		
	Ventilation and Exhaust			
	For each vent fan connected to a single duct	$15.00		
	For each system not a part of a permitted HVAC system	$20.00		
	For each non-residential type I hood (grease)	$175.00		
	Ventilation and Exhaust			
	For each non-residential type II hood (steam)	$95.00		
	Water Heaters			
	Residential	$25		
	Commercial	$50.00		
	Gas Piping			
	For each gas pipe system of one to four outlets	$15.00		

2026 Table III				
BUILDING & FIRE SAFETY				
	For each gas piping system additional outlets over 5	$2.00 each		
Community Development	**Miscellaneous**			
	For each appliance or piece of equipment regulated by the Mechanical Code but not classed in other appliance categories, or for which no other fee is listed in the Code	$20.00		
	Other Inspections and Fees			
	1. Mechanical plan review fee	65% of the mechanical permit fee		
	2. Inspection fees outside normal inspection hours (minimum charge – 1 hour)	$110.00		
	3. 1st Plan Review Extension Fee	5% of plan review fee OR $25.00, whichever is greater.		
	2nd Plan Review Extension Fee	10% of plan review fee OR $25.00, whichever is greater.		
	4. 1st Permit Extension Fee	5% of permit fee OR $25.00, whichever is greater.		
	2nd Permit Extension fee	10% of permit fee OR $25.00, whichever is greater.		
	5. Reinspection fees per inspection	10% of permit fee OR $25.00, whichever is greater.		
	6. Inspection for which no fee is specifically indicated (minimum charge – 1 hour)	$110.00 per hour		
	7. Additional plan review required by changes, additions, or revisions to plans or to plans for which an initial review has been completed (minimum charge – 1 hour)	$110.00 per hour		
	8. For use of outside consultants for plan checking or inspection, or both	Actual cost + 8% administrative fee		
Community Development	**Plumbing Code**			
	• Plumbing Permit	$40.00		
	• Plumbing Plan Review			
	• Backflow Protection Device			
	For the issuance of each permit			
	• Commerical Plumbling Permit	Stand alone commercial plumbling permits based on valuation		
	For issuing each supplemental permit for which the original permit has not expired, been canceled or finaled	$35.00		
	Fee for review of septic system applications from County Health Department	$35.00		
	Unit Fee Schedule			
	For each plumbing fixture or trap or set of fixtures on one trap (including water, drainage, piping and backflow protection therefore)	$20.00		
	For each building sewer and each trailer park sewer	$35.00		
	Rainwater systems - per drain	$20.00		
	For each residential sewer grinder	$30.00		
	For each commercial sewer grinder	$95.00		
	For each electric water heater	$25.00		
	For each pre-treatment grease or oil interceptor including its trap and vent	$30.00		
	For each installation, alteration or repair of water piping and/or water treating equipment	$15.00		
	For repair or alteration of drainage or vent piping, each fixture	$15.00		
	For each commercial lawn sprinkler system on any one meter	$25.00		
	For atmospheric type vacuum breakers			
	– 1 to 5	$20.00		
	– Over 5, each	$5.00		
	For each backflow device other than atmospheric type vacuum type breakers			
	– 2 inches and smaller	$15.00		
	– Over 2 inches	$30.00		
	Expansion Tank	$20.00		
Community Development	**Other Inspections and Fees**			
	1. Commerical Plumbling Plan Review Fee	65% of the plumbing permit fee		
	2. Inspection fees outside normal inspection hours (minimum charge – 1 hour)	$110.00 per hour		
	3. Reinspection fees per inspection (minimum charge – 1 hour)	$110.00 per hour		
	4. 1st Plan Review Extension Fee	5% of plan review fee OR $25.00, whichever is greater.		
	2nd Plan Review Extension Fee	10% of plan review fee OR $25.00, whichever is greater.		
	5. 1st Permit Extension Fee	5% of permit fee OR $25.00, whichever is greater.		
	2nd Permit Extension Fee	10% of permit fee OR $25.00, whichever is greater.		
	6. Inspection for which no fee is specifically indicated (minimum charge – 1 hour)	$110.00 per hour		
	7. Additional plan review required by changes, additions, or revisions to plans or to plans for which an initial review has been completed (minimum charge – 1 hour)	$110.00 per hour		
	8. For use of outside consultants for plan checking or inspection, or both	Actual cost + 8% administrative fee		
	Moving of Buildings			
	• Permit Application	$500.00 + building and demolition permits, as applicable		
	• Traffic Officer Fee	Fully-based rate + materials		
	Fire Code			
	Fire Safety			
	• Fire Safety – Inspection Fee & Permitting	Based on Valuation		
	• Underground Storage Tank Removal			
	– Residential	Based on Valuation		
	– Commercial	Based on Valuation		
	• Fire Sprinkler Permit	Based on Valuation		
	• Fire Sprinkler Plan Check	65% of permit fee		

2026 Table III				
BUILDING & FIRE SAFETY				
Fire & Emergency Services	Fire Alarm Systems			
	• Fire Alarm Installation Permit	Based on Valuation		
	• System Retest	$110.00 per hour		
	• Fire Alarm Plan Check	65% of permit fee		
	Fire Hydrant (fireflow) Test	$180.00		
	Fire Inspection Fees			
	Square Footage Factor:			
	1 = 0 - 2,500 square feet	$20.00		
	2 = 2,501 - 7,500 square feet	$40.00		
	3 = 7,501 - 50,000 square feet	$60.00 + hourly rate of $80.00		
	4 = 50,001 square feet + >	$80.00 + hourly rate of $80.00		
	Non-compliance and Reinspection Fee	$80.00 per hour

RESOLUTION NO. R2025-018

A RESOLUTION of the City Council of the City of Tumwater, Washington, establishing fees and charges, as more particularly set forth herein.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUMWATER, STATE OF WASHINGTON, THAT THE FOLLOWING FEES AND CHARGES ARE HEREBY ESTABLISHED FOR THE CITY OF TUMWATER AS FOLLOWS:

Section 1. Repealer. Resolution R2025-002, and any prior fee resolution, is hereby repealed in its entirety effective midnight December 31, 2025.

Section 2. Fees and Charges Established. Fees shall be established in the following categories presented in this section as presented in attached Exhibit A.

TABLE #	SUBJECT AREA
I	Business Licenses, Administrative & Publications
II	Zoning, Land Division & Environmental
III	Building & Fire Safety
IV	Transportation, Engineering, Utilities, & Utility Connections
V	Public Safety
VI	Recreation
VII	Utility Rates
VIII	Life-line Program

Section 3. Ratification. Any act consistent with the authority and prior to the effective date of this Resolution is hereby ratified and affirmed.

Section 4. Severability. The provisions of this Resolution are declared separate and severable. The invalidity of any clause, sentence, paragraph, subdivision, section, or portion of this Resolution or the invalidity of the application thereof to any person or circumstance, shall not affect the validity of the remainder of the Resolution, or the validity of its application to other persons or circumstances.

Section 5. Effective Date. This Resolution shall become effective January 1, 2026.

RESOLVED this 2nd day of December 2025.

CITY OF TUMWATER

Debbie Sullivan, Mayor

ATTEST:

Melody Valiant, City Clerk

APPROVED AS TO FORM:

Karen Kirkpatrick, City Attorney

2026 Table III			
BUILDING & FIRE SAFETY			
Primary Department	**Title**	**Rate/Fee/Charge**	**Code Reference (If Applicable)**
Community Development	**Building Code**		§15.01.070
	Building Permit Fee Schedule (including signs)		
	Total Valuation	**Fee**	
	Single Family, Middle Housing (duplex, triplex, quadplex, cottage housing, townhouses, stacked flats, and condos) (detached and attached), Accessory Dwelling Units, and multi-family housing that meets the federal definition of "Low Income Housing". The home must be affordable to those making 80% of the median income. An affidavit must be submitted with the building permit application stating that the home meets the definition of low income and that a deed/title restriction will be placed on the home and recorded so that future sales, rental, or lease of the home will also abide by the requirements of this section and be affordable to those making 80% of the median income.	50% of the calculated building permit fee using the table of fees in this section	
	$1.00 to $500	$43.48	
	$501 to $2,000	$43.48 for the first $500 plus $5.64 for each additional $100 or fraction thereof, to and including $2,000	
	$2,001 to $25,000	$151.04 for the first $2,000 plus $25.90 for each additional $1,000 or fraction thereof, to and including $25,000	
	$25,001 to $50,000	$742.50 for the first $25,000 plus $18.69 for each additional $1,000 or fraction thereof, to and including $50,000	
	$50,001 to $100,000	$1,203.89 for the first $50,000 plus $12.95 for each additional $1,000 or fraction thereof, to and including $100,000	
	$100,001 to $500,000	$3,291.80 for the first $100,000 plus $18.55 for each additional $1,000 or fraction thereof, to and including $500,000	
	$500,001 to $1,000,000	$10,664.10 for for the first $500,000 plus $15.74 for each additional $1,000 or fraction thereof, to and including $1,000,000	
	$1,000,001 and up	$18,578.99 for the first $1,000,000 plus $12.10 for each additional $1,000 or fraction thereof	
Community Development	**Other Inspection and Fees**		
	Plan Review Fee		
	1. Commercial and Multi-Family	65% of the building permit fee	
	2. Single Family, Middle Housing (duplex, triplex, quadplex, cottage housing, townhouses, stacked flats, and condos) greater than 1,200 sq. ft., and pole barns	50% of the building permit fee	
	3. Single Family, Middle Housing (duplex, triplex, quadplex, cottage housing, townhouses, stacked flats, and condos) greater than 1,200 sq. ft. and multi-family housing that meet the federal definition of "Low Income Housing". For example, if single family then the home must be affordable to those making 80% of the median income. An affidavit must be submitted with the building permit application stating that the home meets the definition of low income and that a deed/title restriction will be placed on the home and recorded so that future sales, rentals, or leases of the home will also abide by the requirements of this section and be affordable to those making 80% of the median income. Not to be used with any other impact fee discounts except the building permit fee discount for low income housing listed above.	25% of the building permit fee	

2026 Table III			
BUILDING & FIRE SAFETY			
	4. Single Family, Middle Housing (duplex, triplex, quadplex, cottage housing, townhouses, stacked flats, and condos), Accessory Dwelling Units, garages, and accessory buildings less than 1,200 sq. ft.	25% of the building permit fee	
Community Development	5. Single family, Middle Housing (duplex, triplex, quadplex, cottage housing, townhouses, stacked flats, and condos) less than 1,200 sq. ft., and accessory dwelling units that meet the federal definition of "Low Income Housing". For example, if single family then the home must be affordable to those making 80% of the median income. An affidavit must be submitted with the building permit application stating that the home meets the definition of low income and that a deed/title restriction will be placed on the home and recorded so that future sales, rentals, or leases of the home will also abide by the requirements of this section and be affordable to those making 80% of the median income.	12.5% of the building permit fee	
	6. 1st Plan Review Extension Fee	5% of plan review fee OR $25.00, whichever is greater.	
	2nd Plan Review Extension Fee	10% of plan review fee OR $25.00, whichever is greater.	
	Continued on next page		
	7. 1st Permit Extension Fee	5% of permit fee OR $25.00, whichever is greater.	
	2nd Permit Extension Fee	10% of permit fee OR $25.00, whichever is greater.	
	8. One-and-Two Family Re-Roof permit.	$170	
	9. Commercial Re-Roof permit.	Based on valuation and the fee schedule	
	10. Inspections outside of normal inspection hours (minimum charge - 1 hour)	$110.00 per hour	
	11. Reinspection fees assessed under provisions of Section 108	$110.00 per hour	
	12. Inspections for which no fee is specifically indicated (minimum charge – 1 hour)	$110.00 per hour	
	13. Additional plan review required by changes, additions or revisions to approved plans (minimum charge - 1 hour)	$110.00 per hour	
	14. For use of outside consultants for plan checking or inspection	Actual cost plus 8% administrative fees	
Community Development	**ENERGY CODE FEES**		
	Energy Code Plan Check Fee		
	Single Family	$110.00	
	Residential Remodel/Addition	$60.00	
	Multi-Family	$210.00	
	New Commercial Building		
	0 to 12,000 sq. ft.	$210.00	
	12,001 to 60,000 sq. ft.	$395.00	
	60,001 to 200,000 sq. ft.	$770.00	
	200,000 sq. ft. and over	$1,520.00	
	Remodels and Tenant Improvements	50% of the new commercial fee	
	Warehouses	50% of the new commerical building fee	
	GRADING PERMIT FEES		
	Grading Plan Review Fees		
	100 cubic yards or less (no cut\fill greater than 12 inches)	$47.00	
	101 to 500 cubic yards	$94.00	
	501 to 1,000 cubic yards	$187.00	
	1,001 to 5,000 cubic yards	$280.00	
	5,001 to 10,000 cubic yards	$374.00	
	10,001 to 100,000 cubic yards	$375.00 for 1st 10,000 cubic yards plus $24.50 for each additional 10,000 cubic yards or fraction thereof	
Community Development	100,001 cubic yards or more	$1,000.00 for the 1st 100,000 cubic yards plus $13.25 for each additional 10,000 cubic yards or fraction thereof	
	Other Fees		
	Additional plans review required by changes, additions or revisions to approved plans (minimum charge - 1 hour)	$110.00 per hour	
	Grading Permit Fees		
	For the issuance of each permit	$30.00	
	100 cubic yards or less (no cut\fill greater than 12 inches)	$55.00	
	101 to 500 cubic yards	$170.00	
	501 to 1,000 cubic yards	$340.00	
	1,0001 to 5,000 cubic yards	$680.00	
	5,001 to 10,000 cubic yards	$1,360.00	

2026 Table III			
BUILDING & FIRE SAFETY			
	10,001 cubic yards or more	$1,360.00 for 1st 10,000 cubic yards plus $42.50 for each additional 10,000 yards or fraction thereof	
Community Development	**Certificates of Occupancy**		
	°Temporary Certificates of Occupancy		
	-One or Two Family	$25.00	
	-Commercial/industrial/Multi-family	$100.00	
	-Renewal	$200.00	
	°Final Certificates of Occupancy		
	– One or Two-Family	No fee	
	– Commercial/Industrial/Multi-family	No fee	
	°Business License		
	– Request for Certificate of Occupancy	$110.00	
	Mechanical Code		
	• Mechanical Permit	Stand alone commercial mechanical permits based on valuation.	
	• Mechanical Plan Review	65% of permit fee	
	For the issuance of each permit	$40.00	
	For issuing each supplemental permit for which the original permit has not expired, been canceled or finaled	$35.00	
Community Development	**Unit Fee Schedule**		
	Furnaces		
	For the installation or relocation of each forced air or gravity-type furnace, floor furnace, suspended heater, or burner, including ducts and vents attached to such appliance, up to and including 100,000 Btu/h	$25.00	
	For the installation or relocation of each forced air or gravity-type furnace, floor furnace, suspended heater, or burner, including ducts and vents attached to such an appliance over 100,000Btu/h	$30.00	
	Boilers, Compressors and Refrigeration Units		
	For the installation or relocation of each boiler or compressor to and including three horsepower or for each absorption system to and including 100,000 Btu/h	$25.00	
	For the installation or relocation of each boiler or compressor over three horsepower to and including 15 horsepower or for each absorption system over 100,000 Btu/h to and including 500,000 Btu/h	$40.00	
	For the installation or relocation of each boiler or compressor over 15 horsepower to and including 30 horsepower or for each absorption system over 500,000 Btu/h to and including 1,000,000Btu/h	$45.00	
	For the installation or relocation of each boiler or compressor over 30 horsepower to and including 50 horsepower, or for each absorption system over 1,000,000 Btu/h to and including 1,750,000 Btu/h	$65.00	
	For the installation or relocation of each boiler or compressor over 50 horsepower, or for each absorption system over 1,750,000 Btu/h	$110.00	
Community Development	**Air Handlers**		
	For each air-handling unit to 10,000 cubic feet per minute	$25.00	
	For each air-handling unit over 10,000 cubic feet per minute	$30.00	
	Photo-Voltaic Solar Panels		
	Roof mounted; One-and-Two Family Dwellings	$260.00	
	Photo-Voltaic Solar Panels; Commercial	Based on valuation and the fee schedule	
	Evaporative Coolers		
	For each evaporative cooler other than the portable type	$20.00	
	Ventilation and Exhaust		
	For each vent fan connected to a single duct	$15.00	
	For each system not a part of a permitted HVAC system	$20.00	
	For each non-residential type I hood (grease)	$175.00	
	Ventilation and Exhaust		
	For each non-residential type II hood (steam)	$95.00	
	Water Heaters		
	Residential	$25	

2026 Table III			
BUILDING & FIRE SAFETY			
	Commercial	$50.00	
	Gas Piping		
	For each gas pipe system of one to four outlets	$15.00	
	For each gas piping system additional outlets over 5	$2.00 each	
Community Development	**Miscellaneous**		
	For each appliance or piece of equipment regulated by the Mechanical Code but not classed in other appliance categories, or for which no other fee is listed in the Code	$20.00	
	Other Inspections and Fees		
	1. Mechanical plan review fee	65% of the mechanical permit fee	
	2. Inspection fees outside normal inspection hours (minimum charge – 1 hour)	$110.00	
	3. 1st Plan Review Extension Fee	5% of plan review fee OR $25.00, whichever is greater.	
	2nd Plan Review Extension Fee	10% of plan review fee OR $25.00, whichever is greater.	
	4. 1st Permit Extension Fee	5% of permit fee OR $25.00, whichever is greater.	
	2nd Permit Extension fee	10% of permit fee OR $25.00, whichever is greater.	
	5. Reinspection fees per inspection	10% of permit fee OR $25.00, whichever is greater.	
	6. Inspection for which no fee is specifically indicated (minimum charge – 1 hour)	$110.00 per hour	
	7. Additional plan review required by changes, additions, or revisions to plans or to plans for which an initial review has been completed (minimum charge – 1 hour)	$110.00 per hour	
	8. For use of outside consultants for plan checking or inspection, or both	Actual cost + 8% administrative fee	
Community Development	**Plumbing Code**	$40.00	
	• Plumbing Permit		
	• Plumbing Plan Review		
	• Backflow Protection Device		
	For the issuance of each permit		
	• Commerical Plumbling Permit	Stand alone commercial plumbling permits based on valuation	
	For issuing each supplemental permit for which the original permit has not expired, been canceled or finaled	$35.00	
	Fee for review of septic system applications from County Health Department	$35.00	
	Unit Fee Schedule		
	For each plumbing fixture or trap or set of fixtures on one trap (including water, drainage, piping and backflow protection therefore)	$20.00	
	For each building sewer and each trailer park sewer	$35.00	
	Rainwater systems - per drain	$20.00	
	For each residential sewer grinder	$30.00	
	For each commercial sewer grinder	$95.00	
	For each electric water heater	$25.00	
	For each pre-treatment grease or oil interceptor including its trap and vent	$30.00	
	For each installation, alteration or repair of water piping and/or water treating equipment	$15.00	
	For repair or alteration of drainage or vent piping, each fixture	$15.00	
	For each commercial lawn sprinkler system on any one meter	$25.00	
	For atmospheric type vacuum breakers		
	– 1 to 5	$20.00	
	– Over 5, each	$5.00	
	For each backflow device other than atmospheric type vacuum type breakers		
	– 2 inches and smaller	$15.00	
	– Over 2 inches	$30.00	
	Expansion Tank	$20.00	
	Other Inspections and Fees		
	1. Commerical Plumbling Plan Review Fee	65% of the plumbing permit fee	
	2. Inspection fees outside normal inspection hours (minimum charge – 1 hour)	$110.00 per hour	
	3. Reinspection fees per inspection (minimum charge – 1 hour)	$110.00 per hour	
	4. 1st Plan Review Extension Fee	5% of plan review fee OR $25.00, whichever is greater.	
	2nd Plan Review Extension Fee	10% of plan review fee OR $25.00, whichever is greater.	

2026 Table III			
BUILDING & FIRE SAFETY			
Community Development	5. 1st Permit Extension Fee	5% of permit fee OR $25.00, whichever is greater.	
	2nd Permit Extension Fee	10% of permit fee OR $25.00, whichever is greater.	
	6. Inspection for which no fee is specifically indicated (minimum charge – 1 hour)	$110.00 per hour	
	7. Additional plan review required by changes, additions, or revisions to plans or to plans for which an initial review has been completed (minimum charge – 1 hour)	$110.00 per hour	
	8. For use of outside consultants for plan checking or inspection, or both	Actual cost + 8% administrative fee	
	Moving of Buildings		
	• Permit Application	$500.00 + building and demolition permits, as applicable	
	• Traffic Officer Fee	Fully-based rate + materials	
Fire & Emergency Services	**Fire Code**		
	Fire Safety		
	• Fire Safety – Inspection Fee & Permitting	Based on Valuation	
	• Underground Storage Tank Removal		
	– Residential	Based on Valuation	
	– Commercial	Based on Valuation	
	• Fire Sprinkler Permit	Based on Valuation	
	• Fire Sprinkler Plan Check	65% of permit fee	
	Fire Alarm Systems		
	• Fire Alarm Installation Permit	Based on Valuation	
	• System Retest	$110.00 per hour	
	• Fire Alarm Plan Check	65% of permit fee	
	Fire Hydrant (fireflow) Test	$180.00	
	Fire Inspection Fees		
	Square Footage Factor:		
	1 = 0 - 2,500 square feet	$20.00	
	2 = 2,501 - 7,500 square feet	$40.00	
	3 = 7,501 - 50,000 square feet	$60.00 + hourly rate of $80.00	
	4 = 50,001 square feet + >	$80.00 + hourly rate of $80.00	
	Non-compliance and Reinspection Fee	$80.00 per hour

TO: City Council

FROM: Brad Medrud, Community Development Director; Sharon Lumbantobing, Deputy Community Development Director; Dana Bowers, Associate Planner; and Erika Smith-Erickson, Associate Planner

DATE: December 16, 2025

SUBJECT: Ordinance No. O2025-010, 2025 Comprehensive Plan Periodic Update

---

1) Recommended Action:

Adopt Ordinance No. O2025-010, 2025 Comprehensive Plan Periodic Update.

The ordinance was recommended for adoption by the Planning Commission after a public hearing on November 10, 2025.

---

2) Background:

On a ten-year cycle, the City is required to conduct a Growth Management Act periodic update of its Comprehensive Plan and related development regulations. For the current cycle, the City is required to complete work on the periodic update by December 31, 2025.

The updated Comprehensive Plan addresses diversity, equity, and inclusion throughout the Plan. The 2025 Comprehensive Plan Update | City of Tumwater, WA contains links to guidance material and information about the update.

The Planning Commission, General Government Committee, and City Council were briefed on various components of the update over the course of 2023, 2024, and 2025.

The Planning Commission held a briefing on the ordinance on October 14, 2025, a work session on October 28, 2025, and a public hearing on November 10, 2025. Following the public hearing and deliberations on November 10, 2025, the Planning Commission recommended approval of the Comprehensive Plan periodic update ordinance to the City Council.

The City Council and the Planning Commission discussed the Planning Commission's recommendation at a joint work session on December 9, 2025, and the City Council placed the ordinance on the City Council's December 16, 2025, consideration calendar.

---

3) Policy Support:

Goal LPP-1: Provide sufficient and efficient services to Tumwater and the Urban Growth Area.

Goal LU-1: Ensure the Land Use Element is implementable and coordinated with all applicable City plans and the plans of other jurisdictions in the Thurston region.

---

4) Alternatives:

- ❑ None

5) Fiscal Notes:

The periodic update is primarily an internally funded annual work program task. The City was awarded a Washington State Department of Commerce grant for $125,000 to update the Transportation Plan and Economic Development Plan. In addition, the City was awarded a Washington State Department of Commerce grant for $500,000 to support the development of a Climate Element and a Washington State Department of Commerce grant for $75,000 to address the new state middle housing requirements.

2025 Tumwater Comprehensive Plan Periodic Update – Ordinance No. O2025-010

On a ten-year cycle, Tumwater is required to conduct a Growth Management Act periodic update of its Comprehensive Plan and related development regulations. For the current cycle, the City is required to complete work on the periodic update by December 31, 2025. Work on this update began in October 2022 and continued through this year.

The updated Comprehensive Plan addresses diversity and equity throughout the Plan and addresses the State required changes related to housing, climate change, and other topics.

The City Council will be asked to adopt Ordinance No. O2025-010, 2025 Comprehensive Plan Periodic Updates based on the Planning Commission's recommendation after a public hearing on November 10, 2025.

1 – Summary 2
2 – Background 2
3 – Community Engagement 2
4 – Review and Approval Criteria 3
5 – Public Approval Process 6
6 – Public Notification 6
7 –Conclusions 7
8 – Planning Commission Recommendation 7
9 – Effect of the Periodic Update 7

1 – Summary

Ordinance No. O2025-010 is a ten-year periodic update to Tumwater's Comprehensive Plan. The update reflects current population, housing, and employment forecasts, incorporates updated State regulations and guidance, and addresses new community priorities. The last periodic update of the Comprehensive Plan was completed in 2016.

The Comprehensive Plan serves as Tumwater's road map for accommodating growth within the City and its urban growth area from 2026 to 2045. The Plan was prepared in accordance with the Growth Management Act (Chapter 36.70A RCW) and Thurston County County-Wide Planning Policies.

2 – Background

Staff have been working with stakeholders and the community on the Comprehensive Plan periodic update since the fall of 2022. The periodic update included the following state required Elements, with their associated maps and appendices:

- Climate Element (New in 2025)
- Conservation Element
- Housing Element
- Land Use Element
- Lands for Public Purposes Element
- Transportation Plan
- Utilities Element

A Plan Introduction was prepared containing the overall Plan goals, as well as public participation, intergovernmental coordination, plan review, and plan update and amendment requirements.

The Tumwater Thurston County Joint Plan will be updated to reflect Tumwater's amended Comprehensive Plan in 2026 following the approval of the Ordinance No. O2025-010.

The following Elements of the Comprehensive Plan were not required to be updated by the state and were not included in the periodic update:

- Economic Development Plan (Update expected 2026)
- Parks, Recreation, and Open Space Plan (Update expected 2026)
- Shoreline Master Program (Next state required update due 2030)

3 – Community Engagement

Guided by the Community Engagement Plan, a summary of the periodic update's community engagement opportunities is included as Appendix C of the Plan Introduction.

4 – Review and Approval Criteria

The periodic update to the Comprehensive Plan is subject to the Plan amendment criteria below from TMC 18.60.025(B):

1) *All amendments to the comprehensive plan must conform with the requirements of the Washington State Growth Management Act, Chapter 36.70A RCW, and all amendments for permanent changes to the comprehensive plan must be submitted to the Washington State Department of Commerce, pursuant to RCW 36.70A.106.*

   The periodic update being considered is in accordance with Tumwater's Comprehensive Plan amendment process, as required by RCW 36.70A. After Ordinance No. O2025-010 is approved by the City Council, the Plan will be submitted to the Washington State Department of Commerce pursuant to RCW 36.70A.106.

   The periodic update meets the goals of the Washington State Growth Management Act as follows:

   1) ***Urban growth***. *Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.*

      The Comprehensive Plan periodic update is intended to support the growth and development of the Tumwater and its urban growth area as outlined in the maps, goals, policies, and draft implementation actions of the Comprehensive Plan.

   2) ***Reduce sprawl***. *Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.*

      The Comprehensive Plan periodic update is intended to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development and focus future growth in the Tumwater and its urban growth area as outlined in the maps, goals, policies, and draft implementation actions of the Comprehensive Plan.

   3) ***Transportation***. *Encourage efficient multimodal transportation systems that will reduce greenhouse gas emissions and per capita vehicle miles traveled, and are based on regional priorities and coordinated with county and city comprehensive plans.*

      The Comprehensive Plan periodic update supports urban level development Tumwater and its urban growth area that would provide for efficient multimodal transportation systems as outlined in the maps, goals, policies, and draft implementation actions of the Comprehensive Plan.

   4) ***Housing***. *Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.*

      The Comprehensive Plan periodic update supports the provision of a range of residential development in the City, including middle housing and other types of

affordable housing for all income groups as found in the Housing and Land Use Elements.

5) ***Economic development***. *Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.*

   The Comprehensive Plan periodic update supports development that provides economic development and allows more people to live closer to jobs and services.

6) ***Property rights***. *Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.*

   The Comprehensive Plan periodic update does not require any taking of private property without compensation.

7) ***Permits***. *Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.*

   The Comprehensive Plan periodic update and concurrent development code amendments support this goal.

8) ***Natural resource industries***. *Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.*

   The Comprehensive Plan periodic update does not affect rural natural resource industries.

9) ***Open space and recreation***. *Retain open space and green space, enhance recreational opportunities, enhance fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.*

   The Comprehensive Plan periodic update supports the goals, policies, and draft implementation actions for open space and recreation as outlined in the Comprehensive Plan

10) ***Environment***. *Protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.*

    The Comprehensive Plan periodic update protects the environment by directing future development towards urban rather than rural areas.

11) ***Citizen participation and coordination***. *Encourage the involvement of citizens in the planning process, including the participation of vulnerable populations and overburdened communities, and ensure coordination between communities and jurisdictions to reconcile conflicts.*

    Tumwater and its urban growth area residents and all interested parties, agencies and jurisdictions were notified about the periodic update as part of the 2025 Comprehensive Plan periodic update process.

12) ***Public facilities and services***. *Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.*

    The Comprehensive Plan periodic update is supported by Tumwater's provision of sewer and water service in the urban area.

13) ***Historic preservation***. *Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.*

    The Comprehensive Plan periodic update supports historic preservation. As future development occurs, it would need to comply with all the applicable historical or archaeological regulations.

14) ***Climate change and resiliency***. *Ensure that the City's Comprehensive Plans and development regulations adapt to and mitigate the effects of a changing climate; support reductions in greenhouse gas emissions and per capita vehicle miles traveled; prepare for climate impact scenarios; foster resiliency to climate impacts and natural hazards; protect and enhance environmental, economic, and human health and safety; and advance environmental justice.*

    The Comprehensive Plan periodic update supports the reduction of greenhouse gas emissions and vehicle miles traveled and fosters resilience through the new Climate Element.

15) ***Shorelines of the state***. *For shorelines of the state, the goals and policies of the shoreline management act as set forth in RCW 90.58.020 shall be considered an element of the City's Comprehensive Plan.*

    The Comprehensive Plan periodic update does not affect the shorelines of the state. As future development occurs, it would need to comply with the City's Shoreline Management Program, as required.

2) *Amendments and site-specific rezone applications should be evaluated for internal consistency with the comprehensive plan, and for consistency with the county-wide planning policies, related plans, and the comprehensive plan of Thurston County or cities which have common borders with Tumwater.*

The Elements of the Comprehensive Plan periodic update are internally consistent. The Comprehensive Plan is consistent with the Thurston County County-Wide Planning Policies and the plans of neighboring jurisdictions.

3) *Whether conditions in the area for which comprehensive plan change/zoning amendment is requested have changed or are changing to such a degree that it is in the public interest to encourage a change in land use for the area.*

   Conditions in Tumwater and its urban growth area and state requirements have changed since the last periodic update in 2016, which require changes to land use to accommodate required future housing.

4) *Whether the proposed comprehensive plan zoning amendment is necessary in order to provide land for a community-related use which was not anticipated at the time of adoption of the comprehensive plan.*

   The criterion does not apply.

5 – Public Approval Process

An Environmental Checklist for a non-project action was prepared on October 10, 2025, under the State Environmental Policy Act (Chapter 43.21C RCW), pursuant to Chapter 197-11 WAC, and a Determination of Non-Significance was issued on October 17, 2025. The comment period for the determination ended October 31, 2025, and the appeal period ended November 6, 2025.

The ordinance was sent to the State Department of Commerce on October 13, 2025, for the required 60-day Notice of Intent process before the periodic update is adopted, in accordance with RCW 36.70A.106. State Department of Commerce provided their draft comments on the ordinance on November 14, 2025, and staff provided their responses on November 20, 2025, which are included as amendments in the ordinance. The comment period on the Notice of Intent ended December 12, 2025.

The Planning Commission was briefed on the ordinance October 14, 2025, held a work session on October 28, 2025, and held a public hearing and deliberation on November 10, 2025. After the hearing, the Planning Commission made a recommendation for the City Council to adopt Ordinance No. O2025-010, 2025 Comprehensive Plan Periodic Update.

At a Joint City Council and Planning Commission work session on December 9, 2025, Commissioners and Councilmembers reviewed the Planning Commission's recommendation on both the 2025 Comprehensive Plan and Development Code update ordinances. The City Council is scheduled to consider Ordinance No. O2025-010 at their December 16, 2025, meeting.

6 – Public Notification

A Notice of Public Hearing for the Planning Commission was posted on October 31, 2025. The notice was published as a press release, distributed to interested individuals and entities that have requested such notices, and published in The Olympian.

7 – Conclusions

1. The Comprehensive Plan periodic update meets the review and approval criteria found in TMC 18.60.025(B).
2. The Comprehensive Plan periodic update is consistent with the goals of the Washington State Growth Management Act and the Thurston County County-Wide Planning Policies.
3. All the Elements of the Comprehensive Plan periodic update are internally consistent.
4. The Comprehensive Plan periodic update is consistent with neighboring jurisdictions' plans.

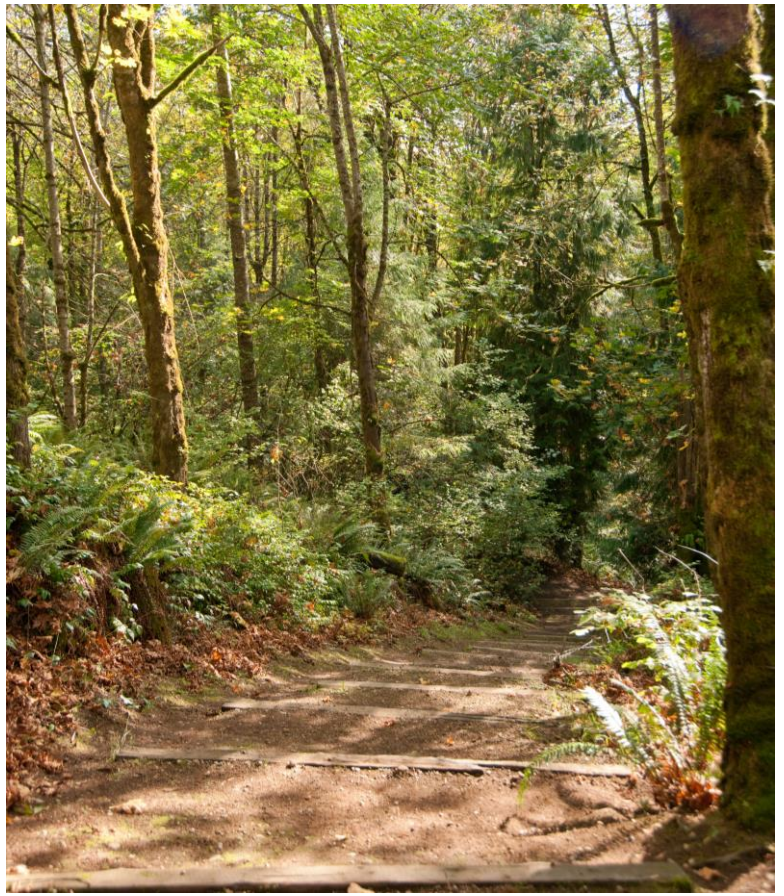
8 – Planning Commission Recommendation

The Planning Commission recommends approval of the Comprehensive Plan periodic update by Ordinance No. O2025-0010 to reflect current information and requirements.

9 – Effect of the Periodic Update

The proposal amends the Comprehensive Plan as shown in Ordinance No. O2025-010.

Attachment B



2025 Comprehensive Plan Periodic Update
Ordinance No. O2025-010

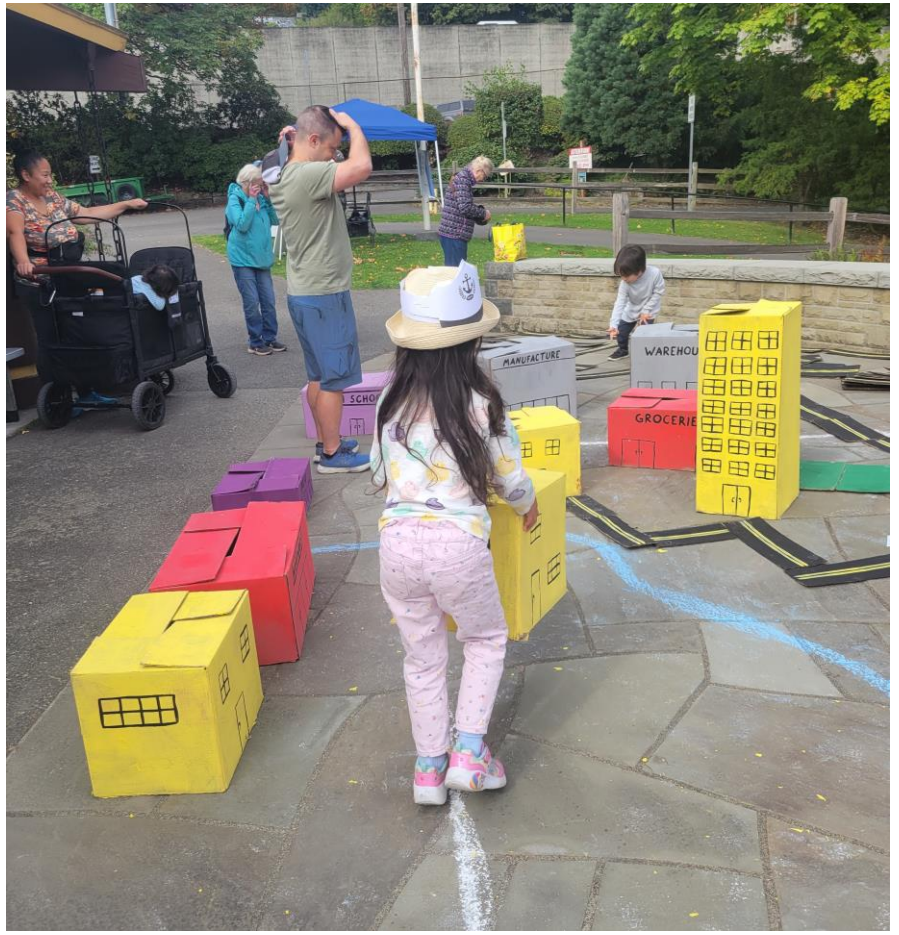
Balancing Nature and Community:
Tumwater's Path to Sustainable Growth

City Council Meeting, December 16, 2025, 7:00 PM

Intent

Adopt Ordinance No. O2025-010, 2025 Comprehensive Plan Periodic Update based on the Planning Commission's recommendation

Ordinance No. O2025-010



Background

- Comprehensive Plan is updated every ten years with last update in 2016
- TRPC Population, housing, and employment forecasts used
- Diversity, equity, and inclusion addressed throughout the Plan
- Reflects community vision and meets state requirements, with new Climate Element and more detailed Housing Element

Community Engagement

- The Community Engagement Plan guided efforts during the update process to include diverse audiences and provide multiple ways to engage
- Summary of community engagement included in Appendix C of the Plan Introduction

Review & Adoption Schedule

Review & Approval Criteria – TMC 18.60.025(B)

Conformance with Growth Management Act

Plan is Internally Consistent

Plan is Consistent with County-Wide Planning Policies & Plans of Neighboring Jurisdictions

Conditions in City have changed since 2016

Conclusions

- The Comprehensive Plan periodic update meets the review and approval criteria found in TMC 18.60.025(B)
- The Comprehensive Plan periodic update is consistent with the goals of the Washington State Growth Management Act and the Thurston County County-Wide Planning Policies
- All the Elements of the Comprehensive Plan periodic update are internally consistent
- The Comprehensive Plan periodic update is consistent with neighboring jurisdictions' plans

Planning Commission Recommendation

After a public hearing on November 10, 2025, the Planning Commission recommended that the City Council approve the Comprehensive Plan periodic update by Ordinance No. O2025-010 to reflect current information and requirements

Requested Action

Adopt Ordinance No. O2025-010, 2025 Comprehensive Plan Periodic Update

ORDINANCE NO. O2025-010

AN ORDINANCE of the City Council of the City of Tumwater, Washington, relating to planning under the Growth Management Act, Chapter 36.70A RCW, of the State of Washington updating the City's Comprehensive Plan and Future Land Use Map as more particularly described herein; declaring an emergency and establishing an effective date.

WHEREAS, the City is required to plan under the Growth Management Act, Chapter 36.70A RCW; and

WHEREAS, the Growth Management Act, Chapter 36.70A RCW, contains fifteen goals that guide the development and adoption of the Comprehensive Plan, which relate to urban growth, reducing sprawl, transportation, housing, economic development, property rights, permits, natural resource industries, open space and recreation, environment, public participation and coordination, public facilities and services, historic preservation, climate change and resiliency, and shorelines of the state; and

WHEREAS, the Growth Management Act, Chapter 36.70A RCW, requires the Comprehensive Plan to demonstrate and uphold the concepts of internal consistency, conformity, and concurrency; and

WHEREAS, the Growth Management Act, Chapter 36.70A RCW, requires a process of early and continuous public participation for updating the Comprehensive Plan; and

WHEREAS, the Growth Management Act, Chapter 36.70A RCW, requires the City to review and, if needed, revise its Comprehensive Plan periodically every ten years in accordance with RCW 36.70A.130(1) to ensure the plan complies with the requirements of the Growth Management Act, Chapter 36.70A RCW; and

WHEREAS, under the schedule established in RCW 36.70A.130(5), the deadline for the City to take action to comply with the ten year review and evaluation process was December 31, 2025; and

WHEREAS, the Comprehensive Plan periodic update was processed in compliance with the requirements of the State Environmental Policy Act; and

WHEREAS, due to the State deadline to adopt the required 2025 Comprehensive Plan periodic update; the City Council finds a public emergency exists; and

WHEREAS, the City Council reviewed all the evidence presented and has made findings of fact and conclusions related to the Comprehensive Plan periodic update, which are set forth below.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF TUMWATER, STATE OF WASHINGTON, DOES ORDAIN AS FOLLOWS:

Section 1. Findings. For the purposes of effective land use planning, the Tumwater City Council adopts the following findings of fact:

1. The City Council approved Long Range Work Programs on January 17, 2023, January 16, 2024, and January 21, 2025.

2. The Long Range Work Programs included work on the Comprehensive Plan periodic update, which included the Climate Element, Conservation Element, Housing Element, Land Use Element, Lands for Public Purposes Element, Transportation Plan, and Utilities Element of the Comprehensive Plan.

3. The Comprehensive Plan periodic update addressed the requirements of the Growth Management Act, Chapter 36.70A RCW, ten year periodic update and brought the Comprehensive Plan's goals and policies up to date to reflect changes to the community and align with current values.

4. The lack of City staff during the update process delayed the review and approval of the Comprehensive Plan periodic update.

5. City staff reviewed the Comprehensive Plan for consistency with the requirements of the Growth Management Act, Chapter 36.70A RCW. Based on this analysis, City staff prepared proposed revisions needed to update the Comprehensive Plan to comply with the Growth Management Act, Chapter 36.70A RCW.

6. The Comprehensive Plan periodic update meets the intent of and is consistent with the Growth Management Act, Chapter 36.70A RCW, County-Wide Planning Policies, and the internal goals and policies of the City's Comprehensive Plan are consistent.

7. The Attorney General *Advisory Memorandum and Recommended Process for Evaluating Proposed Regulatory or Administrative Actions to Avoid Unconstitutional Takings of Private Property* (October 2024) was reviewed

and utilized by the City in order to objectively evaluate the Comprehensive Plan periodic update.

8. The Comprehensive Plan periodic update was prepared in conformance with the Public Participation and Intergovernmental Coordination Procedures contained in the Comprehensive Plan, which meet the Growth Management Act, Chapter 36.70A RCW, requirements for the same.

9. The City engaged the community through three open houses, three public outreach surveys, topic focused working groups, listening sessions with individuals, civic groups, and organizations, as well as briefings and work sessions with the Planning Commission, Tree Board, General Government Committee, Public Works Committee, and the City Council.

10. The Planning Commission reviewed the work plan, staff analysis, and the Comprehensive Plan Elements, and the Future Land Use Map in briefings and work sessions.

11. The Planning Commission reviewed the Comprehensive Plan Elements in briefings and work sessions on October 25, 2022, February 28, 2023, June 27, 2023, July 25, 2023, August 8, 2023, August 22, 2023, September 12, 2023, September 26, 2023, October 24, 2023, November 14, 2023, November 28, 2023, January 9, 2024, February 13, 2024, February 27, 2024, March 26, 2024, April 23, 2024, May 14, 2024, May 28, 2024, June 11, 2024, August 13, 2024, September 10, 2024, September 24, 2024, November 12, 2024, December 10, 2024, January 14, 2025, February 11, 2025, March 25, 2025, April 8, 2025, May 13, 2025, May 27, 2025, June 10, 2025, June 24, 2025, July 22, 2025, August 26, 2025, and September 9, 2025.

12. The Tree Board reviewed the Comprehensive Plan Elements in a work session on June 9, 2025.

13. General Government Committee and Public Works Committee reviewed the Comprehensive Plan Elements in briefings and work sessions on November 9, 2022, January 11, 2023, July 12, 2023, August 9, 2023, September 13, 2023, October 11, 2023, November 8, 2023, December 13, 2023, January 10, 2024, February 14, 2024, April 10, 2024, June 12, 2024, July 17, 2024, September 11, 2024, October 9, 2024, December 11, 2024, January 8, 2025, February 18, 2025, March 18, 2025, May 14, 2025, June 11, 2025, July 9, 2025, August 21, 2025, September 10, 2025, and October 8, 2025.

14. The City Council discussed the Comprehensive Plan Elements in briefings and work sessions on October 24, 2023, July 9, 2024, May 14, 2025, June 10, 2025, June 24, 2025, July 22, 2025, and August 26,2025.

15. The City Council and the Planning Commission held joint work sessions on the Comprehensive Plan Elements on December 13, 2022, December 12, 2023, April 9, 2023 (Housing Tour), June 25, 2024, July 9, 2024, and February 25, 2025 (Transportation Tour).

16. The Transportation Plan was sent to the Thurston Regional Planning Council for review and certification on September 17, 2025, as required by Growth Management Act, Section 365-196-430 WAC.

17. The City served as the Lead Agency under the State Environmental Policy Act, Chapter 43.21C RCW, for the Comprehensive Plan periodic update.

18. An Environmental Checklist for a non-project action for the Comprehensive Plan periodic update ordinance was prepared under the State Environmental Policy Act, Chapter 43.21C RCW, pursuant to Chapter 197-11 WAC on October 10, 2025, and a Determination of Non-Significance was issued on October 17, 2025.

19. The Comprehensive Plan periodic update ordinance was provided to the Washington State Department of Commerce on October 13, 2025, for the required 60-day review before the Comprehensive Plan periodic update ordinance was adopted, in accordance with RCW 36.70A.106.

20. The Planning Commission received a briefing on the Comprehensive Plan periodic update ordinance on October 14, 2025, and discussed the Comprehensive Plan periodic update ordinance at a work session on October 28, 2025.

21. A Notice of Public Hearing for the Planning Commission public hearing on the Comprehensive Plan periodic update ordinance was issued on October 31, 2025. The notice was posted, published as a press release, distributed to interested individuals and entities that have requested such notices, and published in The Olympian.

22. The Planning Commission held the public hearing on the Comprehensive Plan periodic update ordinance on November 10, 2025.

23. Following a public hearing and deliberations on November 10, 2025, the Planning Commission recommended approval of the Comprehensive Plan periodic update ordinance to the City Council.

24. The City Council and the Planning Commission discussed the Planning Commission recommendation on the Comprehensive Plan periodic update ordinance in a joint work session on December 9, 2025.

25. The City Council considered the Comprehensive Plan periodic update ordinance on December 16, 2025.

26. The Comprehensive Plan periodic update ordinance will be submitted to the Washington State Department of Commerce no later than ten days after final adoption, pursuant to RCW 36.70A.106.

27. Any Conclusion herein, which may be deemed a Finding, is hereby adopted as such.

Section 2. Conclusions. For the purposes of effective land use planning, the Tumwater City Council makes the following conclusions:

1. Based on its review of the requirements of the Growth Management Act, Chapter 36.70A RCW, the analysis and proposed revisions prepared by City staff, and the public comments received, the City Council finds, declares, and concludes that the review and needed revisions have been prepared in conformance with applicable law. This includes the Growth Management Act, Chapter 36.70A RCW, the State Environmental Policy Act, Chapter 43.21C RCW, and the City of Tumwater Public Participation and Intergovernmental Coordination Procedures.

2. Based on its review of the requirements of the Growth Management Act, Chapter 36.70A RCW, the analysis and proposed Comprehensive Plan periodic update prepared by City staff, the recommendation forwarded by the Planning Commission, and the public comments received, the City Council accepts the analysis and proposed Comprehensive Plan periodic update. The City Council hereby finds, declares, and concludes that the Comprehensive Plan as revised by this ordinance complies with the requirements of the Growth Management Act, Chapter 36.70A RCW.

3. Any Finding herein, which may be deemed a Conclusion, is hereby adopted as such.

Section 3. Adoption. The City Council of the City of Tumwater Washington hereby adopts:

1. The City of Tumwater 2025 Comprehensive Plan attached hereto as Exhibit "A" and incorporated herein by reference.

2. The City of Tumwater 2025 Comprehensive Plan Future Land Use Map attached hereto as Exhibit "B" and incorporated herein by reference.

Section 4. Corrections. The City Clerk and codifiers of this ordinance are authorized to make necessary corrections to this ordinance including, but not limited to, the correction of scrivener/clerical errors, references, ordinance numbering, section/subsection numbers, and any references thereto.

Section 5. Ratification. Any act consistent with the authority and prior to the effective date of this ordinance is hereby ratified and affirmed.

Section 6. Severability. The provisions of this ordinance are declared separate and severable. The invalidity of any clause, sentence, paragraph, subdivision, section, or portion of this ordinance or the invalidity of the application thereof to any person or circumstance, shall not affect the validity of the remainder of the ordinance, or the validity of its application to other persons or circumstances.

Section 7. **Declaration of Emergency – Effective Date**. For the reasons set forth above, and to promote the objectives stated herein, the City Council finds that a public emergency exists, necessitating that this ordinance take effect immediately upon its passage by unanimous vote of the City Council in order to protect the public health, safety, property, and general welfare. This ordinance shall take effect and be in force immediately upon unanimous passage by the City Council.

Section 8. **Alternative Effective Date**. If this Ordinance does not become effective immediately as provided in Section 7, then this Ordinance shall become effective thirty days after passage, approval, and publication as provided by law.

ADOPTED this _____day of _____, 20___.

DRAFT

1. Foundation of the Plan

A. Background

The Plan Introduction is part of Tumwater's Comprehensive Plan, which was prepared in response to the state Growth Management Act (Chapter 36.70A RCW). It is intended to provide the foundation for the Comprehensive Plan and its overarching goals.

B. Purpose and Scope of the Comprehensive Plan

The Plan serves as Tumwater's road map for accommodating growth in the City and its urban growth area from 2026 to 2045. The Tumwater Comprehensive Plan was prepared in accordance with the requirements of the Growth Management Act (Chapter 36.70A RCW) and adopted Thurston County County-Wide Planning Policies.

C. Vision, Mission, and Values

The following vision, mission, and values provide the overarching direction for the future of Tumwater and were developed by the City Council through Tumwater's Strategic Planning Process in 2025.

1) Vision – The Why

Tumwater is a thriving, inclusive and people-centered city where a resilient economy, vibrant neighborhoods, and a healthy natural environment foster deep community connection, civic pride, and a shared commitment to honoring our history while shaping a dynamic tomorrow.

2) Mission – The What

We work in partnership with our community to provide essential services, protect our environment, grow our economy, and to support a connected, inclusive social fabric where everyone belongs

3) Values

a) People

We embrace the diversity of people in our community and strive to ensure everyone feels valued and included. We recognize the vital contributions of our staff and foster a supportive environment that promotes growth, celebrates achievements, and retains talent to serve our community with excellence.

b) Environment

We strive to safeguard and enhance our community's natural environment and social fabric through sustainable practices and long-term stewardship.

c) Opportunity

We pursue opportunities to enhance social, environmental, and economic well-being, and remain committed to achieving positive outcomes—even in challenging times

DRAFT

d) Partnership

We work in partnership with residents, businesses, community organizations, and governments to address challenges and advance shared goals

e) Learning

We learn from experience, embrace innovation, and seek new ways to enhance City services and strengthen our community.

f) Excellence

With excellence, integrity, and efficiency, we deliver timely and responsive City services — empowering staff, stewarding public resources, and fostering civic trust.

D. Growth Management Act Goals

The State of Washington requires Tumwater to plan under the Growth Management Act (RCW 36.70A.040).

The following fifteen Growth Management Act goals guide the development and adoption of Tumwater's Comprehensive Plan and development regulations and are not listed in order of priority. Each Element of the Comprehensive Plan describes how it meets the goals applicable to its topic area.

1. ***Urban growth***. *Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.*
2. ***Reduce sprawl***. *Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.*
3. ***Transportation***. *Encourage efficient multimodal transportation systems that will reduce greenhouse gas emissions and per capita vehicle miles traveled, and are based on regional priorities and coordinated with county and city comprehensive plans.*
4. ***Housing***. *Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.*
5. ***Economic development***. *Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.*
6. ***Property rights***. *Private property shall not be taken for public use without just compensation having been made. The*

DRAFT

property rights of landowners shall be protected from arbitrary and discriminatory actions.

7. ***Permits**. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.*

8. ***Natural resource industries**. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.*

9. ***Open space and recreation**. Retain open space and green space, enhance recreational opportunities, enhance fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.*

10. ***Environment**. Protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.*

11. ***Citizen participation and coordination**. Encourage the involvement of citizens in the planning process, including the participation of vulnerable populations and overburdened communities, and ensure coordination between communities and jurisdictions to reconcile conflicts.*

12. ***Public facilities and services**. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.*

13. ***Historic preservation**. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.*

14. ***Climate change and resiliency**. Ensure that the City's Comprehensive Plans and development regulations adapt to and mitigate the effects of a changing climate; support reductions in greenhouse gas emissions and per capita vehicle miles traveled; prepare for climate impact scenarios; foster resiliency to climate impacts and natural hazards; protect and enhance environmental, economic, and human health and safety; and advance environmental justice.*

15. ***Shorelines of the state**. For shorelines of the state, the goals and policies of the shoreline management act as set forth in RCW 90.58.020 shall be considered an element of the City's Comprehensive Plan.*

E. County-Wide Planning Policies

The Growth Management Act requires that Tumwater's Comprehensive Plan be consistent with the Thurston County County-Wide Planning Policies, as amended in 2025.

DRAFT

The adopted County-Wide Planning Policies are included in this document in their entirety in Appendix A. Relevant policies are also included in the introduction section of each Element.

F. Amendments and Updates

The Comprehensive Plan is subject to amendment to ensure internal and interjurisdictional consistency of the Comprehensive Plan and with the development regulations implementing the Comprehensive Plan. An evaluation of new conditions will be an integral part of the amendment process.

State law allows amendment of the Comprehensive Plan once annually, except in cases of emergency as determined by the City Council. The process Tumwater uses to amend the plan and development regulations implementing the plan is set forth in Chapter 18.60 Tumwater Municipal Code.

The Planning Commission and City Council will individually consider concurrently all proposed changes to the document accumulated over time since the last amendment, to ascertain the cumulative impact of the proposed changes.

The Comprehensive Plan may be amended outside of the normal annual amendment cycle if findings are adopted by the City Council demonstrating that the emergency meets all the following criteria:

1. The circumstances of the emergency request, if processed within the normal amendment cycle, will result in delays that contribute to significant imminent impact on the community in general, or a specific neighborhood; and
2. The emergency request relates to an issue or issues of a community or neighborhood-wide significance beyond the interests of a particular property owner, provided that an issue pertaining to an individual property may be considered if findings reveal that impacts to the community or specific neighborhood would result from the individual property.

The nature of the emergency and the proposed amendment shall be presented to the City Council, which shall decide if the proposal qualifies as an emergency. Any proposal deemed an emergency should proceed ahead of the normal amendment schedule.

G. Ongoing Plan Review Program

The Comprehensive Plan is meant to be a flexible and easily used document. As Tumwater grows and changes, the Comprehensive Plan will need to be revised and amended to reflect new circumstances.

Tumwater will undertake a program of ongoing review to monitor the performance of its Comprehensive Plan goals, policies, and implementation actions. This will be done principally through the annual Comprehensive Plan amendment process.

DRAFT

H. Public Participation

Public participation in comprehensive planning is required both as a matter of law and policy. The public participation program affirms Tumwater's commitment to public involvement in the planning process.

The intent of the public participation program is to ensure that citywide and neighborhood planning is done with the contribution of all interested parties, including residents, property owners, business owners, neighborhood associations, and other community members. Tumwater will make every effort to involve the community in the processes to develop and update the Comprehensive Plan, subarea plans, zoning, and other development regulations.

Public participation and intergovernmental coordination procedures are set forth below to ensure conformance with the Growth Management Act. Specifically, these procedures are set forth to establish policy providing for early and continuous public participation in Tumwater's development and amendment of the Comprehensive Plan and development regulations implementing the plan.

Errors in exact compliance with the established procedures do not invalidate the Comprehensive Plan or development regulations.

1. Before the due date for submitting requests for Comprehensive Plan amendments, Tumwater will publish an article on Tumwater's media platforms and distribute it to local news media inviting amendment requests and informing the public of the deadline.
2. Proposed amendments to the Comprehensive Plan and development regulations that affect the unincorporated urban growth area will be subject to public hearings by the Tumwater and Thurston County Planning Commissions, the Tumwater City Council, and the Thurston County Board of Commissioners.
3. Tumwater publications, mail, email, broadcast and print media, and the City's website and social media should be utilized by Tumwater to inform affected parties about current or proposed plans or regulations, as well as opportunities for participation in City decision processes.
4. Procedures for providing notice of public hearings are set forth in Chapter 18.60 Tumwater Municipal Code. The City should have proposed amendments to the Comprehensive Plan and development regulations available to the public for inspection at City Hall during regular business hours beginning on the first business day following the date the public hearing notice is published.
5. In addition to hearings and other formal opportunities for oral and written public comment, Tumwater should use various outreach techniques such as opinion surveys, speakers' programs, forums, workshops, open houses, hands–on events, and task forces.

DRAFT

Plan Introduction

I. Intergovernmental Coordination

Adjacent local jurisdictions, fire districts, school districts, public transit agencies, appropriate state agencies, Port of Olympia, The Confederated Tribes of the Chehalis Reservation, the Nisqually Indian Tribe, and the Squaxin Island Tribe will be mailed notices of draft Comprehensive Plan and development regulation amendment proposals prior to final adoption by the City Council.

The notice will contain a description of the amendments and methods for obtaining the draft proposal. Methods for providing input will also be included. Whenever possible, this notification process will be accomplished prior to Planning Commission consideration and in conjunction with the state agency notification requirements set forth in RCW 36.70A.106.

DRAFT

2. Overall Plan Goals

A. Engagement

Goal PI-1 Continuously engage with the community and the region.

Community engagement and participation in the comprehensive planning process are both a Tumwater policy and a state requirement, ensuring that all members of the community have a voice in Tumwater's growth and development. Tumwater will engage all members of the public in planning for Tumwater, so decisions made regarding the growth and development of Tumwater engage all parts of the community, reflect general community goals, and are sensitive to special interests of effected parties.

B. Coordination

Goal PI-2 Ensure coordination between Elements, Plans, and Subarea Plans of the Comprehensive Plan.

The Elements, Plans, and Subarea Plans that make up Tumwater's Comprehensive Plan are interconnected, so changes in one component could affect many other parts of the Plan.

As the Comprehensive Plan is updated and amended, Tumwater will make certain that all Elements, Plans, and Subarea Plans are reviewed and amended as needed when the Comprehensive Plan is updated and amended

C. Community Vibrancy

Goal PI-3 Foster livability by evoking a sense of identity through arts, culture, and history and attracting and sustaining desired economic activity that supports the community by making investments that emphasize Tumwater as a welcoming place and enhance community building.

Building community through the Comprehensive Plan is more than buildings and infrastructure. It is important to recognize the role played the arts, culture, history, and economic development in the creation and maintenance of Tumwater's history and what makes the City unique.

The Comprehensive Plan's Economic Development Plan, Parks, Recreation, and Open Space Plan , and Land Use Element all play important roles in supporting this goal.

DRAFT

D. Equity

Goal PI-4 Ensure that all members of the community, especially those whose needs have been systematically neglected, are well served by making decisions and investments through an inclusive process which results in equitable outcomes.

The Comprehensive Plan is intended serve to all members of the Tumwater community. It is important that the Plan strive to create opportunities for members of the community regardless of age, race, color, national origin, ancestry, sex, sexual orientation, familial status, marital status, ethnic background, source of income use of federal housing assistance, disability, veteran status, protected classes, or other arbitrary factors.

The Comprehensive Plan's Climate Element, Economic Development Plan and Housing Element play important roles in supporting this goal.

E. Climate Resilience

Goal PI-5 Increase climate resiliency by promoting sustainability, reducing pollution, promoting healthy habitats, and supporting clean air and water.

The Comprehensive Plan provides the goal and policy basis for how Tumwater will develop work programs over the next 20 years to address greenhouse gas reduction and climate resilience. While the goals and policies of each of the Element of the Plan support this goal, the Climate, Conservation, and Land Use Elements will be the primary guides for how Tumwater will meet this goal.

F. Fiscal Stewardship

Goal PI-6 Make wise investments of public and private funds in community infrastructure and projects.

The Comprehensive Plan provides the goal and policy basis for how Tumwater will address development and redevelopment of the community over the next 20 years. The Plans goals and policies are used in turn to guide Tumwater's investments during this period through the City's budget, Capital Facilities Plan, Transportation Improvement Plan, and project identified in system plans.

DRAFT

Public resources are finite and wise investment of such resources is essential for the financial health and the City's ability to serve its community.

G. Environmental Protection and Enhancement

Goal PI-7 Protect and enhance the environment.

Protecting and enhancing the environment and improving Tumwater's high quality of life, including air and water quality, and the availability of water, while accommodating state required growth and development is a fundamental component of the Comprehensive Plan.

The Comprehensive Plan's Climate, Conservation, and Land Use Elements play important roles in supporting this goal.

Appendix C Public Engagement Summary

The following table provides a summary of the activities that were completed to ensure the public had opportunities to engage with staff to better understand, offer feedback, and guide the development of the 2025 Comprehensive Plan Update.

Copies of all the materials that were parts of the update, draft Elements, staff reports, presentations, and other materials were continually added to and updated on the project website.

A separate City email, CompPlan@ci.tumwater.wa.us, was set up to receive public comments and questions.

Thurston County

COUNTY-WIDE PLANNING POLICIES

March 18, 2025

These policies were adopted by the Board of County Commissioners on September 8, 1992. They were ratified earlier by each of the seven cities and towns within Thurston County. Those seven cities and towns are Lacey, Olympia, Tumwater, Bucoda, Rainier, Tenino and Yelm. On August 2, 1993, representatives of Thurston County and the seven cities and towns met to clarify intent of policies 1.2 and 1.3 and to affirm long and short term Urban Growth boundaries established in 1988 around Olympia, Lacey and Tumwater. In 2002, policies were amended to be consistent with RCW 36.70A.215 ("Buildable Lands Program"). In 2015, the policies were amended to incorporate foundational principles and policies from Creating Places, Preserving Spaces, A Sustainable Development Plan for the Thurston Region, December 2013. In 2025, the policies were amended to be consistent with RCW 36.70.210, incorporating tribal participation and coordination. Thurston County includes ceded lands of the Medicine Creek Treaty Tribes, including the Nisqually Indian Tribe, Puyallup Tribe of Indians, Squaxin Island Tribe, and other tribal nations; as well as the ceded areas of and the Reservation Home Land of the Confederated Tribes of the Chehalis Reservation. These tribes will be referred to in these policies as "tribes."

Background: The Growth Management Act calls for the faster growing counties and cities within their borders to undertake new planning to prepare for anticipated growth. New parts are to be added to the Comprehensive Plans of these counties and cities, and those plans are to be coordinated and consistent. The framework for this coordination are county-wide planning policies, developed by each county, in collaboration with its cities towns, and tribes. These are Thurston County's county-wide planning policies which will be used to frame how the Comprehensive Plans of Thurston County and the seven cities and towns will be developed and coordinated.

TABLE OF CONTENTS

I. General Policies 3
II. Urban Growth Areas 5
III. Promotion Of Contiguous And Orderly Development, Provision Of Urban Services, And Protection Of Rural Areas 7
IV. Joint County And City Planning Within Urban Growth Areas 9

X. Environmental Quality 16
XI. County-Wide Policies Which Establish A Process To Develop Future Policies 17

I. GENERAL POLICIES

(Adopted November 10, 2015, Amended March 18, 2025)

The seven cities and towns within Thurston County commit to consulting with the tribes, and the agencies and departments on matters that directly affect the tribes, and to the following general policies:

1.1 Balance our needs today with those of future residents, to protect and enhance quality of life and in recognition that each generation is a trustee of the environment for succeeding generations.

1.2 Preserve and promote awareness of our historic, cultural, and natural heritage.

1.3 Collaborate with tribes to identify and protect tribal cultural resources.

1.4 Recognize tribal sovereignty and demonstrate respect for Tribal governmental authority.

1.5 Develop new ways to cultivate and support respectful civic engagement and participation by residents, and public, private, and nonprofit businesses and organizations, encouraging choices and offering information that contribute to individual, household, and community health and well-being.

1.6 Break down institutional barriers to communication and cooperation, fostering open communication and transparent processes that encourage community-wide participation.

1.7 Think broadly, regionally, and globally – act locally. Acknowledge the interdependence of communities both within and external to our region, recognizing the impacts of our region upon the world, as well as the impacts of the world upon our region.

1.8 Translate vision to policy and act on adopted local plans and policies. Consider the effects of decisions on achieving this vision, while balancing individual property rights with broader community needs and goals.

1.9 Monitor progress and shift course when necessary. Use meaningful, easy-to-understand methods to measure progress on key objectives. Respond and adapt to future social, economic, and environmental challenges.

1.10 Partner across topic areas and jurisdictional boundaries. While supporting local decision-making, encourage regional and cross-jurisdictional coordination, communication, and cooperation that increase our capacity to make decisions for the common good across jurisdiction boundaries.

1.11 Build and maintain distinct communities, preserving and enhancing the character and unique identities of the existing urban, suburban, and rural communities in a way that protects what matters most, while offering additional opportunities to improve on what can be better.

1.12 Meet basic human needs of clean water and air, healthy food, adequate housing, quality education, public safety, and equal access, regardless of socio-economic status.

1.13 Support education, employment, commercial opportunities, cultural, social, and recreational opportunities in appropriate places and at a scale that supports community health and well-being.

1.14 Champion energy efficiency and renewable energy strategies that contribute to energy independence, economic stability, reduced climate impacts, and long-term household and community health.

1.15 Protect the natural environment while acknowledging the interdependence of a healthy environment and a healthy economy.

1.16 Provide for adequate active and passive recreational opportunities.

1.17 Cooperate on utilities, transportation, and economic development issues.

II. URBAN GROWTH AREAS

(June 5, 1992, Adopted September 8, 1992, Amended November 10, 2015)

2.1 Urban growth within Thurston County is to occur only in designated urban growth areas.

2.2 The boundaries of designated urban growth areas must meet the following criteria:

a. Contain areas characterized by urban growth.
b. Be served by or planned to be served by municipal utilities.
c. Contain vacant land, or under-developed land with additional capacity, near existing urban areas that is capable of supporting urban development.
d. Be compatible with the use of designated resource lands and critical areas.
e. Follow logical boundaries.
f. Consider citizen preferences.
g. Be of sufficient area and densities to permit the urban growth that is projected to occur in the succeeding twenty-year period.

2.3 Amendments to the urban growth boundaries must use the following process:

a. Cities and towns will confer with the county about boundary location or amendment.
b. Proposed boundaries are presented to the Urban Growth Management (UGM) subcommittee of Thurston Regional Planning Council, which makes a recommendation directly to the Board of County Commissioners.
c. Following a public hearing, the Board of County Commissioners designates the boundaries and justifies its decision in writing.
d. Cities and towns not in agreement with the boundary designation may request mediation through the State Department of Commerce.
e. At least every 10 years, growth boundaries will be reviewed based on updated 20-year population projections.
f. Appeals of decisions made through this process are per the State Growth Management Act, RCW 36.70A.

2.4 Expansion of the Urban Growth Boundary must demonstrate consistency with:

a. All of the following criteria:
    i. For South County jurisdictions: the expansion area can and will be served by municipal water and transportation in the succeeding 20 years. South County jurisdictions must demonstrate that the expansion can be served by sewage disposal measures that provide for the effective treatment of waste water in the succeeding 20 years.
    ii. For North County jurisdictions: the expansion area can and will be served by municipal sewer, water, and transportation in the succeeding 20 years.
    iii. Urbanization of the expansion area is compatible with the use of designated resource lands and with critical areas.
    iv. The expansion area is contiguous to an existing urban growth boundary.
    v. The expansion is consistent with these County-Wide Planning Policies.
b. One of the two following criteria:
    i. There is insufficient land within the Urban Growth Boundary to permit the urban growth that is forecast to occur in the succeeding 20 years; or
    ii. An overriding public interest demonstrating a public benefit beyond the area proposed for inclusion would be served by moving the Urban Growth Boundary

related to protecting public health, safety and welfare; enabling more cost-effective, efficient provision of sewer or water; and enabling the locally adopted Comprehensive Plans to more effectively meet the goals of the State Growth Management Act.

2.5 Reduction of the Urban Growth Boundary must demonstrate consistency with all of the following criteria:

a. Sufficient land will remain within the reduced Urban Growth Boundary to permit the urban growth that is forecast to occur in the succeeding 20 years.

b. The reduced Urban Growth Boundary will include cost-effective sewer and water and transportation service areas, as applicable for each urban growth area.

c. Reduction of the Urban Growth Boundary is compatible with the use of the designated resource lands and with critical areas.

III. PROMOTION OF CONTIGUOUS AND ORDERLY DEVELOPMENT, PROVISION OF URBAN SERVICES, AND PROTECTION OF RURAL AREAS

(August 19, 1992, Adopted September 8, 1992, Amended November 10, 2015)

3.1 Concentrate development in urban growth areas and protect rural areas by:

a. Accommodating the county's growth first and foremost in the urban growth areas and ensuring that development occurring in rural areas is rural in character.

b. Encouraging infilling first within those parts of the urban growth areas that are:

i. Already characterized by urban growth that has adequate existing public facilities and service capacities to serve such development,

ii. Second, in areas already characterized by urban growth that will be served adequately by a combination of both existing public services and facilities, that are provided by either public or private sources, and

iii. Third, in the remaining portions of the urban growth areas.

c. Phasing urban development and facilities outward from core areas.

d. Establishing mechanisms to ensure average residential densities sufficient to enable the county as a whole to accommodate its 20-year population projection.

e. Limiting growth in rural areas to prevent sprawl and the overburdening of rural services, maintain rural character, and protect the natural environment.

f. Prohibiting urban net densities in rural areas.

g. Designating rural areas for low intensity, non-urban uses that preserve natural resource lands, protect rural areas from sprawling, low-density development and assure that rural areas may be served with lower cost, non-urban public services and utilities.

h. Where urban services and utilities are not yet available, requiring development to be configured so urban growth areas may eventually infill and become urban.

i. Considering innovative development techniques.

3.2 Coordinate Urban Services, Planning, and Development Standards through:

a. Maximizing the use of existing infrastructure and assets, and leveraging the value of these in building vital, healthy, and economically viable communities.

b. Making public investments that further multiple community goals, target identified priorities, and leverage additional investment.

c. Considering both economies of scale and long-term maintenance cost when investing in infrastructure.

d. Providing and maintaining municipal services (water, sewer, solid waste, public safety, transportation, and communication networks) in a sustainable, and cost-effective manner.

e. Coordinating planning and implementation of policies regarding urban land use, parks, open space corridors, transportation, and infrastructure within growth areas. Developing compatible development standards and road/street level of service standards among adjoining jurisdictions.

f. Developing, and ensuring the enforcement of, agreements between Thurston County and the cities and towns within its borders, that ensure development occurring within unincorporated urban growth areas is consistent with city utility and storm water planning and conforms to the development standards and road/street level of service standards of the associated city or town.

g. Phasing extensions of urban services and facilities concurrent with development and prohibiting extensions of urban services and facilities, such as sewer and water, beyond urban growth boundaries except to serve existing development in rural areas with public health or water quality problems.

h. Identifying, in advance of development, sites for schools, parks, fire, and police stations, major storm water facilities, greenbelts, open space, and other public assets. Acquisition of sites for these facilities shall occur in a timely manner and as early as possible in the overall development of the area.

3.3 Cooperate on annexations in order to accomplish an orderly transfer of contiguous lands within growth areas into the adjoining cities and towns. Cooperate on developing a streamlined and efficient process for annexation, while maintaining appropriate environmental review.

3.4 Provide capacity to accommodate planned growth by:

a. Assuring that each jurisdiction will have adequate capacity in transportation, public and private utilities, storm drainage systems, municipal services, parks and schools to serve growth that is planned for in adopted local comprehensive plans; and

b. Protecting ground water supplies from contamination and maintaining ground water in adequate supply by identifying and reserving future supplies well in advance of need.

IV. JOINT COUNTY AND CITY PLANNING WITHIN URBAN GROWTH AREAS

(August 19, 1992, Adopted September 8, 1992, Amended November 10, 2015)

4.1 Thurston County and the cities and towns within its borders will jointly plan the unincorporated portions of urban growth areas.

4.2 Each city and town will assume lead responsibility for preparing the joint plan for its growth area in consultation with the county and adjoining jurisdictions.

a. The lead city or town and the county will jointly agree to the level and role of county involvement at the outset of the project, including the role of each jurisdiction's planning commission.

b. A scope of work, schedule and budget will be jointly developed and individually adopted by each jurisdiction.

c. The process will ensure participation by area residents and affected entities.

4.3 The jointly adopted plan or zoning will serve as the basis for county planning decisions and as the pre-annexation comprehensive plan for the city to use when annexations are proposed.

4.4 Each joint plan or zoning will include an agreement to honor the plan or zoning for a mutually agreeable period following adoption of the plan or annexation.

4.5 Nothing in these policies shall be interpreted to change any duties and roles of local governmental bodies mandated by state law; for example, statutory requirements that each jurisdiction's planning commission hold hearings and make recommendations on comprehensive plans and zoning ordinances.

V. SITING COUNTY-WIDE AND STATE-WIDE PUBLIC CAPITAL FACILITIES

(June 5, 1992, Adopted September 8, 1992, Amended November 10, 2015)

5.1 Cooperatively establish a process for identifying and siting within their boundaries public capital facilities of a county-wide and state-wide nature which have a potential for impact beyond jurisdictional boundaries. The process will include public involvement at early stages. These are facilities that are typically difficult to site, such as airports, terminal facilities, state educational facilities, state or regional transportation facilities, state and local correctional facilities, solid waste handling facilities, and in-patient facilities including substance abuse facilities, mental health facilities, and group homes.

5.2 Base decisions on siting county-wide and state-wide public capital facilities on the jurisdiction's adopted plans, zoning and environmental regulations, and the following general criteria:

a. County-wide and state-wide public capital facilities shall not have any probable significant adverse impact on lands designated as critical areas or resource lands; and

b. Major public facilities that generate substantial traffic should be sited near major transportation corridors.

VI. ANALYSIS OF FISCAL IMPACT

(August 19, 1992, Adopted September 8, 1992, Amended November 10, 2015)

6.1 Develop financing methods for infrastructure which minimize the taxpayer's overall burden and fairly divide costs between existing and new development.

6.2 Cooperatively explore a method to mitigate the fiscal impact on county government of annexation of significant developed commercial and industrial properties.

6.3 Cooperatively explore methods of coordinating financing of infrastructure in urban growth areas.

VII. ECONOMIC DEVELOPMENT AND EMPLOYMENT

(June 5, 1992, Adopted September 8, 1992, Amended November 10, 2015)

7.1 Encourage an economy that is diverse, can adapt to changing conditions, and takes advantage of new opportunities.

7.2 Support the recruitment, retention, and expansion of environmentally sound and economically viable commercial, public sector, and industrial development and resource uses, including the provision of assistance in obtaining funding and/or technical assistance.

7.3 Provide in comprehensive plans for an adequate amount of appropriately located land, utilities, and transportation systems to support desirable economic development. Create and maintain regulatory certainty, consistency, and efficiency.

7.4 Acknowledge and look for opportunities to engage with regional economic drivers such as state government, the Port of Olympia, and Joint Base Lewis-McChord. Coordinate economic development efforts as well with other jurisdictions, the Economic Development Council, Chambers of Commerce, and other affected groups.

7.5 Build a vital, diverse, and strong local economy, including job opportunities that support community and household resilience, health, and well-being, by:

a. Supporting workforce training and offering opportunities for education and entrepreneurial endeavors.
b. Supporting creativity, arts, and culture.
c. Providing opportunities for a range of business types to succeed.
d. Emphasizing policies that support locally owned businesses including home-based, entrepreneurial, and nonprofit business and organizations.
e. Encouraging the development of local services for food, clothing, and other basic human needs.
f. Nurturing urban and rural agricultural and food-oriented businesses.
g. Protecting resource lands.
h. Encouraging the utilization and development of areas designated for industrial use, consistent with the environmental policies in these county-wide policies.
i. Connecting economic health with personal health and well-being and the advancement of environmental health.
j. Adding incentives for businesses to demonstrate their environmental sustainability including reduction in greenhouse gas emissions.

VIII. AFFORDABLE HOUSING

(August 19, 1992, Adopted September 8, 1992, Amended November 10, 2015)

8.1 Increase housing choices to support all ranges of lifestyles, household incomes, abilities, and ages. Encourage a range of housing types and costs that are commensurate with the employment base and income levels of jurisdictions' populations, particularly for low, moderate and fixed income families.

8.2 Accommodate low and moderate income housing throughout each jurisdiction rather than isolated in certain areas.

8.3 Explore ways to reduce the costs of housing.

8.4 Establish and maintain a process to accomplish a fair share distribution of affordable housing among the jurisdictions.

8.5 Work with the private sector, Housing Authority, neighborhood groups, and other affected citizens, to facilitate the development of attractive, quality, low and moderate income housing that is compatible with the surrounding neighborhood and located within easy access to public transportation, commercial areas and employment centers.

8.6 Regularly examine and modify policies that pose barriers to affordable housing.

8.7 When possible, provide assistance in obtaining funding and/or technical assistance for the expansion or establishment of low cost affordable housing for low, moderate and fixed income individuals and families.

IX. TRANSPORTATION

(*April 30, 1992, Adopted September 8, 1992, Amended November 10, 2015*)

9.1 Increase transportation choices to support all ranges of lifestyles, household incomes, abilities, and ages.

9.2 Increase opportunities for riding transit, biking, walking, ridesharing, allowing and encouraging flexible work schedules, and teleworking.

9.3 Encourage efficient multi-modal transportation systems that are based on regional priorities and are coordinated with county and city comprehensive plans.

a. Local comprehensive plans will consider the relationship between transportation and land use density and development standards.

b. Local comprehensive plans and development standards should provide for local and regional pedestrian and bicycle circulation.

c. Improved transit service will be based on Intercity Transit's plans, informed by and consistent with the regional transportation plan and local comprehensive plans.

d. Transportation Demand Management plans and programs required by State law will be implemented as a key part of the region's transportation program.

e. Improvements to the regional road network will be consistent with local and regional transportation plans.

f. The regional transportation planning process is the primary forum for setting county-wide transportation policy.

9.4 The transportation element of each jurisdiction's comprehensive plan will be consistent with the land use element of that jurisdiction's comprehensive plan.

9.5 The transportation element of each jurisdiction's comprehensive plan will include level of service standards for all arterials and transit routes and services. Each jurisdiction will coordinate these level of service standards with all adjacent jurisdictions. Transit level of service standards will be consistent with Intercity Transit policies.

9.6 Each jurisdiction's transportation element will include an assessment of the impacts of the transportation plan and land use assumptions on the transportation systems of adjacent jurisdictions.

9.7 The transportation elements of comprehensive plans adopted by Thurston County and each city and town in the county will be consistent with the Regional Transportation Plan adopted by Thurston Regional Planning Council, in accordance with the provisions of the Washington State Growth Management Act.

9.8 The Regional Transportation Plan adopted by Thurston Regional Planning Council will be consistent with the land use elements of comprehensive plans adopted by Thurston County and the cities and towns within Thurston County and with state transportation plans. To ensure this, the Regional Transportation Plan will be reviewed and updated, if necessary, at least every two years for consistency with these plans.

9.9 All transportation projects within Thurston County that have an impact upon facilities or services identified as regional in the Regional Transportation Plan will be consistent with the Regional Transportation Plan.

9.10 Local and regional transportation plans will consider maritime, aviation, and rail transportation as an integral link to the area's regional transportation needs.

X. ENVIRONMENTAL QUALITY

(*August 19, 1992, Adopted September 8, 1992, Amended November 10, 2015, Amended March 18, 2025*)

10.1 Recognize our dependence on natural systems and maintain a balance between human uses and the natural environment.

10.2 Establish a pattern and intensity of land and resource use that is in concert with the ability of land and resources to sustain such use, reduce the effects of the built environment on the natural environment, conserve natural resources, and enable continued resource use, through:

a. Land-use and transportation plans and actions that encourage compact development and concentrate development in urban growth areas.
b. Retrofitting existing infrastructure to reduce impacts of the built environment on the natural environment.
c. Planning for the amount of population that can be sustained by our air, land, and water resources without degrading livability and environmental quality.
d. Minimizing high noise levels that degrade residents' quality of life.

10.3 Protect the soil, air, surface water, and groundwater quality, including through:

a. Reducing dependence on the use of chemicals and other products that pollute and, when their use is necessary, minimizing releases to the environment.
b. Ensuring adequate clean water is available to support household and commercial needs while sustaining ecological systems through conservation, balancing of uses, and reuse.
c. Protecting ground and surface water, the rivers and creeks of Thurston County and the water of the Puget Sound from further degradation by adopting and participating in comprehensive, multi-jurisdictional programs to protect and monitor water resources for all uses, including fish habitat and passage.
d. Protecting and enhancing air quality.

10.4 Take action to conserve resources, increase use of renewable resources and decrease dependence on non-renewable resources by:

a. Reducing energy consumption and reliance on nonrenewable energy sources.
b. Encouraging the reuse and recycling of materials and products, and reduction of waste to the maximum extent practicable.

10.5 Acknowledge that changing weather and climate patterns will impact the human, natural, and built environments and plan for impacts such as increased wildfire, flooding and sea-level rise.

10.6 Protect and restore natural ecosystems, such as, forests, prairies, wetlands, surface and groundwater resources, that provide habitat for aquatic and terrestrial plants and animals.

10.7 Provide for public access to natural resource lands, while ensuring that uses and economic activity which are allowed within those lands are sustainable.

10.8 Provide for parks and open space and maintain significant wildlife habitat and corridors.

10.9 Where outdoor lighting is necessary, design the lighting to minimize the light pollution.

XI. COUNTY-WIDE POLICIES WHICH ESTABLISH A PROCESS TO DEVELOP FUTURE POLICIES

(August 10, 1992, Adopted September 8, 1992, Amended July 1, 2002, Amended November 10, 2015, Amended March 18, 2025)

11.1. Process to determine and assure sufficiency of Urban Growth Areas to permit projected urban population:

a. The state Office of Financial Management (OFM) growth management planning population projections for Thurston County will be used as the range of population to be accommodated for the coming 20 years.

b. Within the overall framework of the OFM population projections for the County, Thurston Regional Planning Council will develop countywide and smaller area population projections, pursuant to RCW 36.70A.110 and based on current adopted plans, zoning and environmental regulations and buildout trends.

c. A review and evaluation program pursuant to RCW 36.70A.215 ("Buildable Lands Program") will be established. The evaluation and subsequent updates required under the Buildable Lands Program will follow timelines in the RCWs, subject to availability of State funding. This evaluation may be combined with the review and evaluation of county and city comprehensive land use plans and development regulations required by RCW 36.70A.130 (1), and the review of urban growth areas required by RCW 36.70A.130(3).

i. In the event of a dispute among jurisdictions relating to inconsistencies in collection and analysis of data, the affected jurisdictions shall meet and discuss methods of resolving the dispute.

ii. Nothing in this policy shall be construed to alter the land use power of any Thurston County jurisdiction under established law.

iii. Because inclusion of this policy is as a result of state mandated legislation, implementation of this policy shall be commensurate with state funding.

d. The Thurston Regional Planning Council will review the smaller area population projections to assure that the 20-year population is accommodated county-wide, and that urban growth areas are of sufficient area and densities to permit the projected urban population.

11.2 These county-wide policies will be reviewed upon the request of four jurisdictions.

11.3 Under the State Growth Management Act, authority for making changes to County-Wide Planning Policies (CWPPs) lies with counties. The State Growth Management Act also states that counties are required to consult with the cities, towns, and tribes within its borders regarding changes to the CWPPs. It is the role of the Thurston Regional Planning Council Urban Growth Management (UGM) Subcommittee to be the vehicle for this jurisdictional consultation process in Thurston County. Amendments to the Thurston County County-Wide Planning Policies must use the following process:

a. Proposed amendments are to be reviewed by the UGM Subcommittee, which consists of a representative from the Council of each of the cities, towns, and tribes in Thurston County and a representative from the Board of County Commissioners.

b. Technical assistance will be provided to the UGM Subcommittee by jurisdictional Planning Directors or their designated representatives.

c. It is the responsibility of the UGM Subcommittee members to coordinate with their respective Councils regarding amendments to the CWPPs and to do so prior to the UGM Subcommittee making its recommendation on the amendments to the Board of County Commissioners.

d. The UGM Subcommittee will make a recommendation on the amendments to the CWPPs directly to the Board of County Commissioners.

e. The Board of County Commissioners will hold a public hearing on the amendments to the CWPPs. This public hearing would allow cities, towns, and tribes within Thurston County an opportunity to comment directly to the Board of County Commissioners on the amendments.

Acronyms and Abbreviations Used in Document

ASD – Administrative Services Department.

CBO – Community Based Organization.

CCA – The Climate Commitment Act (CCA) (Chapter 310, Laws of 2021) caps and reduces greenhouse gas emissions from Washington's largest emitting sources and industries, allowing businesses to find the most efficient path to lower carbon emissions. This program works alongside other critical climate laws and policies to help Washington achieve its commitment to reducing greenhouse gas emissions by 95% by 2050. The CCA also puts environmental justice and equity at the center of climate policy, making sure communities that bear the greatest burdens from air pollution today breathe cleaner, healthier air as the state cuts greenhouse gases. Finally, funds from the auction of emission allowances support new investments in climate-resiliency programs, fund clean transportation, and address health disparities across the state.

CDD – Tumwater Community Development Department

City – City of Tumwater

Commerce – Washington State Department of Commerce

County – Thurston County

CPAT – Climate Policy Advisory Team

DAHP – Washington State Department of Archaeology and Historic Preservation

EDC – Thurston Economic Development Council

EV – Electric Vehicle

EXD – Tumwater Executive Department

Fire & EMS – Fire and Emergency Medical Services Department.

FIN – Tumwater Finance Department

GHG – Greenhouse Gas

PRFD – Tumwater Parks, Recreation, & Facilities Department

RCW – Revised Code of Washington

TCAT – Thurston Climate Action Team

TED – Tumwater Transportation & Engineering Department

TMC – Tumwater Municipal Code

Tribes – Nisqually Indian Tribe, Squaxin Island Tribe, and the Confederated Tribes of the Chehalis Reservation

TRPC – Thurston County Regional Planning Council

UFMP – Urban Forestry Management Plan

WRS – Tumwater Water Resources & Sustainability Department

WSDOT – Washington State Department of Transportation

Key Terms and Definitions

15-minute neighborhood: An urban planning concept referring to neighborhoods in cities in which most daily necessities, services, and amenities (e.g., work, education, health care, shopping, recreational opportunities) can be reached by a 15-minute walk, bicycle ride, or public transportation trip. These neighborhoods tend to be relatively walkable and support a greater baseline of residential density.

Climate: The "average weather" generally over a period of three decades. Measures of climate include temperature, precipitation, and wind.

Climate change: Any significant change in the average climate of a region lasting for decades or longer. Can be measured through substantial changes in temperature, precipitation, or wind. Climate change may result from natural factors and from human activities that change the atmosphere's composition and land surface.

Climate refugia: Areas that continue to resist the impacts of anthropogenic climate change, allowing valued and culturally significant physical, ecological, and socio-cultural resources to continue to survive and even thrive amidst a changing landscape.[1]

Environmental Justice (EJ): The fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to environmental laws, rules, and policies according to RCW 70A.02.010(8). Environmental justice includes

[1] Morelli, T.L.; Millar, C. 2018. Climate Change Refugia. USDA Forest Service Climate Change Resource Center. https://www.fs.usda.gov/ccrc/topics/climate-change-refugia

addressing unfair environmental and health impacts in all laws, rules, and policies by:

- prioritizing vulnerable populations and overburdened communities;
- the equitable distribution of resources and benefits; and
- eliminating harm.

Food Justice: Assumes consistent access to nutritious, affordable, and culturally relevant food to be a human right that should be secured and protected.

Frontline Community[2]: Those communities that experience the effects of climate change "first and worst" while also having significantly lower capacity to adapt and reduced access to resources and political power to respond to those risks. Though not limited to these groups, frontline communities generally include communities of color, Indigenous peoples, and low-income communities. These communities have also not historically had access to City decision making processes.

Green stormwater infrastructure: Stormwater management systems that mimic natural systems, capturing and absorbing or diverting rainwater where it falls.

Greenhouse gas (GHG): Any gas that absorbs heat in the atmosphere; examples include carbon dioxide, methane, nitrous oxide, ozone, and water vapor.

Managed retreat: The voluntary movement and transition of communities away from regions that are likely to become unsustainable for life due to climate change impacts. Primarily a tool used in coastal regions to move communities away from sea level rise impacts, but increasingly a tool used in planning for other climate hazards.

Native species: Any plant, fungus, or animal species native to our area. In the US, this only includes species present in the region prior to the arrival of European settlers.[3]

Overburdened Community[4]: According to RCW 70A.02.010(11), denotes a geographic area where vulnerable populations face combined, multiple environmental harms and health impacts, and includes, but is not limited to, highly impacted communities as defined in RCW 19.405.020.

Passive survivability: Building to ensure that residences will remain at a safe temperature for occupants if the power goes out and that they will overall require less power to keep at a regulated temperature. It can also entail building single-family residences with one room designed to maintain comfortable temperatures or multifamily residences with a designated common area designed to serve this same

[2] In the Climate Element the term "frontline community" is preferred as it does not carry the disempowering and othering connotations of the terms "overburdened community" and "vulnerable population." However, the latter terms carry legislative meaning, with precise definitions in Washington State law and policies that direct funding for and engagement with these groups. All three terms will be used throughout the goals, policies, and implementation actions contained in this Element. "Frontline communities" will be the preferred term where the legislative context is not relevant, while "overburdened community" and "vulnerable population" will be used where the precise definitions are key to enacting the policy.

[3] United States Department of Agriculture, n.d. "What is a native plant?" https://www.usda.gov/peoples-garden/gardening-advice/why-native-species-matter

[4] See Note 1

function. Building for passive survivability also reduces demand on local energy infrastructure.

Resilience: the ongoing process of anticipating, preparing for, and adapting to changes in climate and minimizing negative impacts to our natural systems, infrastructure, and communities (RCW 70A.65.010).

Sustainability: meeting the needs of the present without compromising the ability of future generations to meet their own needs. Often considered through the "triple bottom line" approach which considers impacts to natural environment, community health, and economic vitality.

Vulnerable Populations[5]: According to RCW 70A.02.010(14), includes population groups that are more likely to be at higher risk for poor health outcomes in response to environmental harms, due to: adverse socioeconomic factors, high housing and transportation costs relative to income, limited access to nutritious food and adequate health care, linguistic isolation, and other factors that negatively affect health outcomes and increase vulnerability to the effects of environmental harms; and sensitivity factors, such as low birth weight and higher rates of hospitalization. Vulnerable populations can include but are not limited to racial or ethnic minorities, low-income populations, populations disproportionately impacted by environmental harm, and populations of workers experiencing environmental harm.

DRAFT

[5] See Note 1

1. Introduction

The Climate Element is part of Tumwater's Comprehensive Plan and was created to meet the State Growth Management Act (Chapter 36.70A RCW) requirements to adapt to and mitigate the effects of a changing climate.

Tumwater's Vision, Mission, and Belief Statements that provide overarching direction for the future of Tumwater are found in the Plan Introduction.

The Climate Element aligns and is consistent with the other elements of the Comprehensive Plan.

Part 1 – Goals Policies, and Implementation Actions establishes Tumwater's goals and policies to address greenhouse gas reduction and climate resilience.

The goals and policies of the Climate Element are guided by the state Growth Management Act and the Thurston County-Wide Planning Policies and the vision of a Tumwater that is a vibrant city that fosters a sense of place, active transportation, local business prosperity, and provides a safe environment for our coming climate challenges. The Element's goals and policies are coordinated with the other Elements and regional plans.

The Climate Element's goals and policies are the policy basis for the draft implementation actions in Climate Element and those future actions that will be developed over the next 20 years which will be the foundation for Tumwater's annual work programs to address greenhouse gas reduction and climate resilience.

Part 2 – Technical Information provides the background information on the development of the Climate Element.

A. How to Read this Part of the Element

In Part 1, Chapters 2 and 3 discuss the Climate Element's connection to the goals of the state Growth Management Act and the Thurston County-Wide Planning Policies.

Chapter 4 presents each goal with introductory text, and an explanation of the lead and timeline for each policy.

Appendix A contains the draft implementation actions, which are intended to be a source of annual work program items that serve to implement the goals and policies of the Climate Element.

The annual work programs will further refine the implementation actions prior to their being put into practice. It is expected that implementation actions will be further amended, added, or subtracted as needed over the course of the 20 year Comprehensive Plan as new opportunities arise to meet the intent of the Climate Element's goals and policies.

DRAFT

2. Growth Management Act

The State Growth Management Act (Chapter 36.70A RCW) requires that Tumwater shows that each Element in its Comprehensive Plan meets the relevant fifteen planning goals contained within the Act. The fifteen goals guide the development and adoption of Tumwater's Comprehensive Plan and development regulations.

The following is a summary of how the new Climate Element addresses the goal related to climate change and resiliency. The state legislature added this goal in 2023.

15. ***Climate change and resiliency***. *Ensure that comprehensive plans, development regulations, and regional policies, plans, and strategies under RCW 36.70A.210 and chapter 47.80 RCW adapt to and mitigate the effects of a changing climate; support reductions in greenhouse gas emissions and per capita vehicle miles traveled; prepare for climate impact scenarios; foster resiliency to climate impacts and natural hazards; protect and enhance environmental, economic, and human health and safety; and advance environmental justice.*

The Conservation Element, Land Use Element, and Transportation Plan of the Comprehensive Plan address this new goal in coordination with the new Climate Element.

The Climate Element addresses the dual goals of increasing climate resiliency and mitigating Tumwater's contributions to climate change by promoting sustainability, reducing pollution, promoting healthy habitats, and supporting clean air and water.

DRAFT

3. County-Wide Planning Policies

The Growth Management Act requires that comprehensive plans be consistent with Thurston County's County-Wide Planning Policies, as amended in 2015.

The following is a list of the relevant policies that apply to this Element. The sections of the County-Wide Planning Policies relevant to this Element are cited below. All County-Wide Planning Policies are adopted as Appendix B to the Comprehensive Plan.

I. General Policies

The Climate Element has goals, policies, and actions that address County-Wide Planning Policies 1.1 through 1.14. These goals, policies and actions support a regional vision for sustainable communities which will thrive in the face of climate change impacts and lead efforts to mitigate future impacts.

VII. Economic Development and Employment

Resource uses and resource land protection are addressed in the goals, policies, and actions of the Climate Element.

X. Environmental Quality

The Climate Element is based upon the themes of equity, sustainability, and resilience.

DRAFT

4. Element Goals and Policies

A. How to Read These Tables

The Climate Element goals and policies are not in priority order.

Appendix A provides a list of the draft implementation actions by goal and policy that will be considered when developing annual work programs for implementing the Climate Element's goals and policies.

1) Department Leads

Implementation of the Climate Element's policies is associated with eight different Tumwater departments:

CAO	City Attorney's Office
CDD	Community Development Department
EXD	Executive Department
FIN	Finance Department
PRD	Parks, Recreation, and Facilities Department
TED	Transportation & Engineering Department
TFD	Fire Department
WRS	Water Resources & Sustainability Department

In most cases, the work will require multiple Tumwater departments working together. Each of the Climate Element's policies include a lead department or departments.

2) Period

Each of the Climate Element's policies are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are for the term of the Comprehensive Plan with no set target completion date.

B. Overarching Climate Goals

Goal CL-1 Increase Tumwater's capacity to implement climate action and adaptation priorities.

The goals and policies contained in this Element will only lead to effective climate mitigation and adaptation if Tumwater devotes appropriate resources to implement all aspects of the Element.

Policies		Lead	Period
CL-1.1	**Support fully staffing Tumwater positions needed to support the actions outlined in the Climate Element.**	**WRS EXD**	**Start:** 2026

DRAFT

Policies		Lead	Period
CL-1.2	**Develop a program funding strategy to support equitable access to climate mitigation and adaptation programs developed by Tumwater.**	**WRS** EXD	**Start:** 2026
CL-1.3	**Educate Tumwater staff and community on the Climate Element's goals, policies, and actions.**	**WRS**	**Start:** 2026

Goal CL-2 Advance environmental justice by providing all Tumwater community members with an equitable opportunity to learn about climate impacts, influence policy decisions, and take actions to enhance community resilience.

Environmental justice must be central to any effort to mitigate and adapt to climate change. Tumwater will create opportunities for all members of the community to make meaningful changes to climate policy and must also strive to ensure frontline communities have access to resources to adapt to climate impacts.

Policies		Lead	Period
CL-2.1	**Work with community based organizations and community organizers to conduct intentional outreach with frontline communities to create opportunities for equitable engagement in climate adaptation, mitigation, and education.**	**WRS** EXD	**Start:** 2026 Term of the Plan
CL-2.2	**Prioritize the people of Tumwater and their needs, values, and goals in all future climate planning efforts by developing and implementing all adaptation and mitigation tasks in collaboration with equitable representation from all Tumwater communities.**	**WRS**	**Start:** 2026 Term of the Plan
CL-2.3	**Develop programs and resources to promote equitable financial access to climate resilience and mitigation activities.**	**WRS** **FIN** EXD	**Start:** 2026

Goal CL-3 Address that changing weather and climate patterns driven by human-generated emissions will affect every aspect of life in Tumwater, and plan for impacts such as increased heat, wildfire, and flooding while working to reduce local emissions.

This goal is at the heart of why Tumwater is climate planning. Human-generated emissions are driving unprecedented climate changes, and that fact drives the Greenhouse Gas Reduction

Sub-Element, whose goals strive to curb human emissions. Simultaneously, Tumwater and all communities globally must prepare for the inevitable impacts already set in motion.

Policies		Lead	Period
CL-3.1	**Assess Tumwater's vulnerability to climate change.**	**WRS**	**Start:** 2027
CL-3.2	**Address climate change impacts in all Tumwater planning efforts.**	**WRS** **CDD**	**Start:** 2027

C. Greenhouse Gas Reduction Sub-Element Goals

This sub-element contains five goals that aim to help Tumwater reach its new goal of net-zero emissions by 2045, ahead of the State's emissions target. The policies and actions in the sub-element focus on continuing Tumwater's progress on addressing climate mitigation.

1) Greenhouse Gas Reduction Targets

Under RCW 36.70A.070, Tumwater is required to prepare a sub-element on greenhouse gas emissions reduction as part of its Climate Element. Tumwater's Greenhouse Gas Reduction Sub-Element directs Tumwater's approach to eliminating Greenhouse Gas emissions towards achieving net-zero emissions by 2045.

Tumwater has identified specific interim targets for municipal emissions, such as emissions from Tumwater-owned assets, operations, and services, and community-wide emissions, such as emissions from various sectors across Tumwater, including but not limited to residential, commercial, and transportation sectors.

Community-wide Greenhouse Gas Emissions Targets

- Reduce community-wide emissions by 45% from 2023 levels by 2030, and 70% by 2040.
- Achieve net-zero community-wide emissions by 2045.

Municipal Greenhouse Gas Emissions Targets

- Reduce municipal emissions by 50% from 2023 levels by 2030.
- Achieve net-zero municipal emissions by 2045.

2) Greenhouse Gas Goals and Policies

The goals and policies identified below are designed to move Tumwater towards these emissions reduction targets. As with other components of this Climate Element, these goals and policies were developed based on present information and community feedback, but they are subject to revision over time as regulations and technology evolve.

Goal CL-4 Reduce greenhouse gas emissions from all building types through energy conservation measures prioritizing the deployment of financial resources and programs that help finance or subsidize improvements across Tumwater.

Greenhouse gas emissions from buildings and energy use account for over half of the community-wide emissions across Thurston County. This presents significant opportunities for action and impact, which can include prioritizing energy conservation measures and funding programs and incentives that will reduce Tumwater's municipal and community-wide greenhouse gas emissions.

Community members expressed support for energy efficiency measures to provide financial benefits, particularly for renters and low-income residents.

Policies		Lead	Period
CL-4.1	**Reduce energy use across building types.**	WRS CDD	**Start:** 2026 Term of the Plan
CL-4.2	**Reduce energy use in existing residential buildings.**	WRS CDD	**Start:** 2026 Term of the Plan
CL-4.3	**Reduce energy use in existing nonresidential buildings.**	WRS CDD	**Start:** 2026 Term of the Plan
CL-4.4	**Reduce energy use in new construction, redevelopment, and deconstruction.**	WRS CDD	**Start:** 2027
CL-4.5	**Increase energy efficiency in manufactured home parks and recreational vehicle parks/campgrounds.**	WRS CDD	**Start:** 2027
CL-4.6	**Convert to alternative fuel sources.**	WRS CDD	**Start:** 2026 Term of the Plan

Goal CL-5 Expand the use of on-site renewable energy technology (e.g., solar photovoltaics, battery storage, etc.) across all building types through providing funds, code changes, and educational programs.

Local on-site renewable technology, such as solar photovoltaics and battery storage, will provide increased renewable energy options to Tumwater community members. Additionally, the development of local renewable energy resources strengthens Tumwater's resilience during future extreme weather events. Developing local renewable energy resources

can also strengthen the local economy through job creation.

Policies		Lead	Period
CL-5.1	**Increase the production and storage of local renewable energy.**	WRS CDD	**Start:** 2026

Goal CL-6 Reduce greenhouse gas emissions by making it easier for people to use and shift to low- or zero-carbon transportation modes through policy, programming, and regional collaborations.

Transportation is the second largest source of greenhouse gas emissions in Thurston County. Tumwater can significantly reduce emissions by creating policies and programs that support zero emissions transportation modes, including increasing the number of electric vehicles and charging stations throughout Tumwater and encouraging active transportation such as biking and walking. Community members strongly expressed the desire for improved sidewalks and an increased number of bike lanes to enable active transit.

Policies		Lead	Period
CL-6.1	**Promote increased use of active forms of travel such as bicycling, walking, and other nonmotorized options.**	TED	**Start:** 2026 Term of the Plan
CL-6.2	**Increase adoption of electric vehicles.**	WRS	Term of the Plan
CL-6.3	**Facilitate low-carbon options for movement into and through Tumwater.**	CDD TED	**Start:** 2026 Term of the Plan

Goal CL-7 Reduce vehicle miles traveled by using permitting, regulatory, and other land use tools to promote multimodal transportation options and the use of public transit.

In addition to increasing the adoption of electric vehicles and encouraging active transportation in Tumwater, expanding multimodal options and public transit ridership can greatly affect Tumwater's greenhouse gas emissions.

Promoting public transit ridership includes short term efforts, such as public awareness campaigns and expand transit lines, and long-term efforts, such as urban planning to reduce urban sprawl. Land use tools, such as street network connectivity improvements, can also

contribute to reducing vehicle miles traveled, which in turn lead to reduced emissions, air pollution, and traffic congestion.

Policies		Lead	Period
CL-7.1	**Continue land use policies that support increased urban density and efficient transportation networks and reduce urban sprawl.**	**CDD**	Term of the Plan
CL-7.2	**Increase efficiency of the transportation system.**	**TED**	Term of the Plan

Goal CL-8 Strengthen existing policies and regulations to deploy and enhance natural carbon solutions that are ecosystem-appropriate, store carbon, and offer co-benefits such as pollution reduction, wildlife habitat, and climate resilience.

Natural carbon solutions play an important role in the local environment by sequestering carbon through tree canopy and natural open space. In conjunction with reducing greenhouse gas emissions at the source, natural carbon solutions reduce atmospheric carbon, pollution, and reduce urban heat. Community members have expressed strong support of preserving the tree canopy in Tumwater.

Policies		Lead	Period
CL-8.1	**Preserve tree canopy, native prairie habitat, and support habitat restoration and conservation to sequester carbon.**	**WRS CDD**	Term of the Plan

D. Resilience Sub-Element Goals

This section contains eight goals that aim to help Tumwater guide climate adaptation efforts to protect its communities against unavoidable climate impacts. The policies and actions in this element focus on expanding and improving Tumwater's work on Climate Adaptation.

Goal CL-9 Design, plan, and upgrade buildings and energy infrastructure to accommodate renewable energy opportunities, keep the community safe, and withstand and recover from extreme weather and natural hazards worsened by climate change.

Tumwater's energy infrastructure and buildings need to be protected against projected climate impacts, creating safe and reliable space for community members. Renewable energy does

not just offer climate mitigation benefits: locally generated and stored renewable energy is also more resilient under an uncertain climate future.

Policies		Lead	Period
CL-9.1	Require that planned facilities, utilities, and infrastructure projects and existing vulnerable sites be built or hardened to avoid or withstand climate impacts, including extreme heat, extreme precipitation, and sea level rise.	CDD WRS	Start: 2028
CL-9.2	Plan energy infrastructure to be able to integrate with an increase in renewable energy sources, including increasing energy storage capacity to improve energy grid resilience.	CDD WRS TFD	Start: 2026
CL-9.3	Require buildings in high-risk areas[6] to be designed and built to be resilient to natural hazards and extreme weather worsened by climate change.	CDD WRS	Start: 2028
CL-9.4	Encourage property owners to increase the resilience of existing buildings to natural hazards and extreme weather worsened by climate change.	CDD WRS	Start: 2028
CL-9.5	Work with Puget Sound Energy to improve the safety and reliability of infrastructure vulnerable to climate change.	WRS CDD	Start: 2026

Goal CL-10 Increase preparedness for acute climate impacts and improve the resilience of Tumwater's people and systems against climate hazards.

Research has shown that climate change impacts frontline communities first and worst, while these communities also contribute the least to worsening climate change. System-wide changes need to be implemented to protect all of Tumwater's community members from both chronic and acute climate harm, with particular attention to frontline communities.

Policies		Lead	Period
CL-10.1	Improve community outreach on and response capabilities for climate health and hazard issues, prioritizing frontline communities to address economic, social, and health disparities.	WRS EXD	Start: 2026
CL-10.2	Develop resources to mitigate the risks posed by extreme heat in coordination with regional partners.	WRS TFD	Start: 2026

[6] High risk areas to be identified by Tumwater's Comprehensive Vulnerability Assessment, which should be completed by 2028. Weatherization and hardening building codes should be developed based on identified risks and land use designations of at-risk land parcels.

Policies		Lead	Period
CL-10.3	Increase regional wildfire resilience, preparedness, and response capabilities in Tumwater.	WRS TFD	Start: 2026
CL-10.4	Collaborate with regional partners to develop resources that address projected increases in risks and impacts associated with climate change.	WRS TFD	Start: 2026
CL-10.5	Improve community resilience, health equity, and environmental justice by striving to ensure that all community members can use active transportation to access public green spaces within half a mile and connected by sidewalks or protected walkways.	TED WRS PRD	Start: 2027
CL-10.6	Position Tumwater to qualify for more funding opportunities to adapt to climate impacts.	WRS	Start: 2028
CL-10.7	Work with the Thurston County Public Health Department to increase local understanding of how climate change impacts vector-borne disease outbreaks.	WRS	Start: 2027
CL-10.8	Develop programs that enable and empower community members to protect themselves from poor air quality.	WRS	Start: 2027
CL-10.9	Work with Thurston County Emergency Management to improve access to the resources needed for community members to shelter in place or to adequately reach temporary shelter.	TFD WRS	Start: 2026
CL-10.10	Increase language accessibility of emergency services, plans, and resources.	EXD	Start: 2026

Goal CL-11 Preserve, protect, and sustain cultural sites and resources in alignment with the values and needs of Tribes, traditional stewards, and frontline communities.

Tumwater is built on land traditionally stewarded by the Coast Salish people. Their descendants in the Nisqually, Squaxin Island, Chehalis, and Cowlitz Tribes continue to live on and steward the land today but are also unfairly impacted by climate change and excluded from key climate decision-making. Tumwater must elevate the goals, values, and needs of the region's Indigenous communities.

Policies		Lead	Period
CL-11.1	Enhance partnership between the Tribes and Tumwater, integrating Tribal expertise, opinions, and values into climate planning efforts, projects, and programs.	EXD WRS	Start: 2026

Policies		Lead	Period
CL-11.2	In accordance with Tribal treaty rights, protect, enhance, and restore ecosystems and culturally important consumptive and non-consumptive resources including foods, medicinal plants, places, and materials that could be adversely impacted by climate change.	WRS PRD	**Start:** 2026
CL-11.3	Collaborate with the Tribes to prioritize the preservation of archaeological sites and traditional cultural properties that are vulnerable to climate impacts.	WRS CDD PRD	**Start:** 2026

Goal CL-12 With climate, growth, and environmental changes in mind, identify and elevate the protection of key habitats, ecosystem services, and wildlife corridors.

Protecting Tumwater's local ecosystems is key to building both ecological and community resilience to expected climate impacts. Resilient ecosystems will help vital native species to survive and thrive in the coming decades, while also continuing to provide key ecosystem services to Tumwater's human residents.

Policies		Lead	Period
CL-12.1	Manage Tumwater's urban forest in line with the most recent Urban Forestry Management Plan and current climate projections and guidance.	WRS	**Start:** 2026
CL-12.2	Protect, restore, and connect streams, estuaries, wetlands, floodplains, and other land and habitats that are next to rivers and streams (i.e., riparian ecosystems) to increase resiliency to climate change and reduce flood risk.	WRS CDD	**Start:** 2026
CL-12.3	Manage Tumwater's natural resources to protect, restore, and connect native ecosystems and foster habitats that are resilient to climate change.	CDD WRS	**Start:** 2030
CL-12.4	Increase the climate resilience of native fish species and aquatic ecosystems by reducing the impact of threats such as aquatic invasive species, invasive plants, pollutants, and changes in seasonal water flow.	WRS	**Start:** 2026
CL-12.5	Advocate for prioritizing maintenance of habitat integrity and function when working with regulatory agencies to determine allowed activities and uses within protected wetlands and Fish and Wildlife Habitat Conservation Areas.	WRS	**Start:** 2026

DRAFT

Policies	Lead	Period
CL-12.6 Take early action to eliminate or control non-native invasive species, including insects and plants that take advantage of climate change, especially where invasives threaten native species or ecosystem function.	WRS PRD TED	**Start:** 2026

CL-13 Promote land use and development decisions that support compact urban development and Tumwater-wide resilience, including a resilient local economy.

Compact, walkable, and transit-oriented cities are vital to building community resilience. Land use decisions should support this future, while also striving to foster equity in decision-making.

Policies	Lead	Period
CL-13.1 Continue to focus high intensity land uses into centers to support community resilience and provide public services more efficiently.	CDD	**Start:** 2026
CL-13.2 Form a working group to secure Tumwater's economic resilience regarding climate impacts.	EXD WRS	**Start:** 2026
CL-13.3 In coordination with the Conservation Element, protect, restore, and maintain critical areas, non-regulated open space areas, and the floodplain to maximize climate resilience and ecosystem benefits.	WRS	**Start:** 2026
CL-13.4 Identify and implement strategies for reducing development pressure in the wildland-urban interface.	CDD	**Start:** 2027
CL-13.5 Encourage the location of new development in areas where exposure to climate hazards is low and ecological impacts are minimized.	CDD	**Start:** 2026
CL-13.6 Support efforts of local businesses to bolster climate preparedness and continuity of operations.	EXD WRS	**Start:** 2035
CL-13.7 In areas with significant vulnerability to climate hazards, facilitate and support long-term community visioning including consideration of managed retreat.	CDD WRS	**Start:** 2026

Goal CL-14 Strive to create a local transportation system, including infrastructure, routes, and active travel modes, which fosters connectivity and can withstand and recover quickly from climate impacts.

It is important to address the intersection of transportation planning and climate resilience in the Transportation Plan framework for an equitable, accessible, and multimodal future for Tumwater.

Policies	Lead	Period
CL-14.1 Improve street connectivity, transit accessibility, and walkability, including sidewalks and street crossings, to ease emergency evacuation.	TED	Term of the Plan
CL-14.2 Prioritize access to and restoration of water bodies and water-adjacent sites when designing and siting new and expanded transportation infrastructure.	TED WRS	Term of the Plan
CL-14.3 Improve habitat connectivity wherever possible when constructing and redeveloping roadways.	TED WRS	**Start:** 2028
CL-14.4 Facilitate quick recovery of the whole multimodal transportation system after disruption from disasters or extreme weather events.	TED	**Start:** 2028

Goal CL-15 Protect and improve water quality and availability.

Climate change will cause drastic and uncertain impacts to regional watersheds. Tumwater needs to prepare for potential droughts, changes in seasonal water flow, and impacts to aquatic life.

Policies	Lead	Period
CL-15.1 Manage Tumwater's water sustainably, ensuring there is adequate quantity and quality of water available for future generations.	WRS	Term of the Plan
CL-15.2 Improve Tumwater's drought resilience through water reclamation and conservation measures, drought-tolerant landscape design, and advocacy.	WRS CDD	**Start:** 2026
CL-15.3 Develop and implement a comprehensive drought resilience strategy that factors in projected climate impacts and sets action levels for different drought stages.	WRS	**Start:** 2027
CL-15.4 Increase use of green stormwater infrastructure projects that help capture, filter, store, and reuse stormwater runoff.	WRS	**Start:** 2026

Goal CL-16 Expand local food justice to address climate impacts and increase access to nourishing, affordable, culturally appropriate, and climate-friendly foods while expanding local use of composting.

Climate change will have inevitable impacts on access to nourishing and culturally appropriate foods, but Tumwater has an opportunity to secure a sustainable food future. At the same time, Tumwater can address waste reduction goals by shifting food waste into composting waste streams.

Policies	Lead	Period
CL-16.1 Improve local food justice through collaboration, education, and advocacy.	WRS CDD	**Start:** 2026
CL-16.2 Increase composting in urban agriculture and by private residences.	WRS	**Start:** 2026
CL-16.3 Expand consistent access to food for Tumwater community members.	WRS CDD	**Start:** 2026

DRAFT

Appendix A Draft Implementation Actions

Each of the goals and policies in Chapter 4 will require Tumwater to take specific actions to implement over the course of the 20 year term of the Comprehensive Plan.

The draft implementation actions in the tables below were developed in coordination with the Climate Policy Advisory Team, the community, Tumwater staff, and other agencies. The implementation actions in the tables below are intended to serve as a vetted resource for developing annual Tumwater work programs to address climate change across multiple departments.

As the Comprehensive Plan is put into action over the next twenty years, the draft implementation actions will change as new, unforeseen opportunities emerge: new ones may be added, proposed ones may be modified or replaced by other actions. These draft implementation actions currently represent best available science, best practices and lessons learned from other jurisdictions in North America.

The draft implementations actions below are intended to be draft work program items that serve to implement the goals and policies of the Element. The draft implementation actions will need further refinement before they are incorporated into annual Tumwater work programs.

Draft implementation actions that can only be undertaken by other entities are not included in the Climate Element.

A. How to Read These Tables

The Climate Element goals and policies, and draft implementation actions are not in priority order.

1) Department Leads

Implementation of the Climate Element's policies and draft implementation actions are associated with eight different Tumwater departments:

CAO	City Attorney's Office
CDD	Community Development Department
EXD	Executive Department
PRD	Parks, Recreation, and Facilities Department
TED	Transportation & Engineering Department
TFD	Fire Department
TPD	Police Department
WRS	Water Resources & Sustainability Department

Each of the Climate Element's policies and draft implementation actions include the lead department. In most cases, the work will require multiple Tumwater departments working together.

DRAFT

2) Period

Each of the Climate Element's policies and draft implementation actions are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies and draft implementation actions are for the term of the Comprehensive Plan.

3) Prioritization

Each of the Climate Element's draft implementation actions have been prioritized by the Climate Policy Advisory Team into the following categories:

High Impact Climate Actions. Drives the greatest amount of emissions reductions and/or reduce casualties due to climate hazards immediatley or in the near term.

Easy Wins. Easier to accomplish, allowing Tumwater community members to feel motivated by real and visible progress.

Futureproofing for Everyone. Helps to untangle potential future conflicts and allow Tumwater to create policies and legislate on the side of climate action.

Equity. Creates a more equitable and just community immediately or in the near-term, addressing issues of economic injustice and making it possible for Tumwater's community members to access basic needs.

Building Longevity. Creates a more equitable, just, and resilient community in the long term but require action now to build that future.

A. Overarching Climate Goals

Goal CL-1 Increase Tumwater's capacity to implement climate action and adaptation priorities.

Policies and Implementation Actions		Lead	Period	Prioritization
CL-1.1	**Support fully staffing Tumwater positions needed to support the actions outlined in the Climate Element.**	WRS EXD	**Start:** 2026	

DRAFT

Climate Element

Part 1 – Goals, Policies, and Implementation Actions

Policies and Implementation Actions	Lead	Period	Prioritization
CL-1.1.1 Identify future staffing needs to implement the Climate Element and reach state mandated targets.	WRS EXD	**Start:** 2026 Every 2 years for the term of the Plan	
CL-1.1.2 Fill existing vacant positions that will allow implementation of Climate Element actions, and any positions identified in CL-1.1.1.	WRS EXD	**Start:** 2026 Every 2 years for the term of the Plan	
CL-1.1.3 Utilize creative staffing solutions such as AmeriCorps, Climate Corps, Civic Spark, and fellowships.	WRS EXD	**Start:** 2027	
CL-1.2 Develop a program funding strategy to support equitable access to climate mitigation and adaptation programs developed by Tumwater.	WRS EXD	**Start:** 2026	
CL-1.2.1 Identify the cost to implement the Climate Element and determine funding opportunities and needs.	WRS EXD	**Start:** 2026 Every 2 years for the term of the Plan	
CL-1.3 Educate Tumwater staff and the public on the Climate Element's goals, policies, and actions.	WRS	**Start:** 2026	
CL-1.3.1 Develop training materials for Tumwater employees on the Climate Element to provide opportunities for instruction.	WRS	**Start**: 2026 Term of the Plan	
CL-1.3.2 Develop educational outreach materials on the Climate Element for Tumwater community members to learn how they will be impacted by climate change, can be involved in future climate planning efforts, and be empowered to help implement the Climate Element.	WRS	**Start**: 2026 Term of the Plan	

DRAFT

Goal CL-2 **Advance environmental justice by providing all Tumwater community members with an equitable opportunity to learn about climate impacts, influence policy decisions, and take actions to enhance community resilience.**

Policies and Implementation Actions	Lead	Period	Prioritization
CL-2.1 Work with community based organizations and community organizers to conduct intentional outreach with frontline communities to create opportunities for equitable engagement in climate adaptation, mitigation, and education.	**WRS** EXD	**Start:** 2026 Term of the Plan	
CL-2.1.1 Build and support partnerships with existing community based organizations that have the capacity and existing relationships needed to convene diverse coalitions of community members and collaboratively empower their communities to develop and implement climate resilience and mitigation actions and work to address underlying disparities that impact these communities.	**WRS** EXD	**Start:** 2026 Term of the Plan	
CL-2.1.2 Create and implement tailored outreach and education initiatives that will empower frontline communities to respond to climate change threats.	**WRS**	**Start:** 2026 **Complete:** est. 2 years[7]	
CL-2.1.3 Attend pop-up events with existing community based organizations and hold focus groups, office hours, and other events to build trust in both group settings and one-on-one with Tumwater's frontline community members.	**WRS**	**Start:** 2026 Term of the Plan	

[7] Estimated times required for completing each action are estimates only based on current projected funding, staff capacity, and alignment with broader City goals. Unforeseen circumstances could cause timelines to be extended beyond estimated completion timelines.

DRAFT

Policies and Implementation Actions	Lead	Period	Prioritization
CL-2.1.4 Conduct outreach and listening sessions in frontline communities to understand existing needs and opportunities and to educate on projected climate impacts.	WRS EXD	**Start:** 2026 Term of the Plan	
CL-2.2 Prioritize the people of Tumwater and their needs, values, and goals in all future climate planning efforts by developing and implementing all adaptation and mitigation tasks in collaboration with equitable representation from all Tumwater communities.	WRS	**Start:** 2026 Term of the Plan	
CL-2.2.1 Prioritize recruiting frontline community members most impacted by climate change when forming any Tumwater working group, committee, or task force on climate-related issues. Strive to form all working groups and committees with equitable representation.	WRS	**Start:** 2026 Term of the Plan	
CL-2.2.2 Plan and conduct community engagement activities to co-create all policies and tasks with the community and to share new plan information upon completion and update throughout implementation.	WRS	**Start:** 2026 Term of the Plan	
CL-2.3 Develop programs and resources to promote equitable financial access to climate resilience and mitigation activities.	WRS FIN EXD	**Start:** 2026	
CL-2.3.1 Identify funding sources for subsidies for frontline communities to offset costs associated with climate impacts and mitigation actions, which could include potential cost increases associated with changing to non-fossil-fuel energy sources, increased energy usage to maintain livable indoor temperatures, and home hardening projects.	WRS FIN EXD	**Start:** 2026 **Complete:** est. 1-2 years	

Goal CL-3 **Address that changing weather and climate patterns driven by human-generated emissions will affect every aspect of life in Tumwater, and plan for impacts such as increased heat, wildfire, and flooding while working to reduce local emissions.**

Policies and Implementation Actions	Lead	Period	Prioritization
CL-3.1 Assess Tumwater's vulnerability to climate change.	WRS	**Start:** 2027	
CL-3.1.1 Conduct a comprehensive Vulnerability Assessment that considers climate impacts to communities, physical assets, and Tumwater operations and services, including impacts from extreme heat and flooding.	WRS	**Start:** 2027 **Complete:** est. 1 year	
CL-3.2 Address climate change impacts in all Tumwater planning efforts.	WRS CDD	**Start:** 2027	
CL-3.2.1 Review climate impacts to Tumwater operations and existing facilities and implement plans and changes to operations, buildings, and practices to reduce risk. Utilize planning methods that identify and prioritize multiple potential adaptation pathways into all planning efforts to mitigate the risk of bad investments and account for changes in climate projections.	WRS CDD EXD	**Start:** 2027 **Complete:** Term of the Plan	
CL-3.2.2 Develop a systematic review process to assess Tumwater's plan to build and maintain roads, buildings, utilities, and other facilities for potential climate vulnerabilities to planned facilities, utilities, and infrastructure projects (e.g., the Capital Facilities Plan) and address prior to installation.	WRS TED PRD CDD EXD	**Start:** 2027 **Complete:** Term of the Plan, every 2 years	

B. Greenhouse Gas Reduction Sub-Element Goals

Goal CL-4 **Reduce greenhouse gas emissions from all building types through energy conservation measures prioritizing the deployment of financial resources**

and programs that help finance or subsidize improvements across Tumwater.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-4.1 Reduce energy use across building types.	WRS CDD	**Start:** 2026 Term of the Plan	
CL-4.1.1 Provide educational resources and/or technical assistance to industry professionals and building owners and managers on energy-efficient building design, retrofits, and operations for new and existing buildings.	CDD WRS	**Start:** 2026 Term of the Plan	
CL-4.1.2 Develop data methodology to monitor use and impacts of green building incentives (i.e., encouraging buildings that are environmentally responsible and resource-efficient) and inform recommendations for policy or programs.	CDD WRS	**Start:** 2027 Term of the Plan	
CL-4.1.3 Collaborate with Puget Sound Energy and/or other energy providers to promote and/or deploy energy efficiency programs, local funds, and customer enrollment in clean energy projects and programs.	CDD WRS	**Start:** 2026 Term of the Plan	
CL-4.2 Reduce energy use in existing residential buildings.	WRS CDD	**Start:** 2026 Term of the Plan	
CL-4.2.1 Explore the feasibility of incorporating Home Energy Score disclosures for all types of dwelling units at the time of listing for sale to allow prospective buyers to make informed decisions.	CDD WRS	**Start:** 2026 Term of the Plan	
CL-4.2.2 Explore the feasibility of incorporating Home Energy Score disclosures for all types of rental dwelling units at the time of application to allow prospective tenants to make informed decisions.	CDD WRS	**Start:** 2027 **Complete:** est. 1-5 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-4.2.3 Explore the feasibility of incorporating policies that require existing dwelling units to undertake an energy audit during a substantial remodel.[8]	CDD WRS	**Start:** 2029 Term of the Plan	
CL-4.2.4 Explore the feasibility of tenant protections and/or landlord incentives to promote energy-efficiency and energy safety in rental housing. These may include rights to request improvements to energy efficiency based on tenant energy burden and/or property tax breaks for installing energy conservation measures.	CDD EXD FIN WRS	**Start:** 2026 Complete: est. 1-5 years	
CL-4.2.5 Explore the feasibility of requiring baseline levels of energy efficiency as part of building permit review.	CDD	**Start:** 2029 Term of the Plan	
CL-4.2.6 Where funding allows, continue programs like Energize Thurston that help reduce emissions of existing residential buildings.	WRS	Term of the Plan	
CL-4.3 Reduce energy use in existing nonresidential buildings.	WRS CDD	**Start:** 2026 Term of the Plan	
CL-4.3.1 Explore feasibility of requiring disclosure of Clean Building Performance Standard EUI when available for nonresidential buildings at the time of application for tenants and at time of listing for sales so that owners, tenants, and prospective buyers are informed before making purchasing or rental decisions.	CDD WRS	**Start:** 2027 **Complete:** est. 1-5 years	
CL-4.3.2 Continue to install LED lighting in Tumwater buildings and infrastructure as funding becomes available.	TED EXD	Term of the Plan **Complete:** est. 1-2 years	

[8] "Substantially rehabilitate," or remodel, refers to extensive structural repair or extensive modeling of premises that requires a permit such as a building, electrical, plumbing, or mechanical permit, and that results in the displacement of an existing tenant (RCW 59.18.200).

Policies and Implementation Actions	Lead	Period	Prioritization
CL-4.3.3 Create an incentive program for the installation of sustainable roof options like green roofs and cool roofs[9] on nonresidential buildings to reduce energy consumption and the urban heat island effect.	CDD WRS	**Start:** 2027 Term of the Plan	
CL-4.3.4 Explore feasibility of expanding the State Department of Commerce's Clean Building Performance Standards energy efficiency performance standards to include existing nonresidential buildings with gross floor areas smaller than 20,000 square feet.	CDD WRS	**Start:** 2028 Term of the Plan	
CL-4.3.5 Explore feasibility of expanding the Clean Building Performance Standards program to multifamily buildings smaller than 20,000 square feet. This feasibility study must examine potential negative impacts on property owners and tenants.	CDD	**Start:** 2029 **Complete:** est. 1-2 years	
CL-4.4 Reduce energy use in new construction, redevelopment, and deconstruction.	WRS CDD	**Start:** 2027	
CL-4.4.1 Incentivize projects that meet net-zero carbon certification through land use tools such as floor area ratio, density bonus, height bonus, or parking reductions.	CDD	**Start:** 2027 Term of the Plan	
CL-4.4.2 Support CDD staff pursuing green building accreditations and certifications from green building specialists.	CDD	**Start:** 2026 Term of the Plan	
CL-4.4.3 Explore developing guidelines for deconstruction and salvaging materials for reuse.	CDD	**Start:** 2026 **Complete:** est. 5 years	
CL-4.5 Increase energy efficiency in manufactured home parks and recreational vehicle parks/campgrounds.	WRS CDD	**Start:** 2027	

[9] Roofs designed to reflect more sunlight, thus lowering building temperatures.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-4.5.1 Explore creating an incentive program to weatherize and improve air quality in dwellings not covered in other policies.	CDD	**Start:** 2027 **Complete:** est. 2-3 years	
CL-4.6 Convert to alternative fuel sources.	WRS CDD	**Start:** 2026 Term of the Plan	
CL-4.6.1 Educate community members on options for electric appliances and the benefits of pairing electrification with the installation of renewable energy. Create incentives to support fuel switching.	WRS	**Start:** 2026 Term of the Plan	

Goal CL-5 Expand the use of on-site renewable energy technology (e.g., solar photovoltaics, battery storage, etc.) across all building types through providing funds, code changes, and educational programs.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-5.1 Increase the production and storage of local renewable energy.	WRS CDD	**Start:** 2026	
CL-5.1.1 Install solar photovoltaics on all available and feasible municipal sites such as building rooftops, City Hall, police and fire stations, community centers, parking lots, and municipal water pump sites in collaboration with key community partners, like Olympia Community Solar and/or Puget Sound Energy	TED EXD	**Start:** 2026 **Complete:** est. 1-5 years	
CL-5.1.2 Expand current solar-ready requirements to include incentives for non-residential building types and for building with a southern roof orientation.	CDD	**Start:** 2026 **Complete:** est. 1-5 years	

DRAFT

Policies and Implementation Actions		Lead	Period	Prioritization
CL-5.1.3	Pursue public-private partnerships to accelerate clean energy projects.	WRS	**Start:** 2026 **Complete:** Term of the Plan	
CL-5.1.4	Support existing community solar initiatives from Olympia Community Solar and Puget Sound Energy by providing educational resources, promoting programs, and identifying opportunities for Tumwater residents to participate.	WRS	**Start:** 2026 **Complete:** est. 1-5 years	

Goal CL-6 **Reduce greenhouse gas emissions by making it easier for people to use and shift to low- or zero-carbon transportation modes through policy, programming, and regional collaborations.**

Policies and Implementation Actions		Lead	Period	Prioritization
CL-6.1	**Promote increased use of active forms of travel such as bicycling, walking, and other nonmotorized options.**	TED	**Start:** 2026 Term of the Plan	
CL-6.1.1	Coordinate with the bike and pedestrian plans of other cities to work toward a large regional plan to expand walking and bicycling infrastructure, per goals laid out in the Transportation Plan to maximize funding mechanisms and opportunities.	TED WRS	**Start:** 2026 **Complete:** est. 1-5 years	
CL-6.1.2	Prioritize active transportation in coordination with the Transportation Plan by investing in accessible and attractive street-level elements such as seating, shaded sidewalks, ADA ramps, enhanced signals and crossings, and protected bike lanes.	TED CDD	**Start:** 2026 **Complete:** est. 1-5 years	

DRAFT

Policies and Implementation Actions		Lead	Period	Prioritization
CL-6.1.3	Explore developing a rebate program for community members who wish to buy a bicycle or electric bicycle, with priority for low-income residents or households with greater barriers to vehicles.	WRS	**Start:** 2026 **Complete:** est. 1-5 years	
CL-6.1.4	Continue support for Intercity Transit's Walk N Roll program that focuses on a walking and bicycling incentive program with safety education for families, in coordination with Tumwater School District.	TED WRS	Term of the Plan	
CL-6.1.5	Update the Transportation Plan and Capital Facilities Plan to prioritize active transportation. Set goals and plans for shifting to active transportation, like developing car-free corridors in commercial and mixed-use areas to encourage mode shift.	TED	**Start:** 2026 **Complete:** est. 3 years	
CL-6.2	**Increase adoption of electric vehicles.**	WRS	Term of the Plan	
CL-6.2.1	Collaborate with industry experts and environmental organizations to increase consumer awareness about electric vehicle options and incentives for use and purchase.	WRS	**Start:** 2026 **Complete:** est. <1 year	
CL-6.2.2	Explore providing an incentive and/or technical assistance program to support installing electric vehicle charging at existing rental housing.	WRS CDD	**Start:** 2026 **Complete:** est. 1-5 years	
CL-6.2.3	Add free and publicly accessible Level 2 electric vehicle charging at as many Tumwater properties as feasible.	WRS TED EXD	Term of the Plan	
CL-6.2.4	Develop public-private partnerships to install two or more Level 3 chargers at commercial centers	EXD WRS TED	Term of the Plan	

Policies and Implementation Actions		Lead	Period	Prioritization
CL-6.2.5	Advocate for consumer protections for electric vehicle owners.	EXD	Term of the Plan	
CL-6.3	**Facilitate low-carbon options for movement into and through Tumwater.**	CDD TED	**Start:** 2026 Term of the Plan	
CL-6.3.1	Collaborate with local businesses and industries to explore low-carbon options for deliveries and the movement of goods into, out of, and through Tumwater.	CDD TED	**Start:** 2026 Term of the Plan	
CL-6.3.2	Collaborate with local businesses to identify the people who commute into Tumwater and develop programs to support lower carbon commutes.	CDD TED	**Start:** 2026 Term of the Plan	

Goal CL-7 **Reduce vehicle miles traveled by using permitting, regulatory, and other land use tools to promote multimodal transportation options and the use of public transit.**

Policies and Implementation Actions		Lead	Period	Prioritization
CL-7.1	**Continue land use policies that support increased urban density and efficient transportation networks and reduce urban sprawl.**	CDD	Term of the Plan	
CL-7.1.1	Create a safe, regionally well-connected, and attractive bike and pedestrian network to encourage active transportation both within Tumwater and between neighboring jurisdictions.	CDD TED	Term of the Plan **Complete:** est. 5-10 years	
CL-7.1.2	Increase the number of 15-minute neighborhoods (i.e., walkable environment, destinations that support a range of basic living needs and a residential density), in coordination with goals outlined in the Land Use Element.	CDD	Term of the Plan **Complete:** est. 5 years	
CL-7.2	**Increase efficiency of the transportation system.**	TED	Term of the Plan	

Policies and Implementation Actions		Lead	Period	Prioritization
CL-7.2.1	Develop educational campaigns and programs about benefits of properly inflated tires, including signage at gas stations and local businesses and collaborating with schools.	TED WRS	**Start:** 2026 Complete: est. <1 year	
CL-7.2.2	Work with Intercity Transit to increase local public transit routes or frequency with a focus on providing access to a lower carbon transportation option to the greatest number of riders. Any expansion of service should include an analysis of climate impacts to prevent the program from resulting in an increase in greenhouse gas emissions.	CDD TED	**Start:** 2026 **Complete:** est. 1-5 years	
CL-7.2.3	Work with Intercity Transit to identify and implement programs that help people move to and from transit, reduce greenhouse gas emissions, and use street-level improvements to connect neighborhoods without the population to support fixed routes transit options. Potential programs explored should include an electric vehicle car-share program. Tumwater will engage homeowners' associations for representation and feedback. Expansion of service will include an analysis of climate impacts to prevent the program from resulting in an increase in greenhouse gas emissions.	CDD TED	**Start:** 2026 **Complete:** est. 1-5 years	

Goal CL-8 **Strengthen existing policies and regulations to deploy and enhance natural carbon solutions that are ecosystem-appropriate, store carbon, and offer co-benefits such as pollution reduction, wildlife habitat, and climate resilience.**

DRAFT

Policies and Implementation Actions		Lead	Period	Prioritization
CL-8.1	**Preserve tree canopy, native prairie habitat, and support habitat restoration and conservation to sequester carbon.**	**WRS**	Term of the Plan	
CL-8.1.1	Develop and implement a coordinated reforestation and afforestation program guided by the Urban Forestry Management Plan with goals and policies to support stormwater management. Consider how existing or future tree canopy can support stormwater management and water quality improvements in receiving waters. Include goals for maintaining or increasing canopy in frontline communities.	**WRS**	**Start:** 2026 **Complete:** est. 1-5 years	
CL-8.1.2	Develop goals for preserving existing mature tree canopy in alignment with TMC 16.08. Include guidelines and incentives for maintaining larger, more established trees.	**WRS**	**Start:** 2026 **Complete:** est. >1 year	
CL-8.1.3	Support implementation of habitat conservation plans that allow for state required development and provide for preservation and restoration of prairie habitat for endangered and threatened prairie species.	**CDD**	Term of the Plan	
CL-8.1.4	Continue to champion statewide conservation efforts to protect, restore, and manage wetlands and land and habitats that are near rivers and streams and provide watershed management and flood protection (i.e., riparian ecosystems).	**CDD**	Term of the Plan	
CL-8.1.5	Build relationships and capacity among regional partners to foster successful and effective data coordination and program alignment.	**WRS**	Term of the Plan	

Policies and Implementation Actions		Lead	Period	Prioritization
CL-8.1.6	Maximize tree canopy coverage in surface parking lots. Develop an initiative for identifying impervious surfaces across parking lots for potential reforestation, conversion (i.e., de-pave), or pervious surfaces.	WRS CDD	**Start:** 2027 **Complete:** est. 1-5 years	

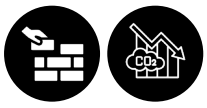
C. Resilience Sub-Element Goals

Goal CL-9 **Design, plan, and upgrade buildings and energy infrastructure to accommodate renewable energy opportunities, keep the community safe, and withstand and recover from extreme weather and natural hazards worsened by climate change.**

Policies and Implementation Actions		Lead	Period	Prioritization
CL-9.1	**Require that planned facilities, utilities, and infrastructure projects and existing vulnerable sites be built or hardened to avoid or withstand climate impacts, including extreme heat, extreme precipitation, and sea level rise.**	CDD WRS	**Start:** 2028	
CL-9.1.1	Identify potential funding sources to bury existing power lines and associated infrastructure, or to make them more resilient to climate impacts where burial is not feasible.	CDD TED WRS	Term of the Plan	
CL-9.1.2	Implement a phased program to improve the resilience and safety of existing power lines; prioritizing areas identified as higher fire risk in the Vulnerability Assessment.	CDD TED WRS	**Start:** 2028 Term of the Plan as funding becomes available	

Policies and Implementation Actions		Lead	Period	Prioritization
CL-9.1.3	Identify potential funding sources to develop and maintain a grant program that will enable affordable housing development projects to bury new power lines and associated infrastructure as required, or to make more resilient to climate impacts where burial is not feasible.	WRS CDD	**Start:** 2028 **Complete:** Term of the Plan	
CL-9.2	**Plan energy infrastructure to be able to integrate with an increase in renewable energy sources, including increasing energy storage capacity to improve energy grid resilience.**	CDD WRS TFD	**Start:** 2026	
CL-9.2.1	Identify public sites to install local microgrid solar and battery storage facilities that will lead to negligible or low impacts on local habitats, infrastructure, and human health.	TED PRD WRS CDD	**Start:** 2027 **Complete:** est. 2-3 years	
CL-9.2.2	Install locally distributed renewable energy generation and battery storage infrastructure at identified key public facilities to enable continuity of operations for a minimum of 24 hours.	TED PRD WRS CDD	**Start:** 2030 **Complete:** est. 5-10 years	
CL-9.3	**Require buildings in high-risk areas[10] to be designed and built to be resilient to natural hazards and extreme weather worsened by climate change.**	CDD WRS	**Start:** 2028	
CL-9.3.1	Develop and enforce fire-resilience standards for new and redeveloped sites in high-risk wildfire areas identified by the State of Washington's Wildland-Urban Interface Map.	CDD	**Start:** 2028 **Complete:** est. 4-5 years	

[10] High risk areas to be identified by Tumwater's Comprehensive Vulnerability Assessment, which should be completed by 2028. Weatherization and hardening building codes should be developed based on identified risks and land use designations of at-risk land parcels.



Policies and Implementation Actions		Lead	Period	Prioritization
CL-9.3.2	Require a hazard assessment and climate risk planning for new and existing buildings in designated high-risk areas, designing for enhanced resilience and mandating building practices that protect inhabitants from climate impacts.	CDD WRS	**Start:** 2028 Term of the Plan	
CL-9.3.3	Help facilitate the subsidization of the cost of hazard risk assessments and climate risk planning for low-income property owners and low-income housing development projects.	CDD WRS FIN	**Start:** 2028 Term of the Plan	
CL-9.4	**Encourage property owners to increase the resilience of existing buildings to natural hazards and extreme weather worsened by climate change.**	CDD WRS	**Start:** 2028	
CL-9.4.1	Develop Climate Resilience Guidelines demonstrating how to design buildings for passive survivability[11] and cooling where necessary, at a minimum providing one common room for residents that provides refuge from heat and power during extended outages for medical necessities. Share this guidance with developers and property owners through outreach activities.	CDD WRS	**Start:** 2031 **Complete:** est. 5 years	
CL-9.4.2	Explore creation of an incentive program for retrofit of existing buildings to meet established Climate Resilience Standards.	CDD WRS	**Start:** 2033 Term of the Plan	

[11] See Part 2: Technical Information for more information on heat projections, passive survivability, and building code.

Policies and Implementation Actions		Lead	Period	Prioritization
CL-9.4.3	Develop and maintain a rebate program for low-income residents who do not qualify for weatherization assistance and refuge cooling through the Community Action Council or whose dwellings are considered vulnerable, such as manufactured homes, to weatherize their homes against extreme weather. Work with Puget Sound Energy on this action where possible.	WRS	**Start:** 2028 **Complete:** Term of the Plan	
CL-9.5	**Work with Puget Sound Energy to improve the safety and reliability of infrastructure vulnerable to climate change.**	WRS CDD	**Start:** 2026	
CL-9.5.1	Collaborate with local energy utilities to explore large-scale energy storage options to use in Tumwater as part of a transition to reliable renewable energy.	WRS CDD TFD	**Start:** 2026 **Complete:** est. 3 years	Puget Sound Energy

Goal CL-10 **Increase preparedness for acute climate impacts and improve the resilience of Tumwater's people and systems against climate hazards.**

Policies and Implementation Actions		Lead	Period	Prioritization
CL-10.1	**Improve community outreach on and response capabilities for climate health and hazard issues, prioritizing frontline communities to address economic, social, and health disparities.**	WRS EXD	**Start:** 2026	
CL-10.1.1	Collaborate with community based organizations to build a volunteer network to develop and manage a vulnerable population database that includes community members who require aid and/or check-in calls during and after emergencies. This database can be built on the existing Lifeline Program members.	WRS TFD	**Start:** 2026 **Complete:** est. 1 year	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-10.1.2 Transition management of the vulnerable population database to Tumwater and develop a long-term strategy to keep the database up to date and oversee its use during emergencies.	WRS TFD	**Start:** 2028 **Complete:** est. 1-2 years	
CL-10.1.3 Explore developing a Pre-Event Recovery Ordinance using American Planning Association's guidance that will allow Tumwater to facilitate a Local Recovery Management Organization charged with planning for long-term, resilient disaster recovery and coordinating with the Tumwater Disaster Recovery Group and Thurston County Disaster Recovery Team after a disaster to align long-term planning with short-term needs.	CDD EXD CAO TFD	**Start:** 2026 **Complete:** < 1 year	
CL-10.1.4 Explore developing climate-resilient redevelopment guidelines to help guide disaster recovery decisions. Utilize recommendations from FEMA's Pre-Disaster Recovery Planning Guide for Local Governments and the hazard-specific zoning overlays created by CL-13.6.3.	CDD EXD TFD	**Start:** 2031 **Complete:** est. 1-5 years	
CL-10.1.5 Require that all Tumwater employees that would serve a role in emergency operations center activation complete FEMA training courses on disaster recovery and achieve functional expertise in FEMA post-disaster processes.	EXD	Term of the Plan	
CL-10.1.6 Explore developing a neighborhood-scale capacity grant or other assistance program to support neighborhood scale resiliency, disaster preparedness, and/or resilience hubs.	CDD EXD	**Start:** 2026 Term of the Plan	

Climate Element

Part 1 – Goals, Policies, and Implementation Actions

Policies and Implementation Actions	Lead	Period	Prioritization
CL-10.2 Develop resources to mitigate the risks posed by extreme heat in coordination with regional partners.	WRS TFD	**Start:** 2026	
CL-10.2.1 Implement the Thurston County Extreme Heat, Emergency Response, and Illness Prevention Plan.	WRS TFD	**Start:** 2026	
CL-10.2.2 Preserve and expand tree and shade cover to reach the 2040 goal of 40% recommended in the Urban Forestry Management Plan to reduce urban heat.	WRS	**Start:** 2027 **Complete:** est. 10-15 years	
CL-10.2.3 Support the work of community based organizations and regional agencies creating and implementing resilience hubs.	WRS TFD	**Start:** 2026 **Complete:** est. 3-5 years	
CL-10.2.4 Explore feasibility of implementing and maintaining a program to distribute portable cooling units and install heat pumps, prioritizing households with residents most vulnerable to extreme temperature events such as renters and low-income seniors. Work with Puget Sound Energy and energy providers on this program wherever possible.	WRS	**Start:** 2026 **Complete:** est. 1-2 years	
CL-10.3 Increase regional wildfire resilience, preparedness, and response capabilities in Tumwater.	WRS TFD	**Start:** 2026	
CL-10.3.1 Collaborate with regional partners to develop a community wildfire protection plan.	WRS TFD	**Start:** 2030 **Complete:** est. 3-5 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-10.3.2 Collaborate with emergency managers and fire experts to educate and empower homeowners to make changes to their homes and properties that lower their wildfire risk, encouraging measures that do not decrease canopy cover where possible.	WRS TFD	**Start:** 2030 **Complete:** est. 5-7 years	
CL-10.3.3 Help facilitate grant funding for low-income community members to follow recommended changes to their homes and properties to lower their wildfire risk.	CDD TFD	**Start:** 2030 **Complete:** est. 2 years	
CL-10.4 Collaborate with regional partners to develop resources that address projected increases in risks and impacts associated with climate change.	WRS TFD	**Start:** 2026	
CL-10.4.1 Develop and share guidance for navigating post-disaster mental health and social resources, translated into multiple languages.	WRS TFD EXD	**Start:** 2026 **Complete:** < 2 years	
CL-10.4.2 Develop and implement a regional wildfire and smoke resilience and response strategy.	WRS TFD	**Start:** 2027 **Complete:** est. 5-7 years	
CL-10.4.3 Work with Thurston County to develop a protocol for using the county emergency alert system to issue Tumwater-specific alerts for wildfire risk, smoke exposure, and evacuation information. Create alert messaging that uses plain language to communicate risks and information.	WRS TFD	**Start:** 2027 **Complete:** est. 3-5 years	

Climate Element

Part 1 – Goals, Policies, and Implementation Actions

Policies and Implementation Actions	Lead	Period	Prioritization
CL-10.5 Improve community resilience, health equity, and environmental justice by striving to ensure that all community members can use active transportation to access public green spaces within half a mile and connected by sidewalks or protected walkways.	TED WRS PRD	**Start:** 2027	
CL-10.5.1 Utilize data from the Trust for Public Land and from community outreach efforts to find any gaps in equitable access to public green spaces.	WRS	**Start:** 2026 **Complete:** est. 1-2 years	
CL-10.5.2 Engage community members who lack equitable access to green spaces to determine how they would like to improve their access. Options can include better transportation options, addition of new green space, and improved safety of active transportation routes, among others.	TED WRS PRD	**Start:** 2027 **Complete:** est. 1-5 years	
CL-10.5.3 Finish the Deschutes Valley Trail project, aiming to complete construction by 2040.	TED WRS PRD	**Start:** 2028 **Complete:** est. 10 years	
CL-10.6 Position Tumwater to qualify for more funding opportunities to adapt to climate impacts.	WRS	**Start:** 2028	
CL-10.6.1 Work with academic research institutions to study hazard events of all magnitudes to provide a fuller understanding of the Tumwater's hazard characteristics — including those affected by climate change.	WRS	**Start:** 2028 **Complete:** est. 1-3 years	

Policies and Implementation Actions		Lead	Period	Prioritization
CL-10.6.2	Analyze how well the municipal water system would maintain adequate pressure during a major wildfire event with multiple structures burning. and how it will look under current and projected drought conditions. Generate a report with specific recommendations for increasing the resilience of the water system.	WRS	**Start:** 2028 **Complete:** est. 2-3 years	
CL-10.6.3	Incorporate findings from Tumwater's Comprehensive Vulnerability Assessment into the Tumwater Annex of the Thurston County Hazard Mitigation Plan. Identify specific projects and opportunities that Tumwater can leverage to maximize funding.	CDD	**Start:** 2029 **Complete:** est. 2-3 years	
CL-10.6.4	Develop a specific, phased plan for completing a large-scale tree planting program.	WRS	**Start:** 2027 **Complete:** est. 3-4 years	
CL-10.7	**Work with the Thurston County Public Health Department to increase local understanding of how climate change impacts vector-borne disease outbreaks.**	WRS	**Start:** 2027	
CL-10.7.1	Work with the Thurston County Public Health Department to identify and map areas in Tumwater that are at high risk to become disease vectors, including developed areas with poor drainage and standing water that serves no ecological purpose.	WRS TED	**Start:** 2027 **Complete:** est. 2 years	
CL-10.7.2	Coordinate with the Thurston County Health Department to develop strategies to mitigate projected increases in disease and pest risk.	WRS CDD	**Start:** 2029 **Complete:** est. 3 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-10.8 Develop programs that enable and empower community members to protect themselves from poor air quality.	**WRS** **TFD**	**Start:** 2027	
CL-10.8.1 Collect data to determine how many Tumwater community members are vulnerable to poor air quality and the neighborhoods in which these residents live, using both quantitative and qualitative data and from community outreach efforts. Use collected data to set target thresholds for shelter occupancy and locations and air conditioner/heat pump and air filtration distribution programs.	**WRS**	**Start:** 2027 **Complete:** est. 1-2 years	
CL-10.8.2 Develop a program to distribute personal protective equipment to populations vulnerable to poor air quality.	**WRS**	**Start:** 2029 **Complete:** est. 1-2 years **Maintain:** Term of the Plan	
CL-10.8.3 Identify facilities that serve high-risk populations to create incentive programs encouraging infrastructure updates for clean indoor air. Updates should include HVAC system improvements.	**WRS** **TFD** **EXD**	**Start:** 2030 **Complete:** est. 1-5 years	
CL-10.8.4 Enhance and protect the quality of life for non-human residents during poor air quality events. Activities can include educational outreach, protection of wildlife corridors, and the development of emergency prevention and response plans focused on preventing harm to non-human residents.	**WRS** **TFD** **EXD**	**Start:** 2028 Term of the Plan	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-10.9 Work with Thurston County Emergency Management to improve access to the resources needed for community members to shelter in place or to adequately reach temporary shelter.	TFD WRS	**Start:** 2026	
CL-10.9.1 Coordinate with other agencies and jurisdictions to provide more cooling centers with 24-hour capacity. Offer 24-hour capacity for all of Tumwater's heat-vulnerable residents including seniors, low-income, and houseless individuals. Shelter locations should be sited equitably throughout Tumwater, with priority for opening locations near the highest concentrations of heat-vulnerable residents.	WRS TFD	**Start:** 2026 **Complete:** est. 5-10 years	
CL-10.9.2 Coordinate with local businesses, community centers, and other neighborhood hubs to assess the potential of using these spaces as cooling centers. Provide sites that agree to participate in this program with resources detailing how to set up an equitable and functional cooling center.	WRS TFD	**Start:** 2026 **Complete:** est. 5-10 years	
CL-10.9.3 Develop outreach programs or materials to increase awareness and education on individual emergency preparedness (e.g., Two Weeks Ready).	TFD EXD WRS	**Start:** 2026 **Complete:** est. <1 year	
CL-10.10 Increase language accessibility of emergency services, plans, and resources.	EXD	**Start:** 2026	
CL-10.10.1 Utilize on-call contracts for language interpretation and translation services, including American sign language, to translate all emergency resources and plans.	EXD	**Start:** 2026 Term of the Plan upon adoption of relevant plans	

Goal CL-11 **Preserve, protect, and sustain cultural sites and resources in alignment with the values and needs of Tribes, traditional stewards, and frontline communities.**

Policies and Implementation Actions	Lead	Period	Prioritization
CL-11.1 Enhance partnership between the Tribes and Tumwater, integrating Tribal expertise, opinions, and values into climate planning efforts, projects, and programs.	EXD WRS	**Start:** 2026	
CL-11.1.1 In collaboration with the Tribes, develop guidelines and standards for incorporating Traditional Ecological Knowledge into Tumwater programs and planning efforts to adapt to climate change impacts.	WRS	**Start:** 2026 **Complete:** est. 5 years	
CL-11.1.2 Integrate the Tribal Stewards Curriculum or an alternative approved by Tribal representatives into regular Tumwater training schedules.	WRS	**Start:** 2030 **Complete:** est. 5 years	
CL-11.2 In accordance with Tribal treaty rights, protect, enhance, and restore ecosystems and culturally important consumptive and non-consumptive resources including foods, medicinal plants, places, and materials that could be adversely impacted by climate change.	WRS	**Start:** 2026	
CL-11.2.1 Work with local partners, especially representatives of the Tribes, to facilitate a native plant nursery and seed bank to support long-term ecological restoration and foster continued access to culturally significant plants.	WRS	**Start:** 2026 **Complete:** est. 4 years	
CL-11.2.2 In collaboration with the Tribes, identify consumptive and non-consumptive resources that will be adversely impacted by climate change.	WRS	**Start:** 2026 **Complete:** est. 3 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-11.2.3 In collaboration with the Tribes, develop and implement a plan to protect, enhance, restore, and/or preserve cultural resources that have been identified as threatened by climate change.	WRS	**Start:** 2028 **Complete:** est. 5 years	
CL-11.2.4 Collaborate with tribes to provide access to foraging opportunities including but not limited to camas, evergreen huckleberry, bog plant species, and cedar.	WRS	**Start:** 2026 Term of the Plan	
CL-11.3 Collaborate with the Tribes to prioritize the preservation of archaeological sites and traditional cultural properties that are vulnerable to climate impacts.	WRS CDD EXD	**Start:** 2026	
CL-11.3.1 Request recommendations from the Tribes for actions Tumwater can take to preserve historic sites and cultural properties.	WRS EXD	**Start:** 2026 **Complete:** est. 3 years	
CL-11.3.2 In collaboration with the Tribes, develop guidelines for protecting, enhancing, and restoring affected historic sites and cultural properties.	WRS	**Start:** 2029 **Complete:** est. 5 years	

Goal CL-12 With climate, growth, and environmental changes in mind, identify and elevate the protection of key habitats, ecosystem services, and wildlife corridors.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-12.1 Manage Tumwater's urban forest in line with the Urban Forestry Management Plan and current climate projections and guidance.	WRS	**Start:** 2026	
CL-12.1.1 Update the Tree Ordinance.	CDD WRS	**Start:** 2026 **Complete:** < 1 year	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-12.1.2 Protect and enhance the climate resilience of urban forests by implementing the Urban Forestry Management Plan. Prioritize implementation of Urban Forestry Management Plan actions that provide benefits for frontline communities.	WRS	Term of the Plan	
CL-12.1.3 Update the Urban Forestry Management Plan every five years, including updated tree species selection and planting guidance, and integrate the most recent available climate data into each new edition of the Plan. Climate guidance consideration should include projections for heat, precipitation, pests, and any other relevant emergent information.	WRS	**Start:** 2027 Reassess every 5 years	
CL-12.1.4 Develop and share guidance with community members that identifies native drought- and pest-resistant trees, shrubs, and grasses. Encourage their use over non-native, non-resilient species in urban forest plantings and in restoration efforts to support climate resilience.	WRS	**Start:** 2027 **Complete:** est. 2 years	
CL-12.1.5 Develop a program to analyze and address the climate impacts and risks of pests and disease on Tumwater's urban forest.	WRS	**Start:** 2027 **Complete:** est. 5-7 years	
CL-12.1.6 Assess tree canopy and forests including parks, greenbelts, and urban forests to identify potential wildfire risk zones and develop strategies to mitigate that risk.	WRS EXD	**Start:** 2038 **Complete:** est. 8 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-12.2 Protect, restore, and connect streams, estuaries, wetlands, floodplains, and other land and habitats that are next to rivers and streams (i.e., riparian ecosystems) to increase resiliency to climate change and reduce flood risk.	WRS CDD	**Start:** 2026	
CL-12.2.1 Conduct inventory of watersheds throughout Tumwater, including an assessment of overall health and connectivity and the type and degree of restoration or protection needed	WRS	**Start:** 2026 **Complete:** est. 3 years	
CL-12.2.2 Protect and restore wetlands and corridors between wetlands to provide biological and hydrological connectivity that fosters resilience to climate impacts.	WRS CDD	**Start:** 2029 **Complete:** est. 8 years	
CL-12.2.3 Protect and restore vegetation in habitats that are next to streams and rivers to reduce erosion, provide shade, and support other functions that improve the climate resilience of streams.	WRS CDD	**Start:** 2029 **Complete:** est. 8 years	
CL-12.2.4 Collaborate with relevant parties to prioritize where and how beavers can be incorporated strategically to address climate change impacts on water quality, streamflow volume, and habitats surrounding rivers and streams without causing any adverse impacts to Oregon spotted frog habitat.	WRS	Term of the Plan	
CL-12.3 Manage Tumwater's natural resources to protect, restore, and connect native ecosystems and foster habitats that are resilient to climate change.	CDD WRS	**Start:** 2030	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-12.3.1 Collaborate with other regional partners to inventory potential climate refugia sites in Tumwater that will require protection and to assess existing habitat protections, habitat quality levels, and connectivity.	WRS	**Start:** 2032 **Complete:** est. 5 years	Tribes, Thurston County, TRPC, Climate Refugia Coalition
CL-12.3.2 Develop an Ecosystem Restoration Plan or a Natural Resource Management Plan that incorporates relevant measures from other relevant existing plans. The plans must address existing stressors, consider climate change impacts, emphasize taking a precautionary approach to reduce risk of environmental harm, and guide adaptive management.	WRS	**Start:** 2030 **Complete:** est. 5 years	
CL-12.3.3 Implement the Ecosystem Restoration Plan and/or Natural Resource Management Plan	WRS CDD	**Start:** 2035 **Complete:** est. 2 years	
CL-12.4 Increase the climate resilience of native fish species and aquatic ecosystems by reducing the impact of threats such as aquatic invasive species, invasive plants, pollutants, and changes in seasonal water flow.	WRS	**Start:** 2026	
CL-12.4.1 Conduct a study of existing threats to native fish and aquatic ecosystems to prioritize which threats are addressed.	WRS	**Start:** 2026 Term of the Plan	TRPC
CL-12.4.2 Develop an Aquatic Resilience Strategy that addresses each unique threat identified.	WRS	**Start:** 2027 **Complete:** est. 1 year	
CL-12.4.3 Implement the Aquatic Resilience Strategy.	WRS	**Start:** 2028 **Complete:** est. 5 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-12.5 Advocate for prioritizing maintenance of habitat integrity and function when working with regulatory agencies to determine allowed activities and uses within protected wetlands and Fish and Wildlife Habitat Conservation Areas.	WRS	**Start:** 2026	
CL-12.5.1 Identify programs that will have a substantive impact on fish and wildlife habitat.	WRS	**Start:** 2026 Term of the Plan	
CL-12.5.2 Review and amend local policies, rules, and management activities to eliminate potential negative impacts on fish and wildlife habitat and take advantage of opportunities to incorporate positive impacts.	WRS TED PRD CDD	**Start:** 2028 Term of the Plan	
CL-12.6 Take early action to eliminate or control non-native invasive species, including insects and plants that take advantage of climate change, especially where invasives threaten native species or ecosystem function.	WRS EXD TED	**Start:** 2026	
CL-12.6.1 Develop and implement a monitoring plan to assess how invasive species are spreading and impacting local plant communities.	WRS	**Start:** 2026 **Complete:** est. 2 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-12.6.2 Collaborate with regional stakeholders and experts to develop an Invasive Insect and Pest Management Plan based on collected data. Utilize an integrated approach that includes a wide variety of strategies, including at a minimum: a. management of established pest infestations; b. widespread use of and restoration of native plants resilient to regional pest threats; c. regular monitoring activities; and d. requirements to include invasive species prevention plans in future projects.	WRS	**Start:** 2028 **Complete:** est. 5 years	

GOAL CL-13 Promote land use and development decisions that support compact urban development and Tumwater-wide resilience, including a resilient local economy.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-13.1 Continue to focus high intensity land uses into centers to support community resilience and provide public services more efficiently.	CDD	**Start:** 2026	
CL-13.2 Form a working group to secure Tumwater's economic resilience regarding climate impacts.	EXD WRS	**Start:** 2026	
CL-13.2.1 Develop partnerships within the local business community in collaboration with existing economic organizations and other stakeholders to set up a working group to analyze climate-driven projected economic impacts on Tumwater.	EXD WRS	**Start:** 2027 **Complete:** est. 2 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-13.2.2 Provide resources to the local Economic Climate Resilience Working Group to inform the development of a climate resilience component of the Economic Development Plan.	EXD WRS	**Start:** 2029 **Complete:** est. 1-2 years	
CL-13.2.3 Coordinate with partners to incorporate continuity of operations thinking into the Thurston County's Comprehensive Emergency Management Plan.	EXD WRS	**Start:** 2029 **Complete:** est. 4 years	
CL-13.2.4 Form partnerships with workforce development organizations to provide services and resources to Tumwater community members that support workers and local businesses affected by climate change.	EXD WRS	**Start:** 2026 **Complete:** est. 7 years	
CL-13.3 In coordination with the Conservation Element, protect, restore, and maintain critical areas, non-regulated open space areas, and the floodplain to maximize climate resilience and ecosystem benefits.	WRS	**Start:** 2026	
CL-13.3.1 Inventory existing and projected vulnerabilities of critical areas, open spaces, and floodplain-adjacent parcels.	WRS	**Start:** 2026 **Complete:** est. 2 years	
CL-13.3.2 Identify maintenance and restoration actions needed to keep critical areas and open spaces resilient. Prepare a report outlining the recommended actions which should incorporate green stormwater infrastructure that will enhance natural systems into recommended actions.	WRS TED	**Start:** 2028 **Complete:** 3 years	
CL-13.3.3 When new State best available science is issued, update critical areas ordinances.	CDD	Term of the Plan	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-13.3.4 Coordinate with FEMA to update floodplain and flood risk maps for the region based on projected extreme precipitation, increased winter streamflow, and sea-level rise due to climate change.	CDD	**Start:** 2026 **Complete:** est. 6 years	
CL-13.3.5 Review best available science for buffers and setbacks for steep slopes vulnerable to erosion exacerbated by climate change, and explore setting new minimums, if necessary, so that improvements are not required to protect structures during their expected life.	CDD	**Start:** 2028 Reassess every 2 years	
CL-13.4 Identify and implement strategies for reducing development pressure in the wildland-urban interface.	CDD	**Start:** 2027	
CL-13.4.1 Identify areas with high fire risk and explore the feasibility of land use changes to reduce further development in these areas.	CDD	**Start:** 2032 **Complete:** est. 1-3 years	
CL-13.4.2 Develop incentives and regulations to maintain open space buffers to reduce wildfire risk.	WRS CDD	**Start:** 2027 **Complete:** est. 3-5 years	
CL-13.5 Encourage the location of new development in areas where exposure to climate hazards is low and ecological impacts are minimized.	CDD	**Start:** 2026	
CL-13.5.1 Develop design guidelines for climate-resilient multi-use development. Guidelines should require residential development to be designed for passive survivability under future climate projections.	CDD	**Start:** 2030 **Complete:** est. 5 years	
CL-13.5.2 Update the regional Transfer of Development Rights program to meet state-mandated growth requirements while preventing urban sprawl and protecting key ecosystems.	CDD	**Start:** 2028 **Complete:** est. 1-2 years	

Policies and Implementation Actions		Lead	Period	Prioritization
CL-13.5.3	Develop hazard-specific overlay zones to inform the development of Climate Resilience Guidelines (CL-9.4.1) and climate-resilient redevelopment guidelines (CL-10.1.4) to promote climate resilient development.	WRS CDD TED	**Start:** 2028 **Complete:** est. 3 years	
CL-13.5.4	Update development regulations on a regular basis to incorporate best practices for reducing the risk of wildfire, extreme heat, flooding, and other climate-exacerbated hazards.	CDD	**Start:** 2026 Reassess every 5 years	
CL-13.6	**Support efforts of local businesses to bolster climate preparedness and continuity of operations.**	EXD WRS	**Start:** 2035	
CL-13.6.1	Collaborate with key stakeholders to draft recommendations for new building codes and incentive programs that help installation of on-site renewable energy and battery storage.	EXD	**Start:** 2035 **Complete:** est. 3 years	
CL-13.7	**In areas with significant vulnerability to climate hazards, facilitate and support long-term community visioning including consideration of managed retreat.**	CDD WRS	**Start:** 2026	
CL-13.7.1	Utilize information from the Comprehensive Vulnerability Assessment to identify areas at high risk from climate impacts that will require substantial adaptation activities or the managed retreat of the entire community.	CDD WRS	**Start:** 2028 **Complete:** est. 7 years	
CL-13.7.2	Conduct regular outreach activities with identified high-risk communities and other key stakeholders to educate them on risks.	CDD WRS	**Start:** 2029 Term of the Plan	
CL-13.7.3	Review adaptation plans for communities in other cities and neighborhoods facing similar risks.	CDD WRS	**Start:** 2026 **Complete:** est. 1 year	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-13.7.4 Develop long term action plans with at-risk communities, with distinct phases for different increasing levels of risk.	CDD WRS	**Start:** 2028 **Complete:** est. 3-5 years	

Goal CL-14 Strive to create a local transportation system, including infrastructure, routes, and active travel modes, which fosters connectivity and can withstand and recover quickly from climate impacts.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-14.1 Improve street connectivity, transit accessibility, and walkability, including sidewalks and street crossings, to ease emergency evacuation.	TED	**Start:** 2028	
CL-14.1.1 Assess Tumwater's street network to find gaps in street connectivity and transit access.	TED	**Start:** 2028 **Complete:** est. 5 years	
CL-14.1.2 Redesign streets in alignment with complete streets mandate where possible, eliminating connectivity gaps to facilitate smoother evacuations and create whole communities connected by safe walking routes.	TED	**Start:** 2035 **Complete:** est. >10 years	
CL-14.1.3 Work with Intercity Transit to expand their transit program that provides evacuation aid to community members who do not or cannot drive, utilizing the vulnerable population database (CL-10.1.2).	TFD	**Start:** 2029 **Complete:** est. 8 years	
CL-14.1.4 Assess current transportation network and transit options to identify barriers to accessibility and develop a plan to address gaps for all abilities and accessibility supports.	TED	**Start:** 2026 **Complete:** est. 3-5 years	
CL-14.2 Prioritize access to and restoration of water bodies and water-adjacent sites when designing and siting new and expanded transportation infrastructure.	TED WRS	Term of the Plan	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-14.3 Improve habitat connectivity wherever possible when constructing and redeveloping roadways.	TED WRS	**Start:** 2028	
CL-14.3.1 Integrate habitat connectivity considerations into road construction and redevelopment projects, reviewing plans for opportunities to make roads more permeable for both aquatic and terrestrial species through actions like widening culverts.	TED WRS	**Start:** 2028 Term of the Plan	
CL-14.4 Facilitate quick recovery of the whole multimodal transportation system after disruption from disasters or extreme weather events.	TED	**Start:** 2028	
CL-14.4.1 Develop transportation recovery plans that assess how recovery of one aspect of the transportation system could inhibit recovery of other forms of transportation and strive to avoid such impacts. For example, snow plowing should not restrict access to bike lanes.	TED	**Start:** 2028 **Complete:** est. 5 years	
CL-14.4.2 Prioritize infrastructure needed for the recovery of Intercity Transit in the aftermath of an extreme weather event.	TED	Term of the Plan	

Goal CL-15 Protect and improve water quality and availability.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-15.1 Manage Tumwater's water sustainably, ensuring there is adequate quantity and quality of water available for future generations.	WRS	Term of the Plan	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-15.1.1 Develop guidance for Tumwater residents, businesses, and developers on sustainable water management practices. Topics may include smart irrigation, drought tolerant plant selection, etc.	WRS	**Start:** 2026 **Complete:** est. 1-2 years	
CL-15.1.2 Study projected climate hazard impacts on water quality and quantity to develop strategies to protect and preserve water for Tumwater's future.	WRS	Term of the Plan (as new projections are available)	
CL-15.1.3 Evaluate the long-term adequacy of water delivery infrastructure to effectively anticipate and manage changes in hydrological patterns. Changes in hydrological patterns may include increases in flooding frequency or reduction of late-summer water availability associated with climate change.	WRS	**Start:** 2028 **Complete:** est. 3-4 years	
CL-15.1.4 Assess current groundwater reservoirs aquifers for any projected climate impacts, including saltwater intrusion, contamination, and reduced quantities (diminishment of aquifers and reduction of streamflow). If necessary, develop and implement strategies to mitigate impacts.	WRS	**Start:** 2028 **Complete:** est. 4-5 years	
CL-15.2 Improve Tumwater's drought resilience through water reclamation and conservation measures, drought-tolerant landscape design, and advocacy.	WRS CDD	**Start:** 2026	
CL-15.2.1 Expand use of reclaimed water at Tumwater facilities when resources are available and expand municipal reclaimed water systems.	WRS	**Start:** 2026 Reassess every 2 years	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-15.2.2 Promote rain gardens, dormant lawns, and lawn alternatives, as well as native and drought-tolerant landscaping choices. Facilitate an incentive or rebate program for community members who use native and drought-tolerant landscaping options.	WRS	**Start:** 2026 Term of the Plan	
CL-15.2.3 Facilitate a demonstration area for lawn alternatives that highlights native and drought-tolerant landscaping.	WRS EXD	**Start:** 2026 **Complete:** est. 1 year	
CL-15.2.4 Advocate at the Thurston County Health Department and state level agencies for the reuse of greywater on-site in buildings for flushing toilets and irrigation.	WRS	**Start:** 2026 Term of the Plan	
CL-15.2.5 Advocate at state level to prioritize using water resources in alignment with public interests.	WRS	**Start:** 2026 Term of the Plan	
CL-15.3 Develop and implement a comprehensive drought resilience strategy that factors in projected climate impacts and sets action levels for different drought stages.	WRS	**Start:** 2026	
CL-15.3.1 Conduct outreach to understand current water resource needs (i.e., water-reliant livelihoods).	WRS	**Start:** 2026 **Complete:** est. 1 year	
CL-15.3.2 Draft measures to protect access to water availability at a fair rate for low-income residents and residents whose income relies on water.	WRS	**Start:** 2027 **Complete:** est. 2 years	
CL-15.4 Increase use of low-impact development infrastructure projects that help capture, filter, store, and reuse stormwater runoff.	WRS	**Start:** 2026	
CL-15.4.1 Continue to prioritize green stormwater infrastructure projects using Stormwater Utility Funds.	WRS	Term of the Plan	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-15.4.2 For all stormwater project designs, require use of improved stormwater runoff modeling that uses future rainfall projections.	WRS	Term of the Plan	
CL-15.4.3 Share guidance for different types of green stormwater infrastructure best management practices with developers to use in future projects.	WRS	**Start:** 2026 Term of the Plan	

Goal CL-16 Expand local food justice to address climate impacts and increase access to nourishing, affordable, culturally appropriate, and climate-friendly foods while expanding local use of composting.

Policies and Implementation Actions	Lead	Period	Prioritization
CL-16.1 Improve local food justice through collaboration, education, and advocacy.	WRS	**Start:** 2026	
CL-16.1.1 Implement the Food System Plan, updating it periodically as necessary.	CDD WRS	**Start:** 2026 **Complete:** est. 1-2 years	
CL-16.1.2 Identify relevant stakeholders who can further sustainable, climate-adapted, and equitable food distribution in Tumwater.	CDD WRS	**Start:** 2026 **Complete:** est. 1 year	
CL-16.1.3 Explore opportunities for the community to provide and engage in local and sustainable food production and consumption, such as farmers markets and community gardens.	WRS	**Start:** 2026 **Complete:** est. 2-5 years	
CL-16.1.4 Work with urban farms and community gardens to invest in climate-resilient water storage solutions such as natural rainwater collection.	WRS	**Start:** 2027 **Complete:** est. 3 years	
CL-16.1.5 Support state-wide regulations that protect producers and consumers from climate change impacts on the food system.	WRS	Term of the Plan	

Policies and Implementation Actions	Lead	Period	Prioritization
CL-16.1.6 Collaborate with community members to identify culturally important foods and develop strategies to secure access to these, incorporating strategies into an update to the Food System Plan.	WRS	**Start:** 2030 **Complete:** est. 2-3 years	
CL-16.2 Increase composting in urban agriculture and by private residences.	WRS	**Start:** 2026	
CL-16.2.1 Develop outreach materials to promote and educate on composting methods and systems.	WRS	**Start:** 2026 **Complete:** est. 1 year	
CL-16.2.2 Develop an incentive program for residents to install and utilize composting systems.	WRS	**Start:** 2031 **Complete:** 1-2 years	
CL-16.3 Expand consistent access to food for Tumwater community members.	WRS	**Start:** 2026	
CL-16.3.1 Coordinate with the Food Bank to expand access to food assistance services.	WRS	**Start:** 2026 **Complete:** est. 1-3 years	
CL-16.3.2 Conduct community outreach to find gaps and barriers in consistent access to nutritious food.	WRS	**Start:** 2026 **Complete:** est. 1 year

Acronyms and Abbreviations Used in Document

EV – Electric Vehicle

GHG – Greenhouse Gas

RCW – Revised Code of Washington

TRPC – Thurston County Regional Planning Council

VMT – Vehicle Miles Traveled

Key Terms and Definitions

15-Minute Neighborhood: An urban planning concept referring to neighborhoods in cities in which most daily necessities, services, and amenities, such as work, education, health care, shopping, recreational opportunities, can be reached by a 15-minute walk, bicycle ride, or public transportation trip. These neighborhoods tend to be relatively walkable and support a greater baseline of residential density.

Climate: The "average weather" generally over a period of three decades. Measures of climate include temperature, precipitation, and wind.

Climate Change: Any significant change in the average climate of a region lasting for decades or longer. Can be measured through substantial changes in temperature, precipitation, or wind. Climate change may result from natural factors and from human activities that change the atmosphere's composition and land surface.

Climate Commitment Act – The Climate Commitment Act (Chapter 310, Laws of 2021) caps and reduces greenhouse gas emissions from the State's largest emitting sources and industries, allowing businesses to find the most efficient path to lower carbon emissions. This program works alongside other critical climate laws and policies to help the state achieve its commitment to reducing greenhouse gas emissions by 95 percent by 2050.

The Act also puts environmental justice and equity at the center of climate policy, making sure communities that bear the greatest burdens from air pollution today breathe cleaner, healthier air as the state cuts greenhouse gases. Finally, funds from the auction of emission allowances support new investments in climate-resiliency programs, fund clean transportation, and address health disparities across the state.

Climate Refugia: Areas that continue to resist the impacts of anthropogenic climate change, allowing valued and culturally significant physical, ecological, and socio-cultural resources to continue to survive and even thrive amidst a changing landscape.[1]

Environmental Justice: The fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to environmental laws, rules, and policies RCW 70A.02.010(8). Environmental justice includes addressing unfair environmental and health impacts in all laws, rules, and policies by:

- Prioritizing vulnerable populations and overburdened communities;
- The equitable distribution of resources and benefits; and
- Eliminating harm.

Food Justice: Assumes consistent access to nutritious, affordable, and culturally relevant food to be a human right that should be secured and protected.

[1] Morelli, T.L.; Millar, C. 2018. Climate Change Refugia. USDA Forest Service Climate Change Resource Center. https://www.fs.usda.gov/ccrc/topics/climate-change-refugia

Frontline Community[2]: Those communities that experience the effects of climate change "first and worst" while also having significantly lower capacity to adapt and reduced access to resources and political power to respond to those risks. Though not limited to these groups, frontline communities generally include communities of color, Indigenous peoples, and low-income communities. These communities have also not historically had access to decision making processes in Tumwater.

Green Stormwater Infrastructure: Stormwater management systems that mimic natural systems, capturing and absorbing or diverting rainwater where it falls.

Greenhouse Gas: Any gas that absorbs heat in the atmosphere; examples include carbon dioxide, methane, nitrous oxide, ozone, and water vapor.

Managed Retreat: The voluntary movement and transition of communities away from regions that are likely to become unsustainable for life due to climate change impacts. Primarily a tool used in coastal regions to move communities away from sea level rise impacts, but increasingly a tool used in planning for other climate hazards.

Native Species: Any plant, fungus, or animal species native to our area. In the US, this only includes species present in the region prior to the arrival of European settlers.[3]

Overburdened Community[4]: According to RCW 70A.02.010(11), denotes a geographic area where vulnerable populations face combined, multiple environmental harms and health impacts, and includes, but is not limited to, highly impacted communities as defined in RCW 19.405.020.

Passive Survivability: Building to ensure that residences will remain at a safe temperature for occupants if the power goes out and that they will overall require less power to keep at a regulated temperature. It can also entail building single-family residences with one room designed to maintain comfortable temperatures or multifamily residences with a designated common area designed to serve this same function. Building for passive survivability also reduces demand on local energy infrastructure.

Resilience: the ongoing process of anticipating, preparing for, and adapting to changes in climate and minimizing negative impacts to our natural systems, infrastructure, and communities (RCW 70A.65.010).

Sustainability: meeting the needs of the present without compromising the ability of future generations to meet their own needs. Often considered through the "triple bottom line" approach which considers impacts to natural

[2] In the Climate Element the term "frontline community" is preferred as it does not carry the disempowering and othering connotations of the terms "overburdened community" and "vulnerable population." However, the latter terms carry legislative meaning, with precise definitions in State law and policies that direct funding for and engagement with these groups. All three terms will be used throughout the goals, policies, and implementation actions contained in this Element. "Frontline communities" will be the preferred term where the legislative context is not relevant, while "overburdened community" and "vulnerable population" will be used where the precise definitions are key to enacting the policy.

[4] Refer to Note 1.

environment, community health, and economic vitality.

Vulnerable Populations[5]: According to RCW 70A.02.010(14), includes population groups that are more likely to be at higher risk for poor health outcomes in response to environmental harms, due to: adverse socioeconomic factors, high housing and transportation costs relative to income, limited access to nutritious food and adequate health care, linguistic isolation, and other factors that negatively affect health outcomes and increase vulnerability to the effects of environmental harms; and sensitivity factors, such as low birth weight and higher rates of hospitalization.

Vulnerable populations can include but are not limited to racial or ethnic minorities, low-income populations, populations disproportionately impacted by environmental harm, and populations of workers experiencing environmental harm.

[5] Refer to Note 1.

1. Introduction

A. Background

The Climate Element is part of Tumwater's Comprehensive Plan and was created to meet the state Growth Management Act (Chapter 36.70A RCW) requirements to adapt to and mitigate the effects of a changing climate.

Part 2 of the Climate Element provides the technical analysis to address the requirements of RCW 36.70A.070(9). The Climate Element addresses:

1. **Climate Mitigation.**
   - Building-Scale Emissions Reduction.
   - Transportation and Vehicle Miles Traveled reduction.
   - Carbon Sequestration.
2. **Climate Resilience.**
   - Adaption Strategies across 11 key sectors.
     - Agriculture and Food Systems.
     - Buildings & Energy.
     - Cultural Resources.
     - Economic Development.
     - Ecosystems.
     - Emergency Management.
     - Health & Well-Being.
     - Transportation.
     - Waste Management.
     - Water Resources.
     - Zoning & Development.
3. **Climate Equity.**
   - Embedded throughout the Climate Element.
   - Addressing inequities in climate impacts and access to resources.

CLIMATE

State requirements (RCW 36.70A.070(9)(a)) that the Comprehensive Plan must meet:

- A climate change and resiliency element that is designed to result in reductions in overall greenhouse gas emissions and that must enhance resiliency to and avoid the adverse impacts of climate change, which must include efforts to reduce localized greenhouse gas emissions and avoid creating or worsening localized climate impacts to vulnerable populations and overburdened communities.

The objectives of the Climate Element are found in two sub-elements:

- The **Climate Mitigation Sub-Element** addresses reducing Tumwater's greenhouse gas emissions to achieve net zero by 2050 goals set by the State.
- The **Climate Resilience Sub-Element** focuses on adapting to climate impacts that are already being felt across the

region and aims to address those impacts that cannot be avoided regardless of whether Tumwater reaches its net zero goals.

B. How to Read this Part of the Element

Part 2 of the Climate Element consists of the following chapters.

- **Chapter 2 – Equity & Environmental Justice**: Provides a summary of the equity and environmental justice work completed for preparation of the Climate Element.
- **Chapter 3 – Greenhouse Gas Reduction**: Provides background Tumwater's current greenhouse gas emissions, how they are measured and their sources.
- **Chapter 4 – Climate Resilience**: Provides a discussion of project climate impacts and adaptation strategies that will guide the Climate Element's goals and policies.
- **Appendices**: The appendices include the following:
  - Summary of foundational documents used to prepare the Climate Element.
  - Summary of engagement results.
  - Index of equity-focused actions.

C. Growth Management Act Goals

The Growth Management Act requires that Tumwater demonstrate that each Element in its Comprehensive Plan meets the relevant fifteen planning goals contained within the Act. The fifteen goals in turn guide the development and adoption of Tumwater's Comprehensive Plan and development regulations.

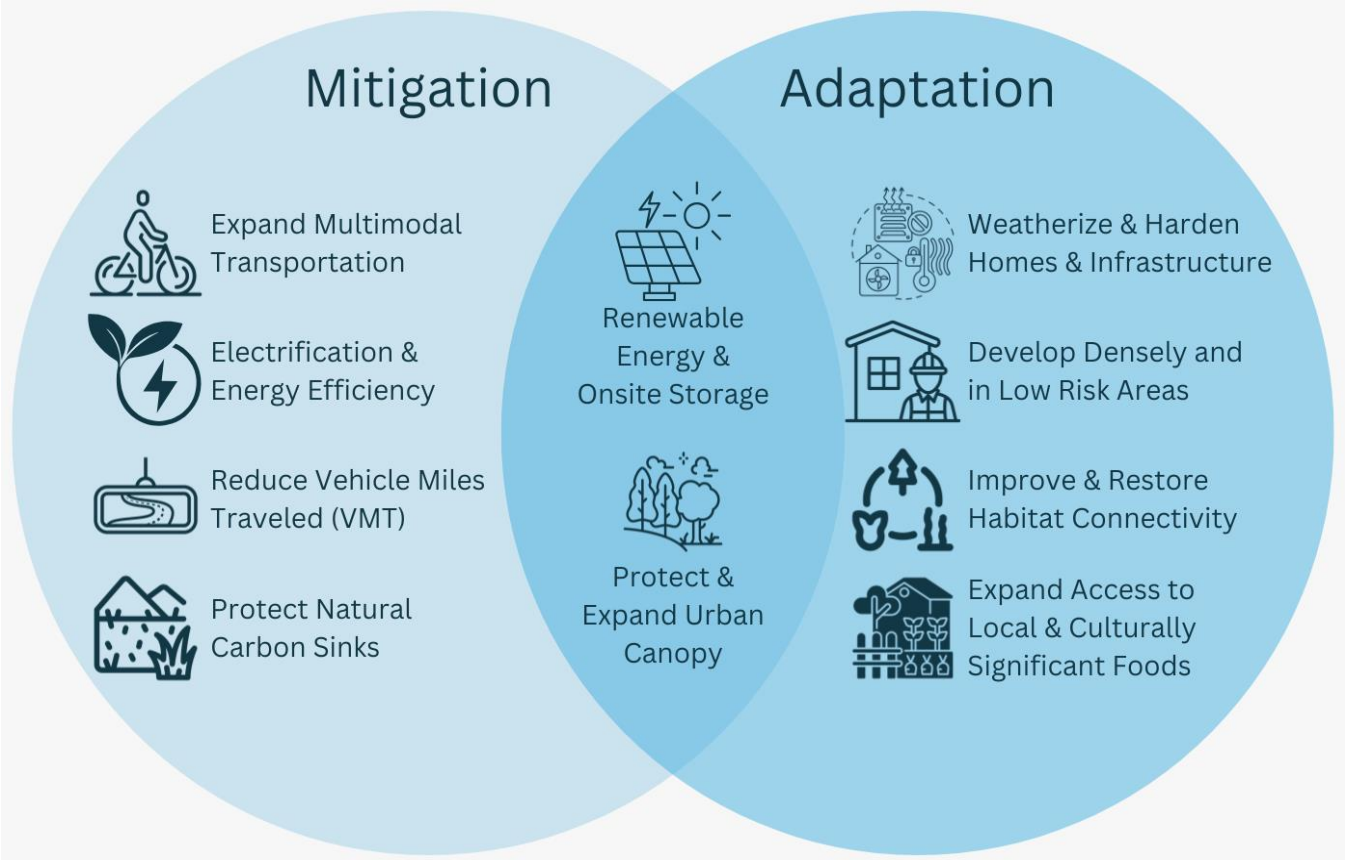
The Climate Element addresses the Growth Management Act goal related to climate:

14. ***Climate change and resiliency***. *Ensure that comprehensive plans, development regulations, and regional policies, plans, and strategies under RCW 36.70A.210 and chapter 47.80 RCW adapt to and mitigate the effects of a changing climate; support reductions in greenhouse gas emissions and per capita vehicle miles traveled; prepare for climate impact scenarios; foster resiliency to climate impacts and natural hazards; protect and enhance environmental, economic, and human health and safety; and advance environmental justice.*

The Climate Element has specific guidelines and policies that delineate what must be covered across the Greenhouse Gas Reduction and Resilience Sub-Elements.

State Department of Commerce requires two separate sub-elements addressing these two focus areas. At times there are actions that appear to be missing but are instead addressed in the other sub-element. Throughout the Climate Element, policies and goals were prioritized where they provided co-benefits with environmental justice and climate equity goals.

Climate Element



Part 2 – Technical Information

The Climate Element was developed with public input as described in the Public Outreach Plan as required by the Growth Management Act. The Element is also based on the updated list of additional supporting plans, documents, and best available science found in Appendix A.

Tumwater has a long history of pursuing sustainability goals and leading the region on efforts such as working across jurisdictions to advance climate mitigation action. In recent years, however, it has become apparent that some climate impacts cannot be avoided. Therefore, Tumwater must pursue climate resilience or adaptation measures as well to ensure Tumwater residents can survive and thrive while continuing to push for global climate mitigation.

Resilience and mitigation actions are not discrete categories, as shown in Figure CL-1. There are several key areas of overlap across the two, such as renewable energy and onsite storage and protecting and expanding the urban canopy.

Figure CL-1. The Distinct Goals of Climate Mitigation and Adaptation with Co-Benefits.

D. Methodology

The Climate Element was developed through a phased, multilateral process with analytical, public outreach, and regulatory input.

1) Regulatory, Policy, & Planning Drivers

All planning and policy documents for the region that addressed climate mitigation or resilience were gathered and reviewed for relevance to the development of the Climate Element. The documents that were determined to be the most relevant based on recency, policy robustness and focus on climate mitigation or resilience, were reviewed more thoroughly.

Through this review, staff identified what the region and Tumwater have accomplished and what gaps remain. The details of this policy gap analysis, including the documents reviewed and breakdown of policies by sector and focus area can be found in Appendix A.

2) Climate Policy Advisory Team

The State Department of Commerce issued guidance suggesting that Tumwater should create an interdisciplinary group of planners, public works professionals, and community members with a focus on helping to prepare the Climate Element. This interdisciplinary group is the Climate Policy Advisory Team.

The Climate Policy Advisory Team addressed the following:

- Supporting the analysis of climate information.
- Providing recommendations on short- and long-term goals.
- Centering equity in the creation of goals, policies, and draft implementation actions of the Climate Element.
- Representing community voices across the community, particularly overburdened communities.

In creating the Climate Policy Advisory Team, staff invited interested individuals within and outside of Tumwater, aiming to capture a mix of representation including:

- Subject matter experts including academia and research institutions.
- Local businesses.
- Staff from Tumwater and Thurston County.
- Frontline communities.

The resulting 11 member Climate Policy Advisory Team was engaged continuously and substantively throughout the Climate Element Planning process, providing feedback and advice with respect to the following issues and questions:

- Vision and Alignment:
  - What is the short- and long-term vision for the Climate Element?
  - How does Tumwater align its Climate Element with other City and regional climate plans and community feedback and priorities?
- Public Engagement:

- How should Tumwater engage with residents on the issue of climate change?
- Who are the priority groups and individuals to engage?
- What are the appropriate times and venues for engagement?

- Greenhouse Gas Reduction and Resilience Analyses:
  - Do the findings of the emissions inventory and climate vulnerability and risk analyses align with the community's lived experience?
  - How are these analyses used effectively and thoughtfully to inform the goals and policies in the Climate Element?
- Policy Development and Planning:
  - What should be the Climate Element goals and policies?
  - Do the Greenhouse Gas Reduction and Resilience Sub-Elements satisfy and align with findings from staff's analyses and with input from community members?

The Climate Policy Advisory Team provided direct input and completed multiple rounds of review on the goals and policies throughout the development of the Climate Element.

The Climate Policy Advisory Team will continue to advise and advocate as needed as Tumwater moves forward with implementing the Climate Element.

3) Public Engagement

Public outreach and engagement were critical components of the Climate Element planning process. Tumwater presented its Public Engagement Strategy on the Comprehensive Plan Update in July 2023 and developed an addendum to this strategy specific to the Climate Element in June 2024. The addendum detailed Tumwater's approach to engaging community members on the Greenhouse Gas Reduction and Resilience Sub-Elements.

The public engagement strategy for the Climate Element focused on providing community members with equitable and ongoing access to the planning process. This entailed direct engagement with City staff, as well as multiple in-person and virtual opportunities to provide input on the Climate Element.

Tumwater also considered planning fatigue as a limitation since other elements of the Comprehensive Plan Update were being developed at the same time as the Climate Element. Tumwater utilized two key approaches to engagement for all chapters of the Comprehensive plan including the Climate Element:

- Public workshop: An in-person workshop where participants reviewed greenhouse gas reduction and climate resilience analyses, with the intent to learn more about the community's lived experience and vision for the Climate Element.
- Online Story Map: An online platform that provides all relevant analytical and qualitative information pertaining to the Greenhouse Gas Reduction and Resilience Sub-Elements. The Online

Story Map provided ongoing feedback to Tumwater throughout the initial development of the Climate Element.

2. Equity & Environmental Justice

A. Introduction

Tumwater recognizes that climate change, inequity, social justice, and environmental justice are inextricably intertwined. The root causes of climate change and environmental justice are the same systemic outcomes of the exploitative extraction of natural and human resources. Communities across the world, including Tumwater, have suffered from the inequitable distribution of benefits and burdens that are especially relevant to the issue of climate change.

Frontline communities are groups of people that typically experience the impacts of climate change 'first and worst.' They are often made up of marginalized populations, such as Black and Indigenous communities of color and low-income individual and households. Frontline communities are often located in areas that are more exposed to certain climate hazards. They have historically had less political power and fewer resources. For example, they may not have the capacity to respond to these risks due to inflexible work policies or positions, and some employers may not issue paychecks when work is suspended due to a hazard event.

For these reasons, the Climate Element and the Comprehensive Plan more broadly placed the issues of environmental justice and climate equity at the center of planning efforts by establishing goals related to these core problems.[6] Centering equity principles is essential for the development of a Comprehensive Plan that ensures frontline communities are not adversely impacted further by new plans and policies.

B. Community Engagement

Effective community engagement is centered around the following attributes:

- Mutually beneficial.
- Recognizes and values the contributions of all participants.
- Focuses on strengths and successes.
- Ensures that all voices are equally respected in shaping decisions whether based on lived experience or technical knowledge.

Tumwater held an in person public workshop that invited residents to identify priorities and solutions. The workshop was designed to encourage community members who might not always feel welcome or choose to attend public forums to participate.

The workshop was held in the ASHHO Cultural Community Center and advertised extensively by City Staff. Over 60 community members

[6] One of the overarching goals (CL-2) that guides policy in both Greenhouse Gas Reduction and Resilience Sub-Elements focuses exclusively on equity and environmental justice, while both sub-elements contain specific policies and actions that further equity. A full list of equity-focused policies and actions can be found in Appendix C.

attended the workshop. They visited three different stations to learn about and share their lived experience and opinions on greenhouse gas reduction strategies, climate hazards and resilience, and local governance. A full summary is included in Appendix B.

C. Equity Goals

All community members, regardless of their background, have an opportunity to benefit from policies and programs. Equity in this strategy is essential to ensure that all communities can participate in and benefit from policies in a fair and inclusive way.

Tumwater developed a series of goals and policies to address these concerns using targeted universalism, which means that universal goals are set for everyone, but the targeted approaches are tailored to meet the unique needs of different groups. Using this approach ensures that all communities can achieve the same outcomes, even if the methods differ.[7]

This approach integrates various forms of equity, including:

- Procedural equity, which ensures that everyone can participate in decision-making.
- Distributional equity, which ensures that benefits and burdens are shared fairly.
- Structural equity, which addresses historical and systemic inequalities.
- Transgenerational equity, which ensures that decisions made today consider their impact on future generations.

Together, these principles created a more inclusive, fair, and sustainable approach to community engagement and policy development.

The following equity goals were aimed to empower underserved communities, enhance access to resources, and ensure that all voices are represented in decision-making processes. In developing the Climate Element, Tumwater made sure to:

- Develop an accessible, equitable, and engaging Element.
- Meet people where they are and ensure that all engagement efforts are accessible and equitable. This means accommodating anyone with certain health, physical, or working conditions, and it requires that needs around language, mobility, or family care are thoughtfully addressed.
- Focus on reducing inequalities and fostering greater community ownership[8]

[7] In Part 1 of the Climate Element Goals, Policies, and Actions, policies that require community members to meet new, more stringent codes or assessment requirements are supported by draft implementation actions that call for creating subsidy or rebate programs or developing funds to support low-income community members.

[8] All policies and actions that were developed by or with the Climate Policy Advisory Team or originated from a suggestion from the public workshop or virtual open house are flagged as Community-Identified Priorities so that community members can see their input in action.

of the Climate Element which will lead to more equitable outcomes to benefit frontline communities.

- Seek how best to intentionally allocate resources to overcome the cumulative impacts of institutional racism on historically underserved and under-represented people.

D. Frontline Communities

In Tumwater, frontline communities face disproportionate challenges related to housing affordability, environmental stressors, and access to essential resources. Since these challenges are disproportionate, they require targeted interventions to center equity and resilience.

To address these disparities, Tumwater must identify overburdened communities and vulnerable populations within its jurisdiction. Tumwater is making intentional efforts to understand the cumulative threats these communities face.

Tumwater has aligned with the motto, "no data without stories and no stories without data." Data confirmed by lived experience can inform how land use planning and policy adjustments may alleviate these issues in ways that align with community needs.

To get those stories, Tumwater must:

- Prioritize collaboration with impacted communities.
- Build community capacity.
- Foster meaningful relationships with community members and community-based organizations.

This work ensures support is both impactful and aligned with local priorities.

E. Evaluating Equity within Strategies

When communities can actively participate in decision-making, policies are more likely to reflect local realities and provide meaningful, sustainable impacts.

Collaborative governance empowers Tumwater communities, which are most affected by social and environmental challenges, fostering self-determination and reducing systemic inequities. Targeted benefits emphasize the right to healthy environments. This approach also explicitly prioritizes support for those experiencing the highest cumulative risks.

Each proposed Climate Element policy and draft implementation action was assessed in accordance with the Intermediate Planning Guidance's Equity Criterion Matrix in Table CL-1, which helped determine if the policy or draft implementation action was equitable. The matrix provides questions for co-governance, targeted benefits, just responsibility, and wealth building considerations and sub-considerations

to assess for each Climate Element policy and draft implementation action.

Table CL-1. Equity Criterion Matrix.

Co-Governance	
Consideration:	**Sub-considerations:**
Does the measure show potential to build self-determination for frontline communities of color and/or low-income communities?	Are communities' most impacted identifying their needs and solutions? Do they have the ability to meaningfully shape the decisions in implementation?
Targeted Benefits	
Consideration:	**Sub-considerations:**
Is the measure clearly explicit in targeting interventions to communities furthest from achieving a healthy community?	Do the goals and targets recognize healthy environments and communities? Do the strategies prioritize those most at risk from highest cumulative impacts?
Just Responsibility	
Consideration:	**Sub-considerations:**
Does the measure show potential to directly limit harm and hold those causing harm responsible? Does it prioritize effectiveness?	Is the solution directly stopping the problem? Is it making anything worse? Are those causing the greatest harm held most accountable?
Wealth Building	
Consideration:	**Sub-considerations:**
Does the measure show potential to invest in and sustain local livelihoods, starting with communities with the greatest barriers to meeting their needs?	Are we supporting production by local communities for local communities, based on a principle of using local resources and living wage labor?

Source: Washington State Department of Commerce.

Using this system of continuous engagement and evaluation of equity criteria throughout development of the Climate Element, 24 percent of the policies and 27 percent of the actions in the Element directly address issues of equity. Additionally, 10 of the Element's 16 goals contain equity considerations.

Frequent and multifaceted public engagement also led to Climate Element developing 19 percent of the policies and 18 percent of the actions directly out of requests, input, and ideas generated through the public workshop, virtual open house, and Climate Policy Advisory Team meetings.

3. Greenhouse Gas Reduction

A. Introduction

Following the requirements of RCW 36.70A.070, Tumwater prepared a sub-element on greenhouse gas emissions reduction as part of Climate Element. The Greenhouse Gas Reduction Sub-Element **dictates Tumwater's approach to eliminating greenhouse gas emissions towards achieving net-zero emissions by 2050**, with interim targets for municipal and community-wide emissions**.**

B. Greenhouse Gas Emissions

Greenhouse gases refer to specific gaseous compounds that trap heat from the sun after it radiates from the Earth's surface. Greenhouse gases include, but are not limited to, carbon dioxide (CO_2), methane (CH_4), and nitrous oxide (N_2O).

Some greenhouse gases are naturally occurring, or 'biogenic,' whereas others are produced by human activity, or are 'anthropogenic.' Greenhouse gases are essential to life on earth: they prevent heat from escaping Earth's atmosphere.

However, increased anthropogenic emissions from burning fossil fuels and land use changes like deforestation have rapidly and significantly increased the concentration of greenhouse gas in the Earth's atmosphere. This increased volume has resulted in a global warming effect that is shifting climate and weather patterns across the world.

This phenomenon has far-reaching impacts on communities, infrastructure, ecosystems, and wildlife as is discussed in Chapter 4 Climate Resilience. As a result, it is critical that Tumwater take action to reduce anthropogenic greenhouse gas emissions, and to do so as quickly as possible.

C. Measuring & Reducing Emissions

Tumwater developed a series of goals and policies to reduce greenhouse gas emissions across the City. These were informed by municipal and community-wide greenhouse gas emissions inventories, providing an accounting of Tumwater's largest sources of greenhouse gas emissions.[9] Tumwater drew upon these emissions inventories to help determine the specific goals and policies for the Greenhouse Gas Reduction Sub-Element. These goals and policies align with feedback from community members, the Thurston County Climate Mitigation Plan, and statewide regulations and climate goals.

[9] Greenhouse gas emissions are measured in metric tons of carbon dioxide equivalent ($MTCO_2e$).

DRAFT

D. Greenhouse Gas Emissions Targets

The Greenhouse Gas Reduction Sub-Element dictates Tumwater's approach to eliminating greenhouse gas emissions towards achieving net-zero emissions by 2045. Tumwater has identified specific interim targets for municipal emissions (i.e., emissions from City-owned assets, operations, and services) and community-wide emissions (i.e., emissions from various sectors across Tumwater, including, but not limited to, residential, commercial, and transportation sectors).

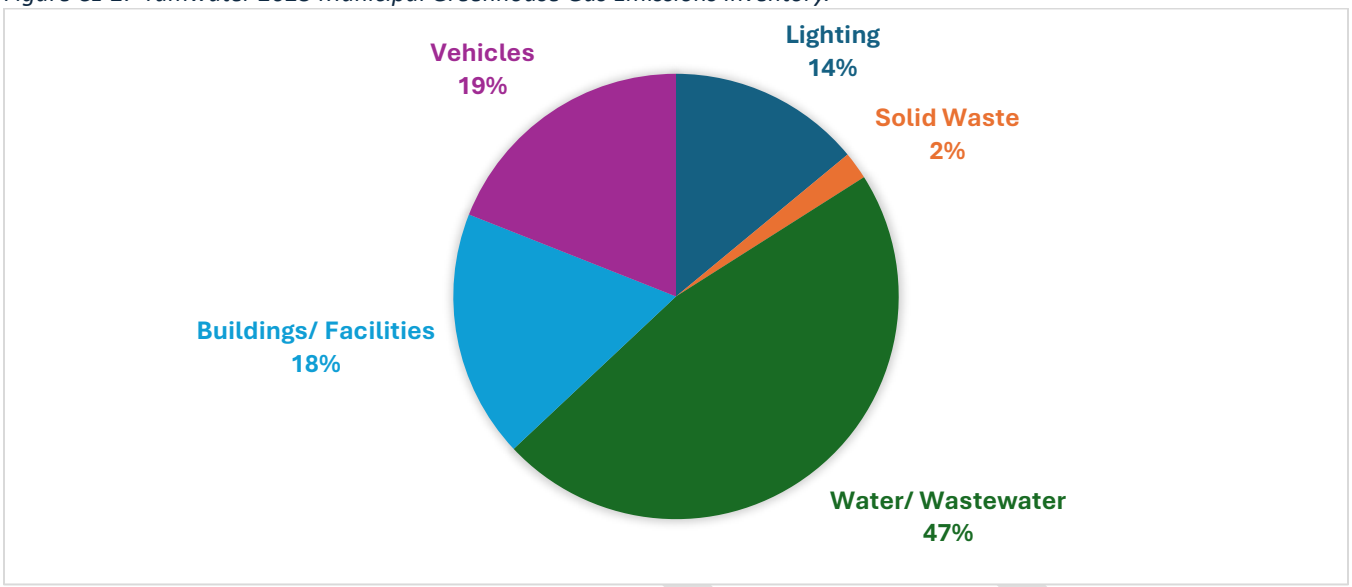
1) Municipal Emissions Goals

Based on its current municipal emissions, Tumwater is **establishing an interim target of reducing emissions by 50 percent from 2023 levels by 2030 on its way to net-zero emissions by 2045.** These municipal emissions milestones keep Tumwater ahead of statewide emissions reduction goals through both 2030 and 2045.

2) Community-Wide Emissions Goals

Based on its current community-wide emissions, Tumwater is establishing an interim target of reducing emissions by 45 percent from 2022 levels by 2030, and 70 percent by 2040 on its way to net-zero emissions by 2045. These milestones align with statewide emissions goals through 2040, while exceeding the State's requirements by 2045.

E. Municipal Operations Greenhouse Gas Emissions



For the Climate Element, Tumwater utilized a municipal inventory of its greenhouse gas emissions from calendar year 2023. Following the State Department of Commerce's Intermediate Guidance on greenhouse gas Emissions-Reduction Pathways, Tumwater exercised Pathway 3 – Create greenhouse gas Emissions Inventory, coordinating with an external expert to prepare a comprehensive municipal emissions inventory for 2023.

In that year, Tumwater's municipal emissions totaled 3,821 $MTCO_2e$, with the leading sources of emissions including electricity used to provide water and wastewater services to residents (47 percent), gasoline, diesel, and electricity used to power city vehicles and equipment (19 percent), and electricity and natural gas used to power municipal buildings and facilities.

Figure CL-2 shows Tumwater's 2023 Municipal Greenhouse Gas Emissions Inventory.

DRAFT

Figure CL-2. Tumwater 2023 Municipal Greenhouse Gas Emissions Inventory.

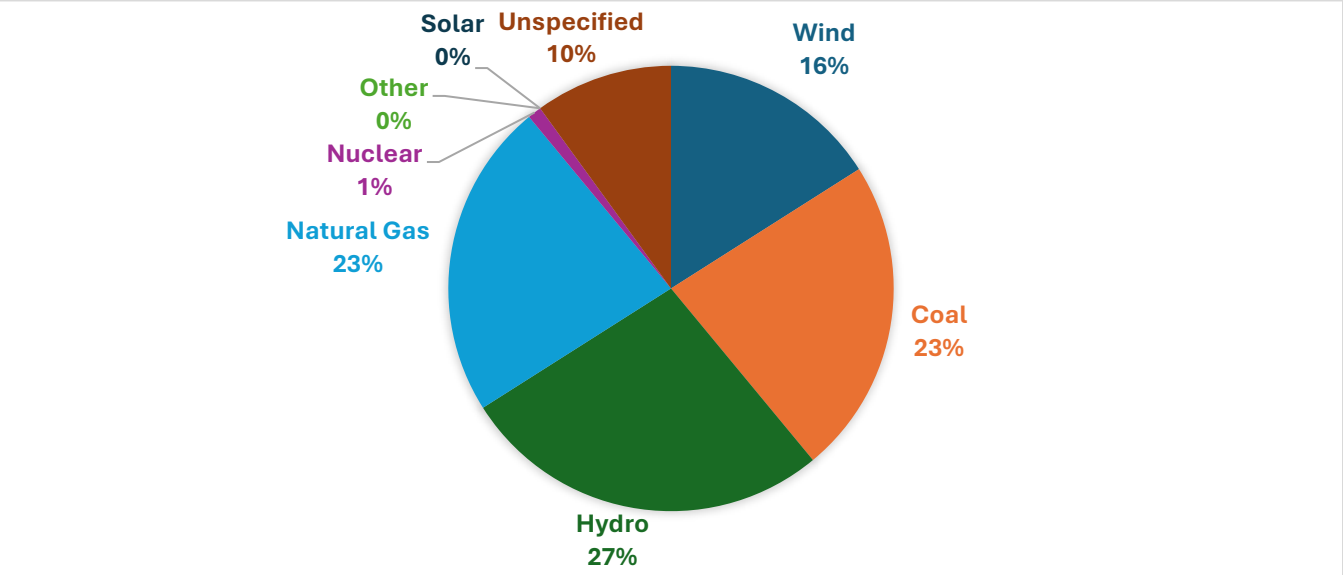
1) Water & Wastewater Services

Water and wastewater services are critical operations for Tumwater and its residents. The emissions from these operations are 47 percent of Tumwater's municipal emissions. The emissions from electricity used to provide water and wastewater services to Tumwater largely stem from water wells and wastewater lift stations. Electricity is used to power pumps in water wells and wastewater lift stations.

2) Fleet Vehicles

Emissions from Tumwater's fleet vehicles make up 19 percent of municipal emissions. Of these emissions, 75.5 percent are attributed to gasoline fuel vehicles, while 24.3 percent are attributed to diesel fuel vehicles. Electric vehicle emissions contribute 0.2 percent of vehicle emissions for the fleet.

Municipal lighting makes up approximately 14 percent of municipal greenhouse gas emissions. Municipal lighting includes traffic signals, streetlights, lights, and other outdoor lighting throughout Tumwater.



3) Electricity & Power Content

Much of Tumwater's greenhouse gas emissions can be attributed to the electricity used to power its assets. Emissions from this source are directly attributed to the power content of the electricity that Tumwater procures from its utility, Puget Sound Energy. Under the State's Clean Energy Transformation Act, utilities like Puget Sound Energy are required to provide fully clean, renewable energy by 2045

As of 2022, Puget Sound Energy's electric power content included natural gas (23 percent) and coal (23 percent), which explain much of the emissions coming from Tumwater's electricity use. As Puget Sound Energy's power content improves and more clean energy sources are used to power the electric grid, emissions from municipal assets will decline.

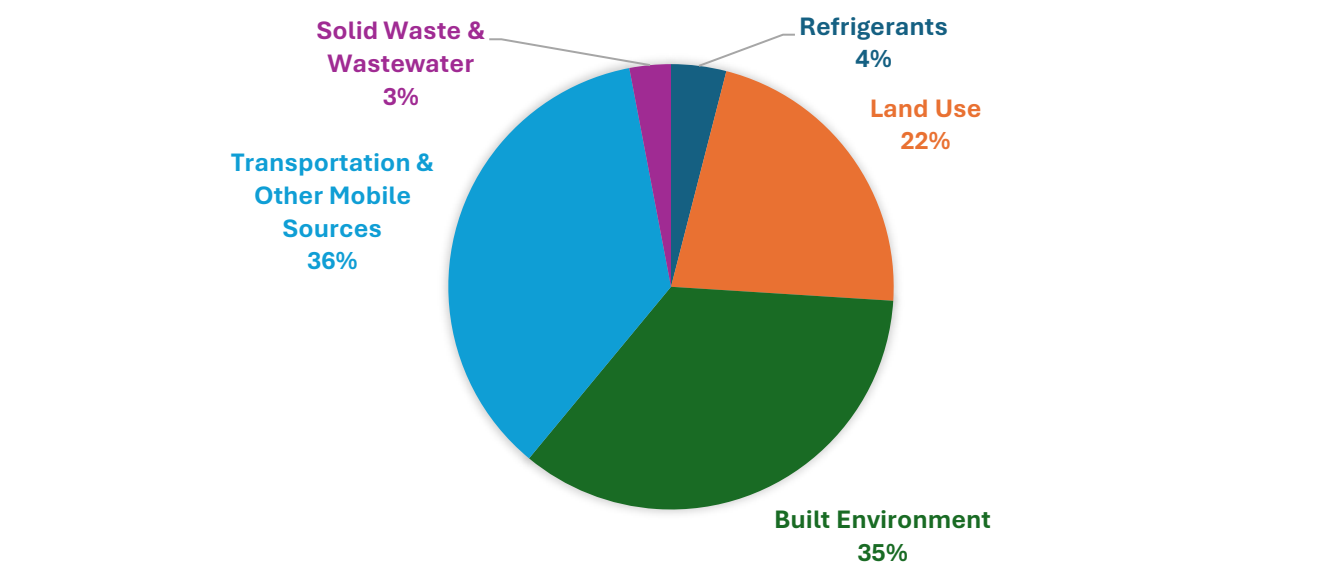
Figure CL-3 shows the 2022 Puget Sound Energy Power Content Mix.

Figure CL-3. Puget Sound Energy 2022 Power Content Mix.

Source: Puget Sound Energy, 2023.

F. Community-Wide Greenhouse Gas Emissions

Tumwater did not conduct its own community-wide greenhouse gas emissions inventory. Instead, Tumwater's community-wide emissions were derived from the 2022 Thurston County greenhouse gas emissions inventory.[10]



Community emissions include those produced by residential, commercial, industrial, and agricultural and other activities outside municipally owned assets and operations. While this emissions inventory accounts for jurisdictions and land area that falls outside of the jurisdiction of Tumwater, it still provides key insights into emissions across different sectors.

Tumwater exercised Pathway 1 – Conduct greenhouse gas Emissions Estimate – according to the State Department of Commerce's Intermediate Guidance to derive its community-wide emissions from another source.

Thurston County greenhouse gas emissions in 2022 shown in Figure CL-4 amounted to 4,240,135 $MTCO_2e$ (or 14.1 $MTCO_2e$ per capita).

[10] The State Department of Commerce funded the development of greenhouse gas emissions inventories for the State's eleven largest counties, including Thurston County.

Figure CL-4. Thurston County 2022 Community-Wide Greenhouse Gas Emissions.

Source: Thurston County, WA: 2022 Inventory of Community-Wide Greenhouse Gas Emissions.

A majority of countywide greenhouse gas emissions are from the transportation sector (36 percent), which largely comprise emissions from on-road vehicles, such as passenger vehicles, freight, and service vehicles. Other transportation emissions can be attributed to:

- Public transit.
- Off-road equipment.
- Aviation.
- Marine and rail.

The built environment makes up the second largest source of emissions in Thurston County (35 percent), largely stemming from natural gas and electricity to power buildings.

In 2022, Thurston County had approximately 19,518 acres of agricultural cropland. Land use from agricultural activities contributed 22 percent of greenhouse gas emissions countywide, with nearly half of those emissions stemming from methane production at dairy farms. Land use emissions also include emissions from tree cover loss in the Thurston County.

Smaller sources of greenhouse gas emissions countywide include emissions from:

- Solid waste and wastewater (3 percent), which include generation and disposal of solid waste, commercially processed compost, and wastewater treatment.
- Refrigerants (4 percent), which include use and leakage of hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and CO_2 from ozone depleting substances (ODs) that are used to cool buildings and other assets.

DRAFT

G. Vehicle Miles Traveled & Land Use

Vehicle Miles Traveled (VMT) is a measure of the number of miles traveled by vehicles in a geographic area. In 2023, the Thurston County VMT was 2,404,917,000 total, and 7,927 per capita. Increasing public transit ridership, carpooling, and increasing modes of active transit, such as biking or walking, all reduce VMT, and emissions from transportation.

VMT can also be reduced through land use and urban planning. Urban sprawl increases the number of miles for daily trips such as commuting to work or running errands. Denser city development reduces VMT by reducing the distance of these trips.

Additionally, planning public transit routes, bike lanes, and micro mobility between denser areas of housing and commercial centers contributes to lowering VMT.

DRAFT

4. Climate Resilience

A. Introduction

Climate adaptation aims to prepare Tumwater for the inevitable impacts of climate change. These impacts are already being felt and can no longer be lessened by climate mitigation activities alone. At the core of climate adaptation is community resilience.

The goal of resilience is that Tumwater not only recovers after a climate-related disaster but bounces back better. Effective resilience requires policies that support a mix of disaster preparedness, response, and recovery activities. Policies should also address systemic underlying issues. Climate adaptation can include:

- Repairing and enhancing existing infrastructure.
- Restoring natural systems which provide a variety of ecosystem services.
- Providing educational resources on individual resilience actions.
- Enacting policies that provide legal protections.

During implementation it is important to continuously engage broadly across the entire Tumwater community to ensure adaptation actions are:

- Equitable.
- Provide benefits for frontline communities.
- Designed to avoid or mitigate unintended negative consequences.

Building resilience effectively requires acting across all 11 sectors:

1. Agriculture and Food Systems,
2. Buildings & Energy.
3. Cultural Resources
4. Economic Development.
5. Ecosystems.
6. Emergency Management.
7. Health & Well-Being
8. Transportation.
9. Waste Management.
10. Water Resources.
11. Zoning & Development.

Tumwater has combined these 11 sectors into eight focus areas:

1. Buildings & Energy.
2. Community Well-Being & Preparedness.
3. Cultural Resources.
4. Ecosystems.
5. Local Economy, Zoning & Development.
6. Transportation.
7. Water Resources.
8. Agriculture, Food Systems, & Waste Management.

DRAFT

B. Projected Climate Impacts

Tumwater is exposed to many natural hazards, several of which are projected to be exacerbated by climate change in the coming decades.

Although Tumwater has laid out mitigation actions for high-risk hazards through the Thurston County Hazards Mitigation Plan, the mitigation actions laid out in the Hazards Mitigation Plan were not created through a climate lens. Further, traditional hazard mitigation tends to focus on infrastructure upgrades alone, neglecting social, behavioral, and institutional adaptation actions. All of these must be implemented in conjunction with infrastructure to effectively build resilience to climate change impacts.

Table CL-2 shows the expected climate projections for high and low greenhouse gas emissions.

Table CL-2. Tumwater Climate Projections, Low & High Emissions

Climate Projection	By 2100	
	Low emissions scenario	High emissions scenario
Average summer temperature in June-August	↑ 5.4°F increase	↑ 9.5°F increase
Summer maximum temperature	↑ 4.7°F increase	↑ 9.6°F increase
Number of hot days (humidex over 90 degrees)	↑ 29.1 days	↑ 58.2 days
Total annual precipitation	*no data*	↑ 5.1% increase
Intensity of extreme rainfall events (change in the magnitude of 2-year storms)	*no data*	↑ 14% increase
Percent change in the magnitude of 25-year storm	*no data*	↑ 25% increase
Peak streamflow	↑ 15% increase	↑ 14% increase
Return interval of 25-year peak streamflow	↓ 9.6 years	↓ 13.8 years
Likely sea level rise	↑ 2.17 ft. increase	↑ 2.67 ft. increase
Change in high fire danger days	↑ 7 days *(by 2040)*	↑ 10 days *(by 2040)*
Precipitation drought (likelihood of a year with summer precipitation below 75% of historical normal)	*no data*	↑ 38% increase
Total late summer precipitation July-September	*no data*	↓ 22% decrease
Percent change in April 1 snowpack	*no data*	↓ 100% decrease

Source: Climate Impacts Group Climate Mapping for a Resilient Washington Tool.

By 2050, Tumwater is projected to experience hotter temperatures, especially during the

summer months, with higher average temperatures and a greater number of days each year that are considered extremely hot.

Tumwater will also experience more frequent and more intense precipitation events, with no projected change in annual rainfall but less precipitation falling during the summer months. There will also be a reduction in winter snowpack and an earlier start to seasonal snowmelt, resulting in altered streamflow regimes.

Although Tumwater is not projected to experience drastic sea level rise in this period, Tumwater could begin to experience impacts on groundwater water quality due to saltwater intrusion or other climate-related impacts. There will likely also be some more direct flooding impacts due to sea level rise, especially at sites like the Historical Park that are adjacent to the tidally influenced Capitol Lake.

All of these projected impacts will lead to more frequent and more intense disaster events in Tumwater, including:

- More extreme heat waves.
- More frequent and severe urban and riverine flooding.
- A higher likelihood of wildfires and the accompanying risk of smoke.
- A higher likelihood of drought due to high temperatures and lack of summer rain.
- A higher risk of landslide activity due to heavier rainfall, saturating soils and wildfires removing supportive root structures.

Tumwater is also projected to experience an increase in vector-borne illnesses, pollen-related air quality issues, and other public health hazards.

C. Climate Adaptation Strategies

1) Types of Adaptation Strategies

The strategies prepared for the Climate Element include both reactive strategies designed to address the impacts of climate change that are already underway and proactive strategies that work to build long-term resilience.

Adaptation strategies are often classified into four typologies: behavioral changes, infrastructural and technological, institutional, and nature-based solutions.[11] To create a robust adaptation strategy, Tumwater needs to create a portfolio of actions that includes strategies across all of these adaptation types.

Behavioral adaptation includes strategies such as relocating away from hazards, making substantive changes to property to mitigate the risk of fire, heat, and other hazards, and shifting food and consumption practices. Infrastructural and technological solutions encompass any adaptation that involves building or strengthening physical infrastructure such as

[11] Berrang-Ford, L., Siders, A.R., Lesnikowski, A. *et al.* A systematic global stocktake of evidence on human adaptation to climate change. *Nature Climate Change.* **11**, 989–1000 (2021). https://doi.org/10.1038/s41558-021-01170-y

dams, wastewater systems, and capital assets. Institutional adaptation methods include the creation of policies, programs, incentives, and the like to guide and support adaptation action.

Finally, nature-based solutions focus on integrating the benefits and protections offered by natural systems into protection strategies, for instance using seagrass restoration to stabilize eroding shorelines. Nature-based solutions in particular offer co-benefits with mitigation goals, usually through increased carbon sequestration.

2) Passive Survivability

Some of the adaptation measures suggested for the Climate Element promote the idea of passive survivability. This involves building or upgrading facilities to be able to maintain a safe temperature for building occupants.

There are many complexities to navigate when building for passive survivability. Tumwater must first decide on definitions of survivability, specifically setting the lowest and highest allowable temperatures that a space can reach. To protect building occupants from extreme heat, the building must be well-insulated, provide airflow, and may even need to offer cooling using technology like heat pumps. Renewable energy like solar power that is connected to a battery system is also important to provide continuous power for cooling and heating systems in the event of a power outage.

Codifying requirements for passive survivability presents challenges at Tumwater level and would require advocacy for mandating code updates at the State level. Tumwater could also explore the viability of incentive programs to encourage new construction to incorporate recommended strategies for passive survivability. This is especially important for low-income and multifamily housing where residents typically cannot choose to make upgrades themselves.

DRAFT

Appendix A Foundational Documents

Table CL-3 identifies the foundational planning documents that form the basis for the Climate Element of the Comprehensive Plan.

Table CL-3. Foundational Documents for the Climate Element.

Plan	Description
Hazards Mitigation Plan for the Thurston Region (2024)	Outlines a multi-jurisdictional strategy to reduce the risks of the most destructive natural hazards such as floods, earthquakes, and wildfires that threaten communities in Thurston County. Includes a Tumwater specific appendix.
Thurston Climate Adaptation Plan (2018)	Climate Resilience Actions for Thurston County and South Puget Sound.
Thurston County Climate Mitigation Plan (2020)	Lays out a road map for continuing regional collaboration on reducing local contributions to climate change and actions that can help to achieve greenhouse gas reduction goals.
Clean Energy Transformation Act (2019)	The Clean Energy Transformation Act aims to transition Washington to a clean energy economy by eliminating coal-fired electricity by 2025, achieving 100 percent carbon-neutral electricity by 2030, and 100 percent carbon-free electricity by 2045.
Tumwater Urban Forestry Management Plan (2021)	Lays out goals and recommendations for sustainably managing Tumwater's urban canopy.
Tumwater Tree Inventory and Maintenance Plan (2024)	Outlines inventoried tree resources (distinct species compositions, age distribution, and condition).
Tumwater Comprehensive Plan – Transportation Plan (2025)	Outlines the transportation goals, policies, and strategies for the community. Aims to improve mobility, safety, and accessibility while promoting sustainable and efficient transportation systems.
Tumwater Comprehensive Plan – Conservation Element (2025)	Outlines natural resource land conservation and critical area protection.

Plan	Description
Tumwater Comprehensive Plan – Land Use Element (2025)	It outlines policies and guidelines for land use planning and development. Aims to promote sustainable growth, protect natural resources, and enhance community livability.
City of Tumwater Shoreline Master Program (2019)	Provides guidance for positive, equitable use and development of shorelines of the state in Tumwater while promoting community well-being, ecological preservation, and compliance with state policy
Tumwater Comprehensive Plan – Lands for Public Purposes Element (2025)	Details the public facilities and services planning for 20 years, including essential public facilities siting and expansion.
City of Tumwater and Thurston County Joint Plan (2021)	Tumwater and Thurston Country last amended the joint plan in 2021, and an update is expected in 2026. The Joint Plan guides future development in the unincorporated portion of Tumwater's urban growth area, ensuring a smooth transition from rural to urban development.
Olympia Climate Action Annual Report (2019)	The goals established a framework for climate-focused decisions, set a foundation for solar and green building community, created city staff culture of climate awareness, green Tumwater's fleet, and facilities, built foundation for climate-friendly infrastructure, and leveraged partnerships.
Puget Sound Energy Green Direct Program	Puget Sound Energy's Green Direct program allows government and commercial customers the ability to purchase 100 percent of their energy from a local, renewable energy resource that is cost-efficient.
Washington Clean Fuel Standard (2023)	The standard will reduce carbon pollution from transportation by decreasing emissions from the production and supply of transportation fuels. It will also provide an increasing range of low-carbon and renewable alternatives to improve air quality and decrease dependency.

DRAFT

1. Policy Analysis

A gap analysis was performed to evaluate the existing policy framework and to identify its strengths and weaknesses. The analysis focused on assessing policies in the areas of environment, economics, and community while also evaluating responses to various risks such as climate change impacts and natural disasters.

The analysis aimed to provide a comprehensive understanding of the current policy landscape, highlighting both effective areas and critical gaps and shortcomings in policies. The overall goal was to develop a more comprehensive and inclusive policy framework that effectively addresses diverse needs and challenges, thereby enhancing community well-being and ensuring long-term sustainability.

An extensive literature review compiled a total of 107 resources to explore climate planning and mitigation strategies. These resources covered a wide range of topics including:

- Forestry and urban green spaces.
- Transportation and air quality.
- equity and community involvement.
- Regulatory and policy frameworks.
- Hazard and risk management.

From this comprehensive collection, a detailed policy analysis focused on key plans to assess their content and relevance. 362 relevant policies were extracted from the 15 plans in Table CL-3.

The detailed policy analysis involved categorizing the reviewed resources into sectors, focus areas, and climate hazards to systematically evaluate their coverage and identify gaps. The categorization was as follows:

Sectors:

- Agriculture & Food Systems.
- Buildings & Energy.
- Cultural Resources & Practices.
- Economic Development.
- Ecosystems.
- Emergency Management.
- Health & Well-Being.
- Transportation.
- Waste Management.
- Water Resources.
- Zoning & Development.

Focus Areas:

- Climate Resilience.
- Climate Mitigation.
- Climate Equity.

Hazards:

- Drought.
- Extreme Heat.
- Flooding, Extreme Precipitation, & Sea Level Rise.
- Wildfire.
- Earthquake.
- Landslide.

DRAFT

- Snowpack Reduction/Snowstorms.

Conducting a thorough policy analysis was essential to understand the current stance on various policy areas. This detailed inquiry revealed several important findings. Firstly, there is a robust framework of policies addressing ecosystems, zoning, and development as shown in Figure CL-5.

Figure CL-5. Number of Policies by Sector, Policy Gap Analysis.

These existing policies underline a strong commitment to natural resource management and land use governance. However, the analysis has also revealed notable gaps in other areas. Specifically, there is a gap in policies related to cultural resources, practices, and economic

development. This indicates a need for more comprehensive strategies that integrate and support these important aspects of the community.

Moreover, while many policies prioritize climate resilience by aiming to safeguard the environment against the impacts of climate change, there is a noticeable gap in policies that address climate equity as shown in Figure CL-6.

Figure CL-6. Policies by Focus Area.

This gap suggests that, although Tumwater is preparing for climate-related challenges, the policies are not addressing the impacts on diverse communities equally and ensuring that all groups benefit from climate resilience efforts. Additionally, nearly all resilience policies originated from County-level.

Thus, this policy analysis underscores the importance of developing a more balanced and inclusive approach that not only fortifies Tumwater's climate resilience but also promotes equitable outcomes for all stakeholders.

DRAFT

Appendix B Engagement Results

1. In-Person Workshop

Across all focus groups, participants called for greater collaboration and engagement citywide, as well as a need to identify funding sources and provide financial incentive, safeguards, and subsidies to ensure equitable climate adaptation and mitigation.

a) Greenhouse Gas Reduction Focus Group

Key discussion themes included:

- Multimodal Transportation System Improvements: requested actions ranged from expanding public transit access, enhancing bike accessibility and walkability, reducing car dependence, and increasing Electric Vehicle charging capabilities.
- Sustainable Land Use: participants urged for preservation of green spaces and urban canopies, denser urban development, and elimination of minimum parking requirements.
- Energy: participants suggested measures that would improve energy efficiency in buildings and encourage renewable energy generation and use.

b) Resilience Focus Group

Participants highlighted several key issues they would like to have addressed in Climate Element policies:

- Equity & Environmental Justice: Building resilience in low-income, historically disadvantaged areas that are disproportionately impacted by climate change.
- Climate Hazards: Actions that will address issues like wildfire smoke, power grid interruptions, and drought.
- Sustainable Practices: Managing water resources for Tumwater's future communities through water conservation methods and integrating and expanding use of renewable energy sources.
- Urban and Land Use Planning: Improving connectivity, walkability, and bike infrastructure, implementing strategies to increase shade and mitigate urban heat islands, and managing Tumwater's projected population growth and housing needs sustainably and equitably.
- Wise Resource Management: Reducing reliance on resource-intensive industries and promoting and supporting sustainable businesses.

c) Governance Focus Group

Participants voiced several areas of concern and opportunity regarding City governance:

- Building Public Trust: Participants noted some wariness due to previous perceived failures to address community needs by Tumwater in past efforts, particularly highlighting skepticism of long-term residents.

DRAFT

- Improving Communication: Finding ways to communicate with diverse age groups and demographics continuously and effectively, including targeted outreach to youth and underrepresented groups
- Clarity and Transparency: Present community members with clear cost-benefit analyses of proposed actions and ensure Climate Element development is transparent and accessible.

2. Virtual Open House

The City hosted a virtual open house, in the format of an ArcGIS StoryMap with all the same information and questions that were presented at the in-person workshop. The virtual open house was open from August 15, 2024, to October 31, 2024. Results are as follows.

a) Equity

Figure CL-72. Climate Element Virtual Open House – Equity Map.

Click on the map to place a pin on areas you are concerned about in terms of pollution, contamination, and/or inequitable benefits (like tree canopy cover).

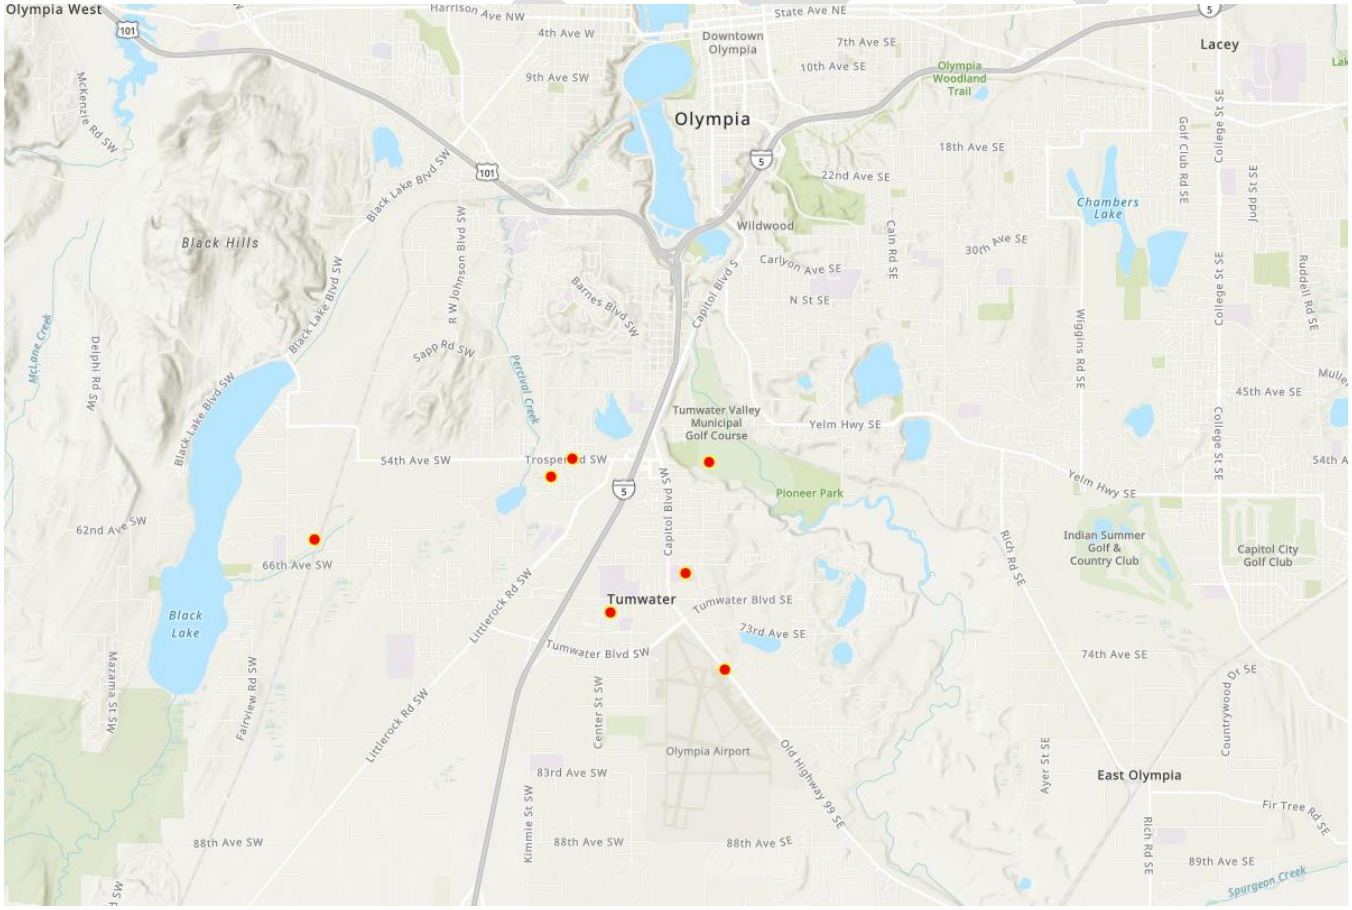


Table CL-4. Climate Element Virtual Open House – Equity Question.

What would you like Tumwater to do to address environmental justice issues and ensure that all residents have equal quality of life both before and after climate disasters?
Create programs and incentives that support resident access to clean energy, such as heat pumps, solar, and EV chargers. Include specific carveouts for low-income and elderly populations.
The ability to walk or roll around our community is a transportation method not dependent on income or on the presence of fuels or electricity. Having a fully accessible, walkable community will be resilient as well.
Sidewalks along Trosper Road and nearby streets are incomplete. Many older residents live in this area and need safe walking routes to get to the commercial area to the east.
Provide safe walking and cycling throughout the city. This is important to reduce emissions and pollution. It is also important so that people can move around if fuel becomes scarce, or some services are not accessible by car. It is also important that people who need to get to transit can walk safely to reach a bus stop. Transit cannot go everywhere, so that means that people need safe walking routes to and from their home and services and destinations.
I believe the City is in need of more cooling & heating centers for community members. This summer was relatively cool but investing in at least one other area in a different part of Tumwater to support heating & cooling for community members would be a great idea. I also really liked an idea I heard at the ASHHO event, which was to find a way to repurpose abandoned parking lots that become heat islands during extreme weather events. If these lots cannot be repurposed right away, maybe trees can be planted in the sidewalk areas that border these lots, to help shade the parking lots somewhat when it's really hot outside. Or maybe we could consider building simple structures that could provide shade over parts of certain heat islands. An empty parking lot on a busy road that had some sort of shade structure with a bench or two underneath it could help a severity of heat coming from that asphalt and also give passerby a place to sit in the shade on hot days.
My concern is putting warehouses near schools. The Tumwater planning dept. should not allow this. Schools need better air quality nearby, not trucks going to and from large Port of OLY. warehouses. My concern is water quality. The Port allowed a Coca Cola plant to lease a parcel in Tumwater. My concern is allowing an industrial plant to bottle our water to be shipped out of state. I do not think we have enough scientific evidence that Tumwater has enough available water for the next 20-25 years to do this. The town of Lacey has water restrictions. This is a big deal. Do we have enough water for the next 40 years of growth? We should not allow industry to take our water!

What would you like Tumwater to do to address environmental justice issues and ensure that all residents have equal quality of life both before and after climate disasters?
Protect the Davis Meeker Garry Oak! The Davis Meeker Garry Oak is sacred to several Coastal Salish Tribes, as well as many Tumwater residents. The Davis Meeker Garry Oak is located on the historic Cowlitz Trail (parts of which became Old Highway 99) and is fairly close to the site of the Bush Family Farm. The City of Tumwater needs to protect the Davis Meeker Garry Oak as one of the only visible reminders of the Cowlitz Trail, and our shared history. The Davis Meeker Garry Oak provides important habitat for birds, as well as sequestration of atmospheric carbon. Too many large trees have been removed in Tumwater already.
There are many mobile home parks in Tumwater. Most of us senior citizens do not have the money to add insulation, although we are exposed to the increase in temperatures more rapidly than most stick-built homes. Help us upgrade the mobile homes we live in. Our rent is being increased annually and on a reduced fixed income leaves little money for improvements.
In a wildfire or incident, how would large numbers be able to exit on the present two- lane roads? Are there enough fire stations, equipment & responders? Would the city be able to expedite building permits to rebuild?

b) Greenhouse Gas

Table CL-5. Climate Element Virtual Open House – Greenhouse Gas Questions.

What is your lived experience with climate change? Does it change seasonally?
I don't really know - I try to rely on data.
I wonder, when it gets hot in the summer, or wet in the winter, whether climate change is showing up, or whether it's just local variation.
I have experienced the heat events but fortunately my health has not been impacted. I also have noted the increase in smoke events.
Summer wildfires are much more frequent in this area compared to when I was a kid growing up here. Summers are hotter.
Our rivers and streams are low. We have less rain. Our thick forests are super dry in the summer. We could have a massive forest fire (my sister went through this in another town, her area was wiped out by fire). We must be aware of how much water we remove from the water table. We must not allow industry into our area that will contribute to lowering the water table.
I purchased a portable a/c for my apartment about 4 years ago to help with the heat. But I am not convinced still that it is related to climate change. I believe the earth goes through cycles like this, it just wasn't tracked 100s of years ago. Tracking temperatures has only been happening for the last 150 years or so.
I am noticing longer hotter and drier summers.

What is your lived experience with climate change? Does it change seasonally?
Aware of increased heat in summer & more snow days in winter. We are less active in summer due to heat and more careful of road conditions in winter. Have been impacted by smoke from fires in other areas.

Have you made any changes to your home or routine due to climate change or its effects?
I haven't made any changes, but I was pleased to buy a home with a heat pump since it gets pretty warm during the summer.
We installed a single split heat pump in the back of our house; replaced our old gas water heater with a new heat pump water heater; went from our plug-in hybrid to a full battery electric; put in a 240 charger; and signed up for Puget Sound Energy's community solar and their time of use rate program. We don't eat red meat anymore (except for occasional bacon and for meat on pizza); We don't fly for vacations.
Went to ductless system from burning wood for heating house. Electric bill has gone up but overall less work/time to heat house.
Yes, we purchased a window-install AC unit. (heat pump) to prepare for heat events. This was the best choice for us since retrofitting our entire home would be expensive. We also have air filters now.
Yes, I've made many changes, but I've also not been able to make all the changes I'd like to because of budget constraints. I drive an EV, I bike to work in the warmer months, I eat a mostly plant-based diet, I've taken my investments out of fossil fuels, and I'm active in local climate groups.
Air conditioning is more necessary for quality of life than it used to be in this area. I try to commute by bike as much as I can to reduce my personal carbon emissions.
We bought 23 solar panels to our house. Our electric bill is lower now. We travel less, so less Greenhouse gas (GHG) emissions.
I try to recycle as much as possible.... but because it is a good thing to do. Not because of climate change.
In the fourteen years I have lived here, I have had to add AC to my home due to summer heat in the last five years. I am sensitive to heat and have to abstain from participating in outdoor activities or un-airconditioned locations on hot days. In my work, I am required to work outdoors but have the flexibility to choose when I can work outdoors. My schedule has had to change due to high heat days.
Have added a portable air conditioner. Have had to adapt a homemade window screen to deter smoke and wear masks outside.

What greenhouse gas mitigation would you like to see improved, enhanced, or created if it doesn't exist now?
Require landlords to implement pollution reduction and safety upgrades on their rental housing. Prevent them from undue increases in rental fees. Prevent new development in tree areas - protect trees from removal.
I would like to talk more about the buildings portion - how can that be reduced?
More community education and outreach about the issues, and opportunities for individual action, available incentives, household planning for gradual electrification. Education and outreach about consumption emissions. Add building recommissioning to the actions in the regional climate plan. EV group purchasing program.
Time limits on car charging stations, some public stations (city parking lot) have cars parked in them all day even though they are fully charged in less than 2 hours. This leaves limited charging space for others to use.
Stop allowing building of homes and services that are not near already established services and transit. We need to grow with density in order to support efficient transit and allow for non-motorized travel. This is an action in the regional Climate Plan. Spreading out beyond existing services is going to increase emissions and miles driven. It also creates inequitable and unaffordable housing which requires ownership of a car. Lowering emissions means we live closer together and drive much less.
Something that improves the lives of poor and working class people. More bike and ped infrastructure in Tumwater - make it not only safe but inviting for people to get out of their cars.
Better community planning that reduce sprawl and car-dependency; improved non-motorized transportation options/infrastructure; increased public transit reliability and awareness; higher cost to GHG-emitting modes.
Do we have enough electric charging stations? I doubt it. We bought an electric vehicle. WE NEED MORE ELECTRIC CHARGING STATIONS!
Any improved mitigation would be appreciated.

Take a look at the committed goals and actions identified in the Thurston County Climate Mitigation Plan. Do you feel there are goals and actions missing? Are the goals and actions identified in the TCMP still what the community wants to commit to?
We continue to float along about the 50 percent of local reductions that the plan says are supposed to come from afforestation. Creating 37,000 acres of new forest seems totally unrealistic. This requirement doubles if we use the estimates for sequestration TRPC adopted in its white paper, even though the ICLEI methodology they said they were using actually recommends using local sequestration estimates when those are available, which is what the plan does. We're also going to get a significantly larger reduction from recent State legislation that the plan estimates). We ought to have a plan that's based on facts and realistic estimates, even if that means we have to recognize that we can't make the reductions we need with our local capacities alone.
I feel like there definitely could have been a goal for increasing the amount of space available for walking and biking. I feel like we should invest more money into improving areas of town to be more walkable and bikeable. Improve spaces to be used by modes of transportation that don't burn fossil fuels. I also don't see anything mentioned about improving the structures of our buildings to waste less energy.
Yes - please continue to commit to the TCMP! And take the actions in the Plan. There are plenty of actions to take. Don't think that doing a handful is enough. We need to do almost all of the actions in order to save our planet.
Regulating large polluters in whatever ways the City can
YES, we want to commit to lowering our GHG emissions. Do we have enough electric vehicle charging stations in Tumwater? NO! We have an electric car. We need more charging stations.

c) Resilience Mapping: Flooding

No responses.

d) Resilience Mapping: Heat

Table CL-6. Climate Element Virtual Open House – Resilience Mapping: Heat Questions.

What has been your experience with extreme heat in Tumwater?
Living here during heat waves and/or heat domes. Many housing units don't have air conditioning, especially rentals.

What has been your experience with extreme heat in Tumwater?
During the June 2021 heat wave I experienced heavy sweating, heart racing and flushing. It felt like my brain was in a fog and I felt weak and fatigued. I recognized these symptoms as the symptoms of heat exhaustion and went to the mall to escape the heat for a while. We did not have air conditioning in our home, and as there was almost no wind, opening the windows couldn't help. Our house got hotter than it was outside. I am 71 years old, so such heat is especially dangerous for my health. After this heat wave we contracted to install a heat pump in our house. This has made our life much more comfortable in the last few years, and when the next heat wave comes, we will be protected. I was very concerned for my neighbor who lives alone and is much older and quite frail and does not have air conditioning. I have told him that we will check on him in future heat wave, and he can shelter with us. I worry about the health of so many other people who are similarly at risk.

Have you had access to all of the resources you needed during an extreme heat event? Is there anything you would like to have available to you in the future?
Portable a/c units or heat pumps that I could rent or borrow during heat events
We did not have any air conditioning for the June 2021 heat wave and suffered for not having what we now consider essential with our changing climate. We have lived in Thurston County for 36 years and never had air conditioning until we installed our heat pump after this heat event. Many of our friends are in the same position. We need a robust program to help our residents have a safe home. I would not want to go to a cooling shelter, and Tumwater's shelter is only available during the daytime and would be very crowded. People need to be able to protect themselves at home.

e) Governance

Table CL-7. Climate Element Virtual Open House – Governance Questions.

What does a resilient Tumwater look like to you?
Great looking plan.
People can walk and cycle safely without needing to own a car. Homes and services are located so that people can access services and schools without driving. There are no homes or businesses in the areas where flooding will happen. A transit system is in place along major corridors. That transit provides access to other communities and helps move people along Tumwater corridors.
Improved transit and non-motorized connectivity; emphasis on density and mixed-use zoning; protection and restoration of our precious natural resources; restoration of derelict properties
A resilient Tumwater would protect the basic needs of the community, including clean water; available housing with limited restrictions for homeowners who want to add ADUs to assist in that effort; encouragement of business growth; and clean and repaired streets.

What do you hope will be true about Tumwater in the future?
I would like to see all the warehouse roofs covered with solar panels. I recommend that there be a requirement for all new warehouse construction, otherwise, that is just wasted real estate, missing the opportunity for developing the backbone of a distributive electric grid. Better to do it there than on agricultural land or forested land. More stringent building codes for renewable electrification across the board. ... EV-ready, etc.
People have their basic needs met and they are happy to live in Tumwater. There are electric vehicles on our streets, but there is not congestion and people who walk and cycle can do so safely.
Improved transit and non-motorized transportation; significant decrease in per capita vehicle miles traveled; higher density housing and mixed-use zoning.
That it will be a city that is proud of its beauty and inclusion.

Are there areas within the city you are most concerned about regarding climate change impacts? If so, what are those areas?
Areas near Deschutes River and creeks... all vulnerable to heavier rainfall amounts as the climate changes.
Not so much areas, but income-levels.

How would you like the city to engage with you around climate change?
Having staff out in the community is good.

What could the City do to improve your trust in it/them?
The City will improve my trust in them by following through to actually take the actions in the Climate Plan. Moving forward with many actions, not just a few. Be open about challenges.

How would you like to see equity addressed in the climate element?
It is not equitable to zone areas for housing or to place low income housing where the people who live there cannot walk or cycle for their needs. Denser areas of housing mean that fire, utilities, mail, deliveries, police, etc. cost less to provide and can respond more efficiently. Schools need to be located amongst the population who will attend the school. And those students should be able to walk to school. This all points to stopping sprawl and developing as a close-knit denser community. That actually is more equitable for everyone.
Reduce future harm

What could the City do to improve your trust in it/them?
No responses

Have you felt distrust or a lack of transparency in any of your interactions with the City?
No responses

Are there current community equity efforts you know about that can be built upon for climate action?
No responses

Are there communities in the city you are particularly concerned about regarding climate change impacts? If so, who are those communities?
Young people who will inherit the world in the condition we leave it.
Poor and working class folks
Tumwater has a significant elderly population who are vulnerable to heat-related illness and many of whom depend on transit or pedestrian routes. Tumwater needs a complete non-motorized network with good tree canopies.

f) Closing Survey

Table CL-8. Climate Element Virtual Open House – Closing Survey Question.

If you have any questions or comments related to the Comprehensive Plan Update and/or Climate Element for City staff, please provide them below.
What is going to happen to the old brewery project when the Deschutes returns to an estuary, tides reach up the river, and sea level continues to rise?
What are you doing to change business as usual to reduce GHG's, increase HOV's reduce water usage, replant forests that are burning up releasing more carbon into the air?

Appendix C Equity-Focused Goals, Policies, & Actions

1. Overarching Climate Goals

Goal CL-2 Advance environmental justice by providing all Tumwater community members with an equitable opportunity to learn about climate impacts, influence policy decisions, and take actions to enhance community resilience.

Policies and Implementation Actions	
CL-2.1	**Work with community based organizations and community organizers to conduct intentional outreach with frontline communities to create opportunities for equitable engagement in climate adaptation, mitigation, and education.**
CL-2.1.1	Build and support partnerships with existing community based organizations that have the capacity and existing relationships needed to convene diverse coalitions of community members and collaboratively empower their communities to develop and implement climate resilience and mitigation actions and work to address underlying disparities that impact these communities.
CL-2.1.2	Create and implement tailored outreach and education initiatives that will empower frontline communities to respond to climate change threats.
CL-2.1.3	Attend pop-up events with existing community based organizations and hold focus groups, office hours, and other events to build trust in both group settings and one-on-one with Tumwater's frontline community members.
CL-2.1.4	Conduct outreach and listening sessions in frontline communities to understand existing needs and opportunities and to educate on projected climate impacts.
CL-2.2	**Prioritize the people of Tumwater and their needs, values, and goals in all future climate planning efforts by developing and implementing all adaptation and mitigation tasks in collaboration with equitable representation from all Tumwater communities.**
CL-2.2.1	Prioritize recruiting frontline community members most impacted by climate change when forming any Tumwater working group, committee, or task force on climate-related issues. Strive to form all working groups and committees with equitable representation.
CL-2.2.2	Plan and conduct community engagement activities to co-create all policies and tasks with the community and to share new plan information upon completion and update throughout implementation.
CL-2.3	**Develop programs and resources to promote equitable financial access to climate resilience and mitigation activities.**
CL-2.3.1	Identify funding sources for subsidies for frontline communities to offset costs associated with climate impacts and mitigation actions, which could include potential cost increases associated with changing to non-fossil-fuel energy sources, increased energy usage to maintain livable indoor temperatures, and home hardening projects.

Goal CL-3 **Address that changing weather and climate patterns driven by human-generated emissions will affect every aspect of life in Tumwater, and plan for impacts such as increased heat, wildfire, and flooding while working to reduce local emissions.**

Policies and Implementation Actions
CL-3.1 Assess Tumwater's vulnerability to climate change.

CL-3.1.1 Conduct a comprehensive Vulnerability Assessment that considers climate impacts to communities, physical assets, and Tumwater operations and services, including impacts from extreme heat and flooding.

2. Greenhouse Gas Reduction Sub-Element Goals

Goal CL-4 **Reduce greenhouse gas emissions from all building types through energy conservation measures prioritizing the deployment of financial resources and programs that help finance or subsidize improvements across Tumwater.**

Policies and Implementation Actions
CL-4.2 Reduce energy use in existing residential buildings.

CL-4.2.2 Explore the feasibility of incorporating Home Energy Score disclosures for all types of rental dwelling units at the time of application to allow prospective tenants to make informed decisions.

CL-4.2.5 Explore the feasibility of requiring baseline levels of energy efficiency as part of building permit review.

Goal CL-5 **Expand the use of on-site renewable energy technology (e.g., solar photovoltaics, battery storage, etc.) across all building types through providing funds, code changes, and educational programs.**

Policies and Implementation Actions
CL-5.1 Increase the production and storage of local renewable energy.

CL-5.1.4 Support existing community solar initiatives from Olympia Community Solar and Puget Sound Energy by providing educational resources, promoting programs, and identifying opportunities for Tumwater residents to participate.

Goal CL-6 Reduce greenhouse gas emissions by making it easier for people to use and shift to low- or zero-carbon transportation modes through policy, programming, and regional collaborations.

Policies and Implementation Actions

CL-6.1 Promote increased use of active forms of travel such as bicycling, walking, and other nonmotorized options.

CL-6.1.2 Prioritize active transportation in coordination with the Transportation Plan by investing in accessible and attractive street-level elements such as seating, shaded sidewalks, ADA ramps, enhanced signals and crossings, and protected bike lanes.

CL-6.1.3 Explore developing a rebate program for community members who wish to buy a bicycle or electric bicycle, with priority for low-income residents or households with greater barriers to vehicles.

CL-6.1.4 Continue support for Intercity Transit's Walk N Roll program that focuses on a walking and bicycling incentive program with safety education for families, in coordination with Tumwater School District.

CL-6.1.5 Update the Transportation Plan and Capital Facilities Plan to prioritize active transportation. Set goals and plans for shifting to active transportation, like developing car-free corridors in commercial and mixed-use areas to encourage mode shift.

CL-6.2 Increase adoption of electric vehicles.

CL-6.2.2 Explore providing an incentive and/or technical assistance program to support installing electric vehicle charging at existing rental housing.

CL-6.2.3 Add free and publicly accessible Level 2 electric vehicle charging at as many Tumwater properties as feasible.

Goal CL-7 Reduce vehicle miles traveled by using permitting, regulatory, and other land use tools to promote multimodal transportation options and the use of public transit.

Policies and Implementation Actions

CL-7.1 Continue land use policies that support increased urban density and efficient transportation networks and reduce urban sprawl.

CL-7.1.2 Increase the number of 15-minute neighborhoods (i.e., walkable environment, destinations that support a range of basic living needs and a residential density), in coordination with goals outlined in the Land Use Element.

CL-7.2 Increase efficiency of the transportation system.

CL-7.2.3 Work with Intercity Transit to identify and implement programs that help people move to and from transit, reduce greenhouse gas emissions, and use street-level

Policies and Implementation Actions	
	improvements to connect neighborhoods without the population to support fixed routes transit options. Potential programs explored should include an electric vehicle car-share program. Tumwater will engage homeowners' associations for representation and feedback. Expansion of service will include an analysis of climate impacts to prevent the program from resulting in an increase in greenhouse gas emissions.

Goal CL-8 **Strengthen existing policies and regulations to deploy and enhance natural carbon solutions that are ecosystem-appropriate, store carbon, and offer co-benefits such as pollution reduction, wildlife habitat, and climate resilience.**

Policies and Implementation Actions	
CL-8.1	**Preserve tree canopy, native prairie habitat, and support habitat restoration and conservation to sequester carbon.**
CL-8.1.1	Develop and implement a coordinated reforestation and afforestation program guided by the Urban Forestry Management Plan with goals and policies to support stormwater management. Consider how existing or future tree canopy can support stormwater management and water quality improvements in receiving waters. Include goals for maintaining or increasing canopy in frontline communities.

3. Resilience Sub-Element Goals

Goal CL-9 **Design, plan, and upgrade buildings and energy infrastructure to accommodate renewable energy opportunities, keep the community safe, and withstand and recover from extreme weather and natural hazards worsened by climate change.**

Policies and Implementation Actions	
CL-9.1	**Require that planned facilities, utilities, and infrastructure projects and existing vulnerable sites be built or hardened to avoid or withstand climate impacts, including extreme heat, extreme precipitation, and sea level rise.**
CL-9.1.3	Identify potential funding sources to develop and maintain a grant program that will enable affordable housing development projects to bury new power lines and associated infrastructure as required, or to make more resilient to climate impacts where burial is not feasible.

Policies and Implementation Actions

CL-9.4 Encourage property owners to increase the resilience of existing buildings to natural hazards and extreme weather worsened by climate change.

CL-9.4.3 Develop and maintain a rebate program for low-income residents who do not qualify for weatherization assistance through the Community Action Council or whose dwellings are considered vulnerable, such as manufactured homes, to weatherize their homes against extreme weather.

Goal CL-10 Increase preparedness for acute climate impacts and improve the resilience of Tumwater's people and systems against climate hazards.

Policies and Implementation Actions

CL-10.1 Improve community outreach on and response capabilities for climate health and hazard issues, prioritizing frontline communities to address economic, social, and health disparities.

CL-10.1.1 Collaborate with community based organizations to build a volunteer network to develop and manage a vulnerable population database that includes community members who require aid and/or check-in calls during and after emergencies. This database can be built on the existing Lifeline Program members.

CL-10.1.2 Transition management of the vulnerable population database to Tumwater and develop a long-term strategy to keep the database up to date and oversee its use during emergencies.

CL-10.1.6 Explore developing a neighborhood-scale capacity grant or other assistance program to support neighborhood scale resiliency, disaster preparedness, and/or resource hubs.

CL-10.2 Develop resources to mitigate the risks posed by extreme heat in coordination with regional partners.

CL-10.2.1 Implement the Thurston County Extreme Heat, Emergency Response, and Illness Prevention Plan.

CL-10.2.2 Preserve and expand tree and shade cover to reach the 2040 goal of 40% recommended in the Urban Forestry Management Plan to reduce urban heat.

CL-10.2.3 Support the work of community based organizations and regional agencies creating and implementing resilience hubs.

CL-10.2.4 Explore feasibility of implementing and maintaining a program to distribute portable cooling units and install heat pumps, prioritizing households with residents most vulnerable to extreme temperature events such as renters and low-income seniors.

CL-10.3 Increase regional wildfire resilience, preparedness, and response capabilities in Tumwater.

CL-10.3.3 Help facilitate grant funding for low-income community members to follow recommended changes to their homes and properties to lower their wildfire risk.

Policies and Implementation Actions

CL-10.4 Collaborate with regional partners to develop resources that address projected increases in risks and impacts associated with climate change.

CL-10.4.1 Develop and share guidance for navigating post-disaster mental health and social resources, translated into multiple languages.

CL-10.5 Improve community resilience, health equity, and environmental justice by striving to ensure that all community members can use active transportation to access public green spaces within half a mile and connected by sidewalks or protected walkways.

CL-10.5.1 Utilize data from the Trust for Public Land and from community outreach efforts to find any gaps in equitable access to public green spaces.

CL-10.5.2 Engage community members who lack equitable access to green spaces to determine how they would like to improve their access. Options can include better transportation options, addition of new green space, and improved safety of active transportation routes, among others.

CL-10.8 Develop programs that enable and empower community members to protect themselves from poor air quality.

CL-10.8.1 Collect data to determine how many Tumwater community members are vulnerable to poor air quality and the neighborhoods in which these residents live, using both quantitative and qualitative data and from community outreach efforts. Use collected data to set target thresholds for shelter occupancy and locations and air conditioner/heat pump and air filtration distribution programs.

CL-10.8.2 Develop a program to distribute personal protective equipment to populations vulnerable to poor air quality.

CL-10.8.3 Identify facilities that serve high-risk populations to create incentive programs encouraging infrastructure updates for clean indoor air. Updates should include HVAC system improvements.

CL-10.9 Work with Thurston County Emergency Management to improve access to the resources needed for community members to shelter in place or to adequately reach temporary shelter.

CL-10.9.1 Coordinate with other agencies and jurisdictions to provide more cooling centers with 24-hour capacity. Offer 24-hour capacity for all of Tumwater's heat-vulnerable residents including seniors, low-income, and houseless individuals. Shelter locations should be sited equitably throughout Tumwater, with priority for opening locations near the highest concentrations of heat-vulnerable residents.

CL-10.9.2 Coordinate with local businesses, community centers, and other neighborhood hubs to assess the potential of using these spaces as cooling centers. Provide sites that agree to participate in this program with resources detailing how to set up an equitable and functional cooling center.

CL-10.9.3 Develop outreach programs or materials to increase awareness and education on individual emergency preparedness (e.g., Two Weeks Ready).

Policies and Implementation Actions

CL-10.10 Increase language accessibility of emergency services, plans, and resources.

CL-10.10.1 Utilize on-call contracts for language interpretation and translation services, including American sign language, to translate all emergency resources and plans.

Goal CL-11 Preserve, protect, and sustain cultural sites and resources in alignment with the values and needs of Tribes, traditional stewards, and frontline communities.

Policies and Implementation Actions

CL-11.1 Enhance partnership between the Tribes and Tumwater, integrating Tribal expertise, opinions, and values into climate planning efforts, projects, and programs.

CL-11.1.1 In collaboration with the Tribes, develop guidelines and standards for incorporating Traditional Ecological Knowledge into Tumwater programs and planning efforts to adapt to climate change impacts.

CL-11.1.2 Integrate the Tribal Stewards Curriculum or an alternative approved by Tribal representatives into regular Tumwater training schedules.

CL-11.2 In accordance with Tribal treaty rights, protect, enhance, and restore ecosystems and culturally important consumptive and non-consumptive resources including foods, medicinal plants, places, and materials that could be adversely impacted by climate change.

CL-11.2.1 Work with local partners, especially representatives of the Tribes, to facilitate a native plant nursery and seed bank to support long-term ecological restoration and foster continued access to culturally significant plants.

CL-11.2.2 In collaboration with the Tribes, identify consumptive and non-consumptive resources that will be adversely impacted by climate change.

CL-11.2.3 In collaboration with the Tribes, develop and implement a plan to protect, enhance, restore, and/or preserve cultural resources that have been identified as threatened by climate change.

CL-11.2.4 Collaborate with tribes to provide access to foraging opportunities including but not limited to camas, evergreen huckleberry, bog plant species, and cedar.

CL-11.3 Collaborate with the Tribes to prioritize the preservation of archaeological sites and traditional cultural properties that are vulnerable to climate impacts.

CL-11.3.1 Request recommendations from the Tribes for actions Tumwater can take to preserve historic sites and cultural properties.

CL-11.3.2 In collaboration with the Tribes, develop guidelines for protecting, enhancing, and restoring affected historic sites and cultural properties.

Goal CL-12 **With climate, growth, and environmental changes in mind, identify and elevate the protection of key habitats, ecosystem services, and wildlife corridors.**

Policies and Implementation Actions	
CL-12.1	**Manage Tumwater's urban forest in line with the Urban Forestry Management Plan and current climate projections and guidance.**
CL-12.1.2	Protect and enhance the climate resilience of urban forests by implementing the Urban Forestry Management Plan. Prioritize implementation of Urban Forestry Management Plan actions that provide benefits for frontline communities.

GOAL CL-13 **Promote land use and development decisions that support compact urban development and Tumwater-wide resilience, including a resilient local economy.**

Policies and Implementation Actions	
CL-13.2	**Form a working group to secure Tumwater's economic resilience regarding climate impacts.**
CL-13.2.4	Form partnerships with workforce development organizations to provide services and resources to Tumwater community members that support workers and local businesses affected by climate change.
CL-13.5	**Encourage the location of new development in areas where exposure to climate hazards is low and ecological impacts are minimized.**
CL-13.5.1	Develop design guidelines for climate-resilient multi-use development. Guidelines should require residential development to be designed for passive survivability under future climate projections.

Goal CL-14 **Strive to create a local transportation system, including infrastructure, routes, and active travel modes, which fosters connectivity and can withstand and recover quickly from climate impacts.**

Policies and Implementation Actions	
CL-14.1	**Improve street connectivity, transit accessibility, and walkability, including sidewalks and street crossings, to ease emergency evacuation.**
CL-14.1.3	Work with Intercity Transit to expand their transit program that provides evacuation aid to community members who do not or cannot drive, utilizing the vulnerable population database (CL-10.1.2).

Policies and Implementation Actions
CL-14.1.4 Assess current transportation network and transit options to identify barriers to accessibility and develop a plan to address gaps for all abilities and accessibility supports.
CL-14.4 Facilitate quick recovery of the whole multimodal transportation system after disruption from disasters or extreme weather events.
CL-14.4.2 Prioritize infrastructure needed for the recovery of Intercity Transit in the aftermath of an extreme weather event.

Goal CL-15 Protect and improve water quality and availability.

Policies and Implementation Actions
CL-15.2 Improve Tumwater's drought resilience through water reclamation and conservation measures, drought-tolerant landscape design, and advocacy.
CL-15.2.5 Advocate at state level to prioritize using water resources in alignment with public interests.
CL-15.3 Develop and implement a comprehensive drought resilience strategy that factors in projected climate impacts and sets action levels for different drought stages.
CL-15.3.1 Conduct outreach to understand current water resource needs (i.e., water-reliant livelihoods).
CL-15.3.2 Draft measures to protect access to water availability at a fair rate for low-income residents and residents whose income relies on water.

Goal CL-16 Expand local food justice to address climate impacts and increase access to nourishing, affordable, culturally appropriate, and climate-friendly foods while expanding local use of composting.

Policies and Implementation Actions
CL-16.1 Improve local food justice through collaboration, education, and advocacy.
CL-16.1.1 Implement the Food System Plan, updating it periodically as necessary.
CL-16.1.2 Identify relevant stakeholders who can further sustainable, climate-adapted, and equitable food distribution in Tumwater.
CL-16.1.3 Explore opportunities for the community to provide and engage in local and sustainable food production and consumption, such as farmers markets and community gardens.
CL-16.1.6 Collaborate with community members to identify culturally important foods and develop strategies to secure access to these, incorporating strategies into an update to the Food System Plan.

Policies and Implementation Actions

CL-16.3 Expand consistent access to food for Tumwater community members.

CL-16.3.1 Coordinate with the Food Bank to expand access to food assistance services.

CL-16.3.2 Conduct community outreach to find gaps and barriers in consistent access to nutritious food.

DRAFT

1. Introduction

A. Background

The Conservation Element is part of Tumwater's Comprehensive Plan. It was created to meet the State Growth Management Act (Chapter 36.70A RCW) requirements to identify and protect critical environmental areas and valuable natural resources.

Tumwater's Vision, Mission, and Belief Statements that provide overarching direction for the future of Tumwater are found in the Comprehensive Plan Summary.

The Conservation Element aligns and is consistent with the other elements of the Comprehensive Plan.

Part 1 – Goals Policies, and Implementation Actions establishes Tumwater's goals and policies to set forth a direction to identify, protect, and conserve critical environmental areas and valuable natural resources in Tumwater.

The goals and policies of the Conservation Element are guided by the state Growth Management Act and the Thurston County-Wide Planning Policies and the vision of a Tumwater that protects and enhances natural resources and the environment. The Element's goals and policies are coordinated with the other Elements and regional plans.

The Conservation Element's goals and policies are the policy basis for the draft implementation actions in Conservation Element and those future actions that will be developed over the next 20 years which will be the foundation for Tumwater's annual work programs to address natural resources and the environment.

Part 2 – Technical Information provides an analysis of natural resource lands appropriate to Tumwater and its critical areas to support the twenty-year growth projections for Tumwater.

B. How to Read this Part of the Element

In Part 1, Chapters 2 and 3 discuss the Conservation Element's connection to the goals of the state Growth Management Act and the Thurston County-Wide Planning Policies.

Chapter 4 presents each goal with an explanation of how to read the tables and then presents each of Tumwater's conservation goals in detail with an explanation of the importance of each goal.

Appendix A contains the draft implementation actions, which are intended to be a source of annual work program items that serve to implement the goals and policies of the Conservation Element.

The annual work programs will further refine the implementation actions prior to their being put into practice. It is expected that implementation actions will be further amended, added, or subtracted as needed over the course of the 20-year Comprehensive Plan as new opportunities arise to meet the intent of the Conservation Element's goals and policies.

DRAFT

2. Growth Management Act – Element Goals

Chapter 36.70A RCW requires that Tumwater show how the Conservation Element meets the relevant planning goals contained within the Act. The following is a listing of the two applicable goals for the Conservation Element, and an analysis of how the Element addresses these goals:

8. ***Natural resource industries.*** *Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands and discourage incompatible uses.*

The Conservation Element has specific guidelines and policies that ensure the viability of natural resource industries and activities. Additionally, the Conservation Element ensures the viability of natural resource industries in Tumwater through the identification of such lands in the Conservation Element text and maps.

While Tumwater has limited natural resource lands as defined by the Growth Management Act, it does have mineral resources, forestry, and agriculture lands. Since these parcels are within Tumwater, it is difficult to determine their long-term significance. Tumwater supports urban agriculture with goals, policies, and implementation actions.

10. ***Environment.*** *Protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.*

The state legislature updated the Growth Management Act environment goal in 2023 to require enhancement of the environment. The Conservation Element contains specific policies relating to air and water quality, water availability, and protection and preservation of critical areas and addresses how to enhance the environment.

If conflict occurs in the implementation of policy and development regulations, the priority of protecting critical areas will be superior to other uses of natural resources.

DRAFT

3. County-Wide Planning Policies

The Growth Management Act requires that Tumwater's Comprehensive Plan be consistent with Thurston County's County-Wide Planning Policies, which were last amended in 2025.

The following is a list of the relevant policies that apply to this Element of the Comprehensive Plan. All County-Wide Planning Policies are adopted as Appendix B to the Comprehensive Plan. The relevant sections of the County-Wide Planning Policies to this Element are cited below.

II. Urban Growth Areas

The resource land and critical area chapters in the Element describe what kinds of development are compatible with the resource or area that chapter covers.

III. Promotion of Contiguous and Orderly Development, Provision of Urban Services, and Protection of Rural Areas

The critical aquifer recharge area policies in the Element support this policy.

VII. Economic Development and Employment

Urban agriculture is discussed in the Element. The critical areas chapters address the protection of crucial areas for both environmental and public health reasons.

X. Environmental Quality

The Conservation Element is based upon the theme of the importance of natural systems and resources to human uses. The portion of the Element related to water resources cover the issues surrounding the balance between meeting future needs for water and protecting water resources.

DRAFT

4. Element Goals and Policies

A. How to Read These Tables

The Conservation Element's goals and policies are not in priority order.

The Conservation Element's goals and policies are associated with one of the three areas of conservation goals:

1. Overarching Environmental Goals
2. Natural Resource Areas Goals
3. Critical Areas Goals

Appendix A provides a list of the draft implementation actions by goal and policy that will be considered when developing annual work programs for implementing the Conservation Element's goals and policies.

1) Department Leads

As noted in the tables below, implementation of the Conservation Element's goals and policies are associated with four different Tumwater departments:

CDD	Community Development Department
PRD	Parks, Recreation, and Facilities Department
TED	Transportation & Engineering Department
WRS	Water Resources & Sustainability Department

2) Period

Each of the Conservation Element's policies is associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

B. Overarching Environmental Goals

Goal C-1 Recognize the significant role played by natural features and systems in determining the overall environmental quality and livability of Tumwater.

Natural features and systems perform key environmental functions that enhance the livability of Tumwater and protects its residents from hazards.

Policies		Lead	Period
C-1.1	**Support active measures to protect and enhance Tumwater's natural environment.**	**CDD**	**Term of Plan**

DRAFT

Policies		Lead	Period
C-1.2	**Use adopted plans to inform critical area policies, regulations, and implementation actions.**	CDD WRS	Term of Plan

Goal C-2 Promote conservation of natural resources and the protection of the environment in cooperation with residents, property owners, other jurisdictions, and tribes.

Natural resources are the building blocks to produce all the things we need. Some resources need Tumwater's protection and management to ensure they can continue to provide materials and services into the future.

Human activity has a large impact on the environment, changing the way the landscape meets the needs of others. Collaboration is key to ensuring that everyone's needs can be met in the future.

Policies		Lead	Period
C-2.1	**Support education programs in the community that outline the need for natural resource conservation and protection of critical areas and create opportunities for community action.**	CDD WRS	Term of Plan

C. Natural Resource Areas Goals

Goal C-3 Support urban agriculture for access to local food production.

Access to nutritious food is becoming more important as Tumwater residents face issues with the cost of living. Supporting urban agriculture like farmstands, community gardens, and urban farms helps provides residents with access to fresh locally grown products, decreases the cost of transporting goods, protects cultural heritage, and provides open space.

As goals and policies are developed which support urban agriculture, farmers have increased access to markets, as well as opportunities to diversify their products and services. These benefits help make farms more viable at a scale that is compatible with urban environments.

Policies		Lead	Period
C-3.1	**Support local food production to maintain the quality of life and long-term sustainability of Tumwater.**	CDD	Term of Plan
C-3.2	**Work with community groups to support the continued viability of agriculture and encourage neighborhood and community support.**	CDD	Term of Plan

Goal C-4 Support urban forestry.

Urban forestry is the care and management of the vegetation on public and private properties in Tumwater. It includes native plants and ornamental plants, understory, and canopy. Plants in Tumwater provide benefits to those who live, work, and play in the area.

Trees mitigate pollution, provide habitat for wildlife, sequester carbon, reduce stormwater runoff, and provide socioeconomic and aesthetic benefits. Managing trees to ensure safety and avoiding conflicts with infrastructure is an important part of urban forestry practices. The City Council adopted the Tumwater Urban Forestry Management Plan in 2021 to guide code development and protect trees and improve public safety.

Policies		Lead	Period
C-4.1	**Maximize retention of a healthy tree cover and native vegetation and encourage restoration, replacement, and enhancement of unhealthy trees and disturbed vegetation as recommended in the adopted *Tumwater Urban Forestry Management Plan* consistent with the Growth Management Act and the requirements of protected habitat.**	WRS	Term of Plan
C-4.2	**Ensure that harvesting for conversion to other uses occurs in a manner compatible with land uses of the surrounding area and maintenance of water quality and critical areas.**	WRS CDD	Term of Plan

Goal C-5 Protect mineral resource lands.

Modern industry relies on mineral resources. The most abundant mineral resource in Washington State is aggregate which includes sand, gravel, and crushed rock. These products are vital to road construction and other projects that require soil stabilization and additional drainage.

Local mineral sources are especially valuable since they reduce the shipping costs associated with transporting heavy materials. Since

minerals are a non-renewable resource, protecting existing sources in Tumwater is important to ensure they are available locally into the future.

Policies		Lead	Period
C-5.1	**Allow mineral extraction industries to locate where prime natural resource deposits exist and where extraction will not cause the degradation of sensitive areas.**	CDD	Term of Plan
C-5.2	**Conserve designated mineral resource lands of long-term commercial significance for mineral extraction, and the use of adjacent lands should not interfere with the continued use of the designated mining sites that are being operated in accordance with applicable best management practices and other laws and regulations.**	CDD	Term of Plan
C-5.3	**Restore mineral extraction sites as the site is being mined. The site should be restored for appropriate future use, and it should blend with the adjacent landscape and contours.**	CDD	Term of Plan

D. Critical Areas Goals

Goal C-6 Designate and protect critical areas including wetlands, critical aquifer recharge areas, frequently flooded areas, geologically hazardous areas, shorelines of the state, and fish and wildlife habitat conservation areas in accordance with the Growth Management Act to protect their functions and values as well as safeguard against threats to health, safety, and property.

Unwise development of critical areas jeopardizes environmental resource functions and values, puts species at risk of extinction, triggers regulatory burdens, and places people and property in unsafe conditions.

If critical area functions are not protected, attempting to enhance or restore them in the future is likely to be costly, if not impossible.

Policies		Lead	Period
C-6.1	**Base critical areas designations and regulations on best available science to protect and enhance the functions and values of these areas.**	CDD	Term of Plan

Policies		Lead	Period
C-6.2	Protect critical areas while allowing for compatible growth and development.	CDD	Term of Plan
C-6.3	Require that prior to any development, critical areas are identified, avoided to the extent possible, and otherwise protected to meet no net loss requirements.	CDD	Term of Plan

Goal C-7 Protect and enhance water quality.

Clean water is necessary for life. Everyday activities such as cleaning and driving can have a negative impact on water quality. Reducing the quantity of pollutants on Tumwater's roads and yards decreases the likelihood that they will be washed into waterways or carried into groundwater.

Since most sources of pollution are all around Tumwater's landscape, it is also important to maintain systems that can remove pollution from water.

Policies		Lead	Period
C-7.1	Protect water quality by preserving and enhancing the ecological functions of water features through land use plans, development regulations, and public education.	CDD WRS	Term of Plan
C-7.2	Support restoration of river and stream channels and associated wetland and riparian areas to enhance water quality, improve fish and wildlife habitat, and mitigate flooding and erosion.	CDD WRS	Term of Plan
C-7.3	Allow public access to wetlands, streams, and lakes for scientific, educational, and recreational use, provided access is carefully sited, sensitive habitats and species are protected, and hydrologic continuity is maintained.	CDD	Term of Plan
C-7.4	Manage water resources to preserve ecosystem services, while addressing fish and wildlife habitat, flood protection, water supply, recreation, and open space.	CDD PRD WRS	Term of Plan

Policies		Lead	Period
C-7.5	Work with Olympia, Thurston County, and other affected entities to enhance and protect water quality in the region guided by the Deschutes River Study.	WRS	Term of Plan

Goal C-8 Improve natural drainage systems.

Storm and surface waters are a primary concern for urban environments. As impervious surfaces replace the permeable land cover, water travelling across the land accumulates pollutants. As development converts more land, less water is filtered through soil, and more pollutants are accumulated.

Drainage systems are also critical to protect the built environment from flood damage. With extreme amounts of stormwater entering the stormwater system within short periods of time, it is imperative that Tumwater expand the system at the rate of land conversion to meet the ever-changing needs.

Policies		Lead	Period
C-8.1	Develop Watershed Management Plans in partnership with other jurisdictions who are also part of the same watershed.	WRS	Term of Plan
C-8.2	Develop and implement conservation measures necessary to preserve and enhance anadromous fish habitat and fisheries and other state and federally protected species, consistent with the Growth Management Act.	CDD	Term of Plan
C-8.3	Protect and enhance natural or degraded drainage systems to maintain and improve water quality and reduce public costs.	CDD WRS	Term of Plan
C-8.4	Prevent environmental degradation by using best management practices and current stormwater treatment and flow control standards on new and redevelopment projects.	CDD TED WRS	Term of Plan
C-8.5	Use current State approved stormwater treatment and flow control standards on development and construction projects.	CDD TED WRS	Term of Plan

Policies		Lead	Period
C-8.6	**Require resource industries to use management practices that prevent erosion and sedimentation and pollutants from entering ground or surface waters following State regulations.**	CDD	Term of Plan

Goal C-9 Improve air quality.

Poor air quality can have serious impacts on health for both people and the environment. Ensuring that air is appropriately filtered by retaining vegetation and reducing the amount of air pollution at the source are two strategies to manage air quality for the next 20 years.

Policies		Lead	Period
C-9.1	**Continue to support and rely on the various State, federal, and local programs to protect and enhance air quality.**	CDD	Term of Plan
C-9.2	**Require appropriate tree and vegetation retention and landscaping to provide filtering of suspended particulates.**	CDD	Term of Plan
C-9.3	**Coordinate with the other Elements in the Comprehensive Plan on actions to reduce vehicle miles traveled, greenhouse gas emissions, and other locally generated air pollutants.**	CDD WRS TED	Term of Plan

Goal C-10 Protect and enhance rivers, streams, and lakes.

Surface waters like rivers, streams and lakes provide necessary transit for water as it flows across the landscape. Measures to protect waterways mitigate erosion and pollution that are ubiquitous in urban areas. Surface water also provides necessary habitat for wildlife. Protecting water quality is important for preserving Tumwater's environments to continue the beneficial ecosystem functions necessary for life.

Policies		Lead	Period
C-10.1	Protect, enhance, and restore natural stream channels, including riparian areas, for their hydraulic, ecological, and aesthetic functions through development regulations; land dedications, easements, and acquisitions; incentives; and restoration planning.	CDD WRS	Term of Plan
C-10.2	Require any alteration and maintenance of rivers, streams, and lakes follow the full mitigation sequence which addresses water quality; floodplain protection; fish and wildlife habitat; channel stability and vegetative cover; maintenance of instream flows; and impacts to downstream property owners.	CDD	Term of Plan

Goal C-11 Protect and enhance wetlands.

Wetlands play a vital role in the overall natural environment. Wetlands protect water quality, reduce flooding, provide aquifer recharge for drinking water and other uses, and provide critical habitat for fish and wildlife as well as carbon sequestration.

Wetlands also provide many social values including recreational opportunities, aesthetic benefits, places for research and education, and cultural resources important to tribes.

Policies		Lead	Period
C-11.1	Where possible, protect wetlands as ecosystems that provide essential services and functionality within watersheds.	CDD	Term of Plan
C-11.2	Preserve and enhance wetlands from new developments by providing buffers around wetlands adequate to protect natural functions.	CDD	Term of Plan
C-11.3	Allow reasonable use of property containing existing wetlands to avoid a regulatory taking following State guidance.	CDD	Term of Plan

Policies	Lead	Period
C-11.4 Maintain stormwater treatment and flow control sites associated with wetlands in a manner that ensures the ecological functions of the wetland to minimize impacts to critical area habitat.	CDD WRS	Term of Plan

Goal C-12 Protect groundwater.

Tumwater's water comes from underground aquifers, which are sand and gravel formations below the ground that "hold" water. These aquifers are replenished by rain and snow infiltrated through the ground and filtered by the soil and trillions of microbes. The many layers of soil, rock, and microbes that sit above the aquifers act to cleanse the water as it passes and helps prevent contamination from the surface. Groundwater contributes to the flow of streams and rivers, providing base flows that are essential for fish and other aquatic life, especially during dry periods.

Policies	Lead	Period
C-12.1 Protect aquifers, aquifer recharge areas, and wellhead protection areas from contamination.	CDD WRS	Term of Plan
C-12.2 Protect streams, wetlands, and lakes that serve to recharge aquifers from contamination.	CDD WRS	Term of Plan

Goal C-13 Protect geologically hazardous areas.

Protecting geologically hazardous areas in Tumwater is important because they pose significant threats to public safety and infrastructure. Identifying these areas allows for better planning, mitigation, and emergency response. Washington state is particularly more vulnerable due to its geological location, active faults, and volcanic activity.

Policies		Lead	Period
C-13.1	Regulate development intensity, site coverage, and vegetation removal in geologically hazardous areas to prevent property damage and environmental degradation; minimize soil erosion, siltation, and landslides; and enhance greenbelt and wildlife habitat values.	CDD	Term of Plan
C-13.2	Minimize soil disturbance and maximize retention and replacement of native vegetative cover, such as trees, for land use permitted in erosion and landslide hazard areas.	CDD	Term of Plan
C-13.3	Decrease development intensity as slopes increase to mitigate problems of drainage, erosion, siltation, and landslides.	CDD	Term of Plan
C-13.4	Require erosion and sedimentation prevention best management practices be used on construction projects by the Development Guide and Drainage Design & Erosion Control Manual.	CDD	Term of Plan
C-13.5	Require appropriate engineering, building design, and construction measures to minimize the risk of structural damage and fire and injury to occupants, and to prevent post-seismic collapse in areas with severe seismic hazards.	CDD TED	Term of Plan

Goal C-14 Preserve flood plains and floodways.

Floodplains are important for flood protection and ecosystems. Natural floodplains provide flood risk reduction benefits by slowing runoff, storing floodwater, and reducing erosion. Floodplains frequently contain wetlands and provide fish and wildlife habitats.

It is important to protect the functions of floodplains and reduce risk to people and property by limiting development in frequently flooded areas.

Policies		Lead	Period
C-14.1	Minimize land alterations that would increase potential flooding and changes to natural surface water features that retain or carry floodwaters, such as wetlands, floodplains, rivers, streams, and lakes.	CDD	Term of Plan

Policies		Lead	Period
C-14.2	Require mitigation for adverse environmental impacts from engineered flood control measures.	CDD	Term of Plan
C-11.3	Meet state regulatory standards for floodplain development as these standards are updated for consistency with relevant federal requirements including those related to the Endangered Species Act.	CDD	Term of Plan
C-14.4	Emphasize non-structural methods in planning for flood prevention and damage reduction. Require new developments or land modifications in 100-year floodplains maintain natural flood storage functions and minimize hazards.	CDD	Term of Plan
C-14.5	Protect 100-year floodplains by restricting development; encouraging low-impact uses such as open space, trails, and parks; locating infrastructure above the flood level, and requiring new development replace existing flood storage capacity lost due to filling.	CDD	Term of Plan
C-14.6	Restrict permanent structures within the floodway due to risks associated with deep and fast-flowing waters unless appropriate flood control measures have been taken.	CDD	Term of Plan
C-14.7	Restrict land uses in a floodway that would divert water from the floodway, change flood elevation, or obstruct natural flow, unless appropriate flood control measures have been taken such that there are no additional offsite impacts and no degradation of water quality.	CDD	Term of Plan
C-14.8	Restrict development in the floodway fringe that would reduce the existing level of flood storage.	CDD	Term of Plan

Goal C-15 Protect and enhance wildlife habitat.

Wildlife habitats, such as prairies, provide essential resources for wildlife and humans. Resources include food, water, shelter, and breeding grounds, ensuring the continuation of diverse species and the health of ecosystems.

Protecting habitats also helps mitigate climate change, conserve biodiversity conservation, and provide health and economic benefits.

Wildlife habitat offers recreation opportunities for the community and has economic benefits as well. Integrating wildlife habitat protection into land use planning decisions can help minimize development impacts on wildlife populations.

Policies		Lead	Period
C-15.1	Identify, protect, and enhance fish and wildlife habitat corridors to minimize habitat fragmentation, especially along existing linkages by enhancing vegetation composition and structure and incorporating compatible indigenous plant species.	CDD	Term of Plan
C-15.2	Protect, preserve, and restore habitats for species identified as endangered, threatened, or sensitive by the State or federal government, giving special consideration to measures necessary to preserve or enhance suitable habitat.	CDD	Term of Plan
C-15.3	Maintain habitats that support the greatest diversity of fish and wildlife through conservation and enhancement of critical areas.	CDD	Term of Plan
C-15.4	When developing forested property adjacent to steep slopes, wetlands, stream ravines, or stream corridors, encourage development to provide additional buffer areas to provide wildlife and fish habitat.	CDD	Term of Plan
C-15.5	Protect, preserve, and restore native vegetation and control invasive species to preserve and enhance fish and wildlife habitat.	CDD	Term of Plan

Appendix A – Draft Implementation Actions

Each of the Conservation Element goals and policies in Chapter 4 will require Tumwater to take specific actions to implement over the course of the 20-year term of the Comprehensive Plan.

The draft implementation actions in the tables below were developed in coordination with the stakeholders, the community, and Tumwater staff. The draft implementation actions in the tables below are intended to serve as the start for developing annual Tumwater work programs to address conservation actions.

As the Comprehensive Plan is put into action over the next twenty years, the draft implementation actions will change as new, unforeseen opportunities emerge: new ones may be added, proposed ones may be modified or replaced by other actions.

The draft implementations actions below are intended to be draft work program items that serve to implement the goals and policies of the Element. The draft implementation actions will need further refinement before they are incorporated into annual Tumwater work programs.

1. How to Read These Tables

The Conservation Element goals, policies, and the draft implementation actions associated with them are not in priority order.

The draft implementation actions that can only be undertaken by other entities are not included in this plan.

The Conservation Element's goals, policies, and draft implementation actions are associated with one of the three areas of conservation goals:

1. Overarching Environmental Goals
2. Natural Resource Areas Goals
3. Critical Areas Goals

1) Department Leads

As noted in the tables below, implementation of the Conservation Element's policies and draft implementation actions are associated with four different Tumwater departments:

CDD	Community Development Department
PRD	Parks, Recreation, and Facilities Department
TED	Transportation & Engineering Department
WRS	Water Resources & Sustainability Department

2) Period

Each of the Conservation Element's policies and draft implementation are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

DRAFT

2. Overarching Environmental Goals

Goal C-1 Recognize the significant role played by natural features and systems in determining the overall environmental quality and livability of Tumwater.

Policies and Implementation Actions		Lead	Period
C-1.1	**Support active measures to protect and enhance Tumwater's natural environment.**	CDD	Term of Plan
C-1.2	**Use adopted plans to inform critical area policies, regulations, and implementation actions.**	CDD WRS	Term of Plan
C-1.2.1	Implement the actions identified in the Thurston Climate Mitigation Plan.	CDD WRS	Term of Plan
C-1.2.2	Implement the actions identified in the most recent version of the Natural Hazards Mitigation Plan for Thurston County.	CDD WRS	Term of Plan
C-1.2.3	Implement the actions identified in the Tumwater Urban Forestry Management Plan.	CDD WRS	Term of Plan

Goal C-2 Promote conservation of natural resources and the protection of the environment in cooperation with residents, property owners, other jurisdictions, and tribes.

Policies and Implementation Actions		Lead	Period
C-2.1	**Support education programs in the community that outline the need for natural resource conservation and protection of critical areas and create opportunities for community action.**	CDD WRS	Term of Plan
C-2.1.1	Support the work of the Stream Team.	WRS	Term of Plan
C-2.1.2	Support the work for the Tumwater Green Team.	WRS	Term of Plan

Policies and Implementation Actions		Lead	Period
C-2.1.3	Support water conservation messaging and outreach.	WRS	Term of Plan
C-2.1.4	Support water quality messaging and outreach for wellhead and source protection.	WRS	Term of Plan

3. Natural Resource Areas Goals

Goal C-3 Support urban agriculture for access to local food production.

Policies and Implementation Actions		Lead	Period
C-3.1	**Support local food production to maintain the quality of life and long-term sustainability of Tumwater.**	CDD	**Term of Plan**
C-3.1.1	Implement and keep the Food System Plan updated.	CDD	Term of Plan
C-3.1.2	Collaborate with local organizations to promote food system resources to improve participation.	CDD	Term of Plan
C-3.2	**Work with community groups to support the continued viability of agriculture and encourage neighborhood and community support.**	CDD	**Term of Plan**
C-3.2.1	Support the efforts of organizations to develop a vibrant food system through access to healthy, local, affordable, culturally appropriate, sustainably produced food to assist the community in having reliable access to enough affordable nutritious food.	CDD	Term of Plan

Goal C-4 Support urban forestry.

Policies and Implementation Actions		Lead	Period
C-4.1	**Maximize retention of a healthy tree cover and native vegetation and encourage restoration, replacement, and enhancement of unhealthy trees and disturbed vegetation as recommended in the adopted *Tumwater Urban Forestry Management Plan* consistent with the Growth Management Act and the requirements of protected habitat.**	**WRS**	**Term of Plan**
C-4.1.1	Implement the actions in the Tumwater Urban Forestry Management Plan.	WRS	Term of Plan
C-4.2	**Ensure that harvesting for conversion to other uses occurs in a manner compatible with land uses of the surrounding area and maintenance of water quality and critical areas.**	**WRS CDD**	**Term of Plan**

Goal C-5 Protect mineral resource lands.

Policies and Implementation Actions		Lead	Period
C-5.1	**Allow mineral extraction industries to locate where prime natural resource deposits exist and where extraction will not cause the degradation of sensitive areas.**	**CDD**	**Term of Plan**
C-5.2	**Conserve designated mineral resource lands of long-term commercial significance for mineral extraction, and the use of adjacent lands should not interfere with the continued use of the designated mining sites that are being operated in accordance with applicable best management practices and other laws and regulations.**	**CDD**	**Term of Plan**
C-5.3	**Restore mineral extraction sites as the site is being mined. The site should be restored for appropriate future use, and it should blend with the adjacent landscape and contours.**	**CDD**	**Term of Plan**

4. Critical Areas Goals

Goal C-6 **Designate and protect critical areas including wetlands, critical aquifer recharge areas, frequently flooded areas, geologically hazardous areas, shorelines of the state, and fish and wildlife habitat conservation areas in accordance with the Growth Management Act to protect their functions and values as well as safeguard against threats to health, safety, and property.**

Policies and Implementation Actions		Lead	Period
C-6.1	**Base critical areas designations and regulations on best available science to protect and enhance the functions and values of these areas.**	**CDD**	**Term of Plan**
C-6.1.1	Update critical area regulations as needed to reflect current best available science and state guidance to minimize impacts from new development.	**CDD**	Term of Plan
C-6.2	**Protect critical areas while allowing for compatible growth and development.**	**CDD**	**Term of Plan**
C-6.2.1	When updating development regulations, review in conjunction with critical areas regulations to ensure compatibility.	**CDD**	Term of Plan
C-6.2.2	Use incentive programs, acquisition, appropriate regulations, and other techniques to preserve critical areas as permanent open space where development may pose hazards to health, property, or important ecological functions.	**CDD**	Term of Plan
C-6.2.3	Apply mitigation sequencing to avoid and minimize impacts to critical areas, and, if necessary, require and enforce mitigation to ensure no net loss of critical area functions.	**CDD**	Term of Plan

Policies and Implementation Actions		Lead	Period
C-6.2.4	Ensure the effectiveness of critical area mitigation by requiring adequate critical area studies and mitigation plans, the application of mitigation sequencing, financial assurances to ensure mitigation success, and by improving Tumwater oversight of maintenance and monitoring of mitigation.	CDD	Term of Plan
C-6.3	**Require that prior to any development, critical areas are identified, avoided to the extent possible, and otherwise protected to meet no net loss requirements.**	CDD	**Term of Plan**
C-6.3.1	In reviewing development proposals that may impact a critical area, supplement staff review with a qualified third-party professional as needed to assess potential impacts and require development alternatives or mitigation.	CDD	Term of Plan

Goal C-7 Protect and enhance water quality.

Policies and Implementation Actions		Lead	Period
C-7.1	**Protect water quality by preserving and enhancing the ecological functions of water features through land use plans, development regulations, and public education.**	CDD WRS	**Term of Plan**
C-7.1.1	Require adequate stormwater treatment and flow control for new development, including low impact development techniques.	CDD	Term of Plan
C-7.1.2	Update stormwater regulations as needed to reflect current state guidance, including low impact development provisions.	CDD WRS	Term of Plan
C-7.1.3	Support water quality messaging and outreach for wellhead and source protection.	WRS	Term of Plan

Policies and Implementation Actions	Lead	Period
C-7.2 Support restoration of river and stream channels and associated wetland and riparian areas to enhance water quality, improve fish and wildlife habitat, and mitigate flooding and erosion.	CDD WRS	**Term of Plan**
C-7.3 Allow public access to wetlands, streams, and lakes for scientific, educational, and recreational use, provided access is carefully sited, sensitive habitats and species are protected, and hydrologic continuity is maintained.	CDD	**Term of Plan**
C-7.3.1 Work with the Tumwater and Olympia School Districts, LOTT, and other community-based organizations on public education on maintaining water quality.	WRS	Term of Plan
C-7.4 Manage water resources to preserve ecosystem services, while addressing fish and wildlife habitat, flood protection, water supply, recreation, and open space.	CDD PRD WRS	**Term of Plan**
C-7.4.1 Update the Salmon Creek Basin Plan.	CDD TED WRS	Term of Plan
C-7.4.2 Monitor storm drain outfalls on a regular basis and pursue corrective actions, as necessary.	WRS	Term of Plan
C-7.5 Work with Olympia, Thurston County, and other affected entities to enhance and protect water quality in the region guided by the Deschutes River Study.	WRS	**Term of Plan**
C-7.5.1 Coordinate implementation strategies and regulations with Olympia and Thurston County.	CDD TED WRS	Term of Plan

Goal C-8 Improve natural drainage systems.

Policies and Implementation Actions	Lead	Period
C-8.1 Develop Watershed Management Plans in partnership with other jurisdictions who are also part of the same watershed.	WRS	**Term of Plan**

Policies and Implementation Actions		Lead	Period
C-8.1.1	Work with Olympia and Thurston County to ensure that regulations regarding surface water management provide consistent surface water management.	WRS	Term of Plan
C-8.1.2	Continue involvement with watershed planning efforts through participation in the Salmon Creek Basin and WRIA 13 watershed planning efforts.	WRS	Term of Plan
C-8.2	**Develop and implement conservation measures necessary to preserve and enhance anadromous fish habitat and other state and federally protected species, consistent with the Growth Management Act.**	CDD	**Term of Plan**
C-8.3	**Protect and enhance natural or degraded drainage systems to maintain and improve water quality and reduce public costs.**	CDD WRS	**Term of Plan**
C-8.4	**Prevent environmental degradation by using best management practices and current stormwater treatment and flow control standards on new and redevelopment projects.**	CDD TED WRS	**Term of Plan**
C-8.5	**Use current State approved stormwater treatment and flow control standards on development and construction projects.**	CDD TED WRS	**Term of Plan**
C-8.5.1	Update stormwater regulations as needed to reflect current best available science and state guidance.	CDD TED WRS	Term of Plan
C-8.6	**Require resource industries to use management practices that prevent erosion and sedimentation and pollutants from entering ground or surface waters following State regulations.**	CDD	**Term of Plan**
C-8.6.1	Update regulations as needed to meet state standards to minimize the amount of erosion, sedimentation, and water pollutants created by resource industries.	CDD	Term of Plan

Goal C-9 Improve air quality.

Policies and Implementation Actions		Lead	Period
C-9.1	**Continue to support and rely on the various State, federal, and local programs to protect and enhance air quality.**	CDD	**Term of Plan**
C-9.1.1	Work with the Olympic Region Clean Air Agency and with Federal and State agencies to ensure that air quality is improved and protected within Tumwater.	CDD	Term of Plan
C-9.2	**Require appropriate tree and vegetation retention and landscaping to provide filtering of suspended particulates.**	CDD	**Term of Plan**
C-9.2.1	Update regulations as needed to reflect the current best available science and state guidance that allow the use of existing vegetated areas for biofiltration.	CDD	Term of Plan
C-9.3	**Coordinate with the other Elements in the Comprehensive Plan on actions to reduce vehicle miles traveled, greenhouse gas emissions, and other locally generated air pollutants.**	CDD WRS TED	**Term of Plan**

Goal C-10 Protect and enhance rivers, streams, and lakes.

Policies and Implementation Actions		Lead	Period
C-10.1	**Protect, enhance, and restore natural stream channels, including riparian areas, for their hydraulic, ecological, and aesthetic functions through development regulations; land dedications, easements, and acquisitions; incentives; and restoration planning.**	CDD WRS	**Term of Plan**
C-10.2	**Require any alteration and maintenance of rivers, streams, and lakes follow the full mitigation sequence which addresses water quality; floodplain protection; fish and wildlife habitat; channel stability and vegetative cover; maintenance of instream flows; and impacts to downstream property owners.**	CDD	**Term of Plan**

Policies and Implementation Actions		Lead	Period
C-10.2.1	Rehabilitate degraded river and stream channels and banks using public and private programs, where conditions permit.	CDD WRS	Term of Plan
C-10.2.2	Work with tribes, nonprofit organizations, and other public agencies to implement programs to rehabilitate rivers, streams, and lakes.	WRS	Term of Plan

Goal C-11 Protect and enhance wetlands.

Policies and Implementation Actions		Lead	Period
C-11.1	**Where possible, protect wetlands as ecosystems that provide essential services and functionality within watersheds.**	CDD	**Term of Plan**
C-11.2	**Preserve and enhance wetlands from new developments by providing buffers around wetlands adequate to protect natural functions.**	CDD	**Term of Plan**
C-11.3	**Allow reasonable use of property containing existing wetlands to avoid a regulatory taking following State guidance.**	CDD	**Term of Plan**
C-11.4	**Maintain stormwater treatment and flow control sites associated with wetlands in a manner that ensures the ecological functions of the wetland to minimize impacts to critical area habitat.**	CDD WRS	**Term of Plan**
C-11.4.1	Ensure the water level fluctuations within wetland areas due to stormwater treatment and flow control objectives are maintained like natural conditions as part of new development.	CDD WRS	Term of Plan

Goal C-12 Protect groundwater.

Policies and Implementation Actions		Lead	Period
C-12.1	**Protect aquifers, aquifer recharge areas, and wellhead protection areas from contamination.**	**CDD WRS**	**Term of Plan**
C-12.1.1	Work with the State Department of Ecology and others to update the delineation of aquifer recharge areas and regulations.	CDD WRS	Term of Plan
C-12.1.2	Update the wellhead protection plan as new source locations are considered or implemented.	WRS	Term of Plan
C-12.1.3	Develop processes to identify and treat contaminated City water sources.	WRS	Term of Plan
C-12.2	**Protect streams, wetlands, and lakes that serve to recharge aquifers from contamination.**	**CDD WRS**	**Term of Plan**

Goal C-13 Protect geologically hazardous areas.

Policies and Implementation Actions		Lead	Period
C-13.1	**Regulate development intensity, site coverage, and vegetation removal in geologically hazardous areas to prevent property damage and environmental degradation; minimize soil erosion, siltation, and landslides; and enhance greenbelt and wildlife habitat values.**	**CDD**	**Term of Plan**
C-13.2	**Minimize soil disturbance and maximize retention and replacement of native vegetative cover, such as trees, for land use permitted in erosion and landslide hazard areas.**	**CDD**	**Term of Plan**
C-13.3	**Decrease development intensity as slopes increase to mitigate problems of drainage, erosion, siltation, and landslides.**	**CDD**	**Term of Plan**

Policies and Implementation Actions	Lead	Period
C-13.4 Require contractors to use erosion and sedimentation prevention best management practices on construction projects by the Development Guide and Drainage Design & Erosion Control Manual.	**CDD**	**Term of Plan**
C-13.5 Require appropriate engineering, building design, and construction measures to minimize the risk of structural damage and fire and injury to occupants, and to prevent post-seismic collapse in areas with severe seismic hazards.	**CDD TED**	**Term of Plan**
C-13.5.1 Update building and fire codes as needed to reflect current state standards to account for the severity and frequency of seismic activity in the south Puget Sound area.	**CDD**	Term of Plan

Goal C-14 Preserve flood plains and floodways.

Policies and Implementation Actions	Lead	Period
C-14.1 Minimize land alterations that would increase potential flooding and changes to natural surface water features that retain or carry floodwaters, such as wetlands, floodplains, rivers, streams, and lakes.	**CDD**	**Term of Plan**
C-14.2 Require mitigation for adverse environmental impacts from engineered flood control measures.	**CDD**	**Term of Plan**
C-14.2.1 Prior to authorizing engineered flood control measures, encourage non-structural methods of flood control utilizing best available science.	**CDD**	Term of Plan
C-14.3 Meet state regulatory standards for floodplain development as these standards are updated for consistency with relevant federal requirements including those related to the Endangered Species Act.	**CDD**	**Term of Plan**

Policies and Implementation Actions		Lead	Period
C-14.4	**Emphasize non-structural methods in planning for flood prevention and damage reduction. Require new developments or land modifications in 100-year floodplains maintain natural flood storage functions and minimize hazards.**	**CDD**	**Term of Plan**
C-14.5	**Protect 100-year floodplains by restricting development; encouraging low-impact uses such as open space, trails, and parks; locating infrastructure above the flood level, and requiring new development replace existing flood storage capacity lost due to filling.**	**CDD**	**Term of Plan**
C-14.5.1	Update regulations as needed to reduce development in floodplains following Federal Emergency Management Agency standards.	**CDD**	Every five years. Next update 2028.
C-14.6	**Restrict permanent structures within the floodway due to risks associated with deep and fast-flowing waters unless appropriate flood control measures have been taken.**	**CDD**	**Term of Plan**
C-14.7	**Restrict land uses in a floodway that would divert water from the floodway, change flood elevation, or obstruct natural flow, unless appropriate flood control measures have been taken such that there are no additional offsite impacts and no degradation of water quality.**	**CDD**	**Term of Plan**
C-14.8	**Restrict development in the floodway fringe that would reduce the existing level of flood storage.**	**CDD**	**Term of Plan**

Goal C-15 Protect and enhance wildlife habitat.

Policies and Implementation Actions	Lead	Period
C-15.1 Identify, protect, and enhance fish and wildlife habitat corridors to minimize habitat fragmentation, especially along existing linkages by enhancing vegetation composition and structure and incorporating compatible indigenous plant species.	**CDD**	**Term of Plan**
C-15.2 Protect, preserve, and restore habitats for species identified as endangered, threatened, or sensitive by the State or federal government, giving special consideration to measures necessary to preserve or enhance suitable habitat.	**CDD**	**Term of Plan**
C-15.2.1 Implement salmon habitat protection and restoration priorities in approved Water Resource Inventory Area 13 and 23 plans.	CDD WRS	Term of Plan
C-15.2.2 Implement suitable habitat protections and restoration priorities for threatened and endangered aquatic and terrestrial plant and animal species.	CDD	Term of Plan
C-15.2.3 Complete and implement the Bush Prairie Habitat Conservation Plan.	CDD	Term of Plan
C-15.3 Maintain habitats that support the greatest diversity of fish and wildlife through conservation and enhancement of critical areas.	**CDD**	**Term of Plan**
C-15.3.1 Coordinate with adjacent jurisdictions and tribes to identify, protect, and develop enhancement plans and actions for habitat networks and wetlands that cross jurisdictional lines.	CDD	Term of Plan
C-15.3.2 Promote the enhancement or restoration of streams, rivers, lakes, and wetlands as adjacent development activities occur.	CDD	Term of Plan

Policies and Implementation Actions	Lead	Period
C-15.4 When developing forested property adjacent to steep slopes, wetlands, stream ravines, or stream corridors, encourage development to provide additional buffer areas to provide wildlife and fish habitat.	**CDD**	**Term of Plan**
C-15.5 Protect, preserve, and restore native vegetation and control invasive species to preserve and enhance fish and wildlife habitat.	**CDD**	**Term of Plan**
C-15.5.1 Develop regulations requiring all new developments to remove invasive plants and use native vegetation in restoration of buffers around wetlands, streams, creeks, and steep slope areas.	**CDD**	Term of Plan

DRAFT

1. Introduction

A. Background

The Conservation Element is part of Tumwater's Comprehensive Plan. It was created to meet the State Growth Management Act (Chapter 36.70A RCW) requirements to identify and protect critical environmental areas and valuable natural resources.

The Element addresses:

1. **Natural Resource Lands Conservation**
   - Agricultural Lands
   - Forest Lands
   - Mineral Resource Lands
2. **Critical Areas Protection**
   - Wetland Areas
   - Critical Aquifer Recharge Areas
   - Frequently Flooded Areas
   - Geologically Hazardous Areas
   - Fish and Wildlife Habitat Conservation Areas

The Growth Management Act requires that Tumwater demonstrate that each Element in its Comprehensive Plan meets the relevant fifteen planning goals contained within the Act. The fifteen goals in turn guide the development and adoption of Tumwater's Comprehensive Plan and development regulations.

The Conservation Element addresses the two Growth Management Act goals related to the environment and natural resources:

CONSERVATION

State requirements (WAC 365-196-405) that the Comprehensive Plan must meet:

- Designation of the proposed general distribution and general location and extent of the uses of land, where appropriate, for agricultural, timber, and mineral production of long-term commercial significance.
- The general location of any known critical areas that limit the suitability of land for development.
- Provisions for the protection of the quality and quantity of ground water used for public water supplies.
- A review of drainage, flooding, and stormwater runoff in the area covered by the plan and nearby jurisdictions, and guidance for corrective actions to mitigate or cleanse those discharges that pollute waters of the state, including Puget Sound or waters entering Puget Sound.
- Influences or threats to the quality and quantity of ground water used for public water supplies.

8. ***Natural resource industries.*** *Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive*

agricultural lands, and discourage incompatible uses.

The Conservation Element has specific guidelines and policies that ensure the viability of natural resource industries and activities. Additionally, the Conservation Element ensures the viability of natural resource industries in Tumwater through the identification of such lands in the Conservation Element text and maps.

While Tumwater has limited natural resource lands as defined by the Growth Management Act, it does have mineral resources, forestry, and agriculture lands. Tumwater supports urban forestry and agriculture appropriate and compatible with other land use goals, policies, and implementation actions.

10. ***Environment.*** *Protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.*

The State Legislature updated the Growth Management Act environment goal in 2023 to require enhancement of the environment.

The Conservation Element contains specific policies relating to air and water quality, water availability, and protection and preservation of critical areas and enhance the environment. Areas of environmental sensitivity are designated as open space or a lower intensity land use designation than other areas of Tumwater.

If conflict occurs in the implementation of planning and development regulations, the priority of protecting critical areas will be superior to other uses of natural resources.

The Conservation Element and implementing ordinances were developed with public input as described in the Public Outreach Plan required by the Growth Management Act. The Element is based on the updated list of additional supporting plans, documents, and best available science found in Appendix A.

B. How to Read this Part of the Element

Part 2 of the Conservation Element consists of the following chapters.

- **Chapter 2 – Natural Resources**: Provides a summary of Tumwater's current mineral resource lands and discusses urban forestry and urban agriculture.
- **Chapter 3 – Critical Areas**: Provides a summary of critical areas in Tumwater, including wetlands, critical aquifer recharge areas, frequently flooded areas, geologically hazardous areas, and fish and wildlife conservation areas. Each critical area has its own section, discussing regulations, classifications, and locations within Tumwater.
- **Appendix A – Foundational Documents and Best Available Science**: Provides a list of the documents used to create the Conservation Element's Technical Summary.

C. Best Available Science

RCW 36.70A.172 and WAC 365-195-900 through WAC 365-195-925 require Tumwater to use best available science in revising or adopting new policies and regulations related to critical areas.

Utilization of best available science is particularly important to wetland and riparian area protection, floodplain areas and salmon recovery efforts required under the Endangered Species Act. Best available science is a process to assist jurisdictions in ascertaining what science is appropriate for use in basing policy and regulatory decision-making.

Tumwater uses best available science in all revisions and additions to critical areas policies and regulations to protect the functions and values of critical areas.

D. Shorelines of the State

For shorelines of the state, the goals, and policies of the Shoreline Management Act (RCW 90.58.020) were added as one of the goals of the Growth Management Act (RCW 36.70A.020) without creating an order of priority among the fifteen goals. The goals and policies of Tumwater's Shoreline Master Program approved under RCW 90.58 shall be considered an element of the Comprehensive Plan.

The shorelines of the state as identified by the Shoreline Management Act within Tumwater include the Deschutes River, and Black Lake Drainage area as well as Trosper Lake, Barnes Lake, Lake Susan, and Munn Lake. Shorelines of the state within Tumwater's urban growth area include Black Lake.

Shorelines of the state also include the upland or shorelands that extend 200 feet landward from the edge of these waters, and any wetlands, floodways, and floodplain areas associated with such waters.

Tumwater's updated Shoreline Master Program was adopted in 2019 following review and approval from the State Department of Ecology. The Shoreline Master Program incorporated the existing critical area regulations from TMC Chapter 16.20, TMC Chapter 16.28, and TMC Chapter 16.32.

DRAFT

2. Natural Resources

A. Background

Natural resources are the materials that occur in nature and are used by humans to meet their needs. The European settlement of Tumwater was based on its location adjacent an abundant water source for industry and transport. The trees around Tumwater were harvested and used for construction, wood pulp, and other products.

Today, natural resources are still a part of Tumwater's urban environment. Having access to locally grown fresh food, forests for wood products, and mineral resources for transportation and other infrastructure reduces the cost of transporting these essential goods from far away. It also creates jobs in harvesting and manufacturing these raw materials into goods.

Natural Resources serve many benefits besides use. Trees sequester carbon, filter air, provide shade, absorb water, and provide habitat. Agriculture improves soil fertility, manages water infiltration, reduces soil erosion, and provides habitat.

Harvesting natural resources can also have impacts on neighboring ecosystems, properties, and human health. Air pollution, erosion, and habitat loss are some of the more detrimental disturbances.

Identifying lands where humans should extract and use resources that will have less impact on the landscape and on other humans is an important part of planning. This section considers natural resources in Tumwater, their value for residents, and considers which lands are most appropriate for natural resource use in an urban area.

B. Urban Agriculture

1) Introduction

Protecting agricultural resource lands in rural areas is prioritized in the Growth Management Act. While Tumwater is developing to urban levels to protect the long-term sustainability of agricultural resource lands outside of the urban area, there are limited areas of Tumwater that currently contain agricultural uses.

Access to healthy food choices is an important public health issue. Lack of healthy food choices contributes to health problems such as obesity, diabetes, heart disease, and cancer. Access to healthy food and local food production are clearly part of planning for a vital, healthy community.

The Tumwater City Council's Strategic Plan has several goals and policies directly related to environmental sustainability and increasing the availability of healthy, locally grown food. Long distance transportation consumes an enormous amount of fossil fuel and generates a great deal of greenhouse gases. Increased local food production has a direct beneficial effect on the environment by reducing greenhouse gas emissions. Transportation costs are much lower for local food producers.

In addition, a direct benefit to the community is the provision of fresh, healthy, locally grown food. Encouraging a wide range of local food production options compatible with an urban environment are important policy decisions in furthering the sustainability goals of Tumwater.

2) Sustainable Urban Agriculture

Sustainable urban agriculture can take a variety of forms, some of which are listed below.

1. **Urban Farm.** An urban farm is where plants and/or some animals are grown for sale of the plants and animals or their products, and in which the plants and animals or their products are sold either on the lot where they are grown or off site, or both. Examples may include flower and vegetable raising, orchards and vineyards. Urban farms are small-scale agricultural uses that are appropriate for an urban area and compatible with other urban land uses.
2. **Community Garden.** A community garden means land managed by a public or nonprofit organization, or a group of individuals, which is used to grow plants and harvest food or ornamental crops from them for donation or use by those cultivating the land and their households.
3. **Individual Home Garden.** A home garden is a garden grown on a residential lot as an accessory use to the primary use for consumption by the occupants.
4. **Farmers Market.** A farmers market consists of a group of individual venders primarily selling locally grown produce and products drawn from the region. This use typically is seasonal and may be temporary. Some examples are set up on closed streets or on portions of sites used for other primary uses.

3) Agricultural Lands Classification

The Conservation Element's classification and identification of agricultural lands of long-term significance is based upon the land-capability classification system of the U.S. Department of Agriculture Handbook No. 210, which utilizes soil characteristics to determine capacity. The classes of agricultural lands are based upon consideration of growing capacity, productivity, and soil composition of the land.

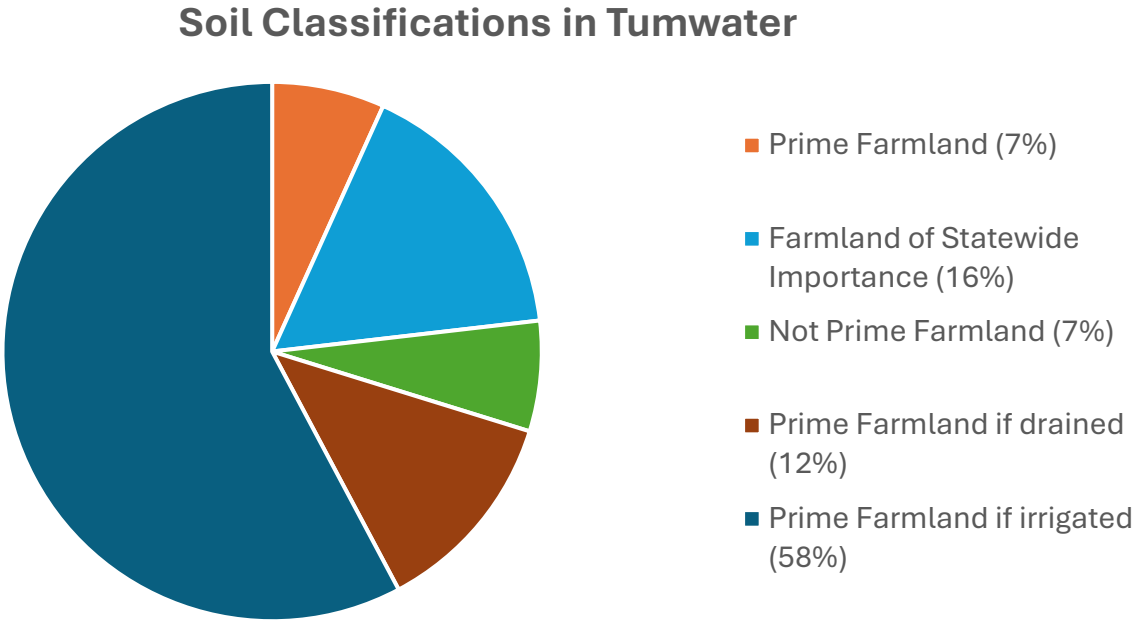
The reference standard for defining categories of agricultural lands of long-term significance is the use of prime and unique farmland soils classifications as mapped by the Natural Resource Conservation Service in the Web Soil Survey.

The Conservation Element recognizes that under the Growth Management Act, the prime agricultural lands in Tumwater and its urban growth areas have developed for urban uses in large part to protect the agricultural lands of long-term significance in rural Thurston County from development pressure.

These circumstances do not allow for a classification of agricultural lands of long-term significance to be applied to Tumwater or its urban growth area, which is intended for urban growth under WAC 365-190-050(3)(a).

4) Agricultural Lands Identification

The U.S. Department of Agriculture updates the soil classification and surveys annually. The



Natural Resource Conservation Service soil survey report for Tumwater is included as Appendix A.

The Natural Resource Conservation Service Soil Survey Report for Tumwater and its urban growth area provides information on the various soils as surveyed in the area. Classifications for soil are contained in the report as well as information about the characteristics of the soil and suitability for land use types. The percentage of prime soil, soils of state significance, and other agriculture land uses classes are provided in Table C-1 below.

While this information is valuable for open space and parcels without development, most of the soil in Tumwater is or will be covered by urban land uses. Information on soil is developed from the Natural Resource Conservation Service Soil Survey of Thurston County. Soils in the classifications including where drained and where irrigated were not included as those actions do not align with other conservation goals within this section.

Urban soils are separately identified as they have different characteristics than natural soils. Part of the reason for this is the impact of human activity from adding fill material to make it more suitable for specific development or to modify the landscape for specific activities.

Figure C-1. Agricultural Soil Classifications in Tumwater.

Source: Web Soil Survey, Natural Resources Conservation Service, U.S. Department of Agriculture. Accessed April 2025.

5) Current Agriculture Uses

Currently within Tumwater there are several agriculture operations identified by the State Department of Agriculture. Several landowners produce hay, pasture, lawn and turf, nursery, and other crops. One of two local farmstand and corn maze agritourism businesses and a grocery retailer focused on local food are located within Tumwater.

Due to the current use, there are parcels within Tumwater that are designated as agriculture and

are eligible for tax reduction programs through the State Department of Revenue.

This incentive-based program promotes the retention of lands used for agriculture by reducing the tax rate for these parcels and restricting the use to agriculture. Future landowners are deterred from changing the land use as doing so results in a penalty. Map C-1 shows the properties enrolled in these programs within Tumwater.

6) Small Scale Urban Agriculture

There are other land use factors that impact small scale agriculture in urban areas and should be considered when regulating food systems. Encouraging small-scale urban farms and community gardens is one way Tumwater can play a role in ensuring food access, food security, and overall environmental sustainability into the future.

While lands for agriculture can be found within Tumwater, the cost of land and the economic pressure for development make it difficult to sustain large scale agriculture businesses within Tumwater.

Existing Tumwater support for small scale agriculture includes:

- The Right-to-Farm Ordinance (Ordinance No. 1276, effective 1991) protected legally established agricultural facilities.
- The Urban Agriculture Ordinance (Ordinance No. O2010-029, effective 2011) established regulations for the following:
    - New agriculture uses are allowed within the Airport Related Industry, Light Industrial, Residential/Sensitive Resource, Single Family Low, Single Family Medium, and Multifamily Medium zone districts provided they are thirty acres or less in size that meet specific requirements.
    - Farmers markets as a permitted use in all commercial and industrial zone districts.
    - Community gardens as a permitted use in all residential, commercial, and industrial zone districts, except for the Manufactured Home Park zone district.
    - Permitting small scale farm animal options such as apiaries, poultry, and rabbits within Tumwater.
    - Taller fences for agricultural uses.

In 2024 the City Council approved a project to review the food system in Tumwater which included a review of regulatory barriers and prepare a plan to address next steps.

C. Forest Lands

1) Introduction

Protecting forest lands in rural areas is prioritized in the Growth Management Act. While Tumwater is developing to urban levels to protect the long-term sustainability of forest resource lands outside of the urban area, there are limited areas of Tumwater that are classified as forest resource

lands.

Applying best management practices on forest land creates environmental benefits such as:

- Improving water and air quality
- Reducing soil erosion
- Decreasing damage from storms and floods
- Protecting wildlife habitat
- Providing scenic and recreational spaces

2) Forest Lands Classification

The Growth Management Act requires Tumwater to classify current forest resource lands. The classification of the forest lands is based upon the private forest land grades of the State Department of Revenue (WAC 458-40-530).

This classification system incorporates consideration of growing capacity, productivity, and soil composition of the land. These factors are calculated and expressed as a site index. Forest lands of long-term commercial significance generally have higher private forest land grades. If lower private forest land grades exist within areas of predominately higher grades, the land may be designation as forest land.

Identifying lands suitable for forest land designation in Tumwater balanced the state requirement that growth occur in urban areas against the review of the dominant species and site index to determine the land grade. Table C-1 shows land grades for Western Washington forests.

Table C-1. State Private Forest Land Grades.

Washington State Species: Westside	Private Forest Site Index	Land Grade
Douglas Fir	136 feet and over	1
	118 to 135 feet	2
	99 to 117 feet	3
	84 to 98 feet	4
	Under 84 feet	5
Western Hemlock	136 feet and over	1
	116 to 135 feet	2
	98 to 115 feet	3
	83 to 97 feet	4
	68 to 82 feet	5
	Under 68 feet	6
Red Alder	117 feet and over	6
	Under 117 feet	7

Washington State Species: Westside	Private Forest Site Index	Land Grade
	Marginal forest productivity	7 or 8
	Noncommercial	8

Source: WAC 458-40-530

Notes: Land Grade 1 = highest, Land Grade 8 = lowest. The marginal forest productivity in Tumwater is Land Grade 8

Forest lands are further defined by operability classes based upon characteristics of soils and slope. The criteria are as follows:

- **Class 1 – Favorable**. Stable soils that slope less than thirty percent. Forest operations do not significantly affect soil productivity and soil erosion. Forest operations, such as road building and logging, are carried out with minimal limitations.
- **Class 2 – Average.** Stable soils that slope less than thirty percent, but on which significant soil erosion, compaction, and displacement may occur because of forest operations.
- **Class 3 – Difficult**. Soils with one or both of the following characteristics:
  a. Stable soils that slope between 30 and 65 percent; and
  b. Soils that slope between zero and 65 percent but display evidence that rapid mass movement may occur as a direct result of forest operations.
- **Class 4 – Extreme**. All soils that slope more than 65 percent.

3) Current Forest Land Use

Forestry occurs at many different scales in Tumwater. Common forestry activities include maintaining existing trees through pruning and non-native plant removal, planting new trees in parks and streetscaping, and tree removal.

Within Tumwater, there are also stands of trees which are currently used for commercial harvest. These stands of trees are harvested and replanted to harvest again in cycles to produce timber for the many wood products made, purchased, or used locally.

There are parcels within Tumwater that are designated for forestry use and are eligible for tax reduction programs through the State Department of Revenue Open Space Program. This incentive-based program promotes the retention of land used for forestry by reducing the tax rate for these parcels and restricting the use to agriculture.

Future landowners are deterred from changing the land use as doing so results in a penalty. Map C-2 and Table C-2 show the properties enrolled in these programs within Tumwater.

Thurston County Assessor public records show that seven parcels within Tumwater and its urban growth area are designated forest land. The total area of all designated forest land in Tumwater is 371.81 acres. More than half of the parcels are owned by a large timber company that manages many parcels for forest products.

There are also lands which are not identified by the assessor nor enrolled in the program where forest practices occur.

Table C-2. Forest Resource Land Identification.

Parcel Number	Parcel Area	Adjacent Land Use Designation	Adjacent Current Land Use
11718330000	37.95	Low Density Residential, Neighborhood Commercial, Open Space	Residential
12721330000	38	Light Industrial	Residential, Commercial, Industrial
12820340000	120	Light Industrial, Low Density Residential, Heavy Industrial	Natural Resource, Residential
12829210000	30	Light Industrial, Low Density Residential, Heavy Industrial	Natural Resource, Residential
12829230000	120	Light Industrial, Low Density Residential, Heavy Industrial	Natural Resource, Residential
12829410000	16.01	Green Belt, Low Density Residential, Light Industrial	Residential, Parks, Vacant
12832420500	9.85	Low Density Residential	Residential, Vacant, Commercial, Industrial, Utilities
51620100100	9.59	Light Industrial	Residential, Commercial, Industrial

Sources: Thurston County Assessor and Thurston Regional Planning Council, 2025.

4) Forest Lands Conservation

Development and urbanization are the leading causes of forest lands conversion. The Growth Management Act protects forest resources in the rural areas by directing urban development within Tumwater and its urban growth area.

Table C-2 shows the conditions for conversion of forest lands to urban land uses.

Table C-3. Forest Lands Designation Considerations.

Considerations	Tumwater Conditions
The availability of transportation and other necessary public services and facilities	Services and facilities available
Forest lands are located outside the urban and suburban areas and rural settlements	Located within an urban area
Parcel size: forest lands consist of predominantly large parcels	Parcels identified are small to medium in size
The compatibility of adjacent and nearby land use and settlement patterns with forest lands of long-term commercial significance	Adjacent land uses of urban land use intensity
Property is assessed as open space or forest land	Seven parcels identified

pursuant to Chapter 84.33 RCW or Chapter 84.34 RCW	
Local economic conditions	Not supportive in the long term of forest land designation
History of land development permits issued nearby	Parcels harvested under state conversion permits are processed by Tumwater

5) Forest Lands in the Urban Area

The Growth Management Act (WAC 365-190-060(2)) locates forests of long-term commercial significance outside of urban growth areas. Forest lands in Tumwater and its urban growth area are not considered in the Conservation Element to be of long-term significance and are not planned for designation as protected resource lands.

Tumwater continues to manage urban forest resources for the many benefits they provide to residents and the larger region. Several goals and policies in the Comprehensive Plan align urban forest practices with other planning requirements and community interests.

While no forest lands of long-term significance are currently identified, the parcels of land that are currently forested are encouraged to remain forested for their environmental and open space benefits, as long as possible, before conversion to urban land uses.

6) Urban Forestry Management Plan

The Tumwater Urban Forest Management Plan establishes goals to ensure healthy trees on Tumwater's urban landscape into the future. The Plan identified a number of action items to support its goals, which include:

- Restore and enhance the community and urban forest.
- Protect and preserve the community and urban forest, which includes trees, understory, habitat, and soils.
- Balance the protection and support of the community and urban forest with other City strategic priorities, which include, in part, providing affordable housing, developing a walkable urban community, economic development, addressing climate change, and protecting endangered species.

C. Mineral Resource Lands

1) Introduction

While metallic, nonmetallic and coal are found and mined in the state, currently the most valuable mineral resource is aggregate. Gravel, sand, and crushed stone are examples of aggregate resources used for transportation, residential, commercial, and industrial construction. The state is the seventh highest sand and gravel producer in the nation. Identifying and conserving local sources for aggregate is important since hauling these materials requires large amounts of fuel due to the weight and heavy vehicle route maintenance.

As with other types of resource lands discussed in this plan, the identification and conservation of mineral resource lands is a requirement of the Growth Management Act. The Conservation Element identifies and classifies mineral resource lands from which the extraction of minerals currently occurs or may occur in the future as well as a strategy to ensure a future supply of these minerals is maintained.

2) Mineral Resources Lands Classification

In defining what lands qualify as mineral resource lands, the Conservation Element bases its methodology upon WAC 365-190-070(3) with modification to include consideration of environmentally sensitive areas, existing land uses, and land ownership.

Tumwater classifies mineral resource lands using the following minimum guidelines:

- **Geology** – The land in question should contain deposits consisting of sand and gravel, coal, sandstone, basalt, or other igneous rock that is recoverable and marketable, based on U.S. Geological Survey maps or site-specific information prepared by a geologist, or as indicated by the State Department of Natural Resources mining permit data.
- **Projected Life of the Resource** – To be designated as mineral resource land there should be sufficient mineral resource to be commercially sustainable for a number of years under market conditions present when the designation is being considered.
- **Proximity to Point of Use or Market** – Consideration for the energy cost of transporting the extracted materials to the market or end user.
- **Infrastructure** – Consideration for the availability of public roads and whether there is a source of water.
- **Current and Future Land Use** – Extractive industries should locate where prime natural resource deposits exist, provided these sites are separated by buffer strips from existing residential areas and restored for appropriate re-use after removing the resource material.

When classifying these areas, maps and information on the location and extent of mineral deposits provided by the State Department of Natural Resources, U.S. Geological Service and any relevant information provided by property owners should be utilized. Critical areas, other environmentally sensitive areas, and cultural resources are also important criterion to consider.

3) Mineral Resources Lands Identification

The Conservation Element identifies lands with long-term commercial significance for extracting mineral resources.

The State Department of Natural Resources maintains maps and classification systems for mineral resources which aligns with state guidance for mineral lands designation in WAC 365.190.040(4) and WAC 365.190.070(3). Aggregate Resource Maps are made using existing geologic maps, subsurface data, materials-testing data, and publicly available mining data to classify potential sources of aggregate. These classifications vary based on size, quality, and uncertainty of the resource. Table C-4 and Map C-

3 show the mineral resources in Tumwater and its urban growth area.

Table C-4. Mineral Resource Land Identification.

Parcel Number	Parcel Area	Adjacent Land Use Designation	Adjacent Current Land Use
11706320100	23.75	Open Space	Natural Resource, Undeveloped Land
11706330000	21.85	Open Space	Natural Resource, Undeveloped Land
11706330100	42.28	Open Space	Natural Resource, Undeveloped Land
12713240100	13.03	Open Space, Light Industrial, Low Density Residential	Parks, residential, Undeveloped Land
12715120900	6.00	Light Industrial, Medium Density Residential, Low Density Residential	Natural Resource
12829120200	15.03	Light Industrial, Heavy Industrial	Commercial, Industrial, Natural Resource
12829130200	3.74	Heavy Industrial, Light Industrial Green Belt	Natural Resource, Undeveloped Land
12829130201	9.10	Heavy Industrial, Light Industrial Green Belt	Natural Resource, Undeveloped Land
12829130202	0.90	Heavy Industrial, Light Industrial Green Belt	Natural Resource, Undeveloped Land
12829130203	5.81	Heavy Industrial, Light Industrial Green Belt	Natural Resource, Undeveloped Land
12829210100	10.06	Heavy Industrial, Light Industrial	Natural Resource,
12829310000	36.57	Heavy Industrial, Light Industrial, Low Density Residential	Natural Resource, Undeveloped Land, Commercial, Industrial
12829320200	27.40	Heavy Industrial, Low Density Residential	Natural Resource, Undeveloped Land
12829320201	12.72	Heavy Industrial, Low Density Residential	Natural Resource, Undeveloped Land
12829340200	4.97	Heavy Industrial, Low Density Residential	Natural Resource, Undeveloped Land, Commercial, Industrial
63050001900	13.55	Light Industrial	Natural Resource, Commercial, Industrial, Residential, Undeveloped Land

Sources: Thurston County Assessor and Thurston Regional Planning Council, 2025.

In Tumwater, the Heavy Industrial land use designation and associated zoning district was specifically created to support the existing rock quarry use on Black Lake Boulevard. New mineral extraction uses are not permitted anywhere else in Tumwater.

Mineral resource lands identified are subject to consideration of the effects of proximity to population areas and the possibility of more intense uses of land as shown in Table C-5.

Table C-5. Considerations for Mineral Lands Designation in Tumwater.

Considerations for Mineral Lands Designation	Conditions in Tumwater
General land use patterns in the area	Urban
Availability of utilities	Available
Availability and adequacy of water supply	Available
Surrounding parcel sizes and surrounding uses	Small-medium sized parcels, land uses industrial and commercial in nature
Availability of public roads and other public services	Available
Division or zoning for urban or small lots	Yes
Accessibility and/or distance from point of use	Close to use sites
Physical and topographic characteristics of the mineral resource site	Accommodating to low operating costs
Depth of the resource	Exposed at surface
Depth of the overburden	Exposed materials
Physical properties of the resource	High grade gravel, sand, and rock
Life of the resource	10 to 100 years
Resource availability in the region	Good for sand/gravel, limited to rock
Surrounding critical areas	Site by site variation
Impact to endangered species habitat	Site by site variation
Energy costs of transporting minerals	Dependent upon location

4) Mineral Resources Lands Protection

TMC Chapter 16.16 protects legally established mineral resource extraction facilities.

Future discoveries of mineral resources, or market conditions that are conducive, may encourage the opening of new mineral resource extraction operations. What or where these facilities would be located cannot be accurately gauged. A newly established mineral resource extraction facility must be a land use identified within the land use designations and zone districts applying to the site.

3. Critical Areas

A. Background

Tumwater's environment is comprised of both natural and built features. Lakes, mature trees, steep slopes, natural vegetation, streams, wetlands, and prairies are parts of the natural environment within Tumwater. Tumwater's history and name reflects the importance of the natural environment to the community identity.

As the need for more jobs, housing, public services, transportation, utilities, and recreation increase, the protection of the natural environment becomes more important.

Tumwater must continually assess the relationship between the natural and built environments and evaluate the potential impacts of development on the environment and the community. Maintaining a quality natural environment in Tumwater depends on coordinated actions between government, the private sector, and individuals.

The Conservation Element guides City effort to balance nature and community, creating a path to sustainable growth. It is intended to meet the objectives of the Growth management Act, the federal Endangered Species Act, State Environmental Policy Act, County-Wide Planning Policies for Thurston County, and other applicable federal, state, and county policies.

This Element also provides guidance for reducing the risks to people, property, and the environment posed by geological and flood hazard areas. Tumwater's Appendix to the Thurston County Hazard Mitigation Plan provides additional mitigation strategies and background information about natural hazards.

TMC Title 16 promotes the maintenance, enhancement, and preservation of critical areas and environmentally sensitive natural systems by avoiding or minimizing adverse impacts from construction and development.

Under the Growth Management Act, Tumwater is required to use the best available science when reviewing and revising policies and regulations for critical areas. The plans and regulations designed to protect critical areas are not intended to deny reasonable use of private and public property, but to assure that development on or near critical areas is accomplished in a manner that is sensitive to the environmental resources of the community.

B. Wetland Areas

1) Introduction

Wetlands serve many important ecological functions. They act as natural reservoirs for flooding and stormwater runoff; protect water quality by filtering out pollutants; help stabilize shorelines; provide areas for groundwater recharge; provide fish and wildlife habitat; provide open space and recreation opportunities; and provide areas for scientific study and education.

Wetlands preservation can significantly reduce public and private costs associated with

downstream flooding, poor water quality, and diminished wildlife habitat.

Through the Conservation Element and associated regulations, Tumwater will:

- Preserve, protect, manage, and regulate wetlands for the purpose of promoting public health, safety and general welfare while conserving fish, wildlife, and other natural resources;
- Protect the ecological and economic benefits to the public of wetlands functions and values;
- Regulate property use and development to maintain the natural and economic benefits provided by wetlands;
- Protect private property rights consistent with the public interest; and
- Provide for protection against direct and indirect wetlands impacts by providing regulatory authority for management of wetland buffers.

It is the short-term goal of this policy to achieve no net loss of the remaining wetlands in Tumwater, defined by acreage and function. It is the long-term goal to improve the health of Tumwater's existing wetlands and create wetlands, where feasible, to increase the quantity and quality of wetlands in Tumwater.

2) Wetland Values and Benefits

Wetlands serve many important ecological functions. A summary of wetland benefits follows:

- Wetlands slow and store floodwater. Riverine wetlands and floodplains provide flat areas where floodwaters can spread out and slow down, reducing the height and velocity of floods. Floodwater trapped in wetlands may then slowly drain, reducing stream bank erosion and downstream peaks.
- Wetlands provide erosion control for shorelines by dissipating the water's energy and stabilizing shorelines with the root systems of plants commonly found in wetlands.
- Wetlands improve water quality by their ability to filter out sediments, nutrients, and toxic chemicals. Moving water carries suspended sediments and other materials. As the water enters a wetland and slows down, these sediments tend to settle down. The sediments are then trapped by wetland vegetation, which in turn reduces the amount of siltation deposited in lakes and reservoirs.
- Wetlands allow water to soak into the underlying soil, which adds to the supply of groundwater.
- Wetlands provide essential areas for waterfowl and migratory shorebirds to rest and feed.
- Wetlands provide essential escape covers and feeding, nesting, and breeding habitat for many species of fish and wildlife, including the Oregon spotted frog. Wetland plants help protect juvenile fish, thereby serving to increase the anadromous fish population.
- Wetlands furnish areas for education and research of a variety of flora and fauna that cannot be found in other

environments.

- Wetlands provide open space and recreation opportunities, including fishing, hiking, boating, and bird watching.

3) Existing Wetland Policies, Regulations, and Inventories

Several federal, state, and local wetland policies, regulations, and inventories currently form a patchwork for wetlands protection.

a) Federal Clean Water Act

The Federal Clean Water Act is a broad-based law covering water pollution control in general. Section 404 of the Act requires the Army Corp of Engineers to regulate the dredging and filling of waters of the United States, including the tributaries and wetlands. However, the dredging, draining or land clearing of wetlands without a nexus to waters of the United States, including their tributaries and wetlands, is not addressed by the Act.

b) State Shoreline Management Act

The State Shoreline Management Act regulates activities in shorelines of the state, which include lakes over 20 acres in size, rivers, and streams with flows more than 20 cubic feet per second (c.f.s.), and all lands within 200 feet of the ordinary high water mark and any wetlands, floodways, and/or floodplain areas associated with such waters.

The Act excludes wetlands not associated with shorelines of the state, including isolated wetlands and riparian wetlands associated with lakes less than 20 acres and streams with flows less than 20 c.f.s. It also exempts most agricultural and forest practices from permit requirements.

Tumwater adopted an updated Shoreline Master Program in April 2014, and it was subsequently amended on December 3, 2019.

Tumwater's Shoreline Master Program requires that wetland buffers be determined by the category and function level of the wetland as stated in the version of TMC Chapter 16.28 adopted as part of the Shoreline Master Program.

c) State Hydraulics Code

Any work that uses, diverts, obstructs, or changes the natural flow or bed of any salt or freshwaters of the state requires Hydraulics Project Approval. The State Department of Fish and Wildlife administers the State Hydraulics Code through Hydraulic Project Approval process. The intent of the Code is to protect fish and fish habitat.

Wetlands outside the ordinary high-water mark and isolated wetlands without fish life are excluded. A Hydraulic Project Approval does not address impacts to wetland functions and values other than fish and fish habitat.

d) State Wetland Rating System for Western Washington

The manual is currently the definitive methodology for determining when a wetland is present and where a wetland boundary is located. It is based on the functional values present in the wetland, sensitivity to disturbance, significance, rarity, and ability to replace. The use of the most current manual during project review is consistent with using the best available science.

e) National Wetlands Inventory

Conducted on a national level using aerial photographs, the National Wetlands Inventory depicts wetland locations, approximate boundaries, and includes classification by wetland type. The inventory is available for Tumwater, but

it should not be presumed to locate every wetland area in Tumwater. Often the only reliable method for wetland identification is a site visit by a qualified wetland biologist following the process in TMC Chapter 16.28. This is typically done in conjunction with a development proposal.

f) Wetland Mapping for the Thurston Region

The Thurston Regional Planning Council has identified wetlands in Thurston County based on color infrared aerial photographs. In many cases, the results of aerial photography have been verified by field surveys. The result is digitized maps showing wetlands boundaries and types. This inventory must be supplemented with site specific field surveys to verify wetland boundaries at the time of development permit review.

g) Environmental Policy

TMC Chapter 16.04 adopts the State Environmental Policy Act with amendments. The intent of this code is to identify and if necessary, mitigate the environmental impacts associated with a variety of actions.

h) Wetlands Protection Standards

TMC Chapter 16.28 establishes standards for the protection of wetlands. Wetlands in Tumwater are regulated under this chapter. Exemptions include intentionally created wetlands, such as stormwater treatment ponds, and certain unintentionally created wetlands.

i) Protection of Trees and Vegetation

TMC Chapter 16.08 regulates the clearing of land in Tumwater, including trees and vegetation located in wetlands. The Urban Forestry Management Plan was adopted on March 2, 2021. The intent of the plan was to guide policies and implementation actions for the maintenance and improvement of the urban tree canopy in Tumwater over the next 20 years.

j) Floodplain Regulations

Floodplains are regulated by TMC Chapter 18.38. The Floodplain Overlay prohibits or strictly limits filling and development in designated floodplains, including wetlands located within these areas. This reduces the height and velocity of floods and lessens bank erosion.

4) Wetland Protection Areas Classification

The Growth Management Act requires Tumwater to classify wetlands according to their sensitivity to disturbance, rarity, functions, and irreplaceability. Tumwater uses the *Washington State Wetland Rating System for Western Washington* for classifying wetlands as outlined below, which is further identified in TMC Chapter 16.28.

5) Wetland Identification

Identification of wetlands is undertaken by the permit application at the time an application for development is made, using the *Washington State Wetland Rating System for Western Washington* in its current form, and as hereafter amended.

6) Wetland Protection Techniques

Techniques used to protect wetland areas include:

- Using the *Washington State Wetland Rating System for Western Washington* for wetland classification based on function and value.
- Requiring a qualified wetland biologist to

determine wetland type and boundary for development sites containing wetlands.

- Establishing wetland buffers based on the relative value of the wetland in which no development or disturbance should occur.
- Striving to achieve no net loss of wetland areas and functions.
- Striving to create wetlands in the long term, where feasible, to increase the quantity and quality of wetlands.
- Attempting to avoid impacts to wetlands altogether if practicable.
- If impact avoidance is impossible, attempting to reduce wetland impacts through mitigation.
- If impact avoidance and reduction are impossible, accomplishing wetland compensation.
- Providing education on the value of wetlands to developers and homeowners.

7) Wetland Protection

WAC 365-190-040(1) states that when critical areas, including wetland areas, cannot be readily identified, these areas should be designated by performance standards or definitions. In this way, such areas can be specifically identified during the processing of a site-specific permit or development authorization.

For the purposes of wetland protection, a performance standard based process is followed.

The wetland protection standards in TMC Chapter 16.28 classify, designate, and protect wetlands and their associated buffers from on-site and off-site activities impacts. These regulations have provisions for reasonable wetland buffer areas and the means for avoidance and reduction of wetland impacts. Attributes of the wetland protection standards in TMC Chapter 16.28 include the following.

a) Wetland Buffer Areas

Wetland buffer areas are required to be adjacent to regulated wetlands to protect wetland functions and values. All wetland buffer widths are measured from the wetland boundary as established by a field survey conducted by a qualified wetland biologist. Wetland buffers are the primary means by which wetland functions and values are protected.

Wetland buffer widths may be increased, reduced, or averaged on a case-by-case basis in accordance with best available science when an altered buffer is necessary to protect wetland functions and values in accordance with TMC Chapter 16.28.

b) Wetland and Wetland Buffer Areas – Allowed Activities

Certain limited low-intensity activities may be permitted in wetland buffer areas without a wetlands permit provided that these activities are not prohibited by any other chapter or law, and they are conducted using best management practices, such as:

- Conservation or preservation of soil, water, vegetation, fish, shellfish, and other wildlife that does not entail changing the structure or functions of the existing wetland.
- Outdoor recreational activities, including fishing, bird watching, hiking, boating, horseback riding, swimming, canoeing, and bicycling.

- The harvesting of wild crops in a manner that is not injurious to natural reproduction of such crops and provided the harvesting does not require tilling of soil, planting of crops, or alteration of the wetland by changing existing topography, water conditions, or water sources.
- The maintenance of drainage ditches.
- Education, scientific research, and use of nature trails.
- Navigation aids and boundary markers.
- Site investigative work necessary for land use application submittals such as surveys, soil logs, percolation tests, and other related activities. In every case, wetland impacts should be minimized and disturbed areas should be immediately restored.
- Normal maintenance, repair, or operation of existing serviceable structures, facilities, or improved areas. Maintenance and repair do not include any modification that changes the character, scope, or size of the original structure, facility, or improved area and does not include construction of a maintenance road.
- Minor modification of existing serviceable structures within a buffer where modification does not adversely impact wetland functions.

C. Critical Aquifer Recharge Areas

1) Introduction

All of Tumwater's drinking water supply comes from underground aquifer areas. The goal of establishing Critical Aquifer Recharge Areas is to protect the functions and values of Tumwater's drinking water by preventing pollution and maintaining supply.

Tumwater's water comes from underground

c) Reasonable Use of Wetlands and Wetland Buffers

Following state law, if an applicant for a proposed development demonstrates that application of these regulations would deny all reasonable use of the property, conditioned development may be allowed if the applicant demonstrates that the criteria in TMC Chapter 16.28 are met.

d) Wetland Replacement Ratios

As a condition of any permit allowing alteration of wetlands or wetland buffers, the applicant should engage in the restoration, creation, or enhancement of wetlands and their buffers to offset loss of wetland function and value. It is recognized that the alteration of wetlands and/or wetland buffers is not desirable. Creation, restoration and enhancement of wetlands or wetland buffers are extremely difficult to achieve. Wetland alteration should only occur when impact avoidance and reduction are impossible.

Wetland restoration, creation, and enhancement acreage replacement ratios are identified in TMC Chapter 16.28.

8) Wetland Enhancement

The Growth Management Act requires that Tumwater not only protects but enhances its critical areas. As part of that process, the Conservation Element's goals, policies, and implementation actions in Part 1 address how Tumwater will be enhancing wetland resources.

aquifers, which are gravel formations below the ground that hold water. These aquifers are replenished by rain and snow as they infiltrate through the ground and are filtered by the soil and trillions of microbes. The many layers of soil, rock, and microbes that sit above the aquifers act to cleanse the water as it passes and helps prevent contamination from the surface.

Tumwater's water system draws water out of these aquifers from multiple sources located around the City. As the water seeps into the aquifers, contaminants from above-ground activities can get into the water. Critical aquifer recharge areas are areas identified where groundwater seeps through the layers and collects. Certain land uses and organic and inorganic materials must be regulated to protect the water and keep it safe.

Public drinking water supply systems are regulated by the State Department of Health under the Safe Drinking Water Act. Generally, the state regulates systems with 15 or more residential connections, known as a Group A system.

Tumwater coordinates with Thurston County Environmental Health to monitor groundwater and report on conditions, including notification of any identified hazards. Periodic inspections have also been completed every few years of businesses that use hazardous materials onsite to ensure they are handled, stored, and disposed of properly.

2) Critical Aquifer Recharge Area Classification

The Growth Management Act requires Tumwater to protect public groundwater supplies so contamination can be avoided. Drinking water depends on groundwater availability, and so the amount of water in aquifers must be monitored to ensure water sources are replenished and are not depleted.

In addition, Chapter 246-290 WAC requires water protection and standards that address vulnerable sources of drinking water, such as Tumwater's Wellhead Protection Program.

All groundwater is vulnerable. Using criteria to create classifications or categories of vulnerability helps Tumwater apply the appropriate measures for the risks involved. Vulnerability is the combined effect of hydrogeologic susceptibility to contamination based on characteristics of the aquifer and the contamination potential.

Vulnerability and hydrogeologic susceptibility to contamination can be determined by using the guidance in WAC 365-190-100(a), such as the following:

- Depth to groundwater.
- Aquifer properties such as hydraulic conductivity, gradients, and size.
- Soil, including texture, permeability, and contaminant attenuation properties.
- Characteristics of the vadose zone including permeability and attenuation properties.
- Other relevant factors.

The following have been considered to evaluate vulnerability based on the contaminant loading potential outlined in WAC 365-190-100:

- General land use.
- Waste disposal sites.

- Agriculture activities.
- Well logs and water quality test results.
- Proximity to marine shorelines.
- Other information about the potential for contamination.

The goals of Tumwater's classification strategy for critical aquifer recharge areas and wellhead protection are to maintain the quality of the groundwater effectively by preventing contamination, with particular attention to recharge areas of high susceptibility. Classification of these areas includes:

- Consideration of the degree to which the aquifer is used, now or in the future, as a potable (drinking) water source.
- Protective measures to preclude further degradation.
- Practicability of treatment measures to maintain potability.
- Availability of alternative potable water sources.
- The degree of sensitivity of contaminants entering the aquifer.

The aquifers within Tumwater provide drinking water and require an Aquifer Protection Overlay based on TMC Chapter 18.39. The intent of the Aquifer Protection Overlay is to identify, classify, and protect critical aquifer recharge areas within Tumwater and its urban growth area. This overlay imposes additional restrictions on development in order to protect public health and safety by preserving the existing and future groundwater supply for Tumwater and its urban growth area.

TMC Chapter 16.24 regulates land uses and activities within the critical aquifer recharge areas. These areas are identified using a mapping system, Geodata, maintained by Thurston County. There are three levels of critical aquifer recharge areas, TMC Chapter 16.24 standards apply to all critical aquifer recharge area designations.

Wellhead protection areas are the surface and subsurface areas surrounding a well or well field of a public water system. These areas have higher vulnerability to contamination from potential land uses. They are classified or rated by the amount of time it would take groundwater to reach a pumping well.

Tumwater's wellhead protection areas are divided into six-month, one-year, five-year, and ten-year time of travel zones. A raindrop landing in the one-year time of travel should reach the well within one year. These areas have extra protections and regulations found in TMC Chapter 16.26. Wellhead protection areas and the Aquifer Protection Overlay are identified using Thurston County Geodata maps.

3) Critical Aquifer Protection Concerns

Concerns about ground water in Tumwater and the Thurston region, in general, include:

- Few alternative sources of drinking water exist.
- Geological conditions in the region leave aquifers unprotected and ground water extremely vulnerable to pollution.
- Septic systems, stormwater runoff, chemical spills, pesticides, and fertilizers can add contaminants to ground water.
- Though the region's ground water is

generally of good quality, it is showing increasing effects of human activities.

- Urbanization and population growth are placing increased demands on limited ground water resources.

Potential sources of ground water pollution include pesticides and fertilizers, septic systems, hazardous materials, contaminated storm water and leaking underground storage tanks.

Gas stations and other land uses that utilize hazardous chemicals are prohibited within the one year and six-month wellhead protection areas. The types of hazardous chemicals that need to be addressed are defined in TMC Chapter 16.24 Aquifer Recharge Standards and TMC Chapter 16.26 Wellhead Protection Standards and are updated based on adopted federal and state standards, whichever is more stringent.

Wellhead protection areas are the surface or subsurface areas surrounding municipal water wells or well fields through which contaminants are reasonably likely to move toward and reach such water well or well field within six months, one year, five years, and ten years.

4) Wells and Critical Aquifers in Tumwater

a) Bush Wellfield

The Bush Wellfield is located in southwest Tumwater, near George Washington Bush Middle School. The wellfield is currently Tumwater's largest producer of drinkable water.

b) Lakeland Manor Water System

The Lakeland Manor Water System is operated and maintained by Tumwater, but it is a Satellite Management Water System that is a separate system from Tumwater's main distribution system. All drinking water for Lakeland Manor comes from its own well located on 60th Avenue Southwest. Tumwater provides an emergency interconnection with Lakeland Manor, if the well were to lose power or experience another emergency, the development will receive water from Tumwater's main distribution system.

c) Palermo Wellfield

Tumwater's Palermo Wellfield is one of Tumwater's oldest and most important wellfields, and up until the early 1990s, provided close to 100 percent of Tumwater's drinking water. Palermo wells deliver high quality groundwater from six wells to customers throughout Tumwater, blending with water from Tumwater's Bush and Port Wellfields. To help keep the water clean, Tumwater has implemented aeration treatment, which is suitable for removing volatile organic compounds coming from the Southgate and Littlerock Road and Trosper Road areas.

d) Port Wellfield

Tumwater operates several wells in the general area of the Olympia Airport and Israel Road. Many of these wells and the associated water rights were acquired by Tumwater from the Port of Olympia in 1991. As with the Palermo water rights, in 2001 Tumwater negotiated with the State Department of Ecology to review the quantities associated with previously issued water rights and determine whether the amounts were correctly established. As a result, the State Department of Ecology issued a superseding permit that increased Tumwater's water right portfolio.

e) Olympia Brewery Wellfield

The Olympia Brewery Wellfield does not currently provide drinking water to the Community of Tumwater, but it is an aquifer within Tumwater that has been carbon dated to be over 3,000 years old. It is part of the Tumwater Sand unit of the Vashon recessional outwash formation.

5) Critical Aquifer Protection

Wellhead protection is a high priority. Tumwater's first wellhead protection areas were drawn in 1997 and adopted the Wellhead Protection Ordinance. There have been many changes to the wellhead protection ordinance as water protection updates were needed, and Tumwater acquired more wells.

In 2016, Tumwater completed a new Wellhead Protection Area Plan. This plan included new groundwater flow technology which more accurately drew the protection areas. The program identifies risks of contamination with potential to impact city wells. Once identified, it finds ways to reduce or eliminate those risks. The ordinance also defines what development and/or uses within the wellhead protection areas are allowed. For example, the ordinance does not allow dry cleaners to use chemical cleaning methods on site within the designated six-month and one-year wellhead protection areas.

Tumwater also has a wellhead protection program that supports Tumwater's mission of keeping high quality drinking water. This program ensures businesses who use, store, and dispose of hazardous materials do so in the safest manner possible. City staff work with Thurston County Environmental Health to inspect and educate businesses about proper material storage and disposal.

Quarterly groundwater monitoring is conducted at wells throughout the wellhead protection areas. Tumwater's well monitoring network serves as an early warning system against issues that could impact Tumwater's drinking water. If the system detects contamination, Tumwater can take measures to lessen the impact.

To help educate and inform the public on the importance of water protection and best practices, the Water Resources & Sustainability Department maintains a website with maps, information, and a quarterly "One Water Newsletter."

The Tumwater aquifer protection classification regime measures susceptibility to pollution in terms of vulnerability. TMC Chapter 16.24 and TMC Chapter 16.26 protect areas of high vulnerability through the Aquifer Protection Overlay, which is geographically applied Citywide. In addition, these chapters maintain specific standards applied citywide.

D. Frequently Flooded Areas

1) Introduction

Protection of life and property during floods is a vital part of Tumwater's responsibility to public safety. Many of Tumwater's rivers, streams, and lakes are subject to flooding during periods of heavy rainfall.

Tumwater has had extensive research and study completed regarding frequently flooded areas within Tumwater. Since August of 1980, Tumwater has participated in the National Flood Insurance Program, as authorized by the National Flood Insurance Act of 1968, and updated its Floodplain Ordinance in 2024.

2) Frequently Flooded Areas Classification

The Growth Management Act requires Tumwater to classify frequently flooded areas known as the 100-year floodplain based on the one percent flood designations of the Federal Emergency Management Agency and the National Flood Insurance Program. In addition, the Act requires Tumwater to provide guidance for corrective actions to mitigate or cleanse those discharges that pollute the waters of the state.

Tumwater considered the following when designating and classifying frequently flooded areas:

1. Effects of flooding on human health and safety, and to public facilities and services.
2. Available documentation, including federal, state, and local laws, regulations, and programs, local studies and maps, and federal flood insurance programs.
3. Future flow floodplain, defined as the channel of the stream and that portion of the adjoining floodplain that is necessary to contain and discharge the base flood flow at buildout without measurable increase in flood heights.
4. The potential effects of tsunami, high tides with strong winds, sea level rise resulting from global climate change.
5. Greater surface runoff caused by increasing impervious surfaces.

The frequently flooded areas within Tumwater are mainly along the Deschutes River and valley. Other areas include Trosper Lake, Barnes Lake, Munn Lake, and Black Lake. City staff utilize Thurston County Geodata mapping, which was updated May 8, 2024, to match the 2024 Flood Insurance Study and Flood Insurance Maps for Thurston County, completed by Federal Emergency Management Agency and adopted by Tumwater to locate frequently flooded areas.

3) Frequently Flooded Areas Concerns

Concerns about frequently flooded areas in Tumwater include:

1. Heavy rains project to increase from climate change can cause sudden river and stream rises and out-of-bank flows.
2. Out-of-bank flows can cause damage to life, dwellings, and industrial, commercial, agricultural, recreational facilities, and Tumwater owned utilities such as drinking wells.
3. Groundwater flooding of low-lying areas

when there is higher than normal precipitation.

4) Frequently Flooded Areas Protection

Tumwater last updated its Floodplain Overlay Ordinance in 2024. Ordinance No. 02023-017 amended floodplain regulations to be more consistent with the state model ordinance for Floodplain Management under the Nation Flood Insurance Program and the Endangered Species Act.

Continued enforcement of the floodplain management ordinance allows Federal Emergency Management Agency to make federally backed flood insurance available to property owners within Tumwater. Properties mapped in the Floodplain Overlay are subject to the regulations in TMC Chapter 18.38 to protect life and property.

In 2023 Tumwater adopted the fourth edition of the Hazards Mitigation Plan. This plan includes the Tumwater Appendix and outlines in detail the extent, impacts, risks, and mitigation measures to protect against damage from floods.

5) Flood Insurance Maps

Flood Insurance Rate Maps from the Federal Emergency Management Agency clearly delineate frequently flooded areas. These maps are used to designate the Floodplain Overlay. The Flood Insurance Rate Maps and Flood Insurance Study were updated in 2024.

The Floodplain Overlay identifies and defines the special flood hazard area within Tumwater, which is the area subject to flooding by the base flood and subject to the provisions of TMC Chapter 18.38. The Floodplain Overlay has served Tumwater well in minimizing the undesirable impacts of flooding.

Frequently flooded areas are identified by the Federal Emergency Management Agency in a scientific and engineering report entitled, "Flood Insurance Study for Thurston County, Washington and Incorporated Areas," dated May 8, 2024, and any revisions thereto, with an accompanying Flood Insurance Rate Map for Thurston County, Washington and Incorporated Areas, dated May 8, 2024, and any subsequent revisions.

The methodology and detail of these studies is accepted as best available science. TMC Chapters 16.28 and 18.38 serve to designate frequently flooded areas. If allowed, any structures permitted in the designated flood areas are subject to strict development regulations. The existing regulations were put in place after careful study, and they fulfill the requirements of the Growth Management Act regarding designation, classification, and protection of frequently flooded areas.

6) Salmon Creek Groundwater Flooding

Above average rainfall caused localized flooding in Salmon Creek Basin in the rainy seasons of 1996-97 and 1998-99. Property owners experienced a range of inconveniences from high water around and under homes to failed septic systems, contaminated drinking water, and restricted access to property. Salmon Creek Basin is located in Thurston County, Washington, in the southern portion of Tumwater.

The basin is relatively flat and slopes gently toward Salmon Creek, which flows into Black River. The basin boundary encompasses

approximately 12 square miles (7,500 acres) from the Tumwater on the northern boundary, to 113th Avenue on its southernmost edge. The western boundary lies along Littlerock Road, and the eastern boundary extends just past Brooks Lane. The area of the basin is defined by the surface and groundwater sources that contribute to recharge of Salmon Creek.

A comprehensive study of the area was completed in late 1999. As a result, Tumwater and several other jurisdictions in Thurston County completed and adopted the Salmon Creek Comprehensive Drainage Basin Plan.

The development review process within the Salmon Creek Comprehensive Drainage Basin Plan was adopted by resolution but Tumwater and was incorporated into the Drainage Design and Erosion Control Manual for Tumwater, WA.

E. Geologically Hazardous Areas

1) Introduction

The Conservation Element defines geologically hazardous areas as those areas susceptible to erosion, landslides, earthquakes, and other geological events, which pose a threat to public safety. This section discusses the proper design and location of development to remove or reduce incompatibility with underlying geology. Appropriate engineering, design, or construction can be used to achieve this goal of land use and geological harmony.

It must also be recognized that even the best of efforts in proper design and application of technology, at times, will not adequately reduce the risks of geological damage. In these instances, building in such extreme geologically hazardous areas should be avoided.

2) Geologically Hazardous Areas Classification

Areas in Tumwater that are prone to one or more of the following hazards are defined as geologically hazardous:

1. Erosion.
2. Landslides.
3. Earthquakes.
4. Volcanic hazards (slight risk in Tumwater).
5. Tsunami Hazard (slight risk in Tumwater).
6. Stream channel migration zones.
7. Other geologic events, including mass wasting, debris flows, rock falls, and differential settlement.

The Conservation Element identifies areas with the above-described hazards and subsequently classifies areas within Tumwater in one of three categories:

1. Known or suspected risk.
2. No risk.
3. Risk unknown (because of lack of information).

3) Geologically Hazardous Areas Identification

The identification methodology used in the Conservation Element to define geologically hazardous areas is as follows:

a) Erosion

Identified by the U.S. Department of Agriculture Soil Conservation Service as the breakdown, detachment, transport, and redistribution of soil particles by forces of water, wind, or gravity. Erosion hazard areas include areas likely to become unstable, such as bluffs, steep slopes, and areas with unconsolidated soils.

b) Landslides

A landslide generally refers to the downhill movement of rock, soil, or debris. The term landslide can also refer to the deposit that is created by a landslide event. Landslide areas are at risk of mass movement due to a combination of geologic, topographic, and hydrologic factors. They include any areas susceptible to landslide because of any combination of bedrock, soil, slope (gradient), slope aspect, structure, hydrology, or other factors found in WAC 365-190-120(6). Landslide hazard areas are further defined in TMC Chapter 16.20.

c) Earthquakes

Earthquakes or seismic hazard areas are those which are subject to severe risk of damage because of ground shaking, slope failure, settlement, soil liquefaction, or surface faulting, debris flows, lahars, or tsunamis. Within the region, the historic damage inducement has been ground shaking which results in settlement and soil liquefaction. The amount of ground shaking is affected by earthquake magnitude, distance from the earthquake epicenter, cohesionless soils of low density, shallow ground water tables, and sub-surface geologic structure.

4) Geologically Hazardous Areas in Tumwater

a) Erosion

The two major soil groupings within Tumwater are the Alderwood-Everett and Spanaway-Nisqually series. These soil types are identified as having severe erosion hazard characteristics when disturbed. Erosion risk is dependent on-site conditions and locations outlined in TMC Chapter 16.20.

b) Landslides

Areas of slope over 15 percent and groundwater seepage exist on Tumwater Hill, the Deschutes River valley slopes, and Bush Mountain. Steep slope risk is the combination of slope, soil, and other factors. A geotechnical report is required in certain areas based on conditions outlined in TMC Chapter 16.28, drainage, and site development reviews, and building plan review.

c) Earthquakes

Tumwater is identified in the International Building Code as being located within the Zone D seismic zone map of the United States. Zone A is the lowest and Zone E is the highest. Zone D is a high-risk area for earthquakes and IBC standards for building construction set out stringent structural performance standards.

Liquefaction is primarily addressed through implementation of International Building Code requirements, local amendments, and structural engineering principles. Liquefaction issues associated with the poor soil bearing capacity in Tumwater are addressed with commonly accepted engineering principles such as “pin piles” or “aggregate piers” to ensure structures of up to approximate six stories can accommodate the impacts of a seismic event.

The 2024 update to the Hazard Mitigation Plan for Thurston County identifies areas of liquefaction based on the fault lines in the region. The entire Deschutes Valley from Henderson Boulevard SE to the former Olympia Brewery has high liquefaction susceptibility. Percival Creek vicinity from Trosper Road SW to Sapp Road SW have areas of moderate to high liquefaction.

d) Volcanic Hazards

According to the 2014 U.S. Geological Survey Mt. Rainier Lahar Hazard Map, Tumwater is not in a Volcanic Hazard zone. Only ash fall from a volcanic eruption is expected to affect Tumwater.

5) Development within Geologically Hazardous Areas

TMC Chapter 16.20 sets forth standards for construction in areas identified as susceptible to earthquake and landslide conditions.

F. Fish and Wildlife Habitat Conservation Areas

1) Introduction

Preservation of fish and wildlife habitats is critical to the protection of suitable environments for animal species and in providing a natural beauty and healthy quality of life for Tumwater and its residents.

The conservation of habitat means active land management for maintaining species within their preferred habitats and accustomed geographic distribution. These areas may include, but are not limited to, rare or vulnerable ecological systems, communities, and habitat or habitat elements including seasonal ranges, breeding habitat, winter range, and movement corridors; and areas with high relative population density or species richness. If these areas are altered, it may reduce the likelihood of the species survival.

2) Habitat Conservation Classification

The Growth Management Act requires Tumwater to classify seasonal ranges and habitats that are critical to the survival of endangered, threatened, and sensitive species. Within Tumwater, habitats and species are identified which are of local importance. Tumwater must include best available science when classifying these areas according to WAC 365-195.

A listing of the types of fish and wildlife habitat areas to be protected by state-mandate in Tumwater include:

- Areas where endangered, threatened, and sensitive species have a primary association.
- Habitats and species of local importance, as determined locally.
- Naturally occurring ponds under twenty acres and their submerged aquatic beds, which provide fish or wildlife habitat.
- Waters of the state as defined in WAC Title 222.
- Lakes, ponds, streams, and rivers planted with game fish by a governmental or tribal entity.
- State natural area preserves and natural resource conservation areas.
- All areas within Tumwater meeting one or more of the criteria in this section,

regardless of any formal identification, are subject to the provisions of TMC Chapter 16.32 and should be managed consistent with the best available science, which includes the "Washington State Department of Fish and Wildlife's Management Recommendations for Priority Habitat and Species" as written or hereafter amended.

3) Habitat Protection Techniques

After classifying and designating fish and wildlife areas in Tumwater, the following protection techniques are pursued:

- Creating a system of fish and wildlife habitat with connections between larger habitat blocks and open spaces, integrating with open space corridor planning where appropriate.
- Limiting the level of human activity in such areas including presence of roads and level of recreation type after site specific analysis and planning passive or active recreation may be appropriate for certain areas and habitats.
- Protecting riparian ecosystems and salmonid habitat.
- Evaluating land uses surrounding ponds and fish and wildlife habitat areas that may negatively or positively impact these areas and functions.
- Establishing buffer areas around these areas to separate incompatible uses from habitat areas.
- Restoration of lost and impaired salmonid habitat.

4) Habitat Identification

A review of state and local records and studies on habitats and species indicates that the following habitat categories exist within Tumwater:

1. Seasonal ranges and habitats with which federal and state listed endangered, threatened, and sensitive species have a primary association and which, if altered, may reduce the likelihood that the species will maintain and reproduce over the long term.

2. Naturally occurring ponds under twenty acres and their submerged aquatic beds which provide fish or wildlife habitat.

   Naturally occurring ponds do not include ponds deliberately designed and created from dry sites, such as canals, detention facilities, wastewater treatment facilities, farm ponds, temporary construction ponds of less than three years duration and landscape amenities. However, naturally occurring ponds may include those artificial ponds intentionally created from dry areas to mitigate conversion of ponds, if permitted by a regulatory authority.

3. Waters of the state. Waters of the state are defined in WAC Title 222; the forest practices rules and regulations. Tumwater uses the water typing system established in WAC 222-16-030 to classify waters of the state.

   The following factors are considered when classifying waters of the state as fish and wildlife habitats:

   a. Species present in Tumwater that are

endangered, threatened, or sensitive, and other species of concern.

b. Species present which are sensitive to habitat manipulation.

c. Historic presence of priority species.

d. Existing surrounding land uses that are incompatible with salmonid habitat.

e. Presence and size of riparian ecosystems.

f. Existing water rights.

g. The intermittent nature of some of the higher classes of waters of the state.

4. Lakes, ponds, streams, and rivers planted with game fish. This includes game fish planted in these water bodies under the auspices of a federal, state, local, or tribal program or which supports priority fish species as identified by the State Department of Fish and Wildlife.

5) Sensitive Species Identification

The State Department of Fish and Wildlife maintains a listing of the priority habitats and species for Tumwater. This database is the reference document to be used by Tumwater in the protection of habitats and species identified within Tumwater.

6) Fish and Wildlife Habitat Protection

Given Tumwater's diversity of fish and wildlife habitats in terms of geographic location, biological sensitivity, species hierarchy, and current and future adjacent land uses, the Conservation Element proposes a regulation and protection process based upon performance standards to be applied to site-specific development.

These performance standards are to be implemented on site-specific projects through TMC Chapter 16.32 and associated development permits. If there are any conflicts between the Shoreline Master Program and the standards in TMC Chapter 16.32, the requirements of the Shoreline Master Program apply.

In addition, Tumwater's Flood Ordinance incorporates federal recommendations for protection of aquatic species. Tumwater has also upgraded the fish capture facility at the head of Tumwater Falls and is planning a new hatchery with the State Department of Fish and Wildlife to help stabilize South Sound salmon populations.

a) Threatened and Endangered Species

Tumwater has critical habitat for several federally designated, threatened, or endangered species including:

- Bull Trout (threatened).
- Oregon Spotted Frog (threatened).
- Mazama Pocket Gopher – Olympia Subspecies (threatened).
- Puget Sound Chinook Salmon (threatened).
- Streaked Horned Lark (threatened).
- Taylor's Checkerspot Butterfly (endangered).
- Water howellia (threatened).

Tumwater has critical habitat for several state designated, threatened, or endangered species including:

- Mazama Pocket Gopher – Olympia Subspecies (threatened).
- Oregon Spotted Frog (endangered).
- Oregon vesper sparrow (threatened).
- Streaked Horned Lark (endangered).
- Western gray squirrel (threatened).

b) Habitat Conservation Plan

The southern portion of Tumwater is located in a glacial prairie that has been historically called Bush Prairie. Most of Bush Prairie has been converted to agriculture or forestry, residences, and businesses, but part of it still remains and provides a home for the unique flora and fauna of the South Puget Sound Prairie ecosystem.

A Habitat Conservation Plan will provide for the long-term preservation and management of three species, protected or soon to be protected under the federal Endangered Species Act that occurs in Tumwater: Olympia pocket gopher subspecies of the Mazama pocket gopher, the streaked horned lark, the Oregon spotted frog, and the Oregon vesper sparrow.

As of 2025, Tumwater in cooperation with the Port of Olympia is preparing the Bush Prairie Habitat Conservation Plan for prairie species. When that plan is completed, the Comprehensive Plan and the Tumwater Municipal Code will need to be amended to reflect the Plan.

Appendix A Foundational Documents and Best Available Science

The table below identifies the foundational planning documents that form the basis for the Conservation Element of the Comprehensive Plan.

1. General Policy

Table C-6. General Policy Foundational Documents for the Conservation Element.

Topic Index	Supporting Plans and Materials
General Policy	• Land Use Element (2025) • County-Wide Planning Policies, Thurston County (2015) • Sustainable Thurston, Thurston Regional Planning Council (2013)

2. Critical Areas

Table C-7. Critical Areas Foundational Documents for the Conservation Element.

Topic Index	Supporting Plans and Materials
Wetland Areas	• Best Available Science for Freshwater Wetlands, State Department of Fish and Wildlife and State Department of Ecology (2005 and 2013) • Custom Soil Resource Report for Thurston County Area, Washington – 2016 Tumwater Soil Survey, U.S. Department of Agriculture (2016) • Priority Habitats and Species Data Base, State Department of Fish and Wildlife (Updated annually) • Priority Habitats and Species List, State Department of Fish and Wildlife (2024) • Shoreline Master Program (2019) • Soil Conservation Service Soil Survey of Thurston County, U.S. Department of Agriculture (1958) • Wetland Mapping for the Thurston Region, Thurston Regional Planning Council (2004)
Critical Aquifer Recharge Areas	• Lands for Public Purposes Element • Thurston County On-Site Sewage Management Plan (2021) • Wastewater Resource Management Plan, LOTT Clean Water Alliance (2015) • Water System Plan (2010-2015) • Wellhead Protection Plan (2016)

Topic Index	Supporting Plans and Materials
Frequently Flooded Areas	• Comprehensive Stormwater Implementation Plan (2018) • Flood Hazard Maps (2024) • Flood Insurance Studies and the Flood Insurance Rate Maps, Federal Emergency Management Agency (2024) • Floodplain Overlay Ordinance (2024) • GIS Thurston County Floodplain Mapping • Littlerock-70th Avenue Annexation Area Drainage Study (Part of the Littlerock-70th Avenue Annexation in 2008) (2011) • Hazards Mitigation Plan for the Thurston Region (2024) • Salmon Creek Comprehensive Drainage Basin Plan (2004)

Forest Lands	• Private Forest Land Grades (WAC 458-40-530), State Department of Revenue
Mineral Resource Lands	• Mineral Resource Lands (WAC 365-190-070), State Department of Natural Resources • Thurston County Assessor Land Use Data (2025)

Appendix B Open Space Taxation Act Summary

The Open Space Taxation Act Summary is attached as a separate document.

Appendix C Tumwater Soils Report

The Custom Soils Resource Report for Tumwater is attached as a separate document.

Open Space Taxation Act

JULY 2021

The information and instructions in this publication are to be used when applying for assessment on the basis of current use under the "open space laws," chapter 84.34 RCW and chapter 458-30 WAC.

What is the Open Space Taxation Act?

The Open Space Taxation Act, enacted in 1970, allows property owners to have their open space, farm and agricultural, and timber lands valued at their current use rather than at their highest and best use. The Act states that it is in the best interest of the state to maintain, preserve, conserve, and otherwise continue in existence adequate open space lands for the production of food, fiber, and forest crops and to assure the use and enjoyment of natural resources and scenic beauty for the economic and social well-being of the state and its citizens.

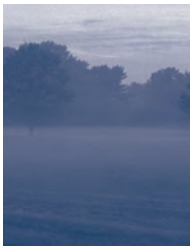
Lands qualifying for current use classification

The law provides three classifications:

Open space land

Farm and agricultural land

Timber land



Open space land is defined as any of the following:

1. Any land area zoned for open space by a comprehensive official land use plan adopted by any city or county.

2. Any land area in which the preservation in its present use would:
   - **a.** Conserve and enhance natural or scenic resources.
   - **b.** Protect streams or water supply.
   - **c.** Promote conservation of soils, wetlands, beaches or tidal marshes. (As a condition of granting open space classification, the legislative body may not require public access on land classified for the purpose of promoting conservation of wetlands.)
   - **d.** Enhance the value to the public of neighbouring parks, forests, wildlife preserves, nature reservations or sanctuaries or other open space.
   - **e.** Enhance recreation opportunities.
   - **f.** Preserve historic sites.
   - **g.** Preserve visual quality along highway, road, and street corridors or scenic vistas.
   - **h.** Retain in its natural state tracts of land not less than one acre situated in an urban area and open to public use on such conditions as may be reasonably required by the legislative authority granting the open space classification.

3. Any land meeting the definition of "farm and agricultural conservation land," which means either:
   - **a.** Land previously classified under the farm and agricultural classification that no longer meets the criteria and is reclassified under open space land; or
   - **b.** "Traditional farmland," not classified, that has not been irrevocably devoted to a use inconsistent with agricultural uses, and that has a high potential for returning to commercial agriculture.

This fact sheet provides general information regarding the Open Space Taxation Act. The information is current at the date of publication. Please note subsequent law changes may supersede or invalidate some of this information.

Farm and agricultural land is defined as any of the following:

1. Any parcel of land that is 20 or more acres, or multiple parcels of land that are contiguous and total 20 or more acres, and are:
   - **a.** Devoted primarily to the production of livestock or agricultural commodities for commercial purposes.
   - **b.** Enrolled in the federal conservation reserve program (CRP) or its successor administered by the United States Department of Agriculture.
   - **c.** Other commercial agricultural activities established under chapter 458-30 WAC.

2. Any parcel of land that is five acres or more but less than 20 acres, is devoted primarily to agricultural uses, and has produced a gross income equivalent to:
   - **a.** Prior to January 1, 1993, $100 or more per acre per year for three of the five calendar years preceding the date of application for classification.
   - **b.** On or after January 1, 1993, $200 or more per acre per year for three of the five calendar years preceding the date of application for classification.

3. Any parcel of land that is five acres or more but less than 20 acres, is devoted primarily to agricultural uses, and has standing crops with an expectation of harvest within:
   - **a.** Seven years and a demonstrable investment in the production of those crops equivalent to $100 or more per acre in the current or previous calendar year.
   - **b.** Fifteen years for short rotation hardwoods and a demonstrable investment in the production of those crops equivalent to $100 or more per acre in the current or previous calendar year.

4. For parcels of land five acres or more but less than 20 acres, "gross income from agricultural uses" includes, but is not limited to, the wholesale value of agricultural products donated to nonprofit food banks or feeding programs.

5. Any parcel of land less than five acres devoted primarily to agricultural uses and has produced a gross income of:
   - **a.** Prior to January 1, 1993, $1,000 or more per year for three of the five calendar years preceding the date of application for classification.
   - **b.** On or after January 1, 1993, $1,500 or more per year for three of the five calendar years preceding the date of application for classification.

6. "Farm and agricultural land" also includes any of the following:
   - **a.** Incidental uses compatible with agricultural purposes, including wetland preservation, provided such use does not exceed 20 of the classified land.
   - **b.** Land on which appurtenances necessary for production, preparation, or sale of agricultural products exist in conjunction with the lands producing such products.
   - **c.** Any non-contiguous parcel one to five acres, that is an integral part of the farming operations.
   - **d.** Land on which housing for employees or the principal place of residence of the farm operator or owner is sited provided the use of the housing or residence is integral to the use of the classified land for agricultural purposes, the housing or residence is on or contiguous to the classified land, and the classified land is 20 or more acres.
   - **e.** Land that is used primarily for equestrian-related activities for which a charge is made, including, but not limited to, stabling, training, riding, clinics, schooling, shows, or grazing for feed. Depending on the number of classified acres, the land may be subject to minimum gross income requirements.
   - **f.** Land that is primarily used for commercial horticultural purposes, including growing seedlings, trees, shrubs, vines, fruits, vegetables, flowers, herbs, and other plants in containers, whether under a structure or not. For additional criteria regarding this use, please refer to RCW 84.34.020(2)(h).

Timber land is defined as the following:

Any parcel of land five or more acresor multiple parcels of land that are contiguous and total five or more acres which is or are devoted primarily to the growth and harvest of timber for commercial purposes. Timber land means the land only and does not include a residential homesite. The term includes land used for incidental uses that are compatible with the growing and harvesting of timber but no more than 10% of the land may be used for such incidental uses.

It also includes the land which appurtenances necessary for the production, preparation, or sale of the timber products exist in conjunction with land producing these products.

The timber land classification may be unavailable in some counties. As a result of the passage of Senate Bill 6180 in 2014, counties have the option to merge their timber land classification into their designated forest land program under chapter 84.33 RCW. To determine whether your county offers the timber land classification, you may contact the county assessor or visit the Department of Revenue's website at: www.dor.wa.gov.

Who may apply?

An owner or contract vendee may apply for current use assessment. However, all owners or contract vendees must sign the application for classification, and any resulting agreement.

When may I apply?

Applications may be made for classification at any time during the year from January 1 through December 31. If approved, current use assessment will begin on January 1 following the year the application was submitted.

Where do I get the application?

Application forms for the farm and agricultural land classification are available from the county assessor's office. Application forms for the open space and timber land classifications are available from either the county assessor's office or by contacting the county legislative authority.

Where do I file the application?

An application for open space classification is filed with the county legislative authority.

An application for farm and agricultural land classification is filed with the county assessor.

An application for timber land classification is filed with the county legislative authority. Timber land applications require that a timber management plan also be filed.

Is there an application fee?

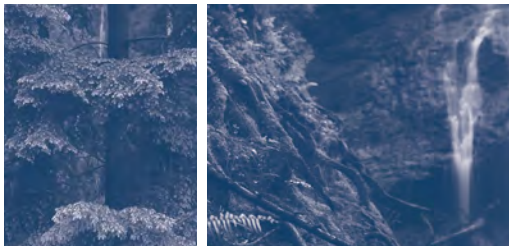
The city or county legislative authority may, at their discretion, establish a processing fee to accompany each application. This fee must be in an amount that reasonably covers the processing costs of the application.

What happens after I file my application for open space classification?

Applications for classification or reclassification as "open space land" are made to the appropriate agency or official called the "granting authority." If the land is located in the county's unincorporated area, the county legislative authority is the granting authority on the application. If the land is located within an incorporated area of the county, the application is acted upon by both the county and city legislative authorities.

If the application is subject to a comprehensive plan that has been adopted by any city or county it will be processed in the same manner in which an amendment to the comprehensive plan is processed. If the application is not subject to a comprehensive land use plan, a public hearing on the application will be conducted, but a notice announcing the hearing must be published at least 10 days prior to the hearing.

The granting authority must approve or reject the application within six months of receiving the application. In determining whether an application made for classification or reclassification should be approved or denied, the granting authority may consider the benefits to the general welfare of preserving the current use of the property.



They may require that certain conditions be met including but not limited to the granting of easements.

If the application is approved, the granting authority will, within five calendar days of the approval date, send an agreement to the applicant for signature showing the land classification and conditions imposed. The applicant may accept or reject the agreement. If the applicant accepts, he or she must sign and return the agreement to the granting authority within 30 days after receipt.

The approval or denial of the application for classification or reclassification is a legislative determination and is reviewable only for arbitrary and capricious actions. Appeal can be made only to the superior court of the county where the application was filed.

Within 10 days of receiving notice of classification of the land from the granting authority, the assessor submits the notice to the county auditor for recording in the place and manner provided for the public recording of state tax liens on real property.

If approved, current use assessment will begin on January 1 following the year the application was submitted. The criteria for classification continue to apply after classification has been granted.

How does a public benefit rating system work?

If the county legislative authority has established a public benefit rating system (PBRS) for the open space classification, the criteria contained within the rating system governs the eligibility and valuation of the land subject to the application.

When a county creates or amends a PBRS, all classified open space land will be rated under the new PBRS. Land that no longer qualifies for classification will not be removed from classification, but will be rated according to the PBRS. Within 30 days of receiving notification of the new assessed value established by the PBRS, the owner may request removal of classification of the land without imposition of additional tax, interest, and penalty.

What happens after I file my application for farm and agricultural land classification?

Upon application for classification or reclassification, the assessor may require applicants to provide data regarding the use of the land, including, but not limited to, the productivity of typical crops, sales receipts, federal income tax returns, other related income and expense data, and any other information relevant to the application.

The application will be considered approved unless the assessor notifies the applicant in writing prior to May 1 of the year after the application was submitted. The criteria for classification continue to apply after classification has been granted.

What is an "advisory committee"?

The county legislative authority must appoint a five member committee representing the active farming community within the county. This committee will serve in an advisory capacity to the assessor in implementing assessment guidelines as established by the Department of Revenue for the assessment of open space lands, farm and agricultural lands, and timber lands.

How do I appeal a denial of my farm and agricultural land application?

The owner may appeal the assessor's denial to the board of equalization in the county where the land is located. The appeal must be filed with the board on or before July 1 of the year of the determination or within 30 days after the mailing of the notice of denial, or within a time limit of up to 60 days adopted by the county legislative authority, whichever is later.

What happens after I file my application for timber land classification?

Applications for timber land classification or reclassification are made to the county legislative authority. A timber management plan is required at the time of application or when a sale or transfer of timber land occurs and a notice of continuance is signed.

The application form requests information about forest management, restocking, fire protection, insect and disease control, weed control, and any other summary of experience and activity that supports the growth and harvest of timber for commercial purposes.

The application is acted upon in a manner similar to open space land applications and within six months of receiving the application.

Approval or denial of a timber land application is a legislative determination and is reviewable only for arbitrary and capricious action. Appeal can be made only to the superior court of the county where the application was filed.

Within 10 days of receiving notice of classification of the land from the granting authority, the assessor submits the notice to the county auditor for recording in the place and manner provided for the public recording of state tax liens on real property.

If approved, current use assessment will begin on January 1 following the year the application was submitted. The criteria for classification continue to apply after classification has been granted.

How is the value of classified land determined?

The assessor is required to maintain two values for each parcel that is classified. The first is the value that would be placed on the land if it was not classified. This is commonly referred to as the "fair market value." The second is the current use land value based on its current use, not highest and best use , as classified by the granting authority.

Open space land located within a county that has adopted a public benefit rating system will be valued according to the criteria of the rating system.

In the absence of a rating system, the per acre value can be no less than the lowest per acre value of classified farm and agricultural land in the county.

In determining the current use value of farm and agricultural land, the assessor considers the earning or productive capacity of comparable lands from crops grown most typically in the area averaged over not less than five years. This earning or productive capacity is the "net cash rental" and is capitalized by a "rate of interest" charged on long term loans secured by a mortgage on farm or agricultural land plus a component for property taxes.

Timber land is valued according to a schedule prepared by the Department of Revenue according to chapter 84.33 RCW. The Department of Revenue annually adjusts and certifies timber land values to be used by county assessors in preparing assessment rolls. The assessors assign the timber land values to the property based upon land grades and operability classes.

When are taxes due on classified lands?

Land classified as open space, farm and agricultural, or timber land is assessed at its current use value and placed on the assessment rolls the year after the application was submitted. Taxes on classified land are due and payable the year after the current use value was placed on the assessment rolls.

How long does the classification last?

The land continues in its classification until a request for removal is made by the owner, the use of land no longer complies, a sale or transfer to an owner that causes land to be exempt from property taxes, or the ownership has changed and the new owner has not signed a Notice of Continuance. The notice of removal is recorded with the county auditor in the same manner as the recording of state tax liens on real property. Additional tax, interest, and penalties will apply if the land is removed and the removal does not meet one of the exceptions listed in RCW 84.34.108(6).

How do I withdraw from classification?

If intending to withdraw all or a portion of the land from classification after 10 years of classification, the owner must complete a withdrawal form with the county assessor.

If a portion of the land is removed from classification, the remaining portion must meet the requirements of original classification unless the remaining land has different income or investment criteria.

What happens after I file a request to withdraw?

Upon receipt of a request for withdrawal, the assessor notifies the granting authority that originally approved the classification, and, the assessor withdraws the land from classification. The land withdrawn from classification is subject to seven years of additional tax and interest, but not a 20% penalty.

What happens if the classified land is sold or transferred?

When classified land is sold or transferred, the seller or transferor becomes liable at the time of sale for the additional tax, interest, and penalty unless the new owner(s) signs the Notice of Continuance which is attached to or shown on the real estate excise tax affidavit. The county auditor cannot accept an instrument of conveyance on any classified land unless the Notice of Continuance has been signed or the additional tax, interest, and penalty has been paid. The assessor determines if the land qualifies for continued classification

What if I want to change the use of my classified property?

An owner changing the use of land from a classified use must notify the county assessor within 60 days of this action. The assessor will remove the land from classified status and impose an additional tax equal to the difference between the tax paid on the current use value and the tax that would have been paid on the land had it not been classified. The additional tax is payable for the last seven tax years, plus interest at the same rate as charged on delinquent property taxes, plus a penalty of 20% of the total amount.

If the assessor removes my land from classification, may I appeal?

Yes, the owner may file an appeal of the removal from classification to the county board of equalization on or before July 1 of the year of the determination, or within 30 days of the date the notice was mailed by the assessor, or within a time limit of up to 60 days adopted by the county legislative authority, whichever is later.

Upon removal from classification, what taxes are due?

At the time the land is removed from classification, any taxes owing from January 1 of the removal year through the removal date, and any additional tax, applicable interest, and penalty owing are due and payable to the county treasurer within 30 days of the owner being notified.

What if the additional taxes are not paid?

Any additional tax, applicable interest, and penalty become a lien on the land at the time the land is removed from classification. This lien has priority over any other encumbrance on the land. Such a lien may be foreclosed upon expiration of the same period after delinquency in the same manner as delinquent real property taxes. If unpaid, interest is charged on the total amount due at the same rate that is applied by law to delinquent property taxes. Interest accrues from the date of the delinquency until the date the total amount is paid in full.

What is done with the additional tax, interest, and penalty paid when land is removed from classification?

Upon collection, the additional tax is distributed by the county treasurer in the same manner in which current taxes applicable to the subject land are distributed. The applicable interest and penalties are distributed to the county's current expense fund.

How do I change the classification of my property?

Land may be reclassified, upon request by the owner, subject toall applicable qualifications for each classification, without additional tax, interest, and penalty for the following:

1. Land classified as farm and agricultural land may be reclassified to timber land; timber land may be reclassified to farm and agricultural land.
2. Land classified as either farm and agricultural land or timber land under chapter 84.34 RCW, or forest land under chapter 84.33 RCW may be reclassified to open space land.
3. Land classified as farm and agricultural land or timber land may be reclassified to forest land under chapter 84.33 RCW.
4. Land previously classified as farm and agricultural land may be reclassified to open space land as "farm and agricultural conservation land" and subsequently be reclassified back to farm and agricultural land.

Applications for reclassification are acted upon in the same manner as approvals for initial classification. The county assessor approves all applications for farm and agricultural classifications and reclassifications. The county legislative authority (and in some cases, the city legislative authority)approves all land classifications or reclassifications for timber land and open space land, including farm and agricultural conservation land.

Is supporting information required to change classifications?

The assessor may require an owner of classified land to submit data regarding the use of the land, productivity of typical crops, income and expense data, and similar information regarding continued eligibility.

Laws and Rules

It is helpful to read the complete laws, Revised Code of Washington, chapters 84.33 and 84.34 (RCW) and rules, Washington Administrative Code, chapter 458-30 (WAC) to understand requirements of the classifications and the tax liabilities incurred.

Need More Information?

Requirements for making application for current use classification are available at the county assessor's office or by contacting the county legislative authority.

Custom Soil Resource Report for Thurston County Area, Washington

April 2, 2025

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

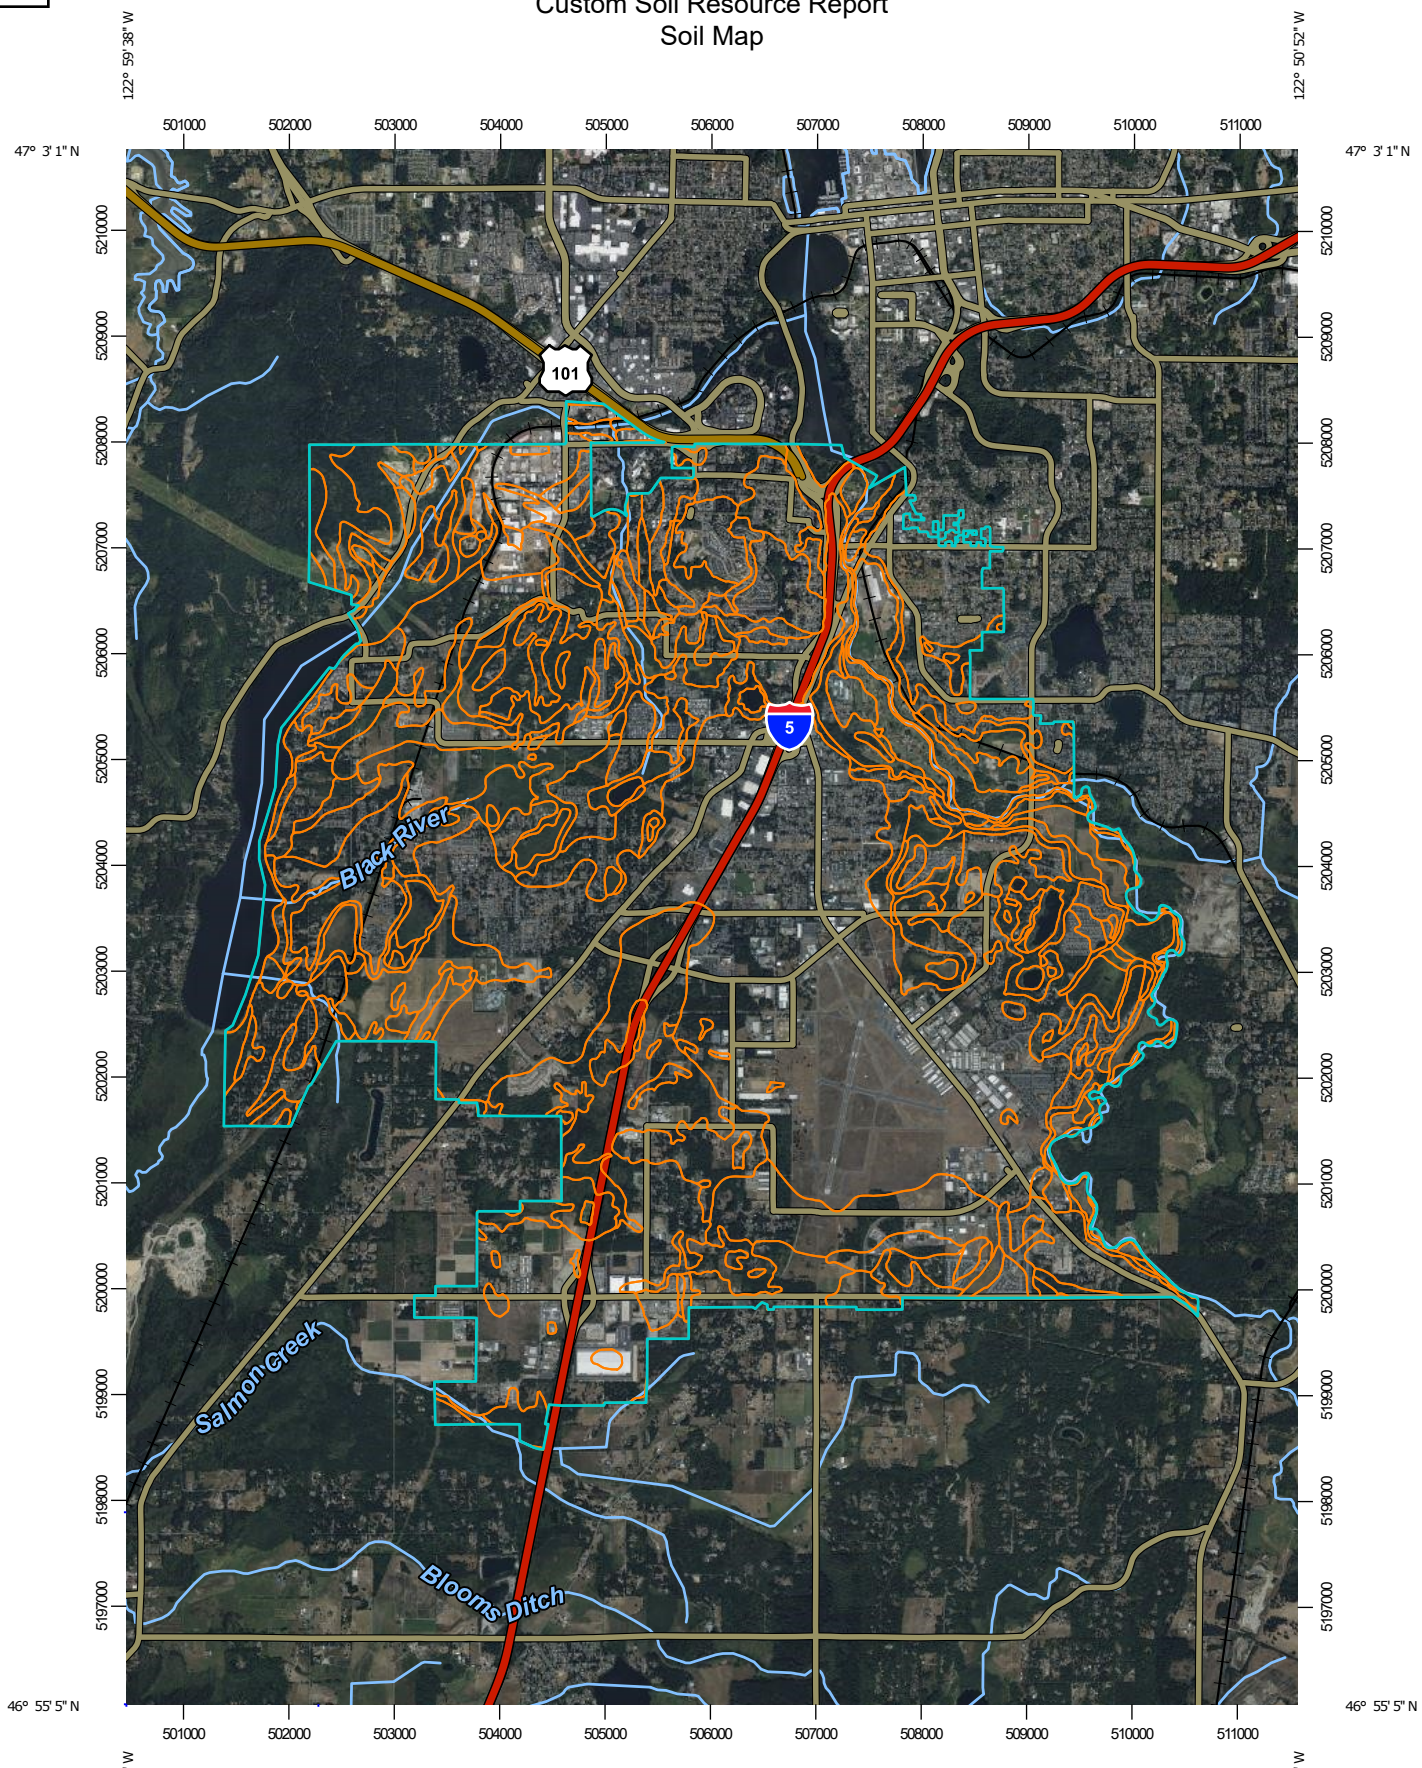
The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.



After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Thurston County Area, Washington
Survey Area Data: Version 18, Aug 27, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jul 18, 2020—Aug 14, 2023

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic

class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Thurston County Area, Washington

1—Alderwood gravelly sandy loam, 0 to 8 percent slopes

Map Unit Setting

National map unit symbol: 2t625
Elevation: 50 to 800 feet
Mean annual precipitation: 25 to 60 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 160 to 240 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Alderwood and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Alderwood

Setting

Landform: Hills, ridges
Landform position (two-dimensional): Summit
Landform position (three-dimensional): Crest, talf
Down-slope shape: Convex, linear
Across-slope shape: Convex
Parent material: Glacial drift and/or glacial outwash over dense glaciomarine deposits

Typical profile

A - 0 to 7 inches: gravelly sandy loam
Bw1 - 7 to 21 inches: very gravelly sandy loam
Bw2 - 21 to 30 inches: very gravelly sandy loam
Bg - 30 to 35 inches: very gravelly sandy loam
2Cd1 - 35 to 43 inches: very gravelly sandy loam
2Cd2 - 43 to 59 inches: very gravelly sandy loam

Properties and qualities

Slope: 0 to 8 percent
Depth to restrictive feature: 20 to 39 inches to densic material
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: About 18 to 37 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Very low (about 2.7 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4s
Hydrologic Soil Group: B
Ecological site: F002XA004WA - Puget Lowlands Forest
Forage suitability group: Limited Depth Soils (G002XS301WA), Limited Depth Soils (G002XF303WA), Limited Depth Soils (G002XN302WA)

Other vegetative classification: Limited Depth Soils (G002XS301WA), Limited Depth Soils (G002XF303WA), Limited Depth Soils (G002XN302WA)
Hydric soil rating: No

Minor Components

Everett
Percent of map unit: 5 percent
Landform: Moraines, eskers, kames
Landform position (two-dimensional): Summit, shoulder

2—Alderwood gravelly sandy loam, 8 to 15 percent slopes

Map Unit Setting
National map unit symbol: 2t626
Elevation: 50 to 800 feet
Mean annual precipitation: 20 to 60 inches
Mean annual air temperature: 46 to 52 degrees F
Frost-free period: 160 to 240 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition
Alderwood and similar soils: 85 percent

Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Alderwood

Setting

Landform: Hills, ridges
Landform position (two-dimensional): Shoulder
Landform position (three-dimensional): Nose slope, talf
Down-slope shape: Convex, linear
Across-slope shape: Convex
Parent material: Glacial drift and/or glacial outwash over dense glaciomarine deposits

Typical profile

A - 0 to 7 inches: gravelly sandy loam
Bw1 - 7 to 21 inches: very gravelly sandy loam
Bw2 - 21 to 30 inches: very gravelly sandy loam
Bg - 30 to 35 inches: very gravelly sandy loam
2Cd1 - 35 to 43 inches: very gravelly sandy loam
2Cd2 - 43 to 59 inches: very gravelly sandy loam

Properties and qualities

Slope: 8 to 15 percent
Depth to restrictive feature: 20 to 39 inches to densic material
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: About 18 to 37 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Very low (about 2.7 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4s
Hydrologic Soil Group: B
Ecological site: F002XA004WA - Puget Lowlands Forest

20—Cagey loamy sand

Map Unit Setting

National map unit symbol: 2nd8d
Elevation: 330 to 980 feet
Mean annual precipitation: 40 to 60 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 165 to 195 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Cagey and similar soils: 85 percent
Minor components: 5 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Cagey

Setting

Landform: Terraces
Parent material: Sandy glacial drift

Typical profile

H1 - 0 to 6 inches: loamy sand
H2 - 6 to 28 inches: loamy sand
H3 - 28 to 60 inches: fine sand

Properties and qualities

Slope: 0 to 4 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): High to very high (5.95 to 19.98 in/hr)
Depth to water table: About 18 to 30 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 4.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3w
Hydrologic Soil Group: A
Ecological site: F002XA005WA - Puget Lowlands Moist Forest
Forage suitability group: Seasonally Wet Soils (G002XS201WA)
Other vegetative classification: Seasonally Wet Soils (G002XS201WA)
Hydric soil rating: No

Minor Components

Mckenna

Percent of map unit: 5 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

27—Delphi very gravelly loam, 3 to 15 percent slopes

Map Unit Setting

National map unit symbol: 2nd8m
Elevation: 330 to 3,280 feet
Mean annual precipitation: 50 to 75 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 165 to 195 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Delphi and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Delphi

Setting

Landform: Till plains
Parent material: Continental basal till

Typical profile

H1 - 0 to 8 inches: very gravelly loam
H2 - 8 to 13 inches: very gravelly loam
H3 - 13 to 48 inches: very gravelly silt loam
H4 - 48 to 52 inches: extremely gravelly clay loam

Properties and qualities

Slope: 3 to 15 percent
Depth to restrictive feature: 40 to 55 inches to densic material
Drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: About 39 to 54 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Moderate (about 6.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4s
Hydrologic Soil Group: B
Ecological site: F002XA007WA - Puget Lowlands Wet Forest

Forage suitability group: Droughty Soils (G001XY402WA)
Other vegetative classification: Droughty Soils (G001XY402WA)
Hydric soil rating: No

30—Dystric Xerochrepts, 60 to 90 percent slopes

Map Unit Setting

National map unit symbol: 2nd8r
Elevation: 0 to 3,280 feet
Mean annual precipitation: 50 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 180 days
Farmland classification: Not prime farmland

Map Unit Composition

Dystric xerochrepts and similar soils: 85 percent
Minor components: 5 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Dystric Xerochrepts

Setting

Landform: Escarpments
Parent material: Colluvium and glacial till

Typical profile

H1 - 0 to 4 inches: very gravelly sandy loam
H2 - 4 to 30 inches: very gravelly sandy loam
H3 - 30 to 34 inches: very gravelly sandy loam

Properties and qualities

Slope: 60 to 90 percent
Depth to restrictive feature: 20 to 72 inches to densic material
Drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Very low (about 2.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 7e
Hydrologic Soil Group: C
Hydric soil rating: No

Minor Components

Skipopa

Percent of map unit: 5 percent
Hydric soil rating: No

32—Everett very gravelly sandy loam, 0 to 8 percent slopes

Map Unit Setting

National map unit symbol: 2t629
Elevation: 30 to 900 feet
Mean annual precipitation: 35 to 91 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 180 to 240 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Everett and similar soils: 80 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Everett

Setting

Landform: Kames, moraines, eskers
Landform position (two-dimensional): Summit, shoulder
Landform position (three-dimensional): Crest, interfluve
Down-slope shape: Convex
Across-slope shape: Convex
Parent material: Sandy and gravelly glacial outwash

Typical profile

Oi - 0 to 1 inches: slightly decomposed plant material
A - 1 to 3 inches: very gravelly sandy loam
Bw - 3 to 24 inches: very gravelly sandy loam
C1 - 24 to 35 inches: very gravelly loamy sand
C2 - 35 to 60 inches: extremely cobbly coarse sand

Properties and qualities

Slope: 0 to 8 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Capacity of the most limiting layer to transmit water (Ksat): High (1.98 to 5.95 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 3.2 inches)

Interpretive groups

Land capability classification (irrigated): None specified

Map Unit Composition

Godfrey, drained, and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Godfrey, Drained

Setting

Landform: Flood plains
Parent material: Alluvium

Typical profile

H1 - 0 to 8 inches: silty clay loam
H2 - 8 to 52 inches: silty clay
H3 - 52 to 60 inches: silty clay

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Very low (0.00 in/hr)
Depth to water table: About 12 to 24 inches
Frequency of flooding: Occasional
Frequency of ponding: None
Available water supply, 0 to 60 inches: High (about 9.7 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4w
Hydrologic Soil Group: C/D
Ecological site: F002XA008WA - Puget Lowlands Riparian Forest
Forage suitability group: Seasonally Wet Soils (G002XS201WA)
Other vegetative classification: Seasonally Wet Soils (G002XS201WA)
Hydric soil rating: Yes

Minor Components

Sultan

Percent of map unit: 5 percent
Hydric soil rating: No

Godfrey, undrained

Percent of map unit: 5 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Newberg

Percent of map unit: 3 percent
Hydric soil rating: No

Puget, undrained

Percent of map unit: 2 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)

Hydric soil rating: Yes

45—Hydraquents, tidal

Map Unit Setting

National map unit symbol: 2nd90
Elevation: 0 to 100 feet
Mean annual precipitation: 20 to 30 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 170 to 210 days
Farmland classification: Not prime farmland

Map Unit Composition

Hydraquents, tidal, and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Hydraquents, Tidal

Setting

Landform: Tidal flats
Parent material: Alluvium

Typical profile

H1 - 0 to 6 inches: fine sandy loam
H2 - 6 to 60 inches: stratified fine sandy loam to silty clay loam

Properties and qualities

Slope: 0 to 1 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: About 0 inches
Frequency of flooding: Very frequent
Frequency of ponding: None
Maximum salinity: Moderately saline to strongly saline (8.0 to 16.0 mmhos/cm)
Sodium adsorption ratio, maximum: 10.0
Available water supply, 0 to 60 inches: High (about 10.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 6w
Hydrologic Soil Group: B/D
Hydric soil rating: Yes

46—Indianola loamy sand, 0 to 5 percent slopes

Map Unit Setting

National map unit symbol: 2t62k
Elevation: 0 to 980 feet
Mean annual precipitation: 30 to 81 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 170 to 210 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Indianola and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Indianola

Setting

Landform: Terraces, eskers, kames
Landform position (three-dimensional): Tread
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Sandy glacial outwash

Typical profile

Oi - 0 to 1 inches: slightly decomposed plant material
A - 1 to 6 inches: loamy sand
Bw1 - 6 to 17 inches: loamy sand
Bw2 - 17 to 27 inches: sand
BC - 27 to 37 inches: sand
C - 37 to 60 inches: sand

Properties and qualities

Slope: 0 to 5 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Capacity of the most limiting layer to transmit water (Ksat): High to very high (5.95 to 99.90 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 3.9 inches)

Interpretive groups

Land capability classification (irrigated): 4s
Land capability classification (nonirrigated): 4s
Hydrologic Soil Group: A
Ecological site: F002XA004WA - Puget Lowlands Forest
Forage suitability group: Droughty Soils (G002XS401WA), Droughty Soils (G002XF403WA), Droughty Soils (G002XN402WA), Droughty Soils (G002XV402WA)

Other vegetative classification: Droughty Soils (G002XS401WA), Droughty Soils (G002XF403WA), Droughty Soils (G002XN402WA), Droughty Soils (G002XV402WA)
Hydric soil rating: No

Minor Components

Alderwood
Percent of map unit: 5 percent
Landform: Ridges, hills
Landform position (two-dimensional): Summit
Landform position (three-dimensional): Crest, talf
Down-slope shape: Linear, convex
Across-slope shape: Convex
Hydric soil rating: No

Everett
Percent of map unit: 5 percent
Landform: Eskers, moraines, kames
Landform position (two-dimensional): Summit, shoulder
Landform position (three-dimensional): Interfluve, crest
Down-slope shape: Convex
Across-slope shape: Convex
Hydric soil rating: No

Norma
Percent of map unit: 5 percent
Landform: Depressions, drainageways
Landform position (three-dimensional): Dip
Down-slope shape: Concave, linear
Across-slope shape: Concave
Hydric soil rating: Yes

47—Indianola loamy sand, 5 to 15 percent slopes

Map Unit Setting
National map unit symbol: 2t635
Elevation: 0 to 980 feet
Mean annual precipitation: 30 to 81 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 170 to 210 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition
Indianola and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Indianola

Setting

Landform: Terraces, kames, eskers
Landform position (three-dimensional): Riser
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Sandy glacial outwash

Typical profile

Oi - 0 to 1 inches: slightly decomposed plant material
A - 1 to 6 inches: loamy sand
Bw1 - 6 to 17 inches: loamy sand
Bw2 - 17 to 27 inches: sand
BC - 27 to 37 inches: sand
C - 37 to 60 inches: sand

Properties and qualities

Slope: 5 to 15 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Capacity of the most limiting layer to transmit water (Ksat): High to very high (5.95 to 99.90 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 3.9 inches)

Interpretive groups

Land capability classification (irrigated): 4e
Land capability classification (nonirrigated): 4s
Hydrologic Soil Group: A
Ecological site: F002XA004WA - Puget Lowlands Forest
Forage suitability group: Droughty Soils (G002XS401WA), Droughty Soils (G002XN402WA)
Other vegetative classification: Droughty Soils (G002XS401WA), Droughty Soils (G002XN402WA)
Hydric soil rating: No

Minor Components

Alderwood

Percent of map unit: 8 percent
Landform: Hills, ridges
Landform position (two-dimensional): Shoulder
Landform position (three-dimensional): Nose slope, talf

Hydric soil rating: No

Everett

Percent of map unit: 5 percent
Landform: Moraines, eskers, kames
Landform position (two-dimensional): Shoulder, footslope
Landform position (three-dimensional): Crest, base slope
Down-slope shape: Convex

Across-slope shape: Convex
Hydric soil rating: No

Norma

Percent of map unit: 2 percent
Landform: Drainageways, depressions
Landform position (three-dimensional): Dip
Down-slope shape: Linear, concave
Across-slope shape: Concave
Hydric soil rating: Yes

48—Indianola loamy sand, 15 to 30 percent slopes

Map Unit Setting

National map unit symbol: 2t639
Elevation: 0 to 980 feet
Mean annual precipitation: 30 to 81 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 170 to 210 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Indianola and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Indianola

Setting

Landform: Terraces, kames, eskers
Landform position (two-dimensional): Backslope
Landform position (three-dimensional): Side slope
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Sandy glacial outwash

Typical profile

Oi - 0 to 1 inches: slightly decomposed plant material
A - 1 to 6 inches: loamy sand
Bw1 - 6 to 17 inches: loamy sand
Bw2 - 17 to 27 inches: sand
BC - 27 to 37 inches: sand
C - 37 to 60 inches: sand

Properties and qualities

Slope: 15 to 30 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Capacity of the most limiting layer to transmit water (Ksat): High to very high (5.95 to 99.90 in/hr)
Depth to water table: More than 80 inches

Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 3.9 inches)

Interpretive groups

Land capability classification (irrigated): 6e
Land capability classification (nonirrigated): 4e
Hydrologic Soil Group: A

51—Kapowsin silt loam, 3 to 15 percent slopes

Map Unit Setting

National map unit symbol: 2ndbx
Elevation: 50 to 900 feet
Mean annual precipitation: 30 to 50 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 220 days

Farmland classification: Farmland of statewide importance

Map Unit Composition

Kapowsin and similar soils: 85 percent
Minor components: 8 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Kapowsin

Setting

Landform: Till plains
Parent material: Compact basal till

Typical profile

H1 - 0 to 4 inches: silt loam
H2 - 4 to 22 inches: silt loam
H3 - 22 to 30 inches: gravelly loam
H4 - 30 to 34 inches: gravelly loam

Properties and qualities

Slope: 3 to 15 percent
Depth to restrictive feature: 20 to 40 inches to densic material
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: About 12 to 24 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Moderate (about 6.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3e
Hydrologic Soil Group: C/D
Ecological site: F002XA004WA - Puget Lowlands Forest

Percent of map unit: 5 percent
Hydric soil rating: No

65—McKenna gravelly silt loam, 0 to 5 percent slopes

Map Unit Setting
National map unit symbol: 2nd9g
Elevation: 50 to 500 feet
Mean annual precipitation: 30 to 60 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 180 days
Farmland classification: Prime farmland if drained

Map Unit Composition
Mckenna and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Mckenna

Setting
Landform: Depressions, drainageways
Parent material: Glacial drift

Typical profile
H1 - 0 to 9 inches: gravelly silt loam
H2 - 9 to 13 inches: gravelly silt loam
H3 - 13 to 36 inches: very gravelly loam
H4 - 36 to 40 inches: very gravelly loam

Properties and qualities
Slope: 0 to 5 percent
Depth to restrictive feature: 20 to 39 inches to densic material
Drainage class: Poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: About 0 to 6 inches
Frequency of flooding: None
Frequency of ponding: Frequent
Available water supply, 0 to 60 inches: Low (about 5.4 inches)

Interpretive groups
Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 6w

Hydrologic Soil Group: D
Ecological site: F002XA007WA - Puget Lowlands Wet Forest
Forage suitability group: Wet Soils (G002XS101WA)
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Minor Components

Bellingham, undrained

69—Mukilteo muck

Map Unit Setting
National map unit symbol: 2nd9l
Elevation: 0 to 1,000 feet
Mean annual precipitation: 40 to 70 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 250 days
Farmland classification: Prime farmland if drained

Map Unit Composition
Mukilteo, undrained, and similar soils: 90 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Mukilteo, Undrained

Setting
Landform: Depressions
Parent material: Herbaceous organic material

Typical profile
Oa - 0 to 6 inches: muck
Oe - 6 to 60 inches: mucky peat

Properties and qualities
Slope: 0 to 2 percent

Depth to restrictive feature: More than 80 inches
Drainage class: Very poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: About 0 inches
Frequency of flooding: None
Frequency of ponding: Frequent
Available water supply, 0 to 60 inches: Very high (about 26.9 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 5w
Hydrologic Soil Group: B/D
Ecological site: R002XA003WA - Puget Lowlands Bogs and Fens
Forage suitability group: Wet Soils (G002XS101WA)

National map unit symbol: 2ndcc
Elevation: 0 to 1,000 feet
Mean annual precipitation: 35 to 60 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 200 days
Farmland classification: Prime farmland if drained

Map Unit Composition
Norma, silt loam, and similar soils: 90 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Norma, Silt Loam

Setting
Landform: Depressions, drainageways
Parent material: Alluvium

Typical profile
H1 - 0 to 8 inches: silt loam
H2 - 8 to 30 inches: sandy loam
H3 - 30 to 60 inches: sandy loam

Properties and qualities
Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: About 0 to 12 inches
Frequency of flooding: None
Frequency of ponding: Frequent
Available water supply, 0 to 60 inches: Moderate (about 8.9 inches)

Interpretive groups
Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 5w
Hydrologic Soil Group: B/D
Ecological site: F002XA007WA - Puget Lowlands Wet Forest
Forage suitability group: Wet Soils (G002XS101WA)

Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Minor Components

Norma, fine sandy loam
Percent of map unit: 5 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Alderwood
Percent of map unit: 5 percent
Hydric soil rating: No

84—Pilchuck loamy sand

Map Unit Setting
National map unit symbol: 2nd9t
Elevation: 70 to 1,970 feet
Mean annual precipitation: 35 to 60 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 160 to 210 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition
Pilchuck and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Pilchuck

Setting
Landform: Flood plains
Parent material: Alluvium

Typical profile
H1 - 0 to 6 inches: loamy sand
H2 - 6 to 60 inches: fine sand

Properties and qualities
Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Capacity of the most limiting layer to transmit water (Ksat): High to very high (5.95 to 19.98 in/hr)
Depth to water table: About 24 to 48 inches
Frequency of flooding: Occasional
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 4.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3w
Hydrologic Soil Group: A
Ecological site: F002XA008WA - Puget Lowlands Riparian Forest
Forage suitability group: Droughty Soils (G002XS401WA)
Other vegetative classification: Droughty Soils (G002XS401WA)
Hydric soil rating: No

Minor Components

Puget, undrained

Percent of map unit: 5 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Sultan

Percent of map unit: 5 percent
Hydric soil rating: No

Newberg

Percent of map unit: 5 percent
Hydric soil rating: No

85—Pits, gravel

Map Unit Composition

Pits: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Pits

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8
Hydric soil rating: No

88—Puget silt loam

Map Unit Setting

National map unit symbol: 2nd9y
Elevation: 10 to 650 feet
Mean annual precipitation: 35 to 55 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 160 to 180 days
Farmland classification: Prime farmland if drained

Map Unit Composition

Puget, drained, and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Puget, Drained

Setting

Landform: Flood plains
Parent material: Alluvium

Typical profile

H1 - 0 to 9 inches: silt loam
H2 - 9 to 60 inches: silt loam

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high (0.20 to 0.57 in/hr)
Depth to water table: About 12 to 35 inches
Frequency of flooding: Occasional
Frequency of ponding: None
Available water supply, 0 to 60 inches: High (about 12.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3w
Hydrologic Soil Group: C
Ecological site: F002XA008WA - Puget Lowlands Riparian Forest
Forage suitability group: Soils with Few Limitations (G002XS501WA)
Other vegetative classification: Soils with Few Limitations (G002XS501WA)
Hydric soil rating: Yes

Minor Components

Puget, undrained

Percent of map unit: 5 percent
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Newberg

Percent of map unit: 5 percent
Hydric soil rating: No

Semiahmoo, undrained

Percent of map unit: 3 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Sultan

Percent of map unit: 2 percent
Hydric soil rating: No

89—Puyallup silt loam

Map Unit Setting

National map unit symbol: 2nd9z
Elevation: 70 to 1,970 feet
Mean annual precipitation: 35 to 60 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 170 to 200 days
Farmland classification: All areas are prime farmland

Map Unit Composition

Puyallup and similar soils: 85 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Puyallup

Setting

Landform: Terraces, flood plains
Parent material: Alluvium

Typical profile

H1 - 0 to 10 inches: silt loam
H2 - 10 to 19 inches: fine sandy loam
H3 - 19 to 60 inches: sand

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: 14 to 20 inches to strongly contrasting textural stratification
Drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: Occasional
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 3.2 inches)

Interpretive groups

Land capability classification (irrigated): 3w
Land capability classification (nonirrigated): 3w
Hydrologic Soil Group: B
Ecological site: F002XA008WA - Puget Lowlands Riparian Forest
Forage suitability group: Droughty Soils (G002XS401WA)
Other vegetative classification: Droughty Soils (G002XS401WA)
Hydric soil rating: No

Minor Components

Newberg
Percent of map unit: 5 percent
Hydric soil rating: No

Semiahmoo, undrained
Percent of map unit: 3 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Sultan
Percent of map unit: 2 percent
Hydric soil rating: No

98—Salkum silty clay loam, 8 to 15 percent slopes

Map Unit Setting
National map unit symbol: 2ndcq
Elevation: 200 to 1,000 feet
Mean annual precipitation: 40 to 70 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 150 to 210 days
Farmland classification: Farmland of statewide importance

Map Unit Composition
Salkum and similar soils: 95 percent
Minor components: 5 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Salkum

Setting
Landform: Terraces
Parent material: Highly weatherd glacial drift

Typical profile
H1 - 0 to 12 inches: silty clay loam
H2 - 12 to 51 inches: silty clay
H3 - 51 to 60 inches: silty clay

Properties and qualities
Slope: 8 to 15 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high (0.20 to 0.57 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None

Available water supply, 0 to 60 inches: High (about 9.5 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3e
Hydrologic Soil Group: B
Ecological site: F002XA005WA - Puget Lowlands Moist Forest
Forage suitability group: Soils with Moderate Limitations (G001XY602WA)
Other vegetative classification: Soils with Moderate Limitations (G001XY602WA)
Hydric soil rating: No

Minor Components

Scamman

Percent of map unit: 5 percent
Landform: Terraces
Other vegetative classification: Seasonally Wet Soils (G003XF203WA)
Hydric soil rating: No

102—Schneider very gravelly loam, 20 to 40 percent slopes

Map Unit Setting

National map unit symbol: 2nd7p
Elevation: 50 to 1,800 feet
Mean annual precipitation: 60 to 75 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 200 days
Farmland classification: Not prime farmland

Map Unit Composition

Schneider and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Schneider

Setting

Landform: Mountains

Typical profile

H1 - 0 to 6 inches: very gravelly loam
H2 - 6 to 32 inches: very gravelly silt loam
H3 - 32 to 55 inches: extremely gravelly silt loam
H4 - 55 to 59 inches: unweathered bedrock

Properties and qualities

Slope: 20 to 40 percent
Depth to restrictive feature: 40 to 60 inches to lithic bedrock
Drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: More than 80 inches

Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 4.6 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 6e
Hydrologic Soil Group: B
Ecological site: F002XA005WA - Puget Lowlands Moist Forest
Hydric soil rating: No

103—Schneider very gravelly loam, 40 to 65 percent slopes

Map Unit Setting

National map unit symbol: 2nd7q
Elevation: 50 to 1,800 feet
Mean annual precipitation: 60 to 75 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 200 days
Farmland classification: Not prime farmland

Map Unit Composition

Schneider and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Schneider

Setting

Landform: Mountains

Typical profile

H1 - 0 to 6 inches: very gravelly loam
H2 - 6 to 32 inches: very gravelly silt loam
H3 - 32 to 55 inches: extremely gravelly silt loam
H4 - 55 to 59 inches: unweathered bedrock

Properties and qualities

Slope: 40 to 65 percent
Depth to restrictive feature: 40 to 60 inches to lithic bedrock
Drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 4.6 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 7e
Hydrologic Soil Group: B
Ecological site: F002XA005WA - Puget Lowlands Moist Forest
Hydric soil rating: No

104—Semiahmoo muck

Map Unit Setting

National map unit symbol: 2nd7r
Elevation: 10 to 1,300 feet
Mean annual precipitation: 4 to 70 inches
Mean annual air temperature: 46 to 50 degrees F
Frost-free period: 125 to 250 days
Farmland classification: Prime farmland if drained

Map Unit Composition

Semiahmoo, drained, and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Semiahmoo, Drained

Setting

Landform: Flood plains
Parent material: Herbaceous organic material

Typical profile

Oa1 - 0 to 6 inches: muck
Oa2 - 6 to 60 inches: muck

Properties and qualities

Slope: 0 to 1 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Very poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: About 0 to 12 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Very high (about 26.9 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 5w
Hydrologic Soil Group: B/D
Ecological site: R002XA003WA - Puget Lowlands Bogs and Fens
Forage suitability group: Wet Soils (G002XS101WA)
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Minor Components

Shalcar variant

Percent of map unit: 5 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Semiahmoo, undrained
Percent of map unit: 5 percent
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Puget, undrained
Percent of map unit: 3 percent
Landform: Depressions
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Sultan
Percent of map unit: 2 percent
Hydric soil rating: No

106—Shalcar variant muck

Map Unit Setting
National map unit symbol: 2nd7t
Elevation: 70 to 980 feet
Mean annual precipitation: 40 to 60 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 150 to 200 days
Farmland classification: Prime farmland if drained

Map Unit Composition
Shalcar variant and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Shalcar Variant

Setting
Landform: Flood plains
Parent material: Organic material over alluvium

Typical profile
Oa1 - 0 to 6 inches: muck
Oa2 - 6 to 20 inches: muck
H3 - 20 to 60 inches: clay

Properties and qualities
Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Very poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.20 in/hr)
Depth to water table: About 0 inches
Frequency of flooding: Occasional
Frequency of ponding: Frequent
Available water supply, 0 to 60 inches: Very high (about 15.4 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 5w
Hydrologic Soil Group: C/D
Ecological site: R002XA003WA - Puget Lowlands Bogs and Fens
Forage suitability group: Wet Soils (G002XS101WA)
Other vegetative classification: Wet Soils (G002XS101WA)
Hydric soil rating: Yes

Minor Components

Sultan

Percent of map unit: 5 percent

Hydric soil rating: Yes

108—Skipopa silt loam, 3 to 15 percent slopes

Map Unit Setting

National map unit symbol: 2nd7w
Elevation: 490 to 980 feet
Mean annual precipitation: 30 to 50 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 160 to 200 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Skipopa and similar soils: 90 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Skipopa

Setting

Landform: Terraces
Parent material: Volcanic ash over glaciolacustrine deposits

Typical profile

H1 - 0 to 8 inches: silt loam
H2 - 8 to 18 inches: silt loam

H3 - 18 to 60 inches: clay

Properties and qualities

Slope: 3 to 15 percent
Depth to restrictive feature: 10 to 20 inches to abrupt textural change
Drainage class: Somewhat poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Very low (0.00 in/hr)
Depth to water table: About 12 to 24 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 5.3 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4w
Hydrologic Soil Group: D
Ecological site: F002XA007WA - Puget Lowlands Wet Forest
Forage suitability group: Seasonally Wet Soils (G002XN202WA)
Other vegetative classification: Seasonally Wet Soils (G002XN202WA)
Hydric soil rating: No

Minor Components

Yelm

Percent of map unit: 10 percent
Hydric soil rating: No

109—Spana gravelly loam

Map Unit Setting

National map unit symbol: 2nd7x
Elevation: 330 to 1,640 feet
Mean annual precipitation: 25 to 45 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 200 days
Farmland classification: Prime farmland if drained

Map Unit Composition

Spana and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Spana

Setting

Landform: Drainageways, outwash plains
Parent material: Glacial outwash

Typical profile

H1 - 0 to 22 inches: gravelly loam
H2 - 22 to 26 inches: gravelly loam
H3 - 26 to 38 inches: gravelly loam

H4 - 38 to 60 inches: extremely gravelly sandy loam

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat poorly drained
Capacity of the most limiting layer to transmit water (Ksat): High (1.98 to 5.95 in/hr)
Depth to water table: About 12 to 35 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Moderate (about 6.3 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3w
Hydrologic Soil Group: B
Ecological site: R002XA006WA - Puget Lowlands Prairie
Forage suitability group: Soils with Few Limitations (G002XS501WA)
Other vegetative classification: Soils with Few Limitations (G002XS501WA)
Hydric soil rating: No

110—Spanaway gravelly sandy loam, 0 to 3 percent slopes

Map Unit Setting

National map unit symbol: 2ndb6
Elevation: 330 to 1,310 feet
Mean annual precipitation: 35 to 65 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 150 to 200 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Spanaway and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Spanaway

Setting

Landform: Terraces, outwash plains
Parent material: Volcanic ash over gravelly outwash

Typical profile

H1 - 0 to 15 inches: gravelly sandy loam
H2 - 15 to 20 inches: very gravelly loam
H3 - 20 to 60 inches: extremely gravelly sand

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Capacity of the most limiting layer to transmit water (Ksat): High (1.98 to 5.95 in/hr)

Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 3.8 inches)

Interpretive groups

Land capability classification (irrigated): 3s
Land capability classification (nonirrigated): 3s
Hydrologic Soil Group: A
Ecological site: R002XA006WA - Puget Lowlands Prairie
Forage suitability group: Droughty Soils (G002XS401WA)
Other vegetative classification: Droughty Soils (G002XS401WA)
Hydric soil rating: No

115—Sultan silt loam

Map Unit Setting

National map unit symbol: 2ndbc
Elevation: 0 to 150 feet
Mean annual precipitation: 35 to 55 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 150 to 200 days
Farmland classification: All areas are prime farmland

Map Unit Composition

Sultan and similar soils: 85 percent
Minor components: 8 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Sultan

Setting

Landform: Flood plains
Parent material: Alluvium

Typical profile

H1 - 0 to 7 inches: silt loam
H2 - 7 to 60 inches: silt loam

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: About 24 to 48 inches
Frequency of flooding: Occasional
Frequency of ponding: None
Available water supply, 0 to 60 inches: High (about 11.4 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3w

Hydrologic Soil Group: C
Ecological site: F002XA008WA - Puget Lowlands Riparian Forest
Forage suitability group: Seasonally Wet Soils (G002XS201WA)
Other vegetative classification: Seasonally Wet Soils (G002XS201WA)

120—Tisch silt loam

Map Unit Setting
National map unit symbol: 2nd82
Elevation: 50 to 1,000 feet
Mean annual precipitation: 20 to 60 inches
Mean annual air temperature: 48 to 52 degrees F
Frost-free period: 150 to 250 days
Farmland classification: Prime farmland if drained

Map Unit Composition
Tisch, drained, and similar soils: 80 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Tisch, Drained

Setting
Landform: Depressions, drainageways
Parent material: Alluvium, volcanic ash, and diatomaceous earth

Typical profile
H1 - 0 to 11 inches: silt loam
H2 - 11 to 50 inches: silt loam
Oa - 50 to 60 inches: muck

Properties and qualities
Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Very poorly drained

Capacity of the most limiting layer to transmit water (Ksat): Moderately high (0.20 to 0.57 in/hr)
Depth to water table: About 0 to 12 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Very high (about 25.3 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 5w

125—Xerorthents, 0 to 5 percent slopes

Map Unit Setting

National map unit symbol: 2nd87
Elevation: 0 to 2,620 feet
Mean annual precipitation: 30 to 60 inches
Mean annual air temperature: 39 to 50 degrees F

Frost-free period: 150 to 200 days
Farmland classification: Not prime farmland

Map Unit Composition
Xerorthents and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Xerorthents

Setting
Landform: Tidal flats
Parent material: Sandy and loamy cut and fill material

Typical profile
H1 - 0 to 60 inches: variable

Properties and qualities
Slope: 0 to 5 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Depth to water table: About 24 inches
Frequency of flooding: None
Frequency of ponding: None

Interpretive groups
Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 7s
Hydric soil rating: No

126—Yelm fine sandy loam, 0 to 3 percent slopes

Map Unit Setting
National map unit symbol: 2nd88
Elevation: 80 to 980 feet
Mean annual precipitation: 30 to 60 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 170 to 200 days
Farmland classification: All areas are prime farmland

Map Unit Composition
Yelm and similar soils: 85 percent
Minor components: 13 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Yelm

Setting
Landform: Outwash terraces
Parent material: Glacial outwash

Typical profile
H1 - 0 to 8 inches: fine sandy loam
H2 - 8 to 46 inches: fine sandy loam

H3 - 46 to 60 inches: loamy sand

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): High (1.98 to 5.95 in/hr)
Depth to water table: About 18 to 36 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: High (about 11.0 inches)

Interpretive groups

127—Yelm fine sandy loam, 3 to 15 percent slopes

Map Unit Setting

National map unit symbol: 2nd89
Elevation: 80 to 980 feet
Mean annual precipitation: 30 to 60 inches
Mean annual air temperature: 50 degrees F
Frost-free period: 170 to 200 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Yelm and similar soils: 85 percent
Minor components: 3 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Yelm

Setting

Landform: Outwash terraces
Parent material: Glacial outwash

Typical profile

H1 - 0 to 8 inches: fine sandy loam
H2 - 8 to 46 inches: fine sandy loam
H3 - 46 to 60 inches: loamy sand

Properties and qualities

Slope: 3 to 15 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Capacity of the most limiting layer to transmit water (Ksat): High (1.98 to 5.95 in/hr)
Depth to water table: About 18 to 36 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: High (about 11.0 inches)

Interpretive groups

Land capability classification (irrigated): 4e
Land capability classification (nonirrigated): 3e
Hydrologic Soil Group: B
Ecological site: F002XA005WA - Puget Lowlands Moist Forest
Forage suitability group: Soils with Moderate Limitations (G002XS601WA)
Other vegetative classification: Soils with Moderate Limitations (G002XS601WA)
Hydric soil rating: No

Minor Components

Soil Information for All Uses

Soil Reports

The Soil Reports section includes various formatted tabular and narrative reports (tables) containing data for each selected soil map unit and each component of each unit. No aggregation of data has occurred as is done in reports in the Soil Properties and Qualities and Suitabilities and Limitations sections.

The reports contain soil interpretive information as well as basic soil properties and qualities. A description of each report (table) is included.

Land Classifications

This folder contains a collection of tabular reports that present a variety of soil groupings. The reports (tables) include all selected map units and components for each map unit. Land classifications are specified land use and management groupings that are assigned to soil areas because combinations of soil have similar behavior for specified practices. Most are based on soil properties and other factors that directly influence the specific use of the soil. Example classifications include ecological site classification, farmland classification, irrigated and nonirrigated land capability classification, and hydric rating.

Prime and other Important Farmlands

This table lists the map units in the survey area that are considered important farmlands. Important farmlands consist of prime farmland, unique farmland, and farmland of statewide or local importance. This list does not constitute a recommendation for a particular land use.

In an effort to identify the extent and location of important farmlands, the Natural Resources Conservation Service, in cooperation with other interested Federal, State, and local government organizations, has inventoried land that can be used for the production of the Nation's food supply.

Prime farmland is of major importance in meeting the Nation's short- and long-range needs for food and fiber. Because the supply of high-quality farmland is limited, the U.S. Department of Agriculture recognizes that responsible levels of government, as well as individuals, should encourage and facilitate the wise use of our Nation's prime farmland.

Prime farmland, as defined by the U.S. Department of Agriculture, is land that has the best combination of physical and chemical characteristics for producing food, feed, forage, fiber, and oilseed crops and is available for these uses. It could be cultivated land, pastureland, forestland, or other land, but it is not urban or built-up land or water areas. The soil quality, growing season, and moisture supply are those needed for the soil to economically produce sustained high yields of crops when proper management, including water management, and acceptable farming methods are applied. In general, prime farmland has an adequate and dependable supply of moisture from precipitation or irrigation, a favorable temperature and growing season, acceptable acidity or alkalinity, an acceptable salt and sodium content, and few or no rocks. The water supply is dependable and of adequate quality. Prime farmland is permeable to water and air. It is not excessively erodible or saturated with water for long periods, and it either is not frequently flooded during the growing season or is protected from flooding. Slope ranges mainly from 0 to 6 percent. More detailed information about the criteria for prime farmland is available at the local office of the Natural Resources Conservation Service.

For some of the soils identified in the table as prime farmland, measures that overcome a hazard or limitation, such as flooding, wetness, and droughtiness, are needed. Onsite evaluation is needed to determine whether or not the hazard or limitation has been overcome by corrective measures.

A recent trend in land use in some areas has been the loss of some prime farmland to industrial and urban uses. The loss of prime farmland to other uses puts pressure on marginal lands, which generally are more erodible, droughty, and less productive and cannot be easily cultivated.

Unique farmland is land other than prime farmland that is used for the production of specific high-value food and fiber crops, such as citrus, tree nuts, olives, cranberries, and other fruits and vegetables. It has the special combination of soil quality, growing season, moisture supply, temperature, humidity, air drainage, elevation, and aspect needed for the soil to economically produce sustainable high yields of these crops when properly managed. The water supply is dependable and of adequate quality. Nearness to markets is an additional consideration. Unique farmland is not based on national criteria. It commonly is in areas where there is a special microclimate, such as the wine country in California.

In some areas, land that does not meet the criteria for prime or unique farmland is considered to be *farmland of statewide importance* for the production of food, feed, fiber, forage, and oilseed crops. The criteria for defining and delineating farmland of statewide importance are determined by the appropriate State agencies. Generally, this land includes areas of soils that nearly meet the requirements for prime farmland and that economically produce high yields of crops when treated and managed according to acceptable farming methods. Some areas may produce as high a yield as prime farmland if conditions are favorable. Farmland of statewide importance may include tracts of land that have been designated for agriculture by State law.

In some areas that are not identified as having national or statewide importance, land is considered to be *farmland of local importance* for the production of food, feed, fiber, forage, and oilseed crops. This farmland is identified by the appropriate local agencies. Farmland of local importance may include tracts of land that have been designated for agriculture by local ordinance.

Report—Prime and other Important Farmlands

Prime and other Important Farmlands–Thurston County Area, Washington		
Map Symbol	**Map Unit Name**	**Farmland Classification**
1	Alderwood gravelly sandy loam, 0 to 8 percent slopes	Prime farmland if irrigated
2	Alderwood gravelly sandy loam, 8 to 15 percent slopes	Prime farmland if irrigated
3	Alderwood gravelly sandy loam, 15 to 30 percent slopes	Farmland of statewide importance
20	Cagey loamy sand	Prime farmland if irrigated
27	Delphi very gravelly loam, 3 to 15 percent slopes	Farmland of statewide importance
30	Dystric Xerochrepts, 60 to 90 percent slopes	Not prime farmland

Wetlands are a composite of new wetland standards and old wetland (pre-2017) delineations identified by the Thurston Regional Planning Council (TRPC) staff and the National Wetlands Inventory data. Edits to the data are made using verified wetland reports that have been submitted to and accepted by the Thurston County Community Planning and Economic Development Department. Last updated July 2, 2024.

Wetland Review Areas contains areas 300 feet around mapped wetland areas identified by TRPC, the National Wetlands Inventory, and wetland delineations from approved Thurston County permit applications.

DRAFT

1. Introduction

A. Background

The Housing Element is part of Tumwater's Comprehensive Plan and was prepared in response to the Growth Management Act (Chapter 36.70A RCW) and meets the requirements of RCW 36.70A.070(2) for the housing elements that are found in Appendix B *State Requirements*.

Tumwater's Vision, Mission, and Belief Statements that provide overarching direction for the future of Tumwater are found in the Comprehensive Plan Summary.

The Housing Element aligns and is consistent with the other elements of the Comprehensive Plan.

The 2021 goals and actions to address homelessness and create more housing identified in Tumwater Housing Action Plan were incorporated into the Housing Element.

Part 1 – Goals Policies, and Implementation Actions establishes Tumwater's goals and policies to set forth a direction to create and maintain housing in Tumwater.

The goals of the Housing Element are guided by the state Growth Management Act and the Thurston County County-Wide Planning Policies and the vision of a Tumwater that supports affordable housing for all members of the community. The Element's goals and policies are coordinated with the other Elements and regional plans.

The Housing Element's goals and policies are the policy basis for the draft implementation actions in Housing Element and those future actions that will be developed over the next 20 years which will be the foundation for Tumwater's annual work programs to address affordable housing for the community.

Part 2 – Technical Information provides a housing needs assessment, a land capacity analysis, consideration of racially disparate impacts, exclusion, and displacement, and a discussion of existing and future housing provision that are intended to try to reduce the cost of producing more housing to support the twenty-year growth projections for Tumwater.

B. How to Read this Part of the Document

In Part 1, Chapters 2 and 3 discuss the Housing Element's connection to the goals of the state Growth Management Act and the Thurston County County-Wide Planning Policies.

Chapter 4 presents each goal with an explanation of how to read the tables and then presents each of Tumwater's housing goals in detail with an explanation of the importance of each goal and how it helps to reduce the cost of housing and address equity.

Appendix A contains the draft implementation actions, which are intended to be a source of annual work program items that serve to implement the goals and policies of the Housing Element.

DRAFT

The annual work programs will further refine the implementation actions prior to their being put into practice. It is expected that implementation actions will be further amended, added, or subtracted as needed over the course of the 20 year Comprehensive Plan as new opportunities arise to meet the intent of the Housing Element's goals and policies.

DRAFT

2. Growth Management Act – Element Goals

Chapter 36.70A RCW requires that Tumwater show how the Housing Element meets the relevant planning goals contained within the Act. The following is a listing of the applicable goals for the Housing Element, and an analysis of how the Element addresses these goals:

1. ***Urban growth***. *Encourage development in urban growth areas where adequate public facilities and services exist or can be provided in an efficient manner.*

The Housing Element has policies supporting development in the urban growth area that support the goals of the Land Use Element.

2. ***Reduce sprawl***. *Reduce the inappropriate conversion of undeveloped land into sprawling, low density development.*

The Housing Element has goals and policies requiring urban growth to be phased outward from the urban core and supports the development of housing on vacant and underdeveloped properties to reduce urban sprawl.

4. ***Housing***. *Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.*

The Housing Element includes a variety of policies expressly designed to keep housing affordable, including a number of regulatory changes dispersed throughout the document.

7. ***Permits***. *Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.*

Tumwater tracks the time it processes permits and has historically achieved short turnaround times for permits.

11. ***Citizen participation and coordination***. *Encourage the involvement of citizens in the planning process, including the participation of front line communities and overburdened communities, and ensure coordination between communities and jurisdictions to reconcile conflicts.*

During the 2025 Comprehensive Plan update, staff met with a housing stakeholder group made up of a wide range of individuals and groups involved in providing housing construction and services. Staff held an in person housing open house and an online housing story, conducted an informational survey and met regularly with the Planning Commission, General Government Committee, and City Council to discuss the development of the Element. The 2025 Comprehensive Plan update webpage was updated with all materials presented publicly. Tumwater staff also attended meetings with homeowner associations, civic and business groups. This approach allowed for public participation in the planning process for the Housing Element.

DRAFT

3. County-Wide Planning Policies

The Growth Management Act requires that Tumwater's Comprehensive Plan be consistent with the Thurston County County-Wide Planning Policies, which were last amended in 2025.

The following is a list of the relevant sections of the County-Wide Planning Policies that apply to the Housing Element. All County-Wide Planning Policies are adopted as part of the Comprehensive Plan and are found in Appendix A of the Plan Introduction.

The Housing Element is Tumwater's principal policy document concerning affordable housing. The Land Use Element works with the Housing Element to provide adequate suitably zoned vacant land to further the policies of the Housing Element. Each residential designation as well as a number of designations that allow for mixed use development in the Land Use Element provide a variety of housing types to allow for affordable housing to be provided for all economic segments of the Tumwater population.

The Housing Element includes a variety of policies expressly designed to support housing affordability, including but not limited to, suggested regulatory changes found throughout the document.

VIII. Affordable Housing

8.1 Increase housing choices to support all ranges of lifestyles, household incomes, abilities, and ages. Encourage a range of housing types and costs that are commensurate with the employment base and income levels of jurisdictions' populations, particularly for low, moderate and fixed income families.

The Housing Element addresses how best to provide affordable housing for all economic segments of Tumwater's population by examining current housing conditions, regulatory barriers, and projected housing needs. The Element contains a variety of policies supporting a wide range of housing choices, such as providing sufficient, suitably zoned land for housing and developing innovative plans, codes, and standards for affordable housing.

8.2 Accommodate low and moderate income housing throughout each jurisdiction rather than isolated in certain areas.

The Housing Element discourages the concentration of low and moderate income housing, favoring dispersal of such housing.

8.3 Exploring ways to reduce the costs of housing.

The Housing Element's purpose is to support ways to reduce the cost of housing so that Tumwater residents of all income groups can afford housing suitable to their needs.

8.4 Establish and maintain a process to accomplish a fair share distribution of affordable housing among the jurisdictions.

The Housing Element recommends that the fair share distribution of affordable housing among the jurisdictions be decided on a regional basis.

8.5 Working with the private sector, Housing Authority, neighborhood

groups, and other affected citizens, to facilitate the development of attractive, quality, low and moderate income housing that is compatible with the surrounding neighborhood and located within easy access to public transportation, commercial areas and employment centers.

Throughout the Housing Element, there are many goals and policies that support the development of housing to serve the needs of all income groups in Tumwater. Tumwater will address these goals by increasing density in specified areas, increasing the range of housing types, and building partnerships with other agencies and organizations including homeowners' associations to reduce restrictions and increase permanent, income-restricted affordable housing stock.

8.6 Regularly examine and modify policies that pose barriers to affordable housing.

The chapter on barrier assessment in the Housing Element provides specific recommendations on regulatory amendments to support the development and maintenance of affordable housing.

8.7 When possible, provide assistance in obtaining funding and/or technical assistance for the expansion or establishment of low cost affordable housing for low, moderate, and fixed income individuals and families.

The Housing Element includes language supporting low income housing providers in Tumwater.

DRAFT

4. Element Goals and Policies

A. How to Read These Tables

The Housing Element goals and policies are not in priority order.

Appendix A provides a list of the draft implementation actions by goal and policy that will be considered when developing annual work programs for implementing the Housing Element's goals and policies.

1) Period

Each of the Housing Element's policies are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

2) Effort to Achieve

Each of the Housing Element's policies are ranked according to the level of effort to achieve:

High Policy would require significant funding or staff resources or political effort to implement.

Medium Policy would require moderate funding or staff resources or political effort to implement.

Low Policy would require few funding or staff resources or political effort to implement.

3) Effect on Housing Supply

Each of the Housing Element's policies are ranked according to their expected effect on housing supply in Tumwater:

High Policy could result in a significant increase in desired housing units.

Medium Policy could result in a moderate increase in desired housing units.

Low Policy could result in a small increase in desired housing units.

4) Housing Needs

The Housing Element's policies are associated with one of the six goals in the Housing Element. Each policy addresses one or more of the eight areas of housing needs or state requirements:

Affordability. Reduces the cost of housing for low-income and cost-burdened households.

Supply. Increases the inventory of housing for all households.

Variety. Increases the variety of housing types.

Seniors. Increases the stock of housing options needed for aging seniors.

Improvements. Maintains the existing housing stock, including improving energy efficiency and air quality.

DRAFT

Stability. Increases household wealth by providing safe, stable options for rental housing and pathways to homeownership.

Supportive Housing. Increases permanent supportive housing options for people with disabilities and those at risk of or experiencing homelessness.

State Requirement. Addresses state requirements for housing.

B. Housing Goals and Policies

Goal H-1 Increase the supply and variety of housing for every income and age group.

Goal H-1 is intended to streamline the development and construction of both owner and renter-occupied market rate and publicly supported housing to increase the amount and variety of housing types.

1) Why is this Goal Important?

Between 2020 and 2045, the population of Tumwater and its urban growth area is projected to increase by 21,969 people. This growth will require 9,192 new housing units in Tumwater and its urban growth area by 2045. Of those units 3,298 would need to be affordable to a household of four making 80% or less of the Area Median Income, which was $82,000 in Thurston County in 2023. When demand for housing is high, but supply stays low, housing costs increase, reducing affordability. The increase in costs affects both renters and those looking to buy.

As household formation and composition have changed over time, so have housing needs. Increasing the variety of housing types allows households more choices and creates a dynamic housing market better able to meet the needs of people wanting to live in Tumwater.

2) How Does the Goal Reduce Housing Costs?

Tumwater will see a growth of households in all income categories over the next twenty years, from the lowest earning ones to those earning well above the median income. This will require housing affordable to a wide range of incomes.

Expanding the housing supply also means people can find housing better suited to their needs. For example, a young family looking to buy their first home may continue to rent or pay more than 30 percent of their household income on a mortgage if home sale prices are too high.

Middle housing, a small part of Tumwater's current housing stock, is an important part of an affordable housing strategy. Middle housing includes duplexes, triplexes, quadplexes, stacked units attached townhomes, and cottage housing.

Per unit costs for middle housing tend to be lower than single-family homes, because the units are smaller, and developers can benefit from economies of scale. Per unit costs are also less than larger multifamily developments because

DRAFT

they do not require structured parking or concrete and steel structures and are typically in neighborhoods with existing infrastructure. This leads to lower costs for both homeowners and renters.

Diversifying the housing stock also recognizes that households are unique and have a wide range of housing needs. This is particularly true as Tumwater's population ages. Middle housing is one way for seniors to downsize while staying in the neighborhoods they love.

3) How Does this Goal Address Equity?

When demand for housing is high, but supply is low, housing costs rise, decreasing affordability.

Those with the lowest incomes, who are disproportionately people of color, are most affected. Rising rents are correlated with increased evictions and homelessness.

Rising home prices means homeownership, a way for disadvantaged households to build wealth and increase financial stability, becomes more difficult.

Increasing costs can also lead to gentrification or cultural displacement as people move to new neighborhoods that lack the businesses and institutions important to their community. While this process may be voluntary, it can be destabilizing for communities of color. When higher income households, those that can afford to rent or buy at market rates, find housing that better meets their needs and budgets, more units are freed up that lower income households can afford. Expanding the overall housing stock also slows the increases in rent and housing prices that disproportionately affect people of color.

Market rate housing alone will not address the needs of the most disadvantaged populations, and pressure to develop market rate housing in communities of color can cause displacement. Draft implementation actions for Goal H-1 in Appendix A would help to increase the supply of housing for the lowest-income households.

Increasing the variety of housing options gives more affordable housing options to low-income households, who are disproportionately people of color. Middle housing can be both rental and owner-occupied. Affordable owner-occupied units are a way to build financial equity.

Middle housing also expands the housing options available in predominantly single-family neighborhoods, leading to a mix of household incomes. This allows low-income households to access some of the resources, such as better school districts or healthier neighborhoods, available to higher-income households.

DRAFT

Policies		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-1.1	**Strive for equity and opportunities for housing regardless of age, race, color, national origin, ancestry, sex, sexual orientation, familial status, marital status, ethnic background, source of income use of federal housing assistance, disability, veteran status, protected classes, or other arbitrary factors.**	Term of the Plan	H	H	
H-1.2	**In conjunction with the Land Use Element, provide sufficient land to meet projected future housing needs.**	Term of the Plan	M	H	
H-1.3	**In conjunction with the Transportation Plan and Lands for Public Purposes Element, support capital facilities planning that meets projected future housing needs over the next 20 years.**	Term of the Plan	M	H	
H-1.4	**Support the construction of housing on vacant or unused lots, such as unused commercial buildings, to minimize urban sprawl and reuse existing infrastructure.**	**Term of the Plan**	L	L	
H-1.5	**Direct mixed use and high density residential development along transit corridors and into urban centers to support employment and place-making opportunities.**	Term of the Plan	L	L	

Policies		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-1.6	**Consider innovative plans, codes, standards, and procedures to take advantage of the best private and public sector approaches to creating housing.**	Term of the Plan	M	M	
H-1.7	**Encourage middle and infill housing consistent with state law.**	Term of the Plan	M	M	
H-1.8	**Support housing opportunities for those at risk of homelessness.**	Term of the Plan	H	M	
H-1.9	**Support housing opportunities for those with special needs, particularly those related to age or disability.**	2026-28	M	L	
H-1.10	**Strive for housing that is compatible in quality and design with surrounding land uses, traffic patterns, public facilities, and environmentally sensitive areas through use of innovative designs that enhance the appearance and quality of Tumwater's neighborhoods.**	Term of the Plan	M	L	

Goal H-2 Expand the supply of permanent, income-restricted affordable housing.

Goal H-2 includes draft implementation actions in Appendix A that increase the supply of housing affordable to low-income households (those making eighty or less percent of the area median

family income) and draft implementation actions that support the providers of low-income housing.

1) Why is this Goal Important?

Demand for housing is straining the limited supply of affordable options. For households with the lowest incomes, such as single income earners with service industry roles like retail clerks, home health aides, or a childcare provider, market rate housing is unlikely to be an affordable option. For these households, even home maintenance costs, let alone rent or mortgage payment costs, can be unaffordable.

2) How does this Goal Reduce Housing Costs?

Removing barriers and providing incentives to develop affordable housing for the lowest incomes increases housing affordability for these households.

Reducing the cost of renting and owning a home are both parts of the solution. For households looking towards homeownership, the up-front costs associated with purchasing a home can put this option out of reach. Low-income households, however, can benefit from the stabilization in housing costs that owning a home can offer, in general, monthly mortgage payments stay the same over 30 years while monthly rent payments increase.

The draft implementation actions in Appendix A address the need for permanent supportive housing for people with disabilities, seniors on limited incomes, and others in similar situations. For people moving out of emergency housing situations, such as a homeless shelter, permanent supportive housing provides not only affordable housing but also access to health and social services. These services build stability and decrease the likelihood residents experiencing homelessness again.

3) How Does this Goal Address Equity?

People who have systematically had less access to generational wealth building, such as communities of color, or those who have experienced homelessness, stand to benefit the most from income restricted housing. Equity means getting people and communities to have equal possible outcomes, which requires eliminating barriers and providing support to those who need it the most. This goal seeks to address equity by providing affordable, stable housing options tailored to meet the needs of our community.

Housing affordable to households with the lowest incomes can be rental or owner units, both of which help stabilize households. Programs that expand homeownership opportunities can significantly improve a household's wealth; this is especially important to addressing inequities for households of color stemming from historical policies like redlining and zoning.

DRAFT

Policies		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-2.1	**Support permanent, income-restricted affordable housing in variety of locations, types, and designs that is safe, and near jobs and daily activities.**	**Term of the Plan**	**H**	**M**	
H-2.2	**Support permanent, income-restricted affordable housing through budgeting and funding decisions.**	**Term of the Plan**	**H**	**M**	

Goal H-3 Maintain and improve existing housing stock.

Goal H-3 is intended to support the ongoing maintenance of Tumwater's housing stock.

1) Why is this Goal Important?

One of the most important methods to keep an adequate supply of housing in Tumwater is to retain existing housing in good condition. The policies and draft implementation actions in Appendix A for Goal H-3 are intended to support the maintenance and improvement of the existing housing stock to avoid prematurely needing new housing to replace existing housing.

2) How Does the Goal Reduce Housing Costs?

Goal H-3 helps to reduce costs by addressing ongoing maintenance on a regular basis to avoid creating a larger, more expensive problem later by not dealing with a smaller, less expensive problem now.

Maintaining and improving Tumwater's existing housing stock also improves energy efficiency, which reduces costs and climate impacts, and air quality, which improves resident's health.

3) How Does this Goal Address Equity?

Existing housing stock is more likely to serve low- and moderate-income residents of Tumwater. Providing public funding to help with renovating and maintaining existing housing that serves low-income households, seniors, or residents with disabilities is a good way of ensuring that residents of all incomes can continue to live in Tumwater.

Tumwater has implemented this goal in the part through funding to nonprofits, CDBG funding, and work through the Regional Housing Council.

DRAFT

Policies		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-3.1	Support efforts to maintain existing housing stock as healthy and safe.	Term of the Plan	H	M	
H-3.2	Support Federal, State, and local financing opportunities to maintain, upgrade, or retrofit the existing housing stock.	Term of the Plan	M	M	
H-3.3	Strive to increase equity and quality of life by improving community surroundings and infrastructure in residential areas.	Term of the Plan	H	M	
H-3.4	Support manufactured home parks to maintain existing sources of affordable housing.	Term of the Plan	M	M	

Goal H-4 Make it easier for households to access housing and stay housed.

Goal H-4 address housing stability in Tumwater by preventing evictions and displacement and creating opportunities to build financial equity through homeownership.

1) Why is this Goal Important?

Housing stability is an important component of housing affordability. When households face housing insecurity because they live paycheck to paycheck or other issues, there can be a fine line between being housed and being homeless. Evictions and foreclosures are both destabilizing and can lead to long-term poverty. These events also make it more likely that a household will experience homelessness.

2) How does this Goal Reduce Housing Costs?

For Tumwater, our priority is to prevent our residents from experiencing homelessness. Not only is that more humane, but it is also more cost-effective.

Households that can avoid evictions and foreclosures also avoid increases in their monthly housing costs. Finding a new home to live in is also very challenging when the supply is

low and the demand is high. For renters, this can also include application fees, deposits, moving expenses, and other costs associated with finding new rental housing.

3) How Does this Goal Address Equity?

Goal H-4 includes draft implementation actions in Appendix A to make it easier for households to access housing and stay housed.

Homeownership is an important way for a household to build financial equity, move people out of poverty, and create generational wealth. Creating these opportunities for people of color, who were historically denied access to mortgages and loans, is particularly important.

As a result of these structural past and present harms, people of color are more likely to rent and more likely to have a lower income than their white, non-Hispanic counterparts. This makes them particularly vulnerable to being evicted when rent increases exceed their ability to pay. This concern is reflected in the population experiencing homelessness, which are also disproportionately people of color.

Policies		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-4.1	**Coordinate with and promote social service organizations in their efforts to help prospective homeowners with financial assistance.**	**Term of the Plan**	**M**	**M**	
H-4.2	**Develop policies that protect front line communities from displacement and inflated housing costs when on fixed incomes.**	**2026-28**	**M**	**M**	

Goal H-5 Continually develop partnerships to improve implementation of housing strategies.

Goal H-5 recognizes the need for Tumwater to engage with its community and maintain strong relationships with affordable housing and housings service providers to address housing affordability.

1) Why is this Goal Important?

While Tumwater does not build or manage housing, the policies and codes the City enacts can affect how much housing can be built and at what cost.

2) How does this Goal Reduce Housing Costs?

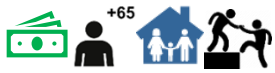
By establishing partnerships with organizations who build housing and that serve below median income households, Tumwater can work with them to direct resources and enact policies that best serve the community.

For some, changes brought on by growth and new development in their established neighborhoods can be seen as difficult. As a result, residents may support policies that improve housing affordability while at the same time deter implementation actions needed to increase affordable options.

Inviting people of all social and economic groups in Tumwater into conversation provides the most direct means of collaborating with leaders of disadvantaged populations to foster government action that does not increase inequities faced by people of color.

3) How Does this Goal Address Equity?

Building public understanding and compassion around the challenges faced by low-income households includes recognizing the historic and systemic reasons why they are disproportionately people of color.



The people who typically engage in public review processes, especially land use processes, are often white and have a higher income, which is not reflective our entire community. Developing relationships with organizations that work with or represent communities of color and disadvantaged groups can help Tumwater better:

- Serve our community.
- Identify who benefits or is burdened by an action.
- Examine potential unintended consequences of taking an action.
- Mitigate unintended negative consequences of taking an action.
- Build in strategies to advance racial equity.

Initiative-taking efforts to strive for engagement in decision-making processes are broadly inclusive and grounded in achieving equity is necessary. With broader input representative of the whole community, decisions are better balanced and implementation actions Tumwater take can be more successfully implemented in an equitable fashion.

Inviting and bringing in people of all levels of society in Tumwater into conversation provides the most direct means of collaborating with leaders of disadvantaged populations to foster government action that does not increase inequities faced by people of color.

DRAFT

Policies		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-5.1	Maintain relationships with for profit housing developers and services.	Term of the Plan	M	M	
H-5.2	Maintain relationships with nonprofits housing providers and services.	Term of the Plan	M	M	
H-5.3	Work with the other jurisdictions as part of the Regional Housing Council to address homelessness and affordable housing in Thurston County.	Term of the Plan	M	M	
H-5.4	Maintain partnerships with agencies that provide or support housing.	Term of the Plan	M	M	

Goal H-6 Explore a Permanent Source of Funding for Low-Income Housing.

Goal H-6 addresses the need to increase funding for low-income housing and to provide a regional strategy for distributing funds.

1) Why is this Goal Important?

While the private sector will build most of the housing needed to meet demand in the Cities of Lacey, Olympia, and Tumwater, a significant portion of households earn less than 80 percent of the median area income. Paying market rate rents or mortgages may not be affordable for them.

For nonprofit or for-profit developers, it is difficult for a low-income development project to be feasible without public support.

2) How does this Goal Reduce Housing Costs?

Providing affordable housing for the lowest income households and those experiencing homelessness requires significant public resources. Currently those resources are scarce, leaving many households unable to afford a decent and affordable place to live that does not have unsafe or unhealthy living conditions.

Many of the draft implementation actions identified in Appendix A of this Element are not possible without more funding. Tumwater can play a significant role in leveraging local, state, and federal dollars for low-income housing. The City also recognizes the need to collaborate regionally on a funding strategy so that funds are used efficiently and distributed to the areas of greatest need. More funding reduces the costs to develop and maintain units and makes housing units more affordable.

While Tumwater will explore ways to increase funding, the City recognizes the need to increase at the state and federal level for affordable housing.

3) How Does this Goal Address Equity?

In 2021, 39 percent of households in Tumwater less than 80 percent of area median income, which are low-, very low-, and extremely low-income households. The draft implementation actions in Appendix A of Goal H-6 will help to address these issues.

Policies		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-6.1	**Work with the state and regional partners to explore permanent sources of funding for the construction and maintenance of low-income housing.**	**Term of the Plan**	**H**	**H**	

DRAFT

Appendix A – Draft Implementation Actions

Each of the Housing Element goals and policies in Chapter 4 will require Tumwater to take specific actions to implement over the course of the 20 year term of the Comprehensive Plan.

The draft implementation actions in the tables below were developed in coordination with the housing stakeholders, the community, and Tumwater staff. The draft implementation actions in the tables below are intended to serve as the building blocks for developing the annual Tumwater work programs that will implement the goals and policies of the Housing Element.

The draft implementation actions will need further refinement before they are incorporated into annual Tumwater work programs.

As the Comprehensive Plan is put into action over the next twenty years, the draft implementation actions will change as new, unforeseen opportunities emerge: new ones may be added, proposed ones may be modified or replaced by other actions.

1. How to Read These Tables

The Housing Element goals, policies, and the draft implementation actions associated with them are not in priority order.

The draft implementation actions that can only be undertaken by other entities are not included in this plan.

a) Period

Each of the Housing Element's policies and draft implementation actions are associated with estimated start dates, length of time to complete, and target completion dates, if appropriate based on adequate funding for staff and resources. Most policies are ongoing with no set target completion date.

b) Effort to Achieve

Each of the Housing Element's policies and draft implementation actions are ranked according to the level of effort to achieve:

High	Policy or action would require significant funding or staff resources or political effort to implement.
Medium	Policy or action would require moderate funding or staff resources or political effort to implement.
Low	Policy or action would require few funding or staff resources or political effort to implement.

c) Effect on Housing Supply

Each of the Housing Element's policies and draft implementation actions are ranked according to their expected effect on housing supply in Tumwater:

High	Policy or action could result in a significant increase in desired housing units.

DRAFT

Medium Policy or action could result in a moderate increase in desired housing units.

Low Policy or action could result in a small increase in desired housing units.

d) Housing Needs

The Housing Element's policies and draft implementation actions are associated with one of the six goals in the Housing Element. Each policy and draft implementation action addresses one or more of the eight areas of housing need or state requirements:

Affordability. Reduces the cost of housing for low-income and cost-burdened households.

Supply. Increases the inventory of housing for all households.

Variety. Increases the variety of housing types.

Seniors. Increases the stock of housing options needed for aging seniors.

Improvements. Maintains the existing housing stock, including improving energy efficiency and air quality.

Stability. Increases household wealth by providing safe, stable options for rental housing and pathways to homeownership.

Supportive Housing. Increases permanent supportive housing options for people with disabilities and those at risk of or experiencing homelessness.

State Requirement. Addresses state requirements for housing.

DRAFT

2. Housing Goals, Policies, and Implementation Actions

Goal H-1 Increase the supply and variety of housing for every income and age group.

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-1.1 Strive for equity and opportunities for housing regardless of age, race, color, national origin, ancestry, sex, sexual orientation, familial status, marital status, ethnic background, source of income use of federal housing assistance, disability, veteran status, protected classes, or other arbitrary factors.	Term of the Plan	H	H	
H-1.1.1 Consider Tumwater programs to offset the displacement of community members by new housing development while not resulting in unnecessary barriers to housing production.	2026-28	M	L	
H-1.1.2 Develop programs to address racially disparate impacts and exclusion in housing caused by local policies, plans, and implementation actions.	2026-28	M	L

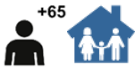
Goal H-2 Expand the supply of permanent, income-restricted affordable housing.

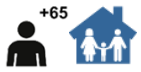
Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-2.1 Support permanent, income-restricted affordable housing in variety of locations, types, and designs that is safe, and near jobs and daily activities.	**Term of the Plan**	**H**	**M**	
H-2.1.1 Expand incentives to incorporate permanent, income-restricted affordable housing into residential developments.	2029-30	H	M	
H-2.1.2 Develop regulations that require a portion of a new Planned Unit Development used for residential development be permanent, income-restricted affordable housing units of different types.	2029-30	H	M	



Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-2.1.3 Mix market rate and low-income housing to avoid creating areas of concentrated low-income housing.	Term of the Plan	M	L	
H-2.1.4 Donate or lease surplus Tumwater-owned land as available to developers that provide permanent supportive housing and explore a process for coordinating the acceptance of land donations from others.	Term of the Plan	M	M	
H-2.2 Support permanent, income-restricted affordable housing through budgeting and funding decisions.	**Term of the Plan**	H	M	
H-2.2.1 Review deferral of park and transportation impact fee payments and utility connection charges for permanent, income-restricted affordable housing.	2026-28	M	M	
H-2.2.2 Review and update permit fee waivers for low-income housing developments.	2026-28	M	M	

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-2.2.3 Coordinate with nonprofit developers on projects that increase permanent, income-restricted affordable housing through federal, state, or local grants or loans.	Term of Plan	H	M	
H-2.2.4 Coordinate with social service organizations in their efforts to seek funds for construction and operation of emergency, transitional, and permanent supportive housing.	Term of Plan	M	M	
H-2.2.5 Meet regularly with housing providers and developers and help inform and educate on programs that support affordable housing.	Term of the Plan	M	M	
H-2.2.6 Coordinate with the Housing Authority of Thurston County and other non-profit organizations to purchase income-restricted units before they are converted to market rate housing.	Term of Plan	H	M	

Goal H-3 Maintain and improve existing housing stock.



Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-3.1 Support efforts to maintain existing housing stock as healthy and safe.	**Term of the Plan**	**H**	**M**	
H-3.1.1 Work with nonprofit providers to support services that work with property owners and renters to maintain housing in good condition and keep people housed.	Term of the Plan	**M**	**M**	
H-3.2 Support Federal, State, and local financing opportunities to maintain, upgrade, or retrofit the existing housing stock.	**Term of the Plan**	**M**	**M**	
H-3.2.1 Build and maintain public and private partnerships to address renovations of unfit structures for use as permanent, income-restricted affordable housing.	Term of the Plan	**M**	**M**	
H-3.2.2 Explore funding for seniors, low income, and disabled residents to purchase housing through community land trusts.	Term of the Plan	**H**	**L**	

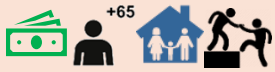
Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-3.2.3 Consider an energy assistance program for rental housing to help property owners with making upgrades when the unit is sold.	2029-30	M	L	
H-3.2.4 Explore programs for septic and well conversions to allow for more housing capacity and density.	2029-30	H	H	
H-3.3 Strive to increase equity and quality of life by improving community surroundings and infrastructure in residential areas.	**Term of the Plan**	H	M	
H-3.3.1 Focus improvements on green space, transportation, and utilities in areas that are cost burdened and at elevated risk of displacement to strive for equity and health.	Term of the Plan	H	M	
H-3.4 Support manufactured home parks to maintain existing sources of affordable housing.	**Term of the Plan**	M	M	
H-3.4.1 Maintain the manufactured home park district land use designation and zone district to prevent conversion of affordable housing to other uses without replacement.	Term of the Plan	M	M	

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-3.4.2 Facilitate a program to preserve and maintain healthy and viable manufactured home parks.	2029-30	M	M	
H-3.4.3 Explore programs with non-profits to acquire manufactured home parks so that lot rental fees can be managed.	Term of the Plan	H	M	

Goal H-4 Make it easier for households to access housing and stay housed.

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-4.1 Coordinate with and promote social service organizations in their efforts to help prospective homeowners with financial assistance.	**Term of the Plan**	M	M	
H-4.1.1 Support down payment assistance programs for homeownership and programs that help people entering the rental market.	2031-32	H	M	
H-4.2 Develop policies that protect frontline communities from displacement and inflated housing costs when on fixed incomes.	**2026-28**	M	M	

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-4.2.1 Work with non-profits and organizations on programs that help communities facing barriers stay housed	Term of the Plan	M	M	
H-4.2.2 Identify areas at risk of displacement and update policies and regulations to address.	2026-28	M	M	
H-4.2.3 Consider short-term rental regulations to minimize impacts on long-term housing availability.	2029-31	H	L	



Goal H-5 Continually develop partnerships to improve implementation of housing strategies.

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-5.1 Maintain relationships with for profit housing developers and services.	**Term of the Plan**	M	M	
H-5.1.1 Start local housing stakeholder group that meets regularly to continue collaboration.	Term of the Plan	L	M	

DRAFT

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-5.1.2 Collaborate with the for profit and nonprofit development community on mixed use, infill, and reuse of existing buildings for housing.	Term of the Plan	L	L	
H-5.1.3 Work with local landlords to identify incentives to increase the amount of rental housing and units that accept housing vouchers and housing assistance.	2026-28	M	M	
H-5.1.4 Work with developers and home lenders to make middle housing more desirable and financially feasible.	2026-28	M	L	
H-5.1.5 Work with regional partners to develop a technical assistance program for small landlords.	2026-28	M	L	
H-5.2 Maintain relationships with nonprofits housing providers and services.	**Term of the Plan**	M	M	
H-5.2.1 Explore collaborations with low-income housing developers to expand homeownership opportunities.	Term of the Plan	M	M	

Policies and Implementation Actions		Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-5.2.2	Work with regional partners on housing strategies for homeless individuals and families, which may include Host Homes.	2026-28	M	L	
H-5.2.3	Collaborate with financial institutions and non-profits to encourage housing land trusts.	2029-30	M	L	
H-5.2.4	Work with non-profits, financial institutions, and other agencies to increase opportunities for home ownership, especially within BIPOC communities, lower income households, and families with children.	Term of the Plan	M	L	
H-5.2.5	Identify and develop partnerships with organizations that provide or support low-income, workforce, young adult, and senior housing as well as other populations with unique housing needs.	2026-28	M	M	
H-5.2.6	Explore opportunities to work with local trade schools that provide renovation and retrofit services for low-income households as part of on-the-job-training.	2029-30	M	L	

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-5.3 Work with the other jurisdictions as part of the Regional Housing Council to address homelessness and affordable housing in Thurston County.	**Term of the Plan**	**M**	**M**	
H-5.3.1 Coordinate allocation of housing for all income groups in cooperation with other jurisdictions in Thurston County.	Term of the Plan	M	M	
H-5.3.2 Track data on affordable housing at the regional level.	2029-30	M	M	
H-5.4 Maintain partnerships with agencies that provide or support housing.	**Term of the Plan**	**M**	**M**	
H-5.4.1 Work with local post-secondary schools to develop strategies for developing off campus housing	2026-28	M	L	
H-5.4.2 Work with the Tumwater School District, Thurston County Housing Authority, and other nonprofits to pursue grant funding and implement transitional housing strategies for families with children.	Term of Plan	M	M	

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-5.4.3 Consider support for Housing Navigators to help households, renters, homeowners, and landlords with housing issues.	2029-30	H	M	

Goal H-6 Explore a Permanent Source of Funding for Low-Income Housing.

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-6.1 Work with the state and regional partners to explore permanent sources of funding for the construction and maintenance of low-income housing.	**Term of the Plan**	**H**	**H**	
H-6.1.1 Develop a comprehensive funding strategy for affordable housing that addresses both the sources of funding and how the funds should be spent.	2026-28	H	H	
H-6.1.2 Support legislative action to increase permanent sources of funding for low-income housing.	Term of the Plan	H	H	
H-6.1.3 Explore an affordable housing property tax levy to finance permanent affordable housing for very low-income households.	2029-30	H	H	

Policies and Implementation Actions	Period	Effort to Achieve	Effect on Housing Supply	Needs Addressed
H-6.1.4 Consider an affordable housing sales tax.	2029-30	H	H	
H-6.1.5 Work with the Housing Authority of Thurston County to take greater advantage of State and Federal housing grants and tax incentives.	Term of the Plan	L	M

PSH – Permanently supported housing

RCW – Revised Code of Washington

TMC – Tumwater Municipal Code

UGA – Tumwater's urban growth area

WAC – Washington Administrative Code

DRAFT

1. Introduction

A. Background

The Housing Element is part of Tumwater's Comprehensive Plan and was prepared in response to the state Growth Management Act (Chapter 36.70A RCW).

Part 2 of the Housing Element provides the technical analysis to address the requirements of RCW 36.70A.070(2) for housing elements. It analyzes Tumwater's:

- Housing needs.
- Housing supply.
- Affordability.
- Racially disparate impacts, exclusion, and displacement.
- Future housing needs.

The assessment supports the development of the Housing Element's goals, policies, and implementation actions found in Part 1 of the Housing Element.

Tumwater is planning for future housing growth for both the City itself and its urban growth area together, so the estimated housing supply for Tumwater and its urban growth area is evaluated together.

1) Growth Management Act Goals

The Growth Management Act requires that Tumwater demonstrate that each Element in its Comprehensive Plan meets the relevant fifteen planning goals contained within the Act. The fifteen goals in turn guide the development and adoption of Tumwater's Comprehensive Plan and development regulations.

HOUSING

State requirements (WAC 365-196-410) that the Comprehensive Plan must meet:

- An inventory and analysis of existing and projected housing needs.
- A statement of the goals, policies, and objectives for the preservation, improvement, and development of housing, including single-family residences.
- Identification of sufficient land for housing including, but not limited to, government-assisted housing, housing for low-income families, manufactured housing, multifamily housing, group homes, and foster care facilities.
- Adequate provisions for existing and projected housing needs of all economic segments of the community.

The updated Housing Element addresses the Growth Management Act goal related to housing:

> ***4. Housing***. *Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.*

The Housing Element specifically sets forth how Tumwater will accommodate affordable housing for all income groups. This effort builds on the work Tumwater has done to prepare and implement a local Housing Action Plan through City actions and working with the Regional Housing Council to address homelessness and permanently affordable housing.

The Housing Element works with the Land Use Element to allocate sufficient land to ensure an adequate supply of buildable land for housing that serves every income group. Each residential land use designation will provide a variety of housing types at varying densities. Each Neighborhood subarea will contain sufficient variability in housing types to ensure housing needs can be met for all segments of Tumwater's population for the next 20 years.

As required by the Growth Management Act, the Housing Element was developed with community and stakeholder input as described in the Comprehensive Plan Update Community Engagement Plan.

2) Foundational Documents

The Housing Element is also based on the additional supporting plans and documents found in Appendix A: Foundational Documents, as well as the following documents that are in Appendices B through E:

- Housing Needs Assessment: Lacey, Olympia, and Tumwater (September 2020).
- Tumwater Housing Action Plan (2021).
- Planning for and Accommodating Housing Needs in Thurston County: Implementing the Housing Affordability Requirements of HB 1220 (April 2025).
- Housing Displacement Risk Analysis for the Cities of Lacey, Olympia, Tumwater, and Yelm – Executive Summary and Technical Annex (2025).

B. How to Read this Part of the Element

Part 2 of the Housing Element consists of the following chapters.

- **Chapter 2 – Housing Needs Assessment**: Provides a summary of Tumwater's existing housing conditions using data from the U.S. Census and other federal, state, and regional sources to provide information on housing supply and demand to establish Tumwater's overall housing needs.

  This chapter also includes a summary of Tumwater's 2045 projected housing need in the form of unit targets by income level, as established by Thurston County and its cities in cooperation with the Thurston Regional Planning Council. In addition, it provides a summary of Tumwater's housing inventory and a discussion of housing affordability, production, and investment.

- **Chapter 3 – Land Capacity Analysis**: Provides a summary of Tumwater's zoned capacity in relation to its 2045 housing unit targets.

DRAFT

- **Chapter 4 – Racially Disparate Impacts, Exclusion, and Displacement**: Provides a detailed assessment of socioeconomic data to identify potential racial housing disparities and risk of displacement and exclusion, as well as an evaluation of current housing policies to identify policies and regulations that may begin to undo these impacts.
- **Chapter 5 – Housing Provisions**: Provides a discussion of existing and future housing provisions that are intended to try to reduce the cost of producing more housing.
- **Appendices**: The appendices include the following:
    - Summary of Foundational Documents.
    - Housing Needs Assessment: Lacey, Olympia, and Tumwater (September 2020).
    - Planning for and Accommodating Housing Needs in Thurston County: Implementing the Housing Affordability Requirements of HC 1220 (April 2025).
    - City of Tumwater Housing Action Plan (September 2021).
    - Housing Displacement Risk Analysis for the Cities of Lacey, Olympia, Tumwater, and Yelm (May 2025).
    - Housing Displacement Risk Analysis for the Cities of Lacey, Olympia, Tumwater, and Yelm: Technical Appendix (May 2025).
    - Housing Displacement Risk Analysis for the Cities of Lacey, Olympia, Tumwater, and Yelm: Technical Appendix – Policy Evaluation Matrix (May 2025).
    - State Department of Commerce Adequate Provisions Checklists.
    - Additional Housing Data.

C. Demographic Summary

1) Growing Population, Getting Older

In 2020, Tumwater and its urban growth area was home to more than 28,707 people. By 2045, Tumwater and its urban growth area are expected to grow to more than 46,070 people.

The overall population is aging. In 2023, 14.9 percent of the population was 65 or older, and 6.4 percent of seniors were 75 or older. Countywide by 2045, 22.7 percent of residents will be 65 or older and 12.7 percent of seniors will be 75 or older. This affects housing affordability for Tumwater's residents as well and reflects the types of housing needed to meet this population's needs.

2) Renting or Buying

In 2024, there were more than 13,580 housing units in Tumwater and its urban growth area, and the Thurston Regional Planning Council projected that 7,986 more housing units would need to be built to accommodate the Tumwater's growing population.

DRAFT

In 2023, 38.9 percent of all occupied housing units in Tumwater are rented, and 61.1 percent were owned by the occupant of the housing unit.

However, the smaller the household income, the fewer options there are for home ownership, which is a key factor for many households in building wealth. Housing units with two or fewer bedrooms are typically rented, and renters are more likely to be cost burdened, meaning they spend more than 30 percent of their income on rent and other housing expenses.

3) Smaller Households, Larger Homes

Over the last 40 years, the average household size in Tumwater has gotten smaller going from 2.93 people per household in 1970 to 2.39 in 2020. However, since 2000 household size has risen from 2.20. During the same period of time, homes have gotten bigger. In the 1980s, more than half of all houses built were less than 1,500 square feet. In the 2010s, only 11 percent were less than 1,500 square feet.

4) Higher Wages, Rents, & Mortgages

According to the Thurston Regional Planning Council, in 2017 Tumwater was home to more than 27,030 jobs and it is estimated this will grow to about 37,760 jobs by 2045. The Washington State Employment Security Department figures indicate wages have increased over the last ten years when adjusted for inflation.

However, the cost of housing has increased whether a resident rents or owns. Between 2014 and 2024, average rents increased from $895 per month to $1,751 per month in Tumwater, while the average sale price for a home in Tumwater increased from $230,736.38 in 2014 to $510,363.52 in 2024[1]. Today, Tumwater is not considered affordable for median or first-time home buyers, although it is still more affordable than jurisdictions in either King or Pierce Counties.

5) Affordable Housing

Approximately ten percent of households in Tumwater in 2024 were extremely low income and earned less than 30 percent of the area median family income. By 2045, another five percent of households are expected to fall into this category.

There are approximately 1,857 housing units available at below-market rents countywide in 2020. This is fewer than the more than 1,900 extremely low income households in Tumwater alone, which are the households that are most at risk of becoming homeless. There were at least 952 people experiencing homelessness in Thurston County, according to the 2024 Point in Time Count. Both subsidized and permanent supportive housing are needed to support these communities with barriers.

6) Equality

In 2020, 24 percent of Tumwater residents identified as people of color, defined as those who are Hispanic or Latino of any race and those who are any race other than white alone. Those who are multiracial, or Hispanic or Latino are the largest minority population groups in Tumwater. In general, people of color have more people in

[1] Zillow Housing Sales Data, December 2014, and December 2024

DRAFT

their household, are less likely to own their own home, have a smaller household income, and are more likely to experience homelessness than their white, non-Hispanic counterparts.

D. Sources of Data

The Housing Element Part 2 – Technical Information combined data from a range of sources. Key sources included:

- **U.S. Census Bureau:** The 2020 U.S. Census and 2019-23 American Community Survey provided key data on population, households, and housing characteristics.
- **Washington Center for Real Estate Research:** Based in the University of Washington's College of Built Environments, Washington Center for Real Estate Research's quarterly Housing Market Report and Apartment Market Survey supplied timely data on housing costs and vacancy rates.
- **Washington Office of Financial Management:** The Office of Financial Management provided annual population estimates for cities.
- **Thurston Regional Planning Council:** The Thurston Regional Planning Council contributed annual population, housing, and employment estimates for Tumwater and its urban growth area, as well as 25-year projections.
- **U.S. Department of Housing and Urban Development:** U.S. Department of Housing and Urban Development's Consolidated Housing Action Strategy data provided area median incomes, information on cost burden, and other housing challenges faced by low-income residents.
- **Zillow Real Estate**: Zillow provided data on housing sales in Tumwater.

Additional sources were included as referenced in the Element.

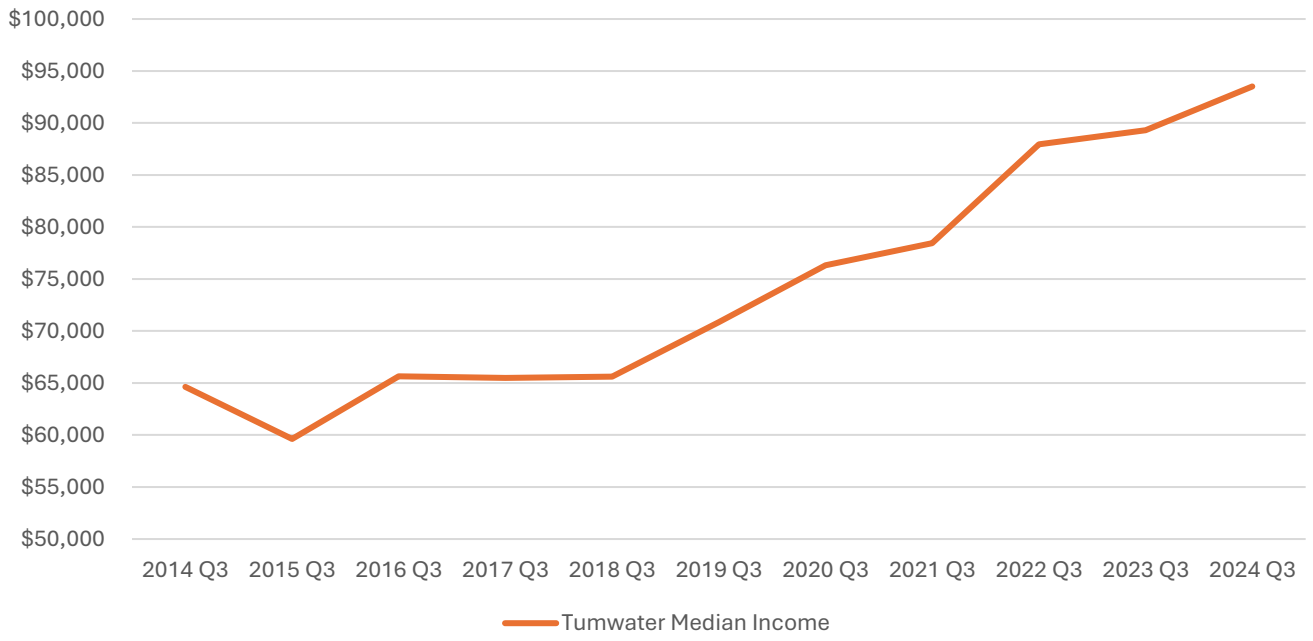
Much of the data shown in the Housing Element were based on surveys. All survey data contain a margin of error, which is a measure of uncertainty around an estimate. The American Community Survey publishes margins of error with their tables. While not included in the figures and tables in this report, they can be accessed through searching the referenced tables at data.census.gov.

Additional tables and graphs related to the individual sections are found in Appendix H.

E. Affordable Housing Definition

WAC 365-196-410 requires that the Comprehensive Plan include a definition of "affordable housing." This is a difficult definition to arrive at because what is affordable for one family can be drastically different from what is affordable for another family. A higher income family may be looking to purchase a larger home, while a lower income family may be struggling to pay the rent on an apartment that is too small for their needs.

Because of this disparity, the U.S. Department of Housing and Urban Development uses a definition of affordability that is based on a percentage of gross income. U.S. Department of Housing and



DRAFT

Urban Development allows up to 30 percent of a family's gross income to be available for gross housing costs, including mortgage payments or rent, and utility payments. The Housing Element uses the same definition of "affordable housing."

In practice, the median family income for a family of two in Tumwater based on data from the Washington Center for Real Estate Research was $93,513 in the third quarter of 2024. For the median family, affordable housing would be any housing that costs $2,338 per month or less, including utilities. Similarly, a family that earned 80 percent of the median income could afford $1,870 per month in mortgage or rent and utilities. In 2024, Tumwater's average rent was $1,747 per month, and roughly $1,950 with utilities.

Figure H-1 shows Tumwater's median income of all households regardless of size from 2014 to 2024.

Figure H-1. Tumwater Median Income, 2014-24.

Source: Washington Center for Real Estate Research, Median Income Data. Third Quarter Data, 2014-24.

2. Housing Needs Assessment

A. Introduction

In September 2020, in cooperation with the Thurston Regional Planning Council, Tumwater, Lacey, and Olympia completed a housing needs assessment as a part of the Tumwater Housing Action Plan project, which is found in Appendix B: Housing Needs Assessment.

The 2020 Housing Needs Assessment provides key findings on Tumwater's housing conditions and identifies shortcomings and gaps in the housing supply meeting demand.

While the Housing Needs Assessment was completed in 2020, its focus and most of the findings are still relevant today. Key findings from the Housing Needs Assessment have been updated in the Housing Element with more current available data. Along with community input, the findings from the Housing Needs Assessment were used to develop the strategies and actions identified in the Tumwater Housing Action Plan found in Appendix D, which in turn have been carried forward and aligned through the goals, policies, and implementation actions in Part 1 of the Housing Element.

The data in the Housing Needs Assessment as updated in the Housing Element meets the state requirement for this Comprehensive Plan Update.

This chapter includes detailed findings on:

- The number and type of current housing units.
- Housing tenure.
- Housing conditions.
- Housing costs and affordability.
- Housing units that were available to various income groups.
- Current and projected housing needs by 2045.

Data for current and projected housing demand by 2045 was based on the April 2025 *Planning for and Accommodating Housing Needs in Thurston County* found in Appendix C.

B. Household Characteristics

1) Demographics

Tumwater is a diverse and fast-growing community.

The U.S. Census Bureau estimated in 2020 that Tumwater's population was 25,573 and its urban growth area's population was calibrated as 3,134. The Washington State Office of Financial Management estimated that Tumwater's population as of April 1, 2024, was 27,470 and the Thurston Regional Planning Council estimated that Tumwater's urban growth area was 3,100 in 2024 for a total of 30,570 residents.

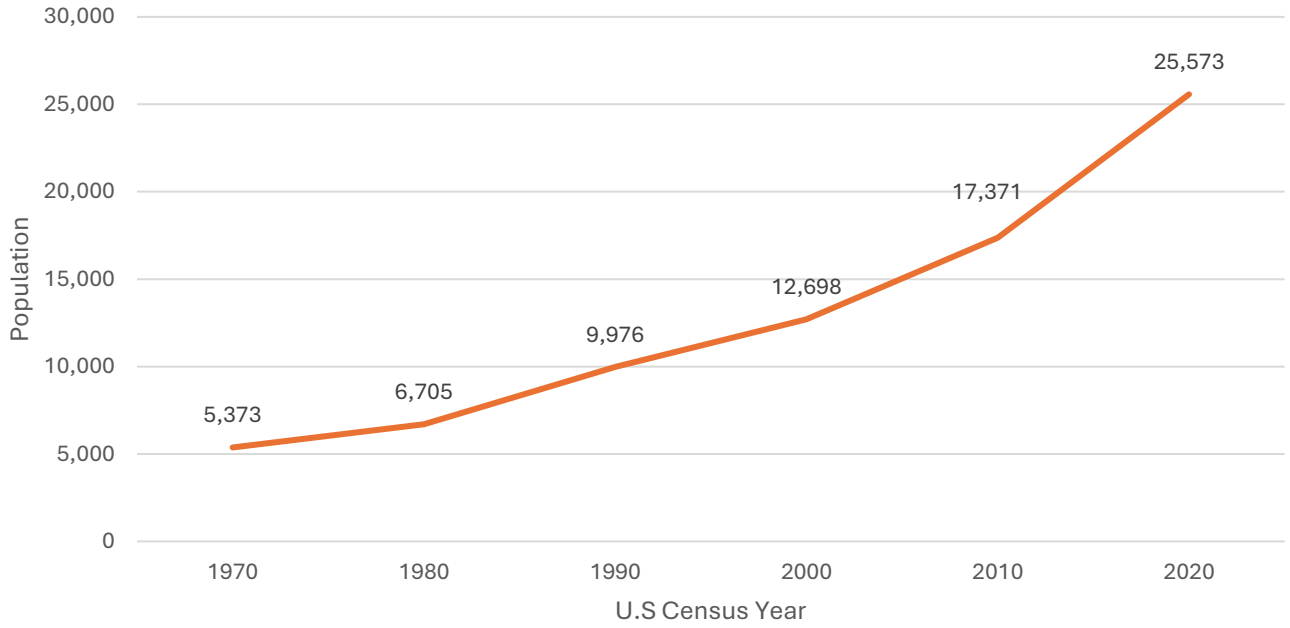


Figure H-2 shows the change in Tumwater's population since 1970. Between 1970 and 2020, Tumwater's population more than quadrupled, growing 476 percent over 50 years. Over the next 25 years from 2020 to 2045, Tumwater and its

DRAFT

urban growth area population are anticipated to grow by 17,360 to reach 46,070 residents in Tumwater and its urban growth area by 2045.

Table H-1 shows the population of Tumwater and its urban growth area since 2010. The population of Tumwater has increased, and its urban growth area decreased since 2010 in part due to annexations.

Figure H-2. Tumwater Population, 1970-2020.

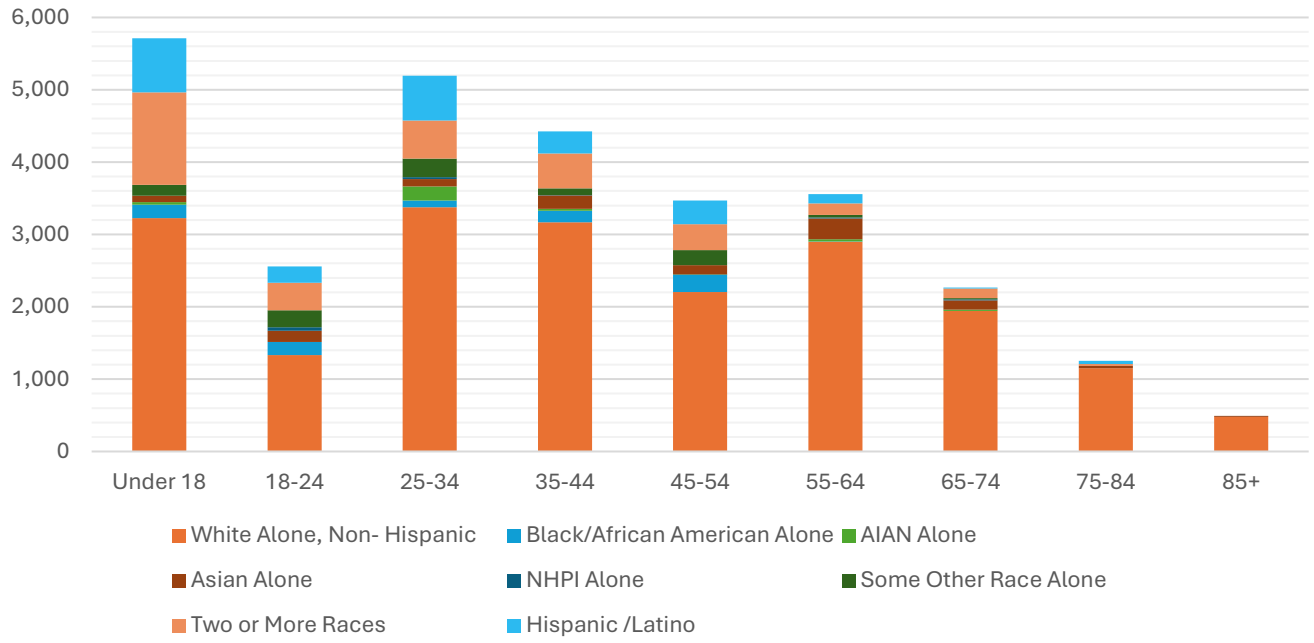
Sources: Washington State Office of Financial Management, 2020 Decennial U.S. Census Counts of Population for the State, Counties, Cities and Towns and Thurston Regional Planning Council, Small Area Population Estimates and Forecast, 2024.

Table H-1. Population of Tumwater & Its Urban Growth Area, 2010-24.

	2010	2020	2021	2022	2023	2024
City	17,371	25,573	26,050	26,360	27,100	27,470
Urban Growth Area	6,350	3,134	3,290	3,300	2,890	3,100
Total	**23,720**	**28,707**	**29,340**	**29,660**	**29,990**	**30,570**

Source: Thurston Regional Planning Council, Small Area Population Estimates and Forecast, 2024.

The diversity and age of Tumwater's residents informs the types of housing that are needed, including family-sized units, accessible units for seniors and disabled household members, and housing types affordable and suitable for multigenerational households.



Washington State law defines a household an individual, family, or group of unrelated people living together in a single home. Members of a household can be related, unrelated, or living alone.

This section presents a profile of these households, which is critical to understanding the types and sizes of new housing needed, including household information by race that supports equitable growth strategies. Figure H-3 shows the

demographic breakdown by race and age in Tumwater.

Chapter 4 includes an analysis of the racially disparate impacts.

Figure H-3. Age by Race/Ethnicity in Tumwater, 2023.

Sources: 2023 U.S. Census American Community Survey 5-Year Estimates, Tables B01001A - B01001I.
Notes: "AIAN Alone" are people who are American Indian and Alaska Native alone. NHPI Alone" are people who are Native Hawaiian and Other Pacific Islander alone.

More than six percent of Tumwater households have one or more members with a cognitive difficulty, the highest share of any disability category. As Tumwater's population ages, the share of residents with a disability who need accessible housing is likely to increase.

Table H-2 provides more details on disability types and the number of Tumwater residents.

Table H-2. Disability Types in Tumwater, 2023.

Disability Type	Tumwater Residents	Percentage of Total City Population
With a Hearing Difficulty	834	3.2%
With a Vision Difficulty	418	1.6%
With a Cognitive Difficulty	1,602	6.5%
With an Ambulatory Difficulty	1,478	6.0%
With a Self-Care Difficulty	548	1.7%
With an Independent Living Difficulty	1,387	6.6%

Source: 2023 U.S. Census American Community Survey 5-Year Estimates, Table S1810.

2) Household Sizes & Types

As of 2023, there were an estimated 10,863 households in Tumwater, 6,636 of which were owner occupied or 61.1 percent of the total and 4,227 of which were renter occupied or 38.9 percent of the total.

In Thurston County, the most common household sizes are one or two people, which account for 29.7 percent and 32.5 percent of all households, respectively.

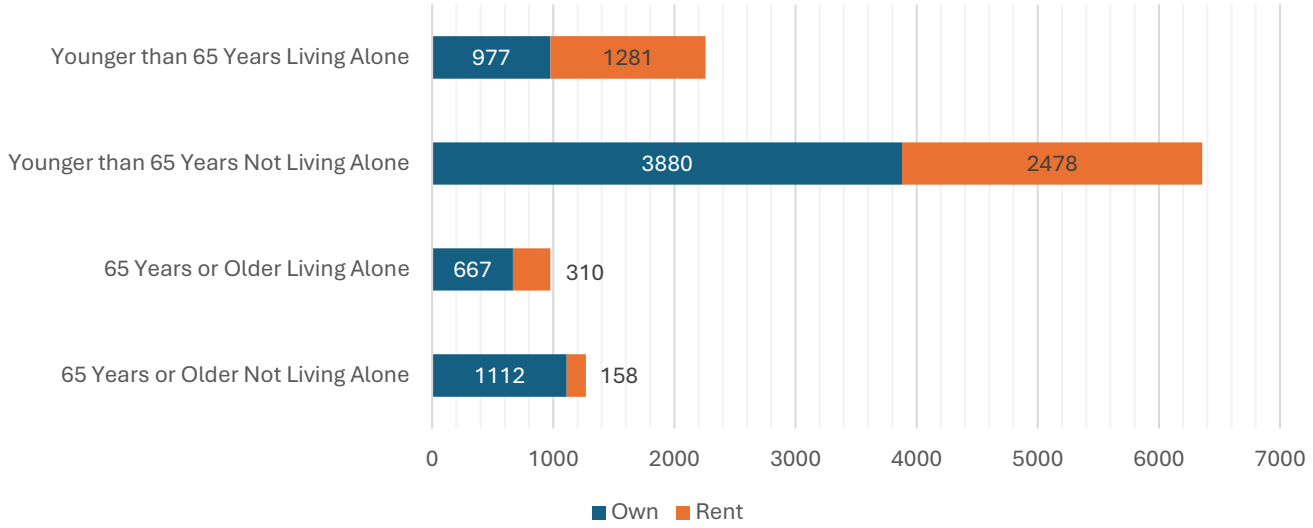
The average household size in Tumwater fell from 3.23 people in 1960 to 2.39 in 2020 and 2023. However, the average household size of 2.39 in 2020 was higher than any U.S. Census since 1970.

Table H-3 has more details on the size and types of households in Tumwater.

Table H-3. Household Size in Tumwater, 2023.

Households	2023 Estimate	Percent of the Total
Total:	**10,863**	**100.0%**
Owner occupied:	**6,636**	**61.1%**
1-person household	1,644	15.1%
2-person household	2,262	20.8%
3-person household	1,336	12.3%
4-person household	892	8.2%
5-person household	312	2.9%
6-person household	153	1.4%
7-or-more person household	37	0.3%
Renter occupied:	**4,227**	**38.9%**
1-person household	1,591	14.6%
2-person household	1,276	11.7%
3-person household	791	7.3%
4-person household	412	3.8%
5-person household	153	1.4%
6-person household	0	0.0%
7-or-more person household	4	0.0%

Source: 2023 U.S. Census American Community Survey 5-Year Estimates, Table B25009.



3) Household Tenure – Age & Race

Tenure refers to housing ownership status, whether a resident owns or rents where they live. Tenure patterns help to understand housing needs and develop appropriate policies and programs.

Figure H-4 breaks down housing tenure by age and household type. Owner-occupied households are the largest household type and

most people over the age of 65 own their own house.

Figure H-4. Household Tenure by Age & Type in Tumwater, 2023.

Source: 2023 U.S. Census American Community Survey 5-Year Estimates, Table B25011.

Table H-4 breaks down owner-occupied and renter-occupied housing units by whether children under 18 live in the household. The proportion of owner-occupied and renter-occupied housing units with children under 18 are similar.

Table H-4. Household Tenure in Tumwater by Presence of Children, 2023.

Households	2023 Estimate	Percentage
Total:	***10,863***	***100%***
Owner-occupied housing units	**6,636**	**61%**
With children under 18	1,696	26%
No children under 18	4,940	74%
Renter-occupied housing units	**4,227**	**39%**
With children under 18	1,109	26%
No children under 18	3,118	74%

Source: 2023 U.S. Census American Community Survey 5-Year Estimates, Table B25012.

Table H-5 shows the breakdown of household tenure by race. Householders who are more likely to own rather than rent in Tumwater are classified by the U.S. Census as White Alone, Asian Alone, American Indian and Alaska Native Alone, Two or More Races, or White Alone, Not Hispanic or Latino, while Black or African American Alone, Native Hawaiian and Other Pacific Islander Alone, Some Other Race Alone, or Hispanic or Latino in Tumwater are more likely to rent rather than own.

Table H-5. Household Tenure & Race in Tumwater, 2023.

Householders	Total Units	Owner Occupied Units	Renter Occupied Units
All Households	**10,863**	**6,636**	**4,227**
White Alone	8,632	5,508	3,124
Black or African American Alone	362	88	274
American Indian and Alaska Native Alone	122	66	56
Asian Alone	379	307	72
Native Hawaiian and Other Pacific Islander Alone	50	0	50
Some Other Race Alone	310	151	159
Two or More Races	1,008	516	492
White Alone, Not Hispanic or Latino	8,292	5,426	2,866
Hispanic or Latino	918	180	738

Sources: 2023 U.S. Census American Community Survey 5-Year Estimates, Tables B25003 and B25003A - B25003I.

4) Household Income

Household income refers to the total combined income of all members of a household. A household's income, cost of living, and market conditions determine whether housing is affordable.

Households at typically grouped by income level relative to the area median income to quantify different housing needs. Area median income is an estimate of the median family income for the current year and is published by the US Department of Housing and Urban Development.

As of April 1, 2025, the area median income for a two-person household in Thurston County was $93,375 and four-person household was $116,688.

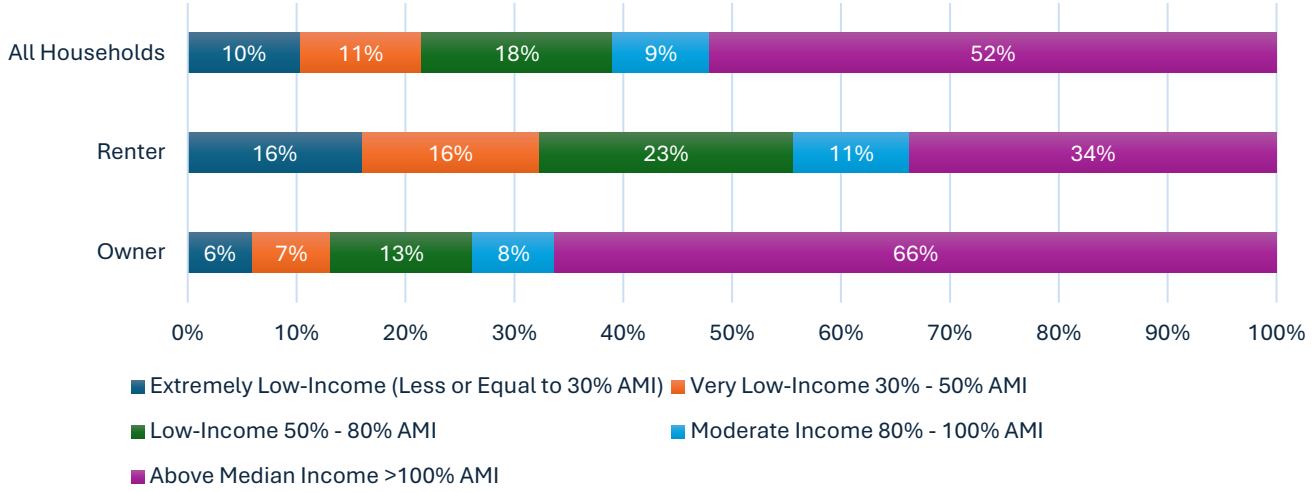
Table H-6 shows typical household income categories for groups of area median income. Income thresholds for grouping households into these categories vary by size, and the typical jobs that may fall in each of the household income categories.

Table H-6. Household Income Categories Associated with Area Median Income for a Family of Four in Tumwater, 2024.

Household Income Category	Percent of Area Median Income	Equivalent Household Income for a Family of Four	Typical Jobs that May Fall in this Income Category
Extremely Low-Income	0-30% AMI	Less than $35,000	Farm Workers, Fast Food Workers, Fixed Incomes
Very Low-Income	30-50% AMI	$35,000 to $58,350	Childcare, Administrative Assistants, Landscaping

DRAFT

Household Income Category	Percent of Area Median Income	Equivalent Household Income for a Family of Four	Typical Jobs that May Fall in this Income Category
Low-Income	50-80% AMI	$58,350 to $93,350	Veterinary Technicians, Construction Workers, Truck Drivers, Social Workers
Moderate-Income	80-100% AMI	$93,350 to $116,688	Nurses, Plumbers
Moderate-Income	100-120% AMI	$116,688 to $140,025	Analysts, Teachers
Upper Income	>120% AMI	More than $140,025	Lawyers, Managers



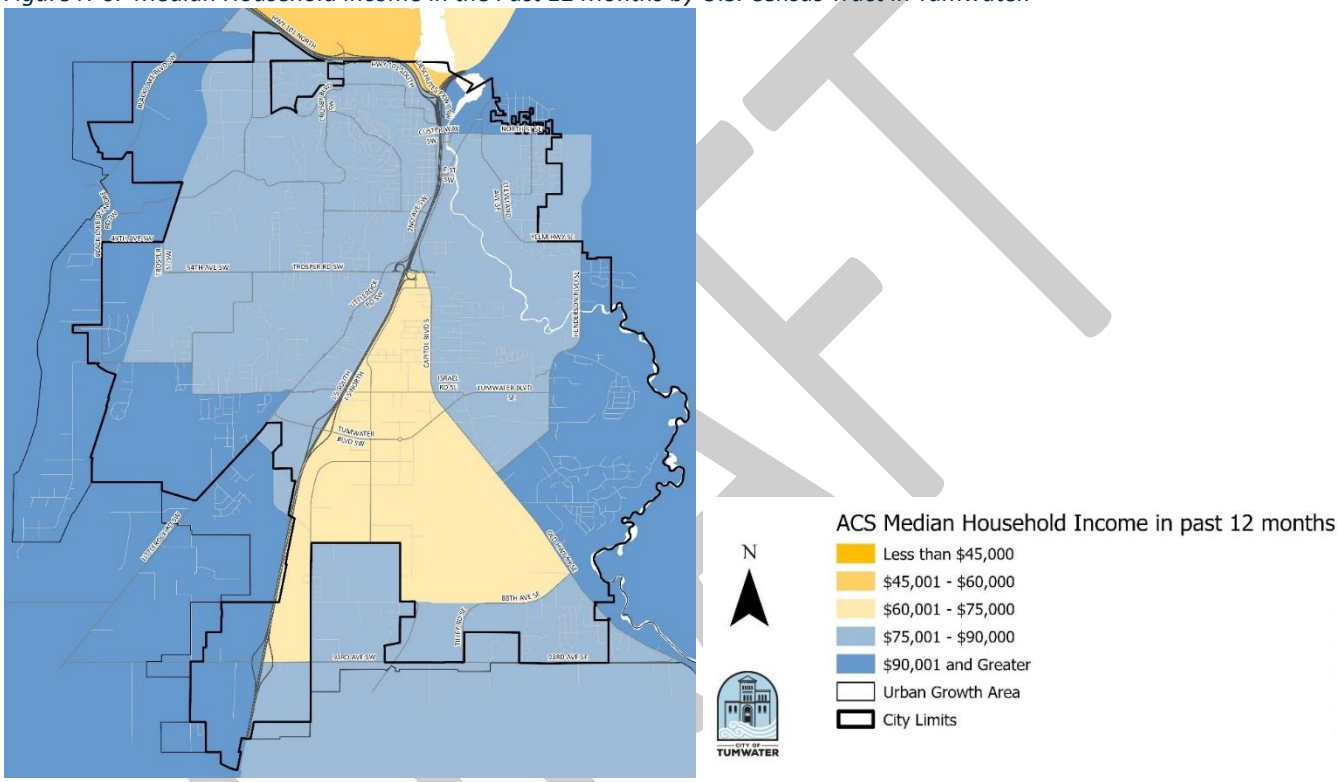
Source: Income Limits, U.S. Department of Housing and Urban Development, 2025.

It takes more income to support a large family than a person living alone. For example, in 2025, a one-person household with a $63,350 income is in the 80 percent area median income. A five-person household with an income of $63,050 is in the 50 percent area median income.

Figure H-5 shows how the various Thurston County area median income groups in Tumwater break down by percentage of households. Twenty-one percent of households in Tumwater fall into the Extremely Low Income or Very Low-Income categories and 52 percent are above median income.

The latest U.S. Department of Housing and Urban Development data on households by income is from 2016 and 2020. 39 percent of households in Tumwater had incomes at or below 80 percent area median income of which 55 percent of renter households were at or below 80 percent area median income. The percentage of renters at or below 80 percent area median income was much higher than the 34 percent for owner-occupied households.

Figure H-5. Proportion of Households by Area Median Income & Tenure in Tumwater, 2021.



Source: U.S. Department of Housing and Urban Development Affordability Strategy (CHAS), 2021.
Note: AMI is area median income.

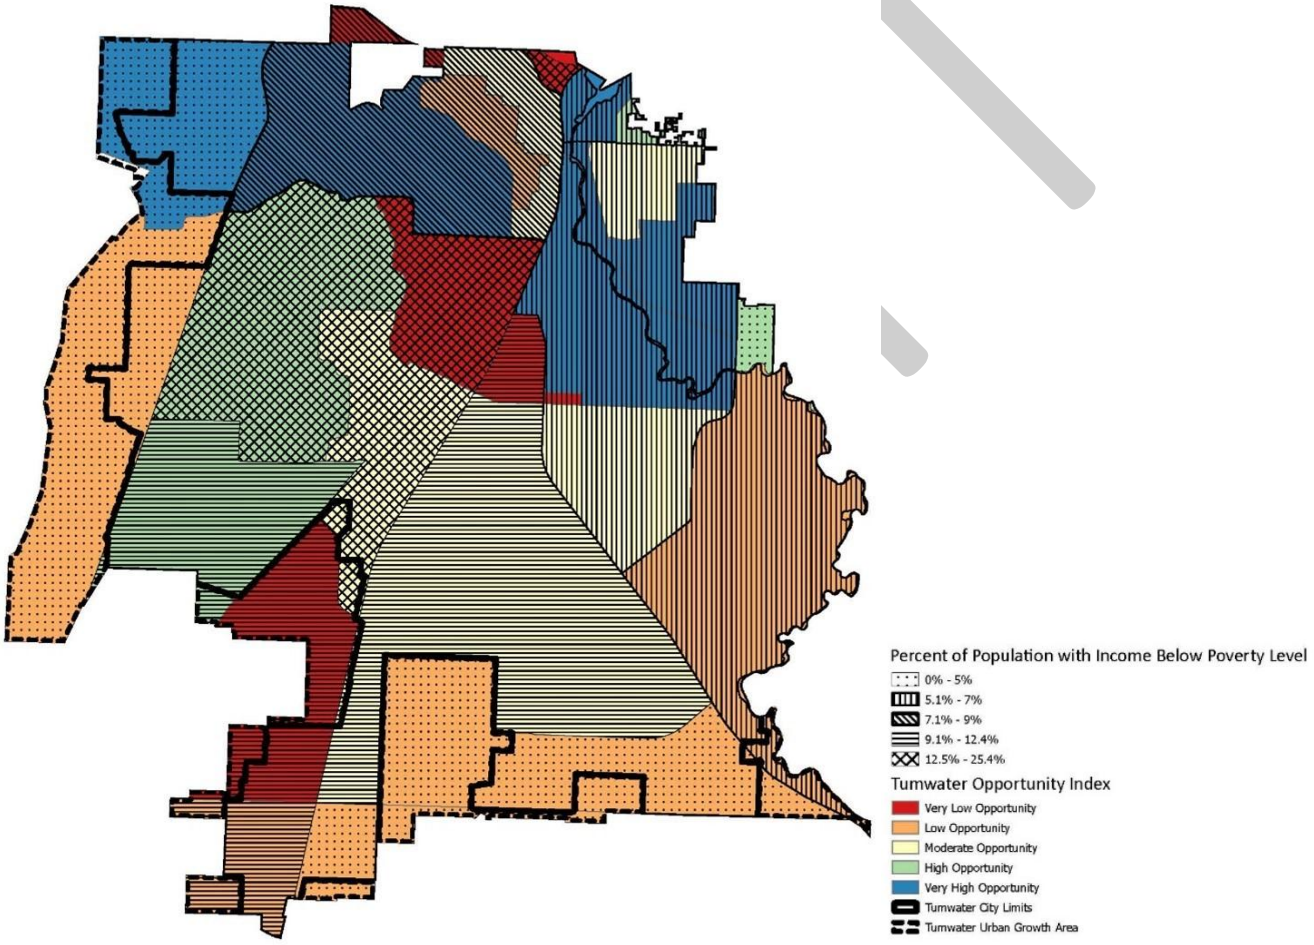
Figure H-6 and Table H-7 show the median household income in Tumwater, which is based on data from the U.S. Census Bureau. This number is different than area median income and varies across Tumwater.

The median income is the amount that divides the household income distribution in each block group into two equal groups, with half of the households having incomes above the median and the other half that has incomes below the median. This measure does not take into consideration household size like area median income.

Figure H-6. Median Household Income in the Past 12 Months by U.S. Census Tract in Tumwater.

Source: 2023 U.S. Census American Community Survey 5-Year Estimates. Tables B19013B - B19013I, B19049, and B19053.

Table H-7. Median Household Income for All Households by U.S. Census Block Group in Tumwater, 2023.



Household Income	Estimate
Total	10,863
Less than $10,000	2.2%
$10,000 to $14,999	2.4%
$15,000 to $24,999	4.5%
$25,000 to $34,999	6.6%
$35,000 to $49,999	9.1%
$50,000 to $74,999	15.0%
$75,000 to $99,999	13.5%

Household Income	Estimate
$100,000 to $149,999	23.1%
$150,000 to $199,999	10.5%
$200,000 or more	13.1%
Median income (dollars)	$93,635
Mean income (dollars)	$115,276

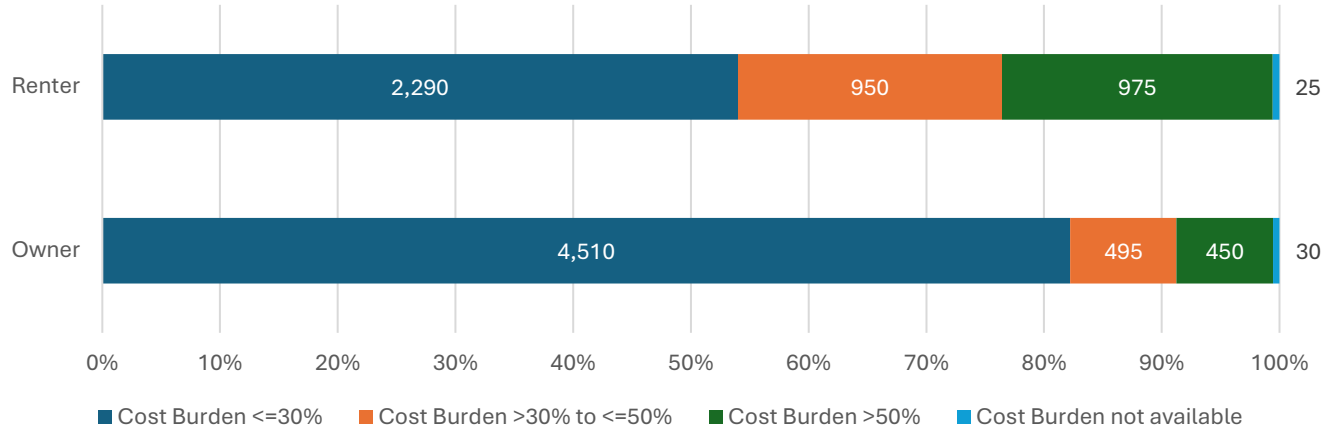
Figure H-7 combines the percentage of population in Tumwater with an income below poverty level with the Tumwater Opportunity Index.

Figure H-7. Percentage of Population with Income Below Poverty Level by Census Tract & the Tumwater Opportunity Index.

Sources: Tumwater Transportation and Engineering Department and 2023 U.S. Census American Community Survey 5-Year Estimates.

C. Housing Affordability



1) Household Cost Burden

Housing cost burden is an important indicator of housing affordability. A household is cost-burdened if it spends more than 30 percent of its income on housing costs.

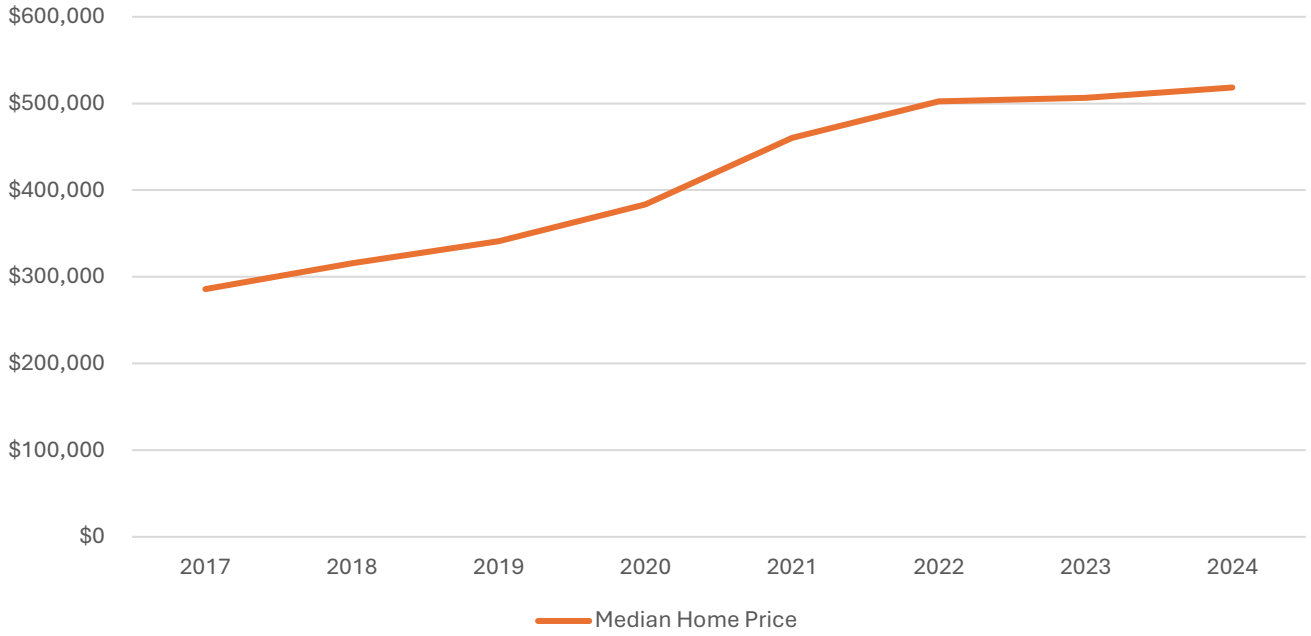
Figure H-8 shows that at least 45 percent of renter households were cost-burdened. This is much higher than the 17 percent of owner households.

Current trends indicate that this will increase in the near future.

Figure H-8. Housing Cost Burden By Area Median Income in Tumwater, 2021.

Source: U.S. Department of Housing and Urban Development Affordability Strategy (CHAS), 2021.

Severely cost-burdened households spend more than half of their income on housing costs and are most likely to be housing insecure. They are at risk of displacement or homelessness if housing costs rise. In Tumwater, almost 15 percent of households were severely cost-burdened as of 2021. Nearly a quarter of all renter households were severely cost burdened.



2) Housing Prices

As of the fourth quarter of 2024, the median house prices in Thurston County were $515,800.[2]

The range of median house prices in Thurston County from 2017 to 2024 is found in Figure H-9.

[2] Washington Housing Market Report, Fourth Quarter 2024, Washington Center for Real Estate Research.

Figure H-9. Annual Median Home Prices in Thurston County, 2017-24.

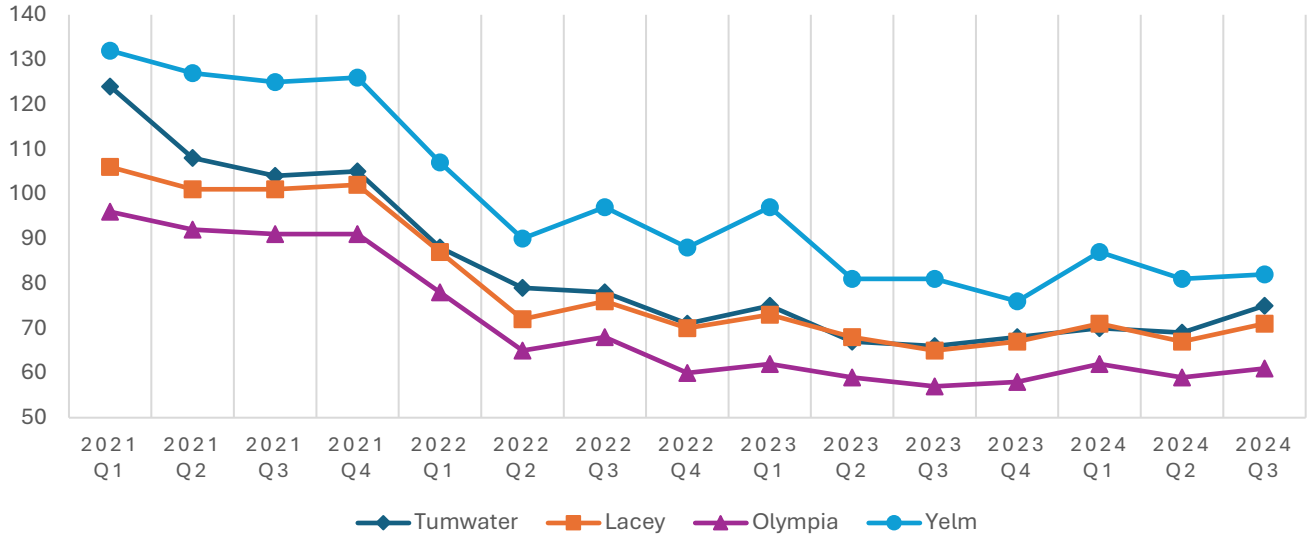
Source: Washington Housing Market Report, Fourth Quarter 2024, Washington Center for Real Estate Research.

3) Housing Costs and Trends

At the end of 2024 according to Zillow, the typical home value in Tumwater was $510,363.52. Based on a 30-year mortgage of 6.65 percent with a 20 percent down payment of $102,072.70 and a monthly payment of $3,116.97 plus utilities, would be affordable at approximately 118 percent area median income, for a four-person household. New homes usually sell for more.

Tumwater was less affordable than 40 percent of Washington State cities.

4) Affordability Index for Owners



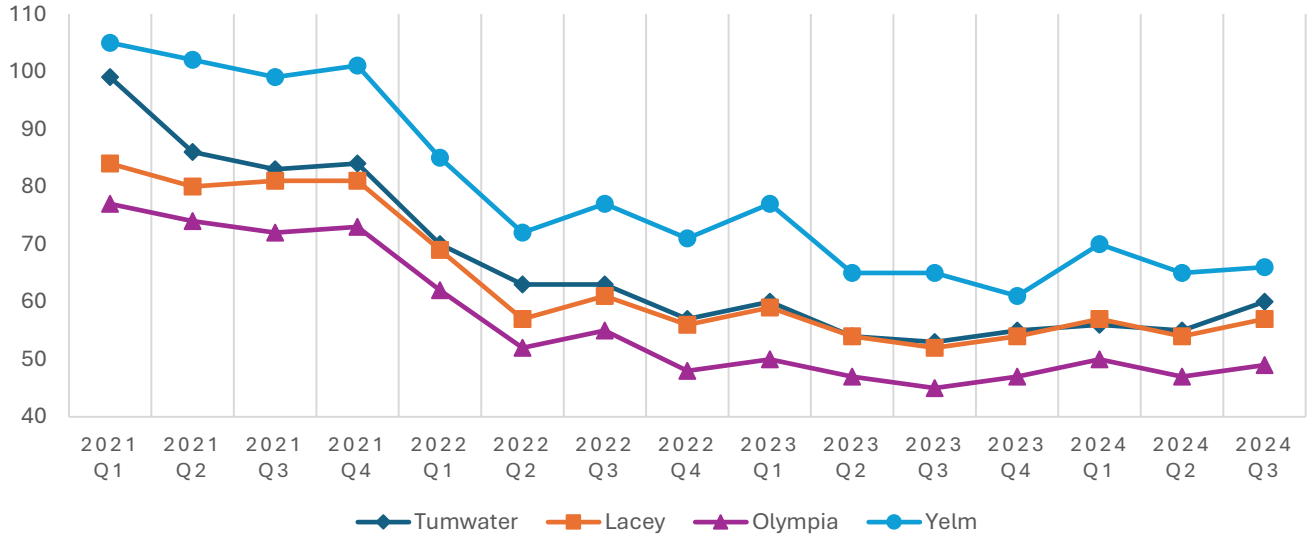
Aside from looking at estimated housing supply by income and property sales, housing affordability indexes for both housing unit owners and renters are another way to understand the scope of the affordability issue. The Runstad Center for Real Estate Research at the University of Washington maintains the Housing Affordability Index used in this section.

Figure H-10 shows the index measuring the overall ability of a middle income family to carry the mortgage payments on a median price home. When the index is 100 there is a balance between the family's ability to pay and the cost. Higher indexes indicate housing is more affordable.

Affordability for both all and median home buyers has been declining for cities in Thurston County at approximately the same rate since 2010.

DRAFT

Figure H-10. Median Home Buyers Housing Affordability Index, Thurston County Cities, 2021-24.



Source: Washington Center for Real Estate Research, 2024, Median Home Buyers Housing Affordability Index Data, 2024.
Note: Data was not available for all quarters.

Figure H-11 summarize the Housing Affordability Index for first time home buyers by Thurston County and adjacent counties and Tumwater and other larger Thurston County cities. When the index is 100 there is a balance between the family's ability to pay and the cost. Higher indexes indicate housing is more affordable.

Affordability for first time home buyers has been declining in Thurston County and surrounding counties and for cities in Thurston County at approximately the same rate since 2010.

Figure H-11. First Time Home Buyers Housing Affordability Index, Thurston County Cities, 2021-24.

Source: Washington Center for Real Estate Research, First Time Home Buyers Housing Affordability Index Data, 2024.
Note: Data was not available for all quarters.

5) Fair Market Rent

As defined in 24 CFR 888.113, the U.S. Department of Housing and Urban Development created Fair Market Rents as the estimates of the 40th percentile gross rents for standard quality units within a metropolitan area such as the Olympia-Tumwater, WA MSA. Table H-8 shows the U.S. Department of Housing and Urban Development Fair Market Rents for Fiscal Years 2024 and 2025 for the Olympia-Tumwater, WA Metropolitan and Micropolitan Statical Area.

Table H-8. HUD Final Fiscal Year 2024 & 2025 Fair Market Rates By Unit Bedrooms for the Olympia-Tumwater, WA MSA.

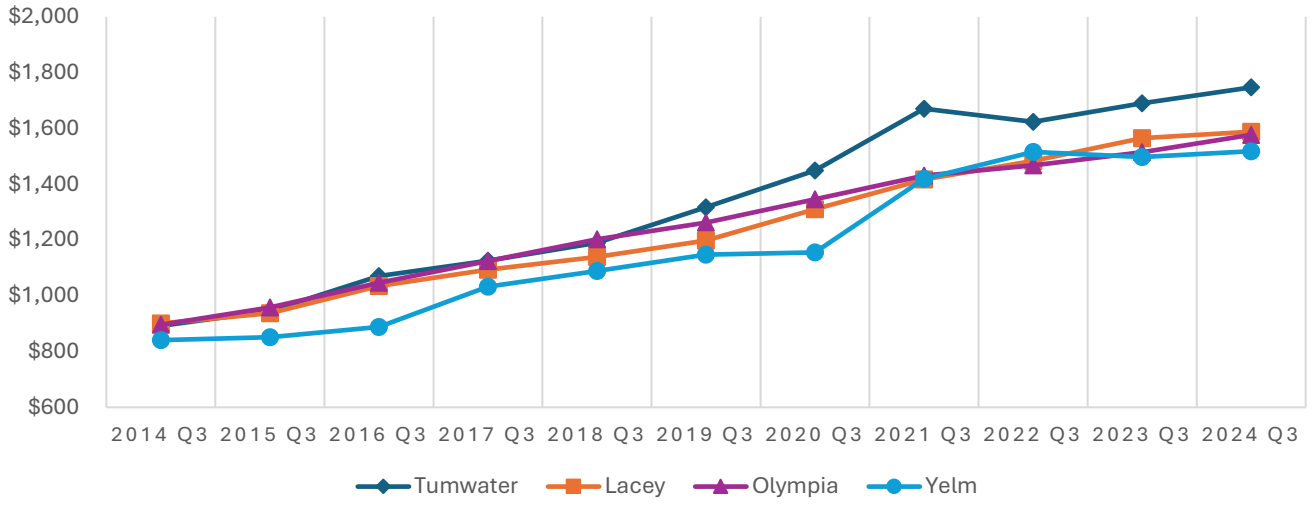
Year	Efficiency	One-Bedroom	Two-Bedroom	Three-Bedroom	Four-Bedroom
FY 2024 Fair Market Rate	$1,341	$1,554	$1,802	$2,531	$3,058
FY 2025 Fair Market Rate	$1,393	$1,585	$1,843	$2,526	$3,095

Source: U.S. Department of Housing and Urban Development, Fiscal Year 2025 Fair Market Rent Documentation System, 2025.

The U.S. Department of Housing and Urban Development annually estimates Fair Market Rents for the U.S. Office of Management and Budget defined metropolitan areas, some U.S. Department of Housing and Urban Development defined subdivisions of the U.S. Office of Management and Budget metropolitan areas, and each nonmetropolitan county. 42 USC 1437f requires Fair Market Rents to be posted at least 30 days before they are effective and they are effective at the start of the federal fiscal year, which is around October 1.

Fair Market Rents are used to determine payment standard amounts for:

- The Housing Choice Voucher program.
- Initial renewal rents for some expiring project-based the Housing Choice Voucher program contracts.
- Initial rents for housing assistance payment contracts in the Moderate Rehabilitation Single Room Occupancy program.
- Rent ceilings for rental units in both the HOME Investment Partnerships program and the Emergency Solutions Grants program.
- Maximum award amounts for Continuum of Care recipients and the maximum amount of rent a recipient may pay for property leased with Continuum of Care funds.
- Flat rents in public housing units.



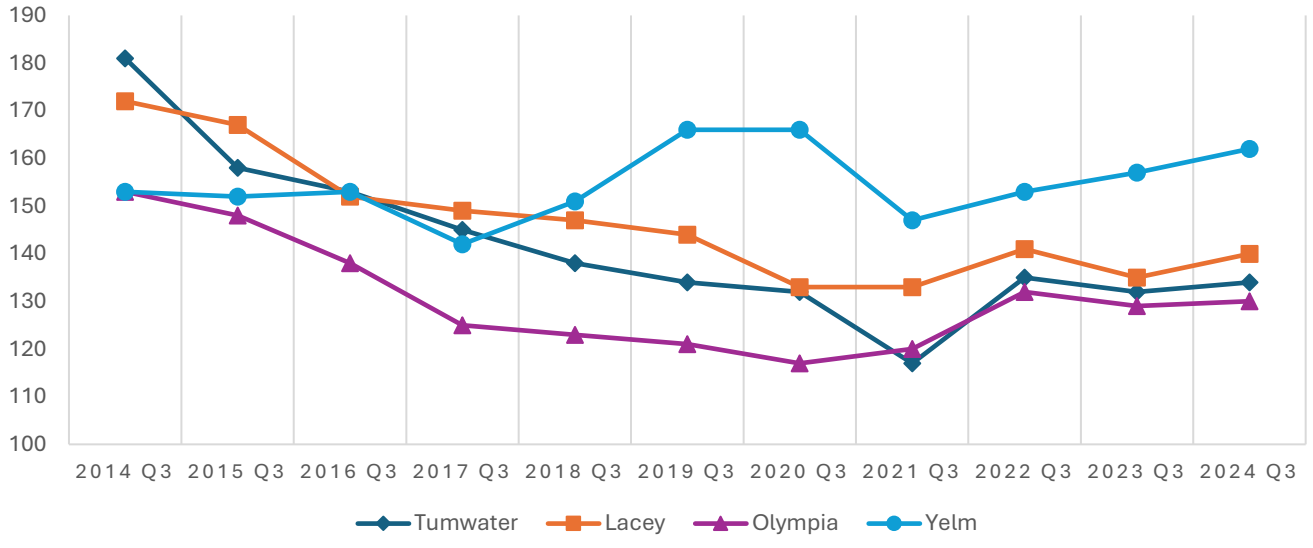
6) Rental Housing Costs & Trends

In the third quarter of 2024, the average rent in Tumwater was $1,747 according to the Washington Center for Real Estate Research as shown in Figure H-12.

Depending on the cost of utilities, a studio or one-bedroom rental housing unit would be considered affordable.

DRAFT

Figure H-12. Average Rent by Thurston County Cities, 2014-24.



Source: Washington Center for Real Estate Research, Rents Data, 2024. Third Quarter Data, 2014-24.

7) Affordability Index for Renters

Aside from looking at estimated rental housing supply by fair market rate and income, housing affordability indexes for housing unit renters such as the one form the Housing Affordability Index maintained by the Runstad Center for Real Estate Research at the University of Washington is another way to understand the scope of the affordability issue.

Figure H-13 shows the overall ability of a median income renter to pay rent on a median price rental housing unit. When the index is 100 there is a balance between the family's ability to pay and the cost. Higher indexes indicate housing is more affordable.

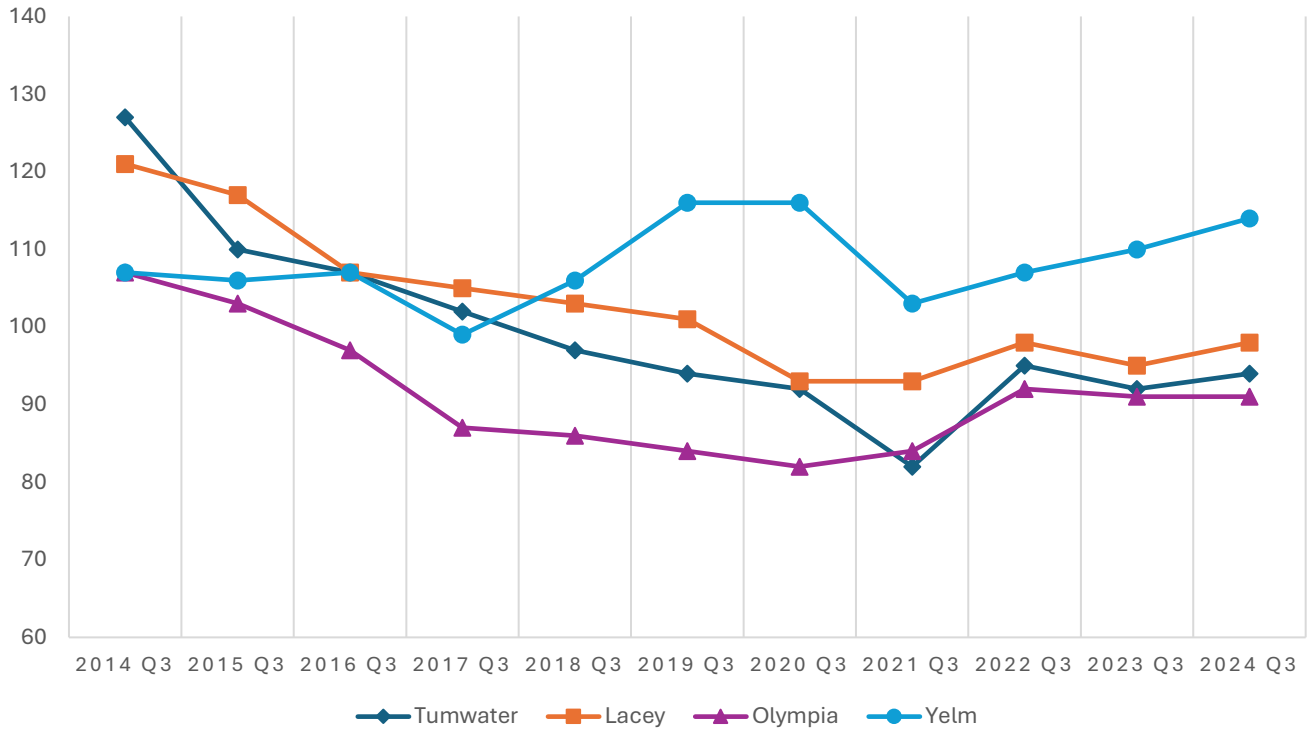


Figure H-13. Median Renters Housing Affordability Index, Thurston County Cities, 2014-24.

Source: Washington Center for Real Estate Research, Median Renters Housing Affordability Index, 2024. Third Quarter Data, 2014-24.

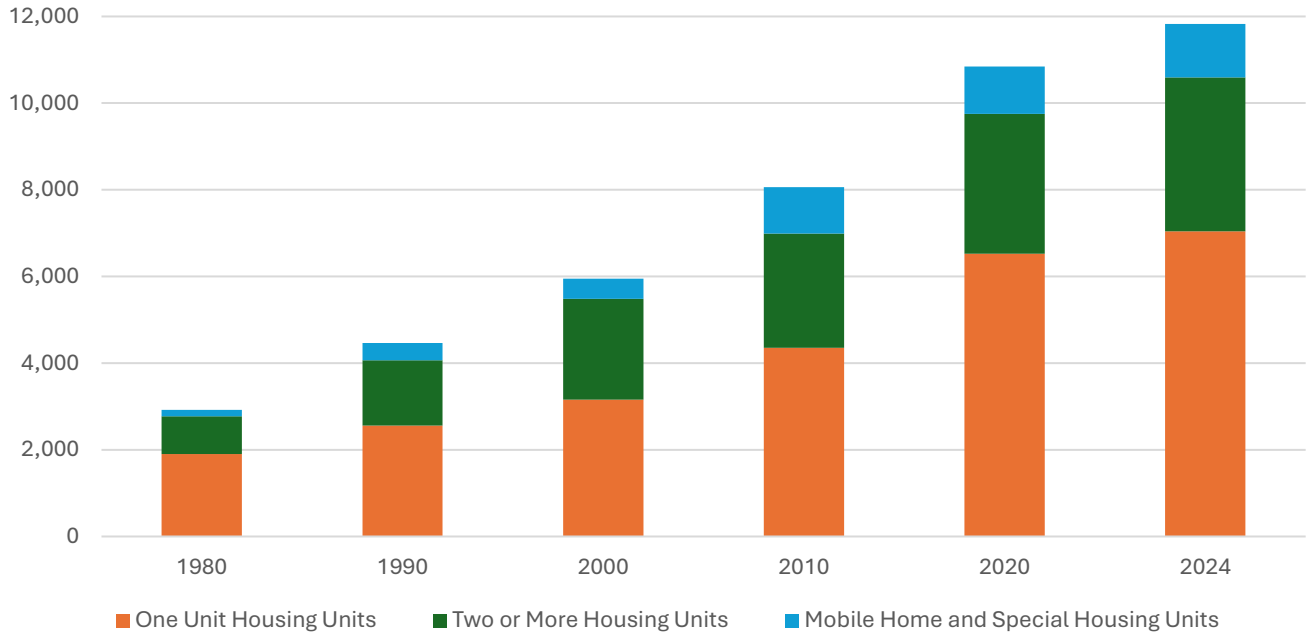
Figure H-14 summarizes the Housing Affordability Index for transitional renters by Thurston County and adjacent counties and Tumwater and other larger Thurston County cities.

Figure H-14. Transitional Renters Housing Affordability Index, Thurston County Cities, 2014-24.

Source: Washington Center for Real Estate Research, Transitional Renters Housing Affordability Index Data, 2024. Third Quarter Data, 2014-24.

Table H-9 shows that in 2023, Tumwater had 47.7 percent of renters paying more than 30 percent of their household income towards gross rent, which indicates a shortage of affordable rental housing and the need for new low-income rental housing.

Table H-9. Gross Rent as a Percentage of Household Income in Tumwater, 2023.



Occupied Units Paying Rent	Number of Units	Percentage
Less than 15.0 percent	417	10.00%
15.0 to 19.9 percent	732	17.50%
20.0 to 24.9 percent	406	9.70%
25.0 to 29.9 percent	630	15.10%
30.0 to 34.9 percent	455	10.90%
35.0 percent or more	1,538	36.80%

Source: 2023 U.S. Census American Community Survey 5-Year Estimates, Table DP04.

D. Housing Inventory

Tumwater had 11,830 housing units as of 2024, a 47 percent increase from 2010. Figure H-15 and Table H-10 break down the number of housing units in Tumwater by housing type, such as single family, duplexes, or multifamily since 1980.

Figure H-15. U.S. Census Decennial Count of Types of Housing Units in Tumwater, 1980-2024.

Source: Washington State Office of Financial Management, Intercensal Estimates of April 1 Population and Housing, 2010-20, March 21, 2024.

Table H-10. U.S. Census Decennial Count of Housing Units in Tumwater, 1980-2024.

Year	Total Housing Units	One Unit Housing Units	Two or More Housing Units	Mobile Home and Special Housing Units
1980	*2,920*	1,901	876	143
1990	*4,463*	2,563	1,504	396
2000	*5,953*	3,155	2,328	470
2010	*8,064*	4,354	2,638	1,072
2020	*10,847*	6,527	3,223	1,097
2024	*11,830*	7,045	3,552	1,233

Source: Washington State Office of Financial Management, Intercensal Estimates of April 1 Population and Housing, 2010-20, March 21, 2024.

The Thurston Regional Planning Council estimated that there were 12,280 housing units in Tumwater and 1,300 housing units in Tumwater's urban growth area in 2024. There were 1,427 housing units in Tumwater's urban growth area according the 2020 Decennial U.S. Census. Between 2020

and 2024, as part of annexations of parts of its urban growth area, Tumwater added 211 dwelling units from its urban growth area.

About 60 percent of homes in Tumwater in 2024 are single housing units, which is an increase from 54 percent in 2010. More than ten percent were mobile homes or special housing units in 2024 down from 13 percent in 2010.

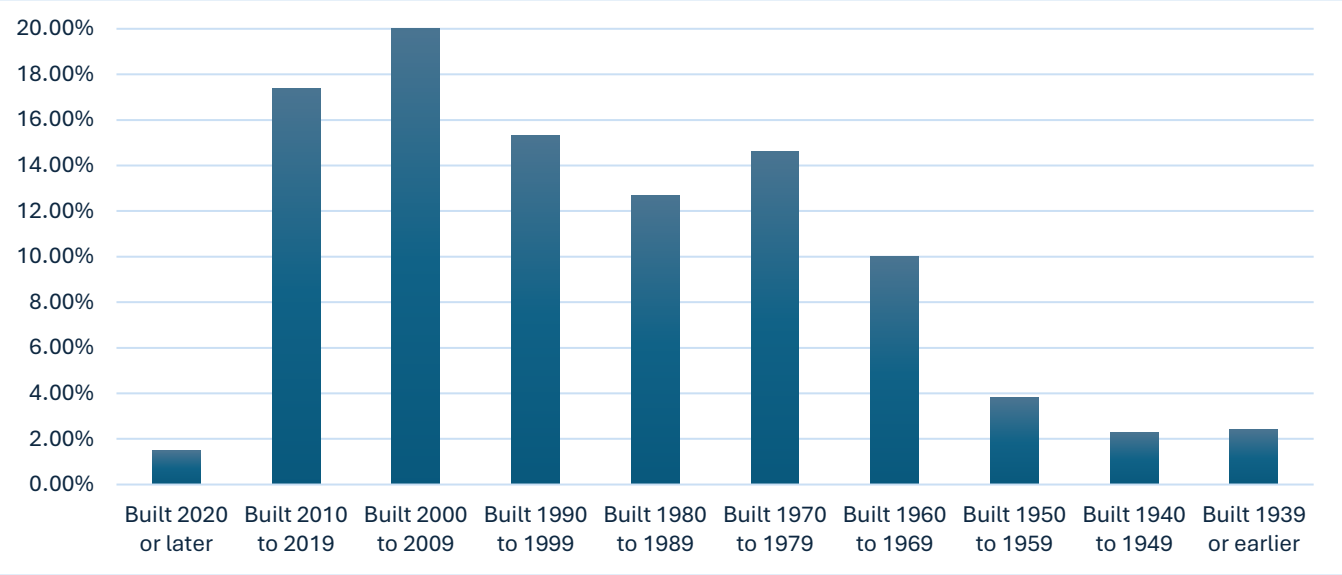
According to the Washington State Office of Financial Management, special homes include traditional manufactured homes, mobile homes, recreational vehicles, vans, and boats that provide a separate and distinct living space for an individual or household.

1) Income & Affordability

The estimates of housing supply by income and affordability in Table H-11 reflects survey data from 2016 to 2020. Housing costs have increased significantly since this survey data was collected and it is likely that the supply of homes affordable at lower income levels has decreased.

Table H-11. Estimated Housing Supply by Income in Tumwater & Urban Growth Area, 2020.

	Total	PSH	Non-PSH	>30-50% AMI	>50-80% AMI	>80-100% AMI	>100-120% AMI	>120% AMI	Seasonal or Migrant Housing
City	**11,064**	0	266	1,099	4,159	2,588	1,296	1,612	45
Urban Growth Area	**1,210**	0	29	120	454	283	142	176	6
Total	**12,274**	0	295	1,219	4,614	2,870	1,437	1,788	51
Total Percentage	**100%**	**0%**	**2.4%**	**9.9%**	**37.6%**	**23.4%**	**11.7%**	**14.6%**	**0.4%**



Sources: U.S. Department of Housing and Urban Development Affordability Strategy (CHAS), 2014-18 Data, Washington State Department of Commerce, and Thurston Regional Planning Council, 2023.
Note: PSH is permanently supported housing and AMI is area median income.

2) Age of Residential Structures

Figure H-16 shows the number of residential structures that were built in Tumwater by decade. More than half of Tumwater's housing stock was built after 1990, which means that most of Tumwater is closer to current building standards.

DRAFT

Figure H-16. Age of Residential Structures in Tumwater by Decade, 2023.

Source: 2023 U.S. Census American Community Survey 5-Year Estimates, Table DP04.

3) Housing Occupancy

According to the 2020 U.S. Census, the occupancy rate base is approximately 97 percent, which is an increase from approximately 94 percent according to the 2010 U.S. Census.[3]

Table H-12 shows the number of occupied and total housing units in Tumwater as of the 2020 U.S. Census. Housing units may be vacant for various reasons. They may be for sale or rent, or they may be used as recreational or vacation homes. Any vacancy rate of less than five percent is considered a tight rental market.

Table H-12. Occupied & Total Housing Units in Tumwater, 2020.

Occupied Housing Units	Total Housing Units	Vacant	Vacancy Rate
10,488	10,847	359	3.3%

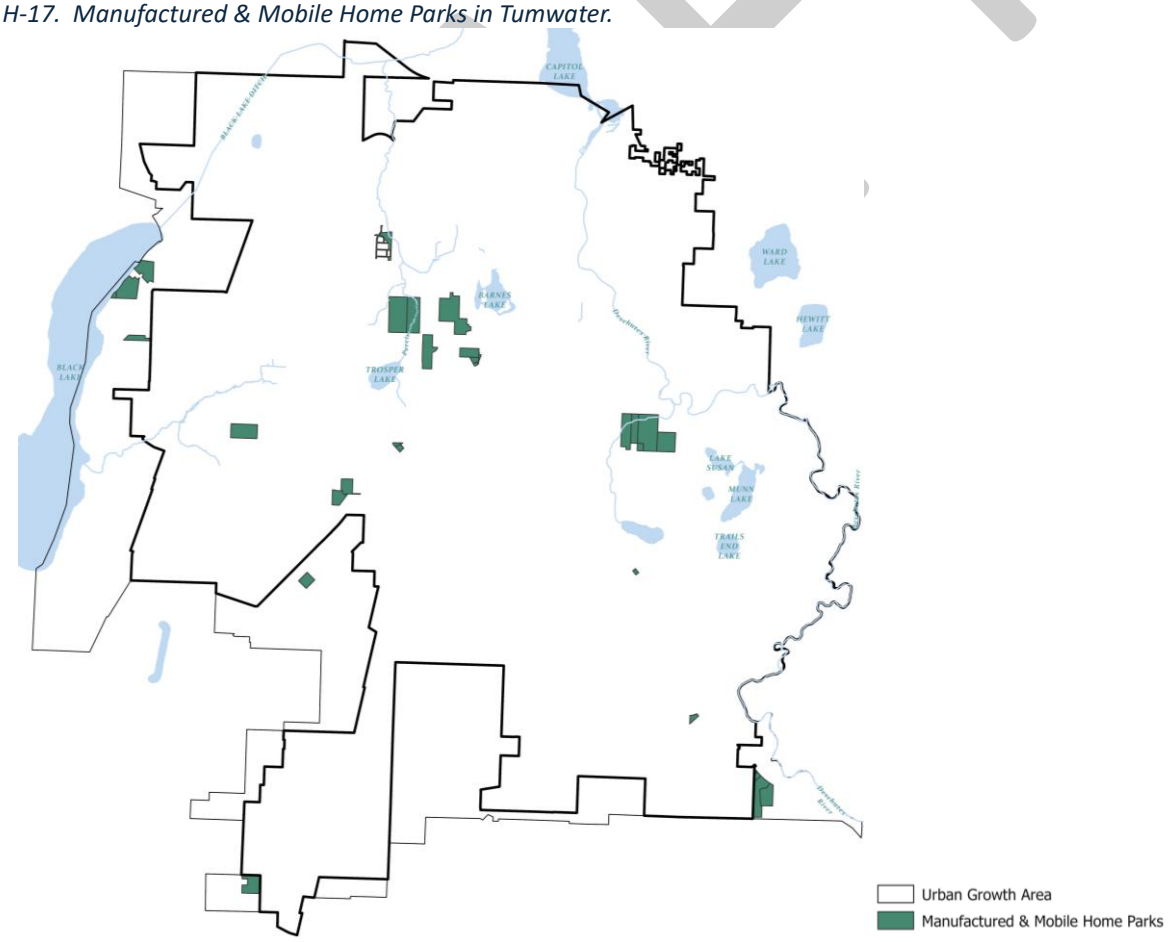
Sources: 2020 Decennial U.S. Census, Table H3 and Washington State Office of Financial Management, Intercensal Estimates of April 1 Population and Housing, 2010-20, March 21, 2024.

4) Mobile & Manufactured Homes

Tumwater has also established a specific land use designation and zone district for mobile homes and manufactured housing parks to ensure properties containing these affordable housing units are not converted to other more expensive forms of housing or commercial land uses. This ordinance has been successfully defended in both state and federal court. While that has been successful in preventing the conversion of parks

[3] Washington State Office of Financial Management, Intercensal Estimates of April 1 Population and Housing, 2010-20, March 21, 2024.

into other uses, it cannot address the issue of the rising costs of ground leases and other fees.



Mobile and manufactured homes are vital to Tumwater's affordable housing supply and are cheaper than homes built on site. They are often more affordable than traditional detached homes. Both mobile and manufactured housing can be found in a variety of settings, such as:

- By itself on a lot owned by the homeowner.
- An accessory unit to a primary home on a lot.
- On a leased plot in a campground or mobile home community.

According to 2024 Washington State Office of Financial Management data, there are an estimated 1,161 mobile and manufactured homes in Tumwater, half are within registered manufactured home park communities.

Figure H-17 shows the location of registered manufactured home park communities in Tumwater. There are nine registered mobile and manufactured home parks in Tumwater and six in Tumwater's urban growth area. Six are in the Manufactured Home Park land use designation and zone district in Tumwater, three are not.

Figure H-17. Manufactured & Mobile Home Parks in Tumwater.

Source: City of Tumwater, 2024.

Many of these homes park communities may offer quality, affordable housing in Tumwater. They may be cheaper than site-built homes of similar size and location. Conditions can vary, and many residents will find few or no affordable options if they have to move. Preserving existing mobile home communities and allowing new ones to be built will support affordable housing in Tumwater.

5) Subsidized Rental Housing

Table H-13 shows the subsidized rental inventory in Tumwater in 2023. Of the 177 subsidized units, 28 at two bedroom units, 16 are three bedroom units, and 133 have an unknown number of bedrooms.

Table H-13. Subsidized Rental Inventory in Tumwater, 2023.

Subsidized Rental Housing Unit Type	Number of Units
Units Funded by Washington State Department of Commerce, including Housing Trust Fund	54
Units funded by the US Department of Agriculture's Rural Housing Service Section 514 and 515 programs	44
Units funded by the US Department of Housing and Urban Development's project-based the Housing Choice Voucher program and other multi-family programs	50
Multifamily Tax Exemption Program affordable units put into service from 2020 to 2022	29
Deduplicated Total Number	**177**

Source: Washington Center for Real Estate Research, Subsidized Rental housing Inventory Data, 2023.

6) Private Subsidized Housing

Subsidized housing is made available by private building owners and through public vouchers. With private subsidized housing, an owner of housing units receives low interest loans or grants for construction or rehabilitation of housing units. In exchange, the owner agrees to make available a certain number of units at a price affordable to low income families. These agreements are made by contract for a set period.

Tumwater currently has 94 subsidized housing units of this type with 44 units reserved families and 50 units reserved for people who are elderly. Waiting lists for access to these units are kept by the individual property owners and average two years. These properties are listed in Table H-14.

Table H-14. Privately Subsidized Housing in Tumwater, 2025.

Project	Type	Location	Number of Units
Deschutes Cove	Families	7200 Henderson Blvd. SE	44 – Two and three Bedrooms
Tumwater Apartments	Seniors	5701 6th Ave SW	50 – Studio and one bedroom

Source: Housing Authority of Thurston County, 2024.

DRAFT

7) Publicly Subsidized Housing

The Housing Authority of Thurston County owns a number of residential properties in Tumwater that offer affordable rents that are below market, but they are not directly subsidized. These properties are listed in Table H-15.

Table H-15. Housing Authority of Thurston County Residential Properties in Tumwater, 2024.

Project	Location	Number of Units
Allen Orchard	202 - 256 Allen Orchard Lane SE	14 – Two bedrooms 10 – Three bedrooms
Trails End Duplexes	7440 - 7446 Trails End Dr. SE	8 – Two bedrooms
Sequoia Landing Apartments	7132 - 7142 Littlerock Rd. SW	10 – One bedroom 4 – Two bedrooms 18 – Two bedroom townhouse 8 – Three bedrooms
McKena Lane Townhomes	206 - 226 McKena Lane SW	6 – Three bedrooms
Lake Park Apartments	1233 Lake Park Drive SW	8 – Two bedrooms
Spring Court Apartments	5765 Linderson Way SW	8 – Two bedrooms
Falls Pointe Apartments	411 Lee Street SW	60 – One bedroom 48 – Two bedrooms

Source: Housing Authority of Thurston County, 2024.

8) Public Voucher Programs

In addition to subsidized housing properties in the community, there are housing voucher programs that serve Tumwater residents earning 50 percent or less of area median income by providing a subsidy to cover the cost of rent above 30 percent of income towards rent and utilities.

Assistance is also available from the Housing Choice Voucher program, which is funded by the US Department of Housing and Urban Development and managed by the Housing Authority of Thurston County. The Housing Choice Voucher program works like rental assistance where you find a private owner and then the voucher pays part of the rent, usually 70 percent if income qualified. Currently the Housing Authority of Thurston County is serving 1,850 households countywide through the program.

The Housing Authority of Thurston County also works with other partners on the Foster Youth to Independence and the Veterans Administration Supportive Housing voucher programs.

Foster Youth to Independence vouchers provide dedicated rental assistance to support youth exiting foster care who are at risk of homelessness and youth who have become homeless or at risk of homelessness after having been in foster care.

The Veterans Administration Supportive Housing voucher program assists homeless veterans in cooperation with the U. S. Veterans Administration.

E. Emergency & Supportive Housing

Emergency and supportive housing are vital for those at risk of homelessness as they help individuals and family who are homeless or are at risk of becoming homeless. These individuals may become homeless due to affordability issues. Life events, like domestic violence, racial discrimination, and mental and physical health problems also play a role. These specific types usually support those with incomes less than 30 percent of area median income.

By strict U.S. Department of Housing and Urban Development standards, Thurston County has one emergency shelter, the Union Gospel Mission in Olympia, which has a reported 60 openings nightly. The Salvation Army in Olympia has 38 beds but it is not considered to meet the technical definition of an emergency shelter as it holds beds for continuous shelter.

The same situation applies to the transitional shelter Catholic Community Services Westminster facility, which manages a ten bed transitional housing program community. Community Youth Services also offers emergency shelter and transitional housing with a total of 34 beds at Haven House and Young Adult Shelter.

During cold weather events, select providers expand by about 40 beds collectively with more beds opening during emergency events with staff capacity.

Based on the Thurston County preliminary 2025 Point-in-Time Count data with 465 individuals marked as experiencing unsheltered homelessness homeless services in Thurston County could shelter 11 percent of those individuals assuming that there were 60 people in Union Gospel Mission, 38 in long term night by night bed placements at the Salvation Army and 20 meet the criteria for the Young Adult Shelter.

The Thurston County Homeless Response System is a primarily a tiered system for access shelter going from Emergency Shelter to Transitional Shelter to Long term Shelter to Permanent Supportive Housing to Vouchered Permanent Housing.

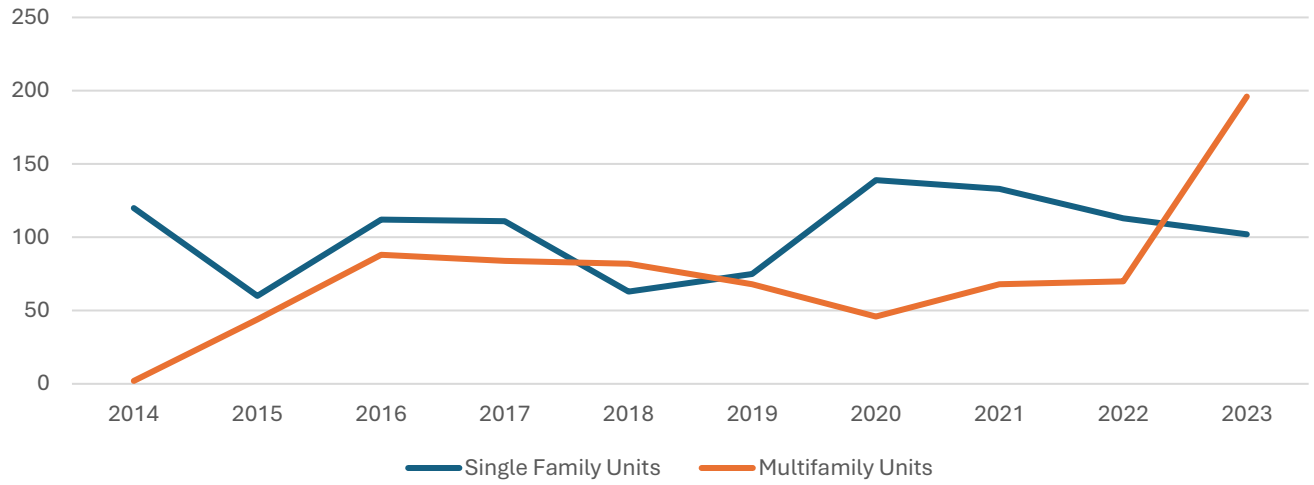
The Tumwater Municipal Code was amended in 2022 to allow for the placement of emergency housing and shelters, permanent supportive housing, and transitional housing in multiple land use designations as required by state law. While in 2024, there was no emergency housing or shelters located in Tumwater, Planning for and Accommodating Housing Needs in Thurston County: Implementing the Housing Affordability Requirements of HC 1220 found that there was sufficient land capacity in Tumwater to allow the placement of such uses.

While no emergency shelters currently exist in Tumwater, there are a number of transitional and permanent publicly subsidized housing units. These include units managed by the Community Action Council, the Thurston County Housing Authority, HomesFirst, and Habitat for Humanity.

Behavioral Health Resources operates several subsidized permanent housing facilities in Tumwater for individuals with mental health issues. The Tumwater Municipal Code allows for the establishment of temporary homeless encampments by sponsoring religious organizations.

Tumwater will be working on a Homeless Shelter, Emergency, and Transitional Housing Assessment and Feasibility Study starting in 2026 which is

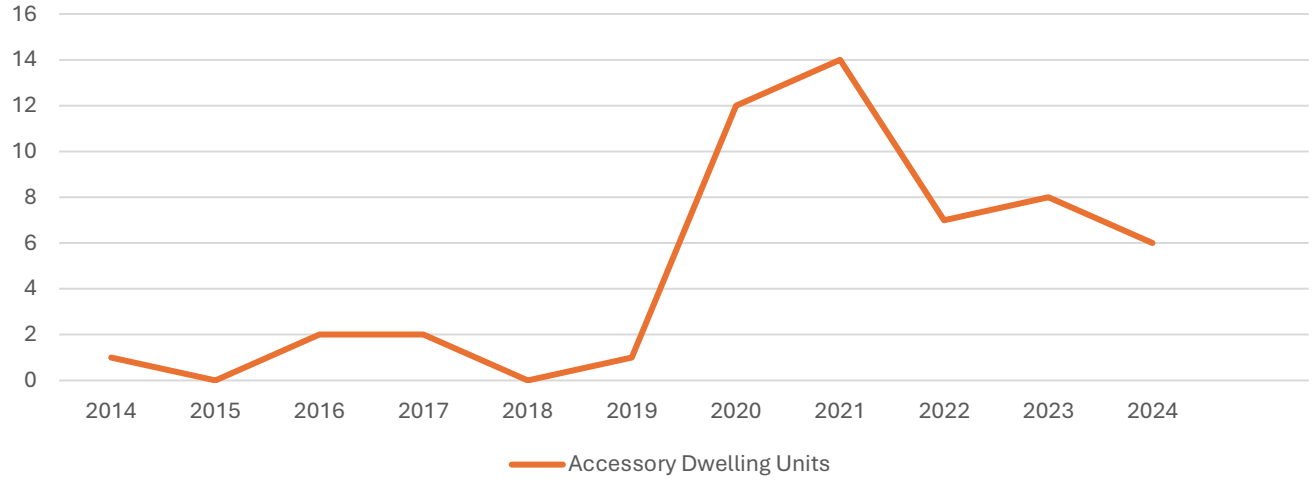
DRAFT



intended to help the City understand the specific needs in Tumwater for emergency and transitional housing facilities beyond the state mandated regulatory amendments of 2022.

F. Housing Production Trends

Figure H-18 shows the breakdown of permitted housing units between 2014 and 2023 in Tumwater. The most permitted housing types were single-family houses. Of the multifamily buildings, there were a total of five duplexes and five triplexes permitted during this time frame which were 25 total units of middle housing out of 748 multifamily units.



There were 53 accessory dwellings units permitted during this period and Figure H-19 shows the permits by year.

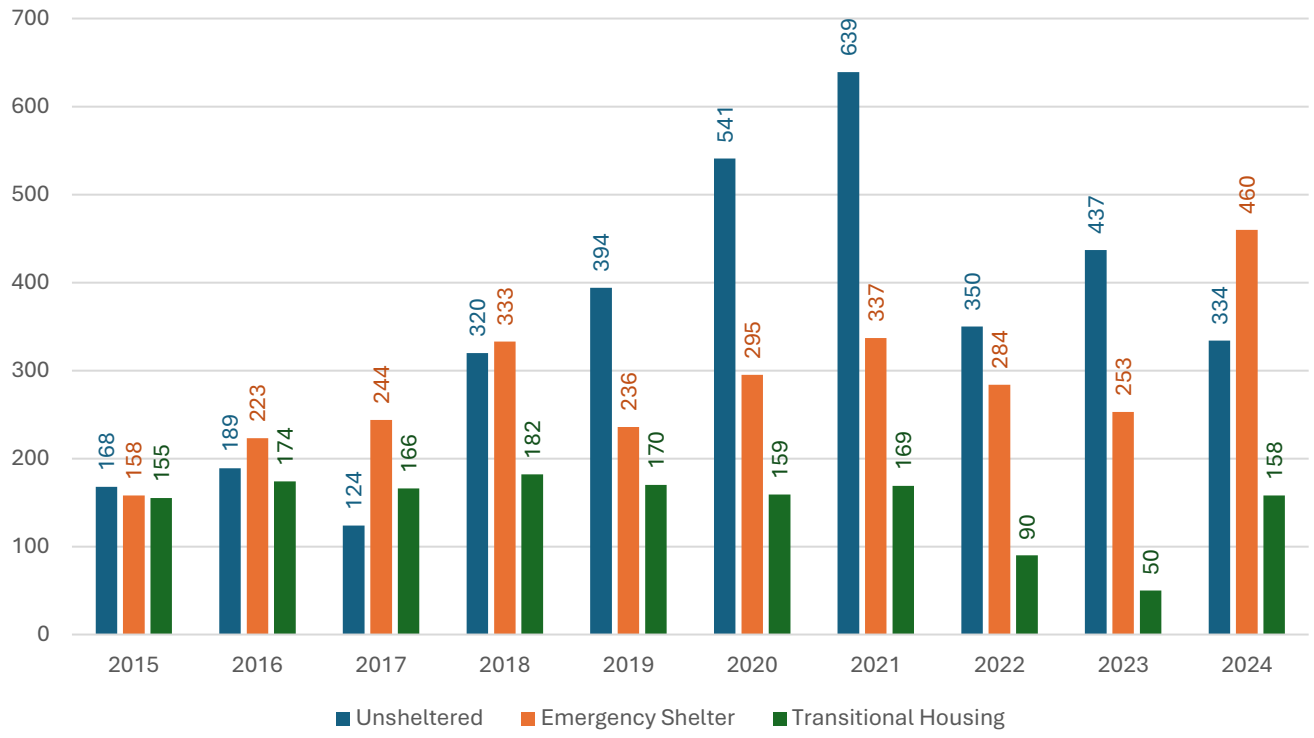
Figure H-18. Single-Family & Multifamily Residential Building Permits in Tumwater, 2014-23.

Source: Washington Center for Real Estate Research, 2024.

Figure H-19. Accessory Dwelling Unit Building Permits in Tumwater, 2014-24.

Source: City of Tumwater, 2024.

G. Homeless Population & Trends



1) Point-in-Time Count

The Point-in-Time Count is conducted annually to assess the number of individuals experiencing homelessness as mandated by the U.S. Department of Housing and Urban Development.

Findings from the 2024 Point-in-Time Count indicate trends consistent with those observed in previous annual counts. Notably, the number of individuals experiencing unsheltered homelessness remains high, while the availability of shelter beds has not significantly increased. The high rate of unpermitted housing reflects a severe shortage of emergency shelters and housing, transitional housing, and permanent supportive housing in Thurston County.

In Thurston County, the homeless population rose nearly 98 percent from 2015 to 2024 as shown in Figure H-20, while it was down 17 percent from a high in 2021. Note the 2021 data was collected differently than the counts in other years because of the pandemic.

Figure H-20. Thurston Point-in-Time Counts Over the Past Decade, 2015-24.

Source: 2024 Point-in-Time County: Homeless Census Report, Thurston County, WA, 2024.

The overall number for the Thurston Point-in-Time count in 2024 of 952 is similar overall number for the Thurston Point-in-Time count in 2010 of 976, which was during the last major recession.

Individuals have been observed in Tumwater living in cars, recreational vehicles, or

unpermitted structures. While thirteen occupied vehicles were observed in Tumwater during the 2025 Point-in-Time count, there is not a more accurate estimate of how many people are living in these situations.

2) McKinney-Vento Act Reporting

Following the requirements of the federal McKinney-Vento Education of Homeless Children and Youth Assistance Act, School Districts report the number of students from pre-kindergarten through 12th grade that experience homelessness during the school year to the Washington State Office of Superintendent of Public Instruction. While the number of students experiencing homelessness does fluctuate throughout the year, the Office of Superintendent of Public Instruction reports the number on October 1 of each school year. Consequently, the total number of students that have experienced homelessness at some point during the year is not reflected.

The Office of Superintendent of Public Instruction reported that 2.7 percent of the Tumwater School District's 6,370 enrolled students were experiencing homelessness as shown in Table H-16. The Tumwater School District serves most of Tumwater and a portion of Thurston County west and south of Tumwater.

Table H-16. Tumwater School District – Students Experiencing Homelessness, 2024-25.

Student Homelessness	Number of Students	Percentage of Students
Students Experiencing Homelessness	~172	2.7%
Total Student Population	6,370	100%

Sources: Thurston Regional Planning Council, Students Experiencing Homelessness by Thurston County School District, 2025. Washington Office of Superintendent of Public Instruction, Washington State Report Card, Tumwater School District, Report Card Enrollment *2024-25* School Year.

H. Projected Housing Need

The Growth Management Act requires Tumwater to "plan for and accommodate housing affordable to all economic segments of the population."

Housing is one of the most important parts of the everyday lives of Tumwater residents. One of Tumwater's top priorities is to work to provide opportunities for residents to have a range of housing options within their budget so that their home is suitable and affordable.

Thurston County and the cities of Lacey, Olympia, Tenino, Tumwater, and Yelm contracted with the Thurston Regional Planning Council to facilitate the process required by HB 1220 (Chapter 254, Laws of 2021) and do data analysis. The process consists of the steps shown in Figure H-21 that were conducted countywide and then specifically for each jurisdiction, including Tumwater.

DRAFT

Figure H-21. HB 1220 (Chapter 254, Laws of 2021) Process.

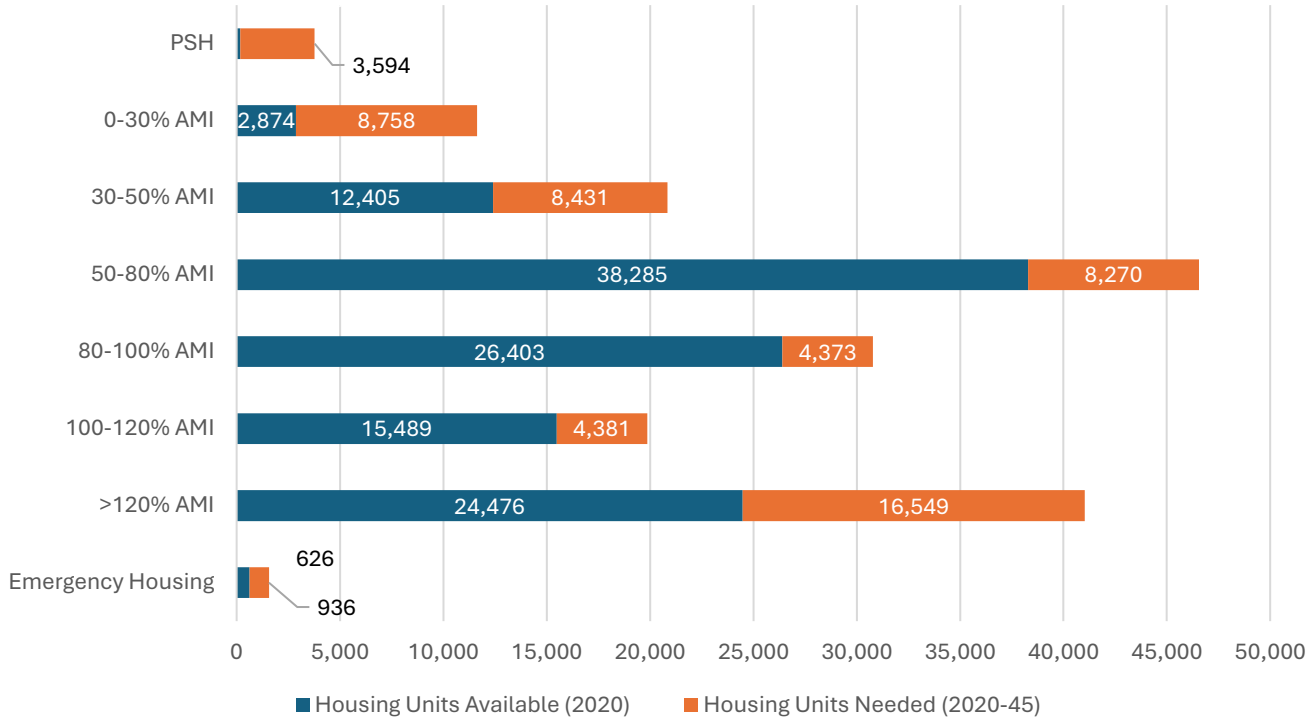
Step 1

Identify housing needs for each jurisdiction.

How many low-income units should Tumwater plan for?

Step 2

Conduct a land capacity analysis.



Is there sufficient land in Tumwater to accommodate the low-income housing need?

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.

According to the U.S. Department of Housing and Urban Development, a moderate income at 100 percent of area median income for a Thurston County household of four in 2025 would be $116,688. In 2020, there were 121,438 housing units available and by 2045 an addition 54,356 housing units would be needed countywide. The countywide need for housing units by income in Thurston County is shown in Figure H-22.

DRAFT

Figure H-22. Countywide Housing Need for Thurston County, 2045.

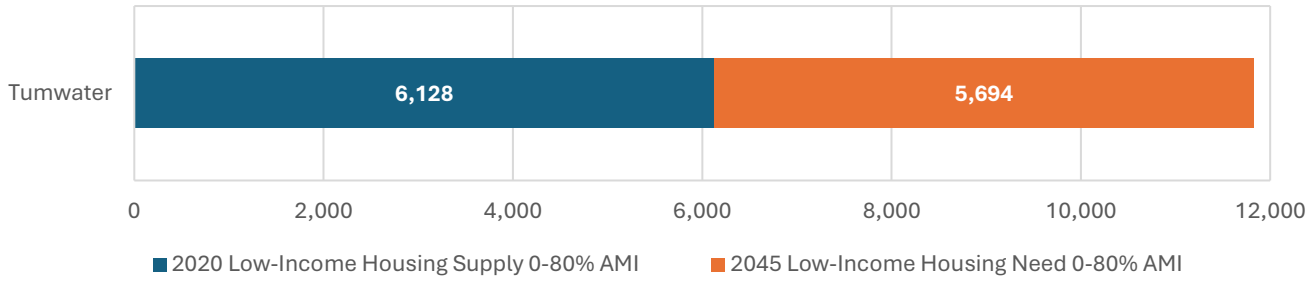
Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.
Notes: PSH is permanently supported housing and AMI is area median income. Numbers may not add to totals due to rounding.

HB 1220 (Chapter 254, Laws of 2021) allowed Thurston County jurisdictions to determine the housing need they planned for as part of the 2025 Comprehensive Update process. The jurisdictions agreed to the following guidelines for the housing allocation:

- The process should be multijurisdictional and collaborative.
- The need for each jurisdiction should sum up to the countywide need.
- The Thurston Regional Planning Council would accept the jurisdiction's recommended housing allocation.

Based on that process, the Thurston Regional Planning Council forecasted that Tumwater and its urban growth area will need to add 9,192 net new housing units between 2020 and 2045 in Tumwater and its urban growth area as shown in Table H-17.

The difference between Tumwater's 2020 low-income housing supply and need in 2045 for households earning between zero and 80 percent area median income is shown in Figure H-23.



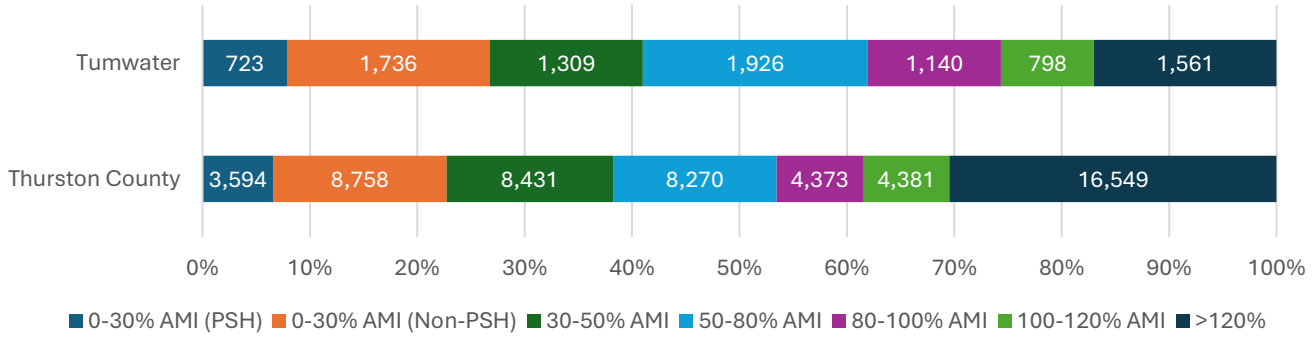
DRAFT

Table H-17. Allocation of Projected Tumwater Housing Needs, 2020-45.

	Housing Units Available in 2020	Projected Housing Units Needed in 2045	2020-45 Projected Housing Need
City	11,064	17,740	6,676
Urban Growth Area	1,210	3,726	2,516
Total	**12,274**	**21,466**	**9,192**

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.

Figure H-23. Low-Income Housing Need in Tumwater, 2020-45.



Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.

The allocation includes breakdowns by percentage of area median income as shown in Figure H-24 and Table H-18, consistent with projections in Commerce's Housing for All Planning Tool.

Under the Growth Management Act, Tumwater must plan for and accommodate future housing, which includes meeting housing need allocations for each income level. Tumwater must show how much land is available to build homes to meet these needs and identify barriers to housing production and the ways they will be overcome. This will be shown in more detail in Chapter 5.

Figure H-24. Comparison of Housing Need Allocation for Tumwater & All of Thurston County, 2020-45.

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.
Notes: PSH is permanently supported housing and AMI is area median income. Numbers may not add to totals due to rounding

Housing Element

Part 2 – Technical Information

Table H-18. Housing Need Allocation for Tumwater, 2020-45.

	Housing Units								Beds
	Total	Income Level (Percent of Area Median Income)							Emergency Housing
		0-30%		30-50%	50-80%	80-100%	100-120%	>120%	
		PSH	Non-PSH						
City	6,676	554	1,320	1,002	1,129	806	627	1,238	133
UGA	2,516	170	415	307	797	333	171	323	50
Total City and UGA	**9,192**	**723**	**1,736**	**1,309**	**1,926**	**1,140**	**798**	**1,561**	**184**
Thurston County	54,356	3,594	8,758	8,431	8,270	4,373	4,381	16,549	936

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.

Notes: PSH is permanently supported housing and UGA is Tumwater's urban growth area. Numbers may not add to totals due to rounding.

3. Land Capacity Analysis

A. Analysis

After identifying Tumwater's Housing Need allocation in Chapter 2, Tumwater must show that there is sufficient land for a variety of housing types appropriate for each of the area median income groups in Tumwater and its urban growth area for the next 20 years.

This is done by completing a land capacity analysis, which identifies if there is sufficient capacity based on zoning and development regulations to accommodate the identified housing need.

"Capacity" refers to the potential number of new dwelling units that could be built on a parcel based on zoning, development regulations, development trends, and market factors. Capacity includes greenfield development, infill development, and redevelopment.

Based on the results of the land capacity analysis, Housing Element works with the Land Use Element to ensure a sufficient supply of suitable land for all types of residential development.

1) Thurston Regional Planning Council Report

Because of the nature of joint planning in Thurston County for urban growth areas, the jurisdictions in the county partnered with the Thurston County Regional Planning Council to prepare a land capacity analysis. As part of that work, the jurisdictions asked that the land capacity analysis combine data for cities and their unincorporated urban growth areas, because the Housing Element will address both together and the Tumwater Housing Element will become part of the joint plan Tumwater has with Thurston County.

The final Thurston County Regional Planning Council April 2025 report, Planning for and Accommodating Housing Needs in Thurston County, can be found in Appendix C.

The Washington State Department of Commerce's guidance for updating housing elements outlined five steps for completing a land capacity analysis, which are described in more detail in Appendix C.

The five steps were:

1. Summarize Land Capacity by Zone.
2. Categorize Zones by Allowed Housing Types and Density Category.
3. Relate Zone Categories to Potential Income Levels and Housing Types.
4. Summarize Capacity by Zone Category.
5. Compare Allocated Housing Need to Capacity.

Step 1: Summarize Land Capacity by Zone District

The land capacity analysis used the land capacity model developed for the Thurston County Regional Planning Council's most recently adopted forecast and the 2021 Buildable Lands Report with documentation and modifications noted in the report.

DRAFT

1) Bush Prairie Habitat Conservation Plan

Tumwater and the Port of Olympia are working on the Bush Prairie Habitat Conservation Plan, which will mitigate the impacts of development on four species protected under the Endangered Species Act as part of an incidental take permit application with the U.S. Fish and Wildlife Service.

Because the latest draft of the Habitat Conservation Plan identifies the need for significant mitigation land within Tumwater and its urban growth area, the land capacity analysis reduced capacity in the zones where mitigation is most likely to occur by the factors shown in Table H-19.

Table H-19. Capacity Reduction Factors for Bush Prairie Habitat Conservation Plan.

Zone District	Acres Removed for Mitigation	Total Area (Vacant Parcels)	Capacity Reduction Factor
Multifamily High Residential	5	18.7	26.8%
Multifamily Medium Residential	30	83.1	36.1%
Mixed Use	30	27.0	100.0%
Single Family Medium Residential	40	227.2	17.6%
Single Family Low Residential	190	354.6	53.6%

Source: Planning for and Accommodating Housing Needs in Thurston County, Thurston Regional Planning Council, April 2025.
Notes: Acres removed for mitigation provided by Tumwater staff. The total area is from the Thurston Regional Planning Council's land capacity model. Reduction only applied to capacity on vacant parcels.

2) Accessory Dwelling Units

The land capacity analysis included an estimate for the development of new accessory dwelling units over the 20 year period of the Comprehensive Plan. For Tumwater, the adopted forecast was for 73 new accessory dwellings units in Tumwater and 10 new accessory dwellings units in its urban growth area by 2045 on 1,536 potential accessory dwelling units lots.

Step 2: Categorize Zones by Allowed Housing Types & Density Category

The State Department of Commerce's housing element guidance recommended that jurisdictions assign a density category to each of their zone districts based on the density and types of housing allowed. In the land capacity analysis, the Thurston County Regional Planning Council used the example zone categories and the typical housing types from Commerce's guidance that are shown in Table H-20.

Table H-20. Categories for Classifying Zone Districts by Housing Types Allowed.

Zone Category	Typical Housing Types Allowed
Low Density	Detached single-family homes
Moderate Density	Townhomes, duplexes, triplexes, or quadplexes
Low-rise Multifamily	Walk-up apartments (up to 3 floors)
Mid-rise Multifamily	Apartments in buildings with ~4-8 floors (~40-85 feet in height)

DRAFT

Zone Category	Typical Housing Types Allowed
High-rise/Tower	Apartments in buildings with ~9 or more floors (>85 feet in height) and requiring steel frame construction

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, Implementing the Housing Affordability Requirements of HB 1220, April 2025.
Notes: Adapted from the State Department of Commerce's guidance. Manufactured homes are not listed as a housing type because by law they should be allowed in all zones that permit residential uses. High-Rise/Tower zones are likely to be relevant only in major metropolitan cities. Condominiums are omitted since they are a type of ownership, not housing.

Step 3: Relate Zone Categories to Potential Income Levels & Housing Types

For the land capacity analysis, zone categories and housing types were tied to an affordability level. The State Department of Commerce's guidance provided examples of this relationship for moderate- and high-cost communities in Washington State, which was used in the land capacity analysis as a more detailed market analysis was not available.

The Thurston County Regional Planning Council used the relationship for moderate-cost communities shown in Table H-21 for the land capacity analysis. Note that the assigned affordability levels were intended to indicate the potential for that zone category to accommodate housing affordable to different income levels, not a guarantee that any housing in those zone districts actually will be affordable at specific household income levels.

The land capacity analysis noted that in some situations, low-income housing may be built in low or moderate density zones.

Table H-21. The Relationship of Zone Categories to Housing Income Levels Served in Moderate-Cost Communities.

Zone Category	Lowest Potential Income Level Served		Assumed Affordability Level for Capacity Analysis
	Market Rate	With Subsidies and/or Incentives	
Low Density	Higher income (>120% AMI)	Not typically feasible at scale	Higher income (>120% AMI)
Moderate Density	Moderate income (>80-120% AMI)	Not typically feasible at scale	Moderate income (>80-120% AMI)
Low-rise Multifamily	Low income (>50-80% AMI)	Extremely low and Very low income (0-50% AMI)	Low income and PSH (0-80% AMI)
Mid-rise Multifamily	Low income (>50-80% AMI)	Extremely low and Very low income (0-50% AMI)	Low income and PSH (0-80% AMI)
Accessory Dwelling Units (all zones)	Low income (>50-80% AMI)	N/A	Group with Low-rise and/or Mid-rise Multifamily

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.

Note: Adapted from the State Department of Commerce's housing element development guidance. PSH is permanently supported housing.

Step 4: Summarize Capacity by Zone Category

In Step 4 the total capacity in each zone category was summarized. This provided the total capacity that could accommodate housing in each income level in Tumwater and its urban growth area. These totals are shown in Table H-22. The more detailed capacity by zone is found in Appendix II of the land capacity analysis under the "Total Capacity" columns.

Table H-22. Housing Capacity by Zone Category in Tumwater& Its Urban Growth Area.

Total	ADUs	Midrise Multifamily	Lowrise Multifamily	Moderate Density		Low Density
	0-80% AMI	0-80% AMI	0-80% AMI	0-80% AMI	80-120% AMI	>120% AMI
11,861	83	1,455	3,148	1,043	3,692	2,441

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.
Note: ADU is accessory dwelling unit. Adapted from the State Department of Commerce's housing element development guidance.

Step 5: Compare Allocated Housing Need to Capacity

The final step of the land capacity analysis was to compare the allocated housing need allocated to Tumwater and its urban growth area to its capacity for new housing.

A summary of the difference between the allocated housing need and the capacity for potential number of new dwelling units that could be built on a parcel based on zoning, development regulations, development trends, and market factors is shown in Table H-23.

A positive number indicates that there is a surplus in Tumwater's capacity for new housing units, which is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number indicates that there is a deficit, which is insufficient capacity.

Table H-23. Summary of Housing Surplus or Deficit in Tumwater& Its Urban Growth Area in 2045.

Aggregate Housing		Capacity		Need Surplus / Deficit	
0-80% AMI	80-120% AMI	0-80% AMI	80-120% AMI	0-80% AMI	80-120% AMI
5,694	1,937	5,729	3,692	35	1,755

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.
Note: A positive number (surplus) indicates that there is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number (deficit) indicates that there is insufficient capacity. AMI is area median income.

While the land capacity analysis found no deficits in the Tumwater and its urban growth areas in the ability for Tumwater's current land use designations to accommodate future housing demand, in looking at the detailed findings shown in Table H-24 under the "Surplus

or Deficit" columns the margin between aggregate housing need and the total capacity to accommodate the housing needs for those less than 80 percent area median income was very small.

Table H-24. Details of Housing Surplus or Deficit in Tumwater & Its Urban Growth Area in 2045.

Income Level	Zone Categories Serving These Needs	Housing Need	Aggregate Housing Need	Total Capacity	Surplus or Deficit
0-30% PSH	Low-rise Multifamily Mid-rise Multifamily ADUs (Housing Units)	723	5,694	5,729	35
0-30% Other		1,736			
30-50%		1,309			
50-80%		1,926			
80-100%	Moderate Density (Housing Units)	1,140	1,937	3,692	1,755
100-120%		798			
Emergency Housing (beds)		184	184	2,842	2,658

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.
Note: Income level is the area median income level. A positive number indicates that there is a surplus, which is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number indicates that there is a deficit, which is insufficient capacity. ADU is accessory dwelling unit.

Given this small margin, the uncertainty around the amount of developable land that will be available without the Endangered Species Act restrictions, and the limited zoning categories that could accommodate housing for this category, under the Land Use Element residential densities for land use designations have been increased and the range of potential uses allowed have been expanded.

HB 1220 (Chapter 254, Laws of 2021) does not require jurisdictions to plan for or accommodate housing for high-income households; data for that income range is excluded.

B. Emergency Housing

Following State Department of Commerce housing element guidance, the Thurston Regional Planning Council used a seven-step selection process in their report to identify potential emergency housing sites in Tumwater and its urban growth area.

Emergency housing includes both indoor emergency shelters and indoor emergency housing as referenced in HB 1220 (Chapter 254, Laws of 2021) and excludes permanent supportive housing, which is addressed in the land capacity analysis.

The Thurston Regional Planning Council found that there was sufficient land capacity for emergency housing in Tumwater and its urban growth area. See Table 13: Emergency Housing Capacity of Thurston Regional Planning Council's Planning for and Accommodating Housing Needs in Thurston County by Zone in Appendix C.

DRAFT

C. Area Median Income, Housing Type, & Tenure

Figure H-25 shows the relationship in Tumwater and its urban growth area between area median income, the housing allocation for each of the income groups, the housing types most affordable for the income groups, and housing tenure.

This information informs the density ranges and permitted types of residential uses in land use designations and zone districts in the Land Use Element and Tumwater's development regulations.

Figure H-25. 2045 Tumwater & Urban Growth Area Housing Need Allocation by Area Median Income, Housing Type, & Tenure.

0-30% AMI	30-50% AMI	50-80% AMI	80-120% AMI	Above 120% AMI

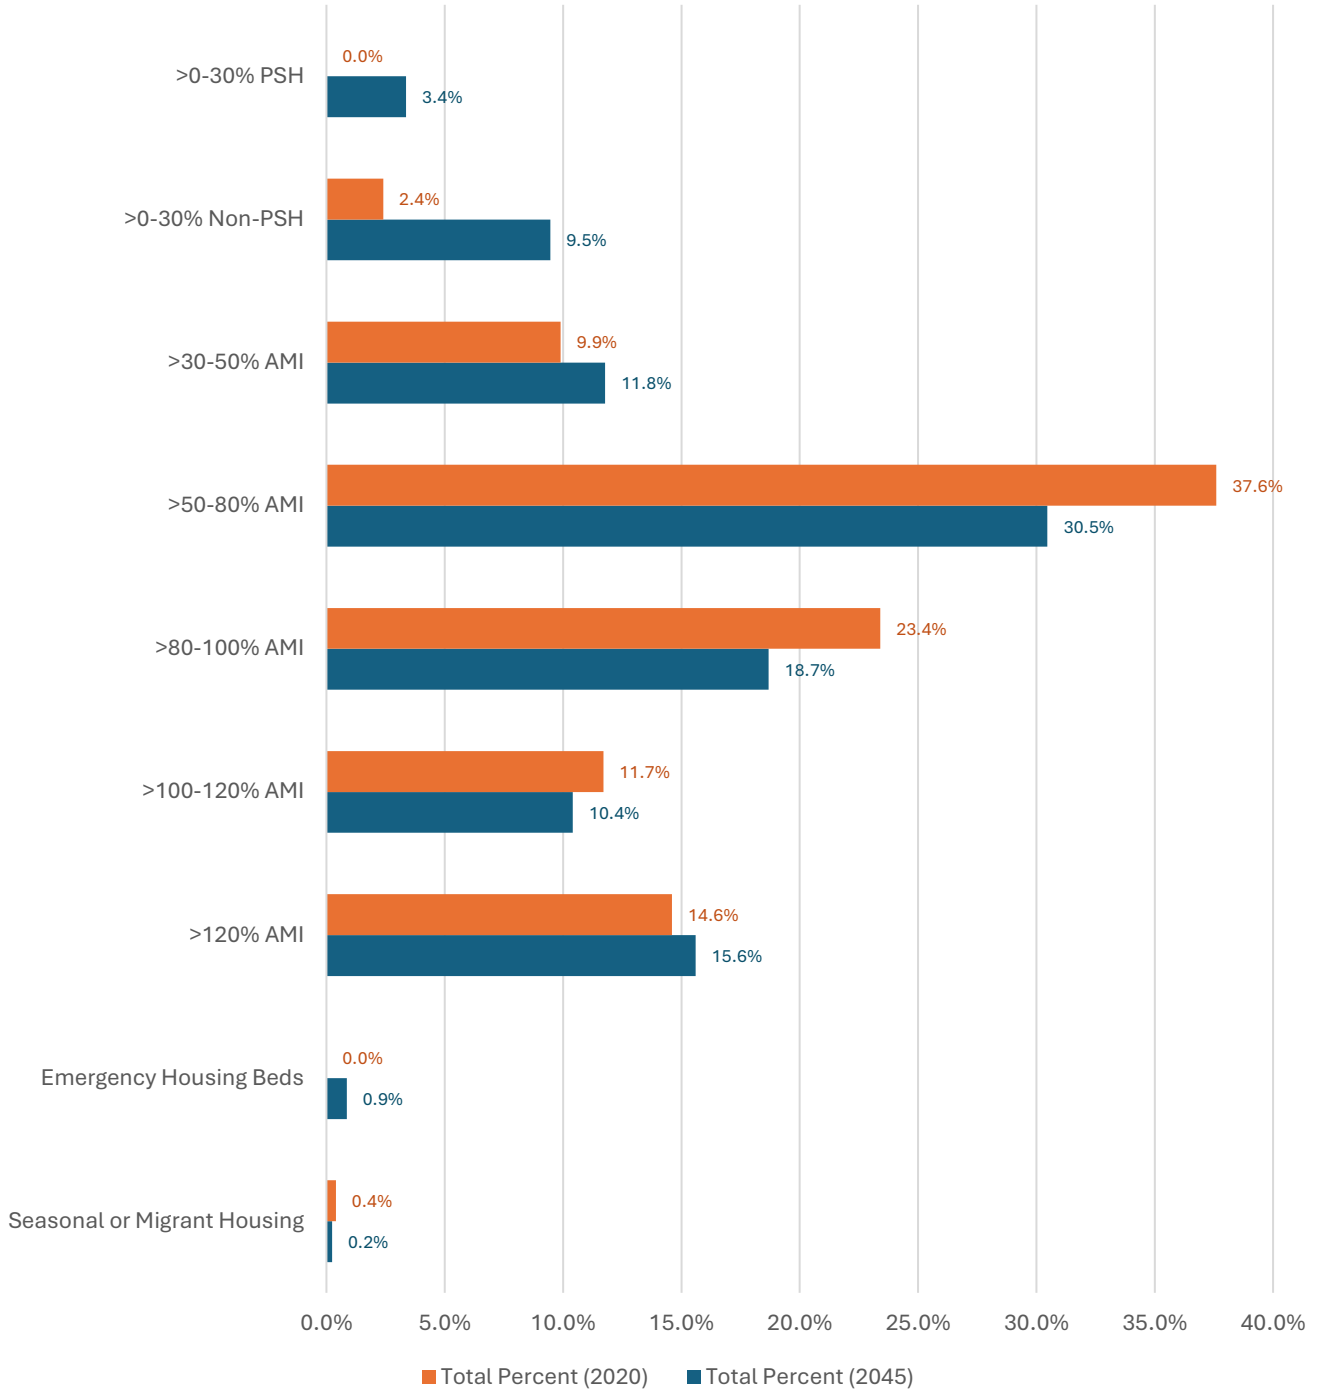
Notes: PSH is permanently supported housing and AMI is area median income. Numbers may not add to totals due to rounding.



1) Changes from 2020 to 2045

Figure H-26 and Table H-25 compare housing demand for Tumwater and its urban growth area from 2020 to 2045 for each household income type.

The primary change between 2020 and 2045 in terms of housing demand by area median income groups is a greater proportion of housing for households under 50 percent and above 120 percent and a reduction in the proportion of housing for households between 50 percent and 120 percent.

Note: PSH is permanently supported housing, AMI is area median income, and UGA is Tumwater's urban growth area.

DRAFT

2) Housing Types and Income

Not all housing types are appropriate for meeting all housing needs. New housing affordability depends partly on its type, which varies with land and construction costs per unit.

For instance, a new single-family house on a large lot is the most expensive type of home to produce per unit. New homes often need an income of over 150 percent area median income to afford. Multifamily homes, such as apartment buildings, can be produced at a much lower cost per unit.

Table H-26 lists the housing types by income level for Tumwater. It shows the lowest income level that typically can be served.

Table H-26. Housing Types with Tumwater Income Thresholds.

Income Level and Housing Type	Percent of Tumwater Area Median Income	Equivalent 2024 Household Income for a Household of Four
Extremely Low Income – Multifamily with Subsidies and/or Incentives	Less than 30%	Less than $35,000
Very Low Income – Multifamily with Subsidies and/or Incentives	30 to 50%	$35,000 to $58,350
Low Income – Multifamily with Subsidies and/or Incentives	50 to 80%	$58,350 to $93,350
Moderate Income - Middle Housing or Multifamily at Market Rate	80 to 120%	$93,350 to $116,688
Higher Income – Detached Single Family Units, Middle Housing, or Multifamily	More than 120%	More than $116,688
Permanent Supportive Housing	Subsidized, leased housing with no limit on length of stay that prioritizes people who need comprehensive support services to retain tenancy and utilizes admissions practices designed to use lower barriers to entry than would be typical for other subsidized or unsubsidized rental housing, especially related to rental history, criminal history, and personal behaviors.	

Income Level and Housing Type	Percent of Tumwater Area Median Income	Equivalent 2024 Household Income for a Household of Four
Emergency Housing	Temporary indoor accommodations for individuals or families who are homeless or at imminent risk of becoming homeless that is intended to address the basic health, food, clothing, and personal hygiene needs of individuals or families. Emergency housing may or may not require occupants to enter into a lease or an occupancy agreement.	
Emergency Shelter	Facilities that provide a temporary shelter for individuals or families who are currently homeless Emergency shelter may not require occupants to enter into a lease or an occupancy agreement. Emergency shelter facilities may include day and warming centers that do not provide overnight accommodations.	

Source: Equivalent household income for a family of four is from U.S. Department of Housing and Urban Development Income Eligibility Limits, 2025.

3) Accessory Dwelling Units

Within urban areas of Thurston County, including cities, towns, and unincorporated urban areas, the land capacity analysis projected 565 accessory dwelling units across 11,886 potential accessory dwelling unit lots. Potential lots have only one single-family unit and no additional dwellings and are located in areas platted prior to 1970.

For the land capacity analysis, Tumwater requested revisions to the accessory dwelling unit assumptions in its urban areas based on observed or expected trends. These are shown in Table H-27.

Table H-27. Estimate of Accessory Dwelling Unit Capacity in Tumwater.

	Accessory Dwelling Units		Potential Accessory Dwelling Unit Lots
	Adopted Forecast	Adjustments to Land Capacity Analysis	
City	73	No Change	1,536
Urban Growth Area	0	10	0
Total	73	10	1,536

Source: Thurston Regional Planning Council, Planning for and Accommodating Housing Needs in Thurston County, 2025.

D. Other Specific Housing Needs

The Growth Management Act requires that Tumwater provide sufficient land for government assisted housing, group homes, and foster care homes.

1) Government Assisted Housing

Government assisted housing means federal, state, local, or some combination of funding that

DRAFT

makes the housing possible. This usually takes the form of the Housing Choice Voucher program housing through the federal government or federal low interest construction loans for low-income people.

Sufficient land for residential housing ensures that sufficient land is available for government-assisted housing.

When possible, this type of housing should be located on or near public transit routes, because very often those using government assisted housing are dependent on public transportation.

2) Manufactured Housing

Manufactured housing refers to housing that is mobile in nature and permitted under federal Housing and Urban Development standards, which are less restrictive than the Uniform Building Code standards. These houses can be less expensive than conventional "stick-built" homes. Historically, these housing units looked more like trailers than houses, but this has changed dramatically.

Because of the design changes and recent housing cost increases, the Housing Element recommends continuing to allowing manufactured housing on low density residential lots as a means to open up the supply of vacant land for this use and increase housing options, which will help control prices.

3) Group & Foster Care Homes

Group homes are facilities that care for people with a variety of disabilities, including adult family homes, which make it possible for them to live with assistance. Foster care homes provide homes for children that for some reason are unable to live with their biological parents.

TMC Title 18 Zoning allows group and foster care homes as a permitted use in all zoning classifications, as required by the State of Washington. Because of these amendments, land for group and foster care facilities is provided for adequately.

DRAFT

4. Racially Disparate Impacts, Exclusion, & Displacement

A. Background

1) State Assessment Process

In 2021, the Washington State Legislature passed HB 1220 (Chapter 254, Laws of 2021) as an amendment to the Growth Management Act. The law required that Tumwater assess the racially disparate impacts of existing housing policies as part of its Comprehensive Plan update. Conditions that indicate that housing policies have racially disparate impacts include segregation, cost burden, displacement, educational opportunities, and health disparities.

According to state guidance, there are five steps to understanding and addressing racially disparate impacts:

Step 1: Engage the Community

Step 2: Gather & Analyze Data

Step 3: Evaluate Policies

Step 4: Revise Policies

Step 5: Review & Update Regulations

This chapter addresses Step 2 and Step 3. Step 1 was addressed as part of the Comprehensive Plan and Housing Element community outreach and stakeholder process. The goals, policies, and draft implementation actions that are the results of the process completed in Step 4 are found in Part 1 of the Housing Element. Step 5 is a part of the Development Code update process that occurred at the same time as the update of the Housing Element.

This chapter includes a summary of findings of Step 2 and Step 3 based on data from the U.S. Census Bureau, U.S. Department of Housing and Urban Development, and other sources. These findings in turn inform the policy evaluations and recommendations in the Housing Element.

2) Intended Results

Housing in Tumwater is the product of many forces including policies, regulations, macroeconomic changes, lending practices, costs of development, and individual preferences. HB 1220 (Chapter 254, Laws of 2021) requires that Tumwater undo policies and practices that cause racial disparities, displacement, and housing exclusion and create policies and actions to mitigate these impacts.

Examples of the effects of these policies and practices include:

- Past practices like redlining and restrictive covenants have denied many minorities and low-income households the opportunity to share in wealth building offered by homeownership, resulting in lasting racial and economic inequities seen today.
- Homeownership is out of reach of many minorities and low-income households, making these households particularly susceptible to housing insecurity and displacement caused by rising rents.
- Higher poverty rates in certain lower income and minority neighborhoods

DRAFT

have contributed to disinvestment of capital, businesses, and services from these neighborhoods.

- Compared to wealthier neighborhoods, residents in lower income and minority neighborhoods are often less engaged and less represented in local government processes and decisions that directly affect their neighborhoods and quality of life.

While all households are impacted by the higher house buying and rental costs identified in the housing needs assessment in Chapter 2, communities of color often spend more of their income on housing. They tend to live in lower quality housing and are less likely to own their homes. These communities are often more susceptible to housing shortages and rising costs.

Land use and related policies contribute to housing conditions in Tumwater as they can impact who has access to "areas of opportunity" in our communities, including access to healthy and safe environments, recreational opportunities, education, jobs, nutrition, and other basic needs. Land use decisions also shape the cost to produce housing, by defining the location, types, and sizes of housing that can be built. Most directly, land use decisions shape the cost to produce housing, and thus the affordability and accessibility of housing for different households, and, more specifically, determine if and where households can live within a community, based on their income.

Increasing housing supply and opportunity to housing, specifically at prices affordable to Black, Indigenous, and People of Color households, is one approach to reduce equity-related effects that discriminatory practices have created.

As part of the update of the Housing Element, Tumwater reviewed the history of racially disparate impacts, exclusion, and displacement, and has taken actions to begin to undo patterns of racial segregation and exclusion in housing and land use policy making. Part of this work was done in the regional Displacement Study found in Appendix E.

Tumwater's review and updates to housing and land use policies and regulations are intended to provide equitable opportunities for safe and healthy housing for all members of the community.

B. Historical Context

Throughout the history of the United States, a combination of laws and practices have determined where specific groups of people live, what opportunities they have access to, and their ability to build wealth through stable housing. Unfortunately, many of these policies explicitly or implicitly benefited white residents at the expense of all others.

The legacy of policies like redlining, which used racial criteria in determining which neighborhoods were suitable for government-backed loans and racial covenants explicitly excluding certain groups from owning specific properties continues to impact non-white communities today.

While Tumwater has acknowledged the harm of these policies, many of which are no longer legal,

DRAFT

there are still policies in effect today that hold Tumwater back from correcting these systemic harms. These can include policies that reference general concepts like "neighborhood character," as well as practices such as downzoning which resulted in exclusive single-family residential zoning in place of middle or higher density zoning that prevented the continued construction of housing types affordable across incomes.

1) Racial Covenants

This section contains a historical review of the racial covenants that caused racially disparate impacts in Tumwater as a starting point in understanding present-day conditions.

Throughout the United States, racial covenants were used to exclude certain races and religious groups from residing in specific neighborhoods, creating exclusive areas for white, Christian residents. These were legally enforceable from 1927 to 1968.

The University of Washington Racial Restrictive Covenants Project mapped and documented neighborhoods in Washington state where racial restrictive covenants were imposed in the decades when they were legal.

Most restrictions in Thurston County date from 1928 to 1955 and covered a large percentage of subdivisions developed in that period. The project documented more than 1,600 restricted properties in 35 subdivisions in Thurston County. Table H-28 shows the subdivisions or plats identified with racial restrictive covenants in Tumwater.

Table H-28. Subdivisions or Plats with Historical Racial Restrictive Covenants in Tumwater.

Subdivision or Plat	Date Approved	Properties Covered	Document Type

Source: https://depts.washington.edu/covenants/map_restrictions_thurston.shtml, Racial Restrictive Covenants Project Washington State, 2025.
Note: [1.] Partly in Tumwater and partly in Olympia.

Neighborhoods without covenants often practiced racial exclusion by other means. 1940, Thurston's population of 37,285 included only 33 Black people and 315 other nonwhites, including members of the Nisqually nation. As the population increased to 55,049 by 1960, the

proportion of 690 non-white residents remained miniscule and exclusionary practices ensured that Thurston County remained 98.7 percent white.

C. Communities of Interest

The population of Tumwater has changed from 81.5 percent White in 2013 to 74.6 percent White in 2023, as shown in Table H-34, The percentage White residents has been dropping since 1970 as the population has become more diverse over time.

Table H-29 shows the number and percentage for each race and ethnicity in Tumwater and Thurston County and Tables H-30 and H-31, and Figures H-27 and H-28 show the change in Tumwater and Thurston County from 2013 to 2023.

Tumwater and Thurston County are both become more diverse and share similar population percentages for individual groups, with Tumwater having slightly higher percentage of White and Black or African Americans and smaller percentage of Asian and those of Hispanic or Latino ethnicity.

Among Black, Indigenous, and People of Color residents, the largest groups in Tumwater in 2023 are those who identify as Two or More Races at 12.6 percent followed by Hispanic or

Latino residents of any race which make up 9.1 percent of the population.

Note that many people with native ancestry identify as two or more races. Tumwater has three tribal communities: the Nisqually Indian Tribe, the Confederated Tribes of the Chehalis Reservation, and the Squaxin Island Tribe.

D. Racially Disparate Impacts

1) Poverty Level

Tables H-32 and H-33 show the percentage of race and ethnic groups below the poverty line in Thurston County and Tumwater as individuals and as households. While there is a margin of error in the survey data, it is apparent that some race and ethnic groups are doing less well than others relative to the overall County numbers, notably Black or African Americans in Tumwater, while others, such as Asians, or those of Hispanic or Latino origin of any race are doing better.

Table H-32. Percent Below Poverty Level of Individuals by Race or Ethnic Origin in Tumwater and Thurston County, 2023.

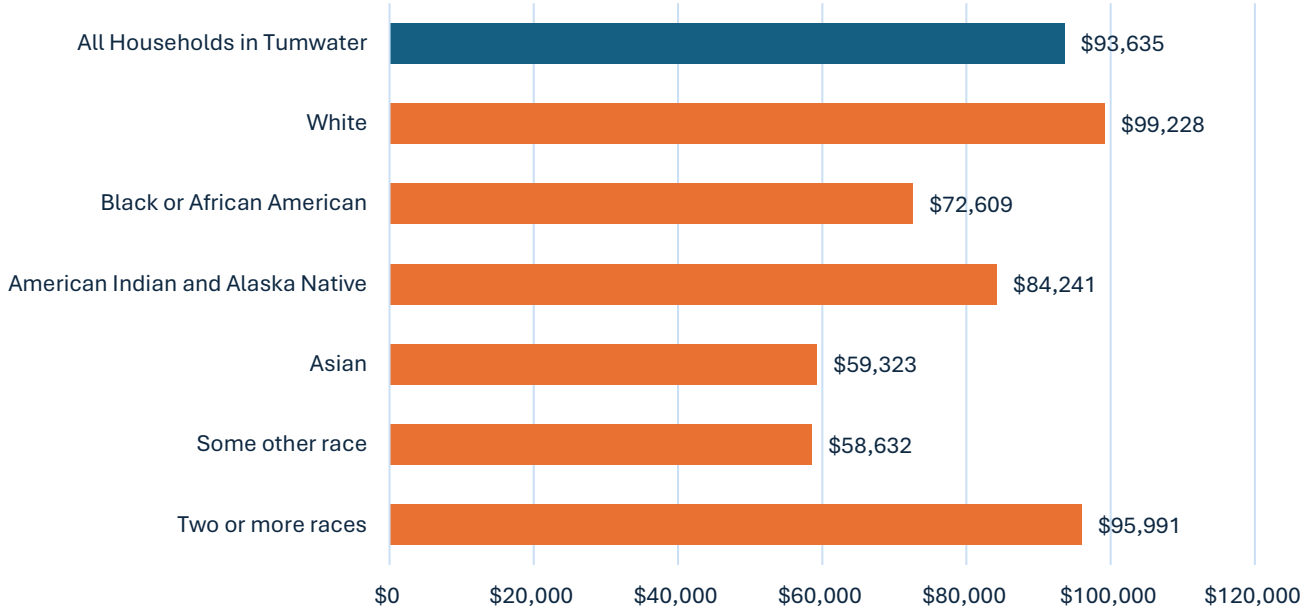
Notes: N/A means no data was available. The grouping of households by race or ethnicity is based on the racial and ethnic status of the householder, or the person in whose name the home is owned or rented.

2) Disparities in Household Income

In Tumwater, Black, Indigenous, and People of Color households earn less than Thurston County and White alone averages.

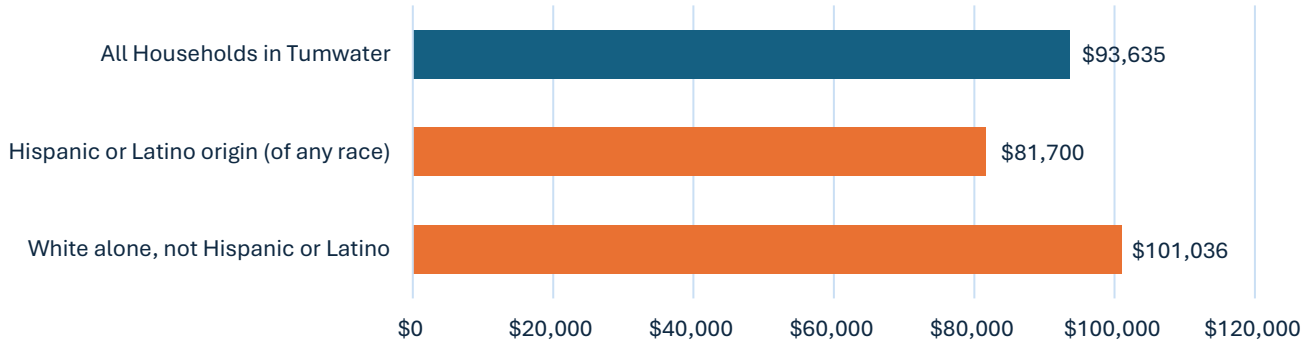
Figure H-29 combines the percentage of Tumwater's Black, Indigenous, and People of Color Households with an income below poverty level with the Tumwater Opportunity Index.

Figure H-29. Percentage of Black, Indigenous, and People of Color Households by Census Block Groups & the Tumwater Opportunity Index.



Sources: Tumwater Transportation and Engineering Department and 2020 Decennial U.S. Census.

Figures H-30 and H-31 and Table H-34 show the median income by race and ethnicity in Tumwater.



White alone households, not Hispanic or Latino, have the highest median income. They are followed by American Indian, Alaska Native, Hispanic and Latino, Black or African American, and Asian households. Some other race households have the lowest median income.

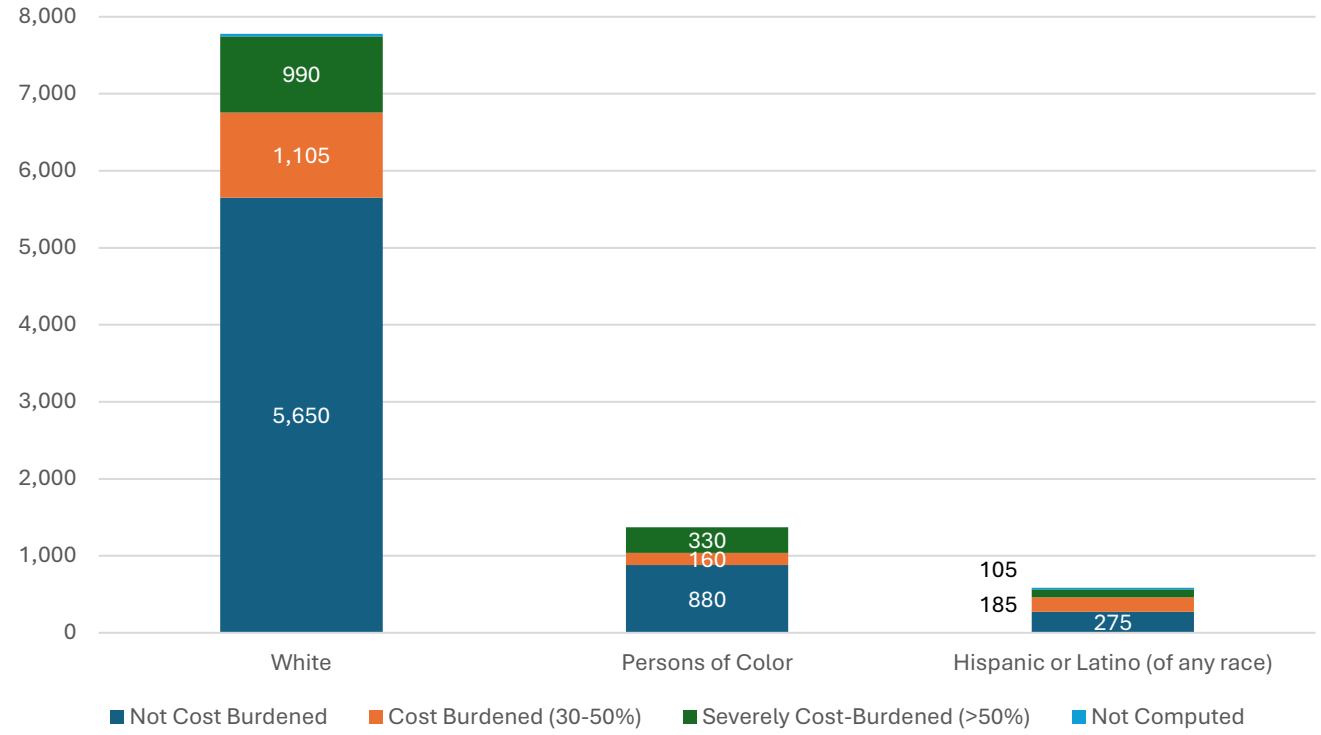
White alone, not Hispanic or Latino	8,292	76.30%	$101,036	89,469	74.70%	$95,802

Source: 2023 U.S. Census American Community Survey 5-Year Estimates, Table S1903.
Notes: N/A means no data was available. The grouping of households by race or ethnicity is based on the racial and ethnic status of the householder, or the person in whose name the home is owned or rented.



3) Housing Cost Burden Disparities

Households with lower incomes are more likely to experience housing affordability challenges. Analyzing housing cost burdens by race and ethnicity reveals systemic disparities in housing affordability. These may come from discrimination, segregation, and unequal access to economic opportunities among different racial and ethnic groups.

Figure H-32 shows the housing cost burden as a percent of household income by racial and ethnic groups in Tumwater.

DRAFT

4) Disparities in Homeownership

In Tumwater, 60.1 percent of White and 75.6 percent Asian households own their homes. Homeownership is much lower for Black or African American (5.9 percent) and Hispanic or Latino (26.5 percent) households.

E. Exclusion

Exclusion means shutting out certain populations from housing in a specified area. This can be intentional or unintentional. It leads to non-inclusive impacts. One important indicator of exclusion is.

This can be seen in patterns of housing types as well as housing units that are owned or rented. While there are not clear neighborhood boundaries for racial or ethnic segregation in Tumwater, there is evidence to suggest in Tumwater that there is racial or ethnic segregation based on income and housing types after considering the margins of error in the data.

F. Displacement Risk

Displacement happens when a household is forced to move from its community due to things beyond their control. The Washington State Department of Commerce defines three types of displacement:

- **Economic Displacement:** Residents must move because of rising rent, property tax, or other costs.
- **Cultural Displacement:** Residents must move because their cultural community has left.
- **Physical Displacement:** Residents must move because of eviction, foreclosure, natural disasters, or poor housing quality.

1) State Requirements

The Growth Management Act requires Tumwater to assess displacement risk and to establish policies and regulations to mitigate displacement risk. A household is considered displaced if its place of residence is disrupted due to forces outside of its control and it is unable to find suitable replacement housing in the neighborhood.

Displacement risk analysis should inform land use policymaking to encourage redevelopment and reinvestment in existing neighborhoods while ensuring that existing neighborhood residents share in benefits of that redevelopment and reinvestment.

While a data-driven displacement risk analysis such as this demonstrates where there is an increased risk of displacement, community engagement with neighborhood representatives to confirm that the data analysis adequately reflects local experience is important.

2) Displacement Risk Analysis

The Housing Displacement Risk Analysis for the Cities of Lacey, Olympia, Tumwater, and Yelm in Appendix E analyzed the housing displacement risks in Tumwater.

The report analyzed historical policies, current trends, and community dynamics to arrive at actions that Tumwater can take to enhance housing security and promote equitable living conditions. The development of the analysis was informed by engagement with community stakeholders.

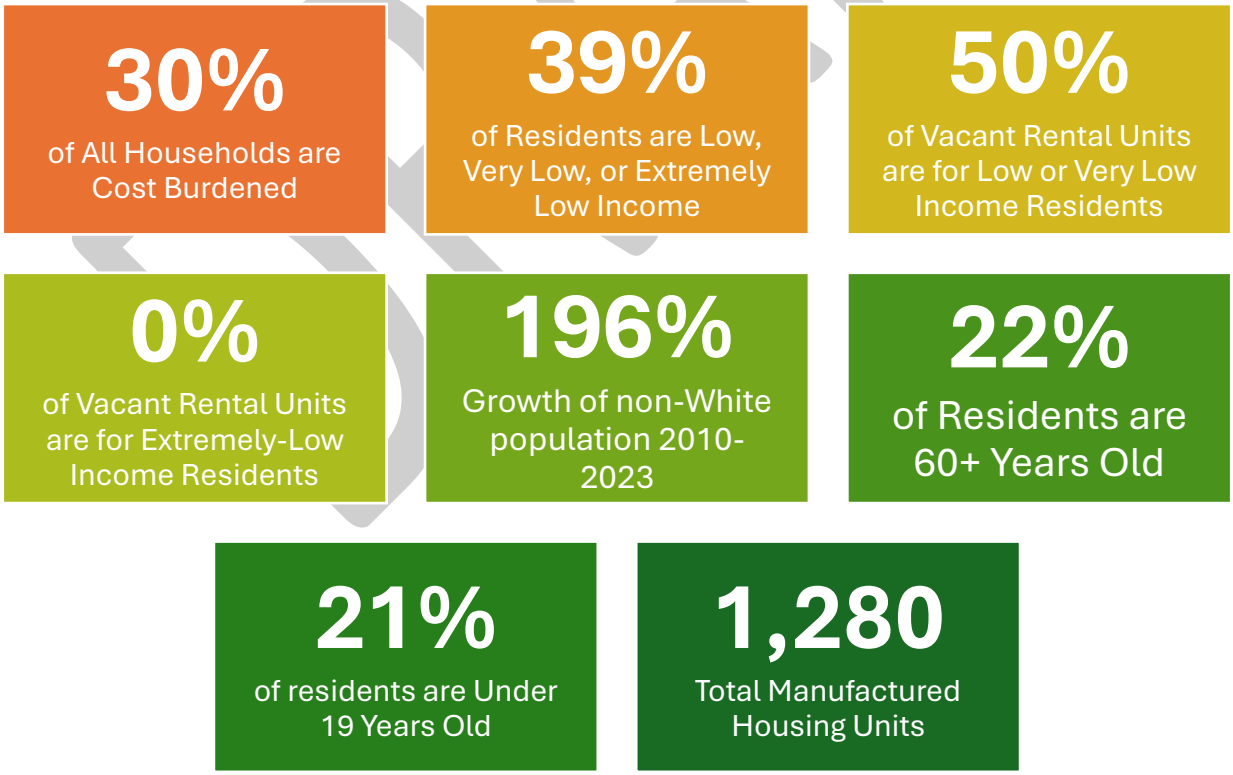
The Housing Displacement Risk Analysis focused on three areas in Tumwater:

1. Describing the populations at risk of housing displacement.
2. Evaluating the housing displacement risk metrics.
3. Outlining risk reduction policy avenues.

Economic displacement was the most prominent displacement risk identified in the report in Tumwater. According to the report, Tumwater's economic displacement risk is

DRAFT

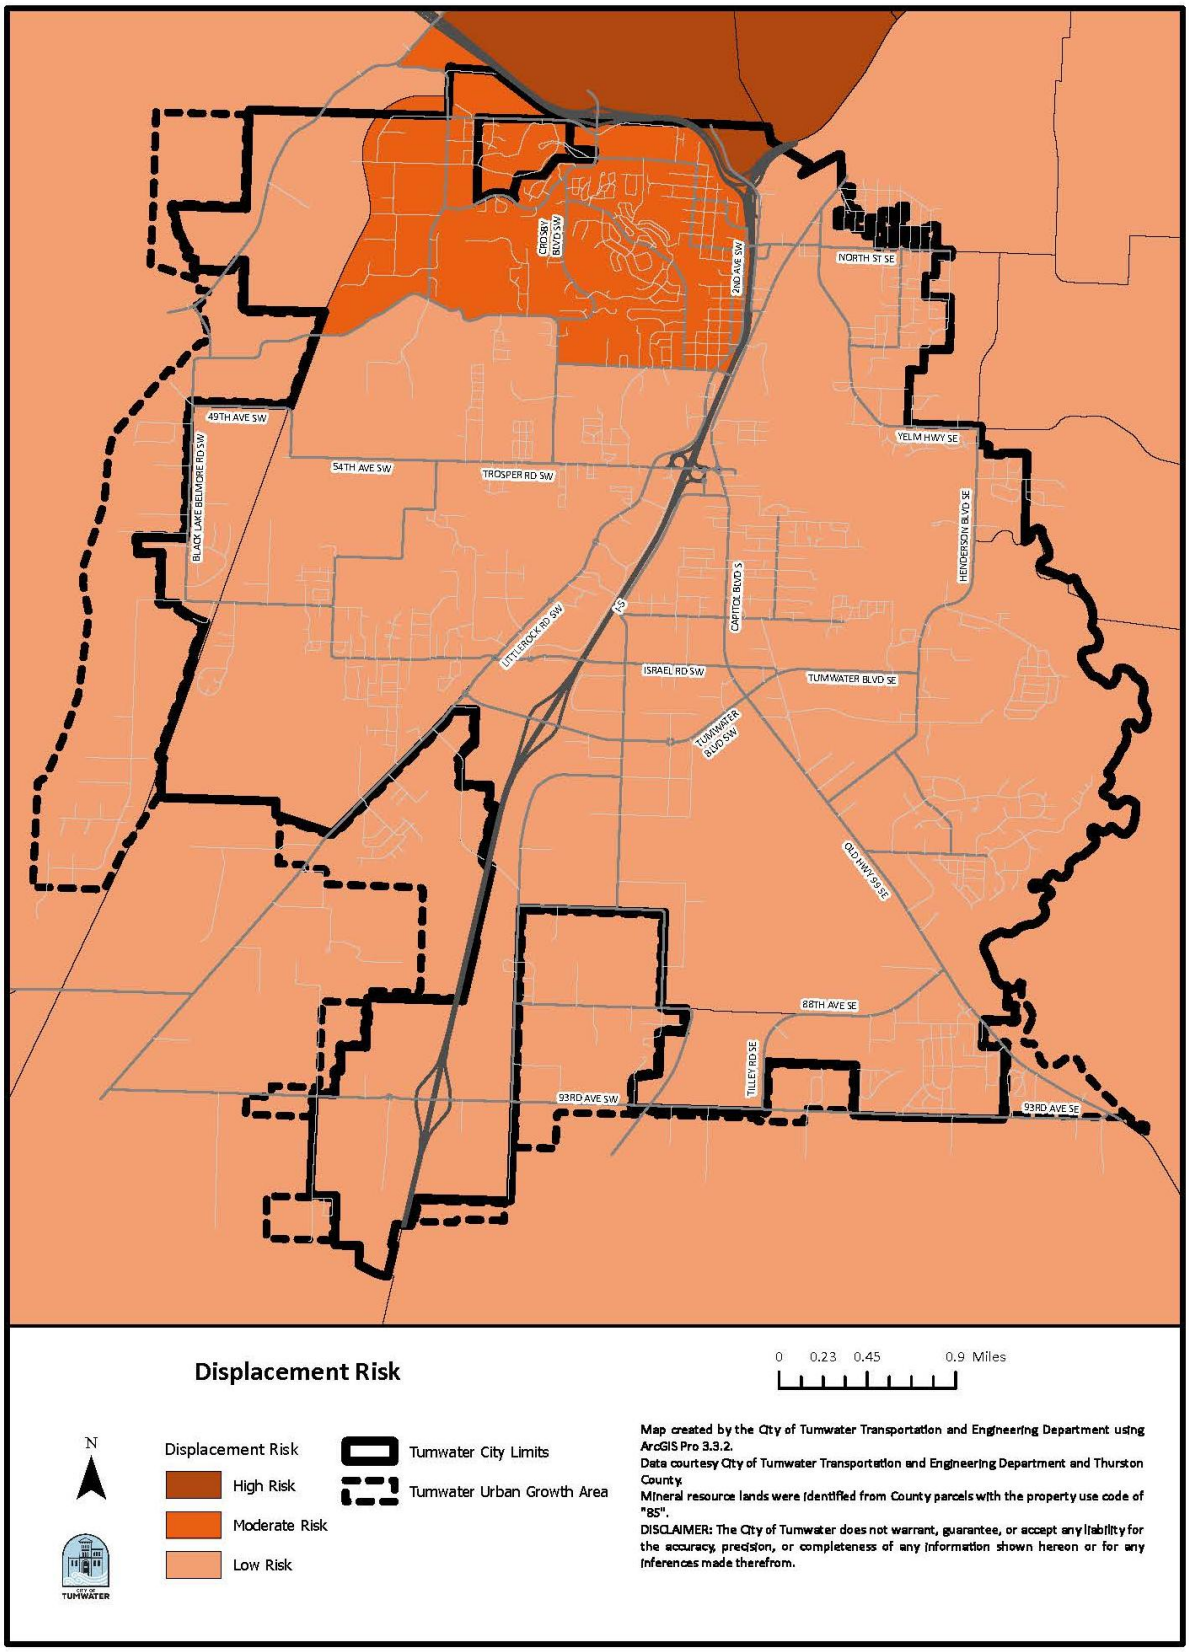
characterized by the reciprocal relationship of subtle loss of low and middle-income renters with a significant lack of affordable housing for the lowest-income segments of the population.



According to available data Tumwater's population experienced:

- **Little to no change in relative racial and ethnic diversity** among residents between 2010 –2023;
- A relative **decrease in cost-burdened households** for renters and homeowners between 2015–2019 and 2017–2021
- A **relative decrease in the availability of affordable rental units for very-low-income households** (earning between 30% and 50% AMI).
- A **general decrease across most income categories for renters and homeowners** except for above median income households between 2015-2019 and 2017-2021
- An **increase in overall homeowner households** and a **slight decrease in renters**.

3) Tumwater Populations at Risk



Tumwater has experienced a significant growth in population diversity accompanied by an increase in income variability where four in ten residents are low, very low, or extremely low-income. Figure H-36 shows some of the demographic information related to that analysis.

Figure H-36. Demographics of Housing Displacement Risk in Tumwater.

Source: Housing Displacement Risk Analysis for the Cities of Lacey, Olympia, Tumwater, and Yelm, 2025.

Figure H-37. State Department of Commerce Draft Displacement Risk Map.

4) Policies to Reduce Housing Displacement

The Housing Displacement Risk Analysis identified the following policy avenues to reduce housing displacement risk in the Housing Element:

- A Community Land Trust style program for mobile home communities.
- A Tumwater program to support private, local, small scale ownership of mobile home communities. This builds on the Tumwater's mobile home housing stock and helps to preserve existing affordable stock.
- Increased staffing capacity to process accessory dwelling units quickly and reduce costs under Tumwater's control.

The following additional policy areas will be considered in the Housing Element to address displacement:

- Increasing homeownership opportunities for BIPOC communities to promote equity and help generational wealth.

5) Policy Evaluation Criteria

The Housing Displacement Risk Analysis proposed the following criteria to evaluate Housing Element policies:

- Does the policy encourage the preservation of naturally occurring affordable housing such as manufactured home parks and other existing affordable units?
- Does the policy incentivize and support the development of affordable and deeply affordable housing?
- Does the policy encourage adaptive reuse of existing residential units or other buildings where feasible?
- Does the policy incentivize or reduce barriers to developing diverse housing types including smaller homes?

G. Policy Evaluation

Based on the analysis in the sections above, there is a need for improvements to policies in Tumwater to reduce racially disparate impacts. Based on guidance provided by the Washington State Department of Commerce, Appendix F Policy Evaluation Matrix includes an analysis of drafts of new Housing Element and adopted Housing Action Plan policies to determine whether they reinforce historical patterns of segregation, displacement, and inequitable outcomes.

Taking a proactive approach in shaping policy to address these challenges will benefit all community members as Tumwater seeks to build a more equitable future.

DRAFT

5. Housing Provisions

The Growth Management Act requires that Tumwater identify provisions for existing and future housing needs.

Chapter 5 summarizes the provisions identified for addressing the housing needs identified in the Housing Element.

A. Protection of Existing Housing Stock

One of the most important methods to maintain an adequate supply of housing is to retain existing housing. The existing housing stock in Tumwater is in good condition.

Policies to protect the quality of existing neighborhoods and encourage maintenance and improvement of the housing stock are addressed in the goals, policies, and implementation actions in Part 1 of the Housing Element.

B. Low & Moderate Income Provisions

There is increasing demand in Tumwater for affordable housing serving those with incomes under 80 percent of area median income. Federal, state, and local funding for both the construction of new units and subsidies for residents to live in these types of housing and related services is limited.

It is difficult for the private sector to build these types of housing and make a profit and for the public sector to obtain the funding needed for construction and ongoing rental supports, maintenance, and other support services.

Low and moderate income households have a variety of needs in addition to the provision of adequate shelter. Of course, lack of adequate shelter is usually foremost among a multitude of needs. Having this exceedingly small income makes obtaining shelter difficult.

In addition, there are many reasons for this low income status, such as mental and physical challenges that require assistance. This assistance is typically provided through public and private human service agencies. The most effective way for Tumwater to assist the needs of low income people in the Tumwater community is through funding assistance to established human resource agencies.

C. Employment & Unemployment

Employment quantity and quality are important considerations when considering housing affordability. The availability of jobs that pay a wage adequate to enable people to afford housing is of paramount importance. The Land Use Element addresses the adequate provision of land for employment and their physical relationship to housing the Tumwater.

The unemployment rate is important for the obvious reason that unemployed people have a challenging time obtaining and retaining housing. Unemployment trends in Thurston County have closely mirrored national unemployment figures.

DRAFT

D. Local Funding Assessment

The provision of affordable housing for all economic segments of the Tumwater population is primarily a function of private enterprise with a limited role for public agencies, such as Tumwater, and nonprofits.

The City Council undertook a significant effort from September 2018 to May 2019 to develop Affordable Housing Work Plans to be used in making informed decisions when prioritizing actions to implement Resolution No. R2018-016, including the adoption of a Housing Action Plan in 2021. Since 2018, Tumwater has pursued a number of options to support local funding for affordable housing projects to implement the resolution.

1) Local Financing

Local funding from cities and Thurston County mostly takes the form of local matching funds to federal or state funding programs. In addition to this, however, Tumwater does have some limited local options for financing public housing and related social service programs. These include:

- Use of general funds to provide grants and loans to service organizations through regional partnerships.
- Use of general funds for direct funding of housing and social service programs through contract with Tumwater.
- Under RCW 84.54.105, Tumwater also has the option of asking voters to support an excess property tax levy of up to 50 cents per $1,000 valuation to support affordable housing and related programs.

2) Regional Housing Council

To meet the City Council's goal of exploring regional solutions to homelessness and affordable housing issues in Resolution No. R2018-016, in 2020 Tumwater worked with the other jurisdictions in the Thurston County to approve an interlocal agreement to set up the Regional Housing Council, which took over the former role of Health and Human Services Council and added other tasks.

The primary purpose of the Regional Housing Council is to leverage local resources and partnerships through policies, funding, and projects that promote fair access to safe and affordable housing.

The Regional Housing Council considers issues specifically related to funding a regional response to homelessness and affordable housing and coordinating existing funding programs. These programs may include RCW 36.22.179 (ESSHB 2163) and RCW 36.22.178 (SHB 2060) funds, HOME Investment Partnership Program (HOME), Consolidated Homeless Grant, Housing and Essential Needs, RCW 82.14.540 (SHB 1406), Community Development Block Grant and other related funding sources such as a regional home fund to help implement the five-year Homeless Crisis Response Plan and increase affordable housing options.

The Regional Housing Council assists in monitoring the implementation of the County's five-year Homeless Crisis Response Plan and sets priorities and makes funding decisions on

DRAFT

projects and programs that implement the Homeless Crisis Response Plan.

Two Tumwater City Councilmembers sit on the Regional Housing Council. Tumwater has committed 0.25 FTE annually in City staffing to Regional Housing Council work as well as pooling its local funding including, but not limited to, ESHB 2163, SHB 2060, ESSHB 1277, Consolidated Homeless Grant, Housing and Essential Needs, SHB 1406, Human Services Fund, County Home Fund, Olympia Home Fund, and other related funding sources as may be identified or created in the future to the extent allowed by federal and state law.

In 2019 the State Legislature passed Substitute House Bill 1406 which allows Tumwater to impose a local state-shared sales and use tax to fund affordable or supportive housing. The consumer does not pay this tax, and the effective sales tax rate remains the same. Instead, this tax is credited against the 6.5% state sales tax.

Depending on Tumwater's population, funds from this tax must be used for the following:

- Acquisition, rehabilitation, or construction of affordable housing.
- Funding the operations and maintenance costs of new units of affordable or supportive housing, or
- Provide rental assistance to tenants.

Tumwater allocates to the Regional Housing Council a minimum annual amount equal to not less than one half of one percent of the last full year of general sales and use taxes pursuant to RCW 82.14.030(1) to Home Service Funds for projects, programs, and activities providing direct support to the region's most vulnerable residents.

3) Multifamily Tax Exemption Program

The state's multifamily property tax exemption program (Chapter 84.14 RCW) provides opportunities for cities and counties to encourage the development of multifamily housing in designated areas. When originally codified by the state in 1995, the program focused on economic development and the creation of new multifamily housing. Over time, the program became an important tool to support the development of affordable housing and implementation of the goals of the Growth Management Act.

The program is intended to encourage the construction of new, rehabilitated, or converted multifamily housing within designated areas. It is limited to multifamily housing developments with four or more housing units.

Tumwater's multifamily property tax exemption program serves multiple purposes. It is an economic development tool identified in Tumwater's Brewery District Plan and Capitol Boulevard Corridor Plan to spur private investment for redevelopment of these areas. In addition, it is one of the many tools identified in the Tumwater Housing Action Plan to support the development of more affordable housing in specific areas of Tumwater served by transit.

In 2017, the City Council adopted the Multifamily Housing Tax Exemption program to stimulate desired housing development within key areas of Tumwater, such as the Brewery District and Capitol Boulevard Corridor. The Multifamily Housing Tax Exemption program includes both an eight-year exemption for providing multifamily

DRAFT

housing in the designated areas and a twelve-year exemption for development providing a minimum of 20 percent of units designated for low or moderate-income households.

In 2019, the City Council approved expanding the Multifamily Housing Tax Exemption program to the Town Center and Littlerock Subarea for just the twelve-year exemption to encourage the development of permanent affordable housing.

4) Community Development Block Grant

Starting in 2015, Thurston County became an Entitlement County pursuant to federal Community Development Block Grants funds. In accordance with a memorandum of agreement with Thurston County, Tumwater shared the annual Community Development Block Grant funding on a three-year rotation with south Thurston County and City of Lacey through 2024. Tumwater had funds in 2015, 2018, 2021, and 2024. In 2018, 2021, and 2024, the City Council prioritized the use of between $826,909.73 and $1,081,622.09 of Community Development Block Grant funds for projects that support affordable housing for Tumwater residents.

5) Development Fees

In 2021, the City Council adopted housing fee amendments as part of Tumwater's annual fee resolution to reduce development fees, water connection charges, and park and transportation impact fees for permanently affordable housing developments. These fee reductions have been expanded to include accessory and middle housing dwelling units as well as smaller single-family housing types.

In addition, Tumwater participates in LOTT's Affordable Housing Support Connection Fee Exemption program. The program provides 50% rebate on LOTT connection fees for projects with 100% affordable units for households with incomes at or below 80%. Projects must be 100% affordable to households with incomes at or below 80% AMI. A restrictive covenant is required.

6) Franz Anderson Project

In 2022, the City Council agreed to provide funding for the Franz Anderson permanently supportive housing project in the City of Olympia, which would result in affordable long-term housing and serve as a public benefit. The City of Olympia, with assistance from Tumwater and the other members of the Regional Housing Council, had been working on a permanently supportive housing project on Franz Anderson Road SE in Olympia near the Interstate 5 Pacific Avenue interchange.

In December 2022, the City Council discussed allocation of Tumwater's $550,000 of American Rescue Plan Act (ARPA) housing funds. The City Council assigned $275,000 to the Franz Anderson Permanent Supportive Housing Project. During 2023, Tumwater's ARPA funds were assigned to other projects, so the $275,000 allocation came from Tumwater's General Fund.

The City Council approved the letter of commitment to the City of Olympia for funding in May 2023 and in December 2023 approved an Interlocal Agreement with the City of Olympia to transfer the funds.

DRAFT

7) CHiP Grant

In 2023, the City Council determined it to be an equitable choice to support an affordable housing project in City, which would result in affordable long-term housing and serve as a public benefit.

South Puget Sound Habitat for Humanity, with assistance from Tumwater in preparing the application, was awarded by the Washington State Department of Commerce a Connecting Housing to Infrastructure Program (CHIP) America Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds federal grant of $726,000 to offset utility infrastructure costs for the Tâlícn Townhomes project on 73rd Avenue SE. Tumwater entered into a Capital Agreement with the Department of Commerce for the grant and managed the grant through an Assignment of Agreement.

8) Tumwater Inn

In December 2022, the City Council discussed allocation of Tumwater's $550,000 of American Rescue Plan Act (ARPA) housing funds. The City Council assigned $275,000 for a potential hotel conversion project in Tumwater for 24 affordable permanent housing units for seniors. During 2023, Tumwater's ARPA funds were assigned to other projects, so the $275,000 allocation came from Tumwater's General Fund.

In January 2023, the City Council supported a grant application from the Housing Authority of Thurston County to convert the Tumwater Inn and Suites on Capitol Boulevard into permanent affordable senior housing. The Housing Authority of Thurston County was successful in receiving the grant award from the Washington Department of Commerce.

The $275,000 assigned by Tumwater was used for testing and mitigation of asbestos, lead, and mold, and relocation costs for current residents as required by RCW 8.26. The City Council confirmed continued support of the project including relocation costs from Tumwater's allocation in June 2023. All projects must benefit low-and-moderate income persons.

9) Housing Funding Gap Tools

As discussed in the sections above, Tumwater has a number of tools to help to address affordable housing funding gaps, including revenue sources and incentives to reduce costs for developers. While most affordable housing funding comes from state and federal sources, there are limited opportunities for Tumwater to seek to reduce the costs for all housing needs, while also meeting its obligations to provide fire, police, and emergency services, transportation, and other services to the community.

Tumwater has implemented these tools to generate revenue for affordable housing:

- Community Development Block Grants. Tumwater renewed its Memorandum of Agreement with Thurston County in 2024 for another three year cycle of funding. Tumwater's next funding cycle is 2026 and is expected to use that funding to support affordable housing projects.
- Affordable housing property tax levy (RCW 84.52.105). From July 1, 2023,

DRAFT

through June 30, 2024, Tumwater collected $63,703.51.[4]

- General sales and use taxes pursuant to RCW 82.14.030(1) to Home Service Funds. Part of the work Tumwater is doing with the Regional Housing Council discussed above.
- Application fee waivers for affordable housing projects (RCW 36.70A.540). Discussed above.
- Impact fee waivers for affordable housing projects (RCW 82.02.060). Discussed above.
- Housing and related services sales tax (RCW 82.14.530). Part of the work Tumwater is doing with the Regional Housing Council discussed above.
- Multifamily tax exemption program (RCW 84-14.010). Under TMC 3.30.130 applications for the multifamily housing tax exemption program will not be accepted after December 31, 2026, and applications for final certificate of tax exemption will not be accepted after December 31, 2029. The multifamily housing tax exemption program is set to expire March 31, 2042. In 2026, Tumwater will do an evaluation of the multifamily housing tax exemption project and changes in state law since 2019 to determine if it will extend the program and add additional options.

Some additional tools that Tumwater can use to reduce the cost of affordable housing production include:

- Pursue grants for affordable housing. Ongoing work program item.
- Make infrastructure investments for infill areas needing upgrades with emphasis on areas where housing affordability is most likely to occur. Part of Tumwater's Housing Affordability Fee Work Plan, which was approved May 28, 2019, and Housing Action Plan approved 2021. Work needs to be done as part of Tumwater's biennial budget to fund and implement this program.
- Donating surplus public lands for affordable housing projects (RCW 39.33.015). Tumwater has evaluated its properties for potential surplus opportunities since 2018; however Tumwater has not identified any potential opportunities.
- Lodging Tax (RCW 67.28.150 and RCW 67.28.160) to repay general obligation bonds or revenue bonds. Option to be evaluated.
- REET 2 (RCW 82.46.035). Option to be evaluated.
- Treatment Sales Tax (RCW 82.14.460). Option to be evaluated.

10) Estimating Local Funding Gap

As noted in the introduction to this section, the provision of affordable housing for all economic

[4] Source: Affordable and Supportive Housing Sales and Use Tax – Collection and use of revenue: Annual report on the collection and use of revenues pursuant to RCW 82.14.540(11).

DRAFT

segments of the Tumwater population is primarily a function of private enterprise with a limited role for local public agencies, such as Tumwater.

The methodology for estimating affordable housing funding gap found in State Department of Commerce's Guidance for Updating Your Housing Element was used to roughly estimate the gap in funding associated with capital costs for new affordable housing development. It does not include operational or social services costs, nor does it address emergency housing. Based on recent experience with affordable housing and emergency housing projects through the Regional Housing Council, those costs can be substantial.

1) **Total annual affordable housing units needed**: Based on Table H-18: Housing Need Allocation for Tumwater, 2020-45, the total number of dwelling units needed for affordable housing for the 0%-80% Area Median Income in Tumwater and its urban growth area is 5,694 dwelling units. Based on the 20 year Comprehensive Plan planning period that is 285 dwelling units annually.

2) **Average annual units produced**: The recent annual affordable housing production in Tumwater and its urban growth area is approximately ten dwelling units developed in Tumwater and its urban growth area with support of local, state, federal or nonprofit funding or financing.

3) **Gap in annual affordable housing production**: The gap between the 285 dwelling units needed annually for affordable housing for the 0%-80% Area Median Income in Tumwater and its urban growth area and the average annual production of approximately ten dwelling units developed in Tumwater and its urban growth area is 275 dwelling units.

4) **Gap in funding**: Multiplying the 275 dwelling units needed annually for affordable housing for the 0%-80% Area Median Income in Tumwater and its urban growth area by the inflation adjusted cost per unit cost of $260,916 for projects using low-income housing tax credits from Washington State Housing Finance Commission data from 2022 is $71,751,900 annually or $1,435,038,000 over the 20 year Comprehensive Plan planning period.

Since 2022, construction costs and interest rates have been increasing, and the funding gap is expected to grow during the 20 year Comprehensive Plan planning period. The methodology also does not consider rents paid by tenants that can offset the total amount of public subsidy needed.

It is difficult to fill gaps in the web of service provision to low and moderate income groups at the local level through public action. Funding for low and moderate income families in Tumwater must compete with all services provided by Tumwater, such transportation, police, and fire.

It is important to note that the $71,751,000 needed annually for affordable housing for 0%-80% Area Median Income in Tumwater and its urban growth area exceeds what Tumwater expects to collect annually from property, sales, and business & occupancy taxes which are the primary sources of local general government funding for police, fire, transportation, parks, and community development. Tumwater would only

DRAFT

be able to cover a small fraction of those costs, while reducing other services.

While direct public action can fill some of the gaps in affordable housing, these broader societal issues cannot be solved by Tumwater alone. Additional efforts will be needed at regional, state, and federal levels to provide the funds to make progress in the underlying causes of lack of affordable housing.

E. Regulatory Barrier Assessment

1) Introduction

The Growth Management Act (RCW 36.70) seeks to control growth by channeling it into urban growth areas in order to provide more orderly and efficient service provision and to reduce sprawl. The Act also specifically authorizes charging impact fees in order to offset the costs of new development.

The Growth Management Act requires that Tumwater ensure that its Comprehensive Plan policies and regulations allow for housing availability for all members of the community at all income levels. Tumwater has reviewed and updated its Housing Element to address the issues identified through the update process.

A number of local, state, and federal regulations make housing more expensive. These regulations are designed to make housing safer or address other community concerns such as climate change. However, there are instances where the benefit received from a particular regulation may not be worth the corresponding cost.

This section of the Housing Element focuses on those regulations under Tumwater's control and will recommend changes to certain regulations in order to promote affordable housing. There are also state and federal regulations that may increase the cost of housing that may be influenced by Tumwater working cooperatively with other jurisdictions and partners to address.

2) Community Perceptions

For a variety of reasons, the community remains concerned about the fast rate of growth in the Puget Sound region.

Community members have opposed projects during the permitting process that would increase the supply of housing, thus tending to drive housing costs higher. While these housing applications are often ultimately approved, they are often approved with additional conditions and time delays.

In some instances, these delays and conditions can make it unfeasible to proceed with the project or at least drive up project costs and subsequent rents or housing costs. Depending upon your point of view, these conditions could be perceived as a vital step in the process, or of little or no value.

3) Permitting

The Community Development Department is a full service, one stop department, composed of planners, engineers, and building and fire inspectors. The department guiding applicants through the approval process and responding quickly to development requests.

DRAFT

While a slow permitting process can add to housing costs, research of permit application history in Tumwater has shown that the average permit processing time is very good. Those that require public hearings are inherently more time consuming than those that do not. Similarly, a more straightforward application, such as a single-family house on a lot of record, is much simpler and less involved than a 50-lot subdivision and associated construction permits.

Tumwater has taken major steps to streamline the development process while taking the views of community members into consideration. The most significant single action taken in this regard was the implementation of a hearing examiner system.

Tumwater has employed a hearing examiner to conduct hearings and make decisions on all discretionary land use permits, such as rezones, conditional use permits, and preliminary plats. The hearing examiner considers the staff report, public hearing testimony, environmental information, and the site itself to issue a decision based on applicable policies and codes. This process allows a more objective approach to site specific land use decisions, which reduces time delays and costs.

In addition Tumwater updated its development review code in 2024 to meet State permitting requirements and expanded the range of State Environmental Policy Act exemptions as allowed by the State to reduce duplicative permit review processes.

4) Infrastructure

Development standards, adopted through the Tumwater Development Guide Manual, set standards for various road, water, and sewer projects. For example, a residential subdivision is required to install water and sewer lines of a certain type and dimension. Likewise, roads and sidewalks are required to be a certain width, and so forth.

Alternate street designs are allowed under the Tumwater Development Guide Manual, which is based on guidance provided in the National Association of City Transportation Officials, Urban Streets Design Guide, and by other organizations. These optional design methods for Neighborhood Collector and Local Residential Streets allow reduced right-of-way widths, which should reduce development costs while improving the human scale of neighborhoods.

5) Zoning Code

Zoning regulates the use of land through controls on density, lot sizes, setbacks, storm water management, and the placement and mix of residential, commercial, and industrial uses. Zoning codes have been used since the late 1800s to ensure an orderly arrangement of land uses within a jurisdiction.

TMC Title 18 Zoning provides for increased density measured by the number of units per acre in target areas to support a greater range of housing options. Minimum lot sizes are supportive of diversity in housing stock. Similarly, zero lot line developments, where the structure is located directly on the lot line on one side of the lot in order to provide more usable side yard space on a smaller lot, are currently allowed in all residential zones.

The expansion of the range of middle housing uses and accessory dwelling units in most

DRAFT

residential land use designations will also help expand location and the types of housing.

6) Building Code

The International Residential Code regulates the construction of all structures in Tumwater by setting minimum standards for building construction to ensure safety. The International Residential Code is adopted by all jurisdictions in the State, with no or minor changes.

For residential construction, Tumwater does have the option of increasing or decreasing the regulations by ordinance for residential structures of more than three dwelling units. Any change to the regulations for single-family and duplex units does require approval by the State Building Code Council, which amounts to significant disincentive to following this route.

As mentioned previously, however, the International Residential Code is designed to be a minimum standard. As such, any minimization of those standards would have a corresponding impact on life safety.

There are cost saving measures that meet the International Residential Code standards. For example, the use of pre-engineered building components can significantly cut labor costs. While many of these components are as much as ten percent more expensive to purchase, they can save 25 percent of labor costs in installation.

Engineered roof trusses are a good example of this type of component. Designing houses to take maximum advantage of lumber and truss span capabilities, such as 24-inch on-center rather than 16-inch on-center framing, and two instead of three stud corners. These and other simple measures can result in substantial cost savings to the builder and subsequent buyer of housing.

There are many options for housing construction available in the International Residential Code that are rarely used. This may be because builders are unaware of these possibilities or are simply accustomed to building in a certain way.

Another reason may be that the perception is that the housing market will not bear such design innovations. There is an opportunity for the builders and Tumwater building and permitting officials to innovate to help contain or reduce housing prices. This could be facilitated through ongoing meetings or exchanges.

F. Programs & Actions to Achieve Housing Availability

1) Housing Action Plan

The City Council adopted the Tumwater Housing Action Plan in 2021. The Plan was intended to inform the Tumwater's Comprehensive Plan policies and development regulations and to guide implementation strategies to help Tumwater meet its housing needs and strategic objectives.

The Plan was built on the affordable housing work the City Council had started in 2018. It was the next step in the process of identifying actions to increase the amount of affordable housing in Tumwater.

The Plan consolidated all affordable housing action items into one document that the Mayor and City Council use to support the development of more affordable housing in Tumwater. Many

DRAFT

of the actions from the Housing Action Plan have been incorporated as implementation actions in the update of the Housing Element.

2) Tumwater Actions

Tumwater will take the following steps to improve the availability of housing:

- Update the zoning code to allow for more housing types.
- Increase minimum and maximum densities to support new housing types, which will include combining the Single Family Low and Single Family Medium land use designations and zone districts.
- Invest in infrastructure to support higher density housing construction.
- Expand the provision of bonus density or additional building height allowances and permit application fee, impact fee, and connection charge waivers for projects that include income-restricted affordable housing.
- Update the development code to align with HB 1337 (Chapter 334, Laws of 2023), which requires Tumwater to allow up to two accessory dwelling units per residential lot, in addition to the primary home.
- Reduce parking requirements for middle-housing types and multifamily housing types.
- Update impact fee calculations to use square footage or bedroom counts.
- Update the Citywide Design Guidelines for consistency with state law.

3) Regional Actions

Tumwater is a part of the Regional Housing Council, which is intended to help in the process of seeking solutions to homelessness and affordable housing on a regional level. While it provides a useful forum for addressing the needs of residents of the County who are below 80 percent area median income, like Tumwater, it struggles with the necessary funding to address these issues.

The primary purpose of the Regional Housing Council is to leverage resources and partnerships through policies and projects that promote equitable access to safe and affordable housing. It considers issues specifically related to funding a regional response to homelessness and affordable housing and coordinating existing funding programs.

These programs may include RCW 36.22.179 funds, HOME Investment Partnership Program, Consolidated Homeless Grant (CHG), Housing and Essential Needs, RCW 82.14.540 funds, Community Development Block Grant, and other related funding sources such as a regional home fund to help implement the five-year Homeless Crisis Response Plan and increase affordable housing options.

To achieve this purpose, the Regional Housing Council assists in monitoring the implementation of the County's five-year Homeless Crisis Response Plan by setting priorities and making funding decisions on projects and programs that implement the Homeless Crisis Response Plan.

Additionally, the Regional Housing Council provides a forum for consideration of policy options related to homelessness and encourages

DRAFT

development of regional approaches to planning for, responding to, and funding homeless services and facilities and expanding affordable housing options.

The Interlocal Agreement establishes procedures for governance, scope of work, funding, and other related items for the Regional Housing Council. The term of the Interlocal Agreement is five years.

The jurisdictions comprising five percent or more of the County population allocate a minimum annual amount equal to not less than one half of a percent of the last full year of general sales and use taxes pursuant to RCW 82.14.030(1) for projects, programs, and activities providing direct support to the Jurisdictions' front line communities. In addition, Tumwater makes an in-kind contribution of up to 0.25 FTE staff to support the work of the Regional Housing Council.

4) Conclusions

Based on the data available, it is clear that the need for affordable housing and human services far exceeds the available supply. In addition, the process of drafting a Housing Element requires that the various jurisdictions meet and discuss the salient issues involved with affordable housing provision. This also raises the level of awareness of the decision-makers in Thurston County.

It is difficult to fill gaps in the web of service provision to low and moderate income groups at the local level through public action. Funding for low and moderate income families in Tumwater must compete with all services provided by a municipality, such as streets, police, and fire.

In summary, while direct public action can fill some of the gaps in affordable housing, these are broader societal issues that cannot be solved by Tumwater alone. Additional efforts will be needed at regional, state, and federal levels to make progress in the underlying causes of lack of affordable housing.

Thurston Regional Planning Council

Title VI Notice

Thurston Regional Planning Council (TRPC) hereby gives public notice that it is the agency's policy to assure full compliance with Title VI of the Civil Rights Act of 1964, the Civil Rights Restoration Act of 1987, and related statutes and regulations in all programs and activities. Title VI requires that no person shall, on the grounds of race, color, sex, or national origin, be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination under any Federal Highway Aid (FHWA) program or other activity for which TRPC receives federal financial assistance. Any person who believes they have been aggrieved by an unlawful discriminatory practice under Title VI has a right to file a formal complaint with TRPC. Any such complaint must be in writing and filed with the TRPC's Title VI Coordinator within one hundred and eighty (180) days following the date of the alleged discriminatory occurrence.

Executive Summary

Today, Thurston County is home to more than 294,000 people. By 2045, this is expected to grow to more than 380,000 people, and 64 percent will live in Lacey, Olympia, and Tumwater or their respective unincorporated urban growth areas. This housing needs assessment is intended to provide an inventory of the current housing stock, household characteristics, the population's housing needs, and any gaps in housing availability.

A Growing (Older) Population

In the next 25 years, the Washington Office of Financial Management forecasts the county's population will grow to more than 380,000 people, and the overall population is aging. Today, 18 percent of the population is 65 or older, and 20 percent of seniors are 80 or older. By 2045, nearly one in four residents will be 65 or older – and 38 percent of seniors will be 80 or older. This has ramifications for housing affordability for the region's population as well as the types of housing needed to meet their needs.

COVID-19 Pandemic and the Housing Needs Assessment

In response to the outbreak of the COVID-19 pandemic, Governor Inslee issued a series of proclamations and declarations aimed at reducing the spread of the virus in Washington State, including requiring all non-essential workers to stay home and stay healthy and extending a moratorium on evictions to protect renters. As a result, significant changes in the Lacey, Olympia, and Tumwater area occurred, affecting businesses and residents alike. Much of the data and statistics used in this assessment were established prior to the outbreak. The estimates, forecasts, and gap analysis do not take into account the radical impacts in employment and housing that continues to occur in the Thurston Region as of the writing of this report.

The cities of Lacey, Olympia, and Tumwater will continue to monitor the impact of the pandemic on housing in the coming months.

Do I Rent or Do I Buy?

More than 83,000 housing units are found in Lacey, Olympia, Tumwater, and their unincorporated urban growth areas. Thurston Regional Planning Council (TRPC) projects 34,000 new units will need to be built

to accommodate the region's growing population. Half of all occupied housing units in Lacey, Olympia, and Tumwater are rented, and the other half are owned by an occupant of the unit. However, the smaller the household income, the fewer options there are for home ownership – a key factor for many households in building wealth. Housing units with two or fewer bedrooms are typically rented, and renters are more likely to be cost burdened, meaning they spend more than 30 percent of their income on rent and other housing expenses.

Smaller Households, Larger Homes

Over the last forty years, the average household in Thurston County has gotten smaller – about 2.5 people per household in 2014-2018. During the same period of time, homes have gotten bigger. In the 1980s, more than half of all houses built were less than 1,500 square feet. In the 2010s, only 11 percent were less than 1,500 square feet.

Higher Wages – and Higher Rents and Mortgages

According to the U.S. Bureau of Economic Analysis, Thurston County is home to more than 148,000 jobs. TRPC estimates this will grow to about 200,000 by 2045. Employment Security Department figures indicate wages have generally increased over the last 17 years when adjusted for inflation – about 0.6 percent per year. However, so has the cost of housing – whether you rent or own. Between 2001 and 2018, average rents increased about 1.7 percent per year while the average sale price for a home increased by about 4.1 percent per year. Today, Thurston County is not considered affordable for first-time home buyers, although it is still more affordable than either King or Pierce counties.

All Things Not Being Equal

About one in four Thurston County residents is a person of color – those who are Hispanic or Latino of any race and those who are any race other than white alone. Those who are Hispanic or Latino, Asian, Black, and multiracial are the largest minority populations in Thurston County. People of color generally have more people in their household, are less likely to own their own home, have a smaller household income, and are more likely to experience homelessness than their white, non-Hispanic counterparts.

The Challenge: Meeting the Greatest Need

More than 6,000 households in Lacey, Olympia, and Tumwater are extremely low income – earning less than 30 percent of the area median family income. By 2045, another 3,000 households are expected to fall into this category. There are approximately 1,857 units available at below-market rents – far fewer than the 6,000 plus households with extremely low income, who are those most at risk of becoming homeless – and there are at least 800 people experiencing homelessness today, according to the 2019 Point in Time Count. Both subsidized and permanent supportive housing are needed to support these vulnerable populations.

Chapter 1. Introduction

In 2019, the Washington State Legislature passed HB 1923, aimed at encouraging cities planning under the state Growth Management Act to take actions to increase residential building capacity. These actions include developing a housing action plan "…to encourage construction of additional affordable and market rate housing in a greater variety of housing types and at prices that are accessible to a greater variety of incomes, including strategies aimed at the for-profit single-family home market" (RCW 36.70A.600).

In recognition of the cross-jurisdiction need for affordable housing, the cities of Lacey, Olympia, and Tumwater choose to collaborate with Thurston Regional Planning Council to develop a regional Housing Action Plan. Funding was provided by the Department of Commerce. The project includes four components:

- A regional housing needs assessment
- A household income forecast to identify future housing needs
- A survey of landlords and rental property owners to better understand housing costs
- A Housing Action Plan – to be adopted by the cities – identifying a list of actions for the cities to implement to encourage development of a housing stock adequate and affordable for current and future residents

This report – the Housing Needs Assessment – is intended to provide an inventory of the current housing stock, household and workforce characteristics, the population's housing needs, and any gaps in housing availability. This information will be used to develop actions for the final Housing Action Plan. The Household Income Forecast, used in the gap analysis, is included in Appendix B.

Report Organization

The Housing Needs Assessment covers the following topics:

Community Profile Chapter 2: Population Characteristics Chapter 3: Household Characteristics Chapter 4: Unique Housing Needs	**Workforce Profile** Chapter 6: Local Workforce Characteristics
Housing Inventory Chapter 5: Housing Supply	**Needs Assessment** Chapter 7: Gap Analysis Chapter 8: Land Supply

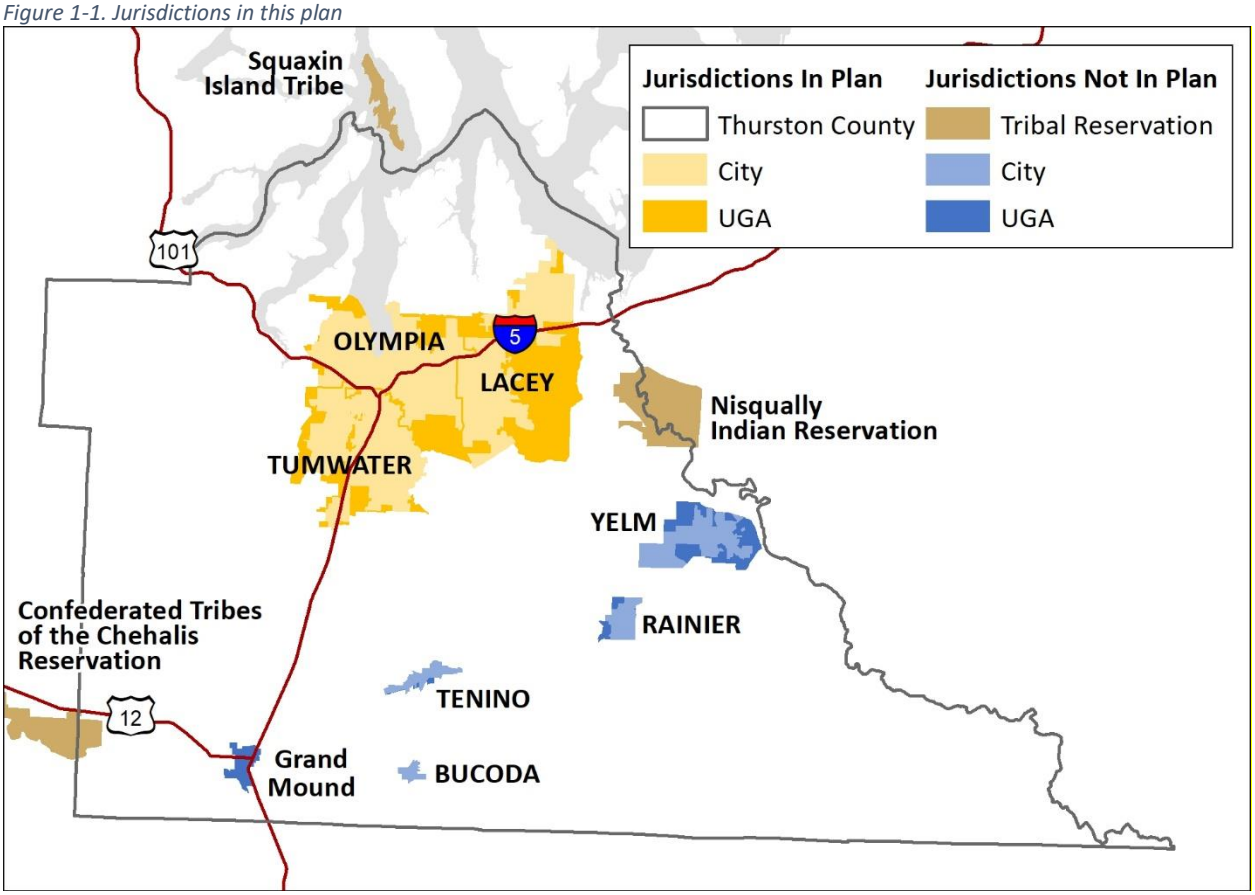
Chapters 2 through 4 – the Community Profile – provide an overview of residents of the cities of Lacey, Olympia, and Tumwater, their demographics, households types and housing choices. It also includes a summary of groups with special housing needs, such as people who experience homelessness, seniors, veterans and military personnel, and students.

Chapter 5 – The Housing Inventory – articulates the state of the region's current housing stock, including the types of housing, size of units and number of bedrooms, and the cost of housing.

Chapter 6 – the Workforce Profile – discusses employment and wage-earning opportunities in the region, as well as unemployment. It also includes information on the minimum income needed to afford households' basic needs.

Chapters 7 and 8 – the Needs Assessment – look at the region's current and future housing needs and the availability of land to accommodate new housing.

Geography



This assessment explores data for the cities of Lacey, Olympia, and Tumwater. For some tables and figures, data for the three cities are combined ("Cities Combined") to enhance readability. City-level data, if available, can be acquired using the source information provided in Appendix C.

When data for the unincorporated urban growth areas is available, it is included with the city data ("Cities plus UGAs").

When key data are not available at the city level, countywide data are presented ("Thurston County"). Thurston County data include data for all seven incorporated cities and towns in Thurston County, unincorporated areas, and tribal reservations within the county border.

Figure 1-1 shows jurisdictions within Thurston County, differentiating the areas addressed in this plan and those that are not.

Figure 1-1. Jurisdictions in this plan

Sources of Data

This assessment combines data from a range of sources. Key sources include:

- **U.S. Census Bureau:** The 2010 Census and 2014-2018 American Community Survey provide key data on population, households, and housing characteristics.
- **Washington Center for Real Estate Research (WCRER):** Based in the University of Washington's College of Built Environments, WCRER's quarterly Housing Market Report and Apartment Market Survey supply timely data on housing costs and vacancy rates.
- **Thurston County Assessor's Office:** Property assessment data furnish useful information on housing types, sizes, and other characteristics at the parcel level.
- **Washington Office of Financial Management (OFM):** OFM provides population forecasts for Washington counties and annual population estimates for cities and counties.
- **Thurston Regional Planning Council (TRPC):** TRPC contributes annual population, housing, and employment estimates for cities, UGAs, and other geographies, as well as 25-year projections.
- **Northwest Multiple Listing Service:** The Northwest Multiple Listing Service specifies annual data on the number, types, and cost of real estate transactions across Thurston County

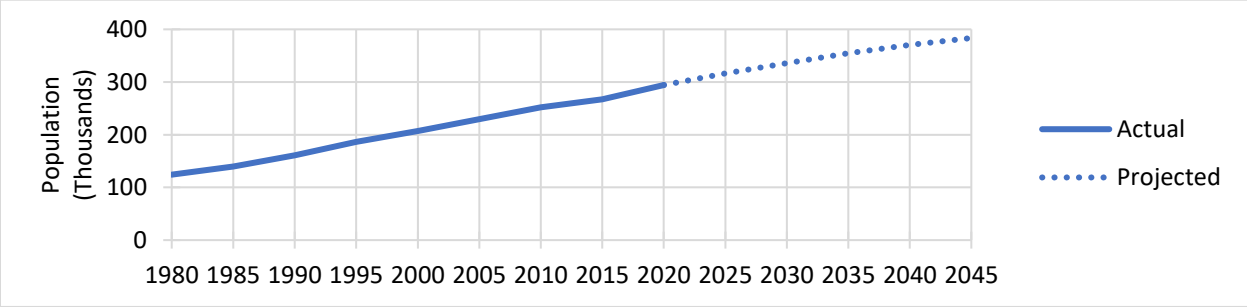
- **U.S. Department of Housing and Urban Development (HUD):** HUD's Consolidated Housing Action Strategy (CHAS) data provided information on cost burden and other housing challenges faced by low-income residents.

Additional sources were included as needed.

Appendix C presents sources for the figures and tables presented in this assessment. Since many of the data are updated on an annual basis, the appendix also includes information on how to access the most recent data.

Many of the data shown in this report are based on surveys. All survey data contain a margin of error – a measure of uncertainty around an estimate. The American Community Survey publishes margins of error with their tables. While not included in the figures and tables in this report, they can be accessed using the source information in Appendix C.

Several tables and figures show dollar values (costs, incomes, etc.) over time. These have been adjusted for inflation using the implicit price deflator for Washington State provided by the Washington State Economic and Revenue Forecast Council.



Chapter 2.
Population Characteristics

This chapter of the housing needs assessment investigates population estimates and forecasts. It also explores demographic information such as age, race and ethnicity, and disability status of the population.

Estimates and Forecast

The Washington Office of Financial Management estimates Thurston County's 2020 population is 294,300. Figure 2-1 shows the change in Thurston County's population since 1980. Between 1980 and 2020, Thurston County's population more than doubled, growing 137 percent over 40 years. For the same period of time, the average annual rate of population change was 2.2 percent. Over the next 25 years, Thurston County's population is anticipated to grow by another 89,200 people at a rate of 1.1 percent per year on average – to about 383,500 people.

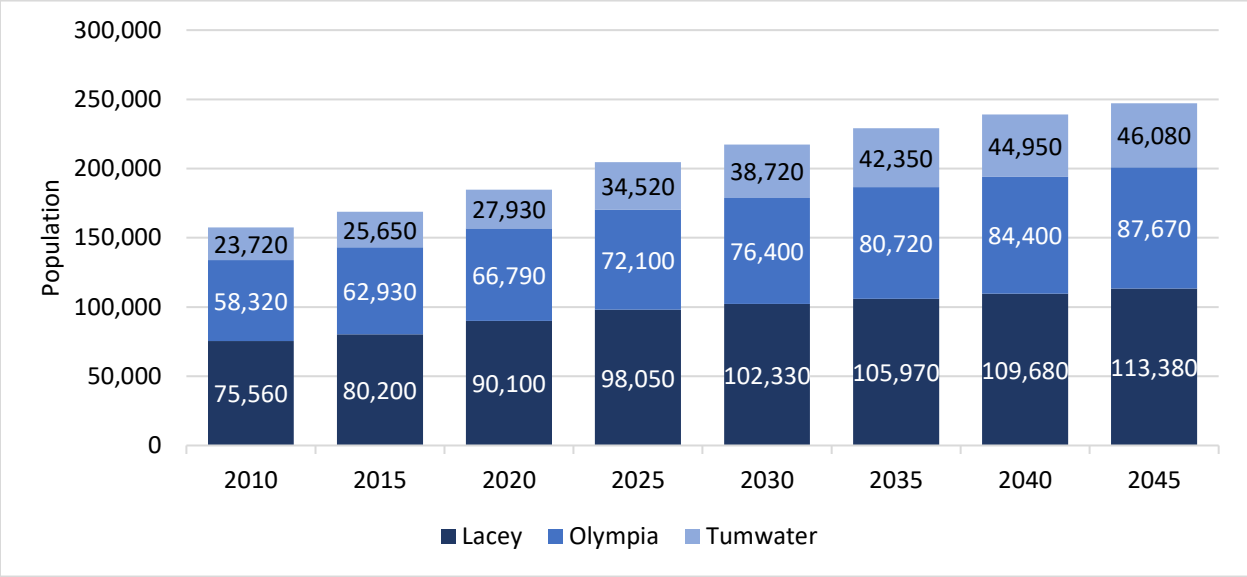


Figure 2-1. Thurston County population, 1980-2045

Source: Washington Office of Financial Management

In 2020, approximately 184,820 people in Thurston County live in in the combined areas of Lacey, Olympia, Tumwater, and their respective unincorporated urban growth areas (UGAs) – representing 64 percent of Thurston County's population (Figure 2-2).

Figure 2-2. Population in cities including their unincorporated urban growth areas, 2010-2045

Source: Thurston Regional Planning Council

Table 2-1 shows the total population for the cities in 2020 and their respective unincorporated urban growth areas (UGAs). Lacey's estimated population was 52,910, slightly less than that of Olympia. However, when looking at Lacey's population and including future annexation areas in the city's urban growth area, Lacey has 90,100 people – 35 percent more than Olympia. Tumwater's population is less than half that of Lacey and Olympia, even when including their respective UGAs.

Table 2-1. Population, 2020

Population	Lacey	Olympia	Tumwater	Cities Combined
City	52,910	54,150	24,600	131,660
Unincorporated UGA	37,190	12,640	3,330	53,160
Total	**90,100**	**66,790**	**27,930**	**184,820**

Source: Thurston Regional Planning Council

Age

Table 2-2 shows the age of Thurston County's population, both in terms of count and percent of population. Approximately one in two Thurston County residents are under the age of 40; one in three is between the ages of 40 and 64. Only about one in six people are 65 or older. Olympia residents skew slightly older than the other communities, with a median age of 38.3. Lacey's population is the youngest, with a median age of 35.3.

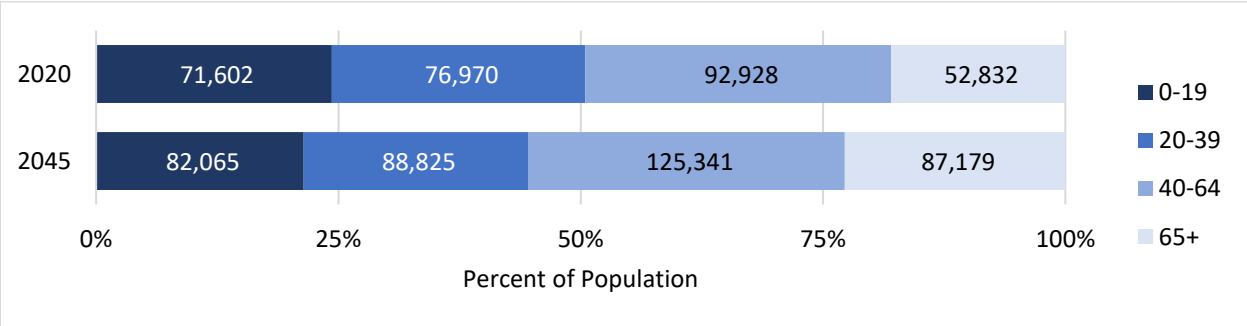

Table 2-2. Age of Population, 2014-2018 average

Age Cohort	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
Count of Population					
0-19	12,381	10,105	5,274	27,760	65,788

Source: U.S. Census Bureau American Community Survey

Figure 2-3 and Table 2-3 (next page) show the distribution of the population based on age, comparing 2020 to 2045. The portion of Thurston County's population under the age of 40 is projected to shrink over the next 25 years. The portion of the population between age 40 and 64 is projected to remain relatively constant, while the portion 65 and older will grow.

Figure 2-3. Age of Thurston County population, 2020 and 2045

TOTAL	**100%**	**100%**	**100%**	**100%**	**100%**	**100%**

Source: Washington Office of Financial Management

Race and Ethnicity

About one in four Thurston County residents is a person of color (Figure 2-4). For the purposes of this report, persons of color include those who identify as Hispanic or Latino of any race and persons who identify as any race other than white alone. Of the three communities, Lacey is the most diverse while Tumwater is the least diverse.

Figure 2-4. Racial and ethnic diversity in Thurston County, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Those who are Hispanic or Latino of any race represent the largest minority population (9 percent) (Table 2-4). For persons who are not Hispanic or Latino, those who are Asian (7 percent), Black (4 percent), and identified themselves as multiracial (5 percent) are also significant minority populations in the three-city area. Thurston County is becoming more diverse. Between 2000 and 2014-2018, the percent of the population identifying as a person of color increased from 19 to 27 percent.

Table 2-4. Racial and Ethnic Diversity in Lacey, Olympia, and Tumwater, 2000 and 2014-2018 average

	2000		2014-2018	
Race and Ethnicity	**Count**	**Percent**	**Count**	**Percent**
White, Non-Hispanic	69,857	81%	88,289	73%
Asian, Non-Hispanic	5,330	6%	8,892	7%

TOTAL	**86,438**	**100%**	**121,188**	**100%**

Source: U.S. Census Bureau American Community Survey

Disability

Approximately 15 percent of Thurston County's population lives with a disability. Measuring disability is a complex concept, and there are many ways to look at what it means to live, work, or play with a disability. Data concerning disability status in this report comes from the U.S. Census Bureau's American Community Survey (ACS) and is limited to the civilian noninstitutionalized population. The ACS measures disability based on whether a person experiences a functional limitation in at least one of six different areas: hearing, vision, cognition, ambulation, self-care, and independent living. Each of these areas has implications for the type of housing needed by that individual. Of the six functional limitations, the most common reported in Thurston County are ambulatory (6.7 percent) and independent living (5.3 percent) (Table 2-5).

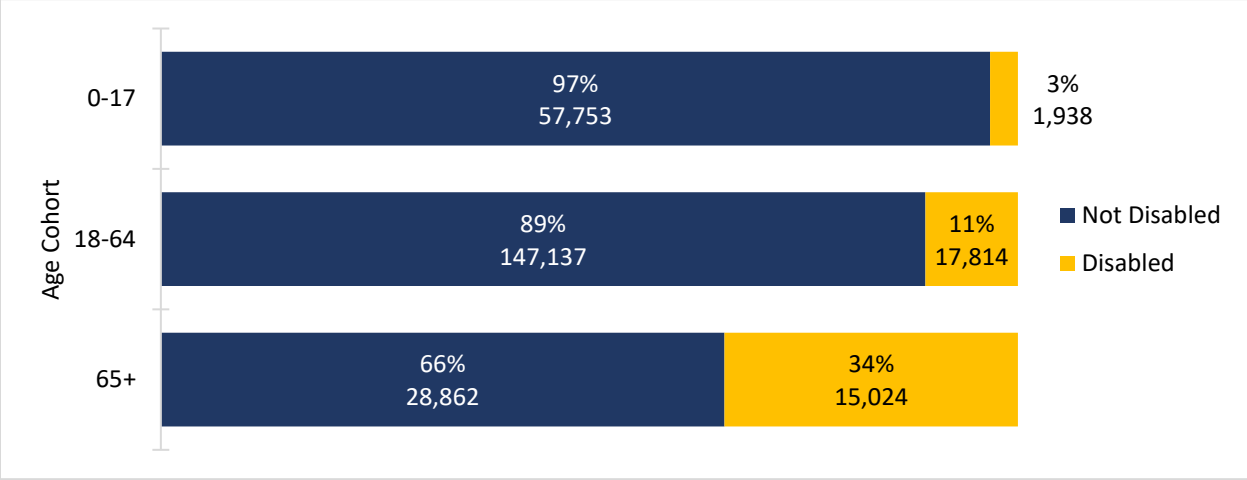

Table 2-5. Types of disability in the Thurston County population, 2014-2018 average

Type of Disability	Count	Percent
Hearing	11,509	4.3%
Vision	6,111	2.3%
Cognitive	12,040	4.8%
Ambulatory	16,991	6.7%
Self-care	5,915	2.3%
Independent living	10,991	5.3%

***Note:** A person may have more than one type of disability.*
Source: U.S. Census Bureau American Community Survey

Figure 2-5 looks at disability status for the entire Thurston County population, breaking it into three age cohorts: children age 0 to 17, adults age 18 to 64, and adults age 65 and older. Only three percent of children and 11 percent of adults age 18-64 have a disability while 34 percent of adults 65 and older have at least one disability.

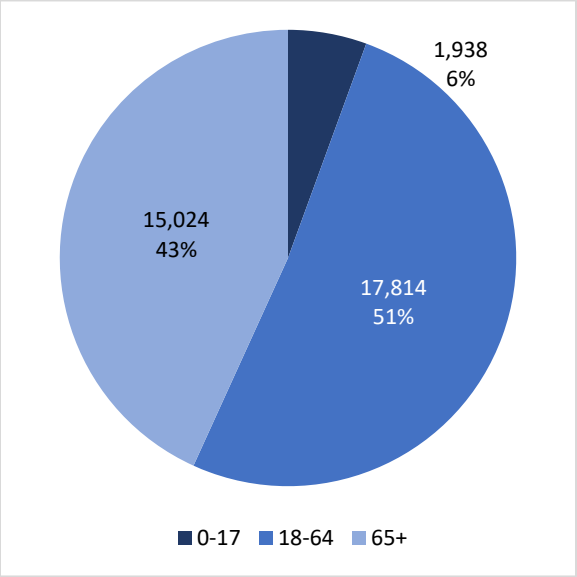

Figure 2-5. Disability status in Thurston County by age, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Figure 2-6 and Table 2-6 (next page) look at only those with disabilities. More than 15,000 seniors make up 43 percent of people with disabilities, and 43 percent of people with disabilities in Thurston County live in Lacey, Olympia, and Tumwater.

Figure 2-6. Disability by age, 2014-2018 average

Poverty

Approximately 15,139 people in Lacey, Olympia, and Tumwater combined live in poverty, and more than half live in Olympia (Table 2-7). Of the three cities, Olympia has the highest poverty rate, at 16.7 percent (Figure 2-7, next page). While poverty rates for Lacey, Tumwater, and Thurston County have all fallen since the Great Recession, Olympia's poverty rate has actually increased. Tumwater has the lowest poverty rate at 9.6 percent. A significant demographic of those living in poverty in Olympia are college and university students. According to a 2013 Census Bureau report, when college students – specifically those living off campus and not with their families – are excluded, the poverty rate decreases. For 2009-2011, Olympia's poverty rate decreased from 16.5 percent to 13.2 percent while Lacey's poverty rate decreased from 10.8 percent to 10.5 percent[1]. No information was available for Tumwater.

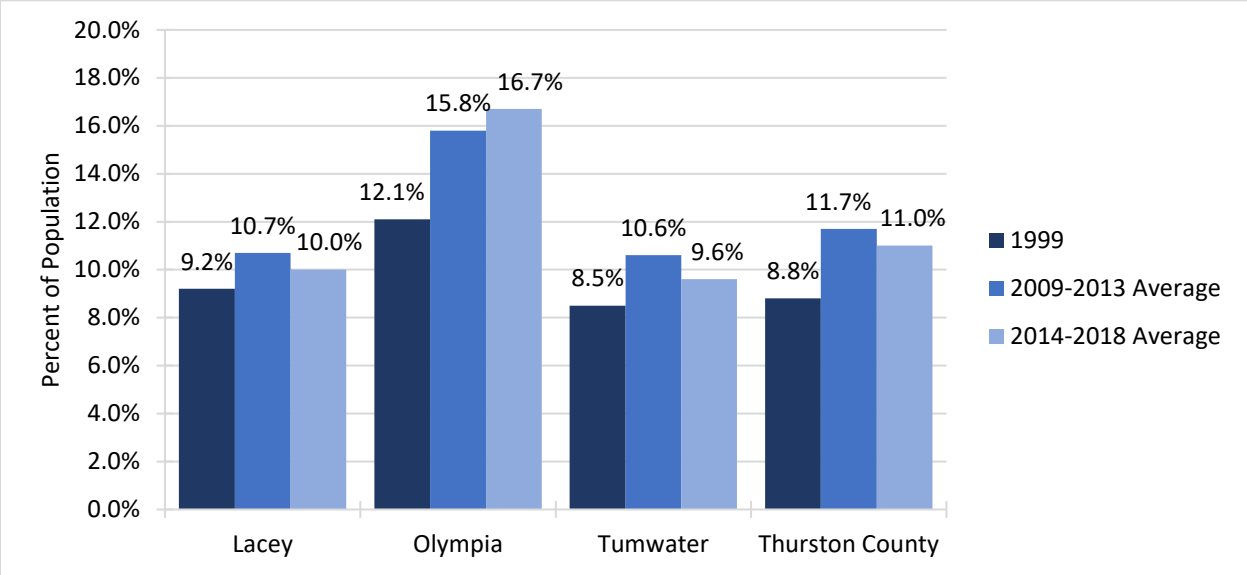

Table 2-7. People living in poverty, 2014-2018 average

	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
1999	2,798	4,982	1,060	8,840	17,992

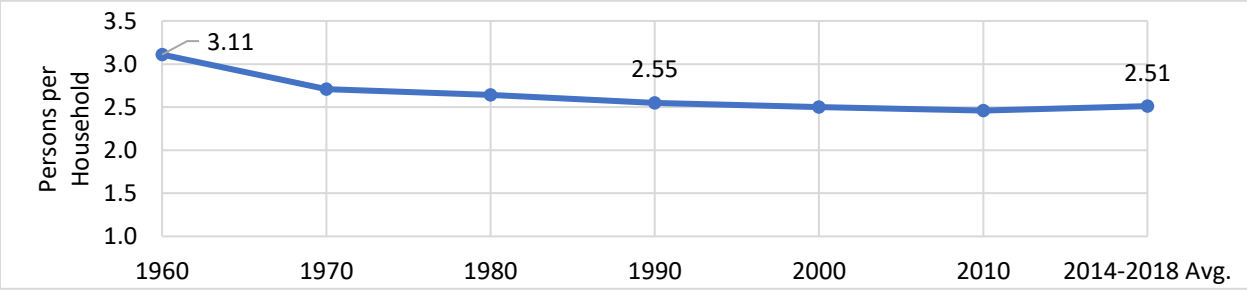
Chapter 3.
Household Characteristics



"Households" are groups of people living together in a single home. Members of households can be related ("family households") or unrelated ("non-family households"). Thurston County is home to more than 100,000 households with nearly half in Lacey, Olympia, and Tumwater.

This chapter of the housing needs assessment looks at household characteristics, including household size and composition, homeownership and tenancy, and household income. It also includes a discussion of people who live in group quarters.

Household Size and Composition

Household size has generally fallen – from a high of 3.11 persons per household in 1960 to just 2.51 in 2018 (Figure 3-1). For the last thirty years, average household size has remained at or close to 2.5 persons per household.

Figure 3-1. Average household size in Thurston County, 1960-2018

Source: U.S. Census Bureau 1960 through 2010 Decennial Census, American Community Survey

Slight variations in average household size exist between Lacey, Olympia, and Tumwater (Table 3-1). Olympia has the smallest households with just 2.21 persons per household while Lacey has the largest (2.50). Household size also varies by race and ethnicity (Table 3-2). Households headed by a person of color are, on average, larger than those headed by a person who is white and not Hispanic.

Table 3-1. Average household size, 2014-2018 average

Jurisdiction	Persons per Household
Lacey	2.50
Olympia	2.21
Tumwater	2.39
Thurston County	2.51

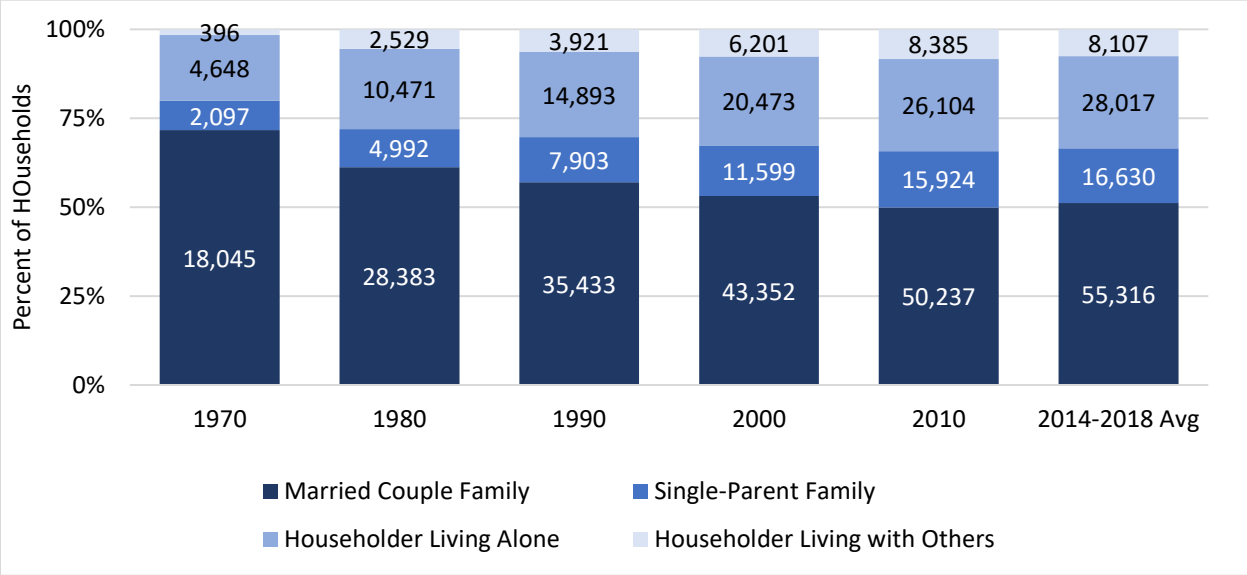
Table 3-2. Average household size by race and ethnicity, 2010



Householder Race and Ethnicity	Persons per Household
White, Non-Hispanic	2.38
Person of Color	2.91

Source: U.S. Census Bureau American Community Survey

What is a Householder?
According to the U.S. Census Bureau's American Community Survey, one person in each household is designated as the householder. In most cases, this is the person or one of the people in whose name the home is owned, being bought, or rented and who is listed on line one of the survey questionnaire. If there is no such person in the household, any adult household member 15 years old and over could be designated as the householder.

Figure 3-2 shows the types of households found in Thurston County since 1970. Household types include married couple families, single-parent families, persons living alone, and unrelated persons living together. A family consists of two or more people living in the same household who are related by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of the family. "Householder living with others" indicates two or more unrelated people living together. The makeup of individual households has changed over the last 50 years. In 1970, only 20 percent of households were nonfamily households (householders living alone or with others they are not related to) compared to 33 percent for the 2014-2018 average.

Figure 3-2. Thurston County households by type, 1970-2018

Source: U.S. Census Bureau

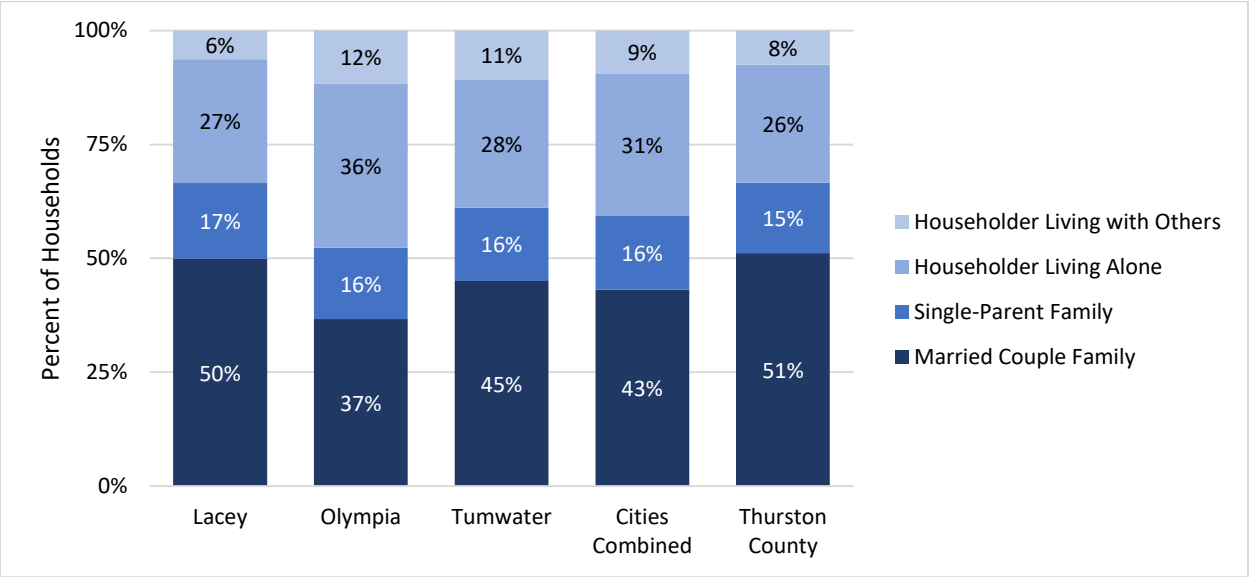


Table 3-3 and Figure 3-3 (next page) show the types of households found in Lacey, Olympia, Tumwater, the three cities combined, and Thurston County. Half of all Lacey households are married couple families compared to only 37 percent of households in Olympia. Householders living alone make up 36 percent of households in Olympia, but only 27 percent in Lacey and 28 percent in Tumwater. Measured as a percentage, Lacey has half as many householders living with others (six percent) than either Tumwater (11 percent) or Olympia (12 percent).

Table 3-3. Households by type, 2014-2018 average

Household Type	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
Married Couple Family	9,331	8,196	4,203	21,730	55,316
Single-Parent Family	3,125	3,507	1,507	8,139	16,630
Householder Living Alone	5,084	8,055	2,613	15,752	28,017
Householder Living with Others	1,171	2,593	1,013	4,777	8,107
TOTAL	**18,711**	**22,351**	**9,336**	**50,398**	**108,070**

Source: U.S. Census Bureau American Community Survey

Figure 3-3. Households by type, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Nonfamily households are more likely to be found in Olympia than either Lacey or Tumwater. Table 3-4 and Figure 3-4 (next page) look at households with children. Only 24 percent (5,410) of Olympia households include children, compared to 30 percent (2,814) for Tumwater and 32 percent (6,036) for Lacey. Olympia is also less likely to have family households without children than either Lacey or Tumwater.

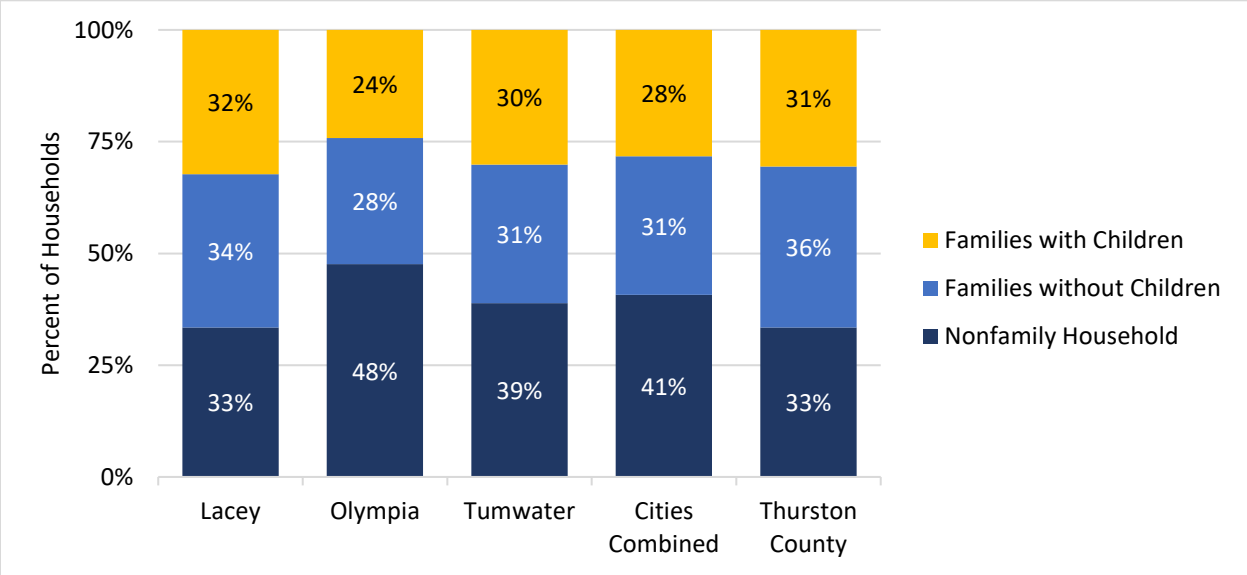

Table 3-4. Households with children, 2014-2018 average

Household Type	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
Family Households with Children	6,036	5,410	2,814	14,260	33,011
Family Households without Children	6,420	6,293	2,896	15,609	38,935
Nonfamily Households	6,255	10,648	3,626	20,529	36,124
TOTAL	**18,711**	**22,351**	**9,336**	**50,398**	**108,070**

NOTE: *Some nonfamily households may contain children, such as a foster child living with a single adult. It is not clear how many children reside with one or more persons they are not related to.*

Figure 3-4. Households with children, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Figure 3-5. Household size in Lacey, Olympia, and Tumwater combined, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Of the total households in Lacey, Olympia, and Tumwater, 65 percent (32,923) have only one or two people (Figure 3-5). Olympia has more one-person households (8,055) than Lacey and Tumwater combined (5,084 and 2,613 respectively) while Lacey has the most households (4,257) with four or more people (Table 3-5).

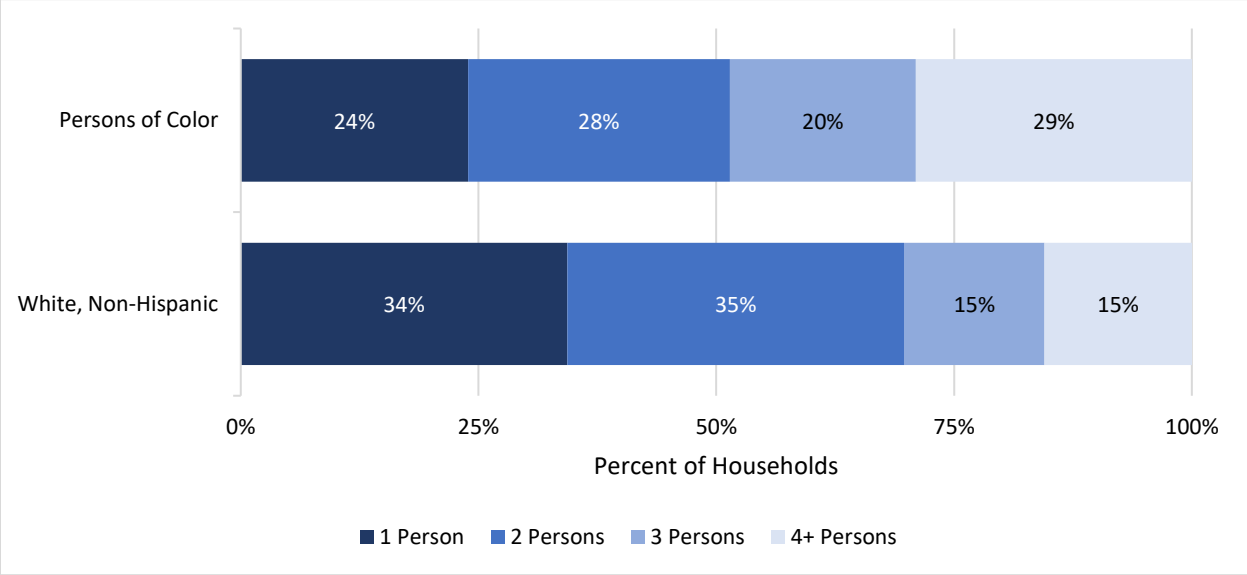

Table 3-5. Household size by location, 2014-2018 average

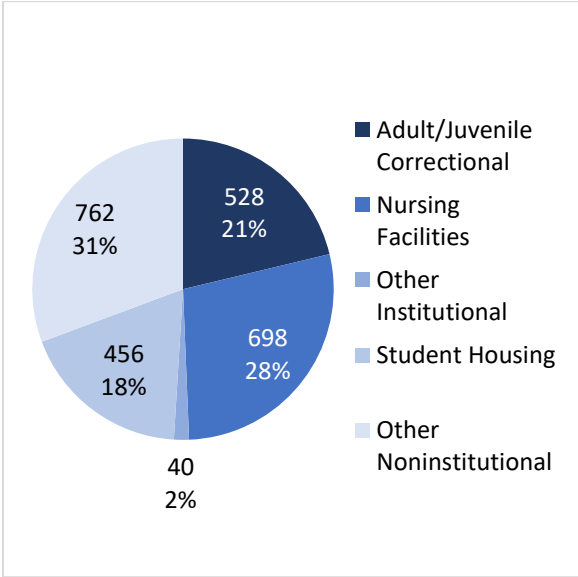
Persons per Household	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
1 Person	5,084	8,055	2,613	15,752	28,017
2 Persons	6,227	7,522	3,422	17,171	39,147
3 Persons	3,143	3,343	1,589	8,075	17,563
4+ Persons	4,257	3,431	1,712	9,400	23,343
All Households	**18,711**	**22,351**	**9,336**	**50,398**	**108,070**

Source: U.S. Census Bureau American Community Survey

Taking into consideration the householder's race (Figure 3-6), people of color in Thurston County are less likely to live in one- or two-person households than people who are white and not Hispanic. Forty-nine percent of households headed by a person of color contain three or more people compared to 30 percent for households headed by a person who is white and not Hispanic.

Figure 3-6. Thurston County household size by race and ethnicity, 2010



Source: U.S. Census Bureau American Community Survey

Group Quarters

In 2010, 2,484 Lacey, Olympia, and Tumwater residents lived in an institutional or noninstitutional group quarters setting (Figures 3-7 and 3-8, next page). This includes nursing facilities, adult group homes, homeless shelters, rehabilitation centers, and other types of group quarters (Table 3-6, next page). The remaining group quarters population is split between correctional facilities and college student dormitories.

The group quarters population is expected to increase by 1,700 people – 69 percent – between 2010 and 2045. Most of this increase is likely to be driven by nursing facilities, adult family homes, and other care facilities for an aging population.

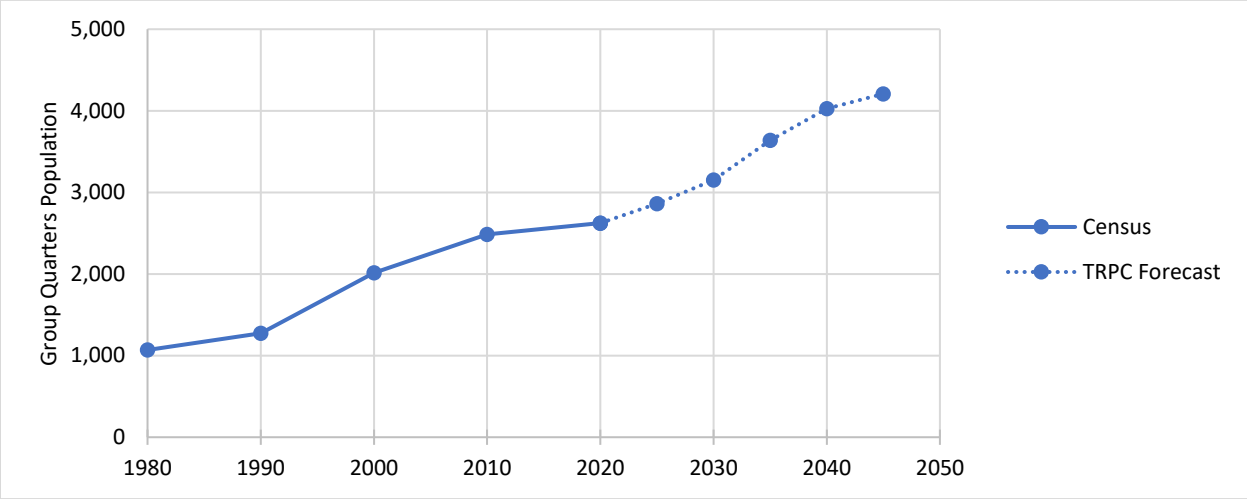


Figure 3-7. Population in group quarters in Lacey, Olympia, and Tumwater by facility type, 2010

Source: U.S. Census Bureau

The population experiencing homelessness is poorly reflected in these numbers. See Chapter 4 for more information on characteristics of the population experiencing homelessness.

Ownership and Tenancy

Homeownership can help a household build equity and move out of poverty, providing long-term stability. Renting offers households flexibility – whether for military personnel who may be posted in the region only for a few years, someone re-entering society after having been incarcerated, a person with developmental disabilities that has limited income opportunities, or a senior who no longer wants the maintenance responsibilities that come with home ownership.

Census Tracts
Census tracts are small, relatively permanent statistical subdivisions of a county, the primary purpose of which is to provide a stable set of geographic units for the presentation of statistical data. Census tracts generally have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people.

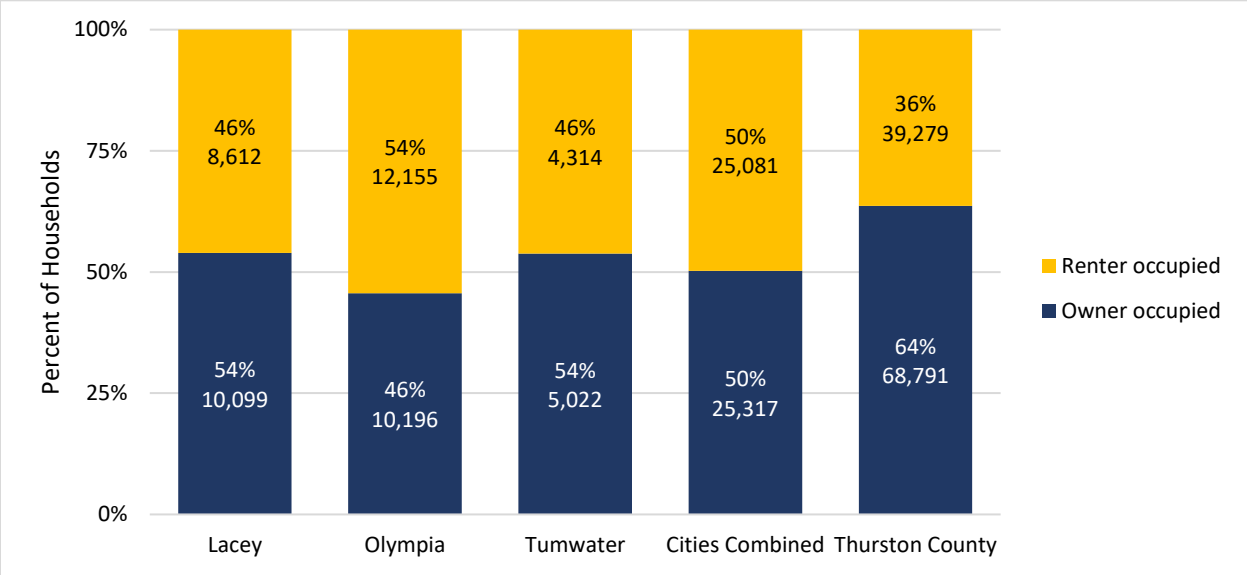

Figure 3-9 shows where households own their housing unit at the census tract level. Half of all occupied dwelling units in Lacey, Olympia, and Tumwater combined are owned by a member of the household (Figure 3-10, next page) compared to Thurston County where 64 percent are owner-occupied. Ownership varies among the three communities: in Olympia, 54 percent are renter occupied compared to 46 percent in Lacey and Tumwater.

Figure 3-9. Owner occupied households by census tract, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

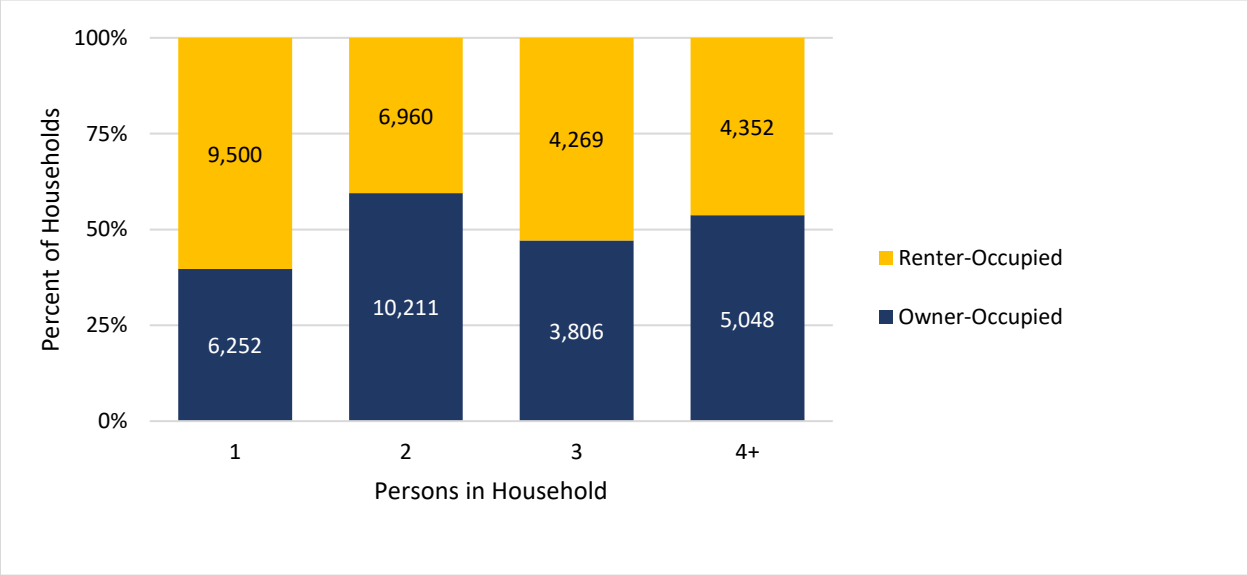

Figure 3-10. Ownership and tenancy, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Most one-and three-person households in Lacey, Olympia, and Tumwater are renter-occupied while most households with two people or households with four or more people are owner-occupied (Figure 3-11).

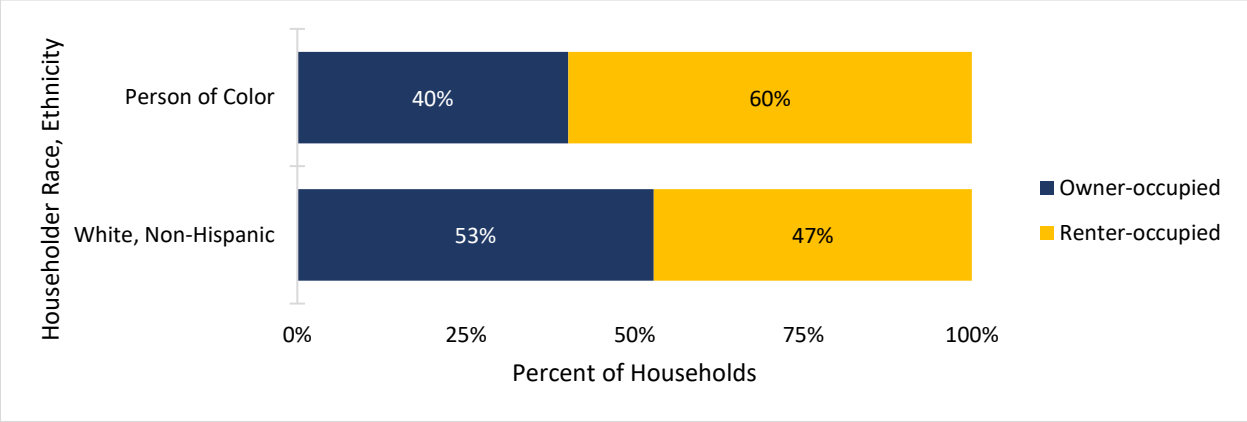

Figure 3-11. Household size by tenure in Lacey, Olympia, and Tumwater combined, 2014-2018 average

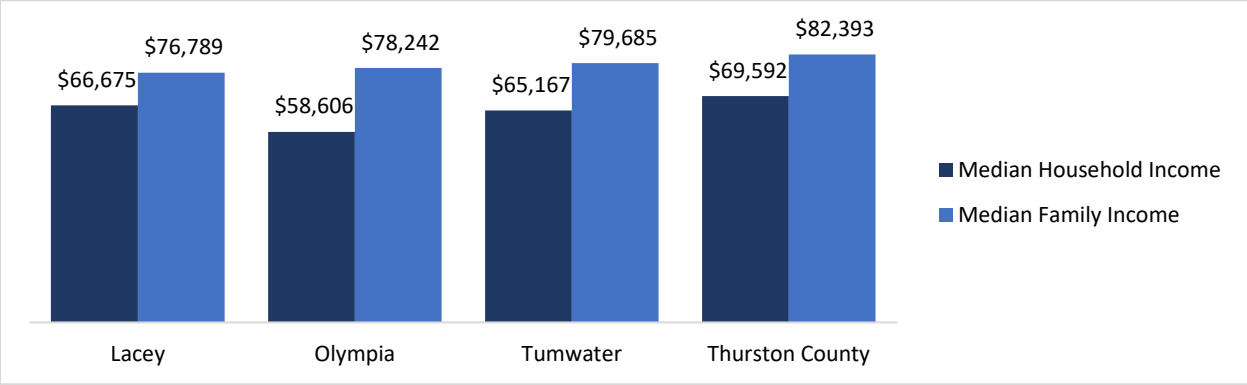
Source: U.S. Census Bureau American Community Survey

Tenure also changes based on the race and ethnicity of the householder (Figure 3-12). Forty percent of householders who are people of color own their home compared to 53 percent for householders who are white and not Hispanic.

Figure 3-12. Tenure by race and ethnicity in Lacey, Olympia, and Tumwater combined, 2014-2018 average



Source: U.S. Census Bureau American Community Survey

Income

A household's income includes wage and self-proprietor earnings, earnings from interest and rental property, social security and retirement income, and other forms of public assistance for all members of the household. Median household income is commonly used to compare incomes for different populations or areas. Half of households earn more and half earn less than the median household income. Median household income is based on the total number of households including those with no income. This is typically lower than the median family income (Figure 3-13). Family households tend to be larger (at least two people) and have more income earners. Olympia has the lowest median household income ($58,606) while Lacey has the highest ($66,675).

HUD Area Median Family Income
This section generally looks at household income. For a discussion of housing needs by HUD income levels (30, 50, 80, 100, and 120 percent of the area median family income) see Chapter 7, Gap Analysis.

Figure 3-13. Median family and household incomes, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

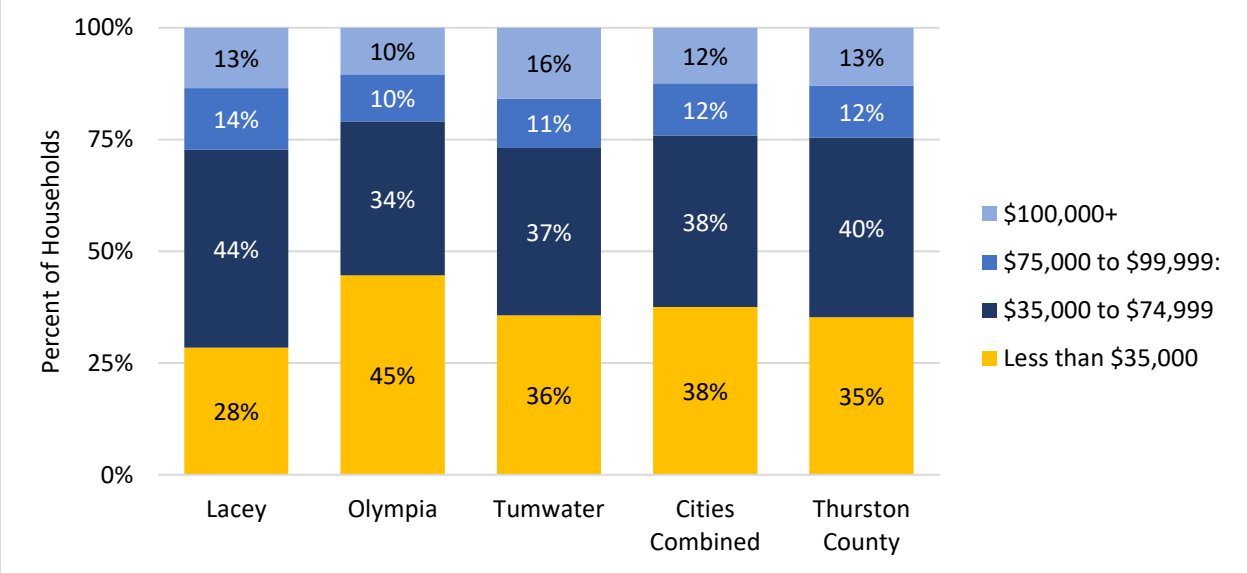


Table 3-7 and Figure 3-14 examine the actual income of households across the jurisdictions. In Olympia, 45 percent (5,420) of all households have an annual income of less than $35,000. Twenty-seven percent of households in both Lacey and Tumwater have an annual income of $75,000 or more compared to 20 percent in Olympia.

Table 3-7. Households by income, 2014-2018 average

Household Income	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
Less than $35,000	2,452	5,420	1,539	9,411	13,833
$35,000 to $74,999	3,816	4,189	1,614	9,619	15,778
$75,000 to $99,999:	1,184	1,275	478	2,937	4,578
$100,000 or more	1,160	1,271	683	3,114	5,090
TOTAL Households	**8,612**	**12,155**	**4,314**	**25,081**	**39,279**

Source: U.S. Census Bureau American Community Survey

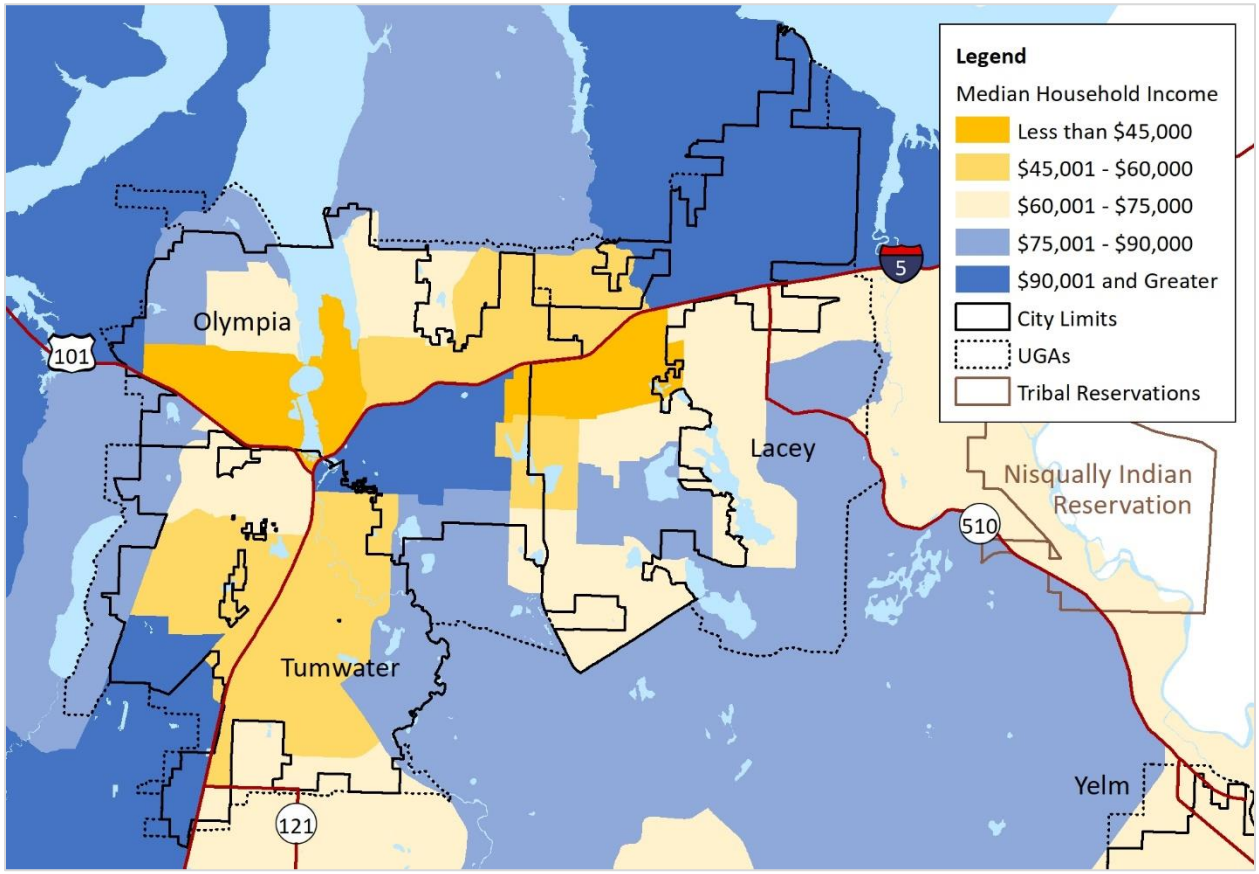

Figure 3-14. Percent of households by income, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Figure 3-15 shows median household income by census tract.

Figure 3-15. Median household income by census tract, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

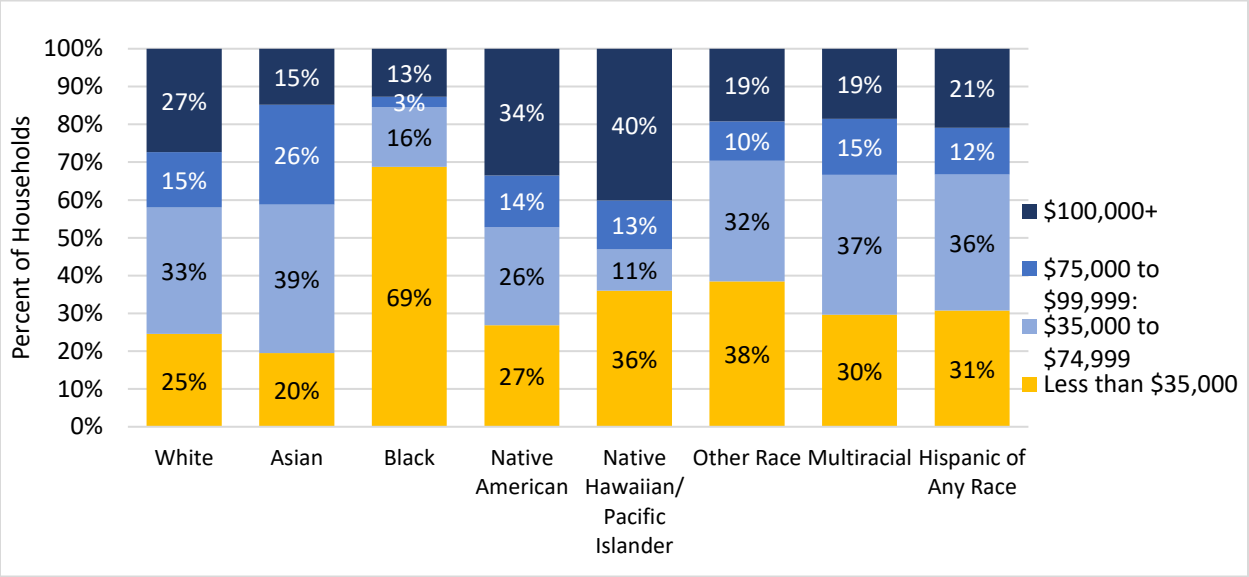

Table 3-8 and Figure 3-16 (next page) examine household income based on the race and ethnicity of the householder. Households headed by a person of color are frequently more likely to have an income less than $35,000 than a white, non-Hispanic householder. In Lacey, Olympia, and Tumwater, 69 percent of households headed by a person who is Black or African American have a household income less than $35,000 compared to just 25 percent of white, non-Hispanic households.

Table 3-8. Household Income in Lacey, Olympia, and Tumwater combined by race and ethnicity, 2014-2018 average

Household Income	White	Asian	Black	Native American	Native Hawaiian/ Pacific Islander	Other Race	Multiracial	Hispanic of Any Race
Less than $35,000	18,505	511	608	1,164	260	420	1,069	2,003
$35,000 to $74,999	28,438	1,032	368	1,436	248	311	1,330	2,104
$75,000 to $99,999:	14,016	702	129	663	51	213	579	951

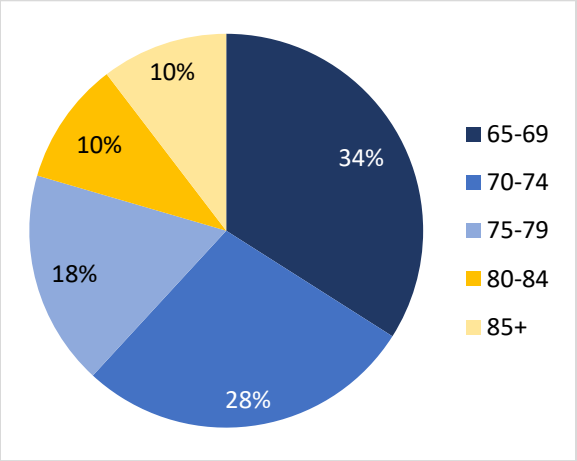
Chapter 4.
Unique Housing Needs

This chapter looks at the unique needs for housing for people who are elderly, those experiencing homelessness, veterans and military personnel, and college students.

Seniors



Approximately 52,800 seniors (age 65 or older) live in Thurston County in 2020, making up 18 percent of the total population. The senior population is forecasted to grow to 87,200 by 2045 and comprise 23 percent of the total population. In addition, the senior population will skew older in 2045 than it does today. Table 4-1 and Figures 4-1 and 4-2 (next page) show the breakdown of Thurston County's senior population today and forecasted for 2045. The proportion of seniors who are between the ages of 65 and 74 will shrink over the next 25 years while those who are 80 and older will grow. The growth in the number of older seniors has implications for the types of care and housing needed, including assisted living facilities, nursing homes, and adult family homes.

Table 4-1. Thurston County senior population, 2020-2045

Age Cohort	2020	2025	2030	2035	2040	2045
65-69	17,967	18,497	18,354	17,889	18,459	20,541
70-74	14,707	17,098	17,571	17,518	17,118	17,613
75-79	9,336	13,300	15,478	15,974	16,015	15,667
80-84	5,338	7,823	11,211	13,150	13,624	13,723
85+	5,484	6,452	8,897	12,849	16,823	19,635
TOTAL	**52,832**	**63,170**	**71,511**	**77,380**	**82,039**	**87,179**

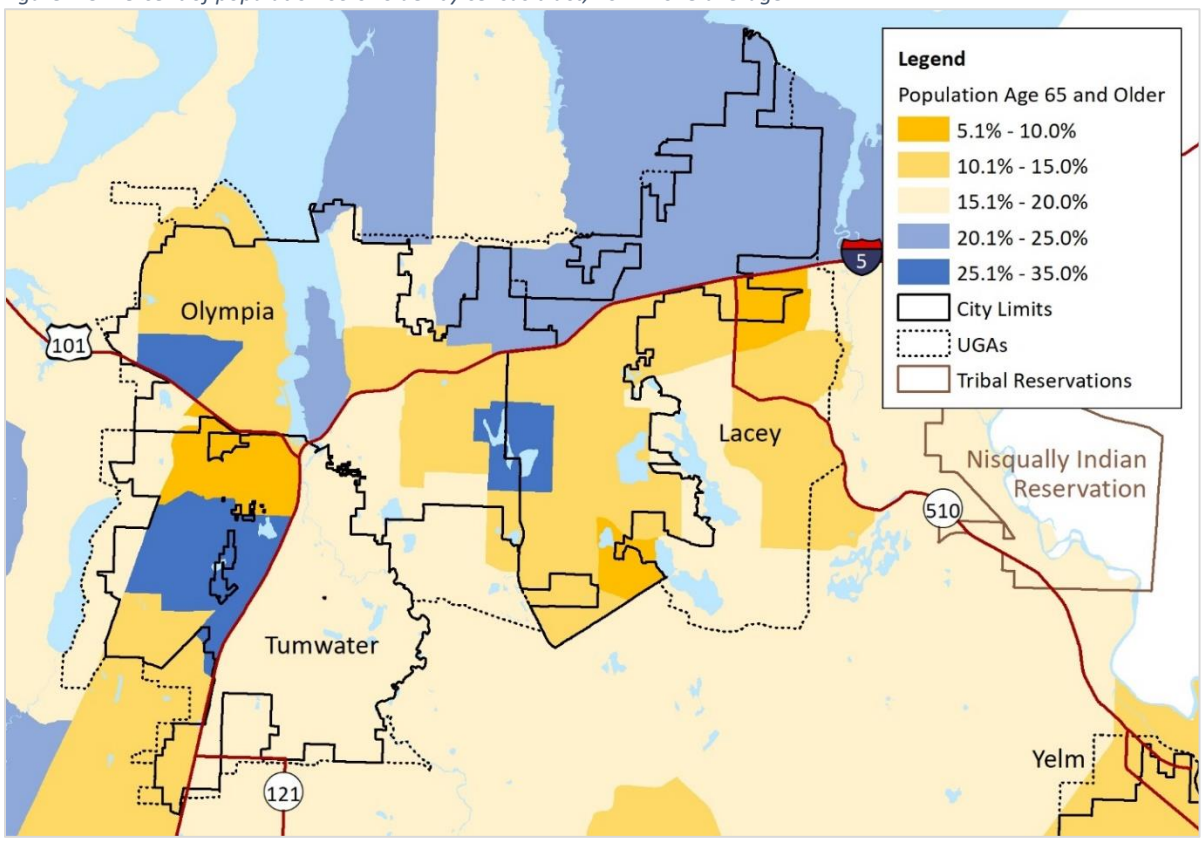

Figure 4-2. Thurston County senior population, 2045

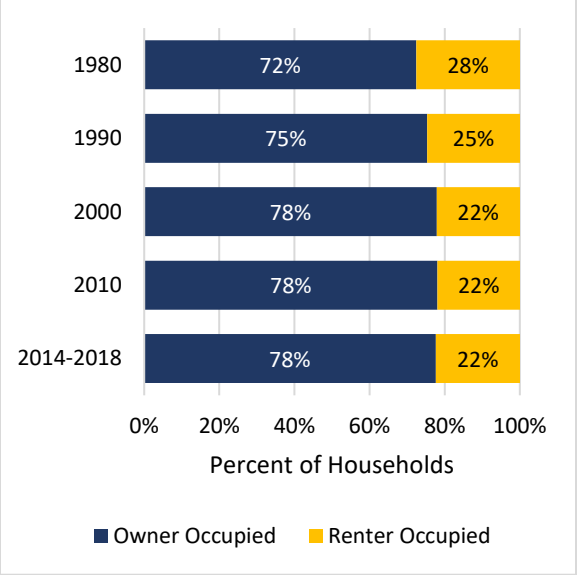
Source: Washington Office of Financial Management

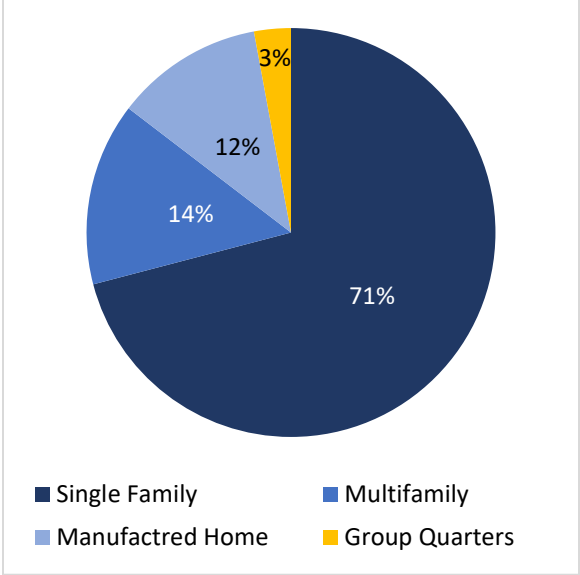
Figure 4-3 shows where the senior population lives based on census tracts. The census tracts near the Capital Medical Center in West Olympia, the Littlerock/Trosper Road area of Tumwater, and the Chambers Lake area in Lacey. There are also higher concentrations of seniors living in Lacey north of the freeway.

Figure 4-3. Percent of population 65 or older by census tract, 2014-2018 average



Source: U.S. Census Bureau American Community Survey

Since 2000, about 22 percent of the noninstitutionalized senior population in Thurston County rents their housing unit while 78 percent own it (Figure 4-4). While the percent of seniors renting has remained stable, the total number has increased. There are several apartment complexes and assisted living facilities in Lacey, Olympia in Tumwater targeted to people age 55 and older.



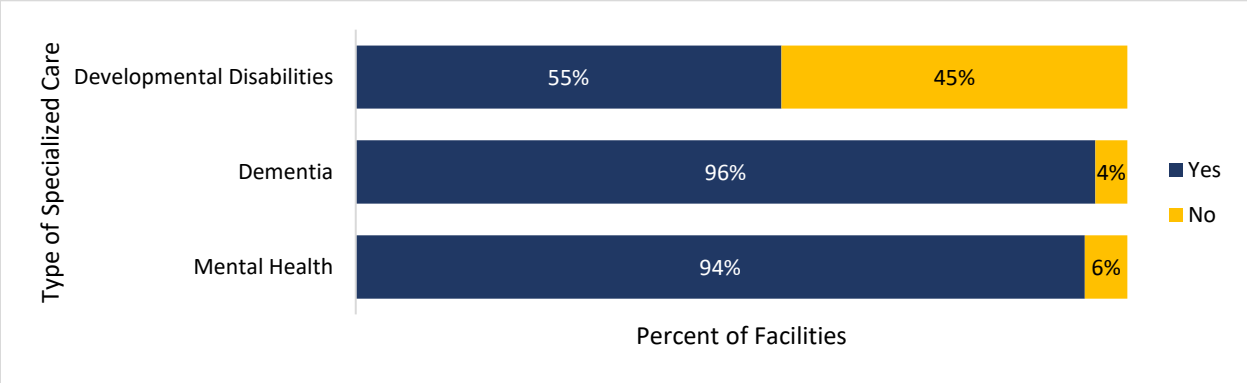
About 12 percent of seniors countywide live in manufactured housing or mobile homes (Figure 4-5) compared to nine percent for the county population as a whole. There are several manufactured home communities in Lacey, Olympia in Tumwater targeted to people age 55 and older.

Figure 4-4. Senior households in Thurston County by tenure, 1980-2018

Source: U.S. Census Bureau

Figure 4-5. Senior households in Thurston County by type of dwelling, 2014-2018 average

Source: U.S. Census Bureau American Community Survey



As of July 2, 2020, Thurston County is home to seven nursing home facilities with a total client capacity of 790 and 145 adult family homes with a total client capacity of 794 (Table 4-2). Some adult family homes offer specialized care for those with dementia, mental health issues, and developmental disabilities (Figure 4-6, next page). Specialized care is defined under state law, which sets standards a provider must meet to be classified as delivering such care.

Table 4-2. Adult family and nursing homes in Thurston County, 2020

Source: Washington State Dept. of Social and Health Services

Military Personnel and Veterans

The proximity of Joint Base Lewis-McChord (JBLM) to Thurston County impacts the number of military personnel and veterans who live in the region. Approximately 13,475 military personnel and veterans live in Lacey, Olympia, and Tumwater (Table 4-3). Service members who live off base are eligible to receive a basic housing allowance, ranging between $1,386 and $2,622 per month in 2020. The allowance varies based on the service member's location, rank, and the number of military dependents in their household. The basic housing allowance can be used for rental costs or a mortgage.

Forthcoming Military Housing Studies

There are two military-related housing studies anticipated to be released in 2020:

- *Housing Market Study by JBLM*
- *Off-Base Housing Study for Service Members by South Sound Military Communities Partnership*

These studies should provide clearer data on the housing needs of service members and their impact on the local housing market.

Table 4-3. Military personnel and veterans, 2014-2018 average

	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
Veterans	5,858	3,646	1,968	11,472	28,992
Military Personnel	1,388	280	335	2,003	3,900
TOTAL	**7,246**	**3,926**	**2,303**	**13,475**	**32,892**

People Experiencing Homelessness

Thurston County conducts a census of those experiencing homelessness each year at a single point in time. Between 2015 and 2019, those experiencing homelessness grew from 476 to 800 people – a 68 percent increase (Figure 4-7) during the same period. The number of people who are unsheltered – sleeping outside, in a tent, car, or other place not meant for human habitation – increased from 34 percent of those experiencing homelessness in 2015 to 49 percent in 2019.

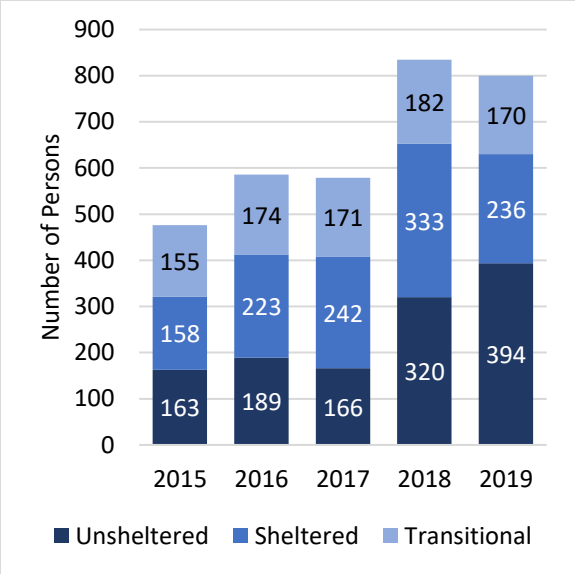

Figure 4-8 examines where those who experience homelessness shelter and includes two more categories of people who are housing insecure: those living in a jail or medical institution that will be released to a homeless situation and those who are temporarily staying with friends or family. When taking into consideration these additional populations whose housing may be tenuous, an additional 344 people could be considered to experience homelessness.

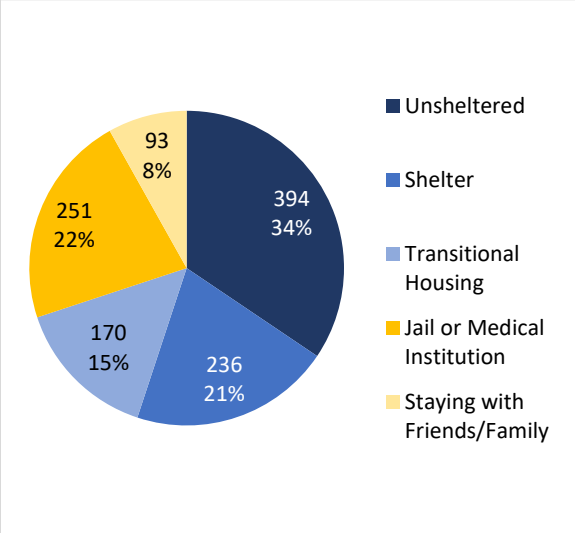
About 34 percent of those experiencing homelessness are unsheltered. Another 21 percent can be found in shelters and 15 percent in transitional housing. Thirty percent are incarcerated, in a medical institution, or are temporarily staying with friends or family.

Counting Those Experiencing Homelessness



Not everyone experiencing homelessness can be found or chooses to participate in the annual Point-in-Time census. Counting those staying in shelters or an institution is easier than counting those living in a tent, in a car, or another unsheltered location. According to the Thurston County Homeless Crisis Response Plan, there are likely 800-1,000 unsheltered people countywide – 2-3 times as many unsheltered people as reported in the 2019 point-in-time census.

Figure 4-7. Homelessness in Thurston County, 2015-2019

Source: Thurston County Public Health and Social Services

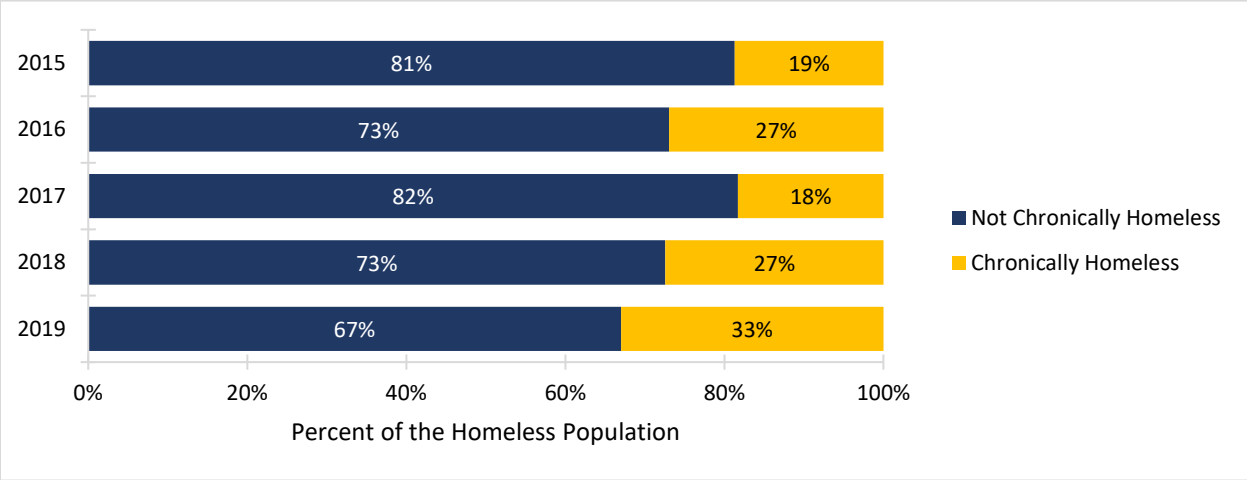


Figure 4-8. Where the homeless shelter in Thurston County, 2019

Source: Thurston County Public Health and Social Services

In 2019, 33 percent of people experiencing homelessness were considered chronically homeless (Figure 4-9). To be chronically homeless means a person has a disability and has also either been homeless for more than one year or has been homeless at least four times in the last three years.

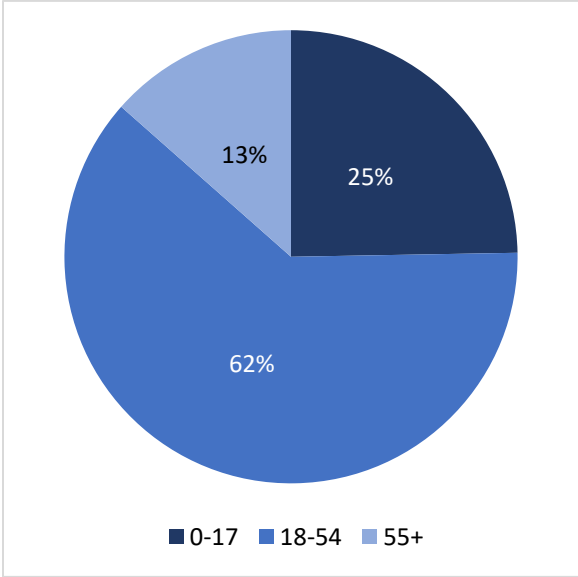

Figure 4-9. Chronic homelessness in the Thurston County homeless, 2019

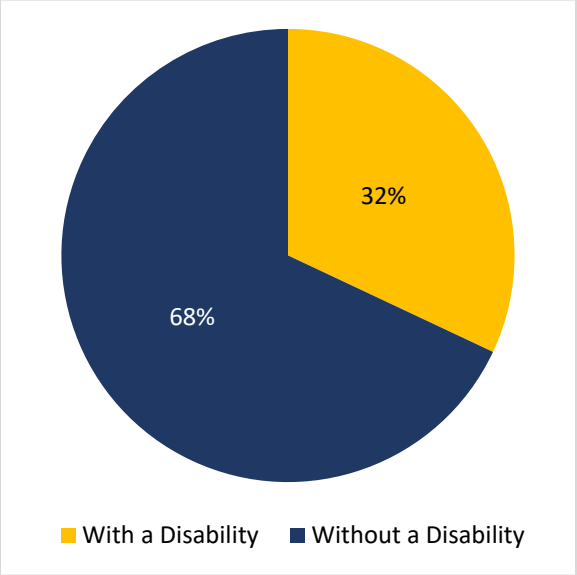
Source: Thurston County Public Health and Social Services



Thurston County reports that between July 2018 and June 2019, 1,886 households (2,345 people total) received assistance through a housing program. Housing programs include emergency shelter placement, rapid re-housing and homeless prevention assistance, transitional housing placement, or a permanent housing placement with or without supportive services. Of those that received assistance through a housing program, one in four was a minor (Figure 4-10), but the majority were single adults without children. Nearly one in three had some kind of disability (Figure 4-11, next page) with mental health issues and substance use being the most common types of reported (Figure 4-12, next page).

Figure 4-10. Age of those experiencing homelessness in Thurston County, 2019

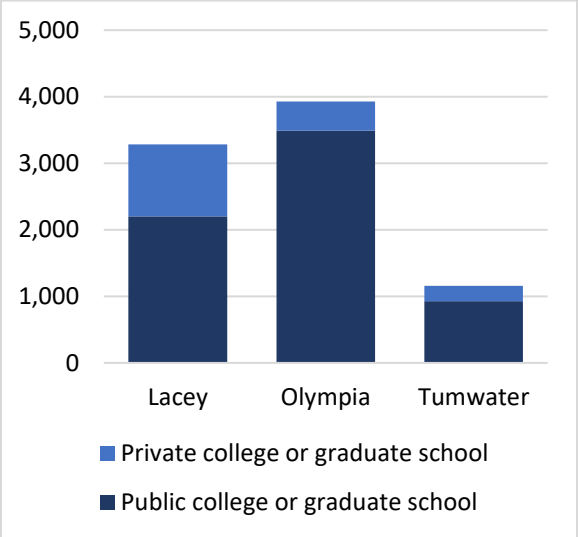
College Students



Approximately 16,800 Thurston County residents are currently enrolled in a college or university. Only a small percent of students (about 6 percent) live in a dormitory or other group quarters setting (Figure 4-13). Over 12,000 students – nearly three quarters – live in a family household (i.e. with another relative). The remainder live in non-family households, either alone (6 percent) or with one or more unrelated persons (15 percent). Most college students live in Olympia and Lacey (Figure 4-14).

Figure 4-13. Household type for college students, 2014-2018 average

Source: U.S. Census Bureau American Community Survey PUMS

Figure 4-14. Residents enrolled in college, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

About 2,600 college students in Thurston County live below the poverty level (Table 4-5). This is especially true for students living in non-family households; more than 40 percent live below the poverty line. Countywide, only five percent of the population live in poverty. While many students living on their own may still receive support from a parent or guardian – a form of income not included in poverty calculations – this still underscores the need for affordable housing for students living off campus.

Table 4-5. Poverty rate for Thurston County college students, 2014-2018 average.

Household Type	Total Households	Households in Poverty	Poverty Rate
Dorm or Other Group Quarter	913	35	4%
Family	12,274	1,114	9%
Non-family 2+ Person	2,535	1,032	41%
Living Alone	1,052	417	40%
TOTAL	**16,774**	**2,598**	**100%**

Chapter 5. Housing Supply

Trends and Projections

Lacey, Olympia, and Tumwater, and their unincorporated urban areas have a combined housing inventory of 83,200 dwelling units (Figure 5-1). This is about two-thirds of Thurston County's housing stock. Between 2020 and 2045, Thurston Regional Planning Council (TRPC) projects 34,000 new units will be built to accommodate the region's growing population.

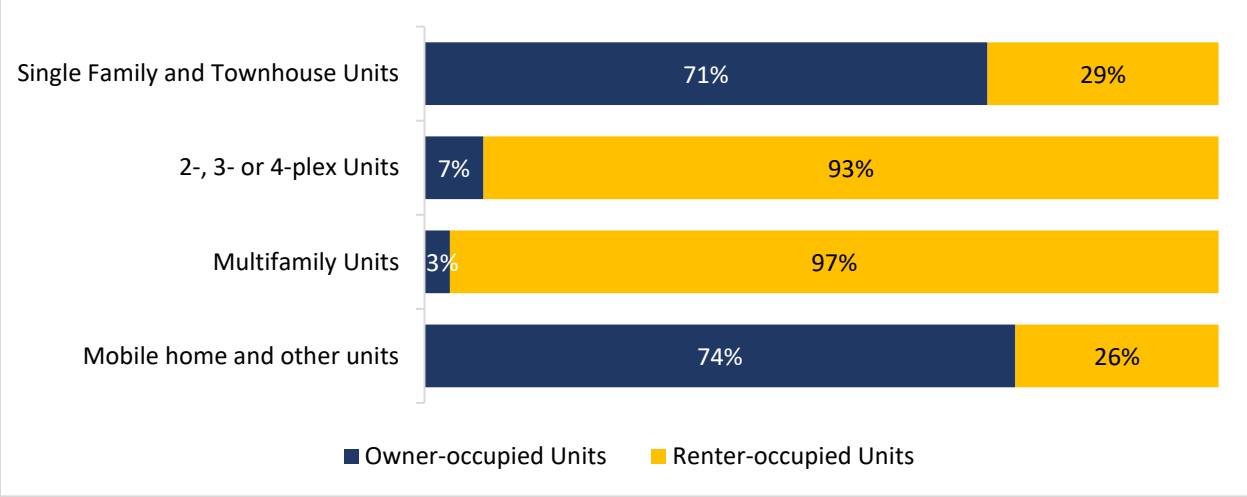
Figure 5-1. Estimated and projected housing units in Lacey, Olympia, Tumwater, and their UGAs, 2010-2045

Source: Thurston Regional Planning Council

Building Types and Density

The Lacey, Olympia, and Tumwater urban area is generally suburban in nature. Most dwellings units – 64 percent – are detached single family or townhouse (single-family attached) units (Table 5-1). TRPC projects that the single-family units will continue to be the primary housing type over the next 25 years, although multifamily units will make up an increasing share of new housing.

Roughly half of Lacey, Olympia, and Tumwater households rent. About 60 percent of renters are in multifamily units (duplex, triplexes, and apartments) with the remainder in single-family or manufactured homes. Single family dwellings, townhouses, and manufactured and mobile homes are predominantly owner-occupied while buildings with two or more units are almost exclusively rented (Figure 5-2).



Manufactured homes make up a small percentage of Lacey, Olympia, and Tumwater's housing stock but are and important form of housing for many seniors and low-income households. TRPC estimates that about 75 percent of manufactured homes are in manufactured home communities where 10 or more units are on the same property. Since they do not own the land the manufacture home is sited on, many unit owners are vulnerable to displacement should the landowner decide to sell the property.

Table 5-1. Occupied housing units by building type, 2014-2018 average

Building Type	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
Single Family and Townhouse Units	13,288	13,025	6,105	32,418	78,390
2-, 3- or 4-plex Units	1,795	2,174	676	4,645	6,561
Multifamily Units	2,735	6,493	1,906	11,134	13,277
Mobile home and other units	893	659	649	2,201	9,842
Total Occupied Units	**18,711**	**22,351**	**9,336**	**50,398**	**108,070**

Source: U.S. Census Bureau American Community Survey

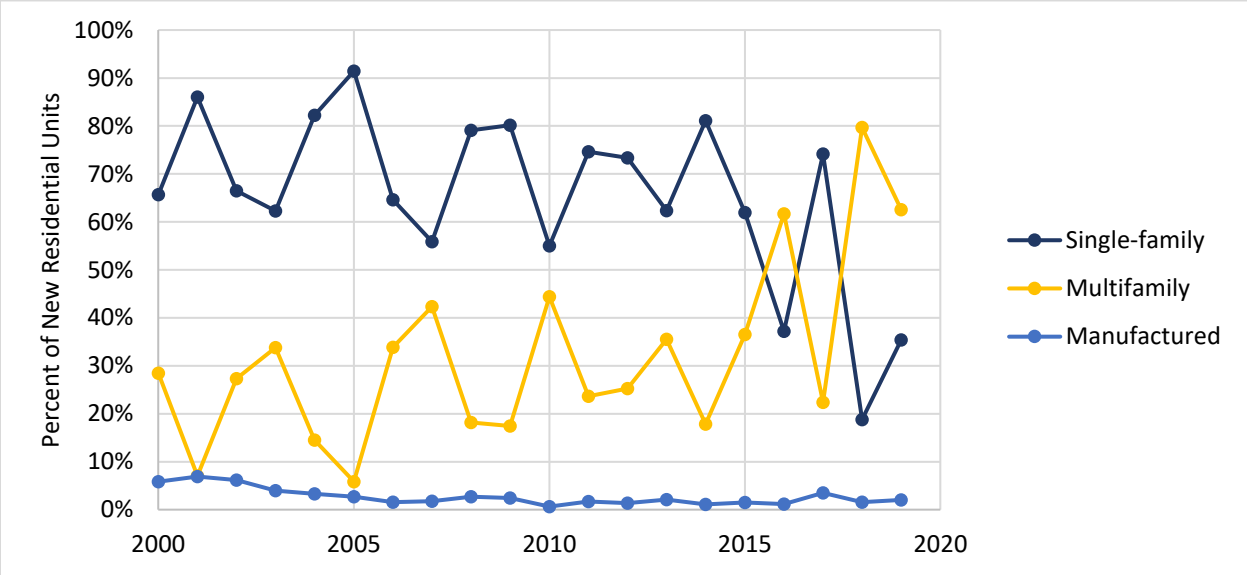


Figure 5-2. Occupied housing units in Lacey, Olympia, and Tumwater combined by building type and tenancy, 2014-2018 average

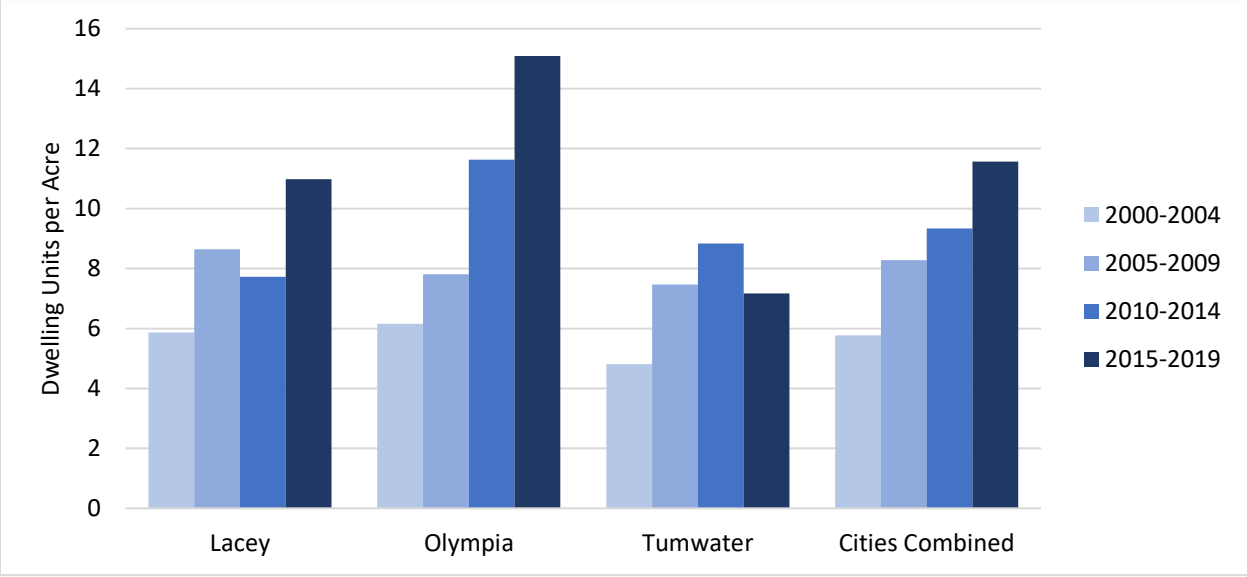
Source: U.S. Census Bureau American Community Survey



There has been a general trend towards development in zones that allow higher densities of development over the past 20 years (see Appendix A for more information). Multifamily unit construction has increased from about 30 percent of new units in 2000 to over 60 percent in 2019 (Figure 5-3). In addition to the increasing number of multifamily units being constructed, changes to zoning to allow more homes per acre and more infill and redevelopment projects have led to an overall increase in housing densities across the three cities and their urban growth areas (UGAs) (Figure 5-4).

Figure 5-3. Housing types permitted in Lacey, Olympia, and Tumwater, 2000-2019

NOTE: *Multifamily includes townhomes and condominiums.*

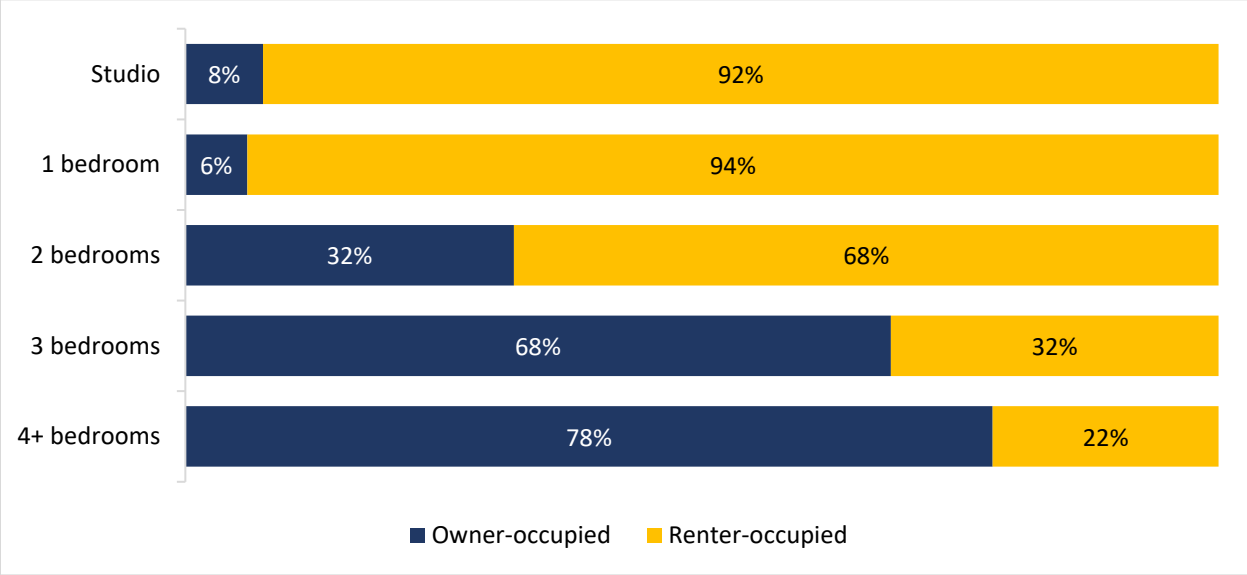
Figure 5-4. Density of new residential development, 2000-2019

Source: Thurston Regional Planning Council

Unit Size

Bedrooms



About 39 percent (19,465) of the housing stock in Lacey, Olympia, and Tumwater consists of three-bedroom units (Table 5-2). About 30 percent (15,031) is two-bedroom units. Nearly all studio and one bedroom units are rented as are most two bedroom units (Figure 5-5).

Table 5-2. Occupied housing units by number of bedrooms, 2014-2018 average

	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
Studio	241	907	154	1,302	1,915
1 bedroom	1,547	3,301	1,053	5,901	9,024
2 bedrooms	5,348	7,206	2,477	15,031	25,912
3 bedrooms	8,201	7,402	3,862	19,465	50,232
4+ bedrooms	3,374	3,535	1,790	8,699	20,987

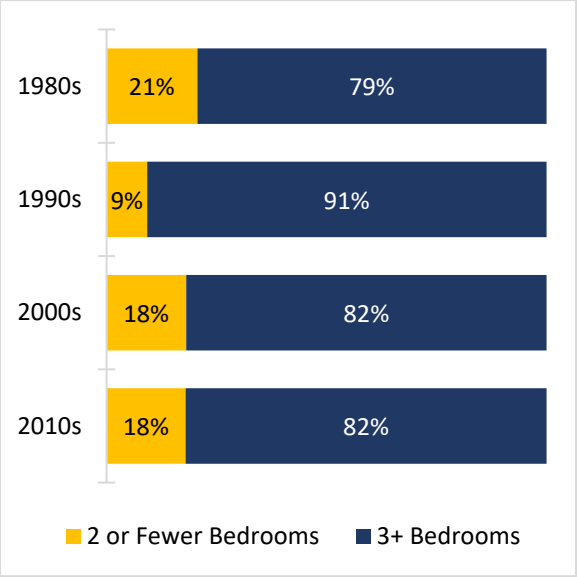
Source: U.S. Census Bureau American Community Survey

Figure 5-5. Occupied housing units in Lacey, Olympia, and Tumwater combined by number of bedrooms and tenancy, 2014-2018 average

Source: U.S. Census Bureau American Community Survey



The Thurston County Assessor's Office provides data on the number of bedrooms for single-family, duplex, triplex, and fourplex units (Table 5-3). Since the 1980s, the percent of two-bedroom or smaller units has declined slightly, and the average number of bedrooms per dwelling unit increased over the same time period (Figures 5-6 and 5-7).

Table 5-3. Housing units built in Lacey, Olympia, and Tumwater combined by number of bedrooms, 1980-2019

Decade	One or Fewer Bedroom	Two Bedrooms	Three Bedrooms	Four or More Bedrooms	TOTAL Units
1980s	280	1,097	4,718	585	**6,680**
1990s	215	648	7,206	1,279	**9,348**
2000s	285	1,629	5,520	3,151	**10,585**
2010s	234	797	2,357	2,352	**5,740**

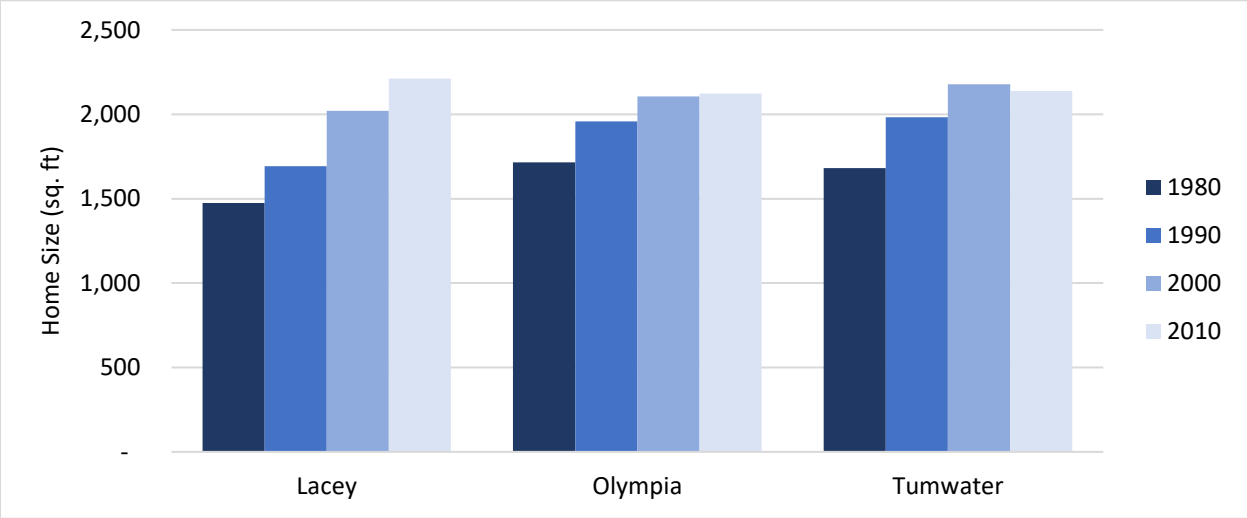
Square Footage

In the 1980s, more than half of all homes constructed were less than 1,500 square feet in size (Figure 5-8 and Table 5-4). In the 2010s, this dropped to just 11 percent of the total dwelling units built that decade. The total number of homes with 2,000 square feet or more have increased from just 17 percent in the 1980s to 56 percent during the 2010s. Over the last four decades, the average home size in Lacey has grown the most – from 1,475 square feet in the 1980s to 2,211 in the 2010s (Figure 5-9, next page). Tumwater saw a slight decrease in home size between the 2000s and the 2010s, but average home size remains more than 2,000 square feet.

Figure 5-8. Home size in Lacey, Olympia, and Tumwater combined, 1980-2019

NOTE: *Data excludes manufactured homes and apartments with five or more units.*
Source: Thurston County Assessor's Office



According to the University of Washington's Washington Center for Real Estate Research (WCRER), the average size of a one bedroom apartment is 678 square feet while a two bedroom apartment is 859 square feet in 2020. The average apartment size is less than half that of single-family, duplex, triplex, or fourplex units.

Table 5-4. Housing units in Lacey, Olympia, and Tumwater combined by home size and decade

Unit Size (square feet)	1980s	1990s	2000s	2010s
Less than 1,500	3,566	3,072	1,905	604
1,500-1,999	1,983	3,654	3,436	1,942

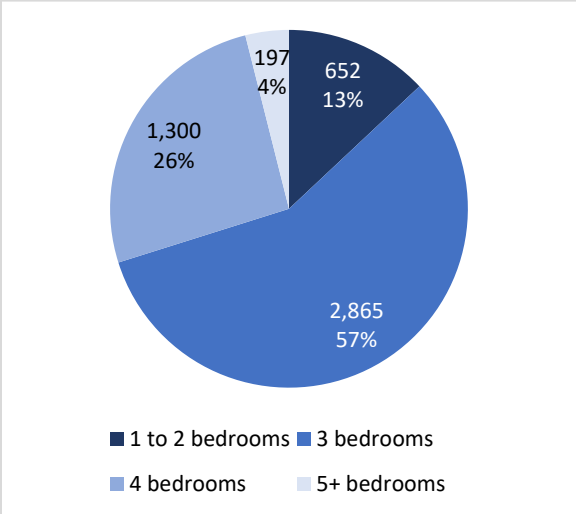
Market Conditions

Home Values and Affordability



The Northwest Multiple Listing Service (NWMLS) reports that the average home sale price in Thurston County was $340,200 in 2018, with prices ranging from $291,700 for a two-bedroom home to $442,700 for a home with five or more bedrooms (Figure 5-10). Zillow – which also tracks home sale prices – estimates that sale prices have continued to increase, by about 8 percent per year – since 2018. Only 13 percent of the housing units sold in Thurston County in 2018 were one- or two-bedroom units (Figure 5-11).

Figure 5-10. Average housing unit sale price in Thurston County, 2018

Source: Northwest Multiple Listing Service

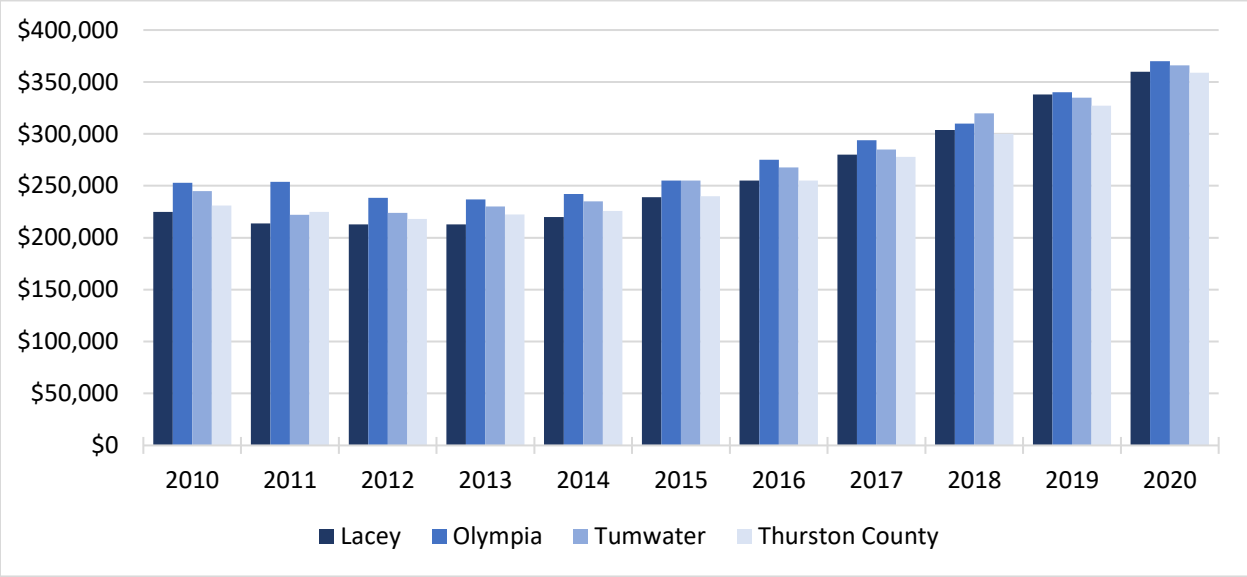


Figure 5-11. Housing units sold in Thurston County, 2018

Source: Northwest Multiple Listing Service

The median home sale price in Thurston County has been on an upward trajectory (Figure 5-12). As of July 2020, Thurston County's median home sale price was $359,000. Median home sale prices were highest in Olympia followed by Tumwater. Both exceed the county average, by 7.9 percent and 2.1 percent respectively. Home sale prices in Tumwater are about 2.6 percent below the county average. Adjusted for inflation, the average home sale price has more than doubled since 1990, increasing about 2.8 percent per year.

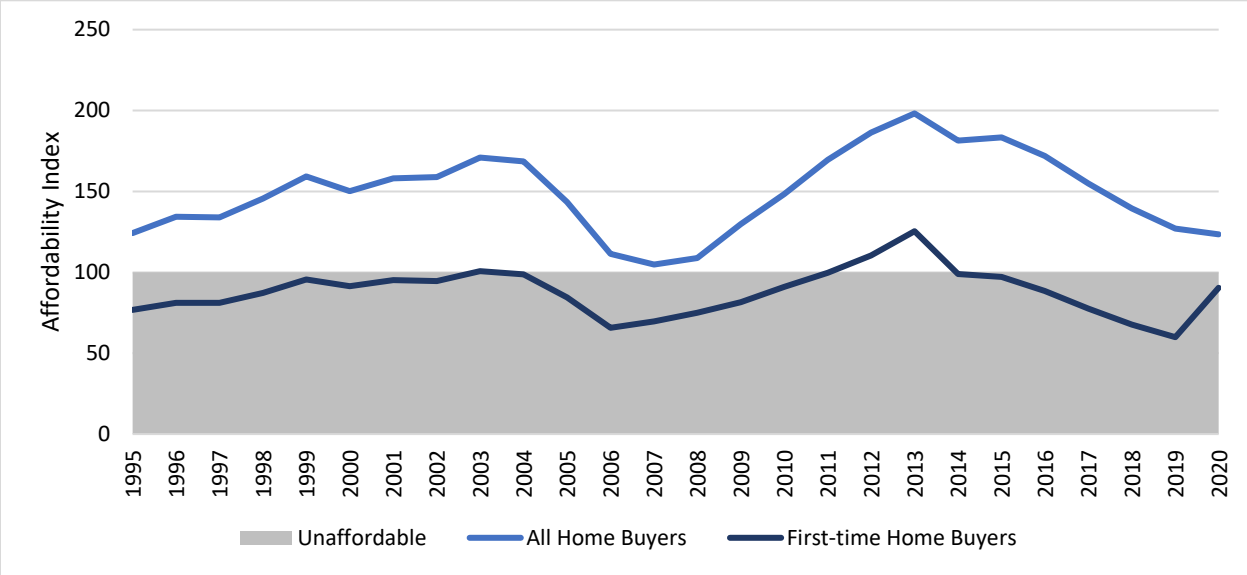

Figure 5-12. Median home sale price in July, 2010-2020

NOTE: *Figures are for July of each year and are not adjusted for inflation. Location of sale is based on the address entered by the listing agent. Location of homes sold may not be within the actual city limits.*
Source: Northwest Multiple Listing Service

Increasing home prices have affected housing affordability. The Washington Center for Real Estate Research's (WCRER) Homeownership Affordability Index tracks the ability for a household earning the median income to afford a median-priced home. WCRER also tracks the index of first-time home buyers, assuming a lower income (70 percent of the median), lower home price (85 percent of the median), and lower down payment (10 percent). For most of the past 20 years, Thurston County's housing has been considered affordable overall, but not for first-time home buyers (Figure 5-13, next page).

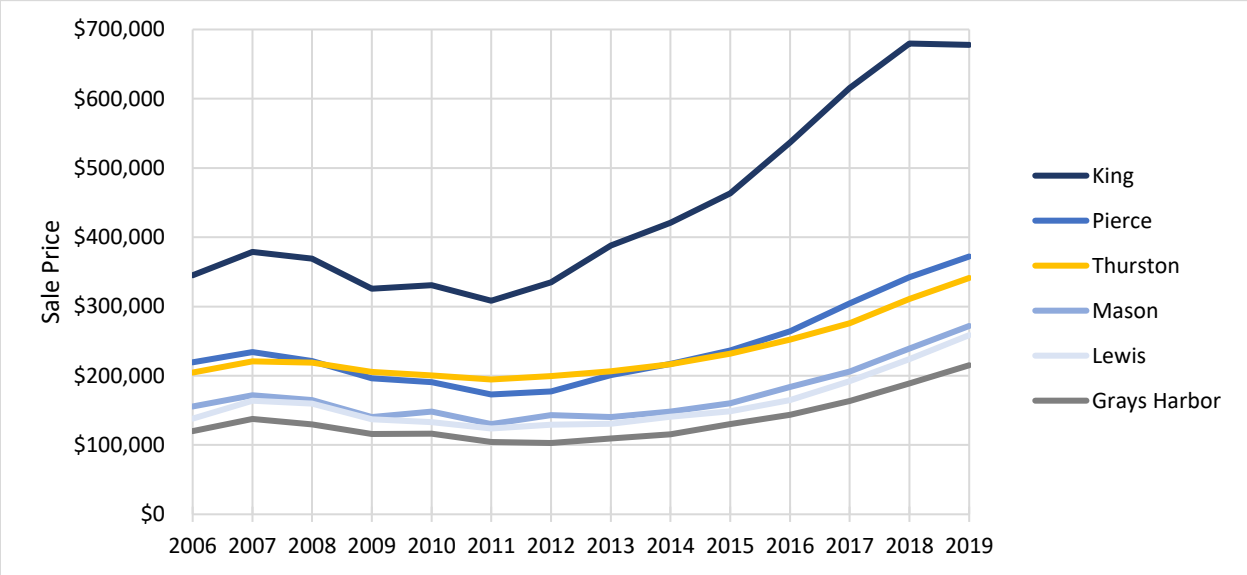

Figure 5-13. Thurston County Homeownership Affordability Index, 1995-2020

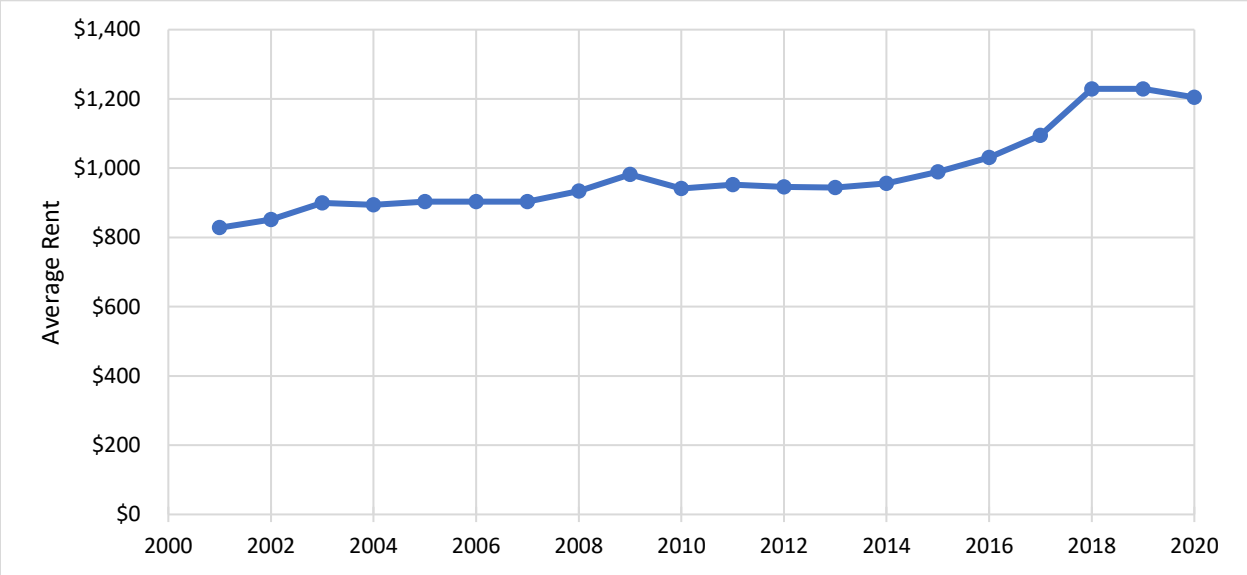
Source: University of Washington

Figure 5-14 shows inflation-adjusted home sale prices for Thurston and adjacent counties since 2006. Historically, home sale prices in Thurston County have been very close to those in Pierce County. Since 2014 that trend has shifted, with prices in Pierce rising slightly faster than Thurston. Home prices in both counties are highly influenced by the Seattle housing market. The dramatic increase in prices in King County (up 120 percent since 2011) forces Seattle workers to look for more affordable housing further south. This increased pressure in Tacoma's housing market subsequently affects demand further south in Thurston County.

Figure 5-14. Median home sale price (adjusted for inflation), 2006-2019

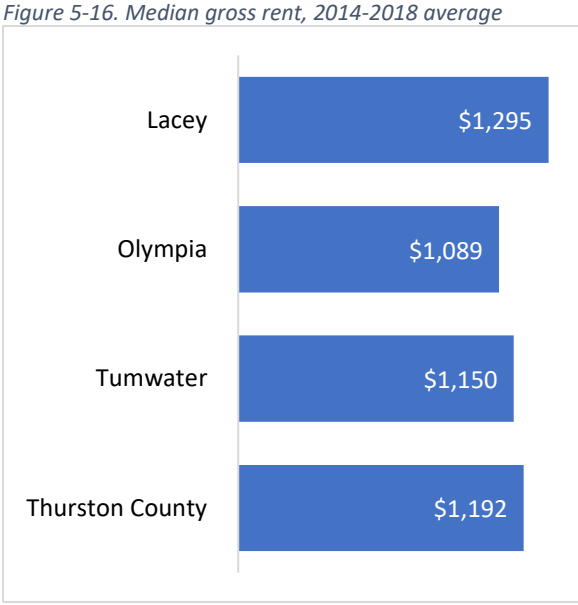


Source: University of Washington

Rents and Apartment Vacancy Rates

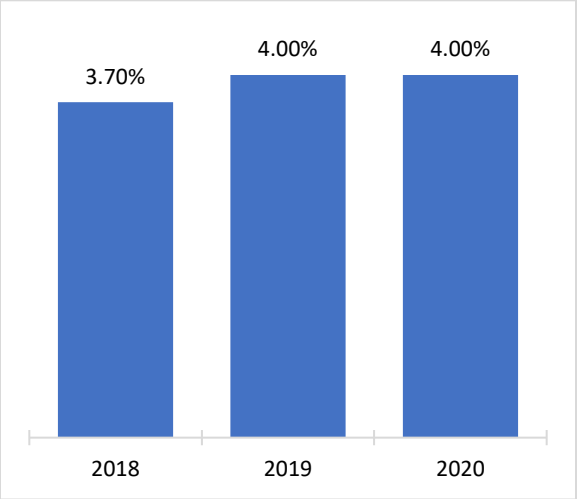
In 2020, the average apartment rent in Thurston County is $1,124 for a one-bedroom unit and $1,212 for a two-bedroom unit. Like home prices, rents have been increasing faster than inflation (Figure 5-15). Since 2001, average rents increased by over $370 in constant 2020 dollars, about 2.0 percent per year. Unlike housing prices, rents did not decrease significantly during the great recession.

Figure 5-15. Average rent in Thurston County (inflation-adjusted), 2001-2020



NOTE: *Due to a change in methodology, 2018-2020 data is not directly comparable to data from previous years.*
Source: University of Washington

Figure 5-16 examines the median gross rent. Gross rent is the contract rent plus the estimated average monthly cost of utilities and fuels if paid by the renter (or paid for the renter by someone else). Lacey has the highest median gross rent while Olympia had the lowest.



A healthy rental market has about a five percent vacancy rate, with lower vacancy rates indicating a shortage of housing. A five percent vacancy rate allows people options to move as needed and allows for a healthy level of competition. The average vacancy rate for apartments in Thurston County is 4 percent indicating there is unmet demand (Figure 5-17, next page). Vacancy rates are lower (3.2 percent) for one-unit apartments.

Figure 5-16. Median gross rent, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Figure 5-17. Apartment vacancy rate in Thurston County, 2018-2020

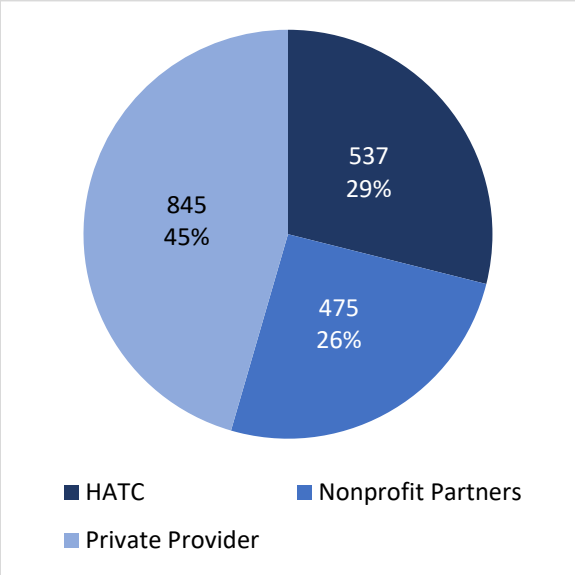
Subsidized Housing Units

Subsidized housing is a critical resource for the lowest income households. The Department of Housing and Urban Development (HUD) sets income limits that determine eligibility for assisted housing programs including: Public Housing; Section 8 project-based; Section 8 Housing Choice Voucher; Section 202 housing for the elderly; and Section 811 housing for persons with disabilities programs. HUD develops income limits based on median family income estimates and fair market rent area definitions for each metropolitan area, parts of some metropolitan areas, and each non-metropolitan county. In 2020, Thurston County's area median family income is $86,700, meaning a family of four with extremely low income – has an income less than $30,000 (Figure 5-18).

Figure 5-18. Thurston County income limits for receiving federal housing assistance, 2020

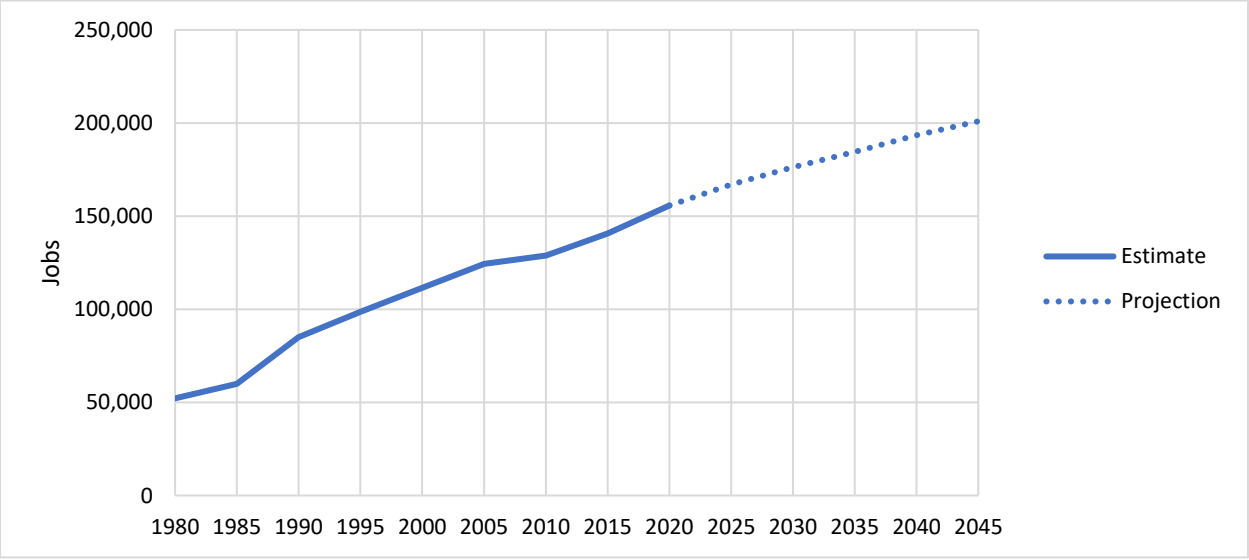


Source: U.S. Dept. of Housing and Urban Development

Currently, the Housing Authority of Thurston County (HATC) assists 1,989 households with rental assistance vouchers. The number of households HATC assists is limited by two factors: the number of rental assistance vouchers and funding. HATC currently has 2,045 rental assistance vouchers but cannot use them all due to limited federal funding. This is because rents rise faster than incomes, and it costs more to support the average household. According to HATC, the average monthly subsidy cost per housing unit is more than $650. About 75 percent of voucher holders are either elderly or disabled, and more than 85 percent have an income of 30 percent or less of the area median family income.

Due to the high demand for housing assistance, HATC operates a waiting list. The list was last opened in January 2020 to new listees; prior to this, the list last opened in 2015. In Thurston County, there are approximately 1,857 units available at below-market rents. Nearly half of all units are supplied by a private provider (Figure 5-19). Washington State provides incentives – in the form of tax breaks or loans – for developers to include low-income housing in their projects. Unlike HATC housing, these units may be converted to market-rate housing after the incentives expire, typically after 20-30 years.

Figure 5-19. Subsidized housing units in Thurston County by owner, 2020



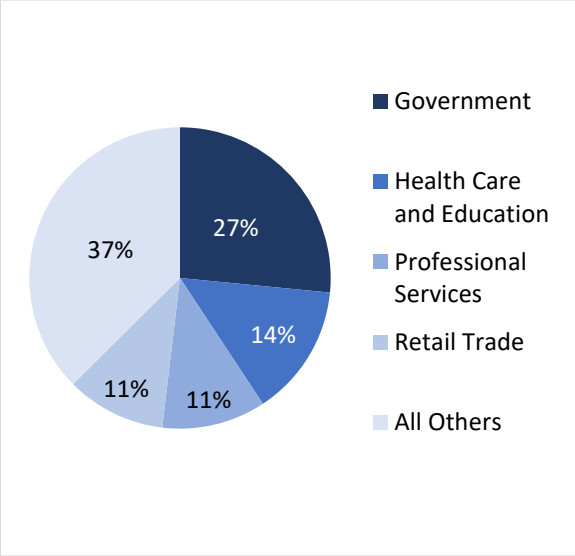
Source: Housing Authority of Thurston County

Chapter 6.
Local Workforce Characteristics

Estimates and Forecast

Total 2017 employment in Thurston County was 148,700 jobs (Figure 6-1). Eighty-two percent of jobs – 121,800 – are located in Lacey, Olympia, and Tumwater and their unincorporated urban growth areas. By 2045, total employment is projected to increase 1.1 percent per year.

Figure 6-1. Thurston County employment, 1980-2045



Source: U.S. Bureau of Economic Analysis, Thurston Regional Planning Council

Government employment, including federal, state, local, and public education, makes up over a quarter of Thurston County's employment (Figure 6-2). The next largest industries are health care and education, professional services, and retail trade. The remaining industries make up just one third of county employment.

Employment industry varies by jurisdiction. Lacey has the largest number of transportation and warehousing employees, Olympia has a greater number and proportion of health care workers, and Tumwater has the most manufacturing and wholesale trade employees. While Olympia has the most state employees, state employment as a proportion of total employment is greatest in Tumwater.

Figure 6-2. Thurston County total employment by industry, 2017

Source: U.S. Census Bureau Economic Analysis

Wages and Self-Sufficiency

Wages vary considerably by employment industry. Average wages for employees affected by state and federal unemployment insurance laws were $54,500 in 2019 (Table 6-1). Government – Thurston County's largest employment industry – paid out over $2.5 billion in wages, about $66,212 per employee. Some of the lowest paying industries include retail trade, accommodation and food services, and arts, entertainment, and recreation. Overall, wages are highest in Tumwater, followed by Lacey and Olympia.

Covered Employment

Covered employment measures all employed persons covered under the Unemployment Insurance Act. The measure accounts for approximately 75% of the total employment in Thurston County, and includes both part-time and temporary positions. Job categories not measured in the count include self-employed workers, proprietors, CEOs, military, and other non-insured workers. If a worker holds more than one job, each position is reported separately.

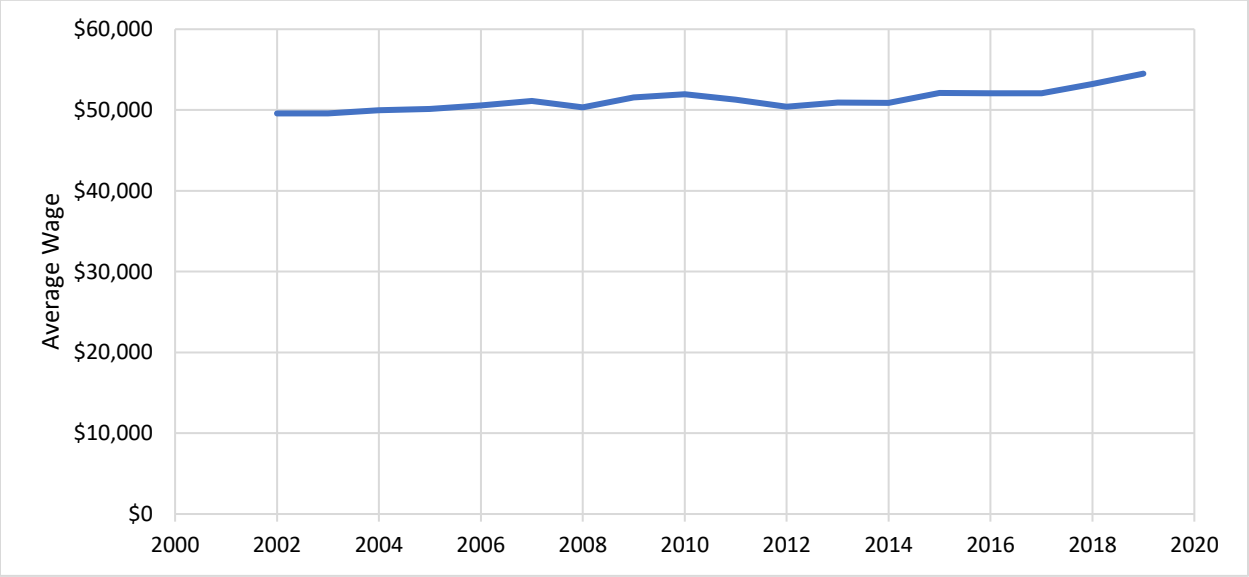


Table 6-1. Thurston County covered employment and wages, 2019

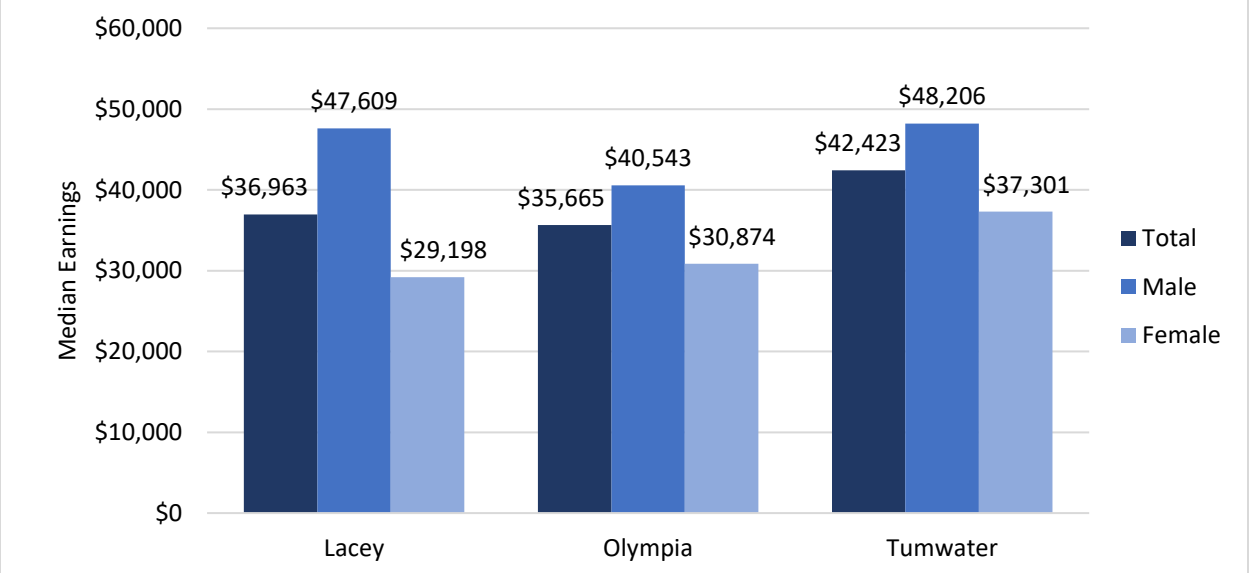
NAICS Industry Category	Total Wages Paid	Covered Employment	Covered Wage
Government	$2,562,598,405	38,703	$66,212
Healthcare and social assistance	$856,430,847	15,655	$54,707
Retail trade	$430,509,161	12,663	$33,997
Construction	$397,748,304	6,184	$64,319
Professional and technical services	$365,230,721	4,829	$75,633
Accommodation and food services	$205,407,281	9,341	$21,990
Administrative and waste services	$259,394,779	6,288	$41,252
Finance and insurance	$190,168,264	2,504	$75,946
Information	$156,197,850	1,685	$92,699
Management of companies and enterprises	$70,055,637	915	$76,564
Utilities	$21,670,912	196	$110,566
Other 9 Industries	$932,341,966	19,341	$48,205
Total	**$6,447,754,127**	**118,304**	**$54,502**

Source: Employment Security Department



When adjusted for inflation, wages have risen 9.9 percent over the past 17 years (about 0.6 percent per year) (Figure 6-3). Median earnings are highest for people living in Tumwater (Figure 6-4).

Figure 6-3. Thurston County average wage, 2002-2019 (adjusted for inflation)

Source: Employment Security Department

Figure 6-4. Median earnings, 2014-2018 average

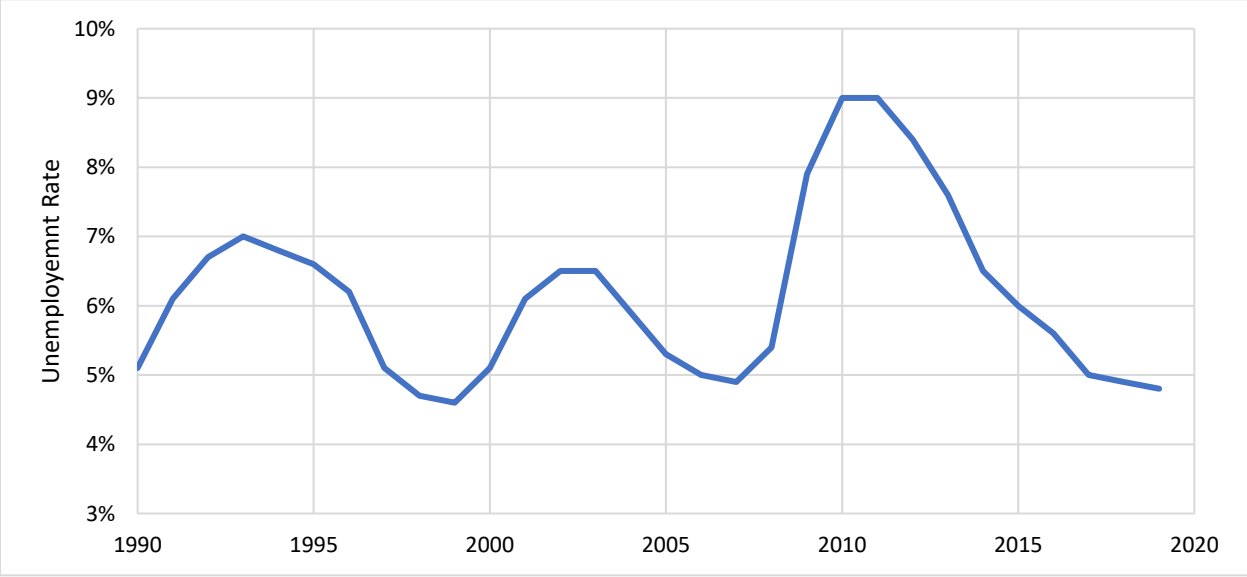
Source: U.S. Census Bureau American Community Survey

The University of Washington publishes a "Self-Sufficiency Standard," defined as the amount of income necessary to meet basic needs (including taxes) without public subsidies (e.g., public housing, food

stamps, Medicaid, or child care) and without private/informal assistance (e.g., free babysitting by a relative or friend, food provided by churches or local food banks, or shared housing).

The 2020 standard estimated that a four-person household (two adults and two children) would need to earn between $40,000 and $73,000 per year, depending on the age of the children (Table 6-2). For comparison, a household with one worker each in retail trade and accommodation or food services would earn $56,000, on average.

Table 6-2. Wages (per adult) needed for self-sufficiency, 2020



Household Composition	Hourly	Monthly	Annual	Monthly Housing Cost
One Adult, No Children	$12.06	$2,122	$25,466	$960
One Adult, One Child	$15.35-$23.09	$2,702-$4,064	$32,430-$48,762	$1,171
One Adult, Two Children	$15.23-$30.84	$2,680-$5,428	$32,159-$65,141	$1,171
Two Adults, No Children	$8.85	$3,115	$37,381	$960
Two Adults, One Child	$9.80-$13.53	$3,450-$4,761	$51,406-$57,135	$1,171
Two Adults, Two Children	$9.68-$17.33	$3,407-$6,100	$40,882-$73,206	$1,171

NOTE: *Caring for infants and young children requires more income than caring for school-aged children and teenagers.*
Source: University of Washington

Unemployment

Preliminary estimates for April 2020 estimated unemployment in Thurston County at 15.9 percent, the highest rate recorded by the Bureau of Labor Statistics since 1990. Prior to the COVID-19 pandemic, unemployment rates had been declining from their previous high of 9.0 percent in 2010 and 2011 during the Great Recession (Figure 6-5).

Figure 6-5. Annual average unemployment for Thurston County, 1990-2019

Source: U.S. Bureau of Labor Statistics

Estimates from the American Community Survey show that unemployment for residents of Lacey, Olympia, and Tumwater are 0.5 percent less than Thurston County as a whole, with Tumwater residents having the lowest rate (Table 6-3).

Table 6-3. Unemployment rate, 2014-2018 average

	Unemployment Rate
Lacey	6.8%
Olympia	6.3%
Tumwater	5.8%
Cities Combined	6.4%
Thurston County	6.9%

Source: U.S. Census Bureau American Community Survey

Commuting

Approximately 28 percent of Thurston County residents commute out of county for work. At 36 percent, Lacey has the highest proportion of its workforce commuting out of Thurston County (Figure 6-6). Olympia has the highest percentage of residents who live and work in the same city – 50 percent.

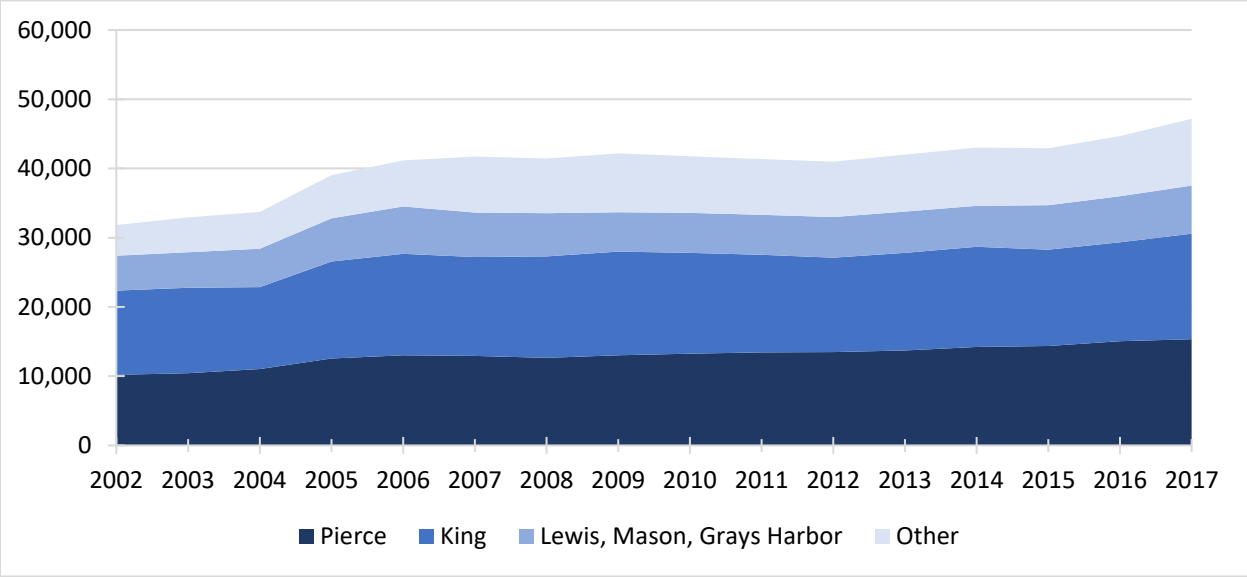


Figure 6-6. Place of work for residents of Lacey, Olympia, Tumwater, and Thurston County, 2014-2018

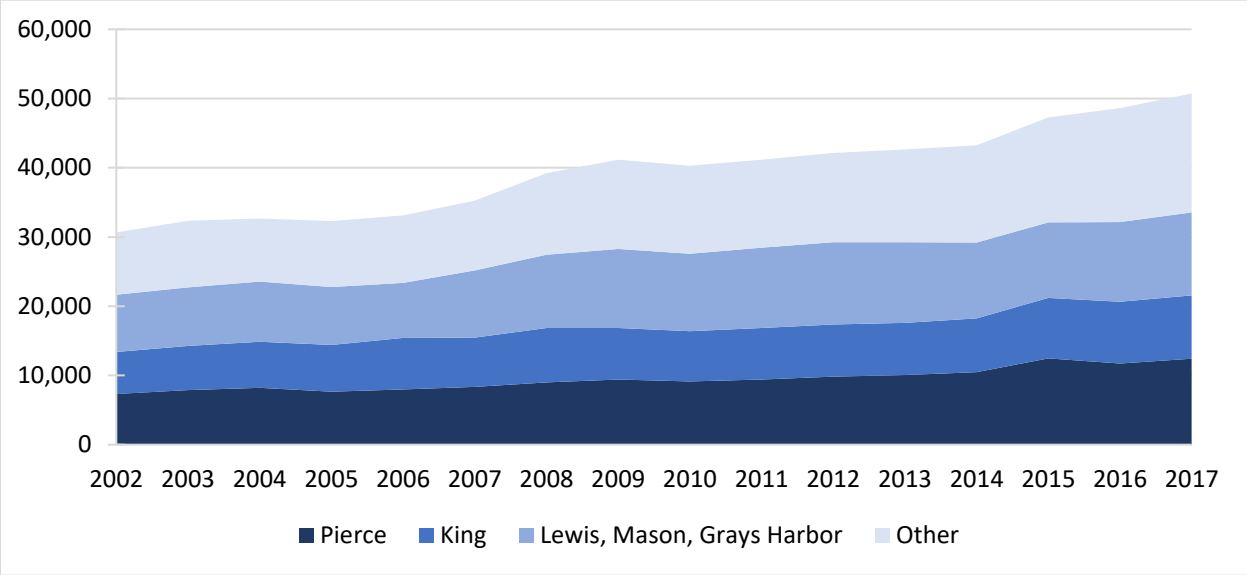
Source: U.S. Census Bureau American Community Survey



The number of both inbound and outbound commutes increased steadily between 2002 and 2017. Outbound commutes increased by 15,000 while inbound commutes increased by 20,000 during this time (Figures 6-7 and 6-8). In 2017, Pierce County was both the largest destination for outbound commuters (13.8 percent) and the largest source of inbound commuters (10.9 percent). King County matched Pierce County as a significant destination for outbound commuters (13.8 percent) but is a less significant source of inbound commuters (8.0 percent).

Figure 6-7. Commutes from Thurston County (outbound), 2002-2017

Source: U.S. Census Bureau LODES

Figure 6-8. Commutes to Thurston County (inbound), 2002-2017

Source: U.S. Census Bureau LODES

People typically commute out of county for higher wage jobs. Average earnings for Thurston County residents who work in county were about $46,200 in 2014-2018 compared to $56,800 for commuters to Pierce County, and $63,600 for commuters to King County (Table 6-4).

Table 6-4. Average wage earnings by county of residence and county of work, 2014-2018 average

County of Residence	County of Work	Average Earnings
Outbound Commuters		
Thurston	Pierce	$56,800
Thurston	King	$63,600
Inbound Commuters		
Pierce	Thurston	$51,300
King	Thurston	$69,900
Non-Commuters		
Thurston	Thurston	$46,200
Pierce	Pierce	$45,700
King	King	$71,000

Chapter 7.
Gap Analysis

The gap analysis evaluates the alignment between Lacey, Olympia, and Tumwater's housing inventory and the housing needs of the three cities' residents. The gap analysis helps planners identify the amount and the type of housing needed over the next 25 years to ensure residents will have access to affordable housing.

A household's current housing may not meet their needs for several reasons, including:

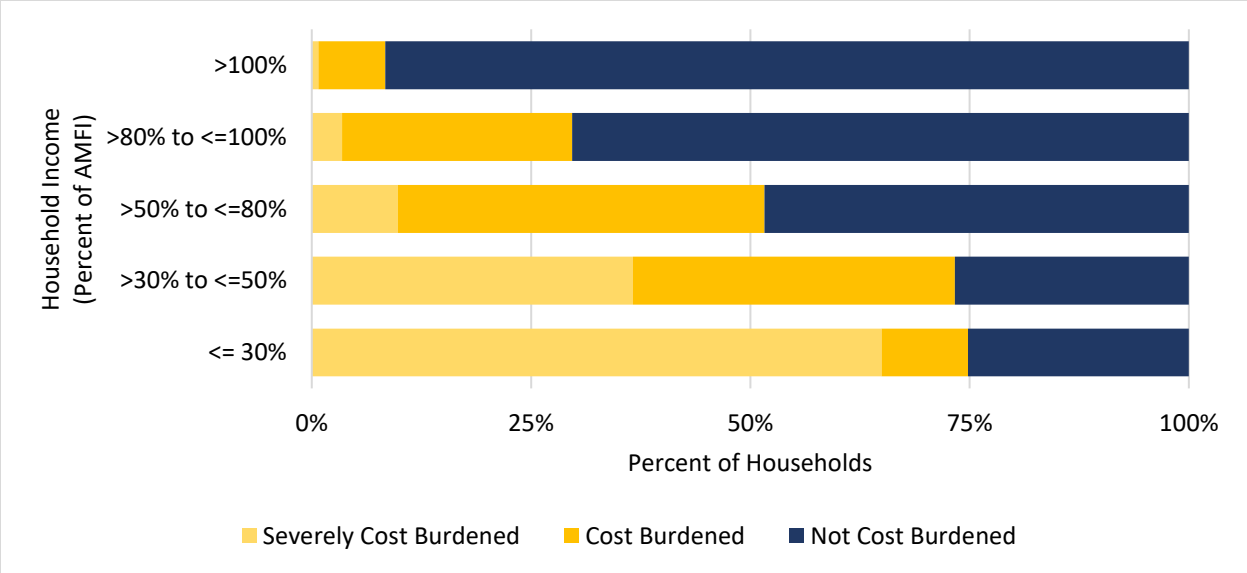
- **Affordability**. The household may not be able to afford the unit. This could result from a lack of more affordable housing options or a change in income or employment.
- **Housing Size**: The dwelling may be too small (overcrowding) or too large for the household's current needs.
- **Substandard Housing**. The unit may lack key plumbing or kitchen facilities to make it fit for habitation.
- **Other Needs**: The household may be looking for a unit that better suits their needs, such as one with lower maintenance costs, ADA accessibility, or one that allows them to build equity.
- **Experiencing Homelessness:** The household may currently lack housing.

This chapter examines some of these factors and provides estimates of the number of households whose housing does not meet their needs for one reason or another. This information can then be used to identify actions to reduce the gap between housing needed and available housing when developing the Housing Action Plan.

Housing Affordability

This section provides an estimate on the number of households that cannot afford their current housing and an estimate of future housing needs for different affordability price points.

Current Housing Affordability Needs



Over 34,650 Thurston County households are cost burdened, meaning they spend more than 30 percent of their income on rent, mortgage payments, and other housing expenses (Table 7-1 and Figure 7-1). Of these, 13,900 are severely cost burdened, spending more than half of their income on housing expense. The percent of households that are cost burdened increases as income declines.

Table 7-1. Cost burdened households by jurisdiction, 2012-2016 average

Percent of Area Median Family Income	Lacey	Olympia	Tumwater	Cities Combined	Thurston County
<=30%	1,375	2,375	1,030	4,780	9,025
>30% to <=50%	1,290	2,185	685	4,160	7,180
>50% to <= 80%	2,135	1,955	620	4,710	8,970
>80% to <= 100%	760	475	1,910	3,145	5,055
More than 100%	735	615	460	1,810	4,420

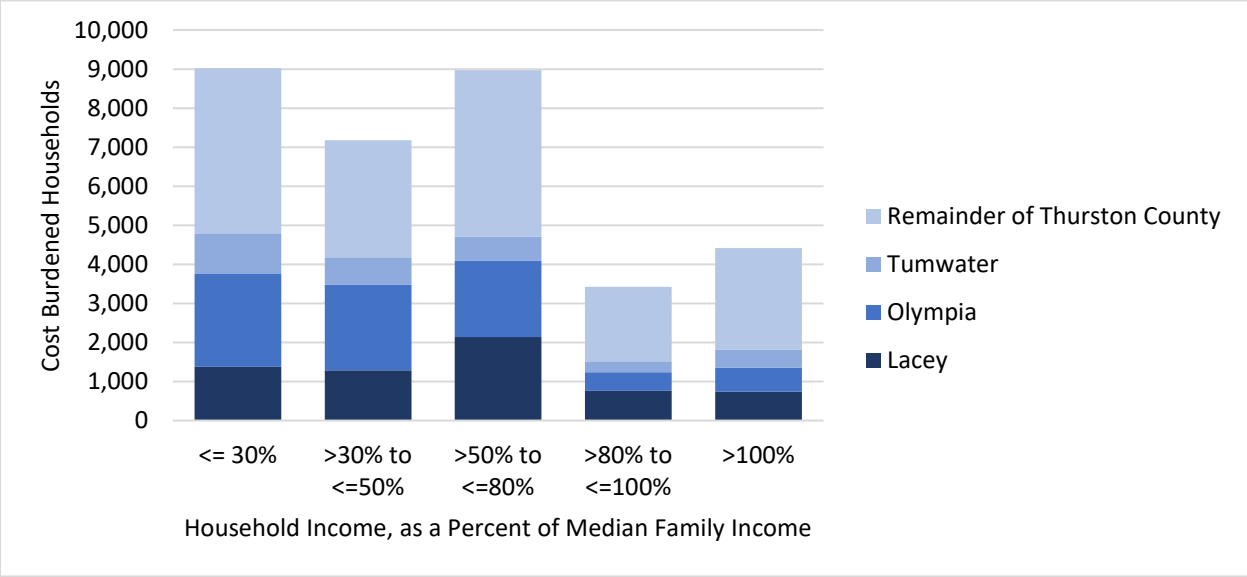

Figure 7-1. Cost burdened households in Thurston County, 2012-2016 average

Source: U.S. Dept. of Housing and Urban Development
Note: AMFI is the area median family income

While some households may opt to spend more than 30 percent of their income on housing expenses, most – especially at lower income brackets – do so because there is not enough affordable housing available. This makes the number of cost-burdened households a good indicator of the current gap between the supply and demand for housing at a given price point. Figure 7-2 shows the estimated affordable housing needed at five income brackets based on the current number of cost burdened households.

Figure 7-2. Cost burdened households by jurisdiction, 2012-2016 average

Source: U.S. Dept. of Housing and Urban Development

Table 7-2 (next page) shows the estimated maximum housing costs that households at three income levels could afford, assuming no more than 30 percent of their income is spent on housing. For example, a 4-person household earning $43,350 annually – 50 percent of the median family household income in 2020 – could afford $1,100 a month for rent or a monthly mortgage payment on a $300,000 home (assuming a 30-year 3.5 APR mortgage with 20 percent down payment). However, these costs do not account for other housing-related expenses such as utilities, property taxes, and insurance. For many low-income households, a down payment is not possible and interest rates are higher due to little or poor credit. For those able to qualify for a home loan despite these circumstances, private mortgage insurance may be required, adding further to the monthly housing cost. To overcome some of these barriers, the Washington State Housing Finance Commission (WSHFC) offers several programs that assist low income households with down payments. Between 1983 and 2019, down payment assistance through WSHFC served 3,018 households.

Table 7-2. Maximum rent and housing costs at various income levels, 2020

HUD Income Limit for a:	Yearly Income	Hourly Wage (Full Time)**	Monthly Rent or Mortgage Payment	Home Value 20% Down	Home Value 10% Down
2-Person Family					
Extremely Low Income (30%)	$20,800	$10.00	$500	$140,000	$130,000
Very Low Income (50%)	$34,700	$16.70	$900	$240,000	$210,000
Low Income (80%)	$55,500	$26.70	$1,400	$390,000	$340,000
4-Person Family					
Extremely Low Income (30%)	$26,200	$12.60	$700	$180,000	$160,000
Very Low Income (50%)	$43,350	$20.80	$1,100	$300,000	$270,000
Low Income (80%)	$69,350	$33.30	$1,700	$480,000	$430,000

NOTE: **For 2020, HUD income limits are based on a median family income of $86,700 for Thurston County. Assumes 3.5 percent fixed interest rate over a 30-year mortgage. Costs do not account for other housing-related expenses such as utilities, property taxes, and insurance.*

***Assumes one household member works full time at 40 hours per week.*

Source: Thurston Regional Planning Council

Future Housing Affordability Need

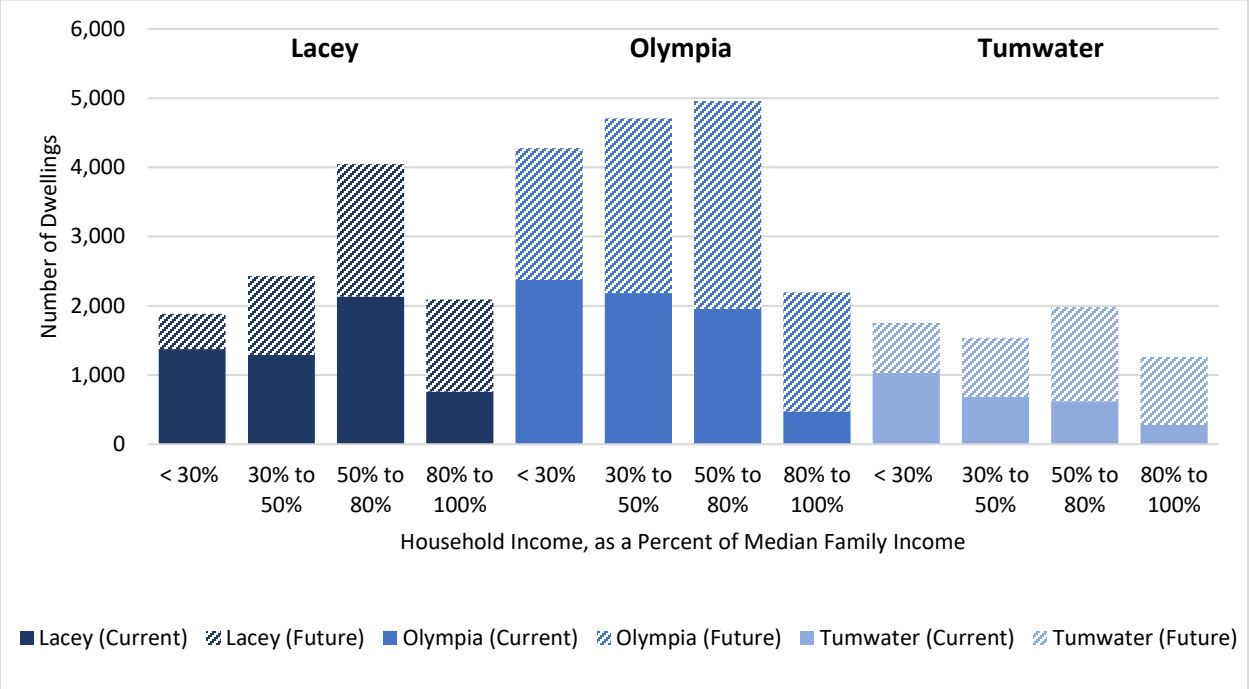
Thurston Regional Planning Council (TRPC) used data on population growth, employment growth, and changing wages and demographics to develop 2045 projections of the number of households in five income brackets.

Table 7-3 looks at the projected number of households at five income brackets from TRPC's Household Income Forecast and the change from the 2012-2016 average. TRPC projects that there will be 66,100 low, very low, or extremely low-income households (those earning less than 80 percent of the median family income) in Thurston County in 2045. This is an increase of more than 26,000 from the 2012-2016 average. The number of extremely low income households – those earning less than 30 percent of the median family income – will increase by over 6,000 units.

Table 7-3. Number of households by income range, 2045 projection

	2045				Increase from 2012/2016			
Household Income*	Lacey	Olympia	Tumwater	Thurston County	Lacey	Olympia	Tumwater	Thurston County
<= 30%	2,200	5,200	1,900	17,800	500	1,900	700	5,700
30% - 50%	3,000	5,200	1,700	17,800	1,100	2,500	800	8,000
50% - 80%	5,500	6,500	2,800	30,100	1,900	3,000	1,400	12,700
80% - 100%	3,500	3,600	2,000	20,700	1,300	1,700	1,000	9,200
>100%	11,400	15,700	8,100	78,000	2,700	5,800	3,200	25,300
TOTAL	**25,600**	**36,200**	**16,500**	**164,400**	**7,600**	**14,900**	**7,200**	**60,900**

NOTE: **Household income as a percent of the area median family income. Excludes people experiencing homelessness and other group quarters populations. Estimates are only for current city limits and do not include unincorporated UGAs.*



Source: Thurston Regional Planning Council

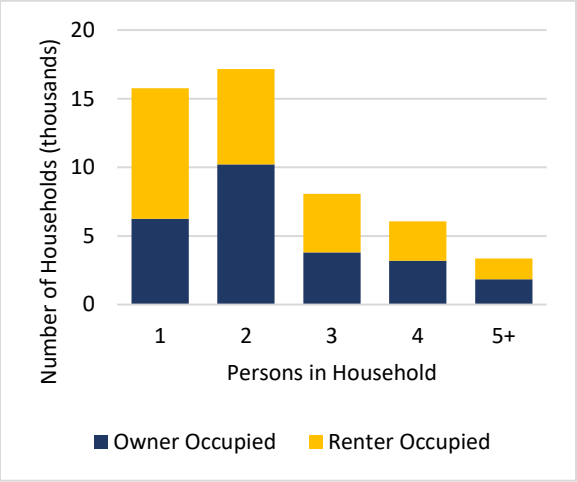
Combined Affordability Needs

Figure 7-3 shows the combined current and projected housing need at the four lowest income brackets over the next 25 years. The solid bars show the current number of households who cannot afford their housing, while the hashed bars show the projected growth in households in each income group. Estimates are for current city limits only. Additional need should be considered for the unincorporated UGAs.

While the housing need is identified for each jurisdiction, it is important that affordable housing addresses the need at a regional scale. Projections for housing needs for the five income groups are based on current distributions. When planning for new affordable housing, other factors should also be considered such as the cost of transportation, access to public transportation, and proximity to social services and medical facilities.

Figure 7-3. Current and projected 25-year housing need

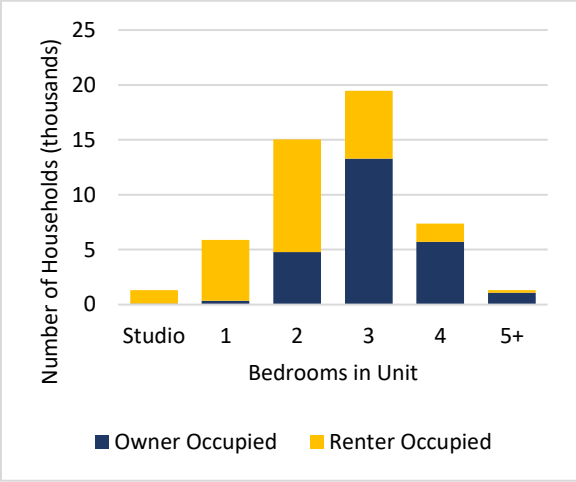
Source: U.S. Dept. of Housing and Urban Development, Thurston Regional Planning Council



Strategies needed to decrease the housing gap will depend on a household's income, and constructing new units is not the only way to meet the housing need identified in Figure 7-3 above. Housing vouchers and other forms of subsidized housing can make the current housing stock affordable for lower-income households. Actions that reduce the cost of utilities – such as energy efficiency upgrades – can also reduce housing costs. When lower income households find housing that better meets their budgets and needs, more units are freed up that higher income households can afford. Finally, as the current housing stock ages, it becomes more affordable and depreciates in value compared to new construction. This is known as "filtering."

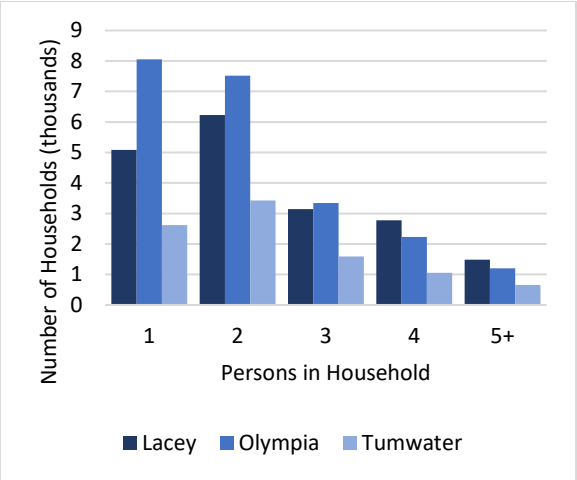
While the forthcoming Housing Action Plan will identify the best actions to take for each housing type and household income, it will also be important to track the number of cost burdened households over time. This will help to evaluate whether the three cities' housing stock is moving closer into alignment with residents' needs.

Housing Size



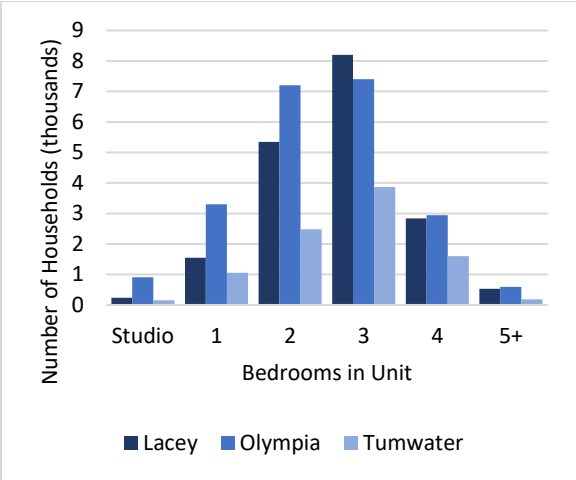
Another way to evaluate whether Lacey, Olympia, and Tumwater's housing inventory is meeting residents' needs is to compare household size to home size (Figures 7-4 through 7-7).

Figure 7-4. Household size in Lacey, Olympia, and Tumwater by tenure, 2014-2018 average



Source: U.S. Census Bureau American Community Survey

Figure 7-5. Number of bedrooms in Lacey, Olympia, and Tumwater dwelling units by tenure, 2014-2018 average



Source: U.S. Census Bureau American Community Survey

Figure 7-6. Household size in Lacey, Olympia, and Tumwater, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

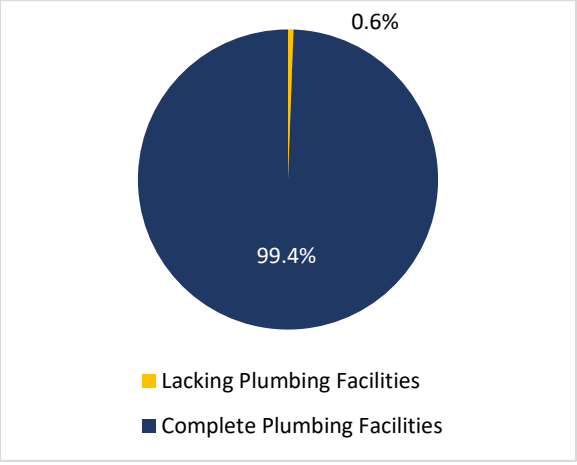
Figure 7-7. Number of bedrooms in Lacey, Olympia, and Tumwater dwelling units, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

While no standard measure exists that defines overcrowding in housing, one common measure is the number of people per room. In 2014-2018, only about 1.7 percent of Lacey, Olympia, and Tumwater's households had more than one person per room. This suggests that few households struggle to find housing that is large enough for their household's size.

Households may be struggling to find more affordable, smaller units. There are 32,900 one- or two-person households in Lacey, Olympia, and Tumwater. However, only 22,200 housing units have two or fewer bedrooms. The problem is more pronounced for one person households, with only 7,200 units for 15,800 households.

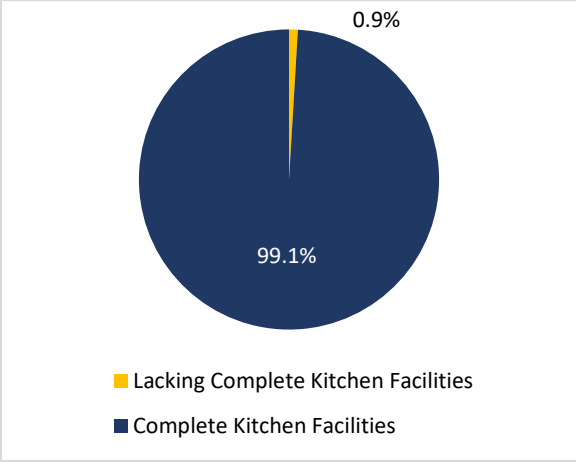
Most units with two or fewer bedrooms are rental units, limiting opportunities for those interested in home ownership.



Substandard Housing

Substandard housing lacks basic facilities needed to make it habitable. The American Community Survey asks respondents whether they have basic plumbing and kitchen facilities. A dwelling unit is considered to have complete plumbing and kitchen facilities if it has:

- For plumbing facilities
  - Hot and cold running water
  - Bathtub or shower
- For kitchen facilities
  - Sink with a faucet
  - Stove or range
  - Refrigerator



Lack of basic plumbing and kitchen facilities is a small problem in Lacey, Olympia, and Tumwater (Figures 7-8 and 7-9). About 290 occupied units (0.6 percent) lack at least one of the basic plumbing facilities while 480 (0.9 percent) lack at least one of the basic kitchen facilities.

Figure 7-8. Plumbing facilities in occupied Thurston County dwelling units, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Figure 7-9. Kitchen facilities in occupied Thurston County dwelling units, 2014-2018 average

Source: U.S. Census Bureau American Community Survey

Data are limited on other types of substandard housing in Thurston County. Some known concerns include:

- Indoor air quality, including exposure to mold
- Peeling paint and lead exposure
- Mice, rats, and other vermin
- Maintenance issues, including electrical, plumbing, and heating

Mold is of particular concern in western Washington. Many options for mitigating mold – including weatherization – have co-benefits in increasing efficiency and reducing heating costs.

Other Needs

For many households, housing may not meet their needs, even if it is affordable and up to building standards. These needs are difficult to quantify but important to consider. Some issues include:

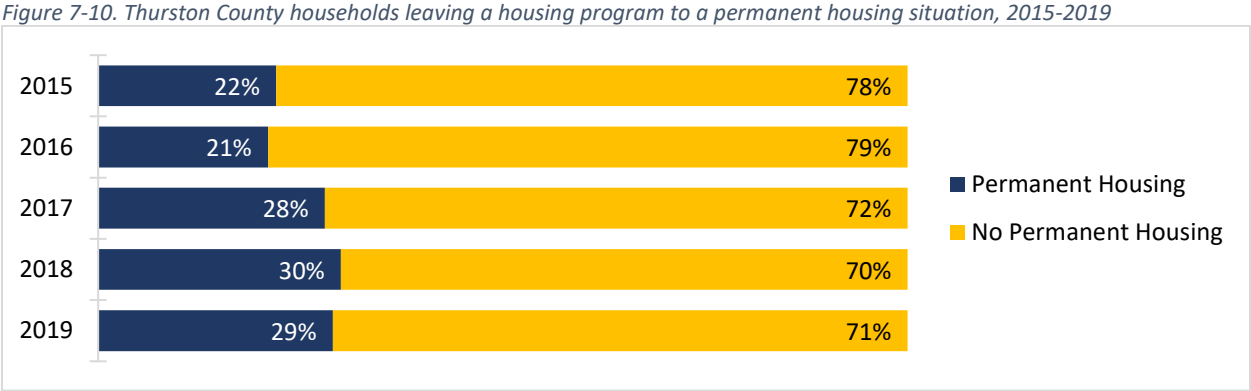
- **ADA Accessibility:** Limit information is available on the number of accessible dwellings units in Thurston County. Ensuring that some percent of new housing is accessible and current housing is upgraded will help house an aging population.
- **Building Wealth:** While many households prefer the flexibility renting offers, homeownership is a means of building a household's wealth. Affordable housing opportunities for low-income households – who are disproportionately persons of color – can help reduce the wealth gap between disadvantaged populations.
- **Transportation Costs:** Many households may be unable to find affordable housing near their place of work. Living farther away from job opportunities may decrease housing costs but it also increases transportation costs. This has implications for time dedicated to commuting, the presence of congestion, and the amount of vehicle emissions.

Experiencing Homelessness

At least 800 individuals experienced homelessness in 2019 (Chapter 4). Thurston County's 2019-2024 Homeless Crisis Response Plan identified approximately 1,692 households without a permanent housing solution. According to the office of the Superintendent of Public Instruction, more than 1,700 students in Thurston County schools experienced homelessness at some point during the 2018-2019 school year. Because of the difficulties in counting the population experiencing homelessness, these numbers are believed to be an undercount of the total population.

Finding adequate housing solutions for those who do not have a home requires both short- and long-term strategies. The 2019-2024 Thurston County Homeless Crisis Response Plan identifies short-term actions that are needed to address homelessness (such as emergency shelters) but makes it clear that the ultimate goal is to find permanent housing solutions.

Thurston County's ability to address homelessness in both the short- and long-term is hindered by a lack of emergency sheltering options and the availability of permanent supportive and affordable housing units. Provided affordable housing is available, most people experiencing homelessness can be assisted through rapid re-housing, which provides those who are newly homeless or on the verge of homelessness with quick resources such as money to pay a security deposit or first month's rent. However, some have higher needs related to physical, mental health or developmental disabilities. In such cases, permanent supportive housing may be required to prevent such individuals from becoming homeless in the first place or exit a homeless situation.



Over the last five years, between 20 and 30 percent of households served by a housing program left such assistance for a permanent housing situation (a rental unit, home ownership, or permanent tenure with friends or family) (Figure 7-4). This means that 70 to 80 percent of households served by housing programs do not have permanent housing by the time the leave a housing program. Factors that affect this include low rental unit vacancy rates, increasing rent costs, and limited supportive housing programs.

Permanent Supportive Housing
According to the 2019-2024 Homeless Crisis Response Plan, permanent supportive housing is vulnerability based, non-coercive, non-judgmental, low-barrier, permanent housing for chronically homeless and permanently disabled individuals and families.

Supportive services including but not limited to holistic health and medical, mental health, substance use, enrichment programs and case management are available on site for people who wish to engage in services or coordinated closely to reduce all possible barriers to residents accessing services once they are ready.

As a costly intervention, permanent supportive housing must be targeted to the people who are most likely to die if they are left on the streets using an objective, standardized assessment tool and placed through a coordinated entry system. An ideal candidate for permanent supportive housing is a household or individual experiencing chronic homelessness, permanent physical, mental health or substance use related disability, chronic illness and high rates of interaction with law enforcement and emergency rooms.

Figure 7-10. Thurston County households leaving a housing program to a permanent housing situation, 2015-2019

Source: Thurston County Public Health and Social Services

Because not everyone is counted in the Point-in-Time Census and the dynamic variables in the homeless experience, it is difficult to pinpoint exactly how many people experience homelessness in Thurston County. These factors, in addition to the economic impacts of the COVID-19 pandemic, it is also difficult to forecast how many people will experience homelessness in the future. Regardless, it is clear there are two critical housing gaps that require focus in order address homelessness in Thurston County:

- Permanent supportive housing for those who need services in order to maintain their housing.
- Affordable housing for households that make 30 percent or less of the area median family income, who are those most likely to be cost burdened or severely cost burdened by their housing, and thus at greater risk of becoming homeless.

Chapter 8.
Land Capacity Analysis

Thurston County is one of seven Washington Counties affected by the review and evaluation provision of the Growth Management Act (GMA). This provision requires counties to periodically review their growth to ensure that development is in line with the GMA's land use goals, and that there is sufficient land to accommodate 20 years' worth of projected growth. This review – known as the "Buildable Lands Report" – is due three years prior to city and county Comprehensive Plan updates. Ensuring that the zoning and size of the urban areas is appropriate for the projected growth helps keep new development affordable.

Thurston Regional Planning Council (TRPC) is responsible for the Buildable Lands Program in Thurston County. As part of the program, TRPC maintains an inventory of developable land. For each parcel in the county, the inventory estimates the number of new dwellings that could be built on the property, taking into account:

- Current land use, including any existing development
- The parcel's zoning and average densities achieved for each zone
- Environmental constraints, such as wetlands or steep slopes.

The most recent inventory was completed in 2019. Documentation is available at https://www.trpc.org/236. The inventory will be used to develop the next Buildable Lands Report, expected in 2021.

Appendix A shows estimates of developable land and residential capacity by zoning designation.

Residential Capacity

TRPC's land supply model estimates sufficient capacity in the Lacey, Olympia, and Tumwater urban areas for about 40,000 new dwelling units in 2020, with about one third of the capacity in each urban area (Table 8-1). Capacity is split among a range of zoning types: about 41 percent in primarily multifamily zones; 26 percent in mixed single-family/multifamily zones; and 33 percent in primarily single-family zones.

Having capacity in a range of zoning types is important since different household types tend to gravitate towards different housing and ownership types.

Table 8-1. Residential capacity by generalized zoning district, 2017

Density Category	Lacey	Olympia	Tumwater	TOTAL
Commercial, Mixed Use, and High Density Multifamily	3,500	7,100	1,800	12,400
Moderate Density Multifamily	2,000	300	1,700	4,000
Mixed Residential and Planned Communities	6,600	1,700	2,300	10,500
Medium Density	2,200	5,000	4,600	11,800
Low Density and Sensitive	0	1,000	500	1,600
TOTAL	**14,400**	**15,100**	**10,800**	**40,300**

Source: Thurston Regional Planning Council

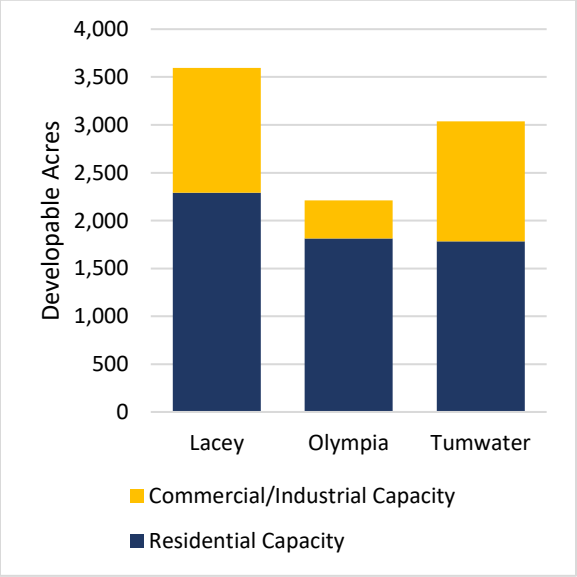
Table 8-2 describes the amount of residential development capacity by the type of developable parcel. About 600 units are on lots that have been recently permitted or subdivided and will be constructed over the next few months. A number of projects are in the development pipeline or part of master planned communities. These projects represent about 9,100 units that will most likely be built over the next few years. The remaining capacity is on parcels with no plans for development. These include vacant parcels (about 13,100 units), subdividable parcels with at least one existing dwelling (13,800 units), and redevelopable parcels (about 3,700 units). These parcels will most likely develop over the next few decades.

Table 8-2. Residential capacity by type of developable parcel, 2020

Capacity Type	Lacey	Olympia	Tumwater	TOTAL
Recently Permitted or Subdivision Lots	400	100	100	600
Planned Projects and Master Planned Communities	4,200	1,900	3,000	9,100
Vacant Single Lots	100	400	100	600
Vacant Subdividable Lands	3,600	5,800	3,100	12,500
Partially Used, Subdividable Lands	4,900	4,500	4,300	13,800
Redevelopment	1,100	2,400	300	3,700
TOTAL	**14,400**	**15,100**	**10,800**	**40,300**

Source: Thurston Regional Planning Council

Since some types of capacity are more likely to develop than others, it is important to have development potential on parcels of all types. Too much capacity on parcels that are more expensive (such as redevelopment parcels) or slow to enter the market (partially used, subdividable parcels) could constrict the supply of housing.



Unique Housing Needs

Apart from single-family, multifamily, and manufactured homes, Lacey, Olympia, and Tumwater's zoning regulations permit – either outright or conditionally – a range of unique housing needs important for specific populations. These include:

- Housing for those experiencing homelessness including shelters, emergency housing, transitional housing, and permanent supportive housing
- Facilities for people with medical needs such as nursing homes, adult family homes, and mental health facilities
- Correctional and rehabilitation facilities

Lacey, Olympia, Tumwater, and their unincorporated urban growth areas contain about 8,800 acres of developable land, plus additional land suitable for infill or redevelopment (Figure 8-1). About a third is suitable for commercial or industrial development with the remainder residential. Based on this assessment, the region should have sufficient land capacity for future housing needs for populations with unique needs.

Figure 8-1. Developable land

Appendix A. Development Trends by Zoning District

The following tables include a summary of permit trends and development capacity for zoning districts in Lacey, Olympia, Tumwater, and their unincorporated Urban Growth Areas (UGAs).

Permit trend data come from Thurston Regional Planning Council's (TRPC) building permit database. TRPC compiles permits for new dwelling units annually from data provided by city, town, county, and tribal reservation building departments. For larger subdivision and mixed-use projects, data are entered as permits are issued, which will occur after the project is approved.

Data on buildable land and residential capacity come from TRPC Population and Employment Forecast work program. Using average densities based on recent development trend in each zone, TRPC estimates the buildable area on each parcel plus the number of dwelling units that the parcel could likely accommodate, should the parcel develop. Estimates take into account any exiting development, wetlands and other critical areas, and probability of redevelopment. Data support the Buildable Lands Report for Thurston County. Documentation is available at www.trpc.org/236.

Appendix B. Household Income Forecast

Introduction

In 2019, the state Department of Commerce awarded a grant to the cities of Lacey, Olympia, and Tumwater to develop a Housing Action Plan. The plan includes four components:

- A Regional Housing Needs Assessment, with an inventory of the current housing stock, household characteristics, the population's housing needs, and any gaps in housing availability.
- A household income forecast to identify future housing needs
- A survey of landlords and rental property owners to better understand housing costs
- A Housing Action Plan—to be adopted by the cities—which provides a list of actions for the cities to implement to promote the development of a housing stock that meets the needs of current and future residents

This report documents the methodology and results of the household income forecast, which provides jurisdictions with a projection of the number of households in different income brackets. This information can be used to identify actions that encourage development of housing over the next 25 years that is adequate and affordable to households of all incomes.

Preparation of the household income forecast occurred during the COVID-19 pandemic. The pandemic resulted in high levels of unemployment and reduced wages for many residents of Thurston County. The baseline forecast uses pre-pandemic sources of data and assumes a full recovery. However, given the uncertainty around the long-term impacts of the pandemic, five scenarios were also prepared to look at alternative growth projections.

What Factors Affect Income?

Household income is complex and influenced by a number of factors. The household income forecast focuses on four factors.

Total Employment by Industry Employment affects the number of wage earners in a county.	**Wages by Industry** Wages affect how much individuals earn, and the amount of income they contribute to the households.
Commuting The number of commuters impacts how much income is moved between counties.	**Population and Age** The number of people in each age bracket reflects the size of the labor force versus the number of people too young to work or who have retired.

These factors are discussed in more detail below.

Sources of Data

Numerous data sources of data are available on population, age, employment, wages, and commuting. These include:

- Washington State Office of Financial Management (OFM): Population estimates and projections by age for counties. Statewide employment projections.
- Thurston Regional Planning Council (TRPC): Employment projections for Thurston County.
- Washington State Employment Security Department (ESD): Average annual employment counts and wages by industry.
- U.S. Bureau of Economic Analysis (BEA)
- U.S. Census Bureau American Community Survey (ACS): Estimates of population, age, employment, and earnings by county.
- Census Transportation Planning Products (CTPP): County-to-county commute flows using a special tabulation of American Community Survey Data.

TRPC used these sources were to develop 25-year projections for population, age, employment, wages, and commuting that were input into the housing income forecast. The following sections explore some of those topics and how they relate to income and wages.

Employment by Industry

TRPC projects that employment in Thurston County will add over 60,000 new jobs between 2015 and 2045, a growth rate of about 1.4 percent per year. This is slightly faster than the state Office of Financial Management's projections for Washington State (Table 1).

The two fastest growing industries are projected to be educational services, health care and social assistance; and professional and business services. Both are projected to increase by about 1.6 percent per year. Finance and insurance, and real estate and rental leasing is expected to be a close third at 1.4 percent per year.

The industries seeing the largest growth in terms of total numbers are also the largest industries: educational services, and health care and social assistance; public administration and government employment; and professional and business services.

Fastest Growing Industries in Thurston County (projected)

- Educational services, and health care and social assistance
- Professional and business services
- Finance and insurance, and real estate and rental and leasing

Largest Industries in Thurston County

- Educational services, and health care and social assistance
- Public administration (government)
- Professional and business services

Wages

Wages make up about 71 percent of total income for Thurston County households. For lower-income households specifically, Social Security, Supplemental Social Security, and other forms of public assistance can make up over 30 percent of a household's income. Figure 1 shows sources of income by household income level.

Average wage earnings for employed Thurston County residents are $54,500 (Table 2). Average wages vary widely by industry, from a high of $110,600 for the utility industry to a low of $20,700 for arts, entertainment, and recreation. Nominal wages (wages not adjusted for inflation) increased 2.4 percent per year between 2001 and 2018. This is in line with inflation (Table 3). For many industries, wage increases can vary widely on a year-to-year basis making projections of future wages difficult.

Thurston County Industries with the Highest Wages

Commuting

TRPC projects that between 2020 and 2045, the number of commuters to or from Thurston County will increase by about 40 percent. Out-bound commuters will continue to make up about 60 percent of all county-to-county commuters (Figure 2).

The ratio of outbound commuters to inbound commuters affects how much income is brought into the County. More people leave Thurston County than commute to it for work which brings income to our communities.

People tend to commute out of county for higher-wage jobs. Most out-of-county commuters have higher incomes that those who live and work in the same county (Table 4). Average wage earnings for Thurston County residents who work within the County is about $46,200. When outbound commuters are included, the average increases to $49,500.

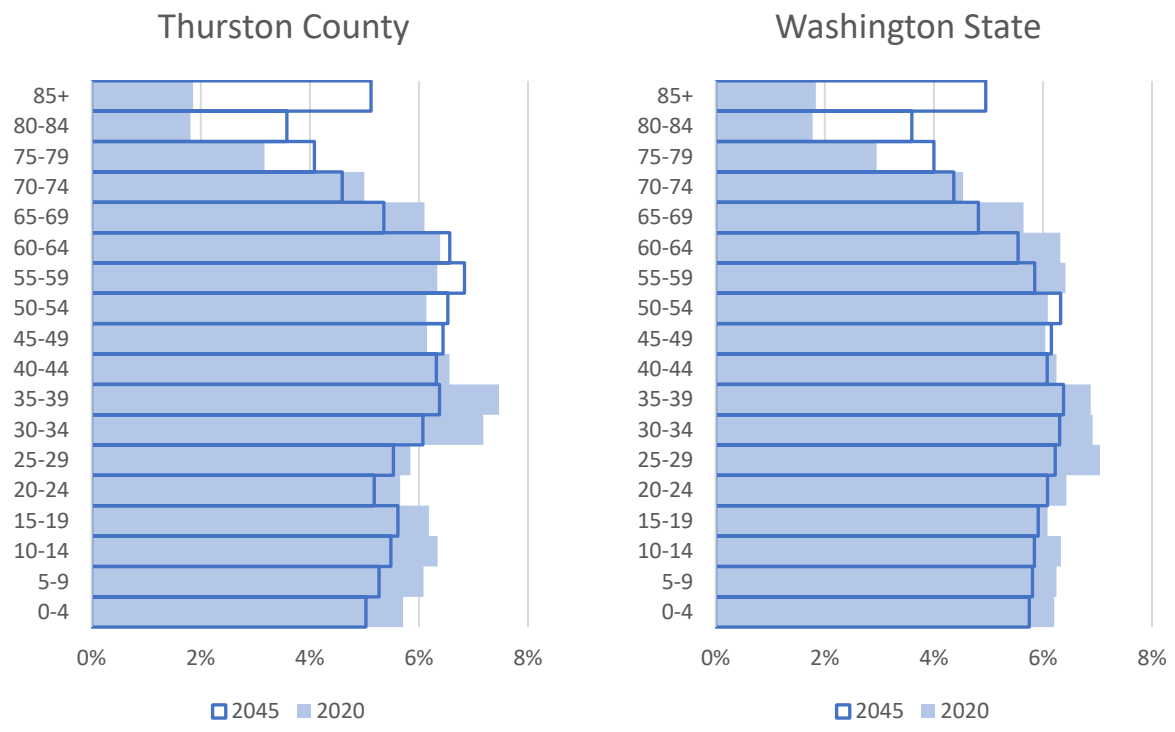
Note: Excludes out of state commutes and county pairs with fewer than 100 records

Age

Age affects income in a number of ways, including:

- The number of people in the labor force (generally age 18 through 65)
- Length of employment, amount of job experience, and compensation
- Type of employment and industry

Increase in Working-Age Population
(Age 20-64)



+ 44,300

2020-2045

Thurston County's working age population is projected to increase by over 44,300 people over the next 25 years (Figure 3). Thurston County however, like most counties in Washington State, has an aging population. The population age 65 and older is expected to increase by over 65 percent between 2020 and 2045. The main source of income for this group is retirement savings and Social Security, not wages.

As the baby-boomer population retires, many higher-wage jobs this will open up for the younger age cohorts. This is particularly true for state employment, which has an older workforce compared to the county average.

Figure 3: Percent of Population in Five-Year Age Cohorts

Source: OFM Growth Management Act County Projections (2017)

Income Forecast Methodology

TRPC modified microdata available from the U.S. Census Bureau to simulate a theoretical 2045 population. This population could then be used to calculate the future median family income and number of households in defined income brackets.

American Community Survey

The U.S. Census Bureau's American Community Survey (ACS) is an ongoing survey that collects data on all the drivers of income—place of work and residence, age, wages, and employment industry. Data are released on a yearly basis and are available as one-year or five-year averages, depending on the population for the geography of interest.

Public Use Microdata Sample

The Public Use Microdata Sample (PUMS) is a unique subset of ACS data. The Census Bureau releases the complete survey responses for about 5 percent of the population. Data are only available for unique geographies with at least 100,000 people – called Public Use Microdata Areas (PUMAs). The sample is chosen so that it is representative of the population as a whole, without identifying a single individual. Additional modifications are made to preserve the confidentiality of individuals' responses. Each record is given a weight that identifies the estimated number of people it represents in the overall population.

The advantage of the PUMS data is that they allow for summarization in ways that are not available through the standard pretabulated ACS tables. This gives researchers more flexibility in the types of analyses they can perform.

Modifying the PUMS Weights

For the income forecast, the weights were adjusted to represent a projected 2045 population. Weights were adjusted to control for two factors:

- Total population by six geographic regions (Thurston County, Pierce County, Northwest Washington, Southwest Washington, Olympic Peninsula, and Eastern Washington) and five age brackets. Population estimates for 2045 came from the Office of Financial Management's 2017 Growth Management Act supplemental projections.
- Total 2045 employment by 13 industry categories for Thurston County and the remainder of Washington State, plus the unemployed population. Statewide projections came from the Office of Financial Management. Thurston County projections came from TRPC's Population and Employment Forecast.

Since growth rates are different for each industry, population in each county, and population in each age group, iterative proportional fitting was used to ensure the expanded population matched the totals (marginals) in each county, age, and employment industry category.

"Stretching" the 2014-2018 ACS PUMS data to fit a 2045 population and workforce provides a conservative estimate of that population. It assumes no major changes in wage distribution of employment industries, employment industry chosen by different age groups, or commute patterns, for example.

Table 5 shows the percent change in population for each of the county, age, and industry groups between the 2014-2018 American Community Survey data and 2045 projections.

Iterative Proportional Fitting

Iterative Proportional Fitting — also known as IPF — is a statistical procedure used to estimate the values of a crosstab table when only the marginal totals are known.

In the example below, the total number of people in each age group and employment industry is known. However, the number of people in age group employed in each industry is not known. What if the number of people age 30-45 who work in retail is needed? IPF can be used to estimate the missing data.

Job Industry	Age <30	Age 30-45	Age 45-60	Total
Services	?	?	?	52
Retail	?	?	?	28
Construction	?	?	?	11
Resources	?	?	?	9
Total	31	37	32	100

IPF Example. The totals for each row and column are known, but not the individual cells.

The accuracy of the procedure can be improved by "seeding" the table, for example, with survey data. Through an iterative process, the initial seed values are refined until they equal the known totals for each row and column.

For the income forecast, the population growth in 30 place of residence/age group categories are the columns, and the rows are the employment growth in 27 employment industry/place of work categories. 2014-2018 PUMS data are used as the seed.

Table 5: Population Expansion Factors

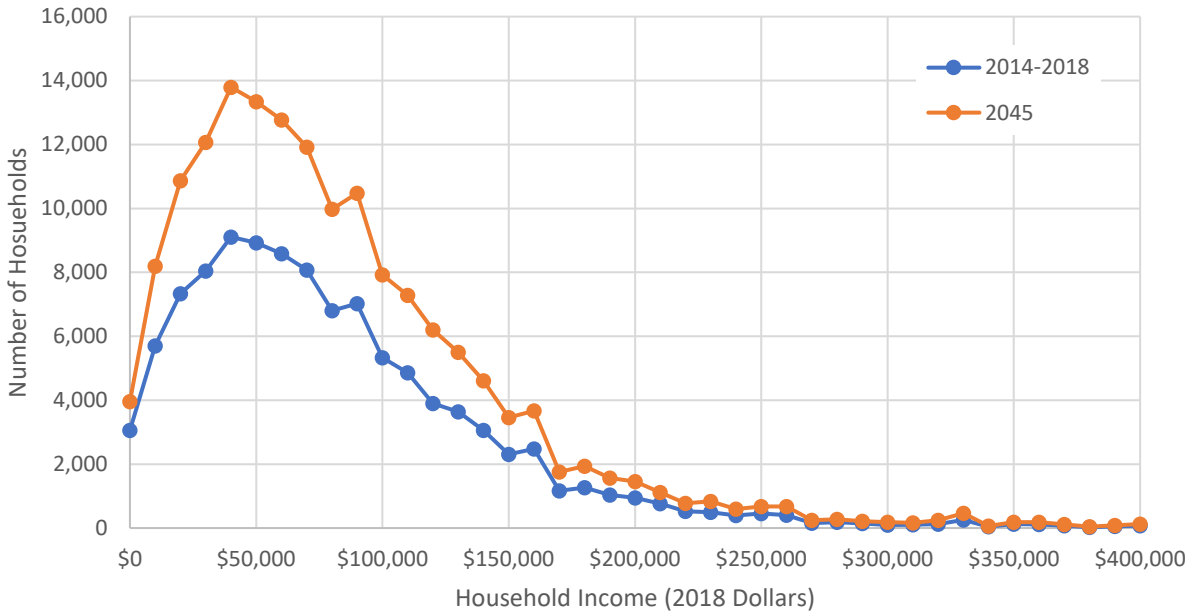
Note: Table shows the percent increase in that group's population between 2014-2018 and 2045. Employment Industry NAICS codes are shown in Table 2. "Other" includes five regions (Pierce County, Northwest Washington, Southwest Washington, Olympic Peninsula, and Eastern Washington) aggregated here for simplicity.



Results

Median Family Income

Median family income is the threshold at which half of family households earn more and half of family households earn less. Without accounting for inflation, median family income is projected to increase 1.3 percent, from $82,400 to $83,400 in real 2018 dollars. This change is well within the margin of error, suggesting that future households' income will not differ significantly from now.

From the projected 2045 median family income, new income thresholds can be calculated. These values, which vary by household size, are shown in Table 6.

Figure 4: Projected Income Distribution (All Households)

Source: U.S. Census Bureau 2014-2018 ACS; TRPC Income Forecast

Table 6: Income Limits in Real 2018 Dollars

		1-person		2-Person		4-Person	
		2014-18	2045	2014-18	2045	2014-18	2045
Extremely Low Inc.	30% AMFI	$17,300	$17,500	$19,800	$20,000	$24,700	$25,000
Very Low Income	50% AMFI	$28,800	$29,200	$33,000	$33,400	$41,200	$41,700
Low Income	80% AMFI	$46,100	$46,700	$52,700	$53,400	$65,900	$66,700
Median Income	100% AMFI	$57,700	$58,400	$65,900	$66,700	$82,400	$83,400
	120% AMFI	$69,200	$70,100	$79,100	$80,100	$98,900	$100,100

Note: AMFI is the Area Median Family Household Income. 2045 income limits are shown in real 2018 dollars. Nominal values will be higher due to inflation. Documentation on how HUD calculates income limits, including for household sizes not show here, is available at www.huduser.gov/portal/datasets/il.html.

Countywide Income Forecast

With the projected median family income, the number of households in different income brackets can be calculated. By 2045, an additional 22,300 low-income households are expected, including 11,600 very low-income households, and 5,400 extremely low-income households (Table 7).

Table 7: Households by Income Bracket

	# Households			% Households	
Income Group	**2014-2018**	**2045**	**Change**	**2014-2018**	**2045**
Less than 30% AMI	12,400	17,800	5,400	11.5%	10.8%
30 to 50% AMI	11,600	17,800	6,200	10.7%	10.8%
50 to 80% AMI	19,400	30,100	10,700	18.0%	18.3%
80 to 100% AMI	13,700	20,700	7,000	12.6%	12.6%
100% to 120% AMI	10,500	15,800	5,300	9.7%	9.6%
Greater than 120% AMI	40,500	62,200	21,700	37.5%	37.9%
Total	**108,100**	**164,400**	**56,300**	**100.0%**	**100.0%**

Note: AMI is the Area Median Household Income

Since there is considerable uncertainty in what the future holds, especially given the ongoing COVID-19 pandemic, TRPC looked at five alterative scenarios:

- **COVID-19:** 10 percent reduction in retail trade employment. 15 percent reduction in leisure and hospitality employment. 5 percent reduction in all other service employment
- **New and Emerging Industries:** 5 percent increase in manufacturing. 10 percent increase in manufacturing wages
- **Decrease in Public Assistance:** 10 percent decrease in public assistance (Social Security, Supplemental Social Security, and other Public Assistance)
- **Increased Government Wages:** Government wages increased 10 percent over inflation
- **Minimum Wage:** 25 percent increase in wage earnings if hourly wage is less than $12/hour

The scenarios are included not to describe scenarios that are likely or expected, but to better understand how sensitive the forecast methodology is to possible changes and the relative importance of different inputs.

Changes to median family income were within the margin of error of current estimates. However, the scenarios do show the importance of programs targeting the lowest-income households. Increasing the minimum wage showed the greatest reduction in the number of very low-income households (those earning less than 50 percent of the median). A 10 percent decrease in public assistance programs (including Social Security, Supplemental Social Security, and other forms of public assistance) saw the largest increase in the number of very low-income households.

Table 8 shows a summary of the scenario results.

Table 8: Change in Income and Cost-Burdened Households for Scenarios

	Change in Median Household Income	Change in Number of Extremely Low and Very Low-Income Households*	
		Number	Percent
COVID-19	− 0.7%	+ 400	+ 1.1%
New and Emerging Industries	+ 0.2%	− 200	− 0.6%
Decrease in Public Assistance	− 1.2%	+ 500	+ 1.4%
Increased Government Wages	+ 1.4%	+ 200	+ 0.6%
Minimum Wage	+ 0.3%	− 900	− 2.5%

Note: *Households earning less than 50 percent of the household median income
Change in cost burdened households may be due in part due to a change in income thresholds.

City/UGA Income Forecast

The Dept. of Housing and Urban Development receives a custom data tabulation of ACS data from the U.S. Census Bureau. This dataset — known as the Comprehensive Housing Affordability Strategy (CHAS) data — are intended to demonstrate the extent of housing problems and housing needs in communities, particularly for low income households. CHAS data include city-level estimates of households for the income brackets used in the Thurston County housing income forecast.

Since the income forecast showed only small changes in the overall distribution of households by income, it was assumed that there would also be little change at the city level from the CHAS estimates. Numbers were adjusted so that the totals for each jurisdiction match TRPC's 2045 housing forecast.

Table 9 shows the current number of households in the five income brackets (2012-2016 average) compared to the projected number of households in 2045.

Table 9: Current and Projected Income Distributions by Jurisdiction

2012-2016 CHAS	Lacey	Olympia	Tumwater	Remainder	Thurston
Less than 30% AMFI	1,690	3,300	1,175	5,900	12,065
30 to 50% AMFI	1,860	2,680	850	4,400	9,790
50 to 80% AMFI	3,590	3,500	1,440	8,850	17,380
80 to 100% AMFI	2,170	1,880	1,015	6,470	11,535
Greater than 100%	8,695	9,920	4,865	29,220	52,700
Total	**18,010**	**21,275**	**9,340**	**54,845**	**103,470**

2045 Projection	Lacey	Olympia	Tumwater	Remainder	Thurston
Less than 30% AMFI	2,200	5,200	1,900	8,500	17,800
30 to 50% AMFI	3,000	5,200	1,700	7,900	17,800
50 to 80% AMFI	5,500	6,500	2,800	15,300	30,100
80 to 100% AMFI	3,500	3,600	2,000	11,600	20,700
Greater than 100%	11,400	15,700	8,100	42,800	78,000
Total	**25,600**	**36,200**	**16,500**	**86,100**	**164,400**

2012-2016 to 2045 Change	Lacey	Olympia	Tumwater	Remainder	Thurston
Less than 30% AMFI	500	1,900	700	2,600	5,700
30 to 50% AMFI	1,100	2,500	800	3,500	8,000
50 to 80% AMFI	1,900	3,000	1,400	6,400	12,700
80 to 100% AMFI	1,300	1,700	1,000	5,100	9,200
Greater than 100%	2,700	5,800	3,200	13,600	25,300
Total	**7,600**	**14,900**	**7,200**	**31,300**	**60,900**

Note: AMFI is the area median family income. HUD combines the 100-120% and 120%+ AMFI categories in the CHAS dataset.

  U.S. Dept. of Housing and Urban Development: CHAS Data
  https://www.huduser.gov/portal/datasets/cp.html
- **Table 7-2. Maximum rent and housing costs at various income levels, 2020**
  Income limits for extremely low, very low, and low-income households are the U.S. Dept. of Housing and Urban Development's FY2020 Income Limits for four-person households. (https://www.huduser.gov/portal/datasets/il.html). The remaining fields were calculated using the following assumptions:
  - Hourly Wage: Assumes one person working a 40-hour work week for 52 weeks a year
  - Monthly Rent: 30 percent of yearly income divided by twelve
  - Home Value 20 percent down: Value of a home with a monthly mortgage payment equal to 30 percent of yearly income divided by twelve, assuming a 20 percent down payment and 3.5 percent fixed interest rate over 30 years.
  - Home Value 10 percent down: Value of a home with a monthly mortgage payment equal to 30 percent of yearly income divided by twelve, assuming a 10 percent down payment and 3.5 percent fixed interest rate over 30 years.
- **Table 7-3. Number of households by income range, 2045 projection**

Title VI Notice

Thurston Regional Planning Council (TRPC) hereby gives public notice that it is the agency's policy to assure full compliance with Title VI of the Civil Rights Act of 1964, the Civil Rights Restoration Act of 1987, and related statutes and regulations in all programs and activities. Title VI requires that no person shall, on the grounds of race, color, sex, or national origin, be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination under any Federal Highway Aid (FHWA) program or other activity for which TRPC receives federal financial assistance. Any person who believes they have been aggrieved by an unlawful discriminatory practice under Title VI has a right to file a formal complaint with TRPC. Any such complaint must be in writing and filed with the TRPC's Title VI Coordinator within one hundred and eighty (180) days following the date of the alleged discriminatory occurrence.

Americans with Disabilities Act (ADA) Information

Materials can be provided in alternate formats by contacting the Thurston Regional Planning Council at 360.956.7575 or email info@trpc.org.

THURSTON REGIONAL PLANNING COUNCIL is a 23-member intergovernmental board made up of local governmental jurisdictions within Thurston County, plus the Confederated Tribes of the Chehalis Reservation and the Nisqually Indian Tribe. The Council was established in 1967 under RCW 36.70.060, which authorized creation of regional planning councils.

TRPC's mission is to "Provide visionary, collaborative leadership on regional plans, policies, and issues for the benefit of all Thurston region residents." To support this mission, we:

- Support **regional transportation** planning consistent with state and federal funding requirements.
- Address **growth management, environmental quality**, and other topics determined by the Council.
- **Assemble** and **analyze data** that support local and regional decision making
- Act as a **"convener"**, build regional **consensus** on issues through information and citizen involvement.
- Build **intergovernmental consensus** on regional plans, policies, and issues, and advocate local implementation.

2025 Membership

Government Jurisdiction	Name of Representative
Town of Bucoda	Miriam Gordon
City of Lacey	Robin Vazquez, Chair
City of Olympia	Dani Madrone
City of Rainier	Dennis McVey
City of Tenino	John O'Callahan
City of Tumwater	Eileen Swarthout, Secretary
City of Yelm	Joe DePinto
Thurston County	Carolina Mejia
Intercity Transit	Robert Vanderpool
LOTT Clean Water Alliance	Carolyn Cox, Vice Chair
Port of Olympia	Amy Evans Harding
PUD No. 1 of Thurston County	Chris Stearns
Olympia School District	Hilary Seidel
North Thurston Public Schools	Esperanza Badillo-Diiorio
Tumwater School District	Mel Murray
Confederated Tribes of the Chehalis Reservation	Amy Loudermilk
Nisqually Indian Tribe	Mike Mason

Associate Members

Thurston County Economic Development Council	Michael Cade
Lacey Fire District #3	Liberty Hetzler

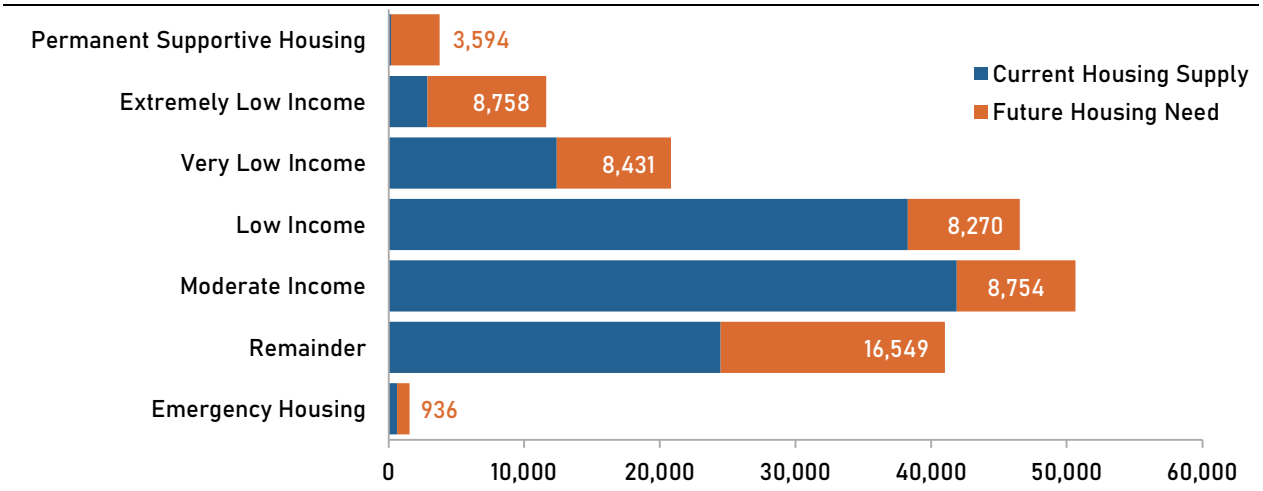
EXECUTIVE SUMMARY

New GMA Requirements

House Bill 1220 — passed by the state legislature in 2021— added new requirements to the Growth Management Act for jurisdictions to **"plan for and accommodate housing affordable to all economic segments of the population of this state."** Thurston County and the cities of Lacey, Olympia, Tenino, Tumwater, and Yelm contracted with Thurston Regional Planning Council (TRPC) to facilitate a process and provide data analysis support to implement this law.

The Thurston region has a long history of planning for affordable housing and much has been done at both the local and regional level. HB 1220 addresses just a small piece of the affordable housing problem — whether land, and how it is zoned, is a barrier to new affordable housing.

HB 1220 requires jurisdictions to ensure zoning is not a barrier to affordable housing. On its own, the law will not lead to more affordable housing.



Local and Regional Efforts to Address Housing Affordability

A Growing Need for Affordable Housing

Data from TRPC and the state Dept. of Commerce identify a need for 54,356 new housing units to accommodate our region's growing population. To address the current housing affordability crisis — and to ensure future residents can afford housing — **29,053 additional units will need to be affordable to low-income households**. An additional 936 emergency housing units and beds are needed for the population experiencing homelessness.

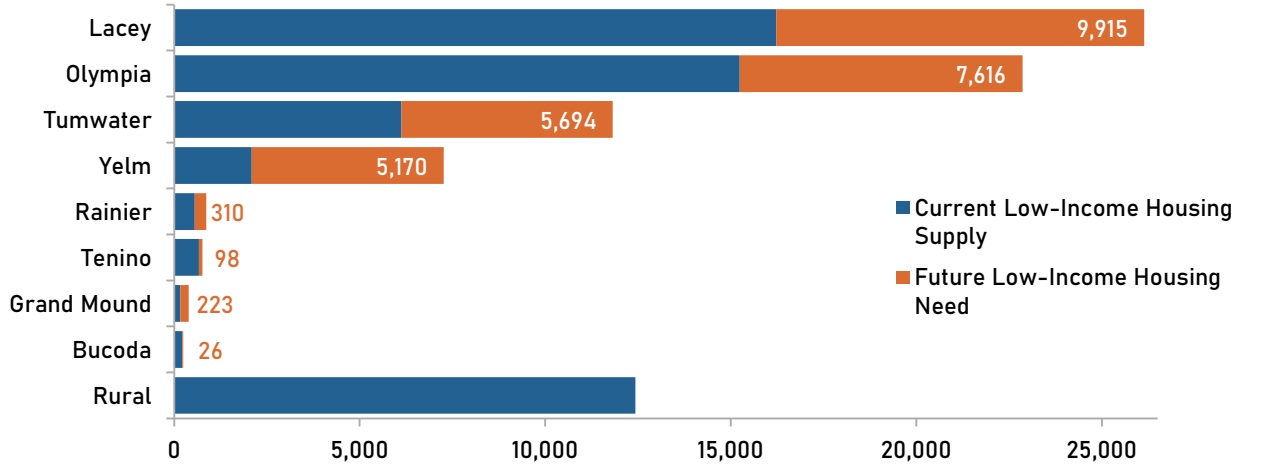


Figure 1
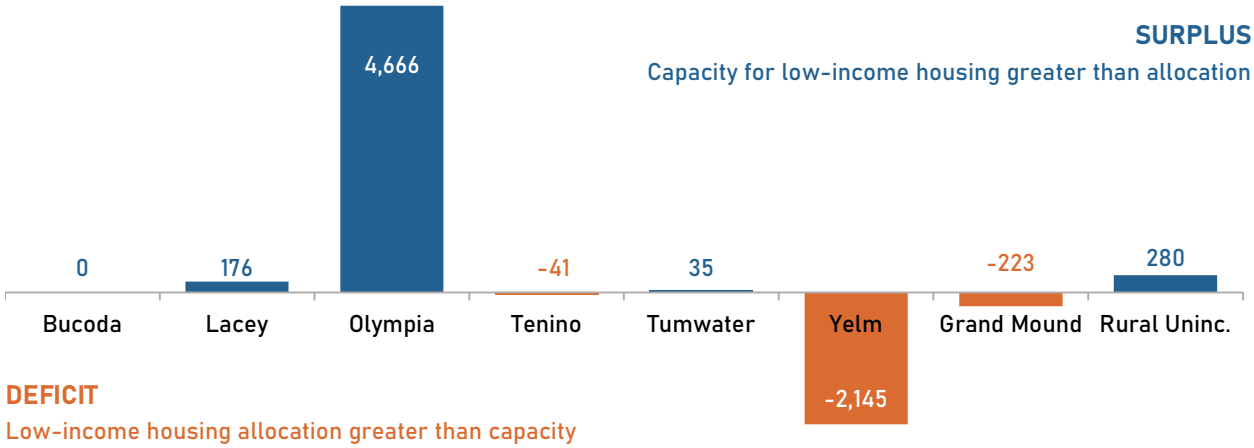
Countywide Housing Need by Income

Where Should Affordable Housing Go?

HB 1220 gives jurisdictions discretion to decide how much low-income housing each jurisdiction should plan for, as long as the countywide need is addressed. The project partners recommended TRPC accept an allocation that met the three values they identified: **fair, clear, and cooperative**.

Figure 2
Low-Income Housing Need (0-80% AMI) Allocated to Each Jurisdiction and its UGA



Thurston County's urban areas generally allow a wide range of housing types that can accommodate affordable housing, including accessory dwellings, duplexes, triplexes, manufactured homes, and apartments.

Is Land the Barrier?

The project included a land capacity analysis that compared the low-income housing need allocated to each jurisdiction to the amount of buildable land in zones that can accommodate low-income housing types. **For most jurisdictions, land — and how it is zoned — is not the barrier to accommodating low-income housing.** Deficits were only found in three jurisdictions: Tenino, Yelm, and the Grand Mound UGA.

Figure 3
Low-Income Housing Need Compared to Capacity for Jurisdictions and Their UGAS

Findings and Next Steps

The land capacity analysis found that:

- The Bucoda, Lacey, Olympia, and Tumwater urban areas, and the rural unincorporated County have sufficient capacity to accommodate future low-income housing needs, as allocated regionally.
- The Tenino, Yelm, and Grand Mound urban areas have deficits in capacity to accommodate future low-income housing needs, as allocated regionally. These jurisdictions will need to include strategies in their comprehensive plan update that will eliminate these deficits.
- All jurisdictions have sufficient capacity to accommodate future needs for emergency housing.

While HB 1220 requires jurisdictions to ensure zoning is not a barrier to affordable housing, on its own, the law will not lead to more affordable housing. All jurisdictions will need to identify policies, programs, and funding gaps to achieve the region's affordable housing goals in the housing elements of their comprehensive plans. Jurisdictions will also need to implement the other requirements of HB 1220 not discussed in this report, including addressing policies with racially disparate impacts and establishing anti-displacement policies.

INTRODUCTION

In 2021, the Washington State Legislature passed HB 1220 which requires cities, towns, and counties to "plan for and accommodate" future housing affordable to a range of incomes and to document the projected housing need each jurisdiction is planning for in the housing element of its comprehensive plan. Specifically, jurisdictions must estimate the number of housing units needed for moderate, low, very low, and extremely low-income households; and emergency housing, emergency shelters, and permanent supportive housing (Table 1). Jurisdictions must also show that there is sufficient land available to accommodate the housing need identified.

The state Dept. of Commerce (Commerce) provided guidance for jurisdictions to implement HB 1220[1]. The guidance recommends that jurisdictions work collaboratively to implement the law. In that spirit, Thurston County and the cities of Lacey, Olympia, Tenino, Tumwater, and Yelm (the "project partners") contracted with Thurston Regional Planning Council (TRPC) to facilitate a process among the project partners and provide the necessary data analysis. The city of Rainier and town of Bucoda were also invited to participate.

The project was completed in two phases. In Phase 1, the project partners reviewed options for allocating the countywide housing need to jurisdictions. In Phase 2, TRPC completed a land capacity analysis identifying any zoning constraints to accommodating those allocations.

HB 1220 also established requirements for jurisdictions to identify local policies and regulations that result in racially disparate impacts, displacement, and exclusion in housing and identify and implement policies and regulations to undo them; and identify areas at higher risk of displacement and establish anti-displacement policies. These requirements are being addressed by the jurisdictions in a separate process and are not included in this report.

Table 1: Housing Types Called out in HB 1220, and Thurston County Income Thresholds

Housing Type	Percent of Thurston Area Median Income*	Equivalent 2023 Household Income*
Extremely Low Income	Less than 30%	Less than $30,750
Very Low Income	30 to 50%	$30,750 to $51,250
Low Income	50 to 80%	$51,250 to $82,000
Moderate Income	80 to 120%	$82,000 to $102,500
Permanent supportive housing	Subsidized, leased housing with no limit on length of stay that prioritizes people who need comprehensive support services to retain tenancy and utilizes admissions practices designed to use lower barriers to entry than would be typical for other subsidized or unsubsidized rental housing, especially related to rental history, criminal history, and personal behaviors.	
Emergency housing	Temporary indoor accommodations for individuals or families who are homeless or at imminent risk of becoming homeless that is intended to address the basic health, food, clothing, and personal hygiene needs of individuals or families. Emergency housing may or may not require occupants to enter into a lease or an occupancy agreement.	
Emergency shelter	Facilities that provide a temporary shelter for individuals or families who are currently homeless Emergency shelter may not require occupants to enter into a lease or an occupancy agreement. Emergency shelter facilities may include day and warming centers that do not provide overnight accommodations.	

*Note: Housing types are defined in RCW 36.70A.030. *Income thresholds are based on HUD estimates for a family of four.*

Income Ranges

HB 1220 uses information from the U.S. Department of Housing and Urban Development (HUD) to define income levels. While the percent of the area median income (e.g. 30-50% AMI) is used as shorthand for the income ranges in this report, these values refer to a four-person reference household. HUD adjusts income thresholds based on household size.

HOUSING NEED ALLOCATIONS

The first step in implementing HB 1220 is to identify the housing need allocation for each jurisdiction — the number of units apportioned to each jurisdiction to meet the countywide need for moderate, low, very low, and extremely low-income households; and emergency housing, emergency shelters, and permanent supportive housing. While HB 1220 requires Commerce to identify the countywide number of units in each income range, it gives jurisdictions discretion in how that need is allocated to cities, unincorporated urban growth areas (UGAs), and the rural unincorporated County.

Between August and October 2023, TRPC convened a project team that included planning directors and staff from Thurston County and the cities of Lacey, Olympia, Tumwater, and Yelm. This group identified the following shared values to assess different housing need allocation methods and select a preferred approach:

Fair

- Distributes new low-income units across all jurisdictions
- Recognizes the differences among jurisdictions and existing housing distribution
- Recognizes needs of community members – especially people who rely on permanent supportive housing and emergency housing

Clear

- Easy to communicate to public and elected officials
- Tailored to jurisdiction boundaries (including UGAs)
- Uses established methods to limit risk of legal challenges

Cooperative

- Builds on existing structures and processes – including the Regional Housing Council, Comprehensive Plan updates, Countywide Planning Policies
- Supported by all workgroup members

The project partners also agreed that the total number of housing units allocated to each jurisdiction should be consistent with the jurisdiction population, employment, and housing projections adopted by TRPC in September 2019.[2]

Countywide Housing Needs

HB 1220 builds on existing requirements for jurisdictions to plan for population growth. TRPC's most recent population and employment forecast estimates that 54,356 new housing units will be needed between 2020 and 2045 to support projected population growth (88,707 new people).[2] Table 2 shows the number of housing units projected for each jurisdiction. These projections were developed consistent with Thurston County's Countywide Planning Policies.

Table 2: TRPC Projected Housing Need by Jurisdiction

		Housing Units		
		2020 Census	**2045 TRPC Projection**	**2020-2045 Projected Need**
Bucoda	Town	241	375	134
Lacey	City	23,042	28,196	5,154
	UGA	13,562	22,532	8,970
Olympia	City	25,642	38,286	12,644
	UGA	5,093	6,744	1,651
Rainier	City	850	1,421	571
	UGA	54	77	23
Tenino	City	780	1,299	519
	UGA	5	14	9
Tumwater	City	11,064	17,740	6,676
	UGA	1,210	3,726	2,516
Yelm	City	3,456	10,960	7,504
	UGA	515	659	144
Grand Mound	UGA	424	734	310
Rural Unincorporated		35,500	43,031	7,531
Total		**121,438**	**175,794**	**54,356**

Note: TRPC forecast adopted September 6, 2019, for jurisdiction boundaries as of September 1, 2023. Numbers may not add to total due to rounding.

HB 1220 adds a requirement that jurisdictions plan for a specific number of housing units affordable for moderate, low, very low, and extremely low-income households; and emergency housing, emergency shelters, and permanent supportive housing. Commerce's Housing for All Planning Tool (HAPT)[2] provided the estimated housing need for each income range and housing type shown in Table 3. Income ranges are expressed as a percent of the area median income; the equivalent household incomes for the Thurston region in 2023 are shown in Table 3. While HB 1220 does not require jurisdictions to plan for housing affordable to households earning more than 120% of the area median income, this need is included so the number of units can be summed up to the total (identified as "Remainder" in tables).

While cities, towns, and counties have discretion over how this need is allocated among the jurisdictions, the countywide housing need identified by Commerce for each income range cannot be changed.

Table 3: Dept. of Commerce Housing Needs by Income Level for Thurston County

	Estimated Supply (2020)	Total Future Supply (2045)	Net Need (2020-2045)	Estimated Supply (2020)	Total Future Supply (2045)	Net Need (2020-2045)
Housing Units						
0-30% AMI (PSH)	180	3,774	3,594	0.1%	2.1%	6.6%
0-30% AMI (Non-PSH)	2,874	11,632	8,758	2.4%	6.6%	16.1%
30-50% AMI	12,405	20,836	8,431	10.2%	11.9%	15.5%
50-80% AMI	38,285	46,555	8,270	31.5%	26.5%	15.2%
80-100% AMI	26,403	30,776	4,373	21.7%	17.5%	8.0%
100-120% AMI	15,489	19,870	4,381	12.8%	11.3%	8.1%
Remainder	24,476	41,025	16,549	20.2%	23.3%	30.4%
Other	1,327	1,327	0	1.1%	0.8%	0.0%
Total	**121,438**	**175,794**	**54,356**	**100.0%**	**100.0%**	**100.0%**
Emergency Housing (Beds)	**626**	**1,562**	**936**	**—**	**—**	**—**

Note: "AMI" refers to the area median family income, which HUD estimates was $102,500 in 2023 for Thurston County. Income ranges are expressed relative to the AMI; income ranges are for a family of four. "PSH" is permanent supportive housing. "Other" includes recreational, seasonal, or migrant labor housing. Numbers may not add up to totals due to rounding. Housing types are defined in RCW 36.70A.030.

Baseline Housing Supply

The project partners agreed that it was important to plan for housing in both the incorporated and unincorporated urban growth areas of each jurisdiction. Since the tools provided by Commerce did not provide estimates for UGAs, TRPC revised the baseline housing supply estimates provided by Commerce using the assumptions listed below. In addition, TRPC revised the baseline supply to reflect current (September 1, 2023) jurisdiction boundaries.

- Use TRPC's parcel-level housing estimates where newly annexed jurisdiction boundaries do not align with 2020 Census blocks.
- The percentage of housing by income range in each UGA is the same as what Commerce estimated in the HAPT tool for its adjacent incorporated area.
- There is no permanent supportive housing or emergency housing in the unincorporated UGA.
- Any permanent supportive housing units where Commerce was unable to determine the jurisdiction (68 units total) were assumed to be in Olympia based on data provided by Olympia staff in the 2023-2027 Thurston-Olympia Consolidated Plan.
- The revised housing supply uses newly released 2020 decennial census data on seasonal and migrant housing instead of American Community Survey (ACS) estimates used in the Commerce HAPT tool. (While HB 1220 does not require jurisdictions to plan for seasonal and migrant housing, these units are removed from the available housing supply.)

HB 1220 only requires housing need allocations for cities, towns, and the unincorporated areas. However, the partners requested housing allocations for the unincorporated UGAs to inform how they plan for housing needs in areas likely to be annexed over the next 20 years. These UGA estimates are for informational purposes only; Thurston County — in consultation with the cities — has discretion over how

the housing need is allocated between urban and rural unincorporated areas as long as the total housing units align with Table 2.

Preferred Allocation Method

The project partners reviewed several methods for allocating the countywide housing need to jurisdictions. Two methods were developed by Commerce in its HAPT tool. TRPC staff also meet with staff from King, Kitsap, Pierce, and Snohomish Counties to discuss their method. Due to their earlier periodic Comprehensive Plan update deadline, all four counties had made progress implementing HB 1220.

The project partners ultimately preferred a variation of the method used by Snohomish County, because it best achieves the shared values identified on Page 7. The preferred method modifies the Snohomish County method so that no low-income housing or emergency housing is allocated to the rural unincorporated County. The partners developed this modification in response to feedback from Commerce that **residential zoning in rural areas — predominantly large, single-family lots — cannot accommodate the housing types and utilities required for low-income housing, permanent supportive housing, and emergency housing**.

The preferred method:

- Begins with an expectation that each jurisdiction should plan for the same share of the new housing need in each income range, but credits jurisdictions that currently have a higher-than-average share of low-income housing.
- Results in allocations that are positive and consistent with the housing need projected for each jurisdiction (Table 2) and for each income range countywide (Table 3).
- Is consistent with the Countywide Planning Policies and is supported by all project partners.
- Limits allocation of low-income housing to rural areas, in line with Commerce guidance.

The preferred housing need allocation is shown in Table 4; the process for calculating it is described in Appendix I. The housing need allocations were adopted by TRPC on December 6, 2024. These allocations replace numbers provisionally accepted by TRPC on March 1, 2024.

Table 4: 2020-2045 Housing Need Allocations

		Housing Units								Beds
		Total	Income Level (Percent of Area Median Income)							Emergency Housing
			0-30%		30-50%	50-80%	80-100%	100-120%	Remainder	
			PSH	Non-PSH						
Bucoda	Town	134	6	12	0	8	67	20	21	3
Lacey	City	5,154	424	1,086	1,199	515	0	540	1,390	103

Grand Mound	UGA	310	16	40	23	143	57	11	19	6
Rural Unincorporated		7,531	0	0	0	0	0	0	7,531	0
Thurston County		**54,356**	**3,594**	**8,758**	**8,431**	**8,270**	**4,373**	**4,381**	**16,549**	**936**

Adopted by TRPC on December 6, 2024.

Note: Numbers may not add to totals due to rounding. "PSH" refers to permanent supportive housing.

This page intentionally blank

LAND CAPACITY ANALYSIS

The second step in implementing HB 1220 is a land capacity analysis to identify if there is sufficient capacity — based on zoning and development regulations — to accommodate the identified housing need. Commerce's guidance for updating housing elements[1] outlines five steps for completing the land capacity analysis, which are described in this report:

1. Summarize Land Capacity by Zone
2. Categorize Zones by Allowed Housing Types and Density Category
3. Relate Zone Categories to Potential Income Levels and Housing Types
4. Summarize Capacity by Zone Category
5. Compare Allocated Housing Need to Capacity

These steps are described below. The land capacity analysis was completed as part of Phase 2 of the project.

Due to the unique nature of joint planning in Thurston County, the partners requested that the land capacity analysis combine data for cities and their unincorporated urban growth areas. How low-income housing is allocated within unincorporated urban areas will be addressed in the cities' comprehensive plans and the joint plans the cities have with Thurston County.

Summarize Land Capacity by Zone

"Capacity" refers to the potential number of new dwelling units that could be built on a parcel based on zoning, development regulations, development trends, and market factors. Capacity includes greenfield development, infill development, and redevelopment. Under the ILA for Phase 2, the partners agreed to use the land capacity model developed for TRPC's most recently adopted forecast and the 2021 Buildable Lands report. The documentation for that model — including the assumptions that went into it — can be found in TRPC's forecast documentation[4] and the Buildable Lands report[5].

The capacity estimates for each zone are shown in Appendix II.

Changes from Adopted Forecast

While TRPC used the same land capacity model to develop TRPC's adopted forecast and the 2021 Buildable Lands Report, the capacity estimates differ from those published in 2021 Buildable Lands Report for the following reasons:

Extension of Planning Horizon to 2045. The planning horizon for the Buildable Lands Report was 2040 while the planning horizon for Comprehensive Plans is 2045. The capacity for housing need allocations includes additional capacity due to:

- Land expected to be redevelopable after 2040
- Accessory dwelling units expected to be built between 2040 and 2045
- Development of some master planned communities projected to occur after 2040

- Difficult-to-sewer areas and areas without sewer expected to have sewer after 2040

Recent development. TRPC also adjusted the capacity to account for recent housing development. If a project was permitted that exceeded the capacity estimate in TRPC's model, the capacity was revised to the permitted number of units.

TRPC did not revise capacity to account for changes in market trends, zoning, or development regulations that have occurred since the last forecast was updated. Doing so would require substantial updates to the population and housing forecast adopted by TRPC in 2019 that serves as the foundation for the housing need allocations and was not included in the scope of work of the current ILA.

Bush Prairie Habitat Conservation Plan. The City of Tumwater and the Port of Olympia are working on a habitat conservation plan (the "Bush Prairie HCP") to mitigate the impacts of development on four species protected under the Endangered Species Act. TRPC's adopted forecast includes assumptions that mitigation in the Bush Prairie HCP (and other jurisdiction HCPs) would reduce capacity in the rural unincorporated County. However, the latest draft of the Bush Prairie HCP identifies significant mitigation within Tumwater's city limits. Therefore, the land capacity analysis reduced capacity in the zones where mitigation is most likely to occur by the factors show in Table 5. The estimated acres removed for mitigation were provided by Tumwater staff.

Table 5. Capacity Reduction Factors for Bush Prairie HCP

Zone	Acres Removed for Mitigation	Total Area (Vacant Parcels)	Reduction Factor
MFH	5	18.7	26.8%
MFM	30	83.1	36.1%
MU	30	27.0	100.0%
SFL	190	354.6	53.6%
SFM	40	227.2	17.6%

Note: Acres removed for mitigation provided by Tumwater staff. Total area is from TRPC's land capacity model. Reduction only applied to capacity on vacant parcels.

Capacity for Accessory Dwelling Units

TRPC's method for projecting accessory dwelling units (ADUs) mirrors Commerce's guidance. TRPC projects the number of ADUs likely to be built over the next 20 to 25 years based on past trends and recent changes to development regulations. The units are then allocated to "potential ADU lots." The estimated number of ADUs for each jurisdiction is shown in Table 6.

Within urban areas of Thurston County (including cities, towns, and unincorporated urban areas), TRPC projects 565 ADUs across 11,886 potential ADU lots — a participation rate of about five percent. Potential lots have only one single-family unit and no additional dwellings and are located in areas platted prior to 1970 (referred to as "infill areas"). For the rural unincorporated county, TRPC projects 280 ADUs across 24,271 potential ADU lots — a participation rate of about one percent. Potential lots have one single-family unit and no additional dwellings.

For the land capacity analysis, Tumwater and Yelm requested revisions to the ADU assumptions in their urban areas based on observed or expected trends. These are shown in Table 6.

Table 6: Estimates of Accessory Dwelling Units by Jurisdiction.

Jurisdiction		Accessory Dwellings		Potential ADU Lots
		Adopted Forecast	For LCA	
Bucoda	City	9	No Change	195
Lacey	City	97	No Change	2,045
	UGA	43	No Change	906
Olympia	City	309	No Change	6,502
	UGA	1	No Change	16
Rainier	City	5	No Change	104
	UGA	0	No Change	0
Tenino	City	19	No Change	395
	UGA	0	No Change	0
Tumwater	City	73	No Change	1,536
	UGA	0	10	0
Yelm	City	9	100	185
	UGA	0	20	2
Grand Mound	UGA	0	No Change	0
Urban Total		**565**	**686**	**11,886**
Rural Total		**280**	**No Change**	**24,271**
Countywide		**845**	**966**	**36,157**

Categorize Zones by Allowed Housing Types and Density Category

Step 2 of Commerce's guidance recommends that jurisdictions assign a density category to each zone based on the density and types of housing allowed. The partners agreed to use the example categories in Commerce's guidance shown in Table 7. In May 2024, TRPC met with jurisdiction staff to review the housing types allowed in each zone and assign a density category; this information is shown in Appendix II.

Table 7: Categories for Classifying Zones by Housing Types Allowed

Zone Category	Typical housing types allowed
Low Density	Detached single-family homes
Moderate Density	Townhomes, duplex, triplex, quadplex
Low-rise Multifamily	Walk-up apartments (up to 3 floors)
Mid-rise Multifamily	Apartments in buildings with ~4-8 floors (~40-85 feet in height)
High-rise/Tower	Apartments in buildings with ~9 or more floors (>85 feet in height) and requiring steel frame construction

Note: Adapted from Commerce's guidance. Manufactured homes are not listed as a housing type because by law they should be allowed in all zones that permit residential uses. High-Rise/Tower zones are likely to be relevant only in major metropolitan cities. Condominiums are omitted since they are a type of ownership, not housing.

Relate Zone Categories to Potential Income Levels and Housing Types

For the land capacity analysis, housing types are tied to an affordability level. Commerce's guidance provides examples of this relationship for moderate- and high-cost communities in Washington State which may be used in the land capacity analysis if a more detailed market analysis is not available. The project partners agreed to use the relationship for moderate-cost communities (Table 8) for this analysis.

Note that the assigned affordability levels are intended to indicate the potential for that zone to accommodate housing affordable to different income levels, not a guarantee that any housing in those zones actually will be affordable at specific household income levels.

Table 8: Relationship of Zone Categories to Housing Income Levels Served in Moderate-Cost Communities

Zone category	Lowest potential income level served		Assumed affordability level for capacity analysis
	Market Rate	With subsidies and/or incentives	
Low Density	Higher income (>120% AMI)	Not typically feasible at scale	Higher income (>120% AMI)
Moderate Density	Moderate income (>80-120% AMI)	Not typically feasible at scale	Moderate income (>80-120% AMI)
Low-rise Multifamily	Low income (>50-80% AMI)	Extremely low and Very low income (0- 50% AMI)	Low income and PSH (0-80% AMI)
Mid-rise Multifamily	Low income (>50-80% AMI)	Extremely low and Very low income (0- 50% AMI)	Low income and PSH (0-80% AMI)
ADUs (all zones)	Low income (>50-80% AMI)	N/A	Group with Low-rise and/or Mid-rise Multifamily

Note: Adapted from Commerce's guidance

Capacity for Low-Income Housing in Moderate Density Zones

The project partners noted that in some situations, low-income housing may be built in low or moderate density zones. This could include:

- Housing built by Habitat for Humanity or similar organizations. Table 9 shows the number of recently constructed Habitat for Humanity projects in Thurston County.
- Under HB 1110, cities between 25,000 and 75,000 are required to allow duplexes in residential zones, and quadplexes if at least one unit is affordable to a low-income household.

The land capacity analysis used HB 1110 as a guide for estimating how much capacity in moderate-density zones could accommodate low-income housing. The land capacity model found 1,104 parcels in Lacey, Olympia, and Tumwater — the three jurisdictions affected by the law — with capacity for four or more units. Total capacity on those parcels is 18,697, or 4,674 low-income units assuming one in four is an income-restricted unit (Table 10).

Table 9: Recent or Upcoming Habitat for Humanity Projects

Jurisdiction	Project	Units	Zone	Density Category
Lacey	Deyoe Vista Subdivision	33	MD	Low-rise Multifamily

Summarize Capacity by Zone Category

In Step 4, the total capacity in each zone category is summarized. This provides the total capacity that could accommodate housing in each income level. These totals are shown in Table 11; detailed capacity by zone is in Appendix II ("Total Capacity" columns).

Table 11: Housing Capacity by Zone Category

	ADUs	Midrise Multifamily	Lowrise Multifamily	Moderate Density		Low Density	Total
	0-80% AMI	0-80% AMI	0-80% AMI	0-80% AMI	80-120% AMI	>120% AMI

Compare Allocated Housing Need to Capacity

The final step of the land capacity analysis is to compare the allocated housing need allocated to each jurisdiction to the capacity for new housing. A summary of the difference between the allocated housing need and capacity is shown in Table 12; detailed findings are shown in Tables 14 through 22 ("Surplus or Deficit" columns). A positive number (surplus) indicates that there is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number (deficit) indicates that there is insufficient capacity. HB 1220 does not require jurisdictions to plan for or accommodate housing for high-income households; data for that income range is excluded.

The land capacity analysis found no deficits in the Bucoda, Lacey, Olympia, and Tumwater urban areas. Deficits were found in Tenino, Yelm, and Grand Mound. The project partners agreed that they would identify strategies to eliminate these deficits as part of their periodic Comprehensive Plan updates. All deficits were found in the low-income categories; no deficits were found in the moderate-income range.

No deficits were found in the rural unincorporated County. Per Commerce guidance, the low-density residential zoning in rural areas — predominantly large lots — cannot accommodate the housing types and utilities required for low-income housing, permanent supportive housing, and emergency housing.

Table 12: Summary of Housing Surplus/Deficit by Jurisdiction

Jurisdiction	Aggregate Housing Need		Capacity		Surplus / Deficit	
	0-80% AMI	80-120% AMI	0-80% AMI	80-120% AMI	0-80% AMI	80-120% AMI
Bucoda	26	87	26	210	0	124
Lacey and UGA	9,915	1,261	10,091	8,256	176	6,995
Olympia and UGA	7,616	3,623	12,282	5,404	4,666	1,781
Tenino and UGA	98	316	58	376	-41	60
Tumwater and UGA	5,694	1,937	5,729	3,692	35	1,755
Yelm and UGA	5,170	1,316	3,025	5,860	-2,145	4,545
Rainier UGA	0	0	0	0	0	0
Grand Mound UGA	223	68	0	406	-223	338
Rural Unincorporated	0	0	280	0	280	0

Note: A positive number (surplus) indicates that there is sufficient capacity to accommodate the allocated housing need for a given income level while a negative number (deficit) indicates that there is insufficient capacity

Yelm Master Planned Community

Yelm is the community with the largest deficit in the land capacity analysis. However, 60 percent of Yelm's capacity for future housing — an estimated 5,000 units — is on 1,250 vacant acres zoned Master Planned Community (MPC). The land capacity analysis assumes that 2,000 low-rise multifamily units that could accommodate low-income households, and 3,000 moderate density units that could accommodate moderate-income households. However, exactly how much affordable housing this area could accommodate will depend on the master plan the City approves.

Emergency Housing

In August 2023, Commerce released updated guidance requiring that all jurisdictions complete a land capacity analysis for emergency housing to meet the intent of HB 1220. TRPC used a seven-step selection process to identify potential emergency housing sites consistent with Commerce's guidance. In this section, "emergency housing" is inclusive of both indoor emergency shelters and indoor emergency housing as referenced in HB 1220; it excludes permanent supportive housing which is addressed in the previous section.

Selection 1

Identify all parcels in zones that allow emergency housing and indoor emergency shelters.

Jurisdiction staff provided a list of zones that allow emergency housing for use in the land capacity analysis (Table 13). By law, emergency housing must be allowed in any zone that allows hotels (RCW 35A.21.430 and 35.21.683). The list of zones is not comprehensive; other zones may allow emergency housing on an emergency or conditional basis, or may allow emergency housing with spacing or intensity restrictions. Trust lands held for the Confederated Tribes of the Chehalis or Nisqually Indian Tribe in were excluded.

Selection 2

From the parcels identified in Selection 1, narrow the search to vacant parcels, hotels, and motels, significantly under-developed or under-utilized parcels, developed parcels with no active business licenses, and those sites that have been declared a nuisance.

For the purposes of the land capacity analysis, only vacant parcels were included. In addition, only the parcel area outside of critical areas or their buffers was included. Vacant parcels were defined as:

- Having an assessor's use code of '91,' a property type of 'LND,' and a property subtype not equal to '46'
- Having at least 0.2 acres outside of critical areas or their buffers
- Having an assessed building to land value less than 0.1 and an assessed land value greater than $100,000 ($10,000 in Bucoda).

Selection 3

Add any parcels that have pending development permits for emergency housing and remove any parcels that have pending development for uses other than emergency housing.

Staff identified four projects currently under consideration:

- Behavioral Health Resources' B&B Apartments Phase 1: Replace eight existing units with eight studio and ten one-bedroom units at State Ave site.
- LIHI Maple Court PSH: Transition current Maple Court facility in Lacey into traditional permanent supportive housing with 124 studio units.
- LIHI Franz Anderson PSH: Construct 71 permanent supportive housing studio units on Franz Anderson Rd.

- New Horizon Communities (“Panza”): 30 studio units in tiny home village. Site yet to be determined.

Because the identified projects are adding permanent supportive housing (addressed in the previous sections) or a site has not been identified, the analysis did not add them to the capacity estimates. The analysis did remove any parcels expected to be developed for non-emergency housing purposes using TRPC’s permit and subdivision databases.

Selection 4

Apply any adopted spacing or intensity requirements to the parcels.

The City of Olympia allows emergency housing in some residential zones if it meets spacing requirements. To simplify the analysis, only zones that did not have spacing or intensity limits for emergency housing were included.

Selection 5

Determine how many emergency shelter beds or emergency housing units could be accommodated.

Commerce’s guidance provides two options for determining the amount of emergency housing that could be accommodated on each site: a site-specific analysis and assumed density method. TRPC took the latter approach, using an assumed density of 50 beds per acre for future emergency housing, excluding critical areas and buffers. This assumption was based on the Quince Street Village in Olympia, which has 100 units on 1.4 acres (71 units per acre). In addition, the analysis assumed that no more than 150 units or beds would be built on a single parcel.

Selection 6

Add up the capacity from all available sites identified in Step 5.

Table 13 shows the estimated capacity for emergency housing by zone.

Selection 7

Document the capacity for emergency shelter and emergency housing in the jurisdiction compared to the allocated emergency housing need.

Tables 14 through 22 show the identified capacity for emergency housing compared to the allocated emergency housing need. No deficits were identified.

APPENDIXES

Appendix I: Housing Need Allocation Method

The project partners preferred the method used by Snohomish County to allocate the housing need to jurisdictions best achieved the values the group identified: fair, clear, and cooperative.

The Snohomish County method was modified so that no low-income housing or emergency housing was allocated to the rural unincorporated County. This was in response to feedback from Commerce that residential zoning in rural areas — predominantly large lots — could not accommodate the housing types and utilities required for low-income housing, permanent supportive housing, and emergency housing.

The allocation method follows a four-step process. Examples for the city of Lacey are include.

Step 1: Same-Share Housing Need (HAPT Method A)

Calculate each jurisdiction's 2020-2045 housing need, assuming the same percentage is affordable in every jurisdiction. This is the same as Allocation Method A in Commerce's HAPT tool.

16.1% of the countywide 2020-2045 housing need needs to be affordable to a very low-income household. For the city of Lacey, that would equate to 799 housing units.

Step 2: Theoretical Housing Baseline

Calculate the theoretical 2020 housing supply if every jurisdiction had the same share of housing in each income range.

Currently, 10.3% of housing units in Thurston County are affordable to a very low-income household. If the percentage of housing affordable in each income range was the same in every jurisdiction, Lacey would have 2,371 housing units affordable to a very low-income household.

Step 3: Housing Need Adjustment Factor

Subtract the theoretical 2020 housing supply (Step 2) from the actual 2020 housing supply to get an adjustment factor.

Lacey currently has 1,832 housing units affordable to a very low-income household — less than the theoretical equal-share distribution (Step 2). Lacey's housing need adjustment factor for the very-low-income range is 539 housing units (2,371 minus 1,832).

Step 4: Initial Housing 2020-2045 Need

Add the housing need adjustment (Step 3) to the same-share allocation (Step 1). Set any negative allocations in Step 4 to zero. Set any low- or moderate-income housing (0 to 120% AMI) allocated to the rural unincorporated County to zero.

Lacey's initial housing need is 1,338 housing units (799 plus 539). If this number had been negative, it would be set to zero.

Step 5: Final 2020-2045 Housing Need

Removing the negative allocations results in total housing numbers that are higher than Commerce's estimate of housing need. Step 5 reduces the allocations generated in Step 4 proportionally to match both TRPC's housing unit projections for each jurisdiction and the countywide housing need in each income range identified by Commerce. An iterative process is used — called "Iterative Proportional Fitting" — to ensure that all rows and columns sum to the correct total.

After the negative allocations in Step 4 are set to zero, the total low-income housing allocation for all jurisdictions is 159 units higher than the countywide need. The initial allocations are reduced to match the housing totals (Table 2 and Table 3).

Table 23: Preferred Method Sample Calculation of the Very-Low-Income (30-50% AMI) Housing Need.

*Notes: *Sum of positive values.*

Appendix II: Estimated Capacity and Density Category by Zone

Notes: P: housing type is permitted; C: housing type is conditionally allowed. Information is included to support the density category assigned to each zone. Consult jurisdiction code for specifics on which housing types are allowed. The city of Rainier was not included in the interlocal agreement so are omitted from the TRPC analysis. Per Dept. of Commerce guidance, manufactured homes are omitted since they should be permitted in all zones. Capacity in this table excludes accessory dwelling units.

Executive Summary

The City of Tumwater Housing Action Plan began as a collaborative effort between the Cities of Lacey, Olympia, and Tumwater to develop a Regional Housing Needs Assessment and Housing Gap Analysis, a Landlord Survey, and a draft set of actions to address the gaps identified in the housing gap analysis. The City Council adopted the City's Housing Action Plan to reflect the specific conditions and concerns of the City. The plan is intended to inform the City's Comprehensive Plan policies and development regulations and to guide implementation strategies to help the City meet its housing needs and strategic objectives.

COVID-19 Pandemic and the Housing Action Plan

In response to the outbreak of the COVID-19 pandemic, Governor Inslee issued a series of proclamations and declarations aimed at reducing the spread of the virus in Washington state, including requiring all non-essential workers to stay home and stay healthy and extending a moratorium on evictions to protect renters. As a result, significant changes in the Lacey, Olympia, and Tumwater area occurred, affecting businesses and residents alike.

The City of Tumwater will continue to monitor the impact of the pandemic on housing in the coming months and develop plans for implementing appropriate actions whether included in this plan or not.

What are the Housing Gaps?

The following seven housing gaps were identified through the Housing Needs Assessment:

1. Reduce housing costs for low-income and cost-burdened households.
2. Increase the overall housing supply.
3. Increase the variety of housing sizes and types.
4. Increase senior housing options.
5. Maintain in good condition and improve the existing housing stock.
6. Provide safe, stable options for both renters and homeowners.
7. Increase permanent housing options for people with disabilities and those at risk of or experiencing homelessness.

How can We Create an Equitable Housing Market?

About one in four Thurston County residents is a person of color, those who are Hispanic or Latino of any race, and those who are any race other than white alone. People of color generally have more people in their household, are less likely to own their own home, have a smaller household income, and are more likely to experience homelessness than their white, non-Hispanic counterparts. Increasing housing equity is not a single action but an overarching theme in this plan. Affordable housing opportunities cannot be created without also reducing housing-related inequities faced by people of

color. Each strategy in this report includes a discussion of how it, and the actions associated with it, will reduce inequity in our community.

Taking Action Locally

Since the City Council adopted Resolution No. R2018-016 "Actions to Address Homelessness and Increase Affordable Housing in the City" in the summer of 2018 and approved the 2019 Housing Affordability Text and Fee Work Plans, the City has been working on a number of actions to reduce homelessness, increase affordable housing, and collaborate with other jurisdictions and agencies to explore regional solutions to these issues. A summary of that work may be found in Appendix E *Previous Work*.

The Housing Action Plan builds on the affordable housing work the City has completed to date or that is underway, which was guided by Resolution No. R2018-016 and the 2019 City Council Housing Affordability Text and Fee Work Plans. The Housing Action Plan is the next step in the process of identifying actions to increase the amount of affordable housing in the City. The Plan will consolidate all affordable housing action items into one document that the City will use going forward to support the development of more affordable housing in the City.

The City is actively implementing actions that remove barriers and encourage appropriate housing development. Of the actions considered in developing this plan, the City has already implemented 31 actions, including making strategic investments in infrastructure, reducing setback requirements, relaxing ground floor retail requirements, and simplifying requirements for accessory dwelling units.

In addition to the work the City has already accomplished, this plan identifies a menu of 39 more actions the City will take to address housing gaps, needs, and equity:

- Thirteen actions that help increase the supply of permanent, income-restricted affordable housing.
- Eight actions that make it easier for households to access housing and stay housed.
- Five actions that help expand the overall housing supply.
- Two actions that help increase housing variety.
- Six actions that help the City maintain forward momentum in implementing housing strategies.
- Five actions that help establish a permanent source of funding for low-income housing.

Some of these actions are in the process of development/implementation and some have not been implemented. In addition, actions that were reviewed by the City as part of the development of Plan, but were not included in the final list of actions, may be found in Appendix B *Considered Actions*.

Setting a Legislative Agenda

While this plan outlines actions the City can take to address housing gaps, needs, and equity, barriers also exist at the state and federal levels. By far, the largest barrier is a lack of funding for low-income and income-restricted housing, whether it is construction, improvement, rehabilitation, or rental subsidies. Other barriers include condominium liabilities for builders, tariffs on construction materials imported to the United States, and the impact of prevailing wage requirements tied to federal funding for small, non-profit housing developers. Chapter 4 *Legislative Needs* addresses this in more detail.

Chapter 1. Introduction

Thurston County is one of the fastest growing counties in Washington State. The pressure to ensure all households have affordable access to housing is also growing and it represents a significant challenge for all stakeholders. The challenge to provide sufficient affordable housing is complicated by rising construction costs, insufficient inventory, and a greater need for coordinated responses between jurisdictions.

Since the City Council adopted Resolution No. R2018-016 "Actions to Address Homelessness and Increase Affordable Housing in the City" in the summer of 2018 and approved the 2019 Housing Affordability Text and Fee Work Plans, the City of Tumwater has been working on a number of actions to reduce homelessness, increase affordable housing, and collaborate with other jurisdictions and agencies to explore regional solutions to these issues. A summary of that work may be found in Appendix E *Previous Work*.

In 2019, the Washington State Legislature passed HB 1923 encouraging cities planning under the state Growth Management Act to take actions to increase residential building capacity. These actions include developing a housing action plan *"…to encourage construction of additional affordable and market rate housing in a greater variety of housing types and at prices that are accessible to a greater variety of incomes, including strategies aimed at the for-profit single-family home market"* (RCW 36.70A.600).

In recognition of the cross-jurisdiction need for affordable housing, the Cities of Lacey, Olympia, and Tumwater chose to collaborate with Thurston Regional Planning Council to develop a Regional Housing Needs Assessment and Housing Gap Analysis, a Landlord Survey, and a draft set of actions to address the housing gaps identified in the gap analysis. The draft set of actions was used as the basis for developing this local Housing Action Plan for adoption by the City Council. The Washington State Department of Commerce provided funding.

The project included four components:

- A regional housing needs assessment.
- A household income forecast to identify future housing needs.
- A survey of landlords and rental property owners to understand rental housing costs better.
- A draft housing action plan framework, to be modified to reflect current conditions and concerns adopted by the City, identifying a menu of actions for the City to implement to encourage development of a housing stock adequate and affordable for current and future residents.

The Housing Action Plan identifies a menu of actions for the City to implement. These actions are intended to encourage development of a housing stock adequate and affordable for current and future residents of all income levels. This information will be used by the City to update the Housing Element of the Comprehensive Plan and the Tumwater / Thurston County Joint Plan covering the urban growth areas in collaboration with Thurston County, as well as the implementing regulations.

Appendix A *Action Details* provides more detailed information on each action, while Appendix B *Considered Actions* lists all the actions considered through the development of this plan. Where appropriate, explanations as to why an action was not included in the plan are provided.

Sources of Actions

The plan combined data and action ideas from a range of sources. Key sources included:

- **Washington State Department of Commerce.** Actions identified in Commerce's **"**Guidance for Developing a Housing Action Plan (public review draft)" were used as a starting point for the action list.
- **Comprehensive Plans.** Staff reviewed housing elements in the City's Comprehensive Plan and those of the cities of Lacey and Olympia for actions to include. See Appendix C *Policy Evaluation Summary* for more information.
- **Development Codes.** Staff reviewed the City's development code and those of the cities of Lacey and Olympia for actions to include. See Appendix D *Regulations Evaluation Summary* for more information.
- **Stakeholder Committee.** A stakeholder committee that included the Housing Authority of Thurston County, other low-income housing providers, real estate professionals, housing developers (low-income and market rate), and representatives of the Thurston Thrives Housing Action Team reviewed and added to the action list.
- **Staff from the Cities of Lacey, Olympia, and Tumwater.** City staffs provided feedback on actions that have already been completed or are underway, added actions that were local priorities, and removed actions that were outside of the Cities' authority.
- **Previous City Work on Affordable Housing.** City staff incorporated actions completed, underway, or not yet started from the City Council's 2019 Housing Affordability Text and Fee Work Plans. See Appendix E *Previous Work* for more information.
- **City Elected and Advisory Bodies.** The Mayor, City Council, and Planning Commission reviewed, discussed, and proposed amendments to the Housing Action Plan before adoption.
- **Other Sources.** Outreach was done to additional stakeholders as needed, including Habitat for Humanity, the Low-Income Housing Institute, Northwest Cooperative Development Center, and the Thurston Housing Land Trust.

Addressing Housing Gaps and Needs

The Regional Housing Needs Assessment preceded the Housing Action Plan. The Regional Housing Needs Assessment reviewed data available on the region's housing needs and the available housing stock to identify gaps. The most pressing needs identified were the following:

Affordability. Reduce the cost of housing for low-income and cost-burdened households.

Supply. Increase the inventory of housing for all households.

Variety. Increase the variety of housing sizes and types

Seniors. Increase the stock of housing options needed for aging seniors.

Improvements. Maintain the existing housing stock, including improving energy efficiency and air quality.

Stability. Increase household wealth by providing safe, stable options for rental housing and pathways to homeownership.

Supportive Housing. Increase permanent housing options for people with disabilities and those at risk of or experiencing homelessness.

Many actions included in this plan address multiple housing gaps or needs, and each action in this plan identifies which area of need it addresses.

Equity in Housing Affordability

Not all households have access to affordable housing. Across Thurston County, people of color, those identifying as Hispanic or a race other than white alone, have lower incomes, are less likely to own their own home, are more likely to be housing cost-burdened, and are more likely to be homeless (Table 1).

Table 1. Metrics for equity in housing.

Metric	Person of Color	White, Non-Hispanic
Cost Burdened Households	37%	31%
Homeowners	52%	66%
People Experiencing Homelessness	~ 4.4 per 1,000	~2.4 per 1,000
Household with an Income Less than $50,000	41%	33%

Across the United States, including Thurston County and its communities, policies have led to and reinforce housing inequities faced by people of color:

- **Redlining.** Neighborhoods with a large number of people of color were denied access to financing for home improvement and construction. This made it harder for people of color to build financial equity and stay or move out of poverty. While redlining is now illegal, people of color are still more likely to have mortgage applications denied or pay higher interest rates.
- **Zoning.** Zoning regulations explicitly barred racial and ethnic minorities. While this is illegal, zoning regulations today may implicitly bar people of color by placing restrictions on the sizes and types of housing that are affordable and accessible to disadvantaged populations. Zoning that exclusively allows single-family neighborhoods, an estimated 75 percent of all residential-zoned land across major cities in the United States, perpetuates this legacy of barring racial and ethnic minorities.
- **Covenants.** Privately enforced housing covenants used to exclude racial and ethnic minorities from predominantly white neighborhoods. Racial covenants became more common after the United States Supreme Court deemed racial zoning ordinances unconstitutional. Such covenants excluding racial and ethnic minorities are now illegal.

The City can help reverse the disparities caused by these problems by creating more opportunities for affordable housing. The City is also responsible for ensuring that new policies, which are not just around housing, do not exacerbate inequities. Resources like the Government Alliance on Race and Equity's "Racial Equity Toolkit" can help the City incorporate equity considerations in policymaking.

How is Equity Addressed in the Plan?

Because creating affordable housing opportunities goes hand-in-hand with reducing housing-related inequities faced by people of color, increasing equity is not a single action but an overarching theme in this plan. Each strategy in this plan includes a discussion of how it and the actions associated with it work to reduce inequity in our community.

An action that promotes affordable housing, especially for the most vulnerable in our community, is an action that will promote equity.

Defining Terms Used

The following terms are used in this plan.

Affordable Housing. Housing for which the household pays no more than 30 percent of its gross income for housing costs, including utilities.

Income Restricted Housing. Housing for which the occupancy of the units is restricted to households making 80 percent or less of the area median family income, as defined by the United States Department of Housing and Urban Development.

Low-Income Housing. Housing that is affordable for households making 80 percent or less of the area median family income, as defined by the United States Department of Housing and Urban Development. Low-income housing can take the form of income-restricted housing units or subsidized housing. Subsidized housing can take the form of the unit itself being subsidized or the household receiving a housing voucher to subsidize market-rate rent conditions.

Manufactured Home Park. A site under single ownership where ground space is made available for mobile homes, manufactured homes, or a combination of the two. Mobile homes and manufactured homes are both factory-built and considered dwellings for habitation rather than vehicles, such as a recreational vehicle. Mobile homes refer to those units that were factory-constructed prior to June 15, 1976, while manufactured homes are units were factory-constructed after that date.

Permanent Supportive Housing. Permanent housing intended specifically for chronically homeless and permanently disabled individuals and families. Supportive services, such as medical, mental health, enrichment programs, etc., and case management are available on site or closely coordinated to reduce barriers the inhibit households from accessing such services.

Assumptions

Four primary assumptions guided development of this plan:

Menu of options. This plan is intended as a menu of actions for the City to implement. Actions that have already been implemented by the City are found in Chapter 2 *Actions Implemented*. Actions that considered by the City, but not implemented are found in Appendix B *Considered Actions*. Actions that can only be taken by other entities are not included in this plan.

Analysis before implementation. The City is a unique community with different priorities, development patterns, and resources that changes over time. This plan cannot respond to every future issue and need, but it does provide a framework for the City to consider how best to act. Further analysis on an action should be undertaken to determine how well it would respond to the specific need or gap the City attempts to fill.

People experiencing homelessness. This action plan addresses permanent housing solutions. The Thurston County Homeless Crisis Response Plan guides the region's emergency response to homelessness. Although there will be some overlap, this plan is limited to actions that result in or support the creation or preservation of affordable and low-income housing, including permanent supportive housing. Permanent housing is a fundamental part of solving the homelessness crisis our region is experiencing. Despite having a coordinated entry system designed to connect people experiencing homelessness quickly to housing, being responsive to needs is hampered by high housing costs and a lack of housing units.

The City also participates in the newly formed Regional Housing Council with the cities of Lacey, Olympia, and Yelm and Thurston County, created to leverage resources and partnerships to promote equitable access to safe and affordable housing in Thurston County. The Regional Housing Council looks at funding issues for responding to homelessness and housing affordability in the region.

Addressing household income. This plan does not address the income side of the housing equation. Attracting living wage jobs, increasing the minimum wage, and other actions affecting a household's income could help make housing more affordable. The City's Economic Development Plan and the Thurston Economic Development Council guide the region's response to economic development, which has a direct impact on household incomes. Although there will be some overlap, this plan is limited to actions that result in or support the creation and preservation of affordable and low-income housing units.

Housing Element Policies

Appendix C *Policy Evaluation Summary* reviewed the City's current Comprehensive Plan housing policies in the Housing Element for connections to the gaps identified in the housing needs assessment and the status of policy implementation.

All the Housing Element goals, policies, and actions were reviewed and updated as part of 8-year GMA Comprehensive Plan Update in 2016 in Ordinance No. O2016-012. The Housing Element has been amended since the update. The next required eight-year Growth Management update of the Comprehensive Plan is expected to begin in 2022.

The City's housing policies are relevant to the housing needs assessment findings. Some minor adjustments may be appropriate for consideration as part of the 2021 annual Comprehensive Plan amendment docket.

See Appendix C *Policy Evaluation Summary* for complete details.

Development Regulations

Appendix D *Regulations Evaluation Summary* reviewed the City's development regulations for connections to the gaps identified in the housing needs assessment.

The City's Development Code is in the process of being reviewed and updated as part of the work on the 2019 Housing Affordability Text and Fee Work Plans.

The City's development regulations are relevant to the housing needs assessment findings. Some adjustments may be appropriate for consideration in a future development code amendment docket.

See Appendix D *Regulations Evaluation Summary* for complete details.

Chapter 2.
Actions Implemented

As of August 1, 2021, the following 31 actions have been implemented by the City of Tumwater.

- **Adopt design standards that assist new forms of high-density housing and promote infill.** The City adopted the Citywide Design Guidelines in 2016.
- **Allow accessory dwelling units in all residential zones.** Accessory dwelling units allow for increased density on existing residential lots.
- **Simplify requirements for accessory dwelling units (ex: title notification, owner living on site, etc.).** In cooperation with the cities of Lacey and Olympia, the City has developed pre-approved accessory dwelling unit plans free for residents.
- **Allow group homes in all residential zones and commercial zones that allow residential uses.** Group homes are a source of housing for people with disabilities, seniors, those undergoing treatment for a variety of medical concerns, children in foster care, etc.
- **Establish a multifamily tax exemption (MFTE) program.** The Multifamily Tax Exemption (MFTE) Program is intended to encourage the construction of new, rehabilitated, or converted multifamily housing within designated areas. MFTE is limited to multifamily units with four or more units. Eligible projects typically receive an eight-year tax break or twelve years if the property owner/developer commits to renting or selling at least 20 percent of the units to households with an income at or below 115 percent of the median family income during the same period. Once the period lapses, the owner/developer is free to rent or sell units at market rate. The City adopted the MFTE program for the Brewery District and Capitol Boulevard Corridor for eight- and twelve-year projects in 2017 and expanded the MFTE program to include the Town Center and Littlerock Road Subarea for twelve-year projects in 2020.
- **Make strategic investments in infrastructure expansion to reduce development costs.** The City makes a concerted effort to invest in infrastructure expansion where it makes the most sense, thereby reducing development costs and spurring needed development in the right locations. Although the City makes such strategic investments, new development constructs the majority of infrastructure, affecting the overall cost of housing in that development.
- **Process short plat applications administratively.** Short platting is the division of land into a limited number of lots. Typically, approving land divisions is a legislative function of the City Council. However, state law requires cities to have a short plat process and approve such requests administratively. As of 2021, the City allows administrative approvals of short plats for land divisions of nine or fewer lots, the state's current limit for short platting.
- **Recognize modular/manufactured housing as a viable form of housing construction.** Since 2004, state law has recognized the value manufactured housing has on housing affordability. Cities must treat manufactured housing the same as it does traditionally built housing and must allow mobile and manufactured homes to locate in existing manufactured home parks.

- **Reduce setbacks and increase lot coverage/impervious area standards.** The City has reduced setback standards and high increase lot coverage/impervious area standards in residential zone districts.
- **Relax ground floor retail requirements to allow residential units.** In commercial zones, retail uses are often required on the ground floor for mixed-use developments. The City has never established a requirement for ground floor retail in a mixed-use development.
- **Require minimum residential densities.** The City has required minimum residential densities since the approval of the Growth Management Act.
- **With major comprehensive plan updates, confirm land is suitably zoned for development of all housing types.** The City is required to include a Housing Element in its Comprehensive Plan. The Growth Management Act requires the Housing Element to include information on the types of housing available in the City and to confirm there is enough land available for such uses. As part of these updates, the City confirms whether the land itself is zoned properly to sufficiently allow the types of units envisioned in the community in the quantities necessary to meet housing needs. The City is undertaking a similar exercise now with Thurston County to update the Tumwater / Thurston County Joint Plan for the urban growth areas of the City.
- **Support compact development.** The City's Comprehensive Plan supports compact urban development to reduce urban sprawl and reduce the costs of public services.
- **Support low-income senior housing.** The City provides property tax and utility fee discounts for low income seniors.
- **Process development applications expeditiously**. The City is subject to deadlines under the GMA for processing housing plat applications. In general, these deadlines are being met. In addition, the City uses a hearing examiner for hearings related to larger new development projects and subdivisions, taking the politics out of these decisions and administratively approves final plats, reducing approval time.
- **Support transit oriented development** The City is served by public transit, operated by Intercity Transit. Public transit is an important component of affordable housing because parking requirements can be reduced, reducing construction costs, and income not spent on buying and maintaining vehicles means more of that income is available for housing.
- **Support place making.** According to TRPC's Urban Corridors Task Force (Dec 2011 report), place making is an important element of attracting high-density housing along urban corridors. The City is engaged in extensive place making such as restoration of the Historic Brewhouse and construction of the Deschutes Valley Trail to attract high-density residential development to the Brewery District and along Capitol Blvd.
- **Use design guidelines to manage higher intensity uses**. The City has adopted design guidelines for higher density housing to better integrate new development into existing neighborhoods.
- **Regional Housing Council.** In addition to these actions, the City is also taking advantage of a local revenue-sharing program established by HB 1406, which allows the cities to receive a portion of the State's existing sales and use tax to fund affordable housing programs and services. The cities of Lacey, Olympia, Tumwater, and Yelm and Thurston County pool their resources with guidance from the Regional Housing Council to help pay for housing supportive services.

- **Provide funding for renovating and maintaining existing housing that serves low-income households or residents with disabilities.** The City has implemented this action through funding to nonprofits, CDBG funding, and work through the Regional Housing Council.
- **Offer density bonuses for low-income housing.** The City implemented this action through Ordinance No. O2020-005 Housing Affordability Text Amendments.
- **Rezone manufactured home parks to a manufactured home park zone to promote their preservation.** The City has implemented this action through Ordinance O2008-009, which established the Manufactured Home Park (MHP) zone district in the City.
- **Offer developers density and/or height incentives for desired unit types.** The City implemented this action through Ordinance No. O2020-005 Housing Affordability Text Amendments.
- **Reduce parking requirements for residential uses, including for multifamily developments near frequent transit routes.** The City implemented this action through Ordinance No. O2020-005 Housing Affordability Text Amendments. The City needs to see how things work under Ordinance No. O2020-005 before proposing additional changes.
- **Identify strategically placed but underdeveloped properties and determine what barriers exist to developing desired housing types.** The City has implemented this action in the Brewery District and Capitol Boulevard Corridor, specifically the WSDOT property.
- **Reduce minimum lot sizes.** The City implemented this action through Ordinance No. O2020-005 Housing Affordability Text Amendments.
- **Expand the multifamily tax exemption to make it available in all transit corridors.** The City has implemented this action. Ordinance No. O2017-004 established the multi-family tax exemption program at the City. Resolution No. R2017-002 established the Brewery District and the Capitol Boulevard Corridor as the initial target areas. Following the 2019 Housing Affordability Work Plan Development Fee Amendment 3) *Expand the multifamily tax exemption program to other areas of the City, such as the Town Center, and the Littlerock Road Subarea, and look at expanding the percentage of permanently affordable units that would need to be provided*, Resolution No. R2019-022 expanded the target areas to include the Littlerock Subarea and the Town Center.
- **With major comprehensive plan updates, confirm land is suitably zoned for development of all housing types.** The City has implemented this action as part of every required eight-year GMA Comprehensive Plan update.
- **Increase the types of housing allowed in low-density residential zones (duplexes, triplexes, etc.).** The City implemented this action through Ordinance No. O2020-005 Housing Affordability Text Amendments.
- **Allow more housing types in commercial zones.** The City has implemented this action. The City currently allows residential development in all commercial and mixed-use zone districts.
- **Allow single-room occupancy (SRO) housing in all multifamily zones.** The City has implemented this action. The City currently allows single-room occupancy in all multifamily zone districts.

Chapter 3. Local Actions

Local Actions to be Undertaken by the City

This chapter discusses the specific local actions that the City of Tumwater will be implementing as part of the Housing Action Plan.

The Housing Action Plan identifies six strategies for addressing housing needs in the City:

1. Increase the supply of permanent, income-restricted affordable housing.
2. Make it easier for households to access housing and stay housed.
3. Expand the overall housing supply by making it easier to build all types of housing projects.
4. Increase the variety of housing choices.
5. Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies.
6. Establish a permanent source of funding for low-income housing.

Thirty-nine actions are associated with one of the six strategies in the Housing Action Plan, and each action is associated with filling one or more of the seven gaps identified in the Housing Needs Assessment:

Affordability. Reduce the cost of housing for low-income and cost-burdened households.

Supply. Increase the inventory of housing for all households.

Variety. Increase the variety of housing sizes and types

Seniors. Increase the stock of housing options needed for aging seniors.

Improvements. Maintain the existing housing stock, including improving energy efficiency and air quality.

Stability. Increase household wealth by providing safe, stable options for rental housing and pathways to homeownership.

Supportive Housing. Increase permanent housing options for people with disabilities and those at risk of or experiencing homelessness.

Table of Actions

The table of actions associated with each strategy includes key information to know:

- Gaps or needs addressed by the action (as indicated by the above icons)
- Implementation status for the City, as represented by the following symbols:

The action is pending – the City has begun the work necessary to implement the action, but it is not yet fully implemented.

The action will be considered – the City will consider the work necessary to implement the action, but the work has not been scheduled.

Detailed information on each action is provided in Appendix A *Action Details*. For a complete list of actions considered as part of the development of this plan, see Appendix B *Considered Actions*.

Neither the strategies nor the actions associated with them are in in priority order. Not all actions will be implemented by the City, and actions that can only be taken by other entities are not included in this plan.

Effort to Implement

High – Action would require significant resources to implement (funding, staff, political effort, etc.)

Medium – Action would require moderate resources to implement (funding, staff, political effort, etc.)

Low – Action would require few resources to implement (funding, staff, political effort, etc.)

N/A – Action not applicable to the City

Effect on Housing Supply

High – Action would result in a significant increase in desired housing units

Medium – Action would result in a moderate increase in desired housing units

Low – Action would result in a small increase in desired housing units

N/A – Action not applicable to the City

Strategy 1: Increase the Supply of Permanent, Income-Restricted Affordable Housing.

Strategy 1 includes actions that increase the supply of housing affordable to low-income households (those making 80 or less percent of the area median family income) and actions that support the providers of low-income housing.

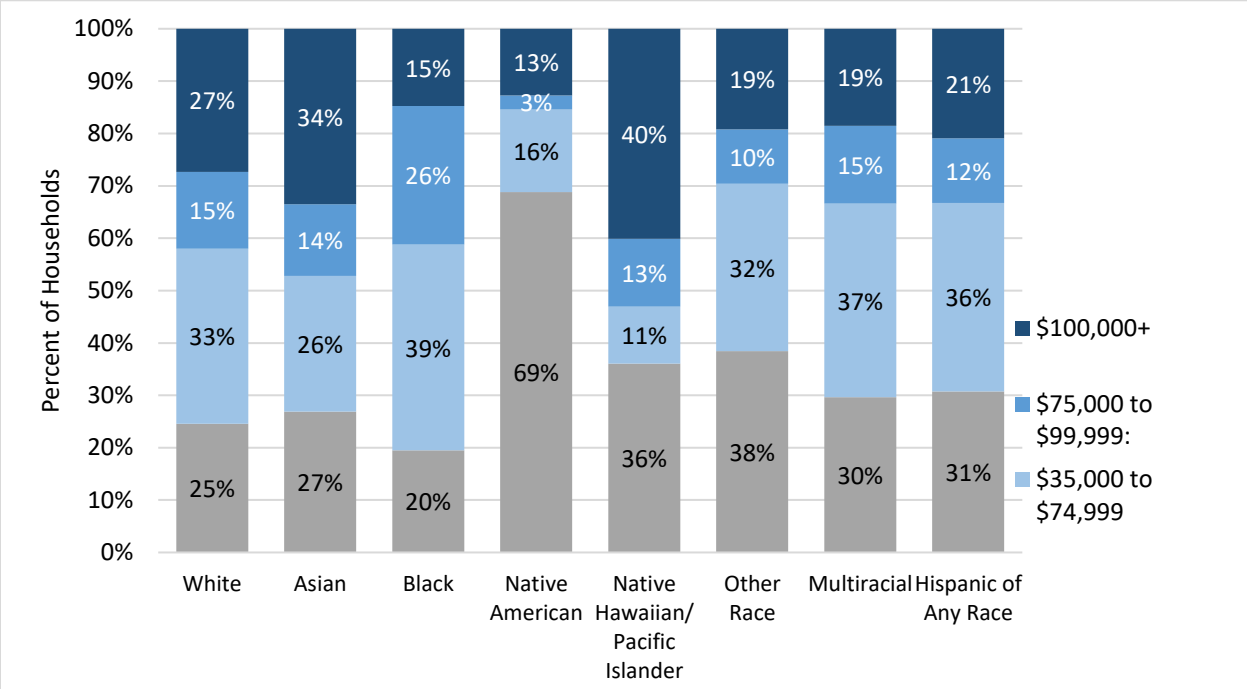
Why is this strategy important?

Demand for housing is straining the limited supply of affordable options. For households with the lowest incomes, such as those headed by a retail clerk, a home health aide, or a childcare provider, market rate housing is unlikely to be an affordable option. For these households, even home maintenance costs, let alone rent or mortgage payment costs, can be unaffordable.

How do these actions reduce housing costs?

Increasing opportunities for developing housing affordable to households with the lowest incomes increases housing affordability for these households. The need is great: according to the needs assessment, about 11,700 households in the Cities of Lacey, Olympia, and Tumwater have an income of 50 percent or less of the median family income. Another 7,500 households in the same category are anticipated over the 25 years.

Reducing the cost of renting and owning a home are both part of the solution. For households looking towards homeownership, the up-front costs associated with purchasing a home can put this option out of reach. Low-income households, however, can benefit from the stabilization in housing costs owning a home offers, in general, monthly mortgage payments stay the same over 30 years while monthly rent payments increase.



These actions also address the need for permanent supportive housing. For people moving out of emergency housing situations, such as a homeless shelter, permanent supportive housing provides not only affordable housing but also access to health and social services. These services build stability and decrease the likelihood residents experience homelessness again.

How do these actions address equity?

People of color (Figure 1) disproportionately head the lowest income households in Thurston County. The same is true for people experiencing homelessness. Permanent, income restricted housing directly benefits both of these populations by providing affordable, stable housing options. Housing affordable to households with the lowest incomes can be rental or owner units, both of which help stabilize

households. Programs that expand homeownership opportunities can significantly improve a household's wealth; this is especially important to addressing inequities for households of color stemming from historical policies like redlining and zoning.

Figure 1. Household income in the Cities of Lacey, Olympia, and Tumwater combined by race and ethnicity, 2014-2018 average.

NOTE: *In the figure above, householders who are Latino or Hispanic are only represented in "Hispanic of Any Race."*

Table 2. Strategy 1: Increase the supply of permanent, income-restricted affordable housing.

Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.a. Donate or lease surplus or underutilized jurisdiction-owned land to developers that provide low-income housing and establish a process for accepting or coordinating the acceptance of land donations from others this action. *Gaps/Needs Addressed:* 		**M**	**M**	The City will consider the work necessary to implement the action, but the work has not been scheduled. While the City does not have any land to donate for housing that is not already committed to other uses, the City could accept or coordinate the acceptance of land donations from others this action.	• Time for staff to develop and manage a program.
1.b. Where a Planned Unit Development is used for residential development, consider requiring a portion of the housing be low-income housing. *Gaps/Needs Addressed:* 		**H**	**M**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.

Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.c. Adopt a "Notice of Intent to Sell" ordinance for multifamily developments. *Gaps/Needs Addressed:*		H	L	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.
1.d. Provide funding for the Housing Authority of Thurston County and other non-profit organizations to buy income-restricted units proposed to be converted to market rate housing. *Gaps/Needs Addressed:*		H	M	The City will consider the work necessary to implement the action, but the work has not been scheduled. Could be part of the Regional Housing Council discussions as well.	• Funding through the City Council's biennial budgeting process.

Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.e. As part of Comprehensive Plan and development code changes, include an evaluation of the impact such changes will have on housing affordability, especially for low-income households. *Gaps/Needs Addressed:* 		**M**	**L**	The City will consider the work necessary to implement the action, but the work has not been scheduled. It is important to recognize that sometimes impacts are unavoidable when trying to balance multiple priorities, such as implementation of the Thurston Climate Mitigation Plan, Building Code updates, and the Housing Action Plan.	• Additional time for staff to include such reviews during the preparation of amendments to the Comprehensive Plan and the development code.
1.f. Provide funding for low-income and special needs residents to purchase housing through community land trusts. *Gaps/Needs Addressed:* 		**H**	**L**	The City will consider the work necessary to implement the action, but the work has not been scheduled. This should be explored on a regional level through the Regional Housing Council, nonprofits, and whether the HATC could do this.	• Funding through the City Council's biennial budgeting process.

Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.g. Offer and/or expand fee waivers for low-income housing developments. *Gaps/Needs Addressed:* 		**H**	**M**	The City has begun the work necessary to implement the action, but it is not yet fully implemented as part of Ordinance No. O2021-001 Housing Affordability Fee Amendments.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.
1.h. Encourage low-income housing units as part of new developments. *Gaps/Needs Addressed:* 		**H**	**H**	The City will consider the work necessary to implement the action, but the work has not been scheduled. This could be required if the residential market can support it. As a requirement, there is concern that it could negatively affect new residential developments. This could also consider allowing density bonuses in the Single Family Medium Density Residential (SFM) zone district for permanent low-income housing in the form of triplexes and quads. In a related discussion, the Planning Commission suggested considering removing "single-family" and "multifamily" from residential zone district titles.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.

Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.i. Fund development projects that increase low-income housing through grants or loans. *Gaps/Needs Addressed:* 		**H**	**M**	The City is currently implementing this action through funding to nonprofits, CDBG funding, and work through the Regional Housing Council. Need to document what is done with City of Tumwater funds.	• Time for staff to manage the annual reporting for such projects.

Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.j. Establish a program to preserve and maintain healthy and viable manufactured home parks. *Gaps/Needs Addressed:* 		**M**	**M**	The City will consider the work necessary to implement the action, but the work has not been scheduled. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 6) *Assess actions for assuring mobile home parks continue to provide affordable housing toward a goal of property ownership by residents* under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. The City has discussed how to get manufactured home parks into a land trust arrangement and inventorying existing manufactured home parks in the City to develop a list of needs.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program. • Time for staff to manage the annual reporting for such projects.

Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.k. Enhance enforcement of property maintenance codes to keep housing in good repair. *Gaps/Needs Addressed:*		**H**	**M**	The City is currently implementing this action and may look at moving beyond the current complaint driven process, to consider periodic inspections of rental property such as mold/vermin inspections. Suggest starting as a voluntary program. Review City of Lacey and City of Aberdeen's programs.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.
1.l. Partner with low-income housing developers (such as Habitat for Humanity) to expand homeownership opportunities. *Gaps/Needs Addressed:*		**M**	**M**	The City is currently implementing this action through funding to nonprofits, CDBG funding, and work through the Regional Housing Council.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

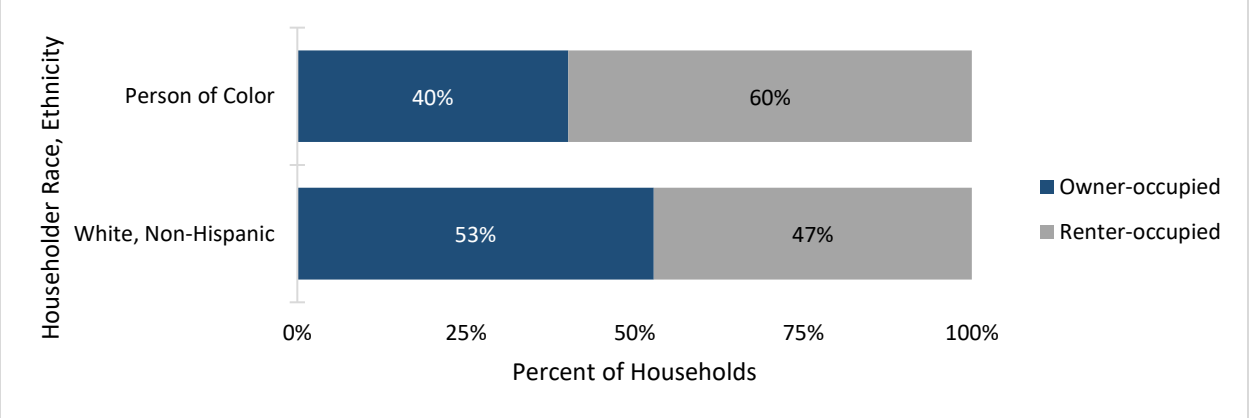
Strategy 1: Increase the supply of permanent, income-restricted affordable housing. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
1.m. Extend public water and sewer to unserved areas to allow infill development in underdeveloped areas. *Gaps/Needs Addressed:*  		**H**	**M**	The City Council's 2019 Housing Affordability Fee Amendment Work Plan included the item "making infrastructure investment for infill areas needing upgrades." The Comprehensive Plan describes where the City expects, and is trying to direct, growth over the next twenty years. The private sector has traditionally done utility extension and upgrades as areas grow. For infill development, the City could invest to promote development in areas where new housing is desired, but upgrades to infrastructure, such as utilities and sidewalks, would be needed to support it.	• Funding through the City Council's biennial budgeting process. • New funding source will need to be confirmed and may not be from ratepayers. • Time for staff to develop and run such a program. • Amendments to the Comprehensive Plan Lands for Public Purposes and Transportation Elements • Amendments to the priorities of the Capital Facilities Plan

Strategy 2: Make It Easier for Households to Access Housing and Stay Housed.

Strategy 2 actions address housing stability by preventing evictions and displacement and creating opportunities to build financial equity through homeownership.

Why is this important?

Housing stability is an important component of housing affordability. When households face housing insecurity due to income or other issues, there can be a fine line between being housed and being homeless. Evictions and foreclosures are both destabilizing and can lead to long-term poverty. These events also make it more likely a household will experience homelessness.



How do these actions reduce housing costs?

For housing service providers, preventing homelessness in the first place is more cost-effective than housing someone experiencing homelessness. Households that can avoid evictions and foreclosures also avoid likely increases in their monthly housing costs, if they are even able to find a new home to live in. For renters, this can also include application fees, deposits, and other costs associated with finding new rental housing.

How do these actions address equity?

People of color are more likely to rent (Figure 2) and more likely to have a lower income than their white, non-Hispanic counterparts. This makes them particularity vulnerable to eviction when rent increases exceed their ability to pay. This concern is reflected in the population experiencing homelessness, which are also disproportionately people of color.

Figure 2. Tenure by race and ethnicity in the Cities of Lacey, Olympia, and Tumwater combined, 2014-2018 average.

Source: U.S. Census Bureau American Community Survey

Homeownership is an important way for a household to build financial equity, move people out of poverty, and create generational wealth. Creating these opportunities for people of color, who were historically denied access to mortgages and loans, is particularity important.

Table 3. Strategy 2: Make it easier for households to access housing and stay housed.

Strategy 2: Make it easier for households to access housing and stay housed. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
2.a. Have developers provide tenants displaced by redevelopment with relocation assistance. *Gaps/Needs Addressed:*		**H**	**M**	The City will consider the work necessary to implement the action, but the work has not been scheduled. More details would need to be provided for the action. It may be best implemented through funding to nonprofits, CDBG funding, and work through policies from the Regional Housing Council.	• Funding for displacement assistance from developers. • Funding for running program through the City Council's biennial budgeting process • Time for staff to develop and run such a program.
2.b. Partner with local trade schools to provide renovation and retrofit services for low-income households as part of on-the-job-training. *Gaps/Needs Addressed:*		**M**	**L**	The City will consider the work necessary to implement the action, but the work has not been scheduled. The City would like to see how to get more people into the building trades to help alleviate the labor shortage. Furthermore, the City could ask EDC to focus on helping people who want to start a construction company.	• Funding through the City Council's biennial budgeting process • Time for staff to develop and run such a program.

Strategy 2: Make it easier for households to access housing and stay housed. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
2.c. Adopt short-term rental regulations to minimize impacts on long-term housing availability. *Gaps/Needs Addressed:*  		**H**	**L**	The City will consider the work necessary to implement the action if we start to see a problem, but the work has not been scheduled. Consider requiring on site ownership for accessory dwelling units used as short-term rentals.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance. • Time for staff to develop and run such a program.
2.d. Support down payment assistance programs for homeownership and programs that assist people entering the rental market. *Gaps/Needs Addressed:*  		**H**	**M**	The City will consider the work necessary to implement the action if we start to see a problem, but the work has not been scheduled. While it is beyond the financial capacity of the City to manage such programs and it would be better as state or regional programs, the City could support regional programs with non-profit management.	• Time for staff to review and develop ordinance updating development code. • Time for staff to develop and run such a program.

Strategy 2: Make it easier for households to access housing and stay housed. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
2.e. Identify and implement appropriate tenant protections that improve household stability. *Gaps/Needs Addressed:* 		**H**	**M**	The City has begun the work necessary to implement the action, but it is not yet fully implemented as part of Rental Housing Amendments. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 9) *Enact policies to protect tenants experiencing housing instability* under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this action. Tenant protections can mean putting a burden on small owners, who often are unable to afford to subsidize their rental property. Start this program with larger rental properties.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance. • Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.
2.f. Develop a technical assistance or education program for small landlords. *Gaps/Needs Addressed:* 		**M**	**M**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

Strategy 2: Make it easier for households to access housing and stay housed. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
2.g. Assist non-profits in the process of acquiring mobile home parks to turn them into public trusts so that lot rental fees can be controlled. *Gaps/Needs Addressed:* 		**H**	**M**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.
2.h. Fund an energy assistance program for rental housing/make landlords do upgrades when the unit is sold. *Gaps/Needs Addressed:* 		**M**	**L**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

Strategy 3: Expand the Overall Housing Supply by Making It Easier to Build All Types of Housing Projects.

Strategy 3 includes actions that streamline the development and construction of market rate housing, both owner and renter-occupied homes.

Why is this important?

Between 2020 and 2045, the population of the Cities of Lacey, Olympia, and Tumwater and their urban growth areas is projected to increase by over 60,000 people. This growth will require nearly 30,000 new housing units. When demand for housing is high, as it is now, but supply remains low, housing costs increase, reducing affordability. The increase in costs affects both renters, and those looking to buy.

How do these actions reduce housing costs?

The Housing Needs Assessment showed that we would likely see a growth of households in all income categories, from the lowest earning ones to those earning well above the median income. This will require the construction of housing affordable to a wide range of incomes.

Expanding the housing supply also means people can find housing better suited to their needs. For example: high prices for condos and rentals means empty nesters who want to downsize are more likely to stay in their single-family home. A young family looking to buy their first home may continue to rent or pay more than 30 percent of their household income on a mortgage if home sale prices are too high.

How do these actions address equity?

When demand for housing is high but supply remains low, housing costs rise, decreasing affordability. Those with the lowest incomes, who are disproportionately people of color, are most affected. Rising rents are correlated with increased evictions and homelessness.

Rising home prices mean homeownership, a way for disadvantaged households to build equity, becomes more difficult. Increasing costs can also lead to cultural displacement as people move to new neighborhoods that lack the businesses and institutions important to their community. While this process may be voluntary, it can be destabilizing for communities of color. When higher income households, those that can afford to rent or purchase at market rates, find housing that better meets their needs and budgets, more units are freed up that lower income households can afford. Expanding the overall housing stock also slows the rent/housing price increases that disproportionately affect people of color.

Market rate housing alone will not address the needs of the most disadvantaged populations, and pressure to develop market rate housing in communities of color can cause displacement. Strategy 1 includes actions to increase the supply of housing for the lowest-income households while Strategy 2 includes actions to make it easier for households to access housing and stay housed.

Table 4. Strategy 3: Expand the overall housing supply by making it easier to build all types of housing projects.

Strategy 3: Expand the overall housing supply by making it easier to build all types of housing projects. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
3.a. Lower transportation impact fees for multifamily developments near frequent transit service routes. *Gaps/Needs Addressed:*		**H**	**M**	The City has begun the work necessary to implement the action for low-income households, but it is not yet fully implemented as part of Ordinance No. O2021-001 Housing Affordability Fee Amendments. Discuss with Intercity Transit.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.
3.b. Allow deferral of impact fee payments for desired unit types. *Gaps/Needs Addressed:*		**M**	**L**	The City has begun the work necessary to implement the action, but it is not yet fully implemented as part of Ordinance No. O2021-001 Housing Affordability Fee Amendments.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.

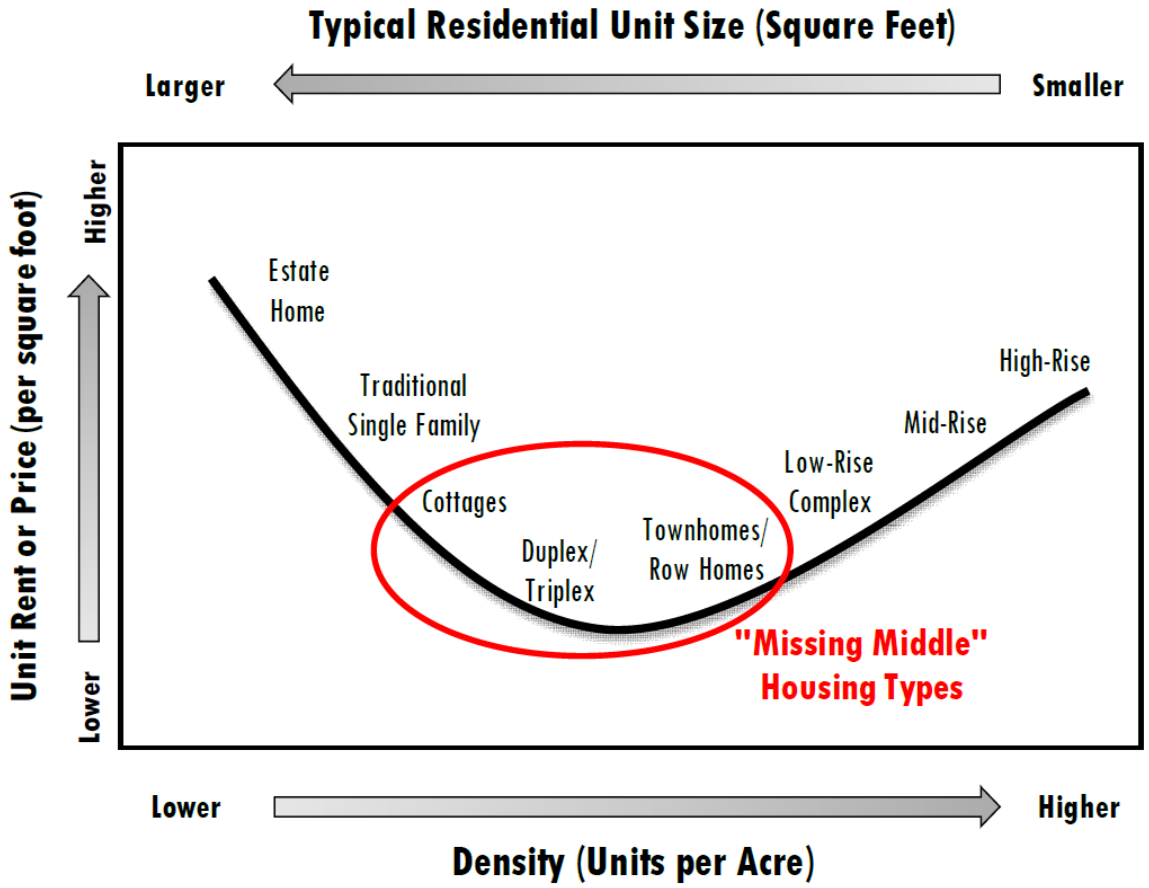
Strategy 3: Expand the overall housing supply by making it easier to build all types of housing projects. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
3.c. Maximize use of SEPA threshold exemptions for residential and infill development. *Gaps/Needs Addressed:* 		**H**	**M**	The City has begun the work necessary to implement the action in support the City's affordable housing goals of raising the SEPA categorical exemption thresholds for multifamily residential development from 25 to 60 multifamily residential units to reduce duplicative environmental review. Ordinance No. O2017-008 raised the SEPA exemption level for short plats to the maximum allowed by state law (9 lots) and to 25 for multifamily dwelling units. Ordinance No. O2019-022 raised the SEPA exemption level for multifamily dwelling units to the maximum allowed by state law (60 for multifamily dwelling units). Focus on reviewing SEPA exemptions and planned actions that support residential development in the Brewery District, Capitol Boulevard Corridor, and Town Center.	• Funding through the City Council's biennial budgeting process. • Revise TMC Chapter 15.48 *Transportation Concurrency Requirements* to allow for review of traffic impacts and ensure concurrency. • Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance. • Consider reviewing SEPA exemptions that support residential development in the Brewery District, Capitol Boulevard Corridor, and Town Center. • Align with MFTE program.

Strategy 3: Expand the overall housing supply by making it easier to build all types of housing projects. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
3.d. Continue to look for place-making opportunities along urban corridors. *Gaps/Needs Addressed:*  		L	L	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Time for staff to develop and run such a program. • Funding through the City Council's biennial budgeting process.
3.e. Mix market rate and low-income housing to avoid creating areas of concentrated low-income housing. *Gaps/Needs Addressed:* 		L	L	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.

Strategy 4: Increase the Variety of Housing Choices.

Strategy 4 actions address way to increase the variety of housing options, including duplexes, triplexes, accessory dwellings, and other housing forms that are not as common in the Cities of Lacey, Olympia, and Tumwater.

Why is this important?



Household sizes in Thurston County have gotten smaller, an average of 2.5 people per household today. There are more single-parent families and householders living alone. As household formation and composition have changed over time, so have their housing needs. Increasing the variety of housing types allows households more choices and creates a dynamic housing market better able to meet the needs of people living in the Cities of Lacey, Olympia, and Tumwater.

How do these actions reduce housing costs?

"Middle density" housing, a small part of the Cities of Lacey, Olympia, and Tumwater's current housing stock, is an important part of an affordable housing strategy. Middle density housing includes small multifamily housing (duplexes and triplexes), attached townhomes, cottage housing, and accessory dwellings. Per unit costs tend to be lower than single-family homes, because the homes are smaller and developers can benefit from economies of scale. Per unit costs are also less than high-density multifamily because they are stick built (they do not require structured parking or other concrete and steel structures) and are typically in neighborhoods with existing infrastructure. This leads to lower costs for both homeowners and renters (Figure 3).

Diversifying the housing stock also recognizes that households are unique and have a wide range of housing needs. This is particularly true as our population ages. Middle density housing provides seniors a way to downsize while remaining in the neighborhoods they love.

Figure 3. Relationship between housing types, price, and rent, household income in the Cities of Lacey, Olympia, and Tumwater combined by race and ethnicity, 2014-2018 average.

Source: Washington State Department of Commerce, Housing Memorandum: Issues Affecting Housing Availability and Affordability (2019), p. 85. https://deptofcommerce.app.box.com/s/npwem3s3rvcsya15nylbroj18e794yk7.

How do these actions address equity?

Increasing the variety of housing options provides more affordable housing options for low-income households, who are disproportionately people of color. Middle density housing can be both rental and owner-occupied. Affordable owner-occupied units would be a potential way to build financial equity.

Middle density housing also expands the housing options available in predominantly single-family neighborhoods, leading to a mix of household incomes. This allows low-income households to access some of the resources, such as better school districts or healthier neighborhoods, available to higher-income households.

Table 5. Strategy 4: Increase the variety of housing choices.

Strategy 4: Increase the variety of housing choices. **Action**		**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
4.a.	Adopt a form-based code for mixed-use zones to allow more housing types and protect the integrity of existing residential neighborhoods. *Gaps/Needs Addressed:*		**H**	**M**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Funding through the City Council's biennial budgeting process. • Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.
4.b.	Strategically allow live/work units in nonresidential zones. *Gaps/Needs Addressed:*		**M**	**L**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Funding through the City Council's biennial budgeting process. • Time for staff to review and develop ordinance updating development code. • Time for the Planning Commission to review and the City Council to review and approve an ordinance.

Strategy 5: Continually Build on Resources, Collaboration, and Public Understanding to Improve Implementation of Housing Strategies.

Strategy 5 actions recognize the need for the Cities of Lacey, Olympia, and Tumwater to engage with the community and establish strong partnerships with affordable housing providers to address housing affordability.

Why is this important?

While the City does not build or manage low-income housing, the policies they enact can affect how much housing can be built and at what cost.

How do these actions reduce housing costs?

By establishing partnerships and collaborations with organizations who serve low-income households, the City can ensure that they are directing their resources and enacting policies that best serve low-income households.

For some, changes brought on by growth and new development in their established neighborhoods can be seen as difficult. As a result, residents may support more affordable housing while at the same time seek to prevent actions needed to increase affordable options. By also engaging with the community, the City can build a shared understanding of the challenges faced by low-income households and develop informed consent around the strategies needed to increase housing affordability.

How do these actions address equity?

Building public understanding around the challenges faced by low-income households includes recognizing the historical reasons why they are disproportionately people of color.

The people who typically engage in public review processes, especially land use processes, are often white and of higher income. Developing relationships with organizations that work with or represent communities of color and disadvantaged groups can help the City better:

- Identify who benefits or is burdened by an action.
- Examine potential unintended consequences of taking an action.
- Mitigate unintended negative consequences of taking an action.
- Build in strategies to advance racial equity.

Proactive efforts to ensure engagement in decision-making processes are broadly inclusive and grounded in achieving equity is necessary. With broader input representative of the whole community, decisions are better balanced and actions the City take can be more successfully implemented in an equitable fashion.

Inviting and bringing in people of all walks of life into the community conversation provides the most direct. Collaborating with leaders of disadvantaged populations can help make this happen and ensure government action does not increase inequities faced by people of color.

Table 6. Strategy 5: Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies.

Strategy 5: Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies. **Action**		Implementation Status	Effort to Implement	Effect on Housing Supply	Comment	City Resources Needed
5.a	Conduct education and outreach around city programs that support affordable housing. *Gaps/Needs Addressed:* 		M	M	The City will consider the work necessary to implement the action, but the work has not been scheduled. Need to define clearly the purposes and expected outcomes of such programs. Begin by clearly defining the purposes and expected outcomes of programs and use trained volunteers were possible.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.
5.b.	Fund Housing Navigators to assist households, renters, homeowners, and landlords with housing issues. *Gaps/Needs Addressed:* 		H	M	The City will consider the work necessary to implement the action, but the work has not been scheduled. It would be good to have an ombudsperson resource for renters established through the Regional Housing Authority or another regional organization. Use trained volunteers were possible.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

Strategy 5: Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
5.c. Identify and develop partnerships with organizations that provide or support low-income, workforce, and senior housing as well as other populations with unique housing needs. *Gaps/Needs Addressed:* 		**M**	**M**	The City has begun the work necessary to implement the action through partnerships with low-income housing providers and work through the Regional Housing Council.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

Strategy 5: Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
5.d. Establish a rental registration program to improve access to data and share information with landlords. Gaps/Needs Addressed: 		**H**	**L**	The City has begun the work necessary to implement the action, but it is not yet fully implemented as part of Rental Housing Amendments. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 9) *Enact policies to protect tenants experiencing housing instability* under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this action. This may be best considered as a regional action. A rental registration program will give the City a way to educate landlords about issues.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.
5.e. Partner with a public or private developer to build a townhouse or row house demonstration project. *Gaps/Needs Addressed:* 		**H**	**L**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

Strategy 5: Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies. **Action**	**Implementation Status**	**Effort to Implement**	**Effect on Housing Supply**	**Comment**	**City Resources Needed**
5.f. Track data on affordable housing at the regional level. *Gaps/Needs Addressed:* 		**L**	**L**	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

Strategy 6: Establish a Permanent Source of Funding for Low-Income Housing.

The actions address the need to increase funding for low-income housing and to provide a regional strategy for distributing funds.

Why is this important?

While the private sector will build most of the housing needed to meet demand in the Cities of Lacey, Olympia, and Tumwater, a significant portion of households earn less than 80 percent of the median area income. Paying market rate rents or mortgages may not be affordable for them (Table 7).

Table 7. Maximum rent and housing costs at various income levels, 2020.

HUD Income Limit* for a:	Yearly Income	Hourly Wage (Full Time)**	Monthly Rent or Mortgage Payment
2-Person Family			
Extremely Low Income (30%)	$20,800	$10.00	$500
Very Low Income (50%)	$34,700	$16.70	$900
Low Income (80%)	$55,500	$26.70	$1,400
4-Person Family			
Extremely Low Income (30%)	$26,200	$12.60	$700
Very Low Income (50%)	$43,350	$20.80	$1,100
Low Income (80%)	$69,350	$33.30	$1,700

NOTE: **For 2020, HUD income limits are based on a median family income of $86,700 for Thurston County. Assumes 3.5 percent fixed interest rate over a 30-year mortgage. Costs do not account for other housing-related expenses such as utilities, property taxes, and insurance.*

***Assumes one household member works full time at 40 hours per week.*

Source: Thurston Regional Planning Council

Whether you are a nonprofit or a for-profit developer, there are real costs to consider in making a development project feasible. Table 8 provides an example of the monthly costs associated with developing a 100-unit apartment complex. This example is intended to give readers an idea of the costs associated with multifamily development; actual numbers for a real project will vary based on variety of factors.

Overall, each apartment unit costs $250,000 to develop and includes acquiring land, engineering and architectural fees, environmental review, appraisals, city fees, construction costs, etc. Most developers do not have the cash to develop a project without financing. Some may not have funds for even a down payment to qualify for the development loan. Developers must also consider the ongoing costs once the development is up and running, costs for managing the property, taxes, and insurance, reserving funds for basic and more extensive repairs, etc. Monthly costs per unit could be $1,695 just to cover the

financing and ongoing operating costs; this does not take into account any profit, just the cost to break even on the project and ensure the developer does not lose any money.

If a non-profit developer has the down payment covered through grant funding (about 25 percent of the total project cost), the cost can be reduced to $1,395 per month. If the non-profit developer were able to obtain grant funding for the total cost of development, the developer would still need about $500 per unit per month to cover maintenance and operation costs. For households with extremely low incomes, those making less than $21,000 per year, this is a hard ask.

Table 8. Example of monthly costs associated with developing an apartment complex.

	Per Unit Cost – Not Grant Funded	Per Unit Cost – 25% Grant Funded	Per Unit Cost – 100% Grant Funded
Total Cost of Development *Covers the total cost of development including land acquisition, engineering and architectural fees, environmental reports, appraisals, city fees, construction, etc.*	$250,000	$250,000	$250,000
Monthly Cost for Down Payment Financing *approximately 25% of overall development cost. Assumes 5.8% return on investment.*	$300	$0	$0
Monthly Cost for Loan Payment *approximately 75% of overall development cost. Assumes 4% interest rate.*	$895	$895	$0
Monthly Cost for Ongoing Operating Costs and Reserves* *Covers property taxes and insurance; utilities; landscaping and general maintenance; basic repairs; property management; and maintenance reserves for painting, new roofs, appliance replacements, etc.*	$500	$500	$500
TOTAL Cost per month over 30-year loan term	**$1,695**	**$1,395**	**$500**

**Per the Housing Authority of Thurston County, $500 per unit is likely a modest amount for well-maintained properties*

Note: This example is intended to give readers an idea of the costs associated with development; actual numbers for real project will vary.

Source: Housing Authority of Thurston County

How do these actions reduce housing costs?

Providing affordable housing for the lowest income households and those experiencing homelessness requires significant resources; right now, those resources are scarce, leaving many households unable to afford a decent and affordable place to live that does not have unsafe or unhealthy living conditions. Many of the actions identified in this plan will not be possible without more funding. The Cities of Lacey, Olympia, and Tumwater can play a significant role in leveraging local, state, and federal dollars for low-income housing. The City also recognizes the need to collaborate regionally on a funding strategy so that funds are used efficiently and distributed to the areas of greatest need. With more funding, housing units become more affordable for households, when costs for developing and maintaining units are reduced.

While the City has some capacity to increase funding, Chapter 4 recognizes the need for action at the state and federal level to increase funding for affordable housing.

How do these actions address equity?

People of color are disproportionately low-income, at risk of experiencing homelessness, or homeless. However, many of the actions in this plan to address these issues will be impossible to implement without additional funding.

Table 9. Strategy 6: Establish a permanent source of funding for low-income housing.

Strategy 6: Establish a permanent source of funding for low-income housing. Action	Implementation Status	Effort to Implement	Effect on Housing Supply	Comment	City Resources Needed
6.a. Develop a comprehensive funding strategy for affordable housing that addresses both the sources of funding and how the funds should be spent. *Gaps/Needs Addressed:* 		H	H	The City has begun the work necessary to implement the action, but work is needed through the Regional Housing Council and other regional forums to determine overall allocation goals for shelters, transitional and permanent low income housing. Otherwise, we will continue to spend most of our money on shelters and never build any affordable units. Continue to provide funding for shelters and transitional housing through non-profits.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.
6.b. Establish an affordable housing property tax levy to finance affordable housing for very low-income households. *Gaps/Needs Addressed:* 		H	H	The City will consider the work necessary to implement the action, but the work has not been scheduled. The City would need to survey taxpayers and our large property tax generators first. Push to early in schedule.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program. • Requires public vote.

Strategy 6: Establish a permanent source of funding for low-income housing. Action	Implementation Status	Effort to Implement	Effect on Housing Supply	Comment	City Resources Needed
6.c. Establish an affordable housing sales tax. *Gaps/Needs Addressed:* 		H	H	The City will consider the work necessary to implement the action, but the work has not been scheduled. The City would need to survey taxpayers and our big sales tax generators first. Push to early in schedule.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program. • Requires councilmatic or commissionmatic action.
6.d. Capture the value of city investments (utilities, roads, etc.) that increase private investments in neighborhoods, especially in areas with planned or existing transit. *Gaps/Needs Addressed:* 		H	M	The City will consider the work necessary to implement the action, but the work has not been scheduled. We would need to do more research on what this involved or how to do it other than what we already do via latecomer agreements.	• Funding through the City Council's biennial budgeting process. • Time for staff to develop and run such a program.

Strategy 6: Establish a permanent source of funding for low-income housing. Action	Implementation Status	Effort to Implement	Effect on Housing Supply	Comment	City Resources Needed
6.e. Encourage the Housing Authority of Thurston County to take greater advantage of State and Federal housing grants and tax incentives. *Gaps/Needs Addressed:* 		L	M	The City will consider the work necessary to implement the action, but the work has not been scheduled.	• Time for staff to develop and run such a program.

Chapter 4. Legislative Needs

The Housing Action Plan identified a number of barriers to affordable housing that need to be addressed at the state or federal level. Cities that are Tumwater's size are not the best suited to leverage sufficient funding to meet the needs identified in this plan. They need state and federal government relief to fill the gap. Loss of funding at either the state or federal level can have severe impacts at the local level. A joint legislative agenda developed by the Cities of Lacey, Olympia, and Tumwater will be necessary to address these issues.

Many of the actions in this plan require funding, especially actions to create affordable housing for the lowest income households and people moving out of emergency and temporary housing situations. Therefore, an important part of this legislative agenda is the need for funding for the construction and maintenance of low-income housing and permanent supportive housing.

State Legislative Agenda

- Increase funding for low-income housing construction.
- Increase funding for permanent supportive housing for those recently experiencing homelessness and moving out of emergency/transitional housing.
- Increase funding for renovating low-income housing to address accessibility upgrades, energy efficiency retrofits, and indoor health (e.g. lead and mold).
- Reform Washington's condominium liability laws.
- Amend the Manufactured/Mobile Home Landlord-Tenant Act, such as in HB 2610, to provide protections for tenants in the event of a sale.
- Allow tax increment financing.
- Require a portion of the Washington State Housing Trust Fund to be used for affordable homeownership projects.
- Update the multifamily tax exemption program to include projects that support homeownership opportunities.
- Encourage local manufacturing of construction products
- Review how state law regulates homeowner associations about affordable housing issues, such as whether accessory dwelling units are allowed in covenants.

Federal Legislative Agenda

- Reduce tariffs that raise housing construction costs, making it more expensive to build housing.

Example: the cost of softwoods (heavily used in construction) from Canada are up by about 25 percent.

- Increase federal Housing and Urban Development (HUD) funding for affordable housing, including housing vouchers and funding for the Community Development Block Grant (CDBG) program, the Self-Help Homeownership Opportunity Program (SHOP), and the Home Investment Partnerships Program (HOME).
- Increase funding for down payment assistance. This could include providing tax credits for first-time homebuyers with low-income, targeted down payment assistance for disadvantaged populations and communities of color, and increased funding for homeownership savings programs like Assets for Independence and the Family Self-Sufficiency initiative.
- Support the Neighborhood Homes Improvement Act tax credit, which would make it economically feasible to rehabilitate distressed homes for homeownership and expand affordable homeownership opportunities for local residents.

Appendix A. Action Details

This appendix includes a fuller description of what each action included in this plan entails. Where appropriate, the appendix includes applicable information on what the City of Tumwater can do or has done as well as resources with more information. The actions are grouped into their strategy categories:

1. Increase the supply of permanently affordable housing for households that make 80 percent or less of the area median income.
2. Make it easier for households to access housing and stay housed.
3. Expand the overall housing supply by making it easier to build all types of housing projects.
4. Increase the variety of housing choices.
5. Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies.
6. Establish a permanent source of funding for low-income housing.

Strategy 1: Increase the supply of permanent, income-restricts affordable housing.

1.a. Donate or lease surplus or underutilized jurisdiction-owned land to developers that provide low-income housing and establish a process for accepting or coordinating the acceptance of land donations from others this action.

In areas with high land costs, acquiring suitable land can add significant expense to an affordable housing project. Public lands can be donated or leased to affordable housing developers, thereby reducing the cost of development. In this case, affordable housing means housing for households with incomes 80 percent or less of the area median income.

When a jurisdiction does not own land appropriate for housing development, purchasing such land may be an appropriate measure. The land can then be donated or leased to developers that provide low-income housing.

For more information on donating public lands, see RCW 39.33.015.

1.b. Where a Planned Unit Development is used for residential development, require a portion of the housing be low-income housing.

Planned Unit Developments are intended to provide a developer flexibility when designing very large subdivisions. Generally, flexibility is provided in terms of lot size and housing types. Requiring low-income housing as part of low-density Planned Unit Developments can introduce a greater variety of housing of low-density housing types (duplexes, small apartment buildings, cottage housing, etc.) into a new neighborhood and ensure the neighborhood is affordable for a wider range of households. This

may also encourage the private sector to partner with non-profits such as Habitat for Humanity to develop detached single-family homes for low-income households.

Low-density developments are more likely to consist only of detached single-family homes. Requiring Planned Unit Developments for low-density development can encourage more housing types in such developments. Requiring low-income housing in Planned Unit Developments proposals is a type of inclusionary zoning (income-restricted affordable housing must be included as part of new developments).

1.c. Adopt a "Notice of Intent to Sell" ordinance for multifamily developments.

Requiring notice to the city, housing officials, and tenants when the owner of a multifamily development intends to sell gives the city the opportunity to preserve low-income units for the same purpose and tenants ample additional time to prepare for a potential move. Not every multifamily development is appropriate for purchase to preserve affordability, but the notice allows jurisdiction staff the time to consider it. The City may consider developing a list of criteria to determine the types of multifamily developments they want to preserve, including units currently required to be dedicated for use by low-income households, but which may be converted to market-rate units in the future.

Resources

- National Housing Preservation Database. Provides information on developments that have received housing subsidies. As of December 2020, more than 3,000 multifamily units (two or more units in a building) in Thurston County have active subsidies.

1.d. Provide funding for the Housing Authority of Thurston County and other non-profit organizations to buy income-restricted units proposed to be converted to market rate housing.

Income-restricted housing units developed or rehabilitated with federal money may in the future be converted to market-rate units. Partnering with HATC and other nonprofit organizations to purchase such units can help preserve housing options for low-income households.

1.e. As part of comprehensive plan and development code changes, include an evaluation of the impact such changes will have on housing affordability, especially for low-income households.

Changes to comprehensive plans and development codes should include an evaluation of how they would affect the amount of housing, the types of housing allowed, and the cost to permit, construct, and renovate housing. Evaluating the potential for displacement when affordable units are likely to be lost to redevelopment (such as a mobile home park that is redeveloped) is also appropriate. Particular attention should be given to areas of need identified in the Housing Needs Assessment, including low-income and permanent supportive housing, housing for seniors, and improving and retrofitting existing low-income housing.

1.f. Provide funding for low-income and special needs residents to purchase housing through community land trusts.

Community land trusts provide permanently affordable housing opportunities by holding land on behalf of a place-based community. As non-profit organizations, housing land trusts help to make

homeownership both possible and affordable for low-income households. Locally, the Thurston Housing Land Trust serves all of Thurston County.

1.g. Offer and/or expand fee waivers for low-income housing developments.

Impact fees, utility connection fees, project review fees, and other fees increase the cost of housing construction. Reducing or waiving fees for low-income housing developments reduces their development costs and acknowledges that providing low-income housing has a positive impact on a community by:

- Ensuring vulnerable households can afford a home.
- Preventing individuals and families from becoming homeless.
- Reducing the cost of providing social services for households in crisis.

The costs for such offsets must be made up elsewhere. According to the Washington State Department of Commerce, reducing or waiving impact fees are most effective when paired with other housing affordability incentives.

See also Action 3.b.

For more information on fee waivers for low-income housing, see:

- RCW 82.02.060 for exempting impact fees for low-income housing.
- RCW 35.92.380 and RCW 35.92.020 for waiving utility connection and other utility fees for low-income persons.
- RCW 36.70A.540 for waiving or exempting fees for affordable housing.

1.h. Encourage low-income housing units as part of new developments.

Future Thurston County households will have a range of incomes, and a portion of residential development will need to be affordable to low-income households. Encouraging low-income housing units, whether for rent or ownership, helps to ensure such units will be built as part of development. Consideration should be given to the number of low-income units required, how they are integrated with market-rate units, and whether thresholds should be enacted that exempt smaller developments from this requirement. This policy is best implemented in coordination with low-income housing providers. Once housing market has further evolved, consider making this a requirement of new developments. If implemented now, there is a concern that it would discourage residential development.

1.i. Fund development projects that increase low-income housing through grants or loans.

The City can provide funding directly to low-income and permanent supportive housing providers through grants or loans. This recognizes the need for public funding to build low-income housing beyond what market-driven incentives can provide. This action can be best implemented for projects located close to transit and with good access to organizations and agencies that serve low-income households.

1.j. Establish a program to preserve and maintain healthy and viable manufactured home parks.

Manufactured home parks can be prime locations for higher density redevelopment in communities with strong demand for new housing. However, they also serve as one of the most affordable housing options for households in the region. A program that seeks to preserve and maintain healthy and viable manufactured home parks may consider ways to assist:

- Unit owners to purchase the park outright.
- Unit owners to maintain and repair individual manufactured homes.
- Unit owners with funding to replace units that would be better replaced than repaired.
- Unit owners with funding for relocation when a park cannot be preserved.
- Park owners with making service and utility upgrades.
- Park owners with converting from septic to sewered service.

1.k. Enhance enforcement of property maintenance codes to keep housing in good repair.

Property maintenance codes are intended to ensure the health, safety, and welfare of the public is adequately protected. Improved enforcement can help ensure pest infestations, lack of sanitary conditions, presence of mold, and structural issues are addressed in a timely fashion, thereby protecting homeowners, tenants, and the public at large. Enforcing adopted property maintenance codes is difficult due to the time, staffing, and funding needed to identify and address issues as they arise.

This strategy could have a negative impact on low-income households if resources are not also made available to such households (or their landlords) to make required repairs.

1.l. Partner with low-income housing developers (such as Habitat for Humanity) to expand homeownership opportunities.

Affordable homeownership opportunities allow low-income households to build wealth. Local jurisdictions can go beyond their own capabilities to encourage affordable homeownership opportunities by partnering with local housing groups and non-profit developers. This may include providing funding, gifting publicly owned property, supporting grant applications, assisting property owners, and other programs that increase affordable homeownership opportunities. See also Action 1.a.

1.m. Extend public water and sewer to unserved areas to allow infill development in underdeveloped areas.

The Comprehensive Plan describes where the City expects, and is trying to direct, growth over the next twenty years. The private sector has traditionally done utility extension and upgrades as areas grow. For infill development, the City could invest to promote development in areas where new housing is desired, but upgrades to infrastructure, such as utilities and sidewalks, would be needed to support it.

Advantages:

- City could direct improvements where it would like to see development

- Attract private development with public investments - public/private partnerships

Disadvantages:

- Administrative requirements
- Need to refocus Capital Facilities Plan development processes
- Changes existing City investment priorities

Strategy 2: Make It Easier for Households to Access Housing and Stay Housed.

2.a. Provide tenants displaced by redevelopment with relocation assistance.

Displacement can happen for a variety of reasons through no fault of the tenant. As redevelopment becomes a more attractive option than keeping a development as is, households, especially low-income households, can be displaced. Moving costs money, and low-income households may not have the funds available for making a required move. State law authorizes local governments to adopt an ordinance requiring developers to provide displaced tenants with relocation assistance to households that have an income of 50 percent or less of the area median income. Cities and counties can also dedicate public funds or use a combination of public and private funds for relocation assistance. When public action results in tenant displacement, relocation assistance is required.

For more information on relocation assistance, see RCW 59.18.440 (developer action) and RCW 8.26 (public action).

2.b. Partner with local trade schools to provide renovation and retrofit services for low-income households as part of on-the-job-training.

According to a 2019 housing memorandum prepared by PNW Economics, LLC and LDC, Inc. for the Washington State Department of Commerce, the majority of general contracting firms struggle to find skilled tradespeople (Issues Affecting Housing Availability and Affordability, p. 71.) Trade schools, apprenticeship programs, and other professionals that provide repair, retrofit, and renovation services to homeowners can scale up training with the help of homeowners who are in need of services at reduced rates.

This action may require additional assistance to the household to accomplish.

2.c. Adopt short-term rental regulations to minimize impacts on long-term housing availability.

When a property owner rents out an entire living unit on a short-term basis, generally a period less than 30 days, that housing unit cannot be used for the community's long-term housing needs. Regulating short-term rentals can reduce negative impacts to the housing market as well as the neighborhood where the short-term unit is located. While this action is most effective in communities that attract a robust tourism base, establishing regulations/registration for this use ensures the city can track the impact short-term rentals have on long-term rentals.

2.d. Support down payment assistance programs for homeownership and programs that assist people entering the rental market.

Washington State has a number of programs that provide down payment assistance to first time and low-income homebuyers. Establishing a down payment assistance program at the local level can assist more households in the Thurston County community towards the goal of homeownership. Down payment assistance typically takes the form of a low- or no-interest loan to the homebuyer, which can be paid back as part of the mortgage or at the time the mortgage is paid off, the home is sold/transferred to a new owner, or the property is refinanced.

For more information on state down payment assistance programs, see the Washington State Housing Finance Commission.

The City would like to expand this to include supporting programs that assist people in entering the rental market.

2.e. Identify and implement appropriate tenant protections that improve household stability.

Tenant protections help avoid or slow the process of displacement for households by preserving housing units, a household's tenancy, or access to information and assistance. Examples of tenant protections include but are not limited to the following:

- Adopting a just cause eviction ordinance that requires landlords to provide tenants with a legally justifiable reason for the eviction.
- Adopting a preservation ordinance, requiring developers to replace affordable housing units demolished as part of redevelopment.
- Adopting an eviction mitigation ordinance to find ways to end a rental agreement mutually rather than evicting tenants.
- Adopting an opportunity to purchase policy that better involves tenants in the decision-making process when a dwelling unit is to be sold.
- Developing a program to incentivize landlords to accept tenants with poor credit or criminal history.
- Improving enforcement of landlord/tenant laws.
- Increasing a tenant's access to legal assistance for landlord/tenant issues.
- Limiting or regulating fees associated with rental housing applications.
- Requiring landlords to establish payment plans for tenants that get behind on rent.

Each tenant protection has positive and negative aspects that should be reviewed and considered before implementing, and both tenants and landlords should be involved in the review process. For more information on protections offered by the Residential Landlord Tenant Act, see Chapter 59.18 RCW.

2.f. Develop a technical assistance or education program for small landlords.

As shown by the Landlord Survey, a large number of the rental properties in the City are owned and operated by small landlords. To maintain this local ownership and maintain these properties, a technical assistance or education program would be useful for training such landlords in basic maintenance activities and help them to know where to look for support if needed.

2.g. Assist non-profits in the process of acquiring mobile home parks to turn them into public trusts so that lot rental fees can be controlled.

This action would support of Resolution No. R2018-016 Housing Affordability Action #6, "Assess actions for assuring mobile home parks continue to provide affordable housing toward a goal of property ownership by residents." This action would help preserve a large source of existing affordable housing in the future and help to protect residents from dramatic shifts in lot rental fees.

2.h. Fund an energy assistance program for rental housing/make landlords do upgrades when the unit is sold.

This action would support actions in the Thurston Climate Mitigation Plan to reduce energy use in older housing, and support local landlords maintaining their properties without passing the costs to their tenants.

Strategy 3: Expand the Overall Housing Supply by Making It Easier to Build All Types of Housing Projects.

3.a. Lower transportation impact fees for multifamily developments near frequent transit service routes.

Transportation impact fees are one-time charges assessed by a local government against a new development project to help pay for establishing new or improving existing public streets and roads. The streets and roads must be included in a community's Comprehensive Plan. The fee must directly address the increased demand on that road created by the development. For multifamily developments near frequent transit service routes, the idea is that many residents and visitors are able to utilize the public transit system, thereby reducing the impact of the development on public streets and roads.

January 2021 Transportation Impact Fees (rounded to the nearest dollar)

- **Lacey:** $610-$3,989 per dwelling unit. Varies according to unit type with detached single-family dwellings having the highest fees.
- **Olympia:** $728-$3,219 per dwelling unit. Varies according to unit type with detached single-family dwellings having the highest fees.
- **Tumwater:** $497-$3,919 per dwelling unit. Varies according to unit type with detached single-family dwellings having the highest fees. Assisted living facilities have a fee of $439 per bed.

3.b. Allow deferral of impact fee payments for desired unit types.

New development affects existing municipal and community investments, and impact fees are a way to ensure new development pays their fair share. Impact fees may be delayed, but they must be paid before the impact is realized. Delaying payment of such fees allows a developer building desired unit types to spread the costs of a development over a longer period. State law already requires the City to establish a system for deferring impact fee payments for small, single-family residential developments. This action would expand the deferral program to developments with desired unit types.

Desired unit types depend on the neighborhood or policy context and could include defining the type of building (courtyard apartment or manufactured home, for example), the need for income-restricted units, units of a certain size, or units containing a certain number of bedrooms.

See also Action 1.g.

3.c. Maximize use of SEPA threshold exemptions for residential and infill development.

The State Environmental Policy Act (SEPA) review process is intended to ensure government actions have fully taken into consideration the environment before a decision is made. Actions that will likely result in an adverse impact on the environment must go through a more rigorous review (an environmental impact statement or EIS). Some projects are exempt from the SEPA review process because their impact on the environment is generally considered minimal and not adverse, but developments must still meet environmental standards. Single-family and multifamily developments with four or fewer units are automatically exempt from review under SEPA, and state law allows cities to adopt exemptions that are more flexible. The Cities of Lacey, Olympia, and Tumwater may exempt single-family developments with up to 30 units and multifamily developments with up to 60 units from SEPA review.

Table 10. Adopted SEPA Exemptions as of January 2021.

Exemptions	Development Type	
	Single-Family	Multifamily
Allowed per SEPA	30 units	60 units
Lacey	4 units	60 units
Olympia	9 units	No exemption
Tumwater	9 units	60 units

Infill Exemptions

In order to accommodate infill development, the Cities of Lacey, Olympia, and Tumwater may adopt SEPA exemptions for infill development to help fill in urban growth areas.

To qualify for the infill exemption:

- An EIS must already be issued for the comprehensive plan or the city must prepare an EIS that considers the proposal's use or density/intensity in the exempted area.
- The density of the area to be infilled must be roughly equal to or lower than what the adopted comprehensive plan calls for.
- The development must be residential, mixed-use, or non-retail commercial development. Commercial development that exceeds 65,000 square feet does not qualify for the exemption.
- Impacts to the environment from the proposed development must be adequately addressed by existing regulations.

If a city takes action to adopt an infill exemption before April 1, 2023, the city's action cannot be appealed through SEPA or the courts.

Planned Actions

Up front review and analysis of impacts to the environment can help streamline the process for developments. Individual developments projects associated with an adopted plan (subarea plan or master planned development, for example) can be exempted from further SEPA review when a threshold determination or EIS has been issued for the adopted plan. The threshold determination or EIS for the adopted plan must detail the project-level impacts of the proposed development, thereby forgoing the need for review when the specific project applies for permitting. The City did a planned action for the historic brewery complex part of the former brewery property.

For more information, see:

- RCW 43.21C.229 (infill exemptions).
- RCW 43.21C.440 (planned actions).

3.d. Continue to look for place-making opportunities along urban corridors.

In support of actions identified in the Sustainable Thurston Plan and the Thurston Climate Mitigation Plan, this action would help incentivize new residential developments in areas of the City, such as the Brewery District and the Capitol Boulevard Communities where redevelopment is encouraged to meet land use and economic goals and provide more residential development opportunities.

3.e. Mix market rate and low-income housing to avoid creating areas of concentrated low-income housing.

The action would ensure that not only market rate and low-income housing is created in the City, but residents of both would be able to intermix and create more opportunities for all economic classes.

Strategy 4: Increase the Variety of Housing Choices.

4.a. Adopt a form-based code for mixed-use zones to allow more housing types and protect the integrity of existing residential neighborhoods.

A form-based code uses the physical form and design of the public realm (building façade and streetscape) as the framework for regulation rather than the need to separate uses. Because of this, form-based codes are most useful in mixed-use zones where the widest variety of uses are already allowed and encouraged. Form-based codes are also useful when the goal is to protect an existing neighborhood character or where developing a cohesive character is desired.

4.b. Strategically allow live/work units in nonresidential zones.

A live/work unit is a single dwelling unit consisting of both a commercial/office space and a residential component that is occupied by the same resident who has the unit as their primary dwelling. The intent is to provide both affordable living and business space for a resident/business owner. The configuration of the live/work unit can vary:

- Live-within. The workplace and living space completely overlap.

- Live-above. The workplace is below the living space with complete separation between the two.
- Live-behind. The workplace is in front of the living space with complete separation between the two possible.
- Live-in-front. The workplace is behind the living space (typically a single-family dwelling) with some overlap between the two possible.

Although home occupations are a type of live/work unit, the emphasis here is on a more intensive nonresidential component (size, traffic generation, employees on site, etc.) that may not be appropriate to classify as a home occupation. Live/work units may also be appropriate in residential zones. In either case, cities will need to conduct additional analysis to determine the locations and types of uses appropriate for live/work units.

Strategy 5: Continually Build on Resources, Collaboration, and Public Understanding to Improve Implementation of Housing Strategies.

5.a. Conduct education and outreach around city programs that support affordable housing.

Providing the public and developers information about affordable housing programs can help households in need find assistance and developers identify resources for building desired unit types. Desired unit types depend on the neighborhood or policy context and could include defining the type of building (triplex or single-room occupancy building, for example), the need for income-restricted units, units of a certain size, or units containing a certain number of bedrooms. Education and outreach can also invite community dialogue on the need for diverse housing options in the community.

5.b. Fund Housing Navigators to assist households, renters, homeowners, and landlords with housing issues.

Housing issues are complex, and so are the resources available to households and landlords. When problems arise or a party needs to find information, having a designated resource to navigate issues and identify resources (development funding, tax assistance, housing opportunities, legal aid, weatherization programs, etc.) gives people more tools to reach their goals.

5.c. Identify and develop partnerships with organizations that provide or support low-income, workforce, and senior housing as well as other populations with unique housing needs.

Both for-profit and non-profit agencies provide or support low-income, workforce, and senior households. They often have expertise to deliver programs and housing the Cities of Lacey, Olympia, and Tumwater do not have as well as access to funding streams unavailable to the cities. Identifying shared vision and goals can help each organization to leverage funding and improve household access to assistance.

5.d. Establish a rental registration program to improve access to data and share information with landlords.

Understanding how many dwelling units are being rented, the types of units being rented, and the cost of rent is important information needed to understand the impacts on landlords and tenants of many of the actions in this plan. It also provides the Cities of Lacey, Olympia, and Tumwater with an easy way to

reach out to landlords and tenants, who are both important stakeholders when enacting many of the actions in this plan. This action is particularly suited to being implemented at the regional level and may be appropriate for the cities to develop through the Regional Housing Council. Doing so would ensure the same data is collected across the jurisdictions effectively and economically.

5.e. Partner with a public or private developer to build a townhouse or a row house demonstration project.

The action would encourage townhouse or row house development in the City.

5.f. Track data on affordable housing at the regional level.

In order to understand if the actions in this Plan are working, regional housing data needs to be collected annually. The Regional Housing Needs Assessment and Housing Gap Analysis were valuable tools in the development of this Plan and maintaining an annual collection of data would be very useful.

Strategy 6: Establish a Permanent Source of Funding for Low-Income Housing.

6.a. Develop a comprehensive funding strategy for affordable housing that addresses both the sources of funding and how the funds should be spent.

Without a comprehensive funding strategy, it will be difficult to ensure dollars earmarked for developing affordable housing in the community are used to their full effect and meet the greatest need. A comprehensive funding strategy takes into consideration how the funds can be used, whether they can be leveraged to obtain other funding (grants, loans, etc.), and the types of projects the funding can support. This action is particularly suited to being implemented at the regional level and may be appropriate for the cities to develop through the Regional Housing Council.

6.b. Establish an affordable housing property tax levy to finance affordable housing for very low-income households.

The Cities of Lacey, Olympia, and Tumwater may impose a property tax levy up to $0.50 per $1,000 of a property's assessed value to fund affordable housing. The levy must be used for low-income households.

The levy, which lasts for up to 10 years, can only be enacted if:

- The city declares an emergency exists concerning the availability of affordable housing for households served by the levy.
- A majority of voters approve it.
- The city adopts a financial plan for spending the money.

If a property tax levy were enacted at the maximum rate of $0.50 per $1,000 of assessed value, homeowners can expect their property taxes to go up. This amounts to $175 per year for a home valued at $350,000 (Table 11). Households that rent can expect their monthly rent to increase on average between $6.71 and $11.91 each month, depending on the type of unit rented.

Table 11. Additional costs to households with a $0.50 per $1,000 property tax levy.

Owner-Occupied*		Renter-Occupied	
Assessed Value	**Additional Property Taxes (annual)**	**Building Size**	**Additional Monthly Rent (average) per unit**
$350,000	$175	Single-Family Dwelling	$11.91
$450,000	$225	Duplex, Triplex, and Fourplex units	$9.04
$550,000	$275	5+ Unit Apartments	$6.71

Note: Rates for owners only apply to detached single-family homes. Costs, which are rounded, are based on the 2017 total assessed value of all taxable non-exempt properties and are adjusted for inflation to 2020 dollars.

Source: Thurston County Assessor.

Thurston County also has the ability to establish a property tax levy. If both cities and Thurston County impose the levy, the last jurisdiction to receive voter approval for the levies must be reduced or eliminated so that the combined rate does not exceed the $0.50 per $1,000 of assessed property value.

If the Cities of Lacey, Olympia, and Tumwater each enact the levy, nearly $9.7 million could be collected for affordable housing in 2021 (Table 12). If the tax levy were adopted countywide, more than $30 million would be available to serve low-income households in 2021. This includes developing new housing, enabling affordable homeownership, and making home repairs.

Table 12. Potential affordable housing funding from maximum property tax levy.

Jurisdiction	2020 Assessed Property Values	Potential Affordable Housing Funds
Lacey	$7.4 billion	$3.7 million
Olympia	$8.2 billion	$4.1 million
Tumwater	$3.9 billion	$1.9 million
TOTAL (cities only)	**$19.5 billion**	**$9.7 million**
TOTAL (Countywide)	**$31.5 billion**	**$31.5 million**

Note: Values, which are rounded, are based on the 2020 total assessed value of taxable non-exempt properties. Potential affordable housing funds are based on the total assessment of all properties combined.

Source: Thurston County Assessor.

Property Tax Levies

- **Lacey:** has not established a property tax levy.

- **Olympia:** has not established a property tax levy.
- **Tumwater:** has not established a property tax levy.
- **Thurston County:** has not established a property tax levy.

For more information, see RCW 84.52.105.

6.c. Establish an affordable housing sales tax.

Beginning in 2020, cities may establish a 0.1 percent affordable housing sales tax by legislative authority or by voter approval. At least 60 percent of the revenue must be used for one or more of the following:

- Constructing affordable housing (new construction or retrofitting an existing building).
- Constructing facilities providing housing-related services.
- Constructing mental and behavioral health-related facilities.
- Funding the operations and maintenance costs of the three projects above.

Thurston County can also establish the affordable housing sales tax. If it does so before the Cities of Lacey, Olympia, and Tumwater, the cities will not be able to establish their own funds. If the cities and Thurston County impose the sales tax, the County must provide a credit to the cities for the amount they would have collected. If the Cities of Lacey, Olympia, and Tumwater had been able to enact an affordable housing sales tax in 2019, nearly $5 million would be available to serve low-income households (Table 13).

For more information, see RCW 82.14.530.

Table 13. Potential affordable housing funding from maximum affordable housing sales tax in 2019.

Jurisdiction	2019 Taxable Retail Sales	Potential Affordable Housing Funds
Lacey	$1.5 billion	$1.5 million
Olympia	$2.4 billion	$2.4 million
Tumwater	$0.9 billion	$0.9 million
TOTAL (cities only)	**$4.8 billion**	**$4.8 million**
TOTAL (countywide)	**$6.2 billion**	**$6.2 million**

Note: Taxable retail sales are rounded.

Source: Washington State Department of Revenue, Taxable Retail Sales.

Affordable Housing Sales Tax

- **Lacey:** has not established an affordable housing sales tax.

- **Olympia:** established an affordable housing sales tax in 2018, referred to as the "Home Fund." Approximately 65 percent of funds are dedicated to construction projects and 35 percent to housing program operations. Must be re-authorized by voters in 2028.
- **Tumwater:** has not established a sales tax.
- **Thurston County:** has not established an affordable housing sales tax.

6.d. Capture the value of city investments (utilities, roads, etc.) that increase private investments in neighborhoods, especially in areas with planned or existing transit.

Value capture is a type of public financing that recovers some or the entire value public infrastructure generates for private landowners. When roads are improved, water and sewer lines extended, or new parks or public amenities developed, property values tend to increase. Value capture is best planned for from the outset of a project and it can include developer contributions and special taxes and fees.

6.e. Encourage the Housing Authority of Thurston County to take greater advantage of State and Federal housing grants and tax incentives.

The Housing Authority of Thurston County is the primary source of low-income housing in community. Being able to take greater advantage of all federal and state housing grants and incentives would help support the production of more affordable housing.

Appendix B. Considered Actions

In developing this plan, many actions were considered, though not all were included. This appendix provides a full list of the actions considered in the plan's development. Where appropriate, explanations for why an action was excluded are included. Actions were developed and refined over six months and the wording may not match previous versions.

Table 14. Actions considered but not included in the Housing Action Plan.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Included (1.a)	Donate or lease surplus or underutilized jurisdiction-owned land to developers that provide low-income housing.	Not excluded, included.
Excluded	Create shovel-ready housing developments that can be handed off to a developer to construct.	Action is out of scale with what our region can reasonably accomplish. Cities do not have the budgets or expertise to perform this action.
Excluded	Purchase property with the intent to donate or lease to developers that provide income-restricted affordable housing.	Combined with Action 1.a.
Implemented	Offer developers density and/or height incentives for desired unit types.	Not excluded, implemented.
Included (1.b)	Where a Planned Unit Development is used for residential development, require a portion of the housing be low-income housing.	Not excluded, included.
Excluded	Make regulations and permit processing more predictable, to remove some uncertainty for both builders and lenders.	Action not specific enough. Other actions more specifically address the need to improve predictability of regulations and permit processing.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Excluded	Allow third-party review and approval of development projects (anytime OR when cities are backlogged).	Note included for implementation by the City, as there are concerns about the partiality of third-party reviewers. The City would rather intergovernmental agreement where we can share development review staff when things slowdown in one jurisdiction.
Excluded	Allow third-party review of building permits for development projects.	Note included for implementation by the City, as there are concerns about the partiality of third-party reviewers. The City would rather intergovernmental agreement where we can share development review staff when things slowdown in one jurisdiction.
Excluded	Adopt a single development code for The Cities of Lacey, Olympia, Tumwater, and their urban growth areas to make regulations and permit processing more predictable.	Each community has a different identity with a desire for different standards.
Excluded	Waive reviews for energy code compliance when a project receives a green building certification.	It does not appear that a green building certification actually makes housing more affordable versus complying with energy code. In the right market conditions, may be an incentive to buy.
Excluded	Require shot clocks for permit processing.	State law already requires timelines for review, and the City is able to accomplish their reviews in a timely manner.
Included (1.c)	Adopt a “Notice of Intent to Sell” ordinance for multifamily developments.	Not excluded, included.
Included (1.d)	Provide funding for the Housing Authority of Thurston County and other non-profit organizations to income-restricted units proposed to be converted to market rate housing.	Not excluded, included.
Included (2.a)	Provide tenants displaced by redevelopment with relocation assistance.	Not excluded, included.
Implemented	With major comprehensive plan updates, confirm land is suitably zoned for development of all housing types.	Not excluded, implemented.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Excluded	On a regular basis, hold a series of community meetings to discuss how housing and zoning regulations affect equity goals.	See Action 5.a.
Implemented	Increase the types of housing allowed in low-density residential zones (duplexes, triplexes, etc.).	Not excluded, implemented.
Excluded	Allow more housing types in commercial and industrial zones.	Creates inappropriate conflicts between uses.
Implemented	Allow more housing types in commercial zones.	Not excluded, implemented.
Included (4.a)	Adopt a form-based code for mixed-use zones to allow more housing types and protect the integrity of existing residential neighborhoods.	Not excluded, included.
Excluded	Develop a plan for adapting vacant commercial space into housing.	Action not implemented by the City, as it may raise questions about a gift of public funds. Every property is unique. If the there is a problem property, the City can focus resources on it. The City may want to consider a checklist of issues to address in such situations
Excluded	Expand allowance of residential tenant improvements without triggering land use requirements.	City had concerns about life and safety issues regarding this action and recommended that the action not be implemented.
Excluded	Prior to finalizing a draft for public review, vet comprehensive plans and development code changes with the development community to ensure desired housing types and locations are supported by market conditions.	See Action 1.e.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Included (1.e)	As part of comprehensive plan and development code changes, include an evaluation of the impact such changes will have on housing affordability, especially for low-income households.	Not excluded, included.
Implemented	Recognize modular/manufactured housing as a viable form of housing construction.	Not excluded, implemented.
Excluded	Provide for a dynamic mix of residential land uses and zones in order to create a diverse mix of sites available for different housing types.	This action is already implemented.
Implemented	Simplify requirements for accessory dwelling units (ex: title notification, owner living on site, etc.).	Not excluded, implemented.
Implemented	Allow accessory dwelling units in all residential zones.	Not excluded, implemented.
Excluded	Allow accessory dwelling units in commercial zones.	Not an issue that has ever been raised to staff; need to focus on actions that have real and lasting impacts.
Implemented	Reduce parking requirements for residential uses, including for multifamily developments near frequent transit routes.	Not excluded, implemented.
Implemented	Identify strategically placed but underdeveloped properties and determine what barriers exist to developing desired housing types.	Not excluded, implemented.
Implemented	Identify strategically placed properties where up zoning is appropriate.	Not excluded, implemented.
Implemented	Require minimum residential densities.	Not excluded.
Excluded	Increase minimum residential densities.	The City already has reasonable minimum residential densities.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Implemented	Reduce minimum lot sizes.	Not excluded, implemented.
Excluded	Support and plan for assisted housing opportunities using federal, state, or local aid.	Action not clear/specific enough
Excluded	Support diverse housing alternatives and ways for older adults and people with disabilities to remain in their homes and community, as their housing needs change.	Action not specific enough. Other actions more specifically address the need to support diverse housing alternatives for seniors.
Excluded	Retain existing subsidized housing.	None of the cities has subsidized units at this time, so it is not an action they would pursue. Other actions can support other entities in retaining existing subsidized housing.
Excluded	Encourage new housing on transportation arterials and in areas near public transportation hubs.	Action not specific enough. See Actions 3.a for actions that more specifically address the issue of housing near transportation facilities.
Included (3.a)	Lower transportation impact fees for multifamily developments near frequent transit service routes.	Not excluded, included.
Implemented	Reduce parking requirements for multifamily developments near frequent transit routes.	Not excluded, implemented.
Implemented	Allow group homes in all residential zones and commercial zones that allow residential uses.	Not excluded, implemented.
Excluded	Limit the density of group homes in residential areas to prevent concentration of such housing in any one area.	May create a hindrance to ensuring there are enough housing opportunities for seniors. There are nearly 150 adult family homes in Thurston County now; their concentration in any one area is not known to be an issue.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Implemented	Provide funding for renovating and maintaining existing housing that serves low-income households or residents with disabilities.	Not excluded, implemented.
Excluded	Support programs to improve energy efficiency, health conditions and public recognition of improvements in low-income rental housing	Statewide need - not just a local need.
Excluded	Fund programs that improve the energy efficiency and health conditions in low-income rental housing.	Statewide need - not just a local need.
Excluded	Encourage self-help housing efforts and promote programs in which people gain home equity in exchange for work performed in renovation or construction.	Action not specific enough. See Action 1.l.
Included (1.l)	Partner with local trade schools to provide renovation and retrofit services for low-income households as part of on-the-job-training.	Not excluded, included.
Excluded	Establish a manufactured home park zone to promote their preservation.	Already in place in the City.
Implemented	Rezone manufactured home parks to a manufactured home park zone to promote their preservation.	Not excluded, implemented.
Excluded	Allow manufactured home parks in multifamily and commercial areas.	The City has enacted Ordinance No. O2008-009, which established the Manufactured Home Park (MHP) zone district in the City as the means to address this action and manufactured home parks are an inefficient use of land in multifamily and commercial zone districts.
Included (1.f)	Provide funding for low-income and special needs residents to purchase housing through community land trusts.	Not excluded, included.
Excluded	Fund programs that prevent homelessness for persons returning to the community from institutional or other sheltered settings (including foster care).	Action better suited to the Thurston County Homeless Response Plan.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Excluded	Fund self-sufficiency and transitional housing programs that help break the cycle of homelessness.	Deals with a temporary/emergency housing situation better addressed through the Regional Housing Council and other, more targeted efforts to address homelessness.
Excluded	Provide funding to the Regional Housing Council for temporary emergency housing programs.	Deals with a temporary/emergency housing situation better addressed through the Regional Housing Council and other, more targeted efforts to address homelessness.
Implemented	Adopt design standards that assist new forms or high-density housing and promote infill.	Not excluded, implemented.
Implemented	Allow single-room occupancy (SRO) housing in all multifamily zones.	Not excluded, implemented.
Included (4.b)	Strategically allow live/work units in nonresidential zones.	Not excluded, included.
Excluded	Promote Planned Unit Developments and cluster subdivisions.	See Action 1.b.
Implemented	Establish a multifamily tax exemption.	Not excluded, implemented.
Included (6.a)	Develop a comprehensive funding strategy for affordable housing that addresses both sources of funding and how the funds should be spent.	Not excluded, included.
Excluded	On a regular basis, evaluate the effectiveness of how the multifamily tax exemption is being used to further affordable housing goals.	Required by state law that an annual review be done for multifamily tax exemption projects.
Included (6.b)	Establish an affordable housing property tax levy to finance affordable housing for very low-income households.	Not excluded, included.
Included (6.c)	Establish an affordable housing sales tax.	Not excluded, included.
Implemented	Expand the multifamily tax exemption to make it available in all transit corridors.	Not excluded, implemented.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Implemented	Offer density bonuses for low-income housing.	Not excluded, implemented.
Excluded	Require developers to provide income-restricted units as part of low-density developments.	The Thurston Region does not have the market to implement this action. Requires a market evaluation before implementing.
Excluded	Require property owners to provide an affordable housing fee when building homes over a certain size.	The Thurston Region does not have the market to implement this action. Requires a market evaluation before implementing.
Excluded	Establish alternative development standards for affordable housing. (standards in the zoning code to support affordable housing)	Action not specific enough.
Excluded	Define income-restricted housing as a different use from other forms of housing in the zoning code.	The City considered this action as part of Ordinance No. O2020-005 Housing Affordability Text Amendments discussions, but determined that defining income-restricted housing as a different use in Title 18 Zoning created more potential complications and restrictions on the use.
Included (1.g)	Offer and/or expand fee waivers for low-income housing developments.	Not excluded, included.
Excluded	Expand fee waivers for affordable housing developments.	Combined w/ Action 1.g.
Included (3.b)	Allow deferral of impact fee payments for desired unit types.	Not excluded, included.
Included (1.h)	Require low-income housing units as part of new developments.	Not excluded, included.
Included (1.i)	Fund development projects that increase low-income housing through grants or loans.	Not excluded, included.
Excluded	Establish a regional housing trust fund to provide dedicated funding for affordable housing.	This should be what the Thurston Housing Authority does. The City should not create another entity.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Excluded	Establish a local housing trust fund to provide dedicated funding for low-income housing.	Coordination at the regional scale will have more of an impact than developing individual plans.
Excluded	Create partnerships with local housing groups to increase affordable housing options for seniors and other populations with unique needs.	Combined w/ Action 5.c.
Implemented	Make strategic investments in infrastructure expansion to reduce development costs.	Not excluded, implemented.
Excluded	Simplify land use designation maps in the comprehensive plan to help streamline the permitting process.	The City currently has six residential zone district and allows residential development in all other zone districts, except for industrial zone districts. This has not been raised as an issue by residential developers in the City.
Excluded	Inventory housing units dedicated for seniors, low-income households, and ADA-accessible units.	Data should support the actions that result in change.
Excluded	Inventory substandard housing units (units with poor energy efficiency, indoor air quality/mold issues, etc.).	Data should support the actions that result in change.
Included (5.d)	Establish a rental registration program to improve access to data and share information with landlords.	Not excluded, included.
Excluded	Require the owners of rental properties to obtain a business license.	Data should support the actions that result in change.
Excluded	On a regular basis, inventory rental housing.	Data should support the actions that result in change.
Excluded	Integrate or adjust floor area ratio standards.	The City uses floor area ratios in a very limited way for residential uses in the Capitol Boulevard Corridor – North Trosper District for mixed-use commercial and residential developments.
Implemented	Relax ground floor retail requirements to allow residential units.	Not excluded, implemented.
Implemented	Reduce setbacks and increase lot coverage/impervious area standards.	Not excluded, implemented.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Excluded	Maximize SEPA threshold exemptions for single-family and multifamily development proposals.	See Action 3.c.
Included (3.c)	Maximize use of SEPA threshold exemptions for residential and infill development.	Not excluded, included.
Excluded	Utilize SEPA exemptions to encourage infill development in urban growth areas	See Action 3.c.
Excluded	Create subarea plans with non-project environmental impact statements.	See Action 3.c.
Excluded	Develop SEPA-authorized "planned actions" to streamline permitting process in designated areas.	See Action 3.c.
Excluded	Consult with Washington State Department of Transportation as part of the SEPA review process to reduce appeals based on impacts to the transportation element for residential, multifamily, or mixed-use projects.	This has not been an issue for the City.
Implemented	Process short plat applications administratively.	Not excluded, implemented.
Excluded	Process preliminary long plat applications that meet specific requirements administratively.	Can implement this but if even one person requests a public hearing, a public hearing must be held. May not be worth implementing if a public hearing is always anticipated and it has different noticing requirements from the norm (administrative headaches).
Excluded	Market available housing incentives.	See Action 5.a.
Excluded	Establish a foreclosure intervention counseling program.	Already existing programs that fill this need.
Included (1.j)	Establish a program to preserve and maintain healthy and viable manufactured home parks.	Not excluded, included.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Excluded	Require developers to provide relocation assistance when a manufactured home park cannot be preserved.	No seen as an issue in the City.
Excluded	Help residents convert manufactured home parks into cooperatives.	See Action #63
Excluded	Adopt a just cause eviction ordinance.	See Action 2.e.
Excluded	Adopt a “right to return” policy for tenants if displaced by redevelopment.	Planning Commission and City Council decided that the action should not be implemented by the City, because this would involve the City too much in market decisions.
Included (2.c)	Adopt short-term rental regulations to minimize impacts on long-term housing availability.	Not excluded, included.
Included (2.d)	Establish a down payment assistance program.	Not excluded, included.
Excluded	Establish a property tax assistance program for low-income homeowners.	This may not be in the cities’ purview.
Excluded	Establish a property tax assistance program for homeowners with disabilities.	This may not be in the cities’ purview.
Excluded	Require an impact analysis for new housing and land use proposals.	This action will lead to an increase in housing costs. Transportation impact analyses are already required where needed.
Excluded	Require subsidized housing be integrated with unsubsidized housing.	See Action 1.h.
Excluded	Develop and implement an education and outreach plan for affordable housing options	See Action 5.a.
Included (5.a)	Conduct education and outreach around city programs that support affordable housing.	Not excluded, included.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Included (5.b)	Fund Housing Navigators to assist households, renters, homeowners, and landlords with housing issues.	Not excluded, included.
Excluded	Review and, if necessary, update property maintenance codes (including standards for mold/moisture) to keep housing in good repair.	Enforcement of property maintenance codes is really the issue.
Included (1.k.)	Enhance enforcement of property maintenance codes to keep housing in good repair.	Not excluded, included.
Excluded	Co-locate emergency, transitional, and permanent affordable housing.	This is an action taken by the developer; may not be appropriate for the city to require.
Excluded	Working through the Regional Housing Council, identify appropriate locations for emergency housing within each jurisdiction.	This action deals with a temporary/emergency housing situation better addressed through the Regional Housing Council and other, more targeted efforts to address homelessness.
Included (5.c)	Identify and develop partnerships with organizations that provide or support for low-income, workforce, and senior housing as well as other populations with unique housing needs.	Not excluded, included.
Excluded	Look at options for creating workforce housing.	Action is not specific enough. Need to define what exactly should the cities be doing.
Implemented	Explore creating dormitory-style housing, similar to what colleges have, with common bathrooms and communal kitchens for transitional housing.	Not excluded, implemented.
Implemented	Identify underutilized properties ripe for redevelopment.	Not excluded, implemented.
Excluded	Review the recommendations in the Urban Corridors Task Force Report (TRPC, 2012).	Data should support the actions that result in change.
Excluded	Adopt a preservation ordinance.	Combined with Action 2.e.

Action Status (Plan Reference)	Action	Explanation for Exclusion
Included (1.1)	Partner with low-income housing developers (such as Habitat for Humanity) to expand homeownership opportunities.	Not excluded, included.
Excluded	Identify and remove code and fee impediments/disincentives to affordable housing.	Like equity, need to review all actions through an affordable housing lens. See Action 1.e.
Included (6.d)	Use value capture to generate and reinvest in neighborhoods experiencing increased private investment (with a focus on areas with planned or existing transit).	Not excluded, included.
Excluded	Limit or regulate fees associated with rental housing applications.	See Action 2.e.
Excluded	Require landlords to establish payment plans for tenants that get behind on rent.	See Action 2.e.
Excluded	Eviction mitigation to find mutual termination of rental agreement instead of evicting tenants.	See Action 2.e.
Excluded	Improve access to enforcement landlord/tenant laws (court enforcement is a barrier).	See Action 2.e.
Excluded	Increase access to legal assistance for landlord/tenant issues (free or sliding scale).	See Action 2.e.
Excluded	Program to incentivize landlords to accept tenants with poor credit or criminal history.	See Action 2.e.
Included (2.e)	Identify and implement appropriate tenant protections that improve household stability.	Not excluded, included.

Appendix C.
Policy Evaluation Summary

Evaluation of the Policies in the City's Comprehensive Plan Housing Element

This appendix evaluates the City's current Comprehensive Plan housing policies for connections to the gaps identified in the housing needs assessment and the status of policy implementation.

All the Housing Element goals, policies, and actions were reviewed and updated as part of 8-year GMA Comprehensive Plan Update in 2016 in Ordinance No. O2016-012 and there have been amendments to the Housing Element through the annual Comprehensive Plan amendment process since then.

As noted in Chapter 3 *Local actions*, some minor adjustments to the Housing Element goals, policies, and actions may be appropriate for consideration in a future Comprehensive Plan amendment docket to support the six strategies for addressing housing needs in the City.

Criteria

Connections to Housing Needs Assessment and HAP Objectives

V Valid, continuing need for goal/policy to meet identified gap in Housing Needs Assessment (HNA) and/or Housing Action Plan (HAP) objectives.

A Amend to address:

1) One of the seven gaps identified in the Housing Needs Assessment:

Affordability. Reduce the cost of housing for low-income and cost-burdened households.

Supply. Increase the inventory of housing for all households.

Variety. Increase the variety of housing sizes and types

Seniors. Increase the stock of housing options needed for aging seniors.

Improvements. Maintain the existing housing stock, including improving energy efficiency and air quality.

Stability. Increase household wealth by providing safe, stable options for rental housing and pathways to homeownership.

Supportive Housing. Increase permanent housing options for people with disabilities and those at risk of or experiencing homelessness.

2) One of the six Housing Action Plan strategies:

1 Increase the supply of permanent, income-restricted affordable housing.

2 Make it easier for households to access housing and stay housed.

3 Expand the overall housing supply by making it easier to build all types of housing projects.

4 Increase the variety of housing choices.

5 Continually build on resources, collaboration, and public understanding to improve implementation of housing strategies.

6 Establish a permanent source of funding for low-income housing.

N Not directly related to housing needs or objectives.

Achievement of goals and policies

1) Goals and policies, progress in implementation:

E Early/initiated

M Moderate progress/maturing implementation through funding/code/program development

C Completed

2) Compatibility with Growth Management Act and County-Wide Planning Policies since Adoption:

R Retain, still compatible and valid

U Update to recognize recent city initiatives, clarity, or ease of implementation

Housing Element

Table 15. Housing Element policy and action evaluation – Goal H-1.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-1	**To conserve and improve the existing city housing stock and quality of life of neighborhoods.**				
Policy H-1.1	Assist city neighborhoods in maintaining and rehabilitating the existing housing stock as decent, safe, sanitary, and affordable housing.	Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 8) *Encourage abandoned houses moving back into the active housing inventory* under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy.	**V**	**E** **R**	The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. See Action H-3.1.2 and Policy 7.2.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-1.2	Encourage a range of housing, economic development, and community revitalization in the city.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2019-004 updated the Economic Development Plan. 4. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy. See Policies H-4.1 and H-6.2.
Policy H-1.3	Promote the quality of life of existing communities and implementation of community housing goals through the preparation of comprehensive plans and the development review process.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022.	**V**	**M** **R**	Continue implementation of the policy. The eight-year GMA update is on proposed 2022 Long Range Planning work program.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-1.4	Provide assistance to improve community surroundings and infrastructure in residential areas.	The 2019 Housing Affordability Work Plans identified Development Fee Amendment Action #6 *Make infrastructure investments for infill areas needing upgrades with follow-up by City staff to develop potential scenarios with emphasis on areas where affordable housing is most likely to occur* to address this policy.	**V**	**E** **R**	Continue implementation of the policy. Development Fee Amendment Action #6 is on proposed 2022 Long Range Planning work program.
Policy H-1.5	Encourage and facilitate economic development as an important part of provision of housing by providing jobs.	Policy not directly related to housing needs or objectives. Ordinance No. O2019-004 updated the Economic Development Plan.	**N**	**M** **R**	Continue implementation of the policy. While the Economic Development Plan is not directly tied to housing, but it plays an important role in raising wages, which have not kept pace with housing costs.
Action H-1.5.1	Continue implementation of economic development efforts to provide jobs in Tumwater.	Policy not directly related to housing needs or objectives. Ordinance No. O2019-004 updated the Economic Development Plan.	**N**	**M** **R**	Continue implementation of the action. While the Economic Development Plan is not directly tied to housing, but it plays an important role in raising wages, which have not kept pace with housing costs.

Table 16. Housing Element policy and action evaluation – Goal H-2.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-2:	**To provide a sufficient number of single family dwelling units, multi-family dwelling units, manufactured homes, and group housing to provide an affordable selection of housing to each economic segment of the Tumwater population.**				
Policy H-2.1	Provide sufficient, suitably zoned land for development of all housing types to accommodate the future needs for each type of housing, including single family, multi-family, and manufactured homes in manufactured home parks and on single lots.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022. Draft 2021 Buildable Lands Report indicates that there is sufficient, suitably zoned land for development of all housing types.	**V**	**M** **U**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy. Consider expanding the types of housing listed in the policy. Eight-year GMA update of the Comprehensive Plan is on proposed 2022 Long Range Planning work program.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-2.2	Provide opportunities for a range of housing types to provide for all economic segments of Tumwater's population.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-2.2.1	Monitor the Land Use Element and Zoning Code to ensure an adequate supply of suitably zoned land.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022. The draft 2021 Buildable Lands Report indicates that there is sufficient, suitably zoned land for development of all housing types.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the action. Eight-year GMA update is on proposed 2022 Long Range Planning work program. See Action H-5.1 and H-6.2.1.

Table 17. Housing Element policy and action evaluation – Goal H-3.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-3	**To provide adequate, affordable housing for residents of all income groups, including sufficient housing affordable to low and moderate-income groups.**				
Policy H-3.1	Encourage the development of innovative plans, codes, standards, and procedures in order to take advantage of new private and public sector approaches to housing provision.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-3.1.1	The Zoning Code allows manufactured homes on single-family lots in all residential zones. It is the intent of the Housing Element to promote the designation of a sufficient supply of land for traditional mobile/ manufactured home parks and to recognize that modular/manufactured housing on single family lots and in manufactured home parks is a viable form of housing construction.	Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 6) *Assess actions for assuring mobile home parks continue to provide affordable housing toward a goal of property ownership by residents under* B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the action.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-3.1.2	Increase code enforcement efforts and build pubic private partnerships to encourage renovations of unfit structures for use as transitional or affordable housing.	Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 8) *Encourage abandoned houses moving back into the active housing inventory* under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy.	**V**	**E** **U**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. See Policies H-1.1 and H-7.2.
Policy H-3.2	Encourage provision of adequate building sites through appropriate land use planning and zoning codes, infrastructure supply, and overall regulatory climate.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The draft 2021 Buildable Lands Report indicates that there is sufficient, suitably zoned land for development of all housing types.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-3.3	Tumwater should assume its "fair share" of housing for low and moderate income groups, in cooperation with other jurisdictions in Thurston County.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action C) *Ongoing Regional Actions – Continue work with other jurisdictions and agencies to explore regional solutions to homelessness and affordable housing*. 2. The City began formally working with the cities of Lacey, Olympia, and Yelm and Thurston County as part of the Regional Housing Council to address such issues in 2019.	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue work with the Regional Housing Council and on implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-3.3.1	Monitor land supply, census data, and housing policies to ensure Tumwater accommodates its fair share of housing for low and moderate income groups.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action C) *Ongoing Regional Actions – Continue work with other jurisdictions and agencies to explore regional solutions to homelessness and affordable housing*. 2. The City began formally working with the cities of Lacey, Olympia, and Yelm and Thurston County as part of the Regional Housing Council to address such issues in 2019, including data collection. 3. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 10) *Inventory and track affordable housing units in Tumwater* under B) *Boost Housing Affordability – Actions to increase affordable housing.*	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue work with the Regional Housing Council on implementation of the action.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-3.3.2	Work with Tumwater School District, Housing Authority, and other agencies and organizations to pursue grant funding and implement transitional housing strategies for families with children.	Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 2) *Develop strategies with the Tumwater School District and nonprofit partners to house homeless students/families* under A) *Reduce Homelessness – Increase resources/actions to combat/decrease regional homelessness* to address this action. The City has been working with Together! in the Tumwater School District to address these issues.	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the action.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-3.3.3	Establish a multi-family tax exemption program that gives financial incentive for developers to create multi-family structures in target areas and to set aside a percentage of units as low-income housing.	1. Ordinance No. O2017-004 established the multi-family tax exemption program at the City. 2. Resolution No. R2017-002 established the Brewery District and the Capitol Boulevard Corridor as the initial target areas. 3. The 2019 Housing Affordability Work Plan Development Fee Amendment 3) noted *Expand the multifamily tax exemption program to other areas of the City, such as the Town Center, and the Littlerock Road Subarea, and look at expanding the percentage of permanently affordable units that would need to be provided*. 4. Resolution No. R2019-022 expanded the target areas to include the Littlerock Subarea and the Town Center.	**V**	**C** **U**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. No further action needed on the action, beyond monitoring implementation of the programs.

Table 18. Housing Element policy and action evaluation – Goal H-4.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-4	**To provide adequate opportunities for housing for all persons regardless of age, race, color, national origin, ancestry, sex, sexual orientation, familial status, marital status, ethnic background, source of income use of federal housing assistance, or other arbitrary factors.**				
Policy H-4.1	Support the inclusion of living opportunities for families with children throughout the city.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City.	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-4.2	Support and encourage a variety of housing types and price ranges through appropriate policies and regulations.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy. See Policies H-1.2 and H-6.2.
Action H-4.2.1	Continue the requirement for reasonable maximum lot sizes in order to create smaller lots that are more affordable and that allow a more efficient use of City services.	The draft 2021 Buildable Lands Report indicates that the new development is occurring on smaller lot sizes than the previous report.	**V**	**M** **R**	Continue implementation of the action.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-4.2.2	Encourage homeowner associations to adopt Covenants, Conditions, and Restrictions (CCRs) consistent with this policy.	Part of the final project review and approval process.	**V**	**E** **U**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the action.

Table 19. Housing Element policy and action evaluation – Goal H-5.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-5	**To supply sufficient, safe, suitable housing sites and housing supply to meet projected future housing needs for Tumwater over the next 20 years.**				
Policy H-5.1	Ensure appropriate land use designations and Zoning Code designations to provide sufficient land for housing construction.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022. The draft 2021 Buildable Lands Report indicates that there is sufficient, suitably zoned land for development of all housing types	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-5.1.1	Monitor the Land Use Element and Zoning Code to ensure an adequate supply of suitably zoned vacant land. (2.1.1)	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022. The draft 2021 Buildable Lands Report indicates that there is sufficient, suitably zoned land for development of all housing types.	**V**	**M** **R**	Continue implementation of the action. See Actions H-2.2.1 and H-6.2.1.
Action H-5.1.2	Continue joint planning with Thurston County to plan for future growth in Tumwater.	The City is currently working with Thurston County on an update to the Tumwater / Thurston County Joint Plan.	**V**	**E** **R**	Continue implementation of the action.
Policy H-5.2	Lands not suitable for development due to site constraints such as wetlands, steep slopes, geologically hazardous areas, etc., should be identified and considered when determining sufficient land for new housing in accordance with Tumwater's Conservation Plan.	Policy not directly related to housing needs or objectives. Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022.	**N**	**M** **R**	Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-5.3	Encourage construction practices, which exceed minimum standards. Tumwater will support the use of alternative building designs and methods that exceed the minimum standards set by Tumwater.	Ongoing evaluation process through amendments to the Development Guide and Building Codes. 2018 Building Codes adopted by Ordinance No. O2021-005.	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports the City's work to expand the range of housing options. Continue implementation of the policy.

Table 20. Housing Element policy and action evaluation – Goal H-6.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-6	**To promote a selection of housing that is decent, safe, and sound, in close proximity to jobs and daily activities, and varies by location, type, design, and price.**				
Policy H-6.1	Protect residential areas from undesirable activities and uses through aggressive enforcement of adopted City codes.	Ongoing code enforcement of the City's nuisance code (TMC 8.04) and the International Property Maintenance Code (TMC 15.18) by the City Police Department in cooperation with the Community Development Department. Same as Action H-8.2.1.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued expansion of the City's design guidelines to balance increase in densities. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-6.2	Provide for a dynamic mix of residential land uses and zones in order to create a diverse mix of sites available for different housing types.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued expansion of the City's design guidelines to balance increase in densities. Continue implementation of the policy. See Policies H-1.2 and H 4.2.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-6.2.1	Continue to monitor the available land supply, census data, and City policies to ensure a diverse mix of land for residential housing stock.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022. The draft 2021 Buildable Lands Report indicates that there is sufficient, suitably zoned land for development of all housing types	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued expansion of the City's design guidelines to balance increase in densities. Continue implementation of the action. See Actions H-2.2.1 and H-5.1.1.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-6.2.2	Continue to implement innovative design techniques, such as zero lot line developments, architectural design standards, alley houses, and attached single-family housing. Zero lot line developments are residential real estate in which the structure comes up to or very near to the edge of the property. Zero-lot-line houses are built very close to the property line in order to create more usable space.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City.	**V**	**M** **U**	As noted in the City's 2019 policy analysis, this policy directly supports continued expansion of the City's design guidelines to balance increase in densities. Continue implementation of the action. Update language to reflect current design techniques.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-6.3	Support increasing housing opportunities along urban corridors and centers.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 2) *Strengthen incentives for affordable housing within the Capital Corridor and Brewery District and explore extending these incentives to the entire InterCity Transit #13 bus corridor* under Action B) *Boost Housing Affordability – Actions to increase affordable housing*. 2. Ordinance No. O2017-004 established the multi-family tax exemption program at the City. 3. Resolution No. R2017-002 established the Brewery District and the Capitol Boulevard Corridor as the initial target areas. 4. Resolution No. R2019-022 expanded the target areas to include the Littlerock Subarea and the Town Center.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued expansion of the City's design guidelines to balance increase in densities and continued implementation of land use and transportation connections. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-6.4	Encourage provision of affordable housing near public transit routes to promote efficient transportation networks.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 2) *Strengthen incentives for affordable housing within the Capital Corridor and Brewery District and explore extending these incentives to the entire InterCity Transit #13 bus corridor* under Action B) *Boost Housing Affordability – Actions to increase affordable housing*. 2. Ordinance No. O2017-004 established the multi-family tax exemption program at the City. 3. Resolution No. R2017-002 established the Brewery District and the Capitol Boulevard Corridor as the initial target areas. 4. Resolution No. R2019-022 expanded the target areas to include the Littlerock Subarea and the Town Center.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of land use and transportation connections. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-6.4.1	Continue to involve Intercity Transit in Tumwater's development review process.	Action not directly related to housing needs or objectives.	**N**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of land use and transportation connections. Continue implementation of the action.
Policy H-6.5	Tumwater will maintain current Building Code standards and will use the most up to date future Code editions.	Ongoing evaluation process through amendments to the Development Guide and Building Codes. 2018 Building Codes adopted by Ordinance No. O2021-005.	**V**	**M** **R**	Continue implementation of the policy.
Action H-6.5.1	Host training with developers and staff on implementation of Low Impact Development.	Completed in 2017.	**V**	**C** **U**	Completed action. Propose removing action.

Table 21. Housing Element policy and action evaluation – Goal H-7.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-7	**To ensure that housing is compatible in quality, design, and density with surrounding land uses, traffic patterns, public facilities, and environmentally sensitive areas.**				
Policy H-7.1	Support the stability of established residential neighborhoods through appropriate plans and codes.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022. Similar to Policy H-8.1 below.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued expansion of the City's design guidelines to balance increase in densities. Continue implementation of the policy. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-7.1.1	Continue to implement design standards for multi-family and attached single-family dwellings in order to ensure compatibility with existing neighborhoods.	Citywide Design Guidelines implemented by Ordinance No. O2016-013. Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued expansion of the City's design guidelines to balance increase in densities. Continue implementation of the action.
Policy H-7.2	Assure housing will be well maintained and safe.	Ongoing code enforcement of the City's nuisance code (TMC 8.04) and the International Property Maintenance Code (TMC 15.18) by the City Police Department in cooperation with the Community Development Department. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 8) *Encourage abandoned houses moving back into the active housing inventory* under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. Same as Policy H-8.2 below.	**V**	**M** **R**	Continue implementation of the policy. The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. See Policy 1.1 and Action 3.1.2. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-7.3	Enhance the appearance of and maintain public spaces in residential areas.	Ongoing code enforcement of the City's nuisance code (TMC 8.04) and the International Property Maintenance Code (TMC 15.18) by the City Police Department in cooperation with the Community Development Department. Same as Policy H-8.3 below.	**V**	**E** **U**	Continue implementation of the policy. The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-7.4	Promote community involvement to achieve neighborhood improvement.	Ongoing program. Same as Policy H-8.4 below.	**V**	**E** **R**	Continue implementation of the policy. The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Table 22. Housing Element policy and action evaluation – Goal H-8.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-8	**To support healthy residential neighborhoods which continue to reflect a high degree of pride in ownership or residency.**				
Policy H-8.1	Support the stability of established residential neighborhoods.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022. Similar to Policy H-7.1 above.	**V**	**M** **R**	Consider update of the policy to support Goal H-8. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-8.2	Assure housing will be well maintained and safe.	Resolution No. R2018-016 Homelessness and Affordable Housing identified Action 8) *Encourage abandoned houses moving back into the active housing inventory* under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. Ongoing code enforcement of the City's nuisance code (TMC 8.04) and the International Property Maintenance Code (TMC 15.18) by the City Police Department in cooperation with the Community Development Department. Same as Policy H-7.2 above.	**V**	**M** **R**	Update of the policy to support Goal H-8. The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. See Policy 1.1 and Action 3.1.2. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-8.2.1	Protect residential areas from undesirable activities and uses through aggressive enforcement of adopted City codes.	Ongoing code enforcement of the City's nuisance code (TMC 8.04) and the International Property Maintenance Code (TMC 15.18) by the City Police Department in cooperation with the Community Development Department. Same as Policy H-6.1 above.	**V**	**M** **R**	Update of the policy to support Goal H-8. The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-8.3	Enhance the appearance of and maintain public spaces in residential areas.	Ongoing code enforcement of the City's nuisance code (TMC 8.04) and the International Property Maintenance Code (TMC 15.18) by the City Police Department in cooperation with the Community Development Department. Same as Policy H-7.3 above.	**V**	**M** **R**	Update of the policy to support Goal H-8. The City could consider a formal maintenance and rehabilitation program beyond the current code enforcement procedures. This would be in coordination with its actions with the Regional Housing Council. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.
Policy H-8.4	Promote community involvement to achieve neighborhood improvement.	Ongoing program. Same as Policy H-7.4	**V**	**E** **U**	Update of the policy to support Goal H-8. During the next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022, eliminate duplication in policies and actions.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-8.4.1	Encourage neighborhood meetings to discuss community issues as situations and concerns arise.	Ongoing program.	**V**	**E** **U**	Continue implementation of the action.
Policy H-8.5	Encourage home ownership for Tumwater residents.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy.	**V**	**E** **U**	Continue implementation of the policy.

Table 23. Housing Element policy and action evaluation – Goal H-9.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-9	**To encourage a variety of housing opportunities for those with special needs, particularly those with problems relating to age or disability.**				
Policy H-9.1	Require housing to meet the needs of those with special housing requirements without creating a concentration of such housing in any one area.	City is addressing this policy subject to the state requirements for location of special housing.	**V**	**E** **U**	As noted in the City's 2019 policy analysis, this policy directly supports continued efforts to address a range of special housing needs, including homelessness. Continue implementation of the policy.
Policy H-9.2	Assist social service organizations in their efforts to seek funds for construction and operation of emergency, transitional, and permanent housing.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action C) *Ongoing Regional Actions – Continue work with other jurisdictions and agencies to explore regional solutions to homelessness and affordable housing*. 2. The City began formally working with the cities of Lacey, Olympia, and Yelm and Thurston County as part of the Regional Housing Council to address such issues in 2019.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued efforts to address a range of special housing needs, including homelessness. Continue implementation of the policy through Council action and the Regional Housing Council.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-9.3	Support and plan for assisted housing opportunities using federal, state, or local aid.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action C) *Ongoing Regional Actions – Continue work with other jurisdictions and agencies to explore regional solutions to homelessness and affordable housing*. 2. The City began formally working with the cities of Lacey, Olympia, and Yelm and Thurston County as part of the Regional Housing Council to address such issues in 2019.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued efforts to address a range of special housing needs, including homelessness. Continue implementation of the policy through Council action and the Regional Housing Council.
Policy H-9.4	Encourage and support social and health service organizations, which offer support programs for those with special needs, particularly those programs that help people remain in the community.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action C) *Ongoing Regional Actions – Continue work with other jurisdictions and agencies to explore regional solutions to homelessness and affordable housing*. 2. The City began formally working with the cities of Lacey, Olympia, and Yelm and Thurston County as part of the Regional Housing Council to address such issues in 2019.	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued efforts to address a range of special housing needs, including homelessness. Continue implementation of the policy through Council action and the Regional Housing Council.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-9.5	Encourage alternative housing strategies for homeless youth, which may include Host Homes.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified Action C) *Ongoing Regional Actions – Continue work with other jurisdictions and agencies to explore regional solutions to homelessness and affordable housing*. 2. The City began formally working with the cities of Lacey, Olympia, and Yelm and Thurston County as part of the Regional Housing Council to address such issues in 2019. 3. City funding work with school aged children by Together! in the Tumwater School District	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued efforts to address a range of special housing needs, including homelessness. Continue implementation of the policy through Council action and the Regional Housing Council.

Table 24. Housing Element policy and action evaluation – Goal H-10.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-10	**To provide housing that is compatible and harmonious with existing neighborhood character through use of innovative designs that enhance the appearance and quality of Tumwater's neighborhoods.**				
Policy H-10.1	Encourage innovation and variety in housing design and development. Tumwater will support efforts to build housing with unique individual character, which avoids monotonous neighborhood appearance.	Citywide Design Guidelines implemented by Ordinance No. O2016-013. Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of the expansion of the City's design guidelines to balance increase in densities. Continue implementation of the policy.
Policy H-10.2	Multi-family residential housing should be subject to design criteria that relate to density, structure bulk, size and design, landscaping, and neighborhood compatibility.	Citywide Design Guidelines implemented by Ordinance No. O2016-013. Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of the expansion of the City's design guidelines to balance increase in densities. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-10.2.1	Continue to implement multi-family housing design standards.	Citywide Design Guidelines implemented by Ordinance No. O2016-013. Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of the expansion of the City's design guidelines to balance increase in densities. Continue implementation of the action.

Table 25. Housing Element policy and action evaluation – Goal H-11

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-11	**To provide housing to accommodate Tumwater's housing needs in the urban growth area and make the most efficient use of infrastructure and services.**				
Policy H-11.1	Reference the Transportation Element and anticipated transportation impacts when making housing decisions affecting the location and density of housing.	Policy not directly related to housing needs or objectives.	**N**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of the policy supporting the land use and transportation connection. Continue implementation of the policy.
Policy H-11.2	Reference utility plans and the impact of housing decisions on capital improvements planning.	Policy not directly related to housing needs or objectives.	**N**	**E** **R**	Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-11.3	Encourage the construction of affordable housing, including cottage housing and accessory dwelling units, within a half mile or twenty minute walk of an urban center, corridor or neighborhood center with access to goods and services to provide access to daily household needs.	1. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 2. Ordinance No. O2017-002 allowed cottage housing uses in the City. 3. Ordinance No. O2020-005 expanded where cottage housing uses could be located and reduced size and parking requirements for ADUs.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of efforts to connect new housing types and increased density to transit corridors would support many different goals. Continue implementation of the policy.

Table 26. Housing Element policy and action evaluation – Goal H-12.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-12	**To encourage urban growth within the city limits with gradual phasing outward from the urban core.**				
Policy H-12.1	Encourage the construction of housing on vacant property within the city and the redevelopment of underdeveloped property within residential areas to minimize urban sprawl and associated public service costs.	1. Resolution No. R2018-016 Homelessness and Affordable Housing identified a number of actions under B) *Boost Housing Affordability – Actions to increase affordable housing* to address this policy. 2. The 2019 Housing Affordability Work Plans identified a number of text and fee amendments to support this policy. 3. Ordinance No. O2020-005 addressed a number of housing text amendments to increase the range of housing in the City.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of using an expanded range of housing types to support development of the core of the City outwards. Continue implementation of the policy.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-12.1.1	Continue to review and revise, as necessary, City Development Standards deemed unnecessary and make development more expensive and/or difficult.	Ongoing evaluation process through amendments to the development regulations, Development Guide, and Building Codes. 2018 Building Codes adopted by Ordinance No. O2021-005.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of using an expanded range of housing types to support development of the core of the City outwards. Continue implementation of the action.
Action H-12.1.2	Continue to support high-density zoning within specific areas of the city that have the infrastructure and services to support high-density housing.	City has enacted high-density zoning for the Brewery District, Capitol Boulevard Corridor, and Town Center, and allows multifamily development in its commercial and mixed-use zone districts.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of using an expanded range of housing types to support development of the core of the City outwards. Continue implementation of the action.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Action H-12.1.3	Continue to implement minimum density levels for all residential zoning districts to ensure efficient use of the urban growth area.	Ongoing evaluation process through amendments to the Comprehensive Plan and development regulations. The next required eight-year GMA update of the Comprehensive Plan is expected to start in 2022.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports continued implementation of using an expanded range of housing types to support development of the core of the City outwards. Continue implementation of the action.
Action H-12.1.4	Work cooperatively with Thurston County to provide for more efficient and orderly annexations to facilitate urban service delivery.	Currently working with Thurston County on an update to the Tumwater / Thurston County Joint Plan as well as an annexation agreement to address "island" annexations.	**V**	**E** **R**	Continue implementation of the action.

Table 27. Housing Element policy and action evaluation – Goal H-13.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
GOAL H-13	**Ensure consistency with RCW 36.70A.070(2)(c) which requires sufficient land be available for all types of housing including manufactured housing.**				
Policy H-13.1	Maintain the manufactured home park district zoning in appropriate areas in order to prevent conversion of affordable housing to other uses without replacement.	Continuing implementation of the Ordinance No. O2008-009, which established the Manufactured Home Park (MHP) zone district in the City as the means to address this policy.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy directly supports manufactured housing options. Continue implementation of the policy.
Action H-13.1.1	Encourage manufactured housing park district zoning to locate near transit services.	Continuing implementation of the Ordinance No. O2008-009, which established the Manufactured Home Park (MHP) zone district in the City as the means to address this policy.	**V**	**E** **R**	As noted in the City's 2019 policy analysis, this policy directly supports manufactured housing options. Continue implementation of the action.

Goal, Policy, or Action Number	Adopted Housing Element Goals, Policies, and Actions	Status	Connection to HNA or HAP	Achievement of Goals & Policies	Recommendation
Policy H-13.2	When locating zones and designations for manufactured home parks, carefully consider the risks from natural hazards, such as flooding and liquefaction, and the impacts of those hazards on the future residents of those manufactured home parks, Tumwater's emergency responders, and the city as a whole.	Part of Resolution No. R2017-013, which was an update to the Hazards Mitigation Plan for the Thurston Region.	**V**	**M** **R**	As noted in the City's 2019 policy analysis, this policy was a major focus of the City's recently adopted Hazard Mitigation Plan. Continue implementation of the policy.

Appendix D. Regulations Evaluation Summary

Evaluation of the Regulations in the City's Municipal Code

This appendix evaluates the City's current development regulations for connections to the seven gaps identified in the housing needs assessment as well as acknowledging the work the City has completed to date to address these gaps.

After the City Council adopted Resolution No. R2018-016 in the summer of 2018 and approved the 2019 Housing Affordability Work Plan, the City worked on a number of actions to reduce homelessness, increase affordable housing, and collaborate with other jurisdictions and agencies to explore regional solutions to these issues.

The evaluation of the regulations starts first summaries of the housing types allowed in the zone districts in the City and the density and bulk and dimensional regulations for those zone districts. Then there is a review of the regulations using the Puget Sound Regional Council's Housing Innovation Program and finally there is a development code barrier summary.

As noted in Chapter 3 *Local actions*, some minor adjustments to the development code may be appropriate for consideration in a future development code amendment docket to support the six strategies for addressing housing needs in the City.

Regulations Evaluation #1 – Housing Types

Tables 28 - 30 *Development code housing type summary* list all the housing types that are allowed in the City by zone district.

Table 28. Development code housing type summary (1 of 3).

Housing Types	City Definition (TMC 18.04)	RSR Residential/Sensitive Resource Zone District (2-4 DU/Acre)[1]	SFL Single-Family Low Density Residential Zone District (4-7 DU/Acre)	SFM Single-Family Medium Density Residential Zone District (6-9 DU/Acre)
Single-family detached dwellings	A building that is not attached in any way to another dwelling unit or structure providing complete, independent living facilities for a family.	Allowed	Allowed	Allowed
Manufactured Homes	A single-family dwelling built according to the Department of Housing and Urban Development Manufactured Home Construction and Safety Standards Act, which is a national, preemptive building code. A manufactured home does not meet the criteria to be classified as a "designated manufactured home	Allowed	Allowed	Allowed

[1] DU/Acre = Dwelling units per acre. For example, 2-4 DU/Acre means that the minimum allowed density in the RSR zone district is two dwelling units per acre and the maximum allowed density is four dwelling units per acre. In many zone districts, achieving the maximum listed DU/acre is dependent on the purchase of transfer of development rights in accordance with TMC Chapter 18.57. The calculation of the density requirements is based on the portion of the site devoted to residential and associated uses (e.g., dwelling units; private community clubs; open space; stormwater detention, treatment and infiltration). The following land is excluded from density calculations:

1. Land that is required to be dedicated for public use as open space, right-of-way, or land on which development is prohibited by TMC Title 16, Environment, and land that is to be used for private roads. Provided, that portion of open space/park areas that consists of stormwater facilities and that is designed for active and/or passive recreational purposes in accordance with the drainage design and erosion control manual for Tumwater shall not be excluded from density calculations;
2. Land that is intended for future phases of development created in accordance with TMC 18.14.060;
3. Land that consists of lots devoted to uses other than residential and associated uses, including but not limited to churches, schools, and support facilities (except for stormwater detention, treatment, and infiltration facilities).

Housing Types	City Definition (TMC 18.04)	RSR Residential/Sensitive Resource Zone District (2-4 DU/Acre)[1]	SFL Single-Family Low Density Residential Zone District (4-7 DU/Acre)	SFM Single-Family Medium Density Residential Zone District (6-9 DU/Acre)
Accessory Dwelling Units (ADUs)	A dwelling unit that is an accessory use or structure subordinate to a single-family detached dwelling subject to the general land use regulations found in TMC 18.42.010.	Allowed	Allowed	Allowed
Manufactured Home Parks	Any real property lot which is rented or held out for rent to others for the placement of three or more manufactured homes, designated manufactured homes, or new manufactured homes for the primary purpose of production of income, except where such real property lot is rented or held out for rent for seasonal recreational purposes only and is not intended for year-round occupancy			
Cottage Housing	A grouping of smaller than average detached single-family dwellings clustered around a common area and developed with a coherent plan for the entire site	Allowed	Allowed	Allowed

Housing Types	City Definition (TMC 18.04)	RSR Residential/Sensitive Resource Zone District (2-4 DU/Acre)[1]	SFL Single-Family Low Density Residential Zone District (4-7 DU/Acre)	SFM Single-Family Medium Density Residential Zone District (6-9 DU/Acre)
Duplexes	A building designed for and used exclusively for occupancy by two families independent of each other where both dwelling units are located on the same lot and are completely separated from each other by an unpierced wall extending from ground to roof or an unpierced ceiling and floor extending from exterior wall to exterior wall, except for common stairwell or garage exterior to both dwelling units.	Allowed[2]	Allowed[3]	Allowed[4]
Townhomes or Rowhouses	One of a line or row of dwelling units attached one to the other, having common walls between individual units, generally two stories in height (and sometimes three). Each unit occupies the space between common walls from the lowest level to the roof.			Allowed[5] Only within a residential planned unit development
