<b>Council Meeting Date:</b>	September 12 <sup>th</sup> , 2023
<b>Agenda Title:</b>	VML Conference Discussion
<b>Requested Action:</b>	Consider Changes to the October Town Council meeting if necessary
<b>Department / Agency Lead:</b>	Town Manager
<b>Staff Lead:</b>	Frank Cassidy

## EXECUTIVE SUMMARY

The Virginia Municipal League is holding their annual Conference on October 8<sup>th</sup> – 10<sup>th</sup> 2023.

Staff is requesting direction and availability of the Town Council members for the October 10<sup>th</sup>, 2023, Regular Town Council meeting.

## BACKGROUND

The Virginia Municipal League is a State wide organization with the following mission: Strengthening local government through advocacy, education, and information.

VML Goals and Strategies

To best deliver on our mission over the next three years we will:

1. **Elevate the Impact of Local Government by Strengthening Relationships with and Between Municipalities**
  - Increase connection with our locality members across the state
  - Grow our outreach and support with municipal staffs
  - Facilitate collaborative peer-to-peer connections
2. **Accelerate Local Elected Official and Municipal Staff Impact Through Expanded Value-Added Programming**
  - Expand support for newly elected officials
  - Bolster education through strategic partnerships with higher education
  - Maintain strong advocacy efforts and grow member voice with the General Assembly
  - Emphasize member localities’ leading practices and successes
  - Establish member connections leveraging 21<sup>st</sup> century communication
3. **Cultivate 21<sup>st</sup> Century Leadership By Streamlining Our Governance Structure**
  - Update our governance structure to include a broader range of municipal voices

- Designate and articulate clear entry-points and pathways for leadership participation by members
  - Fully deploy and empower VML staff
  - Renew membership categories for broader participation and engagement
4. **Support Strategic Initiatives Through Organizational Strength**
- Align current and new staff to support stronger relationships and member value
  - Cultivate a strong brand through focused and strategic communication
  - Re-envision the annual conference to strengthen relationships, engage members, and equip members for excellent leadership

**VML Annual Conference:** Each fall hundreds of local government officials, speakers and member organization representatives attend the VML Annual Conference. The conference includes:

- General sessions featuring political leaders, nationally-known speakers and local government experts.
- Workshop sessions on a variety of local government issues.
- Business meeting focusing on the adoption of the annual VML legislative program and the election of officers for the upcoming year.
- The presentation of the annual Innovation Awards recognizing excellence in local government programs.
- The opportunity for networking with colleagues from across the state.

**STAFF RECOMMENDATION**

---

Staff recommends identifying the impact of those attending the VML annual conference on the October 10<sup>th</sup>, 2023, Regular Town Council Meeting.

**Service Level/Policy Impact**

The October Regular Town Council meeting is scheduled to overlap with the end of the Conference. With the return Trip from Norfolk a quorum may be difficult to attain based on the number of attendees.

**Fiscal Impact**

No fiscal impact has been identified at this time.

**Legal Impact**

No legal impact has been identified at this time.

## EXECUTIVE SUMMARY

---

### BACKGROUND

---

At the July 11<sup>th</sup>, 2023, Regular Town Council Meeting, The Town Council met to discuss the allocation of \$250,000 dollars of American Rescue Plan Act funds not previously allocated. The agenda item titled Beneficial use of funds was spearheaded by Councilmen David McGuire.

The Town Council heard from multiple constituents including representatives from Habitat for Humanity and Community Touch.

The Town Council directed staff to “Dedicate the remaining unappropriated ARPA funds to affordable housing and accessibility initiatives focused on the best use of these funds for maximum benefit, requiring collaboration with existing entities and initiatives, including but not limited to Habitat for Humanity and the First Baptist Church, which will meet all of the requirements for distribution.”

This Policy direction from the Town Council requires staff to establish a process to review and distribute the funds.

One council member, Mr. Jay Heroux created a Request for Information (RFI) with a proposed option for the process to review and distribute the funds. The Town Council directed staff to make some changes to the initial proposal and release the RFI to the public for responses.

The RIF was distributed on August 9<sup>th</sup>, 2023 with a due date of August 24<sup>th</sup>, 2023.

Five proposals were received by Staff for review.

### STAFF RECOMMENDATION

---

**Service Level/Policy Impact**

Affordable housing is a component called out in Plan Warrenton, 2040. This plan will help to work towards items:

**H-1:** Ensure equitable, attainable housing opportunities across residents of all ages, incomes, and abilities by catering to the needs of a diverse community, including young families, professionals early in their careers, essential workforce, and those entering retirement.

**H-3:** Preserve existing neighborhoods and promote infill that supports the character and heritage of Warrenton.

**Fiscal Impact**

Allocation of ARPA funds and the subsequent reporting as well as the staff time required to create and implement the program.

**Legal Impact**

No Legal impact has been identified at this time.

# Town of Warrenton

## Warrenton Virginia

### Request for Information On Affordable Housing

#### 1.0 Introduction

The Town of Warrenton is issuing this Request for Information (RFI) on affordable housing. The private sector, non-profit organizations, and citizens are encouraged to respond. This RFI is for informational purposes only and is not any commitment legislatively, legally, or programmatically to commit the Town of Warrenton government to any affordable housing concept, idea, or program. This RFI is not a public notice for any zoning or other regulatory change within the Town of Warrenton code ordinances. This RFI is for information gathering only. Responses are voluntary, and the Town government of Warrenton will not pay for any expense associated with any organization preparing a response. Responses to this RFI will help the Town government of Warrenton continue to examine how Warrenton, a town of 10,000 citizens on the edge of Northern Virginia, can begin to find solutions to many of the same housing issues nationwide. Affordable housing is important for our citizens to thrive and prosper.

The Town of Warrenton government recognizes that affordable housing is a complex issue. Many factors from the public and private sectors contribute to housing prices, stock, quality, and access. We seek to understand new, innovative, partnership-based approaches to solve this challenge. We recognize there is no single solution to this issue. Affordable housing affects many citizens across complex economic, racial, gender, health, education, income and disability, and personal history situations. As a government entity, the town government of Warrenton has some capabilities to make contributions to creating the right conditions to diversify our housing stock and create affordable options for our citizens. Finally, the Town government of Warrenton recognizes that solutions to affordable housing in Warrenton will require private-sector investment, cooperation, and engagement.

#### 2.0 Considerations for Concept Papers

In preparing RFI responses, the following information should be considered:

**Housing Spectrum:** The Town of Warrenton has the full spectrum of citizens affected by housing prices. This includes 1) homeless, 2) temporary housing, 3) transition housing (from homelessness or recent life change), 4) income challenged (we have the full HUD AMI ranges), 5) seniors, 6) disabled, 7) veterans, and 8) young professionals. RFI responses may address all of this spectrum or specific ones.

**Diversification:** Warrenton has a diversified affordable housing stock within its 4.25 square mile boundaries. Historically, affordable housing has been developed in specific Warrenton neighborhoods. These programs have been successful. But in the future, the Town seeks to diversify this affordable housing stock better.

**Impactful:** This RFI is not seeking a solution for a specific housing unit. We are seeking concepts that will transform the housing stock in Warrenton and create meaningful capacity and diversification. RFI responses that focus only on one house or structure, while important, appreciated, and very helpful, are not the intent of this RFI.

**Home Ownership and Equity:** RFI responses should present concepts that enable the benefits of home ownership to those who live in these properties. This includes generating equity and selling the property to extract the equity. This does not mean concepts that are not ownership models should not be submitted. We recognize that rental units or other ownership models provide value.

**Renovation:** RFI responses should discuss options that enable the renovation of existing housing stocks or infrastructure. This includes structures that may not currently be used in residential housing definitions but can be converted. Any concept that addresses this renovation component must discuss how it would address any displacement of persons currently living in a structure if it were to be renovated.

**Maximize Local Trades and Supplier Base:** RFI responses should discuss how those concepts can maximize the use of Warrenton-Fauquier's employment and business base. This includes using local contractor trades personnel and local suppliers of materials.

**Maximize Local Financing:** RFI responses should discuss how our local banks, financing, or private funding can contribute to meaningful solutions. We desire our community to participate and be part of the overall solution.

**Innovative:** RFI responses are encouraged to bring forward new and creative thinking on affordable housing. Affordable housing is not a new problem; the blockers preventing affordability are long-standing. We seek ways to break through long-standing barriers and perceptions of affordable housing.

**Minimize Public Sector Investment:** The Town of Warrenton government has no desire or intent to operate a Public Housing Authority or have equity interests in the housing stock. RFI responses should not assume significant investment from the Town government of Warrenton.

### **3.0 Town Government Role and Contributions To Addressing Affordable Housing**

To create new and innovative solutions to this challenge in Warrenton, there are certain contributions the Town government may make to create the right conditions for affordable housing. Outlined below are the potential actions and contributions that the Town is considering. The items listed below are not firm commitments at this time. Nor are they a promise of future commitments. Any future commitments will be based on policies and programs presented to and approved by the Town Council.

**Land Contributions:** The Town of Warrenton government currently owns several plots of land. Some of this land may be donated to spur the development of innovative housing programs. The town is not committing to any donation program in this RFI. Donation recipients may be from the private sector or non-profit community.

**Real Estate Tax Deferrals:** The Town may consider real estate tax deferrals for affordable housing programs. These are deferrals, meaning there would be a period of time when the Town would not charge real estate taxes on the properties. The town is not committing to any tax deferrals in this RFI.

**Zoning Changes:** The Town of Warrenton government is legally responsible for creating, enforcing, and changing zoning ordinances. Below is a list of possible zoning changes the Town may consider addressing affordable housing. The town is not committing to any zoning changes due in this RFI. Future changes would follow the normal process of zoning changes as outlined in our Town code and ordinances.

- Potentially create zoning overlays on existing residential, commercial, or industrial land to help spur innovation and development of affordable housing capacity.
- Potentially revise density restrictions in residential and commercial zones allowing smaller housing units such as one-bedroom or studio apartments.
- Potentially revise building height restrictions to allow taller structures on less property. This will enable increased density within a more optimized space.
- Potentially revise setbacks, parking, and other land restrictions that can assist in freeing up land use or reduce construction costs.

**Initial Investment Funding:** The Town of Warrenton has designated an initial \$250,000 as possible investment funding for private or non-profit affordable housing concept implementations.

**Fast Track Permit Approvals:** The Town of Warrenton may consider changes to its permitting process to expedite the approval of affordable housing concepts. This can reduce developer costs for concepts that require permitting. The town is not committing to any permit changes in this RFI.

**Construction Financial Off Sets:** The Town of Warrenton may consider waiving fees associated with the construction of affordable housing. This may include water and sewer hookup fees and permit filing fees. The town is not committing to any permit changes in this RFI.

#### 4.0 RFI and Concept Paper Guidance.

Interested organizations and citizens may submit RFI responses to the Town of Warrenton. The page count is 10 (excluding cover page, table of contents, and items 1-2). The RFI responses shall provide the following information. Please be succinct and direct in your writing.

1. Name of Submitting Organization and address of Submitting Organization
2. Point of Contact, Phone and Email
3. Organization Overview: Describe your organization: mission, purpose, size, and expertise.
4. History in Warrenton and Fauquier County: Describe if you have done or done any business or non-profit work related to housing in the Town of Warrenton and Fauquier County.
5. Concept: Describe your concept for increasing affordable housing in Warrenton.
6. Constituency: Describe what housing constituency concept your will help. For example, does your concept help those who are chronically homeless? Does it help those at the 80% AMI?
7. Dependencies: Define any critical dependencies for your concept to come to reality. Examples include zoning changes, financing, and infrastructure.
8. Outcomes: Describe the outcomes and benefits of your concept.
9. Financing: Describe how your concept would be financed.

#### 4.1 Freedom of Information

All RFI responses submitted as part of this RFI will become public records. This means they can be requested to be released via the Freedom of Information Act. The Town of Warrenton will follow its established FOIA processes for any requests for papers submitted under this RFI.

#### **4.2. Submission Instructions and Timeline and POC**

Interested parties shall submit their concept papers via email no later than 3 PM X September 2023. Submissions shall be made to [affordablehouse@warrentonva.gov](mailto:affordablehouse@warrentonva.gov) The Point of Contact for this RFI is Mr. Joe Smith.

#### **4.3 Notice**

Nothing in this RFI is a commitment by the Town government of Warrenton to fund, approve, deny, sponsor or change any housing, property, code, law, zoning ordinance, or existing permits or programs within the town of Warrenton. This RFI is informational only and is designed to help understand the level of interest and support for solving Warrenton’s Affordable Housing challenges.

**TOWN OF WARRENTON, VIRGINIA**  
ARPA Subrecipient Guide

## Overview

On March 11, 2021, the American Rescue Plan Act (“ARPA”) was signed into law and established the Coronavirus State Fiscal Recovery Fund and Coronavirus Local Fiscal Recovery Fund, which together make up the Coronavirus State and Local Fiscal Recovery Funds (“SLFRF”) program. This program is intended to provide support to State, territorial, local, and Tribal governments in responding to the economic and public health impacts of COVID-19 and in their efforts to contain impacts on their communities, residents, and businesses.

The SLFRF program provides funding for local response efforts as long as they fit into the following statutory categories:

1. To respond to the COVID-19 public health emergency or its negative economic impacts;
2. To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to such eligible workers of the recipient, or by providing grants to eligible employers that have eligible workers who performed essential work;
3. For the provision of government services, to the extent of the reduction in revenue of such recipient due to the COVID-19 public health emergency, relative to revenues collected in the most recent full fiscal year of the recipient prior to the emergency; and
4. To make necessary investments in water, sewer, or broadband infrastructure.

This information in this Subrecipient Guide is provided as reference for the financial and programmatic requirements and responsibilities of projects funded through the SLFRF program.

## Eligibility Requirements

All Subrecipients are required to complete the Subrecipient Information and Pre-Award Risk Assessment and submit it, along with documents requested via the assessment, prior to processing the subaward agreement. The Subrecipient Information and Pre- Award Risk Assessment is used to determine the Subrecipient's ability to provide adequate internal controls, sound accounting practices, and sufficient written procedures in order to prevent fraud, waste, abuse and misuse of funds in addition to determining the monitoring plan for the subrecipient.

As of April 04, 2022, all Subrecipients must have an active Unique Entity Identifier (UEI) number to receive federal funding. The DUNS number will no longer be used for Federal funding. Subrecipients must register with the System for Awards Management (SAM) database <https://www.sam.gov> to receive a UEI number. SAM.gov is the primary registrant database for the U.S. Federal Government and Subrecipients are required to update or renew their registration at least once per calendar year to maintain active status. Failure to maintain an active status could potentially result in de-obligation of all federal funds.

DRAFT

## Compliance with Applicable Laws and Regulations

### ***Uniform Administrative Requirements***

Subrecipient's performance under the subaward agreement is subject to the applicable requirements published in the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Title 2 of the United States Code of Federal Regulations (C.F.R.) part 200 hereinafter referred to as the "Uniform Guidance."

### ***Audit Requirement of Federal Fund (2 CFR §200.501)***

Any non-profit organization, institution of higher education, or local government that expends \$750,000 or more during their fiscal year from all Federal awards must have a single audit conducted in accordance with §200.514 of the Uniform Guidance. Audit reports must be forwarded Town of Warrenton on an annual basis during the active period of performance as a Subrecipient.

### ***Debarment and Suspension (2 CFR §180)***

It is the policy of the federal government to conduct business only with responsible persons. A system for debarment and suspension from programs and activities involving federal financial and non-financial assistance and benefits exists to assist agencies in carrying out this policy.

Subrecipients receiving federal funds must certify that they will adhere to Federal Executive Order 12549, Debarment and Suspension. By signing the Subaward Agreement, the Subrecipient certifies that neither the Subrecipient nor its principals have been suspended or debarred from participation in federal grants.

The Subrecipient must not make any lower-level subaward, or enter into any contract for \$25,000 or more, with parties that are debarred, suspended, or otherwise excluded or ineligible for participation in federal programs or activities. See Contract and Procurement section for verification steps.

### ***Discrimination & Civil Rights***

Statutes and regulations prohibiting discrimination applicable to this award, include, without limitation, the following:

1. Title VI of the Civil Rights Act of 1964 (42 U.S.C. §§ 2000d et seq.) and Treasury's implementing regulations at 31 C.F.R. Part 22, which prohibit discrimination on the grounds of race, color, or national origin under programs or activities receiving federal financial assistance;
2. The Fair Housing Act, Title VIII-IX of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), which prohibits discrimination in housing on the basis of race, color, national origin, sex, familial status, or disability;
3. Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicap under any program or activity receiving or benefitting from federal assistance;
4. The Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101 et seq.) and Treasury's implementing regulations at 31 C.F.R. Part 23, which prohibit discrimination on the basis of age in programs or activities receiving federal financial assistance; and
5. The Americans with Disabilities Act of 1990, as amended (42 U.S.C. §§ 12101 et seq.), which prohibits discrimination on the basis of disability under programs, activities, and services provided or made available by state and local governments or instrumentalities or agencies thereto.

### ***Government-Wide Restrictions on Lobbying***

All Subrecipients must comply with the provision of the government-wide Common Rule on Restrictions on Lobbying, as appropriate. The following lobbying cost prohibition is applicable to all Subrecipients of funding:

1. Attempting to influence the outcome of any Federal, State, or local election, referendum, initiative or similar procedure, through in-kind or cash contributions, endorsements, publicity, or similar activity; and

2. Establishing, administering, contributing to, or paying for the expenses of a political, campaign, political action committee, or other organization established for the purpose of influencing the outcome of elections.
3. Attempting to influence: (a) the introduction of Federal or State legislation; or (b) the enactment or modification of any pending Federal or State legislation through communication with any member or employee of the Congress or State legislature (including efforts to influence State or local official to engage in similar lobbying activity), or with any government official or employee in connection with a decision to sign or veto any legislation.
4. Publicity or propaganda purposes designed to support or defeat legislation pending before legislative bodies.
5. Paying, directly or indirectly, for any personal service, advertisement, telegram, telephone, letter, printed or written matter, or other devise, intended or designed to influence in any manner a member of Congress or a State legislature, whether before or after the introduction of any bill or resolution proposing such legislation or appropriation.
6. Engaging in legislative liaison activities, including attendance at legislative sessions or committee hearings, gathering information regarding legislation, and analyzing the effect of legislation, when such activities are carried out in support of or in knowing preparation for an effort to engage in unallowable lobbying.
7. Paying a publicity expert.
8. The Anti-Lobbying Act, 18 U.S.C. §1913, recently was amended to expand significantly the restriction on use of appropriated funding for lobbying. This expansion also makes the anti-lobbying restrictions enforceable via large civil penalties, with civil fines between \$10,000 and \$100,000 per each individual occurrence of lobbying activity. These restrictions are in addition to the anti-lobbying and lobbying disclosure restrictions imposed by 31 U.S.C. §1352.

#### ***Conflict of Interest***

Subrecipient must understand and agree to maintain a conflict of interest policy consistent with 2 C.F.R. §200.318 (c) and that such conflict of interest policy is applicable to each activity funded under this award. Subrecipient must disclose in writing to the U.S. Treasury or through the Town as appropriate, any potential conflict of interest affecting the awarded funds in accordance with 2 C.F.R. §200.12.

#### ***Protection for Whistleblowers***

In accordance with 41 U.S.C. § 4712, Subrecipient may not discharge, demote, or otherwise discriminate against an employee as a reprisal for disclosing information to any of the list of persons or entities provided below that the employee reasonably believes is evidence of gross mismanagement of a federal contract or grant, a gross waste of federal funds, an abuse of authority relating to a federal contract or grant, a substantial and specific danger to public health or safety, or a violation of law, rule, or regulation related to a federal contract (including the competition for or negotiation of a contract) or grant. The list of persons and entities referenced includes:

1. A member of Congress or a representative of a committee of Congress;
2. An Inspector General;
3. The Government Accountability Office;
4. A Treasury employee responsible for contract or grant oversight or management;
5. An authorized official of the Department of Justice or other law enforcement agency;
6. A court of grand jury; and/or
7. A management official or other employee of Town of Warrenton, contractor, or subcontractor who has the responsibility to investigate, discover, or address misconduct.

Subrecipient shall inform its employees in writing of the rights and remedies provided under this section, in the predominant native language of the workforce.

## Program and Fiscal Responsibilities

### **Recordkeeping Requirements**

The Subrecipient shall maintain records, books, documents, and other materials relevant to its performance under this Agreement. These records shall be subject to inspection, review, and audit by the Town or its designees, the State, and the Federal Awarding Agency for five (5) years following termination of this Agreement. If it is determined during the course of the audit that the Subrecipient was reimbursed for unallowable costs under this Agreement or any, the Subrecipient agrees to promptly reimburse the Town for such payments upon request. If a Subrecipient is notified by the Town of Warrenton in writing, or if other applicable laws and regulations as described in 24 CFR 570.490 apply to a project, the record retention period may be extended. If any litigation, public information request, claim, or audit is started before the expiration of the record retention period, the records must be kept until the action has been fully resolved.

### **Grant Reporting Requirements**

Subrecipients will submit a Grant Project and Expenditures Report to the Town of Warrenton each quarter. These reports should include the current status and progress by the Subrecipient and all subcontractors in completing the work described in the Statement of Work and Approved Program Budget. The report should also detail the expenditure of funds under the Subaward Agreement, in addition to any other information requested by the Town. In filling out the report, Subrecipients should include any significant events or activities that occurred during the reporting quarter. This report will also outline the status of the funds, show obligations, and receipts of program income, cash or in-kind contributions to the project, regardless of whether a local match is required.

#### Quarterly Reporting Timelines for Grant Project and Expenditures Reports

Quarter	Period Covered	Due Date
1	January 1 – March 31	April 15
2	April 1 – June 30	July 15
3	July 1 – September 30	October 15
4	October 1 – December 31	January 15

*If the 15<sup>th</sup> falls on a weekend, the report will be due the Friday before.*

### **Reimbursements/Request for Funds**

Grant funds will be disbursed based on the agreed upon procedures described in the ARPA Subaward Agreement. These processes may include reimbursement of expenses, lump-sum, or lump-sum installments.

For the reimbursement of expenses method, Subrecipients should complete a Grant Reimbursement Request Form. It is strongly recommended that the entity should request reimbursement monthly, when monthly expenditures are incurred. However, Subrecipients can request reimbursement quarterly. If requesting quarterly, Subrecipients must request reimbursement no later than 15 days after the end of each quarter for all expenses incurred during the quarter in its entirety. For example, the entity must request reimbursement for all expenses incurred for July, August, and September no later than October 15th. These reimbursement dates will coincide with the reporting timelines for the Grant Project and Expenditures Report.

Reimbursement will be based upon authorized and allowable expenditures, as outlined in this guide (see APPENDIX I), and be consistent with grant statement of work, project narratives, project budget details, and grant guidance. Payments may be withheld pending correction of deficiencies, or for the lack of supporting documentation.

Acceptable supporting documentation for proof of project expenses to include one of each of the following:

Proof of Purchase:

1. Invoices
2. Billing Statements only if it shows actual date(s) of service
3. Itemized receipts which detail what is being purchased.

Proof of Payment:

1. Bank Statements
2. Canceled checks
3. Credit Card Statements

Documentation for personnel expenses must follow Uniform Guidance 2 CFR 200.430(i) which requires salary and wage expenses to be based on records that accurately reflect the work performed. These records must:

1. Be supported by a system of internal control which provides reasonable assurance that the charges are accurate, allowable, and properly allocated;
2. Reflect the total activity for which the employee is compensated; and
3. Support the distribution of the employee's salary or wages (along with allowable fringe benefits) among specific activities or cost objective if the employee works on more than the specified Federal award cost center.

As required by Uniform Guidance (2 C.F.R. §200.415(a)), any request for payment under this Agreement must include a certification, signed by an official who is authorized to legally bind the Subrecipient, which reads as follows:

"By signing this report, I certify to the best of my knowledge and belief that the report is true, complete, and accurate, and the expenditures, disbursements and cash receipts are for the purposes and objectives set forth in the terms and conditions of the Federal award. I am aware that any false, fictitious, or fraudulent information, or the omission of any material fact, may subject me to criminal, civil or administrative penalties for fraud, false statements, false claims or otherwise. (U.S. Code Title 18, Section 1001 and Title 31, Sections 3729-3730 and 3801- 3812)."

### **Determination of Subrecipient vs Contractor**

Determination as to whether an entity is receiving federal funds as a Subrecipient or a contractor is found in 2 C.F.R. Part 200.331 and the below table.

SUBRECIPIENT	CONTRACTOR
<ul style="list-style-type: none"> <li>• Determines who is eligible to receive federal assistance</li> <li>• Has its performance measured according to whether the objectives of a federal program were met</li> <li>• Is responsible for program-related decision making</li> <li>• Must adhere to applicable federal program requirements specified in the federal award</li> <li>• Uses the federal funds to carry out a program for a specific public purpose as opposed to providing goods or services for the benefit of the pass-through entity</li> </ul>	<ul style="list-style-type: none"> <li>• Has a procurement relationship with the nonfederal entity</li> <li>• Provides goods and services within normal business operations and to many different purchasers</li> <li>• Provides goods or services that are ancillary to the operation of the federal program</li> <li>• Normally operates in a competitive environment</li> <li>• Isn't subject to the compliance requirements of the federal program as a result of the agreement (though similar requirements may apply for other reasons)</li> </ul>

### **Contract & Procurement**

Subrecipients must follow the procurement regulations contained in 2 C.F.R. Part §200.317-327 when purchasing goods or services with federal funds. If a Subrecipient has a purchasing policy that is at least as stringent as the federal regulations, it should be followed.

#### *General Procurement Standards (2 CFR §200.318)*

Subrecipients must maintain written contract and procurement policies that are consistent with state and local laws and regulations and the standards of this section, for the acquisition of property or services required under a Federal award or subaward.

Subrecipients must maintain oversight to ensure that contractors perform in accordance with the terms, conditions, and specifications of their contracts or purchase orders. The Subrecipient's procurement policies must include the following:

1. Conduct covering conflict of interest and governing of employees engaged in the selection, award, and administration of contracts;
2. Procedures to avoid unnecessary or duplicative items;
3. Regulation on awarding contracts only to responsible contractors possessing the ability to perform successfully under the terms and conditions of a proposed procurement;
4. Requirement to maintain records sufficient to detail the history or procurement, which should include: a. Rationale for the method of procurement, b. Selection of contract type, c. Contractor selection or rejection, and d. Basis for the contract price
5. The need for the Subrecipient to be responsible for the settlement of all contractual and administrative issues arising from the procurement.

#### *Competition (2 CFR §200.319)*

All procurement transactions for the acquisition of property or services required under a Federal award must be conducted in a manner providing full and open competition consistent with the standards of this section. When enlisting the help of a contractor to develop or draft specifications, requirements, statements of work, or invitations for bids or requests for proposals, those contractors must be excluded from

competing for those procurements. Unfair practices considered restrictive to competition should be avoided. Example of these include:

1. Placing unreasonable requirements on firms in order for them to qualify to do business;
2. Requiring unnecessary experience and excessive bonding;
3. Noncompetitive pricing practices between firms or between affiliated companies;
4. Noncompetitive contracts to consultants that re on retainer contracts;
5. Organization conflicts of interest;
6. Specifying on a "brand name" product instead of allowing "an equal" product to be offered and describing the performance or other relevant requirements of the procurement; and
7. Any arbitrary action in the procurement process

Subrecipients must prohibit the use of statutory or administratively imposed geographical preferences in the evaluation of bids or proposals.

Written procedures for procurement transactions must be maintained by the Subrecipient. These procedures must ensure that all solicitations include a clear and accurate description of the technical requirements for the material, products, or service to be procured. It must also identify all requirements which the offerors must fulfill and all other factors to be used in evaluating bids or proposals.

#### *Methods of Procurement (2 CFR §200.320)*

Noncompetitive procurements can be awarded in accordance with the following informal procurement methods to expedite the completion of its transactions and minimize the associated administrative burden and cost:

1. Micro-purchases – Acquisition of supplies or services in which the cost is less than the micro-purchase threshold
  - a. Federal micro-purchase threshold = \$10,000
  - b. Should distribute micro-purchases equitably among qualified suppliers when feasible
  - c. May be awarded without soliciting competitive price or rate quotations if the price is considered reasonable based on research, experience, purchase history, or other information and documents and files accordingly
  - d. Purchasing Cards may be used if the process is followed according to written procedures adopted by the Subrecipient
2. Small Purchases – Acquisition of supplies or services in which the total cost is greater than the micro-purchase threshold, but less than the simplified acquisition threshold
  - a. Federal simplified acquisition threshold = \$250,000
  - b. Price or rate quotations must be obtained from an adequate number of qualified sources as determined appropriate by the Town
  - c. The following formal procurement methods should be used when the value is greater than the simplified acquisition threshold (>\$250,000)
3. Sealed bids – Procurement method in which bids are publicly solicited and a firm fixed-price contract is awarded to the bidder that:
  - a. Confirms to the material terms and conditions
  - b. Is the lowest in price

Note: Sealed bids are preferred for construction contracts and must:

  - a. Have complete, adequate, and realistic specifications or purchase description
  - b. Have two or more responsible bidders that are willing and able to compete effectively – documentation of lack of bidders must accompany procurement documents
  - c. Lend itself to a firm fixed-price contract that can be awarded principally on bidders price
  - d. Be publicly advertised
  - e. Have a predetermined time and place where the bids will be opened that is publicly advertised
4. Proposals – method in which either a fixed price or cost reimbursement type contract is awarded.

- a. Must be solicited from at least 3 offerors
- b. Must be publicly advertised
- c. Contracts awarded to most advantageous proposal, considering price and other predetermined factors
- d. Can be used for architectural/engineering services

*Procurement and Contract Best Practices (2 CFR §200.321-322)*

When appropriate and reasonable the Subrecipient should provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States.

The Subrecipient should take affirmative steps to ensure that minority businesses, women's businesses, and labor surplus area firms are used when possible and should include the following steps:

1. Place these firms on the solicitation lists
2. These firms are solicited when they are potential sources
3. Divide total requirements, when economically feasible, into smaller tasks or quantities to encourage participation by these firms, except for projects that are subject to the public bidding process
4. Require prime contractors who use subcontractors to follow these affirmative steps when appropriate

*Contract Provisions for Non-Federal Entity Contracts Under Federal Awards (Appendix II, 2 CFR 200)*

All contracts by the Subrecipient must contain the following applicable provisions described below:

1. Contracts >\$10,000 must address termination for cause and for convenience by the Town including the manner by which it will be effected and the basis for settlement
2. Contracts >\$250,000 must address breach of contract issues including sanctions and penalties
3. All "federally assisted construction contracts" must include clause for Equal Employment Opportunity
4. All prime construction contracts >\$2,000 must include compliance with the Davis-Bacon Act and the Copeland "Anti-Kickback" Act
5. It is prohibited to procure or renew contracts on telecommunications and video surveillance services or equipment from Huawei Technologies or ZTE Corporation, including any subsidiary or affiliate of these entities
6. Contracts and subgrants >\$150,000 must contain a provision of compliance with the Clean Air Act and the Federal Water Pollution Control Act
7. Contractors that apply or bid for an award >\$100,000 must file the required certification in accordance with the Byrd Anti-Lobbying Amendment
8. If the Federal award meets the definition of "funding agreement", contracts entered into with small business firms or nonprofit organizations for the purpose of experimental, developmental, or research work must include provisions of "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements"
9. All contracts >\$100,000 that employ mechanics or laborers must include a provision for compliance with Contract Work Hours and Safety Standards Act
10. No contract shall be awarded to a contractor included on the federally debarred bidder's list.

The list of entities that are not allowed to do business with the Federal government can be found at <https://sam.gov/content/exclusions>

**Subrecipient Monitoring**

Subrecipients will be monitored by the Town in accordance with the Town of Warrenton Subrecipient Monitoring protocols. Each Subrecipient is assigned to a monitoring tier based on a risk assessment that takes into account project budget, Subrecipient capacity and other factors. Subrecipients will be notified of monitoring procedures and compliance deadlines.

For projects that involve Subrecipients passing funding to lower-level Subrecipients, original Subrecipients must develop an infrastructure to monitor those lower-level Subrecipients. The infrastructure must include

sufficient internal controls to ensure compliance with applicable regulations and must include a risk assessment consistent with the Federal program guidance. Subrecipient agreements between original Subrecipients and lower-level Subrecipients must contain all applicable regulatory requirements.

Monitoring of the activities of the Subrecipients is necessary to ensure that the subaward is used for authorized purposes and performance goals are achieved. Monitoring activities must include:

1. Review financial and performance reports
2. Follow-up of timely and appropriate actions of deficiencies identified by the pass-through entity or auditors
3. Management response to audit findings is provided to Subrecipient
4. Resolution of audit findings of the related subaward
5. Record the above monitoring steps are completed and must be available to be provided to external auditor upon request

Compliance with program requirements and achievement of performance goals may be facilitated through:

1. Training and technical assistance on program-related matters
2. On-site reviews of Subrecipient program operations
3. Verification of audit requirements of the Subrecipient

Compliance with program requirements and achievement of performance goals may be facilitated through:

1. Training and technical assistance on program-related matters
2. On-site reviews of Subrecipient program operations
3. Verification of audit requirements of the Subrecipient

***Grant Closeout (2 CFR §200.344)***

The Subrecipient must submit, no later than 90 calendar days after the end date of the period of performance, all financial, performance, and other reports as required by the terms and conditions of the Federal award.

Unless the Town authorizes an extension, the Subrecipient will liquidate all obligations incurred under the Federal award not later than 90 calendar days after the end date of the period of performance as specified in the terms and conditions of the Federal award.

The Subrecipient will promptly refund any balances of unobligated cash that the Federal awarding agency or pass-through entity paid in advance or paid and that is not authorized to be retained by the Town for use in other projects.

The Subrecipient will account for any real and personal property acquired with Federal funds received from the Town.

## APPENDIX I Eligible/Allowable Costs

Pursuant to 2 CFR § 200.403, costs must meet the following general criteria in order to be allowable as a charge against any Federal award:

1. Costs must be necessary and reasonable for the performance of the Federal award and be allocable to that award and not to a different award;
2. Costs must conform to any limitations or exclusions set forth in 2 CFR § 200 or in the Federal award as to types or amount of cost items;
3. Costs must be consistent with policies and procedures that apply uniformly to both federally-financed and other activities of the Subrecipient ;
4. Costs must be accorded consistent treatment;
  - a. A cost may not be assigned to a Federal award as a direct cost if any other cost incurred for the same purpose in like circumstances has been allocated to the Federal award as an indirect cost;
5. Costs must be determined in accordance with generally accepted accounting principles (GAAP);
6. Costs must be adequately documented

### **Necessary Costs**

Costs must be necessary expenditures of Federal funding in order to meet program objectives.

Unnecessary costs are those that are not required to achieve the objectives of the Subaward Agreement or not related to the program being implemented.

### **Reasonable Costs (2 CFR § 200.404)**

A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the decision was made to incur the cost. In determining reasonableness of a given cost, consideration must be given to:

1. Whether the cost is of a type generally recognized as ordinary and necessary for the operation of the non-Federal entity or the proper and efficient performance of the Federal award;
2. The restraints or requirements imposed by such factors as: sound business practices; arm's-length bargaining; Federal, state, local, and other laws and regulations; and terms and conditions of the Federal award;
3. Market prices for comparable goods or services for the geographic area

### **Allocable Costs (2 CFR § 200.405 AND § 200.406)**

A cost is allocable to a particular grant, Subrecipient Agreement, vendor contract, program or other cost objective if the goods or services involved are chargeable or assignable to that cost objective in accordance with relative benefits received. This standard is met if the cost:

1. Is incurred specifically for that cost objective;
2. Benefits both that cost objective and other work of the Subrecipient and can be distributed in proportions that may be approximated using reasonable methods; and
3. Is necessary to the overall operation of the Subrecipient and is assignable in part to the specified cost objective in accordance with Uniform Guidance.

Any cost allocable to a particular cost objective may not be charged to other Federal awards to overcome fund deficiencies, to avoid restrictions imposed by Federal statutes, regulations, or terms and conditions of the Federal awards, or for other reasons. However, this prohibition would not preclude the Subrecipient from shifting costs that are allowable under two or more cost objectives in accordance with existing Federal statutes, regulations, or the terms and conditions of the Federal awards.

If a cost benefits two or more projects or activities in proportions that can be determined without undue effort or cost, the cost must be allocated to the projects based on the proportional benefit. If a cost benefits two or more projects or activities in proportions that cannot be determined because of the interrelationship

of the work involved, then the costs may be allocated or transferred to benefitted projects on any reasonable documented basis.

Costs should only be charged net of all applicable credits. Applicable credits refer to those receipts or reduction-of-expenditure-type transactions that offset or reduce expense items allocable to the cost objective. Examples include:

1. Purchase discounts;
2. Rebates or allowances;
3. Recoveries or indemnities on losses;
4. Insurance refunds or rebates; and
5. Adjustments of overpayments or erroneous charges

To the extent that such credits accruing to or received by the Subrecipient relate to allowable costs, they must be credited to the Federal award either as a cost reduction or cash refund, as appropriate. These credits do not constitute program income.

#### **Activity Delivery Costs**

Direct costs are those costs that can be identified specifically with a particular cost objective and directly assigned to such activities relatively easily with a high degree of accuracy. Costs incurred for the same purpose in like circumstances must be treated consistently as either direct or indirect (F&A) costs.

Activity Delivery Costs are the costs of carrying out a specific program and providing a program benefit. Activity Delivery Costs include staff and consultant costs necessary to implement and carry out a specific program or cost objective.

#### **Federal Requirements for Treatment of Special Types of Costs**

Federal requirements place limitations on specific items of costs, including prohibiting certain costs from being charged to a federal award (notable examples include expenditures for lobbying, alcohol, and payment on uncollectable debts). These requirements are specific and enumerated in 2 CFR § 200.420 – § 200.475.

Subrecipients should review the following table of ALLOWABLE/UNALLOWABLE COSTS regarding costs and become familiar with them in order to carry out any Federal program. Note that this list is not an exhaustive list of costs. Please reference Uniform Guidance 2 CFR § 200.420 – § 200.475.

Category	Reference	Allowable Costs	Unallowable Costs
Advertising & Public Relations	§200.421	1) Advertising costs solely for: a) Recruitment of personnel required by the non-Federal entity for performance of a Federal Award b) Procurement of goods and services for the performance of a Federal award c) Disposal of scrap or surplus materials acquired in the performance of a Federal award	1) All advertising and public relations costs other than as specified in paragraphs (2) and (4) of this section; 2) Costs of meetings, conventions, convocations, or other events related to other activities of the entity, including: 3) Costs of promotional items and memorabilia, including models, gifts, and souvenirs; 4) Costs of advertising and public relations

		<p>d) Program outreach and other requirements of the Federal award</p> <p>2) Public Relations costs:</p> <p>e) Specifically required by the Federal award</p> <p>f) Communication with the public and press regarding specific activities or accomplishments</p> <p>g) General liaison duties to news media and government relations officers for public information</p>	designed solely to promote the non-Federal entity
Alcoholic Beverages	\$200.423	N/A	Unallowable as an entertainment expense
Audit	\$200.425	<p>1) A reasonably proportionate share of the costs of audits required by and performed in accordance with the Single Audit Act Amendments</p> <p>2) Financial Statement audit – indirect cost</p> <p>3) Pass-through entity charges for the cost of agreed-upon-procedure engagements to monitor subrecipients</p>	<p>1) Any costs when audits required by the Single Audit Act or other regulation have not been conducted or have been conducted but not in accordance therewith; and</p> <p>2) Any costs of auditing a non-Federal entity that is exempted from having an audit conducted under the Single Audit Act or other regulation because its expenditures under Federal awards are less than \$750,000 during the non-Federal entity's fiscal year.</p>
Bad Debts	\$200.426	N/A	1) Bad debts (debts which have been determined to be uncollectable), including losses (whether actual or estimated) arising from uncollectable

			accounts and other claims, are unallowable. 2) Related collection costs, and related legal costs, arising from such debts after they have been determined to be uncollectable are also unallowable.
Bonding	\$200.427	1) Bonding costs arise when the Federal awarding agency requires assurance against financial loss to itself or others by reason of the act or default of the non-Federal entity. 2) Costs of bonding required pursuant to the terms and conditions of the Federal award are allowable. 3) Costs of bonding required by the non-Federal entity in the general conduct of its operations are allowable as an indirect cost.	N/A
Compensation - personal services	\$200.430	Please reference Uniform Guidance §200.430 for all allowable & unallowable costs	Please reference Uniform Guidance §200.430 for all allowable & unallowable costs
Compensation - personal services	\$200.431	Please reference Uniform Guidance §200.431 for all allowable & unallowable costs	Please reference Uniform Guidance §200.431 for all allowable & unallowable costs
Conferences	\$200.432	As a sponsor or host to disseminate technical	Does not include

		information beyond the non-Federal entity and is necessary and reasonable for successful performance under the Federal award. May include: a) Facilities rental b) Speakers' fees c) Cost of meals & refreshments d) Local transportation e) Other incidental items	entertainment or alcohol costs
Consulting & Professional Services	\$200.459	Specialized services to assist in carrying out the Federal award, but the fee is not contingent upon recovery of cost by the Federal Government	Fees charged by employees or officers of the entity
Entertainment	\$200.438	Specific costs that might otherwise be considered entertainment that have a programmatic purpose and are authorized in the approved budget for the Federal award	Amusement, diversion, and social activities and any associated costs
Equipment & Other Capital Expenditures	\$200.439	1) Capital expenditures for special purpose equipment 2) Cost of equipment disposal if instructed by Federal agency	1) Capital expenditures for general purpose equipment, buildings, and land 2) Capital expenditures for improvements to land, buildings, or equipment which materially increase their value or useful life
Insurance	\$200.447	Insurance required or approved and maintained, pursuant to the Federal award	Actual losses which could have been covered by permissible insurance

Maintenance and Repair Costs	\$200.452	Costs incurred for utilities, insurance, security, necessary maintenance, janitorial services, repair, or upkeep of buildings and equipment (which neither add to the permanent value of the property nor appreciably prolong its intended life, but keep it in an efficient operating condition	Costs incurred for improvements which add to the permanent value of the buildings and equipment or appreciably prolong their intended life must be treated as capital expenditures.
Materials and Supplies Costs, including Costs of Computing Devices	\$200.453	Costs incurred for materials, supplies, and fabricated parts necessary to carry out a Federal award	N/A
Memberships, subscriptions, & professional activity costs	\$200.454	1) Membership in business, technical, & professional organizations 2) Subscriptions to business, professional & technical periodicals 3) Membership in civic or community organizations (with prior approval)	1) Membership in any country club, social or dining club or organization 2) Membership in organizations whose primary purpose is lobbying
Organization Costs	\$200.455	Prior Approval of Federal awarding agency required	Costs such as incorporation fees, brokers' fees, fees to promoters, organizers or management consultants, attorneys, accountants, or investment counselor
Plant & Security costs	\$ 200.457	Necessary and reasonable expenses incurred for protection and security of	N/A

		facilities, personnel, and work products	
Publication and printing costs	§ 200.461	Publication costs for electronic and print media, including distribution, promotion, and general handling	N/A
Rental costs of real property and equipment	§ 200.465	1) Rental costs under "sale and lease back" arrangements 2) Rental costs under "less-than-arm'slength" Leases 3) Rental costs under leases which are required to be accounted for as a financed purchase	The rental of any property owned by any individuals or entities affiliated with the non-Federal entity, to include commercial or residential real estate, for purposes such as the home office workspace
Telecommunication costs and video surveillance costs	§ 200.471 § 200.216	Telecommunications and video surveillance services or equipment such as phones, internet, video surveillance, cloud servers	Equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or subsidiaries)
Training and education costs	§ 200.473	Training and education provided for employee development	N/A
Transportation costs	§ 200.474	Freight, express, cartage, postage, and other transportation services relating either to goods purchased, in process, or delivered	
Travel costs	§ 200.475	Transportation, lodging, subsistence, and related items incurred by employees who are in travel status on official business of the non-Federal entity.	Costs of travel by non-Federal entity-owned, -leased, or -chartered aircraft

**APPENDIX II**  
**Documents & Forms**  
**Checklist to Determine Subrecipient or Contractor Classification**

INSTRUCTIONS: Complete Sections 1 and 2 which describe the characteristics that may be present in subrecipient and contractor relationships. The section with the greatest number of marked characteristics indicates the likely type of relationship. The substance of the relationship should be given greater consideration than the form of agreement between the prime recipient and the outside entity. Section 3 should be used to provide a written justification for determining the proper relationship classification. Maintain a copy of this form in the subaward or procurement file.

**DEFINITIONS FROM UNIFORM GUIDANCE (2 CFR, PART 200):**

**§200.86 Recipient**

Recipient means a non-Federal entity that receives a Federal award directly from a federal awarding agency to carry out an activity under a Federal program. The term recipient does not include subrecipients.

**§200.69 Non-Federal entity**

Non-Federal entity means a state, local government, Indian tribe, institution of higher education (IHE), or nonprofit organization that carries out a Federal award as a recipient or subrecipient.

**§200.92 Subaward**

Subaward mean an award provided by a pass-through entity to a subrecipient for the subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal Program. A subaward may be provided though any form of legal agreement, including an agreement that the pass-through entity considers a contract.

**§200.93 Subrecipient**

Subrecipient means a non-Federal entity that receives a subaward from a pass-through entity to carry out part of a Federal program; but does not include an individual that is a beneficiary of such program. A Subrecipient may also be a recipient of other Federal award directly from a Federal awarding agency.

**§200.22 Contract**

Contract means a legal instrument by which a non-Federal entity purchases property or services needed to carry out the project or program under a Federal award.

**§200.23 Contractor**

Contractor mean an entity that receives a contract as defined in §200.22 Contract.

NAME OF SUBRECIPIENT/CONTRACTOR ENTITY: \_\_\_\_\_

### SECTION 1- SUBRECIPIENT

Description: A subaward is for the purpose of carrying out a portion of a Federal award and creates a Federal assistance relationship between the recipient and the subrecipient. Subrecipients may have one or more of the following characteristics:

- 1. May determine who may be eligible to receive Federal assistance under the program guidelines.
- 2. Has its performance measured in relation to whether objectives of a Federal program are met.
- 3. Has responsibility for programmatic decision making.
- 4. In accordance with its subaward agreement (which may be in the legal form of a contract), the subrecipient uses the Federal funds to carry out a program for a public purpose specified in authorizing statute, as opposed to providing goods or services for the benefit of the recipient.
- 5. The subrecipient will not earn a profit under the agreement.
- 6. The subrecipient is required to contribute cash or in-kind match in support of the subaward.

### SECTION 2 - CONTRACTOR

Description: A contract is for the purpose of obtaining goods and services for the recipients own use and creates a procurement relationship between the recipient and the contractor. A contractor relationship may have one or more of the following characteristics:

- 1. Provides goods and services within normal business operations;
- 2. Provides similar goods or services to many different purchasers;
- 3. Normally operates in a competitive environment;
- 4. Provides goods or services that are ancillary to the operation of the Federal program; or
- 5. The entity may earn a profit under the contract.

### **FINAL DETERMINATION:**

SUBRECIPIENT  CONTRACTOR

### SECTION 3 - JUSTIFICATION

*In determining whether an agreement between a recipient and another non-Federal entity reflects a subrecipient or a contractor relationship, the substance of the relationship is more important than the form of the agreement. Considering the characteristics checked above, provide a written justification for the final determination of either a subrecipient or contracting relationship.*

## Subrecipient Information and Pre-Award Risk Assessment

This assessment is used to help determine a potential subrecipient's financial and management strength, which helps assess risk and dictates the monitoring plan for subrecipients. This assessment must be completed prior to entering into a subaward agreement. The Town of Warrenton may follow up with the potential subrecipient regarding the responses to this assessment.

**4. Do you certify that your organization or its employees related to this grant are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from participation in this transaction by any Federal or State department or agency?**

 Yes       No

**5. Does the Subrecipient organization have a negotiated Indirect Cost/F&A Rate from a cognizant Federal Agency?**

 Yes       No       10% De Minimis Rate (will be default)

(If yes, please attach a copy of your current rate agreement)

Name of Designated Federal Cognizant Agency: (if applicable): \_\_\_\_\_

**6. Has Subrecipient received an award or subaward to conduct programs similar to those covered under this proposed subaward agreement in the last two (2) fiscal years? If yes, provide a list of all such award or subawards.**

 Yes       No

**7. Was Subrecipient required to comply with the Single Audit requirements of the Uniform Guidance in the last two (2) fiscal years?** (Compliance with 2 C.F.R> Part 200 Subpart F required if Subrecipient expends \$750,000 or more in federal awards in a fiscal year).

Yes  No

**8. Have Subrecipient's financial statements been audited by an independent audit firm?** If yes, provide a copy of the statements for the most recent audit.

Yes  No

**9. If the answer to Questions 7 or 8 is yes, were there any findings or questioned cost in the last two (2) fiscal years?** If yes, please explain any finding or questioned costs with respect to an award or subaward to conduct programs similar to those covered by this proposed subaward agreement.

Yes (Attach separate explanation)  No

**10. Does Subrecipient have an accounting system that identifies the revenues and expenditures for each Agency program by funding source?**

Yes  No

**11. Does the accounting system provide for the recording of revenues and expenditures for each award by budget cost categories shown in the approved budget?**

Yes  No

**12. Is the Organization's accounting system automated (e.g., QuickBooks, Sage)?**

Yes  No

Please describe system or name of financial software package: \_\_\_\_\_

**13. Are all bank accounts reconciled monthly?**

Yes  No

**14. In the last 12 months, has Subrecipient implemented new or substantially changed systems related to its federal grant management?** If yes, please explain.

Yes (Attach separate explanation)  No

**15. In the last 12 months, has Subrecipient hired new senior management personnel (e.g., Executive Director/CEO, Finance Director/CFO) and or gram personnel who would be working on this proposed subaward? If yes, please explain.**

Yes (Attach separate explanation)       No

**16. Does Subrecipient have written policies and procedures that address the following?**

Pay Rates and Benefits

Yes

No

Time and Attendance

Yes

No

Purchasing/Procurement

Yes

No

Discrimination

Yes

No

Conflicts of Interest

Yes

No

Capitalization/Depreciation

Yes

No

17. Attachments: Please attach the following or check N/A if not applicable.			
	<u>Document</u>	<u>Attached</u>	<u>N/A</u>
a.	Form 990 or 990-EZ from the last two years, including Form 990-T and all supporting schedules and attachments	<input type="checkbox"/>	<input type="checkbox"/>
b.	Copies of audit reports and management letters received during the last two (2) fiscal years from Subrecipient's independent auditors (including all reports associated with a Single Audit pursuant to 2 C.F.R. Part 200, Subpart F)	<input type="checkbox"/>	<input type="checkbox"/>
c.	Copies of results from audits, examinations, or monitoring procedures performed during the last two (2) fiscal years on any direct federal award received by Subrecipient	<input type="checkbox"/>	<input type="checkbox"/>
d.	Indirect cost rate agreement	<input type="checkbox"/>	<input type="checkbox"/>
e.	List of all subawards to conduct programs similar to those covered under this proposed subaward agreement to Subrecipient from any funder during the last two (2) years	<input type="checkbox"/>	<input type="checkbox"/>

By its authorized signatory below, Subrecipient hereby certifies and attests to the accuracy of the above responses and all corresponding information attached.

---

---

---

---

### Overview

- American Rescue Plan Act ("ARPA") was signed into law in 2021 to provide support to state & local governments in recovering from COVID-19
- Under ARPA the Town is able to provide a subaward to another entity to carry out part of the program.
- This entity then becomes a subrecipient of the ARPA and is subject to all applicable laws and regulations as outlined in the Code of Federal Regulations (CFR), including ensuring subrecipients comply with the State and Local Fiscal Recovery Funds (SLFRF) statute, SLFRF Award Terms and Conditions, Treasury's interim final rule and final rule, applicable federal statutes, regulations, and reporting requirements.

2

---

---

---

---

---

---

---

---

### Subrecipient Monitoring

- Four main categories of responsibility throughout the term of the project:
  1. Subaward Identification
  2. Risk Evaluation
  3. Monitoring
  4. Closeout

3

---

---

---

---

---

---

---

---

### Subaward Identification

*Identify all parties and their obligations.*

- Entity must provide all required background information. Entity information must be verified against active SAM.gov registration.
- Entity must review and agree to all requirements to be imposed on subrecipients so that the Federal award is used in accordance with Federal statutes, regulations and the terms and conditions of the Federal award.
- Entity must review and agree to any additional requirements to be imposed on subrecipients for the Town to meet its own responsibility to the Federal awarding agency including identification of any required financial and performance reports.

4

4

---

---

---

---

---

---

---

---

---

---

### Subaward Identification

*Identify all parties and their obligations.*

- Entity must agree to the requirement that the subrecipient permit the Town and its auditors to have access to the subrecipient's records and financial statements as necessary for the Town to meet the requirements of the CFR. Reporting is completed on a quarterly basis.
- Entity must agree to appropriate terms and conditions concerning closeout of the subaward in a timely manner.

5

5

---

---

---

---

---

---

---

---

---

---

### Risk Evaluation

*Evaluate and conclude on risk of noncompliance to determine appropriate subrecipient monitoring.*

- Entity must provide detailed information to aid in risk evaluation including:
  - Prior experience with the same or similar subawards
  - Results of any previous audits including whether the entity received a Single Audit in accordance with § 200.500 and the extent to which the same or similar subaward has been audited as a major program
  - Details around new personnel or new or substantially changed systems
  - Internal control environment at the entity

6

6

---

---

---

---

---

---

---

---

---

---

### Risk Evaluation

Evaluate and conclude on risk of noncompliance to determine appropriate subrecipient monitoring.

- Based on the information provided the Town will evaluate and make conclusions on the entity's financial stability, quality of management systems, record in managing Federal awards, findings from audits performed, and ultimately, the applicant's ability to effectively implement statutory, regulatory, and other requirements.

7

7

---

---

---

---

---

---

---

---

---

---

### Monitoring

Ensure the subaward is used for authorized purposes, in compliance with Federal statutes, regulations, and the terms and conditions of the subaward.

- If a subaward is granted, the Town is required to monitor the use of the subaward funds throughout the course of the period of performance.
- Recordkeeping Requirements**
  - The Subrecipient shall maintain records, books, documents, and other materials relevant to the project. These records shall be subject to inspection, review, and audit by the Town or its designees, the State, and the Federal Awarding Agency for five (5) years following termination of the agreement.
  - If it is determined during the course of the audit that the Subrecipient was reimbursed for unallowable costs under the agreement the Subrecipient agrees to promptly reimburse the Town for such payments upon request.
  - If a Subrecipient is notified by the Town of Warrenton in writing, or if other applicable laws and regulations as described in 24 CFR 570.490 apply to a project, the record retention period may be extended. If any litigation, public information request, claim, or audit is started before the expiration of the record retention period, the records must be kept until the action has been fully resolved.

8

8

---

---

---

---

---

---

---

---

---

---

### Monitoring

Ensure the subaward is used for authorized purposes, in compliance with Federal statutes, regulations, and the terms and conditions of the subaward.

- Grant Reporting Requirements**
  - Subrecipients will submit a Project and Expenditures Report to the Town each quarter. The report will include detailed information on the status and progress by the Subrecipient in completing the work described in the Statement of Work and Approved Program Budget.
  - The report should also detail the expenditure of funds under the Subaward Agreement, in addition to any other information requested by the Town. Subrecipients should include any significant events or activities that occurred during the quarter. This report will also outline the status of the funds, show obligations, and receipts of program income, cash or in-kind contributions to the project, regardless of whether a local match is required.

Quarter	Period Covered	Due Date
1	January 1 – March 31	April 15
2	April 1 – June 30	July 15
3	July 1 – September 30	October 15
4	October 1 – December 31	January 15

9

9

---

---

---

---

---

---

---

---

---

---

# Closeout

*Final check subaward was spent within program timeline and regulations.*

- The entire subaward must be encumbered by the subrecipient no later than June 30, 2024.
- The entire subaward must be spent by the subrecipient no later than December 31, 2026.
- Subrecipient must undergo audit as required by Subpart F of this part when it is expected that the subrecipient's Federal awards expended during the respective fiscal year equaled or exceeded the threshold set forth in § 200.501.

**Hope Heals Foundation****501(c)(3)**

606 Falmouth Street - Suite A  
Warrenton VA. 20186  
[hopehealsfreestore@gmail.com](mailto:hopehealsfreestore@gmail.com)

August 22, 2023

Ms. Lyndie Paul  
[townmanager@warrentonva.gov](mailto:townmanager@warrentonva.gov)

Dear Ms. Paul,

We are interested in submitting our concept for future affordable housing for the underhoused in the town of Warrenton in response to the RFI on Affordable Housing released by the Town of Warrenton..

1. **Name of Submitting Organization:** Hope Heals Freestore : 501(c)(3) - 606 Falmouth Street - Suite A, Warrenton VA 20186
2. **Point of Contact:** Wally & Pat Smith - 540-347-7808; [wallyandpat@verizon.net](mailto:wallyandpat@verizon.net)
3. **Organization Overview:** Mission Statement

**Hope Heals Foundation is organized exclusively for charitable purposes. These purposes include:**

- Distribution of household goods at no charge
- Distribution of clothing for adults and children at no charge
- Distribution of food items at no charge
- To expand into providing affordable permanent and transitional housing for individuals that are underhoused in our community

**Hope Heals Foundation Mission Statement:**

At Hope Heals Community Freestore our dream is a community built on relationships based on mutual aid and cooperation. Our mission is to provide an uplifting and empowering place where people can freely give and receive clothing and other essential items for the purpose of meeting the needs of our community and connecting people. Our hearts are to see lives forever changed through not only the giving of clothing and household items, but also through mentorship, relationship, and love. Love is free. Love is a gift. Love changes everything.

The Hope Heals Freestore ([hopehealsfreestore.com](http://hopehealsfreestore.com)) has been distributing free clothing, linens, baby gear & toys (during the Toy Giveaway at Christmas) in Warrenton for over 3 years and serves approx. 25,000 people each year from Warrenton and the surrounding area. During our hours of operation, we connect with people who are currently unsheltered, living in their cars or the woods or spending the majority of their nominal, and often fixed income staying in one of 4 motels we have in Warrenton or just outside of town (Rip Van Winkle Motel, Jefferson Motel, Red Roof Inn or Fauquier Motel just outside of town).

**4. History in Warrenton:** Among the long term volunteers at Hope Heals Foundation we have decades of experience serving the underhoused in Warrenton. Here are a few examples:

-Wally and Pat Smith, who from 1994 - 2008 owned and operated the Upper Room housing ministry at 61 Main Street for men coming out of jail, the shelter and the woods. Up to 6 men at a time were in a program to learn basic life-skills such as: hygiene, shopping/cooking/nutrition, finances, etc. Many apprenticed and received a stipend in God's Handiwork; a ministry led by men in our community that did home repairs for members of our community that needed affordable help.

-Wally and Pat Smith also owned and operated a 3 floor townhouse for families in need of shelter. The same program to learn essential life skills was implemented.

-Multiple families who served beside the Fauquier Community Coalition by organizing and implementing multiple critical home repair projects for those who cannot afford it.

-A family who served beside Christ In Action to respond to the 2017 tornado damage in Warrenton to help residential property owners who couldn't otherwise afford the repairs.

-Wally Smith is the Warrenton Police Chaplain, and organizes the Pastor/Police Coalition quarterly and is Senior Hospital Chaplain.

#### **5. Concept: Develop a Tiny Home Village (Hope Heals Village or HHV)**

The HHV concept involves creating a community of tiny homes within the town of Warrenton. The tiny homes would be designed to provide affordable housing options for various segments of the population, including the homeless, low-income individuals and families, seniors, and veterans. The village would be designed to promote a sense of community and provide necessary amenities such as communal spaces, gardens, and recreational areas. The tiny homes would be built using sustainable and cost-effective materials to keep construction and maintenance costs low. The village could be located on a plot of land owned by the Town of Warrenton, potentially utilizing the land contributions mentioned in the RFI.

We are eager to start **Hope Heals Village (HHV)** for the underhoused in Warrenton. After extensive and continuous research across the U.S. we believe that a gated tiny home village community and program with 2 sizes of cabins (96 sq. ft and 399 sq. ft) is a highly effective solution with a proven track record in other communities. It's proven that by giving a person a roof over their head and a secure place to sleep, their bodies are no longer in survival mode and they are able to thrive. Dignity is the solution to poverty and community is the solution to homelessness. Currently most are living in isolation.

The residents living in the HHV would have 3 months to 3 years to be in the transitional neighborhoods, and help to secure permanent housing. Potential residents would be required to sign a misconduct contract before moving into the Village that would mean inappropriate behavior would lead to removal.

Amenities in the Village will include: a community center in the middle of the Village for administrative offices/mental health appointments/first aid, large kitchen/dining area with doors that open up to outside dining where meals are eaten together, room for ping pong, board games, library books, etc.

There will be paid positions available in the Village such as yard work, child care, maintenance, etc. for those that are unable to find a job in town because they don't have proper identification (we will have a group of people to help get their ID's restored) or the physical means.

Depending on the size of the tiny home, residents will pay \$200.00 - \$400.00 for rent, electricity, Wi-Fi, etc. Our team at HHV will help manage their finances to facilitate savings for their future. The reduced cost in living, coupled with the life skills training program and potential employment at the Village helps prepare our community's citizens for stable employment, future long term housing, and financial fortitude.

Hope Heals Village will be governed by vetted members of our community with a proven track record of responsibility and a desire to serve the underhoused in Warrenton. They will vote together on approving HHV applicants based on a standard application process. An extensive background check will be done for people applying to live in the community. There will be a playground for children, community garden, restroom/bath/laundry house for some neighborhoods (clusters) that don't have indoor facilities.

## **6. Constituency: Targeted Housing Segments**

Hope Heals Village will cater to multiple housing constituencies, including the homeless, those on disability, low-income individuals and families, seniors, and veterans. By providing a range of housing options within the village, it would be possible to address the diverse needs of these different groups.

## **7. Dependencies: Critical Factors for Implementation**

- Zoning Changes: The Town of Warrenton may need to consider creating zoning overlays or revising existing zoning regulations to accommodate the development of the tiny home village.
- Financing: The concept would require financing from various sources, including private investment, grants, capital campaigns (which have already started), local churches, and potentially utilizing the initial investment funding designated by the Town of Warrenton.
- Infrastructure: Adequate infrastructure, such as water and sewer connections and electricity, would need to be in place to support the tiny home village.

## **8. Outcomes and Benefits:**

- Increased Affordable Housing: The tiny home village would provide affordable housing options for individuals and families who may otherwise struggle to find suitable housing in Warrenton.
- Community Development: The village would foster a sense of community and provide opportunities for social interaction and support among residents.
- Sustainable and Cost-Effective: Tiny homes are often more energy-efficient and require fewer resources to build and maintain, making them a sustainable and cost-effective housing solution.

We have several village models that we are investigating. In late August our team will be touring Community First Village in Austin, TX, one of the largest tiny house village/communities in the U.S. with over 500 homes. We are also studying a program called Eden Village in Springfield, MO.

Our team has been researching housing/programs like this throughout the nation to find out what they do to succeed and serve the underhoused. For suggestions, please refer to: [edenvillageusa.org](http://edenvillageusa.org) and Community First! Village ([mlf.org](http://mlf.org) - Mobile Loaves & Fishes)

Hope Heals Village will be a safe, supportive place where residents can overcome trauma, begin to address the issues that led to financial distress or homelessness, and build their support network. Having a place to call your own gives:

- A sense of belonging, safety, security, personhood, and ownership
- Improves the psyche; not living in danger out in public
- Fulfills the longing for social interaction and acceptance
- Camaraderie with people who have experiences with similar issues of homelessness and financial distress
- Mental health/medical services
- Offers shared dinners, social events, gatherings, and more.

## 9. Financing:

The financing for the tiny home village will be a combination of private investment, grants from organizations focused on affordable housing, and potentially utilizing the initial investment funding designated by the Town of Warrenton.

Our capital campaign will include reaching out to the 80 - 106 churches in Warrenton and Fauquier County, and beyond by passing out cards with a list of needs including: community developers/designers, excavators, carpenters, decorators, donations, etc.

Also pointing them to a website that we will create where they can find the information about the project. The grant writer on our team will go in search of funds available from such places as: Grants.gov, PATH Foundation, HHS.gov, and many more. Many of the generous supporters of Hope Heal Freestore are eager to help with our desperately needed Hope Heals Village. We would also hope to enlist the aid of The Fauquier Times to get the word out to our town and county residents.

Divorce, domestic abuse, losing a job, and mental illness can be just some of the reasons for losing housing. Loss of family, home and community are catastrophic and often a reason for homelessness and financial distress. This sends people down a path they are unable to get out of by themselves. But together as a community we can provide love, acceptance and an opportunity to rise out of destitution. Everyone has value no matter who they are. Thank you so much for your time and consideration in this matter.

“The greatest disease in the West is not contracting leprosy or the result of being strangled by an umbilical cord, it is being unwanted, unloved, and uncared for. America can cure or treat many physical diseases with medicine, but the only cure for loneliness, despair, and hopelessness is love.” -Alan Graham, founder of Mobile Loaves and Fishes and Community First Village

## Town of Warrenton Request for Information – Affordable Housing

**1.Submitting Organization:** Fauquier County NAACP

**2.Point of Contact:** Housing Committee Chair – Miggy Strano [naacpfauquierco.housing@gmail.com](mailto:naacpfauquierco.housing@gmail.com),  
Fauquier County NAACP President – Conway Porter [naacpfauquiercounty@gmail.com](mailto:naacpfauquiercounty@gmail.com)

**3.Organization Overview:** The mission of the National Association for the Advancement of Colored People (NAACP) is to secure the political, educational, social and economic equality of rights in order to eliminate race-based discrimination and ensure the health and well-being of all persons.

The function of the Fauquier NAACP Housing Committee is to study housing conditions in the community, receive and seek to address complaints of discrimination, oppose all restrictive practices whether public or private, and disseminate information and render such other assistance which may eliminate discrimination in housing.

4. The Housing Committee studied both the Town of Warrenton Comprehensive Plan and Fauquier County Comprehensive Plan’s Housing section and provided extensive feedback on each. The Committee has a representative that serves on the Foothills Housing Network Steering Committee. They also reviewed and provided feedback on the Rappahannock-Rapidan Regional Commission’s Regional Housing Study. The committee has held webinars and in person events on Homeownership and Tenants Rights for the community in partnership with regional and local organizations. The Fauquier branch developed a Housing Resources and Advocacy page for the community which can be found here. <https://www.naacpfauquiercounty.org/housing-resources>

The committee has also communicated to Town and County Staff, council members, Mayor, and supervisors on several occasions regarding housing issues. They developed a video highlighting the history and issues here under the section Housing Committee Spotlight: <https://www.naacpfauquiercounty.org/housing-advocacy>

5. Concept:

Since the Town Comprehensive plan was adopted in 2021, the Fauquier County NAACP Housing Committee has been advocating for a Town/County Housing Committee to be formed. When providing feedback on the Comprehensive plan which included identified housing gaps, town staff indicated that a housing committee would be tasked with closing these gaps.

A standing housing advisory committee would provide continuity, accessibility, and accountability regarding housing initiatives and issues.

- Continuity would be achieved even when council members and staff change, and when priorities shift. Example, when the Amazon data center SUP shifted the majority of the council’s focus away from other initiatives.

- Access would be achieved by providing the community – private citizens, non-profits and businesses one focal point for housing initiatives and issues. Example, when a non-profit has a proposal they can go to the standing advisory committee.
- Accountability would be achieved by ensuring proposals are followed up on, funding evaluated, and the appropriate input collected before making decisions, example: ARPA fund allocation, county/town owned land designation, and zoning ordinance updates.

As an example, here is the Charlottesville Standing Housing Advisory Committee’s objectives:

(More information can be found here, including the member types that sit on the committee:  
<https://www.charlottesville.gov/975/Housing-Advisory-Committee>)

*Purpose*

*The purpose of the HAC shall be:*

- a. to advise the City Council as to affordable housing needs that are not being served within the City of Charlottesville,*
- b. recommend ways to encourage the for-profit housing sector to provide a variety of affordable housing opportunities,*
- c. advise City Council as to the need to improve or delete existing programs, support, or assistance,*
- d. advise City Council on the potential for regional, inter-jurisdictional cooperation in affordable housing programs*

In summary, we are requesting that the Town of Warrenton with Fauquier County form a standing housing advisory committee with representation from for-profit, non-profit, citizen and county/town staff.

6. All

7. N/A

8. Detailed in #5 above.

9. There might be Staff time needed to assist the committee. But since there are other standing committees, this should be business as usual regarding resource estimates/allocation.

---

*Protecting and restoring the lands and waters of the Virginia Piedmont,  
while building stronger, more sustainable communities.*

Concept Paper: Affordable Housing  
Town of Warrenton

The following is a response to the Request for Information (henceforth, "RFI") posted on the Town website August 11, 2023, whose stated purpose is to assist the town with how "Warrenton, a Town of 10,000 citizens on the edge of Northern Virginia, can begin to find solutions to many of the same housing issues nationwide. Affordable housing is essential for our citizens to thrive and prosper". (Town of Warrenton Request for Information on Affordable Housing, section 1.0)

The Piedmont Environmental Council (henceforth "PEC") concurs that providing for affordable housing involves a complex web of issues, and that housing affordability is crucial to make our communities function well. PEC has invested in multiple small and mid-sized communities in our region to revitalize neighborhoods by providing recreational access for residents and to improve people's access to affordable housing and we recognize the government's role as a partner, along with philanthropy and private investment, in making a range of housing options attainable. It seems prudent for the Town to consider a range of ways it may be supportive of this and other efforts to improve access to affordable housing in the Town of Warrenton via a broad spectrum of housing options, be they for the unhoused, temporary or transitional, income challenged, elderly, disabled, veterans, or other persons and groups for whom market-based solutions have not kept pace with demand.

Given the timeframe for the response to the RFI, our proposals are necessarily broad, but we hope they will be of service in stimulating discussion, of which we look forward to being a part.

We have organized our response into the format set forth in Section 4.0 of the Town's RFI . We note that for the purposes of all of our responses, we are assuming that the Town of Warrenton would not be the owner of any of the affordable solutions we propose; in most cases it could be, but we are assuming either private non-profit or private market-based ownership, and in most cases, either rental or owner-occupied solutions are interchangeable (except in the cases of housing for the unhoused, for temporary or transitional populations, for which there is unlikely a market response, either). However, as we propose multiple concepts, we have taken the liberty of organizing the responses sought for each concept (numbers 6-9 in the RFI), as responses to 5 A-H.

1. The Piedmont Environmental Council  
45 Horner Street  
Warrenton, VA 20188

2. John W. McCarthy, Senior Adviser and Director of Strategic Partnerships

3. PEC was formed in 1972 and we work to protect and restore the lands and waters of the Virginia Piedmont, while building stronger, more sustainable communities. We maintain offices in Charlottesville and Orange in addition to our headquarters in the Town of Warrenton. We have a staff of approximately 50 employees amongst whom are attorneys, land use planners, GIS mapping specialists and a variety of other disciplines that afford us insights into the issues set forth in the RFI

4. We have been proud to be a supporter of various Habitat for Humanity affiliates throughout our nine county service area, but in particular have been intentional collaborators with the Fauquier Habitat for Humanity on their Haiti Street Neighborhood Revitalization Project in community clean up projects, native planting projects involving landscaping around new homes, and in a variety of other areas. We also have worked with Windy Hill Foundation on a variety of affordable housing projects in Fauquier and Loudoun counties, and have collaborated with them and other organizations on housing studies. We have likewise been involved in pedestrian walkability studies in several communities in our area, most recently in Remington, which had as their focus the provision of safe connectivity between affordable housing and recreation opportunities

PEC has a staff member on the Virginia Statewide Community Land Trust which was created to maintain participating Habitat for Humanity affiliates' stewardship of affordable housing property.

5.

A. Donation to private, non-profit housing groups of suitable vacant town-owned properties

A.6 The donation of land could be responsive to a variety of affordable housing constituencies, but will most likely be of assistance to low-moderate income persons (80% AMI or less) but at some level, all target groups might benefit, depending upon the type of housing deemed appropriate for the donated land. The possibility exists that land in commercially zoned areas could include mixed use potential

A.7 For mixed use developments with low-moderate income reserved housing, both land subsidy (donation of land) and additional zoning density bonuses may be needed to induce market response

A.8 The implicit subsidy of land access jump-starts the process of development and acts as a subsidy for the creation of non-market based priced units. The opportunity exists for such a donation to also act as leverage for governmental or philanthropic support and a mixed use development would entail benefits from breaking up concentration of housing and integration into the fabric of the community

A.9 A combination of market and philanthropic support to develop units with potentially an alternate income stream from commercial/office mixed uses in addition to rental from units. In addition, donated property could be used as leverage for other grants and support

**B. Preservation of existing private-non-profit owned affordable housing stock through the rehabilitation of existing units**

**B.6** A range of affordable housing constituencies would benefit by the ownership of such units in private, non-profit hands when conditioned on continued access by target populations

**B.7** Access to capital. In addition, we have learned that neighborhood improvement efforts such as access to recreational opportunities and pedestrian access improvements can have the deleterious effect (to housing access) of increasing valuations of the units outside the price capacity of target populations. Private non-profit hands would help to forestall this loss of stock.

**B.8** Preservation of existing stock rather than allowing gentrification. The market based response to depressed housing valuation often is its acquisition, improvement and conversion to rental or ownership by non-target populations.

**B.9** Public (both the Town, County, State and Federal programmatic funds) as well as philanthropic donations to support rental or sale

**C. Supported acquisition of existing affordable housing stock that is privately owned through low or no-interest loans to affordable housing groups capable of administering rehabilitation of such units**

**C.6** (same as B.6, above)

**C.7** (same as B.7, above)

**C.8** (same as B.8, above)

**C.9** (same as B.9, above)

**D. Creation of a Work Force Housing Fund**

**D.6** Likely most impactful for young professionals at upper end of low-moderate income ranges

**D.7** Capital could accrue through general fund appropriations from the Town or through dedication of tax increment financing from improvements valuation on mixed use or other identified types of development. In addition, local employers could be incentivized to contribute (tax credits or other means) if fund were created to target local residents/employees

**D.8** Increasing tie to local community for employees, limiting commute time and traffic loading by reduction of commuting, providing an on-boarding for continuum of housing options

**D.9** Fund could be used for subsidy for rental or subsidized financing for acquisition

**E. Explore zoning changes allowing ADUs (Accessory Dwelling Units) by right in residential zoning categories**

**E.6** Most Target constituencies other than unhoused and temporary or transitional

**E.7** Most particularly, zoning changes. The reality of many HOA restrictions may limit impact

**E.8** Immediate opportunity to house upon property owner's need for same for family, and others; need to assess need for restriction against temporary rental occupancy (AirBnB, VRBO, etc.)

**E.9** Private

F. Assess opportunity to allow adaptive reuse of existing structures and properties that could accommodate multi-family uses and facilitate through zoning either by-right or with minimal special permitting standards

F.6 upper end of low-moderate income is likeliest beneficiary, but more density would allow broader impact

F.7 Zoning provisions would need to accommodate

F.8 Largely preservative of existing built environment, conversion of existing development preservative of "greenfield" elsewhere, and is often already served by adequate infrastructure

F.9 Private, but density required might allow for creation of permanent (30 year) affordable stock through restrictions

G. Assess allowing multi-family uses by right in areas designated for "Live Work Play" in the 2040 Comprehensive Plan

G.6 Range of low-moderate income wage earners likely mixed in with market rate units

G.7 Zoning provisions would need to accommodate; potentially a density bonus if included

G.8 Would allow redevelopment and advancement of comp plan goals for areas needing reinvestment

G.9 Private and perhaps non-profit, and governmental subsidy

H. Implement cost saving energy efficiency standards and take advantage of federal and potential state funding (from GGRF's Solar for All program) to install solar on all new affordable housing construction.

H.6 All

H.7 Zoning and perhaps tax code revisions (exemptions for solar, etc.)

H.8 Improves affordability of all units and demographics by reducing utility costs

H.9 Public, Private, mixed-part of project financing

Town of Warrenton  
Response to Request for Information on Affordable Housing  
Submitted by Hero's Bridge

**1. Name of Submitting Organization and address of Submitting Organization**

Hero's Bridge  
98 Alexandria Pike, Suite 41  
Warrenton, Virginia 20186

**3. Organization Overview: Describe your organization: mission, purpose, size and expertise.**

***Mission*** - Hero's Bridge is the only 501(c)(3) organization in Virginia (and in the country) dedicated to serving aging veterans, 65 and older. We are also the only non-profit organization providing rapid and direct hands-on assistance to aging veterans who are estimated to be about 25% of the senior population.. We serve, stand by and honor our aging veterans through four distinct programs. These programs include access to food, home repair for safe and adequate housing, and socialization to offset isolation in addition to assisting with access to VA and other benefits. These services are available to our heroes whenever they call home, at no expense to them or their families. In 2022, we provided the following tangible services to area seniors:

540 Battle Buddy Visits  
11 seniors provided emergency financial support for utilities, rent, heating oil, electric  
47 Home Front home repairs  
194 rides to appointments  
503 home delivered ready-to-eat meals  
60 weeks of senior technology tablets in homes  
69 Paw Patrol visits  
193 care packages  
58 new volunteers  
2,101 volunteer hours

Hero's Bridge was founded and is still led by Molly Brooks. As a Gerontological nurse with 30 years of experience, from a medical perspective, she embodies all of the qualifications necessary to care for our aging veterans. Molly is uniquely positioned to continue guiding this organization into the successful and impactful community resource it is today. Supporting Molly is a strong board of directors with more than 50 years of military experience. Her staff of 5 full time and 3 part time team members are all veteran centric individuals dedicated to fulfilling any veteran need with their diverse backgrounds in nursing, journalism and an above average understanding of the military and its culture. Last, but certainly not least, is our resourceful and energetic volunteer base of 392 individuals.

**4. History in Warrenton and Fauquier County: Describe if you have done or done any business or non-profit work related to housing in the Town of Warrenton and Fauquier County.**

Hero's Bridge was founded seven years ago to address social determinants of health in aging veterans. Because of the work we had been doing on the ground as health care workers, we knew some of our seniors were living in substandard living conditions. To be honest, we were not expecting to see the problem rapidly become the #2 problem for which we received referrals. Very quickly, we began receiving requests to assist areal veterans with major home repairs and modifications. We consistently receive referrals to help senior veterans find more affordable rentals and find emergency lodging for homeless veterans. One important accomplishment we achieved in the first two years was identifying funding and to better collaborate with other nonprofits in the housing space. Funders and housing repair nonprofits appreciate our special ability to connect and build trust with the seniors who previously would reject efforts to remediate their substandard living conditions. In 2022, we provided 47 home repairs and modifications.

**5. Concept: Describe your concept for increasing affordable housing in Warrenton.**

It is vital that we diversify the housing stock in our area. The most recent in depth Regional Housing Study performed by the Rappahannock-Rapidan Regional Commission indicated that about 90% of existing housing in our region are larger single-family homes not affordable nor livable for our seniors. The study stresses the need for senior housing, particularly apartments, small cottages and single-story units that are accessible to the changing mobility needs of an older population, and with less overall home maintenance.

To help solve this problem, the Hero's Bridge Village will consist of 44 rental units which are approximately 560 square feet. The units are L-shaped duplexes placed together in a U-shaped fashion to maximize socialization. The units have a kitchen, living area, bedroom and full bath. As rentals they will come completely furnished including appliances, furniture and linens in order to provide a low barrier to entry. It will have pedestrian-only walkways to encourage activity and interaction within the community. The community will be walkable and zero step entry. We plan to bundle water, electric, trash service into the price of the rent. Please see attached site layout, unit floor plans and elevations.

We also looked closely at the supports built into the Hero's Bridge Village because housing only solves part of the issue, it is crucial that all the Villagers' social needs are addressed as well. Our pocket neighborhood will have a community center to promote socialization and provide vital supportive services. Communities used to struggle to figure out how to get seniors to vital services. Covid caused some positive disruption in these services and it is much more feasible to bring the services to the seniors. Groceries and medications can be ordered online and delivered easily. Many medical and counseling visits can occur via telehealth. Our organization already provides extensive transportation assistance to our rural veterans and looks forward to continuing this service to our Villagers. With intention, we plan to house a diverse mix of senior veterans. There will be a mix of senior veterans of differing abilities and talents and they will be invited to be a vital part of the thriving community. We are certain that this innovative model of pocket communities is the perfect solution to caring for our 'missing middle' seniors.

**Constituency: Describe what housing constituency your concept will help. For example, does your concept help those who are chronically homeless? Does it help those at the 80% AMI?**

The Hero's Bridge Village will be open to veterans aged 65 and older, therefore it offers 44 units of affordable housing for five of the Town's target populations- **seniors, veterans, disabled, income challenged and homeless**. Any veteran aged 65 or older will be eligible to live at the Village and rents will be on a sliding scale basis according to their AMI category. Priority will be given to veterans who are:

Living in social isolation  
 Very low income  
 Currently living in unsafe or unsanitary conditions  
 From our local area

The Hero's Bridge Village would serve veteran senior citizens who often fall through the cracks of a fragmented social care system. Unfortunately, many of our veterans' issues are so severe that their situations cannot be remediated where they are. Many are "elder

orphans” with no living family to help them as they get older. They need what we call the “missing middle” level of care. Able bodied enough to not qualify for institutional care but not well enough to be completely on their own. These seniors also fall in an unfortunate financial middle, making just enough in social security to not qualify for the safety net programs but certainly not enough to afford assisted care which ranges \$3,000 to \$8,000 per month in our area. Fauquier County’s safety net senior housing currently has a two-year wait list. We must increase the housing stock available to our seniors.

**6. Dependencies: Define any critical dependencies for your concept to come to reality. Examples include zoning changes, financing, and infrastructure.**

We will be requesting a rezoning from R-10 to R-PUD. We will also be requesting exceptions within the R-PUD zoning such as acreage requirements and the requirement to place each unit on individual lots. Flexibility in these exceptions will be crucial to bringing this innovative pocket community to fruition.

Fast tracking of the rezoning process will also be very helpful. Projects of this size inevitably hit unexpected complications and the more nimble we can be while still following all steps with integrity and transparency will help create safe, affordable units as soon as possible.

Consideration in reducing construction costs by waiving water and sewer hookup fees will be greatly appreciated and contribute to the effort to keep rents deeply affordable. Consideration of waiving real estate taxes on the property would also contribute to affordable rents.

Lastly, allocation of any portion of the remaining ARPA funds would be very helpful as we move from the feasibility phase to pre-development.

**7. Outcomes: Describe the outcomes and benefits of your concept.**

The most obvious outcome is the creation of 44 affordable housing rental units with permanent supportive services for seniors that served our country. Projects that focus on rehabbing or creating 1-4 units are not unimportant but will not move the needle on the housing crisis we are facing.

A less obvious benefit is that the creation of 44 units to the area housing stock will serve as a pressure relief valve on the local housing market. Because preference will be given to local veterans, we can assume that many of these senior veterans will be vacating single family homes that they can no longer maintain which can then be bought or rented by the workforce population. They may also vacate senior apartments that can now be available to other non-veteran seniors.

Lastly, this project is an innovation that we feel will be an example of a community working together to address affordable housing issues. With its pocket community concepts, aging in place considerations and supportive services it will be a community the Town of Warrenton can be proud of and display as an example to other communities.

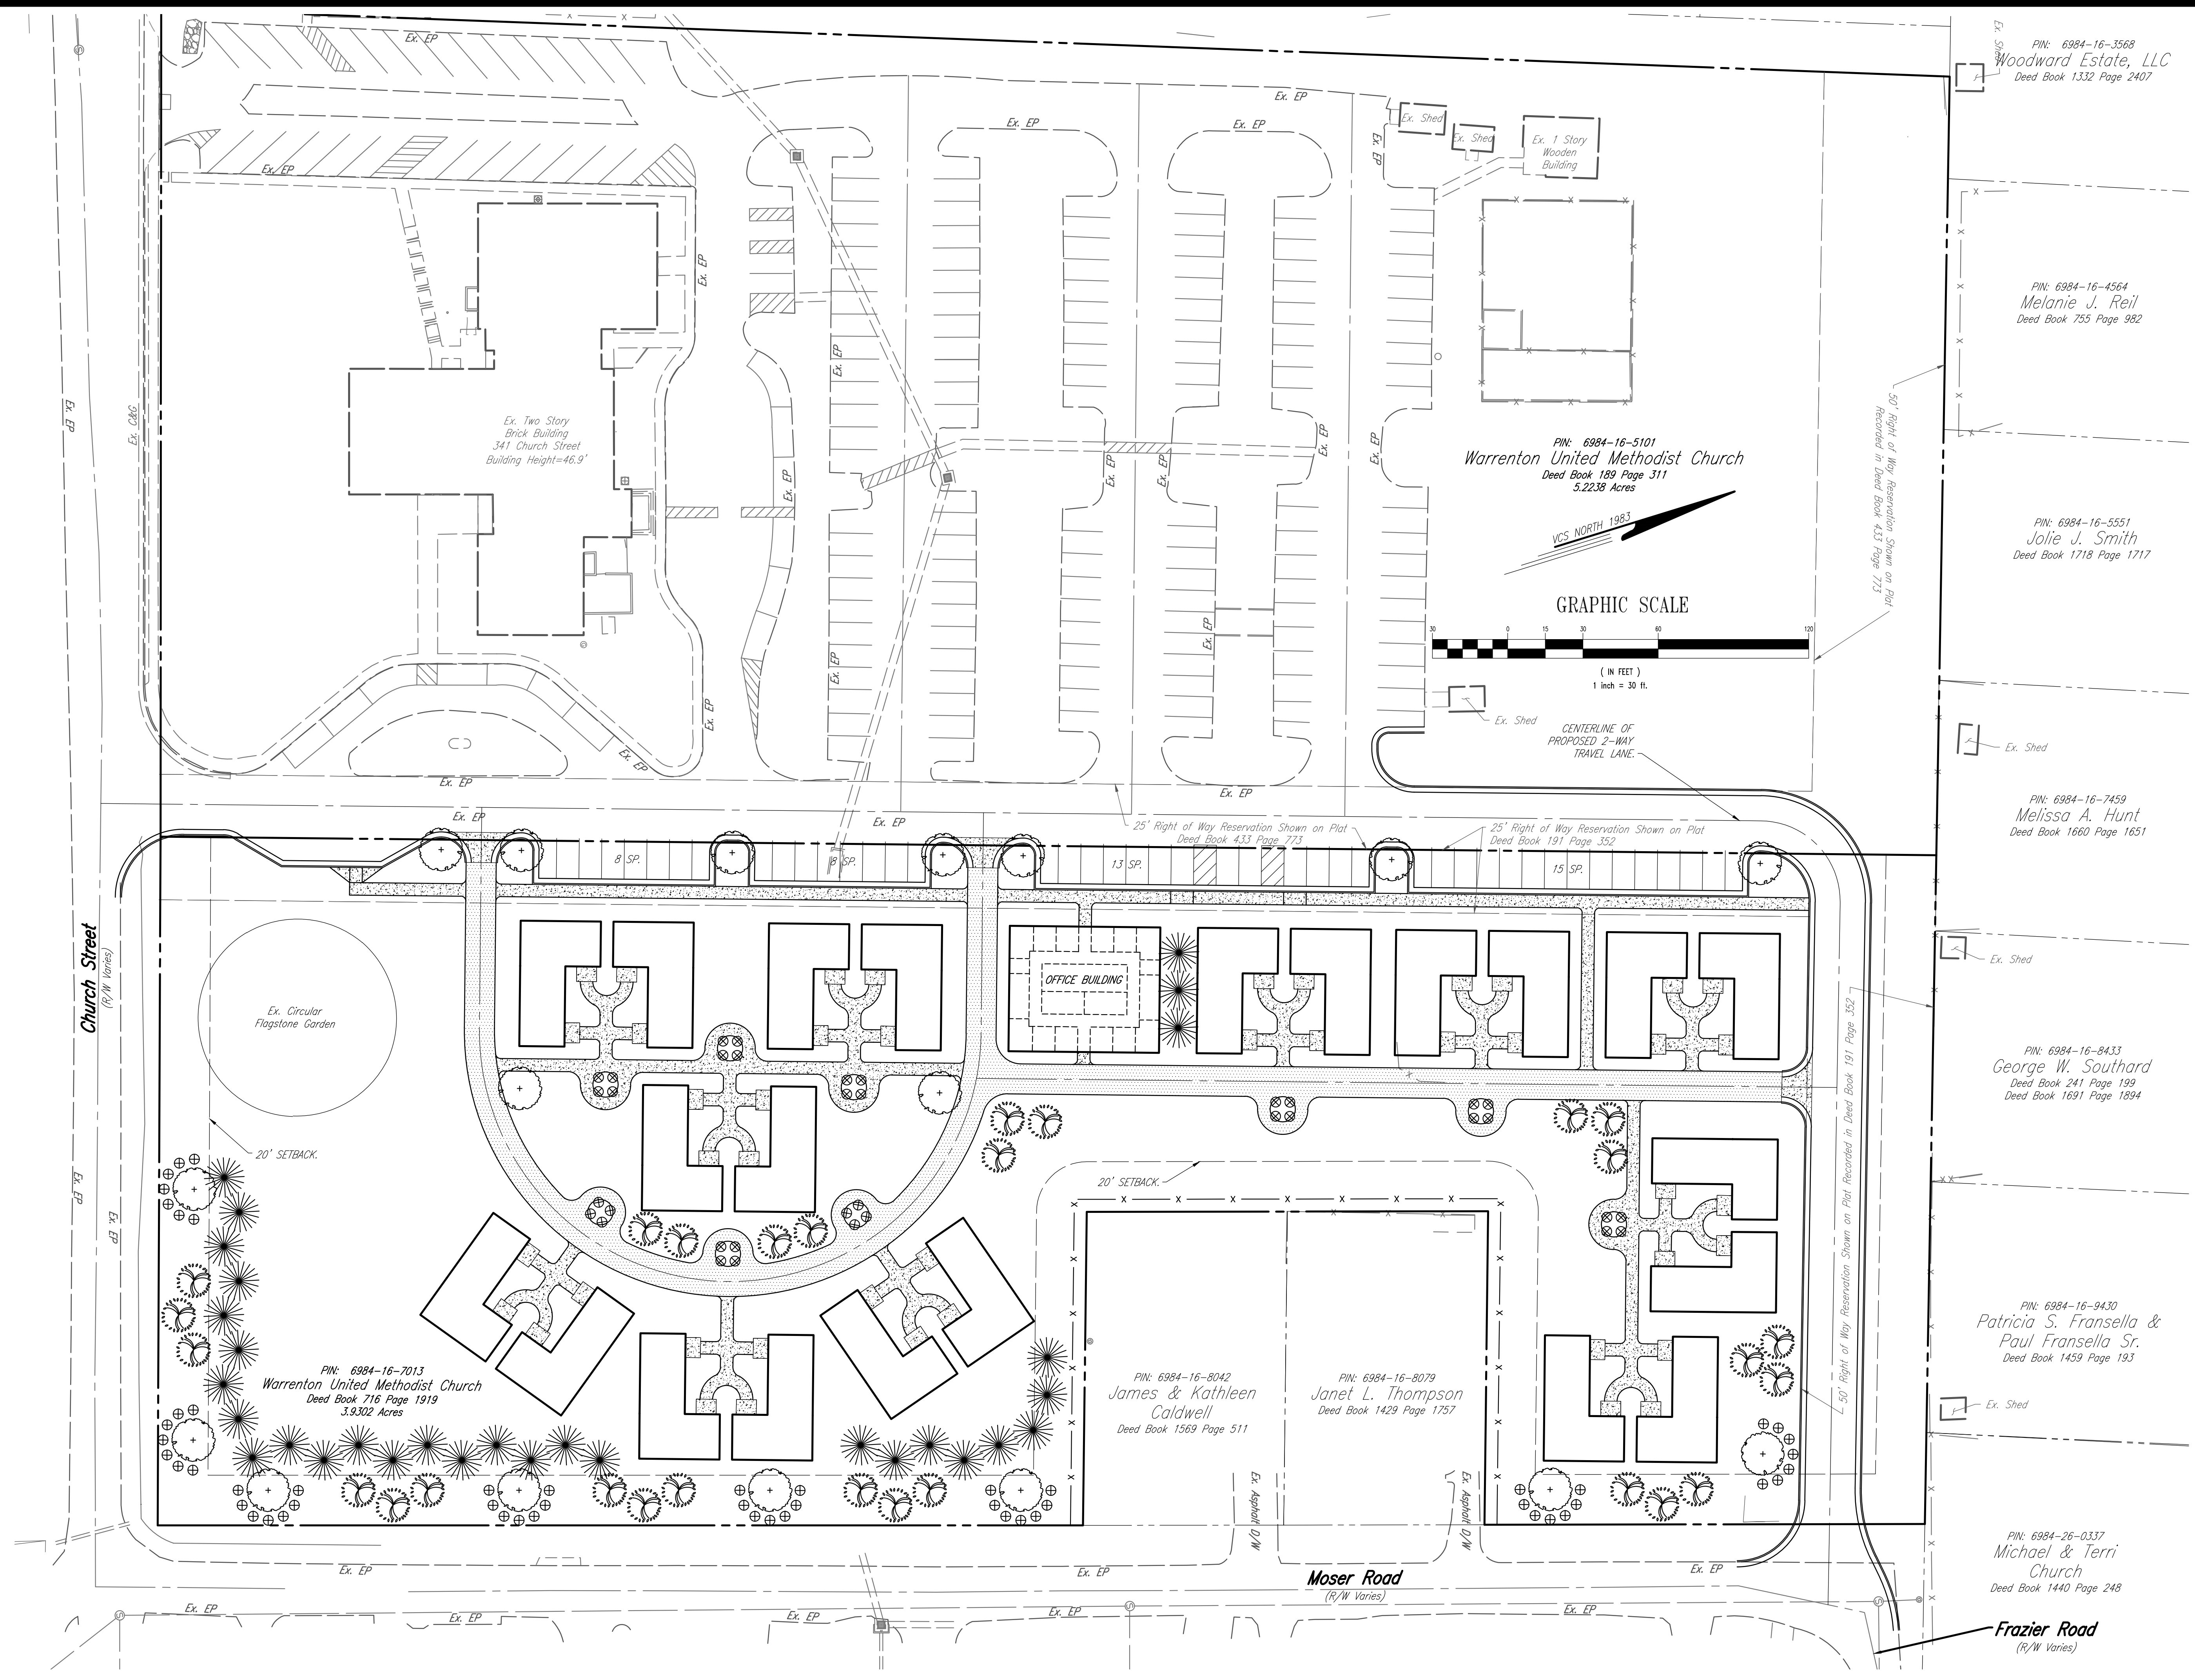

**8. Financing: Describe how your concept would be financed.**

The current estimate of the cost of the Hero's Bridge Village project is \$6 million. Below is a table of donors and commitments already secured.

FY24 Community Project Funding	\$1,000,000 (In process)
Commonwealth of Virginia	\$250,000
Fauquier County BOS	\$250,000 (Committed)
Businesses & Organizations	\$51,000
Individuals	<u>\$13,800</u>
<b>Total</b>	<b>\$1,564,800</b>

Other funders have expressed interest in this important project including the PATH Foundation, Home Depot and Bank of America. These entities with capacity to contribute significantly are following the project closely but are awaiting the outcome of the rezoning request.

Although to keep rents deeply affordable, our goal is to raise the necessary funds 100% via philanthropy, we do realize there will likely need to be some financing involved. We plan to work with local lenders and financial institutions when we reach this step.

## Town of Warrenton, Warrenton, Virginia Request for Information on Affordable Housing

Fauquier Habitat for Humanity  
98 Alexandria Pike Suite 43, Warrenton, VA 20186  
Melanie Burch, President & CEO  
[melanieburch@fauquierhabitat.org](mailto:melanieburch@fauquierhabitat.org)  
540-341-4952 x 106

**Organization Overview:**

Habitat for Humanity International (HFHI) is a nonprofit organization that helps millions of people across the U.S. and more than 70 other countries worldwide achieve homeownership, repair their homes, and build stronger communities. Since 1976, Habitat for Humanity International has built 46 million homes. Fauquier Habitat for Humanity (FHFH), an affiliate of the HFHI, was formed in 1991 to serve a growing segment of our Town of Warrenton and Fauquier County community members needing housing assistance. To date, we have built and renovated 64 homes and performed over 200 critical home repairs in the town and county. Our work has impacted over 300 people who improved their living situation. Overseen by a Board of Directors, FHFH has a staff of eight with a mixture of degrees and licensed professionals in the construction, housing, and accounting industries. Our Construction Director holds a Class A Residential building license, and our Critical Home Repair Manager has a Class C Residential building license.

**Our mission:**

Seeking to put God's love into action, Habitat for Humanity brings people together to build homes, communities and hope.

Simply, Habitat for Humanity's mission is to increase access to homeownership through the construction and affordable sale of homes. This work addresses a present-day need: safe, affordable, owner-occupied homes for families falling between 30 and 80% AMI in our community. Affordable housing plays a critical role in strong and stable communities. But when we dig deeper, we see that a long history of severe inequity and discrimination in housing contextualizes this work.

We are an equal housing lender that serves everyone equally, regardless of race. We are responsible for acknowledging how race has informed access to credit in this country, and we are intentional about making our mortgage equitably accessible for everyone.

Our closings require only a minimal cash down payment, so there is no need to rely on wealth from generations of owning property. Our underwriting criteria uses inclusive credit evaluation and is more lenient than a conventional loan, so applicants are not permanently precluded from homeownership if they have limited assets. And we work to educate our homeowners on unfair practices like appraisal discrimination that can prevent them from getting fair value out of their homes.

In other words, we aim to divorce the opportunity of benefiting from homeownership from all of the barriers that have taken root in the mortgage market.

**Concept:**

The housing affordability crisis makes it difficult for cities across Virginia to recruit and retain essential community workers, including police officers and teachers. FHFH is increasing the supply of affordable housing by building entry-level starter homes while driving down building costs, a nationwide barrier to building affordable housing. Energy-efficient, open-concept home designs and an innovative community land trust set this starter home approach apart.

Fauquier Habitat for Humanity homes are placed in the Virginia Statewide Community Land Trust (VSCLT). This lowers the cost of the house to the buyer, resulting in lower monthly mortgage expenses, and ensures the land stays affordable in perpetuity. The homeowner pays tax on the improvements on the land. The CLT is unique in preserving land to remain affordable yet ensuring homeowners are adding to the tax base. (In Virginia, Habitat homes typically increase the value of nearby homes by 6.55%.)

The VSCLT model allows families to build wealth through monthly mortgage payments. In exchange for buying the house at a lower price, a VSCLT homeowner agrees to pass on the gift and sell the home at an affordable price to someone in a similar financial situation.

Fauquier Habitat's home building and repair activities also energize our local economy, support local jobs, increase tax revenues, and reduce the need for household governmental assistance. Each Habitat home (new, renovated, or repaired) supports between 1.3 and 4.6 full-time jobs in a given year, with a median of 3.5 jobs per home. Habitat spurred jobs pay an average salary and benefits between \$40,918 and \$60,637. Total economic contribution ranges from a low of \$145,563 to a high of \$709,424.00 per home, with a median of \$290,949.

Also, as families transition into Habitat homeownership, they reduce their reliance on public assistance, allowing scarce public dollars to benefit new households. Habitat directly stimulates the local economy by purchasing local construction and building materials, hiring local contractors, and employing staff. This employment and spending has a multiplier effect as it ripples across the broader community. The multiplier effect includes "indirect" economic impacts resulting from business-to-business transactions and "induced" effects, what employees spend their wages on at retail and other establishments in our county. The total economic impact is the sum of all three effects: direct, indirect, and induced.

### **Neighborhood Revitalization**

Fauquier Habitat for Humanity's Neighborhood Revitalization (NR) program is based on an asset-based community development model that places residents as primary stakeholders and drivers to develop a collective vision for an improved quality of life in their neighborhood. Building houses alone does not fix the systemic, generational problems that plague underserved communities. Our current focus neighborhood, on and adjacent to Haiti Street/Eva Walker Park in Warrenton, is a historically African-American neighborhood with a rich history of family and social relationships and community engagement. Models that "push" services to communities without understanding from those who are impacted what their needs are or not engaging them as partners and stakeholders are ultimately unsuccessful as there is no sense of ownership or agency on the part of residents and other stakeholders.

The asset-based model employed by FHFH engages residents to identify the issues that negatively impact the neighborhood and work to "pull" the needed resources. We intend to emphasize our investment in people by replicating the NR model in other underserved neighborhoods and communities within Fauquier County and the guiding principles of our Critical Home Repair and single-family and multi-family builds. The resulting reach is ultimately building more than houses.

The 2019 Haiti Street/Eva Walker Park Small Area plan created by HD Advisors, with the support of community and town officials, gave input to the

1. financial analysis of potential redevelopment and density scenarios,
2. resident and community input sessions,
3. architectural guidelines, and
4. Community Land Trust analysis

This outcome, in turn, generated support from the PATH Foundation for Fauquier Habitat for Humanity to purchase several blighted buildings and lots on Haiti Street. FHFH is shovel-ready to build thirteen new, permanently affordable homes on Haiti Street within one year, removing the blighted buildings deemed unsafe housing. The homes create new housing for an additional thirteen families (30%-80% and up to 120% AMI for workforce families) who have lived or worked in Fauquier County for at least one year, joining the families and 22 children currently residing on the street. This proposal has support from Fauquier County and Sheriff, Town of Warrenton and Police, Senator Warner, Senator Kaine, and Congresswoman Wexton, Piedmont Environmental Council, Encompass, Virginia Housing, and Boys & Girls Club of Fauquier County.

FHFH has funding sources from Virginia Housing, Encompass, and Habitat Mortgage Solutions CDFI funding, but this does not cover all expenses. FHFH needs the support and investment from the Town of Warrenton to see this project through to completion. With all funds in place, our budget shows we can build the Energy-Star efficient homes with a price model that keeps the home mortgage at or below 30% of net income while allowing FHFH to recapture operational costs to move forward to the next project.

Current zoning rules work with our vision for the neighborhood.

Our next redevelopment area is 35 Horner Street, one block off Main Street, Warrenton. This site, again, with the support of the Piedmont Environmental Council, PATH Foundation, Encompass, and others, is an opportunity to build 18 affordable and workforce condominiums to answer the growing need for housing for our young professionals, elderly, and county employees who need functional homes in walkable communities. The design is created, we are discussing with the Special Use option with the Town of Warrenton zoning staff, and we are actively developing financing.

There has been a rural housing crisis for decades, and the Town of Warrenton is not immune to this situation. Local and federal investment is critical to building new housing, especially where access to traditional capital is limited. Fauquier Habitat for Humanity is leading a push to access programs like Community Development Block Grants, HOME Investment partnerships, and Virginia Housing and USDA-Rural Development housing construction programs and mortgages.

Rural communities such as the Town of Warrenton can only thrive when everyone, including our most vulnerable members, has access to housing. As such, FHFH, as a development practitioner, knows that community investments in infrastructure result in a tangible benefit for housing access. This includes water and wastewater systems, transportation, clean energy, and other underlying infrastructure that provide the foundation for affordable and livable communities. Additionally, land banks are a vehicle to acquire, hold, manage and distribute residential, commercial and industrial properties to meet our community's needs. Land banks can help mitigate the adverse effects of gentrification and prevent the displacement of low-income families and families of color in high-cost areas by securing land to create and preserve equitable opportunities.

One of the things that can make the Town of Warrenton’s close-knit community life more vibrant is to emulate other flourishing towns that have housing, small businesses, and community centers in the same building. This is a traditional way of life in many rural places, and it substantially benefits community development and housing affordability. Accessing a Historic Revitalization Grant program brings these project ideas to reality with the accompaniment of Historic Rehabilitation Tax Credits and housing tax credits.

Ideas and scalability addressed by Fauquier Habitat for Humanity will be a continuing conversation that involves inclusive development. The successful scale incorporates low-income, affordable, workforce, and market-rate homes in addition to universal design and studio or one-bedroom homes, creating healthy, holistic living environments.

<b>Department / Agency Lead:</b>	Town Council
<b>Staff Lead:</b>	Frank Cassidy

## EXECUTIVE SUMMARY

Staff and Councilmembers will be providing an update from the Rappahannock Rapidan Regional Commission, (Planning District 9, PD9) meeting held on August 23<sup>rd</sup>, 2023.

## BACKGROUND

The Rappahannock-Rapidan Reginal Commission is a Planning District Commission created under the Virginia Area Development Act. The Commission is comprised of appointed members from local government agencies in the region. Each participating county, city, and town with a population greater that 3,500 has the ability to appoint two representatives with one individual being an elected official. The Term of the appointment shall be for the term of the Elected Official, and in the case of an unelected appointment, the term shall be for no less than one year.

The Rappahannock-Rapidan Reginal Commission is abbreviated RRRC or by a historic moniker of Planning District 9 (PD9).

The Purpose of Planning District, or Regional Commissions, as set out in the Code of Virginia, Section 15.2-4207, is:

"...To encourage and facilitate local government cooperation and state-local cooperation in addressing on a regional basis problems of greater than local significance. The cooperation resulting from this chapter is intended to facilitate the recognition and analysis of regional opportunities and take account of regional influences in planning and implementing public policies and services.

The [Regional Commission] shall also promote the orderly and efficient development of the physical, social and economic elements of the district by planning, and encouraging and assisting localities to plan for the future."

Virginia's 21 Planning District or Regional Commissions, of which the Rappahannock-Rapidan Regional Commission (RRRC) is one, provide a variety of technical services and programming to member local governments.

William Semple, Councilman Ward 2, was appointed to the Planning District on March 8<sup>th</sup>, 2022. Francis Cassidy, Interim Town Manager, was appointed to the Planning District on July 11<sup>th</sup>, 2023.

**Meetings**

The Rappahannock-Rapidan Regional Commission (RRRC) meets on the fourth Wednesday of every other month, beginning at 1:00 p.m. at the Commission Offices, located in the town of Culpeper, in Southridge Office Park, at 420 Southridge Parkway, Suite 106, unless otherwise noted.

## MEMORANDUM

**To: Members of the Rappahannock-Rapidan Regional Commission**  
**From: Patrick L. Mauney, Executive Director**  
**Date: August 17, 2023**  
**Subject: Regional Transportation Collaborative Update**

Kristin Lam Peraza, RRRC Mobility Manager, will present an update on the Regional Transportation Collaborative including an overview of services and growth, FY 2023 highlights, metrics and sharing of the RTC model, as well as summary of funding and strategic direction for FY 2024.

## FY24

### Regional Transportation Collaborative Proposal for Path Foundation Funding

Since late 2019, the mobility services program serving the region has streamlined community investments dedicated to transportation supports, centralized access for mobility programs, and expanded services for older adults, individuals with disabilities, and vulnerable members of the community.

With the support of the PATH foundation, Virginia's first One-Call/One-Click Center has transformed from a small information and referral program to a widespread complex mobility effort utilizing technology and interwoven partnerships to maximize support and impact.

Gas Card Distribution	\$36,000+
Rides Provided	20,000+
Volunteer Hours Logged	15,000+
Volunteer Mileage	225,000+
Equivalent Donation	\$475,000+

#### **Fiscal Year 2023:**

In 2023, the mobility program rebranded under the Regional Transportation Collaborative (RTC) and the Trusted Community Partnership (TCP) forgoing the previous name 'FAMS Call Center' in exchange for 'Mobility Center', a simple name to better encompass the variety of efforts and services provided.

During FY23, the RTC positioned itself as a model program for the State of Virginia and mobility management acted as subject-matter-experts for the development of state processes and metrics as well as local projects.

Efforts to frame the RTC as a scalable-replicable mobility program were particularly successful with selection to present at the Community Transportation Association of America’s (CTAA) national conference in Oklahoma City, the Virginia PDC state conference in Norfolk, and the Community Transportation Association of Virginia’s (CTAV) summer conference in Fredericksburg. In addition, the RTC model was demoed for state level mobility programs in Alaska, Ohio, and New Hampshire; all of which showed interest in replicating the program components in state-wide or regional programming. Lastly, the RTC provided mentorship for the neighboring region, Thomas Jefferson Planning District’s (Charlottesville) grant submission for state funding to implement a mobility program in their area. TJPDC’s grant was awarded for FY24 and the RTC committed to a 18-month mentorship to support a scaled replication of its model in the neighboring region utilizing both RTC technology and mentorship from Mobility Center staff.

Model and mentorship efforts demonstrate the incredible impact that PATH funding has made through its continued investment - reaching well beyond the small region served, across the state and onto the national stage. RTC is passionate about its commitment to serving the needs of the individuals in the area while fostering a “Livable Community” and creating tailored collaborative mobility solutions. Although RTC receives 70-80% of funding through state grants, funds are limited to specific large-scale solutions and traditional uses; PATH funding however, has empowered the RTC to fulfill its commitment with creative, innovative, lasting strategies, ultimately securing the long-term provision of supports in the region.

**FY23 Data:**

Access to Health - RTC Mobility Supports	FY23 Goal	*PROJECTED				Goal %	Total
		Q1: 10.22-12.22	Q2: 1.23-3.23	Q3: 4.23-6.23	Q4: 7.23-9.23		
Rides for Medical Access, Essential Services, Critical Errands, Social Isolation Reduction	9,000.0	2,288	2,602	2,539	2,476	110.1%	9,905
<i>Average Equivalent Ride Value</i>	\$107,928.00	\$27,456.00	\$31,224.00	\$30,468.00	\$29,716.00	110.1%	118,864
Donated Volunteer Hours	6,000.0	1,514	2,025	2,062	1,867	124.5%	7,468
<i>Equivalent Volunteer Hours Value</i>	\$149,460.00	\$37,708.76	\$50,442.75	\$51,371.89	\$46,507.80	124.5%	\$186,031.20
Donated Volunteer Mileage	100,000.0	25,502	34,231	37,256	32,330	129.3%	129,319
<i>Equivalent Volunteer Mileage Value</i>	\$65,000.00	\$16,576.30	\$22,250.15	\$24,216.40	\$21,014.28	129.3%	\$84,057.13
<b>Total Rides/Hours/Mileage Equivalent Financial Impact</b>	<b>\$322,388.00</b>	<b>\$81,741.06</b>	<b>\$103,916.90</b>	<b>\$106,056.29</b>	<b>\$97,238.08</b>	<b>120.6%</b>	<b>\$291,714</b>
Individuals Served	20,000.0	5,181	6,456	6,733	6,123	122.5%	24,493
RTC Mobility Outreach and Engagement Activities	300.0	153	152	264	190	252.9%	759

---------------------------------------	---------	-------	-------	-------	-------	--------	--------	---------

**Strategic Planning 2023:**

In July 2023, one survey of political stakeholders along with approximately 45 individual strategic meetings were conducted with RTC partners and community programs. Strategic meetings act as an opportunity for in-depth review of the current fiscal year’s efforts, partnership interaction, and need analysis. In addition, partners discuss trending needs, long-term project goals, unique challenges, and outline fiscal and program support needs for their services. The strategic process allows RTC to create a comprehensive picture of the mobility challenges and solution efforts in the region, critically review support systems, and develop an efficient recommendation for funding including distribution and spending plans for a variety of partner programs.

Strategic planning in 2023 involved approximately forty different organizations, programs, and localities. Approximately, 20 organizations put forth both short and long-term mobility service solutions for funding, resulting in a total initial budget of more than 1.3 million dollars. Through prioritization, resource leveraging/sharing, and multi-year planning, final FY24 funding recommendations total approximately 1 million dollars.

In addition to funding requests, strategic planning processes identified priority focus areas for FY24 to include: Dialysis Transportation Supports, Long-Term Planning Case Management Support for Individuals Aging in Place, and Enhanced Mobility Solutions to Support the Increasing Medical and Aging Vulnerability of Clients. In particular, as the RTC enters its fifth year of mobility supports in the region, data and analysis clearly indicate that mobility programming designed to support clients at specific mobility levels five years ago has not ‘aged-well’ with clients, especially the approximate 2/3 repetitive clientele who have experienced increased vulnerabilities due to age and natural progression of medical conditions. In researching neighboring programs, as well as national models, it is clear that RTC’s work is unique and the support of increased and specialized mobility needs is atypical. This highlights the need for long-term decision-making and policy infrastructure, and possibly the introduction of specialized external services that can be coupled with local mobility efforts.

Lastly, as RTC completes the compilation of a half-decade of data surrounding mobility needs and collaborative impact, it is clear the region continues to rely heavily on the provision of Volunteer Transportation as primary strategy for meeting mobility needs of the population served. The region’s lack of alternative or private transportation justifies the RTC’s continued commitment to collaboration with, financial support of, and planning/programming aid for multiple volunteer driver programs and local non-profit transportation alternatives. As seen below, the commitment next fiscal year of funding is closely split between overall mobility programming and supports for volunteer programs, with a small portion designated for alternative local options.

**Fiscal Year 2024:**

The Department of Rail and Public Transit, through the 5310 Mobility Management and Operations Grant program, have committed \$733k for a 12-month grant period, October 2023 – September 2024. State funding is set to be designated as shown below:

Description	Program Benefit	DRPT
Vehicle Wraps	Partner Wide	\$9,384
Community Engagement	Partner Wide	\$10,000
Technology	Partner Wide	\$10,000
Mobility Center Supervisor (50hrs p/m)	Encompass	\$18,192
Volunteer Recruiter (23hrs p/w)	Partner Wide	\$25,000
Volunteer Coordinator Position (25hrs p/w)	VolTran	\$25,000
Vehicles, Fuel, Insurance, Volunteer Driver Liability	Partner Wide	\$25,000
Community Liaison (38hrs)	Partner Wide	\$26,000
Continuity Support Coordinator PT	Partner Wide	\$26,000
Mobility Coordinator	Partner Wide	\$43,407
Mobility Coordinator	Partner Wide	\$43,407
Mobility Coordinator	Partner Wide	\$43,407
Mobility Coordinator & Technical Specialist	Partner Wide	\$50,135
Mobility Manager	Partner Wide	\$69,500
Rappahannock Transportation Pilot	Rapp County	\$78,000

\*Staffing amounts have additional Fringe (39.5%) and Indirect (10%) funding to bring FY24 total funding to \$733k.

**Proposal for FY24 Funding:**

In FY24, RTC seeks \$250,000 in funding from the PATH Foundation to provide expanded programming, staffing, and mobility supports for the continued provision of mobility management and the implementation of alternative mobility options, as well as the exploration and development of unique mobility solutions for the priority focuses identified through 2023 Strategic Planning.

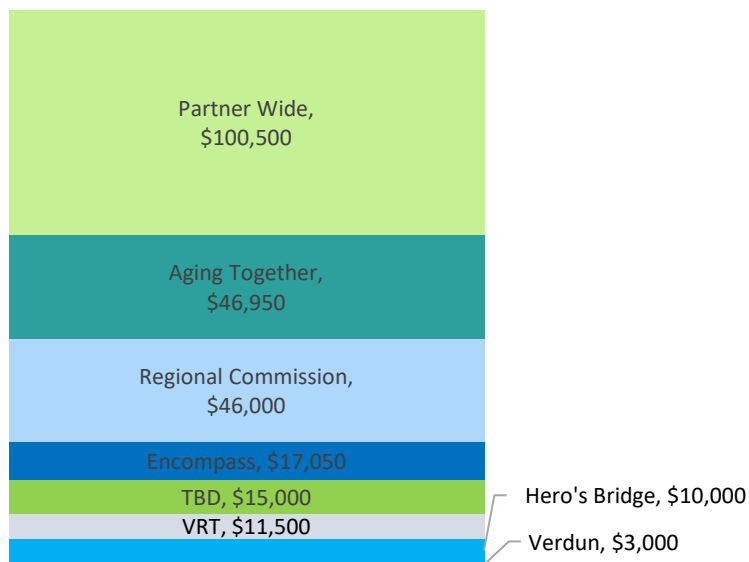

Funding from the PATH foundation, while typically between 20-35% of the overall mobility management funding for the region, provides incredible spending flexibility to tailor mobility solutions to meet emerging needs, support local transportation non-profit programs, and continue evolving the collaborative into a comprehensive mobility support with wrap-around cross-sector connections, interwoven partnerships, and technical infrastructure.

Below are the proposed use and funding allocation recommendations for FY24 PATH funding:

**Funding by Category**

**Funding by Partner Recipient**

Description	Program Benefit	PATH
Communications Supervisory Hours	Aging Together	\$6,000
Marketing Position (30hrs p/w)	Partner Wide	\$40,950
6% Salary Increase for Mobility Center Staff	Encompass	\$4,050
Weekend Support Mobility Center (12hrs p/w)	Partner Wide	\$13,000
Volunteer Coordinator Position (10hrs p/w)	Hero's Bridge	\$10,000
Vehicle Wraps	Partner Wide	\$1,500
Community Engagement	Partner Wide	\$25,000
Education & Travel	Partner Wide	\$7,500
Technology	Partner Wide	\$11,000
Vehicles, Fuel, Insurance, Volunteer Driver Liability	Partner Wide	\$25,000
Volunteer Appreciation Funds	Partner Wide	\$7,500
Donate it Forward Initiative	Partner Wide	\$18,000
Background Checks	Partner Wide	\$5,000
Grant Management & Fiscal Reporting	Regional Commission	\$16,000
Gas Cards	Partner Wide	\$20,000

<b>Annual Recognition Event</b>	<i>Partner Wide</i>	\$10,000
<b>Dialysis Transportation</b>	<i>Partner Wide</i>	\$15,000
<b>Stipend Transportation</b>	<i>Verdun</i>	\$3,000
<b>FHE 1 Additional Day of Service</b>	<i>VRT</i>	\$11,500

**Funding Use Narratives by Category:**

**STAFFING**

- Marketing Position (30hrs p/w)
- 6% Salary Increase for Mobility Center Staff
- Weekend Support Mobility Center (12hrs p/w)
- Volunteer Coordinator Position (10hrs p/w)

RTC utilizes a shared marketing position, that is supervised and employed by Aging Together, as a shared resource for 6-8 local non-profit programs in the area. Programs are able to access marketing support and expertise on a fluctuating basis throughout the fiscal year, aligning priorities with supports, ultimately maximizing the efficiency and use of this resource. Marketing projects range from social media to print ads and campaigns targeted at advertising mobility services, distributing transportation information, and recruiting volunteer drivers.

Funding for mobility center staff salaries and weekend support are requested to maintain the current four staff and employ an additional part-time weekend staff. Mobility Center staff coordinate all requests for transportation information and rides as well as focus on tailored projects and specialties needed across the region, including – technical support, case management referral and advocacy, data entry, volunteer program vehicle management, and other enhanced mobility supports.

A small portion of funding is requested to supplement the Volunteer Coordinator position employed by Hero’s Bridge to recruit, train, and coordinate transportation specifically for veterans.

**VEHICLES & TRANSPORTATION**

- Vehicles, Fuel, Insurance, Volunteer Driver Liability
- Gas Cards
- Dialysis Transportation
- Stipend Transportation
- FHE 1 Day Service

Currently, the region shares 9 volunteer program vehicles owned by Encompass and managed through the Care-A-Van program with the assistance of the Mobility Center. In addition, the RTC supports three programs with direct vehicle ownership (VolTran, Rapp-At-Home, and Hero’s Bridge) Expenses for vehicle maintenance, fuel, and insurance are combined with Volunteer Driver Liability Insurance for each partner program (6) under vehicle transportation expenses. The vast majority of program vehicle transports are for wheelchair transportation or group social trips related to the reduction of social isolation.

Gas Cards are used in several ways to support transportation needs that cannot be served through public transit or volunteer transportation. Cards also support stipend rides, volunteer transportation for extended times/miles, and increase access to health for free clinic patients referred out of the region for additional medical testing/treatment. Cards are currently distributed through 9 partner programs spread across the five-county region and managed under the Mobility Center software.

Funding is requested for the first time to support possible alternative transportation supports for individuals in need of dialysis transportation and transportation to substance abuse recovery therapy. These initiatives are still in the planning and piloting phase, funds will be monitored for impact and distributed through existing infrastructure.

Lastly, Strategic Planning 2023 identified the need for continued access to the UVA Health System in Charlottesville, currently VRT has a 3-day a week service with limited pickup in Madison and Culpeper. Funds are requested to support an additional 1 day a

week of service with additional pick-up sites. If use data justifies, at the end of FY24 service will be seeking funding to increase services to 5 days a week.

**VOLUNTEER SUPPORTS**

- Volunteer Appreciation Funds
- Donate it Forward Initiative
- Background Checks
- Annual Recognition Event

Funding for volunteer supports is essential to the continued widespread provision of volunteer transportation in the region. Volunteer transportation provides 70%+ of the requested transportation in the region with only 5% of requests successfully referred to public transit. Volunteer appreciation funds paired with annual recognition ensure volunteers’ contributions are valued. FY23 data demonstrated that volunteer transportation will exceed \$300k in community contribution; FY24 funding proposes to utilize less than 20k to “thank volunteers” for their contribution. Additionally, funds are used to vet and train volunteers as well as provide volunteers with the option to receive a small portion of their mileage reimbursed at a reduced rate in the form of a pay-it-forward community donation to a local non-profit of their choice. The annual donations encourage volunteers to stay involved while also contributing to another organization they may be passionate about. These donations also bolster the RTC connection to a variety of local nonprofit programs.

**OTHER**

- Vehicle Wraps
- Community Engagement
- Education & Travel
- Technology
- Grant Management & Fiscal Reporting

Funding for community engagement is used along with funds for vehicle wraps to create community displays, advertise services, recruit volunteers, and engage with partners, non-profits, and programs in the region. Additionally, funds for education and travel support continued learning for staff and volunteer drivers.

RTC utilizes a cloud-based software tailored to its use and adaptable to its growing mobility programming. This software is shared as a resource across partners and has a revolving predictable cost without hidden or fluctuating fees. The software’s data collection and analysis capabilities provide automatic reporting, comprehensive data storage, and service coordination for all aspects of the mobility program and collaborative partnership.

Lastly, a small portion of grant funding is designated to the Regional Commission’s efforts to maintain and manage the grant project and its funding.

**FY24 Service Goals & Metrics:**

Based on the projected FY23 data, the planned priorities for FY24, and the expanded staffing supports the RTC has increased its FY24 Goal Metrics to align with the increased financial investment from state and local funders as well as the regions goals for service provision.

<b>Access to Health - RTC Mobility Supports</b>	<b>FY24 Goal</b>
Rides for Medical Access, Essential Services, Critical Errands, Social Isolation Reduction	10,500
Donated Volunteer Hours	8,000
Donated Volunteer Mileage	125,000
<b>Total Rides/Hours/Mileage Equivalent Financial Impact</b>	<b>\$400k</b>
Individuals Served	25,000
RTC Mobility Outreach and Engagement Activities	600
Transportation Services ( <i>Village model services that replace a ride.</i> )	800
Communication & Coordination Services	13,000

*Staff Present: Liz Beling, Monica Creel, Patrick Mauney, Terry Snead*

**1. Call to Order**

Chair Catlin called meeting to order at 1:00 p.m.

**2. Pledge of Allegiance**

Chair Catlin led Commissioners in the Pledge of Allegiance.

**3. Roll Call & Quorum Determination**

A quorum of the Commission was confirmed.

**4. Agenda Approval**

Upon motion by T Underwood, 2<sup>nd</sup> by R Coiner, the agenda was approved ayes all.

**5. Public Comment**

There were no comments from the public.

## 6. Presentations and Special Recognition

Chair Catlin welcomed Ms. Janelle Downes, Fauquier County Administrator, to the Commission.

Chair Catlin also recognized the service of Paul McCulla, Fauquier County and Jim Crozier, Orange County. Mr. McCulla served on the Commission since 2011 and Mr. Crozier since 2014, with each in leadership roles at various points during their terms.

## 7. Consent Agenda

- a) Minutes – April 26, 2023
- b) FY 2023 Year to Date Financial Report

Chair Catlin reviewed the consent agenda items. T Underwood moved to approve the consent agenda, 2<sup>nd</sup> by R Heflin. The motion carried unanimously.

## 8. Executive Director's Report

Chair Catlin asked P Mauney to review the Director's report. P Mauney thanked Liz Beling for her time as Farm to School Liaison and wished her well in her next adventure at law school, and also shared that Matt Tobias had agreed to a second year as AmeriCorps VISTA. P Mauney also shared information received from the Southeast Crescent Regional Commission and indicated that there may be future opportunities for funding that staff will be attentive to and share further details at an upcoming meeting.

## 9. Staff Updates / Old Business

- a) PDC Housing Development Program

Chair Catlin asked P Mauney to provide updates on the PDC Housing Development Program. P Mauney provided a brief presentation on the program to date and updates on the four ongoing projects. He stated that staff recommended a proportional allocation of the \$290,000 unallocated funds to projects under development by People Incorporated and Culpeper Community Development Corporation, with other allocations remaining in place.

R Coiner moved to approve the revised allocation plan, 2<sup>nd</sup> by J Weakley. The motion carried ayes all.

- b) RRRC 50<sup>th</sup> Anniversary Updates

Chair Catlin asked for updates on the 50<sup>th</sup> anniversary. P Mauney provided a one-page handout with date, location and requests for Commissioner support between now and October 4<sup>th</sup>. He also stated that template resolutions for local consideration would be provided in July to Administrators and Clerks.

- c) Regional Broadband Projects Status

Commissioners briefly shared updates on broadband projects ongoing in the region.

- d) Regional Transportation Districts & Authorities

Chair Catlin asked P Mauney to review the information provided on regional transportation districts. P Mauney noted the discussion at previous meetings and

reviewed two additional items for the Commission. One was a table of motor vehicle fuels taxes collected per county and the second was a recent article related to the Central Virginia Transportation Authority and its method of allocating such funds towards local and regional transportation projects. Commissioners briefly discussed the items and potential options for increasing local transportation funds. P Mauney indicated that staff can continue to research and requested Commission direction at a future meeting.

## 10. New Business

### a) FY 2024 Budget

Chair Catlin asked P Mauney to review the FY 2024 budget. P Mauney stated that there was one minor change from the budget presented in April due to adjustments to the Commission's property and liability insurance, but that all other revenues and expenses were unchanged. Commissioners asked if dues rate remained at \$0.83 and P Mauney confirmed, noting that discussion for the FY 2025 dues rate would occur in August.

R Coiner moved to approve the FY 2024 budget, 2<sup>nd</sup> by T Underwood. The motion carried unanimously.

### b) CEDS Planning Session

Chair Catlin asked P Mauney to introduce the next item. P Mauney reminded the Commission of the ongoing Comprehensive Economic Development Strategy (CEDS) project and introduced Dan Gunderson, Senior Vice President and Alex Tranmer, Director of Strategic Planning with Camoin Associates, who are serving as consultants for the Commission. *[Note: Chair Catlin departed the meeting at 2:00pm.]*

Mr. Gunderson and Ms. Tranmer shared information and facilitated discussion of the progress to date and Commission input. A copy of the presentation slides is included with the meeting minutes. Vice-Chair Coiner thanked Mr. Gunderson and Ms. Tranmer for their work and presence at the meeting.

## 11. Closed Session

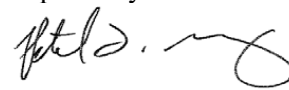

## 12. Regional Roundtable

Commission members shared information of note from their communities.

## 13. Adjournment

Upon motion by J Weakley, 2<sup>nd</sup> by G Woods, Vice-Chair Coiner adjourned the meeting at 3:00 p.m.

Respectfully Submitted by:

Patrick L. Mauney  
Secretary & Executive Director

**MEMORANDUM**

**To: Members of the Rappahannock-Rapidan Regional Commission**  
**From: Patrick L. Mauney, Executive Director**  
**Date: August 11, 2023**  
**Subject: FY 2023 Final Unaudited Financial Report**

Final FY 2023 revenue and expenditure reports through June 30, 2023 are enclosed for your review. These reports are subject to RRRC’s annual audit process. Auditors from Dunham Aukamp and Rhodes PLC will be in the office on Wednesday, September 6<sup>th</sup> as part of their review and we anticipate a draft audit to be available at the October Commission meeting.

Revenues for the fiscal year finished at 96% of budgeted revenues based on the amended budget. Expenses at the end of the fiscal year were 95.2% of the amended budget. Each shortfall is due to delayed spending and reimbursements for ongoing grant projects that will be reflected in FY 2024. I will also note operating expenses ending lower than budgeted overall, with a few line items exceeding budgeted amounts. These overages have been considered as part of the FY 2024 budget process.

**REQUESTED ACTION:** None required.

Rappahannock-Rapidan Regional Commission Revenue Snapshot - June 30, 2023

## MEMORANDUM

**To: Members of the Rappahannock-Rapidan Regional Commission**  
**From: Patrick L. Mauney, Executive Director**  
**Date: August 11, 2023**  
**Subject: FY 2024 Year to Date Financials**

FY 2024 revenue and expenditure reports through July 31, 2023 are enclosed for your review. These are unaudited reports for the first month (8%) of the fiscal year.

Revenues are 11% of budget, with expenditures are 4.5% of budgeted amounts. Thank you to all local jurisdictions for your local dues and housing funding support early in the fiscal year!

**REQUESTED ACTION:** None required.

## MEMORANDUM

**To: Members of the Rappahannock-Rapidan Regional Commission**  
**From: Patrick L. Mauney, Executive Director**  
**Date: August 7, 2023**  
**Subject: RRRC Financial Account FY 2023 Summary**

As you may recall, summary financial information for RRRC's four financial accounts is shared with the Commission in February and August each year, or as requested by Commission members. These summaries cover the following accounts:

- Atlantic Union Bank Checking
- Atlantic Union Bank Money Market
- Virginia Investment Pool NAV Liquid Fund
- Virginia Investment Pool Long-Term Bond Fund

The Virginia Investment Pool accounts are generally considered as the Commission's reserve funds, available to cover long-term debt (mortgage) and provide for emergency operating costs or other targeted expenditures. The purpose of providing these summary reports is to ensure Commissioners are aware of the financial trends of the Commission over short and long-term periods, including annual trends within operating accounts.

**REQUESTED ACTION:** None required.

**FY 2023 Account Balances**

Operating accounts reflect high balances in July based on receipt of annual dues request funds from member jurisdictions. Grant reimbursements are most typically received on a quarterly basis, which is reflected by balance increases in October/November and January/February. The final quarter of FY 2023 (April to June) reflect spending on operating costs and grants, with the latter reimbursements usually received as reimbursements in the following fiscal year.

<b>Operating Accounts</b>			
Month (End)	Checking (Union)	Money Market (Union)	Operating Total
<b>July-22</b>	\$ 9,528.65	\$ 184,080.32	\$ 193,608.97
<b>August-22</b>	\$ 38,215.70	\$ 225,078.57	\$ 263,294.27
<b>September-22</b>	\$ 18,496.34	\$ 413,413.89	\$ 431,910.23
<b>October-22</b>	\$ 21,578.55	\$ 378,347.25	\$ 399,925.80
<b>November-22</b>	\$ 14,695.96	\$ 186,139.20	\$ 200,835.16
<b>December-22</b>	\$ 3,159.60	\$ 138,432.99	\$ 141,592.59
<b>January-23</b>	\$ 2,528.52	\$ 213,956.16	\$ 216,484.68
<b>February-23</b>	\$ 8,009.32	\$ 167,521.01	\$ 175,530.33
<b>March-23</b>	\$ 14,740.29	\$ 65,328.90	\$ 80,069.19
<b>April-23</b>	\$ 54,203.28	\$ 19,533.57	\$ 73,736.85
<b>May-23</b>	\$ 7,190.43	\$ 47,290.41	\$ 54,480.84
<b>June-23</b>	\$ 56,819.11	\$ 43,644.53	\$ 100,463.64

In August 2017, the Commission adopted a Resolution to join the Virginia Investment Pool (VIP), managed by VML/VACo Finance. This allowed for a more clearly defined Reserve fund, designed to cover long-term debt service on the Commission-owned office space and for other operating costs, as needed.

<b>Reserve Accounts</b>			
Month (End)	VIP NAV	Long-Term Bond	Reserve Total
<b>July-22</b>	\$ 248,291.84	\$ 104,526.43	\$ 352,818.27
<b>August-22</b>	\$ 248,754.66	\$ 103,824.99	\$ 352,579.65
<b>September-22</b>	\$ 249,278.18	\$ 102,652.36	\$ 351,930.54
<b>October-22</b>	\$ 249,937.45	\$ 102,498.88	\$ 352,436.33
<b>November-22</b>	\$ 401,072.89	\$ 103,062.91	\$ 504,135.80
<b>December-22</b>	\$ 402,613.99	\$ 103,310.89	\$ 505,924.88
<b>January-23</b>	\$ 404,070.44	\$ 103,947.49	\$ 508,017.93
<b>February-23</b>	\$ 508,760.21	\$ 0	\$ 508,760.21
<b>March-23</b>	\$ 510,857.14	\$ 0	\$ 510,857.14
<b>April-23</b>	\$ 512,960.55	\$ 0	\$ 512,960.55
<b>May-23</b>	\$ 515,210.90	\$ 0	\$ 515,210.90
<b>June-23</b>	\$ 467,424.34	\$ 0	\$ 467,424.34

Over the past fiscal year, the VIP NAV Liquid Fund returned 6.6% and the VIP Long-Term Bond Fund lost 2.4% in one-year returns. As a result, all VIP funds were transferred to the NAV fund in February 2023. Staff continue to participate in Virginia Investment Pool calls and have only made deposits to the NAV fund since the initial deposits to both accounts in 2017.

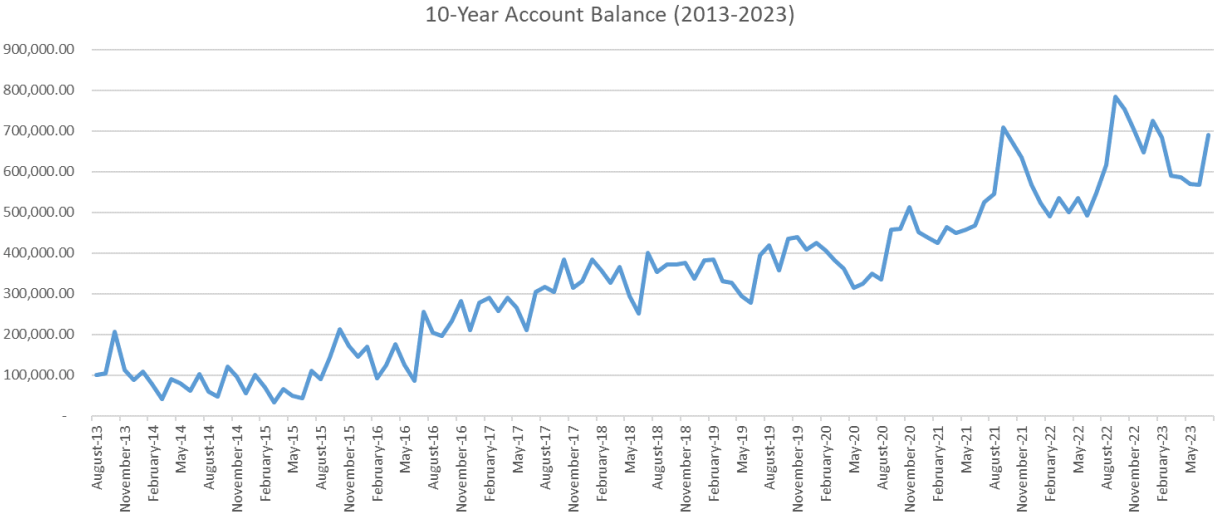

Overall account values are shown below for the end of each month in FY 2023. Fluctuations in year-to-year value are primarily the result of grant reimbursement timing with the general positive net year to year also reflective of the relative trend of increased revenues versus expenditures.

RRRC Total Account Value (FY 2023)		
Month (End)	Total Accounts	Year over Year
July-22	\$ 546,427.24	21,996.48
August-22	\$ 615,873.92	71,494.17
September-22	\$ 783,840.77	74,774.24
October-22	\$ 752,362.13	81,279.81
November-22	\$ 704,970.96	69,291.40
December-22	\$ 647,517.47	80,566.10
January-23	\$ 724,502.61	202,847.05
February-23	\$ 684,290.54	193,979.37
March-23	\$ 590,926.33	55,394.21
April-23	\$ 586,697.40	85,583.20
May-23	\$ 569,691.74	35,135.53
June-23	\$ 567,887.98	75,824.31

**Historical Account Balances**

As referenced above, RRRC historically did not maintain separate Operating and Reserve accounts. While past Treasurers, officers and staff members kept a reserve balance on budget sheets, these were not easily verifiable. Separating operating and reserve accounts allows for an easier view of the organization’s financial trends.

Additionally, RRRC remains predominantly reliant on grant funds each year. The past ten years of monthly account balance trends reflects periods of reserve spending (reduced account balances) and reserve saving (increased account balances). Once again, the typical end of fiscal year drawdowns are evident as are beginning of fiscal year local contributions.

## Executive Director's Report August 16, 2023

The purpose of this report is to provide members of the Regional Commission with a summary report of work plan-related activities, staff attendance and participation at local/regional/ statewide meetings, and updates on initiatives impacting the Regional Commission and our localities.

### Administration:

- Frank Cassidy was appointed to the Commission from the Town of Warrenton in July. I look forward to welcoming him to the Commission in August, and he has already been engaged with our Chief Administrative Officers roundtables in his interim Town Manager role.
- Mallory Grady was hired as our Farm to School Associate and is beginning to schedule in-school visits to support the third year of our Farm to School efforts with local school systems.
- I appreciate our member jurisdictions that have passed, or are in the process of scheduling, Resolutions commending RRRC's 50<sup>th</sup> Anniversary. I keep an eye on local agendas, but would also be grateful to know if a Resolution is on your Board or Council agenda so that we can arrange for a staff member to attend.

### Economic Development & Tourism

- RRRC and the regional tourism directors are collaborating to host a half-day workshop on September 20th focused on Event Planning 101. The workshop is anticipated to include keynote from Dr. Maggie Daniels, Professor of Tourism & Events at George Mason and lessons learned, event planning tips and best practices from local small businesses and event sponsors. Registration is free and available at: <https://www.eventbrite.com/e/event-planning-101-free-training-workshop-tickets-654331321597>
- The Comprehensive Economic Development Strategy (CEDS) process continues. Recent work includes a number of interviews with regional stakeholders and a brief business survey that will be released after Labor Day via our Chamber partners and others throughout the region.

### Emergency Planning & Hazard Mitigation

- Our grant agreement with VA Department of Emergency Management for the Hazard Mitigation Plan update was received earlier in August and we are excited to have that step in the process completed. As previously shared, we will contract with Berkley Group to complete the HMP update and for the Regional Resiliency Plan funded through the Community Flood Preparedness Fund. The project should commence in the next few months and we are aiming for a draft to be available in late 2024. Your local planning, zoning and emergency management staff will be among the stakeholders included in the planning process, but we appreciate any additional sharing of information that you are able to assist with during the process.

### Transportation

- Kristin Peraza will present her annual update on the Regional Transportation Collaborative at the August meeting. This coincides with 40+ strategic funding discussions with RTC partners in July to guide program priorities beginning in October and feedback for applications to the Department of Rail and Public Transportation in January.

- Kristin and I presented on the RTC model at the VAPDC summer conference in Norfolk in July and had several follow up requests for additional information on the model and metric tracking.
- Commuter Services staff will be promoting Discover Transit during September in coordination with the Department of Rail and Public Transportation. Look for them at the Old Town Warrenton Fall Festival, Orange Street Festival and Culpeper AirFest in the next couple of months!
- Staff is participating with local government staff and VDOT on several project pipeline and STARS transportation planning efforts in Warrenton, Fauquier County and Culpeper over the next several months. These efforts are designed to identify future Smart Scale or other project applications.

### **Homelessness & Regional Housing**

- Rebecca Wareham and Matt Tobias continued to share data and information regarding Foothills Housing Network, the 2023 Point in Time Count with local governments.
- Staff are engaged with various Culpeper-area partners in planning for cold weather shelter options. The Winter Heat Shelter is not likely to open this year, and Culpeper Housing and Shelter Services (CHASS) has taken the lead on planning for alternative options as of now.
- Staff also coordinated a Tenants Rights presentation for Foothills Housing Network partners and the public in July with information provided by the Virginia Poverty Law Center.
- The PDC Housing Development Program was extended to a deadline of June 30, 2025 by Virginia Housing in May. We continue to work with our five housing development partners to complete reimbursements and quarterly reporting requirements and should see an increase in activity in FY 2024 with construction expected to begin on the remaining projects.

### **Environmental & Natural Resources**

- The RRRC Food Policy Council has approved new priority projects and seeks Commission agreement on those projects. Michelle Edwards will provide additional information at the August meeting. The success on the nine original priority projects since the Farm and Food System Plan was developed in 2015 is a testament to great work and partnerships across the region!
- RRRC's National Fish and Wildlife Foundation project continues to progress. The Best Management Practice (BMP) Prioritization tool under development by Chesapeake Conservancy will be presented to the Rappahannock River Basin Commission in September, John Marshall Soil & Water Conservation District and Friends of the Rappahannock have been active in on-the-ground BMP installations, and the Town of Warrenton has made great progress on its Garrett Street Pond retrofit and 5<sup>th</sup> Street / Dog Park Bio-retention facility projects.

### **Local Technical Assistance**

- Worked with regional legislative liaison and Chief Administrative Officers to review and revise legislative priorities for 2024. A draft should be available between now and the October RRRC meeting.
- Met several times with Town of Madison staff and Council on pedestrian and downtown planning opportunities. RRRC staff provided grant writing support and technical assistance in the development of a Community Development Block Grant (CDBG) planning grant application that was submitted earlier in August.

- Staff are working with Rappahannock County Water & Sanitation Authority board members on potential infrastructure grant opportunities and connected with USDA Rural Development in July regarding funding options
- Coordinated a demonstration meeting with VDEM and local partners on the Rappahannock-Rapidan Stream Gauge project. You may notice new stream-level sensors on several bridges in the Upper Rappahannock watershed, which are intended to provide real-time water level data for use by emergency management and other stakeholders.
- Continue to support Madison County in their Comprehensive Plan update process
- Staff attended various local government and regional meetings since the last Commission meeting including but not limited to: Fauquier County/Towns Liaison Committee, Culpeper CREW, PATH Foundation Community Advisory Committee, Fauquier Conservation Roundtable, PATH Senior Services Collaborative, Rappahannock River Basin Technical Committee, Culpeper Extension Leadership Council, and George Washington Carver Agricultural Research Center
- Provided data, general information and support letters to various requests from Town of Gordonsville, Town of Orange, Town of Culpeper, Town of Remington, Town of Warrenton, Rappahannock County, Fauquier County, Culpeper County and other local partners in July and August

## MEMORANDUM

**To: Members of the Rappahannock-Rapidan Regional Commission**  
**From: Patrick L. Mauney, Executive Director**  
**Date: August 15, 2023**  
**Subject: GO Virginia Region 9 Nomination**

The Regional Commission is charged with appointing one elected official and one Chief Administrative Officer to serve on the GO Virginia Region 9 Council.

In February 2022, the Commission appointed Mr. James Crozier (elected official) and Mr. Jonathon Weakley (CAO) for three-year terms beginning July 1, 2022.

With Mr. Crozier's resignation in July 2023, the Commission is requested to appoint an elected official to represent the region on the GO Virginia Region 9 Council to complete the term through June 30, 2025. The appointment does not have to be a member of the Regional Commission, though that has been the precedent to date.

For reference, the GO Virginia Council has the following meetings scheduled for FY 2024:

October 20, 2023 – In-person in the Rappahannock-Rapidan region

January 26, 2024 – In-person in the Thomas Jefferson PDC region

April 25, 2024 – In-person in the Rappahannock-Rapidan region

June 27, 2024 – UVa North Fork Research Center

**REQUESTED ACTION:** Nominate elected official member to serve on GO Virginia Region 9 Council

## MEMORANDUM

**To: Members of the Rappahannock-Rapidan Regional Commission**  
**From: Michelle Edwards, Environmental Programs Manager**  
**Date: August 15, 2023**  
**Subject: RRRC Food Council Priorities**

Following an economic analysis, asset assessment and extensive stakeholder input process, RRRC developed the Rappahannock-Rapidan Farm and Plan, which the Commission formally adopted in October 2015. This plan contains nine priority projects intended to be implemented by organizations in the region, including but not limited to RRRC. In winter 2023, RRRC's Rappahannock-Rapidan Food Policy Council determined that all of the priority projects have either been completed or are in-progress.

The Council developed a new list of priority projects to address current obstacles. The eight new priorities are intended to address topics that have become an area of emphasis for the Council, such as farm to school and food access, as well as needs not fully addressed by the existing priority projects, such as food and food business entrepreneurship. They would serve as additional priorities to the existing nine, rather than replacements. The Council voted to approve the new list at their June 12 meeting, and is requesting Commission adoption.

### 2015 Priority Projects

1. Create a regional food system council (complete)
2. Develop a local food regional marketing plan (complete)
3. Foster development of a community kitchen and food processing center (in progress)
4. Foster development of a food node/aggregation center (in progress)
5. Develop farmer mentorship programs (in progress)
6. Foster farm labor internship programs (in progress)
7. Conduct a regional farm labor needs assessment (in progress)
8. Explore feasibility of a mobile slaughter unit (in progress)
9. Promote existing resources (on-going)

### New Food Council Priority Projects – Approved by Council at June 12, 2023 meeting

- Improve farmland access, especially for underserved producers and beginning farmers
- Foster food business entrepreneurship, such as the Farm Bureau bull pen and George Washington Carver Food Enterprise Center

- Improve financial literacy among producers and local food businesses
- Foster equity, diversity and inclusion in the food system, for both producers and consumers
- Enhance farm to school efforts, including better connections between schools and producers
- Foster development of producer co-op(s) to meet institutional needs and those of other larger markets
- Support farmland conservation programs
- Support access to healthy, local foods for all in the region

**REQUESTED ACTION:** Approve the Food Policy Council's new priority project listing

**RAPPAHANNOCK-RAPIDAN REGIONAL FOOD POLICY COUNCIL**  
**APPOINTED MEMBERS**  
**As of August 2023**

**Locality Representatives**

- Culpeper County – Ashley Appling, VA Cooperative Extension, Family and Consumer Sciences
- Fauquier County – James Hilleary, Director, Fauquier County Agricultural Development
- Madison County – Tracey Gardner, Director, Madison County Economic Development & Tourism
- Orange County – Linda Blair, Orange County Schools, Food Services
- Rappahannock County – Kenner Love, VA Cooperative Extension, Agriculture and Natural Resources- Crop and Soil Sciences

**Food Policy Council Technical Advisory Members**

- Production – Michael Sands, Bean Hollow Grassfed (Vice Chair)
- Consumption – Ruth Welch, Rappahannock Food Pantry (Chair)
- Processing and Distribution – Tom McDougall, 4P Foods
- Health – Margy Thomas, PATH Foundation
- Education – Amanda Tackie, Fauquier County Schools, School Nutrition
- Farmland Preservation and Conservation – John McCarthy, Piedmont Environmental Council

**RRRC Liaison Member**

- Michelle Edwards, Rappahannock-Rapidan Regional Commission

## MEMORANDUM

**To: Members of the Rappahannock-Rapidan Regional Commission**  
**From: Patrick L. Mauney, Executive Director**  
**Date: August 15, 2023**  
**Subject: FY 2025 Local Funding Requests**

The Regional Commission expects to receive annual dues requests from local governments beginning in September in advance of the local budget cycle for FY 2025. Reviewing these requests in August eliminates the need for staff to request an extension from Fauquier County and facilitates staff's ability to submit dues requests upon receipt from each member jurisdiction thereafter.

The Regional Commission annually submits two funding requests to member local governments – annual per capita dues and Foothills Housing Network capacity funding.

### Per Capita Request

When Fauquier County moved to a two-year budget cycle in FY 2015, the Commission's administrative policy has been to hold local per capita funding requests steady for the two-year period and to only make a population adjustment every other year. As a reminder, the Regional Commission By-Laws state that the U.S. Census and the Census population estimates program as the official source for population figures used for per capita requests.

Included here are a 15-year history of per capita dues, summary of dues from 18/21 regional commissions in Virginia, and projected dues contributions for FY 2025 and FY 2026 at the existing rate.

The current per capita rate in \$0.83 and is unchanged since FY 2017. In those eight years, population increases have increased the total dues from \$143,555 to \$156,486 (projected FY 2025 at \$0.83), or 9.01%. During the same period, RRRC's overall revenues have increased 145% and staffing has grown from 7 (6.5 FTE) to 12 (11.25 FTE) almost exclusively due to state, federal and non-profit grant funding. When removing significant pass-through funding from the PDC Housing Development Program in the FY 2024 budget, RRRC's revenues have increased 77% over eight years.

A \$.01 change in the per capita rate based on 2022 Census population estimates provides an adjustment of \$1,885.38 in total.

### Foothills Housing Network Capacity Request

As you may recall, the Regional Commission serves as the Lead Agency for the Foothills Housing Network (FHN). FHN is the regional Local Planning Group for homeless services. RRRC first took on this role in 2012 due to changes in Federal and State grant funding requirements which necessitated a regional approach to homeless response systems.

In FY 2016, the Commission requested funding from each member local government to support the Lead Agency role. Grant funding received from Federal and State sources provides minimal funding for administration and planning, and the local funding allows for RRRC to staff a full-time position to manage and administer grants and fulfill mandatory Local Planning Group requirements in coordination with partners throughout the region. Partners include, but are not limited to, Social Services departments, emergency shelters, housing providers, non-profit housing organizations, and law enforcement personnel.

In addition to RRRC staff support, the local investment is also available for use as in-kind matching funds for grants to RRRC and other FHN members totaling greater than \$1 million in FY 2024. Most of these funds support non-profit partners in the region and are not reflected in RRRC's budget.

Staff requests a flat rate for the FY 2025 housing request. The formula developed in FY 2016 is based on a \$3,000 floor amount from each County and a \$.20 per capita rate, using 2013 population estimates, for all jurisdictions. These amounts are shown in the attachment.

**REQUESTED ACTION:** Consider adoption of per capita and regional housing funding requests, and authorize staff to submit requests to member local governments based on local budget calendars

## Rappahannock-Rapidan Regional Commission

Item C.

### Per Capita Dues Rate History

	Adopted Date	Adopted Rate	Per Capita Total Funding	Population Source
<b>FY 2025</b>	<b>Aug-22</b>	\$0.83	\$156,486.00	2022 Census Estimates

<b>Council Meeting Date:</b>	September 12 <sup>th</sup> , 2023.
<b>Agenda Title:</b>	18 Court Street Building updates.
<b>Requested Action:</b>	Receive the update of the 18 Court Street building and proposals for the spaced received by the Town.
<b>Department / Agency Lead:</b>	Town Manager
<b>Staff Lead:</b>	Frank Cassidy

## EXECUTIVE SUMMARY

The vacant 18 Court Street building has recently undergone light renovations to the space to facilitate its use by Town Staff and outside agencies.

Staff has been approached by Fauquier County Government and the Veterans of Foreign Wars Post 9835 for a potential Public and Private Partnership for the use of the 18 Court Street Building.

## BACKGROUND

The historic building at 18 Court Street, originally constructed for and occupied by the Fauquier National Bank in 1925. Thanks to the generosity of Edward L. Stephenson the Town began to occupy the space and use it as a Town hall in 1973. In 2019, the Town Council recognized the needs of the Town were surpassing the use of 18 Court Street and directed Staff to explore options for a more unified space for staff, residents, and visitors of the Town. The Current Town Hall building was identified as an option for expansion of the operations and as a more fitting space for the services offered by the Town. The new Town Hall building better aligned with the priorities of Council laid out in Plan Warrenton 2040 to better serve the public and cerate efficiencies.

After the staff was transitioned to the new Town Hall location, the building at 18 Court Street remained vacant. Staff began the process of removal of the old Town Council Dias and general maintenance to the building.

Focusing on the Priorities of the Council laid out in Plan Warrenton 2040 to better serve the public and cerate efficiencies, staff identified multiple opportunities for the building to serve the Town in a new capacity and role. Staff began outfitting the building with infrastructure needs and performed necessary improvements to the flooring and spaces to facilitate the use of the space for meetings, trainings, emergency response, and community outreach.

The Town has received two inquiries regarding potential Public Private Partnerships for the use of the space at 18 Court Street.

**Fauquier County Government:** The Fauquier County Government has approached the Town for potential use of the space for meetings, overflow seating, Court Proceedings, and other uses.

**VFW Post 9835:** The Leadership of VFW Post 9835 have reached out to staff to being the conversation on a Public / Private partnership for the use of 18 Court Street as a meeting and office space for the VFW. For over 75 years, the Robert E. Laing Memorial VFW Post 9835 has not had a home location with office and meeting space.

**STAFF RECOMMENDATION**

---

Consider the inquiries regarding public private partnerships and direct staff accordingly.

**Fiscal Impact**

A fiscal impact may be necessary for the outfitting of the space, and additional necessary renovations to the building. Offsets may be found from that impact by lease agreements, or split funding from other sources.

**Legal Impact**

A potential Public Private Partnerships will have a legal impact as the Lease agreements, Memorandum of Understandings, and defined polices are reviewed for the proposals.

<b>Council Meeting Date:</b>	September 12, 2023
<b>Agenda Title:</b>	Human Capital Programs Update
<b>Requested Action:</b>	Receive the report from Human Capital Department
<b>Department / Agency</b>	Human Capital Department
<b>Lead:</b>	
<b>Staff Lead:</b>	Kasey Braun, Human Capital Manager

## EXECUTIVE SUMMARY

This staff report provides an update on Human Capital department program initiatives that align with the Town Councils *Resiliency of the workforce* strategic initiative.

## BACKGROUND

Human Capital's main objective is to empower Town employees to contribute to the Town and its residents at optimum levels that will pave the way towards success by meeting the Town residents, Town Manager, and Town Councils overall initiatives. And, in an effort for Town leadership and staff to continue to achieve the *Resiliency of the workforce* strategic initiative set by Town Council, Human Capital has developed strategic goals that identify key program actions needed to increase efficiencies across Town operations. These initiatives are designed to enhance the strengths of our workforce that are advantageous for the Town as a whole, such as robust training and development, succession planning, and risk and safety programs. Therefore, Human Capital will work closely with Town Leadership to continue to develop programs that cultivate and support the strengths of our workforce.

### Service Level/Policy Impact

The Town Councils recent approval of the compensation and pay plan adjustments showcases their continuous commitment of employee advocacy and empowerment. This also directly aligns with the Town's recruitment and retention programs that promote for a highly skilled and adaptable workforce that fosters a safe, efficient, and diverse workforce.

Over the last year, we have seen positive impacts to our recruiting and retention efforts. Some of the impacts are listed below:

- Increase in number of applications reviewed and received by 14% and 29%. *Data collected from January 1, 2022 – December 31, 2022 and January 1, 2023 – August 28, 2023.*

- Decreased time-to-hire for all departments by 8%. *Data collected from January 1, 2022 – December 31, 2022 and January 1, 2023 – August 28, 2023.*
- Strengthening the foundation of the Town’s training and development program initiatives by defining program boundaries.
- Redefining the performance review program compensation and accountability measures.
- Revitalization of risk management and emergency services program accountability.

In addition to the above factors, the Town is undergoing an organizational staffing study that examines the current staffing structure through internal and external benchmarking analysis to identify staffing and workflow efficiencies and inefficiencies. This study will navigate the Town operations through this restructure by identifying optimal best practices that will enhance overall staffing structures and program efficiencies. This study is anticipated to be completed by 4<sup>th</sup> quarter 2023.

Lastly, it is important to note that all Human Capital strategic initiatives directly correlate with accomplishing the goals within the Plan Warrenton 2040. In order to meet these, there must be a highly skilled and adaptable workforce that can continue to provide a high level of services and public amenities for all citizens and visitors to enjoy. Therefore, through the enhancement of our internal Human Capital programs to include the training and development program, the Towns workforce will continue to develop their skills to meet the needs of the Plan Warrenton 2040 objectives, such as, historical preservation, being fiscally responsible, and by educating and promoting awareness of all Town businesses and amenities. Ultimately, the main objective of cultivating a strong workforce is to be able to meet the overall purpose of Town Council strategic goals and the Plan Warrenton 2040 initiatives.

### **Fiscal Impact**

There are no fiscal impacts at this time. We are building upon an already set foundation and approved budgeted items. We will continue to review and identify the strengths and improvements as applicable to these programs and provide any additional budgetary requests in the future budgets.

### **Legal Impact**

There are no legal impact at this time. However, the training and development and safety and risk program initiatives will assist in the decrease of workers compensation claims as well as increase the employee’s accountability on safety which provides for a safer work environment for staff.

<b>Council Meeting Date:</b>	September 12, 2023
<b>Agenda Title:</b>	Warrenton Police Department Overview
<b>Requested Action:</b>	Receive the report from the Police Department
<b>Department / Agency Lead:</b>	Police Department
<b>Staff Lead:</b>	Timothy M. Carter, Chief of Police

## EXECUTIVE SUMMARY

This staff report provides an overview of the Warrenton Police Department and its current and future initiatives and programs.

## BACKGROUND

The mission of the Warrenton Police Department is to work in partnership with the residents and businesses of our community to provide a safe and secure environment. With community service as our foundation, we are driven to enhance the quality of life by providing effective law enforcement services through transparent and impartial policing.

### Service Level/Policy Impact

The Warrenton Police Department has an authorized capacity of 28 sworn officers and 4 civilian personnel. Currently sworn staffing is at 27 officers, two of which are in the law enforcement academy and one who will be attending the next academy in October. It is anticipated that the remaining vacancy will be filled shortly. That vacancy was created by the retirement of a tenured officer.

This year the Police Department has promoted Lt. Andrew Arnold to Deputy Chief of Police, Sgt. Justin Pierce to Lieutenant, Officer Stephen Hall to Sergeant, Officer Maribeth Howser to Corporal, and Detective Corporal Michael Gemmell to Detective Sergeant. These promotions all fill important operational needs and allow the department to maintain an acceptable level of service.

The Warrenton Police Department is currently accredited through the Virginia Law Enforcement Professional Standards Commission (VLEPSC). Accreditation is a systematic, internal review of policies, procedures, training, and operations measured against an accrediting body's standards manual to prove compliance. Accreditation helps police departments operate more professionally, justify their operations, and promote trust in their community. The Warrenton Police Department has been a State-accredited agency since 2007.

The Police Department has several programs designed to foster community engagement. Two of them are the Community Action Team (CAT21) and the Police/Church Coalition. The Community Action Team was

formed in June 2020 to align the Warrenton Police Department's Policies with 21st Century best policing practices. The ultimate objective of the Community Action Team is to help enhance the level of trust and understanding between the community and the Warrenton Police Department. To that end, the Team meets regularly to discuss Warrenton Police Department events and operations, and to review Police Department policies and procedures to make sure they comply with present standards and the community's expectations.

The Church Coalition is a police-community outreach initiative created several years ago to create unity and understanding, break down divides, increase mutual respect, and spur ongoing collaboration through the faith community. The group meets quarterly and welcomes all local faith leaders. Police Department events, initiatives, and policy/procedures are addressed in this group as well as ways to deal with community challenges such as those facing the unhoused and those battling with addiction.

The Police Department is involved regularly with numerous community policing initiatives to include Drug Take Back initiatives, our Community Police Academy, See It In a Different Light, TRIAD, National Night Out, Shop with a Cop, Coffee with a Cop, police bicycle patrols, Special Olympics events such as the Law Enforcement Torch Run, Project Lifesaver International, holiday shopping security details, commercial surveys/security assessments, patrol checks (businesses and residences, and community walks, to name a few. Our agency also incorporates the following programs/strategies to further meet the needs of the community:

- Processes to reciprocate the flow of information to citizens and communities (PIO & Town Traffic emails, social media, and Town website)
- Methodologies to solicit, evaluate and act upon feedback from citizens and communities to better measure effectiveness of services, and community perception (GuardianScore program)
- Crisis Intervention Team training (mental health response)
- Narcan/Naloxone Training and Deployment (in partnership with Department of Health)
- Body Worn Camera program (increase transparency and accountability)
- Community Meet & Greet events

On August 1, the Police Department hosted National Night Out (NNO) at the Warrenton Aquatic and Recreation Facility (WARF). National Night Out is an annual community-building campaign that promotes police-community partnerships and neighborhood camaraderie to make our neighborhoods safer, more caring places to live. For this event, the Police Department partnered with the Parks and Recreation and Public Works Departments. Also participating in the event was the Fauquier County Sheriff's Office, Virginia State Police, Federal Bureau of Investigation, Warrenton Volunteer Fire Company, and numerous local businesses, civic groups, and community organizations. The event was a huge success and drew the largest crowd for a NNO event in the post-Covid era.

Looking to the future, the Police Department is focusing on working with the Department of Social Services and other community partners to create a more effective response program for engaging with and assisting our unhoused population.

The Police Department is also working toward national accreditation through CALEA, the Commission on Accreditation for Law Enforcement Agencies. While state accreditation is a proud achievement, accreditation at the national level is a more rigorous and time-intensive process. Obtaining such accreditation is a sign of an agency's investment and commitment to excellence at the highest level.

---

The Police Department is committed to keeping the Town’s crime rate low and, using crime data as a starting point, uses a combination of focused deterrence, proactive policing, building/strengthening community trust, and strengthening relationships with community partners to do so. Our current response time is below the national average for law enforcement agencies.

Traffic safety and enforcement continue to be among the most important issues for Town citizens. Traffic enforcement went through necessary changes during the Covid pandemic and is now returning to its pre-Covid form. As a result, enforcement efforts and numbers have significantly increased this calendar year. The implementation of a formal traffic safety program, in conjunction with the more efficient handling of traffic complaints/issues, will yield a more effective response and lead to safer streets.

The Police Department is focused on accomplishing the goals set forth in Plan Warrenton 2040. In particular, the Police Department meets goal CF-2 by its responsive nature, community engagement, and the effectiveness of its programs. Goal CF-2.1 is met through the Department providing an acceptable level of service through the proper staffing and acceptable response times. And Goal CF-2.5 is met through the Department’s continued cooperative agreements with the Fauquier County Sheriff’s Office, Fauquier County Department of Social Services, and other County agencies to meet the public safety needs of the community.

---

**Fiscal Impact**

There is no fiscal impact to the Town at this time. The Warrenton Police Department is implementing the aforementioned programs and initiatives using current funding sources.

**Legal Impact**

There is no legal impact to the Town at this time.

<b>Council Meeting Date:</b>	September 12 <sup>th</sup> , 2023.
<b>Agenda Title:</b>	Moving of the Strategic Retreat Date
<b>Requested Action:</b>	Direct staff on the changes to the strategic retreat date.
<b>Department / Agency Lead:</b>	Town Council
<b>Staff Lead:</b>	Stephen Clough

## EXECUTIVE SUMMARY

The original Strategic Retreat date of September 16<sup>th</sup>, 2023, no longer has the ability to have a facilitator from the Virginia Institute of Government or other outside facilitators present at the meeting.

Ms. Jane Dittmar from VIG and staff have worked together on the following recommendation for the Council's strategic retreat plan.

- 1) Hold a work session at the October Town Council meeting to review the strategic goals laid out from the September 2022, Strategic retreat and discuss priorities from Council and Staff for the upcoming year.
- 2) After the work session, staff will begin to implement the priorities as the Budget process for 2024-2025 begins.
- 3) In late January, hold a strategic retreat with VIG or another facilitator to address the strategic goals and other topics identified by staff and Council.
- 4) In Late February, Hold a budget retreat for a preview of the implementation of the new strategic goals and the upcoming budget cycle for 2023-2024.

## BACKGROUND

On September 24<sup>th</sup>, 2022, the Warrenton Town Council met with Ms. Jane Dittmar of the Virginia Institute of Government for a Strategic Retreat. This retreat allowed the Council to begin to work on biannual goals and set direction for Staff to begin work on the FY24 Budget. The September 2023 Retreat will begin the budget process for the Town and allow the Council to set goals and direct policy decisions to align itself with Plan Warrenton 2040.

At the June 13<sup>th</sup>, 2023, Regular Town Council Meeting, a resolution was adopted to hold the Strategic retreat on September 16<sup>th</sup>, 2023, at the Warrenton Police Department.

Discussions with the Virginia Institute of Government and other facilitators were held to determine a recommendation to the Council for the facilitator.

Due to unexpected impacts to the schedule, one facilitator had an unexpected narrowing of their ability to conduct the strategic retreat thus rendering the September 16<sup>th</sup>, date unavailable. Additionally, VIG no longer had availability for the requested date after review of their schedule.

Based on the recommendation from Ms. Jane Dittmar, staff recommends holding the strategic retreat in late January of 2024.

**STAFF RECOMMENDATION**

---

With the guidance of the Virginia Institute of Government, staff recommends the following actions:

- 1) Hold a work session at the October Town Council meeting to review the strategic goals laid out from the September 2022, Strategic retreat and discuss priorities from Council and Staff for the upcoming year.
- 2) After the work session, staff will begin to implement the priorities as the Budget process for 2024-2025 begins.
- 3) In late January, hold a strategic retreat with VIG or another facilitator to address the strategic goals and other topics identified by staff and Council.
- 4) In Late February, Hold a budget retreat for a preview of the implementation of the new strategic goals and the upcoming budget cycle for 2023-2024.

**Service Level/Policy Impact**

The strategic retreat will allow the Council to set goals and direct staff directly impacting all service levels of the Town and affecting all aspects of Plan Warrenton 2040.

**Fiscal Impact**

Some locations have an additional financial impact for rental costs or for streaming costs if live streaming or remote participation is requested by the Council.

**Legal Impact**

No Legal impact has been identified at this time.

- 1. Memo from Ms. Jane Dittmar
- 2. Strategic Retreat Report from VIG Fall 2022.

UNIVERSITY  
of VIRGINIA

Weldon Cooper Center  
for Public Service  
Virginia Institute of Government

TO: Frank Cassidy, Interim Town Manager  
Stephen Clough, Clerk, Warrenton Town Council  
FR: Charles Hartgrove, ICMA-CM, Managing Director  
Jane Dittmar, Consultant  
Virginia Institute of Government  
RE: Planning Meeting Follow Up  
DT: September 1, 2023

Thank you for your time this week to discuss the possibility of the Virginia Institute of Government (VIG) assisting Warrenton’s Town Council in developing a strategic plan to serve as a roadmap for the Town for the next three or more years.

The process we recommend is the following:

1. Schedule an early 2024 extended work session for the newly seated Council to develop the strategic plan, as well as consider other governing issues faced by the Council. This retreat will be designed and facilitated by VIG. You have tentatively Identified the weekends of January 27 or February 2 for this retreat. VIG will hold the option of one of these dates for Warrenton provided Council is able to confirm arrangements with VIG by September 30. Because of the number of jurisdictions hoping to develop plans in the first quarter of next year, it will be impossible to hold this time after that.
2. Reach consensus on whether, besides executing the extended work session, you wish to retain VIG to write the draft plan for Council consideration and adoption. Finally, consider whether you wish VIG to work with the professional staff of the Town to determine milestones, metrics and an internal schedule for periodic reviews to measure successful execution of the plan.
3. Review the After-Action Report, completed by VIG for the Council last fall, to determine if the priorities identified at the September 2022 retreat still encompass the key priorities of the current Council. This can be reviewed at a Town Council work session sometime this fall. We will review the minutes and the video of this work session for insights to determine if Council direction remains the same or whether it may have shifted over the last 12 months. This will be part of our preparation to design the agenda for the 2024 Council retreat. So, if you do not have consensus at your work session, we can address this at the retreat.

VIG will draft a scope of work for Council consideration as soon as you let us know what process you would like to follow. The Town of Warrenton is an important VIG client and we stand ready to support the Town’s progress so please do not hesitate to call, if you wish to discuss this further.

## Warrenton Town Council Fall Retreat After Action Summary & Recommendations

### 1. Executive Summary

The Town Council retreat revisited the priorities identified at its 2019 retreat, and the goals and themes of the Town’s adopted Plan Warrenton 2040 Comprehensive Plan.

This is the first retreat since 2019 due to the pandemic, during which the Town, like many others, operated on an emergency basis. Many capital projects were delayed during the pandemic, while basic programs and services were maintained.

This year’s retreat provides a starting point for the Council to continue its deliberations toward reaching consensus on how to move from the 2040 plan to the 6-year Capital Improvement Program (CIP), to the annual budget. The fiscal year 2024 annual budget, that will be adopted by the Town Council in June 2023, should reflect the Council’s short-term strategic priorities (1-5 years), consistent with the long-term goals of the Plan Warrenton 2040 Comprehensive Plan.

Based on the Council’s discussions of the priorities identified in 2019, and the emerging priorities discussed at this year’s retreat, each of the following issues (see diagram below) will require further discussion and consideration over the next few months, for Council to reach consensus and provide necessary direction to the Town Manager and professional staff.

1. **Resiliency & Preparedness** – Identifying key actions and initiatives that will protect and promote a successful future for Warrenton specifically in the areas of (1) financial and workforce resources and (2) technology and utility investments.
2. **Boundary Line Adjustment** – including overall relationship with the County and the process to finish this project. Resume regularly scheduled Town/County Liaison Committee meetings with a particular focus on boundary line adjustments.
3. **Affordable Housing** – including how the County and Non-Governmental Organizations can assist in this challenge.
4. **Branding** – Determining the next steps in this ongoing goal.

## Recommendations:

To build on the work of the September 24 retreat and to be well positioned for the Town's next fiscal planning cycle it would be advisable to review these initial discussions in relation to existing policy guiding documents.

The Plan Warrenton 2040 Comprehensive Plan is a guiding document for future decisions regarding development, preservation, public facilities, and other key components of community life. Although the plan seeks to provide a clear vision to help steer the Town, it provides a long term, 20-year, development horizon and is therefore very general in nature.

Accordingly, the Council may want to consider a shorter-term strategic plan that would provide the necessary 1–5-year prioritized policy guidance to the Town Manager and professional staff that can then be incorporated into the Town's Six-Year Capital Improvement program (CIP) and Annual Fiscal Plans.

A shorter term, 1–5-year, planning document would help the Council and the community realize its long-term vision by establishing goals and objectives in a logical, systematic, incremental manner.

Such a plan could look like the diagram below.

Once Council achieves further consensus on priorities, the professional staff can begin to:

1. Identify staff resources needed to execute the initiatives that will address these priorities
2. Identify the resources needed to pursue these priorities and develop program and project plans to achieve the desired goals. These resources include funding; technology, and human resources including managerial time.
3. It is also advisable to adopt project mapping software so initiatives can be reviewed for planning purposes and analyzed for milestone progress.

## 1. Overview of the Fall Retreat

### Retreat Preparation

During the weeks preceding the Warrenton Town Council planning session, 1-hour individual interviews were conducted to prepare for the retreat. The following people participated in a one-on-one format via video with Jane Dittmar from the Virginia Institute of Government:

#### **Council Members (9)**

H. E. Carter Neville – Mayor  
James N. Hartman – Vice Mayor (Ward 4)  
Renard Carlos – At Large Member  
Sean Polster – At Large Member  
Heather D. Sutphin – Ward 1  
William Semple II – Ward 2  
Brett A. Hamby – Ward 3  
Jay Heroux – Ward 5 (newly appointed)  
Kevin Carter – Ward 5 (recently resigned)

#### **Professional Staff (10)**

Chris Martino – Interim Town Manager  
Tommy Cureton – Deputy Town Manager  
Stephen Clough – Town Clerk  
Kasey Braun- Human Capital Director  
Frank Cassidy – Public Works & Utilities Director  
Rob Walton- Community Development Director  
Denise Harris – Planning Manager  
Michael Kochis – Chief of Police  
Stephanie Miller – Finance Director  
Jonathan Stewart – IT Director  
Kelly Koernig – Parks & Recreation (Acting) Director

## The Retreat

On September 24, 2022, The Warrenton Town Council convened a day long retreat at the Warrenton Police station. Those present included:

### **Council Members (8)**

H. E. Carter Neville – Mayor  
 James N. Hartman – Vice Mayor (Ward 4)  
 Renard Carlos – At Large Member  
 Sean Polster – At Large Member  
 Heather D. Sutphin – Ward 1  
 William Semple II – Ward 2  
 Brett A. Hamby – Ward 3  
 Jay Heroux – Ward 5

### **Professional Staff (4)**

Chris Martino – Interim Town Manager  
 Tommy Cureton – Deputy Town Manager  
 Stephen Clough – Town Clerk  
 Stephen Bruck – IT Specialist

### **Facilitator**

Jane Dittmar – Virginia Institute of Government

## RETREAT AGENDA

- 1) Roles & Responsibilities of Elected Bodies and Professional Staff
- 2) Norms and Expectations among Council Members
- 3) Communication Strategies for Council Members
- 4) Challenges and Opportunities facing the Town
- 5) Existing Priorities found in the last Strategic and Comprehensive Plans
- 6) Emerging Priorities based on Challenges and Opportunities facing the Town
- 7) Next steps

## 1. Roles and Responsibilities

The science and philosophy behind highly performing elected bodies and their staff was discussed. Material from national and international organizations was reviewed.

### **Town Council**

There was agreement that the Council is the policy maker and responsible for addressing the Town's long-term future by adopting the capital improvement and comprehensive plans, formulating annually a budget and setting the tax rate, enacting local ordinances and making land use determinations. The Council also understands its role hiring the Town Manager and Town Attorney (or by securing outside legal services).

### **Town Manager & Staff**

There was agreement the Town Manager is responsible for hiring, reviewing and retaining professional staff to execute Council policy and for ensuring high-level service delivery for Town residents. Discussion followed whether it was appropriate for individual Council members to work directly with staff instead of going through the Manager with constituent service requests. Utilizing the Town Manager to triage requests is the protocol described in the 2024 Warrenton Town Council Handbook. The handbook procedure was reaffirmed and Council members decided to review protocols on handling constituent service and other requests when the new Manager is on boarded.

### **Preferences for how Council Would Like Information**

The group also discussed their preference in receiving briefings and recommendations from staff. There was consensus that an executive summary of findings and the recommendation of staff is a format that would be well received. There was not general consensus on how many options should be offered. Some members preferred just one recommendation with supporting justification. Others wanted a recommendation that included all the options considered by staff, and besides the supporting justification for the final recommendation, they wanted a brief explanation as to why the other options were rejected. One member did not like having three options to consider. There should be further discussion about how to present the staff recommendation found in their executive summaries.

## 2. Norms and Expectations

### **A. Summary**

During individual Council members' interviews, the topic of norms of behavior among members came up frequently. This subject was added to the agenda. Besides stated norms found in the 2022 Warrenton Town Council Handbook, the Council discussed norms that were important to them individually and as a whole. Questions were posed such as:

- 1) How do we develop and find consensus on our norms?
- 2) How do we (shall we) evolve our norms?
- 3) How do we communicate our norms to new members?
- 4) What do we do if a norm is violated unintentionally?
- 5) What should we do if a member needs to violate a norm?

## B. Individual interviews

During the individual interviews the following themes emerged:

- 1) **One Voice** – Members should bring policy and requests to the full Council so by majority, the Council can speak as “one voice”.
- 2) **No Surprises** – let your fellow members know in advance if they might be surprised by a motion or announcement
- 3) **General Decorum** – treat other members as you want to be treated
- 4) **The actions of a fellow member v. the member** – criticize actions or policies being promoted by a member, not the member themselves and keep language from becoming personal. Exercise care in social media posts and other group communication.
- 5) **My Ward – Our Town** – recognize and respect the ward members who represent a particular ward and all members should understand that the Council considers the good of the whole town.
- 6) **Horse trading votes** – when horse trading ward to ward, ensure that these votes are good for the whole town.
- 7) **Handling “breaches”** – reach out to understand a breach before reacting to what you assume was the motivation.

## C. Exercise results

Members broke into four groups of two each to discuss norms and expectations. The following highlights illustrate the priorities of the members:

- 1) **Boundaries**
  - a. **Ward boundaries** – those in wards request that they be notified if another member has town business to discuss or attend to in their ward. That said, some members didn’t want the town to be too siloed by ward boundaries and wanted everyone to vote on behalf of the entire town.
  - b. **Staff boundaries** – “don’t put staff in the middle on issues”
  - c.

## 2) Respect for each other

There was also good consensus around the showing of mutual respect by avoiding surprising a fellow member by talking outside of official meetings, coming prepared to meetings, accepting each other's differences and handling disagreements or concerns in private and preferably in person.

## 3) Handling Breaches

Discussion included the recommendation that any breach should be addressed carefully with respect on both sides.

## 3. Communication Strategies & Tools

Some time was devoted on tools and strategies for effective communication.

## 4. Existing Priorities

### A. Summary

The Council spent time reviewing existing priorities found in the Comprehensive Plan "Plan Warrenton 2040" and in the findings of the last strategic plan held in 2019.

Plan Warrenton 2040 serves as the official document tying together community features with the overall vision for its future. It is broken into 7 areas of community policy and development:

- 1) Historic resources
- 2) Community facilities
- 3) Housing
- 4) Open space, parks & environment
- 5) Transportation and circulation
- 6) Economic and fiscal resilience
- 7) Land use and character district plan

B The strategic plan created in 2019 identified the following priorities:

- 1) **Boundary Adjustment- Facilities** – From the Community Facilities section of the Comprehensive Plan
- 2) **Branding- Who, What, Where** – From both the Historic Resources section and the Economic and Fiscal Resilience sections of the Comprehensive Plan
- 3) **Recreation- Quality of Life Activities** - From the Open Space Parks and Environment section of the Comprehensive Plan
- 4) **Historic District - Boundaries** – from both the Historic Resources and Land Use and Character District Plan
- 5) **Gateways** – from both Transportation and Circulation section and the Land Use and Character District section of the Comprehensive Plan and
- 6) **Inventory of Affordable Housing** – from the Housing section of the Comprehensive Plan

### C Group Exercise – reaffirming existing priorities

Members broke into four groups of two each to discuss norms and responsibilities. The following highlights illustrate the goals of the members. The top priorities identified by all four groups were:

1. Successful completion of the **boundary line adjustment** project  
Top priority in two groups, number two priority in the other two groups  
This priority continues to be consistent with both the Comprehensive Plan, found in the Community Facilities section, and the 2019 Council Retreat findings.
2. Forward movement on addressing **the affordable housing shortage**  
Top priority in one group, Second priority in one group, third priority in two groups  
This priority continues to be consistent with both the Comprehensive Plan found in the Housing section and the 2019 Council Retreat findings.
3. Continue the **branding** initiative for the town  
Second priority in one group, third priority in one group, fourth priority in one group and fifth priority in one group. This priority continues to be consistent with both the Comprehensive Plan, found in the Historic Resources section and the Economic and Fiscal Resilience section, and the 2019 Council Retreat findings.
4. Honorable mentions were recorded for:
  - a) Recreation (mentioned twice)
  - b) Historic resources (mentioned twice)
  - c) Transportation, including walkability (mentioned twice)
  - d) Economic Development (mentioned once)

### D Group Exercise – Identifying Emerging Priorities

Members broke into four groups of two each to discuss emerging priorities. The following highlights illustrate the priorities of the members

There were a number of emerging priorities the Council considered. The two major emerging priorities centered on **resiliency and workforce**.

- 1) **Resiliency** came in as number one emerging priority. It was listed number one for three groups and one of the three groups listed it twice. Descriptors for resiliency included:
  - a) “financial”
  - b) “preparedness”, and
  - c) “preparedness for change”.

**2) Workforce**, arguably a subcategory of resiliency, was elevated to its own priority. It was listed as the number two issue for two groups and the number three issue for two groups. Descriptors included

- a) "Hiring Town Manager"
- b) "Employee retention"
- c) "Employee recruitment and retention", and
- d) "Protecting our workforce"

**3)** Honorable mentions were recorded for:

- a) Representing town demographics; honoring diversity (mentioned twice)
- b) Maintaining high level of trust with residents (mentioned once)
- c) Maintaining the qualities of Warrenton that make it distinctive (mentioned once)
- d) Preparing for the future embracing change (mentioned once)
- e) Preparing for climate change (mentioned once)

## 5. Next Steps

There are several events in the near future that are significant to Council working through these priorities. They are:

1. Fall (October/November 2022): Communication with the search firm regarding the qualities the Council wants in their next Manager.
2. Winter (December 2022-February 2023): Utilizing remaining work session(s) in 2022 to review the cost, action steps and timing of identified priorities for 2023. Also test the formats for explaining recommendations in executive summaries to determine which style suits the Council.
3. Winter (December 2022-January 2023): The November 2022 election will identify the several new members who will join the Council effective January 2023. Besides other materials, new member orientation can include a discussion of norms and expectations with other remaining members of the Council.
4. Winter (December 2022-January 2023): The on boarding of new Council members
5. Winter (February 2023): Conduct a fiscal planning retreat where for Council to assess the Town's financial strength and stability, review recent financial trends, identify any warning signs and provide guidance and direction regarding the desired quality and level of programs and services, capital investments and how to allocate the Town's limited resource to move ahead on its priority initiatives.
6. Winter (February 2023): The on boarding of the new Town Manager.

- 7. Spring (March-April 2023): Staff preparation of the proposed FY 2024 Annual Budget, the FY 2024 – FY 2029 6-year CIP and FY 2024 – FY 2028 year Budget. To do this there will need to be clear direction from Council on what priorities will be “slow walked” and which priorities should command the most discretionary resources in the next budget cycle.

<b>Council Meeting Date:</b>	September 7 <sup>th</sup> , 2022
<b>Agenda Title:</b>	Drought Conditions Currently Affecting the Town and the Impact on Water Resources
<b>Requested Action:</b>	Review and consider approval of the Resolution Authorizing the Town Manager to Declare a Water Emergency
<b>Department / Agency Lead:</b>	Town Manager
<b>Staff Lead:</b>	Frank Cassidy

## EXECUTIVE SUMMARY

This special meeting has been called to inform the Town Council of the drought conditions currently affecting the Town and the impact on the water resources. The purpose of this meeting is to prepare the Council for potentially imminent actions that need to be taken to preserve the resources of the Town for its basic functions. Staff recommends granting the authority to the Town Manager the authority to Declare a Water Emergency.

**From the Fauquier County Government:** The Virginia Department of Environmental Quality (DEQ) on August 30, 2023, issued drought watch and warning advisories across Virginia. A Drought Watch Advisory was issued for Fauquier County. According to the Virginia Drought Monitoring Task Force, surface and groundwater indicators such as precipitation, groundwater, stream flows have continued to decline throughout the past fourteen-day monitoring period, with near or at record low observations already this year. Additionally, forecasts in the upcoming ten days indicate high heat and no projected precipitation.

Fauquier County is currently experiencing drought conditions. The Department of A drought is a period of Drier than normal conditions. While there have been instances of heavy rain in Warrenton for the summer of 2023, they have been short duration events that have not deposited much water in the region. The lack of precipitation has impacted the available use of Water.

The Town is currently in water conservation measure condition 1- Voluntary Water restrictions.

The Comprehensive Drought management and emergence preparedness plan for Warrenton, Remington, the Plains, Fauquier County, Fauquier County Water and Sanitation Authority is attached.

## BACKGROUND

**From the Fauquier County Government:** The Virginia Department of Environmental Quality (DEQ) on August 30, 2023, issued drought watch and warning advisories across Virginia. A Drought Watch Advisory

was issued for Fauquier County. According to the Virginia Drought Monitoring Task Force, surface and groundwater indicators such as precipitation, groundwater, stream flows have continued to decline throughout the past fourteen-day monitoring period, with near or at record low observations already this year. Additionally, forecasts in the upcoming ten days indicate high heat and no projected precipitation.

**Sec. 17-146. - Authority to declare water emergencies.** During the continued existence of climatic, hydrological and other extraordinary conditions the protection of the health, safety and welfare of the residents of the Town of Warrenton may require that certain uses of water, not essential to public health, safety and welfare, be reduced, restricted or curtailed. As the shortage of potable water becomes increasingly more critical, conservation measures to reduce consumption or curtail essential water use may be necessary.

The town manager, with the approval of the town council, is authorized to declare water emergencies affecting the use of water by persons and properties served by town water, inside and outside of the town boundaries, and to control and restrict the use of water during an emergency caused by a water shortage or other cause.

**Sec. 17-147. - Publication of declaration.**

Upon the declaration of a water emergency pursuant to section 17-146, the Town Manager shall immediately post a written notice of the emergency at the front door of town hall, in a newspaper of general circulation in the area, announce on television and radio and use any other appropriate means of communication.

**Sec. 17-148. - Use of water restricted.**

Upon the declaration of a water emergency pursuant to section 17-146, the town manager is authorized and directed to implement conservation measures by ordering the restricted use or absolute curtailment of the use of water for certain nonessential purposes for the duration of the water shortage in the manner hereinafter set out. In exercising this discretionary authority, and making the determinations set forth in section 17-150 thereof, the town manager shall give due consideration to water levels, available/usable storage on hand, draw down rates and the projected supply capability in source reservoirs in the Town of Warrenton, supply capacity, daily water consumption and consumption projections of the system's customers; prevailing and forecast weather conditions; fire service requirements; pipeline conditions including breakages, stoppages and leaks; estimates of minimum essential supplies to pre-serve public health and safety and such other data pertinent to the past, current and projected water demands.

All data collected and considered by the town manager shall be reduced to writing and maintained by the town manager.

On September 5<sup>th</sup>, 2022, the National Weather Service issued a heat advisory for the region citing record breaking heat across the east and southern United States of America. This heat advisory is bringing heat indexes of up to 107 degrees Fahrenheit through Thursday September 7<sup>th</sup>, 2023. The High heat is exacerbating the existing drought conditions.

**Sec. 17-149. - Limitation of restrictions.**

The provisions of this division, or regulations promulgated hereunder by the town manager, which are hereby authorized, shall not apply to any governmental activity, institution, business or industry which shall

be declared by the town manager, upon a proper showing, to be necessary for the public health, safety and welfare or the prevention of severe economic hardship or the substantial loss of employment. Any activity, institution, business or industry aggrieved by the finding of the town manager may appeal that decision to a water conservation appeals board appointed by the town council consisting of three members selected as follows: a single representative from the department of public utilities, and two citizens from the public at large.

**Sec. 17-150. - Water conservation measures.**

Upon a determination by the town manager of the existence of the following conditions, the town manager shall take the following actions; which shall apply to any person whose water supply is furnished from the town water system:

(a)**Condition 1.** When moderate but limited supplies of water are available, the town manager shall, through appropriate means, call upon the general population to employ prudent restraint in water usage, and to conserve water voluntarily by whatever methods available.

(b)**Condition 2.** When very limited supplies of water are available, the town manager shall order curtailment of less essential usages of water, including, but not limited to, one or more of the following:(1)The watering of shrubbery, trees, lawns, grass, plants, or any other vegetation, except indoor planting, greenhouse or nursery stocks and except limited watering for newly seeded lawns and watering by commercial nurseries of freshly planted plants upon planting and once a week for five (5) weeks following planting.(2)The washing of automobiles, trucks, trailers, boats, airplanes, or any other type of mobile equipment, except in facilities operating with a water recycling system approved by the director of public works; provided, however, that any facility operating with a water recycling system shall prominently display in public view a notice approved by the director of public works/utilities stating that such recycling system is in operation. In lieu of the provisions hereof, the town manager may curtail the hours of operation of commercial enterprises offering such services or which wash their equipment.(3)The washing of streets, driveways, parking lots, service station aprons, office buildings, exteriors of homes or apartments, or other outdoor surfaces.(4)The operation of any ornamental fountain or other structure making a similar use of water.(5)The filling of swimming and/or wading pools, or the refilling of swimming and/or wading pools which were drained after the effective date of the order.(6)The use of water from fire hydrants for any purpose other than fire suppression or other public emergency.(7)The serving of drinking water in restaurants, cafeterias or any other food establishment unless requested by the individual.

(c)**Condition 3.** When critically limited supplies of water are available, the town manager shall institute mandatory reductions on each customer as follows:(1)Industrial, institutional, commercial, governmental, wholesale and all other nonresidential customers shall be allotted a percentage reduction based on that customer's average monthly and/or quarterly previous calendar year's consumption.(2)Individual residential customers shall be limited to a specific volume or percentage reduction of water per quarter. If the allotted monthly/or quarterly water usage is exceeded, the customer shall be charged ten dollars (\$10.00) for every one thousand (1,000) gallons of water consumed above the allotted volume. Where prior consumption data is not available, the town manager shall estimate allocations based upon the data available from similar activities of equal intensity.

(d)**Condition 4.** When crucially limited supplies of water are available, the town manager shall restrict the use of water to purposes which are absolutely essential to life, health and safety. The determination of conditions 2, 3 and 4 by the town manager shall be accompanied by a written report which shall set out the criteria utilized and data relied upon in making such determination including a

narrative summary supporting the determination. Each report shall be available for public inspection in the town manager's office. The town manager shall forthwith transmit a copy of each report to the town council.

**Sec. 17-151. - Penalty.**

Any person who shall violate any of the provisions of this division, or of any of the conservation regulations promulgated by the town manager pursuant thereto, shall, Upon conviction thereof, in addition to additional charges set forth in subsection 17-150(c) be fined not less than one hundred dollars (\$100.00), nor more than two thousand five hundred dollars (\$2,500.00). Each act or each day's continuation of a violation shall be considered a separate offense. In addition to the foregoing, the town manager may suspend water service to any person continuing to violate the provisions of this ordinance or the regulations promulgated thereunder. If such water service is terminated, the person shall pay a re-connection fee of and all outstanding charges before service is restored.

**Sec. 17-152. - Notification of end of water emergency.**

The town manager shall notify the town council when, in his opinion, the water emergency situation no longer exists. Upon concurrence of the council, the water emergency shall be declared to have ended.

**STAFF RECOMMENDATION**

---

Consider a resolution that would grant the Town Manager the Authority to declare a Water Emergency if necessary, before the next regularly scheduled Town Council Meeting on September 12<sup>th</sup>, 2023. A deeper update will be available at that time.

Staff also recommends beginning the implementation of Condition 2 as follows while reserving the right to escalate as needed.

**Condition 2.** When very limited supplies of water are available, the town manager shall order curtailment of less essential usages of water, including, but not limited to, one or more of the following:

- (1) The watering of shrubbery, trees, lawns, grass, plants, or any other vegetation, except indoor planting, greenhouse or nursery stocks and except limited watering for newly seeded lawns and watering by commercial nurseries of freshly planted plants upon planting and once a week for five (5) weeks following planting.
- (2) The washing of automobiles, trucks, trailers, boats, airplanes, or any other type of mobile equipment, except in facilities operating with a water recycling system approved by the director of public works; provided, however, that any facility operating with a water recycling system shall prominently display in public view a notice approved by the director of public works/utilities stating that such recycling system is in operation. In lieu of the provisions hereof, the town manager may curtail the hours of operation of commercial enterprises offering such services or which wash their equipment.
- (3) The washing of streets, driveways, parking lots, service station aprons, office buildings, exteriors of homes or apartments, or other outdoor surfaces.
- (4) The operation of any ornamental fountain or other structure making a similar use of water.

(5) The filling of swimming and/or wading pools, or the refilling of swimming and/or wading pools which were drained after the effective date of the order.

(6) The use of water from fire hydrants for any purpose other than fire suppression or other public emergency.

**Service Level / Policy Impact**

Services may be impacted for the community due to water restrictions and the necessary enforcement.

**Fiscal Impact**

Additional funds may be necessary for advertisement, enforcement, and other emergency response through this Water Emergency.

**Legal Impact**

Potential Legal impact may be occurred due to enforcement measures.

**ATTACHMENTS**

## DROUGHT WATCH ADVISORY DECLARATION

**Richmond, Va.** -- In response to existing conditions and to increase public awareness of the potential for a significant drought, the Virginia Department of Environmental Quality (DEQ) has issued a drought watch advisory for two of the Drought Evaluation Regions within the Commonwealth. This advisory expands the existing drought watch advisory which includes the Eastern Shore Drought Evaluation Region.

Affected Drought Evaluation Regions and localities include:

- Eastern Shore: Accomack and Northampton counties. (Existing Drought Watch Continued)
- Northern Virginia: Fauquier, Loudoun, Prince William, Arlington, and Fairfax counties.
- York James: Charles City, James City, New Kent, and York counties, and the cities of Hampton, Newport News, Poquoson, and Williamsburg.

A drought watch advisory is intended to increase awareness of conditions and facilitate preparation for a drought when indicators in the Drought Assessment and Response Plan have

been met. The interagency Virginia Drought Monitoring Task Force considered the following in establishing a drought watch advisory:

- Much of the Commonwealth is below normal historic rainfall amounts for the past 14-day period, with lowest amounts noted within the Shenandoah Valley. Precipitation maps for the past 60 to 120-day period have shown continued dryness on the Eastern Shore, and in central and northern Virginia.
- Stream flows in the affected areas are below the 25<sup>th</sup> percentile of historical normal values. Limited precipitation is forecasted for the near future in these regions, and dry conditions are expected to continue.
- Groundwater levels for monitoring wells have shown continued declines in some regions. Levels are currently below the 5<sup>th</sup> percentile for some sites in the York-James and Northern Virginia drought evaluation regions. Additional wells below the 25<sup>th</sup> percentile persist in the Eastern Shore
- Soil moisture is below historic values

With this advisory, DEQ is sending notifications to all local governments, public water works and private sector water users in the affected areas, and is requesting that they prepare for the onset of a drought event by developing or reviewing existing water conservation and drought response plans. Through the drought watch advisory, Virginia is encouraging localities, public and private water suppliers and self-supplied water users in the affected localities to voluntarily take these steps to help protect current water supplies:

- Minimize nonessential water use.
- Review existing or develop new local water conservation and drought contingency plans, and take actions consistent with those plans.
- Include water conservation information on local websites and distribute water conservation information as broadly as possible.
- Continue monitoring the condition of public waterworks and self-supplied water systems in partnership with the Virginia Department of Health.
- Impose water use restrictions when consistent with local water supply conditions.
- Aggressively pursue leak detection and repair programs.

The next stage after a drought watch would be a “drought warning,” which would be issued if conditions warrant. Drought warning responses are required when the onset of a significant drought event is imminent. Water conservation and contingency plans that are already in place or have been prepared during a drought watch stage would begin to be implemented. In accordance with the Commonwealth’s Drought Assessment and Response Plan, water conservation activities at this Drought Watch stage would generally be voluntary. This does not preclude localities issuing mandatory restrictions if appropriate

See the current drought status on the [DEQ website](#).

###

### About DEQ

The Virginia Department of Environmental Quality protects and enhances Virginia’s environment and promotes the health and well being of the citizens of the commonwealth. We are committed to cleaner water, improved air quality and the productive re-use of contaminated land.

For more information, please visit [www.DEQ.Virginia.gov](http://www.DEQ.Virginia.gov).

**PRESS RELEASE  
FOR IMMEDIATE RELEASE**

September 1, 2023

**VIRGINIA DEQ ISSUES DROUGHT WATCH ADVISORY FOR FAUQUIER COUNTY**

**Warrenton, Virginia** – The Virginia Department of Environmental Quality (DEQ) on August 30, 2023, issued drought watch and warning advisories across Virginia. A Drought Watch Advisory was issued for Fauquier County. According to the Virginia Drought Monitoring Task Force, surface and groundwater indicators such as precipitation, groundwater, stream flows have continued to decline throughout the past fourteen-day monitoring period, with near or at record low observations already this year. Additionally, forecasts in the upcoming ten days indicate high heat and no projected precipitation.

In accordance with the Fauquier County Comprehensive Drought Management and Emergency Preparedness Plan and Fauquier County Code Chapter 19, Article II, when DEQ issues a drought watch, Fauquier County in consultation with the Fauquier County Water and Sanitation Authority (FCWSA) and Towns, will implement voluntary water conservation practices and provide access to ways individuals can conserve water usage. At this time, Fauquier County Government encourages all citizens to limit and conserve water usage particularly our citizens on private wells.

- Avoid watering during the hottest part of the day, which is typically 10 a.m. to 4 p.m.
- Avoid noncommercial washing of vehicles, boats, or other equipment.
- Run dishwashers and washing machines when full and avoid handwashing dishes.

For citizens on a public water system through FCWSA or a Town water system, please refer to their specific guidance at:

- <https://www.fcwsa.org>
- <https://www.warrentonva.gov>
- <https://www.remington-va.gov>

The County will continue to monitor DEQ guidance and advisory over the coming weeks. The County will issue updated guidance and restrictions, as advised by DEQ and in consultation with FCWSA and our Towns. The following provide specific guidance and protocols for Statewide and County level drought planning.

For DEQ: <https://www.deq.virginia.gov/our-programs/water/water-quantity/drought>

For Fauquier County's Comprehensive Drought Management and Emergency Preparedness Plan: <https://www.fauquiercounty.gov/home/showpublisheddocument/12951/638139461778070000>.

# VIRGINIA DROUGHT MONITORING TASK FORCE

## Drought Status Report

### August 24 2023

#### Summary

On Thursday August 24, 2023, the Virginia Drought Monitoring Task Force (DMTF) met to discuss the drought indicators identified by the Virginia Drought Assessment and Response Plan. Declines in surface and groundwater indicators have continued throughout the past fourteen-day period, with near record low observations at some stations within Northern Virginia and Shenandoah. The Task Force recommends Drought Watch for the Northern Virginia and York James evaluation regions, and maintaining watch within the Eastern Shore.

Due to continued declines in drought indicators and reported impacts to agriculture and public water supplies, the Task Force recommends elevating the Shenandoah drought evaluation region from Drought Watch to Drought Warning.

The DMTF reviewed the status of drought monitoring and hydrologic conditions in the Commonwealth of Virginia. Precipitation over the past 30-60 day period show focused rainfall events within central and small eastern portions of the state. Precipitation percent of normal over the recent seven and 14-day period show exceptional dryness focused within Shenandoah Valley and the majority of Virginia much below historical average. Area-averaged rainfall since the beginning of the current water year (October 1, 2022) has remained below long-term normal values for the Eastern Shore drought evaluation region. Precipitation for the Eastern Shore is within the 83rd percentile (See [DEQ website](#) for more info on drought indicators). The Task Force will continue closely monitoring drought indicator and is scheduled to meet on September 7, 2023.

Streamflow over the past 14-day period has shown widespread declines throughout the Commonwealth. Ranking as “Normal” flows are currently below the 25<sup>th</sup> percentile for eight of the 11 drought evaluation regions including; Shenandoah, Northern Coastal Plain, Northern Piedmont, Chowan, York James, Upper James, Northern Virginia, and Roanoke. Two drought evaluation regions rank within the “Warning” status including Northern Coastal Plain and Northern Piedmont. The Shenandoah is the only evaluation ranking within “Emergency” status below the 5<sup>th</sup> percentile.

Groundwater levels for monitoring wells in the Climate Response Network have shown continued declines within many northern, central, and eastern portions of the state. Levels are currently below the 10<sup>th</sup> percentile for four of 11 drought evaluation regions including Shenandoah, Roanoke, York James, and Northern Virginia. Additionally, two of 11 drought evaluation regions are below the 25<sup>th</sup> percentile including the Eastern Shore and Big Sandy.

Storage at major water supply reservoirs throughout Virginia remain within normal ranges at this time, with exception of the Skidmore Fork Lake (Switzer Lake) located within the Shenandoah drought evaluation region reported below normal.

The most recent weekly [U.S. Drought Monitor \(USDM\)](#) web page map for Virginia ([Appendix A](#), released August 24, 2023) showed abnormally dry (D0) conditions mapped across approximately 26% of the Commonwealth, and moderate drought (D1) conditions mapped across approximately 4.8% of the Commonwealth. Appendix B includes presentations from the United States Geological Survey.

### Reports:

The U.S. Army Corps of Engineers (USACE) reported that Lake Moomaw (Philpott Lake) and J. H. Kerr Reservoir have received below normal inflows over the past month. As Philpott hydropower units remain out of service, USACE continues coordinating with fisheries experts to maintain sufficient releases at Philpott to support downstream aquatic life.

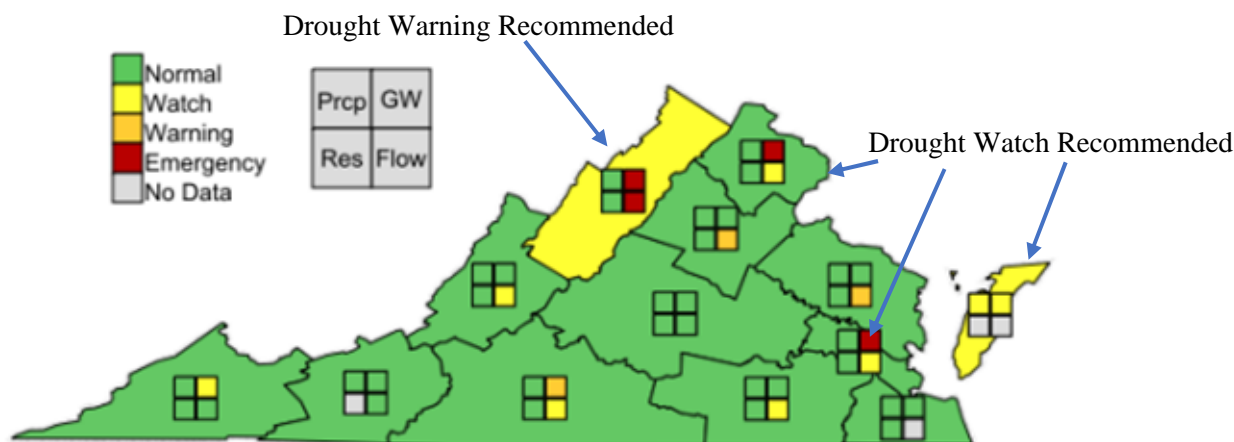

The DEQ report presents a map of current conditions of DEQ Drought Indicators, and summary of current conditions at the four large multi-purpose reservoirs listed as key reservoir storage indicators in the [Virginia Drought Assessment and Response Plan](#) (All remain above drought watch levels at this time).

### Virginia Department of Agriculture and Consumer Services

Producers in the Northern and Central Valley areas as well as the Northern region of the Commonwealth report negative impacts from dry conditions. In these areas, pastures are in poor condition. Additionally, corn and soybean crops are showing drought stress, which some producers expect will negatively affect yields.

### Virginia Department of Environmental Quality

**Conditions of DEQ Drought Indicators: Drought Watch Recommended for Northern Virginia & York-James evaluation regions. Drought Warning Recommended for Shenandoah evaluation region.**

## DEQ Daily Drought Indicator Status: 08/24/2023

### Precipitation Indicators:

#	Region	Start Date	End Date	Water Year % of Normal	Status
1	Eastern Shore	10/1/2022	8/23/2023	83.08	Watch
2	Northern Piedmont	10/1/2022	8/23/2023	90.87	Normal
3	Northern Coastal Plain	10/1/2022	8/23/2023	91.03	Normal
4	Shenandoah	10/1/2022	8/23/2023	92.42	Normal
5	Big Sandy	10/1/2022	8/23/2023	92.68	Normal
6	Northern Virginia	10/1/2022	8/23/2023	95.47	Normal
7	Southeast Virginia	10/1/2022	8/23/2023	97.06	Normal
8	Middle James	10/1/2022	8/23/2023	99.63	Normal
9	York James	10/1/2022	8/23/2023	100.45	Normal
10	Roanoke	10/1/2022	8/23/2023	101.84	Normal
11	Chowan	10/1/2022	8/23/2023	104.38	Normal
12	New River	10/1/2022	8/23/2023	106.03	Normal
13	Upper James	10/1/2022	8/23/2023	106.47	Normal

**Surface Water Indicators:**

#	Region	Start Date	End Date	Percentile	Status
1	Shenandoah	8/17/2023	8/23/2023	1.83	Emergency
2	Northern Coastal Plain	8/17/2023	8/23/2023	6.5	Warning
3	Northern Piedmont	8/17/2023	8/23/2023	9.6	Warning
4	Chowan	8/17/2023	8/23/2023	11.51	Watch
5	York James	8/17/2023	8/23/2023	15.45	Watch
6	Upper James	8/17/2023	8/23/2023	23.01	Watch
7	Northern Virginia	8/17/2023	8/23/2023	23.01	Watch
8	Roanoke	8/17/2023	8/23/2023	23.33	Watch
9	Big Sandy	8/17/2023	8/23/2023	31.66	Normal
10	Middle James	8/17/2023	8/23/2023	32.93	Normal
11	New River	8/17/2023	8/23/2023	47.73	Normal

**Groundwater Indicators:**

**Note, for regions with multiple indicator wells, the well with the lowest percentile is displayed**

#	Region	Start Date	End Date	Percentile	Status
1	Northern Virginia	8/17/2023	8/23/2023	0.0	Emergency
2	York James	8/17/2023	8/23/2023	0.0	Emergency
3	Shenandoah	8/17/2023	8/23/2023	4.48	Emergency
4	Roanoke	8/17/2023	8/23/2023	6.0	Warning
5	Eastern Shore	8/17/2023	8/23/2023	20.33	Watch
6	Big Sandy	8/17/2023	8/23/2023	20.83	Watch
7	Middle James	8/17/2023	8/23/2023	26.43	Normal
8	Southeast Virginia	8/17/2023	8/23/2023	30.94	Normal
9	Northern Coastal Plain	8/17/2023	8/23/2023	31.38	Normal
10	Northern Piedmont	8/17/2023	8/23/2023	51.08	Normal
11	Chowan	8/17/2023	8/23/2023	58.49	Normal
12	New River	8/17/2023	8/23/2023	79.13	Normal
13	Upper James	8/17/2023	8/23/2023	89.21	Normal

**Reservoir Indicators:**

*Note, these reservoir statuses require manual review as they are NOT automated at this time*

#	Region	Reservoir	Date	Status
1	Shenandoah	Skidmore Fork Lake (Switzer Lake)	08/24/2023	Watch
2	Big Sandy	Big Cherry Reservoir	08/24/2023	Normal
3	Chowan	Emporia Reservoir	08/24/2023	Normal
4	Middle James	Sugar Hollow	08/24/2023	Normal
5	Middle James	Lake Moomaw	08/24/2023	Normal
6	Middle James	Beaver Creek Reservoir	08/24/2023	Normal
7	Middle James	Totier Creek Reservoir	08/24/2023	Normal
8	Middle James	South Fork Rivanna River Reservoir	08/24/2023	Normal
9	Middle James	Ragged Mountain	08/24/2023	Normal
10	Northern Coastal Plain	Beverdam Reservoir	08/24/2023	Normal
11	Northern Piedmont	Ni River Reservoir	08/24/2023	Normal
12	Northern Piedmont	Lake Anna	08/24/2023	Normal
13	Northern Piedmont	Motts Run Reservoir	08/24/2023	Normal
14	Northern Piedmont	Hunting Run Reservoir	08/24/2023	Normal
15	Northern Virginia	Occoquan Reservoir	08/24/2023	Normal
16	Northern Virginia	Lake Manassas	08/24/2023	Normal
17	Roanoke	Smith Mountain Lake	08/24/2023	Normal
18	Roanoke	Kerr Reservoir	08/24/2023	Normal
19	Southeast Virginia	Kerr Reservoir	08/24/2023	Normal
20	Southeast Virginia	Lake Cohoon	08/24/2023	Normal
21	Southeast Virginia	Lake Meade	08/24/2023	Normal
22	Southeast Virginia	Lake Kilby	08/24/2023	Normal
23	Southeast Virginia	Speights Run Reservoir	08/24/2023	Normal
24	Upper James	Lake Moomaw	08/24/2023	Normal
25	York James	Harwoods Mill Reservoir	08/24/2023	Normal
26	York James	Lee Hall - City Reservoir	08/24/2023	Normal
27	York James	Little Creek Reservoir	08/24/2023	Normal
28	York James	Diascund Creek Reservoir	08/24/2023	Normal
29	York James	Skiffes Creek Reservoir	08/24/2023	Normal

(Reservoir drought status is based on the "number of days of usable storage remaining" (emergency < 60 days, warning 60-90 days, watch 90-120 days, normal >120 days).

## 1. INTRODUCTION

This is the integrated drought plan for the towns of Warrenton, The Plains and Remington, Fauquier County, and the Fauquier County Water and Sanitation Authority. Individual drought plans for these organizations and jurisdictions have been incorporated into this integrated “umbrella” document, so therefore, this integrated consolidated plan supersedes earlier drought plans produced by these partnering organizations.

While the concept of drought is easy to comprehend, its quantification, the assigning of the starting and ending points and the assessment of its severity becomes more problematic. However, most people would agree with the ability of drought to affect our society, safety, health and economy, as well as influence our day-to-day lives. The ability of a drought to negatively impact our lives is lessened when there is adequate pre-planning, preparation and coordination.

Drought managers often do not manage the drought, but instead monitor for its occurrence, plan and prepare for how people conduct their lives during droughts, and help communities cope in a manner that will get them through the drought with as little impact as possible. A drought management plan should also plan and prepare for the degree of inter-jurisdictional coordination, cooperation and communication that is necessary during a drought event. This cooperation will likely be required to smoothly transition through the phases of a drought, since droughts do not recognize political or jurisdictional boundaries. Another reason for the plan is that hydrologic and recharge boundaries usually do not follow jurisdictional boundaries. The scope of this plan is for all residents, organizations and industries within Fauquier County, including those in the towns of Warrenton, The Plains and Remington, served by public water sources or private wells, and all businesses, residents, and farmers engaged in agricultural operations and other activities within Fauquier County. The purpose of this integrated approach is to facilitate coordination and communication, and to reflect the realities of the wide-ranging impact often associated with drought.

While this consolidated plan supersedes all other drought plans by the various partnering jurisdictions, nothing in this document infringes upon the sovereignty or decision-making authority of any jurisdiction or implies any cross-jurisdictional sharing of resources or obligation. The intent is only to increase coordination and clarity. It is within this holistic integrated approach that this drought management and emergency preparedness plan is presented.

## 2. DEMOGRAPHICS

Fauquier County lies in northern Virginia, between the rural Blue Ridge Mountains to the West and the urban Washington, DC/MD/Northern Virginia Metropolitan Area to the East. While historically rural farm and horse country, significant suburban development has occurred that provides the homes for commuters employed in other northern Virginia communities.

Fauquier County contains three incorporated towns: Warrenton, The Plains and Remington. Outside of these towns, County land-use plans encourage residential and commercial development in the nine Service Districts, located throughout the County (Table 1).

Year 2010 Population for Communities in Fauquier County		
	2010 Dwelling Estimate	2010 Population
Bealeton Service District	1,549	4,435
Calverton Service District	119	239
Catlett Service District	125	296
Marshall Service District	534	1,480
Midland Service District	94	218
New Baltimore Service District	2,772	8,119
Opal Service District	232	691
Remington Service District*	617	1,441
Warrenton Service District*	1,871	5,480
Town of Remington	256	598
Town of The Plains	105	217
Town of Warrenton	3,744	9,611
<b>Total</b>	<b>12,018</b>	<b>32,825</b>
Sources: 1) U.S. Census Bureau, 2010 Census; 2) *Department of Community Development		

Table 1: Population within the Towns and Service Districts

The population of Fauquier County in 2010 was 65,203. This means that 32,378 Fauquier residents (50%) lived outside of Service Districts.

The Fauquier County Water and Sanitation Authority (WSA) estimated that an approximation of water demand may be obtained by multiplying the population by 100 gallons of water per day. Using this figure, the water demand for Fauquier County is approximately 6,600,000 gallons a day, or 2,409,000,000 (2.409 billion) gallons per year. It is also important to remember that this demand is not distributed evenly throughout the County. Instead, there is a heavy concentration within the Warrenton-New Baltimore region.

### 3. DEFINITIONS and BASIC DROUGHT PRINCIPLES

The key factor in droughts is the lack of availability of water that has the acceptable level of quality to serve the desired use. Whether a person’s water supply is from groundwater wells or surface water reservoirs, the source of this water is invariably precipitation. As such, droughts are inherently linked to precipitation and the hydrologic cycle. Before the discussion of drought continues, it may be helpful to provide a brief summary of the hydrologic cycle.

Water is stored in a variety of locations, for example:

- surface water bodies such as oceans, streams, lakes, ponds and reservoirs;
- frozen water bodies such as ice caps and glaciers;
- groundwater, such as in soil particles and interstitial spaces and fractures in bedrock;
- tissues of living matter, such as plants, animals and humans;
- water vapor contained in the atmosphere; and
- human-constructed storage vaults.

The quantity of water stored within these six reservoirs is as follows: 96.5% within the oceans; 1.8% in ice; 1.7% in groundwater; and less than one percent for freshwater bodies, living matter and the atmosphere.

The water cycle describes the natural process of any given unit of water moving from one of these storage locations to another. A specific water unit in the natural water cycle is not consumed or “used up”; it simply is transferred from one storage location to another. For instance, a particular unit of water may come out of a groundwater spring to feed a surface water stream in Fauquier County; this same unit of water may then be pumped to a cattle trough which in turn is drunk by Fauquier cattle; these cattle expire, sweat and transpire the water as vapor into the atmosphere; this same unit of water then may be carried as water vapor off to the Arctic to eventually fall as snow on the icecap of Ellesmere Island; thousands of years later a large chunk of ice containing this same unit of water may fall into the ocean and drift as an iceberg in the Northern Atlantic until it melts and becomes a part of the Atlantic Ocean; this same unit of water may evaporate off the coast of Portugal and be transferred to the atmosphere where it may drift into the Mediterranean region; eventually this unit of water may fall as rain on karst terrain in Croatia and once again enter the groundwater, but this time in Europe.

Most of the water input to land surfaces takes place as precipitation (rain or snow). Meteorological events often create a condition that converts water vapor (a gas) in the atmosphere into liquid water. Atmospheric conditions may exist where the atmosphere may no longer be able to hold as much water vapor, so it condenses into a liquid and it falls as rain. Some of this rainfall runs directly into lakes and streams; and these lakes and streams flow into the ocean.

Other meteorological conditions evaporate liquid water in lakes, streams and the ocean into gaseous water vapor which moves the water stored in lakes, streams and the ocean back into the atmosphere.

Other rainfall that has fallen on land surfaces, seeps below the surface and is incorporated into groundwater storage. Groundwater in turn, often seeps out of springs and feeds the majority of lakes and streams.

Other rainfall that lands on the surface is absorbed by plants and animals and stored in living cells and tissues. All living matter transfer water vapor back into the atmosphere by either respiration (from animals) or transpiration (from plants). The large biomass of forests, shrubs and grasses that blankets the Earth’s land surfaces ends up transpiring a significant quantity of water back into the atmosphere. The term used to describe the total quantity of water that cycles from living plants (transpiration) and that which evaporates from water and ground surfaces (evaporation), is called “evapotranspiration” or “ET” for short.

Humans also often pull water from lakes and reservoirs, and from groundwater. Humans only temporarily use this water for personal, industrial or economic purposes before it is eventually transferred back into streams (such as through a wastewater treatment plant’s effluent discharge), into groundwater (such as septic systems), or into the atmosphere (such as through evaporation off human bodies or off watered lawns). Some of this water may be temporarily stored in cisterns, vaults or tanks, but eventually it too is returned to the natural water cycle.

Figure 1: Generalized Hydrologic Cycle

Many hydrologists when calculating water usage on a watershed scale do not factor in human residential water usage, since any water removed and consumed within a particular watershed is likely to be returned to that same watershed through either their own septic system or else through local wastewater treatment plants. There is a concern if water supplies from one watershed are transferred to another. For instance, if water supply comes from surface water in the Cedar Run watershed (a part of the greater Potomac River watershed) and after being treated by a wastewater facility is returned to surface water in the Rappahannock River watershed, then this may create a water shortage in the Potomac River watershed. These inter-basin transfers may play a noticeable or significant role in water budget and water supply calculations.

Therefore a drought is not a lack of water, since the same quantity of water within the Earth's ecosystem is consistent, but instead, the water may be distributed on the Earth's surface in a manner that provides a localized shortage; or the water is held in a local storage unit (such as a higher quantity being stored in the atmosphere, or more in the oceans, and less in groundwater (and therefore the well may go dry, even though there's high humidity over the same area or floods in Ethiopia).

The hydrologic cycle becomes important in drought planning for two main reasons: to provide a basic understanding of the topic; and to find ways to conserve and manage water and the water cycle for the most beneficial use. One key aspect of a drought plan is to outline priorities for water usage. Another key aspect of a drought plan is to describe ways that water can be conserved by understanding and managing the water cycle. Some examples of this include the following:

- knowing that water bodies lose water to the atmosphere through evaporation, a person may discover ways that they may be able to limit their water loss (e.g. covering water storage vaults and tanks, by providing a shade structure to livestock troughs, or better yet, provide on-demand watering systems for livestock);

- knowing that water that runs off the surface into streams does not infiltrate into the ground and replenish groundwater sources that your well draws from, a person may choose to landscape differently, such as having less impervious surfaces, or by having more vegetation that captures run-off, or by designing a more effective stormwater management system for their lot (which directs surface water run-off to infiltrate into the localized groundwater reservoir rather than from running directly into streams that flow out of the area) ; or
- knowing that much water is lost through evaporation and transpiration, a person may choose to water their plants in cooler periods of the day or through drip irrigation systems that limit water loss to the atmosphere.

The general definition of a drought is a long period of abnormal low rainfall, especially one that adversely affects growing or living conditions. Even if we use this general definition of a drought, how do we go about quantifying it without the quantification of other terms and concepts, such as:

- How long of a period is “long” to count as a drought?
- How much precipitation is “normal” or “abnormal”?
- Is it not only a factor of “rainfall”? Droughts are highly dependent upon other factors such as water storage in snow pack, water storage in groundwater aquifers that may not be influenced by surface conditions, and meteorological parameters such as temperature, humidity, evaporation and wind.
- At what point does low-water availability begin adversely affecting growing or living conditions? In addition, how do you quantify this, especially when it is highly dependent upon the location or community in which you live (for instance, what would be considered a severe drought to a group of farmers may not even be noticeable to a community that is not as closely associated with or tied to field conditions)?

Due partly to these many ill-defined components or ways at looking at a drought, there has since become many categories of droughts, such as “meteorological drought,” “agricultural drought” and “hydrological drought.”

Meteorological drought:

"A period of abnormally dry weather sufficiently prolonged for the lack of water to cause serious hydrologic imbalance in the affected area." (Huschke, R.E., ed., 1959, Glossary of meteorology: Boston, American Meteorological Society, 638 p.)

Agricultural drought:

"A climatic excursion involving a shortage of precipitation sufficient to adversely affect crop production or range production." (Rosenberg, N.J., ed., 1979, Drought in the Great Plains--Research on impacts and strategies: Proceedings of the Workshop on Research in Great Plains Drought Management Strategies, University of Nebraska, Lincoln, March 26-28: Littleton, Colorado, Water Resources Publications, 225 p.)

#### Hydrologic drought:

"A period of below average water content in streams, reservoirs, Groundwater aquifers, lakes and soils." (Yevjevich Vujica, Hall, W.A., and Salas, J.D, eds., 1977, Drought research needs, in Proceedings of the Conference on Drought Research Needs, December 12-15, 1977: Colorado State University, Fort Collins, Colorado, 276 p.)

#### **4. AUTHORITIES**

The Virginia Administrative Code (9VAC25-780-120) states that all communities and water users that withdraw more than an average 300,000 gallons per month shall develop drought response and contingency plans. Several entities within Fauquier County fit within this description, so this requirement applies to residents of Fauquier County. The entire 9VAC25-25-780-120 is as follows:

*9VAC25-780-120. Drought response and contingency plans.*

*A program that includes community water systems and self-supplied users who withdraw more than an average of 300,000 gallons per month of surface water and ground water shall contain drought response and contingency plans in accordance with the following requirements:*

*1. Drought response and contingency plans shall be structured to address the unique characteristics of the water source that is being utilized and the nature of the beneficial use of water.*

*2. Drought response and contingency plans shall contain, at a minimum, the following three graduated stages of responses to the onset of drought conditions:*

*a. Drought watch stage responses are generally responses that are intended to increase awareness in the public and private sector to climatic conditions that are likely to precede the occurrence of a significant drought event. Public outreach activities shall be identified to inform the population served by a community water system of the potential for drought conditions to intensify and potential water conservation activities that may be utilized.*

*b. Drought warning stage responses are generally responses that are required when the onset of a significant drought event is imminent. Voluntary water conservation activities shall be identified with the goal of reducing water use by 5-10%.*

*c. Drought emergency stage responses are generally responses that are required during the height of a significant drought event. Mandatory water conservation activities shall be identified with the goal of reducing water use by 10-15%.*

3. *Drought response and contingency plans shall include references to local ordinances, if adopted, and procedures for the implementation and enforcement of drought response and contingency plans.*

*Statutory Authority*

§§ [62.1-44.15](#) and [62.1-44.38:1](#) of the Code of Virginia; Historical Notes  
Derived from Virginia Register Volume 22, Issue 2, eff. November 2, 2005.

The combined Fauquier County, Remington and The Plains' Water Supply Plan was approved September 29, 2011. Section V(b) of this plan is an official drought response and management plan. Virginia Department of Environmental Quality (DEQ) approved the main Water Supply Plan part, but only provisionally approved the drought plan portion. Specifically, the drought part was found to be lacking in implementation and enforcement specifics, and needed the accompanying and supporting ordinances. The drought plan presented in the Water Supply Plan is superseded by this Drought Plan, which has more implementation and enforcement details, and more importantly, takes a more comprehensive approach by the inclusion of the WSA and the town of Warrenton.

Warrenton's Draft Water Supply Plan was released in February 2010, and their Water Conservation Ordinance (#1999-08) was adopted on August 10, 1999. This Ordinance is attached in the appendix of this document. Since this drought plan is an "umbrella plan" that incorporates other drought plans, such as Warrenton's; therefore, this drought plan supersedes any of their earlier drought plans.

WSA drafted its Water Preservation Program Plan in 2013, and it has been incorporated in this integrated drought plan.

## **5. HYDROLOGICAL AND ENVIRONMENTAL CONDITIONS**

### **5.1 Precipitation**

The single environmental factor controlling drought conditions is precipitation. Most of the National Oceanic and Atmospheric Administration (NOAA) weather stations located in Fauquier County, such as Marshall, Remington, The Plains, Delaplane and Warrenton, have been discontinued. Fortunately, two of these stations (The Plains and Warrenton) were only recently discontinued, so data from these stations were included in NOAA's recent 30-year Normal determinations. The lack of local data to support adjustments in precipitation Normal determinations in the future may be an issue.

"Normal" precipitation is a statistical mean of a moving 30-year interval. Therefore, mean Normal precipitation for the year 2011 would be 1982 through 2011, while the mean Normal precipitation for the year 2012 would be 1983 through 2012. However, these 30-year Normal values are updated only once every ten years, so the most recent of these "Normal" 30-year periods was from 1981 to 2010.

The 30-year Normal precipitation data determined that the Normal annual precipitation for Warrenton is 40.7 inches, and 42.24 inches for The Plains.

Since Fauquier County lacks approved NOAA weather stations, we must look elsewhere for relevant data. Data from the stations used to determine Normal precipitation may be used to assess which other nearby stations best represents precipitation totals within Fauquier County. To assess the current weather stations proximity and potential representative of Fauquier County's climate variables, the stations that passed the initial screening and analysis are as follows:

- Boston, VA
- Front Royal, VA
- Lincoln, VA
- Mount Weather VA
- Quantico Marine Corps Base
- Sperryville, VA
- Washington Dulles International Airport

The stations in Front Royal, Lincoln, Quantico MCB, and Sperryville were determined to be too far away and served little added value to the Boston, Mount Weather and The Dulles sites. The 30-year Normal data for each of these three sites was tabulated, graphed and assessed in comparison with the 30-year Normal precipitation data for The Plains and Warrenton. A summary of this data is depicted in Table 1 and Figure 2.

Month	Warrenton [el. 500 ft.]	The Plains [el. 530 ft.]	The Dulles [el. 290 ft.]	Mt. Weather [el. 1,659 ft.]	Boston [el. 590 ft.]
	inches	inches			
January	3.02	3.04	2.68	2.88	2.70
February	2.78	2.86	2.74	2.96	2.58
March	3.52	3.68	3.38	3.56	3.70
April	3.68	3.56	3.47	3.69	3.44
May	4.56	4.72	4.55	4.48	4.35
June	4.23	4.01	3.98	4.24	4.25
July	4.27	3.71	3.67	3.81	5.20
August	3.77	3.88	3.53	3.45	3.56
September	4.50	4.37	3.92	4.52	4.35
October	3.22	3.46	3.25	3.43	3.48
November	3.53	3.72	3.41	3.51	3.97
December	3.40	3.04	2.96	2.95	2.98
Total	44.48	44.05	41.54	43.48	44.56

Table 1

Figure 2

The closest station to the northern portions of the County is Mount Weather (the town of Marshall is located approximately 10 miles from the Mount Weather station). Marshall is located approximately 20 miles from the Dulles Airport station. The closest station to the central and southern portions of the county is the Boston station (Warrenton is located approximately 16 miles from the Boston station). The Dulles Airport station is located approximately 19 miles from Warrenton. Spatially, Fauquier County is located near the center of the triangle formed between the Mount Weather, The Dulles Airport and the Boston stations. Spatially, if two stations were picked to represent Fauquier County, then the Dulles Airport station to the northeast and the Boston station to the southwest would be logical. However, an evaluation of the precipitation Normals for these sites appears to indicate that spatial considerations are not significant factors, since there is no apparent correlation or trend. Elevation also does not appear to be a significant factor. The majority of the data is so similar to each other that significant differences, let alone correlations could not be found. Data from the Dulles Airport matches the annual trends of both Warrenton and The Plains, although precipitation at the Warrenton station is 7.1 percent more than the Dulles Airport station, and precipitation at The Plains is 6.0 percent more than the Dulles Airport station. Although the Normal July precipitation at the Boston station is noticeably higher than the other stations, taken as a whole, the Boston station represents the upper-end of the anticipated Fauquier County precipitations values, and the Dulles Airport station represents the lower-end; therefore, the mean of these two stations may be best predictor of precipitation within Fauquier County. The station at the Dulles Airport has also the advantage of being the most administratively stable of the weather stations, since it is one of NOAA’s primary weather stations, while the others are

dependent on volunteer persistence. The other weather stations have a long history of being discontinued after a time, since NOAA relies upon volunteer cooperators.

The Warrenton-Fauquier Airport and the Culpeper Airport have automated weather stations in which data is accessible over the internet for a maximum of three days. In these stations, data going back more than three days is not retrievable, therefore, is of limited use for drought planning purposes.

Many volunteers in Fauquier County donate their weather data to the Weather Underground internet site. Weather Underground staff provide quality assurance and quality control over the temperature data, but not the precipitation data. As a consequence, reported precipitation data on the website vary considerably, with some nearby stations containing annual precipitation totals that differ by more than 1,100 inches (91 feet) of precipitation. Therefore, it remains of unknown reliability.

## 5.2 Stream Flow

Warrenton receives most of their potable water from surface water sources; however, the majority of other county residents obtain their potable water from groundwater sources. Some of Fauquier County's livestock and other components of the County's important agricultural industry rely upon surface water. In addition, surface water is a reliable means of assessing drought conditions, even for groundwater sources. For one, the majority of surface streams are derived from groundwater, so if the streams are running low, the groundwater is often low as well. However, there are other uses of and values to surface water beyond potable water supply, such as livestock, irrigation, treated waste disposal, fire protection, and environmental.

For instance, the County estimated that a drought in 2005 caused losses to Fauquier County ranchers and farmers in excess of 2.35 million dollars, and a drought in 2008 caused an estimated 7 million dollars loss. During these droughts, surface waters used for livestock were running dry and alternative water sources were developed to sustain livestock through the drought. Therefore, surface water conditions are important to evaluate and monitor within the context of this drought management and emergency response plan.

Fauquier County contains approximately 1,722 miles of streams, contained in two major watersheds, the Potomac River (950 miles of stream) and the Rappahannock River (772 miles of stream). A summary of the stream miles of the following watersheds is listed below:

Potomac River	Area (Square Miles)
Upper Goose Creek	
Goose Creek-Crooked Run-Gap Run	159.6
Goose Creek- Mitchells Branch	73.7
Goose Creek-Wancopin Creek	6.3
Cromwells Run	50.7
Panther Skin Creek	<u>21.3</u>
	311.6

Lower Goose Creek		
Little River	<u>72.1</u>	
	72.1	
 Broad Run		
Broad Run-Trapp Branch	83.0	
Broad Run-Catletts Branch	36.8	
Kettle Run	<u>26.0</u>	
	145.8	
 Bull Run		
Little Bull Run	<u>2.3</u>	
	2.3	
 Cedar Run		
Cedar Run-Mill Run	69.8	
Cedar Run-Slate Run	16.2	
Cedar Run-Owl Run	121.9	
Cedar Run-Walnut Branch	36.5	
Town Run	103.9	
Licking Run	<u>60.8</u>	
	409.1	
 Lower Potomac River		
Potomac River-Potomac Creek		
Upper Aquia Creek	<u>9.1</u>	
	9.1	
	Total =	950.0
  Rappahannock River		
Carter Run	148.6	
Rappahannock River-Glascock Run	24.6	
Rappahannock River-Great Run	<u>113.1</u>	
	286.3	
 Marsh Run	105.8	
Rappahannock River-Deep Run	46.5	
Rappahannock River-Ruffans Run	52.9	
Rappahannock River-Rock Run	<u>84.7</u>	
	289.9	
 Thumb Run	93.9	
Rappahannock River-Buck Run	91.9	
Rappahannock River-Lake Mosby	<u>9.8</u>	
	195.6	
	Total =	771.8

Figure 3: Subwatershed Basins of Fauquier County

SubWatershed	Area (square miles)	Stream Length (Miles)	Stream miles per Square	Estimated Precipitation Input (cf/yr.)	Estimated ET (cf per year)	Estimated Runoff (cf per year)	Estimated Infiltration (cf per year)	Estimated Annual Stream Discharge (cf)
Goose Creek-Crooked Run-Gap Run	59.57	159.56	2.67853	6,089,846,628	3,943,784,676	246,042,019	1,383,376,668	1,629,418,687

Rappahannock River- Rock Run	27.85	84.69	3.04093	2,847,108,084	1,843,787,196	115,028,877	646,752,396	761,781,273
Thumb Run	36.15	93.93	2.59834	3,695,617,855	2,393,282,123	149,310,374	839,500,865	988,811,239
Rappahannock River- Buck Run	29.09	91.86	3.15779	2,973,873,400	1,925,880,414	120,150,450	675,548,552	795,699,003
Rappahannock River- Lake Mosby	2.15	9.75	4.53488	219,794,700	142,339,047	8,880,147	49,928,820	58,808,967
	651	1,722	73	66,571,214,130	43,111,518,271	2,689,610,578	15,122,394,702	17,812,005,280

The preceding table summarizes various hydrological and meteorological values in an effort to estimate water-balance parameters within the subwatersheds of Fauquier County. USGS Stream discharge values for the years 2008 through 2012 were obtained from three stream gages: Goose Creek near Middleburg; Cedar Run near Catlett; and the Rappahannock River near Remington. Using this 15-minute interval data, the mean total volume of water discharged per year was calculated. This data displayed a strong correlation to watershed surface area; which turned out to be 27,360,991 cubic feet of stream volume per square mile of watershed.

The recharge zones for the streams of Fauquier County lie along the watershed and subwatershed boundaries depicted in Figure 3.

Streamflow is a watershed outflow. To determine the water inputs, Normal precipitation data (derived from 1981 to 2010 data) from NOAA's weather stations in The Plains and Warrenton was used to obtain the mean precipitation value for Fauquier County (44.265 inches per year).

An estimated evapotranspiration value (64.76 percent of annual precipitation) was derived from a mean of localized northern Virginia data obtained from Sanford and Selnick's (2012) *"Estimation of Evapotranspiration Across the Conterminous United States Using a Regression with Climate and Land-cover Data."*

Similarly, an infiltration of ten inches of water per year was used based upon a mean of northern Virginia data.

Since streamflow is a sum of groundwater outflow and surface water run-off, and in most cases the groundwater outflow is in balance with the groundwater inflow (infiltration), then the estimated annual surface run-off was derived by subtracting infiltration from streamflow.

To verify the streamflow, evapotranspiration, infiltration and surface-water run-off estimates, a simple water-balance calculation was performed. Total annual precipitation should equal the sum of annual surface water run-off, annual groundwater infiltration and annual evapotranspiration. Estimates within ten percent of actual values should be considered good. Upon the calculation of these inputs, 8.5 percent of the total precipitation was unaccounted for, meaning that there should be an additional 8.5 percent outflow that is unaccounted for. This should be expected using this methodology, since the input values used was "Normal" precipitation, but the streamflow outputs used were actual. Taking in account that the previous year's precipitation was less than Normal, when the actual values were normalized, the water balance calculation came out almost precisely balanced. This implies that the values and assumptions made in these calculations appear to be valid.

### 5.3 Lakes and Reservoirs

There are many small private livestock and stormwater retention ponds within the county, but there are only four public reservoirs that will be discussed in this drought management and response plan: Germantown Lake; Warrenton Reservoir; Airlie Reservoir; and Lake Brittle. The 109-acre Germantown Lake is managed by the Fauquier County Parks and Recreation Department. It was created for flood control and as a potential future water supply. Both the 46-acre Warrenton Reservoir (260 million gallon volume) and the 55-acre Airlie Reservoir (124 million gallon volume) were created for water supply purposes. They are currently being used and managed for that purpose by the Town of Warrenton. The 77-acre Lake Brittle was created to enhance recreational fishing. It is managed by the Virginia Department of Game and Inland Fisheries.

Warrenton currently monitors the surface levels of Warrenton and Airlie Reservoirs. C.M. Crockett Park is currently monitoring the surface level of Germantown Lake and they are managing and monitoring the discharge of the dam's only outflow, which serves as the only source of the continuation of Licking Run. This may be a potential drought monitoring location; however, currently the electronic instrumentation on site records produces only on paper print-outs, and no digital version of this data exists. The Parks and Recreation Department retains a complete copy of these current and past paper reports. If there is an interest in having this information available to a wider audience or for use in drought management, an electronic transmitter would need to be installed to allow remote data retrieval.

#### 5.4 Groundwater

Most rural county residents rely upon groundwater to meet their water supply needs. The majority of County residents living within one of the nine identified Service Districts obtain their water from public wells managed and maintained by Fauquier County Water and Sanitation Authority (WSA) or from surface water obtained from Warrenton's public utilities district. There are privately managed and maintained community water supplies that also utilize groundwater for their water supply needs. Most rural County residents have their own private water supply well located on their respective properties. A summary of Fauquier County's water supply and water availability is contained in the Fauquier County Regional Water Supply Plan (approved September 29, 2011). The 2011 Water Supply Plan does not include those portions of Fauquier County within the Town of Warrenton's jurisdiction. No attempts to restate the information in the Water Supply Plan will be made in this Drought Management and Response Plan. However, some key points contained in that plan that have special relevance for drought planning consist of the following:

- Demand for water was approaching the current capacity of some existing wells, and anticipated future demand appears to exceed current supply availability in most Service Districts;
- Finding suitable new groundwater sources takes time, due not only to funding issues, but also due to the nature of our aquifers, planning and permitting considerations, geophysical study constraints, public acquisition of real estate and easements, and water quality and water treatment concerns. Therefore, until new wells go on line, the County has very little flexibility to meet supply restraints brought on by drought or other related water supply complication;
- Clearly those Service Districts that are at or near the capacity of the existing wells would potentially suffer disproportionately during drought conditions than those communities and Service Districts with greater reserve capacities. Due to these and other reasons, a drought would likely not affect all County residents equally, and even a relative minor drought may cause significant hardship to some residents, especially for communities that have a high population and that are at or near their water supply capability. Therefore, the residents of New Baltimore may experience more hardships during a drought than a resident of Paris. Drought management within Fauquier County should be closely linked to the planning of future water supplies and water supply infrastructure, since they are integral to each other.

The recharge zone for an individual well may extend beyond the watershed divide of the surface in which the well is located. On the other end of the spectrum, many surface watersheds may contain a multitude of smaller groundwater aquifers. In addition, groundwater aquifer boundaries are not static; they may significantly change over different seasons and under different hydrologic

conditions. Few groundwater aquifers have been delineated within Fauquier County. Lacking more precise delineations, for the purpose of this plan, it will be assumed that the aquifer's boundary lies along the same watershed boundary in which the surface well is located.

It is important to recognize that the County's public water supplies are not located evenly across the land. There is a disproportionately high reliance upon water within the Cedar Run watershed, as depicted on Figure 4.

Figure 4: Population Density Distribution in Fauquier County

## 6. WATER DEMAND/AVAILABILITY

There are many social, economic, health, safety and operational impacts caused by droughts. For instance, the County estimated that a drought in 2005 caused losses to Fauquier County ranchers and farmers in excess of 2.35 million dollars, and one in 2008 caused an estimated 7 million dollars loss. During these droughts, surface waters used for livestock were running dry and farmers and other residents needed to develop alternative water sources to get them through the drought.

## 6.1 Water Availability for Human Consumption

A rough estimate of water demand in Fauquier County used to be 100 gallons of water per day, but in the last few years, Fauquier County Water and Sanitation Authority (WSA) has seen a noticeable increase in the per-household use of water. A one hundred (100) gallons of water per person per day equates to a Fauquier County water demand of 228,210,500 gallons per year. If the average precipitation is 43.48 inches, this would equate to 491,868,404,087 gallons falling on Fauquier County per year. However, most precipitation either evaporates, is absorbed by plants, or runs off into surface streams and eventually to the ocean. A rough estimate of the total available water for recharging both groundwater aquifers is ten percent of the area's total precipitation input. At that amount, the current county-wide demand for water is only 0.4 percent of the potential recharge supply. This would imply that there is likely never to be a water shortage in Fauquier County. However, these calculations and estimates are based upon an assumption that there is an even distribution of water demand. As Figure 4 indicated, the population within Fauquier County is not evenly distributed.

### 6.1.1 Public Water Systems within Fauquier County

The Environmental Protection Agency (EPA) defines *public water systems* as an entity that provides “water for human consumption through pipes or other constructed conveyances to at least 15 service connections or serves an average of at least 25 people for at least 60 days a year.” EPA has defined three types of public water systems:

- Community Water System (CWS): A public water system that supplies water to the same population year-round.
- Non-Transient Non-Community Water System (NTNCWS): A public water system that regularly supplies water to at least 25 of the same people at least six months per year, but not year-round. Some examples are schools, factories, office buildings, and hospitals which have their own water systems.
- Transient Non-Community Water System (TNCWS): A public water system that provides water in a place such as a gas station or campground where people do not remain for long periods of time.

The Water Supply Plan identifies 23 Community Water Systems in 2009. This same plan identifies a number of NTNCWS and TNCWS systems as well (listed merely as “water users,” but no specific quantification of them by water system category is provided). For the purposes of this drought plan, an updated list of Public Water Supplies in Fauquier County was obtained from the Health Department on October 29, 2013. This list contains the same 23 CWS entities, but lists 23 NTNCWS and 15 TNCWS; thereby bringing the total of Public Water Systems up to 61, with an estimated 11,802 people served. This seems low, considering that this would represent only 18.1 percent of Fauquier County residents being served by a Public Water System (and by default, 81.9 percent of Fauquier County residents having their water needs met by non-Public Water Supplies).

These 23 Community Water Systems are composed of ~~13~~ 14 owned and managed by WSA; they are as follows:

- Marshall Waterworks [Marshall vicinity]
- New Baltimore Regional [New Baltimore vicinity]
- WSA-Remington (The Meadows) [Remington vicinity]

- Bealeton Regional [Bealeton vicinity]
- Green Meadows [Opal vicinity]
- Catlett Subdivision [Catlett vicinity]
- Auburn Crossing [New Baltimore vicinity]
- Whitewood Forest [New Baltimore vicinity]
- Opal Regional [Opal vicinity]
- Bethel Academy [Warrenton vicinity]
- ~~Botha Subdivision [in the vicinity west of Opal]~~
- Paris Water System [Paris vicinity]
- Turnbull [Central West Fauquier County vicinity]
- The Plains [the town of The Plains]
- Waterloo Estates [Warrenton vicinity]

There are two public water systems which are owned by other entities, but managed by WSA. These are as follows:

- ~~The Plains [the town of The Plains]~~ Botha Subdivision [in the vicinity west of Opal]
- Buckland Water and Sanitation Assets Corporation (Vint Hill)

The preceding ~~15~~ 16 public water systems, since they are managed by WSA, will follow the WSA-specific provisions of this plan.

The Warrenton Water System is owned and managed by the Town of Warrenton. As such, the residents of Warrenton will follow the Warrenton-specific provisions of this plan.

The Remington Water System (separate from the “WSA-Remington” system mentioned earlier) is owned and managed by the Town of Remington, as such; the residents of Remington will follow the Remington-specific provisions of this plan.

There are another ~~six~~ five water systems that are owned and operated by private entities; these are as follows:

- Lakeway Subdivision Water System [currently a Community Water System, but transitioning into separate wells]
- ~~Waterloo Estates [currently a PWS, but in process of being taken over by WSA]~~
- The Drysdale Water System
- Baldwin Ridge Water System
- Marsh Run Mobile Home Park
- Fauquier Springs-Sulfur Springs Investment Corporation

These preceding ~~six~~ five Community Water Systems will follow the Fauquier County provisions of this plan.

According to the Public Health Department, the 23 Public Water Systems classified as Non-Transient Non-Community Water System are as follows:

- Airlie Foundation
- Southern Fauquier Child Development
- Chemetrics, Inc.

- Walnut Grove Child Care III
- Fresta Valley Christian School
- Maplewood Child Care Center
- Marshall/Coleman schools [Fauquier County School System]
- Claude Thompson Elementary School [Fauquier County School System]
- Mary Walter Elementary School [Fauquier County School System]
- H.M. Pearson Elementary School [Fauquier County School System]
- Southeastern Alternative Education Center [Fauquier County School System]
- Mountainside Montessori School
- Midland Christian Academy
- Midland Church of the Brethren
- McDonalds- Opal
- Piedmont Child Care
- Quarles Truck Stop
- Ross Industries
- Sheetz Station #221
- Smith-Midland Corporation
- TP Development Parcel, Inc. (formerly known as “Trinity Plastics”)
- Virginia Power
- Walnut Grove Child Care

These 23 Public Water Systems will follow the Fauquier County portions of this drought plan. According to the Public Health Department, the 15 Public Water Systems classified as Transient Non-Community Water System are as follows:

- Phoebe Hall Knipling Outdoor Lab
- El Agave Restaurant (formerly known as Frog and Friends Restaurant)
- Camp Moss Hollow
- C.M. Crockett Park [Fauquier County Parks Department]
- Northern Fauquier Community Park [Fauquier County Parks Department]
- Hunter’s Head Tavern
- Marriott Ranch
- Middleburg Tennis Club
- M&P Pizza
- Poplar Springs Inn
- Blackthorne Inn and Restaurant (formerly known as 1763 Inn)
- Spitony’s Restaurant
- Northside 29 Restaurant (formerly known as Town and Country)
- Sky Meadows State Park [Virginia Parks Department]
- St. Stephen’s Episcopal Church

These 15 Public Water Systems will follow the Fauquier County portions of this plan.

### **6.1.2 Other Non-Public Water Systems intended Primarily for Human Consumption**

There are two known water users that were formerly classified as Public Water Systems, but now are not. The status of these water users is currently unknown:

- Pete’s Park ‘n Eat [Opal] (The Pete’s Park ‘n East restaurant has closed but the status of their public water system is unknown)
- Johnsons Motel (Warrenton, VA)

Lastly, many Fauquier County residents’ water needs are serviced by individual private ground-water wells. There is not an accurate inventory of the number of these individual wells, but based upon the best estimate, the County’s 2009 Water Supply Plan estimated that there were approximately 14, 425 separate individual private wells in Fauquier County that services an approximate 39,670 residents.

## 6.2 Non-agricultural Industrial Water Users

There are a few businesses that have their own groundwater systems that use the majority of their water for industrial purposes. Some of these dominant industrial water users include the following:

- Vulcan Sanders Quarry
- Kastle Green Golf Course (currently out of business, but maintaining turf by using surface water)
- Dominion Generation
- Marsh Run Old Dominion Electric Cooperative
- Fauquier Livestock Exchange (was formerly a Public Water System)

## 6.3 Agricultural Water Users

In spite of the dominance of agriculture within Fauquier County, agriculture has not been a dominant water user within the region. This is largely due to most agricultural operations not having traditionally irrigated crops. Crops relying upon direct precipitation are not included in this assessment of water demand, since this assessment focuses upon surface water and groundwater users. However, crops and other agricultural activities that solely rely upon precipitation are especially susceptible to drought-induced impacts. The following table summarizes the estimated water needs of various agricultural products within Fauquier County:

<b>Agricultural Product</b>	<b>Water Requirement</b>	<b>Quantity of Product in County</b>	<b>Estimated Water Needs per Year (gallons)</b>	<b>Source of Water</b>
Dairies	11,619 gallons per day per dairy	26 dairies	110,259,930	Mostly Ground-Water (GW)
Beef Cattle	300 gallons per day per head	33,840 cattle	3,705,480	Surface Water (SW) & GW
Sheep	1.5 gallons per day per head	2,400 sheep	1,314,000	SW & GW
Horses	10 gallons per day per horse	14,800	54,020,000	SW & GW
Corn	25.9 in. per acre per year	10,700 acres	7,525,181,600	Rain

Soybeans	24 in. per acre per year	4,800 acres	3,128,140,800	Rain
Barley	17 in. per acre per year	1,100 acres	507,779,800	Rain
Alfalfa Hay	5 in. per ton	2,600 acres	1,341,407,600	Rain
Grass Hay	28 in. per acre per year	36,100 acres	27,447,263,200	Rain
Pasture	28 in. per acre per year	110,000 acres	83,634,320,000	Rain
Vineyards	360 gallons per vine per year	272 acres	70,992,000	Rain and Irrigation
<b>Subtotal</b>			<b>123.8 billion gallons of water per year</b>	

Traditionally, the majority of cattle within the County received their water directly from surface water sources. At an estimated 300 gallons per cow per day, this is a lot of water used within the County. The cattle simply waded into streams and drank directly from the surface water. While this practice is legal, there are a number of complications and problems associated with this practice. Some of the problems include:

- Cattle drinking from the same water that they are wading in, lying in (to stay cool), and defecating in, creates higher incidents of cattle diseases and health problems that are expensive to treat and reduces the economic potential of beef production;
- To access the streams, cattle often need to climb down stream embankments, which in turn causes soil erosion, bank failures, and stream sedimentation problems;
- Cattle walking and wading through sensitive wetlands causes soil compaction, destruction of wetlands, and turns the wetlands into mud holes; and
- Cattle accessing streams also impact fragile riparian buffers, which not only serve as wildlife habitat, but these buffers also protect and filter excess nutrients, sediment and other water contaminants from entering streams.

More farmers, especially the larger operations, are moving toward the trend of fencing streams off from cattle and providing dedicated wells for their livestock that are free from fragile and vulnerable resources, and provides their herd with high quality water, thus reducing medical expenses.

As a consequence to this trend, more surface waters are being restored and less surface water is being used, while at the same time more groundwater is extracted.

There are many agricultural users of both surface water and groundwater; some of the most dominant ones include the following:

- Marriott Ranch
- Virginia Beef
- Kettle Wind
- Woodland Turf Farm (uses exclusively surface water for irrigation)

In addition to these four, it is estimated that there are approximately 1,344 Fauquier County farms that utilize a mixture of groundwater and surface water.

In November 2013 Fauquier County staff updated the water needs information provided in the most recent Water Supply Plan. This new analysis indicates that the combined Fauquier County, WSA, Warrenton, Remington, and The Plains water needs from surface water and groundwater sources is approximately 3,000,000,000 gallons per year (this does not include precipitation needs of agricultural crops).

#### **6.4 Biological and Ecological Water Needs**

The focus of this drought management plan is ensuring an adequate supply of water for human use and consumption. However, although it is beyond the scope of this document, it should be recognized that there are also many other sometimes competing demands for water. Examples of some of these other uses include for fish and other aquatic organisms; ecological processes; recreational; transport via stormwater systems, our pollutants; and the disposal and dilution of treated effluent.

#### **6.5 Water Demand/Availability Summary**

Therefore, for the purposes of this plan, there are five categories of water users:

- 1) those served by Warrenton and therefore covered by the Warrenton sections of this plan;
- 2) those served by the Remington-owned and operated water system that covers part of the Town of Remington and are therefore covered by the Remington sections of this plan;
- 3) those served by WSA (both WSA owned/WSA managed and owned by others/managed by WSA- including The Plains); and therefore covered by the WSA sections of this plan;
- 4) those that obtain their potable, non-agricultural use water from other sources; and therefore covered by the County's non-agricultural portions of this plan; and
- 5) those agricultural uses not serviced by WSA, Remington or Warrenton (surface and ground-water); and therefore covered by the County's agricultural portions of this plan.

### **7. DROUGHT MANAGEMENT BACKGROUND**

#### **7.1 Indicators**

##### Total Precipitation

One way of quantifying a drought is to measure total precipitation. However, a severe limitation with this parameter is the lack of a relationship to normal conditions and a relationship to other regional measurements. For instance, a one inch rainfall event in Fauquier County is a fairly routine occurrence; however, this same one inch rainfall event in Death Valley California would cause historic erosion and flooding, since their annual precipitation is only 2.91 inches.

### Percent of Normal

The Percent of Normal is simply the statistics derived by dividing the actual accumulative precipitation over a given period (i.e. a month or a year) by the unit of time that you are interested in. For instance, if you wanted to know the normal precipitation for January, then you add the accumulative precipitation for all the Januarys in the last- say ten years, and divide that total by the number of “Januarys” involved in the total (in this case ten) to obtain the average or Mean January precipitation. The Percent of Normal can then be calculated for any accumulative January precipitation by subtracting the Mean Normal value from any actual January, and then converting this value into a Percent. [Note: the Commonwealth of Virginia uses a 30-year period to indicate their “Normal” values]. This indicator of drought is often reported in various media outlets, but since precipitation over this given period of time rarely follows a normal distribution, interpretations of the data may be confusing and hard to assimilate analytically and even harder to assess the rarity or the probability of the drought.

### Standardized Precipitation Index

The Standardized Precipitation Index was developed to solve the statistical problems identified for the Percent of Normal data. The Standardized Precipitation Index (SPI) may be used statistically, and it may be used to assign the start and ending point of the drought, and it may be used to assess the rarity of the drought.

### Crop Moisture Index

The Crop Moisture Index uses relatively short-term precipitation and temperature data to assign a drought indicator value designed to assess drought effects to agricultural products. Because it uses short-term (week-to-week) data, this indicator is highly influenced by short-term single events. As such, it is not as useful a long-term drought indicator.

### Cumulative Severity Index/Keetch-Byrum Drought Index

The Cumulative Severity Index uses not only long-term precipitation data, but it also emphasizes short-term events in a manner that is designed to assess the dryness of the soil. This is a widely used drought indicator for assigning wildland fire hazard conditions, and may not be that useful as an indicator for general water supply purposes.

### Palmer Drought Severity Index

The Palmer Drought Severity Index is calculated and administered by the National Oceanic and Atmospheric Administration (NOAA). The Palmer Drought Severity Index uses both precipitation and temperature values to determine long-term drought conditions. This Index is standardized to the local climatic conditions, but it is best used when looking at periods of several months. The Index assigns a value of “0” for normal conditions, and negative numbers equate to droughts. The following table describes the various terms used in the Palmer Drought Severity Index:

Extremely Moist	+4.00 and higher
Very Moist	+3.00 to +3.99
Moderate Moist	+2.00 to +2.99
Slightly Moist	+1.00 to 1.99
Normal	-0.99 to +0.99

Mild Drought	-1.99 to +1.99
Moderate Drought	-2.00 to -2.99
Severe Drought	-3.00 to -3.99
Extreme Drought	-4.00 and lower

There are more than one Palmer Drought Severity Indexes. The standard “Palmer Drought Index” depicts long-term meteorological drought conditions, while the “Palmer Hydrological Drought Index” depicts long-term hydrological conditions. Perhaps the latter index is more useful for Fauquier County, since it is concerned with groundwater conditions and other water supply conditions.

#### Non-precipitation-Based Drought Indicators

No matter how refined a national or regional drought index becomes, it may not effectively represent the water supply conditions at a local scale. This is especially true of water supply systems that rely upon small or localized water sources, such as that within Fauquier County. For instance, small watersheds often do not have the natural water storage capabilities as large watersheds. Therefore, the small watershed may experience wider extremes and may suffer disproportionately during even relatively mild drought conditions. Therefore, regional drought models and indexes are essential components of an effective local drought plan, but they should not be the sole trigger for local drought response.

There are drought indicators that do not utilize precipitation, such as reservoir or lake level, depth to groundwater in a well, and stream gage height; however, without having a reliable and accurate reference “Normal” value to compare it with, such data may be meaningless. Taken by itself, such data is often difficult to relate to other nearby data points in an effort to place the data in a regional context. These other indicators can be quite useful and powerful if there are reliable reference data, and when used as a companion with other drought indicators. An ideal drought management program for Fauquier County would incorporate statewide monitoring points; regional and local indexes, such as the Palmer Hydrological, coupled with locally monitored stream, well and surface water sites that are linked with reliable reference “normals” for each of these sites. Obtaining drought indicators from multiple sources and methodologies gives powerful collaborative strength to rely upon when implementing what could be disruptive water restrictions. In addition, having it scaled spatially provides a much more detailed and nuanced means of evaluating the drought conditions within Fauquier County.

Because of the narrow focus of some of these indexes, the localized nature of many of our water supplies, and the social hardships that would be created when there is an inadequate drought preparation or when water restrictions are imposed prematurely, or when not needed, it is wise to not rely only upon one indicator. Similar and consistent warnings from multiple indexes usually offer compelling indication of trends and potential concerns that should be professionally acted upon to lessen hardships for Fauquier County residents.

## 7.2 Indicators Used

### 7.2.1 Virginia

Virginia's drought management is directed and guided by the Virginia Drought Assessment and Response Plan dated March 28, 2003. A copy of Virginia's plan is included in the Appendix of this document. Virginia's plan designates drought management responsibilities for the Commonwealth of Virginia to lie with the multi-jurisdictional Virginia Drought Monitoring Task Force (DMTF) and the Virginia Department of Environmental Quality (DEQ). The DEQ monitors various environmental conditions throughout the state and produces monthly status reports. Based upon the crossing of designated drought triggers, the DMTF will activate drought procedures upon the first occurrence of moderate drought conditions. They will monitor the drought conditions using the following five indicators: Standardized Precipitation Index; Palmer Drought Severity Index; Crop Moisture Index; Keetch-Byrum Drought Index; and NOAA monthly and seasonal precipitation outlooks, as well as specific stream, groundwater and surface water monitoring locations.

Precipitation throughout the state is monitored and compared with the individual's Normal values. Besides using NOAA's 30-year Normal values, the DMTF determined that precipitation greater than 85% of this mean and less than 115% will be considered normal. Instead of a calendar year, precipitation is monitored by "water year," which is defined as October 1 to September 30 of each year.

For management purposes, the Commonwealth's Drought Assessment and Response Plan divided the state into thirteen different drought evaluation regions. Fauquier County lies in their "northern Virginia" region, along with Loudoun, Prince William, Arlington and Fairfax Counties.

The DMTF uses the Accotink Creek near Annandale as their reference stream to determine stream flow drought conditions for the Northern Virginia Region. Since this stream is a long way from Fauquier County, it is unknown how representative it is for stream flow within our county. The DMTF monitors ground water levels in two wells for their reference groundwater drought conditions for Northern Virginia Region: one near Harper's Ferry, WV and one near Arlington Cemetery. Due to the highly individualistic nature of many of the aquifers in the fractured groundwater aquifers that occur in Fauquier County, it is suspected that these wells do not adequately represent Fauquier County, although this has not been confirmed.

The DMTF monitors water levels in two reservoirs for their reference reservoir drought conditions for Northern Virginia Region: the Occoquan Water Supply Reservoir and Lake Manassas Water Supply Reservoir. While the Warrenton Reservoir is closer, the locations of these two monitored reservoirs are close enough to Fauquier County that they are assumed to be fairly representative of our needs.

Because the significance of a precipitation deficit changes as the water year progresses, drought response stages will trigger at different percentages of normal depending upon the date of evaluation, as depicted in the following table:

<b>Months Analyzed</b>	<b>Normal (% of Normal Precipitation)</b>	<b>Watch (% of Normal Precipitation)</b>	<b>Warning (% of Normal Precipitation)</b>	<b>Emergency (% of Normal Precipitation)</b>
October – December	>75.0	<75.0	<65.0	<55.0
October – January	>80.0	<80.0	<70.0	<60.0
October – February	>80.0	<80.0	<70.0	<60.0
October – March	>80.0	<80.0	<70.0	<60.0
October – April	>81.5	<81.5	<71.5	<61.5
October – May	>82.5	<82.5	<72.5	<62.5
October – June	>83.5	<83.5	<73.5	<63.5
October – July	>85.0	<85.0	<75.0	<65.0
October – August	>85.0	<85.0	<75.0	<65.0
October – September (and previous 12 months)	>85.0	<85.0	<75.0	<65.0

### 7.2.2 Fauquier County

The Fauquier County Regional Water Supply Plan (2011) established the three drought response stages that the state had established: Drought Watch; Drought Warning; and Drought Emergency. This plan does not cover Warrenton or agricultural water users. Besides the monitoring and triggers specific to WSA and Remington, this plan established that the following drought indicators will be monitored:

- Statewide Virginia drought indicators;
- USGS flow duration curves (Rappahannock River, Cedar Run and Goose Creek);
- NOAA drought monitor;
- NOAA Palmer Index;
- Surface water levels in Warrenton’s reservoirs;
- Precipitation deficits;
- Local recommendations which would allow jurisdictions to act independently on a localized area of impact. Examples of local triggers might be slow recovery of WSA wells, the level of the Warrenton Reservoir and the Department of Forestry danger levels. If the County opts to undertake a groundwater program, the results of all groundwater monitoring will also be used by the Task Force in order to assess water quantity.

This current Drought Plan updates and supersedes the drought management portion of the 2011 Water Supply Plan. Some of the biggest deficiencies of the 2011 effort includes the lack of specific enforcement standards and protocols, and the adoption of ordinances that support such process, and the lack of comprehensiveness (it did not include the Town of Warrenton, WSA, or agricultural operations). It is for some of these reasons, that enforcement specific standards and

protocols will be included in this plan, and the development of ordinances will be prepared concurrent with or in conjunction with this plan.

Since the County does not directly manage any potable or public water, its ability to enforce or incentivize drought restrictions is limited. Therefore, the best approach is one of coordination, facilitation and support.

### **7.2.3 Fauquier County Water and Sanitation Authority**

The Fauquier County Water and Sanitation Authority (FCWSA) currently use the following techniques to plan for water production shortages:

- Monitor and review well drawdown data, watch for any trends that suggest diminished production;
- If reduced water supplies are observed:
  - a reduced flushing schedule is implemented;
  - water use restrictions are implemented
- In extreme cases, water may be trucked between WSA systems as needed.

~~The WSA took over operation of the Marshall Water System from the now defunct Marshall Water Works in 2005. Because of the degraded infrastructure in the Marshall area as well as low supply, the WSA imposed water use restrictions on the Marshall Service area beginning in 2007. These restrictions include limitations on outdoor water use such as filling swimming pools, watering laws, and on commercial car washing.~~

### **7.2.4 Warrenton**

The Town of Warrenton's drought monitoring is directly tied to water levels in their reservoirs. These triggers are discussed in greater depth in later sections of this plan.

### **7.2.5 Remington**

The Town of Remington drought monitoring procedures are discussed in greater depth in later sections of this plan.

### **7.2.6 The Plains**

The Town of The Plains currently has no known drought management guideline or plan. Since they receive water from the WSA, their drought provisions will follow those of WSA.

### **7.2.7 Private Individual Wells and Agricultural Water Users**

Individual private wells were not covered in the drought provisions in the 2011 Fauquier County Regional Water Supply Plan. The Commonwealth of Virginia does not grant counties a lot of latitude in managing and regulating private groundwater wells. In spite of this limited authority over private wells, they are included in this current plan for the interest of being holistic. Clearly, people on private wells utilize water and place demands upon water, and it is believed that to be most effective in managing limited water during a drought, managers must be aware of the totality of water demands, and place all the demands into proper context. Even if the County has limited authority to regulate these water users, it appears irresponsible to simply ignore a significant

segment of water users and to factor them out of the equation in understanding drought and mitigating the negative effects of drought. It is for these reasons that private water wells and water users are included in this plan.

## 8. DROUGHT MANAGEMENT SPECIFICS

### 8.1 Operations

The central aspect of this drought plan is the coordinated and unified approach of the County; the WSA; the Towns of Warrenton, Remington, and The Plains; private self-supplied users; and the agricultural industry. The premise is that the effects of droughts will be less if all relevant organizations are prepared, coordinated and facilitate each other's goals.

~~Along this line, two specific functional duties are outlined here: a drought coordinator and drought monitors.~~ A **dDrought tTeam** will be selected and assigned the responsibility of managing droughts within the combined area of Fauquier County and the towns of Warrenton, The Plains and Remington, including the WSA and agricultural sectors. This ~~tTeam~~, ~~should~~ shall consist of ~~representatives of the following organizations:~~

- Warrenton Town Manager, or his/her designee
- Remington Town Manager, or his/her designee
- The Plains Town Manager, or his/her designee
- WSA Executive Director, or his/her designee
- District Manager of the John Marshall Soil and Water Conservation District, or his/her designee
- ~~Fauquier County Agricultural Extension~~
- ~~Farm Bureau~~
- Fauquier County Fire Chief, or his/her designee ~~Department of Fire Rescue & Emergency Management~~
- ~~VA Department of Forestry~~
- Fauquier County Administrator, or his/her designee ~~Administration~~
- Fauquier County Office District Director of Commonwealth of Virginia Health Department, or his/her designee
- ~~Fauquier County Community Development~~
- ~~Fauquier County Parks and Recreation~~
- ~~Fauquier County Sheriff's Office~~
- ~~Fauquier County General Services~~
- ~~Fauquier County Environmental Health~~
- ~~Natural Resource Conservation Service~~
- ~~Fauquier County Public Schools~~
- ~~A private non-agricultural industrial water user that manages their own groundwater supply system~~

~~A representative of the Department of Fire Rescue & Emergency Management~~ The Director of the Fauquier County Department of Community Development, or his/her designee, shall be the **dDrought eCoordinator**, and serve as the staff lead ~~on~~ for this team. The primary responsibilities of this team are drought management, public communication, and drought

education and public awareness. This team only convenes upon the initiation of a drought. The Drought Coordinator shall coordinate with representatives from the WSA, various towns located within the County, agricultural entities (either directly or through the County Agricultural Development Director), and private non-agricultural water users. If the Drought Coordinator receives a request from any of these representatives or information that any of the conditions that would trigger any level of drought pursuant to this plan has occurred, the Drought Coordinator shall call an emergency meeting of the Drought Team.

~~A drought monitor shall be selected from each of the following organizations: Community Development (monitors regional and state drought situations); Agricultural Extension (monitors farm drought conditions); Town of Warrenton (monitors their reservoirs and their drought triggers); Town of Remington (monitors their water supply); a private non-agricultural water user (that manages their own water supply system); and WSA (monitors their water supply). Representatives of these organizations will monitor the agreed upon environmental conditions and when these conditions cross the threshold for one or more of the action items outlined in the “trigger” section of this plan, then any or all of the monitors will call the entire Fauquier Drought Management Committee (FDMC) into action.~~

Once the entire Team is convened, the Team is responsible for implementing the action items identified in the plan and to coordinate and facilitate communication with other affected organizations, publics, and interested parties.

Once one of the drought triggers have been activated, the following process will be initiated:

- 1) ~~Make sure the entire Drought Management Team is alerted. If any individual member is unavailable, then a suitable temporary replacement is needed. The Team reconvenes the Department of Fire Rescue and Emergency Services is the lead. The Fauquier County Cooperative Extension Office shall be the sub-lead for agricultural factors;~~
- 2) Obtain detailed monitoring and status conditions from the monitoring subset of the group;
- 3) Generate a specific recommendation, compatible with the established procedures (see appendix);
- 4) Obtain needed authorizations from affected organizations;
- 5) Update, as needed, any website and other related public document;
- 6) Communicate with affected entities in a manner consistent with Drought Management public notifications procedures (see appendix);
- 7) Continue monitoring environmental conditions in a manner sufficient to determine at which point the drought has ended, or the work accomplished so far has reached its conclusion;
- 8) Obtain needed permission to end drought action; and
- 9) Notify any entities needed to ensure the latest status has been communicated; ~~and~~
- 10) ~~Disband the full committee.~~
- 11) ~~Continue monitoring.~~

~~The FDMC will be responsible for monitoring the drought conditions within Fauquier County by a combination of the use of Virginia’s monitoring program, combined with local sites more specific to, and applicable for, Fauquier County.~~

Fauquier County will employ four drought management levels: 1) Normal Conditions~~Non-drought~~; 2) Drought Watch; 3) Drought Warning; and 4) Drought Emergency.

## 8.2 Monitoring Sites:

Besides tracking the state's drought status, the ~~FDMC~~ representatives of Drought Team members will also monitor the following local sites and specific indexes:

- 1) Palmer Hydrologic Drought Indicator
- 2) Crop Index
- 3) Precipitation Index
- 4) Germantown Lake
- 5) Precipitation at Boston
- 6) Precipitation at Washington, DC Dulles International Airport
- 7) USGS stream gage on the Rappahannock River near Remington
- 8) USGS stream gage on the Cedar Run near Catlett
- 9) USGS stream gage on Goose Creek near Middleburg

## 8.3 Triggers (Summary):

County/WSA	<u>Drought Watch</u>	<u>n/a</u>	<u>Drought Warning</u>	<u>Drought Emergency</u>
Warrenton Condition	1	2 <i>(Warrenton only)</i>	3	4
Warrenton	<ul style="list-style-type: none"> <li>•Warrenton Reservoir at or below elevation 440.0; and</li> <li>•Airlie Reservoir down 2.5 feet below Normal Pool Elevation.</li> </ul>	<ul style="list-style-type: none"> <li>•Warrenton Reservoir at or below elevation 440.0; and</li> <li>•Airlie Reservoir down 5.0 feet below Normal Pool Elevation.</li> </ul>	<ul style="list-style-type: none"> <li>•Warrenton Reservoir at or below elevation 440.0; and</li> <li>•Airlie Reservoir down 8.0 feet below Normal Pool Elevation.</li> </ul>	<ul style="list-style-type: none"> <li>• Any situation that requires immediate and drastic action to preserve life, safety and health</li> <li>• Airlie Reservoir down 14.3 feet below Normal Pool Elevation.</li> </ul>
Remington	<ul style="list-style-type: none"> <li>•Well recharge times take longer than in Normal conditions, well pumping level below normal stable levels;</li> <li>•NOAA drought index DI (Drought Moderate);</li> <li>•Current demand requires the use of any Town water supplies above the safe</li> </ul>	n/a	<ul style="list-style-type: none"> <li>•Wells are not recharging to normal levels during their off times;</li> <li>•Pump levels within 150 feet of well pump location;</li> <li>•Tank is out of service for maintenance;</li> <li>•NOAA Drought Index of D2 (Severe Drought);</li> <li>•Current demand between 85 to 95</li> </ul>	<ul style="list-style-type: none"> <li>•One or more wells not functioning properly or with extreme drawdown, within 100 feet of the well pump;</li> <li>•Storage drawn below 65 percent of total capacity;</li> <li>•NOAA Drought Index of D3 (Extreme Drought);</li> <li>•Major waterline break;</li> </ul>

	yield capacity for more than two consecutive days.		percent of system safe yield on average for a week; • Current demand required the use of any Town water supplies above the safe yield capacity for more than two consecutive days.	• Current demand at or above 95 percent of system safe field on average for a week.
WSA	<ul style="list-style-type: none"> <li>- Water demand is between 75% and 85% of permitted capacity;</li> <li>- All WSA facilities operating within normal parameters;</li> <li>- No major well, storage or treatment facility is out of service for maintenance.</li> </ul>	n/a	<ul style="list-style-type: none"> <li>• Water demand is between 85% and 95% of permitted capacity;</li> <li>• A major well, storage or treatment facility is out of service for maintenance.</li> </ul>	<ul style="list-style-type: none"> <li>• Water demand exceeds 95% of permitted capacity;</li> <li>• A major WSA waterline break;</li> <li>• A major well, storage or treatment facility is out of service for maintenance or an emergency condition to include related or manmade disaster.</li> </ul>

#### 8.4 Guiding Principles in the Determination of Water Restrictions

- Ensure health and safety are not compromised;

- As much as possible, action items will be targeted to the most applicable scale to ensure blanket restrictions are not imposed on areas that are not needed;
- Implement and maintain an organized process to increase efficiency, promote communication and instill confidence;
- Demonstrate effective and efficient interorganizational communication and coordination;
- Avoid or minimize economic impacts where possible;
- Any measures taken are scaled to ensure least impactful actions are taken first and implemented progressively;
- Focus on cooperative work with large water users so as to reduce the hardships to the majority of the small users; and
- Encourage education and public awareness of water demands, usage and conservation measures.

## 8.5 Drought Management in Specific Locations

### 8.5.1 Fauquier County Water and Sanitation Authority

#### Normal Conditions (~~Observe~~ Voluntary Wise Water Use):

##### Management Actions

- ~~- These are voluntary actions, so no penalty will be assessed.~~
- Education and outreach about wise use of water.

##### ~~Triggers~~ Normal conditions occur when all of the following three criteria are met:

- Water supply is adequate to meet all demands (demand <75% of permitted capacity);
- All facilities are operating within normal parameters;
- No major well, storage or treatment facility is out of service;

##### and no more than one of the following Commonwealth of Virginia drought indicators are outside of the normal range:

- Precipitation exceeds the percent of normal precipitation for the time period in precipitation table
- Streamflows are above the 25<sup>th</sup> percentile
- Ground water levels are above the 25<sup>th</sup> percentile for all historic levels
- Water Supply Reservoirs exceed 120 days of useable storage or appropriate criteria for non-water supply reservoirs

#### ~~Water~~ Drought Watch (Voluntary Water Conservation):

##### Management Actions

- Education and outreach about voluntary water conservation measures which include encouraging:
  - § Limited watering of lawns. Watering of lawns is limited to no more than three (3) days per week only during the night between 8 p.m. and 8 a.m. on any day.
  - § The avoidance of washing vehicles or wash no more than Homeowners may wash cars once a week.
  - § Limited replenishment of swimming pools only to levels necessary to maintain health and safety.

- § ~~The avoidance of~~ No-washing of streets, roads, sidewalks, driveways, buildings, garages, parking areas or patios.
- § All restaurant related uses are permitted.
- § All agricultural irrigation or water for farm animals is permitted.
- § ~~The limited Use~~ of fire hydrants for training purposes is ~~limited~~ to once a week upon coordination with WSA.

~~Triggers~~ Drought watch is triggered when, all WSA facilities are operating within normal parameters and no major well, storage or treatment facility is out of service for maintenance, and either:

- Water demand is between 75% and 85% of permitted capacity;  
OR at least two of the following Commonwealth of Virginia drought indicators meet the following conditions:
- Precipitation levels are at or below the percent of normal precipitation for the time period in precipitation table
- Streamflows fall between the 10<sup>th</sup> and 25<sup>th</sup> percentile
- Ground water levels fall between the 10<sup>th</sup> and 25<sup>th</sup> percentile for all historic levels
- Water Supply Reservoirs contain between 90 and 120 days of useable storage or appropriate criteria for non-water supply reservoirs.

Water Drought Warning (Voluntary and/or Mandatory Water Conservation):

#### Management Actions

- ~~For all these actions, the first offense is a written warning. Fines are imposed for subsequent offenses.~~
- Watering of lawns is limited to one day per week only during the night between 8 p.m. and 8 a.m. on any day.
- Homeowners may not wash cars. Commercial car washing is allowed only in facilities where at least 80 percent of water is recycled.
- ~~Replenish~~ Swimming pools may only be replenished to levels necessary to maintain health and safety.
- No washing of streets, roads, sidewalks, driveways, buildings, garages, parking areas or patios.
- Restaurants may serve water to customers only upon request.
- All agricultural irrigation or water for farm animals is permitted.
- Use of fire hydrants for training purposes is prohibited.

Drought warning is triggered when either:

- Water demand is between 85% and 95% of permitted capacity;
- A major well, storage or treatment facility is out of service for maintenance;
- OR at least two of the following Commonwealth of Virginia drought indicators meet the following conditions:
- Precipitation levels are at or below the percent of normal precipitation for the time period in precipitation table
- Streamflows fall between the 5<sup>th</sup> and 10<sup>th</sup> percentile

- Measured ground water levels fall between the 5<sup>th</sup> and 10<sup>th</sup> percentile for all historic levels
- Water Supply Reservoirs contain between 60 and 90 days of useable storage or appropriate criteria for non-water supply reservoirs.

Water Drought Emergency (Mandatory Water Conservation):

Management Actions (~~for all these actions, the first offense is a written warning. Fines are imposed for subsequent offenses.~~)

- Lawns may not be watered with the use of automatic sprinkler systems, whether installed in the ground or attached to a hose. Gardens may only be sprinkled with watering cans or a handheld hose.
- Homeowners may not wash cars. Commercial car washing is allowed only in facilities where at least 80 percent of water is recycled.
- Private pools may not be filled or topped off. Public pools serving health care facilities and residential pools serving more than 25 units may be filled or topped off. Newly constructed pools are exempted and may be filled.
- No washing of streets, roads, sidewalks, driveways, buildings, garages, parking areas or patios.
- Restaurants may serve water to customers only upon request.
- All agricultural irrigation or water from farm animals is permitted
- Use of fire hydrants for training purposes is prohibited.

Drought emergency is triggered when either:

- Water demand exceeds 95% of permitted capacity;
- A major well, storage or treatment facility is out of service for maintenance or an emergency condition to include related or manmade disaster;
- A major WSA waterline break;

OR at least two of the following Commonwealth of Virginia drought indicators meet the following conditions:

- Precipitation levels are at or below the percent of normal precipitation for the time period in precipitation table
- Streamflows are at or below the 5<sup>th</sup> percentile
- Measured ground water levels are at or below the 5<sup>th</sup> percentile for all historic levels
- Reservoirs contain 60 days or less of useable storage or appropriate criteria for non-water supply reservoirs.

### 8.5.2 Remington

Because the water system for the Town of Remington is operated independently of WSA, it currently uses the following procedure to monitor for drought conditions:

Normal Water Conditions

Management Actions:

- Observe wise water use.

Triggers:

- Wells are recharging to normal levels with stable pumping levels.

- Water Supply is adequate to meet demands (demand < 75 percent of capacity).
- NOAA drought index neutral to DO (abnormally dry)
- All Town facilities are operating within normal parameters.

#### Drought Watch

##### Management Actions:

- Voluntary water conservation.
- The Town announces voluntary water conservation recommendations.

##### Triggers:

- Well recharge times take longer than in Normal conditions, well pump below normal/stable levels.
- NOAA drought index level Moderate.
- Current demand requires the use of any Town water supplies above the safe yield capacity for more than two consecutive days.

#### Drought Warning:

##### Management Actions:

Voluntary water conservation plus some mandatory restrictions.

##### Triggers:

- Wells are not recharging to normal levels during their off times.
- Pumping levels within 150 feet of well pump locations.
- Tank is out of service for maintenance.
- NOAA Drought Index listed as Severe Drought.
- Current demand between 85 to 95 percent of safe yield on average for a week.
- Current demand requires the use of any Town water supplies above the safe yield capacity for more than two consecutive days.

#### Drought Emergency:

##### Management Actions:

- Mandatory water restrictions.

##### Triggers:

- One or more wells not functioning properly or with extreme drawdown, within 100 feet of the well pump.
- Storage drawn below 65 percent of total capacity.
- Major waterline break.
- Current demand at or above 95 percent of system safe yield on average for a week.
- NOAA Drought Index listed as Extreme Drought or higher.

### **8.5.3 Warrenton**

The Town of Warrenton has a draft Water Supply (2010) that includes various water conservation practices that residents are encouraged to adopt. Their Drought Ordinance (January 20, 1999) is highly tiered to the pool-levels of Warrenton and Airlie Reservoirs. It has four management levels for drought, listed as “Conditions.” They are as follows:

Condition 1 (Voluntary Conservation):

## Management Actions:

- The public is requested to restrict water use. Conservation tips will be provided by the Town.

## Triggers:

- 150 days storage remaining (this is defined as the Warrenton Reservoir is ½ full (elevation 440.0) and the Airlie Reservoir is 2.5 feet below normal pool elevation.

Condition 2 (Restricted Use):

## Management Actions:

- The Town may restrict water use for outdoor use (car washing, lawn watering, filling swimming pools) or other uses. Mandatory restrictions with violations subject to fines.

## Triggers:

- 120 days storage remaining (this is defined as the Warrenton Reservoir is ½ full (elevation 440.0) and the Airlie Reservoir is 5.0 feet below normal pool elevation

Condition 3 (Mandatory Reduction of Consumption):

## Management Actions:

- In addition to restrictions in Condition 2, each customer will be limited to a specific volume or percentage reduction based upon prior billing history. A surcharge of \$10 per 1,000 gallons above the allocation will be charged to the monthly bill.

## Triggers:

- 90 days storage remaining (this is defined as the Warrenton Reservoir is ½ full (elevation 440.0) and the Airlie Reservoir is 8 feet below normal pool elevation.

Condition 4 (Emergency- any situation that requires immediate action to preserve health and safety):

## Management Actions:

- The Town manager will restrict water use to only that absolutely essential to life, health and safety.

## Triggers:

- This would be in response to catastrophic loss of one of the dams, treatment plant failure or multiple main breaks.

**8.5.4 Fauquier County**

Normal Conditions – the County will continue to educate about the wise use of water. This condition is found when no more than one of the following indicators is outside of the normal range:

- Precipitation exceeds the percent of normal precipitation for the time period in precipitation table
- Streamflows are above the 25<sup>th</sup> percentile
- Ground water levels are above the 25<sup>th</sup> percentile for all historic levels
- Water Supply Reservoirs exceed 120 days of useable storage or appropriate criteria for non-water supply reservoirs.

Drought Watch - the County will implement voluntary water restrictions to reach a goal of 10 percent reduction in water usage. Including:

- Public education ~~started~~ focused on how to reduce water usage.
- Notification of drought conditions posted on County website and ~~Fauquier County's Emergency Management Facebook page~~ press releases (Fauquier County's notification procedures are listed in the Appendix).

This level is triggered when at least two of the following indicators meet the following conditions:

- Precipitation levels are at or below the percent of normal precipitation for the time period in precipitation table
- Streamflows fall between the 10<sup>th</sup> and 25<sup>th</sup> percentile
- Ground water levels fall between the 10<sup>th</sup> and 25<sup>th</sup> percentile for all historic levels
- Water Supply Reservoirs contain between 90 and 120 days of useable storage or appropriate criteria for non-water supply reservoirs.

Drought Warning - the County will implement voluntary water restrictions to reach a goal of 20 percent reduction in water usage. In addition to the actions identified under the "Watch" level:

- Alert larger water users that have established water management action plans, so that they may activate the plans as appropriate.
- Establish voluntary water restrictions on watering lawns and washing cars (levels of restrictions to be determined by the drought team, depending on current conditions and drought indicators in each area).

This level is triggered when at least two of the following indicators meet the following conditions:

- Precipitation levels are at or below the percent of normal precipitation for the time period in precipitation table
- Streamflows fall between the 5<sup>th</sup> and 10<sup>th</sup> percentile
- Measured ground water levels fall between the 5<sup>th</sup> and 10<sup>th</sup> percentile for all historic levels
- Water Supply Reservoirs contain between 60 and 90 days of useable storage or appropriate criteria for non-water supply reservoirs.

Drought Emergency - the County will ~~adopt and enforce any water use restrictions contained in the Drought Ordinance of the Fauquier County Code that may have been issued by any drought emergency declaration issued by the Commonwealth of Virginia. Special circumstances may dictate that special restrictions may be needed to support water emergency restrictions issued by any or all of the governmental partners to this plan. Such individual case-specific exemptions shall only be initiated upon the prior approval of the Chair on the Fauquier County Board of Supervisors.~~ In addition to the actions taken under the “Drought Warning” level, there shall be:

- ~~Daily alerts~~ Alerts sent out on the Fauquier County’s Emergency Notification System to include drought emergency updates.
- Mandatory water restrictions placed on activities as delineated in the Drought Ordinance of the Fauquier County Code, including but not limited to watering lawns and washing cars (levels of restrictions to be determined by the drought team, depending on current conditions and drought indicators in each area).
- ~~Warnings-Summonses~~ and potential prosecutions and fines issued for violators of water restrictions (see the Appendix for enforcement guidelines).

This level is triggered when at least two of the following indicators meet the following conditions:

- Precipitation levels are at or below the percent of normal precipitation for the time period in precipitation table
- Streamflows are at or below the 5<sup>th</sup> percentile
- Measured ground water levels are at or below the 5<sup>th</sup> percentile for all historic levels
- Reservoirs contain 60 days or less of useable storage or appropriate criteria for non-water supply reservoirs.

Within Virginia, there is a separate but related process for the establishment of agricultural disaster designations. These processes are located in the Appendix.

### **8.5.5 Other Public Water Systems and Water Users**

None of these water users have any known drought triggers; however, some of the businesses and agricultural operations may have established action plans in the event of droughts. These entities may include:

#### Parks and Recreation Sites

Northern Fauquier Community Park  
 C.M. Crocket Park  
 Sky Meadows State Park  
 Middleburg Tennis Club  
 Camp Moss Hollow  
 Phoebe Hall Knipling Outdoor

#### Schools

Marshall/Coleman Schools  
 H.M. Pearson Elementary School  
 Southeastern Alternative High School

Midland Christian Academy  
Fresta Valley Christian School  
Claude Thompson Elementary School  
Mary Walter Elementary School  
Mountainside Montessori School

#### Restaurants

El Agave Mexican Restaurant (Frogs & Friends)  
Northside 29 Restaurant (Town and Country)  
Spitonys Restaurant  
Blackthorne Inn & Restaurant (1763 Inn)  
Hunters Head Tavern  
Pete's Park 'n Eat (the restaurant is closed, but their well may still be active)  
M & P Pizza  
McDonald's Opal

#### Child Care

Maplewood Child Care Center  
Piedmont Child Care  
Walnut Grove Child Center  
Walnut Grove Child Care III  
Southern Fauquier Child Development

#### Churches

Midland Church of the Brethren  
St. Stephens Episcopal Church

#### Businesses with Separate Water Systems

Fauquier Livestock Exchange  
Chemetrics, Inc.  
Ross Industries  
Sheetz Station #221  
Quarles Truck Stop  
Johnsons Motel  
Airlie Foundation  
Dominion Generation  
Marsh Run Old Dominion Electric Cooperative  
TP Development Parcel (former Trinity Plastics)  
Poplar Springs Inn  
Fauquier Springs-Sulfur Springs Investment Corp.  
Smith-Midland Corp.  
Virginia Power

#### Agricultural

Marriott Ranch  
Woodward Turf Farm  
Virginia Beef Corp.  
Kettle Wind Farm LLC

## 8.6 Common Actions that May be Taken during All Drought Situations

### Normal Conditions:

No special actions are required other than to continue with the monitoring as prescribed by this plan; however, the best time for drought planning and preparation is during non-drought times. The County will continue to try to educate the public about the wise use of water.

### Drought Watch:

- The Drought Coordinator will notify of the Drought Watch and advertise the drought conditions by posting on County website and press releases (Fauquier County's notification procedures are listed in the Appendix). Advertisements are primarily a public education campaign focused on how to reduce water usage in an effort to implement voluntary water restrictions to reach a goal of 10 percent reduction in water usage. These voluntary efforts can include, but not be limited to:
  - Suggesting that providers and users Pperform inspections of integrity of water lines and other potential sources of water loss.—Fix and repair any leaking pipes, fixtures or faucets.
  - The Drought Coordinator will prepare all notices and press releases required herein.
  - ~~Make monthly reports on drought condition to Drought Coordinator.~~
    - ~~Drought Coordinator will declare a county-wide Drought Watch and will issue a press release indicating the reasons for the declaration.~~
    - ~~The Fauquier County Drought Coordinator will notify the following entities: County Administrator; Warrenton; The Plains; Remington; WSA; Police; Fire; Schools; Agriculture; Forestry; and Health. Plus the [MEDIA]. Plus other water entities.~~
  - The Drought Coordinator will Encourage water providers to review existing water conservation plans.
  - Agencies and departments represented on the Drought Team Committee should post Drought Watch notifications on their respective websites and through their other typical public outreach efforts.
    - ~~Leak detection and other water conservation measures.~~
  - Any private organization, entity or business that uses on average more than 1,000 gallons per day shall develop their own water reduction plan tiered to the drought notification levels contained in this plan, and that entity must, during periods of droughtDrought Watch, provide monthly reports to the Committee-Drought Coordinator that summarizes their water conservation efforts taken and water reduction levels achieved. The Drought Coordinator, or designee, will notify these organizations of this requirement and will provide an annual reminder.

## 8.7 Potential Means of Water Conservation

No matter what drought level Fauquier County is in, residents, businesses, communities and government agencies can, and should, critically evaluate and explore more efficient water conservation practices. Upon the initiation of drought watches, warnings, emergencies or crisis, some of these practices may transition from voluntary to requirements. The emphasis of this Drought and Emergency Response Plan is to facilitate coordination and to set certain water

conservation goals, rather than being 100 percent prescriptive in how each person finds ways to conserve precious Fauquier County water resources. The important concern is the responsible conservation of water, not necessarily how one achieves this goal. However, for consistency purposes, for time management during emergency situations, and for other purposes, there will still be a need for specific bans or restrictions, if the situation warrants such an approach. Therefore, the following list of water conservation practices is not intended to be a complete or exhaustive list, but rather to provide some examples of what can be done to conserve water, and that may show up as requirements or restrictions during the higher levels of drought emergencies:

- Use dishwaters only when they are full.
- Wash only full loads of laundry (adjust water level if possible).
- Turn off faucets while brushing teeth, shaving, etc. (saves about five gallons per day).
- Reduce water used per toilet flush by installing toilet tank displacement inserts. A plastic jug may be used as an alternative. [Note: do not use bricks. They disintegrate when soaked and the resulting grit hinders closing of the flap valve, causing leakage and subsequent water loss].
- Keep a bottle of water in the refrigerator, so as to limit the running of tap water to get cold water.
- If you have a water meter, monitor it to evaluate how much water you use and the timing of this use, so as to better inform you of how you may create additional water savings.
- Take shorter showers and baths (saves about 25 gallons per shower/bath).
- Do not use a garbage disposal.
- Do not use water to wash off driveways or sidewalks.
- Water before 10:00 a.m. to reduce evaporation during the hottest part of the day. Watering in the morning is better than the evening, because the dampness and coolness of the evening may promote fungal growth.
- When watering plants, use drip irrigation that directs water to the root system. If you do not have drip irrigation capabilities, then closely monitor your watering to ensure that the water is turned off when sufficient water has been delivered. Avoid run-off.
- When watering plants, water infrequently but thoroughly, because water penetrating deeper in the soil will be retained longer and it will encourage plants to grow deeper roots. Conversely, water from frequent light waterings often is lost due to evaporation, and it encourages plants to grow in the shallow soil zones that dry out quickly causing greater plant stress and the need for additional waterings.
- Water lawns only when necessary [note: grass that springs back when stepped on does not need water].
- Install automatic shut-off nozzles on outdoor water hoses.
- Aerate lawns by punching small holes approximately six inches apart. This will encourage water to soak into the soil rather than run off the surface.
- Position manually-placed sprinklers so that they do not water pavement, gravel, buildings or other non-plant surfaces.
- Know how to turn off an automatic irrigation system in case of rain.
- Weed gardens so that more desirable plants do not have to compete for limited moisture.
- Mulch garden beds to reduce evaporative water loss and weed growth, and cool the soil, which in turn creates less water-stress to plants.
- During dry periods postpone new plantings, since new plantings often require a higher quantity of irrigation.
- Use trash cans to dispose of used tissues rather than flushing them down the toilet.

- Avoid mowing grass at a very short height, since more water evaporates from short grass than taller grass.
- Do not allow children to play water games.
- Reduce or eliminate car washing.
- Encourage the use of rainbarrels and other means to capture and re-use water.
- Turn off ornamental water fountains.
- Avoid irrigation of athletic fields.
- Discourage the Ffilling or topping off outdoor swimming pools-~~discouraged~~.
- Avoid washing car, boats, and other personal or recreational equipment.
- ~~Restaurant will serve~~ Serve water to restaurant patrons only upon request.

## 8.8 Alternate and Emergency Water Supplies/Sources

There are many situations within droughts that managers may want to find alternative water supplies to mitigate their shortages through their normal sources. In these situations, it is suggested that managers identify these sources before drought situations, and as much as possible, to obtain any permits, permission, contracts and other logistical obstacles before drought emergency situations kick in. It is recommended that the various agencies and organizations decide upon priorities, in order to reduce the potential of conflicts during droughts, since an emergency situation is not the best time for multiple organizations to be arguing over limited resources. For instance, it would be undesirable if a hospital was counting on the use of an emergency tank of water to supply critical life-support functions during a drought finds that someone had already tapped into this emergency supply in order to water a golf course. To avoid these problems, pre-planning and prioritization is important. The first step is to inventory potential emerge sources of water. Some potential sources may include the following:

### Germantown Lake

One of the purposes of creating Germantown Lake is as an alternative water supply. Therefore, using it for drought emergencies is consistent with this purpose. There are no dry hydrants present to tap into Germantown Lake. To withdraw water from the lake would require hoses, pumps and other assorted equipment (such as filters), and to either drive up to the boat ramp or use the dam access road (both in C.M. Crockett Park).

### Dry Hydrant Inventory

Fauquier County's Department of Emergency Services had started an inventory of the County's dry hydrants. It is recommended that this inventory be completed, incorporated into a Geographic Information System (GIS), shared with other organizations in the County, and to develop an approval and prioritization process.

### Rappahannock River

Some withdrawals from the Rappahannock River may be a viable option; however, permits and coordination with the Virginia Department of Environmental Quality is required.

### Other tanks, reservoirs, storage facilities

Some private businesses, such as the Sander's Vulcan Quarry, maintain large water tanks on site. Coordination, approval and agreements with these businesses would be required prior to their emergency usage for purposes beyond that designed by the landowner/owner.

### Other localities

Purchasing or trading for water from other localities that are not experiencing as much of a drought as Fauquier County is always a possibility; however, prior permission and contractual arrangements would be required. In addition, sizeable transportation expenses may also be involved.

## 9.0 Updating the Plan

This plan will require periodic updating and/or revising. Since this is a multi-jurisdictional plan, the updating of this plan will not take the standard approach. If the standard approach is utilized, a small change in how one entity, such as the Town of Warrenton wanting to make a change on one of their triggers, would necessitate approved and re-signing by all the boards and signature authorities in all the other jurisdictions under the umbrella of this multi-jurisdictional plan. Such a scenario would be problematic and unworkable. Therefore, the approach taken on this plan is that if ANY of the jurisdictions covered by this plan (Warrenton, The Plains, Remington, Fauquier County (agricultural and non-agricultural) and Fauquier County Water and Sanitation Authority) wanted to change portions of this plan that dominantly pertain to that respective organization, such as management actions or response triggers, then they may do so with only that organization's approval authority. After such change is made, that organization would simply notify the Drought ~~Committee Chair~~ Coordinator of what changes to the master copy of the Drought Plan are to be made. The ~~Chair~~ Coordinator would then update the master copy accordingly and distribute the updated version to appropriate entities, including Virginia DEQ. However, in the interest of cross-jurisdictional cooperation and coordination, it is hoped that the other parties of the Drought Committee are solicited for input and comment upon any proposed plan amendments or updates prior to revision.

*Summary: any signature organization to this plan does NOT need any other organization's permission or review in order to make policy and procedural changes that are primarily directed to the needs of that particular organization.*

## Appendix

### Appendix A

#### Fauquier County's Drought Management Public Notification Procedure

- Notifications Procedures – During times of drought ~~warnings~~, drought levels (Drought Watch, Drought Warning or Drought Emergency) will be placed on the Fauquier County website and press releases issued the Fauquier County Emergency Management (EM) Facebook page. ~~During times of Warnings, drought levels will be placed on the Fauquier County website and the Fauquier County EM Facebook page. For Drought Warnings or Drought Emergencies,~~ Notifications may be sent via the Fauquier County Emergency notification system on worsening drought conditions and on possible water restrictions. During times of Drought Emergencies notifications will be sent to all affected ~~residence~~ residents via the Fauquier County Emergency notification system on these water restrictions. These notifications will be sent prior to restrictions being implemented and when changes occur to these restrictions to include the elimination of any restrictions.
  
- During times of Drought Emergencies notifications will also be sent to local TV and radio stations for additional public notification. Included in these notifications will be the restrictions placed, reasons why, where additional information on the emergency can be found, and measures households should take to reduce their water usage. Upon the reduction or elimination of any restrictions additional information will be sent to these TV and radios stations.

## Appendix B

### Fauquier County's Drought Management Enforcement Guidelines

- ~~○ The following is a list of possible water restrictions to be placed on citizens during a drought. Any violation of these restrictions in accordance with Code of Virginia, Title 62.1-44.38.1 are subject to penalty of confinement of up to 12 months in jail and/or a fine no less than \$2,500.00 and no more than \$32,500.~~
- ~~1. Reduction or elimination of watering of lawns.~~
  - ~~2. Reduction or elimination of washing of cars.~~
  - ~~3. Reduction or elimination of the use of water of any kind outside the home with the exception of agricultural uses.~~
  - ~~4. The reduction and implementation of water Emergency Plans by commercial water users.~~
  - ~~5. The reduction or elimination for use of Fire Hydrants for the purposes of Training or Testing.~~

Subsequent to the adoption of this Plan, the County will adopt an ordinance that provides for a process for declarations of drought stages, establishes water use regulations based on drought stage and enforcement mechanisms for violations of mandatory water use restrictions. The ordinance shall set out specific water use restrictions based on drought stage and initial violations shall be deemed a Class 4 misdemeanor and subsequent violations a Class 3 misdemeanor punishable pursuant to *Code of Virginia* § 18.2-11.

### Example Disaster Request Cover Letter

Fauquier County Office  
24 Pelham Street, Suite 20  
Warrenton, VA 20186-3234  
(540) 341-7950, ext. 12, FAX (540) 349-1792

Chairman, Fauquier County Board of Supervisors  
40 Culpeper Street  
Warrenton, VA 20186

Dear Mr:

I am writing to you at this time to request that the Fauquier County Board of Supervisors resolve to file with the Governor of Virginia a request that Fauquier County be designated as drought disaster area. The Fauquier County Food and Agriculture Committee, consisting of, Natural Resources Conservation Service, Farm Service Agency, and myself have met and have determined that Fauquier County meets the criteria of a drought disaster area, as per Federal guidelines.

If Fauquier County is granted drought disaster status by the Governor's office, farmers in Fauquier County will be eligible for guaranteed low-interest loans from the Farm Service Agency, as well as any other disaster relief programs that are appropriated by Congress.

Enclosed you will find a suggested resolution for the Board to use in making this request of the Governor. If you have any questions or comments, please do not hesitate to call on me.

Regards,

## Appendix D

### Example Consent Agenda Request for Drought Emergency

#### CONSENT AGENDA REQUEST

**Sponsor:**

Raymond E. Graham, Chairman  
Cedar Run District Supervisor

**Board of Supervisors Meeting Date:**

July 14, 2005

**Staff Lead:**

Catherine M. Heritage, Assistant County Administrator

**Department:**

County Administration

**Topic:**

A Resolution Authorizing the County Administrator to File with the Governor of Virginia a Request To Designate Fauquier County as a Drought Area.

**Topic Description:**

The ongoing drought has reached critical proportions for the Fauquier County farming community. The Fauquier Food and Agricultural Council reports that approximately 100,000 acres of farmland have been adversely affected within Fauquier County and estimates crop and hay losses of \$250,000.

**Request Action of the Board of Supervisors:**

Consider adoption of the attached resolution.

**Financial Impacts Analysis:**

None

**Identify any Departments, Organizations or Individuals that would be affected by this request:**

Cooperative Extension Service  
Farm Services Agency  
National Conservation and Recreation Services  
Fauquier County Farm Bureau

## Appendix E

### Example Resolution for Agricultural Drought Emergency

#### RESOLUTION

#### A RESOLUTION AUTHORIZING THE COUNTY ADMINISTRATOR TO FILE WITH THE GOVERNOR OF VIRGINIA A REQUEST THAT FAUQUIER COUNTY BE DESIGNATED A DROUGHT DISASTER AREA

WHEREAS, the drought conditions in Fauquier County have severely affected farmers; and

WHEREAS, during the growing season of this year, Fauquier County received considerably less rain than normal; and

WHEREAS, the Fauquier County Food and Agriculture Council, made of up the Farm Services Agency, the National Resource Conservation Service, and the Virginia Cooperative Extension, reports that approximately 100,000 acres of pasture land and 45,000 acres of hay land have been adversely affected within Fauquier County, at an estimated loss of \$3.6 million; and

WHEREAS, it is incumbent upon the Fauquier County Board of Supervisors to authorize the County Administrator to file with the Governor of Virginia a request that Fauquier County be designated as a drought disaster area; now, therefore, be it

RESOLVED by the Fauquier County Board of Supervisors this 18<sup>th</sup> day of June, 2007. That the County Administrator be, and is hereby, authorized to file a request with the Governor of Virginia to declare Fauquier County a drought disaster area.

## Appendix F

### AGRICULTURE - RELATED DISASTER DESIGNATIONS PROCESSES

#### I. Types of Designations

- A. PRESIDENTIAL - Based on a request from the Governor of the State the President can declare a state or portions of a state a major disaster area. Usually this is due to a major widespread national disaster such as a hurricane or tornado.
- B. SECRETARIAL - At the request of the State Governor the Secretary of Agriculture can declare a County, series of counties or an entire State a disaster area.
- C. FARM SERVICE AGENCY ADMINISTRATOR - The Administrator, based on a request from the FSA State Executive Director, can designate a County or Counties eligible for Emergency Loan Assistance, however, this declaration is limited to physical loss only.

#### II. Designation Process

- A. PRESIDENTIAL - The Presidential Declaration is made in response to a request of the Governor of the State. No local Food and Agriculture Council action is necessary, except for reporting purposes and estimation of dollar losses and is usually reported by a local government as a part of its initial damage assessment report to the Virginia Department of Emergency Services.
- B. SECRETARIAL - When a natural disaster creates significant agricultural crop losses, the producers and growers in those localities affected by the disaster will need help in coping with their losses. Through the Farm Agency of the U.S. Department of Agriculture, farmers may apply to the Federal Government for emergency low interest loans provided their localities have been designated natural disaster areas by the Secretary of Agriculture.

Local government is responsible for initiating the disaster designation process when there is sufficient evidence that significant agricultural crop losses have been sustained or, in the case of frost/freeze damage, there is a potential for major losses to crops which will require time to fully assess. The following provides an outline of the procedure for obtaining a Secretarial disaster designation.

In responding to disasters caused by frost or freeze, local government should keep in mind that a Governor's written request for disaster designation must be received by the Secretary of Agriculture within three months of the last day of the disaster.

#### Procedure

1. Local government submits request to Governor:

When a natural disaster occurs or develops, the County Board of Supervisors (or City Council in the case of cities that have agricultural production) submits a formal resolution and request to the Governor stating that the county is experiencing or has experienced significant losses to agricultural crop (specifying those crops if possible) due to a natural disaster and asking the Governor's help in obtaining federal disaster designation for that locality.

2. Governor's Office responds to request:

- a) Governor's Office writes representative of the County Board of Supervisors advising that request has been referred to appropriate state agencies for review and processing.
- b) Governor's Office refers the request for designation to Commissioner of the Virginia Department of Agriculture and Consumer Services through the Secretary of Commerce and Trade and copies the State Coordinator of Emergency Services (Director of the Virginia Department of Emergency Services) and the Secretary of Public Safety.

3. Farm Service Agency Damage Assessment Report is prepared:
  - a) The Commissioner's Office requests the State Executive Director, Farm Service Agency (FSA), USDA, to prepare an FSA Damage Assessment Report (DAR), on the County.
  - b) The Chairperson of the State Food and Agriculture Committee requests the FAC at the County level to prepare and submit a Disaster Assessment Report, on the disaster reported by the County Board of Supervisors. The FSA, DAR is different for the state initial Damage Assessment Report.
  - c) Upon receiving the Damage Assessment Report, from the local Food and Agriculture Committee, the State Executive Director of FSA calls together the State FAC to review the DAR. A copy of the approved report is forwarded to the Commissioner of the Virginia Department of Agriculture and Consumer Services.
  - d) When the necessary baseline data is available, the Virginia Department of Agriculture and Consumer Services places an estimated dollar value on the crops affected by the nature disaster.
4. Governor's request for USDA designation prepared:
  - a) Given that the extent of losses are significant, the Commissioner's Office drafts the Governor's letter of transmittal to the Secretary of Agriculture requesting disaster designation for the County because of significant agricultural crop losses. This letter would be accompanied by the County damage assessment report.
  - b) The Commissioner's Office notifies the Virginia Department of Emergency Services that the damage assessment report is completed and provides VDES with the report and additional data concerning crop losses for review and return through the Secretary of Public Safety.
  - c) The draft letter and the damage assessment report are submitted to the Governor's Office by the Commissioner's Office through the Secretary of Commerce and Trade.

5. Governor's request is submitted to USDA Secretary. The Governor's letter is sent to the Secretary of Agriculture and copies are sent to the Secretary of Commerce and Trade. The Commissioner of Agriculture and Consumer Services, the Secretary of Public Safety, the Director of the Virginia Department of Emergency Services, the State Executive Director of FSA, the State Director of Rural Development and the County Board of Supervisors representatives.

6. Secretary of Agriculture responds to Governor's request:

When the Secretary of Agriculture advises the Governor concerning approval or disapproval of the request for disaster designation, the Governor's Office notifies the County Board of Supervisors and sends copies of this response to those state and federal officials mentioned under # 5.

## Dry Conditions

## Wet Conditions

The Multi-Indicator Drought Index (MIDI) looks at current drought conditions across the U.S. by integrating several key drought indices on precipitation and moisture into one objective, computer-generated map. The Long-Term MIDI approximates drought impacts from changes in precipitation and moisture over a long-term timeframe (up to 5 years), such as impacts to irrigated agriculture, groundwater, and reservoir levels. Long-term drought conditions can also increase wildfire intensity and severity. This experimental map is based on methodology from the NOAA National Weather Service's Climate Prediction Center. # STAFF REPORT

<b>Town Council Meeting Date:</b>	September 12, 2023
<b>Agenda Title:</b>	Special Use Permit 2023-01 St John the Evangelist
<b>Requested Action:</b>	Deferral Request from Applicant to October Meeting
<b>Decision Deadline:</b>	February 12, 2024
<b>Staff Lead:</b>	Denise Harris, Planning Manager

## EXECUTIVE SUMMARY

Special Use Permit (SUP) 2023-01 St John the Evangelist, the Applicant, and the Owner, the Catholic Diocese of Arlington (St Johns Catholic School Tees), seeks to amend a June 3, 1986, SUP approval to allow for the demolition of an existing building and the construction of a new 13,000 square foot office building. The subject parcel is located in the Residential (R-10) District of the Town of Warrenton Zoning Ordinance and is designated as Live/Work on the Future Land Use Map. The subject parcel (GPIN 6984-36-7135-000) is located at 271 Winchester Street on approximately 11.0664 acres.

The Town Council deferred, per the Applicant’s request, the SUP application from the August Town Council Public Hearing until September. The Applicant requested a second deferral to the October Town Council meeting to allow for the Archdiocese of Arlington’s General Counsel to work with the Town Attorney regarding the Condition of Approval regarding the right-of-way dedication on Winchester Street.

Planning Commission held a Work Session on April 18, 2023<sup>6</sup> and a Public Hearing on May 16, 2023. Three members of the public spoke to the application. Items brought up included proximity of the new building to Winchester Street, potential loss of old growth trees, noise “bounce back” to residences, no crosswalk on Winchester to entrance, water run-off, topo/grade changes, no lighting on building, loss of green space, question if additional parking is necessary, and support for the existing building to be demolished. The Planning Commission requested the Applicant work to address items missing on the SUP Plans and issues raised. The Planning Commission also suggested the Applicant look at the potential of green space vs additional parking. The Planning Commission voted 3-0 (Lawrence, Lasher absent) to hold the Public Hearing open until the June Planning Commission meeting.

On June 1, 2023, the Applicant submitted an updated SUP Plan to address the requested missing information, including parking, topography, improvements on the site, refuse locations, adjacent properties, and other miscellaneous items. The Applicant piloted a new student pick up/drop off pattern to address draft Condition of Approval 9.b and found it to be successful in preventing stacking in the public-right-of way.

The Planning Commission continued the Public Hearing on June 20, 2023. Three members of the public spoke to the application. One in support of the church and two adjacent property owners, while generally in support, raised questions regarding water runoff. The residents questioned if leaving the old building in place while the new one is constructed will impact and hinder the ability to properly grade the site to resolve ongoing water runoff issues to properties on Richards Drive and Winchester Street. Citizens spoke to the desire for reassurance the new building will deal with the water issues.

The Planning Commission voted to recommend approval to the Town Council subject to draft Conditions of Approval (4-0-1; Lawrence abstained).

## BACKGROUND

---

In 1986, St Johns the Evangelist received a Special Use Permit for a school. The minutes from the Town Council meeting indicate the intent was to allow:

1. Construction of the School in two phases
2. Phase 1 enrollment 270
3. Phase 2 enrollment 540
4. Relocate the convent
5. Obtain Right of way dedication to centerline of King Street (aka John E Mann Street) and Winchester

When the church school sought an expansion in 2017, a Zoning Determination letter found the building expansion could proceed without a Special Use Permit amendment as the enrollment numbers were not changing. However, during the Site Development Plan (SDP 2017-01), the Town indicated that *“as new projects are proposed by the Church, the additional work will be considered accumulative to this plan and will trigger the Commonwealth’s SWM Regulations.”* The Town’s willingness to work with the applicant in 2017 was predicated on the shared knowledge that the next proposed improvement would include a comprehensive update of the site’s uses and existing conditions. This Special Use Permit application is the opportunity for the Applicant to bring the last 37 years of property uses up to date.

During agency review of the application, staff raised several potential issues and asked the Applicant to address them. Highlights of issues include the potential inability to meet landscaping buffer requirements, no details on lighting, preliminary stormwater design, proposed refuse locations, and no height and dimensions of the building, retaining walls, parking, travelways, setbacks, and landscape buffers for staff to ensure the proposal will meet requirements. Staff is aware that stormwater and landscape buffer solutions can be expensive to engineer. Staff sought to help the applicant understand that staff cannot ensure this proposal works without more information and/or requested waivers.

The Planning Commission held a work session and two public hearing dates on this proposal. The Planning Commission discussed buffers and landscaping along the length of the northern boundary of the property; energy, water, and sewer demands; intentions of existing building and timing of demolition; parking overflow into adjacent neighborhoods and stacking in the public right-of-way; elevations from Winchester Street and the request for artist's rendering; appropriate stormwater, sediment control, and boundary line adjustments; and ARB approvals.

### **PLANNING COMMISSION RECOMMENDATION**

---

The Planning Commission recommended approval to the Town Council subject to the draft Condition of Approval. The Applicant is requesting a deferral to the October Town Council meeting.

### **Suggested Motions**

1. I move that the Town Council defer SUP 23-1, St John Catholic Church, per the Applicant's request, to the October Town Council meeting.

**SPECIAL USE PERMIT CONDITIONS****Applicant: ST. JOHN THE EVANGELIST CATHOLIC  
CHURCH****Owner: CATHOLIC DIOCESE OF ARLINGTON  
(ST JOHNS CATHOLIC SCHOOL TEES)****SUP 23-01 (Supersedes SUP Dated June 3, 1986)****PINs 6984-36-7135-0000 (the "Property")****Special Use Permit Area: ± 11.0664 Zoning: R-10  
Residential****Date: July 11, 2023**

In approving a Special Use Permit, the Town Council may impose such conditions, safeguards, and restrictions as may be necessary to avoid, minimize, or mitigate any potentially adverse or injurious effect of such special uses upon other properties in the neighborhood, and to carry out the general purpose and intent of this Ordinance. The Council may require a guarantee or bond to ensure that compliance with the imposed conditions. All required conditions shall be set out in the documentation approving the Special Use Permit (SUP).

1. General: This Special Use Permit is issued covering the entire Property pursuant to the provisions of § 11-3.10 of the Town of Warrenton Zoning Ordinance.
2. Site Development: The Property shall be developed in substantial conformance with the Special Use Permit Plan entitled, "Special Use Permit Plat," prepared by Carson Land Consultants, Page 1 dated February 10, 2023 and Pages 2-4 dated December 6, 2022, all revised May 30, 2023, consisting of four (4) sheets (the "SUP Plan"). Minor changes and adjustments may be made to the road and street alignments, entrances, parking, dimensions and location of SWM/BMP facilities, the exact configuration and location of building footprints, and other similar features as shown on the SUP Plan, provided they meet the intent of these Conditions and are approved by the Director of Community Development or the Zoning Administrator.

3. Use Parameters:
  - a. Special Use Permit Area – The Special Use Permit shall apply to the entire +/- 11.0664 acre site.
  - b. Use Limitations – The use shall be limited to a religious institution and related facilities including the church, school, and those accessory uses customarily incidental to the primary uses.
  - c. Maximum Students – The maximum number of students shall be 540 as approved in the previous SUP dated June 3, 1986.
4. Architecture: The site is located within the Historic District and is subject to Architectural Review Board, Certificates of Appropriateness (COA), and the Town of Warrenton Guide to Historic Resources. No structures shall be modified or erected until a COA has been issued. This includes walls and fences exceeding 36” in height.
5. Signage: All signage shall comply with the applicable provisions of Article 6 of the Town of Warrenton Zoning Ordinance.
6. Site Maintenance and Refuse Collection: Any refuse storage areas shall be screened with a solid enclosure constructed of materials that are compatible with the buildings on the property. The enclosure shall have gates that prohibit viewing this area from adjoining properties and public rights-of-way. The gates shall remain closed when not in use and the trash containers shall be emptied as necessary to prevent odors or infestation by vermin. Compliance with this condition shall be demonstrated on each final site plan(s). Deliveries and refuse collection shall follow Town Code Section 11-19(9).
7. Environment: All landscaping shall be native and drought-resistant or other species as may be approved on the final site plan(s).
  - a) Landscaping – The Applicant shall make all efforts to maintain and preserve the existing mature vegetation and hardwood trees when feasible.
  - b) Minimize Clearing and Grading – The Applicant shall show the limits of clearing and grading for the site on the approved final site plan(s). For portions of buffers located outside the limits of clearing and grading, the existing vegetation shall be preserved and supplemented to meet the intent the buffer as noted above. In addition, existing trees and shrubs shall be incorporated into the landscaping plan. This does not preclude the removal of diseased, noxious and/or invasive vegetation.
  - e) Stormwater Management –The property owner is required to account for all improvements, regardless of square footage, made to the property since July 1, 2014, and design and construct for the accumulative stormwater management for both quantity and quality in accordance with all applicable State and local

requirements in effect at the time of site development plan approval.

8. Lighting:

- a. Proposed lighting shall be reviewed during the review of the Certificate of Appropriateness and at the time of site plan in accordance with the Zoning Ordinance.
- b. Building-mounted security lighting, which is full cut-off and directed toward the building and in compliance with the Zoning Ordinance, shall be permitted.
- c. All new and replacement light fixtures shall consist of full cut-off fixtures with a color temperature of 3,000 K or lower, and a maximum mounting height of 14 feet.
- d. Lighting on the school managed turf fields is prohibited.
- e. All other proposed lighting shall be addressed at site plan in accordance with the Zoning Ordinance.

9. Transportation:

- a) Vehicular Access – The site shall be accessed from the Winchester Street and John E. Mann entrances. Egress shall be controlled via a stop sign traffic control with stop bar at the exits.
- b) There shall be no stacking of vehicles into the public right-of-way. The school is responsible for ensuring drop off and pick up from the school do not result in backs ups on the public streets. Stacking on the property by accessing the school by way of Winchester Street or staggering times is required to achieve this condition.
- c) Handicapped Parking and Signage – Handicapped parking and signage for shall be provided in accordance with the PFM and the Americans with Disabilities Act.
- d) Dedication of public right-of-way on Winchester Street shall be included on the Site Development Plan and be recorded prior to occupancy permit. With the dedication of the right-of-way frontage, the property owner will submit with the site plan an agreement to retain the maintenance of the existing perimeter wall and entrance features, including the entrance apron on Winchester Street for Town review and approval.

10. Parking: Parking located on the north side of the property, adjacent to Richards Lane shall buffer and shield the headlights of vehicles from the adjacent residences. Headlights shall be screened from view from the residential-zoned property located to the north to at least 3.5 feet in height above the parking surface elevation with a solid wall, sight-tight fence, evergreen shrubs, or other method as approved by the Zoning Administrator as a part of the Site Development Plan, to extend the length of the parking on the north side.

11. Water and Sewer: The site shall continue to be served by public water, with the property owner bearing all costs associated with providing the additional services that will be required. Construction of a new 3-story building, +/- 13,000 square foot located at the northwest corner of the property on Winchester Street will require a separate water meter, per Town Code
  
12. Demolition: Demolition of the existing 3 story stone and block building located in the northwest portion of the property adjacent to Richards Lane shall require a permit from the Town. No final occupancy permit shall be issued on a new 3-story building, +/- 13,000 square foot located at the northwest corner of the property on Winchester Street until the above existing building has been demolished. The old building will be demolished within 6 months after the issuance of the temporary occupancy permit.

**Staff Analysis**

This analysis is based on the Comprehensive Plan, Zoning Ordinance, and review comments by Town Departments. The standards/analysis tables in the sections below contain the criteria for Planning Commission and Town Council consideration of Special Use Permits, per Article 11-3.1.3.

This request for a Special Use Permit for St John the Evangelist to amend the exiting 1986 SUP to allow for a new building in accordance with Article 3-4.2 and Article 11-3.10 of the Town Zoning Ordinance. The proposal is to demolish an existing approximately 11,000 square foot building with a new 13,000 square foot building. The property is operating under a Special Use Permit that was approved to allow for a school. The Special Use Permit has not been updated since 1986 to reflect the uses and needs of the property. However, through time, multiple improvements have been made to the property, including the church expanded in 2002/3, modifications to the stone wall in 2007, improvements were done to the Parish Activity Center in 2015, and the school expanded in 2017. This SUP application is the opportunity to update the 11 acres to reflect the proposed new building and provide an accounting stormwater, parking, refuse, open space, and lighting for the uses contained on the parcel.

The following table summarizes the area characteristics (see maps in Attachment A):

Direction	Land Use	Future Land Use Map Designation	Zoning
North	SF Residential	Residential	R-10 Residential
South	SF Residential	Residential	RT Multi-Family
East	SF Residential	Residential	R-10 Residential
West	SF Residential	Residential	R-10 Residential

The subject parcel is zoned to the R-10 Residential District of the Town of Warrenton Zoning Ordinance and is designated as Live Work Neighborhood on the Future Land Use Map. The subject parcel (GPIN 6984-36-7135-000) is located at 271 Winchester Street on approximately 11.0664 acres.

**Comprehensive Plan Future Land Use and Historic Resources Analysis**

Plan Warrenton 2040 labels this parcel in the Future Land Use Map is designated as Live Work outside of a Character District. It is also located within the Historic District. The Historic District goals state:

- Conserve, reuse, and promote historic resources to enhance the Town’s sense of place and grow the economy.
- Preserve the authenticity and tell the stories of historic resources for generations to come through documentation. Educate the community on the value of historic resources.
- Enhance the environment through preservation and sustainability best practices.

- Protect the rich histories of existing neighborhoods.
- Promote asset-based economic development through historic resources.

Standard	Analysis
<i>Whether the proposed Special Use Permit is consistent with the Comprehensive Plan.</i>	The proposed use falls within the future land use designation of Live Work as listed in the Comprehensive Plan and is located within the Historic District.
<i>The compatibility of the proposed use with other existing or proposed uses in the neighborhood, and adjacent parcels.</i>	The church property is adjacent to existing residential single-family homes. A church and school are permissible uses within the Residential R-10 zoning district, requiring a Special Use Permit.

**Staff Findings**

The historical survey of the existing building found it to be non-contributing. The applicant has held a work session with the Architectural Review Board to begin the process of discussion for the new building scale, massing, and materials. A Condition of Approval for the SUP addresses the need to obtain a Certificate of Appropriateness. The applicant intends to develop a building up that meets new building codes, in keeping with the context and character of the area.

**Zoning Analysis**

The legislative intent of the Residential R-10 District is this district is composed of certain low concentrations of residential uses, plus certain open space areas where similar development would be consistent with the provisions of the Town’s Comprehensive Plan. The regulations of this district are designed to stabilize and protect the essential characteristics of the district and promote and encourage suitable environment for single-family residential units and prohibit all activities of a commercial nature, except neighborhood professional businesses. To these ends, development in low density single unit dwellings, plus certain compatible uses by special use permit.

Standard	Analysis
<i>The level and impact of any noise emanating from the site, including that generated by the proposed use, in relation to the uses in the immediate area.</i>	The proposed use is adjacent to existing residential single-family detached dwellings. All non-residential uses must meet the noise standards under Article 9-14.2. No change of use is proposed.
<i>The proposed location, lighting and type of signs in relation to the proposed use, uses in the area, and the sign requirements of this Ordinance.</i>	The applicant has not proposed any new signage with the new building.

Standard	Analysis
<p><i>The location and area footprint with dimensions (all drawn to scale), nature and height of existing or proposed buildings, structures, walls, and fences on the site and in the neighborhood.</i></p>	<p>An SUP plan has been provided showing the location of the existing church, associated accessory buildings and proposed office building.</p> <p>The proposed 3-story office building is noted at 13,000 square feet. The plan shows an existing church, 1-story school, rectory, and 1 story building with a basement.</p> <p>There is an existing retaining wall located at the northwestern corner of the property, and a proposed retaining wall is noted along the proposed office building. The applicant states “the proposed building height will be approximately 35’ or less” based on a calculation using the average proposed grade along the outside of the building. The applicant states “variations in the final site grading will change the building height calculation.”</p> <p>The ARB will review the retaining wall to ensure compliance with the Historic District.</p>
<p><i>The nature and extent of existing or proposed landscaping, screening and buffering on the site and in the neighborhood.</i></p>	<p>No new landscaping detail is proposed on the SUP Plan, except a call out for the area around the existing retaining wall. Staff has indicated to the applicant that as presented it does not meet the ordinance requirements, which will be required at time of site plan submission</p>
<p><i>The timing and phasing of the proposed development and the duration of the proposed use.</i></p>	<p>Timing of construction will depend on receiving site plan approval. The applicant has proposed a condition that would call for the demolition of the existing building prior to final occupancy of the new building.</p>
<p><i>Whether the proposed Special Use Permit at the specified location will contribute to or promote the welfare or convenience of the public.</i></p>	<p>The additional office space may allow the church to better serve the community. Updating the Conditions of Approval to address stacking in the public right-of-way will promote safety on John E. Mann Street.</p>
<p><i>Whether, in the case of existing structures proposed to be converted to uses requiring a Special Use Permit, the structures meet all code requirements of the Town of Warrenton.</i></p>	<p>Any new structures will be required to meet current codes.</p>

Standard	Analysis
<i>The location, character, and size of any outdoor storage.</i>	No outdoor storage is shown on the SUP plan.
<i>The location of any major floodplain and steep slopes.</i>	No floodplain is located on site.
<i>The location and use of any existing non-conforming uses and structures.</i>	The proposed structure must meet all required setbacks and permissible uses should the SUP be granted.
<i>The location and type of any fuel and fuel storage.</i>	No fuel storage areas are noted on site.
<i>The location and use of any anticipated accessory uses and structures.</i>	The office building is proposed to be built at the Northwest corner of the site.
<i>The area of each proposed use.</i>	The proposed area for the new office building is 13,000 square feet.
<i>The location and screening of parking and loading spaces and/or areas.</i>	The applicant has revised the plan to show all existing parking spaces; conformance with the minimum required parking for the use(s) a found in Article 7 will be reviewed in detail as a part of the Site Development Plan. Perimeter parking lot landscaping is required The applicant provided a “Typical Wall and Landscape Detail” on the SUP Plan but it will have to meet ordinance requirements.
<i>The location and nature of any proposed security features and provisions.</i>	Not applicable.
<i>Any anticipated odors which may be generated by the uses on site.</i>	The site must remain in compliance with Article 9-14.5 regarding the control of odors.
<i>Refuse and service areas.</i>	Refuse is identified on the SUP Plan. The Statement of Justification acknowledges conformance with refuse storage requirements will be verified at the time of site plan.
<i>Whether the proposed Special Use Permit will result in the preservation or destruction, loss or damage of any significant topographic or physical, natural, scenic, archaeological or historic feature.</i>	No significant or topographic areas are noted on site.
<i>The effect of the proposed Special Use Permit on environmentally sensitive land or natural features, wildlife habitat and vegetation, water quality and air quality. The location of any major floodplain and steep slopes.</i>	The applicant will address stormwater at time of site plan. The SUP Plan includes topo and general placement of improvements. The applicant stated they do not anticipate blasting.
<i>The glare or light that may be generated by the proposed use in relation to uses in the immediate area.</i>	A condition of approval includes lighting standards for the site and the applicant will be required to meet the ordinance.

**Staff Findings**

During agency review of the application, staff raised several potential issues and asked the applicant to address them. Highlights of issues include the potential inability to meet landscaping buffer requirements, details on lighting, preliminary stormwater design, proposed refuse locations, and height and dimensions of the building to confirm required setbacks, retaining walls, parking, travelways, and landscape buffers for staff to ensure the proposal will meet requirements. Staff is aware that stormwater and landscape buffer solutions can be expensive to engineer. Staff sought to help the applicant understand that staff cannot ensure this proposal works at Site Development Plan without more information and/or requested waivers.

As part of the agreement between the church for the pre-school expansion in 2017, in an email from Carson Land Consultants to the Town on August 4, 2017, the applicant's engineer confirmed "but if and when St John's does anything else in the future, the land disturbance from this project plus the next will trigger the VPDES permit." The Town engineer responded with the statement "However, when they move to the next phase, we will go back to any upgrade during and after 2014."

Draft Conditions of Approval have been drafted to attempt to address potential stormwater and lighting issues.

**Transportation and Circulation Analysis**

The Transportation and Circulation goals for the Town of Warrenton are:

- Improve multi-modal capacity and safety that encourages trips by walking, bicycling, and transit. Enhance the traveling experience by creating great streets.
- Promote livability in the Town by creating great places where residents and visitors feel welcome and safe.
- Provide an equitable and connected Multi-Modal Network.

<u>Standard</u>	<u>Analysis</u>
<i>The traffic expected to be generated by the proposed use, the adequacy of access roads and the vehicular and pedestrian circulation elements (on and off-site) of the proposed use, all in relation to the public's interest in pedestrian and vehicular safety, efficient traffic movement and access in case of fire or catastrophe.</i>	The church site is used for multiple uses including a pre-school – 8 <sup>th</sup> grade school, parish activity center for community events, outdoor managed turf fields, a rectory, and the multi-use office building.
<i>Whether the proposed use will facilitate orderly and safe road development and transportation.</i>	

**Staff Findings**

The Warrenton Volunteer Fire Department requested consideration of wider access roads, strict enforcement of no parking areas, more fire hydrants, and ensuring flat areas 1/4<sup>th</sup> of the height of the

building. Community Development staff raised concerns about perimeter parking, understanding of the impervious surface dimensions (e.g. parking and travelways), and information regarding school pick off and drop off to prevent stacking in the public right-of-way. Public Works and Utilities raised the 1986 condition of dedicating the right-of-way to the centerline of Winchester Street. The applicant acknowledged these items and stated they would be addressed at site plan. Staff has worked to try to develop a set of draft conditions of approval to address the right of way, potential maintenance needs and who is responsible for them, and vehicle stacking in the public right-of-way. It should also be noted there is no proposed sidewalk along the frontage of Winchester Street. Normally a subdivision is the trigger for installing a sidewalk. In this case, the applicant is not subdividing the property.

**Community Facilities and Environmental Analysis**

Plan Warrenton 2040 outlines Community Facilities goals and Environmental goals by stating:

- Green infrastructure and sustainability are incorporated into community facilities to promote energy efficiency and environmental protections.
- Ensure healthy, safe, adequate water and wastewater services.
- Preserve, enhance, and protect the environmental, scenic, and natural quality of the Town.

<u>Standard</u>	<u>Analysis</u>
<i>Whether the proposed Special Use Permit will be served adequately by essential public facilities, services and utilities.</i>	There is an existing water and sewer system on the parcel. The applicant has indicated a potential stormwater management area with a note that stormwater is subject to change with final design on the SUP Plan.
<i>The location of any existing and/or proposed adequate on and off-site infrastructure.</i>	

**Staff Findings**

The Town Public Works and Utilities Department cannot verify the disturbance work or the erosion and sediment control measures and calculations without more information provided. The applicant was provided information from 2017 site development plan that stated the additional disturbance related to the recently constructed education building (per SDP 2017-01) will be considered accumulative to this new SUP application (per SUP-23-01) and will trigger the Commonwealth’s SWM Regulations, as indicated in General Note 12 of the 2017of the Saint John the Evangelist Roman Catholic Church SDP sheet 2. Public Works and Utilities also informed the applicant that at least a 10% reduction in runoff and nutrients from the site. Per February 2, 2017, memorandum (SDP 2017-01 St. John’s Catholic Church Pre-School Addition letter), the additional disturbance will be considered accumulative to this SUP application and will trigger the Commonwealth’s SWM Regulations, as indicated in General Note 12 of the 2017of the Saint John the Evangelist Roman Catholic Church SDP sheet 2. Further concern from Public Works is the site plan must ensure that the existing drainage on Winchester Street has adequate capacity to convey drainage from this improved site.

Public Works requested a Stormwater Master Plan for the site showing how stormwater is proposed to leave the site and how it meets the Stormwater Town’s Ordinance criteria. This relates to the recently constructed education building (per SDP 2017-01) and the proposed new building. Staff is unable to ensure all these concerns have been addressed until more detail is provided at site plan.

The applicant states they will address all outstanding issues at time of Site Development Plan.

**Economic Resources Analysis**

An economic goal of Plan Warrenton 2040 is to promote a diverse, equitable stable tax base while preserving the character of the community.

<u>Standard</u>	<u>Analysis</u>
<i>Whether the proposed Special Use Permit use will provide desirable employment and enlarge the tax base by encouraging economic development activities consistent with the Comprehensive Plan.</i>	The proposed use does not change the existing uses on the property.
<i>The number of employees.</i>	Unknown. Students is capped at 540.
<i>The proposed days/hours of operation.</i>	Unknown.

**Staff Findings**

The proposal does not change the existing economic use of the site.

**Conditions of Approval**

The Planning Commission recommended conditions of approval for the Town Council’s consideration.

**PARKING TABULATION**

IN ACCORDANCE WITH ARTICLE 7 OF THE TOWN OF WARRENTON ZONING ORDINANCE THE PARKING REQUIRED FOR THE SITE ARE AS FOLLOWS:

CHURCH: ONE (1) SPACE PER FOUR (4) SEATS DESIGN CAPACITY OF THE PRINCIPLE PLACE OF WORSHIP  
SCHOOL: ONE (1) SPACE PER TWENTY-FIVE (25) CLASSROOM SEATS PLUS ONE (1) PER EMPLOYEE CALCULATED FOR THE WORK PERIOD CONTAINING THE LARGEST NUMBER OF EMPLOYEES.

**REQUIREMENTS**

CHURCH = 793 SEATS (PER APPROVED AMENDED SITE PLAN)  
PARKING REQUIRED: 750 SEATS / 4 = 187.5 = 188 SPACES  
HC PARKING REQUIRED: 7 SPACES (PER ADA)

PRESCHOOL = 100 CLASSROOM SEATS / 25 = 4 SPACES  
12 EMPLOYEES = 12 SPACES  
= 16 SPACES TOTAL

ST. JOHN'S SCHOOL (K-8) = 250 CLASSROOM SEATS / 25 = 10 SPACES  
30 EMPLOYEES = 30 SPACES  
= 40 SPACES

TOTAL NUMBER OF PARKING SPACES REQUIRED:  
CHURCH 188  
PRE-SCHOOL 16  
SCHOOL 40  
SPACES 244

TOTAL NUMBER OF PARKING SPACES PROVIDED: 244 SPACES PROVIDED (CURRENTLY)  
TOTAL NUMBER OF PARKING SPACES PROVIDED: 277 SPACES PROPOSED (WITH THIS SUP AMENDMENT)

TOTAL CHANGE WITH THIS SUP AMENDMENT: ADDITION OF 229 SPACES (SUBJECT TO CHANGE)

**ENGINEER'S CERTIFICATE**

I, JAMES A. CARSON, JR., A LICENSED PROFESSIONAL ENGINEER IN THE COMMONWEALTH OF VIRGINIA, DO HEREBY CERTIFY THAT THE PROPERTIES UPON WHICH THIS SITE PLAN IS PROPOSED LIE IN THE NAME OF ST. JOHN'S CATHOLIC SCHOOL TEES, AS FOUND AMONG THE LAND RECORDS OF FAUQUIER COUNTY, VIRGINIA, IN DEED BOOK 205, PAGE 59.

# SAINT JOHN THE EVANGELIST CHURCH

271 Winchester Street  
Warrenton, Virginia 20186  
(540) 347-2922

## Statement of Justification

The church has an existing Special Use Permit for all the current uses on this property and has been operating on this site for 63 years. No new use is being requested. The church would like to demolish the existing cinder block office building and replace it with a new office building of similar size. The existing building was constructed as classroom and dormitory space in the early '40's and is located right on the property line abutting a residential neighborhood with no setback. The church has worked for the past two years to develop a plan to renovate the existing building to make it ADA accessible, install central HVAC, and manipulate the configuration to accommodate the modern needs of the church, but the cost was tremendous and given the shape of the existing building, the space was still not suitable for current needs.

The new building would be placed on the site to be on axis with the church and will meet all current setbacks. It will be finished in stone and stucco to match the church. The demolition of the existing building will allow for increased parking on the site to help mitigate any overflow onto neighboring streets. All new landscaping and any change in parking lot lighting will be presented on the site development plan and will be in accordance with all town ordinances. The schematic design of the building has already been presented to the town Architectural Review Board and has received their blessing.

The new building will provide a much better, fully accessible work environment, but will not increase the number of employees or increase the hours of operation. There will be no change to the service or refuse areas already located on the site.

As mentioned above, the church has had this use on the property for 63 years and it was used as the Stuyvesant School for decades before that. For as far back in the records as we could find, the future land use map has designated this parcel as Public/Semi Public – Intense. Only recently, and undisclosed to the church, this was changed to Live/Work Neighborhood. The church is an established use and has no intention of vacating this property. The zoning on the ground is still R-10 and allows for this use with a Special Use Permit which the church already possesses. Therefore, we are requesting that the existing Special Use Permit be amended to allow the existing office building to be demolished and reconstructed in a more favorable location on the site.

Civil Engineering ♦ Land Surveying ♦ Land Planning

## Saint John – SUP Amendment Addendum to Statement of Justification

January 26, 2023

Revised February 10, 2023

### **Additional items requested in letter from Town dated January 23, 2023**

- The existing conditions are shown on sheet 2 of the permit plat. Existing conditions are provided for the entire parcel.
- The SUP plat shows existing trees in vicinity of the existing building and the proposed building that will replace it. All previous approved plans and amendments have an approved landscape plan. A landscape plan associated with the proposed building will be required and provided at site development plan. At that time screening and buffering will be provided per Ordinance requirements. In addition, and in accordance with final design plans, existing trees between Winchester Street and the proposed building will be preserved to the extent possible.
- A copy of the previous SUP plat and conditions of approval have been provided in the form of a zoning determination letter dated January 6, 2017. We have also provided a copy of a master plan that may have been associated with the original special use permit approved June 3, 1986.
- Existing and proposed parking has been shown on the SUP amendment. No change is made to the existing required parking tabulation as provided in the Pre-School Addition plan approved on August 1, 2017. For the purposes of this application, more parking is being added to the site, while no increase to use/intensity is proposed. Therefore, adequate parking will be provided. Detailed parking tabulation will be required and provided with the site development plan.

### **Evaluation Criteria; Issues for Consideration**

1. Whether the proposed Special Use Permit is consistent with the Comprehensive Plan.

***Evaluation: The amended Special Use Permit is consistent with the Comprehensive Plan, as no change in use is proposed.***

2. Whether the proposed Special Use Permit will adequately provide for safety from fire hazards and have effective measures of fire control.

***Evaluation: The new office building is the same size as the old one, therefore current provisions for safety from fire hazards and effective***

**measures of fire control should be adequate. In addition, measures will be evaluated with site development and building plan as appropriate.**

3. The level and impact of any noise emanating from the site, including that generated by the proposed use, in relation to the uses in the immediate area.

**Evaluation: No additional noise shall be generated. Intensity of use is not being changed.**

4. The glare or light that may be generated by the proposed use in relation to uses in the immediate area.

**Evaluation: No additional light shall be generated. Intensity of use is not being changed. Commercial building and parking lot lighting if proposed will be required to meet Ordinance standards.**

5. The proposed location, lighting and type of signs in relation to the proposed use, uses in the area, and the sign requirements of this Ordinance.

**Evaluation: No signs are being proposed with the new building.**

6. The compatibility of the proposed use with other existing or proposed uses in the neighborhood, and adjacent parcels.

**Evaluation: No changes to the site's use is proposed. The site is compatible currently and this application only proposes to replace an existing building.**

7. The location and area footprint with dimensions (all drawn to scale), nature and height of existing or proposed buildings, structures, walls, and fences on the site and in the neighborhood.

**Evaluation: Shown on the SUP plat.**

8. The nature and extent of existing or proposed landscaping, screening and buffering on the site and in the neighborhood.

**Evaluation: No changes to landscaping, existing features are shown on the SUP plat. Additional landscaping will be required associated with the new building location and parking layout. A landscape plan will be provided and approved with a site development plan following the SUP amendment process.**

9. The timing and phasing of the proposed development and the duration of the proposed use.

**Evaluation: No changes to timing and phasing and duration of the proposed use. The church property is long-standing and is already integrated into the community.**

10. Whether the proposed Special Use Permit will result in the preservation or destruction, loss or damage of any significant topographic or physical, natural, scenic, archaeological or historic feature.

**Evaluation: The applicant is working with the ARB in terms of the existing building and any historical significance. It should be noted that a portion of the existing building foundation will be preserved to the extent practical and used as a retaining wall. This will reduce the impact of grading and construction on the existing features to be preserved.**

11. Whether the proposed Special Use Permit at the specified location will contribute to or promote the welfare or convenience of the public.

**Evaluation: The church property is long-standing and is integrated into the community.**

12. The traffic expected to be generated by the proposed use, the adequacy of access roads and the vehicular and pedestrian circulation elements (on and off-site) of the proposed use, all in relation to the public's interest in pedestrian and vehicular safety, efficient traffic movement and access in case of fire or catastrophe.

**Evaluation: No additional traffic beyond what is already existing.**

13. Whether the proposed use will facilitate orderly and safe road development and transportation.

**Evaluation: No change to roads or internal travelways.**

14. Whether, in the case of existing structures proposed to be converted to uses requiring a Special Use Permit, the structures meet all code requirements of the Town of Warrenton.

**Evaluation: The existing structure is to be demolished as the building can longer be serviced and maintained to current building standards. A new building is necessary to provide all code requirements.**

15. Whether the proposed Special Use Permit will be served adequately by essential public facilities, services and utilities.

**Evaluation: The new office building is the same size and use as the old one, so all services will be adequate.**

16. The effect of the proposed Special Use Permit on environmentally sensitive land or natural features, wildlife habitat and vegetation, water quality and air quality.

**Evaluation: The proposed building will be constructed in an existing open grass area. The land does not contain environmentally sensitive features that contribute to wildlife, water or air quality.**

17. Whether the proposed Special Use Permit use will provide desirable employment and enlarge the tax base by encouraging economic development activities consistent with the Comprehensive Plan.

**Evaluation: Not applicable.**

18. The effect of the proposed Special Use Permit use in enhancing affordable shelter opportunities for residents of the Town, if applicable.

***Evaluation: Not applicable.***

19. The location, character, and size of any outdoor storage.

***Evaluation: Not applicable.***

20. The proposed use of open space.

***Evaluation: Not applicable.***

21. The location of any major floodplain and steep slopes.

***Evaluation: Not applicable.***

22. The location and use of any existing non-conforming uses and structures.

***Evaluation: Not applicable.***

23. The location and type of any fuel and fuel storage.

***Evaluation: Not applicable.***

24. The location and use of any anticipated accessory uses and structures.

***Evaluation: Not applicable.***

25. The area of each proposed use.

***Evaluation: No changes of use. Only replacement of an existing building.***

26. The proposed days/hours of operation.

***Evaluation: No change to operation. Church use is predominantly on Sunday and the school is Monday through Friday during the day. The purpose of the amendment is the replacement building.***

27. The location and screening of parking and loading spaces and/or areas.

***Evaluation: Location of parking indicated on the plat. Screening to be addressed with landscape plan required at site development plan.***

28. The location and nature of any proposed security features and provisions.

***Evaluation: Provided on SUP plat, if applicable.***

29. The number of employees.

***Evaluation: Not applicable, existing uses with no changes.***

30. The location of any existing and/or proposed adequate on and off-site infrastructure.

***Evaluation: Provided.***

31. Any anticipated odors which may be generated by the uses on site.

***Evaluation: Not applicable.***

32. Refuse and service areas.

***Evaluation: Refuse and service areas will be accommodated with site development plan. Adequate area is available across the parcel.***

There being no further business, the meeting adjourned.

Respectfully submitted,

*Evelyn J. Weimer*  
Evelyn J. Weimer  
Recorder

MINUTES OF THE REGULAR MEETING OF THE COUNCIL OF THE TOWN OF  
WARRENTON HELD ON TUESDAY, JUNE 3, 1986

The regular meeting of the Council of the Town of Warrenton was held on Tuesday, June 3, 1986 at 7:00 p.m. in the Council Chambers of the Municipal Building.

The following members were present: Mr. J. W. Lineweaver, Mayor; Benjamin T. Harris, Vice-Mayor; Councilmen J. Frederick Austin, Jr.; Frank S. Foley; Robert J. Hockensmith; John L. Mann, Sr.; Councilwoman Kathryn A. Carter; Donald A. Smith, Acting Town Manager; Carroll J. Martin, Jr., Town Attorney, and Evelyn J. Weimer, Town Recorder.

The meeting was opened with invocation by Reverend Donald W. Pickens, Pastor, Warrenton Assembly of God.

All members received copies of the minutes of the regular meeting of May 6, 1986 and the recessed meeting of May 8, 1986. Miss Carter requested that page 3, paragraph 2 of the minutes of the recessed meeting of May 8, 1986 be corrected to read: "On a motion by Miss Carter, seconded by Mr. Austin, Council voted to ask Mr. Bendall to see if elections could be held the first Tuesday in May. If this is not possible, Council requested elections take place the last Tuesday in April preceding April 22nd."

On a motion by Mr. Hockensmith, seconded by Mr. Foley, Council approved the minutes of the regular meeting as presented and the minutes of the recessed meeting of May 8, 1986 as corrected.

Next on the agenda was to hear from visitors. Mrs. Beverly K. Hunsaker, Secretary of the Baha'i Local Spiritual Assembly of Fauquier County, appeared before Council to request Council passage of a proclamation declaring 1986 the year of Peace in the Town of Warrenton. Miss Carter expressed concern that the Town would be setting a precedent to allow visitors to speak on matters other than Town business. The Mayor told Mrs. Hunsaker it was not Council policy to pass a proclamation without first reviewing it. Mrs. Hunsaker left a copy of the proclamation for consideration.

Next was the Public Hearing on the application of Arlington Catholic Diocese for a special use permit for expansion of the St. John Catholic School and Church at 271 Winchester Street.

The Mayor stated the Public Hearing had been properly advertised.

The Mayor declared the Public Hearing open at 7:08 p.m. Mr. James Downey, Attorney, addressed Council on behalf of the Arlington Catholic Diocese. Mr. Downey stated the Church had been at its present location for 25 years. The current enrollment of the school is 203. Mr. Downey stated the school would be constructed in two phases. In Phase I, the present school would be closed and used for meetings and special functions. Phase I would increase enrollment to 270 students and would be completed in approximately 1 1/2 years. Phase II, would increase enrollment to 540 and include a relocation of the convent. The church would be constructed over a period of ten years or more.

There being no one other person to speak for and no one to speak against the application, the Mayor declared the Public Hearing closed at 7:15 p.m.

The Acting Town Manager stated that the architect's plans had been submitted indicating that the Church owned all of King Street and to the centerline of Winchester Street. Town Staff recommended a special use permit be granted only if the Arlington Diocese agreed to construct the public improvements and submit a plan prepared by a registered surveyor.

On a motion by Mr. Hockensmith, seconded by Mr. Mann, Council approved the special use permit for expansion of St. John's Church and School located at 271 Winchester Street subject to proper site plan review and resolution of the street right-of-ways.

Next was the Public Hearing on the application of the Warrenton Assembly of God Church for a special use permit to operate a pre-school program in the Church located at 276 Cleveland Street.

The Public Hearing had been properly advertised and the Mayor opened the Public Hearing at 7:28 p.m.

Reverend Donald Pickens stated that the Warrenton Assembly of God would like to operate a pre-school for children ages 2-5. He stated they were going through the process of obtaining all necessary permits.

There being no one else to speak for and no one to speak against the application, the Mayor declared the Public Hearing closed at 7:29 p.m.

On a motion by Mr. Harris, seconded by Miss Carter, Council approved the application of Warrenton Assembly of God for a special use permit to operate a pre-school program in the Church located at 276 Cleveland Street.

Next on the agenda was a Public Hearing on the application of Fauquier Temporary Family Shelter Coalition for a special use permit to operate a temporary shelter in an RMF zone on land owned by the County of Fauquier located at Keith and E. Franklin Streets.

The Public Hearing had been properly advertised and the Mayor declared the public hearing open at 7:31 p.m.

Mr. Steve Crosby, Fauquier County Administrator, stated the Board of Supervisors approved a portion of County land to be used by the shelter. The costs of relocation of the house will be funded by the Department of Social Services and FISH. The County will be responsible for the maintenance of the house after relocation.

Mrs. Jan Selbo, Director of the Department of Social Services, stated that her agency would be responsible for admissions to the shelter. She stated they would receive referrals from other community service organizations such as FISH, Community Action, and the Health Department. Social Services would use the services of the Town Police Department to screen people who would be using the shelter. Department of Social Services will make daily visits to the shelter when it is occupied and would be on call for emergencies.

Mrs. Jean Davis of FISH stated her organization is all-volunteer. They provide food, transportation, fuel, pay utility bills, purchase medical supplies and subscriptions and supply emergency housing for those who cannot obtain it through other sources. She stated the need was great for a shelter of this kind. She stated from July 1 through December 31, 1985, FISH received 41 requests for emergency housing assistance, but they only handled 7 of these, involving 14 people. FISH volunteers housed these 14 people in their own homes. She stated the Social Services Department has received 45 calls this year and only helped 2. Fauquier Community Action receives 5-10 calls per week for this kind of assistance.

Moving and renovating the house will be financed entirely by donations.

 19 Winchester Street  
 Warrenton, Virginia 20186

**RE: Zoning Determination Letter for 271 Winchester Street (GPIN 6984-36-7135-000)**

Dear Mr. Norden:

In response to your request for a Zoning Determination Letter for the above-mentioned property within the Town of Warrenton, please note the following:

- The zoning district for the parcel in question is R-10 (Residential). The parcel lies within the Historic District and is subject to the regulations of this Zoning Overlay District.
- The 2006 Zoning Ordinance R-10 District requires a Special Use Permit for church and school uses. However, the existing uses, Saint John the Evangelist Catholic Church and School received a Special Use Permit on June 3, 1986 to expand the church and school. The Special Use Permit included the following:
  - Construction of a school within two phases:
    - Phase I: Use of existing school for meetings and special functions. Increase enrolment from 203 to 270 students within approximately 1 ½ years.
    - Phase II: Increase enrolment to 540 students and relocate the convent.
  - Construction of the church would occur over a period of 10 years or more.

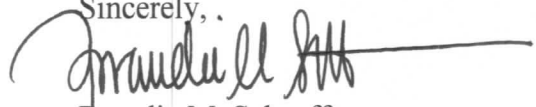

Conditions for the Special Use Permit approved on June 3, 1986 included:

- Proper Site Plan Review
- Resolution of Street Right-of-Ways
- As per the Special Use Permit approved on June 3, 1986, expansion of the school to allow the enrolment of up to 540 students is allowed by right upon approval of a Site Plan. All applicable Federal, state, and local regulations will need to be met for Site Plan approval. This includes, but is not limited to items such as:
  - Approval by the Architectural Review Board

- Building Code Regulations
- Public Facilities Manual Regulations
- Storm Water Management Regulations
- Zoning Ordinance Regulations
  - Impervious surfaces maximums (65%)
  - Setbacks (30ft front; 15ft side; 20ft rear)
  - Height (35 ft – up to 60 feet for institutional/church uses provided setbacks are increased 1ft per each foot above 35ft)
  - Parking requirements per Article 7
  - Landscaping requirements per Article 8

As the documentation that the Town has regarding the approved Special Use Permit is limited, it would be helpful if we could obtain a copy of the architect's plans submitted for the Special Use Permit application. Mr. James Downey was the attorney for the Special Use Permit application.

This Zoning Confirmation Letter only applies to the subject property noted above. This is a formal decision by the Zoning Administrator of the Town of Warrenton, Virginia. Any person aggrieved by any decision of the Zoning Administrator may take an appeal to the Board of Zoning Appeals. Such appeal shall be taken within thirty (30) days of the date of this letter by filing with the Zoning Administrator a notice of such appeal specifying the grounds thereof. The decision shall be final and unappealable if not appealed within thirty (30) days. The fees for filing an appeal are \$250.00 plus the cost of advertising and property notice mailings. Classified advertising is placed in the local paper for two consecutive weeks prior to the meeting with costs averaging around \$500.00. The cost for property notice mailings varies and depends on the number of adjacent owners. The adjacent property notices are sent via first class mail at the current first class postage rate, which is \$.48. The Zoning Office is located at 18 Court Street within Town Hall. Hours of operation are from 8 AM until 4:30 PM Monday through Friday. If you have any questions regarding this notice or would like additional information about the appeal process, please do not hesitate to contact me at (540) 347-2405.

Sincerely, .  
  
Brandie M. Schaeffer  
Director of Planning & Community  
Development Department

# Conditions of Approval

Item a.

1. General: This Special Use Permit is issued covering the entire Property pursuant to the provisions of § 11-3.10 of the Town of Warrenton Zoning Ordinance.
2. Site Development: The Property shall be developed in substantial conformance with the Special Use Permit Plan entitled, “Special Use Permit Plat,” prepared by Carson Land Consultants, , Page 1 dated February 10, 2023 and Pages 2-4 dated December 6, 2022, all revised May 30, 2023, consisting of four (4) sheets (the “SUP Plan”). Minor changes and adjustments may be made to the road and street alignments, entrances, parking, dimensions and location of SWM/BMP facilities, the exact configuration and location of building footprints, and other similar features as shown on the SUP Plan, provided they meet the intent of these Conditions and are approved by the Director of Community Development or the Zoning Administrator.

# Conditions of Approval

## 3. Use Parameters:

- a. Special Use Permit Area – The Special Use Permit shall apply to the entire +/-11.0664 acre site.
- b. Use Limitations – The use shall be limited to a religious institution and related facilities including the church, school, and those accessory uses customarily incidental to the primary uses.
- c. Maximum Students – The maximum number of students shall be 540 as approved in the previous SUP dated June 3, 1986.

4. Architecture: The site is located within the Historic District and is subject to Architectural Review Board, Certificates of Appropriateness (COA), and the Town of Warrenton Guide to Historic Resources. No structures shall be modified or erected until a COA has been issued. This includes walls and fences exceeding 36” in height.

5. Signage: All signage shall comply with the applicable provisions of Article 6 of the Town of Warrenton Zoning Ordinance.

6. Site Maintenance and Refuse Collection: Any refuse storage areas shall be screened with a solid enclosure constructed of materials that are compatible with the buildings on the property. The enclosure shall have gates that prohibit viewing this area from adjoining properties and public rights-of-way. The gates shall remain closed when not in use and the trash containers shall be emptied as necessary to prevent odors or infestation by vermin. Compliance with this condition shall be demonstrated on each final site plan(s). Deliveries and refuse collection shall follow Town Code Section 11-19(9).

# Conditions of Approval

Item a.

7. Environment: All landscaping shall be native and drought-resistant or other species as may be approved on the final site plan(s).

- a) Landscaping – The Applicant shall make all efforts to maintain and preserve the existing mature vegetation and hardwood trees when feasible.
- b) Minimize Clearing and Grading – The Applicant shall show the limits of clearing and grading for the site on the approved final site plan(s). For portions of buffers located outside the limits of clearing and grading, the existing vegetation shall be preserved and supplemented to meet the intent the buffer as noted above. In addition, existing trees and shrubs shall be incorporated into the landscaping plan. This does not preclude the removal of diseased, noxious and/or invasive vegetation.
- c) Stormwater Management – The property owner is required to account for all improvements, regardless of square footage, made to the property since July 1, 2014, and design and construct for the accumulative stormwater management for both quantity and quality in accordance with all applicable State and local requirements in effect at the time of site development plan approval.

# Conditions of Approval

## 8. Lighting:

- a. Proposed lighting shall be reviewed during the review of the Certificate of Appropriateness and at the time of site plan in accordance with the Zoning Ordinance.
- b. Building-mounted security lighting, which is full cut-off and directed toward the building and in compliance with the Zoning Ordinance, shall be permitted.
- c. All new and replacement light fixtures shall consist of full cut-off fixtures with a color temperature of 3,000 K or lower, and a maximum mounting height of 14 feet.
- d. Lighting on the school managed turf fields is prohibited.
- e. All other proposed lighting shall be addressed at site plan in accordance with the Zoning Ordinance.

# Conditions of Approval

Item a.

## 9. Transportation:

- a) Vehicular Access – The site shall be accessed from the Winchester Street and John E. Mann entrances. Egress shall be controlled via a stop sign traffic control with stop bar at the exits.
- b) There shall be no stacking of vehicles into the public right-of-way. The school is responsible for ensuring drop off and pick up from the school do not result in backs ups on the public streets. Stacking on the property by accessing the school by way of Winchester Street or staggering times is required to achieve this condition.
- c) Handicapped Parking and Signage – Handicapped parking and signage for shall be provided in accordance with the PFM and the Americans with Disabilities Act.
- d) Dedication of public right-of-way on Winchester Street shall be included on the Site Development Plan and be recorded prior to occupancy permit. With the dedication of the right-of-way frontage, the property owner will submit with the site plan an agreement to retain the maintenance of the existing perimeter wall and entrance features, including the entrance apron on Winchester Street for Town review and approval.

10. Parking: Parking located on the north side of the property, adjacent to Richards Lane shall buffer and shield the headlights of vehicles from the adjacent residences. Headlights shall be screened from view from the residential-zoned property located to the north to at least 3.5 feet in height above the parking surface elevation with a solid wall, sight-tight fence, evergreen shrubs, or other method as approved by the Zoning Administrator as a part of the Site Development Plan, to extend the length of the parking on the north side.

# Draft Conditions of Approval for Consideration

Item a.

11. Water and Sewer: The site shall continue to be served by public water, with the property owner bearing all costs associated with providing the additional services that will be required. Construction of a new 3-story building, +/- 13,000 square foot located at the northwest corner of the property on Winchester Street will require a separate water meter, per Town code.

12. Demolition: Demolition of the existing 3 story stone and block building located in the northwest portion of the property adjacent to Richards Lane shall require a permit from the Town. No final occupancy permit shall be issued on a new 3-story building, +/- 13,000 square foot located at the northwest corner of the property on Winchester Street until the above existing building has been demolished. The old building will be demolished within 6 months after the issuance of the temporary occupancy permit.

# Draft Motions for Consideration

Item a.

1. I move that the Town Council approve of SUP 23-1, St John Catholic Church to amend the approved SUP in June 3, 1986, to allow for the 13,000 square foot accessory use building the church and school, subject to the Conditions of Approval dated July 11, 2023, sheets 1 through 4 of the Special Use Permit Plan created by Carson Land Consultants dated February 10, 2023 and revised through May 30, 2023.

OR

2. I move that the Town Council forward SUP 23-1, St John the Evangelist to the next Town Council meeting.

OR

3. I move an alternative motion.

OR

4. I move to deny SUP 23-01 for the following reasons...

**Planning Commission Public Hearing**  
**SUP 23-1 St John the Evangelist**  
**July 11, 2023**

<b>Council Meeting Date:</b>	September 12 <sup>th</sup> , 2022
<b>Agenda Title:</b>	Consent Agenda: RRRC 50th Anniversary Resolution
<b>Requested Action:</b>	Review and consider approval of the RRRC 50th Anniversary Resolution
<b>Department / Agency Lead:</b>	Town Manager
<b>Staff Lead:</b>	Frank Cassidy

## EXECUTIVE SUMMARY

The Rappahannock-Rapidan Reginal Commission is celebrating it's 50<sup>th</sup> Anniversary this year. At the Commission's direction, Executive Director Patrick L. Mauney reached out to each of the 13 member districts to consider a resolution celebrating that historic milestone. Attached is the resolution commending RRRC on the 50 Years of exceptional work they have achieved for the region.

## BACKGROUND

The Rappahannock-Rapidan Reginal Commission is a Planning District Commission created under the Virginia Area Development Act. The Commission is comprised of appointed members from local government agencies in the region. Each participating county, city, and town with a population greater that 3,500 has the ability to appoint two representatives with one individual being an elected official. The Term of the appointment shall be for the term of the Elected Official, and in the case of an unelected appointment, the term shall be for no less than one year.

The Rappahannock-Rapidan Reginal Commission is abbreviated RRRC or by a historic moniker of Planning District 9 (PD9).

The Purpose of Planning District, or Regional Commissions, as set out in the Code of Virginia, Section 15.2-4207, is:

"...To encourage and facilitate local government cooperation and state-local cooperation in addressing on a regional basis problems of greater than local significance. The cooperation resulting from this chapter is intended to facilitate the recognition and analysis of regional opportunities and take account of regional influences in planning and implementing public policies and services.

The [Regional Commission] shall also promote the orderly and efficient development of the physical, social and economic elements of the district by planning, and encouraging and assisting localities to plan for the future."

Virginia's 21 Planning District or Regional Commissions, of which the Rappahannock-Rapidan Regional Commission (RRRC) is one, provide a variety of technical services and programming to member local governments.

William Semple, Councilman Ward 2, was appointed to the Planning District on March 8<sup>th</sup>, 2022. Francis Cassidy, Interim Town Manager, was appointed to the Planning District on July 11<sup>th</sup>, 2023.

**STAFF RECOMMENDATION**

---

Review and consider approval of the RRRC 50th Anniversary Resolution

**Service Level / Policy Impact**

This Resolution would be adopted in support of the RRRC mission. The mission helps the Town Support multiple aspects of Plan Warrenton 2040 including historic resource goals, housing goals, resiliency goals, among others.

**Fiscal Impact**

None.

**Legal Impact**

None.

**ATTACHMENTS**

---

1. RRRC 50th Anniversary Resolution

**A PROCLAMATION COMMENDING THE RAPPAHANNOCK-RAPIDAN REGIONAL  
COMMISSION ON ITS 50<sup>TH</sup> ANNIVERSARY**

**WHEREAS**, in 1966, the General Assembly created the Metropolitan Areas Study Commission (the Hahn Commission), which found that a holistic approach to solving local and regional problems needed to be taken; the Commission recommended a new concept, the creation of planning district commissions and service district commissions; and

**WHEREAS**, the Virginia Area Development Act (VADA), passed in 1968, created the Planning District Commission framework “to encourage and facilitate local government cooperation and state-local cooperation in addressing on a regional basis, problems of greater than local significance”; and

**WHEREAS**, on January 16, 1973, the Rappahannock-Rapidan Regional Commission (RRRC) held its first meeting at the Culpeper Town Hall with charter members from Fauquier County, Orange County, Rappahannock County and the Town of Warrenton attending; and

**WHEREAS**, the Rappahannock-Rapidan Regional Commission is now led by members representing the Counties of Culpeper, Fauquier, Madison, Orange, and Rappahannock, and the Towns of Culpeper, Gordonsville, Madison, Orange, Remington, The Plains, Warrenton, and Washington; and

**WHEREAS**, the RRRC has provided professional planning and technical resources, a concerted approach to regional cooperation, planning assistance with program delivery, and a forum for the interaction of appointed and elected officials and citizen members of the region, and serves as a liaison between local and state governments, partnering with the Commonwealth to carry out state initiatives at the local and regional level; and

**WHEREAS**, the RRRC and its partners have worked on numerous projects impacting the Rappahannock-Rapidan region in the areas of agricultural development, environmental planning, transportation planning and coordination, regional tourism, criminal justice planning, housing development and homeless services, hazard mitigation planning and regional growth issues; and

**WHEREAS**, the RRRC takes great pride in the value that its work has brought to the Rappahannock-Rapidan region over the past 50 years and recognizes the importance of regional collaboration in addressing challenges in the future; and

**NOW, THEREFORE BE IT RESOLVED**, that the Town Council of the Town of Warrenton on this 12<sup>th</sup> day of September 2023, commends the Rappahannock-Rapidan Regional Commission on their 50<sup>th</sup> Anniversary and all the exceptional work they have brought not just to the Town, but to the region.

<b>Council Meeting Date:</b>	September 12, 2023
<b>Agenda Title:</b>	Authorize support for the application of Culpeper Street Milling and Paving, from Shirley Avenue to Main Street
<b>Requested Action:</b>	Approve the resolution of support
<b>Department / Agency Lead:</b>	Public Works and Utilities
<b>Staff Lead:</b>	Michael Wharton

## EXECUTIVE SUMMARY

The Town submitted a pre-application for Culpeper Street Milling and Paving, from Shirley Avenue to Main Street, for VDOT Revenue Share Program as a Tier 3 project. The application has been screened and was successful to proceed to the final application phase.

VDOT requires a Resolution of Support for the final application phase to show the commit of the Town to allocating these funds. This resolution is a standard format for VDOT on these types of projects. Once the resolution is passed, staff will proceed with submitting the final application.

If successful, this project will be awarded 50 percent of total project cost by the VDOT Revenue Share Program. The estimate cost of the project is \$195,928.26 and funding will come available in Fiscal Year 2027. At that time, the Town will need to allocate 50 percent of project cost in the CIP for Fiscal Year 2027.

## BACKGROUND

The Town Public Works and Utilities Department submitted a pre-application for VDOT Revenue Share funds on May 31, 2023. This project was submitted as part of the continuing resurfacing projects within Town limits based upon the conditions of roadways and the availability of funds through VDOT. The Town will be submitting the final application to VDOT by October 2, 2023.

**STAFF RECOMMENDATION**

---

It is the recommendation of staff that the Town of Warrenton Council authorize the resolution of support.

**Service Level/Policy Impact**

The State of Good Repair, Smart Scale projects will support the Town’s transportation strategic goals by providing required maintenance and resurfacing to the designated sections of roadways as a continuing effort to maintain all roads in safe condition.

**Fiscal Impact**

This funding will save the Town 50 percent of the total cost of resurfacing Culpeper Street, from Shirley Avenue to Main Street. If awards the funds, the Town will need to budget \$97,964.13 in the 2027 CIP.

**Legal Impact**

No legal impact from the Town for this project.

## STAFF REPORT

<b>Town Council Meeting Date:</b>	August 8, 2023
<b>Agenda Title:</b>	33 N. Calhoun Street Cistern
<b>Requested Action:</b>	Work Session
<b>Decision Deadline:</b>	N/A
<b>Staff Lead:</b>	Casey Squyres, Preservation Planner

### EXECUTIVE SUMMARY

In May, 2023 the Town of Warrenton entered into a lease agreement with Fauquier County for 33 N. Calhoun Street. The subject property, known as the previous Visitors Center, contains a cistern located in front of the building. The County is requesting to remove the cistern to allow for direct ADA access from the parking lot.

### BACKGROUND

The Town of Warrenton owns the property at 33 N. Calhoun Street which contains a cistern in front of the building and is located within the Historic District. The property was part of the historic Brentmoor property that is subject to a historic preservation easement held by the Virginia Board of Historic Resources and administered by the Department of Historic Resources (DHR). The cistern is not listed as a contributing structure on the historic surveys conducted in 2019.

Fauquier County is exploring the option to remove the cistern to allow for direct ADA access from the parking lot to the building. The County approached DHR that found the proposed work of abandoning the cistern/well, removing the low wall and railing, and bricking over with pavers consistent with the walkway to be consistent with the Terms of the easement and the Secretary of the Interior's *Standards for Rehabilitation* (Attached Letter).

The Town of Warrenton Zoning Ordinance 3-5.3.4.5 states the demolition of a structure within the historic district may be approved by the Town Council if the structure has been identified as non-contributing.

The discussion of removing the cistern has also been brought up at the County/Town Liaison meeting and before the Architectural Review Board (ARB). While the ARB does not have purview over the potential demolition discussion, the Board indicated they are not opposed to its removal in an informal discussion.

Town staff has requested the County provide a layout of the proposal and a site visit with the County staff.

**STAFF RECOMMENDATION:**

---

Town staff conducted site visits to the property and offer the following for consideration during the work session:

- 1) If Town Council approves the demolition of the cistern, the bricks may be re-laid in a circular fashion, or in some other manner, to demark where the cistern was historically located.
- 2) Town Council may consider the removal of an existing tree to the left of the building, which would allow ADA clearance from the existing ADA marked parking space. This would allow the cistern to remain as is, or Council may allow the County to modify it in a manner that would allow for landscaping.

**ATTACHMENTS**

- 1) DHR Letter to Fauquier County
- 2) Fauquier County COA Form
- 3) Submitted Pictures

Brentmoor (Spilman-Mosby House), 33 N. Calhoun Street, Warrenton, Fauquier County  
Easement File No. 156-0014\_ep

Mr. McCulla ~

Thank you for submitting a project review request reflecting proposed modifications to the existing cistern/ well on the Brentmoor property in Warrenton. This request was submitted vis U.S. Mail and received at the Department of Historic Resources (CHR) on March 29, 2023. As you are aware, this property is subject to an historic preservation easement held by the Virginia Board of Historic Resources and administered by the Department of Historic Resources (DHR), which requires modifications to the property receive the prior review and approval of DHR.

According to the information received, the well is located in front of the Visitor Center, which is at the rear of the property. In the current state, the well, and its railing and surround, present a safety concern and are an obstacle to providing appropriate access consistent with Americans with Disabilities (ADA) guidance. As proposed, the cistern/well would be abandoned in accordance with applicable regulations of the Virginia Department of Health and the Virginia Department of Environmental Quality. The low wall and railing will be removed and the opening bricked over with pavers consistent with the walkway.

Following review of the information provided, DHR concluded that the work in this proposal is consistent with the terms of the easement and the Secretary of the Interior's *Standards for Rehabilitation* and is approved. This approval is valid for one year from the date of this letter. If you need to revise the scope of work or are unable to complete the work within one year, please contact me.

Sincerely,

Megan Melinat  
Director, Preservation Incentives Division

September 12, 2023  
Town Council  
Regular Meeting

**RESOLUTION TO APPROVE THE REMOVAL OF THE CISTERN LOCATED AT 33 N. CALHOUN STREET**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the County of Fauquier; and

**WHEREAS**, the Town of Warrenton owns 33 N. Calhoun and all structures on the property; and

**WHEREAS**, on May 3, 2022 the Town of Warrenton entered into a twenty (20) year lease agreement with Fauquier County for 33 N. Calhoun Street to allow the County to use the property for medical and mental health clinic purposes with related services; and

**WHEREAS**, the subject property, known as the previous Visitors Center, contains a cistern located in front of the building; and

**WHEREAS**, Fauquier County is requesting to remove the cistern to allow for direct ADA access from the parking lot; and

**WHEREAS**, the property is part of the historic Brentmoor property that is subject to a historic preservation easement held by the Virginia Board of Historic Resources and administered by the Department of Historic Resources (DHR); and

**WHEREAS**, the cistern is a noncontributing structure and not listed on the historic surveys conducted in 2019; and

**WHEREAS**, Fauquier County approached DHR, which found the proposed work of abandoning the cistern/well and thereby preserving it subsurface in the event that it is uncovered again in the future, removing the low wall and railing, and bricking over the cistern/well with pavers in a manner consistent with the existing walkway, to be consistent with the Terms of the easement and the Secretary of the Interior's Standards for Rehabilitation; and

**WHEREAS**, the Town of Warrenton Zoning Ordinance 3-5.3.4.5 states the demolition of a structure within the historic district may be approved by the Town Council if the structure has been identified as noncontributing.

**NOW THEREFORE BE IT RESOLVED**, by the Warrenton Town Council that Fauquier County shall be able to abandon, preserve, and brick over the cistern at 33 N. Calhoun Street, provided that all necessary permits are acquired.

<b>Council Meeting Date:</b>	September 12 <sup>th</sup> , 2023.
<b>Agenda Title:</b>	Moving of the Strategic Retreat Date
<b>Requested Action:</b>	Direct staff on the changes to the strategic retreat date.
<b>Department / Agency Lead:</b>	Town Council
<b>Staff Lead:</b>	Stephen Clough

## EXECUTIVE SUMMARY

The original Strategic Retreat date of September 16<sup>th</sup>, 2023, no longer has the ability to have a facilitator from the Virginia Institute of Government or other outside facilitators present at the meeting.

Ms. Jane Dittmar from VIG and staff have worked together on the following recommendation for the Council's strategic retreat plan.

- 1) Hold a work session at the October Town Council meeting to review the strategic goals laid out from the September 2022, Strategic retreat and discuss priorities from Council and Staff for the upcoming year.
- 2) After the work session, staff will begin to implement the priorities as the Budget process for 2024-2025 begins.
- 3) In late January, hold a strategic retreat with VIG or another facilitator to address the strategic goals and other topics identified by staff and Council.
- 4) In Late February, Hold a budget retreat for a preview of the implementation of the new strategic goals and the upcoming budget cycle for 2023-2024.

## BACKGROUND

On September 24<sup>th</sup>, 2022, the Warrenton Town Council met with Ms. Jane Dittmar of the Virginia Institute of Government for a Strategic Retreat. This retreat allowed the Council to begin to work on biannual goals and set direction for Staff to begin work on the FY24 Budget. The September 2023 Retreat will begin the budget process for the Town and allow the Council to set goals and direct policy decisions to align itself with Plan Warrenton 2040.

At the June 13<sup>th</sup>, 2023, Regular Town Council Meeting, a resolution was adopted to hold the Strategic retreat on September 16<sup>th</sup>, 2023, at the Warrenton Police Department.

Discussions with the Virginia Institute of Government and other facilitators were held to determine a recommendation to the Council for the facilitator.

Due to unexpected impacts to the schedule, one facilitator had an unexpected narrowing of their ability to conduct the strategic retreat thus rendering the September 16<sup>th</sup>, date unavailable. Additionally, VIG no longer had availability for the requested date after review of their schedule.

Based on the recommendation from Ms. Jane Dittmar, staff recommends holding the strategic retreat in late January of 2024.

**STAFF RECOMMENDATION**

---

With the guidance of the Virginia Institute of Government, staff recommends the following actions:

- 1) Hold a work session at the October Town Council meeting to review the strategic goals laid out from the September 2022, Strategic retreat and discuss priorities from Council and Staff for the upcoming year.
- 2) After the work session, staff will begin to implement the priorities as the Budget process for 2024-2025 begins.
- 3) In late January, hold a strategic retreat with VIG or another facilitator to address the strategic goals and other topics identified by staff and Council.
- 4) In Late February, Hold a budget retreat for a preview of the implementation of the new strategic goals and the upcoming budget cycle for 2023-2024.

**Service Level/Policy Impact**

The strategic retreat will allow the Council to set goals and direct staff directly impacting all service levels of the Town and affecting all aspects of Plan Warrenton 2040.

**Fiscal Impact**

Some locations have an additional financial impact for rental costs or for streaming costs if live streaming or remote participation is requested by the Council.

**Legal Impact**

No Legal impact has been identified at this time.

Stephen Clough, Clerk, Warrenton Town Council  
FR: Charles Hartgrove, ICMA-CM, Managing Director  
Jane Dittmar, Consultant  
Virginia Institute of Government  
RE: Planning Meeting Follow Up  
DT: September 1, 2023

Thank you for your time this week to discuss the possibility of the Virginia Institute of Government (VIG) assisting Warrenton's Town Council in developing a strategic plan to serve as a roadmap for the Town for the next three or more years.

The process we recommend is the following:

1. Schedule an early 2024 extended work session for the newly seated Council to develop the strategic plan, as well as consider other governing issues faced by the Council. This retreat will be designed and facilitated by VIG. You have tentatively identified the weekends of January 27 or February 2 for this retreat. VIG will hold the option of one of these dates for Warrenton provided Council is able to confirm arrangements with VIG by September 30. Because of the number of jurisdictions hoping to develop plans in the first quarter of next year, it will be impossible to hold this time after that.
2. Reach consensus on whether, besides executing the extended work session, you wish to retain VIG to write the draft plan for Council consideration and adoption. Finally, consider whether you wish VIG to work with the professional staff of the Town to determine milestones, metrics and an internal schedule for periodic reviews to measure successful execution of the plan.
3. Review the After-Action Report, completed by VIG for the Council last fall, to determine if the priorities identified at the September 2022 retreat still encompass the key priorities of the current Council. This can be reviewed at a Town Council work session sometime this fall. We will review the minutes and the video of this work session for insights to determine if Council direction remains the same or whether it may have shifted over the last 12 months. This will be part of our preparation to design the agenda for the 2024 Council retreat. So, if you do not have consensus at your work session, we can address this at the retreat.

VIG will draft a scope of work for Council consideration as soon as you let us know what process you would like to follow. The Town of Warrenton is an important VIG client and we stand ready to support the Town's progress so please do not hesitate to call, if you wish to discuss this further.

## Warrenton Town Council Fall Retreat After Action Summary & Recommendations

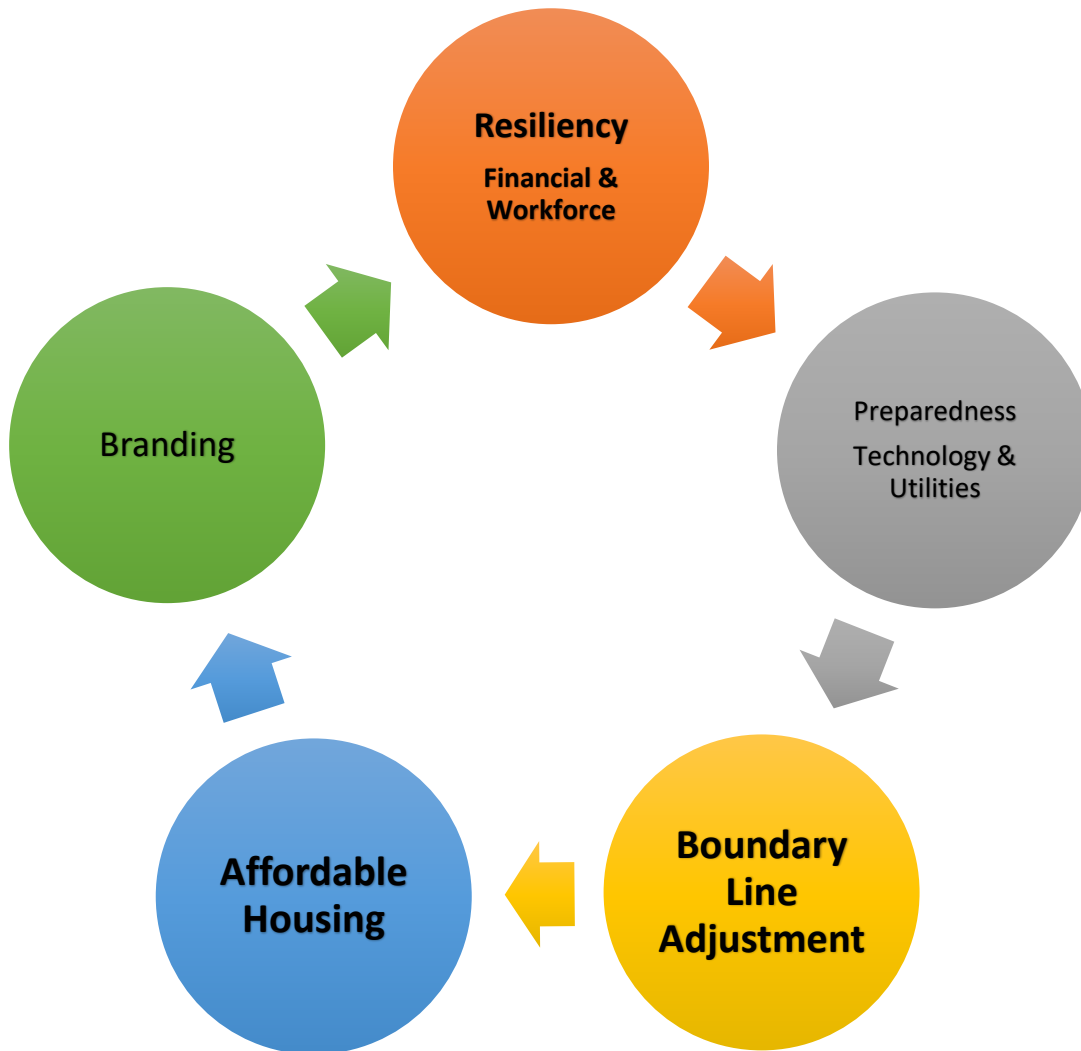

### 1. Executive Summary

The Town Council retreat revisited the priorities identified at its 2019 retreat, and the goals and themes of the Town’s adopted Plan Warrenton 2040 Comprehensive Plan.

This is the first retreat since 2019 due to the pandemic, during which the Town, like many others, operated on an emergency basis. Many capital projects were delayed during the pandemic, while basic programs and services were maintained.

This year’s retreat provides a starting point for the Council to continue its deliberations toward reaching consensus on how to move from the 2040 plan to the 6-year Capital Improvement Program (CIP), to the annual budget. The fiscal year 2024 annual budget, that will be adopted by the Town Council in June 2023, should reflect the Council’s short-term strategic priorities (1-5 years), consistent with the long-term goals of the Plan Warrenton 2040 Comprehensive Plan.

Based on the Council’s discussions of the priorities identified in 2019, and the emerging priorities discussed at this year’s retreat, each of the following issues (see diagram below) will require further discussion and consideration over the next few months, for Council to reach consensus and provide necessary direction to the Town Manager and professional staff.

1. **Resiliency & Preparedness** – Identifying key actions and initiatives that will protect and promote a successful future for Warrenton specifically in the areas of (1) financial and workforce resources and (2) technology and utility investments.
2. **Boundary Line Adjustment** – including overall relationship with the County and the process to finish this project. Resume regularly scheduled Town/County Liaison Committee meetings with a particular focus on boundary line adjustments.
3. **Affordable Housing** – including how the County and Non-Governmental Organizations can assist in this challenge.
4. **Branding** – Determining the next steps in this ongoing goal.

**Recommendations:**

To build on the work of the September 24 retreat and to be well positioned for the Town's next fiscal planning cycle it would be advisable to review these initial discussions in relation to existing policy guiding documents.

The Plan Warrenton 2040 Comprehensive Plan is a guiding document for future decisions regarding development, preservation, public facilities, and other key components of community life. Although the plan seeks to provide a clear vision to help steer the Town, it provides a long term, 20-year, development horizon and is therefore very general in nature.

Accordingly, the Council may want to consider a shorter-term strategic plan that would provide the necessary 1–5-year prioritized policy guidance to the Town Manager and professional staff that can then be incorporated into the Town's Six-Year Capital Improvement program (CIP) and Annual Fiscal Plans.

A shorter term, 1–5-year, planning document would help the Council and the community realize its long-term vision by establishing goals and objectives in a logical, systematic, incremental manner.

Such a plan could look like the diagram below.

Once Council achieves further consensus on priorities, the professional staff can begin to:

1. Identify staff resources needed to execute the initiatives that will address these priorities
2. Identify the resources needed to pursue these priorities and develop program and project plans to achieve the desired goals. These resources include funding; technology, and human resources including managerial time.
3. It is also advisable to adopt project mapping software so initiatives can be reviewed for planning purposes and analyzed for milestone progress.

## 1. Overview of the Fall Retreat

### Retreat Preparation

During the weeks preceding the Warrenton Town Council planning session, 1-hour individual interviews were conducted to prepare for the retreat. The following people participated in a one-on-one format via video with Jane Dittmar from the Virginia Institute of Government:

#### **Council Members (9)**

H. E. Carter Neville – Mayor  
James N. Hartman – Vice Mayor (Ward 4)  
Renard Carlos – At Large Member  
Sean Polster – At Large Member  
Heather D. Sutphin – Ward 1  
William Semple II – Ward 2  
Brett A. Hamby – Ward 3  
Jay Heroux – Ward 5 (newly appointed)  
Kevin Carter – Ward 5 (recently resigned)

#### **Professional Staff (10)**

Chris Martino – Interim Town Manager  
Tommy Cureton – Deputy Town Manager  
Stephen Clough – Town Clerk  
Kasey Braun- Human Capital Director  
Frank Cassidy – Public Works & Utilities Director  
Rob Walton- Community Development Director  
Denise Harris – Planning Manager  
Michael Kochis – Chief of Police  
Stephanie Miller – Finance Director  
Jonathan Stewart – IT Director  
Kelly Koernig – Parks & Recreation (Acting) Director

## The Retreat

On September 24, 2022, The Warrenton Town Council convened a day long retreat at the Warrenton Police station. Those present included:

### **Council Members (8)**

H. E. Carter Neville – Mayor  
 James N. Hartman – Vice Mayor (Ward 4)  
 Renard Carlos – At Large Member  
 Sean Polster – At Large Member  
 Heather D. Sutphin – Ward I  
 William Semple II – Ward 2  
 Brett A. Hamby – Ward 3  
 Jay Heroux – Ward 5

### **Professional Staff (4)**

Chris Martino – Interim Town Manager  
 Tommy Cureton – Deputy Town Manager  
 Stephen Clough – Town Clerk  
 Stephen Bruck – IT Specialist

### **Facilitator**

Jane Dittmar – Virginia Institute of Government

## RETREAT AGENDA

- 1) Roles & Responsibilities of Elected Bodies and Professional Staff
- 2) Norms and Expectations among Council Members
- 3) Communication Strategies for Council Members
- 4) Challenges and Opportunities facing the Town
- 5) Existing Priorities found in the last Strategic and Comprehensive Plans
- 6) Emerging Priorities based on Challenges and Opportunities facing the Town
- 7) Next steps

## 1. Roles and Responsibilities

The science and philosophy behind highly performing elected bodies and their staff was discussed. Material from national and international organizations was reviewed.

### **Town Council**

There was agreement that the Council is the policy maker and responsible for addressing the Town's long-term future by adopting the capital improvement and comprehensive plans, formulating annually a budget and setting the tax rate, enacting local ordinances and making land use determinations. The Council also understands its role hiring the Town Manager and Town Attorney (or by securing outside legal services).

### **Town Manager & Staff**

There was agreement the Town Manager is responsible for hiring, reviewing and retaining professional staff to execute Council policy and for ensuring high-level service delivery for Town residents. Discussion followed whether it was appropriate for individual Council members to work directly with staff instead of going through the Manager with constituent service requests. Utilizing the Town Manager to triage requests is the protocol described in the 2024 Warrenton Town Council Handbook. The handbook procedure was reaffirmed and Council members decided to review protocols on handling constituent service and other requests when the new Manager is on boarded.

### **Preferences for how Council Would Like Information**

The group also discussed their preference in receiving briefings and recommendations from staff. There was consensus that an executive summary of findings and the recommendation of staff is a format that would be well received. There was not general consensus on how many options should be offered. Some members preferred just one recommendation with supporting justification. Others wanted a recommendation that included all the options considered by staff, and besides the supporting justification for the final recommendation, they wanted a brief explanation as to why the other options were rejected. One member did not like having three options to consider. There should be further discussion about how to present the staff recommendation found in their executive summaries.

## 2. Norms and Expectations

### **A. Summary**

During individual Council members' interviews, the topic of norms of behavior among members came up frequently. This subject was added to the agenda. Besides stated norms found in the 2022 Warrenton Town Council Handbook, the Council discussed norms that were important to them individually and as a whole. Questions were posed such as:

- 1) How do we develop and find consensus on our norms?
- 2) How do we (shall we) evolve our norms?
- 3) How do we communicate our norms to new members?
- 4) What do we do if a norm is violated unintentionally?
- 5) What should we do if a member needs to violate a norm?

## B. Individual interviews

During the individual interviews the following themes emerged:

- 1) **One Voice** – Members should bring policy and requests to the full Council so by majority, the Council can speak as “one voice”.
- 2) **No Surprises** – let your fellow members know in advance if they might be surprised by a motion or announcement
- 3) **General Decorum** – treat other members as you want to be treated
- 4) **The actions of a fellow member v. the member** – criticize actions or policies being promoted by a member, not the member themselves and keep language from becoming personal. Exercise care in social media posts and other group communication.
- 5) **My Ward – Our Town** – recognize and respect the ward members who represent a particular ward and all members should understand that the Council considers the good of the whole town.
- 6) **Horse trading votes** – when horse trading ward to ward, ensure that these votes are good for the whole town.
- 7) **Handling “breaches”** – reach out to understand a breach before reacting to what you assume was the motivation.

## C. Exercise results

Members broke into four groups of two each to discuss norms and expectations. The following highlights illustrate the priorities of the members:

- 1) **Boundaries**
  - a. **Ward boundaries** – those in wards request that they be notified if another member has town business to discuss or attend to in their ward. That said, some members didn’t want the town to be too siloed by ward boundaries and wanted everyone to vote on behalf of the entire town.
  - b. **Staff boundaries** – “don’t put staff in the middle on issues”
  - c.

## 2) Respect for each other

There was also good consensus around the showing of mutual respect by avoiding surprising a fellow member by talking outside of official meetings, coming prepared to meetings, accepting each other's differences and handling disagreements or concerns in private and preferably in person.

## 3) Handling Breaches

Discussion included the recommendation that any breach should be addressed carefully with respect on both sides.

## 3. Communication Strategies & Tools

Some time was devoted on tools and strategies for effective communication.

## 4. Existing Priorities

### A. Summary

The Council spent time reviewing existing priorities found in the Comprehensive Plan "Plan Warrenton 2040" and in the findings of the last strategic plan held in 2019.

Plan Warrenton 2040 serves as the official document tying together community features with the overall vision for its future. It is broken into 7 areas of community policy and development:

- 1) Historic resources
- 2) Community facilities
- 3) Housing
- 4) Open space, parks & environment
- 5) Transportation and circulation
- 6) Economic and fiscal resilience
- 7) Land use and character district plan

B The strategic plan created in 2019 identified the following priorities:

- 1) **Boundary Adjustment- Facilities** – From the Community Facilities section of the Comprehensive Plan
- 2) **Branding- Who, What, Where** – From both the Historic Resources section and the Economic and Fiscal Resilience sections of the Comprehensive Plan
- 3) **Recreation- Quality of Life Activities** - From the Open Space Parks and Environment section of the Comprehensive Plan
- 4) **Historic District - Boundaries** – from both the Historic Resources and Land Use and Character District Plan
- 5) **Gateways** – from both Transportation and Circulation section and the Land Use and Character District section of the Comprehensive Plan and
- 6) **Inventory of Affordable Housing** – from the Housing section of the Comprehensive Plan

### C Group Exercise – reaffirming existing priorities

Members broke into four groups of two each to discuss norms and responsibilities. The following highlights illustrate the goals of the members. The top priorities identified by all four groups were:

1. Successful completion of the **boundary line adjustment** project  
Top priority in two groups, number two priority in the other two groups  
This priority continues to be consistent with both the Comprehensive Plan, found in the Community Facilities section, and the 2019 Council Retreat findings.
2. Forward movement on addressing **the affordable housing shortage**  
Top priority in one group, Second priority in one group, third priority in two groups  
This priority continues to be consistent with both the Comprehensive Plan found in the Housing section and the 2019 Council Retreat findings.
3. Continue the **branding** initiative for the town  
Second priority in one group, third priority in one group, fourth priority in one group and fifth priority in one group. This priority continues to be consistent with both the Comprehensive Plan, found in the Historic Resources section and the Economic and Fiscal Resilience section, and the 2019 Council Retreat findings.
4. Honorable mentions were recorded for:
  - a) Recreation (mentioned twice)
  - b) Historic resources (mentioned twice)
  - c) Transportation, including walkability (mentioned twice)
  - d) Economic Development (mentioned once)

### D Group Exercise – Identifying Emerging Priorities

Members broke into four groups of two each to discuss emerging priorities. The following highlights illustrate the priorities of the members

There were a number of emerging priorities the Council considered. The two major emerging priorities centered on **resiliency and workforce**.

- 1) **Resiliency** came in as number one emerging priority. It was listed number one for three groups and one of the three groups listed it twice. Descriptors for resiliency included:
  - a) “financial”
  - b) “preparedness”, and
  - c) “preparedness for change”.

**2) Workforce**, arguably a subcategory of resiliency, was elevated to its own priority. It was listed as the number two issue for two groups and the number three issue for two groups. Descriptors included

- a) "Hiring Town Manager"
- b) "Employee retention"
- c) "Employee recruitment and retention", and
- d) "Protecting our workforce"

**3)** Honorable mentions were recorded for:

- a) Representing town demographics; honoring diversity (mentioned twice)
- b) Maintaining high level of trust with residents (mentioned once)
- c) Maintaining the qualities of Warrenton that make it distinctive (mentioned once)
- d) Preparing for the future embracing change (mentioned once)
- e) Preparing for climate change (mentioned once)

## 5. Next Steps

There are several events in the near future that are significant to Council working through these priorities. They are:

1. Fall (October/November 2022): Communication with the search firm regarding the qualities the Council wants in their next Manager.
2. Winter (December 2022-February 2023): Utilizing remaining work session(s) in 2022 to review the cost, action steps and timing of identified priorities for 2023. Also test the formats for explaining recommendations in executive summaries to determine which style suits the Council.
3. Winter (December 2022-January 2023): The November 2022 election will identify the several new members who will join the Council effective January 2023. Besides other materials, new member orientation can include a discussion of norms and expectations with other remaining members of the Council.
4. Winter (December 2022-January 2023): The on boarding of new Council members
5. Winter (February 2023): Conduct a fiscal planning retreat where for Council to assess the Town's financial strength and stability, review recent financial trends, identify any warning signs and provide guidance and direction regarding the desired quality and level of programs and services, capital investments and how to allocate the Town's limited resource to move ahead on its priority initiatives.
6. Winter (February 2023): The on boarding of the new Town Manager.

7. Spring (March-April 2023): Staff preparation of the proposed FY 2024 Annual Budget, the FY 2024 – FY 2029 6-year CIP and FY 2024 – FY 2028 year Budget. To do this there will need to be clear direction from Council on what priorities will be “slow walked” and which priorities should command the most discretionary resources in the next budget cycle.

February 14<sup>th</sup>, 2023, Regular Town Council Meeting.

February 25<sup>th</sup>, 2023, Special Town Council Meeting.

March 14<sup>th</sup>, 2023, Regular Town Council meeting.

### BACKGROUND

The Town Council Meeting minutes are created by the Town Clerk for each meeting of the Town Council to summarize the meetings and act as an official record for the proceedings per Warrenton Town Code (Code 1981, § 2-31).

Per Virginia Code § 2.2-3707(i) the meeting minutes will contain the following:

- (a) the date, time, and location of the meeting;
- (b) the members of the public body recorded as present and absent; and
- (c) a summary of the discussion on matters proposed, deliberated, or decided, and a record of any votes taken.

In addition, for electronic communication meetings conducted in accordance with § 2.2-3708.2 or 2.2-3708.3, minutes shall include (1) the identity of the members of the public body who participated in the meeting through electronic communication means, (2) the identity of the members of the public body

who were physically assembled at one physical location, and (3) the identity of the members of the public body who were not present at the location identified in clause (2) but who monitored such meeting through electronic communication means.

The minutes are an integral part of Plan Warrenton 2040 as they document the steps taken by the Staff and Town Council towards every goal laid out in the Comprehensive plan.

**STAFF RECOMMENDATION**

---

Review and consider approval of the Town Council Meeting Minutes.

**Service Level / Policy Impact**

The minutes of the Town Council Meetings help facilitate transparency in Government with records management and availability.

**Fiscal Impact**

No additional impact is expected. Minutes creation is an assigned duty of the Town Clerk and falls within the budget amount for that role.

**Legal Impact**

The Town Council Meeting minutes are the legal record of the proceedings and actions of the Town Council.

**ATTACHMENTS**

---

- 1. November 9<sup>th</sup>, 2022, Regular Town Council meeting.
- 2. December 13<sup>th</sup>, 2022, Regular Town Council meeting.
- 3. January 10<sup>th</sup>, 2023, Regular Town Council meeting.
- 4. February 14<sup>th</sup>, 2023, Regular Town Council Meeting.
- 5. February 25<sup>th</sup>, 2023, Special Town Council Meeting.
- 6. March 14<sup>th</sup>, 2023, Regular Town Council meeting.

PRESENT Mr. Carter Nevill, Mayor; Ms. Heather Sutphin; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. Sean Polster; Mr. Mr. Renard Carlos; Mr. Christopher E. Martino, Interim Town Manager; Mr. Tommy Cureton, Deputy Town Manager; Mr. Stephen Clough, Town Clerk; Mr. Martin Crim, Town Attorney.

PRESENT ELECTRONICALLY Mr. William Semple

ABSENT None

REGULAR MEETING.

PRESENT Mr. Carter Nevill, Mayor; Ms. Heather Sutphin; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. Sean Polster; Mr. Mr. Renard Carlos; Mr. Christopher E. Martino, Interim Town Manager; Mr. Tommy Cureton, Deputy Town Manager; Mr. Stephen Clough, Town Clerk; Mr. Martin Crim, Town Attorney.

PRESENT ELECTRONICALLY Mr. William Semple

ABSENT None

**WORKSESSION - 9:01 AM Called to Order.**

Mayor Nevill called the meeting to order at 9:01am and stated that a quorum was present.

Councilmen Semple stated he was at home at 319 Falmouth Street in Warrenton participating electronically because of a medical condition that prohibited him from attending.

**1. Closed Session.**

Vice Mayor Hartman moved to convene a closed session under:

Virginia Code §2.2-3711 (A)(3) to discuss the acquisition of real property within Town limits for the use of a park.

Councilman Hamby Seconded.

**Ayes:** Mr. James Hartman, Vice Mayor; Mr. Sean Polster; Mr. Brett Hamby; Mr. Jay Heroux; Mr. Renard Carlos; Ms. Heather Sutphin; Mr. William Semple

*Nays:*

*Abstention:*

*Absent:*

The motion passes unanimously. Mayor Nevill stated the meeting will proceed into Closed Session.

At 10:46 AM, Council reconvened in the dais chambers to certify the Closed meeting. Upon reconvening from the closed session, Town Council adopted the following Certification of Closed meeting:

#### CERTIFICATION OF CLOSED MEETING

**WHEREAS**, the Town Council of the Town of Warrenton has convened a closed meeting on this date pursuant to an affirmative recorded vote in accordance with the provisions of the Virginia Freedom of Information Act; and

**WHEREAS**, Section 2.2-3172 E of the Code of Virginia requires a certification by the Town Council that such closed meeting was conducted in conformity with Virginia law;

**NOW, THEREFORE, BE IT RESOLVED** that the Town Council hereby certifies that, to the best of each members knowledge, (i) only public business matters lawfully exempted from open meeting requirements by Virginia law were discussed in the closed meeting to which this certification resolution applies, and (ii) only such public business matters as were identified in the motion convening the closed meeting were heard, discussed or considered by the Town Council

Vice Mayor Hartman proposed the certification, Councilmen Hamby seconded, the vote for the motion was unanimous, as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. Sean Polster, Mr. Renard Carlos.

*Nays:*

*Abstention:*

Mayor Nevill declared the Council officially certified out of Closed session.

Mayor Nevill suggested the Council begin the Agenda Review.

Interim Town Manager Martino began to review the agenda.

Mayor Nevill suggested pushing the agenda review to the end of the meeting to accommodate the presenters before Council.

## 2. North Rock Harris Teeter Service Station.

Ms. Denise Harris, Planning Manager introduced the topic before Council.

Ms. Jessica Pfeiffer, a Representative of Harris Teeter was available to answer questions from the Council.

Councilwoman Sutphin addressed safety concerns regarding the North Rock Harris Teeter Service Station project and mentioned that it was within the Ward she represents.

Ms. Pfeiffer presented changes to the project application made to address the Concerns of the Council.

Ms. Pfeiffer discussed a brief history of Harris Teeter in the North Rock Shopping Center and why it wished to move forward with a service station project. She discussed the geography and infrastructure of the area.

Councilmen Sutphin expressed concerns regarding the width of roads in the North Rock Shopping Center.

Ms. Pfeiffer stated additional steps may be taken to investigate addressing infrastructure concerns if the necessary parties agree.

Councilmen Heroux asked Ms. Pfeiffer about the loading and unloading of fuel pumps. Ms. Pfeiffer demonstrated how a truck would drive into the center to load/unload the pumps.

## 3. Broadview Avenue Safety Improvement Project: Waterloo Street Update.

Mr. Martino introduced Ms. Harris.

Ms. Harris gave a presentation on Waterloo Junction Mixed-Used zoning. She stated the applicant was proposing a mixed-use development and discussed the details of the request, the planned development, the geography, the architecture, and the organization of the proposed development. Ms. Harris introduced Mr. John Foote to discuss the proposal on behalf of the applicant.

Mr. Foote stated he has no presentation and was willing to answer questions.

Councilmen Heroux inquired about the location of the six planned apartments included within the proposal.

Mr. Foote confirmed the location.

Councilmen Heroux questioned whether there were current residents within the mentioned apartments and their occupancy status during a potential renovation.

Mr. Foote stated that he does not know the answer and stated that he believed they would not be permanently evicted. He reiterated that all apartments would be renovated and put to market with a monthly rent.

Councilmen Heroux asked Mr. Foote if monthly rent increased, might current tenants not return.

Mr. Foote stated he does not know.

Councilmen Heroux asked about the relation between the apartments and the proposed homeowner's association.

Mr. Foote stated the apartments are owned by another individual who would be the deciding factor.

Councilmen Polster asked about traffic impacts on the surrounding site, and whether it would be less than a previously proposed shopping center.

Mr. Foote stated his connection to that shopping center proposal and that traffic would be less than that previous proposal.

Councilmen Polster mentioned traffic issues with parcels along Broadview Avenue. he asked about the effects of and plausibility of a proposed roundabout in the surrounding area.

Ms. Harris stated that the proposed roundabout was not considered competitive by VDOT.

Councilmen Polster asked about communication between this project and neighbors. Mr. Foote stated he believes there has been no formal outreach.

Mayor Nevill asked about the direction of housing units on the northwestern side of the property. Councilmen Heroux asked this question, too.

Mr. Foote stated that the front of townhouses will face Norfolk Drive.

Councilmen Polster asked if the built streets were public or private.

Councilmen Hamby inquired about the right turn-only lane onto Bear Wallow Road.

Councilmen Hamby asked whether new apartments will be to housing code.

Mr. Foote affirmed they would be.

Councilmen Hamby asked about a proposed commercial building.

Mr. Foote stated he believes it was speculative.

Councilmen Heroux asked about the timeline of apartment construction.

Mr. Foote gave a tentative timeline.

Councilmen Semple asked about infrastructure connectivity and Norfolk Drive.

Mayor Nevill stated that he believed connectivity was addressed with this proposal.

Councilmen Semple asked if these units were Housing & Urban Development-qualified, reiterating the necessity of this form of housing in Warrenton. Additionally, he asked about affordability related to the surrounding commercial district.

Mr. Foote explained the logic behind using Annual Median Income as a basis for mortgages.

Councilmen Semple asked about HUD standards related to utilities and rent.

Mr. Foote stated that they will examine the HUD standards.

Councilmen Carlos agreed with Councilmen Semple.

#### 4. **Agenda Review.**

Mr. Martino continued the review of the agenda with the items on the Consent agenda.

##### 1. **Architectural Review Board Appointments.**

Mr. Martino stated that the Chair and Vice Chair positions of the Architectural Review Board will expire at the end of the year, held by Steve Wojcik and Laura Bartee respectively.

Mr. Martino recommended reappointing Mr. Wojcik and Ms. Bartee to the ARB for another Term.

##### 2. **Bonds for Assisted Living Communities.**

Mr. Martino gave an update on inspections and recommended release of remaining public improvement bonds for the Warrenton Assisted Living Facility.

##### 3. **Quarterly Staff Reports.**

Mr. Martino stated reports for the previous quarter were included in the Council's packets.

#### 4. **Central Business District Zoning Density Amendment Text.**

Mr. Martino stated the decision text of the amendment was before the Council and introduced Mr. Rob Walton, Director of Community Development, to answer questions of the Council.

Councilmen Heroux inquired about numbers stated in the amendment.

Mr. Walton stated the expected density of the applicant Mr. Mothershead.

Councilmen Heroux asked about support or opposition from property owners.

Mr. Walton stated all letters of support have been forwarded to the Council and they had not encountered large opposition.

Councilmen Heroux asked about categories of property related to condition; specifically, 200 new properties. Mr. Walton stated new properties would need to be brought to code.

Councilmen Hamby asked about automobile parking and trash pickup services.

Mr. Walton conversed about parking requirements for new spaces.

Councilmen Hamby said the Town of Warrenton may handle parking if required.

Councilmen Hamby asked about current operations in the Central Business District related to parking and trash.

Mr. Walton spoke about previously existing apartments and their code violations.

Councilmen Hamby asked if there was a database containing apartment violations.

Mayor Nevill asked about costs related to structured parking.

Mr. Walton stated a projected cost of between \$15,000 and \$20,000 per space.

Councilmen Semple asked about the number of spaces that may be converted into apartments.

Mr. Mothershead stated a range of 92 to 200 units over one decade.

#### 5. **Broadview Avenue Safety Improvement Project.**

Mr. Cabbage, a VDOT representative, discussed the timeline of the project between 2012 and 2026. He discussed Frost intersection changes as part of the project.

Mayor Nevill interjected with the mention of a proposal relevant to the design of Frost intersection.

Mr. Cabbage thanked Mayor Nevill for mentioning it and stated there had been discussion regarding said proposal.

Mr. Cabbage mentioned infrastructure changes to the Broadview Avenue safety improvement plan regarding bike lanes and crosswalks.

Councilmen Polster asked about direct communication with businesses.

Mr. Cabbage stated there are various methods to communicate with entities including via construction managers and email lists.

Councilmen Polster asked how to update the project's website.

Mr. Cabbage stated not much had changed since last updated, but they would investigate it.

Mr. Polster asked for a timeline regarding how the project will play out.

Mr. Cabbage stated a two-week look-ahead was best and working with contractors complicates a timeline.

Mayor Nevill stated an opinion regarding communication.

Councilmen Heroux asked about risks that could influence the project.

Mr. Cabbage stated an opinion regarding market influences on materials regarding risks.

## 6. Waterloo Street Update.

Mr. Martino introduced the topic. He mentioned budgeting for fiscal year 2023 regarding surveying and improvements. He added that Mr. Walton and Ms. Harris were here to answer any questions as well.

Mayor Nevill asked about the costs of a previous rendering.

Mr. Martino affirmed it was an artistic rendering, not engineered drawings.

Mayor Nevill asked about the allocation of \$72,000 in ARPA funds.

Mr. Martino identified the allocation would be used in surveying Waterloo St. and completing full engineering.

Mayor Nevill inquired about safety, engineering, and temporary trials of speed tables. Ms. Harris stated that different renderings represent different forms of traffic calming.

Councilmen Hamby expressed a need for public input on Waterloo St. alterations.

Councilmen Heroux expressed similar thoughts to Councilmen Hamby.

Councilmen Heroux asked for clarification on appropriation of funds.

Ms. Harris clarified a timeline and appropriation of funds for engineering.

Councilmen Heroux stated potential alternative uses of ARPA funds for traffic calming measures.

Mayor Nevill stated an opinion of approval for landscaping, he expressed concerns of ongoing costs associated with landscaping.

Councilmen Polster stated he was in support of sidewalks.

Councilmen Heroux stated a desire for public input.

Councilmen Semple stated approval of physical, non-road-bump, traffic calming solutions and stated the need for public input.

## 7. **RollOutWarrenton! Update.**

Mr. Martino introduced Mr. Frank Cassidy, Director of Public Works, and Utilities to introduce the project.

Mr. Cassidy relayed a shortened history of parklets on Main St. in the Town. He stated the reasons as to why the parklets are removed from Main St. in October. He also addressed concerns of the conditions of the parklets as they have lost integrity and begun to fall apart due to being at the end of their lifespan.

Mr. Cassidy relayed plans for potential areas that may be utilized for the public spaces including First and Second streets and expressed the potential for a permanent program.

Mr. Cassidy mentioned that before the Council for consideration was a resolution that ends the temporary timeline of the program and allows First street to remain a plaza and reopen Second street. The second proposed resolution ends the temporary timeline of the program and recognizes First and Second streets as plazas.

Mr. Cassidy asked for questions and input from the Council.

Mayor Nevill asked about a timeline for adopting a resolution.

Councilmen Heroux asked if the intent was to pass one resolution or the other.

Mayor Nevill affirms.

Councilmen Polster asked to delay a vote to allow an opportunity to converse with business owners.

Mayor Nevill agreed.

Councilmen Polster suggested clarifying language within the resolutions.

Councilmen Hamby suggested discussion being postponed until December of 2022.

Vice Mayor Hartman questioned whether the parklets and plazas should be seasonal or year-round.

Councilmen Carlos approved of waiting until 2022.

Mr. Martino mentioned the reopening of Second street.

Councilmen Polster mentioned an opinion regarding reopening Second Street before December.

Mr. Martino mentioned Third, Fourth, and Fifth Streets regarding reopening.

Mayor Nevill expressed approval of reopening Third, Fourth, and Fifth streets.

Mayor Nevill mentioned conflicts between pedestrian and automobile traffic.

Mayor Nevill announced that a resolution to keep Second street closed for one more month to be added to the agenda for the evening.

**8. Introduction of an Ordinance to Amend Article 1 of Chapter 10, Section 10-5 of the Code of Ordinances Town of Warrenton, Virginia (1991) as Amended Related Generally to Speed Limit.**

Mr. Martino introduced Chief of Police Michael Kochis to discuss a proposal for the addition of speed zones near Warrenton Middle School and St. Johns.

Councilmen Polster mentioned inconsistencies with the presented budget presented.

Chief Kochis mentioned that it was an approximate budget and possible mistake.

Councilmen Polster stated that St. Johns may not be willing to put forth funding for equipment.

Councilmen Heroux mentioned traffic issues during pickup from school.

Chief Kochis acknowledged the issues.

Councilmen Polster asked to whom an entity would address to obtain a crossing guard for Warrenton Middle School.

Chief Kochis stated that he could explain the process.

**9. Interim Town Manager's Update.**

Interim Town Manager Martino introduced new staff members Project Coordinator Michael Wharton who was focused on water-based projects and IT-staff Mr. Robert Hughes.

Mayor Nevill announced the meeting adjourned at 12:41 PM.

---

### **REGULAR MEETING – 7:33 PM**

Mayor Nevell called the meeting to order, he stated that a quorum was present.

Councilmen Semple stated he was at home at 319 Falmouth Street in Warrenton participating electronically because of a medical condition that prohibited him from attending.

Vice Mayor Hartman had not yet arrived but was en route to Town Hall.

### **INVOCATION.**

Reverend Dr. Reese to lead the invocation.

### **PLEDGE OF ALLEGIANCE.**

Mayor Nevill asked the attendees to remain standing, face the flag, and recited the Pledge of Allegiance.

### **CITIZEN'S TIME.**

Joelle Fryman 6295 Margaret Way addressed the Council regarding RollOutWarrenton!

Jill Evans 351 Preston Drive addressed the Council regarding Ordinance 1 to amend Ch 10, Art 1, Sec 10-5.

Ken Alm 194 Culpeper St addressed the Council regarding Town boundary adjustments.

Kevin Ramundo 9757 Elmwood Road addressed the Council regarding the Amazon Data Center.

Douglas Larson 134 Mosby Circle addressed the Council regarding the Amazon Data Center.

Guy Hinkler 12465 Elk Run Rd addressed the Council regarding outdoor seating and multi-use zoning.

Jason Philippy 153 Lapis Court addressed the Council regarding a wildlife issue.

Cynthia Burbank 6347 Barn Owl Ct addressed the Council regarding the Amazon Data Center, transparency and FOIA.

David Gibson 7548 Fox View Dr addressed the Council regarding the Amazon Data Center.

Casey Ward 25 N Chestnut St addressed the Council regarding RollOutWarrenton!

Jean Boenish 5473 Camellia Ct addressed the Council regarding the Amazon Data Center.

### **APPROVAL OF THE AGENDA.**

Councilmen Polster motioned to approve the agenda as presented. Councilmen Heroux seconded. There was no discussion on the motion. The vote for the motion to approve the agenda was unanimous, as follows:

**Ayes: Mr. Renard Carlos; Mr. Brett Hamby; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin**

*Nays:*

*Abstention:*

*Absent:* Mr. James Hartman

The Motion passed 6-0. The agenda was approved as presented.

---

### **PUBLIC HEARINGS.**

1. **ZMA/SUP 2021-01 North Rock Harris Teeter Service Station** - The Applicant, Harris Teeter/North Rock Center, LLC, is proposing a revision to the North Rock Planned Unit Development (PUD) Master Plan and a Special Use Permit (SUP) to allow for the construction of an eight-pump service station for Harris Teeter.

Mayor Nevill introduced Ms. Harris from the morning meeting who introduced Ms. Pfeiffer.

Ms. Pfeiffer spoke about infrastructure regarding the North Rock Harris Teeter Service Station and emergency vehicle access. She presented an amendment to Harris Teeter's application which required the applicant to pave the infrastructure in question.

Mayor Nevill thanked Ms. Pfeiffer and opened public hearing at 7:08 PM.

Roy Francis, 147 North View Circle, addressed the Council regarding North Rock Harris Teeter Service Station.

Roxanne Haddon, 110 N View Cir, addressed the Council regarding carcinogens related to gasoline.

R.B. Chadasam, 150 W Lee Hwy, addressed the Council regarding the North Rock Harris Teeter Service Station.

Jean Boenish, 5473 Camellia Ct addressed the Council regarding the North Rock Harris Teeter Service Station.

Mayor Nevill closed public hearing at 7:18 PM.

Councilmen Hamby moved that SUP 2021-01 be approved with the condition that the proffered dates be changed to 9 November 2022. Seconded by Councilmen Heroux. Mayor Nevill opened the floor for discussion.

Councilmen Polster asked for clarification if this was *only* for SUP 2021-01 or also ZMA 98.

Mayor Nevill clarified that the ZMA 2021-01 must be addressed first.

Councilmen Hamby rescinded his motion and moved for approval of ZMA 2021-01. Councilmen Heroux seconded.

Mayor Nevill opened the floor for discussion.

Councilmen Semple discussed health, citizen approval, and infrastructure.

Councilmen Carlos stated agreement with Councilmen Semple.

Councilmen Heroux thanked the citizens of North Rock and discussed the risk of the project.

Councilwoman Sutphin thanked the citizens of North Rock and discussed public welfare and citizen approval.

Councilmen Polster discussed infrastructure of North Rock.

Councilmen Hamby thanked the public for their participation and discussed project risks.

Mayor Nevill called the question.

The motion failed 4-3, the vote was as follows:

**Ayes:** Mr. Brett Hamby; Mr. James Hartmann; Mr. John Heroux

**Nays:** Mr. Renard Carlos; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin

**Abstention:**

**Absent:**

**The Motion that SUP 2021-01 be approved with the condition that the proffered dates be changed to 9 November 2022. Failed on a vote of 3-4. The SUP was not approved. Mayor Nevill declared a vote on SUP 2021-01 moot, therefore, SUP 2021-01 failed.**

2. **CPA/ZMA/SUP 2022-01 Waterloo Junction Mixed-Use Center** - The Owner/Applicant, Broadview LLC and Fog Holdings, LLC, are requesting a Comprehensive Plan Amendment (CPA) to revise the Future Land Use Map changing three Low-Density Residential designations to Re-Planned Commercial in the Broadview Character

District; a Zoning Map Amendment (ZMA) for three parcels currently zoned R-15 residential parcels to Commercial (C); and a Special Use Permit (SUP) to allow for residential only structures as part of the Mixed Use development in the Commercial District.

Mayor Nevill introduced Ms. Harris to speak on the issue. Ms. Harris summarized the project application including infrastructure, apartments, and waivers.

Mayor Nevill stated that the application was available online for the public to view.

Mayor Nevill asked if the Council had any questions.

Councilmen Heroux stated that tenants of current apartments need plenty of notice of the potentially impending project.

Mayor Nevill introduced Mr. Foote regarding the project application.

Mr. Foote stated that he recently learned the apartments mentioned in the application are currently vacant.

Mr. Foote stated that the applicants have worked to address concerns raised by the council and believe this project would be beneficial to the Town of Warrenton.

Mr. Foote stated that HUD income levels at a zip-code level do not exist related to this project. He also reiterated that this was a private project on to-be private property.

Mayor Nevill opened public hearing at 7:34 PM.

No one spoke at the public hearing.

Mayor Nevill closed public hearing at 7:34 PM.

Councilmen Polster moved to approve CPA 2022-01. Councilmen Carlos seconded the motion. Mayor Nevill opened the motion for discussion.

Councilmen Semple asked Mayor Nevill to amend the motion to table the issue for 30 days.

Councilmen Polster seconded the motion.

Mayor Nevill opened the motion for discussion.

Councilmen Semple stated that the application was complex and was not yet sure if it offered many benefits to the Town. Additionally, he mentioned an issue of setting a precedent of rezoning along Broadview Ave for similar developments.

Councilmen Polster stated that he did not object to the 30 day table, and that it was a complex application with many notes. He asked the applicant what it would imply for them.

Mr. Foote stated that it would affect contractual negotiations and that it would present a significant contractual issue for Mr. Farish.

Councilwoman Sutphin stated that she did not see a need for a table.

Mr. Polster asked if Mr. Semple would be willing to retract his motion. Mr. Semple said that a vote was still agreeable.

The motion to table the issue for 30 days failed 1-6. The vote was as follows:

*Ayes:* Mr. William Semple  
*Nays:* Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Ms. Heather Sutphin  
*Abstention:*  
*Absent:*

Mayor Nevill announced the issue before Council was now the original motion by Councilmen Polster.

Councilmen Polster stated that this project may have great impacts on the community and benefit local businesses. Councilmen Polster asked the applicant to address inter-parcel access.

Councilwoman Sutphin stated she thinks it will be a beneficial addition to the Town of Warrenton.

Councilmen Hamby stated that he agreed with Councilmembers Polster and Sutphin. He referenced previous project proposals and said he thinks it will be beneficial to the Town.

Vice Mayor Hartman stated he agreed with Councilmembers Polster, Sutphin, and Hamby, and referenced his personal connections to this plot of land.

Councilmen Heroux thanked the applicant for their contribution to the Town of Warrenton.

Councilmen Semple stated that he thought this was a great proposal but was concerned with the amount of time the Council has had to review the application; however, it was a beneficial project.

Mayor Nevill compared the project to Main St. Warrenton and stated approval of the project.

The motion passed unanimously. The vote was as follows:

**Ayes:** Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin

*Nays:*

*Abstention:*

*Absent:*

Councilmen Polster motioned to approve ZMA 2022-01. Seconded by Councilmen Hamby.

Councilmen Polster asked about staffing and if there was anything necessary to be included.

The motion passed unanimously. The vote was as follows:

**Ayes:** Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin

*Nays:*

*Abstention:*

*Absent:*

Councilmen Polster moved to approve SUP 2022-01. Councilmen Heroux seconded.

There was no discussion.

The motion passed unanimously. The vote was as follows:

**Ayes:** Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin

*Nays:*

*Abstention:*

*Absent:*

## CONSENT AGENDA.

1. **ARB Reappointments-** Laura Barte and Steve Wojcik
2. **Request for release of Public Improvements Bond #SAIFSU0748141** for Warrenton Assisted Living Facility SDP 2018-03.

Councilmen Hamby motioned to approve the consent agenda. Councilmen Heroux seconded.

There was no discussion.

The motion passed unanimously as follows:

**Ayes:** Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin

*Nays:*

*Abstention:*  
*Absent:*

## STAFF REPORTS.

1. Quarterly Finance Department Report
2. Quarterly Parks and Recreation Department Report
3. Quarterly Police Department Report.
4. Quarterly Community Development Report
5. Quarterly Public Works and Utilities Department Report

## NEW BUSINESS.

### 1. Temporary Closure of Second Street

Mr. Martino stated this issue's connection to RollOutWarrenton! and summarized the issue.

Mayor Nevill sought a motion from Council.

Vice Mayor Hartman motioned to approve the resolution for the temporary closure of Second Street. Councilmen Carlos seconded.

Councilmen Hamby motioned to approve the resolution. Councilmen Heroux seconded.

The motion passed unanimously as follows:

**Ayes:** Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin

*Nays:*

*Abstention:*

*Absent:*

Mayor Nevill announced that Second Street would remain closed until December 2022, when the Council could discuss and decide on the issue further.

### 2. Introduction of an Ordinance to Amend Article 1 of Chapter 10, Section 10-5 of the Code of Ordinances Town of Warrenton, Virginia (1991) as Amended Related Generally to Speed Limit

Mr. Martino summarized the issue and stated its locations of Warrenton Middle School and St. John's. Mr. Martino also stated additional action would need to be taken in December by the Council.

Mr. Polster complimented the Police Chief for finding another source of funding other than the Town of Warrenton for St. John's school and working with the community.

Councilmen Heroux motioned to approve the resolution initiating a public hearing on an ordinance relating to an Amendment of Chapter 10, Article 1, Section 10-5. Seconded by Councilmen Polster.

Councilmen Hamby motioned to approve the consent agenda. Councilmen Heroux seconded.

The motion passed unanimously as follows:

**Ayes:** Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin  
**Nays:**  
**Abstention:**  
**Absent:**

## UNFINISHED BUSINESS.

1. **An Applicant Initiated Zoning Ordinance Text Amendment (ZOTA 2022-1) To Increase the Permitted Density in the Central Business District from Twenty Five (25) Units Per Acre to Fifty (50) Units Per Acre on Parcels Less Than 1/2 Acre and to Update to Fee Schedule**

Mr. Walton stated that this was an issue from the previous month. Mr. Walton stated that Ordinance A does not address affordable housing while Ordinance B does.

Councilmen Heroux motioned to reject ZOTA 2022-1. Seconded by Councilmen Hamby.

Councilmen Heroux thanked those who worked for the applications. Mr. Heroux stated it was difficult to understand the impact to current infrastructure, current business owners, and apartments, which are the basis of his concern.

Councilmen Hamby stated he had similar concerns to Councilmen Heroux, specifically stating parking and trash. Councilmen Hamby also stated that affordable housing was not well addressed.

Mayor Nevill stated that both he and Councilmen Polster would recuse themselves from this vote due to personal interests in property ownership.

Councilmen Carlos stated that he thought this was a great opportunity and worked to address an issue often ignored by the Town and focus on needed housing instead of business spaces.

Councilmen Carlos introduced a motion to table ZOTA 2022-1 for 30 days. Vice Mayor Hartman seconded.

Councilmen Semple laid out a timeframe, reminding the Council that this project would take time to come to fruition and therefore impacts would not be instantaneous.

Councilmen Sutphin inquired about a previous Council issue regarding the creation of an affordable housing committee. Councilmen Carlos stated that the Town did try to create an affordable housing committee; however, the previous Town Manager suggested that the Town did not have the resources to support such a project with the other projects the Town was undertaking.

Councilmen Heroux suggested that 30 additional days would not be enough to work out the issues of this project, but additional time would be helpful.

Councilmen Hamby referenced the small geographic area of the Central Business District and the projected increase in housing. Councilmen Hamby stated that parking was the largest issue that he was concerned about.

Councilmen Semple told the Council that the application would not restrain inquiries from the Council regarding issues stemming from the ordinance. Additionally, the ordinance may also be changed in the future.

The motion failed 3-3-1. The vote was as follows:

**Ayes:** Mr. Renard Carlos; Mr. James Hartman; Mr. William Semple  
**Nays:** **Mr. Brett Hamby; Mr. John Heroux; Ms. Heather Sutphin**  
**Abstention:** Mr. Sean Polster  
**Absent:**

Mayor Nevill reminds the Council the motion before the Council was now the original motion by Councilmen Heroux.

Mayor Nevill reminded the Council that both he and Councilmen Poster were recusing themselves due to personal interests in property ownership.

The motion passed 4-2-1. The vote was as follows:

**Ayes:** **Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Ms. Heather Sutphin**  
**Nays:** Mr. Renard Carlos; Mr. William Semple  
**Abstention:** Mr. Sean Polster  
**Absent:**

## TOWN ATTORNEY'S REPORT.

Town Attorney Martin Crim spoke about working with Frank Cassidy to bring a Shenandoah Cable Television Franchise to the Town.

Additionally, Mr. Crim commended Mr. Clough for working on the Electronic Meeting Participation Policy.

---

## TOWN MANAGER'S REPORT.

Mr. Martino spoke about the Town's Halloween Parade, costume contest, the WARF's "Trunk and Treat," and a flashlight candy hunt at Rady Park.

Mr. Martino commended the Parks and Recreation department for coordinating all these events.

Mr. Martino congratulated the Public Works and Utilities Department for evaluating the WARF and Warrenton Police Stations after become polling places, then bringing them to code following the ADA prior to election day.

Mr. Martino also commended the Public Works and Utilities Department for spearheading the new "Hook Lift Trucks Program."

---

## COUNCILMEMBERS TIME.

**Councilmen Polster** – Mentioned mental health among young adults, specifically referencing a local student's failed attempted suicide, and promoted helping other individuals who need mental health.

**Councilmen Carlos** – Spoke about his personal experience with the WARF's "Trunk and Treat" and commended the Parks and Recreation Department.

**Councilmen Sutphin** – Stated that affordable housing was important and necessary to the Town. Councilmen Sutphin also congratulated the owners of O'Brien's Restaurant for their birth. Councilmen Sutphin reassured that outdoor seating will not end in its entirety. Finally, she referenced a local student's failed attempted suicide, extended her sympathies to the family and teammates, and referenced a fundraising source for said family.

**Councilmen Semple** – Thanked the individuals who worked on ZOTA 2020-01 and ensured that the Council will continue to look for avenues to affordable housing. Councilmen Semple also announced that the Fauquier Community Band, in which he plays, had a free December 12 Christmas Concert at Fauquier High School.

**Vice Mayor Hartman** – Welcomed two new employees to the Town. Thanked and congratulated the reappointments to the Architectural Review Board, and mentioned open positions open for applicants. Vice Mayor Hartman also commended the new truck program. Finally, despite not being a fan of Halloween, he enjoyed the events put on by the Parks and Recreation Department.

**Councilmen Heroux** – Mentioned Piedmont Smiles, a community dental event, and thanked the participants. Thanked individuals for working on ZOTA 2020-01 and how it has educated the council. Finally, told young adults to remain optimistic in reference to mental health.

**Councilmen Hamby** – Spoke about RollOutWarrenton! and ensured that the Council will have issues worked out by the time the program was implemented the following year.

**Mayor Nevill** – Thanked the public for participating in Election Day, and commended Councilmen Carlos for the mayoral race. Mayor Nevill commended the staff who worked to make Election Day run smoothly and stated a need for participation for democracy to run well.

---

#### **ADJOURNMENT.**

**With no further business, this meeting was adjourned at 8:33 PM on Wednesday November 9<sup>th</sup>, 2022.**

**I hereby certify that this is a true and exact record of actions taken by the Town Council of the Town of Warrenton on November 9<sup>th</sup>, 2022.**

---

Stephen M. Clough  
Town Recorder

Warrenton, Virginia 20186

Re: Boundary Line Adjustment Between Fauquier County and Town of Warrenton

Dear Brandie:

As you are aware from previous discussions, at its November meeting the Board of Supervisors tabled its discussion of the areas proposed by the Town for adjustment into the boundaries of the Town to its December 9, 2021 meeting. At its December 9<sup>th</sup> meeting, the Board passed a resolution authorizing the sending of this letter expressing the Board's willingness to continue a good faith discussion and negotiation of a boundary line adjustment agreement between our localities, pursuant to the authority of *Code of Virginia* § 15.2-3106 et seq. Attached to that resolution are two maps showing the areas under discussion. As the Town and the County go forward with these discussion and negotiations, the Board hopes that an open process will inform the citizens of the Town and the County, particularly those in the areas under discussion, allowing those citizens to offer their input on these potential adjustments. It is the County's belief that proceeding under boundary adjustment authority found in § 15.2-3106 would be the most efficient and cost effective way to find a mutually agreeable decision on the proposed adjustment of the Town's boundaries.

In order to move the discussions forward, the Board and its members offer some questions and thoughts:

- Why does the Town desire the adjustments in each of the areas proposed for adjustment?
- The County is concerned about anticipated future development for some of the areas proposed to be brought into the Town, specifically whether any increase in density would create unanticipated burdens on the schools and the County's taxpayers without the County receiving proffers for those expenses. Is the Town willing to propose protections or compensation to offset any impacts?
- Would the Town consider the creation of a joint planning committee for the adjusted areas?

Brandie Schaeffer, Town Manager  
Page 2  
December 17, 2021

- Would the Town welcome this as an opportunity to increase coordination in transportation planning around and through Town?
- The County would experience a loss of tax revenues with the adjustment of some of the proposed commercial areas. Is the Town willing to propose measures to offset or soften the impact of such loss of revenue?

The County is looking forward to receiving more information from the Town about Warrenton's intent and purposes for seeking this boundary line adjustment. Once this additional information and a proposed agreement is received, the County would like an opportunity to involve the community in informational meetings prior to the scheduling of public hearings on the proposed ratification of the agreement. As previously stated, the County believes that community engagement is very important and does not need to create any unnecessary delay in negotiation of the agreement.

We look forward to working with you on an agreement that considers the best interests of both of our localities.

Sincerely,

Paul S. McCulla  
County Administrator

Holly Meade, Director of Community Development

Warrenton Town Council Meeting  
November 9, 2022

Remarks by David Gibson, 7548 Foxview Dr, Warrenton VA

- AWS Noise Study was flawed, incomplete and improperly summarized in September 09 SUP submission – the draft identified numerous locations of non-compliance
- Dr. John Lyver's data (below) identifies very substantial violations of the Town and County Standards during daytime and nighttime at all 21 locations beyond AWS' fence line
- The impact on 634 residences and business locations within 2500 feet of AWS will be substantial, pernicious, and will threaten the health and wellbeing of residents
- Without credible and verified proof otherwise, there is no reason to believe that AWS will be able to deliver this facility within the Noise Standards set forth by the Town or County
- There should not be any attempt to kick the can down the road and "condition" these critical requirements to Site Plan Review or Waive or Modify these standards or to otherwise accommodate this application.
- Based on the quality and incompleteness of critical information provided to the Town, and the demonstrated and deleterious consequences of noise and vibration at this location, of the current SUV application should be DENIED.

Figure identifies 21 locations within 2500 feet of proposed AWS location where noise has been modeled. Noise emissions were modeled on several similarly sized and recently built AWS facilities in Prince William County. Yellow tabs identify ambient traffic noise and purple tabs identify expected post-construction operating noise levels. Both are measured in dBA scales.

**List of Noise Ordinance Violations of mapped location after the data center is completed (courtesy of Dr. John Lyver)**

Location	Daytime Violations								Location	Nighttime Violations							
	63 Hz	125 Hz	250 Hz	500 Hz	1,000 Hz	2,000 Hz	4,000 Hz	8,000 Hz		63 Hz	125 Hz	250 Hz	500 Hz	1,000 Hz	2,000 Hz	4,000 Hz	8,000 Hz
1		V	V	V	V	V	V	V	1	V	V	V	V	V	V	V	V
2				V	V	V	V	V	2		V	V	V	V	V	V	V

## 11/9 KJR Comments before Town Council (465)

Good evening, Mr. Mayor and Town Council Members. I am Kevin Ramundo, President of Citizens for Fauquier County.

When I spoke during citizens time in September, I underscored the tremendous amount of work that CFFC has done on the Amazon Special Use Permit, and our desire to share this work with town officials which has started to happen.

At the town hall CFFC co-hosted in late October, Sean Polster, Jay Heroux and Renard Carlos attended along with over 200 others including several county officials. And last week, I and two others from our board spent ninety minutes with Heather Sutphin. I think she was impressed by how deeply we understand the data center situation and we now better understand her perspectives and where there may be misperceptions. We were encouraged that Heather offered to recommend to others on the Town Council that they meet with us. **We are ready anytime.**

We were also pleased to hear her opinion that the Town Council would not rush to a decision on the data center. That's really important because there is a very strong perception that the town is not doing all the required due diligence, and is relying too heavily on Amazon and going too fast. On this last point, many are wondering why the planning commission has scheduled a public hearing for next Tuesday just three weeks after a contentious work session where it was very obvious that Amazon has a lot more work to do. **How can that be?**

And the Fauquier Times today reported that the planning commission might even vote on the SUP that evening. **So one has to wonder what's the hurry given that this data center is the most important land use issue facing the town in decades if not in its entire history?**

In addition to opposing this data center <sup>AT</sup> ~~at~~ this location, CFFC believes that prior to any action on the SUP:

1. Amazon should be required to submit a complete application.
2. The new planning commission and town council should be in place.
3. A comprehensive and impartial review should be conducted to understand if Amazon and possibility others exerted inappropriate influence on the process.
4. And that town residents should be fully informed about the proposed facility and the town's long-term data center plans.

During our October town hall, there were many who questioned why the town would even consider approving a data center at this location, and who were concerned about the lack of integrity and transparency in how this entire situation has been handled by the town and Amazon.

Someone in the audience made a particular point that stuck with me and I hope it will with you. **"It's never too late to get it right."** Thank you.

The Town of Warrenton

Comment	<p>No to Amazon next round Country Chevrolet!</p> <p>Green space...where does their plan fit?</p> <p>Open space?</p> <p>Energy...can green energy and the aquifer and our Faquier tax dollars support more data and a business that is sketchy on the rules?</p> <p>Infrastructure...Do Faquier tax payers need to pay for towers and look at them? New energy if approved should support equity and the local tax payers and equality.</p>

Water...Can the local aquifer cool their needs without hurting the rest of us?

Who pays for their infrastructure... Amazon that is...

How many more doe we need...Prince William, Brandy Station etc...

This is not Loudon County who has sold their soul...

How much data do we need with towers and substation(s)...

I am happy to speak to all. Warrenton is a lovely city that does not need to support Amazon as the entrance on the east side whether one is a Democrat or Republican.

Say no to Amazon and their towers...

Charles and Geraldine Carroll  
Delaplane, VA

Committee, Board, or Commission Type	Town Council
Agenda Item	Amazon Data Center
Comment	I am writing to urge the Council to postpone any action approving the massive data center in town due to the noise and vibration that will be caused by the center. The noise will be a permanent loss of the quiet that is a part of Warrenton and once lost, cannot be regained. Approval of this proposal will permanently change Warrenton's small-town appeal and Fauquier County's rural character, and significant noise and visual impacts will affect citizens and visitors alike. Citizens and visitors will be greeted by a fifty-foot-high building on an elevated site, right at the eastern entry to Warrenton. The data center and power lines will be visible from many parts of both Warrenton itself and the surrounding countryside.

Please don't sell out the town for such a short-term financial gain at the expense of the town and its residents.

Comment	Just wanted to say thanks for shutting down the street eating. Hope you can sense the sarcasm. My husband is physically disabled and has a very serious auto immune disease which means not only can we not eat inside he can't climb stairs. So thanks for making our favorite restaurant completely shut down for us. Making the few things we can enjoy just out of reach. Just have to tell my disabled husband that he isn't important and he can't enjoy the same things people who have use of their legs can.

Agenda Item	CPA/ZMA/SUP 2022-01 Waterloo Junction Mixed-Use Center
Comment	<p>I have several concerns about this proposal, which do not appear to have been addressed by the Planning Commission.</p> <p>One - I am concerned about the predominance of impervious surfaces in the submitted plans and the corresponding lack of adequate landscaping buffer, for which the developer is requesting a waiver. The plans show that the majority of the property will become buildings, streets, parking areas, sidewalks, and other impervious surfaces. If you've ever driven past this property after a good rain, as I have done many times, you've noticed that this property is "low lying" and subject to ponding throughout. The addition of massive impervious surfaces will only exacerbate the existing drainage issues. I am</p>

further concerned that runoff from this property, if developed as proposed, will flow onto adjacent existing streets and residential properties and create flooding during heavy rainfall that does not occur now.

Two - I am concerned about the public safety impact of what the plans show as concrete walkways leading from each unit along Norfolk Drive to a sidewalk running along Norfolk Drive. This design will create a dangerous situation, in which visitors to these units (and residents with excess vehicles) will want to park along Norfolk Drive and the adjacent Plain Road, in order to avoid Broadview Avenue and thereby more conveniently access the interior of the development "from the backside". Norfolk Drive and Plain Road are narrow two-lane streets that do not, even now, easily or safely handle street parking -- especially not near the busy intersection with Bear Wallow Road. As a matter of public safety, the submitted plans need to be amended to remove the sidewalks leading to and from Norfolk Drive; instead, fencing or other barriers need to be added to the plans, to absolutely preclude resident or visitor access to the development from anywhere along either Norfolk Drive or Bear Wallow Road.

Three - I am concerned about what appears to be inadequate parking in the plans for this development. Just this past Friday evening, November 4 around 8:00 PM, I happened to drive past McMahon's, and I noticed that patrons' vehicles parked at the restaurant had overflowed onto unpaved grassy areas. This was not an uncommon occurrence. I've noticed it many times before. To put this another way, during busy times, McMahon's draws a large crowd, and the parking is already inadequate just for the restaurant crowd. When you add to that the residents of 47 town home units plus 6 apartments, visitors to those homes, plus patrons of the proposed retail establishment, there is no way, just no way, that the parking proposed for this development will be adequate or even close to adequate. Indeed, it will be so inadequate that parking will necessarily spill out onto adjacent streets, and that spillover will unfortunately increase the rate of accidents in the area.

Four - I am concerned about a 3600 square foot retail building being proposed, in addition to everything else, without any hint of what type of retail that might be, how that retail establishment will impact parking and traffic patterns, whether

---

the retail building will provide both an attractive and suitable "front" onto Broadview Avenue as well as a "backside" that is not an eyesore for patrons of McMahon's or the residents and visitors to the new town homes and apartments. I don't object to retail, per se, and it could be a positive addition to the development. However, there is also much potential for a retail development that would be detrimental. If and when Town Council approves this development, I urge the inclusion of language to grant to Town Council a strong voice and control over the type of retail occupying the 3600 square foot building and all the particulars.

Five - Finally, I have what I'll characterize as a more philosophical concern about this development. It's not stated in the planning documents made available to us, at least not that I could find, but in the Fauquier Times recently, it was reported that the sales price of the new town homes would be in the neighborhood of \$500,000, not including monthly HOA fees. That price point is quite high for this area, for what are proposed to be smaller town homes only 16 feet wide -- even for new construction with "luxury" features. As such, these new homes will remain out of reach for residents who are employed locally (typically at lower wages than paid elsewhere in Northern Virginia) as well as younger residents and young couples who are just getting started. I suggest that construction of these high priced homes as planned -- presumably crowded together to extract the maximum profit for the developers -- is not in the best interest of the Town of Warrenton or its residents.

Phone Number	[REDACTED]
Committee, Board, or Commission Type	Planning Commission
Agenda Item	SUP 2022-03 Amazon Data Center
Comment	<p>I support Planning Commission recommending approval of the Amazon Data Center request. Properly designed and constructed data centers make excellent fiscal sense without negative impact to Town or County residents.</p> <p>A number of potential downsides to the Amazon Data Center have been identified, ranging from the possible need for visually unacceptable overhead power transmission lines to the possibility of "humming" noise emanations. In reading through Staff analysis of these and other factors, I see that the Planning Commission has satisfactorily addressed all citizen concerns that I've heard raised. In addition, Amazon has made significant concessions as part of this process, for example, agreeing to</p>

fund burial of power lines to the data center, reflecting their responsiveness to concerns raised by Town and County residents.

My only affiliation with Amazon is that of a "not Prime" customer who occasionally orders merchandise online. I'm an age 65+ retired homeowner. I pay real estate and other taxes to both the Town of Warrenton and Fauquier County. As we all know, taxes go nowhere but up. Even with the Amazon Data Center and other new commercial developments, our taxes will go up, because that's just the way of things. However, without the Amazon Data Center and other commercial developments, our taxes will rise at a truly alarming rate, like what we've seen over the past couple of years. I can't afford more of that! Can you?

In order for the Town and County to maintain the services that we residents expect, two things have to happen: (1) our elected officials must maintain budgetary vigilance and be prudent in spending our tax dollars; and (2) tax revenue must increase to compensate for inflation and other cost drivers. For a number of reasons, the worst way to increase tax revenue is to extract additional taxes from residents. The best way to increase tax revenue is to attract low impact businesses -- businesses that contribute to the tax base while placing few burdens on local resources. A well-designed, well-constructed Amazon Data Center is just such a business, and it deserves our support.

Hello,

I am with the Fauquier Courthouse Chapter of the Daughters of the American Revolution (DAR). Currently, I serve as the Chair for the chapter's American Indians Committee. I am contacting you today, because I would like to request a proclamation from Fauquier County for Native American Heritage month in November. Can you please contact me as soon as feasible to discuss? Below is my contact information. Thank you!

As a resident of Fauquier County, I oppose the Amazon proposal in Warrenton next to Country Chevrolet. It will ruin the eastern entrance to a country town. The electricity and water consumption from the aquifer are an issue. Where will the power come from as we try to make our grid secure with green energy? The power lines should be built only to help people and not Amazon. The substation for them is not needed for our present needs.

Say no to Amazon and their proposals. The taxpayers of Virginia should not subsidize Amazon.

I am hoping to see that project due much like Disney in Manassas.

Our lovely area can survive without helping Amazon and the insatiable need for data .

Keep it country. We have maintained our open space since 1999.

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Town of Warrenton,

Please do not grant Amazon permission to build a 220,000 square-foot data center on the 42-acre tract where Route 17 and Routes 15 & 29 converge. In addition to the data center, project approval would likely lead to the addition of large electrical transmission lines across Fauquier County, as well as a new 8-acre substation. All of this construction will create a gruesome eyesore!

Approval of this proposal will permanently change Warrenton's small-town appeal and Fauquier County's rural character. The significant noise and negative visual impacts will affect citizens and visitors alike, who will be greeted by a fifty-foot-high building on an elevated site at the eastern entry to Warrenton. The data center and power lines will be visible from many parts of both Warrenton itself and the surrounding countryside.

Please help protect the Virginia Piedmont Heritage Area's scenic landscape by turning down this inappropriate proposal. Let Amazon put this monstrosity in an area that has already been ruined by over development. Please protect the beauty that still remains in Virginia!

Thank you!

Sincerely,  
Tanina Linden

I have sent previous emails and will continue to do so on this topic. We MUST NOT approve this amazon data center project. The promise of tax revenue does not justify the demolition of our small town/ rural county. One we open the flood gates to big tech companies, we will see an influx of special exemption allowances, zoning request changes, etc.

**Subject:** Amazon Data Center A Voting Citizen's Concern

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Sirs,

I am extremely concerned that Amazon is seeking the Warrenton Town Council's permission to build a 220,000 square-foot data center on a 42-acre tract adjacent to Country Chevrolet where Route 17 and Routes 15 & 29 converge.

Approval of this proposal will permanently change Warrenton's small-town appeal and Fauquier County's rural character, and significant noise and visual impacts will affect citizens and visitors alike. Citizens and visitors will be greeted by a fifty-foot-high building on an elevated site, right at the eastern entry to Warrenton. The data center and power lines will be visible from many parts of both Warrenton itself and the surrounding countryside.

This data center is a threat to our incredible historic scenic landscape. It is not what the town, the residents, the visitors and the general public at large want. Please don't be short sighted and blinded by Amazon's attempt to destroy our neighborhoods for profit.

Best regards,

Catherine Johns

Good Evening - I am a 37 year resident of Loudoun County. I have experienced the changing of our rural, peaceful, almost idyllic area into a fast paced, overcrowded, & unsightly example of greed. Please please please do not do the same to Fauquier County.

The mega centers/ Data centers requested are unsightly. Take a drive on Rt 28 in Sterling, or anywhere in Ashburn, & you will see. And what is to happen when these gigantic gray buildings are deemed to be obsolete in a few years time? What then?

Please do not make the mistakes made in Loudoun. Protect the beauty & history of your county. Say 'no' to data centers.

**Subject:** Planning Commission Meeting 10/25  
**To:** Susan Helander <[shelander@warrentonva.gov](mailto:shelander@warrentonva.gov)>, <[jlawrence@warrentonva.gov](mailto:jlawrence@warrentonva.gov)>, <[sainsworth@warrentonva.gov](mailto:sainsworth@warrentonva.gov)>, <[gjohnston@warrentonva.gov](mailto:gjohnston@warrentonva.gov)>, Ali Zarabi <[AZarabi@warrentonva.gov](mailto:AZarabi@warrentonva.gov)>, <[Rstewart@warrentonva.gov](mailto:Rstewart@warrentonva.gov)>

Good Afternoon -

I attended the Planning Commission meeting last week, and would like to offer the following comments:

- The building elevations and renderings shown on October 25th were very different from the ones presented at the July 26th work session. At least one of the renderings shown last week from Route 17 still seems incorrect as the fence that would go around the perimeter was not included. I think it was the second rendering presented.
- Commissioner Lawrences' comments about the photos that Wetland Solutions took around town were warranted. Better photos and line of sight studies should have been provided. Obviously the views would be very different from November-April when all the leaves would be off the trees as Commissioner Johnston noted, and also very different if trees were to be cut down on the proposed data center site.
- Commissioner Stewart was asking about how many households and businesses would have line of sight to the building. A PEC viewshed study indicates that within a three mile radius, 4,094 residences and businesses would see it. 1,699 of those are outside the town limits, so I hope the Planning Commission and the Warrenton Town Council take into account comments from county residents as this project would really impact them if approved.

- A few nearby locations that were not photographed were the Hampton Inn, the Holiday Inn and the Baymont (formerly the Comfort Inn). These are the three major hotels in Warrenton and all three would have views of the proposed data center (according to both the Amazon and PEC viewshed studies), especially the Hampton Inn. See the attached photos showing the view of the proposed data center from the parking lot of the Hampton Inn and from the top floor. The Holiday Inn would also have a direct line of sight to the power lines if those were to go in from Meetze Rd to the Blackwell Road site. This is not the vision that Warrenton wants to portray to visitors coming into town, and perhaps something you have not considered yet.
- John Foote's comment about this building not being the tallest in town was inaccurate, and the comment about "if you were to go to other buildings of roughly similar height or higher you expect to see a similar profile" was irrelevant. At 56' with the equipment on the roof, this building would be the tallest building in Warrenton (topography not being taken into account), the one with the biggest footprint; and the other larger buildings in town aren't surrounded by a security fence and they don't make significant noise 24x7. There are no buildings in Warrenton like this one.
- It seems very unlikely that Amazon could only hire town of Warrenton residents for the data center positions. I think lawyers would have a field day with that one!
- I applaud Commissioner Zarabi's comments as they are completely in line with the majority of town and county residents. A large number of town residents spent 2 1/2 years coming up with the comp plan for the town, and data centers were not included. That was on purpose, and not part of the vision of the town. New Town 2040 called for a mixed use area, not a large data center with a fence around it. Like Commissioner Zarabi, I am confident that John Foote could bring additional applications for that land that are actually consistent with the comp plan.
- The issue of a lot of cars getting in and out of that immediate area was mentioned. Has VDOT or an independent highway engineer done an in depth study to determine solutions for getting larger numbers of people in and out? It seems like we are just throwing our hands up and saying it can't be done, when maybe we just need to take a fresh look at finding an answer, or call on new experts. There is a lot of road frontage with Route 17 and the site is very close to Route 29, so it would seem that with a little creativity it can be done.
- I agree with Commissioner Ainsworth's comments that all the virtual learning and working has to be processed somewhere, however, I disagree with his comments that if we rely on it being in another county that it is "too NIMBYish" and this data center is a "reasonable use." I don't think people have taken a NIMBY approach to this, they have taken a NITWBY (Not In The Wrong Back Yard) approach. This is the wrong back yard, and I think the information presented to you by Protect Fauquier, CFFC and PEC has shown that beyond a doubt, in addition to all the

comments you have received from the general public. The community is telling you that a 56' tall building on a hill as you enter Warrenton with a security fence around it that makes noise and can be seen for up to 3 miles away is not a reasonable use for the property. If data centers are going to be approved in Fauquier they need to be in the areas designated for them in the county (Vint Hill and Remington), and then revenue sharing worked out with the BOS to give some of that money to the town for their spending. I think you would have public support for this. This is the correct backyard.

- I am confused by Commissioner Ainsworth's concern that nothing has been built on this property and there seemed to be a "building something is better than doing nothing" notion. I would suggest that Warrenton is on a slippery slope and if this data center is approved more will likely follow, and there are no "redos" with this decision. "Nothing" on that property is a million times better than the wrong "something" on that property.
- The noise study that Amazon presented is inaccurate. I hope you will review the study done by Dr. John Lyver (noise specialist for the Navy/NASA) as it demonstrates that the proposed data center would be in violation of both town and county noise ordinances during most of the day/night. For this reason alone, this application should be voted against.
- Towards the end of the meeting Commissioner Lawrence seemed encouraged by the prospect of Amazon sharing the cost to bury the distribution lines from the proposed substation to the proposed data center. Burying the distribution lines is already the responsibility of the applicant, so it is not a new concession, and they would only run about 250'. With regards to transmission lines, Amazon and Dominion cannot make any promises that they will be buried. The SCC has the final say as to where the lines would be routed and whether they would be above or below ground. There are 6600 miles of transmission lines in Virginia and only 1% are buried. The Planning Commission and Warrenton Town Council would be making the decision with blinders on if they approve the data center/substation based on Amazon/Dominion assurances that the lines would go underground. The citizens of Fauquier County deserve better than this.

*"It is the citizens who should benefit from the decisions of their elected officials, not special interests such as Amazon, the data center industry, Dominion Power and the landowners who will reap many millions of dollars more for their properties if data centers are built." - CFFC*

Thanks for your consideration and I welcome your comments. I'll be passing on more information about the recent Town Hall soon.

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Planning Commissioners and Town Council Members:

I am a resident of Fauquier County and live near Rectortown in the Marshall District on a farm. I am also Chair for Fauquier of the Goose Creek Association, Vice Chair of the Virginia League of Conservation Voters, and a board member of the Citizens for Fauquier County. However, I submit this comment only as a resident and tax payer.

Please delay any vote this year on Amazon's application to build a data center in Warrenton. What's the rush? Why has this Planning Commission meeting been scheduled so close to year-end before newly appointed and elected members of the Planning Commission (PC) and Town Council (TC), as well as the public, have an opportunity to analyze a complete SUP application? If the PC votes on November 15th, the TC likely will have the opportunity to vote in December on the application, regardless of the outcome of the PC vote.

Think about it—is that really appropriate and in the interests of the public that you serve? Will that pass the “smell” test given all that we have learned about the process leading up to this application?

Warrenton is not only the town residents' home, it is our county seat. The residents of this county have worked for over half a century to preserve and protect this county from the environmental depredation and degradation that has occurred in nearby counties. The public and the PC have revealed many flaws in Amazon's application and the process that led to it. To approve such an application now would only breed public mistrust for our elected officials and other irreparable consequences for the town and county.

Do not vote prematurely on this Amazon application. Give this application its due and delay any vote until the application is complete and town staff, officials and the public have had an opportunity to evaluate it fully, fairly and impartially.

Sincerely yours,

Florence/Lori Keenan

**Subject:** Amazon data centers special use permit, concerned resident opposition

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Warrenton Town Officials,

I am writing to express my concern for allowing Amazon the requested Special Use Permit (SUP) 2022-03 Amazon Data Center. I strongly oppose you approving this special use permit.

I was born and raised in Fauquier County and returned to live here again six years ago to raise my own family because of what an agriculturally friendly community it is. We live here to enjoy the countryside and do not want to lose what we hold most dear to us by this kind of harmful development.

**This special use permit should not be approved because:**

1. It does not meet SUP criteria consistent with the town's comprehensive plan.
2. The electrical transmission towers will litter our county and scenic views and lower property values.
3. It will create major noise and viewshed impacts.
4. It will open the door for even more data centers to come and ruin our way of life here.
5. This will not bring the right kind of economic development that we need or long-term job creation.

I urge you to deny Amazon Data Services, Inc. request for this special use permit and protect our way of life in Fauquier County.

Thank you for your time and attention.

Jennifer Gray  
Fauquier County resident

Hello,

I live just a few blocks away from Main Street, and the highlight of our week is walking over to Molly's to eat at the picnic tables and listen to music. It is such a lovely part of the town, and is most charming when the street is closed down and bustling, with people eating, drinking, and visiting with each other. I love imagining that one day it is closed to cars and exists entirely as a pedestrian walk, like in downtown Winchester. Cars already have to creep along, and there's plenty of parking one street over. I don't know how far of a leap it would be, but I think it would be embraced.

I would love to see Warrenton generally increase walkability and bikeability, as it has clearly already begun to. Part of that is having outdoor meeting spaces, like the eating areas, which remind people how nice it is to live in this small town. I know there are many reasons why you take down the seating in the winter, but as a resident, I want you to know how much we would appreciate and value it.

Thank you for your time and consideration,  
Bridget Bradshaw

**Attachment 3: Signed Legislation**

November 9, 2022  
Town Council  
Regular Meeting

**RESOLUTION OF THE TOWN OF WARRENTON TOWN COUNCIL TO AMEND THE FUTURE LAND USE MAP OF THE COMPREHANSIVE PLAN ("PLAN WARRENTON 2040")**

**WHEREAS**, Broadview Holdings, LLC, ("the Applicant"), is the requesting Comprehensive Plan Amendment to the Future Land Use Map of approximately three parcels identified as GPINs 6984-18-3915-000, 6984-18-2905-000, & 6984-18-2709-000 located on the east side of Norfolk Drive and hereinafter referred to as the "Property"; and

**WHEREAS**, the Town of Warrenton adopted a comprehensive plan, herein referred to as "Plan Warrenton 2040", on April 13, 2021; and

**WHEREAS**, the Applicant is requesting to designate the properties as Re-Planned Commercial within the Experience Broadview Character District of the Future Land Use Map to enable a Mixed Use Development; and

**WHEREAS**, Plan Warrenton 2040 envisioned the Experience Broadview Character District to, "maintain and enhance the existing commercial corridor but add nodal development with mixed use residential anchors and improve transitions to adjacent single-family neighborhoods."

**WHEREAS**, the Applicant proposes to amend the Future Land Use map of Plan Warrenton 2040 in furtherance of meeting the goals of the Experience Broadview Character District; and

**WHEREAS**, upon petition of the Applicant for approval of the Comprehensive Plan Amendment, the Planning Commission held a Public Hearing on October 18, 2022, upon advertisement and notice properly given pursuant to §15.2-2204 of the Virginia Code; and

**WHEREAS**, the Town Council received and considered the recommendation of the Planning Commission for approval of the Comprehensive Plan Amendment; and

**WHEREAS**, the Town Council of the Town of Warrenton held a Public Hearing on November 9, 2022, upon notice properly and duly given; and

**WHEREAS**, the Town Council believes that the general welfare, as well as good planning practices, are served by the approval of the requested Comprehensive Plan Amendment; and

**WHEREAS**, the Town Council, in consideration of all of the foregoing, is of the opinion that the application for requested Comprehensive Plan Amendment be approved; now, therefore, be it

**RESOLVED** by the Town of Warrenton Town Council on this 9<sup>th</sup> day of November 2022, that CPA 2021-01 amends the Future Land Use map by incorporating and designating three parcels identified as GPINs 6984-18-3915-000, 6984-18-2905-000, & 6984-18-2709-000 in the Experience Broadview Character District as Re-Planned Commercial be, and is hereby, approved.

**A RESOLUTION AUTHORIZING ADVERTISEMENT OF A PUBLIC HEARING ON AN ORDINANCE TO AMEND ARTICLE I OF CHAPTER 10, SECTION 10-5 OF THE CODE OF ORDINANCES, TOWN OF WARRENTON, VIRGINIA (1991) AS AMENDED, RELATED GENERALLY TO SPEED LIMITS**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the County of Fauquier; and

**WHEREAS**, the Code of Virginia §46.2-873D and H permits the Town of Warrenton to pass an ordinance and establish a School Speed Zone and install flashing warning signs at Warrenton Middle School (Waterloo Street) that would reduce speeds to 15 mph during morning drop off and afternoon pickup periods upon receipt of a resolution by the School Board requesting such reduction in speed limits, and the Saint John's School Principal submitted a memorandum requesting the establishment of a School Speed Zone and install flashing warning signs at the Saint John's School (on Winchester Street between 200 feet north of Richards Drive and John E Mann Street), and on (John E Mann Street between Winchester Street and Robinson Street). that would reduce speeds to 15 mph during morning drop off and afternoon pickup periods; and

**WHEREAS**, the Fauquier County School Board passed a resolution requesting the establishment of a School Speed Zone and install flashing warning signs at the Warrenton Middle School (Waterloo Street) that would reduce speeds to 15 mph during morning drop off and afternoon pickup periods; and

**WHEREAS**, the Saint John's School Principle submitted a memorandum requesting the establishment of a School Speed Zone and install flashing warning signs at the Saint John's School (on Winchester Street between 200 feet north of Richards Drive and John E Mann Street), and on (John E Mann Street between Winchester Street and Robinson Street). that would reduce speeds to 20 mph during morning drop off and afternoon pickup periods as recommended by an independent, Engineering, traffic investigation; and

**WHEREAS**, the requested changes would require an Ordinance to amend Article I of Chapter 10, section 10-5 of the Code of Ordinances, Town of Warrenton, Virginia (1991) as amended, related generally to speed limits; and

**WHEREAS**, The Warrenton Town Council wishes to authorize staff to advertise for a Public Hearing to gather Public Comments on the proposed ordinance amendment; and

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council Hereby adopts a resolution authorizing advertisement of a Public Hearing on an Ordinance to amend Article I of Chapter 10, section 10-5 of the Code of Ordinances, Town of Warrenton, Virginia (1991) as amended, related generally to speed limits.

**RESOLUTION PURSUANT TO SECTION 11-3.10 OF THE ZONING ORDINANCE OF THE TOWN OF WARRENTON FOR APPROVAL OF APPLICATION FOR ISSUANCE OF A SPECIAL USE PERMIT**

**WHEREAS**, Broadview Holdings, LLC, ("the Applicant"), is the requesting Special Use Permit approval of approximately 4.81 acres, located on the west side of Broadview Avenue and hereinafter referred to as the "Property"; and

**WHEREAS**, the Applicant submitted a Special Use Permit Plan was prepared by Bohler dated June 3, 2022 and revised through October 18, 2022 hereinafter the "SUP Plan"; and

**WHEREAS**, the Applicant has applied for a Special Use Permit pursuant to Section 11-3.10 of the Zoning Ordinance, for a Mixed-Use Development under Section 9-25 of the Zoning Ordinance within the Town of Warrenton, hereinafter the "Special Use Permit"; and

**WHEREAS**, the Applicant has applied for waivers and modifications to the Zoning Ordinance for a waiver of the five acre requirement (§9-25.1.A), an increase allowable residential density for mixed-use (§9-25.1, allowing for front loaded townhouses, modifying required setback for new residential buildings (§9-25.1.J), modifying required setback for new commercial building (§9-25.1.J), modifying required lot width for residential (§9-25.1.J), and waiving landscape buffer requirements between single-family homes to townhouses and townhouses to commercial (§8-8.5); and

**WHEREAS**, pursuant to §11-3 of the Zoning Ordinance upon petition of the Applicant for approval of the Special Use Permit, the Planning Commission held a Public Hearing on October 18, 2022, upon advertisement and notice properly given pursuant to §15.2-2204 of the Virginia Code; and

**WHEREAS**, the Town Council received and considered the recommendation of the Planning Commission for approval of the Special Use Permit with the SUP Plan conditions; and

**WHEREAS**, the Town Council of the Town of Warrenton held a Public Hearing on November 9, 2022, upon notice properly and duly given; and

**WHEREAS**, the Town Council has considered the impact of the requested use on the Town of Warrenton and on the facilities and systems listed in Section 11-3.10.3 of the Zoning Ordinance for the Town of Warrenton; and

**WHEREAS**, the Town Council, in consideration of all of the foregoing, is of the opinion that the application for the issuance of the requested Special Use Permit be approved subject to the SUP Plan and conditions; now, therefore, be it

**RESOLVED** by the Town of Warrenton Town Council on this 9<sup>th</sup> day of November 2022, that SUP 2021-01 be, and is hereby, approved, subject to the SUP Plan and Conditions of Approval dated October 18, 2022.

**RESOLUTION PURSUANT TO SECTION 11-3.9 OF THE ZONING ORDINANCE OF THE TOWN OF WARRENTON FOR APPROVAL OF APPLICATION FOR ISSUANCE OF A ZONING MAP AMENDMENT**

**WHEREAS**, Broadview Holdings, LLC, ("the Applicant"), seeks to amend the zoning district for R-15 residential parcels identified as GPINs 6984-18-3915-000, 6984-18-2905-000, and 6984-18-2709-000 located on the east side of Norfolk Drive, and hereinafter referred to as the "Property", to C - Commercial district; and

**WHEREAS**, the Applicant further seeks to amend parcels identified as GPINs 6984-18-5649-000, 6984-18-3854-000, and 6984-18-6837-000 currently zoned Commercial to Commercial with Proffers; and

**WHEREAS**, a Rezoning Plan was prepared by Bohler dated June 3, 2022 and revised through October 18, 2022 hereinafter the "Zoning Map Amendment"; and

**WHEREAS**, the Zoning Map Amendment incorporates Applicant requested waivers and modifications from the Zoning Ordinance including an increase allowable residential density for mixed-use (§9-25.1, allowing for front loaded townhouses, modifying required setback for new residential buildings (§9-25.1.J), modifying required setback for new commercial building (§9-25.1.J), modifying required lot width for residential (§9-25.1.J), and waiving landscape buffer requirements between single-family homes to townhouses and townhouses to commercial (§8-8.5); and

**WHEREAS**, pursuant to §11-3.9 of the Zoning Ordinance upon petition of the Applicant for approval of the Zoning Map Amendment, the Planning Commission held a Public Hearing on October 18, 2022, upon advertisement and notice properly given pursuant to §15.2-2204 of the Virginia Code; and

**WHEREAS**, the Town Council received and considered the recommendation of the Planning Commission for approval of the Zoning Map Amendment with proffers; and

**WHEREAS**, the Town Council of the Town of Warrenton held a Public Hearing on November 9, 2022, upon notice properly and duly given; and

**WHEREAS**, the Town Council has considered the impact of the requested use on the Town of Warrenton and on the facilities and systems listed in § 11-3.9-12 of the Zoning Ordinance for the Town of Warrenton; and

**WHEREAS**, the Town Council, in consideration of all of the foregoing, is of the opinion that the application for the issuance of the requested Zoning Map Amendment be approved subject to the Rezoning Plan dated June 3, 2022 with revisions through October 18, 2022, and proffers revised on October 18, 2022.

**NOW THEREFORE BE IT RESOLVED**, by the Town Council of Warrenton, Virginia **APPROVES** the

application by the Applicant for issuance of a Zoning Map Amendment to the properties identified as GPINS 6984-18-3915-000, 6984-18-2905-000, and 6984-18-2709-000 be rezoned from R-15 Residential to C Commercial District with proffers; and

**BE IT FURTHER RESOLVED**, that the Town Council of Warrenton, Virginia hereby **APPROVES** the application by the Applicant for issuance of a Zoning Map Amendment for the properties identified as GPINS 6984-18-5649-000, 6984-18-3854-000, and 6984-18-6837-000 currently zoned Commercial to Commercial with Proffers.

**A PROCLAMATION RECOGNIZING NOVEMBER 27, 2021 AS SMALL BUSINESS SATURDAY IN THE TOWN OF WARRENTON, VIRGINIA**

**WHEREAS**, the government of Warrenton, Virginia, celebrates our local small businesses and the contributions they make to our local economy and community; according to the United States Small Business Administration, there are 31.7 million small businesses in the United States, they represent 99.7% of firms with paid employees, and they are responsible for 65.1% of net new jobs created from 2000 to 2019; and

**WHEREAS**, small businesses employ 47.1% of the employees in the private sector in the United States, 88% of U.S. consumers feel a personal commitment to support small businesses in the wake of the pandemic, and 92% of small business owners have pivoted the way they do business to stay open during the pandemic; and

**WHEREAS**, 97% of Small Business Saturday® shoppers recognize the impact they can make by shopping small, 85% of them also encouraged friends and family to do so, too; and

**WHEREAS**, 56% of shoppers reported they shopped online with a small business on Small Business Saturday in 2020; and more than 50% of consumers who reported shopping small endorsed a local business on social media or shopped at a local business because of a social media recommendation; and

**WHEREAS**, Warrenton, Virginia supports our local businesses that create jobs, boost our local economy, and preserve our communities; and

**WHEREAS**, advocacy groups, as well as public and private organizations, across the country have endorsed the Saturday after Thanksgiving as Small Business Saturday.

**NOW, THEREFORE, BE IT PROCLAIMED** we shall join in this initiative and show support for small business owners, recognizing their valuable role and contributions to our economy and our lives; November 27, 2021, shall be known as ‘Small Business Saturday.’

**BE IT PROCLAIMED FURTHER**, the Town Council of the Town of Warrenton urges the residents of our community, and communities across the country, to support small businesses and merchants on Small Business Saturday and throughout the year.

Regular Meeting

PRESENT

Mr. Carter Nevill, Mayor; Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Sean Polster;’, Mr. Mr. Renard Carlos; Mr. Christopher E. Martino, Interim Town Manager; Mr. Tommy Cureton, Deputy Town Manager; Mr. Stephen Clough, Town Clerk; Mr. Martin Crim, Town Attorney.

PRESENT

ELECTRONICALLY

Mr. Jay Heroux;

ABSENT

None

**WORKSESSION - 9:00 AM Called to Order.**

At 9:00am Mayor Nevill Called the meeting to order. He stated that a quorum was present.

Councilmen Heroux stated he was at 12 Watts Landing, New Hampshire, participating electronically because of family medical care that prohibited him from attending.

Mayor Nevill noted that a closed session had been stricken; therefore, there was no closed session. In its place, Mayor Nevill stated that there would be a discussion of Town Attorney contract negotiation.

1. **Dominion Energy Presentation.**

Mayor Nevill introduced Mr. Parker and Ms. Underwood to present on behalf of Dominion Energy.

Mr. Parker discussed different approaches for providing energy to a proposed data center. Those approaches that involved an on-site sub-station were no longer being considered.

Mr. Parker stated that the approach currently being entertained was an off-site sub-station south of the Town of Warrenton, off of Meetze Rd. Another possible location was off of Falmouth St. Mr. Parker noted that both of these options involved predominantly underground, in-road transmission lines.

Mr. Parker noted that these approaches are still being assessed by engineers and altered due to community outreach. A map of the potential options was shown to the Council.

Mr. Parker stated the next three steps and a tentative timeline for this project.

Councilmen Semple stated that he represents the ward predominantly affected by these plans, and that those citizens have expressed great concern. He stated that he lives on Falmouth St. and asked which routes or portions would require an SEC application.

Mr. Parker stated that any area with a transmission line would require an SEC application. This would likely be the half-mile of transmission lines in the Falmouth St. option.

Councilmen Semple asked for clarification on the timelines for the planned SEC application.

Mr. Parker stated that Dominion Energy realized they needed additional time for planning with the original application, including community engagement, and new timelines are flexible.

Councilmen Semple asked if the filing date is or is not conditioned on the requirement of their client.

Mr. Parker said that there are dates their client looks towards, but dates can change.

Councilmen Semple asked about Town and Fauquier County authority over the proposed project, and whether the project will enter the Town limits.

Mr. Parker stated that the Falmouth St. option would cross county property via a half-mile transmission line.

Councilmen Semple questioned who would file the SUP.

Mr. Parker assured that Dominion Energy would own the land and therefore file an SUP.

Councilmen Semple asked if there had been discussions with current landowners about buying property.

Mr. Parker stated that he would have to check with their economic development team.

Councilmen Semple asked about the capacity of the proposed powerlines and potential use for future data centers.

Mr. Paker stated that they would have to look at their plans. And stated that this new infrastructure may be able to support future high-energy users but could not speak about future plans.

Councilmen Semple made a statement about Amazon, future data centers, Dominion Energy, and future power supply. Councilmen Semple asked why the underground transmission lines could not follow Route 29.

Mr. Parker stated that there were issues that groundwater contamination, drainage issues, space issues, and VDOT communications were all factors in looking elsewhere for laying cables. Accessibility caused Dominion to look at the Falmouth property. Mr. Parker assured the Council that nothing has been finalized and that these are simply options to study.

Councilmen Semple asked about impact on roads and right-of-way requirements.

Mr. Parker stated that they were currently looking at 30-40ft of right-of-way with a caveat of there being a lack of detailed construction designs.

Councilmen Semple noted some streets are only 30ft wide, and asked if they would need to use sidewalks and/or tree lawns.

Mr. Parker said he would need to defer to his colleagues not currently present.

Councilmen Semple asked what portion of Walker Dr. Dominion would utilize.

Mr. Parker deferred to distribution and future construction details to come later.

Councilmen Semple asked about the effects on existing above and below-ground infrastructure. Specifically, whether current power lines along Falmouth Rd. would be buried.

Mr. Parker deferred to distribution and future construction details to come later.

Councilmen Semple asked about who would pay for this project.

Mr. Parker stated it was his understanding that the client would pay for the project.

Councilmen Semple asked about liability for accident or damage to property during construction.

Mr. Parker stated that Dominion has a liability hotline open to the public to submit claims for damages to property.

Councilmen Semple asked why option 1 is preferred over option 2.

Mr. Paker stated the Falmouth St. property is preferred because of the size and accessibility of the property. The county property has environmental, shape, accessibility, and space constraints.

Councilmen Semple asked about the future of this project if the Amazon application is denied.

Mr. Paker stated this project is based on a load request from a specific customer and to serve a community as a whole; however, if that customer's request is denied, the project does not move forward.

Councilmen Semple asked why this would prevent Amazon from including a substation on the property included in its application.

Mr. Parker stated he could not speak to that.

Councilmen Carlos thanked Mr. Parker for attending and asked about how current the information included on their website is.

Mr. Parker acknowledged the website and stated that it was up to date.

Councilmen Carlos asked if the website had a section to submit questions to Dominion Energy.

Mr. Parker affirmed.

Councilmen Carlos asked about communication if the Council were to provide the applicant with a series of questions necessary to answer.

Mr. Parker affirmed the Council that a response would be received and introduced Ms. Underwood as the government affairs representative for Fauquier County.

Councilmen Carlos asked about a timeframe for a response.

Mr. Parker asked for at least a week to respond.

Councilmen Carlos asked about the date and location future public outreach attempts in Town Halls.

Mr. Parker stated that February is the next planned community meeting in Warrenton.

Councilmen Carlos asked how constituent should prepare for that meeting and in what manner the meeting would be held.

Mr. Parker stated they would assess how they would hold the meeting closer to the date it is held, and likely open it up for questions and answers.

Councilmen Carlos asked about advanced notice for constituents for said meeting.

Mr. Parker noted they would attempt at least one-month advance notice for citizens.

Councilmen Carlos asked about power requirements at the proposed substation.

Mr. Parker answered that substations have thresholds of 300MW, but the data center may not use that much.

Councilmen Carlos asked about other load requests Dominion had received.

Mr. Parker acknowledged that there were other requests for data centers or industrial usage that the substation could serve.

Councilmen Carlos asked from whom the requests were.

Mr. Parker replied they are discussing the customer at Blackwell Rd. with others interested in rezoned parcels.

Councilmen Carlos asked about the size of the substation.

Mr. Parker stated that a substation is usually five to 10 acres but may differ from that based on future or present requirements.

Councilmen Carlos asked about future requests.

Mr. Parker stated that the data center business is likely not slowing down and look towards the future working with local governments.

Councilmen Carlos asked about preliminary design plans.

Mr. Parker stated that the only plans they had drawn up had been released to the Council and the public.

Councilmen Carlos asked about a timeline for construction.

Mr. Parker stated he could not present a timeline as the project is currently based on public engagement.

Councilmen Heroux asked whether substations are only required for data centers and their purpose.

Mr. Parker stated that substations are not only required for data centers, and they are designed to lower transmission line voltage to be delivered to individuals. They contain transformers to lower voltage to consumer-level capacity.

Councilmen Heroux asked whether the proposed data center would be consumer 300MW.

Mr. Parker said no and reiterated the 300MW is a common capacity prior understanding needs of the community. Mr. Parker stated that building this substation was triggered by a single request but would not only serve this one customer.

Councilmen Heroux asked about the age and reliability of Warrenton's power grid.

Mr. Parker stated that the Town's current power grid is aged but reliable, but future growth requires higher energy consumption.

Councilmen Heroux asked about the benefits of a substation without a data center.

Mr. Parker stated that an additional substation would improve ability to serve the community but cannot speak to the needs of a substation without a data center.

Councilmen Heroux asked about what the maximum load of a data center would be.

Mr. Parker could not share that information due to privacy policies, but stated that once an SEC has been filed, that information could be requested.

Councilmen Heroux asked about costs for laying transmission lines and who would pay.

Mr. Parker stated that the applicant had agreed to bear the costs of laying underground lines, but transmission infrastructure would still be paid by Dominion Energy Customers across Virginia.

Councilmen Heroux asked about how those costs are included in ratepayer bills.

Mr. Parker clarified that they are included in "riders" on customer bills.

Councilmen Heroux asked whether the applicant would receive these "riders" on their electric bills.

Mr. Parker affirmed.

Councilmen Heroux stated an assumption that the applicant's electric bill would be rather high in cost.

Mr. Parker affirmed.

Councilmen Heroux asked about an average electric bill cost for data centers.

Mr. Parker stated he did not have an answer.

Councilmen Heroux asked why access to a substation is important.

Mr. Parker stated that lines entering or exiting a substation should have little impact on the space. Mr. Parker stressed safety.

Councilmen Heroux asked about staffing and the operations of a substation.

Mr. Parker stated that it is not a daily staffed property, but engineers enter occasionally to ensure proper operation.

Councilmen Heroux asked for clarification on the 300MW and the applicant's proposed data center.

Mr. Parker clarified that the entirety of the 300MW will not be serving the applicant.

Councilmen Semple asked if there is a reason Dominion could not upgrade the 230KV line south of Warrenton to a 500KV line.

Mr. Parker stated there were no current plans for an upgrade, but future plans could change.

Councilmen Semple stated concern for future data centers being built in the Town. Councilmen Semple asked if substations spur the construction of data centers.

Mr. Parker could not speak to where data centers are built as that is not Dominion's business focus.

Councilmen Polster asked about any future need forecasts for the Town.

Mr. Parker stated that there is desire to develop other industrial parcels across VA, but Dominion does not build a substation until there is a request. Mr. Parker could not speak to future substation plans.

Councilmen Polster asked about analyzing energy capacities within the Town.

Mr. Parker reiterated the importance of future energy requests. Mr. Parker stated that with future growth, the Town will likely reach capacity but could not speak to a date.

Mr. Polster asked about the capacity of the existing Warrenton substation.

Mr. Parker stated that there is enough capacity to serve a data center with the current substation, but it would be close to capacity. Mr. Parker did not have a wattage to share.

Councilmen Polster expressed approval of Councilmen Semple's idea to bury existing overhead lines along Falmouth St.

Councilmen Semple asked whether the substation is required without the applicant's data center request.

Mr. Parker reiterated that this project is driven by the applicant's request.

Councilmen Hamby asked whether the current substations surrounding the Town are near capacity and whether they serve Warrenton.

Mr. Parker stated that the Warrenton substation is the only substation that serves the Town while the other substations act as "check points" for energy transmission. A new substation would provide redundancy.

Councilmen Hamby referenced various weather events in previous years and power outages.

Mr. Parker stated that if the Warrenton substation were shut off, the Town would not have power.

Councilmen Hamby asked about connections to transmission lines.

Mr. Parker affirmed that all substations must be connected to a transmission line.

Vice Mayor Hartman asked about whether Dominion had received feedback on these route options.

Mr. Parker stated they had received little feedback as the options were new.

Vice Mayor Hartman asked whether that feedback would be made public.

Mr. Parker stated that it would be made public if they are included in an SEC application.

Vice Mayor Hartman asked about the purpose and meaning of a public outreach letter.

Mr. Parker stated that it is to ensure there is an understanding that if the Town or County were to invite high energy users, additional infrastructure would likely be necessary.

Vice Mayor Hartman asked whether there had been any serious discussions with VDOT about right-of-way.

Mr. Parker stated that discussions with VDOT have been preliminary and discussed awareness.

Councilmen Carlos asked if Dominion could provide the Town with a report on current energy usage and projected use with different kinds of growth.

Mr. Parker said he is willing to take that back for investigation.

Councilmen Heroux asked if power demand is growing in Virginia.

Mr. Parker affirmed.

Councilmen Heroux compared Virginia's power growth to other parts of the United States.

Mr. Parker stated that he could not speak to other parts of the country.

Councilmen Semple asked why the Town would seek high energy users and Ms. Underwood's wording in a letter.

Ms. Underwood stated that wording was not the point of the letter, but decisions of economic pursuits and growth eventually require additional infrastructure.

Councilmen Semple asked about the wording in Ms. Underwood's letter.

Ms. Underwood stated an assumption that all towns likely want robust economies and growth.

Councilmen Semple asked if Dominion had received applications for future use.

Ms. Underwood deferred the economic development team.

Councilwoman Sutphin thanked Mr. Parker and Ms. Underwood for attending and answering questions.

Councilmen Polster stated an observation that some questions had not been answered, specifically timelines, but thanked Mr. Parker and Ms. Underwood for coming.

Mayor Nevill asked why Dominion did not consider a current property Dominion Energy owns on Meetze Rd. for a potential substation.

Mr. Parker stated it was likely size constraints and introduced Ms. Thronton. Ms. Thronton stated that the property owned is too small for the necessary facilities of a substation.

Mayor Nevill stated that eminent domain use by the Town could present liability issues for the Town and asked that Route 29 be considered.

## **2. Status of Special Use Permit SUP 2022-03 Amazon Data Center Application.**

Mr. Martino introduced the topic stating that the Planning Commission adjourned without completing a public hearing or making a suggestion to the Town Council on November 22, 2022.

Mayor Nevill asked for clarification on the outcomes if the Planning Commission does not make a recommendation to the Town Council during its December meeting.

Town Attorney Martin Crim stated there would be no public hearing in the January Town Council meeting.

Councilmen Polster asked if the Council could still advertise for the January meeting, but only after the Planning Commission's December meeting and if they make a decision. If they do not make a decision, do not advertise.

Mr. Crim affirmed that that would allow enough time to advertise for the Town Council Meeting and avoid an illegal advertisement.

Councilmen Semple asked for clarification on council actions if the Planning Commission does not make a decision.

Mr. Crim stated that options for this evening would be either to direct staff to advertise for the January Council Meeting but if the Planning Commission does not make a decision in December, defer action on 1 January 2023; or direct staff to wait until after the Planning Commission's meeting to begin advertisement.

Councilmen Semple asked if a recommendation from the Planning Commission is necessary for advertisement of a public hearing.

Mr. Crim answered that the legal issue is if the Planning Commission does not make a recommendation in December, it has gone outside of its scope of authority by not making a recommendation in a "reasonable period of time". This is if the applicant does not agree to continue deferring their application, the "reasonable" timeframe has closed.

Councilmen Semple asserts that this is Mr. Crim's opinion.

Mr. Crim states that this was a legal opinion.

Councilmen Semple asks whether Mr. Crim has created a “reasonable” standard.

Mr. Crim relates this legal opinion to Common Law.

Councilmen Semple asserts an opinion regarding the definition of “reasonable” and states that using Mr. Crim’s legal opinion, the Town Council would not be acting reasonably.

Councilmen Carlos asked if there is a precedent for municipal bodies making recommendations without receiving information from the Planning Commission.

Mr. Crim ensured that it has likely happened but could not present an immediate example. Mr. Crim stated that he would try to find an example before the evening meeting.

Councilmen Polster asked about a 100-day timeframe.

Mayor Nevill asked if an open-ended direction to staff if acceptable action by the Council.

Councilmen Polster asked how to a reasonable period is determined vs. a 100-day timeframe.

Mr. Crim stated that if the applicant is asking for a delay, it is considered a reasonable timeframe.

Councilmen Polster asked if it would be considered “reasonable” to again defer the Planning Commission decision after the December meeting.

Mr. Crim stated that it would not be, as the applicant had only requested deferent until that meeting and had not asked for deferrals past the December Planning Commission meeting.

Councilmen Polster asked for clarification of a 30-day deferment by the applicant.

Mr. Crim stated that the 30-day deferment requested by the applicant upon completion of the application in May only applies *within* the reasonable period, not acting as an extension of the period.

Councilwoman Sutphinreferenced that the application was completed eight months ago, and asked how long the Planning Commission may defer the issue without action from the Council.

Mr. Crim stated that there are gaps within all statutes and that if the Town allows the Planning Commission, there could be a lawsuit for denial of due process. Mr. Crim demonstrated that a cautious course of action would be to state that the Planning Commission must act at its December meeting *unless* the applicant asks for additional time.

Councilwoman Sutphin asserted that this is Mr. Crim's opinion and that the Planning Commission delayed their decisions so they could receive more information, which is reasonable. Councilwoman Sutphin apologized for "being argumentative."

Councilwoman Sutphin stated that the Planning Commission should be able to complete its task.

Councilmen Heroux asked Mr. Crim about how the applicant should present itself at the Planning Commission meeting.

Mr. Crim stated that he was unsure whether this was a legal question.

Councilmen Heroux stated that in his view, the applicant would likely give their best presentation on December to sway the Planning Commission.

Councilmen Semple asked why the Council was rushing if the Council has one year after the application to act.

Mr. Crim stated that he cannot speak to that as it was not a legal question.

Councilmen Semple clarified that his question was regarding the one-year timeframe.

Mr. Crim questioned whether the statute to which Councilmen Semple was referring was applicable to towns or counties.

Councilmen Semple assured it was a statute Mr. Crim referenced already.

Councilmen Carlos asked whether the Planning Commission had requested information not yet provided by the applicant.

Mr. Martino deferred to Ms. Harris.

Ms. Harris stated that the Planning Commission requested more information about noise and elevations.

Councilmen Carlos asked whether the applicant had agreed to provide said information.

Ms. Harris stated that the applicant had agreed to abide by zoning requirements regarding noise and bring forward elevation information on December 20<sup>th</sup>.

Councilmen Carlos asked whether there was any other information not yet provided to the Planning Commission.

Ms. Harris stated that the applicant needs to update their plans regarding a removed substation and landscaping.

Councilmen Semple inquired about an outstanding zoning determination.

Ms. Harris clarified that the noise ordinance applies to everyone in the Town, and that the applicant will abide by said noise ordinance.

Councilmen Carlos asked whether the Town has provided similar leeway to other applicants as to allow changes to applications during the Planning Commission's oversight process.

Ms. Harris stated that this is not often the case, and that it is being allowed because of the intense scrutiny on this specific application.

Mayor Nevill clarified that if there were no action by the Planning Commission at their December meeting, staff would take no action; but if a vote is taken, staff would advertise for a public hearing at the next Town Council meeting.

### 3. **Planning Commission Appointment Discussion.**

Mayor Nevill stated that the Council has appointments to the Planning Commission with appointments they must attend; therefore, Mayor Nevill asked privilege of the Council to move the Planning Commission Appointment discussion forward.

Mayor Nevill turned the discussion to the nominating committee, Vice Mayor Hartman and Councilmen Semple.

Vice Mayor Hartman stated that there had been nine qualified applicants creating a difficult decision for the committee. The committee had chosen Mr. Lasher and Ms. Barbour as nominees for the Planning Commission.

Councilmen Semple expressed approval of the applicants and public participation in the local government.

Mayor Nevill invited Ms. Barbour and Mr. Lasher to the podium to make a statement.

Ms. Barbour expressed excitement for participation in the Planning Commission and mentioned her association with the NAACP and commitment to diversity. Ms. Barbour thanked Councilmen Semple and Vice Mayor Hartman for the opportunity.

Mr. Lasher stated that he believes this to be an honor to give back to the community and referenced experience working in the public sector. Mr. Lasher thanked the Council for this opportunity.

Mayor Nevill stated that there needs to be discussion regarding the number of Planning Commission members and wished that there be a commitment to geographic diversity within the Town.

4. **Water and Sewer System Growth and Capacity Evaluation.**

Mayor Nevill invited Mr. Cassidy to speak regarding the water and sewer system. Mr. Martino provided a summary of the water and sewer system evaluation.

Mr. Cassidy stated that the purpose of the wastewater treatment facility is to provide healthy and safe water and wastewater services. Mr. Cassidy provided an overview of the operations and both the water and wastewater treatment plant, challenges facing them, and roadmaps for moving forward.

Mr. Cassidy outlined the accuracy of and differences with the 2015 study performed regarding the water and wastewater facilities, and the future needs for build outs or expansions.

Councilmen Heroux asked Mr. Cassidy to define “build outs.”

Mr. Cassidy defined it as when the overall capacity of the facility has reached its limits with current capacity. Mr. Cassidy referenced a current capacity of 2.42MGD and maximum capacity of 2.92MGD. Mr. Cassidy stated that the water facility’s capacity was at 40% and the wastewater facility’s capacity was at 70%.

Mr. Cassidy introduced Mr. Steven Friend.

Mr. Friend explained the flow of water within the water treatment facility, chemicals, and uses of each building.

Councilmen Heroux asked where the largest risk to citizens within the flow Mr. Friend outlined.

Mr. Friend explained how this each step is critical and if one failed, the entire system would fail.

Councilmen Heroux asked if there was a single risk point that was most concerning.

Mr. Friend stated that his biggest concern was the filter control valves due to age and poor function, causing repeated necessary maintenance.

Councilmen Heroux asked about the effects if the filter control valves were to fail.

Mr. Friend stated that no drinking water could be filtered.

Councilmen Hamby asked if there were a way to refilter water through step six and/or increase stored capacity.

Mr. Friend recommended increasing capacity of the clear well. Mr. Friend stated that 10% of water loss can be recycled back to the beginning of the process, but that increases likelihood of bacterial contamination.

Councilmen Hamby reiterated a question about increasing stored capacity.

Mr. Friend stated that there are already difficulties with stagnation, and increasing water capacity would cause larger stagnation issues. Mr. Friend explained the relationship between storage size and stagnation.

Councilmen Polster mentioned a previous plan to create redundancy by increasing storage and creating a loop within the water treatment system. Councilmen Hamby asked about pressure within the water system.

Mr. Friend stated that pressure levels only decline when tank levels begin to decline.

Mr. Friend mentioned a plan to build a building focused on chemical injections to streamline and more accurately treat chemicals. Mr. Friend referenced a plan to bring SCADA online for automated controls. Mr. Friend discussed permit cycles for a dam in Fauquier.

Mr. Friend discussed a timeline for the next steps to be taken regarding the water treatment plant, with an expected conclusion date in May 2024.

Councilmen Heroux asked if the images shown were the aged and difficult valves earlier referenced. Mr. Friend affirmed.

Councilmen Semple asked about the dates of the timeline presented.

Mr. Friend stated that the situations faced by the treatment facilities forced the timeline to be pushed back.

Councilmen Semple asked for financial numbers to be provided in the future, as well.

Mr. Friend stated that those numbers could be provided. Mr. Cassidy summarized that priorities required funding to be used to support the CARP and SIP.

Councilmen Semple summarized that the council would receive a composite overview of costs, revenue, and sources of revenue to pay costs.

Mr. Cassidy affirmed.

Vice Mayor Hartman asked about the capacity and buildout of the water treatment facility.

Mr. Cassidy stated that the water treatment facility was currently at 40% capacity. A buildout would be 80% to 90% capacity.

Mr. Friend shifted focus to the wastewater treatment facility. Mr. Friend outlined the age of different key parts of the wastewater treatment facility. Mr. Friend demonstrated the flow of wastewater through the facility and the purpose of each building within the facility. Mr. Friend reiterated that the wastewater treatment facility is one of the oldest in the Town of Warrenton.

Councilmen Heroux asked about which area in the facility presented the highest risk.

Mr. Friend stated that the primary clarifiers presented the largest risk because of their age, their vulnerability, and the solids issue at the plant.

Councilmen Heroux asked about the efficiency of the wastewater treatment facility.

Mr. Friend stated that the facility was very efficient but was beginning to fail because of its aged equipment. Mr. Friend expressed concern over this, as if one step failed, the process would need to begin all over again.

Councilmen Heroux asked mentioned SCADA and asked whether the plant had little automation.

Mr. Friend stated that the facility was too old in certain areas to be automated in its current state.

Councilmen Heroux asked about the benefits of automation in this situation.

Mr. Friend stated that it is more reliable and allows corrections more easily. An automated system may track itself.

Councilmen Heroux expressed an assumption that newer hires and younger operators would wish to use newer processes and equipment, and asked whether this was correct.

Mr. Friend affirmed.

Councilmen Hamby asked about the future of the rotating biological compactors.

Mr. Friend stated that they would wish to remove the rotating biological compactors and replace them with more efficient technology.

Councilmen Hamby asked about surrounding real estate and who/what owns them.

Mr. Friend pointed out the Army Corps and the WARF on the images displayed.

Councilmen Hamby asked if there was enough need or space for another in-ground building.

Mr. Friend stated that there would *never* be a need for another building.

Councilmen Hamby asked for clarification as to removing the rotating biological compactor and replacing them with clarifiers.

Mr. Friend affirmed that that was the proposal. Mr. Friend stated that rotating biological compactors are being phased out as technology with replacement parts being difficult to find.

Councilmen Hamby asked about the age of the clarifiers and rotating biological compactors.

Mr. Friend reiterated 1958, 1958, 1977, and 1992 for the clarifiers; and 1977 and 1992 for the rotating biological compactors.

Mayor Nevill asked about new technology to replace the rotating biological compactors.

Mr. Friend stated that new technology would use the same concept, along with replacing outdated faulty equipment with newer more efficient equipment.

Mr. Nevill asked whether the rotating biological compactors needed to be physically replaced with new technology.

Mr. Friend stated that the rotating biological compactors would be left in place performing no actions, with secondary clarifiers placed elsewhere.

Vice Mayor Hartman commended Mr. Friend on this presentation, saying it was a great first-presentation for an individual.

Councilmen Heroux stated that his tour of the wastewater treatment facility was excellent.

Councilmen Heroux asked about whether the primary digestion room pumps presented risk.

Mr. Friend stated that those pumps are ugly, but work.

Councilmen Polster asked about the proffer and how it affects the wastewater treatment facility, specifically about a goal range of 2.5 million-3 million.

Mr. Martino affirmed that the goal was to update a permit to 3MGD.

Mr. Cassidy outlined a timeline and future priorities for the wastewater treatment facility. Mr. Cassidy mentioned that Public Works will be having a public hearing to have money allocated for said issues.

Councilmen Semple asked whether the plans presented could be compared to Warrenton 2040, noting significant changes between the two.

Mr. Cassidy stated that the presented plans follow the Warrenton 2040 plan closely and was incorporated into the plans.

Mr. Martino asked for authorization for advertisement for a public hearing to budget and appropriate for the capital projects. Mr. Martino reference funding for water and sewer projects, and allocation of those funds for this project at the evening meeting.

## 5. **Public Works and Utilities Feasibility Study.**

Mr. Cassidy stated that the Public Works and Utilities Feasibility Study relates to the Warrenton 2040 plan under the facilities section. Mr. Cassidy stated that staff conducted an in-house assessment of their current facility in 2021 and worked with the Town Manager to identify potential 10-acre sites for a new facility, with option "A" having been chosen.

Option "A" was near the entrance of the landfill, with Mr. Cassidy speaking about the development, engineering, and environmental analyses of the potential site. Mr. Cassidy stated that the future steps necessary to be taken including surveying of the site, rezoning, and inclusion in a CIP. Mr. Cassidy presented estimated construction costs of \$30 million.

Mayor Nevill asked for a reminder on why there is discussion of a new facility.

Mr. Cassidy stated there are noise complaints from residential neighbors and an aging facility that have largely pushed this proposal.

Councilmen Hamby asked whether the current Public Works building was built in 1953 with an addition in the 1980s.

Mr. Cassidy affirmed.

Councilmen Hamby stated that a feasibility study with Fauquier County states the project is plausible, but the next step is a site plan. Councilmen Hamby asked if the 334,000 will culminate in a physical plan.

Mr. Cassidy affirmed.

Councilmen Hamby asked if Public Works was asking to put this into the CIP.

Mr. Martino stated that the next step would be the 334,000 which would be included in the next fiscal planning cycle.

Councilmen Semple expressed appreciation of a presented budget.

Mr. Cassidy stated that there was no previous budget presented.

Councilmen Semple stated this project's impact on future monetary reserves would need to be considered moving forward.

Mr. Martino suggested that this project could be phased, and that the Town could look into such an option for financing.

Councilmen Polster referenced a previous suggestion of a public-private partnership.

Councilmen Carlos asked if the Town would receive any type of State or Federal funding for this project.

Mr. Cassidy stated that such funding is possible but hasn't been investigated.

#### 6. **RollOutWarrenton! Second Street Status.**

Mr. Cassidy stated that there has been communication with individuals to create a January plan for RollOutWarrenton! to become a permanent fixture. Mr. Cassidy reminded the Council that during the November meeting he had recommended denial for permanent closure of Second St because there was no plan, but they are now working on a plan to be presented in January.

Mr. Cassidy stated that the Town has no more barricades to use to block off Second St, obtaining which would cost the Town money.

Mr. Cassidy stated the January plan would include any measures for businesses to occupy Second St. He recommended reopening Second St until a plan is presented and passed.

Mayor Nevill asked for clarification that during a discussion to reopen, a discussion for closing in summer may be had.

Mr. Cassidy affirmed.

Councilmen Polster stated that a temporary measure for closure would be beneficial. Reiterating that a short-term solution is necessary.

Councilmen Hamby stated that the Council doesn't have a very good plan, so a hard-date is necessary for temporary opening/closure.

Councilmen Carlos referenced Councilmen Polster’s statements and stated that a permanent closure would be beneficial.

Councilmen Semple referenced a VDOT application for upgrading Main St and stated that he would like to wait until there is a more definitive approach, opening the street in the interim.

Vice Mayor Hartman agreed with Mr. Semple but stated that he could agree with either viewpoint.

Mayor Nevill asked if removable bollards were a barrier option.

Mr. Cassidy stated that removable bollards are not designed for such a purposed. Additionally, there’s a question of who decides when it is open or closed and who uses the space.

Vice Mayor Hartman expressed support for reopening Second St until there is a more concrete plan presented to the Council.

Councilmen Heroux expressed support for reopening Second St.

Mayor Nevill asked the Council if the general consensus was to reopen the street for the winter, but close it to vehicles during RollOutWarrenton!.

Councilmen Heroux affirmed.

7. **Presentation of Fiscal Year 2022 Audit Results and Annual Comprehensive Financial Report – Brown, Edwards, and Company LLP.**

Ms. Miller introduced Mr. Murray, the Town’s audit director, who was attending the meeting virtually. Mr. Murray thanked the Council for allowing him to present virtually.

Mr. Murray began with the highlights of the audit including the implementation of GASB 87 leases having minimal impacts on the Town; the impact of financial markets on the Town’s pensions; specific Town debts being refunded; and the establishment of a stormwater fund.

Mr. Murray stated that the Town’s net position had negligibly decreased from the prior year. Mr. Murray stated that the Town had between 7- and 9-months unassigned funds in the general fund, greatly over the FAA-recommended 2-month timeframe.

Mr. Murray demonstrated that the Town had a consistently positive budgetary comparison except in 2018 and 2020, with growth in 2022 attributed to a meals tax increase. Mr. Murray also demonstrated that the town’s expenditures fell below the

Town's budget between 2018 and 2022. Mr. Murray demonstrated a favorable quick ratio for the town.

Mayor Nevill asked the Council if they had any questions.

Councilmen Heroux commended the presentation.

Councilmen Semple stated that if he had questions, Ms. Miller could likely answer.

## **8. Discussion of Town Attorney Contract.**

Mayor Nevill stated that the Council has a discussion about the Town's contract with Vanderpool, Frostick, and Nishanian, PC, and the associated fees.

Mr. Crim thanked the Council for the opportunity to serve Warrenton, that this form of work is the form of work he enjoys doing, and that he wishes he may continue to work with the Town.

Mr. Crim stated that when they began, there was a flat fee for the entire month; however, overall workload had increased. Therefore, Vanderpool, Frostick, and Nishanian had proposed a flat fee of \$10,000 for the first 40 hours of a month, followed by hourly rates of \$290 per hour for attorneys and \$100 per hour for paralegals.

Councilmen Semple asked what this proposal would have cost the town under these new rates.

Mr. Crim did not have an answer.

Councilmen Semple asked whether this was an unusually large amount of legal work.

Mr. Crim stated that this may present a circular feedback loop, and that if there were hourly rates the Town may have more selection into what matters need an attorney.

Councilmen clarified that he wished to understand costs moving forward under these new rates. What benefits are received from flat fees and from other time worked.

Mr. Crim referenced Table 3 within paperwork in front of the Council with relevant information.

Councilmen Heroux asked if there was any information that gave the law firm any idea of a projected demand.

Mr. Crim stated there was no information.

Councilmen Heroux asked if their proposal set an engagement requirement for the \$10,000 flat fee.

Mr. Crim stated that there were no anticipated number of hours when the proposal letter was written the previous winter.

Councilmen Polster asked Mayor Nevill if the original documents were available.

Mayor Nevill asked for clarification on which documents.

Councilmen Polster [inaudible].

Mayor Nevill stated two proposals back were available.

Mr. Crim stated that there is no required action at this time, and he serves at their pleasure.

Councilmen Hamby asked about when this change would take effect.

Mr. Crim stated that this would take effect January 1<sup>st</sup> and affect future payments.

Councilmen Heroux asked if this was a unilateral contract change.

Mr. Crim referenced a letter in which it is stated that the law firm serves the Town at will and may change rates periodically like other services.

Councilmen Polster asked what the year-end costs were for legal advice.

Mr. Martino stated that he would have to follow up with that question.

Mayor Nevill asked if Mr. Crim's average monthly hours were 67 hours.

Mr. Crim stated that the average he worked was 72 hours.

## 9. **Agenda Review.**

Mr. Martino reviewed the agenda.

### 1. **Ordinance to amend Article I of Chapter 10, Section 10-5 of the Code of Ordinances, Town of Warrenton, VA (1991) as amended, related generally to speed limits.**

Mr. Martino stated that the one public hearing scheduled for the evening meeting would be the amendment regarding speed limits around Warrenton Middle School and St. John's.

Mr. Martino stated that the school zones for St. John's were to be on Winchester St and John E Mann St. Mr. Martino suggested striking references to Winchester

St after discussing with Major Carter. Mr. Martino referenced an initial request for both streets to be school zones, but a later preference for John E Mann St.

Councilmen Polster referenced the November Town Council meeting in which there was a request for both streets to still be included; however, only put a school zone on John E Mann St while a study is performed on Winchester St. Councilmen Polster questioned whether that was possible.

Mr. Crim confirmed that he saw a draft proposal for a speed study during school days.

Mr. Martino stated that he was unfamiliar with this point. Mr. Martino asked for clarification.

Councilmen Polster stated that St. John's wishes for the school zone on Winchester St but does not want to act on it immediately, instead focusing on John E Mann St; however, with a school zone already declared on Winchester St, they may create infrastructure in the future without participating in the bureaucratic process again.

Mr. Martino stated that if the ordinance is amended, they *would* have to come back at a future date to establish a school zone on Winchester St.

Councilmen Polster asked if St. John's would still be responsible for the \$10,000 in costs for John E Mann.

Mr. Martino affirmed.

Councilmen Hamby asked for clarification on requested speed limits of 15mph or 20mph, and asked if only one speed could be agreed upon.

Vice Mayor Hartman agreed and asked if both school zones could be made 15mph.

Councilmen Heroux stated that the basis of these speeds were speed studies and was discussed at the previous meeting.

Major Carter affirmed that the St. John's speed study concluded that a 20mph limit was best there. Major Carter did not have information for the Warrenton Middle School study.

Councilmen Polster asked about commonwealth laws related to public school, school zones.

Mr. Crim affirmed that state laws are relevant.

Councilmen Hamby pointed out that these are public streets and expressed concern over differing school zone speed limits.

Mr. Crim stated that there are 14 other streets in the Town with 15mph speed limits, and speed studies are planned for them as well.

Councilmen Hamby stated that there are differences between school zones and streets.

Mr. Martino stated that the 15mph limit is by code and request from the school board. For private schools, speed studies must be performed and abided by.

Councilmen Heroux asked if speed studies must be followed.

Mr. Crim stated that speed studies must be followed, no matter the outcome.

Councilmen Heroux expressed a desire for consistency in speed limits but recognized a requirement to abide by the speed study.

Mayor Nevill asked if St. John's' concern's regarding Winchester St were based in the costs of conducting a speed study.

Councilmen Polster stated that St. John's didn't ask for a school zone on Winchester St and costs incurred by a study.

Mayor Nevill pointed out that Winchester St is still utilized during school pick-up and drop-off and suggested a school zone would be beneficial.

Councilmen Polster asked if a speed limit would create a speed trap.

Councilmen Hamby outlined the route used by individuals attending St. John's and expressed a need for more than only lowered speed limits along Winchester St.

Councilmen Carlos suggested that action along Winchester St be reserved for a later date.

Councilmen Heroux stated that citizens are looking for more permanent speeding solutions and stated that a school zone on Winchester St is only effective during part of the day.

Mayor Nevill asked the Council if the evening resolution would have Winchester St stricken.

Mr. Martino and Councilmen Polster affirmed.

2. **Budget amendment to increase the contribution to Virginia Regional Transit in support of the Circuit Rider.**  
Mr. Martino introduced the first consent agenda item to appropriate \$10,000 for the Circuit Rider service. Mr. Martino noted that the cost of the service in FY2023 was greater than in adopted budget.
3. **Bond release for Chick-fil-A (SDP 2007-14 Amended).**  
Mr. Martino introduced the second consent agenda item, to release a bond put in place for the Chik-Fil-A project. Public Works and Community Development had indicated that the project had been completed, ergo, the bond should be released.
4. **24'x32' Pole Varn Permit Fee Waiver/Keeping of Swine at Fauquier High School**  
Mr. Martino introduced the third consent agenda item for Fauquier High School's agricultural program to construct a swine barn.
5. **Post-Zoning master development plan as proffered in the Walker Dr Rezoning**  
Mr. Martino introduced the fourth consent agenda item relating to development of one parcel along Walker Dr.

Councilmen Semple asked why this was on the consent agenda.

Mr. Walton stated that it was how it was proposed and may be removed.

Councilmen Semple expressed support for removal from the consent agenda.

Mr. Walton offered to give a presentation on the project.

Councilmen Semple stated that he was familiar with the project and asked for it to be put under new business for the evening meeting.

Councilmen Hamby asked if the rezoning was for land bay E and if it was in order.

Mr. Walton affirmed. Mr. Walton stated that this is a general concept plan following the rezoning of land bay E.

Councilmen Hamby asked for clarification on the proposal and what new business would be brought forward if removed from the consent agenda.

Mr. Walton outlines different properties associated with access, materials, and architectural rules related to the project included in the agenda.

Councilmen Hamby asked if there was anything missing from the proposal.

Mr. Walton stated that everything has been submitted, with discussion only regarding the height.

Councilmen Semple asked if the construction of left-hand turn-lanes would be completed before the construction of the first unit.

Mr. Walton affirmed.

Councilmen Semple expressed a desire to propose a resolution to table the proposal for 30 days to be examined because of the new idea of post-zoning master development concept. Specifically, to re-examine this new, novel approach. Councilmen Semple stated that he had not had time to consent to this.

Mayor Nevill asked if this required council action.

Mr. Walton stated that a PZMD submission is not required, but thought it was important to have on the agenda.

Councilmen Semple stressed that the PZMD is voluntary, and that this is a good time to look at the proposal.

Councilmen Polster pointed out that the PZMD was non-binding, allowing flexibility.

Councilmen Semple asked whether the outcome of the PZMD is detailed and binding. Councilmen Semple asked if the PZMD required Council action or just Community Development action.

Mr. Walton stated that the process needed to be adopted.

Councilmen Polster stated that the process of the PZMD is consistent.

Councilmen Hamby stated that even if the PZMD went through the consent agenda, there are various hurdles it would still need to pass. Councilmen Hamby stated that he didn't see why it couldn't go through the consent agenda.

Councilmen Semple asked Mayor Nevill if the issue could be removed from the agenda at the evening meeting via an objection.

Mayor Nevill stated that Councilmen Semple could motion to remove the item from the consent agenda.

Councilmen Semple stated that this is the action he would take at the evening meeting.

**6. Approval of September 13, 2022, Town Council Meeting Minutes.**

Mr. Martino introduced the final measure on the consent agenda to approve the minutes from the September 13<sup>th</sup>, 2022, Town Council meeting.

Mayor Nevill mentions the proclamation to designate 21 Main St as the Municipal Building for Warrenton, VA. Mayor Nevill announces the meeting adjourned at 1:15 PM.

---

**REGULAR MEETING – 6:30 PM**

Mayor Nevill called the meeting to order stating a quorum was present.

Councilmen Heroux stated he was at 12 Watts Landing, New Hampshire, participating electronically because of family medical care that prohibited him from attending.

**INVOCATION.**

Pastor Hackett led the invocation.

**PLEDGE OF ALLEGIANCE.**

Mayor Nevill asked the attendees to remain standing and recited the Pledge of Allegiance.

**CITIZEN'S TIME.**

Steve and Anne Wojcik, 621 Old Meetze Rd, spoke regarding a noise from a proposed data center and the 2040 plan.

Dale Browne, 10517 Winged Elm Cir, Manassas VA 20110, president of an HOA, spoke regarding data centers in Prince William County.

Eric Gagnon, 200 Winchester St, spoke regarding noise pollution from a proposed data center.

Mike Fox, 7241 Hastings Ln, spoke regarding zoning ordinances.

Denise Schefer, 6080 Whippoorwill Dr, spoke regarding noise pollution from a proposed data center.

Christina Gagnon, 200 Winchester St, spoke regarding a proposed data center and virtual private networks.

Cynthia Burbank, 6347 barn owl Ct, spoke regarding a car accident and a proposed data center.

Josephine Gilbert, 5273 Ambler Dr, spoke regarding an ordinance allowing Black Lives Matter demonstrations in Courthouse Square.

Dr. Jean Carroll Buzby, 8425 Buckland Mill Road, Gainesville VA 20155, spoke regarding a proposed data center and potential future data centers.

Owen Schefer, 6080 Whippoorwill Dr, spoke regarding a proposed data center.

Amy Trotto, Broad Run spoke regarding SUP 2022-03, timelines, John Foote, Denise Harris, and Town Manager Martino.

Dale Sites 6642 Riley Rd, spoke regarding a proposed data center.

David Gibson, 754 Fox View Dr, spoke regarding the Warrenton Training Center, noise pollution, and a proposed data center.

Yakiir Lubowsky, 448 Devon Dr, co-founder of Warrenton Honest Government League, spoke regarding procedures and a proposed data center.

Sally Burke, 155 North View Cir, spoke regarding a proposed data center.

Tim Hoffman, 4191 cray Dr, Vint Hill, spoke regarding petitions against a proposed data center.

Ken alm, 194 culpeper st, spoke regarding a proposed data center.

Barbara Amster, 726 Acorn Ct, spoke regarding a special use permit.

Ann Zigler, 5577 Old Bust head rd, spoke regarding an online article.

Jennifer Dorrer, 6064 whippoorwill dr, spoke regarding procedures and about questions they had regarding a proposed data center.

Erin O'Donnell, 52 Blue Ridge St, spoke regarding local businesses and a proposed data center.

David Fox, 257 Hidden Creek Ln, spoke regarding representation.

David Daubert, 727 arbor ct, spoke regarding noise pollution from a proposed data center.

## **APPROVAL OF THE AGENDA.**

Vice Mayor Hartman motioned to approve the agenda as presented. Councilmen Hamby seconded. There was no discussion. The vote for the motion was unanimous, as follows:

**Ayes: Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin**

*Nays:*

*Abstention:*

*Absent:*

**The agenda was approved as presented.**

## PUBLIC HEARINGS.

1. **Ordinance to amend Article I of Chapter 10, Section 10-5 of the Code of Ordinances, Town of Warrenton, VA (1991) as amended, related generally to speed limits.**

Mayor Nevill declared a five-minute recess at 7:40 PM.

The Council reconvened at 7:47 PM.

Mayor Nevill opened the public hearing at 7:48 PM. Mayor Nevill introduced Mr. Francis as an applicant requesting a speed limit change.

Mr. Francis thanked the Council and Major Carter for working with the school and stated that he represented St. John's school. Mr. Francis stated that distance was the reasoning for a lack of school-zone on Winchester St.

Mayor Nevill closed public hearing at 7:51 PM.

Councilmen Heroux motioned to approve the ordinance. Councilmen Polster seconded. Mayor Nevill opened the floor for discussion.

Councilmen Hamby asked Mr. Francis if the church was content with a school zone only on John E. Mann St.

Mr. Francis stated that the St. John's was comfortable with reapplying for a Winchester St. school zone in the future.

There was no further discussion.

The motion passed unanimously:

**Ayes: Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin**

*Nays:*

*Abstention:*

*Absent:*

## CONSENT AGENDA.

Councilmen Hamby motioned to approve the consent agenda as presented. Councilmen Carlos seconded. There was no discussion. The vote for the motion was unanimous, as follows:

**Ayes: Mr. Renard Carlos; Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Mr. Sean Polster; Mr. William Semple; Ms. Heather Sutphin**

*Nays:*

*Abstention:*

*Absent:*

**NEW BUSINESS.**

1. **Resolution Ad Authorization Amazon SUP 2022-03** – To permit staff to advertise based on the outcome of the December Planning Commission meeting. If the Planning Commission votes, the staff would advertise for a public hearing. If the Planning Commission fails to vote, the Council requests deferral; if the applicant consents, there will be no public hearing.

Vice Mayor Hartman motioned to approve the resolution. Councilwoman Sutphin seconded. The mayor opened the floor for discussion.

Councilmen Semple spoke about the wording of the resolution. Councilmen Semple stated that the Planning Commission did *not* postpone the resolution indefinitely in November; this is not a zoning amendment; and that processes apply to the staff review as well. Councilmen Semple expressed that the Planning Commission acted reasonably.

Councilmen Carlos stated that he shares concerns with Councilmen Semple and asked for clarification on actions taken if the Planning Commission does not act in December without consent from the applicant.

Mr. Crimm affirmed that the Council would move forward if the applicant does not consent.

Councilmen Carlos asked about similar situation in Virginia history.

Mr. Crimm stated that he could not find similar circumstances but emailed colleagues who affirmed that it would be appropriate to move forward without the suggestion from the Planning Commission in such a case.

Councilmen Semple stated that he looked at several planning commission Supreme Court cases with none expressing a similar authority as to what the Council was taking.

Councilmen Polster asked why this resolution needed to be passed that night.

Mr. Crim stated that it did not need to be passed at all.

Councilmen Polster clarified that this was a proactive approach.

Mr. Crim stated that this was a discretionary act.

Councilmen Polster asked about liability if the resolution was not passed.

Mr. Crim stated that there were few liability concerns, but the applicant had asked for this to be heard at the January Council meeting.

There was no further discussion.

The motion passed 4-3, the vote was as follows:

**Ayes:** Mr. Brett Hamby; Mr. James Hartman; Mr. John Heroux; Ms. Heather Sutphin  
**Nays:** Mr. Renard Carlos; Mr. Sean Polster; Mr. William Semple  
**Abstention:**  
**Absent:**

---

### TOWN ATTORNEY'S REPORT.

Mr. Crim spoke about a newspaper report about a potential Freedom of Information Act lawsuit from Citizens for Fauquier County which had not yet been filed.

Additionally, Mr. Crim commended Chief Kochis and said it had been a pleasure to work with him.

### TOWN MANAGER'S REPORT.

Mr. Martino stated that he had offered, and Major Carter had accepted the role as Acting Police Chief with the departure of Chief Kochis.

Mr. Martino referenced an event from the previous week that commemorated Town Staff, and thanked two councilmembers for attending. Mr. Martino referenced 22 nominees for and the individuals who were awarded "Employee of the Year," the winners being Steven Bruck, the Transmission and Distribution Team of the Utilities Department, Lyndie Paul, and Brandon Wagner.

### COUNCILMEMBERS TIME.

**Councilwoman Sutphin**– Stated that she had received threats from individuals and was at a loss for words that the large crowd had left immediately after the citizen's time. She stated that items being thrown at her would not be tolerated again. She stated that people have been extremely disrespectful and threatening. She defended the members of the Council, the Mayor, police officers, and the Interim Town Manager. She expressed a right to safety, opinions, and ability to vote. She wished luck to Chief Kochis and thanked first responders who helped her husband who was injured.

**Councilmen Semple** – Stated that respect towards council is necessary and was not being shared expressed by everyone. He referenced the "golden rule." He commended Councilmen Carlos and wished him well in the future. He wished Chief Kochis luck in the future.

**Councilmen Hamby** – Mentioned Mr. Greenstreet and Sean. Congratulated Chief Kochis and Major Carter. Wished 'happy holidays' to all in attendance. Recognized that some topics have become contentious but wished that people would remain kind. Recognized milestones some Town-workers had achieved in length-of-service.

**Vice Mayor Hartman** – Thanked Town employees and recognized difficulties that some Town staff had gone through in recent times. Reiterated others' statements about Chief Kochis and

that he looked forward to working with Major Carter. Stated 'happy holidays and merry Christmas'.

**Councilmen Heroux** – Thanked people for making these meetings possible. Thanked Sean and Rernard for making positive differences and wished them the best in their future. Reiterated others' statements regarding Chief Kochis and Major Carter. Congratulated the 22 individuals who were nominated for employee of the year. Mentioned Mr. Francis and thanked him for his work on the Winchester St speed project. Mr. Heroux also mentioned the Town's audit results and thanked the Town's Finance Department. Thanked Mr. Cassidy for the information he gave about water treatment. Mentioned a memorial hockey tournament at the WARF. Mentioned future issues. Asked citizens to remain kind, specifically mentioning the homeless.

**Councilmen Carlos** – Thanked the other Councilmembers and stated that it was a pleasure to work with them. Thanked the Town staff. Wished 'happy holidays'.

**Councilmen Polster** – Stated that he served on the Council for his family, and that he served because of his wife, thanking her. He recognized the Town staff for making sure the Town's goals were accomplished. Referenced policing, farmer's markets, camping, water drainage, and contentious conversations.

**Mayor Nevill** – Thanked Councilmen Carlos for 'challenging race' and making history; and thanked Councilmen Polster for 'creating a challenge'; and wished them best in their future. Emphasized the benefits of kindness.

---

## ADJOURNMENT.

**With no further business, this meeting was adjourned at 8.:30 pm on Tuesday, December 13<sup>th</sup>, 2022.**

**I hereby certify that this is a true and exact record of actions taken by the Town Council of the Town of Warrenton on December 13<sup>th</sup>, 2022.**

---

**Subject:** RE: August 23rd Planning Commission Work Session

Good evening John and Jessica,

I appreciate your offer to advance the conversation verbally next week. However, as no updated information or balloon test has been provided since the last work session, the Chair and Vice Chair are not inclined to schedule the SUP for Amazon on the work session agenda Tuesday. The Planning Commission and staff need adequate time to review any new materials properly submitted both through Open Gov and in hard copy

to ensure the work session is productive. When materials are provided we will route to the Planning Commission members and assess potential next steps for September.

Thank you.  
Denise

Good morning John!

We are getting asked daily if there are any updates on the SUP for Amazon. I need to take the work session agenda live today with materials and give an update to the PC tonight at their meeting. Is Amazon proceeding next week and do they have updates for us to post?

Thanks!!!

Denise M. Harris, AICP  
Planning Manager  
Town of Warrenton

**Subject:** August 23rd Planning Commission Work Session

Good afternoon John and Jessica,

Will the Amazon applicant be submitting any new materials for the August 23<sup>rd</sup> PC works session? There were statements made verbally and wondered if anything was going to be submitted. Staff will be taking "live" the agenda next Tuesday. There were a number of requests/questions at last month's PC work session, including:

- 1) Schedule a balloon test and let the PC know before it occurs.
- 2) Provide the Landscape Plan and Tree Survey.

- 3) Elaborate and document the water usage.
- 4) Invite PC members to visit site.
- 5) Questions about elevations and height.
- 6) Noise generation
- 7) Lighting impacts
- 8) Relationship with Dominion, power needs, and phasing
- 9) Planned Community Outreach, if any
- 10) Relationship with Comprehensive Plan
- 11) Soils and potential for blasting
- 12) Explanation of emergency plans and how potential leaks are contained
- 13) Misc.

Thank you,  
Denise

Denise M. Harris, AICP  
Planning Manager  
Community Development Department

You know your Planning Commissioners, they have over 50 years of combined service in planning on behalf of the Town and have worked on hundreds of applications. Has the PC EVER made a unanimous recommendation to return an application to the applicant because the level of misrepresentations and omissions of data before them prevented them from doing their job? Have They? Maybe Mr. Martino, Mr. Crimm and Mr, Herioux don't know the answer, but it is NO. Doesn't the fact that they reached this conclusion, and that for months the citizens have been raising the irregularities with the application to your attention, raise a red flag that maybe something is not right here?

Perhaps before the Town Manager publicly humiliated and decried the PC, their authority and their decision in a Press Release, a little research and investigation should have been made to determine why the PC found what they did. Perhaps the same applies to the Mayor, who should support the PC instead of characterizing them as needing to be reined in and put back on track? And perhaps the Planner Denise Harris should not have the authority to ignore the PC decision, and continue after the PC decision to work with Amazon to advance the Application to the TC, asking them to advise what they "desire for next steps". Ms. Harris is referring as to whether they want to be placed on Town Council's December 2022 public hearing or January 2022 public hearing. Luckily for you all, Amazon preferred the 1/10/23 public hearing, but it sure would have been interesting to see what maneuvers would have been cooked up to make the Dec public hearing happen.

All of this things should be raising red flags that there is something irregular going on with this application and your Staff, and perhaps you should let the PC do it's job, and you should start doing yours.

*The*  
I ~~was~~ attended the WS and thought we ~~should~~ <sup>Give Documents</sup> have here about the status of the SUP APP, but the TM can't provide any <sup>Info on</sup> record <sup>ANSWER</sup> that was before the PC or why they did what they did.  
I only have 3 minutes and can't possibly address the laundry list of misrepresentation + omissions <sup>by</sup> Amazon's during the PC process that was before the PC on 11/15 + 11/22/22. I was surprised that at the WS that was to address the status of the Amazon's SUP, that the only topic planned was how to ensure the App is set for public hearing. I was also surprised that the TM had no information about the missing info + misrepresentations, esp b/c he has decried the PC's <sup>their</sup> authority and their decision in a press release. ~~Denise Harris To assist~~  
I want to give you 3 emails - 1 Aug where

I give you

- Attended + that we'd hear status of the APD
- Instead all we heard was how to ensure this gets before the TC's public hearing on 1/20.
- I only have 3 mins + can't address the laundry list of omissions + misrepresentations ~~that fit the~~ before the PC when it reached its decision

~~I was surprised the TM had no info about the~~

- Give 8/ cant attend 13
- 9/ deferral

11/28/28 Email @ exchange from Deise Hams + John Foote.

I'm also very surprised no info on the

The lack of transparency of correct and complete information that surrounds the Amazon data center process and application is outrageous, and we witnessed that at your work session today. Besides Dominion's presentation, You were to discuss the status of the SUP Application, but all the Town Manager, Town Attorney and Mayor wanted to address was how the Town can manipulate the timing to get the Amazon application properly noticed for the Jan public hearing. They didn't have any information about the status of the SUP at all – and couldn't answer one question as to why the Planning Commission acted the way they did. Perhaps Ms. Harris should have been prepared to answer your questions fully. Here's here August 11, 2022 email to Amazon outlining materials needed before she will agree to schedule the application for the August 23 hearing.

Balloon Test - used wrong height  
 Landscape Plan and Tree Survey  
 Document water usage  
 Site visit  
 Elevations and Height questions  
 Noise Generation  
 Lighting Impacts  
 Relationship with Dominion, power needs and phasing  
 Plannined community outreach if any  
 Relationship with Comprehesive Plan  
 Soils and potential for blasting  
 Explanation of emergency plans and how leaks are contained

Of those, only 2 of those – the a balloon test, which used the wrong building height and therefore is useless, and the Applicant's position on how this use aligns with the Comprehensive Plan, had been addressed as of 11.15.22. The Tree Study is out of date, the noise study, after John Foote admitted to making misrepresentations to the PC as to it's contents and conclusions, has been withdrawn as out of date and no numbers on noise and vibration from the Applicant are known at this time. In fact, Foote has said and Staff confirms in its report that "Compliance with the Noise Ordinance cannot be confirmed", because the application is under Agency Review for interpretation of the noise ordinance as it applies to this Data Center application. Although a soil study has been submitted, the extent of blasting required has never been addressed. There have been no objective documentation on water or sewer usage, or stormwater calculations, and none of the information from Dominion that you spent an hour on today has ever been presented to the PC – they were told on 11/15 that theres no on-site substation, but no information on where was available, and where the power lines will go, we don't know, it's not our decision. I think you would agree those have impacts to the Town residents that are relevant to this Application, and should be determined before the impacts can be evaluated?

I attended today's WS and that we'd have about  
the status of the WS - but all that was planned  
was how to manipulate the timing to ensure it  
gets set for TC public in Jan. I'm surprised  
the TM edit answer any Qs.

To Heather Sutphin, Town Council Member representing Oak Springs, Coppermill, North Rock, and Highlands –

Heather - We are relying on your vote to reject the proposed Amazon Data Center that would harm our neighborhood so drastically. We are all residents of your ward who are very upset that consideration of the DC has even gone this far. The noise alone of existing data centers in Prince William is making residents ill and Amazon has offered no remedy except yoga mats and bungee cords – which are NOT working. We would be subject to the same noise 24/7, 365 days/ year of constant noise and the same debilitating symptoms.

Further, as a Realtor, you surely realize that the projected harm to the value of our townhouses would be substantial, perhaps over \$85,000 each in lost value. Why would you allow this to happen? As two speakers said at a recent Town meeting on Nov 15:

"So who's gonna buy a home that is subject to constant noise and vibration 24/7, 365 days a year?"

Albert Mudrian

"I went and listened at night to one of the data centers and I was horrified."

Barbara Amster

We elected you to represent us, and you appear to have the swing vote, on which the outcome will rest. You will determine our fate.

**Please say that we can trust you to protect us from this very harmful proposal. Vote NO on the Special Use Permit.**

## WARRENTON TOWN COUNCIL

December 13, 2022

Good-evening Mayor, Council Members, community members. My name is Josephine Gilbert and I live in the Scott District.

I've not heard a response from the administration on questions I have about the newly updated Ordinance Special Events. Police Chief Kochis tried to meet with me to answer questions I posed to the Town Attorney per Mr. Martino's recommendation. So here we are.

Two comments.

1. Isn't there a process for citizens to get clarification on an ordinance the town passes? How do you expect the citizenry to abide such ordinance?
2. We now know that BLM has a Warrenton Chapter. The Charlottesville administration leadership said so to the media. Knowing this, isn't time to shut this Saturday morning takeover of our Court House Square?

Do we need our Christmas festivities blemished by this racist organization? I sent you pictures of the Fire Truck with Mr. and Mrs. Claus and a BLM sign. Our Director of Experience Old Town was also sighted at the Gum Drop Square event.

You're providing the space, public safety expenses and declared support. A change in the police department's leadership may be the catalyst. I am hopeful.

Merry Christmas

**Ms. Harris – I have just had my client confirm that it would prefer that the Town Council schedule a public hearing on this application on January 10, 2023. Under the circumstance, it would not seem necessary to set a public hearing on December 13<sup>th</sup>.**

**John Foote** - Shareholder

Good afternoon Mr. Foote,

Please advise the Town on the applicant's desire for next steps regarding SUP 22-03. Below is the draft language for the legal ad. Please review and submit the applicant's desire before COB today.

**Special Use Permit (SUP) 2022-03 Amazon Data Center** – the owner/applicant Amazon Data Services, Inc., seeks a Special Use Permit under Article 3-4.12.3 of the Zoning Ordinance for an approximately 220,200 square foot data center on industrial zoned parcel consisting of approximately 41.793 acre parcel identified as GPIN 6984-69-2419-000. Designated in the New

Town Character District on the Future Land Use Map located off Blackwell Road and Lee Highway. The owner/applicant is requesting modifications for building height allowance and fence height allowance as part of the Special Use Permit.

Many thanks!  
Denise

Denise M. Harris, AICP

Warrenton, Oregon is a small town located in the Willamette Valley. The town is known for its historic architecture and scenic views of the surrounding hills. The town is home to several historic buildings and a large park. The town is also known for its annual "Warrenton Days" festival, which is held in the town square. The town is a popular destination for tourists and is a great place to visit for anyone looking for a peaceful and scenic getaway.

# How will PWC protect Great Oak residents from 3 noise sources??

**GLEN GERY BRICK PLANT DATA CENTER**

- 9905 Godwin Drive
- Removal of eight existing structures and replace with proposed data center
- Site Plan Under Review
- Existing building demolition and site clearing; anticipated start end of 2022
- Noise study and mitigation plan will be submitted with the building plans and shared w/Great Oak

**10000 Brickyard Way**

- Building A1 - 54' tall, footprint = 223,820 SF, 2-story
- Building A2 - 54' tall, footprint = 184,660 SF, 2-story
- Building B1 - 54' tall, footprint = 223,820 SF, 2-story
- Building B2 - 54' tall, footprint = 184,660 SF, 2-story
- Additional substation planned

George C Round Elementary School  
Kings Landing – 28 Townhomes  
**Church of Latter-day Saints (LDS) Lot**

**AWS Tanner Way**

- 4 buildings, 820,000 SF, 1-story

Cloud HQ Site

## Great Oak

Once a property has an entitlement, rezoning, SUP or by-right zoning, all they need is a site plan and a building permit. They have to develop within the parameters of the entitlement. If they want more than what is allowed in the entitlement, they either ask for a proffer/SUP amendment or a variance. They can sometimes get notifications or waivers through the site plan for site development standards.

### PETITION TO PROTECT FAUQUIER COUNTY AND THE TOWN OF WARRENTON

The Town of Warrenton and Fauquier County residents, property, and business owners signing below:

**OPPOSE** Amazon’s Blackwell Road Data Center and application, and any future data centers at Warrenton's Gateways, and **RESPECTFULLY REQUEST** the Warrenton Town Council to **DENY** Amazon’s application; and

**OPPOSE** Dominion Energy’s Blackwell Road substation, and **RESPECTFULLY REQUEST** the Warrenton Town Council to **DENY** Dominion’s future application for a substation; and

**OPPOSE** Dominion Energy’s new power lines to Dominion/Amazon’s Warrenton site, and only if approved, support participation in Virginia’s pilot underground transmission program to bury all transmission lines.
