11 MR. HAMBY: I understand.

12 MR. MCGUIRE: That's the dangerous slippery  
13 slope we should all agree we're going down.

14 MR. HAMBY: But I'm also saying that they're  
15 standing here before us and they're agreeing to terms of an  
16 SUP. Now, whether you think they'll follow it or whether you  
17 think they won't, I understand, it's like that with everybody  
18 who walks in here. I had a lost sleepover, Chick-Fil-A's  
19 Drive-Thru, we had to do SUP. But most people comply. I  
20 mean, they do.

21 And if they want to be poor business partners,  
22 I doubt that they would continue to be running the business

1 that they're doing. Not saying they're perfect, and I'm not  
2 sticking up for them, don't throw me in that group, but they're  
3 a fairly substantial, respectable company on the face of the  
4 earth and in space. So...

5 MR. SEMPLE: Well, may I ask the question  
6 again? I asked Amazon earlier, has there ever been a  
7 compliance action where a data center was shut down? And the  
8 answer was they didn't know of any. And so this is what I  
9 call an instance of the first impression. We will be the  
10 first in the country to set up a situation like this, which  
11 when it's first tested, will be a novel experience for  
12 everybody involved.

13 And I am just concerned that I understand this  
14 -- that this is why I think whether you -- no one seems to  
15 get the sense, there's no agreement with this, but I think  
16 we need to really understand and actually investigate similar  
17 circumstances like this in other communities, in other  
18 municipalities, which give us confidence that this will work.

19 I don't see any reason -- you're talking about  
20 we hope there'll be good citizens. Well, let's -- we can --  
21 if we think that will help us enforce this, let's put that  
22 in the application. Let's put that in a draft conditions of

1 approval and we'll check out to see if you're a good citizen  
2 or not.

3 I mean -- so my concern is and I like what  
4 Councilman Heroux has suggested in terms of narrowing this  
5 down. But I think that as we do it, we should take the time,  
6 and not try and legislate this from here on the bench amongst  
7 each other on the issue as complicated as this. Thank you.

8 MR. MOONEY: Mr. Mayor.

9 MR. NEVILL: Mr. Mooney.

10 MR. MOONEY: Is it my understanding that if it  
11 was 60 yards east, that the county ordinance would be burying  
12 transmission lines; is that correct?

13 MR. NEVILL: Right.

14 MR. MOONEY: But in the town, they don't have  
15 to be buried by ordinance.

16 MR. NEVILL: For SUP in the town the county has  
17 by-right.

18 MR. MOONEY: Right. So they could go out  
19 there, but then they would have to bury the transmission line.  
20 I'm just asking the question.

21 MR. NEVILL: No, they wouldn't have to.

22 MR. MOONEY: All right. My second -- my next

1 thought process is if Amazon has agreed to do a 48-hour noise  
2 study, that's great. What happens when every -- what happens  
3 when they fire up their generators to test them and then they  
4 fail because they keep firing up their generators that don't  
5 pass the noise ordinances? How is that taken into  
6 consideration in our conditions?

7 MR. NEVILL: Failure to comply with the noise  
8 ordinance results in a denial of occupancy.

9 MR. MOONEY: So are we going to just  
10 continually deny their occupancy because we don't have  
11 anything about the generators in here? I'm just asking.

12 MR. NEVILL: Well, the generators, what  
13 you're speaking about.

14 MR. MOONEY: Yes, Mr. Mayor. So, like with  
15 the gap, they have to test the generators. And if we set the  
16 noise ordinance and they fire up the generators, they're going  
17 to fail the noise ordinance and then we're going to shut them  
18 down.

19 But they're not going to shut them down if they  
20 have certain clients already in their stacks, they're not  
21 going to shut it down. But how do -- how is that -- is it  
22 -- that's not in the condition while they're doing this. I

1 just figure we should probably have something in here about  
2 the generators because they're going to fail.

3 MR. HAMBY: Isn't the noise ordinance  
4 connected to the property itself? Or we don't differentiate  
5 between the chillers on the roof and the generators on the  
6 ground, do we? Noise.

7 MR. MOONEY: There's noise?

8 MR. HAMBY: You're either compliant or you're  
9 not, correct? So if it's a generator test or it's a chiller  
10 on the roof, they are still required to comply by the  
11 ordinance.

12 MR. MOONEY: Okay.

13 MR. HAMBY: Mr. Mayor, can we hear from the  
14 applicant?

15 MR. NEVILL: Yes. Is someone from the  
16 applicant, Mr. Foot, or someone from -- Mr. Reinke. Ms.  
17 Harris, have you had a chance to review the request for the  
18 amendment to 17B or 17C?

19 MS. HARRIS: Yes. We're working on it right  
20 now and I'm going to try to get it in the PowerPoint so everyone  
21 can see it at the same time.

22 MR. NEVILL: Okay.

1 MR. FOOTE: Good evening, Your Honor. It's  
2 nice to see you this morning. Oh, wait. We're still in this  
3 evening here. As you know, my name is John Foot. I'm with  
4 Walsh Colucci Lubeley & Walsh, and I do represent the  
5 applicant in this case. I did not have a chance earlier today  
6 to personally say welcome to Mr. McGuire and to Mr. Mooney.

7 I have a -- I guess I have a certain proprietary  
8 interest in that. I've been working in this town for more  
9 than 30 years now, so -- and I've had -- made a lot of friends  
10 out here, and I thoroughly enjoy working in this community  
11 and I'm able to still work here for some reason. So I'm  
12 pleased to be here to talk to you about this.

13 I've been here long enough to have  
14 participated, not as the client or representing anyone, but  
15 I was here at the Walmart fight, that you may recall some years  
16 ago. It was a little less heated than this, but not a whole  
17 lot less heated than this, as you may recall. And I can  
18 remember statements made at that hearing that it is the end  
19 of Warrenton if we approve the Walmart here. Well, somehow  
20 it wasn't the end of Walmart.

21 One of the unenviable tasks of my job is to  
22 advocate for the future. We're not here yet, but someone has

1 to speak for the future. And I'm pleased to do so in a  
2 community that has shown me great courtesy over the years.  
3 The future, unfortunately, tends to be threatening to people  
4 who don't see it coming, or don't want to have it arrive. But  
5 it's here, it's coming.

6 One of the reasons it's coming is because of  
7 us. The demand -- the -- what appears to be the almost  
8 insatiable demand for data centers is us. There are  
9 obviously customers that may be using something like what this  
10 company is about to build if it's approved.

11 But if you put a 50 meg -- 50 kilobyte  
12 photograph on your phone, and if you put that on your Facebook  
13 and it gets 100 likes -- and that gets 100 likes and it gets  
14 shared, suddenly your 50 kilobyte photograph is two  
15 megabytes. Guess where that goes, it goes into a thing called  
16 the Cloud.

17 Well, what are data centers? It's the Cloud.  
18 And that two megabytes never goes away because nobody ever  
19 deletes it. You don't empty your photographs and you don't  
20 scrub your material out of the data centers. And so it's  
21 still sitting there in a data center, probably not, or maybe  
22 not owned by my client, but by iCloud, or Iron Mountain, or

1 someone.

2           There's a data center out there and the demand  
3 for it is driven by us. It's driven by the government, it's  
4 driven by the department. In fact, the fact that the  
5 Department of Defense made a decision some years ago, not too  
6 many years ago, that it couldn't keep up with the private  
7 sector, and that by going to the Cloud, it could actually  
8 perform more efficiently than it could if it tried to do  
9 internal systems. So it's been moving to the Cloud.

10           It's been suggested with respect to this  
11 application that there are many unanswered questions. Well,  
12 as you know, we had a work session with you lovely folks  
13 earlier today in which many questions were asked and many  
14 questions were answered.

15           Much of that information, if not all of that  
16 information is available online today and has been available  
17 online for anyone who saw -- wanted to see it for weeks, if  
18 not months. For example, there are 32 criteria for the  
19 consideration of the adoption of a special use permit in the  
20 town.

21           There is in the material that you've already  
22 had, a memorandum from me on behalf of my client addressing

1 every single one of those 32 criteria. There are more than  
2 one document in which we address specific questions that the  
3 staff had presented to us during the course of these  
4 proceedings.

5           So what we suggest to you is that it's not a  
6 question of us being non-transparent because we have, in fact  
7 provided a huge -- we, and this is the royal we, I'm only  
8 employed by Amazon, that we have provided an extensive amount  
9 of information to this community and to the council if you  
10 were willing to go look for it because the way it's done in  
11 these processes is both publicly.

12           We were at the Planning Commission, I think  
13 five times of work sessions and public hearings, and yet they  
14 claim that there was insufficient information provided and  
15 yet some of the information they claimed wasn't provided was  
16 a wet signature on a document that's been provided, and  
17 secondly, a lack of a graphic of Route 7 -- Route -- I think  
18 it was Route 29, when in fact the graphic had been shown to  
19 them twice but had not been formally filed because it was still  
20 under revision.

21           Minor revision, but it was still under  
22 revision. It had been shown to the Planning Commission yet

1 somehow that was providing them insufficient information.  
2 So we submit that in fact, a great deal of this information  
3 has been provided and has been available. Basic lesson, and  
4 I suggested this a second ago, but you know, it came up in  
5 one of the first Planning Commission meeting.

6           What is a data center? Well, I thought  
7 everybody knew what a data center was, but let me be clear  
8 that it is nothing more than a building that houses rack upon  
9 rack of computer servers, which are nothing but computers that  
10 process and store data that is accessible to you and other  
11 customers, and it is the Cloud.

12           Now, my wife who has a Doctorate, thought the  
13 Cloud was a cloud. It was up there somewhere until there  
14 showed up data centers in Prince William County, in Loudoun  
15 County. But that is where information that we choose to store  
16 is actually going.

17           I want to mention a few major points, and we  
18 have a small presentation on (inaudible) way, because I know  
19 you want to hear from the rest of the folks are here. This  
20 facility does not use your public water for cooling. It is  
21 a system that is a closed loop system in which water is mixed  
22 with glycol and that is not replenished as you heard this

1 morning.

2           It'll require 190,000 gallons of water over  
3 the three to seven years it's going to take to fill out the  
4 facility, that's one half -- less than one half of the water  
5 that's in the war facility today. If you -- or in order to  
6 use public water, the billing would have to be redesigned and  
7 rebuilt. And that's not going to happen because we have a  
8 conditional use permit, a special use permit, that gives you  
9 the design that is actually going to be constructed.

10           Landscaping and buffering of this project is  
11 significant as we have been shown. And based on the  
12 conversation we had this morning is -- has -- is, has been,  
13 and will be enhanced, and the architecture has been revised  
14 to increase visual quality of the building, although I think  
15 there may be an option here that folks on the council might  
16 have liked better in a previous version.

17           The elevation from Route 29 will now include  
18 additional plannings that have been agreed to, but we can't  
19 provide you a physical graphic of that. So it -- it's been  
20 part of a condition here because it takes hours to redo those  
21 graphics that Mr. Hall from Corgan prepares for us.

22           The facility, as you have just spent some time

1 discussing requires -- meets -- has to meet the requirements  
2 of the town's noise ordinance. Now, part of the discussion  
3 that we all just heard with respect to enforcement of it goes  
4 back to a question that one of the members of council asked  
5 about, has you -- have you ever been charged with  
6 non-compliance?

7 Well, the other question was, have you ever  
8 been accused of non-compliance and never got asked? We're  
9 not aware of any situation in which we've been accused of  
10 non-compliance. For example, in the circumstance in Prince  
11 William County, the circumstance there is a situation in which  
12 that facility is actually in compliance with Prince William  
13 County's noise ordinance.

14 It's not working well enough, and that's  
15 absolutely true and it's being addressed, but it is in  
16 compliance with the noise ordinance. So to suggest --  
17 because the implicit suggestion we hear is that a corporation  
18 like this corporation might, if somehow it were subjected to  
19 enforcement of a conditional use permit, thumb its nose at  
20 any jurisdiction, be it New York City or Warrenton, and say,  
21 Well, you know, the door's closed, we got a guy with a gun,  
22 and so don't you come in here. We're going to ignore you and

1 we're going to not follow the law.

2           That takes some gall to suggest, in my  
3 judgment. It's just not what a corporation like this does  
4 because this corporation has built its reputation into being  
5 one of the most remarkable companies in this country. The  
6 site produces no revenue for the town today.

7           Hundred dollars -- I think it pays \$500, maybe  
8 it's up to 13 or 14,000 now based on the increased value of  
9 the property as a consequence of the acquisition of the  
10 property by Amazon. Now, there was a discussion today about  
11 the Warren Green Project that has been presented by the  
12 Weisberg Companies some time ago as a potential option, a  
13 multi-use option for the property.

14           Well, the fact of the matter is that was  
15 proposed by the Weisberg Companies, as you know. Guess who  
16 sold the property to Amazon, it's the Weisberg Company. And  
17 consequently, Weisberg has given up on the proposition of a  
18 multi-use development on this property, and has sold it to  
19 someone else.

20           And why does it pick -- why is it here?  
21 Because this is industrially-zoned property. It's -- it  
22 makes perfectly good sense from the perspective of a company

1 that looks for industrially-zoned properties, and has -- as  
2 it said to you today, use that as one of the major factors  
3 in site selection.

4           This comp -- this site will produce income for  
5 the county and the town and your own staff suggested to you  
6 today that it will produce approximately 1 million to \$1.3  
7 million for you over a four-year period of time. That's for  
8 the town. Amazon's own numbers are a little bit lower than  
9 that, but it does suggest that that's going to occur. You'll  
10 get that money.

11           And the other thing that you heard was, there  
12 will be approximately two million dollars to the county. The  
13 last I heard, the children of Warrenton are educated in county  
14 schools. That money will in fact be useful for the county  
15 as well as it will be for the town.

16           There was discussion about how the servers  
17 depreciate over time. Well, yes, but you also heard that the  
18 revenue will come in waves because these servers are replaced  
19 every five to seven years, which means the value of them goes  
20 back up to new material after that period of time. Something  
21 that I've discussed with Mr. Martino. Let me throw you --  
22 run you through the few slides and I'll quit. Where are the

1 -- where's the little -- oh -- the -- it's on here.

2 MS. PFEIFFER: John.

3 MR. FOOTE: Oh.

4 MS. PFEIFFER: We actually just received the  
5 conditions probably I would say at 5:30 p.m. today, maybe  
6 5:00 p.m. We were wondering if after this public hearing,  
7 if we could then take some time to take a look at those  
8 conditions and provide feedback. We heard the feedback on  
9 the noise condition and we can certainly take a look at it,  
10 bring it back and give feedback to Denise on those conditions.

11 MR. FOOTE: In fact, we can -- might even be  
12 able to do that during the course of your continued public  
13 hearing. The reason I -- we both agree about that is because  
14 there's a general agreement on our side that the conditions  
15 make sense. There are parts of those conditions which are  
16 practically difficult for -- to be complied with.

17 For example, the request that a site plan be  
18 provided for each technological phase, well, Amazon doesn't  
19 provide that information publicly. It's actually exempt  
20 from disclosure by state law under the Freedom of Information  
21 Act.

22 Now providing a site plan that talks about

1 compliance with the requirements of your ordinance, that's  
2 a different thing than providing internal plans. So that  
3 just is a detail, but we'd like an opportunity to discuss it.  
4 And then also to make sure we fully understand your discussion  
5 about enforcement of the noise ordinance.

6 Because as I have said here before, and as Jay  
7 -- Mr. Reinke has said before, Amazon will comply with your  
8 noise ordinance. It will comply with your noise ordinance.  
9 And if it doesn't, it will accept the proposition of a temp  
10 -- of removal of its certificate of occupancy. It's been said  
11 publicly by me and by Mr. Reinke on behalf of the company  
12 because we believe we can meet it.

13 MS. PFEIFFER: But let us take a look at the  
14 details and get that back to you if we could after the public  
15 hearing tonight prior to the next meeting.

16 MR. FOOTE: All right, let's --

17 MS. PFEIFFER: Actually, what --

18 MR. SEMPLE: Mr. Foote, I don't mean to  
19 interrupt you --

20 MR. FOOTE: I'm being told by somebody here I  
21 got to listen to --

22 MR. SEMPLE: I'm wondering if I could ask some

1 questions.

2 MR. FOOTE: All right. I'm effectively  
3 through with my presentation rather than waste your time on  
4 this. Your Honor, I'm done. I'm done.

5 MR. SEMPLE: Mr. --

6 MR. NEVILL: Do you have other questions  
7 (inaudible) question we've already done.

8 MR. HAMBY: Tell us again what you're asking  
9 for. I want to understand. You're going to review --

10 MR. FOOTE: Jessica.

11 MR. HAMBY: -- the conditions that we've  
12 brought forward during the public hearing and then get back  
13 to us?

14 MR. FOOTE: Well, we'd like to work with your  
15 staff even now. We don't know what the council is going to  
16 do. But if the -- if -- let's assume for a moment, an  
17 assumption that we're just making as an assumption. If the  
18 council did choose to vote tonight, then we would like an  
19 opportunity to discuss the issues we might have with the  
20 conditions with your staff.

21 And -- which is common, that's what we all do  
22 in almost every circumstance. They may, or may not agree with

1 us, but we want to know exactly what the council has suggested,  
2 and how they have understood it. Because that's how we have  
3 to live with these conditions. And some we might not be able  
4 to.

5 MR. HAMBY: So are you asking for another 30  
6 days to continue it till next month or what are you asking?

7 MS. PFEIFFER: Yeah, we heard a lot of  
8 feedback on the conditions. We just want to have a chance  
9 to take a look at them, make sure they make sense for the town,  
10 make sure they make sense for us, make sure they make sense  
11 for everyone.

12 And if that's what that means, just because I  
13 don't think we can do this on the fly, and make sure that it  
14 is 100 percent right for everyone, I think that is the best  
15 course of action.

16 MR. HAMBY: So you're asking to hold the  
17 hearing open till February?

18 MR. FOOTE: No, we're not asking you to hold  
19 the hearing open. I think you should go ahead and --

20 MR. HAMBY: You're asking to come back to us  
21 in February with more information.

22 MR. FOOTE: -- but we would come back after we

1 -- I think that's what --

2 MR. HAMBY: Just want to be clear on that. I  
3 know there's some people laughing, but I want to be clear on  
4 --

5 MR. FOOTE: They do that.

6 MR. HAMBY: Yeah. So you want to come back  
7 February --

8 MR. FOOTE: 14th.

9 MR. HAMBY: -- 14th. February 14th. So the  
10 February meeting?

11 MR. FOOTE: That's what I'm told.

12 MR. HAMBY: Okay. Okay.

13 MR. FOOTE: Okay.

14 MR. HAMBY: If they're going to request.

15 Okay. So we'll move on with the public hearing?

16 MR. NEVILL: Let's open the public hearing.

17 MR. HAMBY: Okay.

18 MR. NEVILL: So the applicant actually had a  
19 chance to speak. Ms. Harris, do you have anything further  
20 to add on the presentation?

21 MS. HARRIS: Steven, if you wouldn't mind  
22 bringing up conditions version 2. And can you go to slide

1 5, please. So tried to capture what we just heard. We  
2 revised B so that the first sentence remains, and then we break  
3 out and create a C, which states if the use violates the  
4 section of the zoning ordinance related to noise, then the  
5 applicant shall have 48 hours to mitigate the violation of  
6 the use, or the certificate of occupancy, and its certificates  
7 potentially, if it's based on phasing, are automatically  
8 suspended and the applicant shall cease the use until such  
9 time that the applicant can demonstrate the use meets said  
10 section of the zoning ordinance.

11 MR. NEVILL: Okay. Does that meet the intent  
12 of your request?

13 MR. HAMBY: I believe so.

14 MR. HEROUX: Mr. Mayor.

15 MR. NEVILL: Mr. Heroux.

16 MR. HEROUX: I believe it is, but I just want  
17 to make sure what I hear -- what I think we're saying now is  
18 the applicant is asking for 30 days to review these terms and  
19 conditions that we've reviewed here or discussed here, and  
20 at the next meeting wants to discuss them with us again. You  
21 do not want to review these tonight. Is that my  
22 understanding?

1 MR. NEVILL: Yeah.

2 MR. FOOTE: Yes, that would be correct, Your  
3 Honor.

4 MR. HEROUX: So you want 30 days to work with  
5 us? Mr. Mayor, may I just make a statement?

6 MR. NEVILL: Yes, sir.

7 MR. HEROUX: Folks, I -- with all will due  
8 respect, I would just ask a little -- whether you like it or  
9 not, they're actually a taxpayer in this town just like you.  
10 Okay? They're owed respect and they have rights because they  
11 are a property owner. They're actually the third largest  
12 principal property taxpayer in Warrenton today.

13 MR. NEVILL: Sixth.

14 MR. HEROUX: Walmart's behind them. Okay.  
15 Let's just show some respect so we can get someplace here.

16 MR. FOOTE: I appreciate you John --

17 TOWN CLERK: John. John. John.

18 MR. FOOTE: -- I believe you're aware that the  
19 protocol is always for the best comment to the chair.

20 MR. NEVILL: Yes, sir. So what we're talking  
21 about here is -- okay, I think I got it. Thank you

22 MR. MCGUIRE: Mr. Mayor. Also, just to be

1 clear, according to the town attorney, we need do outs by the  
2 next meeting as to the legality of Virginia Code and  
3 everything else.

4 MR. NEVILL: That's right.

5 MR. MCGUIRE: Okay.

6 MR. NEVILL: So the request is that after this  
7 public hearing this evening, we have discussed additional  
8 conditions. It would give the applicant time to review with  
9 the client and then find that they meet or don't meet their  
10 consideration and that we would then reconvene in -- the  
11 meeting in February to take a vote on the motion or on the  
12 application up or down.

13 MR. MURRAY: And Mr. Mayor just a point of  
14 order, whether in closing, do we necessarily have to close  
15 the public hearing tonight or can we leave it open based on  
16 our discretion? Depending on -- we discussed that this  
17 morning that, that was a possibility that we had reserved  
18 Fauquier High School Auditorium potentially, that we could  
19 continue the public hearing at the same time.

20 MR. NEVILL: Mr. Murray, you can leave the  
21 public hearing open. Okay. So are we ready to open the  
22 public hearing? So before we begin, the public hearing

1 allows each individual speaker three minutes, a speaker  
2 representing a named or established organization is given  
3 five minutes.

4           Each organization may only speak once on the  
5 podium or a speak -- on the podium or a series of lights. When  
6 the lights turn from green to yellow, your time is almost up.  
7 We ask you please conclude your remarks. As other -- please  
8 be respectful to the other speakers that are awaiting their  
9 turn and due to the large amount of speakers, we ask that once  
10 you are done speaking, to consider giving your space in the  
11 room to the people who are waiting, you may exit out the back  
12 of the building enabling a person to enter from the front.

13           This meeting is live streamed on the town  
14 website and a video of this meeting will be posted on the  
15 town's website. Speakers who live in town will be afforded  
16 the opportunity to speak first. After that, all of the  
17 speakers will be called an order of which they've signed up.

18           It is our job to ensure and preserve order and  
19 decorum. We understand there may be strong feelings of  
20 support for some speakers. However, the town council  
21 requests your respect for all speakers time and ability to  
22 communicate without interruption, applause or any other

1 outbursts.

2                   The applicant has had their chance to speak.  
3 And then as you are called forward, please state your name  
4 and your address and I'm sorry Clerk Carl will be calling out  
5 the names of individual speakers and also those who are on  
6 deck.

7                   Again, this is important when we ask for  
8 holding of applause so that those speakers who are on deck  
9 can hear, so they can bring themselves into the room to be  
10 able to speak. So with that at 10:33 p.m. We will open the  
11 public hearing and we will begin with our first speaker and  
12 the naming of the next two on deck.

13                   TOWN CLERK: Mr. Mayor, our first speaker is  
14 Steven Wojcik, followed by Charles Chuck Cross and Rebecca  
15 Cross.

16                   MR. WOJCIK: Thank you. I'm not really going  
17 to take up a lot of time. I had signed up for both because  
18 I wasn't sure when I should speak, but I did want to say, I'm  
19 grateful to all of you for the discussion about the noise.  
20 I raised it at your 10th council meeting initially August,  
21 2021 and there was not much discussion.

22                   I do appreciate also what -- I was at the work

1 session earlier. I do appreciate the additional information  
2 provided by Amazon regarding that as well. So I just wanted  
3 to make that clear that I appreciate your discussion with  
4 respect to and taking the noise issue seriously. I think  
5 that's been well demonstrated.

6 And I also want to just quickly say thank you  
7 to a Councilman Heroux for your response to my question of  
8 the issue that I discussed earlier. I wanted to acknowledge  
9 that and thank you. And also Mr. Semple regarding what I  
10 talked about earlier at citizen time. Thank you.

11 TOWN CLERK: Charles Cross.

12 MR. CROSS: Thank you. My name's Chuck  
13 Cross. I reside at 606 Galena Way in Warrenton. I came here  
14 today I had two pages of a script. I was going to read sort  
15 of a governance 101 lecture I planned to give to the council  
16 but after this discussion I just heard around enforcement,  
17 I just decided to go a completely unscripted direction.

18 So I spent 12 years as enforcement chief of a  
19 government agency, an agency that's way larger than this town.  
20 I led the largest predatory lending case in history in 2002  
21 and then 10 years later was involved in a 25 billion dollar  
22 case against five of the largest banks in this country.

1 I sat here and listened to the naivety around  
2 how enforcement works and I'm telling you, either your  
3 attorney has never done an enforcement case or he is blowing  
4 smoke at you. It will require an injunction against Amazon  
5 to do what you want to do. I don't know if you know what that  
6 involves, but it involves going to court.

7 There's actually three ways you go. You go to  
8 -- you do an administrative enforcement action, you do a civil  
9 enforcement action, you could do a criminal enforcement  
10 action, unlikely -- probably unlikely, sorry, probably  
11 unlikely. It's probably going to be a civil enforcement  
12 action.

13 All right. That means you're going to begin  
14 with an injunction. There's a bunch of tests on injunctions.  
15 Just one of the tests says you have to prove as the plaintiff  
16 that your harm is going to be greater than the defendant's  
17 harm. And I ask you how much harm is involved with shutting  
18 down a giant data center with worlds of information in it.

19 You'll be tied up for years in court over this.  
20 These cases I mentioned a few minutes ago, they took years  
21 and years and years to bring to resolution. Large government  
22 agencies going after corporations, and the idea that Amazon

1 is going to be a good player in this, sure, as was Bank of  
2 America, Citibank, Wells Fargo, Household Finance, they're  
3 always good players when it comes down to losing money.

4           So I just want to close, I'm not going to take  
5 the full three minutes. I just want to close by saying that  
6 what I've experienced here with the town of Warrenton and this  
7 council is you don't have the stomach to enforce your own code  
8 of ethics. So how in the world are you going to enforce this  
9 action against the second largest corporation of the world?  
10 It's not going to happen. You're fooling yourself. Thank  
11 you.

12           TOWN CLERK: Rebecca Cross, Michael Cross,  
13 Mary Gaye Cross.

14           MS. REBECCA CROSS: Good evening. My name is  
15 Rebecca Cross and I live at 606 Galena Way in Warrenton,  
16 Virginia near Old Mets Road. Thank you for taking time to  
17 hear from a high school student tonight. This issue is  
18 important to our town and I feel that I need to tell you what  
19 I think because I am the future of this town. I live here.  
20 I go to school here. I play sports here. This town is a part  
21 of me.

22           I have participated in so many great things at

1 this town of Warrenton, such as our parades, volunteering with  
2 the police force, with Feed Fauquier in the American Legion,  
3 going to first Fridays and just enjoying this old town with  
4 my friends.

5 I list these things to help you see that this  
6 is my town. Although I live over a mile and a half from the  
7 Blackwell location my neighborhood sits right next to another  
8 location proposed for a data center, the old wire factory  
9 property.

10 If Amazon Data Center is approved, I fear the  
11 next application will be for a data center near my home. How  
12 will we stop the data center once Amazon is approved? Even  
13 if builders make these data centers more attractive other than  
14 what I see in other places, they're still huge and out of  
15 proportion with anything in all of Warrenton.

16 Surely this will change my town forever. A  
17 town that I'm a part of and is a part of me, I've heard that  
18 you still do not have all the information you need to make  
19 a wise decision about the future of Warrenton. I'm here with  
20 all the others asking you to hold firm and to continue to  
21 protect Warrenton.

22 My sports team slogan is total preparation and

1 total effort as a town resident. And I am here to stay and  
2 carry out what I learned in my education. I am dedicated and  
3 I give my total effort to what I believe in. This town has  
4 prepared the preservation of our historic character. Let's  
5 not ruin this presentation that has been done throughout  
6 centuries of this very town.

7 My statement is no way a filibuster for a  
8 filibuster only delays the inevitable. I hope we can change  
9 the way this seemingly is going. So hear me when I say all  
10 of Warrenton needs to be a team. We need to give our full  
11 and total effort to not let us be beaten by big corporations.  
12 Thank you for listening to me tonight. I am the youth and  
13 I will inherit the destruction due to the data centers. We  
14 will pay, so we will fight

15 TOWN CLERK: Michael Cross. Mary Gaye Cross,  
16 Eric Gagnan.

17 MS. MARY CROSS: I'm following my husband and  
18 my daughter. My son is, excuse me, my son is in bed. Good  
19 evening. My name is Mary Gaye Cross. I live at 606 Galena  
20 Way in Warrenton. It's been a very long day and long night  
21 and I thank all of you for putting in the effort for that.

22 In today's town council work session,

1 Councilman Hartman said that he was tired of hearing us, the  
2 citizens of Warrenton use words like secretive, suspicious  
3 when referring to the process the mayor and some council  
4 members have used in this issue with Amazon.

5 I'd like to give one example, one of many why  
6 these types of words are used. The following is an email from  
7 the mayor to Amazon. It's to Ray Rankie, AWS Global Real  
8 Estate, and Becky Ford Economic Development, AWS  
9 Infrastructure Global Expansion. I'll just repeat that.  
10 Global Expansion.

11 On May 3rd, 2022, the mayor forwarded an email  
12 from Julie Bolthouse of the Piedmont Environmental Council.  
13 This was just days after Amazon applied for a special-use  
14 permit and before it had even come before the town council.

15 The mayor writes, just wanted to pass this  
16 along. I know you are familiar with this group and it goes  
17 on. And then he writes, they are vocal with concerns about  
18 everything we do as a town. This email from the mayor was  
19 made public only a few days ago in response to a FOIA petition.

20 The answer, Mr. Hartman, of why you have heard  
21 such words as suspicious, lack of transparency et cetera, lies  
22 in concerns like this that have been going on since February

1 of last year. Why would the mayor pass along information from  
2 a concerned citizen to Amazon at all, especially before an  
3 application was even before the town council? Is this not  
4 suspicious and if not secret, why were the mayor's emails to  
5 Amazon withheld from the public for so many months?

6 Mr. Mayor, you said they are vocal with  
7 concerns. Well, it's a good thing they are. Look around  
8 these rooms and outside we are now you are they. These rooms  
9 are full of people and full of those who we represent who  
10 aren't here tonight.

11 All of us care and are concerned about our  
12 town. I was going to bring up many questions about the  
13 enforcement of the noise compliance but I will refrain, I will  
14 just skip to, is pulling an occupancy permit realistic that  
15 the town of Warrenton could shut down a production of Amazon.

16 Who will be knocking on Amazon's door to demand  
17 they shut down because they are out of compliance. Will it  
18 be you, Mr. Mayor or will it be they, which is now us whom  
19 you have positioned yourself against?

20 MR. NEVILL: Thank you, Ms. Cross.

21 MS. MARY CROSS: Thank you very much.

22 TOWN CLERK: Eric Gagnon. Ms. Cross, did you

1 say Michael was sick? Christina Gagnon on deck.

2 MR. GAGNON: Good evening. My name is Eric  
3 Gagnon and my wife and I live at 200 Winchester Street. Our  
4 Ward Five Town Council Representative, Jay Heroux is a VP at  
5 the company, Definitive Logic. Mr. Heroux Company has  
6 extensive business ties to Amazon Web Services, also known  
7 as AWS and is even featured as a partner on the AWS website.

8 The Warrenton Town Charter clearly states that  
9 no member of the council shall participate in the vote on a  
10 matter for which he is an employee or agent or has a financial  
11 interest. Also, the town code of ethics that you signed as  
12 a town council member states that even if a business  
13 relationship may give the appearance of a conflict of  
14 interest, that representative shall abstain from  
15 participating in deliberations and decision-making where  
16 conflicts exist.

17 So even if the town attorney doesn't see a  
18 conflict, everyone can see more than the appearance of a  
19 conflict. We've been gathering signatures in Ward Five  
20 asking you to recuse yourself from a vote on the Amazon  
21 proposal.

22 So far we've collected 49 signatures to this

1 open letter, which I've already presented to you tonight.  
2 We've also gathered 61 signatures so far to a general petition  
3 signed by Ward Five residents opposing the Amazon project.  
4 At last month's Planning Commission meeting, Allies Robbie  
5 said this entire Amazon matter has done nothing but put a dark  
6 cloud over this town, and many of us agree with him.

7           It doesn't take an army of lawyers to see that  
8 if Mr. Heroux votes on this issue, it will place yet another  
9 cloud over this matter. And the feeling among town residents  
10 will be reinforced that our interests are not being  
11 represented, but instead Amazon is being represented and its  
12 data centers are seen as big boxes of tax revenue for the town  
13 to spend.

14           So Mr. Heroux tonight, I respectfully ask you  
15 to recuse yourself from voting on this issue and show your  
16 fellow residents that the conflict of interest rules aren't  
17 just words on paper to be ignored or twisted around by lawyers  
18 so that AWS can try to turn Warrenton into another Amazon  
19 company town in Virginia. Thank you for your time.

20           TOWN CLERK: Christina Gagnon. Richard  
21 Keister.

22           MS. GAGNON: My name is Christina Gagnon, 200

1 Winchester Street Ward Five. In the nineties when Amazon was  
2 just an online book seller, they were losing millions, yet  
3 were given access to very liberal bond financing that no other  
4 dot com company would've had access to.

5           Even today, Amazon.com intentionally sells  
6 retail items at a loss as quote, a recipe for the slow  
7 strangulation of the competitive retail marketplace and the  
8 creation of a retail monopoly for Amazon bulldozing local  
9 business ecosystems and dominating markets. All this while  
10 aggressively pursuing tax breaks at the local level.

11           Amazon has been very successful in this  
12 strategy as we can see in the struggling retailers in our own  
13 town. Other Amazon divisions, including AWS data centers use  
14 the same tactics and are making billions. And their massive  
15 federal tax breaks and state subsidies have given them very  
16 deep pockets.

17           They use that enormous wealth to wield undue  
18 political influence. We see that playing out right now in  
19 front of our eyes in the lack of transparency, the NDAs, the  
20 apparent conflict of interest and the questionable rezoning  
21 of the Blackwell property in Amazon's favor.

22           With an influx of Amazon tax revenues, I can

1 see if the town incurs debt that they will use the carrot and  
2 stick to extract even greater tax breaks and zoning allowances  
3 in order to build more data centers in and around our town.

4 Amazon is a company that doesn't play fair and  
5 they don't play nice. They don't care about our ability to  
6 give tax incentives to existing local businesses or use them  
7 to attract companies to the Blackwell site that would actually  
8 bring something to the town and create a healthy local  
9 economy. Amazon doesn't care about our comprehensive plan.

10 They don't care about the historic character  
11 of our community. They don't care about the health of our  
12 local economy or about our health in general. Amazon will  
13 wield their undue political influence to try to strip us of  
14 our energy resources, strip us of our land, strip us of a  
15 healthy local economy, strip us of our quality of life, strip  
16 us of our health and worse they will try to strip us of our  
17 constitutional right of self-determination to live in a town  
18 that benefits its citizens.

19 Amazon is used to getting their way, but I  
20 think they've met their match with Warrenton residents. We  
21 love our town and we'll fight for it. Thank you.

22 TOWN CLERK: Richard Keister. Richard

1 Keister, Mark Smith, Lee Owsley, David Richardson. Mr.

2 Richardson or was that somebody else?

3 UNIDENTIFIED SPEAKER: (Inaudible)

4 TOWN CLERK: No ma'am. You're not too much  
5 further down. Richard Keister, Mark Smith, Lee Owsley, David  
6 Richardson has already left. (Inaudible) you're next.

7 MS. AMSTER: This is a bit of a surprise. I  
8 didn't realize I'd actually signed up twice. I'm not all that  
9 great with computers and I'd rather suspect that most of you  
10 aren't either. But yes, I use the cloud. Yes, I appreciate  
11 Amazon, but I'm not willing to pay the price in my neighborhood  
12 in Ward One.

13 You did not get a straight answer from Mr.  
14 Foote about the generators and whether that would be included  
15 in the noise enforcement. It was a good question. Mr.  
16 Mooney asked, what about when they charge up the generators,  
17 which they must do.

18 Amazon came up to answer that question and  
19 didn't. What you saw was a very neat tap dance and a lecture  
20 about why we're Luddites and not willing to look to the future  
21 or take part in any kind of forward planning. We're not  
22 idiots. We're not pumpkins. We're not rubes. And Amazon

1 is used to dealing with people like us.

2           They go first to the town councils and the  
3 officials with NDAs and sweet offers and sweet talk, and they  
4 get them on board before the outrage citizenry can come and  
5 start asking the tough questions. You have not had an answer  
6 for the noise. You have not had answers for how that would  
7 be enforced.

8           And Mr. Foote thinks that what's going on in  
9 Prince William is fine because they're meeting the noise  
10 requirements. Have you spoken to anyone in Prince William?  
11 Have you been to the data centers in Prince William and  
12 listened at night as I have? Those people are miserable.

13           They're so -- they're saying they're getting  
14 sick, they're getting no sleep, they can't concentrate, they  
15 have tinnitus. And Amazon offered yoga mats and bungee  
16 chords and much to nobody's surprise wasn't sufficient. You  
17 are not going to be able to control Amazon.

18           You're not going to be able to limit them, find  
19 them, discipline them, close them down. At the very least,  
20 the gentleman who spoke to you had a vast experience dealing  
21 with large corporations. How do you enforce an injunction?  
22 What is the process? What do you have to do? How many years

1 does it take?

2                   You should be meeting one-on-one with him and  
3 with other people with similar experience to his and asking  
4 really nitty gritty what would be involved talking about, oh,  
5 we shut them down, or, oh, we would -- Amazon gets its way  
6 with people who are far more sophisticated than we are, with  
7 far more experience than we have and with much greater  
8 resources than we can muster.

9                   I understand about libraries and schools. I  
10 would be perfectly happy as many people would to be taxed a  
11 little higher to provide better schools and a much better  
12 library. But this is not the answer. This is not the place.  
13 These are not the reinsurances you need and this is not the  
14 company you want to take on.

15                   TOWN CLERK: Scott Weiner, Wendy Wheat Craft.  
16 David Fox, Scott Weiner, Wendy Wheat Craft. David Fox.

17                   MR. WEINER: Sorry guys. Good evening, or is  
18 it good morning yet? I'm not sure. My name's Scott Weiner.  
19 I live at 281 Salem Street right in town. It's with some  
20 sadness that I come here tonight. There's no support from  
21 the majority of the citizens of Warrenton for the Amazon  
22 project. In fact, the no has been a hell no.

1                   The application for the SUP has not been  
2 completed to the standards that is expected of every other  
3 applicant. The incomplete nebulous information provided by  
4 the applicant should not have allowed this hearing to even  
5 be necessary. But here we are.

6                   We as citizens of Warrenton are having our  
7 quality of life in some instances, our property values, our  
8 overall health, and our faith in our democratic process  
9 threatened by this unexplained urgency to pass this SUP. I  
10 was under the impression that the council serves the will of  
11 the people who elected them.

12                   Perhaps I'm being naive, I was under the  
13 impression that honesty, integrity, and full transparency was  
14 what we were promised. Hiding behind a non-disclosure  
15 agreement is cowardly and not worthy of the spirit of your  
16 oaths of office to represent the people that elected you.

17                   The people that put their faith in you, that  
18 you would listen to them. Our democracy is dying in the  
19 darkness of the murky shadows that have been cast by this  
20 council's actions in this matter. This is a very sad day  
21 indeed. Thank you,

22                   TOWN CLERK: Wendy Wheatcraft. David Fox,

1 Joan Morris, Wendy Wheatcraft.

2 MS. WHEATCRAFT: Good evening. My name is  
3 Wendy Wheatcraft. I live at 851 Oak Leaf Court in Ward 1,  
4 along with my neighbors. I too oppose the Amazon Data Center.  
5 This evening a part of your responsibility will be to  
6 determine the potential effects of the project.

7 You'll consider, would the proposed use impair  
8 the health, safety and welfare of town residents and town  
9 properties. I believe it would. I believe it could because  
10 severe audio and visual effects to neighboring residential  
11 properties, including my own.

12 I believe these adverse effects could be  
13 cumulative and irreversible. I wish that the applicant had  
14 provided sufficient information to prove me wrong, but the  
15 applicant has not. There are still unresolved issues and a  
16 lot of unknowns regarding this application.

17 Amazon has been unable to demonstrate  
18 compliance with the town's noise ordinance or produce a  
19 credible noise study, which of course, as you know, is an  
20 application requirement. And the revised conditions still  
21 appear to lack any consequences for ongoing persistent noise  
22 ordinance violations.

1                   A visual impact study or vision analysis was  
2 never offered. The location of energy infrastructure needed  
3 to serve the proposed facility, including the new substation  
4 and probable transmission lines has yet to be determined.  
5 This is a pivotal decision for our community.

6                   Your decision could affect the living  
7 conditions of Warrenton residence for decades. I ask that  
8 you vote in denial of this application. Forget about  
9 revising the conditions. Just deny the damn thing. Thank  
10 you.

11                   TOWN CLERK: David Fox, Joan Morris, Douglas  
12 Larson.

13                   MR. LARSON: Good evening once again. I'm  
14 Douglas Larson. I live in the town of Warrenton at 134 Mosby  
15 Circle but tonight I'm also here representing citizens for  
16 Fauquier County and speaking on their behalf. So if you would  
17 take note and provide my time accordingly.

18                   TOWN CLERK: One second sir.

19                   MR. LARSON: First I'm confused with what  
20 transpired just prior to the opening of the public hearing  
21 and want to be clear in my mind and urge you to keep the public  
22 hearing open for the next month's meeting. And there was at

1 least in my thinking, there was some uncertainty there whether  
2 that public hearing would remain open.

3 I think it's evident from the discussion -- the  
4 robust discussion that you gentlemen and ladies have had this  
5 evening on these conditions that there is still a great deal  
6 to be learned. And I think you will also admit that  
7 throughout this process, we have been fortunate to have found  
8 among the citizens of Fauquier County and the town of  
9 Warrenton, some remarkable talent as we -- as evidenced by  
10 the gentleman this evening who has had great experience with  
11 enforcement.

12 We've had a great deal of expertise brought to  
13 bear on the review of this SUP. Certainly there are  
14 conditions that have just been presented and the citizens  
15 should have the opportunity to also pursue those conditions  
16 and comment on them further at the continuation of the hearing  
17 at next month's meeting before our vote is taken.

18 So I pass that along as a strong  
19 recommendation. And before I get into my comments, I do want  
20 on behalf of the citizens for Fauquier County to also  
21 acknowledge and thank the two retiring gentlemen that we've  
22 spoke about earlier this evening. Ali Zarabi from the

1 Planning Commission and Renard Carlos from the Town Council.

2 We thank you for your years of service and  
3 appreciate all that you have given to the town. But I'm here  
4 tonight on behalf of CFFC. I know you have heard from CFFC  
5 repeatedly throughout this SUP process. There is certainly  
6 a long list and in my mind, while they've been repeated over  
7 and over the conditions tonight that we heard still do not  
8 address in my view, the violation of the Comp Plan.

9 I participated in a number of the public  
10 meetings for the Comp Plan. I also sat on the citizen's  
11 committee that worked with the consultant on the comp plan.  
12 And at no point in that process, absolutely no time at all  
13 did I ever hear the words data center mentioned in the vision  
14 of that Comp Plan.

15 Noise, we still have not had to our thinking  
16 an adequate noise study, even though it impacts 650 homes very  
17 directly. The visual impact at our gateway to the historic  
18 town, the electrical requirements that will be needed to meet  
19 the demands of data centers, the precedent that's been -- that  
20 will be set if this SUP is approved, that will almost certainly  
21 involve additional data centers coming to this town.

22 The questionable process by which the SUP has

1 moved forward to this vote, withholding information because  
2 of NDA agreements between Amazon and the town, the forwarding  
3 of incomplete application to the Planning Commission by town  
4 staff, the dismissal of citizen input in favor of the  
5 applicant.

6 I'd like to take just a minute of my time to  
7 relate to you a little story about a land use battle that  
8 occurred in Fauquier County over 50 years ago because there  
9 are parallels to the data center proposal we face today. In  
10 1967, a large out-of-state company purchased over five --  
11 4,500 acres of land called North Wales along the Springs Road.

12 The proposal was to build 10,000 homes with an  
13 expected population increase of over 30,000 new residents.  
14 This was in 1967. The supporters of this proposal, of course,  
15 said that the development would bring revenue and that growth  
16 was inevitable. Where have we heard that before?

17 Citizen opposition to this project was great.  
18 It was a multi-year complicated battle with many iterations,  
19 but ultimately the citizens won the day and the Cooper  
20 Corporation gave up on the development. Today, the Springs  
21 Road remains a showpiece of rural conservation.

22 The population of this town has grown steadily

1 to the current 10,000 population. The town has continued to  
2 prosper and some of the same citizens that led the North Wales  
3 fight are here today standing in opposition to the Amazon  
4 proposal. But the point is, the citizens knew then what was  
5 best for the town as they do tonight. Please listen so that  
6 in 50 years we can all look back at what might have happened  
7 and be with relief that a better solution was found.

8 TOWN CLERK: Ken Amm, James Hanover.

9 MR. AMM: I promise this is the last time.

10 It's Ken Amm, I live in the town of Warrenton 194 Court  
11 Culpeper Street. Just one thing on the fight on North Wales  
12 there, I actually have the petition that was done on a paper,  
13 a rolled piece of paper that was rolled up done by Hope Porter.  
14 And they were at the high school and they rolled it down there.  
15 Had thousands of names on it that fought that battle for North  
16 Wales.

17 And I also have the book that showed what the  
18 developer was going to develop. It would've changed the  
19 county and the town, the whole area forever. Just a couple  
20 of things. One was mainly, and this is the big thing and  
21 having worked for the county, enforcement is always a problem.  
22 It's one of the biggest things.

1                   We -- for the last four years, we've been  
2 trying to stop a man named Hawkins from dumping soil from  
3 outside the county into the county. And he brings in all  
4 sorts of soils. In some places they've raised the land 20  
5 feet. Can you imagine suddenly raising that land and what  
6 it could cause as far as erosion and just the things that they  
7 brought in there we're still fighting that battle in court  
8 with him.

9                   I wish that Rick Gerhardt was here earlier and  
10 it's in his district. He's the supervisor and he can tell  
11 you how difficult it is to go after somebody who just says,  
12 they just refuse. The court system takes a long time.  
13 Anyway, but thanks for keeping the hearing open. Thank you.

14                   TOWN CLERK: James Hanover, Ike Miller, Aaron  
15 O'Donnell, Lori Canee, Melissa Widenfield. James Hanover,  
16 Ike Miller, Aaron O'Donnell, Lori Canee, Melissa Widenfield.  
17 Luke Morazo.

18                   MR. MORAZO: Evening everyone. My name is  
19 Luke Morazo. I live at 835 Oak Leaf Court and here in  
20 Warrenton. And I've lived in Warrenton for three years with  
21 my wife and now two small children. And Warrenton, it's a  
22 special town. You all know that it's preaching to the choir.

1 That's why you're up there.

2                   And I mean, it's got a booming main street.

3 It's got beautiful historic sites, homes and most importantly  
4 has a small town texture of life. A small town, rural texture  
5 of life. And so that's impossible to replace once it's lost.

6 Now to a point that was made earlier by the Amazon rep, I  
7 actually wasn't here when the Walmart debate was occurring.

8                   And I don't know if what he said was true that  
9 people were saying that the Walmart coming in and of itself  
10 was the end of Warrenton. I'd be pretty surprised. My guess  
11 is that people were saying kind of what they're actually  
12 saying today, which is, it's not that this data center coming  
13 in all of a sudden were Ashburn. It's not overnight.

14                   And that's how these insidious things happen.  
15 They're not one big thing that everyone can see happening all  
16 at once. It's these creeping steps that one after another.  
17 Walmart probably being included in those, frankly. But the  
18 Walmart's then the data center and another data center and  
19 all of a sudden, 10, 20 years down the road you are Ashburn.

20                   We had a guy speaking in the public, speaking  
21 session earlier and he was saying he left Leesburg 20 years  
22 ago because he felt the sprawl coming in now it was before

1 the sterile suburb that it is now that just happens to have  
2 an old town. Now, there's a little bit of a tangent I guess,  
3 you know, I live in Oak Springs and I actually work in the  
4 IT field. So I am directly impacted on this in many fronts.

5           And the reality is, if I lived on the opposite  
6 side of town, I would still be against these. This isn't a  
7 question of what affects me personally. This is a question  
8 of the soul of our town. And I chose this town because it's  
9 thriving as historic Virginian character and with the modern  
10 amenities that we want.

11           This isn't some far out there town. This is  
12 a perfect balance that everyone is here for. I want my  
13 children to go to the schools here, experience the same town  
14 that drew me in, and it'll be more than heartbreaking if they  
15 grew up in a town that's a little more Ashburn than it is  
16 Warrenton.

17           Data centers they're opening the door to sub  
18 urbanization, which will steal the soul and charm of this  
19 town. It will deliver the nail in the coffin for historic  
20 texture of life that brings in residents and tourists alike.  
21 The public of backlash against this could not have been clear.

22           You can't go anywhere in Warrenton without

1 seeing stop Amazon signs. The crowd behind is almost  
2 entirely unanimous against this. I mean, in good conscience,  
3 you just can't defy the will of the entirety of Warrenton and  
4 let this happen. Cause it's not about this data center.  
5 It's about the soul and the future of Warrenton. Thank you.

6 TOWN CLERK: Carol Chase Collins. Carol  
7 Chase Collins, Christine Fox, Christopher Bonner.

8 MS. COLLINS: Hi Carol Chase Collins on  
9 Winchester Street. I didn't realize I signed up for both.  
10 Anyway, you've heard it all. Don't do it, it's wrong.

11 TOWN CLERK: Christine Fox, Christopher  
12 Bonner, Alfred Young. Christine Fox, Christopher Bonner,  
13 Alfred Young, Waldo Ward.

14 MR. WARD: Well, I tell you, I've been sitting  
15 here since 6:30, and I appreciate you all standing this much  
16 time. My name is Waldo Ward. I live at 192 Pinnacle Court  
17 in Warrenton. I've been involved in commercial construction  
18 in Washington DC and the Baltimore area since 1978, and I can  
19 sit here and list to you for a lot longer than my three minutes  
20 buildings and projects that the developer has come in and  
21 promised that he will do this, that or the other.

22 Other buildings he will allow for

1 apprenticeships, he will provide employment, he will do this,  
2 he will do that. The building goes up, none of it ever  
3 happens. So you're up here. Well, what if -- what about the  
4 noise? What if they do this? What if they do that? What  
5 if they do this? What are our options?

6 The easiest option is for you to follow the  
7 recommendations of your Planning Commission and deny the SUP  
8 that negates every one of these other questions. And that's  
9 all I've got to say. Thank you.

10 TOWN CLERK: Steve Byfield. Amy Hampton.  
11 Kevin Hampton.

12 MR. BYFIELD: Did you say Steve Byfield?

13 TOWN CLERK: Yes, sir.

14 MR. BYFIELD: Wow. That is one heck of a  
15 coincidence. I'm sorry. I need a second. That was weird.  
16 I almost didn't come tonight. Just busy with a lot of things  
17 going on. All right. This is where I fail because I did --  
18 I scrapped what I had typed up. Bottom line is I'd just like  
19 to start by saying that I oppose this SUP.

20 However, I would also -- I would like to point  
21 out, I've spent a lot of time over the past month or so  
22 researching this issue. And I've actually spent a lot of time

1 going through the archives of these meetings, various  
2 Planning Commission and Town Council meetings.

3           And I would just like to say thank you to  
4 everyone on this Town Council. That goes for everyone and  
5 the Planning Commission as well. I was quite surprised when  
6 I spoke at the Planning Commission meeting, the last one we  
7 had. And I was pretty surprised to hear, what I spoke about  
8 was specifically the enforcement mechanism as it relates to  
9 the noise ordinance.

10           And so you can imagine my surprise today when  
11 I listened to the morning session how much of the discussion  
12 was on that specifically. So I'd just like to say thank you  
13 as I'm personally pleased that that has been a significant  
14 point of discussion.

15           And I just like to say that thank you for taking  
16 it so seriously. Other than that I'm just here to -- as much  
17 as I would've loved to have had something profound to say,  
18 I just -- I failed as I was working up trying to write  
19 something. I just don't think what I had was necessarily  
20 productive.

21           But I would like to highlight when this is all  
22 said and done, obviously emotions have been high. I don't

1 think there's any misunderstanding there. Everyone knows  
2 that there's been emotions on all sides of this. They've been  
3 quite high.

4 I would just like to ask that when the time does  
5 come, the decisions made by the Town Council, I would just  
6 ask that you respect the community and that should it go in  
7 a direction that the community opposes. I would just ask that  
8 you have a very thorough explanation as to why. I think a  
9 lot of people feel -- I've got 30 seconds left.

10 I think a lot of people in this county feel --  
11 in this town feel like I do, which is that we do -- what we  
12 have here is somewhat of a gem. If you look around us, there  
13 has been sprawl that has almost skipped by us from Northern  
14 Virginia, right on the Culpeper.

15 And I'd just like to say that the only way that  
16 we keep that is to maintain what we have. And you just need  
17 to be very careful about the things that we do approve and  
18 things of this nature. So I'll go with that, but I just want  
19 to say thank you for what it's worth. So thank you very much.

20 TOWN CLERK: Amy Hampton. Kevin Hampton, Ali  
21 Zarabi. Yeah. If you're outside and you still need a seat,  
22 there are seats now. Christina Blitz, Ruth Fugi, Jennifer

1 George, Jason Samolinsky, Frank, Michael Kas -- I apologize  
2 on this one Frank. Kokaksa, you had passed earlier, Kas --  
3 oh, Ali Zarabi,

4 MR. ZARABI: Thank you. It's actually way  
5 past my bedtime and my kids are wondering where I am. But  
6 just the last opportunity actually. With all due respect  
7 probably Mr. Foote will not acknowledge this but I operate  
8 very slightly on the social media and Mr. Foote has been one  
9 of my few friends on the Book of Faces.

10 And this is how much regard I have had over the  
11 30 years that Mr. Foote has served his applicants in this  
12 community. And I would always say that he's been well  
13 prepared. He has demonstrated the highest integrity. I  
14 have always believed that the applicants and their  
15 representatives will get to push as hard as they need to and  
16 that's their job to win for their client.

17 And it is our job to stick our arms out and say,  
18 whoa, we cannot cross this line. I'm sorry to say, on this  
19 application, I believe that code and that rule did not get  
20 followed. And I am a little saddened and I am disappointed  
21 actually.

22 TOWN CLERK: Mr. Zarabi I'll direct you --

1 MR. ZARABI: And I mean that with all due  
2 respect that there have been lack of transparency, and I know  
3 it's getting to be an overstated word, but from the very  
4 beginning, there has been an impression that there did not  
5 have to be a lot of information volunteered.

6 We do have a separation of branches of  
7 government here. We understand that we are advisory body,  
8 but we are separate from the executive branch in the  
9 legislative branch, the appointed branches. I understand my  
10 role. I think I learned well by listening to a lot of  
11 thoughtful people in this community about how the process  
12 should work.

13 We did not have the autonomy, I think, to  
14 operate on a level that the commission needed to operate. And  
15 I'm sorry. And I -- what I'm additionally sorry for is the  
16 reflection that it has had on the staff and it has -- I regret  
17 that it has put such a burden and a pressure on very thoughtful  
18 and knowledgeable people in this community that are serving  
19 as staff. And they have been put in compromising position.

20 And I regret that quite frankly, as a friend,  
21 as a citizen, as a concerned citizen, as a person who has  
22 served here. So the dark cloud continues over this

1 application and has reflected it's really the worst  
2 attributes on a lot of very thoughtful people that are here  
3 to do good.

4           And I blame the applicant for that. The  
5 representative is simply doing the job and it's our position  
6 to hold our arms out and say, look, you know what? That's  
7 getting a little too close. We understand you want this, we  
8 want -- we understand you want to force it, but this is not  
9 the line that we're going to cross. And I think there's been  
10 a little bit of an issue with that. I hope that you can  
11 rectify that and I appreciate your service and goodnight.

12           TOWN CLERK: Christina Bills. Ruth Fugi,  
13 Jennifer George, Jason Samolinsky, Frank Michael Kokaksa.

14           MR. KOKAKSA: Good evening. Well, in my  
15 opinion, we've heard enough. Again, the whole HOA asked you  
16 to vote against this and the idea of hindsight is 2020. Well,  
17 the hindsight has been given to us. Thank you.

18           TOWN CLERK: Michael McGee, Robin Lawns,  
19 Susan Whitles.

20           MS. WHITLES: (Inaudible)

21           TOWN CLERK: Susan Whitles, Susan Harford,  
22 Kirk Gosbee, Jeffrey Gramble, Richard Rose, Brandon Wilson,

1 Jen Nemro.

2 MS. NEMRO: (Inaudible) Thank you.

3 TOWN CLERK: You're Jen correct?

4 MS. NEMRO: Yeah, I'm Jen. Thank you again  
5 and sorry I was a little frozen when I came in earlier, said  
6 it and have all of my thoughts put together. But I also wanted  
7 to say again, if you recall, I live on Galena Way in Monroe  
8 States and your decision making tonight will impact my  
9 community, my neighborhood directly.

10 One of the things I wanted to point out, I  
11 mentioned previously that I have recently sold four of the  
12 42 homes that are in that neighborhood. We have very young  
13 families in that neighborhood. We are starting to see a  
14 turnover in our neighborhood. So I have four children of my  
15 own ages, eight through 16.

16 We also have -- I was just trying to do a quick  
17 count in my head of about 30 children from elementary age or  
18 -- excuse me, younger up to high school age, who are  
19 potentially going to be impacted by the decisions that you  
20 make regarding this Amazon Data Center.

21 There are countless children. I don't  
22 obviously have a number in the Oak Springs subdivision that

1 are going to be affected. We don't know the environmental  
2 impacts. I ask each of you, do you have children? Do you  
3 have grandchildren? Would you come into my neighborhood and  
4 recommend -- you as a realtor, would you recommend buying a  
5 home in one of these neighborhoods?

6           Would you -- I have neighbors that have now  
7 told me that if this gets approved and data centers are  
8 approved in the town of Warrenton that they're going to sell,  
9 they're going to sell at rock bottom prices to get out of our  
10 town. Our town that we love and hold dearly. And that we  
11 have done such a great job of doing representation on our town  
12 in this community, in this room tonight.

13           Would you recommend someone move into one of  
14 these neighborhoods that will be surrounded by a data center,  
15 not knowing the long-term impacts of noise, vibrations, of  
16 other environmental impacts that are going to be left in the  
17 ground?

18           I ask you to please seriously take these  
19 considerations not just tonight, but don't make a decision  
20 if you do make a decision, vote for no. If you don't really  
21 do your research, let's get some more information on this and  
22 please think about the equity that people have gotten recently

1 with the increases in the real estate market.

2                   And I think that's a really important  
3 consideration because those people are now paying higher  
4 taxes to live in the town of Warrenton. We want to continue  
5 to have growth in our town in the real estate market, but we  
6 also want to take into consideration all of our children that  
7 are living and growing up in the town of Warrenton. Thank  
8 you.

9                   TOWN CLERK: John Liber. John Liber. Your  
10 organization, correct, sir?

11                   MR. LIBER: Oh, thank you. I'm Dr. John Liber  
12 from Gainesville, and I'm representing the HOA Roundtable,  
13 which represents 60 HOA associations in about 90,000  
14 residences throughout the Northern Virginia area. I'm a  
15 volunteer who's been doing data center noise analysis in  
16 Prince William County and also on your SUP.

17                   I'm the one who reviewed the September Amazon  
18 noise study and found it to be non-credible. My analysis is  
19 very similar to the work that I had done at NASA as an  
20 engineering manager for over 25 years and my PhD work. On  
21 September 9th, a noise study was submitted and then withdrawn  
22 on October 28th because it was not credible.

1 I've done a preliminary review on the January  
2 9th noise study and found it to be not credible. Here's why.  
3 Same contractor, same model, same assumptions. They have not  
4 incorporated the December 16th town zoning administrator's  
5 guidance on noise. They discount the noise from generators  
6 due to, "Limited time."

7 However, Amazon's normal practices are  
8 exceeding what the ANSI standard says for limited time  
9 misrepresenting the ANSI standard. They cite the August  
10 design versus the current design. They cite noise from a  
11 generic train brand chiller, but don't cite the source of the  
12 noise or how far away that noise was calculated from the  
13 chiller.

14 For the noise readings, they don't cite any  
15 distances and it's a very amateur freshman type of mistake.  
16 They did not compute this -- the total site generated noise  
17 as required in the ordinance per the zoning administrator.  
18 And when you add it together, they do definitely override the  
19 -- and exceed the town noise limits.

20 And you got this handout earlier if you want  
21 to start pulling that out. They claim there's a five or ten  
22 DBA noise generation decrease for night operations for a thing

1 that's 24 by 7 steady state. The physics is erratic. It  
2 doesn't follow common scientific principles, practices or how  
3 topography interacts with noise energy waves.

4           The ambient noise readings they model are 15  
5 to 25 decibels lower than what they have themselves measure  
6 and put in the report. This makes no sense at all. Your  
7 Warrenton zoning ordinance, chapter 11, section 11, 3, 10,  
8 2, requires, and I quote "A noise impact and abatement study  
9 to determine a potential impact on adjoining properties and  
10 neighborhoods." There's no discussion of any impacts in this  
11 study, therefore, the January 9th noise report is not credible  
12 and does not conform to the ordinances.

13           Amazon's simply saying, trust us, we have your  
14 best interest at heart. Talking about noise generation,  
15 Amazon defines operational as when they can process the first  
16 electron off the internet. The noise that we are talking  
17 about here comes from the I squared R losses after you have  
18 many computers operating.

19           The set of promised noise studies they  
20 proposed on October 28th would be completed well before they  
21 get to that level. This or incremental approval process will  
22 be -- they'll be three quarters the way built before they

1 exceed the noise level.

2           And just because they say they're using a  
3 closed loop system does not mean that they will be quieter.  
4 You still have to exchange that heat to the environment.  
5 Amazon is counting on your lack of expertise and counting on  
6 the lack of expertise in this town.

7           Amazon's plethora of lawyers will challenge  
8 your noise ordinance and will take you to court as quick as  
9 can be under Virginia Code 15.2 chapter 9, section 15.2-980.  
10 List the maximum penalty as \$500 per occurrence. I'll give  
11 this to the clerk so you all can copy it down and research  
12 it yourself with the Town Attorney's assistance.

13           One, they're going to violate at the Tanner  
14 Way, a data center built by Amazon. They have been violating  
15 as Mr. Foote lied to you earlier about that one. And they  
16 will take them over two years to correct the noise. And if  
17 they ever do.

18           Here's some basic information on noise.  
19 Could be heard up to two miles, 99 percent of the town  
20 footprint will heave that, half mile away will exceed.  
21 That's what this picture shows. The other thing is excessive  
22 noise because stress-related health impacts. I encourage

1 you to read this. Look at this. This is very well done by  
2 and by a medical doctor, sleeplessness, diabetes, high blood  
3 pressure, nervous conditions, lack of concentration, and so  
4 on.

5 And it just goes on and on. Let me finally say  
6 that if any of you or your staffs would like a discussion more  
7 on this, I can go more into the details and the -- what is  
8 happening in Manassas and --

9 TOWN CLERK: Thank you, sir.

10 MR. LIBER: Sterling, I will be more than  
11 happy to come on this sheet is my email address that you can  
12 get in contact with me. Thank you all very much.

13 TOWN CLERK: Bill Wright. Bill Wright, Julie  
14 Bolthouse. Go Wright.

15 MR. WRIGHT: Well, I already had my three  
16 minutes earlier. I'm the guy from Gainesville. No. I'll  
17 spare you that again. But I guess I was unprepared to make  
18 a second set of comments. But I would like to say at this  
19 point, have you heard enough? I mean, I've been here for five  
20 hours. I've never been to any of these other meetings and  
21 other than two guys that bumped their heads, everybody's  
22 against this.

1 I mean, even in Prince William, we had a  
2 handful of landowners who were making a killing who were for  
3 it. But here, everybody's against it. And I -- the only  
4 thing I can imagine is what's propping this up is some kind  
5 of promise that was made behind closed doors before the public  
6 ever had a chance to weigh in.

7 And you're sticking to that and your entire  
8 town is against it. Now, I don't live here, but I can tell  
9 you if you want this place to become Prince William, which  
10 I heard a few derogatory comments about today, which are  
11 justified. This is the first step. So please consider it  
12 for the sake of your citizens.

13 TOWN CLERK: Julie Bolthouse.

14 MS. BOLTHOUSE: My husband's from Manassas  
15 and he says the same thing about Prince William. So I'm Julie  
16 Bolthouse, resident of 410 Madison Court, in Leesburg, and  
17 I'm the Director of Land Use with Piedmont Environmental  
18 Council. Available information indicates that the proposed  
19 Amazon data center will have noise impacts will be highly  
20 visible.

21 The fenced in facility will likely glow as you  
22 drive down Route 29 at night. It will discourage investment

1 and redevelopment on Broadview for mixed -- the type of mixed  
2 use that you want. It will double, more than double the power  
3 usage of the town.

4           It will necessitate additional power  
5 infrastructure, likely a transmission line over Route 29 and  
6 a substation at the Old Wire Factory, which will then  
7 encourage more data center proposals in the future, in other  
8 problematic locations like the Old Wire Factory.

9           And now you get to choose if this is the right  
10 future for Warrenton. PEC is a local non-profit founded in  
11 1972, supported through donations from hundreds of residents,  
12 many of whom live in Warrenton. Several of PEC's staff live  
13 in Warrenton and the offices are well-maintained historic  
14 building right down the road with a large native plant garden  
15 named after Doug Larson.

16           Solar panels, geothermal and stormwater  
17 catchment basements and basins here in Warrenton. Amazon is  
18 a Fortune 500 company, well known for putting profits over  
19 its workers and the environment. And is locally known in  
20 Prince William County for not addressing the ongoing noise  
21 complaints of our neighbors.

22           Please stop and think, who really has

1 Warrenton's best interest at heart? It seems like heels have  
2 been dug in, but I'm asking you to take a step back and ask  
3 yourself why. This is not a high-tech office park that's  
4 going to bring good jobs and prestige for Warrenton, it's a  
5 concrete warehouse for data surrounded by noisy generators,  
6 fuel tanks, and security fences.

7           It's not proposed in some tucked away  
8 industrial area that's planned for it. It is proposed in --  
9 for the North Northeastern gateway on one of the most visible  
10 parcels in town. Your motto is Experience Warrenton.  
11 Promotion of your town revolves around tourism. A historic  
12 town with a backdrop of vine yards and horse country.

13           I know you want the revenue to make  
14 improvements to the town, but if the town becomes known as  
15 a hub of data warehouses fed by a giant transmission line over  
16 Route 29 and it's kind of noisy and ugly and people just want  
17 to move away, what exactly was the point?

18           TOWN CLERK: Denise Scheffer. Denise  
19 Scheffer. On deck Michael Fox. David Wynn.

20           MS. SCHEFFER: Good evening. My name is  
21 Denise Scheffer. I live in the Scott District and I own a  
22 townhouse in Ward 1. I want to thank council member Setpin

1 for meeting with me last week. However, it was frustrating  
2 to hear that you had met with Amazon via Zoom that morning.  
3 These proceedings are meant to take place largely within these  
4 four walls.

5           When you or other council members talked to  
6 Amazon on Zoom, you are forming your opinion about the  
7 project. You are also influencing what Amazon will do next,  
8 and you're taking your fellow council members out of the  
9 conversation. And finally, you're keeping the public in the  
10 dark. The process matters.

11           You also mentioned that during our meeting  
12 that Amazon was going to announce today a new cooling system  
13 like the one used at OVH in Vin Hill. That is not the case.  
14 Amazon is saying they would add noise mitigation and they  
15 would use the same modeling techniques that they use at OVH  
16 for the Blackwell Road project. That's a big difference.

17           Amazon finally showed up with their team  
18 today. They are nine months too late. It's curious that on  
19 the day that some thought the Warrenton Town Council would  
20 vote on the SUP, they show up and they finally produce a noise  
21 study, which Dr. Liber says is completely false.

22           One thing that hasn't been mentioned this

1 evening is that this morning Amazon talked about tax revenue.  
2 They said it would be \$900,000 the first year, \$700,000 the  
3 second year, and \$300,000 the third year. And that doesn't  
4 even include the possible incentives they would have to make  
5 those taxes disappear the first three years.

6 It's unfathomable to me that the town council  
7 would consider this SUP application with so many negatives  
8 that would bring in such little revenue. You have compelling  
9 reasons to vote against this application, please do so.

10 TOWN CLERK: Michael Fox, David Wynn, Bridget  
11 Wolf.

12 MR. FOX: Hello, my name is Michael Fox. I  
13 live at 7241 Hastings Lane here in Warrenton 20187. Like one  
14 of the other gentlemen that spoke, I had a great speech written  
15 up, really was good. And then after hearing a lot of the  
16 people talking and that the new conditions, speech kind of  
17 got thrown out the window, so kind of flying by the cuff a  
18 little bit. So I apologize if I'm not as prepared as I would  
19 like to be.

20 But I'd like to bring up a couple of points that  
21 believe it or not, I actually haven't heard pointed out yet.  
22 One of them being that I haven't seen any legit environmental

1 study done on the impacts that this would have on the  
2 environment. Couple of things that might seem trivial but  
3 are actually pretty important.

4           The effect on runoff. We have a reservoir  
5 less than two miles away from this site. Another one, at  
6 night there're going to be big lights on. What do lights  
7 attract? Mosquitoes. Has anyone done a study on the impact  
8 on the mosquito population in the area and what this will  
9 because? I haven't heard anything.

10           Another thing I'd like to point out, the one  
11 justification that I've heard ongoing for this is tax revenue.  
12 I'd like to point out a couple of things about that. Yeah.  
13 Amazon would bring in additional tax revenue. However, it  
14 also brings in another source of volatility into our economy.

15           The revenue from a data center is largely  
16 generated based on the number of servers that they house and  
17 the age and value of those servers by either reducing the  
18 number of servers or not implementing the number of servers  
19 that were originally planned or by running older servers for  
20 longer periods of time, they can drastically impact the amount  
21 of revenue that you're going to get from them.

22           In 2021, Loudoun County faced a \$60 million

1 shortfall in property tax because the data centers didn't roll  
2 out servers in the quantity that they anticipated. Are you  
3 really ready for that kind of volatility in our local economy?  
4 The other thing that worries me, and a lot of people have  
5 alluded to this, this vote doesn't just impact us in this data  
6 center. This is going to impact down the road what happens.

7           And I think that voting no on this is not just  
8 important, but then following up with some zoning ordinances  
9 that make stringent requirements, things like putting data  
10 centers underground. There are things that could be done to  
11 make this better for our community. Thank you.

12           TOWN CLERK: Thank you, sir. David Wynn,  
13 Bridget Wolf, William Ziegler. David Wynn, Bridget Wolf.  
14 William Ziegler. Miriam Gramick. She's coming up from the  
15 back. Bert Harris, Spencer Snakard on deck.

16           MS. GRAMICK: I'll start. Good evening. My  
17 name is Miriam Gramick. My family and I live at 5290 Ambler  
18 Drive in the Scott District, and we moved in 2007 and since  
19 that time, I have never seen an issue generate such a visceral  
20 reaction to bring so many people together.

21           You have heard all the reasons that my fellow  
22 Fauquier County citizens and others have so articulately

1 Impassionately presented to you, the Planning Commission and  
2 the Board of Supervisors. So I will not belabor you with them  
3 at this point.

4 I simply urge you to listen to the people you  
5 represent and deny Amazon's data center application.  
6 Fauquier County is a precious jewel, a unique flower  
7 surrounded by weeds. Please do not Louden and Prince  
8 William, this beautiful beloved place we call home. Thank  
9 you.

10 TOWN CLERK: Bert Harris. Spencer Snakard.  
11 Brian Haggerty.

12 MR. HARRIS: Hi, my name's Bert Harris. I'm  
13 the Executive Director of the Clifton Institute, but I'm  
14 speaking tonight as an individual. My address is 7781 Leads  
15 Manor Road in Marshall. I moved to Fauquier County eight  
16 years ago and there's no other place like it as we've all said.  
17 I have a PhD in ecology and I, together with a group of citizen  
18 scientists have documented an incredible 4,725 species of  
19 animals, plants, and fungi in our county.

20 Fauquier County is a meeting place of northern  
21 and southern species, and the reason is still so rich is  
22 because it is still rural. Each new big industrial

1 development chips away at our precious biodiversity. A major  
2 impact that many have overlooked is the bright lights that  
3 would be installed.

4 We are living through an insect apocalypse and  
5 there are lots of peer reviewed publications on this online.  
6 And bright lights are one of the primary because. And don't  
7 forget that baby birds eat nothing but insects. So if you  
8 like to have birds say no to the data center.

9 Amazon's plans to dim the lights in the middle  
10 of the night would not mitigate the impact because the biggest  
11 flight of insects is one hour after sundown. Why can we not  
12 build something that has a lower impact for biodiversity and  
13 something that actually fits with our comprehensive plan?  
14 Please do not set a dangerous precedent.

15 Finally, I've got to say that I'm shocked by  
16 the disconnect between the overwhelming public opposition and  
17 the way the council is leaning. It is really discouraging  
18 that not even the government of a small town is able to  
19 represent the will of the people. Please restore our faith  
20 in the local government by following the recommendation of  
21 your Planning Commission and saying no to this SUP.

22 TOWN CLERK: Spencer Snakard. Brian

1 Haggerty,

2 MS. SNAKARD: I'm speaking on behalf of an  
3 organization. I'm Spencer Snakard, President of Protect  
4 Fauquier, a growing coalition of thousands of concerned local  
5 citizens. We initially came together to oppose miles of  
6 transmission lines to power the data center.

7 We seem to have dodged that bullet for now, but  
8 we still are very much opposed to this data center and ask  
9 that you deny the SUP. This one data center because numerous  
10 concerns of its own, but I'd like to start with the avalanche  
11 effect that this one center may trigger. Because after the  
12 one is approved, there will be no way to deny others.

13 Mayor Nevill told one of our members that he  
14 would never allow a data center on the Old Wire Factory  
15 property because of its proximity to homes. By our  
16 measurements, those homes are no closer to Oak -- no closer  
17 than Oak Springs or Highlands, which leads us to wonder why  
18 would the Blackwell site be okay? But that one not.

19 More importantly, when you say you'd never  
20 allow it there, if a precedent is set by this one being  
21 approved, none of you will be able to stop it. If you deny  
22 a futures SUP after this first is approved, get ready for

1 future applicants like trillion-dollar Amazon to bankrupt  
2 this town over the legal battle that will be required to uphold  
3 it.

4           Which leads us back to power lines. Dominion  
5 has already made clear that even one more data center will  
6 require -- excuse me, transmission lines, which the State  
7 Corporation Commission in Richmond will decide what routes  
8 they take and whether above or underground. With only one  
9 percent of Virginia's transmission lines underground, it's  
10 pretty much guaranteed that we will have miles of above ground  
11 lines littering our landscape with these monstrosities and  
12 destroying our property values.

13           So now what about the noise? I have so many  
14 notes here, I'm missing notes from today. I could feel like  
15 I could talk forever about this, but let me start with the  
16 lies that have already been stated about the Tanner Way  
17 Center. Because the round table, HOA round table has been  
18 working continuously to get this issue straightened out.

19           And Mr. Heroux, I appreciate your optimism of  
20 how Amazon would want to handle it as soon as possible, I think  
21 is what you said, or as quickly as possible. It has already  
22 been almost a year. It will be at least two years before their

1 solution is even implemented.

2           And we have no idea at that two-year mark if  
3 it's even going to work. By the way, their current, their  
4 initial solution looks very much like what Amazon presented  
5 to you all this morning as our permanent solution. So Great  
6 Oak last month, Dale Brown came from there to speak to you  
7 guys with a cautionary tale.

8           He had no personal benefit to come. He was  
9 trying to save us from ourselves and came to share about how  
10 numerous residents have suffered blasting impacts with cracks  
11 to their homes, foundations and windows. The health problems  
12 they've experienced, including significant sleep impacts,  
13 increased stress and anxiety, migraines and worsening  
14 symptoms of rare autoimmune disorders.

15           Due to the failed short-term effect. Again,  
16 the failed short term fix again, like what Amazon is pretty  
17 much proposing for us, Great Oak residents will be suffering  
18 two years, as I said. You cannot expose our residents to the  
19 same and contrary to Mr. Dobson's comments about how quiet  
20 OVH is, which by the way, OVH is about one quarter the size  
21 of what our data center will be.

22           So already it's going to be inherently quieter

1 and how quiet centers could be. The fact is that that is not  
2 what Amazon is proposing here. Their system is not OVH's  
3 system and will not have the same level of noise. Your --  
4 I -- it's my opinion that your council should be fired based  
5 on the advice tonight of, oh yeah, we can do that.

6           As you've already heard, it is not  
7 enforceable. We are not go -- there is Virginia law in place,  
8 Virginia Ordinance that says we will not be able to shut them  
9 down. So I appreciate the attempts to work in the specifics  
10 to the conditions, but they are not going to be enforceable.

11           By the way, B, still says it's an annual test,  
12 not ongoing. So even if you're going to try to play with  
13 those, that needs to be caught too. I appreciate that many  
14 of you have said you don't want a noisy building, but you need  
15 to face the reality that if this is passed, that's what you  
16 will have. You will have a noisy building destroying your  
17 resident's lives and their property values.

18           Tax revenue has been addressed. But I want to  
19 speak to the other lie there, which I guess the gentleman  
20 before me said of how Mr. Foote said servers are replaced every  
21 five to seven years, regenerating your tax value, not  
22 according to Loudoun County. Whereas someone said they've

1 had a \$60 million shortfall based on that expectation.

2 Numerous town residents have come before you  
3 over the last many months saying, raise my taxes. I would  
4 gladly pay more. Just anything to not have a data center.  
5 You've been elected to represent the people not to decide for  
6 the people what's best. The people are begging you to deny  
7 this despite the possible revenue.

8 And once this thing is abandoned, a reality  
9 that is probably not far away given the speed of technological  
10 advancement, then what? Mr. Foote spoke to his vision, the  
11 future, how we have to look to the future, my vision of the  
12 future leaves me wondering what this town will do when the  
13 building high on the hill is gone. The box that's left.

14 UNIDENTIFIED SPEAKER: Thank you very much.

15 MS. SNAKARD: Thank you.

16 TOWN CLERK: Ryan Haggerty, Kenneth Thomas,  
17 Julie Brotus. David Gibson, Kevin Cask and Keho. You got  
18 someone coming from the back, sir.

19 MR. CASK: I'm speaking on behalf of an  
20 organization. Good evening. My name is Kevin Cask. I'll  
21 be speaking on behalf of the Piedmont Environmental Council  
22 as their Fauquier County Land Use Field Representative.

1 Tonight you're considering an application with near unanimous  
2 opposition from the community, a planning commission  
3 recommendation of denial and a number of unresolved issues.

4           On that basis alone, the application is worthy  
5 of a vote for denial. The Planning Commission has issued its  
6 ruling based on what makes sense from a land use perspective  
7 and as a planner, I agree with their recommendation.

8           Issuing an approval for a development with so  
9 many unresolved issues would be negligent and deviating from  
10 the comprehensive plan would be in such a drastic way, is not  
11 only disingenuous to the hundreds of residents who  
12 contributed to it, but also comprises -- compromises a prime  
13 location for the town that could generate revenue while  
14 contributing to the town's urban fabric.

15           Sometimes a site and a proposed use are simply  
16 incompatible. I believe that's the case here and that a data  
17 center of this scale would be difficult to incorporate into  
18 the compact urban environment that characterizes the town.  
19 I've worked in the development industry and I know that the  
20 reason firms like Walsh Colucci get hired is to get applicants  
21 their approval by offering as little as possible.

22           And while that's their responsibility and can

1 be expected for many applicant, it's your duty to consider  
2 your constituents concerns and to look beyond their unvetted  
3 promises and consider the many issues that have resulted in  
4 a planning commission recommendation of denial.

5           Since Dominion has introduced new plans to  
6 serve the site, there has been no stakeholder engagement.  
7 Residents, particularly in Ward 2, who are facing prospects  
8 of a substation and another potential data center need to be  
9 consulted. Any such infrastructure would make data center  
10 development more appealing for certain landowners and an  
11 industry whose common practices to co-locate data centers,  
12 to share resources and infrastructure.

13           Despite what's been proposed today, any  
14 proposed solutions to noise need to be vetted by a third party  
15 reviewer and the community, who've demonstrated they're more  
16 than capable of weighing in on technical studies, even with  
17 a zoning determination letter, an appropriate methodology to  
18 make noise readings and confirm compliance with the ordinance  
19 hasn't been established.

20           This issue is far from resolved and not worthy  
21 of any approval. The applicant has also submitted a  
22 questionable balloon study that only analyzed visibility from

1 seven photo locations and do not accurately reflect the  
2 heights of the balloons in those photos. The illustrative  
3 elevations Amazon offered are a best case scenario and even  
4 after the year's vegetation would take to reach maturity,  
5 residents could be stuck with views of a monolithic structure  
6 at their town's gateway.

7 While nothing Amazon has provided, has  
8 quantified the proposal's visual impact to the town as a  
9 whole, PEC, and citizens have. If the SUP is approved, these  
10 visual impacts will not be limited to the data center's  
11 immediate surroundings. So I hope you can see this  
12 application for the seriously flawed and impactful proposal  
13 it is an issue an appropriate ruling denial. Thank you for  
14 your time

15 TOWN CLERK: Ann Keho, Edwin Brotus, Mike  
16 Foltz.

17 MR. BROTUS: Good evening. Ike Brotus here.  
18 I've been a commercial real estate as a developer, broker,  
19 manager for about 35 years. I've served as the Chair and  
20 Director of the Vint Hill Economic Development Authority. In  
21 these various roles, I've submitted dozens of applications  
22 for re-zonings, CDP and text amendments, site plans, and

1 construction permits.

2 I want to clarify something that was raised  
3 earlier, a point about whether or not if you were to across  
4 the county line you would have by right. The answer is you  
5 would not remotely at all. It would take years to rezone the  
6 property to get what you're looking for.

7 The only place east or north of here where you  
8 could get a data center is in Vint Hill, and it is by right  
9 there because it went through the process. It went through  
10 a very lengthy process, and it's conditioned upon all the  
11 transmission and distribution lines being underground. So  
12 that's the only thing that could happen outside of the town.

13 The reason Amazon likes the town site is  
14 because it's easier, they believe to get the approval they  
15 want than it would be outside of the town. I know firsthand  
16 how long it takes to gain approvals for big projects, it's  
17 tough. And the reason it's tough is because there are details  
18 that matter and these details, the devil's in the details.

19 It's important to consider the many impacts  
20 that any proposed project will have on its neighbors, on the  
21 environment and on the community at large. The details must  
22 be 100 percent worked out before we commit, because that's

1 the only time we have an incentive to negotiate. Once a  
2 project is approved, a developer has no obligation or  
3 incentive to do any more than what the -- a written contractual  
4 approval requires.

5           The challenge with this Amazon proposal is  
6 that the data -- excuse me, that the building is massive. It  
7 covers five acres of ground, five acres of rooftop is the  
8 height of a three-story office building and could have  
9 equipment on the roof that goes well above that height. A  
10 few balloons on the corners of that do not adequately even  
11 remotely come close to demonstrating the visual impact.

12           Another impact is the precedent. This  
13 building alone would use as much power as the entire town of  
14 Warrenton, and I am personally aware of about a half a dozen  
15 other data center developers looking for viable sites in  
16 Fauquier County.

17           As soon as this application is approved, we  
18 will see applications throughout the county, in the town, and  
19 in the county. The collective demand for power will be so  
20 high that Dominion and Novec to our East will have ample  
21 justification to erect high voltage transmission lines that  
22 will impact hundreds, if not thousands of homeowners. And

1 I urge you to reject this thing.

2 TOWN CLERK: David Gibson. Mike Foltz.

3 MR. FOLTZ: Well, good evening.

4 TOWN CLERK: Mike Foltz. David Gibson.

5 MR. FOLTZ: Mike Foltz, Beaconsfield Lane,  
6 Warrenton. It's almost time for me to wake up for my midnight  
7 snack. 4:00 a.m. is going to come rather early. Devil's  
8 into details. I want to follow on that thought. John Foote  
9 masterfully crafted a chapter titled Planning and Zoning in  
10 the Handbook of Virginia Local Government Law, published by  
11 the local government attorneys.

12 And I want to quote one paragraph out of that  
13 book. Some of you probably have read the chapter, others may  
14 not know about this. "Truths, half lies, and outright  
15 falsehoods can pepper the legislative record in a battle for  
16 governing body approval and may even have constituted the  
17 basis upon which an approval was granted.

18 Unless such representations are reduced to a  
19 legally binding commitment, as they may be through proffer  
20 statements, they are just so much advocacy offered to persuade  
21 a legislator to grant a rezoning application. Land zone to  
22 a category permitting a variety of uses, some perhaps

1 desirable in a given location and some not, may be put to use  
2 for any of those permitted uses, barring the limitations  
3 possible and conditional zoning.

4           Since this is zoning classification, which  
5 controls and not the representations of an applicant because  
6 the minutes of governing bodies are not admissible in evidence  
7 over objection and a consent over legislation enactment.

8           There can be little, "legislative history"  
9 that illuminates the meaning of an adopted enactment, much  
10 like a court that speaks through its orders, a locality,  
11 speaks through its formally adopted ordinances, resolutions  
12 and policy, which are customarily analyzed within their four  
13 corners."

14           So I think there's a cautionary tale here, and  
15 that is, as you look at these conditions, if you think you're  
16 going to get size of a tree, it better be in the condition,  
17 not just a tree, but what size do you think you're going to  
18 get? Do you think you're getting some kind of technology?  
19 You better have that in a condition if you think you're going  
20 to have access to validate what they say, probably have to  
21 have a condition to have access.

22           I don't think they allow easy access for

1 Loudoun County government inspectors to come in when they're  
2 up and operational. So as you go through the conditions,  
3 think about everything, get them all well documented because  
4 not only is the conditions for them, it's for us. It's to  
5 make sure that we want to live next to this, not just that  
6 they want to be in Warrenton. Thank you.

7 TOWN CLERK: David Gibson.

8 MR. GIBSON: Thanks very much. Good evening,  
9 or is it good morning? Get close. I've been up long for a  
10 couple of days now. David Gibson, Fox View Drive right off  
11 of Bear Wallow right below the Warrenton Training Center. I  
12 could tell you exactly what happens at construction.

13 And I'm off my script already. A hundred  
14 trucks -- 110 ton trucks every single day for six months has  
15 been unbelievable. I can tell you what it looks like. I can  
16 hear what it sounds like. And they haven't even turned the  
17 darn things on yet. And when they do, we'll be talking about  
18 that.

19 They're just ready. So keep in mind that all  
20 this cumulative noise, Mr. Hartman, I've still got your  
21 attention, don't I? Thank you. I'd like to make three  
22 points. First off, I don't believe that you -- the zoning

1 ordinance has been met, period.

2 Amazon has not provided a credible and  
3 complete noise impact an abatement study. They haven't  
4 provided a justification -- in their justification letter.  
5 They've not provided what will happen and how that noise will  
6 affect them. They've not provided the requirements for the  
7 special use permit evaluation. There's no noise study for  
8 them to do, to look at, for you to determine, assess.

9 You got one this morning, I think at 10:00  
10 o'clock or whenever it was. We haven't really seen it yet.  
11 I had an opportunity to look through it. But my question here  
12 is, do you really have the authority to be talking about  
13 conditioning, waving or whatever?

14 TOWN CLERK: Sir, please address the dais.

15 MR. GIBSON: Unless you are all on board with  
16 what you've had a noise study that's there. You've got one  
17 at 10:00 o'clock this morning. I reviewed it. I agree  
18 completely with Dr. Liber. I'm not an engineer, but I do have  
19 a master's degree in biology and 40 years of experience.

20 And I will tell you that it's -- it is again,  
21 the same executive summary we saw on October 28th. It's just  
22 been recast. It's not been represented by Mr. Foot. Again,

1 thank goodness but the -- it's the original data. It's been  
2 rehashed. It's very clear. They fail to show their work.  
3 They do not state their assumptions and the executive summary.  
4 They don't show their work.

5 All of their results and recommendations all  
6 are very explicitly dependent on mitigation measure they do  
7 not describe -- very clear, they do not describe the  
8 mitigation. They actually suggest that HUD requirements and  
9 the difference between indoor and outdoor sound levels are  
10 important.

11 They're totally irrelevant. So we've got a  
12 bad -- another bad study that's equally not credible that you  
13 got at 10:00 o'clock this morning and you haven't had a chance  
14 to look at it. I guarantee it. I would also question as to  
15 who actually is competent to look at it, because I know for  
16 sure when I worked on hydropower or other energy projects,  
17 I want an engineer. I want somebody who's qualified and able  
18 to do it. Let's make sure we do. There's 6,578 people.

19 UNIDENTIFIED SPEAKER: Thank you, sir.

20 MR. GIBSON: Within two miles. That's what's  
21 at stake. Please understand that. Thank you.

22 TOWN CLERK: Georgia Herbert, John Benedict,

1 Catherine Kulik, Roseanne Woodruff.

2 MR. BENEDICT: I'm John Benedict.

3 TOWN CLERK: John Benedict.

4 MR. BENEDICT: Yes, sir.

5 TOWN CLERK: Yes, sir.

6 MR. BENEDICT: Anyone else? All right.

7 Well, again, I'm John Benedict. Thank you for being here.  
8 I don't envy your jobs and appreciate what you do. I live  
9 at 23349 Parsons Road in Middleburg. I'm a member of the  
10 Greater Piedmont community. I'm not a Warrenton resident,  
11 but we all love this town, the historic district, the town's  
12 unique character and its close ties to the surrounding  
13 Virginia countryside.

14 And clearly within the town and throughout the  
15 Piedmont, there's a broad consensus that a data center  
16 shouldn't be approved, especially at so prominent a site of  
17 the gateway historic middle, historic Warrenton. But I'll  
18 depart from what I was planning to review and say that a  
19 scrumming in my seat there, because speaking as a lawyer with  
20 35 years of regulatory experience including dealing with  
21 enforcement matters particularly in defending companies that  
22 are facing with them and in other cases, trying to shut down

1 other operations that were compromising our own client's  
2 efforts.

3           The notion that you can enforce anything via  
4 an occupancy permit is naive. Noise and indeed any  
5 conditions are not enforceable through that mechanism except  
6 through bringing an action in court. You'd need to get an  
7 injunction against a data center. You won't get it. You  
8 might be able to close a bar, maybe a cement plan. You're  
9 not going to shut down a data center.

10           There are too many people reliant on it,  
11 including government agencies and banks and Lord knows what's  
12 in it. So that -- for all practical purposes, you will never  
13 win an injunction against one. And even if you had some magic  
14 cord that you could pull the plug on, which you won't. They'd  
15 be able to get in a temporary injunction in a heartbeat to  
16 prevent you from disrupting the operation.

17           Realistically, you're not able to find them  
18 effectively and particularly for noise. I mean, the cap on  
19 that is ridiculous. The police have no authority to act on  
20 it. I've been dealing with these issues in Loudoun County,  
21 and the Sheriff's Office is unable to enforce and unwilling  
22 to enforce a noise ordinance.

1                   So, in effect, it sort of looks like you're  
2 looking for excuses to grant it. Don't expect any of the  
3 conditions that you might think will get you there would  
4 justify it. And certainly don't be thinking that an  
5 occupancy permit gives you any leverage on any of the  
6 conditions that you might be looking at. The only way is  
7 litigation which is long and expensive against an opponent  
8 that is infinitely better funded. Thank you.

9                   TOWN CLERK: Ann Keho, Georgia Herbert,  
10 Catherine Kulik, Roseanne Woodruff, Linda Lavash, Jonathan  
11 Elliot, Redman Maner. Linda.

12                   MS. LAVASH: Good evening, Mr. Mayor, Council  
13 members, thank you so much. My name is Linda Lavash. I live  
14 at 6274 Red Wing Blackboard Drive in Cedar Run District. Just  
15 outside of town. First, I want to urge you to keep the public  
16 hearing open contrary to Mr. Foot's assertions.

17                   New information was presented today, the noise  
18 study, which goes to the heart of one of the main issues being  
19 discussed was put out today. And I haven't had a chance to  
20 look at it. I'm sure many other people haven't had a chance  
21 to look at it for what that's worth, even though we're not  
22 experts. Give people a chance to scrutinize whatever new

1 information was provided today.

2           It's also apparent that council members need  
3 more time to make a decision. We just watched in real time  
4 as you guys spitballed language for conditions. And we  
5 watched as you expressed confusion over what legal  
6 enforcement mechanisms might be available to you.

7           You've heard from a couple of regulatory  
8 experts that the conditions of occupancy, that is unlikely  
9 to provide you with an easy enforcement mechanism. You're  
10 going to be forced to go to court, it's going to be expensive.  
11 You need to regroup and reconsider what's available to you.

12           As Mr. Heroux points out. The applicant has  
13 service agreements with its customers for reliable service  
14 and I guarantee they're going to put their customers above  
15 residents. It's cheaper for them to go to court and fight  
16 an injunction than it is for them to break their service  
17 contracts.

18           For reasons articulated by others and by the  
19 Planning Commission. This parcel is not the appropriate  
20 place for a data center. The amazing citizens speaking here  
21 tonight have made clear that we don't share Mr. Foot's vision  
22 of the future. The vision that town residents have is

1 reflected in the comprehensive plan which asks for a mixed  
2 use for that property.

3           From high on a hill, the data center would be  
4 both a noisy, giant concrete behemoth with negative visual  
5 and noise impacts but it would also be a black hole that  
6 virtually no one in town will ever visit because it will be  
7 a secure facility behind an eight-foot metal fence. That's  
8 not how we want to experience Warrenton. I respectfully urge  
9 every council member to vote no on this special use permit.  
10 Thank you.

11           TOWN CLERK: Jonathan Elliot, Redmond Manier,  
12 Juan Archello, Jesse Strait, Ann Ziegler, Kevin O'Neill.

13           MR. ARCHELLO: Hi, it's Juan Archello. I'm  
14 must say that I actually was -- I spoke earlier that this is  
15 citizen's time and I honestly didn't expect to be speaking  
16 twice. So I'm just going to -- that was actually meant for  
17 the public hearing. So that was my mistake. But I just want  
18 to reiterate my opposition obviously for the data center and  
19 just kind of make some off the cuff remarks.

20           From what I observed when you guys were  
21 discussing and from Mr. Foot, it just seemed to me like, with  
22 all due respect, it's like you're bending over backwards to

1 I guess kind be of help Amazon when it's like there's so much  
2 opposition for it. And it is just made me think, you know,  
3 Albert Einstein once said that -- I believe it's Einstein,  
4 he said that the definition of insanity is doing the same thing  
5 over and over again but expecting different results.

6           And I'm thinking it's like this really applies  
7 to the situation. I mean, we have the Amazon data center in  
8 Manassas that's causing all the significant noise yet we're  
9 trying to come up with all these special conditions. So maybe  
10 we'll make it work.

11           And it's just -- I mean, clearly the experts  
12 that have already spoken about the regulatory enforcement and  
13 I don't think -- it sounds like that's not going to work. So  
14 the power lines -- I mean, we've seen it right in Loudoun  
15 County, Prince William County if one data center starts, it's  
16 going to be more and more data centers. So anyways, it just  
17 seems kind of unfortunate to me but that's all. Thank you  
18 for your time,

19           TOWN CLERK: Jesse Streit. Ann Ziegler,

20           MR. STREIT: Good evening. My name is Jesse  
21 Streit. This is my daughter Roberta and I live at 8717  
22 Springs Road, Warrenton, Virginia. And Hope Porter, who was

1 referenced here and who was earlier here, she actually is the  
2 reason that we still are on our farm.

3           So we're next door neighbors of North Wales,  
4 so we're part of the beneficiaries of that legacy of people  
5 in Fauquier County, fighting for what's right for the land  
6 and not short term game. So I was born Fauquier Hospital 40  
7 years ago, graduated from Fauquier High School in 2000.

8           And hope to live my whole life here and I hope  
9 that -- I have eight children and hope that some of them might  
10 be happy and proud to make this their home as well and continue  
11 that legacy of caring for our home. I ask that you deny this  
12 application and I ask that in regards to thinking about the  
13 long-term good of the community. I think primarily based on  
14 not lining up with a comprehensive plan.

15           The overwhelming opposition and particularly  
16 also the power lines, TBD aspect. I think you guys have a  
17 really great opportunity here which is there's an incredible  
18 effort to care and work for the good of Warrenton here. I've  
19 never been to a meeting like this, this late.

20           And I think that you have the opportunity to  
21 take those -- that effort and that care and raise it up and  
22 encourage it and tell these people that their caring and

1 fighting and working isn't in vain. And that their effort  
2 to care for their community isn't in vain. The alternative  
3 is to squelch it and to demoralize that effort in those people.

4 And our community is only as good as the people  
5 who live here and work here and care for it. And so squelching  
6 that it's just hurting us. And it's not good for our long  
7 term good. Yeah. I think the other thing I think of tonight  
8 is just you get to write the story.

9 So the story can end in great joy and gladness  
10 and happiness and sort of -- and heartening this or can be  
11 very sad and disheartening. And you have this opportunity,  
12 which is great. And I hope that you will write a really happy  
13 story and that you'll deny this SUP. Thank you very much.

14 TOWN CLERK: Ann Ziegler.

15 MS. ZIEGLER: Hello, I'm Ann Ziegler. I  
16 didn't realize I'd be called again, but since I have, I had  
17 been scratching some notes here during the conversation.  
18 Firstly, as some of the gentlemen have already pointed out,  
19 I thought, gee, the 900-pound gorilla versus the SUP and the  
20 rules we have.

21 The building's already there make me stop.  
22 They will bankrupt the county in court and they don't care

1 about bad press because they're Amazon. And some comments  
2 that Mr. Foote made. Well, Walmart is not a data center. It  
3 doesn't make that much noise and we all use it.

4 gets paid either way and he apparently thinks  
5 we're really dumb and has to tell us what the cloud is. And  
6 has the goal to suggest is a comment he made something that  
7 we have said and the Weisbergs, is that their name? Oh, they  
8 gave it up. Yeah. They gave it up for \$40 million.

9 And the value of the servers has been pointed  
10 out. They figure out what they're going to pay and pay it.  
11 And if it's just a computer warehouse why is it so secret?  
12 If it's just a storehouse of all this computer things why the  
13 non-disclosures? What's the big secret?

14 And bad future doesn't have to come. Future  
15 is coming. It doesn't have to be bad. And sir, respect when  
16 respect is due. And also, I read an article recently that  
17 Frederick Maryland was approached and the citizens did not  
18 give up and Amazon went away. Thank you.

19 TOWN CLERK: Owen Schaffer, Jessica Matthews,  
20 Thomas Daley. Owen Schaffer, Jessica Matthews, Thomas  
21 Daley, Catherine Hayes, Laura Hettinger. Got one coming up.

22 MR. SCHAFFER: Good evening and actually good

1 morning. It is morning now. Thank you. You guys have had  
2 a very long day. My name is Owen Schaffer. I'm at 6080  
3 Whippoorwill Drive here in Warrenton. I do own a townhouse  
4 in Ward 1. And Mr. Foote was correct, the Warrenton Green  
5 project that Nina Weisberg started, she is the one that sold  
6 the land.

7 She had a plan that whether be vibrant live  
8 workshop in the character district that was well documented  
9 in your Warrenton in 2040 comprehensive plan. She sold the  
10 land. It doesn't mean you have to give up on the plan. Why  
11 deviate from that one, that 2040 plan.

12 It seems tonight you guys have been  
13 spitballing these ideas to try and make this work. How do  
14 we enforce it? I mean, look what you're going through to try  
15 and make this work. It obviously doesn't fit. Stop trying  
16 to shove it where it doesn't belong.

17 The Warren -- the land is light industrial.  
18 Light industrial goes along with that vibrant live, work and  
19 shop atmosphere. When we talk about going out in the  
20 evenings, we talk about going into town. We want to go out  
21 and go into town. When you go into town what do you do? You  
22 want to go to dinner? We have a nice main street with lots

1 of places to eat, but what else do we have?

2           As mentioned by others what do the children  
3 have to do? My kids head to other counties. They drop our  
4 money off in other counties, other counties got our tax  
5 revenue. There's -- we have places to eat and we do have some  
6 nice restaurants but that's about what we have. We did decide  
7 to try and go into town. We now have a nice bowling alley.

8           And to give you an idea of the demand for these  
9 type of services, it was a two and a half hour wait for a lane.  
10 So there's the demand out there for entertainment, for things  
11 to do in town. Don't give up on that plan. We could have  
12 shops for small businesses for little startups with all the  
13 entrepreneurs in Warrenton. We could have entertainment,  
14 learning centers, restaurants, possibly more affordable  
15 housing, which was all part of her original plan.

16           Not only would we have those things to attract  
17 for us to go and do, but we could then pull in people from  
18 other counties to drop their money off here and get their tax  
19 revenue as well. And to give you an example, the Walker Drive  
20 project was estimated to bring in a million dollars per year  
21 to the town.

22           What will a data center bring in? It sounded

1 like this morning you would bring in \$900,000 the first year,  
2 \$700,000, \$300,000. That number diminishes as the equipment  
3 devalues and it depreciates. Even if they do start replacing  
4 it every five, seven years, you're going to be looking at an  
5 average of maybe half a million a year.

6 That mixed use could have brought in a million  
7 a year. You -- more viable solution there. And that's  
8 assuming they even keep renewing that equipment on that  
9 frequency. And that's also assuming that they don't want to  
10 try and apply the incentives that would give them that tax  
11 break. Thank you.

12 TOWN CLERK: Jessica Matthews, Thomas Daley,  
13 Catherine Hayes, Laura Hettinger.

14 MR. DALEY: Mr. Mayor, and other members of  
15 the panel. My name is Tom Daley. I live at 3596 Sutherland  
16 Court, Warrenton. My purpose here is to add my name to the  
17 list of people who are in opposition to the proposed data  
18 center by Amazon. I have provided a hard copy of detailed  
19 comments.

20 I submitted an email to the comment for the  
21 meeting tonight and I provided each of you with a copy email  
22 of my comments. In the interest of time and as a courtesy

1 to you and the other attendees, especially those who still  
2 want to speak, I will limit my comments accordingly.

3 In view of what would appear to be  
4 overwhelmingly significant problems with this issue, I  
5 respectfully request if and when this does come to a vote that  
6 the Amazon application for a special use permit to allow for  
7 the construction of a data center on Blackwell Road behind  
8 Country Chevrolet be denied. Thank you.

9 TOWN CLERK: Katherine Hayes, Laura  
10 Hettinger, James L. Lou Spencer, Brian Haggerty. Corey Ann  
11 Payford. Roy Stefanic, Kimberly Winter.

12 MR. STEFANIC: Hello. I am Roy Stefanic. I  
13 spoke earlier tonight against the data center but after  
14 watching the sausage being made and listening to the  
15 discussion of enforcing ordinances and hearing Mr. Foot's  
16 legal defense of Amazon, I just thought to myself, well, wow.  
17 I realized the arguments in favor of the data center even less  
18 compelling than originally thought. So the solution is very  
19 simple, no, to the data center. Thank you.

20 TOWN CLERK: James L. Lou Spencer, Brian  
21 Haggerty, Corey Ann Payford, Kimberly Winter. What was your  
22 name ma'am?

1 MS. WINTER: Hello, I'm Kim Winter and I live  
2 at 5209 Ambler Drive in Warrenton. Wow. I just want to  
3 concur with what's been said about this being a bad idea and  
4 not being fully understood and not being enforceable. I  
5 mean, you guys are trying to find ways to make conditions here  
6 for these guys to comply with your noise ordinances but it  
7 doesn't sound to me like anybody can enforce those conditions.  
8 Please think about that before you make a decision and take  
9 into account what this means to the people who have to live  
10 with this every day. Thank you.

11 TOWN CLERK: Daniel Bliss, Christian Snow.  
12 Daniel.

13 MR. BLISS: Hi. I'm Daniel Bliss. 7456  
14 Keith Road, Warrenton. Good evening. Thank you for giving  
15 me a chance to speak tonight. Thank you also for the other  
16 speakers who have done an excellent job. My name's Daniel  
17 Bliss, I live just outside the town of Warrenton with my wife  
18 and daughter and I'm opposed to the special use permit.  
19 Before I get into it, I would like to note that there were  
20 a large number of people who spoke on this issue during  
21 Citizen's Time.

22 They were not instructed that they were

1 speaking at the wrong part of the meeting. I just hope that  
2 anyone who reports on this meeting includes them in any tally.  
3 Okay. I'll keep it short. There's an enormous groundswell  
4 of opposition to this special use permit. The language of  
5 it is full of nonsensical conditions and enforcement  
6 mechanisms don't make sense and only serve to deceive.

7           The application is incomplete without a noise  
8 study. It always has been. There are numerous data center  
9 horror stories in nearby counties. There are serious ethical  
10 red flags. You would have to defy your own Planning  
11 Commission. Approving the application would be a terrible  
12 scandal. Please do not do it. Thank you.

13           TOWN CLERK: Kristen Snow. Kristen Snow.  
14 My apologies.

15           MR. SNOW: That's okay. Good evening and  
16 thank you. My name is Kristen Snow. I live at 5443 Wemberley  
17 Drive in Warrenton, Virginia 20187. A lot of wonderful  
18 things have been said. I love Warrenton. I would like to  
19 talk about our favorite things in Warrenton. This list is  
20 by no means exhaustive and the music is plagiarized.

21           Dinament pearls g Wilker's toy store, bucolic  
22 farmland, horse riding galore, the War Free to Park, Fox den

1 Antique King. These are a few of my favorite things. First  
2 Friday festivals, the Christmas parade, Claires at the depot  
3 and Latitude's Fair Trade. Sundays at O'Brien's with Irish  
4 fiddling. These are a few of my favorite things.

5 Backdoor politics. Secret meetings make me  
6 feel so mad. I simply remember my favorite things and then  
7 I don't feel so bad. Civil War sites and carousel ice cream  
8 with full tree farm and Red Truck Bakery. All lives matter,  
9 Black Lives Matter protesting. These are a few of my favorite  
10 things.

11 Selling out citizens to corporate interest  
12 makes me feel so sad. I simply remember my favorite things  
13 and then I don't feel so bad. Warrenton Branch Green Way,  
14 the little redco booze, Massett St. John's deja bruise and  
15 deja vu's, Stores in downtown with guns and quilting. These  
16 are a few of my favorite things.

17 Manipulating foyer requests, claiming  
18 executive privilege makes me feel so mad. I simply remember  
19 my favorite things and then I don't feel so bad. Neighbors  
20 helping neighbors. The food bank thrift store. All kinds  
21 of charities helping the poor. Crossing political lines in  
22 community organizing. These are a few of my favorite things.

1                   Shoddy noise studies, lying lawyers make me  
2 feel so mad. I simply remember my favorite things and then  
3 I don't feel so bad. Remember our favorite things. Vote no  
4 on the data center. And one last thing because I have 30  
5 seconds. The quote that keeps coming to mind as I've listened  
6 to these wonderful, wonderful comments and input tonight is  
7 from Winston Churchill that he made when Hitler was marching  
8 across Europe and violating every promise he made to every  
9 sovereign nation that he crossed.

10                   And the quote was, do not. You cannot reason  
11 with a tiger when your head is in its mouth. So please don't  
12 put your head in the tiger's mouth. Say no.

13                   TOWN CLERK: Cindy Burbank on deck. Amy  
14 Trato, Dale Seitz.

15                   MS. BURBANK: Can't follow that. And I can't  
16 sing either, so, oh, well, you'll have to have straight text.  
17 My name is Cindy Burbank. I live in Barnell Court in  
18 Warrenton. This morning you spent a lot of time grappling  
19 with the noise issue and then again, tonight. And the more  
20 you grappled, the more difficult the problem seemed from the  
21 enforceability to the testimony of Dr. Liber. That once  
22 again, the Amazon noise study just is not credible. It's not

1 something you can trust.

2           But beyond noise, there's a Haitian saying,  
3 mountains, beyond mountains. And it means, after you climbed  
4 one mountain, then there's another mountain. So there are  
5 three more mountains to confront here. First is the risk of  
6 more data centers. We know that Amazon and other data centers  
7 are pushing south because of the power limits and the public  
8 resistance in Loudoun and Prince William.

9           Moreover, last year, Brandy Schaffer sent some  
10 of you an email that Amazon was going to contract for another  
11 data center within two years. That was a year and a half ago.  
12 Yet this morning you heard Amazon say they have no more plans  
13 for data centers in Warrenton. Really? Do you believe them?  
14 I don't believe that. I doubt that anyone in this room  
15 believes it, including the Amazon employees.

16           What we risk is more data centers in places  
17 like Falmer, the Old Wire Factory along Walker Drive and other  
18 neighborhoods. Another huge problem, contradiction of the  
19 comp plan. We all know this data center is a contradiction  
20 of the comp plan. It is, to not see that contradiction is  
21 to deceive yourself.

22           If you approve this land for a data center

1 there will be no possibility of mixed use for the new town  
2 in the comp plan. And that contradiction with the comp plan  
3 will not stand up in litigation. Third, a secretive process  
4 that has tried to block out your own citizens every step of  
5 the way.

6 In 2021, secret meetings, non-disclosure  
7 agreements, use of the consent agenda, lack of any effort to  
8 notify citizens about the zoning amendment and your own town  
9 manager going to work for Amazon. Since then, Amazon's  
10 submissions that are so shabby they telegraph that Amazon had  
11 assurances from somebody. That approval is a done deal.

12 Heavily redacted FOIAs, appointment to the  
13 Town Council of a vice president of a tech company that  
14 partners with Amazon. I'll stop. Thank you. Bye.

15 TOWN CLERK: Amy Trudo. Dale Seitz. Sandra  
16 Seitz.

17 MS. TRUDO: Good evening. Amy Trudo. Scott  
18 District. I was at the work session today and there was a  
19 lot of talk about whether the application's complete or  
20 incomplete and that terminology apparently applies to the  
21 basic initial administrative reception of the application.

22 So I just want to clarify that before

1 determining the application or making a determination, the  
2 town council, like the Planning Commission had to determine,  
3 or has to determine, whether the application complies with  
4 the special use provisions and whether it complies with the  
5 comprehensive plan.

6           And it's confusing to me, but for some reason,  
7 staff and the applicant today completely have avoided, I  
8 didn't see it anywhere in the staff report or anywhere in the  
9 analysis, the 11 criteria that are mandatory, which includes  
10 the information data and studies that have to be submitted,  
11 evaluated, to determine the use and the impacts, especially  
12 all the utilities; the water, the sewer, the storm water, the  
13 electric, and as well as the noise study. It's not just a  
14 checklist, it has to be looked at.

15           What is the impact on the community? Not just  
16 does it comply or doesn't it comply with certain other  
17 numbers. So that has to be looked at, 11-3, 10, 2, not just  
18 the 32 criteria. The other is the conditions. The  
19 conditions that we have been seeing are conditions to ensure  
20 compliance with those mandatory criteria at a future date.

21           Well, the reason you have these criteria that  
22 you have to evaluate before you approve SUP is to ensure that

1 you are protecting the health and the safety and the welfare  
2 of the citizens. But if you approve it and then seek the  
3 compliance, you are doing nothing to protect the citizens in  
4 the town and the county.

5           The last one is the compliance with the comp  
6 plan. I know a lot of you approved it. You went through the  
7 three year process. We talked about this morning how the  
8 owner of the property, she also told this council before you  
9 voted to approve the comp plan, that she believes she can do  
10 this. This live, work, play, environment, she embraced it,  
11 especially the affordable housing component, which we've  
12 heard so much about.

13           Mr. Heroux, you also spoke that night and you  
14 also asked this council to approve that comp plan. So I ask  
15 that you all seriously consider your confirmation to the town  
16 in this good planning, which is part of your mission statement  
17 to the town. That you will ensure good planning, and that  
18 only happens when you are consistent and reliable in the  
19 application of your comp plan. So I ask you to deny this SUP  
20 for all of these reasons. Thank you.

21           TOWN CLERK: Dale Seitz, Sandra Seitz,  
22 Matthew Wheldon. Are you Matthew?

1 MR. WHELDON: Yeah, Matthew. Hi. Good  
2 morning. My name is Matthew Wheldon. I live in Marshall  
3 Carters Run Road 506, Carters Run Road's in Marshall. Thank  
4 you for staying with it this late. This is a testament to  
5 you and of course, everyone still here.

6 My understanding is that there are at least 50  
7 data centers in Northern Virginia, and I'm just wondering  
8 perhaps by a show of hands, you could tell me whether you've  
9 interviewed any of the neighborhoods around those data  
10 centers, any of the communities, any of the local governments  
11 that work in the areas of these data centers. Anybody who's  
12 done anything like that? I'm guessing not.

13 It looks like we're going to have another 30  
14 days to review this application before vote. That's, I  
15 think, what I took away from the work session. Before this  
16 hearing and perhaps over those next 30 days, you or your staff  
17 could conduct some of those interviews or surveys of the  
18 neighborhoods around the data centers.

19 Fifty of them in Northern Virginia, you  
20 wouldn't have to go too far. And if what you've heard tonight  
21 doesn't convince you, then maybe some of those interviews or  
22 surveys would. Thank you again. Take care.

1 TOWN CLERK: Jean Banish, Andrew Orland.

2 Jean Banish, Andrew Orlands. Someone's coming up. Ms.  
3 Banish, you'll have the five minutes now.

4 MS. BANISH: Thank you. I'll just pick up  
5 where I left off. With a couple of other comments how naive  
6 and unprofessional can the town council be about habitually,  
7 over accommodating plan applicants and deceptions? Your  
8 town ordinance says under special use permits and waivers,  
9 10-3.10.1, authorization, special use permits may be granted  
10 upon finding that the use will not have a deleterious impact  
11 and will reflect the spirit and intent of the comprehensive  
12 plan as well as this ordinance.

13 There should be no discussions -- this is me  
14 now, there should be no discussions about when or if there  
15 might -- there should be no discussions about conditions when  
16 or if there might be deleterious effects because you don't  
17 know if there will be.

18 You are thereby not authorized to vote to grant  
19 this SUP. Having greenery on that site will do no harm to  
20 anyone. It would be educational to put a memorial walking  
21 trail around it with historic marker signs with the tail of  
22 the town's learning experience to help others avoid

1 self-destruction of their own hometowns.

2 Amazon, could donate the land to the National  
3 Park Service for a tax write off. If you are upset, resigned  
4 to damaging or compliant to damage being done, the public  
5 trust decision making dais is not one for you and it is better  
6 to resign before making this vote than to follow along with  
7 more bad guidance from the town attorney or town manager that  
8 would be further abuse of office.

9 Economic and community development require a  
10 well thought out functioning flow of non-harmful connections  
11 in a community system. Planning standards are to be met in  
12 advance, not after people have to complain and suffer after  
13 something is approved and constructed.

14 Honestly, what quality do you think will be  
15 attracted to Warrenton by your approval of this plan? The  
16 town has violated laws and violated policies and guidance for  
17 making decisions affecting everyone's future. Money will  
18 not make Warrenton's failures of governance any better.

19 Chasing over development and boundary line  
20 adjustments for short term profit now, will leave bills damage  
21 and decommissioning to the next generation, who can never  
22 regain what was lost through the sale of the soul of the

1 community. What needs serious immediate work is effective  
2 outreach for more active governing by the community, not the  
3 current dysfunctional system filling this hall with  
4 adversaries and wasting a lot of good residents' time.

5           The town charter requires that council members  
6 shall not vote if they have a conflict of interest. Since  
7 it is known that Warrenton residents are already moving  
8 because of this issue, as a real estate agent and active in  
9 town economic development council member Sutphin should also  
10 not vote on this issue.

11           TOWN CLERK: Andrew Orland, Hugh Hoffman,  
12 Robert Lambert.

13           MR. HOFFMAN: Good evening, Mr. Mayor and  
14 members of the Town Council. My name is Hugh Hoffman. I go  
15 by Tim. I live at 40191 Cray Drive in Vint Hill. Earlier  
16 this evening, I left an updated list of the petition signers,  
17 those who have signed the petition against the Amazon Data  
18 Center.

19           It consists of over 85 pages. There are about  
20 26, 27 names per page, that's over 2000. And it doesn't  
21 include the people who signed up today because I didn't have  
22 time to download them and add them to the list. That group

1 of people would fill 30 rooms of this size. 30 rooms of folks  
2 like you heard tonight telling you that they don't want this  
3 Amazon data Center.

4 We've heard funny statements, we've heard  
5 serious statements, we've had experts one after one coming  
6 in and telling you why this is a problem. But this is tangible  
7 proof that there are a lot of people who are telling you from  
8 the bottom of their heart that they don't want this to happen,  
9 at least not in the way it is.

10 What I've taken away from watching you all  
11 tonight is you're not ready for prime time at the very minimum.  
12 I was in charge of three major change projects for the  
13 Department of Defense. One was the redesign of the Army's  
14 officer personnel system, which consists of over 70,000  
15 people, 70,000 officers.

16 I was also in charge of redesigning, the army  
17 of the -- sorry, the Department of Defense's Planning System,  
18 which encompasses all seven of the combatant commands and it's  
19 a worldwide system. And I also was in charge of the DOD  
20 element that constituted the rewrite of all the regulations  
21 that tie -- that are tied to transferring dual use in military  
22 technology to other countries.

1                   If I had brought a product before an executive  
2 body at this stage of ill preparation, I would've literally  
3 been relieved on the spot. Relieved is a military term for  
4 being flat ass fired. This is unacceptable. We have been  
5 coming to meeting after meeting and you all are not ready to  
6 make a decision and the applicant hasn't given you the  
7 information to make that decision. I employ you to vote no  
8 on this SUP and put it to bed. Thank you.

9                   TOWN CLERK: Robert Lambert. Robert  
10 Lambert.

11                   MR. LAMBERT: Yes.

12                   TOWN CLERK: Robert.

13                   MR. LAMBERT: Good morning. Thank you for  
14 staying around. My address is 10454 Wheatley School Road,  
15 Marshall, Virginia. I live closer on this side of Orlene than  
16 I do to Marshall, and I consider Warrenton to be my closest  
17 town. And we love it. We've been here 12 years and I've been  
18 here long enough now to actually know somebody in the parade  
19 on Christmas.

20                   And we shop in all the streets -- all the shops  
21 down the street. We bring relatives down from all the -- for  
22 all that purpose, to come down and enjoy the town. And the

1 question really becomes, I'm looking here, it's really a  
2 question of perception. It's what do we want the town to do?  
3 What do we want it to look like? I hear all the time here  
4 right now that we don't want it to look like Prince William?

5                   And that's an accurate statement. The  
6 obvious question -- another question is why here and why now?  
7 We can build data centers. We know how to build data centers,  
8 but why does it have to be built here? Put it out where it  
9 isn't affecting everybody, where it isn't affecting the  
10 charm.

11                   Now I just hit a couple of points real quick  
12 on what everybody else has already said tonight. And one of  
13 the things for me is perception. I am relatively new to  
14 following this. I've only been doing it for about six months.  
15 Been to a couple of meetings, but perception's tough.

16                   I mean, I see that the -- I guess a former city  
17 manager left and is now working for Amazon; is that correct?  
18 Sorry, I read in FauquierNow, yesterday there was a thing,  
19 Jay Harran, I think you heard people say, you have conflict  
20 of interest.

21                   And from what I understand, according to the  
22 FauquierNow, it said we're going to leave it to the -- leave

1 the decision to recuse yourself to the township attorney.  
2 I've got 35 years in quality assurance. We've got a conflict  
3 of interest.

4 So, a couple of quick points then. I don't  
5 understand why we're having this whole meeting. The Planning  
6 Commission on a three to one decision with one abstention  
7 didn't recommend going further with this. Why have a  
8 planning committee? You have a comprehensive town plan and  
9 this isn't part of it.

10 Jonathan Elliot spoke earlier. He had three  
11 things. The middle one he said was, he hadn't heard any  
12 reason as to why -- from anybody, as to exactly why it has  
13 to be built here. And then just a couple of other things.  
14 The whole conditions for 25 that came up here once the --  
15 somebody mentioned this earlier, the camel's nose gets under  
16 the tent, once that happens, you have no recourse. You're  
17 not going to be able to stop that. Thank you very so much.

18 TOWN CLERK: David Dobson.

19 MR. DOBSON: Well, I guess we know how Kevin  
20 McCarthy felt. My points are very simple. You're at a point  
21 where you've got conditions. You can make those conditions  
22 work. You're that close already. Paragraph 17 is there.

1 You need to modify it. You need to make it better. You need  
2 to make it work. But this world is not a world of perfection.  
3 It's a world of good.

4 And the fact is that this will be good for the  
5 town. It will provide revenues, it will provide jobs, it will  
6 provide educational opportunities. Now you can ignore that  
7 or you can face the world and the world says this can be made  
8 a good thing. That's the point of conditions. Let's talk  
9 about enforcement. I get to wear lawyer's hat too.

10 I've represented hundreds of corporations  
11 based in the United States and worldwide in Europe, Asia.  
12 There is not one corporation in America or the world that would  
13 take on City Hall for the fun of it. There is a saying that  
14 you all know, do not fight city hall.

15 There's a reason for that. Good lawyers don't  
16 start that way. They try to make accommodations to come to  
17 a good compromise to make things work successfully.  
18 Enforcement is never a no risk proposition for either side.  
19 It is a common sense thing to avoid it. That's what good  
20 lawyers, good corporations do every time. It will be the same  
21 here.

22 Finally, noise. We've had a gentleman from

1 NASA, we've had other people talk about noise and I respect  
2 tremendously their experience. But nobody talked about OVH.  
3 Nobody talked about the Fauquier Hospital chilling plant.  
4 Nobody talked about Terramark, Equinix. Nobody talked about  
5 AWS and Haymarket, where we have real examples of things that  
6 work, where it has not had the noise, not had the vibrations,  
7 not had the humming.

8           So we don't need to look to Arizona for this.  
9 We don't need to look to Prince William. We can look at  
10 ourselves and ourselves, say there are solutions. That's the  
11 good point here, we can solve this. Conditions work and  
12 you're smart enough to come up with great conditions.

13           Finally on the funds. Okay, we're going to  
14 complain that Fauquier or not Fauquier allowed and was down  
15 \$60 million. My goodness, what a problem to have. They're  
16 on schedule for 576 million this year. 576 million. That's  
17 the kind of problem that would be pretty attractive for any  
18 community.

19           In the end, it's all about conditions. You've  
20 got the power and you've got the experience, and you've got  
21 the smartness to put up with good conditions. I recommend  
22 them to you. You'll make it successful. Thank you

1 TOWN CLERK: Jean Busby. Jean.

2 MS. BUSBY: Hi, I'm Jean Busby. I live in at  
3 8425 Buckley Mill Road, Gainesville, Virginia, which is the  
4 dividing line between Fauquier County right across the street  
5 from me. First of all, respectfully, Congressman Heroux, I  
6 think if there are conflicts of interest, I ask that you recuse  
7 yourself with an earnest, you know, good faith.

8 With that said -- sorry it's been a long day  
9 for all of us. I do want to mention that all those names that  
10 -- of people who have not been able to stay up this late, you  
11 can bet that the vast majority are against this data center  
12 as I am strongly against it.

13 I'm against it for several reasons. One is,  
14 if you -- as we've heard before, if you open the door to one  
15 data center, they'll build the infrastructure and others will  
16 follow. There's evidence that there's other waiting in the  
17 wings. There's the demand for the data centers.

18 With that infrastructure comes the  
19 electricity needed to do more, those tall power lines coming  
20 in Route 29. We heard a little bit about planting some trees  
21 around the data center, well, that's not going to cover those  
22 high-tension towers that are twice the size of the tree

1 canopies.

2           Also, it's a wrong spot. Citing it near 700  
3 homes within a half mile radius when a large proportion of  
4 Americans have their home as their primary asset, reducing  
5 the land values by citing that is going to reduce their ability  
6 to -- it'll affect their retirement and so you will steal it  
7 from them.

8           We've heard so many good experts. I was a  
9 little worried about when we were hearing about the sausage  
10 making, how to accommodate. What I'm seeing is that you've  
11 already made your decision. You're trying to accommodate  
12 Amazon and you don't have to. This should have been thrown  
13 out immediately, say no to it.

14           And all the people have spoken. People don't  
15 want this, and this is not the kind of community that they  
16 want. And if you have to do it and move forward, then when  
17 we heard before, you've got to get every detail in place done  
18 now because once you agree to have it, it's too late.

19           You can't make changes. You can't make them  
20 do something that's not -- they're not legally bound to do.  
21 So, I implore you to just say, no, toss this out, move on,  
22 and let us restore faith in this process. Thank you.

1 TOWN CLERK: Mr. Mayor, I have no further  
2 speakers signed up. I will call the names that have been  
3 missed, if you'd like, for the last call. Bill Wright.

4 MS. DORA: Can I be added to?

5 TOWN CLERK: Yeah, we can add. I'd like to  
6 call the names one more time. Bill Wright, David Wynn,  
7 Bridget Wolf, William Ziegler, Ryan Haggerty, Kenneth Thomas,  
8 Julie Brightus, Ann Kehoe, Georgia Herbert, Katherine Kulik,  
9 Roseanne Woodruff, Jonathan Elliot, Redmond Nae, Kevin  
10 O'Neill, Jessica Matthews, Katherine Hayes, Laura Hettinger,  
11 James L. Lou Spencer, Brian Haggerty, Corey Ann Packard,  
12 Dale Syz, Sandra Syz, Andrew Orlands, Larry Kovac. May I add  
13 additional speakers? Lee Ousley, Mr. Mayor.

14 MR. OUSLEY: Hi, once again. This is Terry  
15 Ousley for Lee Ousley, because my wife is taking care of her  
16 sick father. No, this is Terry Ousley for Lee Ousley, sorry.  
17 I think, I speak for everybody and nobody likes to do this.  
18 It's kind of nervous for us, and I'm not good at confronting  
19 authority and I respect you guys, but I care about this town  
20 and I want to stand for this town.

21 And I think that's what you're seeing citizens  
22 do here. And it's not something that we feel like we have

1 to do, that we want to do, but I think we feel like we have  
2 to do it. And I just point you to the motif there of the county  
3 with the town skyline, you see the courthouse, you see a couple  
4 historic buildings, you see some trees. There's probably an  
5 outline of a church in there as well.

6           And the only thing I ask you to do is to imagine  
7 a data center blocking out that entire image. And if you vote  
8 for this data center, in my mind, in my heart, you're blocking  
9 out the entire town. So stand up for us, please. We care.  
10 We wouldn't be here. Some of us have to go to work tomorrow  
11 morning. So, stand up for us please, and don't block out the  
12 town with the data center. Thank you.

13           TOWN CLERK: Jennifer Dora.

14           MS. DORA: Yes. Hello, my name is Jennifer  
15 Dora. I am a resident of Warrenton, 6064 Whipper Will Drive  
16 and 20187. I'm speaking as an individual on my own behalf,  
17 and I oppose the applicant's request for a special use permit  
18 for data center. I just wanted to touch on some things. I've  
19 had to amend this as people have talked.

20           I would like to highlight the noise as  
21 everybody has before, but I really like to stress the power  
22 use and I find that the power use, some folks have talked about

1 it being two times the power, I believe of the town, you know,  
2 and how these data centers are popping up all over in the power  
3 use.

4           And I'd asked the council to please consider  
5 how that's going impact the town's green goals in its  
6 comprehensive plan. I mean, you've set some great  
7 initiatives for yourself, but how are you going to meet those  
8 initiatives if you've got this entity elsewhere that's  
9 sucking up so much power, why bother?

10           And I'm also wondering if you're on the issue  
11 of conditions, if you do decide to proceed with this,  
12 condition perhaps that they pursue green power. I mean, why  
13 should we as a town be shouldering the burden of more green  
14 future and then allowing these other folks to come in and  
15 continue to use fossil fuels.

16           So with regard to the use, it was mentioned  
17 earlier about the cloud, I just wanted to touch on that point.  
18 Data collection is a big business and there is a reason that  
19 they're collecting this data. And it's not just us uploading  
20 photos on the web, there's been a lot that's been said about  
21 them actively collecting this data.

22           So they're taking data sometimes without

1 permission, not necessarily Amazon, but just the business of  
2 data collection and they need a place to store it, and then  
3 they want to store it in our backyard. So, my last point that  
4 I wanted to make was what happens if this is denied?

5 I mean, we're talking about denial. Does that  
6 mean this is over or does Amazon have to go back and do its  
7 diligence? And you have more time to reflect on this and we  
8 get a better application and we get answers to these  
9 questions. So thank you for your time.

10 TOWN CLERK: Mr. Mayor, I have no further  
11 speaker signed up.

12 MR. NEVILL: Is there anyone in the audience  
13 who desires to speak before we wind this session down?  
14 Hearing none at the request of the applicant and council we'll  
15 keep the public hearing open. Submitting comments through  
16 the town website will continue to be on and continue entered  
17 into the record. Those speakers who signed up to speak this  
18 evening who were not able to speak will remain on the list.

19 And I think if there are other members who have  
20 not spoken will have an opportunity to sign up, before the  
21 next meeting. If you have spoken, you have exhausted your  
22 opportunity. So only those people who have not spoken

1 tonight will have the opportunity to speak at the continuation  
2 of the public hearing when we reconvene in the February  
3 meeting.

4           So as the public hearing remains open, there  
5 is no motion to be asked for. And we will move on with the  
6 agenda. Which brings us to the consent agenda, and I will  
7 seek a motion to approve.

8           MR. HAMBY: Mr. Mayor, I move that we approve  
9 this consent agenda.

10           MR. NEVILL: So moved by Councilman Hamby.

11           MR. HARTMAN: I second.

12           MR. NEVILL: Second by Vice Mayor Hartman.

13 Discussion on the motion? Hearing none. All in favor?

14           AUDIENCE: Aye.

15           MR. NEVILL: Opposed? Motion -- was that an  
16 aye from you?

17           MR. MOONEY: Yes, Mr. Mayor.

18           MR. NEVILL: Okay. Thank you. I'm just  
19 clarifying. Motion carries unanimously. The consent  
20 agenda is adopted. New business, from our morning meeting  
21 this evening or this morning, or yesterday morning as it was,  
22 we have reelection of a vice mayor and seek a nomination.

1 MR. HEROUX: Mr. Mayor, I'd like to nominate  
2 Councilman Hartman.

3 MR. NEVILL: Okay. Councilman Heroux  
4 nominates Councilman Hartman.

5 MR. HAMBY: Mr. Mayor, I'll second.

6 MR. NEVILL: Seconded by Councilman Hamby.  
7 You want to continue on with this position, sir?

8 MR. HARTMAN: Yes, sir. I'll be willing to do  
9 it.

10 MR. NEVILL: Is there a discussion on the  
11 nomination that's on the floor? Hearing none. I'll call the  
12 question. All in favor?

13 AUDIENCE: Aye.

14 MR. NEVILL: Opposed?

15 MR. MOONEY: Abstain.

16 MR. NEVILL: You will abstaining?

17 MR. MOONEY: Yes, sir.

18 MR. SEMPLE: I abstain.

19 MR. NEVILL: So the motion carries 5-2 -- I'm  
20 sorry, 5-0 with two abstentions. All right. And that will  
21 now bring us to the request for unfinished business brought  
22 to the request of Councilman Hamby a discussion on the

1 boundary line adjustment.

2 MR. HAMBY: Can I start?

3 MR. NEVILL: Yes, sir.

4 MR. HAMBY: Thank you. As for agenda update  
5 for boundary line adjustment. So Mr. Mayor, I move that the  
6 town removes its request from the county for boundary line  
7 adjustment

8 MR. NEVILL: Motion on the floor is to  
9 withdraw the boundary line adjustment request from the  
10 county. Is there a second?

11 MS. SUTPHIN: I'll second that.

12 MR. NEVILL: Seconded by Councilwoman  
13 Sutphin. Mr. Hamby, you have the privilege of the first  
14 motion of discussion.

15 MR. HAMBY: Sure. It's so quiet now at 1:00  
16 a.m. So boundary line adjustment. Boundary line  
17 adjustment's been going on for years, many years before I came  
18 up here. Many years now. Boundary line adjustment's gone  
19 back and forth, so to me at this time, there's no reason to  
20 pursue boundary line adjustment from the town side.

21 As normal, if there's anyone who lives outside  
22 in the county who wants to apply to be moved into the town,

1 they're more than welcome to it at any time. At least that's  
2 my opinion. But the five areas that we have gone through  
3 since I think we started in 2016, the five areas for boundary  
4 line adjustment, I want to withdraw from the county.  
5 Proposal.

6 MR. NEVILL: Discussion from anyone else?

7 MR. HEROUX: Mr. Mayor.

8 MR. NEVILL: Mr. Heroux.

9 MR. HEROUX: I concur. I -- we have a lot to  
10 do in our existing 4.33 square miles of the town of Warrenton.  
11 We have a lot of things to do. We got 91 miles of road, we  
12 got to figure out a way to fix. We got 87 miles of pipes that  
13 are blowing up and leaking. We got wastewater treatment  
14 plants that we've got to figure out something to do with.

15 We've got 10,000 citizens that we've got to  
16 serve. We've got 151 employees that we've got to figure out  
17 how to keep them. We've got to figure out how to keep our  
18 police officers paid well. We got parking lots, we got pieces  
19 of equipment, we got cemeteries, we got parks. We got a lot  
20 on our plate to do, to figure out how to pay for, prioritize,  
21 and I think we got a plate full. So I concur with Councilman  
22 Hamby. Let's get 4.33 miles right.

1 MR. NEVILL: Councilman Semple.

2 MR. SEMPLE: Well, first of all, I thank  
3 Councilman Hamby.

4 MR. HAMBY: I'll help you out, Bill.

5 MR. SEMPLE: Yeah you've helped. Ringing  
6 this motion, I mean, I feel our comprehensive plan, we're  
7 excited about a boundary line adjustment, would've mentioned  
8 it. And there's plenty in that plan that will as a guide and  
9 as an aspiring document in a variety of ways help us do what  
10 we can with the boundaries that we currently have. So I  
11 totally endorse it. Thank you very much.

12 MR. NEVILL: Discussion response anyone else?  
13 Hearing none, we'll call the question. All in favor?

14 AUDIENCE: Aye.

15 MR. NEVILL: Opposed? Any abstentions?  
16 Motion carries unanimously. Which brings us to our Town  
17 Attorney's report. Mr. Simmons.

18 MR. SIMMONS: No report tonight, mayor.  
19 Thank you.

20 MR. NEVILL: Thank you, sir. Town manager's  
21 report. Mr. Martino.

22 MR. MARTINO: No report, but a couple of

1 items. First, just a few minutes ago, and I'm sorry I didn't  
2 catch this five minutes ago you, adopted your regular town  
3 meeting calendar, which specifies you'd be meeting on  
4 February 14th at 21 Main. And so, I need to ask you to  
5 consider a resolution now to hold your meeting for February  
6 14th at Fauquier High School based on our prior discussions  
7 earlier this morning to continue the public hearing.

8           So, we would advertise for the meeting  
9 February 14th, regular time 6:30 at Fauquier High School.  
10 And we would have a snow date, so to speak. If the schools  
11 close, we can't get into the schools, we'd want to reconvene  
12 right here at 21 Main, but we hopefully -- it's February, but  
13 hopefully we'll have a clear day and we can -- the meeting  
14 can go off smoothly.

15           MR. NEVILL: Okay. May I ask for a motion for  
16 that said resolution?

17           MR. HARTMAN: I make a motion we adopt that  
18 resolution as stated by the town manager.

19           MR. NEVILL: So the motion would be to direct  
20 staff to advertise for the February meeting to be held at a  
21 remote location at Fauquier High School and with the snow date  
22 alternate location is here. So this is a motion to direct

1 staff to advertise accordingly.

2 MR. MARTINO: That's correct.

3 MR. NEVILL: So moved by the Vice mayor. Is  
4 there a second?

5 MR. MCGUIRE: I'll second that.

6 MR. NEVILL: Second by Councilman McGuire.

7 Discussion on the motion.

8 MR. HEROUX: Mr. Mayor, the only condition I  
9 would suggest in the resolution is let's make sure we have  
10 a broadcast capability that those citizens who cannot come  
11 here, whether they're at home or they're commuting in, have  
12 the ability to see what happens over at Fauquier High School.

13 MR. NEVILL: Thank you, sir. And I believe  
14 that was affirmed this morning, that that room does have audio  
15 visual capabilities. So thank you. Call the question, all  
16 in favor?

17 AUDIENCE: Aye.

18 MR. NEVILL: Opposed? Motion carries on  
19 anonymously. Getting a little punchy at one o'clock here in  
20 the morning. Okay. Any further report Mr. Martino?

21 MR. MARTINO: No, sir. Thank you.

22 MR. NEVILL: Okay. That will bring us to

1 Council Member's time. I will start to our out large  
2 candidates -- I'm sorry, out large council members. I'll  
3 start with Mr. McGuire.

4 MR. MCGUIRE: Thank you Mr. Mayor. Just in  
5 light of what's going on, I'll need the three minutes. No,  
6 I won't. I just want to thank everyone for coming out tonight  
7 and everybody on the council for working together, and it's  
8 been a great experience and I look forward to this next month.  
9 Thank you.

10 MR. NEVILL: Councilman Mooney.

11 MR. MOONEY: Thank you, Mr. Mayor. I want to  
12 close the night with a great quote from Abe Lincoln who said,  
13 whatever you are, be a good one. And I want to thank you guys  
14 for being good citizens and for all being here. I'm thankful  
15 for all the guidance and help on my first meeting. Thank you,  
16 Mr. Mayor. That's all.

17 MR. NEVILL: Councilwoman Sutphin.

18 MS. SUTPHIN: I'd like to say that as much as  
19 there's been disagreements, I think we're all here because  
20 we love our town. And to say that one person does or doesn't  
21 love the town because they're not agreeing is unfair. I've  
22 heard a lot of stuff this evening about what we love about

1 our town. Our town is ever changing.

2                   And because I ask or have phone conversations  
3 with Amazon doesn't mean I'm hiding anything. Because  
4 honestly, if I was hiding it, nobody would've known I had the  
5 dog on conversation to begin with, so I wasn't hiding it.  
6 That's part of my due diligence, is to find out as much  
7 information before I make a vote.

8                   And to find out all the information before I  
9 run around town saying, I'm going to vote or I'm not going  
10 to vote, or I'm going to do this, that, or the other. So  
11 that's why I've been quiet about it until I make my mind up,  
12 it's not fair. I've talked to a lot of people. I've knocked  
13 on doors, I've visited three different data centers because  
14 I am trying to find the truth.

15                   So to say that I'm trying to hide or do anything  
16 like that, it's unfortunate. I can't get anybody to change  
17 their mind because so many people have already made up their  
18 mind about me. But one thing that I do know, this is my town.  
19 I will die fighting for my town and what I feel is right.

20                   So, I appreciate the fact that everybody loves  
21 it. As a little girl, I have many memories of Christmases  
22 here. They aren't anything like when I grew up here, but I

1 still love it. I'll still do everything I can to help and  
2 protect my town. And I'm actually pretty excited that  
3 Councilman Hartman has decided that he wants to be our vice  
4 mayor still, because I think he's done one hell of a job.

5 He's fair, he's honest. He's talked me off  
6 the rooftops a couple of times and I think that he's going  
7 to do a wonderful job. So thank you for taking on that  
8 responsibility again, and thank you for our mayor for keeping  
9 me safe and quiet. So anyway -- and welcome our two new  
10 members to this circus we call Council. Best of luck because  
11 I know as a newbie it was a little bit confusing for me and  
12 some hard lessons. So, welcome.

13 MR. NEVILL: Councilman Semple.

14 MR. SEMPLE: I just want to say thank you to  
15 all the citizens who came out tonight. I see many friends  
16 of mine who are residents in my ward and I think you spoke  
17 from the heart, you spoke eloquently. You actually said a  
18 few things that as hard as I've worked on this I hadn't thought  
19 of.

20 And there is a wonderful sense of town when our  
21 town comes here, and this is our town. You represent the  
22 residents, who are our town, along with the businesses. And

1 you are the soul of our town, and that, of course, is why you're  
2 here. You would like to preserve that soul.

3 So it is been a difficult day and I guess I have  
4 to admit, I'm a little glad it's coming to an end. I'm looking  
5 forward to getting home and getting a good night's sleep. But  
6 I appreciate all the hard work that staff has done on this,  
7 on everything that was presented today. I know we've had  
8 difficult conversations among our council members, but that's  
9 why we're up here.

10 And I appreciate the mayor having allowed us  
11 to have a free wheeling at times discourse and keeping us in  
12 our rails. And so, I wish if you don't, you can always, at  
13 the next public hearing, you don't have to speak, you can just  
14 come and watch. So see what happens next time. I look  
15 forward to seeing you again. Thank you.

16 MR. NEVILL: I won't overlook you, Brett.

17 MR. HAMBY: Thanks.

18 MR. NEVILL: Councilman Hamby.

19 MR. HAMBY: Great. It's been a long day.  
20 We've been here, I think for about 21 hours, I don't know,  
21 I got to be working four hours, five hours. I'll keep it short  
22 as possible. Thanks everybody that came out as usual. This

1 is the place where everybody gets a chance to talk. There's  
2 certainly been a lot of people in and out of here today, don't  
3 get me wrong.

4           There's a couple things that caught my eye. I  
5 know that there's only like two or three people who came here  
6 to voice their opinion in favor, but I just wish that everyone  
7 would respect them. Don't make fun of them behind their back.  
8 People are laughing, that's just rude. There's only three  
9 of them, just be nice.

10           We all sit up here and we don't speak back when  
11 people are speaking. That's just etiquette. It's your time  
12 for your First Amendment Right. You know somebody told me  
13 today that like, you're the senior guy up there now, and I  
14 was like, Bill's way older. I had to keep Bill awake a couple  
15 times tonight. I was helping him out. But, you know, they  
16 always say, politics, get a dog because you don't have any  
17 friends. I get it.

18           Just the things that go on, this is certainly  
19 one of those charged up issues. We've had them before, and  
20 this isn't the last time. Everybody always starts out  
21 everything they say with how long they've been here. I've  
22 been here for 47 years. I've always lived here. Walmart was

1 bad. Home Depot was bad. Everything that's large is usually  
2 bad.

3 It is very strange. I know that both sides,  
4 if you support data centers or you don't support data centers.  
5 I run into people all the time and I know that it looks like  
6 everybody's against, but there are a lot of people for, there  
7 are, there's 73,000 people in this county.

8 And I'm not saying you guys haven't covered all  
9 of them. You probably have, but, I talk to people and I'm  
10 like, why are data centers allowed in Vin Hill? Why are data  
11 centers allowed in Remington? Why are data centers operating  
12 on Bearwallow Hill? I get it. These are all questions that  
13 we have to work through. Not saying right or wrong, but data  
14 centers have been operating in this county for years.

15 I think as we go forward, is the Amazon  
16 application perfect? Nope. It hasn't been since we saw it,  
17 probably November. But I think everybody's trying to work  
18 through some stuff. I know some people, they're over here,  
19 knows the only answer that they'll take. Some people are over  
20 here, let it go through. Some people are in the middle, they  
21 lean either way, both sides all the time, but we'll work  
22 through it.

1                   We'll go into next month, I'm sure everybody  
2 will show up and we'll see what happens. But like I said,  
3 I know it's really late. And thank you to everybody that's  
4 stayed. Most people, and this is no offense to anybody, but  
5 normally for the last seven and a half years, when their  
6 issue's over, they're gone. At least everybody stayed, or  
7 the majority, not everybody, but the majority of people  
8 stayed. That's all I got. Thank you for coming. Thank you.

9                   MR. NEVILL: Thank you Councilman Hamby.  
10 Vice Mayor Hartman.

11                   MR. HARTMAN: All right. I'm going to count  
12 on as a long two days. We're in day two now. I'm tired. I  
13 got to be at work at eight o'clock in the morning. What I  
14 have to do is after retiring 32 years of law enforcement, I  
15 now work at a school, so I have to direct traffic tomorrow.  
16 So town police gets a call about an accident in front of  
17 Brumfield, I'm tired.

18                   But on a serious note, it was recently Law  
19 Enforcement Appreciation Day. I want recognize these guys  
20 and girls in our local law enforcement to do such a great job  
21 day in, day out. We recently had Christmas and New Years  
22 while we were all home celebrating or wherever celebrating

1 and home sleeping, these guys and girls were out working hard,  
2 keeping us safe, so thank you very much.

3 I also want to just -- I just wish Chief Conius  
4 was here, I want to just note the recent loss of Dr. Ellsworth  
5 Weaver. He's the president of the Fauquier branch of the  
6 NAACP and a big supporter of our local law enforcement. And  
7 he even attended the first, I think it was the first Citizens  
8 Academy, the inaugural Citizens Academy for the police  
9 department.

10 And he also served on the police department's  
11 community action team. And he was just a well-known -- he  
12 was a giant in the community and a well-known community  
13 leader. And I always enjoyed talking to him and always  
14 learned something. He always had a smile on his face, and  
15 it made me smile. And I'm going to miss him, and I know he'll  
16 be greatly missed by our community. So I just wanted to  
17 recognize Dr. Weaver.

18 And welcome to our two new council members. I  
19 look forward to working with you and quite an introduction  
20 today. So, look forward to more of it. Thank you.

21 MR. NEVILL: Councilman Heroux.

22 MR. HEROUX: Thank you, Mr. Mayor.

1           Real quick, I also want to thank everyone for  
2 coming out tonight. On a personal note, I'd like to -- I get  
3 a lot of emails from folks and I want to thank a lot of folks.  
4 You heard I was in New Hampshire, my father passed away on  
5 the 23rd of December, received many condolences.

6           And that's why I love Warrenton, people that  
7 I don't even know sending me email of condolence. So thank  
8 you very much for your kindness. I just can't tell you how  
9 much it means to me. Along that line of email, I'm a little  
10 bit behind, so I do try to get back to everyone who sends me  
11 something in one shape or form, may not be the answer you want  
12 or you're looking for, but I continue to do what I can.

13           I might snap back a little bit sometimes, and  
14 things, it's not personal. Just trying to clarify things up  
15 a little bit. But I will try to be as responsive as I can  
16 to you. I do have two questions that I welcome your input  
17 on and don't read into these questions just -- I'm looking  
18 for feedback.

19           This particular property that we're talking  
20 about at the entrance of town here that Amazon now owns, it  
21 came into the town in 1960, 63 years later, it's vacant.  
22 There's nothing there. There's nothing that's ever been

1 there. I've heard a lot in this conversation about we need  
2 mixed use. We need whether it's parks or we need a college.

3 I just ask you to think through who's we and  
4 where is we? We hasn't been showing up for quite some time,  
5 or when they have in developments, they've backed out. So  
6 I am not -- again, don't read into it. I'm just trying --  
7 I'd love to hear from you when we talk about these 60 -- 40  
8 acres that have been around for 63 years vacant doing nothing,  
9 offering no jobs, bringing no, I know no talks about taxes,  
10 bringing no revenue to town, developers back out.

11 Who is it? Who's we that's going to put mixed  
12 use or whatever in there? I welcome your thoughts on that  
13 and maybe there's something we're doing wrong. Maybe we're  
14 not marketing it correctly. Maybe we're not thinking about  
15 it correctly. Maybe it needs to be rezoned. I don't know.  
16 But now keep in mind, somebody owns it right now. Just like  
17 you own your property, Amazon owns that property.

18 And again, like I said earlier, let's please  
19 try and show them respect. They are a property owner in this  
20 town now. So that's question number one. Number two is, and  
21 again, don't read into it, should there be data centers in  
22 Fauquier County?

1                   Should there be data centers in Warrenton?  
2   Should there be data centers in Vin Hill?   Should there be  
3   data centers in Remington, Catlett, any of the industrial  
4   zoned areas in the county?   It was about 4,000 acres that I  
5   think the county has for industrial.   Should this not happen  
6   here?   And tell us your feedback on that.   I think I know it,  
7   but should they not even exist in this county?

8                   Those are two questions I would love to hear  
9   your input on.   Email me, and again, I'll try and get back  
10   to you, but trust me, every email is read, I listen to it,  
11   I read it, I think about it.   I'll do my best to get back to  
12   it.   But those are two questions I would love to hear your  
13   opinions on.   Thank you.

14                  MR. NEVILL:   Thank you, sir.   I'd just like to  
15   echo.   I thank Vice Mayor Hartman for bringing up the memory  
16   and the loss of this community with the giant that is Dr.  
17   Ellsworth Weaver.   That was a tragic news.   I had heard a few  
18   days earlier that -- actually a few weeks earlier, Mrs. Weaver  
19   was in and had indicated that his health was declining.

20                  And through, I know great prayers among the  
21   community he was sent to the arms of the Lord in good comfort,  
22   from this community.   So I thank for everyone who we're

1 offering those prayers on his behalf and know that he was  
2 deeply loved and will be sorely missed by this community.

3 I just would also like to thank everyone for  
4 their impassioned time this evening. Their willingness to  
5 stay well past one o'clock in the evening to speak on behalf  
6 of the town that you love. You are all being heard, we're  
7 listening. Our job as Councilman Heroux and as everyone has  
8 indicated, is to listen and as also to weigh all the facts  
9 fairly and objectively.

10 And we all intend to do so in the best interest  
11 and service of our community that we all love and our  
12 responsibility towards ensuring a positive, solvent and  
13 resilient town of Warrenton. So know that we are all taking  
14 our obligations with extreme seriousness and sobriety.

15 So, unless there is any objection, at which  
16 point I don't think there would be, at 1:23 on Wednesday,  
17 January 11th, this meeting of county council is now adjourned.

FORM MOTION FOR CONVENING A CLOSED MEETING 01/10/2023

I move that the Council convene in closed session to discuss the following:

----- As permitted by Virginia Code § 2.2-3711 (A)(1), a personnel matter involving:  
----- Discussion, consideration, or interviews of prospective candidates for employment or appointment; OR  
----- assignment, appointment, promotion, performance, demotion, salaries, disciplining, or resignation of specific public officers, appointees, or employees of the Town; specifically dealing with \_\_\_\_\_ [Give department, job title(s), or job category].

----- As permitted by Virginia Code § 2.2-3711 (A)(3), a matter involving:  
----- discussion or consideration of the acquisition of real property for a public purpose; OR  
----- disposition of publicly held real property specifically involving \_\_\_\_\_ [Give location of property], because discussion in an open meeting would adversely affect the City's bargaining position or negotiating strategy.

----- As permitted by Virginia Code § 2.2-3711 (A)(4), a matter requiring the protection of the privacy of individuals in personal matters not involving the public business.

----- As permitted by Virginia Code § 2.2-3711 (A)(7), consultation with legal counsel or briefing by staff members or consultants pertaining to:  
----- probable litigation involving \_\_\_\_\_ [Give subject]; OR  
----- the pending case of \_\_\_\_\_ [Give case name], where such consultation or briefing in open meeting would adversely affect the negotiating or litigating posture of the City.

X----- As permitted by Virginia Code § 2.2-3711 (A)(8), consultation with legal counsel regarding specific legal matters requiring the provision of legal advice by such counsel, relating to \_\_CFFC Lawsuit update, Walmart Tax Matter Update \_\_\_\_\_ [Give nature of matter].

----- As permitted by Virginia Code § 2.2-3711 (A)(29), discussion of the award of a public contract for [Give nature of the contract] involving the expenditure of public funds, including interviews of bidders or offerors, and discussion of the terms or scope of such contract, where discussion in an open session would adversely affect the bargaining position or negotiating strategy of the City Council.

----- As permitted by Virginia Code § \_\_\_\_\_, a matter involving:  
-----

[IDENTIFY THE APPLICABLE PARAGRAPH OF § 2.2-3711(A) OR OTHER LAW AND GIVE THE SUBJECT MATTER AND PURPOSE FOR THE CLOSED SESSION.]

**A RESOLUTION TO BUDGET AND APPROPRIATE \$458,001 FOR THE TIMBER FENCE TRAIL CAPITAL PROJECT**

**WHEREAS**, the Warrenton Town Council is charged by the Code of Virginia with the preparation of an annual budget for the Town of Warrenton; and

**WHEREAS**, on June 16, 2022, the Town Council adopted the Town of Warrenton Fiscal Year 2023 Budget; and

**WHEREAS**, the Fiscal Year 2023 budget included a partial appropriation for the Town's ten percent share of the Timber Fence Trail Project to be funded by the American Rescue Plan Act; and

**WHEREAS**, the balance of the project is to be funded ten percent by the County of Fauquier and eighty percent by a Federal Highway Administration Transportation Alternatives Program administered by the Virginia Department of Transportation; and

**WHEREAS**, the design of the project is nearing completion and the appropriation for the balance of funding will need to be in place to award the construction, engineering and inspection contracts; and

**NOW THEREFORE, BE IT RESOLVED**, by the Town Council of the Town of Warrenton this 10<sup>th</sup> day of January 2023, that the Fiscal Year 2023 Capital Project Fund budget be, and is hereby, amended to budget and appropriate additional funds in the amount of \$458,001 for the Timber Fence Trail project, \$50,889 of which will be funded ten percent by the County of Fauquier and \$407,112 by Federal funds.

**A RESOLUTION ADOPTING AND ESTABLISHING A PERMANENT "ROLLOUTWARRENTON!" PROGRAM, ESTABLISHING EFFECTIVE DATES < PERMITTING < FEES AND OTHER REQUIREMENTS SUBJECT TO CONDITIONS**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the County of Fauquier; and

**WHEREAS**, the Town developed and implemented a temporary program called "RollOutWarrenton!" to assist businesses navigating the restrictions from the pandemic; and

**WHEREAS**, Town Council has decided to develop the temporary program into a permanent program; and

**WHEREAS**, Town staff in cooperation with EOTW has developed program requirements and a "Parklet Program Guide" to develop and implement an equitable, consistent, and predictable program; and

**WHEREAS**, The established timeframe for participation in the program is April 1 through November 10 each year; and

**WHEREAS**, any business may apply for a permit through the Town Community Development Department for use of the public space during this time period; and

**WHEREAS**, upon approval of the use agreement and payment of all fees, the applicant can construct and use the designated space as per all the adopted requirements outlined in the "Parklet Program Guide"; and

**WHEREAS**, a fee of \$1.20 per square foot of space, the standard size of a parking space, will be required per month of designated use; and

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council Hereby adopts the "RollOutWarrenton!" program as a permanent program subject to conditions.

**BE IT FURTHER RESOLVED** that First Street will remain closed to vehicle traffic and continue to be developed into a public space and pedestrian accessway to Main Street;

**BE IT FURTHER RESOLVED** that Second St. will remain open to vehicle traffic;

**BE IT FURTHER RESOLVED** that any street closures will be handled through a special event permit;

**BE IT FURTHER RESOLVED** that the Town reserves the right to reassess the program and any of the provisions therein and make adjustments as necessary to ensure the continuing success of the program.

**A RESOLUTION TO BUDGET AND APPROPRIATE \$5,000,000 OF DEBT PROCEEDS FOR WATER AND SEWER CAPITAL PROJECTS, AND \$75,090 OF WATER AND SEWER FUND RESERVES FOR DEBT SERVICE IN THE WATER AND SEWER FUND**

**WHEREAS**, the Warrenton Town Council is charged by the Code of Virginia with the preparation of an annual budget for the Town of Warrenton; and

**WHEREAS**, on June 16, 2022, the Town Council adopted the Town of Warrenton Fiscal Year 2023 Budget; and

**WHEREAS**, on September 13, 2022, the Town Council authorized the issuance of up to \$5,400,000 in financing for water and sewer projects. The Town subsequently entered into a 17-year loan in the amount of \$5,000,000; and

**WHEREAS**, at the September 13, 2022 Town Council meeting, the Town Council appropriated \$4,500,000 in American Rescue Plan Act funding for water and sewer projects; and

**WHEREAS**, at the December 13, 2022 Town Council work session, Town staff presented an overview of water and sewer operations and an updated prioritization of approved Capital Improvement Program projects. Some of the projects identified during this presentation are not currently included in the Fiscal Year 2023 adopted budget and reflect increased cost estimates. Three of the projects are currently appropriated and funded by Water and Sewer reserves; and

**WHEREAS**, the \$4,500,000 in ARPA funding will be allocated to the Primary Clarifier project and the \$5,000,000 of bond proceeds will be allocated to the following projects: 1) Water Fill Station - \$506,314, 2) Gravity Sludge Thickener Upgrade - \$600,000, 3) Filter Control Valves - \$750,000, 4) Primary Clarifier (project balance) - \$2,274,682, and 5) Water Treatment Plant Clearwell Project (partial funding) - \$869,004; and

**WHEREAS**, the first interest-only payment for the bond debt service will be due on April 1, 2023 in the amount of \$75,090, which is not appropriated in the Fiscal Year 2023 adopted budget; and

**NOW THEREFORE, BE IT RESOLVED**, by the Town Council of the Town of Warrenton this 10<sup>th</sup> day of January 2023, that the Fiscal Year 2023 budget be, and is hereby, amended and budgeted to appropriate \$5,000,000 of bond proceeds to the Water and Sewer projects identified above, to appropriate Water and Sewer reserves in the amount of \$75,090 for the first debt service payment on the bond, and to reduce the use of Water and Sewer reserves for projects identified above by \$1,975,318.

PRESENT Mr. Carter Nevill, Mayor; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney; Mr. Christopher E. Martino, Interim Town Manager; Mr. Tommy Cureton, Deputy Town Manager; Mr. Martin Crim, Town Attorney; Mr. Stephen Clough, Town Clerk.

PRESENT ELECTRONICALLY Ms. Heather Sutphin

ABSENT None

**The minutes laid out will be a brief recap of the agenda items. Please see the included Transcript for more in-depth information.**

### WORKSESSION - 9:00 AM

The meeting was called to order at 9am. Mayor Carter Nevell stated that a quorum was physically present and that Ms. Heather Sutphin was attending the meeting electronically.

Ms. Sutphin Stated for the record that she was at her residence in Warrenton, she was attending electronically due to health reasons, she and her husband both have bronchitis.

## 1. Closed Session

Vice Mayor Hartman moved to convene a closed session under:

Virginia Code § 2.2-3711 (A)(1), a personnel matter involving: Town Manager Recruitment, Acting Town Manager Appointment, Police Department Personnel Update

Va. Code §2.2-3711 (A)(8) Legal matters, specifically where such matters require the provision of legal advice, under Virginia Code Specifically relating to Walmart Tax Matter Update, Process and consideration of SUP 2022-03.

Virginia Code § 2.2-3711(A)(19) . a matter involving: Police Department Briefing on Safety of Town Council, RSM Briefing of Information Technology evaluation.

Mr. Brett Hamby Seconded.

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

**Nays:**

**Abstention:**

**Absent:**

Upon reconvening from the closed session, Town Council adopted the following Certification of Closed meeting:

### CERTIFICATION OF CLOSED MEETING

**WHEREAS**, the Town Council of the Town of Warrenton has convened a closed meeting on this date pursuant to an affirmative recorded vote in accordance with the provisions of the Virginia Freedom of Information Act; and

**WHEREAS**, Section 2.2-3172 E of the Code of Virginia requires a certification by the Town Council that such closed meeting was conducted in conformity with Virginia law;

**NOW, THEREFORE, BE IT RESOLVED** that the Town Council hereby certifies that, to the best of each members knowledge, (i) only public business matters lawfully exempted from open meeting requirements by Virginia law were discussed in the closed meeting to which this certification resolution applies, and (ii) only such public business matters as were identified in the motion convening the closed meeting were heard, discussed or considered by the Town Council

Vice Mayor Hartman proposed the certification, Councilmen Heroux seconded, the vote for the motion was unanimous, as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

**Nays:**

**Abstention:**

**Absent:**

- 2. **SUP 2022-03 Amazon Data Center - The Owner/Applicant, Amazon Data Services, Inc., seeks a Special Use Permit under Article 3-4.12.3 of the Zoning Ordinance for an approximately 220,200 square foot data center on Industrial zoned parcel consisting of approximately 41.793 acre parcel identified as GPIN 6984-69-2419-000. Designated in the New Town Character District on the Future Land Use Map located off Blackwell Road and Lee Highway. The Owner/Applicant is requesting modifications for building height allowance, parking, and fence height allowance as part of the Special Use Permit. The Town Council held open a public hearing from its January 10, 2023 Regular Meeting.**

Christopher E. Martino, Interim Town Manager, introduced the topic as a continuation of the item from the January 10<sup>th</sup>, 2023, Town Council meeting. He stated that the applicants were present at the meeting for questions from Council.

Jay Reinke, a representative of the applicant, Amazon Data Services, addressed the Council.

The Town Council asked a series of questions regarding the application and the conditions of the Special Use Permit that were answered by the applicant and staff.

Representatives from Polysonics addressed questions on the noise of the proposed data center and the mitigation efforts surrounding it. Questions included testing, standards used for testing, mitigation efforts, and modeling.

Councilmen Hamby inquired with the Town Attorney, Martin Crim, about the Tax implications and how the Council could choose to tax the data center.

Mr. Crim answered with options for the Council to consider at a later date.

Mr Heroux stated that he had filed a Conflict of Interest Act Declaration with the Town Clerk that is the opinion of the Town Attorney that he has no conflict on this matter.

After the lengthy morning session, Mayor Carter Nevill opted to modify the agenda and move some items originally on the docket for this meeting the budget retreat on February 25<sup>th</sup>, 2023.

- 3. **Addition of Citizen Time Speakers to the Public Hearing Comments from 01.10.23**
- 4. **Second Street Discussion**

Tommy Cureton, Deputy Town Manager presented the item to the Council. After discussions with Experience Old Town Warrenton and local vendors, the recommendation from staff was the permanent closure of Second Street. Staff would accomplish this with the instillation of permanent bollards.

Councilman Hamby requested the instillation of semipermanent bollards to facilitate emergency response if necessary.

Staff was directed to add a resolution for the permeant closure of second street to the agenda for the night meeting under unfinished business.

**5. Advertisement of Special Meeting for the purposes of Interviewing a Town Manager in the next 14 days.**

Staff was directed to advertise the special meeting for the purposes of Interviewing a Town Manager in the next 14 days.

**6. Agenda Review**

Mr. Martino reviewed the agenda for the evening meeting at Fauquier High School. Council had no questions for the staff.

**The Work Session meeting was adjourned at 2:21pm.**

---

**REGULAR MEETING LOCATED AT FAUQUIER HIGHSCHOOL- 6:30 PM**

At 6:33pm on Tuesday, February 14<sup>th</sup>, 2023. The Town Council meeting was called to order. Mayor Carter Nevell stated that a quorum was physically present and that Ms. Heather Sutphin was attending the meeting electronically.

Ms. Sutphin Stated for the record that she was at her residence in Warrenton, She was attending electronically due to health reasons, she and her husband both have bronchitis

February 14<sup>th</sup>, 2023  
Town Council

Regular Meeting

**RESOLUTION PURSUANT TO SECTION 11-3.10 OF THE ZONING ORDINANCE OF THE TOWN OF  
WARRENTON FOR APPROVAL OF APPLICATION FOR A**

**SPECIAL USE PERMIT 22-03**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the  
County of Fauquier; and

**WHEREAS**, Amazon Data Services, Inc., (“the Applicant”), is the requesting a Special Use Permit approval on a parcel of land containing approximately 41.793 acres, identified as GPIN 6984-69-2419-000, located off Blackwell Road and Lee Highway in the Town of Warrenton and hereinafter referred to as the “Property”; and

**WHEREAS**, the Applicant has applied for a Special Use Permit pursuant to §3-4.12.3 of the Zoning Ordinance, to allow for approximately 220,200 square-foot data center to be located on the Property, hereinafter the “Special Use Permit”; and

**WHEREAS**, the Applicant requested waivers and modifications to increase the building height from 35 feet to 37 feet, increase the fence height from six feet to eight feet, and decrease the parking loading space requirement from 22 spaces to one space; and

**WHEREAS**, pursuant to §11-3 of the Zoning Ordinance upon petition of the Applicant for approval of the Special Use Permit, the Planning Commission upon advertisement and notice properly given pursuant to §15.2-2204 of the Virginia Code held a Public Hearing on November 15, 2022, November 22, 2022, and December 20, 2022; and

**WHEREAS**, the Town Council received and considered the recommendation of the Planning Commission for denial of the Special Use Permit; and

**WHEREAS**, the Town Council of the Town of Warrenton held a Public Hearing on January 10, 2023, upon notice properly and duly given; and

**WHEREAS**, the Town Council of the Town of Warrenton held open the Public Hearing on January 10, 2023 to February 14<sup>th</sup>, 2023, upon notice properly and duly given; and

**WHEREAS**, the Town Council has considered the issues and the Applicant addressed the applicable factors listed in §11-3.10.3 of the Zoning Ordinance for the Town of Warrenton; and

**WHEREAS**, the Town Council finds that the Application meets the criteria for approval in the Town of Warrenton Zoning Ordinance and that the Application is consistent with the Town of Warrenton’s Comprehensive Plan based on the analysis in the staff report; and

**WHEREAS**, the Town Council, in consideration of all of the foregoing, is of the opinion that the application for the Special Use Permit be approved subject to certain conditions;

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council approves SUP 22-03, subject to the attached Special Use Permit with Conditions of Approval dated February 14<sup>th</sup>, 2023, and all documents referenced in the Conditions of Approval, with requested waivers and modifications listed above.

- 3. Date and Location Change for the Town Council Budget Retreat
- 4. Resolutions Appointing Interim and Acting Town Manager
- 5. Resolution Appointing a Town Recorder

**APPROVAL OF COUNCIL MINUTES.**

- 9. Minutes September 25th, 2022, Special Town Council Meeting: Strategic Retreat
- 10. Minutes November 7th, 2022, Special Town Council Meeting

**QUARTERLY DEPARTMENT REPORTS.**

- 1. Quarterly Finance Department Report
- 2. Quarterly Parks and Recreation Department Report
- 3. Quarterly Police Department Report.
- 4. Quarterly Community Development Report
- 5. Quarterly Public Works and Utilities Department Report
- 6. Quarterly Capital Projects Report
- 7. Quarterly Report Emergency Services & Risk Management

Motion put forth by Councilman Hamby to approve the consent agenda.

Seconded by Vice Mayor Hartman.

The vote was as follows:

*Ayes: Ms. Heather Sutphin; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux.*

*Nays:*

*Abstention: Mr. William Semple; Mr. David McGuire, Mr. Paul Mooney.*

*Absent:*

The motion passed 4-0-3, the consent agenda was approved.

**NEW BUSINESS.**

- 1. Discussion of the release of the emails in the lawsuit brought forth by CFFC.

Motion put forth by Councilman Mooney to release the emails held in exemption in the CFFC lawsuit for the viewing of the Town Council Members.

Seconded by Councilmen Semple

Councilmen Semple spoke in favor of the motion.

Councilmen Mooney spoke in favor of the motion.

Vice Mayor Hartman spoke in favor of the motion.

The vote was as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

**Nays:**

**Abstention:**

**Absent:**

The motion passed unanimously; Council directed staff to facilitate the release of the emails held in exemption in the CFFC lawsuit for the Councils viewing.

## UNFINISHED BUSINESS.

### 18. A Resolution Directing Staff to Close Second Street to Vehicular Traffic

Motion put forth by Councilman Hamby to adopt a resolution to direct staff to close second street to vehicular traffic.

The resolution was modified to include the language of removeable bollards that would be purchased in funding partnership with EOTW.

Seconded by Vice Mayor Hartman.

The vote was as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

**Nays:**

**Abstention:**

**Absent:**

The motion passed unanimously; Council passed a resolution directing staff to close second street to vehicular traffic.

## TOWN ATTORNEY'S REPORT.

Mr. Crim opted to omit his report this month in light of the hour.

## TOWN MANAGER'S REPORT.

Interim Town Manager Christopher E. Martino announced with his great pleasure that he had promoted Acting Chief Timothy Carter to the position of Chief of Police for the Town of Warrenton.

Chief Carter thanked the Town Manager and Council for their trust and thanked his wife for understanding him having to work through Valentine's Day.

Mr. Martino introduced a Human Capital initiative that would change the merit increased earned by evaluations for employees from July 1 to April 1 this year then would move it to January 1 of the following to be more in line with the review time period.

Additionally, Mr. Martino introduced two ordinances that would be coming before the Council in March. Indemnification of Town Employees and the appointment of the Town Clerk.

## COUNCILMEMBERS TIME.

**Mr. Mooney-** Thanked all the citizens for coming tonight and all the effort that had gone into this process. Thanked his wife for her understanding of him being out at 3am on valentine's day.

**Mr. Semple-** Shared his viewpoint on the passing of the SUP and thanked all who worked so hard and came out tonight on Valentine's Day. He continued by congratulating Chief Carter on his promotion, and thanked Mr. Martino for his service to the Town.

**Mr. Mooney-** Councilmen Mooney requested a second chance to speak. He thanked the staff for tonight and thanked Mr. Clough for his outstanding work as the Town Clerk. He wanted to let the citizens know that he was really exited to be on the Council and serve for the citizens doing the best he can.

**Mr. Hamby-** Thanked everyone who had come out to all of the meetings on the SUP. Congratulated Chief Carter on his promotion, thanked the staff for the efforts in moving the meeting off site.

**Mr. Hartman-** Thanked the Staff who had worked hard on making the meeting run and the staff supporting from the back room as well that had worked hard on the whole process. He thanked the police department for keeping everyone safe tonight. He Congratulated Chief Carter on his promotion. He thanked Mr. Martino for his service and noted that he would be sorely missed.

**Ms. Sutphin-** Thanked the Town Employees for their endless contributions behind the scenes. She thanked Stephen for the efforts made to ensure that her system was up and everything was working correctly. She emphasized that each person up on the stage was there because they love their community. She thanked her fellow Councilmembers and Mayor as well as Mr. Martino and Tommy for the work that they've put into this. She congratulated the Chief on his promotion.

**Mr. Heroux-** Congratulated the chief on his promotion. He thanked Mr. Martino for the work he had done adding that he would be missed. He thanked the staff on the efforts that they put in to making sure that the Town Keeps running. He added that he was optimistic about the future of Warrenton and the great community that it has. He spoke on community and closed by thanking his wife for understanding why he was here tonight and that he loves her.

**Mr. McGuire-** Thanked all the good citizens that have come out tonight for the long meeting. He Congratulated Chief Carter on his promotion. He thanked the staff for their efforts and added that Mr. Martino would be missed. He thanked his fellow councilmembers for their efforts and collaboration with him. He added that he appreciated that the email review has passed and that it is moving things in the right direction towards transparency and honesty.

**Mr. Nevill-** Thanked the volunteers for their efforts this evening. He thanked the citizens who have been coming out and speaking on the SUP since July and that the Council has been listening. He explained that the Council is charged with responsibilities towards the applicants, the town, the future and what is before the Council. He appreciated the care that the Councilmembers utilized in this process. He thanked all the staff, officers, volunteers that made this meeting safe and effective. He thanked Stephen for his Clerking duties and responsibilities for ensuring the success of this meeting. He thanked Mr. Crim for his legal guidance to the Council. He thanked Jonathan, Stephen Bruck, and the entire IT Team for bringing the remote live stream capabilities and making git work flawlessly. He asked the Council to recognize the responsibility to IT as it effects the openness and accessibility of the democratic process. He thanked Denise, Rob, Stephanie, and all those who have done their jobs faithfully, dutifully, and with the best interests of this Town. He congratulated Chief Carter on his pro motion and thanked Mr. Martino for his leadership. He added that he looked forward to Tommy's leadership again.

#### **ADJOURNMENT.**

**With no further business, this meeting was adjourned at 3:12am on Wednesday February 15<sup>th</sup>, 2023.**

**I hereby certify that this is a true and exact record of actions taken by the Town Council of the Town of Warrenton on February 14<sup>th</sup>, 2023.**

---

Stephen M. Clough  
Town Recorder

Comment	Dear Town Council,

I'm opposed to the Amazon Data Center being considered on Blackwell Rd for the following reasons.

- .7 miles to my residence and my place of business.
- .8 miles from Bradley Elementary, Highland School, a nursing home and a 55 and older apartment complex.
- .2 miles from Poet's Walk, a home for disabled seniors suffering from dementia and Alzheimer's Disease.
- .3 miles from a town house community
- .4 miles from residents on Blackwell Road

This is inappropriate and inconsiderate of citizen's rights! The planning commission spoke and so have the citizens! SAY NO TO AMAZON and show the citizens that you care!

Sincerely,

Christina Fox

Comment	<p>My sister, Suzanne Morgan, and I have happily resided in beautiful Monroe Estates for 18 years. We plan to live out the rest of our lives here. We have studied the plans, discussed them with neighbors, and authorities in town. We have heard that other small towns have been negatively affected by such data centers.</p> <p>As we read the plan, this data center will interrupt our peaceful life both by sight and sound. This grotesque center is adjacent to our community and will be a horrible eyesore. The effects of the unnatural noise levels may disturb the backyard wildlife we so enjoy.</p>

If we trust this council to choose the best for our lovely town and its citizens, why would you allow AMAZON to destroy it?

NO AMAZON DATA CENTER, PLEASE!

Agenda Item	Town of Warrenton vs Amazon/CIA/NSA/FBI?!?...Are you kidding? Your only power is to say NO to this data center
Comment	Does the Town of Warrenton Town Council really think that it can enforce any rules against a company the size of Amazon, that is serving the CIA and other alphabet agencies???? The only power you have, is the power you have now, which is the power to say NO. If anything goes to litigation, the Town of Warrenton will hemorrhage money for years trying to enforce or defend its regulations. Residents near the data center(s) will suffer the entire time.

Comment	I just read in FauquierNow that the implied council decision was to not continue the Fri and Sat street closures next season (implied as special event requests). We did not know this decision was coming before the council nor were we consulted by EOTW for their recommendation. Is this a final decision or will there be more transparency to give the community and impacted businesses a chance to voice their opinions? I can't tell you how many people have been asking when Main Street will be open again for community interaction - both from residents and from visitors. And as a small business, we have to grow from visitors - we can't rely just on local business.

Comment	<p>I'm resident of the Town of Warrenton and I would like to express my support for Amazon Data Center. This town can benefit greatly from the data center. Data centers bring local jobs and tax revenue. We need improvements. Our roads need improvements. Electrical grid, internet/cellular coverage are unreliable. Teacher are leaving our schools because we can't pay them descent salaries. Please think about future of our children. If not, the trend will continue, young will be leaving the town because there is no future here.</p>

Committee, Board, or Commission Type	Town Council
Agenda Item	Amazon Special Use Permit Application to build a Data Center in the Town of Warrenton
Comment	<p>February 12, 2023</p> <p>Town Council Town of Warrenton, VA</p> <p>Re: Public Hearing to discuss the Special Use Permit requested by Amazon</p> <p>Attention Council Members: As you are aware, there are a considerable number of concerns about various aspects of this issue and significant opposition, as has been demonstrated by the petition to that</p>

effect and the many speakers and others in attendance at the Hearing. The purpose of my comments is to support the call to not approve the Special Use Permit (SUP) requested by Amazon in that it has been demonstrated, thus far, that it is incomplete, at best, and full of unverified and bad information.

Given the concerns raised by the many speakers at the Hearing, as well as the concerns/reservations expressed and implicit in the denial action by the Planning Commission, it would seem inconceivable that approval of the Amazon request would be made. Perhaps, Amazon could be advised to restart the application process – but with a more suitable site in mind – and, this time, with complete and trustworthy data/input.

There is too much at stake to make a hasty decision and/or ignore what appear to be legitimate concerns, some of which I will mention below. It also should be recognized, and agreed to by the members of the Council, that the legitimacy of any concerns/issues raised should be based on the merits of the issues themselves versus a consideration of where the people live who present/raise them or by the number of instances they are mentioned.

Any proposed 'changes' offered by Amazon and/or Dominion, also need to be thoroughly examined. What, on the surface, may appear to be an accommodation may, in the long run, present and/or add to other problems, such as setting up the Town of Warrenton for multiple Data Centers, irrespective of the particular sites, and their associated problems.

Careful attention must be paid to the language used, such as the terms Distribution lines vs Transmission lines. For example, instead of an offer by Amazon to pay for the undergrounding of 'all' electrical/power lines (which would include Transmission lines), an offer by Amazon stipulating only Distribution lines is relatively meaningless in that, it is understood, under Dominion's policy, Amazon would be required to pay for that anyway.

There may not be anything new presented at the Hearing. You have probably been exposed, in one way or another, to all of them by now. So I will not go into detail discussing them. Rather, I will just list some of the more prominent concerns that have been identified, thus far, that I am aware of.

---

\* One concern calls into question the whole administrative (rezoning) process that allowed this to come about in the first place. That may not weigh that heavily on the direct consideration of the Permit; but, it is out there and, in a way, overshadows the whole process.

\* Continuing weak, shifting, information from both Amazon and Dominion is another. It almost seems as though it was considered, by them, to be a 'done deal' from the beginning; so that more thoughtful, detailed, professional input by them wasn't that necessary.

\* The whole setting of the proposed Data Center, aka known as the 'viewshed', has been called into question. Is the proposed site one of those that has/had been identified as appropriate for that kind of development? I think the term 'industrialized' has been used to describe such sites/areas. I will not even bring up the ludicrous 'balloon test' results offered by Amazon.

\* Also, what has become a major issue is the 'noise' that will be generated. It is understood that, as a result, some changes have been offered by Amazon; but, again, these need to be looked at in detail and in context. For example, noise measurement may be one thing at a relatively early stage of development; but, an entirely different matter once the Data Center would be in full operation.

\* The impact on nearby property values needs to be seriously considered. Speaking of 'value', the proposed tax revenue needs to be carefully examined, as well. In the end, it may not turn out to be what is being speculated/projected. Have the experiences, relative to tax revenue from Data Centers, in other locations/counties been explored? Especially, as concerns what was projected and what actual revenue has been received!

\* Finally, another thing to consider is the projected advancement in technology. Already, there is talk of a time in, perhaps, the not too distant future that will call into question the need for so many Data Centers or even, at some point, any at all! What happens then to all those structures and the related investments?! It is speculated that Amazon, and other such companies, already have depreciation related

procedures/processes in place that eventually would result in no tax revenue being generated at all. The location(s) of such facilities would end up being stuck with the stereotypical 'white elephant(s)'.

As has been demonstrated, there are many things to consider and, given the importance of this decision relative to the precedent it will set for further/future applications of this nature, it is imperative, in the discharge of your duties, to get it right the first time – Deny the Amazon Application.

Respectfully submitted,  
Tom Daily

Agenda Item	Amazon Data Center
Comment	I am a county resident, former town resident, who is against the data center and I encourage you to vote against the SUP. I see no benefit to the data center coming to Warrenton. The tax revenue will not be significant -- especially when considering the property value decrease of the nearby homes. It will create noise pollution, which will significantly damage the quality of life to those living nearby, not to mention the known issues data center noise causes to wildlife. The environmental impacts of the data center and substation have been raised again and again. I have seen person after person speak out against this, and the Town Council isn't giving any indication they're listening. That is disturbing.

I have heard concerns from the Town Council about that plot of land -- what would go there if not the data center? Honestly -- who cares? It's not our business to help a land prospector sell their plot. There are enough developers destroying the land in the area. They see a tree or field and see dollar signs, where I would like to see nature.

When I moved to Warrenton 15 years ago, I quickly came to love our small businesses -- farm breweries, wineries, independently owned shops -- and our farmers markets, along with the rural-adjacent atmosphere. Massive housing developments have already cut down on the charm. But we should not be sold into the opposite direction -- horrible data centers having no benefit to our community. According to the website ClimaTiq: "Global emissions from cloud computing range from 2.5% to 3.7% of all global greenhouse gas emissions, thereby exceeding emissions from commercial flights (about 2.4%) and other existential activities that fuel our global economy." Local residents want no part of this and are telling you at every hearing. It's time to listen. You don't know what's better for the area than your residents and constituents. They know best.

If you choose to approve this monstrosity, I would like to see a member of the Town Council volunteer to swap homes with someone who lives nearby -- put your money where your mouth is. I expect I will be waiting for a long time, since it seems to me you are okay with gambling with other people's homes, and their personal and financial well-being, but would not be so quick to approve it was in your backyard.

Agenda Item Amazon Special Use Permit

---

Comment Good Morning.

At this point in Amazon's Special Use Permit request, there would be very little "new" information I could offer as you consider your final position in this historic decision.

This has been a very hard issue to follow, as the applicant has been less than transparent on just about every impactful aspect...and only until pressed reveals questionable resolutions that change from meeting to meeting, those not only in public but the select one on one with TC members as well.

How can anyone speaks towards an issue where the goal line

is constantly being moved?

However, as a citizen of Warrenton for the past twenty years, allow me to offer a few insights that I have been able to gather throughout this process....as well as some that have transpired in years before.

I can verify that the hum from the data centers at the Warrenton Training Center are very noticeable at my residence in Olde Gold Cup...but so is the noise from Broadview Avenue, Route 17 and Rt. 211.

One big difference with all of them is that the road infrastructure was here before my residence and I accept that resultant noise as a compromise of having a home location with convenient access to transportation into and out of Warrenton.

My primary concern regarding this SUP is how all of this got started. A landowner who has long sought to sell a piece of land while at the same time realizing their preferred use, possibly mixed-use development, is no longer an attractive nor needed venture. Plus the location does not lend it well towards an increase in traffic as access is limited.

So the landowner goes a different direction and sells with knowledge that certain, now former, Town officials will do an end around on the process to get it started...whereas if it had been done with full transparency and protocol it may never have come to fruition.

In case you didn't know, the Towns Comprehensive Plan shows a public multi-use trail circling the property in question. When I asked Community Development where this planned multi-use trail fits into this application, Community Developments response was hard to believe. They told me the "trail" would be constructed inside the Amazon Security fence so that they could patrol the perimeter.

At the very least, I would have thought Town officials would demand a trail still be built...if not there how about somewhere else instead? Please don't allow the Comprehensive Plan to be anything other than what Town residents need and want...and the proposed Data Center is neither and in truth was not in

there when the Council approved it a few years ago.

Your recent denial of the Harris Teeter gas pumps showed me that many of the concerns expressed by citizens regarding that project are also shared by many, many more with the Amazon Special Use Permit application. (Noise/Visual impacts)

I have seen the re-introduction of the Western Bypass voted down multiple times by different County Supervisors not because they felt it was not needed but because the citizens that spoke against it far outnumbered those that felt it was necessary.

I ask that you do the same for the Amazon Special Use Permit and deny the Special Use Permit application.

Thank you,

Mark Nesfeder

Comment	<p>I am adamantly opposed to the Town of Warrenton approving Amazon's request to build a data center in Warrenton.</p> <p>My wife and I moved to northern Fauquier County in 2007 and are the owners of a horse farm. We were drawn by the rural agricultural nature of the county and the friendly and welcoming citizens. We love the natural beauty and openness of Fauquier County and have chosen to remain here after I retired from a 37 year military career.</p> <p>I cannot state strongly enough my fear and apprehension of what approval of this proposal would mean to the nature and quality of life here. Building one data center, installing all the</p>

required infrastructure, will lead to additional projects that would affect all of northern Fauquier County. This will permanently mar the "atmosphere" of our county forever.

I urge you to not be the ones who ruin Fauquier County by turning it in to Prince William County - West. Please vote to disapprove Amazon's request. Thank you for your consideration.

Sincerely, Jon Kreitz

Comment	<p>I write regarding the special use permit application you will be voting on.</p> <p>I'm a Civil Engineer, and I review site construction plans and permit applications. I gave the SUP application in question a read, and I found it to be an incomplete application.</p> <p>In my experience, it is incomplete to an extent that would be unusual for approval in a large-scale project such as this one.</p> <p>Now we know in a special use the burden of proof is really on the applicant to provide a thorough analysis of the downsides and compelling reasons why they should receive an exception.</p>

This is what the Statement of Justification in this permit is for. But this Statement of Justification fails to provide the requested analysis.

There are sixteen criteria here to be addressed. In my judgment, the applicant did adequately discuss and analyze 6 of the 16 criteria. But the remaining 10 either are avoided or the responses have not stood up to closer examination.

Let's take the environmental impact for one example... This is criteria 10 and 16

"10. Whether the proposed Special Use Permit at the specified location will result in the preservation or destruction, loss or damage of any significant topographic or physical, natural, scenic, archaeological or historic feature.

16. The effect of the proposed Special Use Permit on environmentally sensitive land or natural features, wildlife habit and vegetation, water quality, and air quality."

In the initial submittal, the Applicant responds "In 2020, the Applicant became the world's largest purchaser of renewable energy. It's facilities are almost 4 times as energy efficient as other enterprise data centers etc etc" it goes on like that

In my judgment, that response does not adequately address the environmental impact. How could it? Similar comments can be made about the 8 other criteria. What improvements the application has, have essentially been made at the direction and demand of the citizens.

The Planning Commission and the citizens have spent the last few months essentially doing the Applicant's work for them -

providing analysis, addressing the tough questions, quality controlling studies, developing feasibility options, even correcting typos and topographic errors.

This application, even as it stands now, is in my judgment not thorough or complete enough to move forward.

You would be right to vote no.

Comment Hello,

I recently moved to Old Town Warrenton. I'm not able to attend the town council meeting tonight but wanted to make my voice heard. I oppose Amazon and the power towers. I do not want to see Warrenton turn into Arlington or another hub of endless buildings. Please save this lovely town!

Sincerely Taryn Meeks

**Subject:** No Amazon Data Center Blackwell Rd

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I live at 226 N View Circle and am firmly against the proposed data center on Blackwell Road.

Over the holidays, i found myself having to pick up a family member in the middle of the night and drove past data centers to see the emissions in the night sky. Is this what we want for the residents living near the data center?

The data center is intrusive and unfitting for the town of warrenton and negatively impacts residents living in the area.

I quote the same questions posed by Mr Sniw in the recent letter to the editor posted by Faquier Now:

-Is this the town we want, where the public doesn't believe its officials will put PEOPLE's interests first?

-How are you adhering to the principles of logic, order, and process... and the principle of trusting in the wise judgment of the citizen to have input into a major community decision ... when you undermine process?

-In forcing people to move out of their homes and incur an unrecoverable loss because of the unnatural presence of this data center, are you committing to social justice and housing for all, or callously neglecting your middle-class neighbors in favor of the richest company on the planet?

-Why should we trust that any purported tax revenues from a data center will offset the sales, meal, and property taxes we already pay?

-Why would you prioritize tax incentives for a corporate behemoth over incentives that could be offered current or would-be small business owners?

-How does adding a major unregulated noise source next to a residential area of town show your commitment to our neighbors' health and sanity?

-How does incentivizing massive power lines through our countryside, farmlands, and wetlands, and planting a massive electrical and water consumer right in town, all for one in-town customer, show commitment to our ecological environment?

-What of Fauquier's commitment to agriculture, given the inevitable cascading effects from this decision?

The public response in recent months has shown you where the sentiment lies within our town. We want honest people, honest processes, and representation of our people's interests. You have seen it and heard it.

Dear  
 Warrenton Town Council Members,

We am writing to express our opposition to the proposed construction of a datacenter in our community. While we understand the potential economic benefits that a datacenter could bring to the area, we am deeply concerned about the potential negative impacts on the surrounding areas, as well as the noise and aesthetic effects on our community.

First and foremost, we are concerned about the power required for a datacenter. These facilities require a significant amount of energy to operate, and will require power lines to be installed. Their construction would likely involve the removal of trees and impact the views of many homeowners.

Furthermore, we are concerned about the noise that a datacenter would generate. The constant hum of fans and cooling systems can be disruptive to residents living nearby, and could negatively impact property values.

Lastly, the proposed location for the datacenter is not ideal for this kind of large-scale industrial operation. It is at the entrance of Warrenton and near a residential area and it would greatly impact the quality of life for local residents, and that area would be even more inconvenienced by the construction vehicles.

We urge the Town Council to consider the negative impacts that a datacenter would have on our community, and to carefully weigh the potential economic benefits against the potential harms. We ask that you take this proposal in consideration and take the residents concern in account while deciding if this is something that would be beneficial to the Warrenton community.

Thank you for your time and consideration.

Sincerely,

Luis and Staci Albisu  
6544 Bob White Dr

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Town Council Members,

Thank you for your service to our town. My family lives a few minuaway from where you will be voting, for which we are deeply grateful.

The integrity of small towns like Warrenton is under attack across the country. I am sure you have seen one you once knew lose its individual charm or die on the vine.I know you want to see Warrenton thrive. I imagine you think the Amazon taxes will help this happen.

I am not against data centers or well-designed development that takes into consideration the long-term effects of the project. This is not such a project.

This proposal represents a Faustian bargain, and our children will be paying the price in the loss of the very essence of our town.

This has been, as you know, a difficult process, and for many reasons, has eroded the bonds between much of the citizenry and those representing them. These bonds are difficult to repair.

Please do the right thing and vote no. This will repair those bonds and help us make a fully informed decision on future data center proposals .

Respectfully yours,  
Bernardine Clark  
Menlough

I have lived in Fauquier County for 34 years and would like to voice my disapproval of the proposed data center. Fauquier is a rural county at present with unsurpassed acreage and bucolic scenery. To open the door to this type of development would destroy the peaceful environment so many have endeavored to maintain. One only has to look at Loudoun and Prince William counties to see the negative impact data centers have brought to their communities. I urge you to vote NO on the proposed data center.

Sincerely,  
Sue Hays, resident of Hume

Good morning,

I fervently oppose the Amazon data center and hope that you will vote against its construction.

From my understanding, there is no concrete evidence pertaining to actual, instead of "projected", tax revenue. Also, the facility would be a nuisance with the noise decibel above town thresholds. All those aside, a data center, right in the heart of town would be an unsightly monstrosity. I moved to Warrenton because I longed for the small town feel and friendly residents, a data center would take all those away

Secondly, I ask that Mr. Heroux recuse himself from any discussions and votes involving the data center. He is the vice president of a small tech firm, Definitive Logic, which has ties to Amazon Web Services and partners with Amazon on projects. Because of this, he is not able to be objective and unbiased.

Kind regards,

Landy T. Barbera

January 10, 2023

Dear Town Officials,

I join my fellow residents in opposing the proposed Amazon data center on Blackwell Road. Having a young family, I have not been able to attend meetings. As I asked around for more information about the project and spoke with neighbors, a few things were clear:

1. Many residents have limited information about the data center project.
2. Many of the people I spoke with did not support the project, but being very busy with young kids and competing priorities, they had limited time to focus on additional information gathering and attending town meetings.
3. No one I spoke with voiced their support of the project.
4. Only one person seemed ambivalent, mentioning that the need for data centers is growing; however, that person did not go so far as to express support for the data center here.

I spoke with over 20 people, and while that number is small, I am skeptical that there is significant support for this project among our local population. As our representatives, please consider the number of people speaking out against the project in comparison to the number who have expressed support. Have you reached out to your constituents to ascertain their awareness

and ask their position? Is your vote truly representing your community and the town's best interests?

I moved to Warrenton in 2020, attracted by the balance between economic growth and preservation of the county's natural beauty and small-town community. Previously, I lived in Prince William County, where I experienced the consequences of short-sighted economic development plans. While there is a lot I loved about that county, it would be sad to see Warrenton follow in Prince William County's missteps. Those missteps have less to do with the mere presence of data centers and more to do with what businesses are brought into the county, what jobs they offer, where they are located, and how the growth in population and business byproducts is managed. The currently proposed data center on Blackwell Road seems to be a mistake on all those fronts.

I understand the promise of jobs and tax revenue is appealing, yet a majority of those jobs will be temporary construction jobs. With the county's growth and appeal, I believe there will be plenty of temporary construction jobs available here in the future. As for tax revenue, I'm not saying data centers shouldn't be considered. However, do you really want a barren path of massive transmission lines and electrical substations, leading to a data center on a hill at the crossroads entering town as the way we welcome people to Warrenton? I don't.

I ask you to vote "No" on the proposed data center and encourage Amazon to propose a new location. Amazon is *not* concerned about what is in the best interest of Warrenton and its citizens. Naturally, they're looking at their own business interests. As our representatives, I'm asking you to take a stand for our best interests.

Thank you for your hard work and dedication to our beautiful community and its residents.

Sincerely,

Corianne Pafford

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

For you and the public record of SUP-2022-03

This morning Amazon is presenting a significant new proposal and presenting a large amount of new information. I respectfully request:

1. You must treat this as a new SUP application.
2. You must allow citizens ample time to review and comment especially on the noise and water impacts. We all know Amazon's prior info contained bizarrely incorrect noise information - which was exposed only through citizens enlisting a noise expert to expose bad physics, misuse of tables, and flagrantly false noise conclusions. You must allow time and a PC public hearing to examine this materially new application and new technology.
3. If and when you vote in some future month, you must include all the details of Amazon's technology and assurances IN WRITING in the SUP. John Foote himself has written a book emphasizing that applicants can make false and misleading statements in the process and NONE of them mean anything unless they are incorporated in writing, in firm contractual terms, in a SUP decision.

 RE: Amazon SUP 2022-03

According to Heather Sutphin, Amazon has come forth with an offer to switch the cooling technology for its proposed data center on Blackwell, in order to comply with the Town's noise ordinance.

Surely, this constitutes a proffer on Amazon's part, and both you and Amazon must comply with the Town's conditions for proffers, below (note especially highlighted portions).

Even if it were not required by Town ordinance, **it is absolutely essential that there be a thorough vetting and opportunity for public comment at a future public hearing on this switch in the technology for cooling the data center. At the minimum, a noise study is required (a legitimate noise study, one that uses physics correctly, and one that can be analyzed by citizens and objective experts), as well as probing for potential water and other impacts. YOU MUST NOT VOTE ON TUESDAY NIGHT on a switch of this magnitude, without full public notice and opportunity for comment.**

WARRENTON TOWN ZONING ORDINANCE

:

11-3.9.17 Conditional Zoning

....

2. Proffered Conditions.

As a part of an application for rezoning or amendment to the zoning district map, the owner or owners of the property involved may, prior to a public hearing before the Town Council, voluntarily proffer in writing such reasonable conditions, in addition to the regulations provided for the zoning district or districts as herein set forth, as he deems appropriate for the particular case to address impacts of the proposed use.

For the purpose of this Ordinance, proffered conditions may include written statements, development plans, profiles, elevations, and/or other demonstrative materials. Materials of whatever nature and intended as proffers shall be annotated with the following statement signed by the owner or owners of the subject property: "I (we) hereby voluntarily proffer that the development of the subject property of this application shall be in strict accordance with the conditions set forth in this submission unless an amendment thereto is mutually agreed upon by the Town Council, and the undersigned."

### 3. When Proffers Are Made.

Proffered conditions should be submitted for Staff review as part of the initial application for rezoning..

Proffered conditions made at the Planning Commission meeting shall be forwarded to the Town Council prior to the Council's public hearing.

To be considered by the Planning Commission, proffers must be submitted with the application prior to advertising for public hearing.

11 - 32 Updated April 2022

### 4. Contents of Proffer.

Proffered conditions shall be signed by all persons having an ownership interest in the property and shall be notarized. Proffered conditions shall contain a statement that the owners voluntarily enter into the proffers contained therein.

### 5. Review and Revision of Proffered Conditions.

Additional conditions may be proffered by the applicant during or subsequent to the public hearing before the Planning Commission, provided however that after proffered conditions are signed and made available for public review and the public hearing before the Town Council has been advertised (whether or not jointly held with the Planning Commission) **no change or modification to any proffered condition shall be approved without a second advertised public hearing thereon.**

### 6. Modifications to Proffers.

After the Town Council's public hearing has been advertised, should additional or modified conditions be proffered by the applicant, which conditions were specifically discussed at the public hearing before the Planning Commission, then a second public hearing need be held only before the Town Council before the application and the modified conditions can be reviewed and acted on by the Council.

### 7. Additional Conditions.

Should additional conditions be proffered by the applicant at the time of the public hearing before the Town Council, which conditions were not addressed at the public hearing before the Planning Commission, or **if the proffered conditions are modified beyond the scope of any conditions considered at the public hearing before the Planning Commission, the application shall be the subject of a second public hearing before both the**

**Planning Commission and the Town Council, which hearing may be held either separately or jointly.**

Dear Town Officials,

We do not see how elected officials can vote with a clear conscience to allow Amazon to build this dreadful datacenter, knowing that so many of your constituents are adamantly opposed to it.

Therefore, we join with our neighbors and friends in opposition to Amazon's data center on Blackwell Road. It has no place at this location and will diminish everything that is special about Warrenton and Fauquier. It will harm the health, quality of life, and property values of those who live near it. It opens the door to an onslaught of more data centers.

Please vote no on Amazon's application.

John and Winnie Buursink  
Warrenton, VA

Dear Mayor and Council,

I, a town citizen and homeowner, urge you to use common sense and vote NO on the Amazon Special Use Permit this evening. The reasons are obvious and have been spelled out to all of you ad nauseum. I don't need to rehash everything again. Do the right thing for our community, not for your own bank accounts, and simply vote no. The decision is such an obvious one that, if you vote to approve this data center, the entire town will know that your pockets are being lined by Amazon and that there are illegal, shady, backroom deals going on. Don't go down that road. It's not worth it. Do the right thing. Vote no.

Dear Town Official(s):

My family and I have lived in Fauquier County for twenty years, and we have watched the successful maintenance of a rural environment, respecting nature and the citizens who moved here to enjoy the country life. We are standing with our friends and neighbors to oppose allowing Amazon to infiltrate this community and destroy what has been preserved thus far. We are certain that if any citizen of Fauquier wanted to live by data centers, they would move to neighboring counties for the experience. My family and I do not wish for such an environment and will continue to stand up and oppose Amazon's intrusion. We ask each of you to oppose Amazon's data center(s), as well, because they have no place in our county and are, quite frankly, not welcome.

We live nearby the proposed Blackwell Road site, and have been following the process by which Amazon has presented to our community. By allowing Amazon's data center (and surely more to follow), it will harm the health, quality of life, and property values of Fauquier County residents.

We are asking you to please vote NO on Amazon's application.

Sincerely,

Tara Segó-Jelenic

**Importance:** Normal

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear elected official(s),

I am writing to express my opposition to the proposed Blackwell Road Data Center. I am a new Fauquier County resident who was drawn to the rural and small town feel of Fauquier County and Warrenton. Building this data center will not only be detrimental to our community from the negative effects of the data center itself but it will open up the door for numerous more data centers which will cause Fauquier County and Warrenton lose a lot of the charm and beauty which draws young families such as my wife and me to the community.

While it has been discussed that this data center will use underground distribution lines, the additional data centers, which will likely be encouraged to build here by a potential approval of the Blackwell Road Data Center, will require new, tall transmission towers which will ruin many parts of our community.

Sincerely,  
 Joseph Artrip  
 Fauquier County Resident

**Cc:** [REDACTED]  
**Subject:** Letter to Warrenton Town Council, re: Data Center debate

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Town Council:

The public response to data centers in recent months has shown you where the sentiment lies within our town. More than any specific path to approve or disapprove a data center and its power infrastructure, we want honest people, honest processes, and representation of our people's interests-- not backroom deals, grift, conflicts of interest, and secrecy.

You have seen it and heard it; **don't sell a bad bill of goods to the people of this town.**

Increasingly, **Americans have a crisis of trust in institutions.** Who can earn our trust? Who can keep our trust? Who are the honest brokers who care about their constituents and neighbors, advocating for the most discernible common good over powerful special interests?

I learned today that Amazon's attorney, John Foote, teaches other attorneys that they can lie their way into approval, by saying "whatever it takes" to win over a locality like Warrenton. A book he wrote states the following:

- "Truths, half-truths, and outright falsehoods can pepper the legislative record in a battle for governing body approval" [just to get approval granted], but...
- "[none of it] is legally enforceable against the property once the zoning is approved."

I also hear that Amazon will claim tonight that it has concocted a never-before-seen, super-wham-o-dyne, new technology that is going to reduce noise concerns and magically meet the Town noise ordinance (though it has never been tested). Hmm... Coming from a man who out-right justifies **lying to your face**, do you trust this? As an engineer trained to read the reality around me and determine plausibility of a technical solution, consider me skeptical...

**Councilmember, can you be trusted** to represent this wonderful town with honesty and integrity? Are you an honest broker? Where do you stand? Are you an advocate for the big and powerful over the interests and desires of your neighbors and constituents?

Have money and power, coercion, and bribery poisoned the well of Warrenton politics? **Will you stand in the breach to fight those lacking in integrity?**

By any measure, due diligence on the part of Amazon regarding the planned data center has not been met. In November, the Planning Commission reasonably postponed a hearing based on an incomplete application from Amazon that does not demonstrate goodwill or good intent to meet the town's basic requirements. The Planning Commission has rightly recommended disapproval of the Special Use Permit. **The commission's job is to assure due diligence.** Yet, some on this council are now considering overriding the Planning Commission and their constituents and strong-arming the many who take umbrage with the backroom deals that have characterized this process. **Why would you even consider overriding the Planning Commission on this contentious issue, in which the applicant has obvious shortfalls?**

Any steps you take on this data center are **precedent** for the next of inevitably **many** data center applications. If you allow Amazon to dictate that this town lower the bar on environmental measures— namely noise, sightlines, and elevations— not to mention the obvious eyesore factor, every other application will rightly see this town's government as a pushover. Soon, Fauquier will be another rubber-stamp-wielding pushover for tech companies, in the infamous line of Loudoun and Prince William Counties. Our town's and county's character will be forever changed, and in a short 10 to 20 years, those data centers will be obsolete.

A few questions for those leaning toward support of the Amazon data center:

- Is this the culture you want engendered in the town you lead, where the **public doesn't believe its officials will put constituents' interests first**, above those of the richest company in the world, located 2700 miles west of here, with no stake in our local community?
- How are you adhering **to the principles of logic, order, and process...** and the **principle of trusting in the wise judgment of the citizen** to have input into a major community decision... when you **undermine process?**

- In forcing people to move out of their homes and incur an unrecoverable loss because of the unnatural presence of this data center, are you **committing to social justice** and housing for all, or callously neglecting your middle-class neighbors in favor of the richest company on the planet?
- **Why should we (the people) trust** that any supposed tax revenues from a data center will offset the sales, meal, and property taxes we already pay?
- Why would you prioritize tax incentives for a corporate behemoth over **incentives that could be offered current or would-be small business owners**?
- How does adding a major unregulated noise source next to a residential area of town show your **commitment to our neighbors' health and sanity**?
- How does incentivizing massive power lines through our countryside, farmlands, and wetlands, and planting a massive electrical and water consumer right in town, all for one in-town customer, show **commitment to our ecological environment**?
- What of Fauquier's **commitment to agriculture**, given the inevitable cascading effects from this one decision?

**Ask you to show diligence in listening to your neighbors and protecting this town, as your neighbors have been pleading for you to do.** The role for which you were elected is to work in support of our town's best interests, which includes shielding your constituents from negative impacts on their daily lives.

The primary concern for many of us is one of PRECEDENT. If Amazon succeeds, after you have driven off your neighbors and constituents with the inescapable and health-stealing hum of massive air conditioning units and peppered our bucolic farmland with industrial waste, we will all be staring at **abandoned and neglected shells and lost agricultural potential**, reminders of the brief Era of the Hulking Data Centers.

- **This data center is intrusive and unfitting.**
- **This data center would be the first of many.**

**We don't need data centers here.**

**We don't benefit from data centers here. Any presumed tax windfall is a temporary and unconfirmed figment.**

**We the citizens of this lovely town and county... do not WANT data centers here.**

Do the right thing. Be the leader we're counting on. **Restore our trust** by listening to your neighbors.

Jonathan Snow  
Warrenton

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Town Council:

It is obvious at this point that the application Amazon has submitted is incomplete, particularly in relation to the requirement for a noise study. Numerous examples have been brought to your attention of noise from data centers disturbing residential neighbors, so I do not understand how you could move forward in a responsible manner.

Further, the location of the proposed data center would be a permanent blight on the entrance to Warrenton from the east. There is no guarantee that new overhead power lines will not be needed which will impact negatively current property owners.

Is there a projection of the financial impacts of the installation? What is the anticipated net revenue to the town and the county?

Please vote no on the application. It is the only responsible action at this time. I grew up in Fauquier County, went to school in Warrenton and do not wish to see its charm so greatly diminished as it will be if you approve it. Take a drive down Route 50 east of Gilberts Corner (or even better, Ashburn) to see the impact of these monstrosities. Undoubtedly, there are better places to site a data center, or centers if this sets a precedent that will result in their proliferation.

Sincerely,

Michael Morency  
 The Plains

**Subject:** Nothing Amazon says has any standing unless documented as binding, in writing in the SUP. NOTHING. Re: Amazon SUP 2022 03 Re: Town Prohibition on Vibration perceptible to human feeling. Amazon's New Offer re Noise Town Conditions for Proffers

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Per John Foote in-his own land use book.

It doesn't matter if it is in the record, as Brett Hamby seeming to rely on this morning.

These oral statements mean nothing, per John Foote in his book. Even if they are in Amazon's slides, and even if flatly promised orally.

They only have legal standing if nailed down, clearly, in writing, in the SUP, without clever lawyer weasel words.

Town noise provisions prohibit new uses where there is any vibration perceptible to human feeling.

Previously and with new Amazon noise study nothing has been submitted demonstrating this Town requirement will be met by Amazon.

wrote:

For you and the public record of SUP-2022-03

This morning Amazon is presenting a significant new proposal and presenting a large amount of new information. I respectfully request:

1. You must treat this as a new SUP application.
2. You must allow citizens ample time to review and comment especially on the noise and water impacts. We all know Amazon's prior info contained bizarrely incorrect noise information - which was exposed only through citizens enlisting a noise expert to expose bad physics, misuse of tables, and flagrantly false noise conclusions. You must allow time and a PC public hearing to examine this materially new application and new technology.
3. If and when you vote in some future month, you must include all the details of Amazon's technology and assurances IN WRITING in the SUP. John Foote himself has written a book emphasizing that applicants can make false and misleading statements in the process and NONE of them mean anything unless they are incorporated in writing, in firm contractual terms, in a SUP decision.

To the Town Council -  
RE: Amazon SUP 2022-03

According to Heather Sutphin, Amazon has come forth with an offer to switch the cooling technology for its proposed data center on Blackwell, in order to comply with the Town's noise ordinance.

Surely, this constitutes a proffer on Amazon's part, and both you and Amazon must comply with the

Town's conditions for proffers, below (note especially highlighted portions).

Even if it were not required by Town ordinance, **it is absolutely essential that there be a thorough vetting and opportunity for public comment at a future public hearing on this switch in the technology for cooling the data center. At the minimum, a noise study is required (a legitimate noise study, one that uses physics correctly, and one that can be analyzed by citizens and objective experts), as well as probing for potential water and other impacts. YOU MUST NOT VOTE ON TUESDAY NIGHT on a switch of this magnitude, without full public notice and opportunity for comment.**

WARRENTON TOWN ZONING ORDINANCE

:

11-3.9.17 Conditional Zoning

....

2. Proffered Conditions.

As a part of an application for rezoning or amendment to the zoning district map, the owner or owners of the property involved may, prior to a public hearing before the Town Council, voluntarily proffer in writing such reasonable conditions, in addition to the regulations provided for the zoning district or districts as herein set forth, as he deems appropriate for the particular case to address impacts of the proposed use.

For the purpose of this Ordinance, proffered conditions may include written statements, development plans, profiles, elevations, and/or other demonstrative materials. Materials of whatever nature

Draft: Not approved by Town Council

and intended as  
 proffers shall be annotated with the following  
 statement signed by the  
 owner or owners of the subject property: "I (we)  
 hereby voluntarily  
 proffer that the development of the subject property of  
 this application  
 shall be in strict accordance with the conditions set  
 forth in this  
 submission unless an amendment thereto is mutually  
 agreed upon by the  
 Town Council, and the undersigned."

### 3. When Proffers Are Made.

Proffered conditions should be submitted for Staff  
 review as part of the  
 initial application for rezoning..

Proffered conditions made at the Planning  
 Commission meeting shall be  
 forwarded to the Town Council prior to the Council's  
 public hearing.

To be considered by the Planning Commission,  
 proffers must be  
 submitted with the application prior to advertising for  
 public hearing.

11 - 32 Updated April 2022

### 4. Contents of Proffer.

Proffered conditions shall be signed by all persons  
 having an ownership  
 interest in the property and shall be notarized.

Proffered conditions shall  
 contain a statement that the owners voluntarily enter  
 into the proffers  
 contained therein.

### 5. Review and Revision of Proffered Conditions.

Additional conditions may be proffered by the  
 applicant during or  
 subsequent to the public hearing before the Planning  
 Commission,

provided however that after proffered conditions are signed and made available for public review and the public hearing before the Town Council has been advertised (whether or not jointly held with the Planning Commission) **no change or modification to any proffered condition shall be approved without a second advertised public hearing thereon.**

6. Modifications to Proffers.

After the Town Council's public hearing has been advertised, should additional or modified conditions be proffered by the applicant, which conditions were specifically discussed at the public hearing before the Planning Commission, then a second public hearing need be held only before the Town Council before the application and the modified conditions can be reviewed and acted on by the Council.

7. Additional Conditions.

Should additional conditions be proffered by the applicant at the time of the public hearing before the Town Council, which conditions were not addressed at the public hearing before the Planning Commission, or **if the proffered conditions are modified beyond the scope of any conditions considered at the public hearing before the Planning Commission, the application shall be the subject of a second public hearing before both the Planning Commission and the Town Council,**

Draft: Not Approved by Town Council

**which hearing may be held  
either separately or jointly.**

**Subject:** Town Council Vote on the Amazon Data Center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Mayor Nevill and Town Council Members,

The January 4, 2023 edition of the Fauquier Times referred to the Amazon data center application as having travelled on a bumpy road. That is one way, and not an inaccurate way, of characterizing the process that has been under way for nearly two years, as detailed by the Times.

The issues that arise from this account, and which are ones that ought to govern your current deliberations and give you pause for concern, are, in my view, the following:

1. A faulty process largely attributable to Amazon. Much controversy can be traced back to Amazon's late admission that the original noise study, filed in support of the application, was just a draft. It was not marked as a draft in the application, but admitted to being a preliminary study by the applicant when probed for accuracy. The final noise study has not been submitted to this day.
2. The planned data center may conflict with the Town Comprehensive Plan. Hundreds of home owners, directly impacted by the possibility of having the data center at close quarters, and hence being subjected to constant noise, have pleaded before the Planning Commission and your own council, to reject the application.
3. Conflict of interest issues have been raised, and litigation initiated, which further points to citizens' widespread, serious and sustained rejection of this application.
4. A further point is that the entire process has shown that Amazon is less than a good faith applicant. Had that been the case, the application would never have been submitted with the noise issues unresolved. The question arises what sort of counterpart Amazon would be were this project to go forward ? A counterpart that simply forces its way through a permitting process is in all likelihood not one that you would want to do business with to begin with.

5. Finally, Warrenton, and Fauquier county, have a celebrated track record of having dodged the kinds of bullets that have transformed other towns and counties within a short space of time, to places where we would not want to live. No one has regretted the denial of a huge development project at North Wales in the 1960s and in the intervening years caution has governed approvals thus making sure that the town and the county have remained what they are today.

The Town Council has a responsibility to honor that legacy and to look beyond what the possible fiscal advantages might provide in the short term. You are at the helm of a ship that has sailed well for decades in the face of pressures from elsewhere. We only need to leave Fauquier to know what it is that we don't want.

Sincerely yours,

Margrete Stevens

Dear Warrenton Town Officials,

If you vote to authorize the proposed Amazon data center with it's festoon of 240 kv transmission lines at the very gateway to Warrenton and Fauquier County, you will propel us all down a path that will irreversibility change this special place forever. Just this one data center will be an anathema to all of us, but it will also pave the way for an onslaught of acres and acres of forbidding dead zone developments.

After all these months of discovery and debate you are unquestionably aware of the problematic nature of data centers. There will be noise, imposing transmission lines and sterile industrial vistas. What has become obvious in the past year is that this data center will be the first in a deluge that will cascade throughout Fauquier County. It will be the end of a very, very special place.

Please vote no.

**Subject:** For Official Record AWS SUP Public Hearing and Jan. 10, 2022 Council minutes

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Council Members,

I request this comment be entered into the official minutes of the Jan. 10, 2023 Council Meeting, and in the official record for the AWS SUP 2022-03 Public Hearing.

Given the new AWS SUP information presented in the work session this morning, and the continued unresolved issues, and still-outstanding, thoughtful information requests on noise etc, it is inappropriate for Council to vote Jan. 10 on the Amazon Data Center SUP. Further, the enforceability of occupancy conditions discussed remains uncertain.

If Council chooses to vote, consider that the proposed use does Not comply with Comprehensive Plan; applicant's proposed approximately 50 jobs does Not qualify them as a major employer for Warrenton. Further, the issues of water raised for other potential uses, did not take into account the bond resolution to improve the water system; these questions directed toward insinuating other uses are not feasible, are not vetted, and deciding the application without further study on other potential uses for the Blackwell parcel, is a disservice to Council's and the community's work on the Comprehensive Plan.

I applaud Council's direction to staff this morning to re-instate committees and move the work sessions to a date prior to regular meetings. These changes need to be enacted prior to any vote on the AWS SUP. Council and community require time to digest and independently *verify* the Applicant's assertions and new information from this morning's work session on the AWS SUP. Last time a noise study was presented by Applicant, it was mis-represented as a true noise study, and only after community validation attempts revealed flaws, it was admitted by Applicant to be a 'draft' and faulty study; this admission was repeated again by Mr. Foote today.

Additionally, consider this application, if approved, will likely spur an SUP application for a data center at the Old Wire Factory. The electrification power will be there from the new substation. As consequence of a Council denial of potential SUP application for data center at Old Wire Factory on the heels of an approval for a data center on Blackwell Road, one could argue Council would be acting arbitrarily and capriciously in such a denial at the Old Wire Factory. If you do not want a data center at Old Wire factory, you cannot approve a data center on Blackwell. BOTH locations are inappropriate for a data center, both to Warrenton's sense of place and our Residents' quiet enjoyment, by sound and sight, of their homes and their hometown.

One has only to look north to Prince William and Loudon Counties, to know a Yes vote on the AWS SUP, seals the Town And County's fate to multiple data centers and high tension power lines

throughout BOTH our Town and County, especially given the Town's intent through a Boundary Line Adjustment, to annex several industrially-zoned parcels. Please weigh your decisions; they will be your legacy. This will be recorded in the history of our Town, and there will be no do-overs.

Respectfully,  
Suzan Fultz, Scott District  
7020 Beaconsfield Lane

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Town Official(s):

I am joining with my neighbors and friends in opposition to Amazon's data center on Blackwell Road. We believe It has no place at this location as it will diminish everything that is unique and special about Warrenton and Fauquier County. It will harm the health, quality of life, and property values of those who live near it. Prince Williams is already putting up 5 data centers. This opens the door to an onslaught of more data centers that will become just a bunch of strip malls that no one fully uses and bring unsightly, unwanted presence to our area..

Please vote no on Amazon's application.

James Williams

**Subject:** Amazon Datacenter vote  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good afternoon,

I would like to express my concerns about the upcoming vote regarding the Amazon Datacenter. I wish to be clear that my email is not about the eventual outcome, whether for or against approving this proposal, it is about the integrity of the vote itself.

Our nation is currently experiencing a time where the public's trust in our governing officials has been eroded. Regardless of which party people identify with or whether people align themselves with a political party at all, there is very little confidence that our elected officials are actually acting in good faith and serving the people whom they represent. The concept of personal or business interest must never be allowed to taint the results of a vote.

I request each of you to consider that Councilman Heroux should recuse himself from this vote. There is nothing personal about this request, I do not know the Councilman. I am not asking this because I question the integrity of any of our council members. I am asking this because the simple impression that a vote of this magnitude (or any vote for that matter) could be decided one way or another due to the personal and/or business interest of any council member should seriously disturb each of you as it does us, your constituents. The integrity of our governmental processes must stand. If it does not, if decisions can be called into question because the implication of personal or professional interest being an influence, the result can be nothing other than a people who calls every decision their government makes into question.

I thank you for your service to this community and to the people. I trust that this and every vote will be beyond reproach. That you, our elected officials, will shine as beacons of integrity for our town and the surrounding areas.

Thank you,

Jacob Geurkink

**Subject:** Council Meeting of 10 January 2023, re: Amazon SUP

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Councilman Heroux,

I understand that at tonight's meeting, the major subject of interest is the Amazon Special Use Permit (SUP). This has been a very contentious debate within our community over the last several months if not longer. I am not sure myself if I am for or against it, but I do know that because it is such a contentious issue **there must be no question that the final outcome of any vote on the SUP must be free of conflicts of interest (or even the appearance of one) or it will be so costly for you, the council, the town, and our community might not recover.** The greatest cost would be the trust we place in the council and you as a member. It will have been lost if it appears that any members of the council vote their own personal interest first.

**This concern has become very real in the case of the Amazon SUP debate.** It has come to my attention that Amazon is a client of yours and because of your professional and personal ties, you stand to greatly benefit (most significantly financially) from the Town Council's voting to approve the SUP.

If this is the case, you must recuse yourself from the any vote on any related matter involving your client, Amazon or its representatives.

**It is matter of integrity. If your vote has the potential being a tie-making or tie-breaking vote affirmatively adopting the SUP, you must recuse yourself.** To recuse yourself in such a situation would not only be the right thing to do, it will ensure the trust of the all in our town and its council.

**If you were not to recuse yourself,** I do think the rest of the Council should consider barring you from casting a vote on this issue. I would go even as so far as to suggest, if you do cast such a vote, the Council should perhaps consider a call for impeachment and removal, because if you demonstrate such poor judgement on where a publicly known conflict of interest exists, what are we to think about any of your other votes?

Furthermore, **your integrity will thereafter will always remain suspect.** I know none of us want that for you, nor do you want it. That will be tragic in the long term, because no one will trust you, no one will trust the Council that the members are voting their own interests over that of the community they represent. That is a recipe for disaster.

I do ask the members of the town council, (among those courtesy copied here), to do the right thing if you will not and bar you from voting if you do not recuse yourself.

Sincerely and respectfully,  
Matthew Hassan

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

>> FYI...

>>

>> Dear Mr Precker:

>>

>> We reviewed the packet you sent us outlining various potential transmission line routes in support of a potential Amazon Data Center here in Warrenton. We appreciate seeing just how far Dominion has already come in planning support for the unwanted and unnecessary data center. Your packet also indicates infrastructure information that could potentially support more than one data center.

>>

>> We refuse to take part in any of the false choices you have laid forth. The absence of any data center here renders your work project moot. No data center equals NO transmission lines subjecting us to additional unhealthy EMF's and unsightly lines that take away from the beauty of our town.

>>

>> Sincerely,

>> Jill and Russ Brown

Dear Councilman Heroux,

I would like to add my voice to the chorus of concerned Warrenton citizens and kindly request that you recuse yourself from voting on the Amazon SUP. From a very basic web search, your company has the appearance of ties with Amazon. This is the appearance of a conflict of interest, and that is all that is needed for the mayor to take action to intervene, based on the Warrenton Town's Code of Ethics. Please maintain your personal integrity and recuse yourself.

Sincerely,  
 Christen Snow

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Town Officials:

Please do not allow Councilman Heroux to vote on the contentious issue of the Amazon Data Center. Councilman Heroux should recuse himself immediately given his company's ties to Amazon. Otherwise, this is a serious violation of the Town's Code of Ethics. This is the first of several steps that can be taken to restore public trust in our elected officials.

Respectfully,  
 Kimberlee Calvert

Good Morning Eileen

Thank you for your note and for offering your thoughts. As was stated last night (and this morning ☐) we appreciate and value all of the input.

As I stated last night, I am interested in citizen input on 2 questions. I welcome and thank you for any feedback.

1. Amazon's property that is part of this SUP came into the Town Boundaries in 1960. Since 1960, it has remained vacant. 63 years. During this SUP process, I have heard many calls for uses other than a data center. Uses that align with the comp plan. Examples have been mixed use development, housing, universities (fraternity and sorority houses are allowed by right on the property today), and parks. When these ideas are raised, they have been stated using the term "we." Examples are "we need" or "we should." My question is, who is "we"? Who will invest in any of those or other ideas? Who will build it?
2. Should data centers be anywhere in Fauquier County? Should they be in zoning areas where they are allowed? Should a landowner be allowed to ask for a re zoning for a data center? What about the data centers present today in the county and planned ones Remmington etc.? Should the county remove its advertisement on fauquierbusiness.com that advertises data centers are a featured industry? Help me understand what we do about data centers in the county.

Thank you again, and I look forward to hearing from you.

Stephen – Per our discussion last evening, here is the *Coalition to Protect Fauquier's* latest update of our petition that opposes the Amazon data center.

I've added quite a few new names since last evening's Town Council open hearing. Our petition has now been signed by about 2,000 signers. More people are signing it every day. Since the last Town Council meeting, we've added another 300 or so signatures.

If you want to print it, you should know that it is now 100 pages long.

Cheers,

Tim Hoffman

**Subject:** WTC Work Session/Public Hearing Followup 1/10/2023

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good afternoon -

I wanted to make the following comments and pose the following questions after the work session and public hearing on Tuesday.

1) Councilmember Hamby expressed the notion of a "silent majority" on Tuesday and Councilmember Heroux mentioned the same thing in a previous email to a county resident. This data center would affect Town of Warrenton and Fauquier County residents. A quick online search shows 73,815 residents in Fauquier County or thereabouts. Do you really expect to hear from 36,908 residents before you will accept the public sentiment as being against this proposal? All indications from emails and public comments are about 99% against.

2) I would like to hear reasons you have for a council member to be in favor of this proposal.

I welcome your feedback and further discussion.

Thank you,

**Subject:** Amazon's 1/10/23 Noise Study Analysis by Dr. Lyver  
**Importance:** Normal

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Council members Hartman, Hamby, Heroux, Sutphin, McGuire, Mooney, and Semple, and Mayor Neville -

For each of you individually, and for the public hearing record for Amazon SUP 2022-03 --

I hope you will pay close attention to Dr. Lyver's analysis of Amazon's latest noise study. He absolutely shreds Amazon's noise study. Please read it twice, for it to really sink in.

***At this point, it should be clear how much Amazon and John Foote have been deceiving you and disrespecting you.***

***I hope you realize that Amazon has been setting you up to put a noise knife in the neighborhoods of Oak Springs, Copper Mill, North Rock, and the Highlands.***

Moreover, Amazon has been leading you along with blatantly unenforceable noise "conditions." With conditions that are not only unenforceable, but that are designed to produce invalid noise readings, at invalid times, and so infrequently as to be useless.

You should not, you must not, let Amazon deceive you. You should not, you must not let the fox guard the henhouse, by accepting unenforceable noise conditions that Amazon can readily "game."

Do not choose Amazon over the well-being of your own residents and neighborhoods.

**Mayor and Councilmen of the Town of Warrenton,**

I was pleased to be able to attend and speak to you during the Warrenton Town Council (TC) Public Hearing on the proposed Amazon Data Center SUP on Tuesday, January 10, 2023. My concern is that you have only heard a very tainted single view, that of Amazon, and have not heard the real physics of the situation. I am writing this note to help you understand just what this proposed data center will do to the Town.

First let me reintroduce myself. I am Dr. John Lyver, Ph.D. and I am a resident of Gainesville, VA, but love coming to Warrenton to relax and shop. I am a volunteer and do not have any "dog in the fight", so I am giving you an unbiased independent analysis. I spent 25 years as a NASA Engineering Manager working on leading and performing analyses of the safety of nuclear missions heading to Mars and beyond. During that time, I earned a Ph.D. in Computational Data Science and earned a Certified Safety Professional license (basically, a Professional Engineer in Safety). So the work I have been doing on the noise and safety aspects of the data centers is something of which I have many years of experience.

Below is some information that I feel is vital to your understanding of the noise implications from approval of the SUP. Please accept my apology for its length, but this is important. At the Public Hearing, I offered to meet with each of you and/or your staff members to provide more details and explanation. My contact information is provided at the end of this e-mail.

**Amazon submitted Noise Study dated January 9, 2023:**

First, let me say that I was the reviewer that found the September Amazon noise study to be NOT CREDIBLE. The January Noise study has not corrected any of the misinformation and bad physics that was in the September Study. I find the January 2023 noise study to be both NOT CREDIBLE and NOT Defensible. Let me explain:

- The same contractor, same "SoundPLAN" model, and very similar assumptions were used in both studies.
- The noise study did NOT incorporate the Town Zoning Administrator, Mr. Walton's, guidance letter to Mr. Foote on December 16, 2022. In fact, they again analyzed for the wrong conditions, locations and measurement requirements. Nor did they analyze against the -10 dB(Z) and -15 dB(Z) corrections to the Town Zoning Ordinance noise limits. (BTW: Please pass my appreciation on to Mr. Walton for an excellent letter. It is probably the best I have seen in explaining noise ordinances throughout the region.)
- The study cited the August 2022 SUP provided materials and did not update for the October and December design changes.

- The study recognizes that noise from diesel-electric generators will increase the overall noise levels. However, does not cite the noise that they will produce.
- The study states: generators will only run for a “limited time” but do not cite what that time is. At other Amazon sites in Northern Virginia, generators run for time periods beyond the cited ANSI S12.9-defined short duration period. Plus, Amazon regularly runs generators in a contiguous series, making the noise generation well beyond the ANSI direction for measurement periods.
- The study does not cite references, nor do they cite verifiable data. For example, the study cites noise from a generic Trane Corporation brand chiller but do not cite the source or the noise data itself. Trane produces a wide variety of chilling systems and sizes, so it is impossible to verify the assumptions made.
- When the study does cite noise readings, the study does not cite the distance where the noise was taken. This makes it impossible to validate the calculations. Noise decreases by a ratio of  $[(1/r)^{1.5}]$ , where r is the ratio of the cited distance to the observed distance.
- The study does not combine the noise sources on the property into a single noise level. The study only cites individual levels. Mr. Walton’s letter clearly states that total noise from the site is what must be compared to the Ordinance. When the noise levels are combined, they clearly exceed the Ordinance limits in nearly all cases.
- The study cites a drop of 5 dB(A) to 10 dB(A) noise generation decrease at night for a building operating at steady state 24/7. This is not correct. Plus the Ordinance uses dB(Z), making the claim difficult to explain.
- The Study does not follow commonly used scientific principles in plots or how topography interacts with noise waves. They have topographic low areas stopping sound and hills increasing noise in some plots. Same as in Sept report.
- The study’s plots show the center of the isopleth ‘circles,’ not at a noise source, but rather, in the road on the north side of the building. This factor alone discredits the entire analyses as poor modeling.
- As for the SoundPLAN model, it does not consistently use similar modeling between frequency octaves. The sound attenuation modeling per distance varies. Same issues as in Sept.
- The background reading plots show that the modeling was done at 15-25 dB(Z) lower than what was measured.
- The Warrenton Zoning Ordinance Chapter 11, section 11-3.10.2, Item #8 **REQUIRES** “Noise impact and abatement studies to determine potential impact on adjoining properties and neighborhoods.” There is no discussion of impacts due to noise.
- Finally, there is no mention of the study for the data center’s impact or compliance with the Fauquier County Noise Ordinance, even though over 1,000 residents of Fauquier County (living outside the Town boundary) will be affected by the noise.

For these reasons, the January 9, 2023 noise study is NOT CREDIBLE and NOT DEFENSIBLE and should be withdrawn as the September study was withdrawn. At a minimum, it should be rejected by the Town as a valid submission as required for SUP submissions and the SUP submission declared as incomplete.

#### **Enforceability of Town Noise Ordinance:**

The TC members had a large discussion during the meeting about how the Town can effectively shut down the data center if the data center exceeds the Town Ordinance. May I direct your attention to

Virginia Code Title 15.2, Chapter 9, section 15.2-980  
 ( <https://law.lis.virginia.gov/vacode/title15.2/chapter9/section15.2-980/> ) " Civil penalties for violations of noise ordinances" which states: "Civil fines will not exceed \$250 for the first offense and \$500 for each subsequent offense." Nowhere in this Section does it permit shutting down the facility. Additionally, since the Code of Virginia does not include noise limits within their building code ordinances enforced through zoning, I contend that should the Town attempt to shut down the data center simply for noise violations, Amazon's plethora of lawyers will take the Town to Court within minutes. This lawsuit will cost the Town large sums of money with no relief for the residents due to excessive noise. I would strongly recommend that the Town Attorney provide you with a thorough analysis of civil penalty limits due to noise. I am not a lawyer, but have been told this directly by the Acting Prince William County Executive, Mr. Elijah Johnson, during discussions of noise enforcement in PW County.

### **Reduction of Noise from an Amazon Data Center in Manassas:**

Let me provide you with a short recap of the noise generation from the Amazon data center cite on Tanner Way in Manassas, Virginia.

- The site consists of a four-building complex with approximately 220,000 square feet for 3 of the 4 buildings and the 4th building, slightly less. The first of these buildings became "operational" early in 2022 (February, we believe).
- On May 16, 2022, a complaint was filed with the PW County Police for excessive noise. The PW Police responded that evening and performed noise readings. They found that the noise level was at the PW County Noise ordinance limit (55 dB(A)) at the resident's homes, about 1,200' from the closest operating building. The Police did not take readings at other homes which are closer to the data center buildings, which are as close as 600' away from the buildings.
- In development of my noise model, I discovered that the Tanner Way buildings closely matched the noise generation profile with other similarly designed buildings. My model predicted similar readings to the Police's readings.
- In July, meetings began between Amazon, PW County officials, and the neighborhood HOA to discuss the complaint (Great Oak Subdivision). Amazon representatives were invited to the site and acknowledged the noise levels were loud.
- As the meetings continued, Amazon tried to wrap the air exhaust vents with a sound-absorbing blanket as a short term aid. After about 100 blankets were applied, the noise levels did not decrease, in fact, they increased.
- Amazon is now working on re-engineering of the exhaust fans by adding wind bands and new higher power fan motors. Amazon has committed to a 5 to 8 dBA source level reduction, which the community believes will still not be enough to bring noise levels under the outdated (1989) Prince William County noise ordinance (a low bar). During this time, noise has now increased to over 65 dB(A), which is over 10 dB(A) above the PW County Noise Ordinance limit. Further, certification of this solution has taken nearly six months, pushing their phased installation to start in Feb 2023, and plan to complete in Feb 2024. The community will have lived with unabated data center noise for two years at completion of this unproven solution.
- Additionally, I have used the Tanner Way noise readings collected to validate and sharpen my model. What I am finding is that my model is conservative and actual noise readings are about 2 dB(A) higher than I predicted. Additionally, I was able to 'work why model

backwards' to discover that on May 16, 2022, the complex was operating at a level of about 10% of total electrical power. These results were presented at one of the neighborhood meetings and were not denied or contradicted by an Amazon Vice President.

*(Note: The heat generated that must be removed is a function of the I-squared-R losses in the electric circuits in the computers and is a function of the amount of current (the "I") and the circuits involved (the resistance "R"). The result is that heat generated is a function of the power consumed in the complex.*

*(Note: Let me invite you to travel to the Great Oak neighborhood to listen to the Tanner Way noise generation for yourself. You will be shocked at the tenor and intensity of the noise along the western end of "Winged Elm Drive". Personally, I have heard the complex's distinctive noise from about 1-1/2 miles away, above the background noise of Manassas.)*

#### **Proposed Amazon Noise Studies:**

Amazon will offer to perform noise studies for the jurisdiction as they have done in Warrenton. One study I have reviewed is the Amazon provided noise study for the Tanner Way complex that was provided to PW County and Great Oak HOA. After review:

- It was found that one of the 3 meters taking readings was placed in a depression and did not produce representative readings.
- One of the meters taking readings stopped working during the analysis and was never restarted.
- The modeling used did not correctly average the dB(A) readings. Mathematically, the results were incorrect/invalid.
- The modeling discounted noise levels for some background noises (they claimed were frogs), but did not provide adequate discounting methods for these readings. This introduced more error in the results.
- The modeling did not report the power level of the complex at the time of recording. It was believed to be about 30% or less.
- When I reanalyzed the raw data, my results showed that Amazon exceeded the PW County noise limits even though they were only operating at a small fractional of their planned operational power consumption.

#### **Additional facts to consider:**

- Amazon defines "Operational" as when they can process the first electron off the internet. The noise comes from the cooling systems to exchange the I—squared-R heat losses from the computers to the environment. At 2-4 months after becoming "operational," noise levels will exceed the Town limits and will only increase as operations increase. Amazon's set of 'promised' noise studies from October 28 would be completed before the real noise begins.

- The typical Amazon Data Center design, like the Amazon Tanner Way centers in Manassas, will exceed the Town's noise ordinance in OVER 90% of the cases. (Please see the attachment to this note)
- When the diesel generators are operating, the noise will increase further.
- The noise from data centers can be heard up to 2 miles. That covers over 99% of the Town footprint.
- Residents up to 1/2 mile from the proposed site will experience noise levels above the ordinance limits, strictly from the data center noise generated 24/7.
- Approximately 1,000 Fauquier County residents outside the Town limits will have noise levels that exceed Warrenton's limits, and exceed the County's noise ordinance.
- Excessive noise causes stress-related health effects like diabetes, sleeplessness, high blood pressure, nervous conditions, lack of concentration and so on. These effects will be especially hard on seniors, stay-at-home adults, residents of Poets Walk, and children.

Attached is a copy of the handout I provided at the Public Hearing showing the potentially related health effects and the results of my analysis on predicted compliance violations per Mr. Walton's guidance in his Dec 16 letter.

**Amazon is counting on your lack of expertise.** Let me help you become better informed on the implications of approval of this SUP. Please let me know if you would like to discuss my analyses. I will be happy to meet with you and provide you with even more analyses on the noise predictions of the proposed SUP.

**THANK YOU** for your consideration and attention in this matter.

r/s  
John

**Subject:** Seeking a reply: Much of Ward 1 is within 1000 ft

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good evening Town Council members,

Thank you for your attention during my 3 minutes of comments at the public hearing on Tuesday night. I was the one about 45 minutes in to the meeting who cited distances to some of our neighborhoods. (I am a GIS analyst and GIS educator).

To remind you: The closest townhome in Highland Towne off Walker Dr is only 600 feet away. The nearest single family home in Highlands of Warrenton is 800 ft. The closest in Oak Springs is 1000. And over 700 residences are within a half mile of the site. This does not even include Fauquier (non-town) residences.

You also heard from Dr. Lyver, whose letter to you is available for all to read. This part stood out to me:

I just read Dr. Lyver's letter to the Town Council. This stood out to me:

"On May 16, 2022, a complaint was filed with the PW County Police for excessive noise. The PW Police responded that evening and performed noise readings. They found that the noise level was at the PW County Noise ordinance limit (55 dB(A)) at the resident's homes, about 1,200' from the closest operating building. The Police did not take readings at other homes which are closer to the data center buildings, which are as close as 600' away from the buildings."

Hundreds of our residences in Ward 1 (represented by Ms. Sutphin) are within 1000 feet of the site! With these numbers I can't believe the approval of the SUP is still a possibility.

I would greatly appreciate hearing back from each of you (and at the least, any 1 of you) explaining why residents of Ward 1 should NOT be concerned about noise pollution. We would desperately like to know your thinking on this.

Thank you,  
Jason Smolinski  
481 Cardinal Ln.

**Subject:** The Data Center would be REGRESS, not PROGRESS

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hello, All  
 The 4 H's and Mayor Nevill, who made up their minds to push the data center forward from the very start often use the word "progress" to describe it. It is, rather, a regression back to a past of pollution, sprawl, and the municipal corruption that so often made those possible. The noise- related information you have received is definitive: Amazon could NEVER meet Warrenton's noise restrictions and the town would be helpless to fight Amazon if the data center were built. You know this and we know this.

Especially difficult to understand is the position of Heather Suthpin who was elected to represent Dist. 1. Even if you others can be seduced by Amazon's promises, Councilwoman Suthpin is bound to try to protect us from bearing the heavy, heavy cost of this so-called "progress". That said, you others on the Council -- Reps. Hamby, Hartman, Herous and Mayor Nevill--have also taken oaths of office. You may feel this knife to the throat of Dist. 1 won't really affect your own constituents, but it definitely will, and you have heard from thousands of us begging you not to do it. On one petition alone, 1/4 of the population of Warrenton asked you to stop this. Think about that

If you want to be able to face your neighbors in the future, you must vote to reject the SUP. if Amazon's blandishments are overriding, you will live with the consequences. We will never forget what you do here. Never.

Yours,

Barbara Amster ( an Oak Springs resident who trustingly voted for Mrs. Suthpin)

**Subject:** Re: Seeking a reply: Much of Ward 1 is within 1000 ft

Good morning Mr. Smolinski

The noise conditions for the AWS SUP continue to be examined. This was one of the main topics of discussion at the January Town Council working session and formal meeting. The applicant requested time to review in greater detail the language that had been discussed at the working session and then again at the hearing. When and if the applicant returns to Planning Department with a revised SUP language on noise and that is presented to the council, I will review it to the best of my abilities to see how it does or does not meet our Town noise ordinances.

In the meantime, as I stated in the Town Council meeting, I am interested in folks' views on 2 topics. They are:

1. Amazon's property that is part of this SUP came into the Town Boundaries in 1960. Since 1960, it has remained vacant. 63 years. During this SUP process, I have heard many calls for uses other than a data center. Uses that align with the comp plan. Examples have been mixed-use development, housing, universities (fraternity and sorority houses are allowed by right on the property today), and parks. When these ideas are raised, they have been stated using the term "we." Examples are "we need" or "we should." My question is, who is "we"? Who will invest in any of those or other ideas? Who will build it?
2. Should data centers be anywhere in Fauquier County? Should they be in zoning areas where they are allowed? Should a landowner be allowed to ask for a re-zoning for a data center? What about the data centers present today in the county and planned ones - Remmington, Vint Hill, Catlett, etc.? Should the county remove its advertisement on fauquierbusiness.com that advertises data centers are a featured industry? Help me understand what we do about data centers in the county.

Thank you again.

**Subject:** Re: WTC Work Session/Public Hearing Followup 1/10/2023

Good morning Ms. Schefer

Thank you for your note. As you know from your real estate experience and background, this SUP is evaluated using a process outlined in our Zoning Ordinances. If it comes before us again for consideration, it is a legislative act by the Town Council to approve or deny. This SUP is not a formal vote in the sense of a general election among the citizens casting a ballot. Based on what I hear or read from citizens, I understand both sides of the argument. I certainly do hear the voices of the opposition and their reasons. But I also hear voices of support.

Regardless, at this point, at the last Town Council meeting, the applicant requested and was granted additional time to review the SUP conditions that had been crafted during the work session. When and if the applicant submits a revised document to the Planning Department for Town Council consideration, it is at that point I will review the application. If the SUP comes to a vote, I will make my decision known at that time. Until then, the applicant has a right as a landowner and taxpayer in the Town of Warrenton to be heard and evaluated on what they feel is their best proposal to meet our requirements. The pros, cons, and risks continue to be examined.

In the meantime, as I stated in the meeting, I am interested in folks' views on 2 topics. They are:

1. Amazon's property that is part of this SUP came into the Town Boundaries in 1960. Since 1960, it has remained vacant. 63 years. During this SUP process, I have heard many calls for uses other than a data center. Uses that align with the comp plan. [EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good afternoon -

I wanted to make the following comments and pose the following questions after the work session and public hearing on Tuesday.

1) Councilmember Hamby expressed the notion of a "silent majority" on Tuesday and Councilmember Heroux mentioned the same thing in a previous email to a county resident. This data center would affect Town of Warrenton and Fauquier County residents. A quick online search shows 73,815 residents in Fauquier County or thereabouts. Do you really expect to hear from 36,908 residents before you will accept the public sentiment as being against this proposal? All indications from emails and public comments are about 99% against.

2) I would like to hear reasons you have for a council member to be in favor of this proposal.

I welcome your feedback and further discussion.

Thank you,

**Subject:** Amazon SUP

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To members of the Council of the Town of Warrenton,

Nothing presented in the January 10th Town Council workshop and following meeting changed my view of the requested Amazon SUP. I remain convinced it is the wrong way forward for the Town of Warrenton.

Should you consider approving the Amazon SUP, may I make a few comments regarding the proposed Amazon data center:

- The request is not for a public cloud service data center. It is for a data center dedicated to a single customer as part of a 10 year outsource contract.

The proposed data center is too small for conversion to a cloud service data center at a later date. It is prudent to expect it to be empty in about 12 years' time.

- As part of the outsource service, Amazon will have alternate data centers that can absorb the workload planned for the Warrenton facility. Mitigation of these types of operational and commercial risks is normal and generally required in outsource contracts. The migration of services between data centers is a core capability of Amazon which underpins much of their public business. Closing all or part of the proposed facility for a SUP violation will not be a disaster to Amazon or its customer.

- The 10 January noise study submitted by Amazon does not follow guidance from the town's zoning organization. When applied, the zoning guidance shows many projected noise levels exceeding those permitted by the zoning ordinance. The study is sloppy including contradictions, diagram errors and almost no supporting information regarding input data and assumptions used in running the model. This is Amazon's third attempt at a noise design. I strongly recommend you take a conservative position when evaluating the validity of Amazon's pre-operational noise studies.

- Noise/Sound level modeling and future tests should be conducted using the loudest configuration of the data center permitted and available to Amazon under the law. As the Warrenton ordinance does not exempt the facility from noise constraints during power outages, the final build must be evaluated with all generators and chillers operating. I recommend you (1) include this language in the SUP Conditions document and (2) the town procure and be responsible for any future sound measurement procedures because there is tremendous latitude for "gaming" these measurements.

- Many citizens, especially nearby residents, will not trust future Amazon's noise readings. The erroneous Amazon noise information provided during SUP review supports this attitude. Should the data center be built, there is a high probability that the town will be ensnared in constant friction between its citizens protesting loud noises and Amazon over what the actual noise is. The best way to avoid this is to use a permanent continuous noise measurement system, which Amazon pays for, mounted on light poles at 4-8 sites around the perimeter. This is not expensive and is easily affordable by Amazon (nominally less than \$10,000 a year).

I was sorry to see no discussion in the Town Council meeting regarding the location of the VEPCO sub-station or perimeter fence lighting. Both items will have significant impact on the town and are easily mitigated in advance.

The damage the proposed data center and associated electrical power infrastructure will do to Warrenton is not worth the small tax benefit.

In closing, I am not swayed by Mr. Foote's argument this 'difficult' property needs to be developed. Each day Washington sprawl comes closer to Warrenton. This means the property will increase in value and become even more capable of supporting highly creative development that includes full integration with the fabric of Warrenton's community. Just because a viable approach for development has not come forward so far does not mean one will not be forthcoming in the not-too-distant future.

Thank you

Regards,  
Fred Smith

Good afternoon Mr. Heroux,

Thank you for taking the time to reply to my email, especially doing so during the holiday weekend. It is appreciated. Thank you also for inviting deeper thoughts. I would like to reply to your 2 questions:

1 - Regarding the property being vacant for 63 years. I've been in Warrenton for 12, so I would be curious to know, has the property been for sale from the same owner for 63 years? If yes, I can understand the seller's desperation in trying to offload the site after 63 years of actively trying to sell. If not, then the years of vacancy isn't quite as relevant. I see records online of a few deed transfers available online going back to 1997. If you know the history of the property's sale status over 63 years, I would be curious to know more.

Regarding who the "we" is - The Town of Warrenton and Fauquier County have prided themselves as a sort of oasis among the growth of NoVA. That is obvious the moment you drive over the county boundary on 29 between Vint Hill Rd. and New Baltimore.

"We", the residents who have chosen this oasis as our home, would like a say in big decisions. Not 'small potatoes' land transfers, but something of this monumental size that could change (many argue for the worse) the trend going forward. Could the property benefit from a conversation about rezoning? Maybe yes. If the 63-year vacant lot is such a desperate sell, then that conversation should be as public as the conversation over Walker Drive a few years ago. Let citizens be engaged about the options available for this property and what we consider acceptable and not-

acceptable. Will it be developed? Yes. How? Ask us as part of a larger conversation, not now at the 11th hour.

2 - Regarding the presence of Data Centers in Fauquier County, I would say this: This is the hottest issue today and for good reason. The roll-out of data centers in neighboring PW County has been horrendous. When these are fast-tracked, the result is simply fitting these wherever they physically fit with disregard for the effects - sound, line-of-sight, secondary infrastructure (towers), ALL of which can and will affect residential property values and quality of life. Are we ready to invite that kind of uncertainty and ill-effects into the neighborhoods of our small town?

As I said at the public hearing, there are over 700 (close to 800) residences within a half mile of the proposed structure, including assisted-living and memory care, apartments and condos, townhomes, and single family homes. Are we willing to say "screw you" to all of those residents, a significant chunk of the town's population, and shove this giant structure within earshot? Judging from the noise issues coming out of PWC, I would say that is the NUMBER ONE reason why you saw hours of public pleading last Tuesday night. We do not want to hear this thing. We do not want to go out for a walk or play outside and hear it. And there remains no confidence we will be shielded from that.

When it comes to zoning, this is worth an in-depth community conversation about the comprehensive plan, revisiting it, revising it, and asking for input. I bet if this was put before each resident as a yay or nay vote, the result today would be overwhelmingly nay. There is a larger conversation that has to happen here in our Town and in our County, and this pending vote jeopardizes that chance.

These are my thoughts. I'm happy to continue dialoguing despite me not living within your Ward. I appreciate (truly) your time.

Good evening Town Council members,  
 Thank you for your attention during my 3 minutes of comments at the public hearing on Tuesday night. I was the one about 45 minutes in to the meeting who cited distances to some of our neighborhoods. (I am a GIS analyst and GIS educator).

To remind you: The closest townhome in Highland Towne off Walker Dr is only 600 feet away. The

nearest single family home in Highlands of Warrenton is 800 ft. The closest in Oak Springs is 1000. And over 700 residences are within a half mile of the site. This does not even include Fauquier (non-town) residences.

You also heard from Dr. Lyver, whose letter to you is available for all to read. This part stood out to me:

I just read Dr. Lyver's letter to the Town Council. This stood out to me:

"On May 16, 2022, a complaint was filed with the PW County Police for excessive noise. The PW Police responded that evening and performed noise readings. They found that the noise level was at the PW County Noise ordinance limit (55 dB(A)) at the resident's homes, about 1,200' from the closest operating building. The Police did not take readings at other homes which are closer to the data center buildings, which are as close as 600' away from the buildings."

Hundreds of our residences in Ward 1 (represented by Ms. Sutphin) are within 1000 feet of the site! With these numbers, I can't believe the approval of the SUP is still a possibility.

I would greatly appreciate hearing back from each of you (and at the least, any 1 of you) explaining why residents of Ward 1 should NOT be concerned about noise pollution. We would desperately like to know your thinking on this.

Thank you,  
Jason Smolinski  
481 Cardinal Ln.

Dear Warrenton Town Council,

I attended the 13 December 2022 meeting and shared my community’s experience living adjacent to an Amazon Data Center campus (Tanner Way, Prince William County). I also provided a few hand outs. The attached PDF contains the notes and hand outs that I provided to you during that meeting.

I have also attached the latest noise log summary which demonstrates that nothing has changed in almost a year of trying to get this resolved. It is my understanding that an Amazon Lawyer recently told you that they have not violated the PWC Noise ordinance at the Tanner Way site. This was patently false. As you will see from the chart, the AWS Data Center exceeds the nighttime ordinance level of 55 dB(A) nearly every day (Gold symbols) and the day time (Blue symbols) levels of 60 dB(A) regularly. I meet with Amazon again this coming Friday, My expectation is that they will confirm their 1-year exhaust fan retrofit schedule which starts next month and will continue through Feb 2024, weather permitting. They have committed to 5-8 dB(A) source level reduction (may not be enough when measured in the community). Time will tell. I also understand that AWS is spending 10’s of Millions of dollars on this retrofit.

Please revisit the materials I have attached as you consider your path forward. I ONLY have leverage with AWS now because they desperately want to build more facilities in PWC. If you approve something that affects your residents, in your small town, you will have very few options to get it corrected and an angry constituency. Please be thoughtful and deliberate. This has been painful and time consuming for Great Oak.

I offered to host you in Great Oak during the 13 Dec meeting. That offer remains open ended. Please feel free to contact me via email.

Kindly and with respect  
Dale Browne  
Great Oak HOA President

**Subject:** Amazon job numbers are not credible for Warrenton  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Town Council -

Amazon has claimed their proposed Blackwell data center will bring 50 or more direct jobs to Warrenton. Amazon claims their investment will be \$550 million for this data center. That works out to 11 jobs per \$100 million AWS investment.

Yesterday Amazon announced a plan for a \$35 billion investment in new data centers in VA, and claimed it will bring 1,000 jobs to VA. That works out to 2.86 jobs per \$100 million AWS investment.

11 jobs / \$100 million in Warrenton  
 2.86 jobs/ 100 million in Virginia

Seems a bit suspicious, doesn't it? Amazon is claiming 4 times as many jobs per \$100 million for Warrenton, as they are loudly touting for Virginia. Both sets of figures are coming from AWS. Both sets of figures are for new data center development, so presumably based on similar technology and employment needs.

You must not accept Amazon's jobs figures for Warrenton at face value. It is merely John Foote's oral claim. As Foote says loudly and clearly in his book on local land use,

***"...no oral, or even written, representation of any kind made by an applicant during the rezoning process is legally enforceable against the property once the zoning is approved, if it is not incorporated into a proffer. Truths, half-truths, and outright falsehoods can pepper the legislative record in a battle for governing body approval and may even have constituted the basis upon which an approval was granted. Unless such representations are reduced to a legally binding commitment, as they may be through proffer statements, they are just so much advocacy ..."***

If you are going to base your decision, even in small part, on jobs -- if you are going to tell citizens your support is, even in small part, based on jobs -- then you must add a condition to the Amazon SUP binding Amazon to provide at least 50 full-time jobs throughout the lifetime operation of the proposed Amazon data center. If Amazon really is committed to providing 50+ jobs in Warrenton, they should readily sign such a condition.

But if Amazon balks at such a condition, there is your evidence that Amazon is practicing "half-truths and outright falsehoods" in pursuit of approval.

Internal Use Only

Dear Mayor Nevill and Members of the Town Council,

On January 10<sup>th</sup>, Jeb Benedict and I separately spoke to you on the impracticality of enforcing agreed noise conditions with Amazon. Despite the similarity in our messages, which were delivered from a perspective of years of personal experience in enforcing matters between government offices and private corporations, Jeb and I had not met. Following the meeting we exchanged information and over the last week decided our message should be submitted to the record in writing. The submission is a short read and attached for your benefit.

Either or both of us would welcome meeting with any of you face to face to discuss this matter further.

Sincerely,

Chuck Cross  
 [REDACTED]

And

John (Jeb) Benedict

**Subject:** Amazon SUP: A New Risk DEQ Notice of Air Quality  
 Variances for Data Centers in NoVa  
**Attachments:** Relaxing DC Diesel Restrictions (1 26 23).docx  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Town Council:

Here is yet another reason NOT to approve the Amazon SUP. See the article below. In short:

*Virginia DEQ is proposing to allow more and longer periods for data centers to operate on diesel and natural gas generators. This is because data centers are contributing to grid reliability issues in northern VA. And those generators will significantly exacerbate noise in nearby residential neighborhoods while also emitting diesel and natural gas air pollution that would be a localized air quality threat in those neighborhoods.*

*Think of it this way: electric grid instability, substantially higher noise levels from generators, and infusions of localized air pollution from diesel generator operations.*

While this latest DEQ regulatory proposal is now for PWC, Loudoun, and Fairfax, it will almost certainly be expanded to cover Fauquier County if you allow the Amazon data center to be built on Blackwell. This will add to the negative legacy your Warrenton neighbors will remember you for if you approve the Amazon SUP.

DEQ anticipates invoking this variance as early as March-July of this year.

# Virginia regulators consider letting data centers regularly use fossil-fuel power for part of the year

By Whitney Pipkin      January 26, 2023 ([Virginia regulators consider letting data centers regularly use fossil-fuel power for part of the year | Energy | bayjournal.com](#))

Virginia regulators have proposed *allowing nearly 300 data centers in Northern Virginia to use backup generators over a five-month period during which energy “transmission problems” are anticipated.*

Many of these backup generators produce power by burning diesel or natural gas, which releases pollutants that pose risks to human and environmental health. To protect regional air quality, Virginia’s Department of Environmental Quality regulates when and how frequently data centers can run their emergency on-site generators to ensure they are working while limiting their cumulative impact.

During normal operations, data centers can be powered by a variety of sources, ranging from the municipal electric grid to their own solar panels. In Virginia, natural gas and nuclear power were the top sources of electricity in 2021, but that is

changing, fueled partly by data centers. Google and Amazon, which operate many of the region's centers or contract with them, have each committed to source energy entirely from renewable sources by 2030 and 2025, respectively.

During past interviews with the Bay Journal, state regulators said they imagined multiple data center generators running at the same time only in the case of a major emergency impacting the regional power grid. *Environmental groups, meanwhile, have been increasingly concerned about the rapid and regionally concentrated growth of an industry that uses massive amounts of energy to satisfy the world's appetite for electronic data.*

The Northern Virginia counties of Loudoun, Fairfax and Prince William are home to nearly 300 data centers that are crucial to moving about 70% of the world's internet traffic. *Those centers, and the reliability of the internet, by extension, could be impacted by upcoming power transmission issues that are anticipated from March to July of this year,* DEQ Director Mike Rolband said in a statement explaining why the agency was proposing a temporary variance from its own regulations. Responding to questions by email, DEQ Spokesman Aaron Proctor said *demand for electricity from data centers in that region "could potentially exceed the capacity of the area's electric transmission system"* during that time period.

"We are proposing this temporary and redundant variance out of an abundance of caution to maintain the reliability of the internet and the electric grid while enabling data centers to continue serving their customers," Rolband said in a press release. "We will closely follow this developing situation and will use our robust compliance and permitting programs to ensure our environment remains protected."

Proctor said the agency hopes the variance, once approved, will not be invoked and that it is "intended only as a precautionary measure." PJM Interconnection, the organization that coordinates electricity transmission in 13 states and the District of Columbia, issues warnings when conditions indicate that

stress on the grid in a particular area is high and could lead to a declaration of emergency, he said. "Such warnings are rarely issued," and, when they are, it is "for very short periods of time." Since 2015, Proctor added, the duration of such warnings has averaged 17 hours a year. But he also said the variance for the region's data centers, which operate around the clock, would be the first issued "for this type of facility."

The agency will be [accepting public comments](#) on the proposed measure for 45 days, beginning Jan. 31. A [public hearing](#) will take place at DEQ's Northern Regional Office in Woodbridge at 11 a.m. on Feb. 27.

*DEQ officials a few years ago began looking at the cumulative impact of data centers' backup generators* should they all fire up at once. A report by the state Secretary of Natural Resources in 2019 listed air emissions from data centers' backup generators as a potential risk to air quality. In 2020, the agency began requiring new data centers to use emergency generators with the "best available control technology" to limit emissions, according to an [industry report](#).

During an interview with the *Bay Journal* in 2019, Thomas Faha, the director of DEQ's Northern Regional Office, which issues air permits for the generators, said the equipment is permitted to kick on periodically for 15- or 30-minute periods to ensure they will work in an emergency.

*Each data center facility includes dozens if not hundreds of backup generators to keep it operating around the clock. Faha estimated in late 2019 that the number of generators permitted at the time for data centers in Northern Virginia could run up to 3,000, and the total has grown since.*

DEQ permits typically restrict when those tests can occur, avoiding hours when commuter traffic isn't also contributing to air pollution, for example.

"But even a minimum amount is an addition to what was there in the past," Faha said. "If the grid were to go down and we had a

catastrophic emergency, these units are then allowed to run for longer periods of time.”

*Burning diesel or natural gas for power releases pollutants such as nitrogen oxides, which combines with volatile organic compounds to form ozone, which is a threat to human health. Nitrogen oxides emitted into the air can also contribute nutrient pollution to the Chesapeake Bay when the pollutants fall back to Earth and wash into local waters.*

The latest proposal from DEQ would permit exceptions to those requirements during the temporary variance period starting in March. DEQ’s statement said the operators of generators must still calculate and report the emissions created by the equipment during these times. When asked what assurances residents living near the data centers would have about their local air quality, Proctor said that DEQ operates real-time, continuous air quality monitors at a half-dozen locations near these data center hotspots. Information from those sensors can be viewed on [DEQ's website](#).

The variance would become effective after being signed by DEQ director Rolband following the 45-day [comment period](#), which will end in mid-March. The variance would expire on July 31.

Council Members,  
 Each of you has a conscience, and you will have to live with yourselves as well as with your fellow townspeople if you inflict this data center on us. You will turn a peaceful Dist. 1 into a nightmare of noise, air pollution, and ugly sightlines, for no reason other than a perceived financial gain. Your "safeguards" have been shown to be useless, especially based on Amazon's behavior in Prince William and other VA sites. Your neighbors and, at least in one case, your own family, oppose the SUP so how can you even consider supporting it?

My Dist. 1 neighbors have no idea what you might have in store for them but, once they have to live with it, there will be nothing but shame and recriminations. Please follow your consciences and vote no.

Sincerely,  
 Barbara Amster  
 726 Acorn Ct.

Good Afternoon Mr. Mayor and Town Council Members,

Please take just a minute to view this drone video showing the Amazon data center site from various perspectives. I know you all are very familiar with the site, but what this video shows may make you think even harder than you already are regarding your decision on the SUP.

This site truly is at the gateway to Warrenton and is surrounded by many homes and businesses.

Thank you,

Kevin Ramundo

I do not live in the Town, but I do live in the County. I'm a bit taken aback by the extreme opposition to the data center being proposed adjacent to Country Chevrolet.

The land has been sold and something will be built there. If it's a sea of new homes, that will have a major impact on town and county services (police, fire, water, schools, roads, etc). After it's built, a data center will have almost zero effect on those services. It will also bring in additional revenue and perhaps the burden won't fall so hard on home owners.

Compared to how close some data centers are to existing housing in Prince William County, this seems like an acceptable location. The townhouses that are constantly referenced with regards to noise, etc currently sit behind the large Giant shopping center as well as the 24 hour Sheetz gas station.

I do think it's important to have a tree barrier that will eventually shield the building and they do need to meet the noise standards.

Citizens and businesses both large and small use cloud based services like AWS and I think it's unrealistic to continue to think NIMBY. Citizens who are opposed to a data center have not clearly articulated what they would like to see built within the current zoning ordinances. Many just want nothing built and that is not realistic.

I hope both the town and the county can be a bit more business friendly while still considering the wants and needs of the citizens. I think we are all tired of the numerous fast food, vape shops, dollar store, auto parts stores, etc that are being built and would like to see additional quality businesses like in old town that reflect our wonderful area. We also need to balance that with tax revenue.

I would come in person but I had foot surgery, have to use a knee scooter and it's difficult to get around. Thank you for taking email comments.

**Attachments:** Noise Flow chart 2019 (1).pdf

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good evening,

I would like to share the following before you vote on the Amazon SUP Application:

### **Drone Viewshed Photos**

My husband took drone photos looking outward from where the proposed Amazon structure would be. Everything in those photos would be able to see it. We used Amazon and ArcGIS info to calculate where the building/rooftop equipment would be and tried to be very accurate. We are happy to go through the exercise again and show you our process in person, just ask. [Please note: we took off/landed near the Amazon property and not on it since Amazon declined our request to be on their property].

- The data center would be visible from many homes in North Rock, Highlands and the Reserve at Moorhead; also from the Hampton Inn, several office buildings and multiple shopping areas.
- The line of sight to Oak Springs/Poets Walk could not be determined since there are currently trees in that direction.
- We did not fly all the way to the northeast corner to determine viewshed impacts in that direction.

Link to photos:

[https://drive.google.com/drive/folders/1b2L44n1\\_ibZlo6GojM5J0BQqSOX8F5G7?usp=sharing](https://drive.google.com/drive/folders/1b2L44n1_ibZlo6GojM5J0BQqSOX8F5G7?usp=sharing)

### **Don't Want To Hear It Or See It**

Councilwoman Sutphin, during our meeting you mentioned that you had told Amazon that you "didn't want to see or hear the data center"

- These photos very clearly identify all the residents - many in your ward - that would be able to see the data center if approved.
- Dr. John Lyver is telling you that many of these same residences would be able to hear it, even with the condenser fan silencers, compressor wraps and sound walls Amazon has said they would install. Dr. Lyver is also saying that with these silencers, wraps and sound walls in place, and taking into account Mr. Walton's December 16th letter clarifying the ordinances, Amazon would still violate Town ordinances much of the day and night at the perimeter of the property.
- The data center would also violate County noise levels, but it seems that residents in the County would not have much recourse based on the Sheriff's flow chart we recently received (see attached).

### **Difference Between OVH and Blackwell Road**

I want to clarify that the equipment used at OVH in Vint Hill is different from the equipment Amazon is proposing to use on Blackwell Road. OVH uses a "closed loop" cooling system and the proposed Warrenton data center would use an "air cooled" system. They would produce very different noise levels. Visiting OVH and thinking it will sound the same at the Blackwell Road data center if approved is incorrect.

### **DEQ Proposing Relaxed Use of Generators**

The Virginia Department of Environmental Quality (DEQ) has recently proposed allowing Loudoun County data centers to be permitted to run generators beyond what is normally allowed due to power concerns, and the same could happen in Warrenton. Has your staff calculated the amount of noise the 29 generators would make and how far that noise would travel? Also, how much air pollution that would put out?

### **The Elephant In The Room**

You are supposed to be making your decision based on the merits of the application and not on potential revenue. However, that seems to be the driving factor in this process, and the only possible benefit of this proposal. Amazon indicated that tax revenues would be \$900k the first year, \$700k the second year, \$300k the third year, etc. But these figures are only if Amazon doesn't ask for exemptions. I hope you have had a chance to watch Sam Mitchell's comments about the myths of data center property taxes: <https://protectfauquier.com/latest-news/gw9usy1rv4cne2jy41k2g9bozyltnb>. Sam Mitchell has 40 years of experience as a financial analyst.

In recent weeks, Town officials have vocalized concerns about the WARF running in the red, as well as money being needed for sewer/water updates. This is all the more reason to promote a mixed-use development at that location as 1) the tax income from a mixed-use development would be higher than data center income, 2) the tax income would be relatively constant versus cyclical as a data center's would, and 3) the tax income does not run the risk of disappearing at a later date when data centers become obsolete. Frankly, if the Town is concerned about WARF

expenditures - close the WARF, discuss transferring it to the County or investigate selling it to a private company. Town and County residents would rather see the WARF close than a data center being built on Blackwell Road.

### **Falmouth Street/Walker Drive**

Dominion has said that the transmission lines to power the proposed data center would be run along Falmouth Street and Walker Drive. Dominion has still not provided any details about where the 30-40' path would run. This is a critical factor that has not been addressed as part of the application.

### **Councilman Héroux**

With regards to the two questions you asked -

1) Who is the "we" that will build a mixed-use development on that land? Multiple developers have indicated support for a mixed-use development at that property or in the immediate vicinity. If the Town advertises the concept, they will get an able and willing developer:

- *Nina Weissberg* shared her mixed-use vision during the discussions of the Warrenton 2040 Plan (2019-2021).
- *Brian Cohn*, the Brookside Developer, reviewed Suzan Fultz's proposal that she shared with the Council and commented "this could be shown to be a very viable option."
- Executives from *The Warrenton Village Center* (adjacent to the Amazon site) are currently working on a proposal for a 2-phased mixed-use project on their property. Phase I would be apartments/townhomes between Ace Hardware and Oak Springs Drive. Phase II would be residential and retail infill. They are supposed to be reaching out to the Town before 2/14.

2) Where should data centers be built in the Town/County? Data centers should not be built in the Town since they would be too close to residences and businesses. If any data centers are going to be built in the County they should be built at Vint Hill or Remington where much of the infrastructure is already in place. I think they should be required to use the "closed loop" technology that OVH uses so that they are quieter, and County officials should be having open and transparent conversations with citizens before moving forward with additional data centers since Dominion has stated that they will need to add high voltage lines in the area if additional data centers are built.

### **Councilman Hartman**

I noticed your Council bio says that you are "working to preserve the unique character and charm of our small town and the quality of life in Ward 4." That is exactly what the opponents of the data center, which include many people from your ward, are trying to do. Please remember that when you vote.

**All The Information You Need**

You have received hundreds of emails and public comments, but you have all the information you need to make this decision from the following 5 sources:

*Warrenton 2040 Comprehensive Plan:* The New Town District is "characterized by mixed-use with strong live, work and play options." Data centers are not part of the Plan.

*Your Planning Commission:* They voted against this proposal due to lack of information provided by Amazon regarding how much noise the facility would generate, how much power it would need to operate and where the power would come from, how much tax revenue it would generate for the town, impact on the town's scenic gateway and viewshed, noncompliance with the town's comprehensive plan and lack of a plan surrounding the decommissioning of the building.

*John Lyver:* Dr. Lyver is telling you the data center would violate Town ordinances much of the day and night, and would be above County limits (without recourse for County residents). NASA relied on his computational abilities for 25 years, do not discount his calculations. He is a wealth of knowledge, talk to him.

*Chuck Cross/Jeb Benedict:* They have 65 years of regulatory work, including enforcement between them. They are telling you that the Town will not be able to shut down the data center once it is up and running unless they file a lawsuit, and that process will take years.

*Dale Brown/Great Oak Community:* The Amazon data centers have made residents' lives miserable, and working with Amazon to get relief has taken months without any results. Don't let Warrenton neighborhoods suffer the same fate.

VOTE AGAINST THE AMAZON SUP APPLICATION.

Good evening -

I wanted to pass on more information about the Warrenton Greene project in case any of you are interested in learning more about it. The project was approved by the Planning Commission but did not come to fruition because of the economy. There is no reason why a mixed-use development (modified to take into account the current economy and Town needs) would not be successful and provide a strong tax base. It is interesting to note how complete this application is compared to the skeleton application Amazon has submitted.

**Application Timeline:**

May 2007

Wilson's Warrenton Greene application submitted for Planned Unit Development (PUD).

May 2008

Grove Slade and Associates traffic study. "Upon full build-out and when mitigation measures are implemented by the Applicant and others, traffic conditions would fall within acceptable levels of service (LOS) for Lee Highway and Blackwell Road."

June 2009

The Planning Commission approved the rezoning application, SUP's and associated zoning text amendment.

February 2011

Withdrawn by Applicant due to the economy.

Denise Schefer

Dear Mayor and Town Council Members,

I have emailed most of the town council members before concerning the Amazon Data Center Proposal as well as spoken at the 2023 January Warrenton town meeting. As I mentioned in my previous email, it really comes down to what we want in Warrenton. There are 7 council members along with the Mayor that are responsible for guiding the future of our town. I know being a town council member can be a thankless job - but you did sign up for it - and you should be answerable to the citizens that elected you.

The problem I'm finding, is how does the Mayor and each council member actually feel about the Amazon proposal - are you for or against it and why. Not much has been said by our Mayor and council members, and this makes it difficult as a citizen to ascertain the pros and cons of the proposal. I resent the fact that I have to spend many, many countless hours researching, reviewing and trying to understand all that is involved with this proposal - when in fact, the council members, having all the information, should be informing us - your constituents. Which brings up the question, why hasn't this proposal been sold to us - WHY?

I was dismayed to read that several council members signed NDAs with Amazon, which most folks would find highly unusual (and should be illegal!). Given that no information is available to the public regarding why these NDAs were required - which again begs the question - what possible motive could there be and has Amazon paid off our elected officials - it leaves the citizens to speculate and possibly coming to wrong conclusions - but nothing but silence from council members.

I have read it will bring jobs - but not very many (data centers are pretty automated). That it will bring in 5 million dollars in revenue - where does that number come from - the same people that have NDAs with Amazon? There is talk of data centers being obsolete in the near future - then what? We the citizens need more information so we can help you make an informed decision.

It comes down to why would I (we) want a large data center in Warrenton, and all that comes with it - hugh power lines, noise and ugliness - in our beautiful pastoral setting. And once one data center is approved, more will come.

After much research (with little help from town officials), I want to state I am strongly against the proposal and feel you should be as well (unless you can give me good reasons why you should vote for it).

I implore you - Do Your Job and Protect Warrenton!!

Sincerely,

Dave Hettinger

To the  
 Members of the Warrenton TC, and Mayor Nevill,

You have  
 received a mountain of mail, texts and phone calls on the Amazon Data Center SUP application. We do not intend to add to that without a good reason.

Attached  
 you will find four things we encourage you to read before next Tuesday's Council meeting and presumably your vote on that application:

--  
 The first is a joint letter summarizing our position.

--  
 The second is a timeline of the relevant known events and factors that have brought us to this point. So far as we know, no one has assembled a review document like this until now and it is a highly useful tool for supporting your reviews. There will surely be things here you do not already know (some of the information was obtained through FOIA disclosures), but will benefit from knowing. It is nothing if not an interesting read.

--

The third is a study of key elements of the application and considerations we believe to be necessary to assess its acceptability under the law.

--

The fourth is a response to Council Member Heroux's questions.

These

are each provided to you by and through the collective efforts of the three undersigned organizations. We have worked together for many months to understand the application and its potential community impacts, and to educate the public on these. While we have not always agreed among ourselves on every issue or determination, the attached represents our united views and conclusions.

We

respectfully request that you consider these closely as you approach this weighty decision.

With

thanks for your time and attention,

Citizens

For Fauquier County, Piedmont Environmental Council, and Protect Fauquier

**Subject:** Citizen Comment for Warrenton Town Council Public Meeting,  
 14 Feb 2023

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Warrenton Town Council,

I would like to state, for the public record, my 100% opposition to the Amazon data center special use permit (SUP). It is imperative that the town council vote against this dangerous proposal that will adversely impact thousands of citizens in Warrenton and surrounding areas of Fauquier County, significantly degrade the quality of life, diminish housing values, and forever alter the small town and rural feel of our area.

It is breathtaking that this misguided proposal could have made it this far, as it has so many negatives, almost universal opposition among the citizenry, and a solid rejection by the planning commission. This SUP is also in total opposition to the approved Comprehensive Plan for Warrenton. Furthermore, the proposal process has been shrouded in opaqueness and questionable actions by the town and some of its officers that evoke many concerns of shady dealings. What are you trying to hide behind your non-disclosure agreements and lack of forthright response to Freedom of Information Act inquiries?

At the last town council meeting, there was a lot of talk about noise, as it is certain that the data center will produce huge amounts of noise 24/7 that will impact hundreds of households in Warrenton day and night. Either the town council is incredibly naive or is purposely putting out misdirection and disinformation to have an excuse to vote for this SUP. Do you seriously think there will be any practical recourse to the certain violation of the town noise ordinance once the data center is operating? Do you really think that our small town, with limited money and inexperienced town lawyers, will be able to best the financial and legal might of one of the richest and most powerful corporations in the history of our country? You will be tied up in legal proceedings for years that will bleed the town dry, costing way more money than the pittance that you expect to get in yearly

tax revenue from the data center. And meanwhile, the noise will be going on day after day, night after night.

Currently, I have absolutely zero confidence in the integrity and decision-making of the town council. It appears that a majority of this council is more than happy and more than ready to sell out our town and county for a bit of Amazon silver that will be thrown our way in exchange for the massive harm that this proposed data center will do. Please prove me wrong. Show that you care about citizens' concerns. Show that you value the small town, rural, agricultural, and scenic nature of our area. Show that you are not in thrall to a big corporation that hasn't the slightest interest in our town other than making money. You can do the right thing, the ethical thing, and the intellectually honest thing. Vote against this SUP. Just say NO.

Sincerely,  
William Ziegler  
Broad Run, Scott District  
Citizen of Fauquier County since 2005

Dear Mayor and Councilmembers,

I humbly request your attention again regarding the Amazon data center issue. I read this article this morning. The article focuses on Prince William County but brings to light some big issues regarding data centers. I hesitate to highlight any points because every one of the points is vital, but the terrible noise that Manassas residents complain of seems especially important. You were elected to protect and represent us! Please protect our city from this awful noise that threatens!

<https://insideclimateneews.org/news/10022023/virginia-data-centers-amazon-prince-william-county/>

Additionally, here is a brief video in which I discuss some of the reasons why you should hesitate to think that Amazon will keep its promises. Please do take the time to watch it! It took many hours of work for myself and others, though it is less than five minutes long.

<https://vimeo.com/797542389/dd5f07c0b4>

Thank you for all of the time you put into your jobs!

Erin O'Donnell

From the station he helped construct, Vint Hills Farms Station, my father, Jim Thoroman, worked on the design of the radio and receiving towers that were responsible for breaking the Enigma code near the end of World War II. He opened a radio repair shop on the corner of Third Street and Main Street because he liked the fly fishing at Thornton River and Goose Creek. He often spoke of his experience as a business owner in the development of land use zoning in town beginning in 1950 with the first planning commission, with the supervision and support of Paul Mellon. The planning commissions go on to gather the input of the residents on growth and development. Mr. Mellon began the Piedmont Environmental Council to whom we owe the continued protection of open and forested land, and he donated the land for Sky Meadows. I was born at Fauquier Hospital, graduated from Fauquier High, trained as a nurse at Fauquier Hospital, our children farm in Fauquier County, and hopefully I will die in my bed off Academy Hill Rd, where my mother taught third grade at Warrenton Elementary.

Protect open and forested land. Be a part of a legacy of philanthropy and conservation. Land use planning in Warrenton, through the administration of special use permits, is the right of town residents, and we don't want an Amazon data center at the entrance to Warrenton.

**Subject:** Citizen Comments against the Amazon Data Center

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Town Council,

I am a resident of Warrenton and I am opposed to the Amazon Data Center due to the noise it would be producing from the massive HVAC units and generators. Not only do they produce a great amount of noise, but they also produce very strong vibrations that will be felt inside homes and businesses nearby, as well as the nearby Poets Walk, which is a memory care unit. The noise and vibrations are known to cause, or exacerbate, many health conditions.

I encourage you to listen to this: <https://vimeo.com/796104421/dbd1e29382>

If you absolutely feel you must vote yes for the Amazon Data Center, then I must insist on a Noise Ordinance that requires a 24/7 continuous noise monitoring system, mounted on poles around the property, transmitting noise measurements to a third-party public website.

I truly hope and pray the Town Council votes NO!

Sincerely,

Sarah Thomas  
210 Fairfield Dr  
Warrenton, VA 20186

**Subject:** Response to Mayor: AN INFORMED PUBLIC CANNOT LET  
 FALSE STATEMENTS STAND  
**Importance:** High

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Internal Use Only

The following letter has been submitted to the editor of Fauquier Times and is also being submitted into the town record for tomorrow's hearing.

AN INFORMED PUBLIC CANNOT LET FALSE STATEMENTS STAND

In recent years we have learned important lessons from the highest level of our nation's governance that false or factually incorrect statements made by public officials, whether intentional or not, cannot be allowed to stand in the public record unchallenged. It is with this in mind and the belief that ethical responsibility begins at home that we feel compelled to challenge recent assertions by Mayor Nevill and Councilman Heroux.

On Jan 6, Warrenton resident Chuck Cross wrote to the Mayor asking that he exercise his responsibility under the Town Code of Ethics to "intervene when actions of members that appear to be in violation of the Code of Ethics are brought to their attention," in regard to Councilman Heroux's clear and indisputable appearance of a conflict of interest in the Amazon special use permit matter. The Mayor offered no response.

Exactly one month later, over 30 concerned Warrenton residents wrote to the Mayor stating: "We expect our Town government to operate ethically and with high integrity. We expect our Town government to honor its own Code of Ethics. We are deeply troubled by the clear appearance of a conflict of interest by Council Member Jay Heroux, and equally troubled by your failure to intervene, as you were requested on January 6."

After this additional citizen request, the Mayor provided a curt and dismissive response:

"The Conflict of Interest Act overrules any local rules regarding participation in votes by council. Under applicable law, the Mayor has no authority to require anyone to recuse themselves. Mr. Heroux made a declaration on the record that he can make a decision fairly, objectively, and in the public interest, and I trust that he made the right decision. Furthermore, I would never advise any council member to recuse themselves based on supposition or innuendo."

The Mayor's curt response to these concerned citizens is not only unreasonably dismissive of valid concerns, it is flatly incorrect. The Conflict of Interest Act does not overrule Warrenton's ethics rules. On the contrary, it sets out minimum state requirements for conflicts by town officials, such as prohibiting gifts, payments, or favors, restricting personal or family interest in contracts, and restricting lobbying after leaving office. Indeed, although county authority is limited to express grants by charter, Virginia law gives incorporated cities and towns all of the "uniform charter powers" set out in Article 1 (Virginia Code section 15.2-204). Those powers, set out in Article 1 (§ 15.2-11 et seq.) of Chapter 11, enable local government to govern its own affairs as long as state law has not "expressly prohibited" that action, and it includes "all other powers pertinent to the conduct of the affairs and functions of the municipal government, the exercise of which is not expressly prohibited by the Constitution and the general laws of the Commonwealth, and which are necessary or desirable to secure and promote the general welfare of the inhabitants of the municipality."

Those powers certainly include adopting additional ethics requirements or procedures for council members and employees. And it is wholly appropriate that Warrenton's Code of Ethics addresses even the appearance of conflict of interest, because often the full extent of conflicts and improper dealing may remain hidden. And the citizens of Warrenton need to have full confidence in their Mayor and Town Council, especially in proceedings that involve major corporate interests and have widespread citizen opposition. The appearance standard, in fact, is commonplace among civic and professional ethics codes across the nation.

Arguing that "we can't do it because state law doesn't say we can," is not only legally incorrect, but also illogical. Our Mayor should not treat such a serious ethics issue so dismissively, and his false statements only further undermine public trust and the Town's reputation.

Further, it is preposterous that the Mayor should claim that the Town's own Code of Ethics is somehow invalidated under state law. The Code of Ethics has been in place for years, was recently modified and re-ratified, and must be signed by all council members and town employees. The Mayor himself presided over some new amendments and council signatures to the new code.

The statement that the "Mayor has no authority to require anyone to recuse themselves," is also out of line. The citizen letters of Jan. 6 and Feb. 6 asked that he "intervene," as the ethics code requires. It is Council Member Heroux who should recuse himself. The Mayor has a responsibility to intervene to see that he does so, or to delay or prevent Town Council action that could be affected by the appearance of Mr. Heroux. That intervention could take the form of an investigation, a hearing, a request to comply with the Code of Ethics, or any number of other actions reflecting that he has a responsibility to the office he was elected.

As for the Mayor's comments about Council Member Heroux himself, the fact that Mr. Heroux has claimed that he would perform his duties impartially does not relieve the Mayor or Mr. Heroux of complying with the Code of Ethics. Again, the code is very clear that the trigger for recusal is the "appearance" of conflict, and when "actions of members appear to be in violation." The Code of Ethics is meant to ensure public confidence in the utmost integrity of Town decision-making. Twice now citizens have pointed out to the Mayor and Mr. Heroux that it is the appearance alone, not an actual untoward act, that triggers these responsibilities. The appearance of conflict of interest was further underscored by a feature length article by Peter Cary in this publication on Jan. 4, "Resident points to councilman's potential conflict of interest regarding proposed Amazon data center." Or one can simply do an online search of the company where Council Member Heroux is a senior executive, Definitive Logic, which trumpets its partnership with Amazon Web Services.

Finally, the Mayor's statement that he would "never advise" recusal based on "supposition or innuendo," is not only dismissive but shamefully disrespectful to the citizens. This is not about supposition and innuendo. Mr. Heroux was appointed under irregular circumstances, after another Council Member resigned. The Mayor and the Town Council had extensive communications and meetings with Amazon -- all hidden from the public -- and has stonewalled against attempts to require disclosure under Virginia's Freedom of Information Act. The Mayor and Council's improper handling of the Amazon data center issue has led many citizens to doubt the honesty and integrity of its town government, on an issue that more than 2000 citizens have petitioned the Council to deny.

So, in this -- the most serious and most opposed issue in Warrenton's history, we call on Mayor Nevill to be factual, to be correct, and to be ethical -- and most importantly, do the right thing. Stop any vote on the tainted application and take the ethics issue seriously.

Chuck Cross, Warrenton  
Eric and Christina Gagnon, Warrenton  
Carol C. Collins, Warrenton  
Scott and Hilary Pierce, Warrenton

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Thank you for reading yet another comment - I can only imagine that you are bombarded with them during these deliberations. Right up front, I live in the county - 5 miles outside Warrenton down 211. So, I don't live in town - if that ends the value of my commentary - save yourself the read.

However, if you do want feedback from the citizens that invest in Warrenton everyday for shopping, volunteering, and other business - I'd like to weigh in as opposed to the facility at this site and would also love to see the towns and counties in Virginia use their collective power to shape the billions in investment that will come to Virginia for data centers given the big federal client and related businesses that this region supports. Notice that I'm not saying never, no way, not in my backyard... I'm just reflecting on several experiences of our neighboring counties and asking Warrenton to consider being the leadership that helps to define the future.

Are you persuaded that the tax revenues you will receive will offset the negative impacts that have been raised at our hearings and in many articles about Loudoun and other counties. Noise, power demands, the big box corridors - do they deliver a net benefit worth the impact on the neighbors in that area. Are we setting a precedent for a drive into Warrenton that looks like drives to Dulles and into Leesburg - green replaced with big imposing structures? As we grapple with the energy crisis - should the data center owners be required to tap into geothermal and other sources rather than increasing the Dominion sprawl and power stations. When faced with a "no go" unless demonstrated noise reduction works - would Amazon and others not step up their investment to making things work. That engineering does not seem impossible compared to the remarkable things that we've seen in such short order but unless someone says "no, unless" (with real teeth) - it will never happen.

Amazon made big net zero carbon commitments as part of it's climate pledge. The owner Jeff Bezos created his own Earth Fund to invest in smart strategies for our future. Might there be a conversation with Amazon about stepping from the back of the data center pack in terms of impacts to the grid, noise, etc and engineering a pilot for our area that demonstrates a model that might work for all. I know that all sounds naive - as it would in the short term impact their profit model.... But long term might stop the next wave of resistance. They have the resources - make them use them. Having paid the multiple they did for the property - they have a huge incentive to get this done right.

If the client in this instance is predominantly federal - would the Infrastructure investments - client and more - not provide a challenge and funding to give it a go. Or will the government be content to have federal sprawl extend throughout Virginia. We'll all be the big warehouses and noise generators that support DC?

Whatever your decision, I hope that the deep divides that have been created over this decision can be healed. Today's Post author made it sound like this is a rich vs. poor divide. I work with people of all walks of life - long term and short term residents; town and county; rich, poor and middle income and that is not what I hear. That's not what I saw when I was turned away at the November hearing because of the crowd. Wish you had cameras outside to see the diversity of the crowd that had not turned out to cheer the decision on but to register concerns.

I can't imagine what it might feel like to be in your shoes right now with this decision. Good luck as you deliberate.

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Mayor Nevill and Town Council,

As a constituent in Ward 5, I am deeply concerned about the proposed Amazon data center. It is my understanding that you may be unaware of the strong opposition here.

I wrote twice to my Councilman Jay Heroux and signed a petition sent to him. To date, I have received no confirmation or response from him. Perhaps he has not shared all the correspondence he received from his constituents with you or the rest of the Council, so I am reaching out to you directly.

Below is message 1 sent December 3rd and my followup message 2 (sent January 6).

Please know that the majority of residents in Ward 5 are deeply opposed to the data center. We have forwarded multiple correspondence to voice our opposition, yet our representative on the Council continues to fail to appropriately represent us. It seems clear now that we know he has a conflict of interest regarding this matter he may not be adequately expressing our wishes to you and the rest of the Council.

Lorraine Bethea

**Date:** December 3, 2022 at 5:16:24 PM EST  
**To:** jheroux@warrentonva.gov  
**Subject:** Please vote NO on Amazon Data Center

Dear Mr Heroux,

From the beginning, the Amazon data center plan has been immersed in scandal and multiple under the table deals that do not bode well for our town. In fact, nearly everything about how this situation has been handled so far outright stinks.

Clearly, Amazon's case could never stand on its own merits why else would their shady dealings with our Town Manager and others have occurred?

As a resident in an area that is already affected by more noise and light pollution than ever before, I certainly do not need this data center added to it. Yes, my bedroom windows face the site and my hilltop location ensures that the light and noise will affect me and my family 24 hours a day.

As your constituent, I am urging you to vote **against** the data center, as it will clearly NOT be an asset to this town. It may have some financial advantages, but it will not maintain the cultural or moral integrity of our town, nor will those advantages override its negative affect on the people that live here (myself included).

I also urge you to support the full disclosure of all town council members and town employees that participated in signing NDAs with

Amazon and those who worked for Amazon (paid or unpaid) at the same time they served the town in any capacity.

We all deserve to know and this chapter in Warrenton's history needs to close in favor of the residents, not Amazon.

Thank you,

Lorraine Bethea

**To:** jheroux@warrentonva.gov  
**Subject:** Fwd: Please vote NO on Amazon Data Center

Mr Heroux,

I am deeply disappointed that I have not received any acknowledgment or response to my message sent on December 3rd, 2022. I am forwarding it to you here with urgency, as I hear you still support the Amazon data center project.

As your neighbor and constituent, I must ask WHY? There is unquestionable evidence that shows you are representing citizens that overwhelmingly oppose a data center here, so why would you think the appropriate way to represent us is to support it??

That is not how representational government works. Your vote on the Council is supposed to voice the will of the majority of your constituents, not work in direct opposition to their clearly demonstrated wishes.

Kindly consider this and our Town Code of Ethics.

Thank you,

Lorraine Bethea

1 P R O C E E D I N G S

2 MAYOR NEVILL: It's 9:00 a.m. on Tuesday,  
3 February 14th. I'll call the work session of the  
4 Town Council of Warrenton to order. We do have a  
5 quorum present in the room, and we have Ms. Sutphin,  
6 who will be joining us remotely.

7 Ms. Sutphin, are you on the line?

8 MS. SUTPHIN: Yes, I am.

9 MAYOR NEVILL: Will you state for the  
10 record, please, your reason for remote attendance  
11 and your current location.

12 MS. SUTPHIN: I'm at my residence here in  
13 Warrenton. And it's for health reasons. My husband  
14 and I both have bronchitis.

15 MAYOR NEVILL: Thank you, ma'am.

16 We are now officially in session, and  
17 we will turn to the Vice Mayor to read us into  
18 closed session.

19 MR. HARTMAN: Mr. Mayor, I move that the  
20 council convene to closed session to discuss the  
21 following as permitted by Virginia Code  
22 2.2-3711(A)(1): A personnel matter involving

1 discussion, consideration, or interviews of  
2 prospective candidates for employment or appointment  
3 or assignment appointment, promotion, performance,  
4 demotion, salaries, disciplining, or resignation of  
5 specific public officers, appointees or employees of  
6 the town, specifically dealing with town manager  
7 recruitment, acting town manager appointment, and  
8 police department personnel update.

9                   Also, as permitted by Virginia Code  
10 2.2-3711(A)(8), consultation with legal counsel  
11 regarding specific legal matters requiring the  
12 provision of legal advice by such counsel, relating  
13 to the Walmart tax matter update, and process and  
14 substance for consideration of SUP 2022-03; and as  
15 permitted by Virginia code 2.2-3711(A)(19), a matter  
16 involving the police department briefing on safety  
17 of Town Council, an RSM briefing of information and  
18 technology evaluation.

19                   MAYOR NEVILL: So moved by the Vice Mayor.

20                   MR. HAMBY: Second.

21                   MAYOR NEVILL: Seconded by Councilman Hamby.

22                   Discussion on the motion?

1 (No responses.)

2 MAYOR NEVILL: Hearing none, all in favor?  
3 Councilwomen Sutphin?

4 MS. SUTPHIN: Aye.

5 MAYOR NEVILL: Opposed?

6 Motion carries unanimously, and we are  
7 now in closed session. We will convene upstairs in  
8 the Willow Room.

9 (Whereupon, the Warrenton Town Council  
10 adjourned into closed session.)

11 (Whereupon, the Warrenton Town Council  
12 resumed the work session.)

13 MAYOR NEVILL: All right. At 12:10 p.m., we  
14 will reconvene and return from closed session. I'll  
15 turn to the Vice Mayor for a motion.

16 MR. HARTMAN: Mr. Mayor, I move that the  
17 council certify that the closed session just  
18 concluded. Nothing was discussed except the matter  
19 or matters specifically identified in the motion to  
20 convene in closed session and lawfully permitted to  
21 be discussed in a closed session under the  
22 provisions of the Virginia Freedom of Information

1 Act as cited in that motion.

2 MAYOR NEVILL: So moved by the Vice Mayor.

3 Second?

4 MR. HEROUX: Second.

5 MAYOR NEVILL: Second by Councilman Heroux.

6 Discussion on the motion?

7 (No responses.)

8 MAYOR NEVILL: Hearing none, we will do a  
9 roll call vote. I'll start to my right.

10 Councilman Mooney.

11 MR. MOONEY: Aye.

12 MAYOR NEVILL: Councilman Sutphin.

13 MS. SUTPHIN: Aye.

14 MAYOR NEVILL: Councilman Semple.

15 MR. SEMPLE: Aye.

16 MAYOR NEVILL: Councilman Hamby.

17 MR. HAMBY: Aye.

18 MAYOR NEVILL: Vice Mayor Hartman.

19 MR. HARTMAN: Aye.

20 MAYOR NEVILL: Councilman Heroux.

21 MR. HEROUX: Aye.

22 MAYOR NEVILL: Councilman McGuire.

1 MR. MCGUIRE: Aye.

2 MAYOR NEVILL: The motion is approved. We  
3 are certified out of closed session, and that will  
4 bring us to the next item.

5 Mr. Martino to introduce the SUP  
6 2022-03. The applicants are here. This is a  
7 continuation of a discussion from last month.

8 MR. MARTINO: Thank you, Mr. Mayor. The  
9 staff has shared their staff report with you. It  
10 addresses the few adjustments that have been made,  
11 and it basically walks through the proceedings that  
12 we've been undertaking for the past few months.

13 The applicant is also here to address  
14 any questions, comments, that the council would  
15 choose to raise with them.

16 If you would like a very, very brief  
17 presentation on things, we can provide that.  
18 Otherwise, I would -- you can call the applicant to  
19 the podium at this point.

20 MAYOR NEVILL: Any requests or questions for  
21 Mr. Martino, or shall we have the applicant come  
22 forward?

1 MR. SEMPLE: Mr. Mayor, just to make the  
2 presentation?

3 MAYOR NEVILL: Excuse me?

4 MR. SEMPLE: Is this to answer questions or  
5 just to make the presentation?

6 MAYOR NEVILL: To answer questions, too.

7 MR. SEMPLE: Oh, yes, please.

8 MAYOR NEVILL: All right.

9 MR. MARTINO: You would like the staff --

10 MAYOR NEVILL: No.

11 MR. MARTINO: No, no, the applicant.

12 MAYOR NEVILL: I think at this point we  
13 would request that the applicant come forward to  
14 answer questions as directed by council.

15 MR. REINKE: Hi. Good afternoon. My name  
16 is Jay Reinke with Amazon Web Services.

17 MAYOR NEVILL: Thank you, sir.

18 And just a point of clarification. So  
19 from the last Town Council meeting issues were  
20 brought up and the conditions were drafted and  
21 finalized based upon guidance from counsel and  
22 agreement with the applicant, Amazon Web Services.

1 No new conditions were added. These were just  
2 clarifications and cleaning up the language. So if  
3 you want to just maybe touch on where we we want  
4 from last month to here and the relationship.

5 MR. REINKE: Yeah, absolutely. We met with  
6 the town staff, went through the conditions that  
7 you-all had agreed upon, and then we worked through  
8 a few little language issues, cleaned that up, and  
9 we're at full agreement with the town staff.

10 MR. SEMPLE: I have some questions --  
11 several questions, actually. But I want to look at  
12 the noise ordinance. And I have some issues about  
13 it that I'm -- unfortunately, I was not involved in  
14 any of these discussions, so the first time I saw  
15 it, a final draft of it, was when the agenda was  
16 posted.

17 I'm wondering -- I was going to ask  
18 this perhaps of you or the staff: But the  
19 definition of an "electric line," does that include  
20 transmission lines?

21 MR. REINKE: Where is that?

22 MR. SEMPLE: What I'm looking at is the

1 draft conditions where we provide for  
2 under-grounding of electric lines from a substation  
3 facility. Is that just distribution lines or any  
4 electric line?

5 MR. REINKE: Those are the distribution  
6 lines coming from the substation.

7 MR. SEMPLE: Okay. One of my concerns in  
8 this -- excuse me while I just look at my notes --  
9 has to do with the noise ordinance. You're here to  
10 discuss that.

11 Do you have the --

12 MR. REINKE: I'm here to discuss whatever  
13 you would like to discuss.

14 MR. SEMPLE: Thank you. You have your noise  
15 expert here?

16 MR. REINKE: We have several of them, yes.  
17 We have several from Polysonics.

18 MR. SEMPLE: All right. The first question  
19 I have about the noise is whether there is -- one of  
20 the provisions we have is that each phase that's  
21 showing a site plan shall receive a conditional  
22 certificate of occupancy.

1                   It's my understanding that there's only  
2 going to be one phase.

3                   MR. REINKE: No. There will be eight  
4 phases.

5                   MR. SEMPLE: Because in the letter that we  
6 received from your attorney, he said that it would  
7 be completed in one phase in 15 months.

8                   MR. REINKE: The shell will be completed.  
9 So you're building out -- the outside shell of the  
10 building will be completed in one phase, and then  
11 you build out each room progressively.

12                   MR. SEMPLE: So over what period of time do  
13 you think it will be -- this entire build out will  
14 occur?

15                   MR. REINKE: Yeah, somewhere between three  
16 to seven years.

17                   MR. SEMPLE: Three to seven years?

18                   MR. REINKE: Yeah.

19                   MR. SEMPLE: Wow. And that's from the point  
20 that -- okay. Three to seven years. Thank you.

21                   So by the third year, what level of  
22 power -- when will you be in a full-power state? In

1 the seventh year?

2 MR. REINKE: Yeah, whenever it's fully built  
3 out.

4 MR. SEMPLE: Okay. I'm basically concerned  
5 with one particular provision, and that is that you  
6 are only obligated to pay for one test annually.

7 What happens to the rest of the year in  
8 terms of your enforcing these noise standards? I  
9 mean, this is something I need to ask either you or  
10 the staff. I don't understand.

11 If you do an annual test, that's fine,  
12 but that means that 364 days out of the year you  
13 could be in noncompliance and no one would know  
14 about it; and that's really not much of a protection  
15 for the health, safety, and welfare of our citizens.

16 So would you be willing -- I have not  
17 discussed with this anybody. This is not part of  
18 the conversation. I'm just introducing the idea  
19 that, don't you think we need some type of more  
20 frequent testing to ensure compliance? Would you  
21 agree with that?

22 MR. REINKE: No, because, I mean, as a good

1 neighbor, as a good resident, the tests we would do  
2 would be (indiscernible) to what would be going on  
3 year round. So you do one test a year. It should  
4 be very indicative of what's going on 365 days a  
5 year.

6 MR. SEMPLE: I understand you want to be a  
7 good neighbor, but I know people who have been in  
8 the compliance enforcement business at the  
9 Environmental Protection Agency, and there's always  
10 a tendency that when you do a singular test like  
11 this, it does not necessarily survive. It can be a  
12 variety of different reasons that a test is built in  
13 that will satisfy that particular testing day, but  
14 not necessarily elsewhere.

15 Another thing, there can be a change in  
16 the availability of equipment. For example, DEQ,  
17 right now is considering Prince William and Prince  
18 County -- Prince William, and in Loudoun County, the  
19 allowance of the use of generators where there seems  
20 it be peak demand issues on the electrical grid.

21 When we do these testings, are you  
22 going to have all of the -- what is the equipment

1 that will be tested when you do the test?

2 MR. REINKE: The full HVAC systems running  
3 at 100 percent.

4 MR. SEMPLE: Including generators?

5 MR. REINKE: At least one generator.

6 MR. SEMPLE: At least one generator.

7 MR. REINKE: Yes.

8 MR. SEMPLE: Well, how many generators do  
9 you have?

10 MR. REINKE: We'll have -- I believe 54  
11 generators complete.

12 MR. SEMPLE: So wouldn't you want --

13 MR. REINKE: So --

14 MR. SEMPLE: I don't understand why you  
15 wouldn't have them all running.

16 MR. REINKE: The reason being is that when  
17 we test generators, we test them one at time. So  
18 the only time that we'd ever run full generators  
19 would be if there's a power outage. And if there's  
20 a power outage, probably the whole county is down.

21 MR. SEMPLE: What I'm worried about,  
22 honestly, is let's say the DEQ requirement comes in.

1 Now, you're able to -- let's say there's a complete  
2 grid shutdown. Would all of those 54 generators  
3 come online?

4 MR. REINKE: Half of them would.

5 MR. SEMPLE: Half of them. So don't you  
6 think we would want to know what the noise volume  
7 would be at that point in -- I know that worse case  
8 scenarios sometimes never happen, but that we would  
9 understand how -- whether you would be in violation  
10 or not of our noise ordinance at that particular  
11 time?

12 MR. REINKE: No, I would think if the whole  
13 county is down without power, your least concern  
14 would be if we're making a noise above ambient noise  
15 there.

16 MR. SEMPLE: Okay. Excuse me while I just  
17 ponder this. Because part of our job is to protect  
18 the health, safety, and welfare of our residents.

19 MR. REINKE: Absolutely.

20 MR. SEMPLE: Right? And we do that --  
21 that's a year-round job that we have. We just don't  
22 do it once a year. And I'm concerned that there

1 will be instances throughout the year where you  
2 perhaps for whatever reasons at whatever time, even  
3 when we apply all of the offsets that we may have in  
4 our ordinance, that you're not in compliance. And  
5 it can be over a period of time. It can be a short  
6 or brief period.

7 I'm concerned that this particular  
8 approach will not protect our health, safety, and  
9 welfare of our residents consistent with our  
10 obligations. I just want to know why you think this  
11 single test in a particular -- in a year is adequate  
12 to do that job.

13 MR. REINKE: Because the noise level is not  
14 going to change throughout the year.

15 MR. SEMPLE: Excuse me?

16 MR. REINKE: As a matter of fact, when we do  
17 a test, it should be indicative of all 365 days.

18 MR. SEMPLE: Well, but you just told me that  
19 if there was a power outage that you could bring on  
20 half of these generators. Now, when you do the  
21 test, will you be firing up half the generators?

22 MR. REINKE: No. To do a test, you test one

1 at time.

2 MR. SEMPLE: Well, I'm talking about the  
3 noise. I'm talking about what we're going to hear  
4 sitting on the perimeter of the property.

5 MR. REINKE: If the county is in a blackout,  
6 we will run all generators at that time.

7 MR. SEMPLE: Yeah, but then you'd still --  
8 then theoretically at that time you could very well  
9 be in violation of the noise ordinance.

10 MR. REINKE: Could be at that point.

11 MR. SEMPLE: Right, yeah. And how would we  
12 know that?

13 MR. REINKE: Well, we could model it.

14 MR. SEMPLE: No, no. I'm just saying how do  
15 we -- we're creating a set of conditions that we  
16 need to enforce at some level, that we need  
17 understand when those violations occur. I just  
18 would like to know how in an annual scenario we can  
19 possibly account unless we put in a continuing  
20 monitoring system?

21 MR. REINKE: I would make the argument that  
22 most likely that the chances of the county being out

1 of power is probably a once in a 50-year or lifetime  
2 event. And so the chances of that even occurring  
3 would be extremely rare. If it does occur, we'll  
4 run all 24 generators.

5 MR. SEMPLE: I'm not worried about something  
6 that may or may -- most likely. I'm worried about  
7 creating conditions that we can actually enforce  
8 under any circumstance.

9 MR. FOOTE: I'm sorry, what? It should be  
10 pointed out the condition --

11 MS. PFEIFFER: I wrote that. That is just  
12 something to consider.

13 MR. FOOTE: Okay. The other thing to keep  
14 in mind in talking to our sound engineers is that if  
15 you do daily sound testing they really don't tell  
16 you much because there's ambient noise around.

17 These sound tests that are done once a  
18 year do, according to our sound engineers, tell you  
19 what's going to be happening for 365 days a year.

20 If you do have a circumstance in which  
21 all of these generators have to come on, that's  
22 going to be a circumstance that is, A, exceptionally

1 rare; and, B, is something that is going to present  
2 a set of circumstances the town will face that's a  
3 larger problem than this data center.

4 MR. SEMPLE: Well, Mr. Foote, I thank you  
5 for your remark, but I don't -- I don't quite  
6 understand it.

7 You're saying that a one-time test will  
8 predict what will happen the rest of the year. I  
9 can tell you that the Environmental Protection  
10 Agency, they never rely on that kind of assumption;  
11 and they are the experts in testing for air, as well  
12 as water, pollutants, and that's what their job is.

13 So all I'm telling you is that it's  
14 nice to make that representation, but from the town,  
15 I think we have an obligation to protect our  
16 residents around the year. And I don't see -- if  
17 you say it won't tell you much on a daily basis,  
18 then what's the problem with having it? In other  
19 words, there really is no reason why we can't have a  
20 mechanism where we have an ability to enforce.

21 The other approach we might take is  
22 that we wait for citizens to complain. So the

1 citizens come to us and say, well, you know, it's a  
2 little noisy. Will you go make a test?

3 Will we be able to go do that under  
4 this?

5 MR. FOOTE: Yes, you would.

6 MR. SEMPLE: We will?

7 MR. FOOTE: Nothing stops you. Nothing  
8 stops the council and the town, Your Honor, from  
9 running a noise test whenever it feels like it.

10 MR. SEMPLE: Okay. Well, let's just say  
11 that we do that, and that will the onus on us to get  
12 the engineer and bring them out there. And we may  
13 be having complaints every day. So that when we run  
14 that test and we come to you and say there's a  
15 violation, is that covered under this condition?

16 MR. FOOTE: It would be covered by your very  
17 noise ordinance. And so the answer would be not  
18 under this condition but your noise ordinances which  
19 is what every other user in this town --

20 MR. SEMPLE: Right.

21 MR. FOOTE: -- would have to follow. It's my  
22 understanding that the noise from the hospital

1 itself exceeds noise limits.

2 MR. SEMPLE: That places the onus on the  
3 town. I'm looking at the good neighbor, Amazon, to  
4 provide us with a mechanism by which we can be  
5 satisfied that you'll be in compliance.

6 MR. REINKE: Let me do this, Ian and Chris,  
7 would you mind coming up for quick?

8 UNIDENTIFIED SPEAKER: Yes.

9 MR. REINKE: And Mr. Semple, look, we don't  
10 want complaints from -- we don't want this to be  
11 above the noise level at all, right. And that's our  
12 desire. That's our design. That is our intent,  
13 right. And so to let you now, we desire to be great  
14 neighbors, not just good neighbors. Great  
15 neighbors.

16 And so there's -- there is not some  
17 sort of nefarious design we have to put something in  
18 here that would be above the noise level. So I just  
19 -- I believe you believe that.

20 MR. SEMPLE: I understand. But at the last  
21 hearing I asked you if you knew whether there was  
22 ever a data center that had been shut down for

1 non-compliance and noise there, and you said no.

2 MR. REINKE: I said I didn't know of one.

3 MR. SEMPLE: You didn't know of one.

4 MR. REINKE: Right.

5 MR. SEMPLE: Yeah, I said -- well, that's  
6 the same, you didn't know of one.

7 MR. REINKE: But, actually, my knowledge is  
8 very limited.

9 MR. SEMPLE: And my particular concern is,  
10 is that when we get to this issue -- and it is a  
11 major issue that's in front of us -- and we have the  
12 problems like we have in Prince William and we try  
13 to -- first of all, I'm not even getting to the  
14 point where in this case we're even asserting our  
15 rights, that we're even attempting to file a notice  
16 of violation or even doing that. I'm just talking  
17 about the mechanics of getting the right kind of  
18 information that we can reliably rely on.

19 I mean, generally speaking, when you  
20 have a noise test -- I mean, a noise ordinance or  
21 some type of -- and believe me, I'm not -- I did not  
22 work for the EPA, but I happen to know somebody who

1 did; and the fact is is that you need to, first of  
2 all, have very clear standards as to what you're  
3 testing. You have to have clear standards of what  
4 you're testing with. You have to have the criteria  
5 set out in advance, and it should all be built into  
6 the rule.

7 And my point is that this will just  
8 allow -- it's too vague to allow for the assurance.  
9 Because when you go -- for example, when you go to  
10 actually challenge -- let's say we get into a  
11 dispute. I agree you'd be great neighbors, but --

12 MR. REINKE: (Indiscernible) I hope you do  
13 believe that.

14 MR. SEMPLE: You can see that. But let's  
15 just assume that things get a little contentious and  
16 people really get upset and it gets really noisy --  
17 and that's what's happening in Prince William right  
18 now -- and we say, well, you need to shut down your  
19 facility. Well, I can tell you, in the EPA they've  
20 never shut down a facility. They have a much  
21 different approach to these kind of enforcement  
22 procedures. And they also have much greater

1 authority.

2                   But what I'm saying is here we need a  
3 way to protect our -- the public interest. And my  
4 concern is on an annual test, as you propose, just  
5 simply is not going to do that.

6                   MR. REINKE: You know, I have to disagree.  
7 But let me do this, because I disagree. Because if  
8 a test -- one time a test -- once it's ran  
9 100 percent, it's running 100 percent. And so there  
10 shouldn't be any deviation at all from that -- let  
11 me go through.

12                   I want maybe Ian to speak real quick  
13 because I want to make sure everyone understands the  
14 ANSI standards that we're going through, the sound  
15 plan model, and everything else, just to give a  
16 little background just so in case somebody asks you  
17 -- a resident asks you, hey, why is this plan viable  
18 and accurate, you'll have hopefully a little more  
19 data points on that.

20                   MR. BREWE: So, Ian Brewe with AWS.

21                   As Jay mentioned, we have, you know,  
22 employed Polysonics to do this sound study for us.

1 We have gone through, we have analyzed the sound  
2 study. We've had a third-party review look at the  
3 noise modeling. We've looked at the noise modeling  
4 ourselves. We have conducted our own independent  
5 noise modeling based on the equipment we're  
6 considering for this project. And, you know, we  
7 agree with the findings of the Polysonics' study,  
8 appropriately.

9                   And, you know, I mean, one of the big  
10 takeaways from that it that based on the noise  
11 ordinance where we have individual limits for each  
12 frequency band to be enforced along the property  
13 line, to do monitoring for that and testing for  
14 these frequency bands in the environment where we  
15 have a lot of existing background noise currently  
16 and Polysonics went out and took measurements per  
17 ANSI standards along the property line.

18                   UNIDENTIFIED SPEAKER: (Inaudible.)

19                   MR. BREWE: Oh. The American National --

20                   UNIDENTIFIED SPEAKER: Standards.

21                   MR. BREWE: -- Standards Institute.

22                   Thank you. I always get the wording

1 backwards.

2                   And so, you know, what we found is that  
3 the existing background noise levels before we've  
4 even set foot onsite, you know, are already over  
5 what the town limits are in many of the frequency  
6 bands.

7                   So as -- if we were a measure this --  
8 you know, what was emitted from our facility, it's  
9 very difficult to distinguish between the two. So,  
10 you know, some sort of testing has to be done in --  
11 with a great amount of care.

12                   And, you know, the ANSI standards  
13 reference, you know, when it is appropriate to do an  
14 attended test versus an unattended test. And this  
15 would really fall into a classification where we  
16 really need to do attended tests to not only take  
17 the measurement data, but also, you know, have  
18 somebody there to understand what the current  
19 environment is.

20                   And then there's a lot of calculations  
21 and backing out and understanding what's really  
22 being measured. So if we were doing more frequent

1 tests, you know, I mean, it's a labor intensive,  
2 time intensive process that I think -- you know, we  
3 can't just say all right, let's put a monitor up,  
4 and it's just going to tell us whatever, because  
5 there's so much noise in the highways around there  
6 that it would indicate a violation at all times even  
7 before we ever built anything.

8 MR. SEMPLE: (Inaudible.)

9 MR. KARNER: Well, you've had the report for  
10 the month. But I would add that the noise from the  
11 HVAC, as he said, it's going to be there and it's  
12 going to be there year-round. There's not a knob  
13 they can turn to make things louder or quieter when  
14 we do the test.

15 Our report and our modeling showed that  
16 using the inputs from the manufacturer put into the  
17 model, run the model at the property line, it's  
18 going to meet it at the property line with the  
19 mitigation.

20 MR. REINKE: What model is it? How many  
21 models (inaudible.)

22 MR. REINKE: Oh, okay. Sure.

1                   So there was a slide show prepared for  
2 it, but it's fine. It's in the report. It's a  
3 sound plan model based on ISO standards,  
4 International Standard Organization, for how sound  
5 propagates. We had about 80ish inputs into the  
6 model. So each piece of equipment had a sound. So  
7 it's a complicated model.

8                   But I -- to address your question,  
9 yeah, if we set up a -- or as Ian said, if we set up  
10 a meter right now, it would exceed. It sounds more  
11 like a matter of trust than, you know, of noise.

12                   UNIDENTIFIED SPEAKER: (Inaudible.)

13                   MR. KARNER: Yes, the model is accurate  
14 based on the standards and the input.

15                   MR. SEMPLE: Thank you. It's not a matter  
16 of trust. It's a matter of noise. And this is what  
17 I'm particularly concerned with.

18                   Just a little background. I used to  
19 write articles for a magazine called Absolute Sound.  
20 I did studies -- and I'm not saying I'm an  
21 acoustician, I just listen with my ear -- of concert  
22 calls. So I have a little familiarity with the

1 character -- at least the quality of the character  
2 of sound. And we're not just talking about, shall I  
3 say, that ambient noise or this kind of noise, but  
4 the type of noise.

5           And there are offsets, as well. In  
6 other words, if there's a hum or a screech, that we  
7 apply certain corrections. Whatever monitoring  
8 system we have, whether it's tied to a computer or,  
9 not, needs to be able to monitor those variables as  
10 they occur. We have to know when during the course  
11 of the test that there may be -- those corrections  
12 may be applied and you're in violation.

13           Now, I understand you might say -- it  
14 does raise another question. What if you have a  
15 second data center next door and it's operating  
16 while you're doing the test? I mean, what do you  
17 consider to be background noise.

18           So all of these issues -- my concern is  
19 let's go back to the first question. We're going to  
20 do this once a year. And even then you have to  
21 actually inquire as to whether the test will be  
22 adequate to cover all of those other variables,

1 because we're not going to know what they are.

2 I mean, one of our distinctions that we  
3 make in our noise ordinance is how often something  
4 occurs or the duration of the test. Are we talking  
5 about a peak violation? Are we talking about an  
6 average violation over a period of time?

7 I mean, that is -- it may not be a real  
8 big deal for you to violate, let's say, at a peak  
9 moment. I mean, I don't know. You're the experts.  
10 But I don't know, when I hear my air-conditioning  
11 unit, it kinds of oscillates. Kind of (descriptive  
12 sound). It's not absolutely a perfect single pitch.

13 So there's going to be times when, for  
14 example, it may violate the noise ordinance, but not  
15 sufficiently over a period of time to really justify  
16 an enforcement action.

17 I'm worried that we don't have enough  
18 here to allow us to actually understand what we're  
19 enforcing. That's my first concern.

20 MR. KARNER: Yeah, I appreciate that. The  
21 equipment we have modeled is all of the equipment  
22 running at 100 percent. It's the loudest case

1 scenario that we have modeled.

2 MR. SEMPLE: Okay.

3 MR. KARNER: That shows that it is meeting  
4 it. So your house HVAC is not equal to what is  
5 going on at Amazon. They can't -- they're not  
6 sometimes powering the -- cooling the equipment and  
7 sometimes it turns off. This is everything running  
8 all at once at the loudest case.

9 MR. SEMPLE: All right. Now, which does  
10 raise another question about -- let's say, for  
11 example, you -- there is -- I'm not going to talk  
12 about if there is a violation, but where the test is  
13 done. Our understanding is that you will find a  
14 tester, or we find the tester? Amazon will acquire  
15 the --

16 MR. KARNER: Well, that -- go ahead.

17 MR. SEMPLE: -- person testing --

18 MR. KARNER: The --

19 MR. SEMPLE: -- and we approve it?

20 MR. FOOTE: The way it works, the way the  
21 condition works, is the town provides a -- chooses  
22 the tester, and Amazon pays for it.

1 MR. SEMPLE: Okay. And the tester -- and  
2 Amazon doesn't necessarily have to agree or  
3 disagree --

4 MR. FOOTE: No.

5 MR. SEMPLE: -- as to the test?

6 MR. FOOTE: No, it's the town's selection.

7 MR. SEMPLE: And does Amazon have any say as  
8 to the test method?

9 MR. FOOTE: No.

10 MR. SEMPLE: No. So you wouldn't -- if we  
11 found you in violation, you wouldn't use that as a  
12 basis, for example, of saying, well, it's an  
13 unreliable test?

14 MR. FOOTE: The way the condition is written  
15 -- let me just bring up for you because it actually  
16 says what it says.

17 MR. REINKE: There are some standards.

18 MR. FOOTE: There are standards on who is  
19 selected, but that's all.

20 MR. REINKE: Right.

21 MR. FOOTE: Let me get to it.

22 MR. SEMPLE: Okay. Now, okay. So, all

1 right. So you're just saying you don't think it's  
2 practical to do a continuous monitoring?

3 MR. FOOTE: That's correct, Your Honor. And  
4 what it says is the applicant shall provide and pay  
5 for -- you pick it -- a member -- a qualified full  
6 member of the Acoustical Society of America, or a  
7 board certified member of the Institute of Noise  
8 Control Engineering -- that's in order to ensure  
9 that whoever you choose is in fact qualified to do  
10 acoustical engineering -- who is approved by the  
11 director of community development.

12 MR. SEMPLE: But -- great. You do that once  
13 a year. That means the onus --

14 MR. FOOTE: Each phase. That's each phase.

15 MR. SEMPLE: Well --

16 MR. FOOTE: And then whenever it's done is  
17 going to be --

18 MR. SEMPLE: Whenever they're completed, the  
19 ongoing requirement will be once a year. That still  
20 goes back to my essential point: You're going to --  
21 the onus will be on the town then to continue to  
22 test.

1                   And they would -- in other words, I  
2 think there should be the applicant's requirement to  
3 make sure that on a 365-year basis that you're in  
4 compliance. I don't understand. I'm sorry I wasn't  
5 involved in this negotiation. If I had been, you  
6 would have heard this before.

7                   MR. FOOTE: Understand, Your Honor.

8                   We would also point out that with  
9 respect to the annual sound test, the same  
10 requirements apply. The town will select a -- the  
11 director of human development will pick someone who  
12 is qualified to do that sound engineering, and we'll  
13 be able to do the test and give you the report.

14                  MR. SEMPLE: Okay. Enough of that  
15 conversation. I think I've made my point.

16                  Then, here's my next issue: If the use  
17 violates 9-14.2 of the Town of Warrenton zoning  
18 ordinance related to noise, then the applicant shall  
19 have 48 hours to mitigate.

20                  Mitigates just means to make better.  
21 It doesn't mean to rectify. It doesn't mean to come  
22 into compliance.

1 MR. FOOTE: We would submit that's what it  
2 does mean, and that's what the discussion with the  
3 staff was.

4 MR. SEMPLE: Then you would be agreeable to  
5 "shall have 48 hours to come into compliance with  
6 the violation"?

7 MR. REINKE: The agreement was mitigate --  
8 Mr. Crim isn't here, but that's the agreement we  
9 came upon.

10 MR. FOOTE: "Mitigate" means to comply.

11 MR. SEMPLE: No, it does not. I looked that  
12 up in the Webster's Third International Dictionary.  
13 And you know it.

14 MR. FOOTE: (Indiscernible.)

15 MR. SEMPLE: And the first definition,  
16 Mr. Foote, is that it means to make better.

17 MR. FOOTE: Well, if you can read the noise  
18 ordinance and the condition, Your Honor, you'd find  
19 that the only way you sufficiently mitigate is to  
20 come into compliance. And so if the question is  
21 should it say "compliance," then okay.

22 (Simultaneous inaudible speakers.)

1 MR. MCGUIRE: Mr. Mayor, can I ask a  
2 question?

3 MAYOR NEVIL: Yes.

4 MR. MCGUIRE: Yeah, so with testing for  
5 sound, is there a specific time of the year when  
6 sound travels further than other times of the year?

7 MR. REINKE: Well, there are --

8 UNIDENTIFIED SPEAKER: (Indiscernible) will  
9 you answer that?

10 MR. BREWE: Sure.

11 So when we would test for sound there  
12 are certain parameters set forth in the ANSI  
13 standards for testing conditions. You know, such as  
14 we need low wind. We need --

15 MR. MCGUIRE: Okay. But is there a certain  
16 time of the year that --

17 MR. BREWE: Yeah. And so then, you know,  
18 humidity and temperature and whether you have  
19 temperature inversion layers, these things do come  
20 into play.

21 So generally speaking, we would  
22 expect -- and then also, you know, the cooling is

1 going to run a little -- as the temperature is  
2 higher in the summer, we would expect to see the  
3 loudest sound levels in the summertime.

4 MR. MCGUIRE: So when would you test then?

5 MR. BREWE: I would assume that we're  
6 testing probably in the summertime.

7 MR. MCGUIRE: So you do worse case scenario?

8 MR. BREWE: Yeah.

9 MR. REINKE: That's what is modeled.

10 MR. MCGUIRE: Okay. All right. Thank you.

11 MAYOR NEVILL: Amazon operates, obviously,  
12 data centers across the country and across the  
13 world, and we're hearing that -- you know, we're  
14 focusing and dialling in on noise as being an issue.

15 What is the percentage of data centers  
16 that you operate that are subject to noise  
17 complaints, violations, or otherwise?

18 MR. REINKE: Yeah, the exact percentage I  
19 don't know, but very few. We operate really  
20 hundreds of data centers, and there's very few  
21 (indiscernible) noise complaints right now.

22 MR. SEMPLE: But you do have complaints?

1 MR. REINKE: There are parts in this part of  
2 the country that are.

3 MR. SEMPLE: Right. Not too far from us.  
4 And so that's my point.

5 And actually, it doesn't matter what  
6 percentage of complaints you may or may not get.  
7 We're looking at an ordinance. And when it comes to  
8 our determining whether or not it meets our needs,  
9 it's sufficiently vigorous, and it -- that we can  
10 apply a decent standard that we can rely on.

11 MR. REINKE: Yeah, so the --

12 MR. SEMPLE: My concern is that I don't  
13 think we can.

14 MR. REINKE: Yeah, that's why we use the  
15 ANSI standards. That's why we use the sound plan  
16 model which is well accepted, and it shows that we  
17 are below the ordinance running 100 percent.

18 MR. SEMPLE: On your modeling, I do have a  
19 question. You modeled on what equipment? I'm  
20 sorry. I mean, you created a model based on -- did  
21 you go to Europe where you apparently have these  
22 things? Or did you model -- I just don't -- can't

1 remember what you modeled on.

2 MR. KARNER: We had a select set of  
3 equipment, and then we received sound power data  
4 from the manufacturer for that.

5 MR. SEMPLE: Sound power data from the  
6 manufacturer?

7 MR. KARNER: Yes.

8 MR. SEMPLE: So this wasn't realtime? You  
9 didn't set your monitor up over here and turn on the  
10 equipment over there?

11 MR. KARNER: They -- I've been to the  
12 Carrier plant down in Oklahoma, and they have a  
13 laboratory that they build the equipment in, and  
14 they'll perform measurement in a laboratory setting.

15 MR. SEMPLE: Was that in anechoic chamber or  
16 something?

17 MR. KARNER: Yeah, yeah.

18 MR. SEMPLE: Okay.

19 MR. KARNER: That's how they test the  
20 (indiscernible).

21 MR. SEMPLE: All right. Well, that's  
22 interesting. Anechoic chambers sort of give you an

1 absolute idea because there is not any -- I  
2 understand what they are.

3 MR. KARNER: Yeah.

4 MR. SEMPLE: It's supposed to create an  
5 environment where there are no other sounds at all  
6 except the ones you're looking at.

7 MR. KARNER: That's correct.

8 MR. SEMPLE: Right.

9 MR. REINKE: So there's no background  
10 interference.

11 MR. SEMPLE: Okay. All right. So this is a  
12 model, but we -- you could -- I mean, if you really  
13 wanted to get into this and do it right -- get in an  
14 airplane, fly over, and actually take tests of -- as  
15 you say, you have these -- specific units equipped  
16 with a sound ameliorating equipment -- I mean, wraps  
17 or whatever you do. I mean, however you do it --  
18 that you can actually directly model. You don't  
19 have -- so this is all just base a little bit on a  
20 model is a model; and I understand what it does, but  
21 we still won't know.

22 And I remember Councilman Heroux saying

1 we don't know until we actually build it, whether it  
2 will work or not; and that's my point.

3 My point is if we build it when we get  
4 to build it, we've done all this wonderful  
5 modeling -- I mean, I can't tell you how many  
6 rockets sat on a launching pad and they modeled it  
7 to go to the moon and they blew up before they took  
8 off.

9 I mean, this is this is the problem I  
10 have. The problem is not -- we can take everything  
11 you say at face value. That's great. I'm worried  
12 about when it actually happens, and do we have  
13 conditions in place that actually protect our  
14 citizen's health safety and welfare that we're  
15 satisfied with.

16 MR. REINKE: Yes. That's why I think the  
17 certificate of occupancy is a great idea. So every  
18 phase you build, you test it. And then so you'll be  
19 testing every phase and then we have an exact date  
20 that you'll be able to operate on and evaluate.

21 MR. SEMPLE: All right. Well, I won't get  
22 into compliance issues. I mean, that's another

1 matter where we -- and I don't want to get into that  
2 conversation with you.

3           But I can tell you that at a point  
4 where -- and I hope we don't have to cross that  
5 road, but at a point where we actually issue a  
6 notice that you cannot occupy the space -- sorry,  
7 I'm asking questions as I go along -- but what  
8 constitutes the end of a phase?

9           MR. REINKE: Yes, so the room is built out  
10 with all of the HVAC systems running up, being  
11 operational. We test it full speed. A hundred --  
12 full speed, make sure it's within compliance. We  
13 show the test results to the staff. The staff gives  
14 a CO where we can then occupy that room.

15           MR. SEMPLE: So is it already you have all  
16 your equipment in there? I mean, all the -- the  
17 servers are operating? Or is the room still vacant  
18 and the service hasn't been hooked up yet?

19           MR. REINKE: Because we don't have a CO, we  
20 don't have the full servers, but all the HVAC  
21 equipment is running 100 percent to test it.

22           MR. SEMPLE: I'm going to -- let me

1 understand that. You won't -- you may or may not  
2 have all the servers in?

3 MR. REINKE: We won't have -- we don't have  
4 a certificate of occupancy.

5 MR. SEMPLE: You won't have any servers in?

6 MR. REINKE: No.

7 MR. SEMPLE: Okay. So that you will just be  
8 just testing it as a shell?

9 MR. REINKE: So you have a shell, and you  
10 build out a room -- build out rooms. And so we have  
11 a room built, build that room out. You have the  
12 HVAC equipment for that room. You do a full test on  
13 that HVAC equipment, do a sound test to make sure  
14 it's within compliance.

15 If it is, you get the CO for that room.  
16 You move those servers in. You go build the next  
17 room. You do the same thing. Same with the third  
18 room, fourth room, et cetera.

19 So every room is being tested. Which,  
20 by the way, at that point -- and, Ian, feel free to  
21 speak up here, but once you test one in that room,  
22 you'll have a real, very accurate idea of what the

1 whole -- what it's going to sound like. And you'll  
2 know it. Even at room one, you'll know it. At room  
3 eight, you'll know if it will be in compliance or  
4 not. Completely. And so you'll see exactly how  
5 tight that model is.

6 MR. SEMPLE: I thought that sound pressure  
7 was additive. Can someone -- I mean, it's the  
8 difference between having one chiller going as  
9 opposed to 50.

10 MR. BREWE: Right. And that's where we  
11 would be extrapolating and refining our model.

12 MR. SEMPLE: Extrapolating?

13 MR. BREWE: Now we have a basis to further,  
14 you know, understand our model, and if there's  
15 adjustments we need to make, then we're going to  
16 make them.

17 MR. SEMPLE: Well, in your previous work --  
18 I mean, for example in previous data center issues,  
19 did you do this? Did you model the -- what  
20 happened, for example in the data centers in Prince  
21 William? Did you predict that it would comply? I  
22 mean --

1 MR. BREWE: I don't think we're here to  
2 discuss that.

3 MR. SEMPLE: No, I mean, I'm sorry to be  
4 challenging this, but I'm looking for the best --

5 MR. REINKE: This is new for us. This  
6 process is new for us.

7 MR. SEMPLE: Oh, it's new for you.

8 MR. REINKE: For the -- yes.

9 MR. SEMPLE: Okay. Thank you.

10 MR. HEROUX: Mr. Mayor, I have a question.

11 So you talked about noise. Is it true  
12 that there's a level of vibration that comes from a  
13 data center?

14 MR. REINKE: You.

15 MR. BREWE: You know, I mean, there's going  
16 to be a little bit of vibration for anything that we  
17 do, you know, foot falls on a floor. I mean,  
18 there's -- I can't say there's no vibration.

19 MR. HEROUX: But specifically --

20 MR. BREWE: But generally speaking, the  
21 vibration emitted from a data center is very low.

22 MR. HEROUX: And is it ever measured or

1 considered? Because you Google it on the web and  
2 you see that.

3 MR. BREWE: Okay.

4 MR. HEROUX: So it's something that I'm  
5 concerned about because I don't know a lot about it.  
6 But I'm asking you --

7 MR. BREWE: Yeah, I mean --

8 MR. HEROUX: -- if you can explain that.

9 MR. BREWE: Yeah, so the -- especially in  
10 this situation, our equipment is mounted up on the  
11 rooftops. So, you know, there's not a lot that  
12 would be transferred that way.

13 MR. HECKER: Brent Hecker, PE senior manager  
14 at AWS. I'm responsible for the building design in  
15 the East Coast, Virginia specifically.

16 Any time we have rotating equipment,  
17 there's vibration that gets dampened. Even in this  
18 build right now with the HVAC system running, there  
19 is vibration.

20 MR. HEROUX: Of course.

21 MR. HECKER: Can we feel it? I mean, at  
22 this --

1 MR. HEROUX: Do you feel it -- the question  
2 is, like, can you feel it --

3 MR. HECKER: Can you feel it at the  
4 building?

5 MR. HEROUX: Yeah, that's what I'm saying.  
6 You know, like, you know, you can hear power lines,  
7 everything else. But can you feel the vibration  
8 from a data center, and how close can you, and  
9 what's the proximity and things like that?

10 MR. HECKER: I've personally been inside a  
11 number of our data centers, and I have not felt a  
12 vibration from HVAC equipment.

13 MR. HEROUX: Inside?

14 MR. HECKER: Yes.

15 MR. HEROUX: I'm talking about outside.

16 MR. HECKER: Even outside.

17 MR. HEROUX: Okay.

18 MR. HECKER: Inside and outside.

19 MR. HEROUX: Outside is more the issue, so.

20 MR. HECKER: Yeah.

21 MR. HEROUX: So what you're saying is  
22 vibration outside of a data center is not an issue

1 at all?

2 MR. HECKER: The building has a dampening  
3 function to it.

4 MR. HEROUX: Okay.

5 MR. HECKER: Plus we put rotating equipment  
6 on spring isolation to --

7 MR. HEROUX: Because there's numerous  
8 articles on the web that say you can feel the  
9 vibration.

10 MR. HECKER: I understand that. I've read a  
11 number of those articles, too. I mean --

12 MR. REINKE: There's a lot of articles on  
13 the web that say a lot of things for sure.

14 MR. HEROUX: Yeah. But I'm asking you the  
15 experts, you know.

16 MR. HECKER: I mean, I can speak to a  
17 building that a fellow engineer signed at a previous  
18 stop where they didn't put enough dampening  
19 vibration and the CEOs office was right below the  
20 pump. He could feel the vibration.

21 So can any building vibrate? Yes. Can  
22 you feel it? Yes. The percentage of our data

1 centers that you might feel it at, minimal, if there  
2 is a vibration coming out of the building.

3 MR. HEROUX: And how close would you have to  
4 be to that?

5 MR. HECKER: Feet.

6 MR. HEROUX: Okay.

7 MR. HECKER: We're talking -- in that  
8 particular case, the CEO was within ten feet of the  
9 building.

10 MR. HEROUX: Okay.

11 MR. HECKER: Ten feet of the source.

12 MR. HEROUX: And does that contribute to the  
13 noise level, as well, the vibration?

14 MR. BREWE: Generally, no. You know, the --  
15 that vibration would have to transfer through the  
16 ground and then be transmitted up through another  
17 source to create a sound issue that way, to have  
18 vibration-induced sounds levels.

19 MR. HEROUX: Uh-huh.

20 MR. MOONEY: Mr. Mayor.

21 Okay. So thank you-all for coming out  
22 here. I appreciate it. It's good to see you guys

1 again.

2                   One question is: How many of you live  
3 near a data center, within a hundred -- within 250,  
4 350 feet of it?

5                   So Mr. Brett -- I don't -- you didn't  
6 say your last name, or maybe you did. I didn't hear  
7 it. You said you were in a building and you didn't  
8 feel it, but have you lived next door to a building  
9 year after year?

10                  MR. HECKER: I live next to a railroad  
11 track. So not next to a data center. The railroad  
12 vibrates.

13                  MR. MOONEY: Okay.

14                  MR. HECKER: I can tell the difference  
15 between Metro VRE and freight.

16                  MR. MOONEY: Okay. All right.

17                  MR. HECKER: To answer your question,  
18 though, Councilman Mooney, no, I do not live next to  
19 a data center currently.

20                  MR. MOONEY: Okay. I got a lot of  
21 questions. All right.

22                  So I have a question for you, sir,

1 Mr. Brewe. You said -- I want to reiterate  
2 Mr. Semple's question: Did you plan for noise  
3 mitigation at any other data center that did not  
4 pass it?

5 MR. BREWE: We are planning and implementing  
6 noise mitigation at other data centers.

7 MR. MOONEY: None in the past?

8 MR. BREWE: What's that?

9 MR. MOONEY: None in the past that have  
10 failed?

11 MR. BREWE: I can't comment on all of our  
12 data centers in the past.

13 MR. MOONEY: Okay. But I think it's -- I  
14 think it's worth noting that if you have planned for  
15 something in the past there's not this overarching  
16 theme that it's just going to go, you know, smooth  
17 as silk and everything is going to pass if we've  
18 planned for things in the past.

19 Unless there's some, you know,  
20 clearance that I'm supposed to have to know about  
21 places that you've tried to mitigate that it's  
22 failed. Wouldn't it make sense -- wouldn't that be

1 an important thing that people would want to know,  
2 that it's not just going to go perfectly as  
3 everybody stated? That we would want to know that  
4 there's a history. Maybe not a ton of history but  
5 some history. You know, like -- you know, that we  
6 plan for emission at a 70 percent solution that is  
7 going to go well, and then we got ambushed because  
8 we didn't plan for that last 30 percent.

9 MR. REINKE: Yeah. At least in this part,  
10 there hasn't been a data center that's gone through  
11 this amount of mitigation in the predesign stages.

12 MR. MOONEY: Okay.

13 MR. REINKE: And that's important to know  
14 because once you build -- and you know this. Once  
15 you build a structure, what you can do to it  
16 afterwards is limited.

17 MR. MOONEY: Sure.

18 MR. REINKE: Where pre-build where you  
19 design the mitigation, you have a lot more options.

20 MR. MOONEY: Sure. So, all right.

21 Another question for Mr. Brewe. Who  
22 was the third party that looked at the noise study?

1 MR. BREWE: Lando and Associates.

2 MR. MOONEY: Okay. And then I have a couple  
3 questions for Polysonics.

4 In this noise study that I guess should  
5 be of note that the planning commission didn't see  
6 because it wasn't given to us until January 9th, you  
7 have on page 17 -- page 17, I'm curious about how  
8 there is lower noise -- lower noise levels directly  
9 above the center versus out. I don't know what that  
10 is, 50 feet. You have 40s on top and 45s out of the  
11 building. How does that compute when the noise is  
12 coming from the center of the rooftop and then it's  
13 actually louder farther away.

14 MR. KARNER: Sure. I wouldn't say that it's  
15 directly at the rooftop. The building is 50 feet  
16 high. These contours are taken at 20 feet tall. So  
17 there is some building shielding right next to the  
18 building. But when you get beyond that building  
19 shielding, the noise can build up a little louder.

20 MR. MOONEY: Okay. Do you hear how that  
21 sounds a little not right, that it's louder?

22 MR. REINKE: Go ahead and make sure because

1 I don't want Mr. Mooney to walk away thinking that's  
2 not right.

3 MR. KARNER: Sure. I -- it's -- can you  
4 clarify your question, then? I'm not sure I  
5 understand.

6 MR. MOONEY: You said there's noise things  
7 that -- noise reducers or whatever, and these things  
8 are taken at 20 feet above --

9 MR. KARNER: Yeah.

10 MR. MOONEY: -- where the air-conditioners  
11 are, where you have a 40 on the, I guess, southern  
12 end.

13 MR. KARNER: No. Sorry. 20 feet above the  
14 ground. The equipment itself is 50 some feet above  
15 the ground, but these contours are generated at  
16 20 feet.

17 MR. MOONEY: Okay.

18 MR. KARNER: So, you know, imagine you're on  
19 a ladder and you're looking, you can't quite see all  
20 of the equipment because the building is blocking  
21 it.

22 The contours directly on the rooftop

1 are probably generated from within the building, and  
2 so that's probably why they're quieter right on top  
3 of the building.

4           If we did them at the height of the  
5 equipment, you know, it would be -- you would see a  
6 real red bubble over all of the equipment.

7           MR. MOONEY: Okay.

8           MR. KARNER: So this is figure is more for  
9 the surrounding neighborhoods and, you know, for  
10 people on their decks, how are they -- what the  
11 noise level is going to be for them.

12           MR. MOONEY: Okay. And then earlier when  
13 you first started talking, you said that you gave us  
14 the report a month ago; what did you mean by that?

15           MR. KARNER: I'm not sure. Well, this  
16 report from January 9th, isn't that...

17           MR. MOONEY: Right. So you said that we've  
18 had a month. I'm taking that as I should have read  
19 through this.

20           MR. REINKE: I wouldn't read anything into  
21 it.

22           MR. KARNER: No, I meant it more towards

1 Jay. I'm sorry.

2 MR. MOONEY: Okay. Because that's one of  
3 the questions that I had. We were given this last  
4 month, and none of us have your background, you  
5 know.

6 MR. REINKE: Can are you run through your  
7 slide --

8 MR. MOONEY: Is there a presentation?

9 MR. KARNER: We have a presentation to walk  
10 you through the report.

11 MR. REINKE: Steve, do you have that?

12 MR. MCGUIRE: Mr. Mayor, could I have a  
13 question, though?

14 So understand -- like, will you be  
15 continuously monitoring the sound on a daily basis?

16 MR. REINKE: Say that again.

17 MR. MCGUIRE: Will you, Amazon, be  
18 continuously monitoring the sound on a daily basis?

19 MR. REINKE: No. There would be a sound  
20 test once a year.

21 MR. MCGUIRE: Once a year.

22 So then if a resident calls up and

1 says, hey, this is, you know, out of compliance and  
2 things like that, don't you think it would be in  
3 good neighbor fashion to monitor the noise every  
4 day? I mean, because then it's a he said/she said.  
5 I mean, you know, you're going to dispute maybe the  
6 citizen from the town's numbers, and you have  
7 nothing to go on based on what you just said. I  
8 mean, you just said that? Right.

9 MR. REINKE: Run through your -- run through  
10 your presentation.

11 MR. MCGUIRE: No, no. This is important  
12 because -- I will see the presentation, but it's  
13 important that, I think, in fairness you run a sound  
14 test every day because otherwise you're going to  
15 dispute what a good citizen says. You have no  
16 baseline to say that you're in compliance or not.

17 MR. REINKE: And the reason I want to show  
18 the model -- and I'm not trying to bypass the  
19 question.

20 MR. MCGUIRE: Well, that's what I thought  
21 you were. I'm just --

22 MR. REINKE: Think better of me, if you

1 would.

2 MR. MCGUIRE: I would hope so. I'm just  
3 going on the answers. That's all.

4 MR. REINKE: So I want to show is the  
5 ambient noise at the site -- and if you go out to  
6 the site now, when they run the ambient noise,  
7 you're going to see -- expect for, I think, between  
8 2:30 and 3:30 if you'll run through your  
9 presentation -- the ambient noise is already above  
10 -- well above what our noise would produce and above  
11 already the noise ordinance.

12 So if you go out and do a test -- if  
13 you just did a test today at the property boundary  
14 --

15 MR. MCGUIRE: Right.

16 MR. REINKE: -- that site would be out of  
17 compliance.

18 MR. MCGUIRE: Okay.

19 MR. REINKE: So the problem with that is  
20 that if someone goes, hey, they're out of  
21 compliance. Someone could call every day if they  
22 wanted to, and go, they're out of compliance. To

1 test it, they'd have to go out there and do manned  
2 -- someone has to watch it usually for three or four  
3 days. They're out there with a monitor, someone is  
4 watching it. And Ian says in his early days you  
5 have to be out there -- someone is usually out there  
6 2:00, 3:00 in the morning, they're watching.

7 And then they also have to do equipment  
8 sound testing and do a modeling from that to see if  
9 it's in compliance. The standards to through all  
10 that -- so to do that continuously is not possible  
11 at this site. I'll let Ian and Chris --

12 MR. MCGUIRE: And why is that? Just because  
13 of cost/financial --

14 MR. REINKE: No.

15 MR. MCGUIRE: I would think it would just be  
16 as a good neighbor you would want to do that maybe  
17 every week or so so your baseline -- because  
18 otherwise they can see the back and forth between us  
19 and the town -- with you and the town saying, you  
20 know, well, you know, we'll test it once. I mean,  
21 then where do we stand?

22 That's my question, Mr. Mayor.

1 MR. REINKE: We're testing the equipment at  
2 100 percent. Like, we do every phase. And then we  
3 get all the phases, and we test it. It's ran 100  
4 percent and we test it. Then you know you're above  
5 and below compliance.

6 Unless there's an equipment malfunction  
7 for something, which would be rare in this instance  
8 itself, the only time you'd ever -- something weird  
9 would cause you to be out of compliance. So once  
10 you're in compliance, there's nothing we can do to  
11 go, oh, we're going to turn it up to be louder.

12 MR. MCGUIRE: Right.

13 (Simultaneous speakers.)

14 MR. MCGUIRE: No, but what I'm confused  
15 about is you said right now if you ran a test at the  
16 site it would be not in compliance.

17 MR. REINKE: The site wouldn't be. The  
18 noise level -- but the equipment coming from our --  
19 if we had -- if we run the equipment, and we'll --  
20 you can go through how you run it -- it would show  
21 that we're below the noise ordinance. The sound  
22 coming from the equipment would be below ordinance,

1 but it takes a modeling to do that.

2 MR. MCGUIRE: So what you're saying then --  
3 and I could be wrong -- is it will always be not in  
4 compliance based on your testimony.

5 MR. REINKE: The site right now --

6 MR. MCGUIRE: Right.

7 MR. REINKE: -- the ambient noise is well --

8 MR. MCGUIRE: Okay.

9 MR. REINKE: -- well above --

10 MR. MCGUIRE: -- okay.

11 MR. REINKE: -- the noise ordinance already.

12 MR. MCGUIRE: And you're saying Amazon will  
13 not contribute any to that, so it's always going to  
14 be out of compliance.

15 MR. FOOTE: And let me add -- I don't think  
16 anybody has actually said this, Your Honor, but the  
17 noise ordinance requires us to get these sound  
18 levels without considering existing ambient noise.  
19 So the testing and the modeling is done without  
20 considering that ambient noise.

21 So the numbers that we're showing as  
22 meeting, are assuming there's no ambient noise, but

1 in fact there is.

2 MR. MCGUIRE: But there is, and you said  
3 it's not --

4 MR. FOOTE: That's right.

5 MR. MCGUIRE: -- in compliance?

6 MR. FOOTE: That's right. Well, that we  
7 won't be because of the data center. Because the  
8 data center assumes it's quiet with no hummingbirds  
9 out there, and we still meet the ordinance.

10 MR. MCGUIRE: So I think that's -- we've  
11 seen the defense they're going to make in terms of  
12 noise violations. They are going to say it's  
13 already not in compliance.

14 MAYOR NEVILL: I think you're  
15 misunderstanding. I think the decision here -- the  
16 reading is that the site has an ambient -- once you  
17 add in traffic noise, noise emanating from  
18 properties next door, that does not count into  
19 whether or not the site is in compliance.

20 UNIDENTIFIED SPEAKER: Correct. That's  
21 right.

22 MAYOR NEVILL: The compliance they're

1 demonstrating and stating that the site itself, the  
2 noise emanating from the building, will be within or  
3 below our noise ordinance standards. But if we had  
4 continuous monitoring, it would show it in  
5 violation --

6 UNIDENTIFIED SPEAKER: Right.

7 MAYOR NEVILL: -- not because of what the  
8 building is, but because of ambient noise.

9 MR. MCGUIRE: If you only test once a year,  
10 that's not -- I mean, I would think you would want  
11 more testing. We would want more testing.

12 MAYOR NEVILL: The testing would be  
13 modeling. So basically at-site, but would then be  
14 applied through modeling --

15 UNIDENTIFIED SPEAKER: Correct.

16 UNIDENTIFIED SPEAKER: That's right.

17 MAYOR NEVILL: -- to remove the ambient noise  
18 to demonstrate whether or not the site is --

19 MR. MCGUIRE: But I would rather have a  
20 "test" test, because --

21 MR. BREWE: There would be testing. There  
22 would be measurements. It would also then need to,

1 you know, be per ANSI standards: Trapping out the  
2 background noise to understand what is the noise  
3 emitted from the facility exclusive of the existing  
4 environment. And it's a challenging process to be  
5 (indiscernible).

6 MR. SEMPLE: How do you subtract out the  
7 ambient noise? And what you said earlier -- let me  
8 explain -- is that you say the ambient noise in some  
9 cases is already in violation if we were testing for  
10 the ambient noise.

11 MR. BREWE: It already is (indiscernible.)

12 MR. SEMPLE: So you wouldn't know whether  
13 you're in violation -- I mean, the ambient noise  
14 could be high enough so that you could be in  
15 violation and we wouldn't know it.

16 MR. BREWE: So that is part of the issue. I  
17 mean, that is that the existing background noise  
18 levels at this sight are greater than the noise  
19 limits.

20 MR. SEMPLE: So you have a singular test  
21 that's capable of clearing the decks of the ambient  
22 noise, right?

1 MR. BREWE: So there are methods to -- that  
2 are defined within the ANSI standards that the town  
3 has incorporated into their ordinance to accommodate  
4 and to try and calculate as best possible.

5 MR. SEMPLE: Okay.

6 MR. BREWE: But it is a challenge.

7 MR. SEMPLE: But the ambient -- okay. Well,  
8 this gets to my whole point. I mean, how do we  
9 create a test that we can rely on?

10 The other issue that I have is ambient  
11 noise is based on kind of -- these are directional  
12 microphones? I mean, I assume that they're not --  
13 are they omnidirectional?

14 MR. BREWE: Yeah.

15 MR. SEMPLE: Okay. So but the ambient noise  
16 will vary, will it not, around --

17 MR. BREWE: (Nods head.)

18 MR. SEMPLE: So you're selecting one  
19 location to do this?

20 MR. BREWE: I would assume we have multiple  
21 locations.

22 MR. SEMPLE: Multiple. Okay. All right.

1                   Because I'm just wondering. I thought  
2 we had -- one of the requirements would be the  
3 nearest, what I call, CPA, closest point of  
4 approach. It's an interesting "thereof." Where is  
5 this? Where in the noise ordinance -- it's based on  
6 our own ordinance, where we have this curious phrase  
7 about the general testing requirements. Let me see  
8 if I have it here. Which I felt was a curious way  
9 of phrasing it.

10                   But please correct me if I'm wrong. It  
11 says the sound -- yes, the pressure level of sound  
12 radiated from an establishment measured at the lot  
13 line of the site thereof, that is the nearest  
14 thereto, shall not exceed the values.

15                   That seems to be you select one  
16 location that is the closest point of the approach.  
17 I mean, based on this ordinance.

18                   MR. BREWE: I would assume that we would be  
19 selecting multiple locations, but.

20                   MR. SEMPLE: But I'm -- I know you can make  
21 all of these assumptions. I'm just looking at the  
22 rule. And so -- what we can rely on in terms of

1 enforcement.

2                   So we are there in a circumstance where  
3 you're in the closest point of approach. What if  
4 there is a tree between you and the sound value?

5           MR. BREWE: So that would kind of -- well,  
6 depending on where it's positioned. You know,  
7 because that tree would be part of the environment.

8           MR. SEMPLE: Well, we have a rule --

9           MR. BREWE: I will say the modeling did not  
10 take into account any of those trees.

11           MR. SEMPLE: All right. All right. I've  
12 asked all the questions that I can think of.

13           MR. BREWE: Okay.

14           MR. KARNER: Feel free to ask questions  
15 during. Hi. I'm Chris Karner with Polysonics. I  
16 don't think I said that when I got here.

17                   Polysonics is located in Warrenton, but  
18 has been in D.C. and Remington, has been around  
19 since 1958. We provided acoustical technology  
20 design services.

21                   We've done some major projects in D.C.,  
22 Maryland, Virginia, throughout the country, and

1 overseas even. But I just wanted to list some of  
2 the local projects that you could just go to, and  
3 say, hey, how did Polysonics do here? Should we  
4 trust Polysonics?

5           And OVH would be the most parallel. We  
6 worked with the Path Foundation separating from OTEC  
7 (ph). The band room at the (indiscernible) High  
8 School. The Fauquier Community Theater reached out  
9 to us, and we helped them with their AV and their  
10 acoustic panels. If you you've gone there, you may  
11 noticed their orange panels look nicely in the past  
12 few years.

13           Gloria's, when it was here, we gave  
14 them design for acoustic panels. Rainforest Trust,  
15 when they moved into Vint Hill were concerned about  
16 cross fit (ph). Hope Christian Fellowship, we put  
17 up panels in there. And then an FAA air traffic  
18 control center, also in Vint Hill.

19           So these are projects that I've  
20 personally all worked on -- or I've worked on all of  
21 these. So that's just to give a very brief history  
22 of Polysonics's 60-some years of experience. So

1 I've been with them for ten years, and doing  
2 acoustics for about 20 years.

3           So I can I control the slides with this  
4 thing? Okay. It's cut off on my screen, but you  
5 can see the full thing -- it is auto-plane? Okay.  
6 All right. So this is -- this is all -- I think it  
7 has, like, a thing on there. I'm going to give it  
8 real quick. Try to keep up. Oh, thank you. All  
9 right. Skipping forward.

10           So this is very basic acoustic stuff.  
11 If you want me to skip this, that's fine.

12           Here's the equation for noise. If it's  
13 a point source, it's 20 times log, distance one over  
14 distance 2. 3 db for doubling of distance for line  
15 source. We have both in our model. We also have  
16 area sources.

17           The chart on the right shows sound  
18 level perceptions, if something is loud, quiet,  
19 deafening, where the speech frequency is, and things  
20 to compare it to. I believe that's in the report,  
21 too.

22           The houses of a standard construction,

1 meaning vinyl walls and normal off-the-shelf Home  
2 Depot windows, is a 20 db reduction. And then here  
3 is some sound level perception changes. So 3 db,  
4 meaning just noticeable. 20 db, meaning a quarter  
5 is quiet.

6 All right. I'm going to try to skip it  
7 without it playing through the whole thing.

8 These just real quick are the sounds  
9 level standards we use for measurement, because we  
10 did do onsite measurements. That's the ANSI  
11 standards. And then our modeling is based off this  
12 ISO standard. It takes into account all of these  
13 things: Topography, shielding, reflections,  
14 metrological. So it's a complicated model.

15 The Town of Warrenton limits, they're  
16 confusing, but I think we've captured them here,  
17 saying here's the base limits. Here's daytime with  
18 penalty for -- because we're next to residential.  
19 And then we're assuming there's a tone, so we're  
20 taking 5 db off of that, and another 5 db off at  
21 nighttime from 10:00 to 7:00.

22 And then the generator, we're not

1 taking off tone because there's no tone; and it will  
2 only be tested during the day, so it just has that  
3 minus five.

4           So we're applying the residential limit  
5 throughout the whole property even though to the  
6 north and east and somewhat most of the west is not  
7 residential; but we're just applying it because it's  
8 next to a residential site.

9           The noise levels here are only  
10 applicable to the property lines; and you'll notice  
11 they're all on octave bands, too. There's no  
12 overall noise level. So if someone did have an app  
13 or something, it would not tell them whether or not  
14 they are meeting it. It would say, you know, 45 db.  
15 Well, where is 45 db on this chart? It's not on  
16 that chart. So that's just part of the town code.  
17 It's kind of -- you need a special meter to measure  
18 if you're in compliance or not.

19           MR. MCGUIRE: Mr. Mayor, I have a question.

20           MR. KARNER: Yes.

21           MR. MCGUIRE: So just trying to understand  
22 this as a laymen.

1 MR. KARNER: Yeah.

2 MR. MCGUIRE: So can noise or sound be in  
3 compliance and still be offensive to your ear?

4 Because I'm trying to understand --

5 MR. KARNER: Yeah, no.

6 MR. MCGUIRE: I'm trying to -- because I  
7 can't hear what I'm seeing. That's --

8 MR. KARNER: No, I appreciate --

9 UNIDENTIFIED SPEAKER: (Indiscernible) the  
10 answer is yes.

11 MR. KARNER: The answer is yes, in my  
12 professional opinion. The Town of Warrenton's noise  
13 limits are stricter than any other adjacent counties  
14 or towns. So it's -- you could hear it and maybe  
15 find it offensive if you're sensitive.

16 But these are quieter than Arlington,  
17 Loudoun, Fairfax, everybody. So it's stricter than  
18 Town of Warrenton, as well.

19 So in the town limits other than later  
20 when it says consider the community. Again, this is  
21 just at the property line up assuming the property  
22 line is a plane.

1                   We generated a sound plan model. It's  
2 an industry standard model for noise. You can kind  
3 of see in the bottom right what the model looks  
4 like. You can see the topography. That's all  
5 imported from Google Earth. You can kind of see all  
6 of the little dots and slashes and things on top of  
7 the roof of the building.

8                   So the building is in there. The  
9 topography is in there. All the noise sources are  
10 up there running in the model.

11                   On the top right of this picture we put  
12 some receivers in there -- which will come up later  
13 -- just in the tables. We ran the -- let's see.  
14 So, yeah, 80 sources in the model. Topography is in  
15 there.

16                   We ran it under three conditions, so  
17 with no mitigation. I think last time we talked we  
18 talked about silencers and boxing everything in. So  
19 we ran it if you did nothing, if you just ran the  
20 equipment as designed. Next, we applied the  
21 mitigation. So all the sounds (indiscernible) and  
22 things. And then the generators and the chillers.

1 So everything -- or one generator and the chillers.

2 We modeled for loudest case scenario at  
3 59 feet high. I know that's not measurable, but if  
4 it can meet at the loudest case, then it's going to  
5 meet anywhere else along that plane.

6 We also looked at 20 feet high for  
7 adjacent properties. That was figure that we looked  
8 at earlier. And then 5 feet high for a person  
9 standing on the ground. So all of those scenarios  
10 were modeled.

11 So here would be if you didn't do  
12 anything. If Amazon just built as-is and used the  
13 sound data as shown. Anything in orange would be  
14 over. So that this would be -- you know, it's not  
15 meeting the town limits. It's showing in bold at  
16 the top, daytime and nighttime. You can see that  
17 anything orange is over.

18 If we apply the mitigation, the  
19 silencers on top, the walls on the side, the  
20 compressor wraps, we get this next slide where  
21 everything is below the town limit numbers, both at  
22 daytime and nighttime, as well as the generator.

1 Again, this is the chillers with the mitigation, and  
2 then one generator tested at the nearest property  
3 line point.

4           So it's a lot of numbers, but if you  
5 just start with the bold one and look down, you will  
6 not see a number higher than those numbers. And  
7 these are -- again, these are numbers generated from  
8 the model based on the ISO standards.

9           UNIDENTIFIED SPEAKER: (Inaudible.)

10           MR. KARNER: Everything running at  
11 100 percent during summer conditions.

12           MR. FOOTE: Let me add one other point. The  
13 question came up earlier, Your Honor, as to where  
14 these tests were taken, and we -- in addition to  
15 what's actually in your ordinance, as you know,  
16 we've received a zoning determination letter from  
17 the zoning administrator some time ago.

18           And during that -- in that letter, it  
19 talked about sound pressure levels created by the  
20 establishment are to be met at any other point of  
21 the lot boundary. For the proposed data center,  
22 this means measurements would be taken at the

1 property lines of the (indiscernible) of this  
2 property, and these measurements need to show the  
3 data center is meeting the sound pressure limits at  
4 any of the property lines of the subject lot.

5           And so the numbers that Mr. Karner is  
6 showing you meet every property boundary.

7           MR. KARNER: So we've got -- if you look  
8 here, I'm just going to go back a few slides. It  
9 says north, south, east and west. That's what's  
10 shown here on the top right.

11           So north is the loudest location in the  
12 north and even same with the east, south, and west.  
13 So it's not centered. It's just where the loudest  
14 point is.

15           Skipping forward. So outside of the  
16 town ordinance we also looked at the adjacent  
17 properties. So if you're living in the town houses  
18 nearby or the houses to the northwest, what would  
19 want sound levels be in your backyard when it's  
20 running. So that's -- this is the daytime levels,  
21 which is 35 to 40 at the north and east. Nothing is  
22 really to the north and east. But 35 to 42 to the

1 south.

2                   And if you remember from the chart --  
3 I'll just go back so you don't have to -- you know,  
4 those are moderate to faint sound levels. Soft  
5 stereo in a -- or soft stereo music in a residence,  
6 stereo without playing -- and this is outside.  
7 Inside the house you would subtract 20 from that,  
8 and it would be a whisper.

9                   So that's the daytime. They both say  
10 daytime, but the second one is nighttime. It gets  
11 even quieter because the equipment doesn't have to  
12 fight against the daytime heat. It's still -- the  
13 fans are still at 100 percent, but the compressor  
14 runs at a different -- so it's a little quieter.  
15 Comparing the two, it goes down by about 5 db.

16                   So we had measured ambient noise, and I  
17 think that that's all the big figures at the end of  
18 the report at these locations. And I think M5 is  
19 probably the most important. It's buried in the  
20 residences. You know, it's a little away from 15.  
21 M1 through M4 are kind of just along the property  
22 line. That's not something people in the community

1 are going to experience, but it could be where you  
2 measured in the future.

3           So here's an example of the ambient  
4 noise compared to the model. The ambient noise is  
5 the blue squiggly line. You can see it get quiet at  
6 nighttime. During the day, it's like 55. Drops  
7 down to 40 at nighttime. But the model is at 37  
8 during the daytime, and 33ish at nighttime.

9           So if you were to do -- at this point,  
10 at this picture, and along with most of the other M1  
11 through M4, if you look through the report, the  
12 background noise is more of the data center, and the  
13 traffic noise is more of a source.

14           We can, if the background noise is 10  
15 db quieter than the source, subtract out the  
16 background noise, but we can't do it if the traffic  
17 is 30 db higher than the data center. So I think  
18 the measurement is going to have to take some  
19 coordination between Amazon and the town; and if you  
20 measured at the property line it's going to be hard  
21 because the ambient noise is so loud.

22           So they may have to move closer to the

1 source or higher to get what the equipment is  
2 actually doing.

3                   And I think that's what Ian meant by  
4 modeling, is that if we measure at the roof line to  
5 make sure we're getting equipment louder than  
6 traffic, we would have to calculate out what is  
7 that, you know, at the property line.

8                   So, for example, if someone at the  
9 hotel set up a meter right now, you would say, oh,  
10 yeah, look, it's way over the town ordinance. It's  
11 55 and -- but the data center is -- you know, like I  
12 -- in the first meeting I had said that you'd be  
13 surprised if you heard it during the day, and that's  
14 why: It's 37. You know, it's almost 27 db lower.  
15 So four times quieter than the traffic noise at this  
16 -- at the hotel location.

17                   MR. MOONEY: Mr. Mayor, I have a question.

18                   MAYOR NEVILL: Yes.

19                   MR. MOONEY: So what you're saying then is  
20 the ambient noise will cancel out the data center?

21                   MR. KARNER: For the most part, yeah.

22                   MR. MOONEY: Okay.

1 MR. KARNER: At certain locations.

2 MR. MOONEY: So then at other times of the  
3 day or night when there's no traffic, you might hear  
4 the data center more, or...

5 MR. KARNER: Yeah, so audibility is tricky.  
6 It's very much the individual's perception of the  
7 noise. Measurement-wise, it's going to be tricky.

8 I mean, it's -- so you can see it's  
9 like 33 in the middle of the night there and the  
10 traffic is 37. So if you measured, you're going to  
11 get 37. You won't be able to pull the traffic and  
12 the data center apart. You may be able to hear --  
13 usually if you're within 10 db you might be able to  
14 hear a second ambient source.

15 MR. SEMPLE: Are you saying we don't need to  
16 worry about qualitative tests as opposed to  
17 quantitative?

18 Because what we're talking about, we  
19 know there's certain types of noise that is  
20 aggravating than others. And there's also -- I  
21 realize this is probably not testable, but the fact  
22 is that people living near a data center are already

1 disposed to hear noise they don't like.

2 MR. KARNER: Well, I understand that, and I  
3 do think there's no acoustic qualitative test. That  
4 would be more public opinion. But we are, during  
5 the daytime, you know, significantly quieter than  
6 the traffic noise.

7 I don't think -- I don't think they  
8 would hear it during the day. I think if you were  
9 out on your deck in the middle of the night or if  
10 you had your windows open in the middle of the  
11 night, then you may hear it; but those would be the  
12 only conditions having looked at the data. And  
13 really just the townhouses nearest them. Everyone  
14 else is so far away.

15 MR. SEMPLE: One of the things I heard was  
16 that some people couldn't go to sleep at night or  
17 open up their windows; and so nighttime is an  
18 important consideration. Would you agree?

19 MR. KARNER: Yes. But if you open your  
20 windows, do you have an expectation of quiet or  
21 acoustic privacy from the outside world?

22 MR. SEMPLE: No, no, but you do have an

1 expectation you can hear maybe a screech owl  
2 perhaps.

3 MR. KARNER: Yeah.

4 So, Mr. Mooney, did you have further  
5 questions about the slide? Or I hope that it helped  
6 clarify the report.

7 MR. MOONEY: It did a little bit. I've got  
8 -- I do have some questions, though. Everything is  
9 -- you just keep referencing db. Sometimes it's  
10 dba, sometimes it's db. Is our ordinance in dba and  
11 db, or in dbz?

12 MR. KARNER: Sure. The ordinance is in dbz,  
13 which means all the octave values in there -- do you  
14 mind pulling up the slide with the town ordinance?  
15 Those are unweighted. Dba is how people perceive  
16 noise. You're not just hearing it -- overall it's a  
17 curve applied to those dbz. So we looked at -- we  
18 looked at all of it.

19 MR. MOONEY: So ordinance is in dbz.

20 And you said you have to have a special  
21 meter. Do we have a meter that can test that?

22 MR. KARNER: I have a meter. I doubt the

1 town has a meter. It's usually an expensive meter.

2 But it could be rented.

3 MR. MOONEY: But you're saying that  
4 everything -- our ordinance is in dbz, but all of  
5 your studies are done in DBA, and that's the same  
6 thing?

7 MR. KARNER: No. The study looked at dbz  
8 and dba. So my result tables, all of those numbers  
9 are in dbz. But dba, if you are a regular person  
10 and you want to measure noise and you get a Radio  
11 Shack meter or your cellphone, it's going to be in  
12 dba. Phones and that kind of thing can't measure  
13 each frequency.

14 MR. MOONEY: And you mentioned training  
15 equipment. Is that the mechanical equipment that  
16 you tested?

17 MR. KARNER: I did not test any equipment.

18 We received data from various  
19 manufacturers. So they -- Amazon has not yet  
20 selected it, but it is based on training sound data.

21 MR. MOONEY: So the sound study is based off  
22 of equipment that we're not guaranteed that we're

1 going to get?

2 MR. BREWE: That's correct at this point.

3 We have looked at other manufacturers and, you know,  
4 have similar data for them. If there is a change  
5 and it's not that specific manufacturer, then we  
6 will adjust to make sure that we're in compliance  
7 with the noise -- or the sound ordinance.

8 MR. MOONEY: Okay. So, and -- all right.

9 So I guess on the record you're not willing to  
10 comment on whether any previous sound studies and  
11 studies have been in compliance or not in  
12 compliance? You're not willing to comment?

13 MR. KARNER: (No audible response.)

14 MR. MOONEY: Okay. So the noise study that  
15 is part of the application is based off of hope and  
16 speculation?

17 UNIDENTIFIED SPEAKER: It's based off --

18 MR. MOONEY: And that's not my -- excuse me,  
19 sir?

20 MR. REINKE: Yeah, I wouldn't say  
21 speculation. Through testing through ANSI  
22 standards.

1 MR. MOONEY: Excuse me?

2 MR. REINKE: Through ANSI standards. So  
3 it's not speculation. Right it's a model that's  
4 been proven or, I guess, created by extremely  
5 capable engineers. It's been demonstrated to be  
6 accurate over years of use.

7 And so we're using numbers from  
8 manufacturers that should be accurate, or at least  
9 they've been recorded as accurate. They provide  
10 those numbers to us, we put them in a model, and  
11 that model will produce results that should be  
12 fairly accurate. So it's far from speculation.

13 MR. MOONEY: But it could be different --

14 MR. REINKE: Yeah, yeah.

15 MR. MOONEY: -- equipment? Okay.

16 MAYOR NEVILL: Point of order. I'd like to  
17 ask the town attorney a question.

18 Mr. Crim, it seems that we are in a --  
19 sort of a -- this is a work session, and we're kind  
20 of heading down some questions of -- questions of  
21 veracity of information. And, you know, we have an  
22 applicant who has submitted their view, their

1 reports, their data as such. And there's a good  
2 faith, bad faith. And I'm curious.

3           It seems that we are -- that some on  
4 the dais here are taking a very strong assumption of  
5 bad faith, that the data that is being presented is  
6 misleading, inaccurate, or otherwise wrong.

7           And what -- is there a standard or is  
8 there a debatable point? Because the question we're  
9 having here is that you're telling us that you will  
10 comply, that this will not be in violation, that you  
11 have proposed and developed a system that will fully  
12 meet our noise ordinance.

13           MR. REINKE: Yes.

14           MAYOR NEVILL: And we are, then, also  
15 looking at examples in other communities where  
16 there's a failed system. And so we're applying a  
17 standard of, you know, well, in the Tanner Way site,  
18 which is the one that keeps being referenced, is not  
19 in compliance and is currently under mitigation.  
20 Expected to be solved by September, I understand.

21           But at what point are we taking or  
22 depriving an applicant -- now, just imagine if you

1 were coming before us for an SUP for a drive-thru,  
2 and we started taking down all the worst case  
3 scenarios, and we started taking down the fact that,  
4 you know, your drive-thru will be in failure.

5           So, Mr. Crim, I think -- at what point  
6 is there an assumption of faith of what is being  
7 presented before us? Is there a legal standard for  
8 that, or is it just subjective or just interpretive  
9 up the council to make the decision as to say, I  
10 don't care what you say, I believe it to be false?

11           MR. CRIM: Well, for the reasons we  
12 discussed in closed session, the ultimate decision  
13 may be in other people's hands and in the court's  
14 hands, but the initial decision is in your hands.

15           MAYOR NEVILL: So we can -- if we don't  
16 believe the information they have provided, that is  
17 up to us?

18           MR. CRIM: Yes. And if you're in court  
19 you're doing to need to back that up.

20           MAYOR NEVILL: Okay. Thank you.

21           MR. MCGUIRE: Mr. Mayor, can I make a point?  
22 We have a fiduciary to our residents and everything

1 else, and I don't doubt your due diligence. I just  
2 -- I'm asking questions for clarification.

3 MR. REINKE: Sure.

4 MR. MCGUIRE: And that's like anything else.  
5 I think, you know, to characterize some people like,  
6 you know, trying to poke holes in something because  
7 they don't believe people, I just want to know what  
8 the fine points are to things, and how we're going  
9 to enforce this and everything else.

10 And I think it's important because we  
11 only get one bite at the apple. It's not like a  
12 drive-thru. It's a data center. It's a big impact.  
13 It's huge. And we need to ponder that and really  
14 think about our decision. It's important. That's  
15 why I'm asking questions. I can't speak for other  
16 people on the dais.

17 But I want to know ground truth. I  
18 want to know -- my questions have been fair and  
19 honest, you know. And it's not about, like,  
20 doubting your veracity. I know you did due  
21 diligence on this.

22 But like I said, you know, it's -- you

1 know, some of the things are debatable. Like I  
2 asked about the sound. Some sound is -- meets the  
3 ordinance, but is offensive. That's something  
4 that's important. And it's just only to get to  
5 ground truth. So we know what we're doing and what  
6 really getting into here.

7 So, thank you.

8 MR. SEMPLE: Yes, Mr. Mayor. And I think if  
9 you -- certainly from my point of view I'm not  
10 suggesting they're necessarily wrong. I just want  
11 to make sure we can find a way that they're right,  
12 and to do so after the fact and not until we wait.

13 These are -- Polysonics has a wonderful  
14 risumi and a great background, so I'm not  
15 questioning their assurance. My biggest problem is  
16 once, as, again, Councilman Heroux pointed out at  
17 one point, it will be built. Will we have -- will  
18 we have requirements in place? Will we have  
19 everything set up so if something does go wrong  
20 we're in the position to not just mitigate but to  
21 rectify? And I think that's one word that I really  
22 want to see changed in this.

1           If we get citizen's complaint, I'm just  
2 worried about that we're going on a model and the  
3 model is going to be a model. I mean, you can put  
4 the Titanic in a nice little bathtub, but you  
5 couldn't expect that one day it would hit an  
6 iceberg.

7           So models are what we have. I just  
8 want to make sure that the model is based on as much  
9 as possible and the correct science; and that's why  
10 they're here to tell us. And there have been others  
11 in the public who have disputed that model, and I've  
12 seen lawyers go back and forth.

13           And if it were my druthers and we  
14 really wanted to resolve this problem we could get  
15 an independent expert to come in who is neutral to  
16 both parties. But I'm not necessarily suggesting we  
17 do that, but I would recommend -- well, actually, I  
18 would recommend we do that, but I don't think we're  
19 going to. It's just that this is a big decision,  
20 and I don't believe that we should be, I guess,  
21 indirectly called out because we think that they're  
22 wrong. I don't necessarily think they're wrong.

1 MR. REINKE: Can I ask you one question?  
2 Chris, I don't want o put you on the spot. I know  
3 we paid your bill. Because we paid your bill, is  
4 any of the information you presented in any way  
5 skewed?

6 MR. KARNER: No.

7 MR. REINKE: Yeah.

8 MR. FOOTE: Your Honor, I have long  
9 experience with the Town of Warrenton. We do not  
10 question the good faith of any question that's been  
11 asked of us at this process. We understand the  
12 responsibility that you assumed when you got elected  
13 to this position.

14 And so what we say is we're here to  
15 answer your questions. In the end you may not  
16 choose to agree or believe it. We understand that.  
17 That's your call. But we assume the good faith,  
18 just as we hope you assume ours.

19 MR. MOONEY: Mr. Mayor, I have another  
20 question.

21 The -- it was stated that the  
22 generators would be tested one at a time. And how

1 long are those generators tested for?

2 MR. REINKE: Usually between seven and ten  
3 minutes.

4 MR. MOONEY: That's it?

5 MR. REINKE: Yeah.

6 MR. MOONEY: And then they're --

7 MR. REINKE: We test -- we'll test another  
8 and test another one. And we usually do that every  
9 two weeks.

10 MR. MOONEY: So -- and how many generators  
11 are on top of the roof at full capacity?

12 MR. REINKE: (Indiscernible.)

13 MR. MOONEY: Okay. I'm sorry. How many  
14 generators.

15 MR. REINKE: 54 is accurate?

16 UNIDENTIFIED SPEAKER: 26.

17 MR. REINKE: 26. My bad. 26. 26, yeah.

18 And so, yeah, if they're -- yeah.

19 MR. MOONEY: And you would test them all  
20 every two weeks?

21 MR. REINKE: Yes. And the reason, just  
22 because we always want the data center to be fully

1 up, make sure everything is always redundant. So  
2 you have redundant generators.

3 MR. MOONEY: I completely agree. So that's  
4 260 minutes of generator testing every two weeks?

5 MR. REINKE: Yes.

6 MR. MOONEY: Okay.

7 MR. FOOTE: That has been incorporated --  
8 excuse me. That has been incorporated into the  
9 noise study. That noise.

10 MR. MOONEY: Oh, the generators testing.

11 MR. REINKE: Yeah, so -- yeah. The  
12 assumption was what's the loudest it's going to be.  
13 And so it's going to be when the equipment is  
14 running 100 percent. And you have the generators  
15 being tested, as well.

16 MR. MOONEY: Okay. So I have another  
17 question.

18 Is there anything in the conditions  
19 about the -- I understand that there's probably  
20 going to have be blasting onsite. Is there anything  
21 to build it? Is there anything in the conditions  
22 that we're going to -- somebody is going to pay for

1 a foundation -- a foundation inspection for all the  
2 homes that are within X number of feet based off of  
3 the prior reports of all the foundation issues from  
4 blasting in other locations?

5 MR. REINKE: No, there isn't.

6 And John Wright, are you -- I mean,  
7 there's some -- we're going to have -- looks like  
8 you found some rock.

9 MR. WRIGHT: Yeah.

10 MR. REINKE: There will be some blasting.

11 How do you make sure that none of the  
12 foundations around surrounding homes are damaged  
13 through that?

14 MR. WRIGHT: Yeah, thanks, Jay.

15 So, yeah, there are -- based on the  
16 geotechnical site there are portions of rock, which  
17 is pretty prevalent in this area. So typically  
18 general contractors will set up their own monitoring  
19 system around site to document baseline from that  
20 perspective.

21 MR. MOONEY: Okay.

22 MR. MCGUIRE: Mr. Mayor, can I ask a

1 question? It's something like that that we need to  
2 know about. That's all I'm asking. You know, if  
3 they're going to do blasting, we need to know about  
4 that. You should come forward and have your  
5 template and say this when we're going to blast,  
6 when we're going to blast, things like that.

7 Because then by asking these questions  
8 nobody can doubt my veracity. I just want to know  
9 ground truth. I don't know what I don't know.

10 MR. WRIGHT: Sure.

11 MR. MCGUIRE: And everybody wants to know  
12 what's going on. That's why I would think you'd be  
13 able to turn around and say bring that slide up and  
14 I'll brief it. That's what worries me, is what I  
15 don't know.

16 MR. REINKE: Right.

17 And, John, you can correct me here, but  
18 that's typically done at site plan work. So once  
19 you get the land use permit, then you do the site  
20 plan.

21 And so when you go into the town for  
22 the site plan, you describe the blasting, how you

1 mitigate it, all that other stuff. So usually not  
2 done in the zoning process, but great questions  
3 regardless.

4 MR. MCGUIRE: Right. And it came up during  
5 the Harris Teeter gas station, as well, so I'm just  
6 saying, so.

7 MAYOR NEVILL: Any further questions for the  
8 applicant?

9 MR. SEMPLE: (Inaudible) what if the  
10 substation is in Fauquier County? We don't have  
11 jurisdiction over that.

12 MR. REINKE: We don't dictate where the  
13 substation goes. So that's up to Dominion.

14 MR. SEMPLE: All right. Well, here's --  
15 okay. Well, this will bring up my bigger question,  
16 and that really has to do the fact that this  
17 application is going to, based on Dominion's letter  
18 of November 22nd, tear up my ward. That is, they're  
19 going to underground up Falmouth Street, down East  
20 Lee Street, up Walker Drive. That is their  
21 proposal. I asked them several questions since  
22 then. I have huge diagrams of where they're going

1 to go with this.

2                   Now, I understand Amazon moved the  
3 substation. But did Amazon have any discussions  
4 with Dominion about paying for this line? Is there  
5 an agreement between Amazon and Dominion about this?

6                   MR. REINKE: Almost with any developer. So  
7 any time that someone is doing development and  
8 they're bringing new power lines to that site, it's  
9 the responsibility of that developer to pay for  
10 that.

11                  MR. SEMPLE: Right. But isn't this an  
12 impact? I mean, this is an impact. This is an  
13 impact we should consider; don't you agree?

14                  MR. REINKE: That's your decision.

15                  MR. SEMPLE: But, I mean, it is an impact.  
16 Yes, I understand it's our decision, but it is an  
17 impact that is being -- Dominion has said time and  
18 time again that we're it not for this data center,  
19 we wouldn't have this impact. And my concern is  
20 that -- to the extent it impacts my ward, is that it  
21 is a criteria that we should look at.

22                         Would you agree with that?

1 MR. REINKE: Criteria to look at it as far  
2 as what?

3 MR. SEMPLE: In terms of reviewing the  
4 application.

5 MR. REINKE: From a land use perspective,  
6 better to ask Mr. Crim to answer that question.

7 MR. SEMPLE: Well --

8 MR. REINKE: So if that's a land use  
9 question, I'm not sure.

10 MR. SEMPLE: Yeah, well, I'll ask Mr. Crim  
11 in a second. But my point is it's an impact.

12 Let's say, for example, we had a quarry  
13 over there. I think that's one of the main things  
14 that people say could happen. And we have a quarry  
15 over there, and they say, well, in order for us to  
16 serve the quarry, we need to build a railroad, and  
17 we've got to bring our railroad hopper cars and  
18 we've got to fill them up with rocks and carry them  
19 out of here. Seems to me that would be an impact  
20 that we would consider and would be part of the  
21 application.

22 And I guess we can talk about this

1 separately because I think -- but I'm asking the  
2 applicant. And I'm not asking the staff to weigh in  
3 on these concerns. And Mr. Foote is here so he can  
4 -- we can talk about it.

5 But --

6 MR. FOOTE: Well, in your example, the  
7 location of the railroad would be under control of  
8 the federal government and not a locality.

9 MR. SEMPLE: I'm not worried about that  
10 distinction.

11 MR. FOOTE: Yeah, well.

12 MR. SEMPLE: It's just an anomaly -- I mean,  
13 an analogy. My point is that traffic -- for  
14 example, we have traffic studies, and you don't own  
15 the traffic, and you don't own the roads that the  
16 traffic travels over. Well, that's true here.

17 And in this case they're going to be  
18 center line, this underground facility, right down  
19 though a historic district and right up to Amazon;  
20 and my position and my observation is that this is  
21 an impact that we need to consider, and I don't see  
22 it addressed anywhere in the application.

1                   What I see is an effort to disassociate  
2 the applicant from this impact by saying they moved  
3 the substation.

4                   MR. FOOTE: Well, when -- first of all, I've  
5 seen the same maps that you have. I was not aware,  
6 and I don't think Amazon is aware, that they have  
7 selected one of those routes.

8                   There are several routes, including the  
9 Walker Drive route. Let's assume it's the Walker  
10 Drive route.

11                  MR. SEMPLE: Right.

12                  MR. FOOTE: I would suggest to you that this  
13 is a consideration that any member of the council  
14 can put in their head. Whether that's a legitimate  
15 consideration for a decision on this is something  
16 you have to make up your mind on.

17                  I don't believe it's a land use issue  
18 in the same sense that the use of this piece of  
19 property is a land use question. But if that's  
20 something that moves your opinion, then I can't  
21 certainly tell a council member not to think about  
22 it.

1 MR. SEMPLE: Well, it's an impact question.  
2 That's under our criteria.

3 MR. FOOTE: I've read all of your criteria,  
4 and we've responded to all of them, and I can't  
5 believe I've seen that among your 36 criteria -- or  
6 32 criteria.

7 MR. SEMPLE: It calls for community impact  
8 to facilities.

9 MR. FOOTE: That's -- and I would agree that  
10 that's a (indiscernible).

11 MR. SEMPLE: And is not an electrical line a  
12 facility?

13 MR. FOOTE: Not of the town's.

14 MR. SEMPLE: What?

15 MR. FOOTE: It's not a town electric  
16 facility.

17 MR. SEMPLE: No, no. There's where it talks  
18 about a town facility, but it also talks elsewhere  
19 of just the facilities in general.

20 MR. FOOTE: That's insufficiently specific  
21 for me to say that that's an applicable environment.

22 MR. SEMPLE: Okay.

1 MR. FOOTE: But I repeat that I certainly  
2 can't stop a council member from considering it.

3 MR. SEMPLE: Okay. Because you're saying --  
4 I mean, this is just one of the artful things that's  
5 happening here. I mean, we have an impact that is  
6 serious -- that's potentially serious, could create  
7 access management problems, could create traffic  
8 backups. And not only is Amazon -- I mean, Dominion  
9 has purported that whenever they put it, it's going  
10 to be for the service of Amazon and no one else; and  
11 to me that's an impact I don't think as a council we  
12 can avoid.

13 MR. FOOTE: I think that there is certainly  
14 going to be an impact. I would also observe that  
15 it's going to be temporary. It will be there for  
16 sure, but it will be temporary. Just as the  
17 construction of this facility will be temporary.  
18 There will be an impact of that, too, but it will be  
19 over.

20 And so what I would submit to you is,  
21 again, if that's something you're concerned about,  
22 you can be concerned about it. But do I think that

1 it is something that's a legitimate ground that  
2 would be a reason to defeat this? I can't agree  
3 with that because it is a passing concern.

4 MR. SEMPLE: I mean, your definition of  
5 "passing" perhaps is different from mine.

6 MR. FOOTE: I understand that. That's  
7 perfectly okay.

8 MR. SEMPLE: And I would say that when you  
9 have a historic street where they're going to take  
10 up the entire right of way on both sides and maybe  
11 including sidewalks, that's not just a mere passing.

12 But it's also the mere idea that at for  
13 the service of one entity we can expose our  
14 residents who will get no benefit from this at all,  
15 to this harm.

16 MR. FOOTE: Your Honor, I understand that  
17 Dominion has said that it probably wouldn't be here  
18 without this data center, but I thought it had also  
19 said that it would serve other purposes once it was  
20 here.

21 MAYOR NEVILL: Dominion did state  
22 (inaudible).

1 MR. SEMPLE: Yes, other data centers.

2 MR. FOOTE: It certainly isn't one that  
3 we're associated with.

4 MR. SEMPLE: That's one of them. But that  
5 won't be part of my consideration.

6 But my point is when you look at  
7 impacts -- and we look at impacts -- that this is  
8 one of them. And it's not just that impact. It's  
9 where the location of the substation may be, as  
10 well. These are all impacts as a result of the  
11 application.

12 MR. FOOTE: That's certainly something that  
13 you're permitted to consider.

14 MR. SEMPLE: Okay. Thank you.

15 MR. MCGUIRE: Mr. Mayor, I have a question  
16 in regards to the SUP.

17 So you're going to do construction to  
18 build the data center. Have we as the town looked  
19 at how it's going to impact our transportation, our  
20 emergency services, things like that? Because  
21 Blackwell over there, that's sort of a tight  
22 corridor. You know, I'd like to be briefed as to

1 how you're going to do construction flow in and out  
2 of there and everything else and how that's going to  
3 impact us as the town.

4           MAYOR NEVILL: That's something that comes  
5 with the site plan.

6           UNIDENTIFIED SPEAKER: It is.

7           MR. MCGUIRE: Great. But I'm just saying I  
8 think that's very important as to the impacts of  
9 that in how we vote on this because it's -- how long  
10 do you anticipate construction to be for the data  
11 center? You said it's temporary, but how long?

12           MR. REINKE: About 12 months.

13           MR. MCGUIRE: About 12 months. Okay. So  
14 that's (indiscernible.)

15           MR. FOOTE: One of the things that you do at  
16 site plan, Your Honor, is create a maintenance of  
17 traffic program.

18           MR. MCGUIRE: Right.

19           MR. FOOTE: And how you manage that traffic.  
20 It doesn't come at regular rush hour times and other  
21 things that solve the problem. And they do get  
22 solved.

1 MR. MCGUIRE: And you do you anticipate any  
2 of the construction being done off hours or anything  
3 else like that?

4 MR. FOOTE: Traffic comes in. No, the  
5 traffic -- the construction occurs at regular  
6 construction times.

7 MR. MCGUIRE: Okay. Good. Right.

8 MR. FOOTE: But people come to work at  
9 different times.

10 MR. MCGUIRE: Right. No, understood, yeah.

11 But I'm just saying it's going to  
12 impact traffic, egress, everything else there. I  
13 think we really need to take a hard look at that,  
14 so.

15 MR. REINKE: Yeah, that's usually done at  
16 site plan.

17 MR. MCGUIRE: I'm aware of that, but I'm  
18 saying this is an unusual, you know, circumstance,  
19 so to speak. You know, it's different than, like,  
20 building, like, a drive-thru.

21 MR. FOOTE: And we do understand that, Your  
22 Honor. It's not something that hasn't been faced

1 here before.

2 MR. MCGUIRE: Right.

3 MR. MOONEY: Mr. Mayor, I'd just like to  
4 say, Mr. Foote, the reason why I'm diving so much  
5 into this is I have four kids under 8 years old, and  
6 unfortunately my kids and the town can't retire to  
7 Florida. Like, we would like to be here forever,  
8 you know. And I -- it means a lot to me, right, you  
9 know the whole impact.

10 Like, I agree with Mr. Semple. You  
11 know, I can't -- my company can't just build a house  
12 in the middle of the woods. Unfortunately there's  
13 an impact to the environment of building a driveway.  
14 And if I, you know, do so many acres, I have to do a  
15 pollution prevention plan and all these types of  
16 things.

17 So I think as a good partner and good  
18 neighbor you would want to make sure that a Town  
19 Council who maybe doesn't know all the impacts would  
20 have a holistic approach of all the impacts that  
21 might contain. And there's no way you can have a  
22 data center without a substation. And where that

1 substation goes, and how it impacts, and how it cuts  
2 up boards, I think, is a huge -- is a huge concern,  
3 or it should be to council members and to the  
4 constituents.

5 MR. FOOTE: I didn't disagree, actually.

6 MR. MOONEY: Right.

7 MR. FOOTE: As I said, it's something that a  
8 council member can seriously consider. This is a  
9 decision driven by others than us.

10 And the decision where that substation  
11 goes is one made by an entity that's governed by the  
12 State Corporation Commission and not by us; and what  
13 flows from that is something that will impact us, as  
14 well as it will impact the town; and so we would  
15 submit to you that that's a consideration you must  
16 take -- that you're perfect -- I can't tell you what  
17 not to consider.

18 What I can suggest to you is that it  
19 will be relatively temporary. It will go away. The  
20 roads will be reconstructed. They will be back in  
21 position, as every time someone puts a new telephone  
22 line in that's underground. And so I would submit

1 to you that that is something that you can consider.  
2 And I'm not saying you can't. I'm just saying it  
3 has to be given due weight.

4 MR. SEMPLE: I appreciate your point. In  
5 those cases, we had a big project down there with  
6 Columbia Gas. We placed all their old service  
7 lines. And right down Falmouth Street. And it tied  
8 it up for almost a year, if not more. But those are  
9 benefitting residents. This is just a case where  
10 this doesn't benefit them at all.

11 And I feel that any inconvenience --  
12 and I'd have to say about access management, access  
13 to driveways, it's going through three black  
14 historic neighborhoods. It is affecting properties  
15 that are in the national register. These are all  
16 concerns that we have regarding this.

17 Now, there may be changes. It may go  
18 somewhere else. I realize all that. But it's an  
19 impact -- it would be my personal preference that  
20 this is resolved as part of this analysis. But if  
21 it can't be, it's still an impact we have to  
22 consider.

1                   And I just can't believe that Amazon --  
2 I mean, I understand Amazon, by moving the  
3 substation off, provided one -- resolved one issue  
4 from that point of view, but it didn't really solve  
5 the overall impact at all and -- in my mind.

6                   And I'm personally defensive about it  
7 because it runs right past my house.

8                   MAYOR NEVILL: Just as a reminder that some  
9 of these comments should be directed to within  
10 council, that these are -- to your point, Mr.  
11 Semple, this should be addressed to council, that  
12 this is not a sort of -- not an appropriate line of  
13 questioning or line to ask the applicant. This is  
14 to be discussed among ourselves in terms of how we  
15 choose to vote on this.

16                  MR. SEMPLE: Okay. Thank you. I agree with  
17 you.

18                  MAYOR NEVILL: Yeah.

19                  MR. MOONEY: Mr. Mayor, another question.

20                         Was is there not a potential fiscal  
21 economic impact proposed for this project?

22                  MR. REINKE: Yeah.

1                   As a matter of fact, Becky Ford, come  
2 on up.

3                   MR. MOONEY: Like, a document?

4                   MS. FORD: No, we didn't prepare a formal  
5 document.

6                   MR. MOONEY: Okay. So on the economic  
7 impact, what -- you said last month that your  
8 estimation was the 900,000 to the town?

9                   MS. FORD: That was an estimation, yes. And  
10 that was put together in coordination with the  
11 county tax commissioner.

12                   MR. MOONEY: Correct. Okay. Is there a  
13 reason why there wasn't a document prepared?

14                   MS. FORD: No, there wasn't.

15                   MR. MOONEY: Okay.

16                   So, Mr. Mayor, I have a question then.  
17 Wouldn't it be -- wouldn't it behoove us to see  
18 something like that, then?

19                   MS. FORD: It certainly is within your  
20 prerogative to request something like that.

21                   Again, we reviewed last month the  
22 information relative to AWS investment and job

1 creation, and that was combined with the county  
2 practices for assessing and collecting tax revenue.

3 Happy to talk about any of those  
4 figures in detail as we did last month and over the  
5 course of the project. Is there anything specific  
6 in that written format that we may have not covered  
7 that would be helpful to understand?

8 MR. MCGUIRE: No. I just -- I'm maybe old  
9 school. If I see it in writing, then I believe it.  
10 That's -- you know what I'm saying?

11 MS. FORD: Yeah, I think --

12 MR. HEROUX: Yeah, I mean that's always --

13 MS. FORD: -- the PowerPoint we provided last  
14 time and the time prior is actually available  
15 online. And it was contained in the slides.

16 MR. REINKE: (Indiscernible) so the tax  
17 income usually comes either from one or two sources:  
18 The property tax or the personal property tax.

19 And usually you'll see some sort of  
20 breakdown between, hey, the property is going to be  
21 worth this much, the personal property this much.  
22 And then based on how the county is going to tax

1 that, you'll see some figures come off that.

2 MR. HEROUX: Right. I think it goes to  
3 council member Mooney's questioning. Like, I'd like  
4 to see it in black and white. You know what I mean?  
5 I mean, I think a lot of people would.

6 MS. FORD: It was contained in the  
7 presentation.

8 MR. HEROUX: Just because, you know, people  
9 have questioned the veracity.

10 MS. FORD: Sure.

11 MR. HEROUX: I'm not questioning your  
12 veracity. I just want to see it.

13 MS. FORD: It's a fair question.

14 MR. HEROUX: I think so (indiscernible).

15 MS. FORD: I'm a visual learner, myself.

16 MR. HEROUX: Thank you. Yes.

17 MS. FORD: So I just want to reiterate the  
18 information was provided in the presentation which  
19 is posted online, as well as in the application  
20 itself. So those economic questions were addressed  
21 and supplemented in the application process, and  
22 they are available in print online.

1 MR. SEMPLE: May I ask a question about the  
2 tax implications?

3 MS. FORD: Sure.

4 MR. SEMPLE: I know it's not proper to  
5 actually know exactly what it is. I'm not asking  
6 that question. But I think at the last meeting, you  
7 said it would be about 900,000 in personal property  
8 tax.

9 MS. FORD: I believe that's what the county  
10 estimated.

11 MR. SEMPLE: Yeah, that's what you said.

12 And that's depreciable over time?

13 MS. FORD: Yeah, so that was an average over  
14 five years.

15 MR. SEMPLE: Okay. And we won't see that  
16 for seven -- until the full build out. So we won't  
17 be seeing that full realization of that build out  
18 until the whole thing is finished; is that right?

19 MS. FORD: Well, as Jay indicated it's  
20 approximately 12 months for construction, and then  
21 the building will roll on to the tax rolls, and the  
22 county will realize revenue.

1                   That equipment will depreciate over the  
2 course of approximately five years, and then be  
3 refreshed. And so that tax revenue will peak again.  
4 So, that's why we have an average.

5                   MR. SEMPLE: So that's your average  
6 expectation per year over the -- upon full build  
7 out. So we won't be seeing that revenue for seven  
8 years?

9                   MS. FORD: That's not true.

10                  MR. REINKE: Well, personal property.

11                  MR. SEMPLE: Personal property.

12                  MR. REINKE: Personal property is taxed  
13 when?

14                  MR. SEMPLE: We're talking about the  
15 equipment. You won't have the equipment in place  
16 for seven years.

17                  MS. FORD: That's not true.

18                  MR. SEMPLE: So how do we tax it?

19                  MS. FORD: That's not true. So we'll build  
20 the facility, and the construction will take  
21 approximately 12 months, and then we'll install the  
22 equipment which is talked as personal property.

1 MR. SEMPLE: But my understanding is this is  
2 going to be built in eight phases over seven years.  
3 So you won't have all the equipment installed.

4 MS. FORD: So the estimate that we provided  
5 to you is for the initial investment.

6 MAYOR NEVILL: A question, if I can clarify.  
7 I think what Mr. Semple is asking is: As it goes  
8 into phased building, we have several phases as  
9 planned, certificate of occupancy granted upon the  
10 completion of each phase.

11 Are you front-loading all of the  
12 equipment up front and then slowly phasing up, or as  
13 -- or are you going to have empty bays and will be  
14 bringing in the equipment as those bays then get  
15 ready to ramp up for that next phase?

16 MS. FORD: So there will be additional  
17 revenue as those bays fill up.

18 MAYOR NEVILL: Okay.

19 MS. FORD: Correct.

20 MAYOR NEVILL: So it will gradually increase  
21 over time, and that build out, we'll be hitting what  
22 we're looking at, the 900, on average. But that is

1 also at that point going to be in excess of it  
2 because you're factoring in the phasing of it; is  
3 that correct? Sort of --

4 MS. FORD: Correct.

5 MAYOR NEVILL: Got it.

6 MR. MOONEY: That's the type of thing,  
7 Mr. Mayor, that I would like to see on an economic  
8 impact study, because it doesn't -- it doesn't  
9 actually -- what just transpired was we talked about  
10 at a full build out, after a year we would get  
11 900,000. And then if you break it up into sections  
12 and you insert this and you insert this one over a  
13 seven-year period, looking at depreciation  
14 schedules, now the first section is now depreciated  
15 because it's been seven years.

16 And so are we ever going to see the  
17 full, you know, tax revenue that we would see if  
18 there's a build out schedule? And then, like,  
19 what's the depreciation schedule of the seven  
20 phases? Is the first phase -- you know, so I'm  
21 going to go back to my constituents, and say: They  
22 said 900,000. And then it's like 300, 400, 500, and

1 then depreciation drops back in, so we never get to  
2 that. That's something that I need to be able to  
3 show, and should -- all of us should be taking into  
4 consideration what the actual impact of doing  
5 something like this to the town would cause  
6 financial.

7 MR. HAMBY: I think before we've -- and  
8 we've been going for this a couple of hours.

9 Mr. Maybach provided an estimate of how things are  
10 going to be taxed, but I think going forward, like,  
11 when you're asking the applicant something, I think  
12 that we should turn around a little bit and say,  
13 hey, Mr. Manager, if you request something, get it  
14 from the manager.

15 The applicant, if they so move forward,  
16 they're going to pay whatever this body establishes  
17 that tax rate to be, in both the county and the  
18 town.

19 So the prior estimate for -- if this  
20 moves forward and they start up into zones, pods, or  
21 anything else, that's just an estimate that  
22 Mr. Maybach made at the time.

1                   So I -- like, I get it, and I  
2 understand your questions to the applicant, but the  
3 applicant really doesn't have any control over what  
4 we tax upon them.

5                   MAYOR NEVILL: And, also, just a point of  
6 clarification. Mr. Crim, in terms of these  
7 questions, tax revenue in determining an SUP? Just  
8 clarification for council.

9                   MR. CRIM: So you have elements in your  
10 ordinance that talk about the job creation. And  
11 that kind of points towards overall revenue towards  
12 the town, as well, as other considerations.

13                   The tax revenue that you will get from  
14 this will be dependent on the tax rate that you set  
15 and on the assessments that you don't have any  
16 control over.

17                   And I just want to reiterate that the  
18 tax assessment information is confidential, made  
19 confidential by state law, and so we have to be very  
20 careful in handling that information. That's what I  
21 would say about that.

22                   MR. SEMPLE: May I follow up with a question

1 of Mr. Crim?

2                   Ordinance 17 says whether the proposed  
3 special use permit use will provide desired  
4 employment and enlarge the tax base by encouraging  
5 economic development activities consistent with the  
6 comprehensive plan.

7                   So don't we need to at least address  
8 consistency with the comprehensive plan for our  
9 determining whether the proposed special use permit  
10 has enlarged the tax base?

11                  MR. CRIM: Consistency with the  
12 comprehensive plan is always a consideration.

13                  MR. SEMPLE: And that's consistent with the  
14 comprehensive plan.

15                  MR. MOONEY: So, Mr. Mayor, these draft  
16 conditions of approval, these have all been verified  
17 by the applicant and --

18                  MR. REINKE: Yes.

19                  MR. MOONEY: So you guys have verified that  
20 you're good with all of these?

21                  MR. REINKE: Yes.

22                  MR. MOONEY: Have we verified that we're

1 good with all of these?

2           MAYOR NEVILL: That's up to us. And I  
3 believe staff has cleared; and based upon council's  
4 direction. So the work done was just fine tuning  
5 based upon questions that were remaining from the  
6 last work session and the last Town Council meeting.

7           And, again, it was clarification  
8 language. And so my understanding is that the  
9 applicant has agreed to, and staff has. But staff  
10 has only taken what direction council has given.

11           MR. MCGUIRE: Mr. Mayor, I have a question  
12 about one of the contingencies on this. And I'm no  
13 fire fighter, by any stretch of the imagination, but  
14 I ran into a few fires.

15           But it says the condition does not  
16 include or prevent the property owner from utilizing  
17 the town's water for fire suppression. Does that  
18 mean that we're going to build a water line up  
19 there? Or what are the impacts for that? And,  
20 also, like, my laymen's knowledge, you know, in  
21 terms of, like, computer fires, don't you need a  
22 special fire truck to put those things out? I mean,

1 it's more foam than anything else, right?

2 MR. REINKE: Yeah, Brent, you can come on up  
3 and --

4 MR. HECKER: As far as fires for computers,  
5 no. That's put out with water. It's a dry pipe --

6 MR. MCGUIRE: Okay.

7 MR. HECKER: -- system, so there's no water  
8 stored. But if we activate, then --

9 MR. MCGUIRE: Okay.

10 One more question for the town. Are we  
11 going to build -- are we going to provide a water  
12 main up there or something like that? Or what are  
13 the impacts to the town water?

14 MR. HAMBY: I mean, I think I can help. All  
15 the condition is you're providing them domestic  
16 water for a fire sprinkler suppression system in  
17 their building.

18 MR. MCGUIRE: Okay.

19 MR. HAMBY: It's just for suppression  
20 purposes.

21 MR. MCGUIRE: Okay.

22 MR. HAMBY: They're going to -- a water main

1 is going to go there anyway for --

2 MR. MCGUIRE: Right.

3 MR. HAMBY: -- their bathrooms.

4 MR. MCGUIRE: Okay. Sure. Okay.

5 MR. HAMBY: Same thing.

6 MR. SEMPLE: I have (inaudible). This has  
7 to do with your statement that -- on your comments  
8 regarding the comprehensive plan that Amazon is a  
9 major employer.

10 Is 52 employees a major employer?

11 MR. FOOTE: At these salary levels, the  
12 answer is yes.

13 MR. SEMPLE: It is? I mean, that would mean  
14 that every store, every -- I mean, that means that's  
15 all we have in town is major employer. I mean,  
16 you're saying 52 employees is --

17 MR. FOOTE: Well, the question -- you don't  
18 define "major employer" anywhere in your  
19 comprehensive plan or anywhere else.

20 What I would suggest to you is that  
21 when you bring in a highly-skilled, highly-talented,  
22 highly-educated, and highly-paid workforce to work

1 on something like a data center, that's a major  
2 employer. And so I would submit to you that that  
3 would in fact qualify, and it certainly can be  
4 determined to qualify.

5 MR. SEMPLE: Well, Mr. Foote, I could bring  
6 in one skilled person under your definition and that  
7 would be a major employer.

8 MR. FOOTE: But we're not bringing in one,  
9 Your Honor.

10 MR. SEMPLE: Well, no, you're bringing in  
11 50. All I'm saying is that a major employer -- a  
12 major employer -- I think our major employer here is  
13 the hospital. And so I'm talking about number of  
14 employees within our town limits.

15 I know that -- I know that Amazon has  
16 1.6 million part-time and full-time employees. That  
17 makes it a major employer. But I'm talking about  
18 here.

19 MR. FOOTE: That's a question of  
20 interpretation and judgment.

21 MR. SEMPLE: Okay.

22 MR. MCGUIRE: Mr. Mayor, another question.

1                   So on 17-C it talks about the Town of  
2 Warrenton and the zoning ordinance related to noise  
3 and the 48 hours to mitigate.

4                   Can you, Amazon, walk me through how  
5 you envision that working out? Just so I'm clear as  
6 to how -- and then I'd like to hear from the town  
7 how we envision, as well.

8                   MR. REINKE: You know, ironically, we're not  
9 sure what would ever be a noise issue. So let's  
10 assume that it would be a piece of equipment. Every  
11 piece of -- every pod room has data redundant  
12 systems. So if there's a piece of equipment that  
13 for some reason went faulty, the very first thing we  
14 would do is immediately switch over to the redundant  
15 system.

16                  MR. MCGUIRE: So more or less the question  
17 -- I understand that. What about if a resident  
18 calls up and says, hey, I can hear the data center;  
19 how do we mitigate that? That's what I really want  
20 to know, you know, because if we're not doing  
21 continuous monitoring, then it's going to be he  
22 said/she said. Are you going to take what the town

1 says on that? Or, you know. And the other thing  
2 that concerns me is some noise is within the  
3 ordinance but can be offensive. So how -- what's  
4 our plan for the town to mitigate all this? I think  
5 it's important?

6 MR. HAMBY: Can I jump in here just one  
7 second.

8 Acting Chief carter, can you walk over  
9 here to the microphone for a second?

10 MR. CARTER: Yes, sir.

11 MR. HAMBY: Can you tell everyone how the  
12 town deals with noise complaints, because I assume  
13 that we have noise complaints from time to time.

14 MR. CARTER: Yes, sir. You mean noise  
15 complaints under our current policy.

16 MR. HAMBY: Noise complaint to noise  
17 complaint.

18 MR. CARTER: Policy and ordinance.

19 MR. HAMBY: Whatever you do as the police  
20 department.

21 MR. CARTER: So the way that we handle noise  
22 complaints currently is when we get a complaint of a

1 noise, we get as much as information as we can from  
2 the complainant about what the noise is,  
3 particularly details, where is it coming from, so on  
4 and so forth.

5           Currently, we send an officer out to  
6 see if they can hear that same type of noise. And  
7 part of the details that we get from the Complainant  
8 is, well, where are you? Where do you hear the  
9 noise from? And in what manner is the noise  
10 offensive to you?

11           We send an officer out to see if they  
12 can hear that same noise. We follow the town's  
13 ordinance. We follow our policies and procedures.

14           We usually make contact with the -- I  
15 want to say the source of the noise, but usually in  
16 most cases -- probably not in this instance, but in  
17 most cases we're talking about something at a  
18 residence, maybe a business. There's usually  
19 someone we can talk to; and we notify them of what  
20 the noise is, and we try to take steps to mitigate  
21 that noise.

22           In most case if it's someone who is

1 playing in a band or something like that, we ask  
2 them to turn it down.

3 We then make contact with the  
4 complainant, explain to them what we have done to  
5 try to mitigate that problem; and that's usually the  
6 end of it.

7 If it's not and we have to return, then  
8 we return and we take whatever necessary steps are  
9 appropriate after that.

10 MR. MCGUIRE: So Acting Chief Carter, do we,  
11 like, download -- do the officers download on their  
12 phone, like, you know, there's the EPA app you can  
13 tell decibel level and everything else?

14 MR. CARTER: No. Currently, we do not do  
15 that.

16 MR. MCGUIRE: Okay.

17 MR. CARTER: That is not part of the town's  
18 ordinance.

19 MR. MCGUIRE: Okay.

20 MR. CARTER: Or our procedures to do that.

21 MR. MCGUIRE: So then, you're kind of  
22 relying on an officer's sort of opinion or his or

1 her hearing level as to what's, you know,  
2 appropriate?

3 MR. CARTER: We are relying on the town code  
4 which has a noise ordinance that explains what is  
5 problematic noise, I guess, I would say.

6 MR. MCGUIRE: Right. But what I'm saying is  
7 it's not --

8 MR. CARTER: And then the officer to put  
9 themselves in the same --

10 MR. MCGUIRE: Right.

11 MR. CARTER: -- situation as the complainant.

12 MR. MCGUIRE: Right.

13 MR. CARTER: So that they can then try to  
14 monitor that noise.

15 MR. MCGUIRE: Right. But --

16 MR. CARTER: Now, we do have -- you know, if  
17 there's some, I don't want to say disagreement, but  
18 if there's some question about it, we can always  
19 have another officer come over --

20 MR. MCGUIRE: Right.

21 MR. CARTER: -- so you have another  
22 independent person to --

1 MR. MCGUIRE: No, I understand.

2 MR. CARTER: -- verify.

3 MR. MCGUIRE: But I think it might be better  
4 that we download an app because we are getting very  
5 technical here, and I think, you know, everybody's  
6 hearing is different. I have hearing loss.

7 MR. CARTER: Sure.

8 MR. MCGUIRE: And my opinion might be it  
9 might not be offensive. I think with something like  
10 this it needs to be very technical because --

11 MR. CARTER: Well, I would say, sir, what  
12 you're talking about, downloading an app on an  
13 officer's phone to evaluate noise, I think if you're  
14 going to get technical, you need to do it in the  
15 proper way; and I don't think that would be the  
16 proper way to do such.

17 MR. MCGUIRE: Okay.

18 MR. CARTER: Because you're doing more of a  
19 laymen's way of --

20 MR. MCGUIRE: So what do you think would be  
21 appropriate, then? I'd welcome your opinion.

22 MR. CARTER: There are many models out there

1 of how can do it. I think that would be up to the  
2 council how they want to do it. But there's many  
3 things to take into account. But you can purchase  
4 sound level meters. You can have policy and  
5 procedure in place of how that is to be handled as  
6 far as evaluating the noise. That's one way to go.  
7 But there's many others. You know, I couldn't go  
8 over all of them standing here talking now.

9 MR. MCGUIRE: And I agree. In terms of law  
10 enforcement, you know, there's more important  
11 priorities that sound level. But I think we need to  
12 address that as a council because there's going to  
13 be complaints.

14 MR. HAMBY: And that was the point. You're  
15 asking a question about what they do now.

16 MR. MCGUIRE: Right. But I'm saying --

17 MR. HAMBY: Here's a -- I get it. Hold on.

18 MR. MCGUIRE: -- we need to, like, do  
19 mitigation --

20 MR. HAMBY: Hold on. Hold on.

21 MR. MCGUIRE: -- in how we deal with it.

22 MR. HAMBY: You're asking about the policy,

1 right? We will all from this body have to set the  
2 policy, and then the acting chief will have to  
3 develop the procedure for what they would like to  
4 do.

5 But right now I'm sure that we could go  
6 back in time and figure out how many noise  
7 complaints we had last fiscal year, right. I'm sure  
8 we can develop that type of data somewhere; and at  
9 least be a starting point, right. Because noise  
10 complaints are not new. I'm sure they're probably  
11 every weekend.

12 MR. SEMPLE: But this gets to my principal  
13 point. The point is the criteria by which we  
14 determine whether you're in compliance or not should  
15 be the same criteria as we had when we actually run  
16 the noise study annually; and that requires our  
17 getting a qualified ANSI-qualified engineer out  
18 there, which would be the staff's responsibility,  
19 and to go out there with the right equipment.

20 Otherwise, it's -- you know, it's -- I  
21 wouldn't expect one of your officers to be an  
22 audiologist. I mean -- or someone who works for

1 Polysonics.

2 MR. MARTINO: Mr. Mayor.

3 MR. SEMPLE: I mean --

4 MR. MARTINO: If I may, if it's council's  
5 desire you can direct --

6 MR. MCGUIRE: I'm sorry. Councilman Semple  
7 was speaking. I mean, I don't understand. There's  
8 been interruption and everything else. I think he  
9 should speak.

10 MR. SEMPLE: No, no, I'm fine. I'm just  
11 pointing out -- and I don't mind Mr. Martino  
12 chopping in. Go ahead.

13 MR. MARTINO: My point, and I apologize for  
14 interrupting. That's a valid point there. My  
15 apologies. But I'm hearing a conversation about a  
16 desire to have more resources available to  
17 determine/measure sound, and those tools do exist;  
18 and if it's the council's desire, you can direct the  
19 town manager and staff to come back with some of the  
20 alternatives that may be possible, and we can  
21 develop policy around that issue so that if it's the  
22 chief or if it's building code inspectors, whomever

1 it may be, they're in a better position to report  
2 back and have the issue addressed more objectively.

3           And that's all my point. Thank you.

4           MR. SEMPLE: Thank you.

5           MAYOR NEVILL: Thank you, Chief.

6           MR. SEMPLE: I apologize. My computer is  
7 doing --

8           MR. MAYOR: Any further questions for the  
9 applicant?

10                   (No responses.)

11           MAYOR NEVILL: All right.

12           MR. REINKE: Thank you.

13           MAYOR NEVILL: Thank you, sir.

14           MR. HEROUX: Mr. Mayor, just in conversation  
15 with Mr. Crim, just for the record, because I know  
16 there was a conflict of interest declaration deck  
17 that I had to make. And by the Virginia Code, I'm  
18 required to disclose before this kind of hearing  
19 that I have in fact filed a conflict of interest act  
20 declaration, and that I have no conflict of  
21 interest. And that documentation is available with  
22 Mr. Cloud (ph).

1           MAYOR NEVILL: Thank you, sir.

2                   As we have a long evening ahead of us,  
3 I'm going to remove items D, E, and F. I think we  
4 can do Second Street very quickly and move through  
5 the other options. But D, E, and F, we will move  
6 that to our budget retreat on the 25th.

7                   And then if we could just have a quick  
8 presentation from Mr. Cassidy, I believe -- or Tommy  
9 to present Second Street. I'm sorry.

10           UNIDENTIFIED SPEAKER: This will work from  
11 over there, Steve? Okay.

12                   Good afternoon, Mr. Mayor, members of  
13 council. (Inaudible) change that occurred  
14 (inaudible) that's fine.

15                   As has been previously discussed, Roll  
16 Out Warrenton was a town-wide economic development  
17 initiative to assist all businesses with the impacts  
18 of Covid 19. That initiative created an environment  
19 that encouraged and promoted economic viability,  
20 allowed businesses to be creative, and promoted  
21 government as a collaborative partner to support the  
22 business community.

1 I think we all understand what the  
2 goals of Roll Out Warrenton were. I think that we  
3 established some truly incredible goals as it  
4 relates to enhancing a sense of community and  
5 proving alternatives for business owners within the  
6 town to continue with their economic viability.

7 I'm not going to go through the  
8 entirety of the background because this has been  
9 spoken about in previous work sessions, but I will  
10 note that as part of the December 13th meeting, we  
11 did provide an update regarding Second Street  
12 closing, and we were directed to actually reopen  
13 Second Street.

14 On December 22nd, we meet with EOTW to  
15 discuss further the opportunity to -- opportunities  
16 that may arise from either permanent closure or  
17 permanent opening of Second Street.

18 When we met in January, we presented to  
19 council staff's recommendation that Second Street  
20 should remain closed based off of information we  
21 received from EOTW. And at that point leading into  
22 the January meeting, EOTW was of the opinion that

1 they were okay with the street remaining -- excuse  
2 me -- open.

3                   On January 23rd, I met -- as a  
4 follow-up to that council meeting, I met with  
5 members of EOTW to discuss opening or closing of  
6 Second Street. At that time EOTW did shift in their  
7 perspective, and they did ask that we actually close  
8 Second Street permanently. There are three  
9 businesses there: Molly's, Altered Suds, and, I'm  
10 sorry, we have a new --

11                   UNIDENTIFIED SPEAKER: Cast Iron.

12                   UNIDENTIFIED SPEAKER: Thank you. Cast  
13 Iron. That are located on Second Street, and they  
14 want to collaborate during Roll Out Warrenton to see  
15 what type of offerings they could provide to the  
16 community.

17                   As a response to that, we are now  
18 recommending based upon EOTW and additional  
19 information that we received during this January  
20 meeting that we go with the permanent closure of  
21 Second Street.

22                   Any business that chooses to construct

1 or set up a parklet on Second Street will still be  
2 required to meet ADA standards, safety requirements  
3 associated with it. As we've talked at length  
4 before, Second Street, it's a pretty large hill, so  
5 it will take some creative engineering to come up  
6 with structures that will meet safety and ADA  
7 compliance.

8 But looking at it from the perspective  
9 of EOTW, and we agree with them as they are  
10 basically our Main Street sounding board, if you  
11 will, we are recommended that we go with a permanent  
12 closure of Second Street.

13 The fiscal impact of that will be  
14 approximately \$5,500. That will fall upon the  
15 Public Works Department to go in and install  
16 permanent bollards to basically close down Second  
17 Street permanently. So.

18 MR. HAMBY: Are you ready?

19 UNIDENTIFIED SPEAKER: Yes, sir.

20 MR. HAMBY: Okay. I'm sure you guys

21 probably broached it or didn't broach it, but who  
22 did you want to pay for it?

1 UNIDENTIFIED SPEAKER: That would be -- it's  
2 a town street.

3 MR. HAMBY: I knew it. All right. I  
4 certainly don't have a problem with Second Street.  
5 I've spoken to a lot of people in the EOTW, and I've  
6 heard their concerns.

7 Is your intention to try and act  
8 tonight at this meeting, or...

9 UNIDENTIFIED SPEAKER: We do have a draft  
10 resolution ready for you-all. EOTW has asked for  
11 somewhat quick action on this so they can go with  
12 their planning.

13 MR. HAMBY: Okay.

14 UNIDENTIFIED SPEAKER: If you-all would  
15 prefer to have a month to think about it and  
16 continue to review, then we can certainly bring that  
17 forward again in March.

18 MR. HAMBY: Let me see if I can get a hold  
19 of some people between some breaks --

20 UNIDENTIFIED SPEAKER: Okay.

21 MR. HAMBY: -- to see if we can do something  
22 to help. The only thing I do ask is that the

1 permanent bollards -- I'd like to do the bollards  
2 like we do at the greenway in case there's a fire,  
3 in case there's something else.

4 UNIDENTIFIED SPEAKER: Right.

5 MR. HAMBY: Once they're in there, you can't  
6 use that street ever again. So I'd like to have  
7 semipermanent but you can remove in case --

8 UNIDENTIFIED SPEAKER: Absolutely.

9 MR. HAMBY: -- of emergency. That's all I  
10 have for that.

11 MR. HEROUX: That's my concern, as well, how  
12 permanent are the bollards and --

13 UNIDENTIFIED SPEAKER: Absolutely. And I  
14 have not spoken with Mr. Cassidy, our Public Works  
15 director, but in my mind I'm thinking probably  
16 something similar as to what's placed out here --

17 MR. HEROUX: Okay.

18 UNIDENTIFIED SPEAKER: -- on Main Street when  
19 we do -- you know, when we close down Main Street  
20 for special events.

21 MR. HEROUX: Right. Yes. Right.

22 UNIDENTIFIED SPEAKER: Exactly.

1 MR. HEROUX: Okay. Great. Thank you.

2 UNIDENTIFIED SPEAKER: Any further  
3 questions?

4 MR. MOONEY: Yes, I have questions.

5 UNIDENTIFIED SPEAKER: Yes.

6 MR. MOONEY: My questions resolve around  
7 money. And I'm assuming that they will be renting  
8 per square foot just like the other from the Town of  
9 Warrenton?

10 UNIDENTIFIED SPEAKER: Correct.

11 MR. MOONEY: And have we --

12 UNIDENTIFIED SPEAKER: They would fall into  
13 the previously discussed parklet guide, and would be  
14 following those guidelines set forth in that.

15 MR. MOONEY: Okay. And is it only -- is it  
16 only -- the opportunity only given to those  
17 restaurants and stores that are right there, or have  
18 we opened it up to other restaurants not just on  
19 Main Street but all over town to have a space there.

20 UNIDENTIFIED SPEAKER: So I believe that was  
21 addressed last month. There is the opportunity for  
22 a restaurant if they don't -- for example, say there

1 are two spaces in front of my restaurant but one is  
2 only right in front of me. I can talk to my  
3 neighbor and see the they mind if I actually rent  
4 their space, as well.

5 Does that -- if I'm understanding your  
6 question. Is that what you're asking me?

7 MR. MOONEY: Yes. More or less for other  
8 restaurants around town that don't have an  
9 opportunity to be on Main Street.

10 UNIDENTIFIED SPEAKER: Sure. Absolutely.  
11 You know, if Molly's, for example, wanted to reach  
12 out to one of their neighbors because they didn't  
13 have something, you know, directly in front of them,  
14 and say, hey, do you mind if we rent this place out,  
15 as well, then they collaborate with one another and  
16 make those decisions.

17 MR. MOONEY: Okay. Thank you.

18 UNIDENTIFIED SPEAKER: Yes, sir.

19 MAYOR NEVILL: So we'll have that -- we will  
20 have that resolution. Mr. Hamby has requested time  
21 to reach out to verify with some people.

22 Will that be under new business, then,

1 this evening?

2 MR. MARTINO: You could put it under  
3 unfinished business.

4 MAYOR NEVILL: Unfinished business. Okay.

5 MR. MARTINO: Either way, yeah.

6 MAYOR NEVILL: All right. Let's put it  
7 under unfinished business and take care of it that  
8 way.

9 MR. MARTINO: Okay.

10 UNIDENTIFIED SPEAKER: All right. Perfect.  
11 Thank you.

12 MAYOR NEVILL: All right. Thank you.

13 Next up is the advertisement of a  
14 special meeting for the purposes of interviewing a  
15 town manager in the next 14 days. I think we're  
16 safely directing staff to go ahead and place that  
17 advertisement and proceed with that unless there's  
18 any questions or concerns from council to the  
19 contrary.

20 (No responses.)

21 MAYOR NEVILL: So directed.

22 And then the agenda review, I think, we

1 probably have everything we have discussed already  
2 is -- going to go over quickly if there's anything  
3 you wish to point out.

4 MR. MARTINO: I'll give you an item. That  
5 is the proclamation recognizing February as Black  
6 History Month. And if the council goes ahead with  
7 that proclamation, then the mayor will be in a  
8 position to hand that out at a future date and  
9 location.

10 And then, of course, you have the  
11 quarterly reports for your review. We'll add the  
12 settlement that we talked about. And that's it.

13 MAYOR NEVILL: Any questions for the town  
14 manager?

15 (No responses.)

16 MAYOR NEVILL: Okay. At 2:21 p.m. we are  
17 adjourned. And we will reconvene at Fauquier High  
18 School at 6:30 this evening.

19 (Whereupon, the Warrenton Town Council  
20 work session was adjourned at 2:21 p.m.)

1 P R O C E E D I N G S

2 MAYOR NEVILL: 6:33 p.m. on Tuesday,  
3 February 14th, I will call this Town Council meeting  
4 to order. All members are present. Ms.  
5 Councilwoman Sutphin is joining us virtually.

6 I would like to ask, Ms. Sutphin, are  
7 you on the line?

8 MS. SUTPHIN: Yes, I am.

9 MAYOR NEVILL: Would you please state the  
10 reason for your attendance remotely and state your  
11 location, please.

12 MS. SUTPHIN: I'm at my residence in  
13 Warrenton, Virginia. And I am remote because we --  
14 my husband and I both are sick.

15 MAYOR NEVILL: So stated and entered into  
16 the record. She is able to participate in this  
17 meeting.

18 At this point, then, we will turn to  
19 the invocation. We have Pastor Brown from First  
20 Baptist Church on Alexandria Pike in Warrenton to  
21 lead us in prayer.

22 Please stand.

1 PASTOR BROWN: Good evening. I will be  
2 praying in a manner that is comfortable and familiar  
3 to me. Please feel free to join in.

4 Eternal God, our Father, thank you for  
5 every seat that has been filled here tonight. For  
6 each mind and heart that fills the presence of this  
7 room, we thank you. Only you truly know what we are  
8 setting out to accomplish this evening.

9 We have an idea, a vision, hints, and  
10 daily instructions. We have talents, abilities, and  
11 time to work.

12 However, only you can see in perfect  
13 detail the end of every beginning, every project,  
14 every season, every life. Nothing is ever in vain,  
15 for even mistakes and missteps are used for good.

16 Your righteousness transcends all our  
17 efforts and understanding.

18 Forgive us of our pride. The pride  
19 that puffs us up and the pride that threatens to  
20 unqualify us. Strengthen our confidence in who you  
21 have made us to be. Set us free from comparison in  
22 order to work together efficiently.

1 Bless this meeting tonight, all those  
2 present, as well as the lives of those that we will  
3 encounter afterwards, ready us to make every moment  
4 count.

5 In Jesus's name, I pray. Amen.

6 (The Pledge of Allegiance was conducted.)

7 MAYOR NEVILL: At this point I would invite  
8 Ms. Karen White, please, up to the stage to receive  
9 a proclamation honoring Black History Month and the  
10 work of the Afro-American Historical Association of  
11 Fauquier County.

12 The proclamation recognizing  
13 February 2023 as Black History Month in the Town of  
14 Warrenton, Virginia, whereas Black History week was  
15 originally initiated in 1926 by Dr. Carter G.  
16 Woodson, a native of Buckingham County, Virginia.

17 And whereas since the bicentennial year  
18 of 1976, Americans of all walks of life come  
19 together during the month of February to honor the  
20 accomplishments of black Americans in every area,  
21 endeavor, throughout our history; and whereas  
22 African-Americans have contributed greatly to the

1 heritage, progress, and advancement in the United  
2 States of America, the Commonwealth of Virginia,  
3 Fauquier County, and the Town of Warrenton.

4           And whereas history, culture,  
5 African-Americans make up an important part of the  
6 history of culture in the United States, the  
7 Commonwealth of Virginia, the Town of Warrenton.

8           And whereas in the late 1980s Karen  
9 Hughes White -- Karen came aboard (inaudible) to  
10 find the common thread of connection; and whereas  
11 the Afro-American Historical Association of Fauquier  
12 County was established by Karen Hughes White when  
13 Karen came aboard in 1992 to further our community's  
14 appreciation and understanding of Fauquier County  
15 and Warrenton African American history, genealogy,  
16 and culture.

17           And whereas the Afro-American  
18 Historical Association is home to a (inaudible)  
19 museum located in The Plains, Virginia, with 1,634  
20 artifacts detailing the rich history of the Fauquier  
21 County black residents and those of historic black  
22 communities in Warrenton, such as Oliver City,

1 Madison Town, Hattie Street, and the historic  
2 landmarks of (inaudible).

3           And whereas the Afro-American  
4 Historical Association regularly (inaudible)  
5 programs, special events (inaudible) and individual  
6 lives (inaudible) of our community, past and current  
7 residents (inaudible) community celebrations,  
8 veterans, and whereas the Afro-American Historical  
9 Association library archives and its rich inventory  
10 of books, (inaudible), (inaudible), photographs,  
11 letters, and other memorabilia, are open to the  
12 public for research.

13           And whereas the Afro-American  
14 Historical Association (inaudible) and web page  
15 allowing all to explore our historic Afro-American  
16 communities, story maps that tell the history of the  
17 lives of (inaudible). And whereas the Afro-American  
18 Historical Associations is an invaluable resource of  
19 the Warrenton community.

20           I therefore proclaim, and the Town  
21 Council hereby proclaims, the month of February 2023  
22 as Black History Month for the Town of Warrenton.

1 (Inaudible) the Town Council recognizes  
2 the Afro-American Historical Association, their  
3 contributions to (inaudible) progress (inaudible)  
4 and Karen.

5 And I want to congratulate you  
6 (inaudible).

7 (Applause.)

8 MS. WHITE: (Inaudible) and to all of you,  
9 today would not be possible had there not have been  
10 footprints in the sand that we have to uncover and  
11 to document.

12 I pay homage to those before us and  
13 those that are often unnamed. So as we proceed on  
14 with our next phase of Know Their Names Too, we hope  
15 to present to you more names of the  
16 African-Americans from our past.

17 Thank you.

18 (Applause.)

19 MAYOR NEVILL: During citizens time on the  
20 public hearing issue of the SUP that came forth, all  
21 of those who spoke during citizens time during that  
22 time, your words and records have been entered into

1 the public comment and will be duly noted for future  
2 reference.

3           So if you did speak previously during  
4 citizen's time on the issue of the SUP, your input  
5 has been recorded into the public record.

6           So at this time it comes to citizen  
7 time, where citizens are invited to come to speak on  
8 issues of importance to the town. These are not  
9 issues regarding the public hearing this evening.

10           So, please, if you're here to speak  
11 about the public hearing, reserve your comments  
12 until that time.

13           Citizen's time is afforded -- each  
14 individual is afforded three minutes, and that  
15 three minute's time will be monitored. And we will  
16 ask at the three minutes that you yield the floor to  
17 the next speaker as there are many speakers to get  
18 through.

19           When you do come up, please identify  
20 either your address or your ward or magisterial  
21 district to identify your location.

22           And at this time we have people -- and

1 I believe Mr. Clouth will call speakers up and will  
2 call speakers on deck. So if your name is on deck,  
3 please do come to the front -- (loss of audio feed)  
4 -- speakers so that we can sufficiently move through  
5 this evening and everyone has the right to be heard  
6 accordingly.

7 So, Mr. Clough, I'll turn it over to  
8 you.

9 MR. CLOUGH: To reiterate, you can come to  
10 either lectern.

11 Mr. Mayor, our first speaker is Hope  
12 Porter, or Porter Hope. On deck: Feroline  
13 Higginson, Charles Cross, Christopher Bonner.

14 For those of you who cannot see, the  
15 buzzer and the time indicator is right in the middle  
16 of the stage right in front of the TV in front of  
17 us.

18 Please state your name, ma'am.

19 MS. PORTER: Good evening, gentlemen.

20 I have been a resident of Warrenton for  
21 a century -- almost a century. And I've -- this is  
22 the first time I've ever spoken to you-all. I think

1 the Board of Supervisors would say "some guys have  
2 all the luck."

3           But I really am so amazed at the  
4 public, the response to what is coming before you  
5 tonight. I just wish to God we would have had this  
6 response when we were fighting our battles 60 years  
7 ago. But I think it's wonderful. And I think the  
8 people here obviously have a very good cause.

9           And I think that it's -- one thing --  
10 only thing I really want to bring up is I don't  
11 understand when we have 200 acres in Remington that  
12 is zoned specifically for data centers, why is it  
13 necessary to have this thing right next to an old  
14 folks home and right next to Warrenton which is a  
15 famous town?

16           And I think there are so many things  
17 wrong with this application, starting with the town  
18 manager going to work for -- you know, there's just  
19 too many bad things about it. I hope you'll turn it  
20 down.

21           Thank you.

22           (Applause.)

1           MAYOR NEVILL: Thank you. This is a  
2 reminder, again, that this is an opportunity to  
3 speak on issues -- this is a reminder --

4           (Applause.)

5           MAYOR NEVILL: A reminder that this is time  
6 -- if you wish to speak on the SUP, to please  
7 reserve your comment for the public hearing time at  
8 that moment.

9           MR. CLOUGH: Feroline Higginson.

10          MS. HIGGINSON: Hello. My name is Feroline  
11 Higginson. I live in Rectortown, Virginia. I'm the  
12 daughter of the recent speaker, and it seems like I  
13 always follow in her footsteps. I wish I could  
14 follow them as well as she made them.

15                 We are speaking now because my mother  
16 couldn't wait until the end of this session for the  
17 other speeches.

18                 But I want to say that my family and I  
19 own a place within a mile of the data center. It is  
20 a historic place, and we have owned it for a hundred  
21 years. And we -- driving up and down Blackwell  
22 Road, as we do on a daily basis, looking at all of

1 those houses and the two schools that are nearby and  
2 thinking about how those people are going to listen  
3 to the noise is very upsetting.

4           And I also want to say that there was  
5 an article in the Washington Post about how all the  
6 rich people are trying to stop this data center. If  
7 you-all haven't noticed, it's not rich people. It's  
8 the people of Warrenton. It's everybody.

9           (Applause.)

10           MR. CLOUGH: Charles Cross. On deck:  
11 Christopher Bonner and Rose Wojcik, Dave Wynn, Edwin  
12 Ike Broaddus.

13           MR. CROSS: Mayor Nevill and Council, my  
14 name is Chuck Cross, and I reside at 606 Galena Way  
15 in Warrenton, very close to Old Town.

16           Our family moved to Warrenton in 2018  
17 for the same reasons that many have found their way  
18 to Warrenton.

19           Mr. Mayor, I've met you twice, but I  
20 don't think you'll recall the first time. My wife  
21 and I walked downtown one evening and stopped at the  
22 Wild Hare to try a cider. She sat at the counter

1 while I stood.

2                   After a moment, she turned to me and  
3 said, "I think I'm sitting next to the Mayor." We  
4 had friendly conversation with you for a bit. And  
5 on the walk home, we said to each other, okay.  
6 That's exactly why we moved to Warrenton.

7                   The second time I met you was in  
8 November outside the polling location where we had a  
9 very civil discourse on data centers. Although  
10 reticent to wade into local politics, I had agreed  
11 to hand out some flyers addressing positions counter  
12 to yours.

13                   That was only three months ago, and  
14 what I've learned about the governing process in  
15 this town since that day has left not only my head  
16 reeling but has drawn me, as it has others, into  
17 speaking out on matters that I thought was just the  
18 stuff of corrupt big cities.

19                   I'm reminding the council --

20                   (Applause.)

21                   MR. CROSS: I'm reminding the council that  
22 good governance is imperative for any public

1 undertaking. Governance helps you to always act in  
2 the best interests of your constituents and fulfill  
3 your responsibilities in an ethical manner.

4 Governance should never be considered  
5 an impediment to accomplishing something.

6 The foundation of governance lies in  
7 the law, the code, the policy, and the agreed  
8 process for implementing the law and the code. Wrap  
9 your code, your policies, and your process in a  
10 mantle of ethics, and you have good governance.

11 Good governance is your best friend  
12 and everything you do on behalf of yourself and the  
13 public. But somewhere along the line, this body and  
14 our town staff have ended up taking a different look  
15 at governance.

16 Look around this room. The anxiety,  
17 outrage, and animosity is palpable, but none of us  
18 want to be here doing this, and we're not here as a  
19 result of good governance.

20 Mr. Mayor, this lack of governance  
21 emerged in 2021 when the town manager led backroom  
22 dealings hidden behind non-disclosure agreements.

1 Trust in you and the council fell dramatically when  
2 that same town manager was paid back by the company  
3 she shepherded quietly past our protective processes  
4 and controls.

5 Trust continued to deteriorate as you  
6 appointed Mr. Heroux to this council without even  
7 investigating his apparent conflicts. His very  
8 recent statement that he has no conflict falls far  
9 short of the town's code of ethics.

10 And the loss of our trust reached its  
11 pinnacle on February --

12 (Applause.)

13 MR. CROSS: Please. I'll run out of time --  
14 when you tried to explain to 31 voters who asked you  
15 to stop violating the town code of ethics, and in  
16 that explanation you not only revealed a  
17 misunderstanding of state law and town code, you  
18 replied in a dismissive tone to the people who allow  
19 you to be in office.

20 A very smart person once said to me, if  
21 you're explaining, you're losing.

22 Mr. Mayor and Council, you have a lot

1 of explaining to do.

2 (Applause.)

3 MR. CROSS: Finally, the data center matter  
4 is revealing your disregard for governance. Don't  
5 think for a second that our concern with your  
6 governance failures goes away when Amazon wins. In  
7 fact, I think this is where it all begins.

8 Thank you.

9 (Applause.)

10 (Inaudible due to an interruption in audio  
11 feed.)

12 MR. CLOUGH: Edwin Ike Broaddus, Josephine  
13 Gilbert.

14 MR. BONNER: Mr. Mayor, Council, ladies and  
15 gentlemen, my name is Chris Bonner. I live in  
16 Warrenton.

17 And I'm not here to talk about the  
18 shocking failure of imagination that led to the  
19 likelihood of a faceless data center at the gateway  
20 to Warrenton, because that's not the worst thing  
21 that can happen.

22 The worse thing that can happen is the

1 next data center, and the one after that, and the  
2 one after that.

3 (Applause.)

4 MR. BONNER: Amazon is huge. It's used to  
5 getting what it wants. Warrenton is small. Please  
6 summon the political will to resist Amazon's easy  
7 money. In doing so, council will be voting to  
8 protect Warrenton's future as a strong and  
9 independent small town.

10 Shamefully, the Amazon deal was born in  
11 secrecy with the expectation that a compliant Town  
12 Council would give the project a green light. Let's  
13 change that narrative starting tonight.

14 (Applause.)

15 MR. CLOUGH: Ann Rose Wojcik, Dave Wynn,  
16 Edwin Ike Broaddus, Josephine Gilbert, Ann Ziegler.

17 MS. WOJCIK: Ann Rose Wojcik, 621 Meetze  
18 Road, Warrenton. Thank you for the opportunity to  
19 speak.

20 The following is a children's tale I  
21 hope we don't have to tell our children and  
22 grandchildren ten years from now. It's called "A

1 Walk on the Greenway."

2 Old Ms. Meetze was excited. It was a  
3 bright sunny day and her grandchildren had come for  
4 a visit. She said to them, "Children, let's take a  
5 walk. The weather is so nice.

6 "Do we have to Grandma," they cried?

7 "Yes," she told them. "It will be good  
8 exercise. Wear your ear plugs and you won't hear  
9 the buzzing."

10 They shouted, "but we'll still see  
11 those awful scary buildings. Why is it called the  
12 greenway anyway? We don't see anything green  
13 there."

14 Old Ms. Meetze responded, "that's a  
15 good question."

16 As they walked by the first big  
17 building just behind a tall fence, her  
18 granddaughter, Allison, asked, "why do they call  
19 them data centers anyway?"

20 Grandma replied, "they have shelves  
21 upon shelves of computers that store data for the  
22 government and big corporations."

1                   But "Grandma, why do they need to be  
2 here," Allison asked.

3                   "That's a good question," Grandma  
4 Meetze replied. She missed the pond, the fields,  
5 the farms, and the green space that used to be along  
6 the greenway. All the animals had disappeared, too.  
7 She sighed and thought to herself, if only the town  
8 leaders had not allowed data centers.

9                   When they came upon what the children  
10 thought looked like the biggest and scariest jungle  
11 gym in the world, her grandson, Shepard, shouted,  
12 "Grandma, what's that?"

13                   "It's called a substation, grandma  
14 responded.

15                   "What's it for?"

16                   "Well, each data center uses more  
17 electricity than everybody in the entire town. Two  
18 and a half times more.

19                   "Wow, that's a lot of electricity.

20                   "Yes, the four data centers by the  
21 greenway and the one across town need their own  
22 substation; and it's a very large one."

1                   It was getting late, so they decided to  
2 return home. As they walked home, a tear came to  
3 old Ms. Meetze's eye. Allison asked, "Grandma, why  
4 are you sad?"

5                   "Oh, I was just remembering the  
6 historic manor with its long driveway, stately  
7 pillars, and beautiful gardens that used to be right  
8 here. Your mom and dad had their wedding party  
9 there. Now, it's a data center."

10                  The end.

11                  I hope we don't have to tell this scary  
12 tale to our children and grandchildren. Please make  
13 it a happy ending. It's up to you, members of the  
14 Town Council. Don't allow a substation or data  
15 centers across the street from us or anywhere in  
16 Warrenton.

17                  Thank you.

18                  (Applause.)

19                  MAYOR NEVILL: Just to reiterate that  
20 citizen's time is not intended for comments on the  
21 public hearing this evening. If you are speaking  
22 about the public hearing, your comments this evening

1 will not be entered into the record as they were  
2 last time as there may have been some  
3 misunderstanding. We've took great pains to make  
4 sure that there was clarity on that.

5 So tonight if you are speaking on the  
6 data center during citizen's time, that will not go  
7 into the public record. Just to clarify that.

8 (Booing.)

9 MR. CLOUGH: Sir.

10 MR. WYNN: My name is David Wynn. I live in  
11 Warrenton. I'm the president of Waterloo Property  
12 Owners Association, so I'm speaking on behalf of an  
13 organization.

14 I graduated from George Mason  
15 University with a degree in land planning and real  
16 estate and urban development, where I learned about  
17 land planning, compatible uses, buffering,  
18 transitional land uses, et cetera. I have never  
19 seen a plan fail on every metric in my career.

20 I served on my town's planning  
21 commission in 1979 while I was still in college  
22 where I helped write their comprehensive plan.

1 I have spent 40 years in land planning  
2 and site analysis reviewing zoning ordinances, comp  
3 plans, and land use plans. Over that time I have  
4 never seen a worse land use plan.

5 Starting in 1970 while I was still in  
6 high school, I visited Warrenton every weekend on my  
7 way to the Shenandoah mountains. I decided then  
8 that I would one day live here in Warrenton.

9 In 1999, I purchased land in Warrenton  
10 and built a home where I could age in place. The  
11 Amazon data center at the Warrenton Training Center  
12 one mile away from my house through thick forests  
13 and over on the other side of the ridge destroyed my  
14 peace and sleep.

15 Several years ago I spoke at this  
16 auditorium on a proposed land use plan where I met  
17 Hope Porter. Hope Porter is a visionary, role  
18 model, and an inspiration. If you do not know Hope  
19 Porter's story, you need to learn about it.

20 Hope Porter was moved by what I said  
21 that night, and had kind words for me after the  
22 meeting. I was honored by her words. I'm inspired

1 by her. She has spent 70 years protecting Fauquier  
2 County and the Town of Warrenton.

3 Hope Porter's home, Hopefield, is on  
4 the Virginia Register of Historic Places, and is  
5 located less than one mile from said center.

6 Warrenton is like a Norman Rockwell  
7 painting. Warrenton is unique. I know this from my  
8 career traveling around Virginia and Maryland  
9 studying and reporting on land use plans.

10 If certain plans are approved by the  
11 Town Council, Warrenton's small town charm will be  
12 cast aside forevermore in the shadow of a six-story  
13 concrete monolith. If DCs -- if data centers are  
14 built on the four industrial zoned sites encircling  
15 Warrenton, including the one at the Warrenton  
16 Training Facility, there will be no escape from them  
17 and the visual blight.

18 The viewsheds will be destroyed. There  
19 will be visual blight and noise to the north, east,  
20 west, and south.

21 My own peace was destroyed when Amazon  
22 built a data center at the Warrenton Training Center

1 in 2015. Two more are under construction as we  
2 speak there today, and that noise will be tripled.  
3 I don't need studies to tell me about the noise.  
4 That's my lived experience.

5 We have been looking for a house for my  
6 in-laws to purchase in Warrenton. We found one a  
7 week ago on Blackwell Road. However, it's a quarter  
8 mile from said site. We will not be buying it.

9 Potential buyers will figure this out.  
10 It will reduce the market value of the properties,  
11 because whenever you reduce potential buyers, you  
12 reduce marketability.

13 The result will be assessment appeals.  
14 How do I know this? I have personally handled over  
15 one billion dollars in assessment appeals as an  
16 expert witness. These appeals will be very  
17 expensive. How do I know this? I do know this.  
18 Warrenton has a Walmart as an example. In 2012  
19 Walmart promised big revenues --

20 MAYOR NEVILL: Sir, your time has expired.  
21 Thank you.

22 MR. WYNN: I have one sentence to finish.

1           MAYOR NEVILL: Finish it.

2           MR. WYNN: Walmart promised revenues if you  
3 would allow to them to build in 2012. In 2014, they  
4 came back and appealed their assessments for 2014  
5 through 2019. You are not going to get the revenues  
6 you think you're going to get, and it's going to  
7 cost you.

8           MAYOR NEVILL: Thank you.

9           MR. CLOUGH: Edwin Ike Broaddus. On deck:  
10 Josephine Gilbert, Anne Ziegler.

11           MR. BROADDUS: Good evening, Mayor and Town  
12 Council. My name is Ike Broaddus. I'm a county  
13 resident who, like many here tonight, love this  
14 town.

15                   We live five minutes from Warrenton,  
16 closer than any other town. My kids attended school  
17 here. We have bought our groceries here and most of  
18 my Christmas presents in the Old Town for the last  
19 27 years.

20                   Two years ago we attached ourselves  
21 further to the town when we purchased 70 Main Street  
22 and became involved as an active participant in the

1 Main Street owner's group.

2           In a word, we love this town. And I'm  
3 not here tonight to speak about Amazon again,  
4 although, I know you're aware of my wishes to reject  
5 the data center application until we have a plan in  
6 place where the next one would be allowed and how  
7 we'd handle power to the next one and the next one  
8 and the one after that.

9           And I hope you-all had a chance to read  
10 my suggestions that I emailed earlier about the  
11 conditions and the areas that I think we can improve  
12 on those conditions before a vote is taken.

13           But instead I'm here to talk tonight  
14 about what I've observed in the last month or two as  
15 I've become a candidate for the Scott District  
16 supervisor race. I learned that the town and county  
17 governments at most levels aren't working together  
18 as well as they could.

19           Most residents of the town and county  
20 don't feel the line that divides our governments.  
21 Our kids play soccer together. We are coworkers and  
22 friends. We are members of the same community.

1 Businesses in town get most of their revenues from  
2 people across the county line. We have a symbiotic  
3 relationship, and we want our governments to reflect  
4 that.

5 It comes as a surprise to most folks  
6 when I tell them that the town actually can annex  
7 properties from the county, and then can rezone it  
8 for any use it wants without regard to the wishes of  
9 its neighbors across the county line.

10 As I meet people in the Scott District,  
11 I tell them that my number one priority will be to  
12 work with the Town Council and Mayor to build a  
13 working relationship that reflects the wishes of the  
14 community. I tell them we have big problems to  
15 solve, and we need to solve them together. Like, a  
16 plan for data centers, a plan for power  
17 transmission, and a plan for how to handle the  
18 pressure to expand our towns and service districts  
19 and to pave over our countryside.

20 I believe you-all love this town and  
21 love this county as much as I do. I encourage you  
22 to engage with the county government to develop

1 plans everyone can embrace. And until those plans  
2 exist, please recognize that every action you take  
3 has an impact on more than your own voters.

4 Remember that the town and county are  
5 tied to one another through businesses we all  
6 support, through friendships we all appreciate, and  
7 through a gorgeous rural setting that we all  
8 cherish.

9 Thank you.

10 (Applause.)

11 MR. CLOUGH: Josephine Gilbert. On deck:  
12 Anne Ziegler, Ken Ohm, Douglas Larson, Shawn  
13 O'Donnell.

14 MS. GILBERT: I'm next. Thank you.

15 Good evening, Mayor, Council members,  
16 and community members. My name is Josephine  
17 Gilbert, and I live in the Scott District.

18 I want to thank the Mayor for giving me  
19 the opportunity to sit down for over an hour and  
20 discuss the ongoing Saturday morning harassment --  
21 my interpretation -- at the courthouse square since  
22 June 2020. Yes, two and a half years, and no plans

1 to stop.

2           The Mayor was thoughtful and very open  
3 with his point of view. I appreciated this, as it  
4 allowed me to do the same.

5           In the end, he believes it's a freedom  
6 of speech issue. I don't see it the same way. This  
7 ongoing propaganda from a fringe group in our  
8 community is divisive and not constructive. It  
9 teaches our young people to believe a lie and stand  
10 on the corner and complain.

11           A better response would be: How can I  
12 help this community? Many opportunities to  
13 volunteer at a church, school, Salvation Army, et  
14 cetera.

15           One result of this ongoing protection  
16 of approximately 50 people from the five to ten  
17 patriots on any given Saturday is the cost to the  
18 town and, therefore, the taxpayer. I requested a  
19 FOIA from this -- for this expense from June 2020 to  
20 December 31st, 2022. The police department  
21 responded with: This record does not exist.

22           Interesting. They used a provision in

1 the law that does not require them to create a  
2 document. Too bad. I wanted to use as close to  
3 actual as possible.

4 The acting police chief made a  
5 perfunctory call to explain, but when he couldn't  
6 reach me initially, he would not respond to phone  
7 calls or email. Why?

8 Given my finance background I'm quite  
9 comfortable with my assumptions. \$500 a weekend  
10 would cover one officer, sometimes two. Sometimes a  
11 chief and sometimes a sergeant. Sometimes a  
12 lieutenant. Benefits and vehicle expenses.

13 So let's take a look at the numbers.  
14 \$500 a week. For 2020, there was 26 weeks. That's  
15 \$13,000. 2021, 52 weeks, \$26,000. 2022, another  
16 52 weeks, \$26,000.

17 Now, I stopped in December. We're in  
18 February. Nevertheless, I've got 130 weeks for a  
19 grand total of \$65,000.

20 Is the community okay with this ongoing  
21 expense? Is the rest of the council okay with this  
22 ongoing expense?

1 I thank you for your service.

2 (Applause.)

3 MR. CLOUGH: Anne Ziegler. On deck: Ken  
4 Ohm, Douglas Larson, Shawn O'Donnell, Denise  
5 Schefer.

6 MS. ZIEGLER: Good evening, Council. My  
7 name is Anne Ziegler. I live in Scott District,  
8 also, about three miles out of the city limits, but  
9 this is my hometown.

10 I have excerpts from the town code of  
11 ethics. Under the mission statement: Provide  
12 public safety in an attractive, well-planned  
13 community with historic character for the benefit,  
14 enjoyment and accessibility of all.

15 Under values: Strive to display  
16 honesty, respectfulness, and fairness, support the  
17 health and economic well-being of our citizens and  
18 preserve our historic small town character.

19 The preamble says: The citizens of  
20 Warrenton are entitled to fair, ethical, and  
21 accountable local government which has earned the  
22 public's full confidence for integrity.

1 Under the act in public interest:  
2 Stewardship of the public interest must be the  
3 primary concern. Members will work for the common  
4 good of the people and not for any private or  
5 personal interests.

6 (Applause.)

7 MS. ZIEGLER: Under conflict of interest:  
8 In order to assure their impartially on behalf of  
9 the common good, members shall not use their  
10 official positions to influence decisions in which  
11 they have a financial interest or where they may  
12 have an organizational responsibility or a personal  
13 relationship that may give the appearance of a  
14 conflict of interest.

15 (Applause.)

16 MS. ZIEGLER: They shall abstain from  
17 participating in deliberations and decision-making  
18 where conflicts may exist.

19 It does not say "unless the town  
20 attorney says it's okay."

21 (Laughter.)

22 MS. ZIEGLER: Under gifts and favors: They

1 shall refrain from accepting any gifts, favors, or  
2 promises of future benefits which might compromise  
3 their judgment or give the appearance of being  
4 compromised.

5 (Applause.)

6 MS. ZIEGLER: Under compliance: Members  
7 have the responsibility to assure that ethical  
8 standards are met and the public can have full  
9 confidence in the integrity of the government.

10 Have we had that? No.

11 The Mayor has the responsibility to  
12 intervene when violations of the code of ethics are  
13 brought to their attention. Clear.

14 But the bottom statement says: A  
15 violation of the code of ethics shall not be  
16 considered a basis for challenging the validity of a  
17 decision.

18 So, therefore, it's all meaningless,  
19 right? You can do whatever you want, any time you  
20 want, no matter what, no matter who it hurts.

21 (Applause.)

22 MR. CLOUGH: Ken Ohm, Donald Larson, Shawn

1 O'Donnell, Denise Schefer, Owen Schefer.

2 MR. OHM: Good evening. I'm Ken Ohm, and I  
3 live in the Town of Warrenton.

4 As I came here tonight I wanted to -- I  
5 was thinking about memory, and all sorts of  
6 different memory, and I thought, well, elephants  
7 have really good memory. I remember in Botswana  
8 they always remember -- elephants could tell where  
9 their watering holes were. They always remembered  
10 that.

11 Another thing with a good morning  
12 memory -- another person that I know is my wife. My  
13 wife remembers through 40 years of marriage every  
14 mistake I've ever made.

15 (Laughter.)

16 MR. OHM: And probably every good one. And  
17 she usually says the only reason I open my mouth is  
18 to stick my other foot in it.

19 I can also think of another group that  
20 has a long memory; and that's this group, we the  
21 people.

22 Government that is open and processes

1 that are fair can withstand the light of day. And  
2 so it brought me to thinking about the FOIA  
3 documents, which basically -- that we tried to get  
4 and were not released. And I thought if this is  
5 really open and there's nothing to hide, why would  
6 you not -- why wouldn't you just basically say  
7 here's all the Mayor's emails, here's all of Brandie  
8 Schaeffer's? What do we have to hide here?

9           Because -- and the same thing goes,  
10 actually, with the non-disclosure agreements. I  
11 would go -- and I will suggest to you that we the  
12 people here, we will remember that, and we have a  
13 good memory.

14           This has not been a collective  
15 decision. You never asked the citizens of Warrenton  
16 if we wanted a data center, any data center, in our  
17 town. It has been a decision of a few people acting  
18 in secret.

19           And here's something you can take to  
20 the bank: We will remember. We will remember how  
21 you vote tonight. The one thing we will do is --

22           UNIDENTIFIED SPEAKER: (Indiscernible.)

1 MR. OHM: -- we will remember.

2 Thank you.

3 MR. LARSON: I'm Douglas Larson. I live in  
4 the Town of Warrenton. And I'll be brief. I've  
5 spoken to you in the past about my feelings about  
6 the data center, and I won't address that.

7 I do wish to remind you--all of what I  
8 feel is a central responsibility, not only of our  
9 elected officials, but all of us in this room, and  
10 that is to preserve and protect this very unique and  
11 special resource that we all share called the Town  
12 of Warrenton.

13 (Applause.)

14 MR. LARSON: For 20 years -- for 20 years, I  
15 was the director of the Arlie Foundation; and as  
16 part of my role there, I was responsible for the  
17 marketing of that facility just on the edge of  
18 Warrenton. And in that time we relied almost  
19 totally on the idea that Arlie was this wonderful  
20 place within an hour of the crowded urban  
21 environment of Washington, a wonderful place that  
22 people could come and get away from the distractions

1 and address the subject at hand.

2           It is this authenticity that people  
3 seek today in their daily lives. While other  
4 communities try to replicate a Main Street, we have  
5 a Main Street that is charming. While other  
6 communities try to replicate old buildings, we have  
7 beautiful buildings that are over 200 years old that  
8 line our streets. We have a courthouse that is an  
9 exemplary piece of architecture. We have  
10 authenticity, which is what so many of the people  
11 today are searching for.

12           To do anything that hampers the  
13 authenticity of the little jewel that we have here  
14 in the Town of Warrenton puts in jeopardy all of the  
15 Experience Old Town efforts to bring tourism and  
16 bring people to our town. They are not coming to  
17 look at cinder block construction and expansive  
18 electric transmission lines. They are coming for  
19 the authenticity that we find ourselves in jeopardy  
20 of losing.

21           Thank you very much for your time.

22           MR. O'DONNELL: My name is Sean. I live at

1 52 Blue Ridge Street. I wrote a poem about fishing  
2 at Lake Brittle in the summer, and it was inspired  
3 by Mike McClintock.

4 My mother formatted this for me, and I  
5 had suggestions from my family.

6 I sat by Lake Brittle, I looked at the  
7 sky. And as I looked, a neighbor went by. A  
8 neighbor went by, he said, by the nations I saw them  
9 shake. He shook with frustrations. And when I  
10 asked what was the trouble, he answered me on the  
11 double, I haven't slept in one whole year. There's  
12 a terrible noise in my ear.

13 (Laughter.)

14 MR. O'DONNELL: The neighbor went past.  
15 Another came fast. I asked this neighbor, I asked  
16 him, why? Why do you want to leave Warrenton? Why?

17 My neighbor said, me? Why leave this  
18 town? My house, it might fall down. I read it  
19 happened in Prince William County. My foundation  
20 has cracks. Just look and see.

21 The Mayor came up with one big hop.  
22 The Mayor came up and I said stop. Stop, stop,

1 stop, I told Mr. Carter. He shouted, I didn't make  
2 this barter. Dominion is digging in my yard. I  
3 wish I could put them behind bars.

4 Along came some children along with  
5 their dad. He said, things have gotten incredibly  
6 bad. I thought our officials would represent us.  
7 Now we are leaving by plane, train, or bus.

8 Away past Lake Brittle ran a cat and a  
9 dog. Away past Lake Brittle swam a fish and a frog.  
10 I asked the frog, why do you flee from your blog,  
11 Mr. Frog? The frog said, me? I have no blog. It's  
12 been ruined and they took my log. I've come to Lake  
13 Brittle for a log to live on. I hope it isn't sold  
14 to Amazon.

15 (Laughter.)

16 MR. O'DONNELL: I sat by Lake Brittle, I  
17 looked at the sky. And as I closed my eyes, I  
18 started to cry.

19 (Applause.)

20 MR. CLOUGH: Denise Schefer, Owen Schefer.  
21 On deck: Susan Whitus, Patricia Drunagel, John  
22 Benedict.

1 MS. SCHEFER: Good evening. My name is  
2 Denise Schefer. I live at 6080 Whippoorwill Drive  
3 in Warrenton, and I also have a townhouse at 40  
4 Morton Ridge in Ward 1.

5 I've lived in Warrenton for 25 years,  
6 and I've been following local politics closely for  
7 the last nine months. To say the least, it's been a  
8 very frustrating nine months.

9 You guys are public servants and you  
10 ran for your position or were appointed so that you  
11 could serve in the best interests of the town people  
12 that you see sitting before you.

13 Who better to tell you what is in their  
14 best interests than the town residents themselves?  
15 Listen to your citizens. They are joined by county  
16 residents as the decisions you are making tonight  
17 and in the coming months will have a big impact on  
18 them, as well.

19 Don't discount the county residents  
20 coming before you.

21 We have experts in our community that  
22 have spoken during public hearings and had offered

1 to share their knowledge with you further, but their  
2 offers have been ignored by the majority of you.

3 Why?

4 Your staff doesn't have the expertise  
5 to address some of these issues, and you aren't  
6 hiring companies to do studies for you or get  
7 outside opinions, so why not become educated from  
8 people in this community that have spent 20, 30, or  
9 40 more years doing exactly that?

10 Why are you not taking advantage of the  
11 experience and the time they are offering you?

12 Filling your council and Mayoral seat  
13 is a privilege, and if you don't see the people  
14 sitting before you as your greatest asset and you  
15 don't vote in their best interests, then you  
16 shouldn't continue to fill the seat.

17 Thank you.

18 MR. SCHEFER: Hi. My name is Owen Schefer.  
19 Same address, 6080 Whippoorwill Drive. As my wife  
20 mentioned, we also have a townhouse in Ward 1.

21 I've actually been in the county a  
22 little bit longer, since '87, when my parents moved

1 out here and we decided to settle out here.

2 UNIDENTIFIED SPEAKER: (Inaudible.)

3 MR. SCHEFER: Oh, sorry.

4 The Town Council, along with many  
5 others, put a huge amount of effort into developing  
6 the Warrenton 2040 comprehensive plan. Input was  
7 taken from all kinds of sources, even including  
8 input from some 1,000 students via postcards. Some  
9 as young as 5 years old. Everybody got to give  
10 input.

11 Previous documents were adopted,  
12 including ones on character districts, economic  
13 white papers, housing analysis, just to name a few.  
14 Over two years went into this. The 2040 plan is  
15 quite inspiring as one starts to read through it.  
16 The passion and effort really shows.

17 The plan of Warrenton 2040-vision, your  
18 town, your neighborhood, your plan.

19 But who is driving that plan? We have  
20 an inspiring plan that all this hard work and effort  
21 went into, but now who is implementing it? Why  
22 isn't the town, the council, staff, economic

1 development, planning all soliciting developers to  
2 come and build the plan? Instead we sit back and  
3 hope people will come and build your dream.

4           When developers do approach and it  
5 doesn't match our plan, we hear some of the  
6 councilmembers make comments like, well, we haven't  
7 done anything else, so we might as well do this.

8           It seems the plan was made, and then we  
9 sit back and wait for it to happen.

10           I've taken the time to draw out  
11 pictures of my home garden, and I had a plan. It  
12 was going to look good. But then I didn't take the  
13 next steps to drive towards my goal. But rather I  
14 sat back and I just watched it grow. And what did I  
15 get? I got growth, but it was weeds.

16           Remember, you're in the driver's seat.  
17 You're not in the back seat. Steer the town to  
18 where we've all decided we want it to go in the 2040  
19 comprehensive plan.

20           Stick to your vision: Your town, your  
21 neighborhood, your plan. Don't sit and wait for it  
22 to happen. Make it happen.

1 Thank you.

2 (Applause.)

3 MR. CLOUGH: Susan Whitus, Patricia  
4 Drunagel, John Benedict, Roseanne Woodruff, Eric  
5 Gagnon.

6 MR. BENEDICT: All right. Well, I'm John  
7 Benedict, and I live at 23349 Parsons Road in  
8 Middleburg.

9 UNIDENTIFIED SPEAKER: We can't hear.

10 MR. BENEDICT: Okay. And -- there we go.  
11 All right. Again, John Benedict, 23349  
12 Parsons Road in Middleburg.

13 Like many people I'm concerned about  
14 ethics in government. It's too easy for people in  
15 public roles to let themselves be put into  
16 inappropriate positions, they may not even realize  
17 when it's happened.

18 Ethics is more than simply not  
19 violating law or misusing office for personal gain.  
20 It's about conducting yourself in a manner that  
21 allows everyone, even those who disagree with you,  
22 to have confidence in the integrity of town

1 government.

2 (Applause.)

3 MR. BENEDICT: That's why -- that's why  
4 Warrenton's code of ethics appropriately provides  
5 that its public officials, among other things, are  
6 to do the following: They are to comply with both  
7 the letter and the spirit of laws and policies; they  
8 are to comply with laws pertaining to conflicts of  
9 interest, as well as open processes of government;  
10 they are to maintain professional and personal  
11 conduct above reproach and even avoid the  
12 appearance of impropriety.

13 They are not to act to serve in public  
14 interests -- for public interest -- private  
15 interests, excuse me. They are not to influence  
16 decisions where they have an organizational  
17 responsibility or a personal relationship that could  
18 give the appearance of a conflict of interest.

19 They are to abstain from participating  
20 in deliberations or decision-making where conflict  
21 of interest might exist. And they're to respect the  
22 independence of boards, committees, and commissions.

1                   When focused on a big issue it can be  
2 easy to rationalize letting irregularities slide;  
3 withholding information; and notably, letting  
4 interested outside parties maneuver you into doing  
5 what many would see as inconsistent with the code.

6                   Most violations of ethics aren't really  
7 intentional, and some are even unaware. But it's  
8 not what you think that matters; it's what others  
9 could perceive. The appearance of a violation is  
10 enough to require members or the Mayor to act.

11                   I appreciate that the council have  
12 committed themselves to follow the code of ethics.  
13 But please remember, whenever there's doubt in your  
14 minds or among many in the public, you owe it to  
15 them to stop and change course.

16                   Thank you.

17                   (Applause.)

18                   MR. CLOUGH: Susan Whitus, Patricia  
19 Drunagel, Roseanne Woodruff, Eric Gagnon, Christina  
20 Gagnon.

21                   MS. WHITUS: My name is Susan Whitus. I  
22 live at 99 Brookshire Drive in Warrenton.

1 I came here tonight -- I've never been  
2 to one of these before, and I'm not really sure how  
3 these things work. But I came here tonight because  
4 I am -- I'm really concerned about my health and the  
5 health of the townspeople that I am friends with.  
6 And I hate to think of anybody suffering due to this  
7 -- to this building, this proposed project.

8 I had -- in the time since I've moved  
9 into Warrenton, there was a building built behind my  
10 own home. It's not quite as big as a data center,  
11 but it's pretty loud at times, especially like the  
12 fan that runs. And it has affected my own health.  
13 And I shudder to think of how many people may be  
14 affected due to this building.

15 I care about my health. And as I care  
16 about my own, I care about everybody's, especially  
17 my fellow townspeople. And I love this town, too.  
18 It's very beautiful.

19 So, thank you.

20 (Applause.)

21 MR. CLOUGH: Patricia Drunagel, Roseanne  
22 Woodruff, Eric Gagnon, Christina Gagnon.

1 MS. DRUNAGEL: Hi. I'm Patricia Drunagel.

2 And I live on Vint Hill Road in Warrenton.

3 And I'm sure many others here do not  
4 want to speak tonight, but I was told that if you  
5 didn't speak, then Amazon assumes we want the  
6 center. Amazon should not assume anything.

7 Our small town is special the way it  
8 is, and it needs to stay this way. Say no thanks to  
9 the Amazon proposal now and in the future.

10 Thank you.

11 (Applause.)

12 MR. CLOUGH: Roseanne Woodruff.

13 MR. WOODRUFF: Roseanne L. Woodruff, 9255  
14 Tournament Drive, Warrenton, Virginia 20186.

15 Since I can't improve upon the  
16 wonderful analysis -- the excellent analysis that my  
17 fellow citizens have already presented to you and  
18 the heartfelt messages from so many of them, I just  
19 want to reminisce a bit.

20 A few months ago when you were pursuing  
21 the Warrenton plan and you were talking about  
22 sprucing up houses that looked like they had fallen

1 behind and helping the underserved to get up to par  
2 with service -- that's what I understood and read  
3 about.

4           So you have these noble plans, and then  
5 all of a sudden there was a pivot to the great  
6 disruptor that is this Amazon data center. And we  
7 go from the quaint historic town brand, to the tech  
8 corridor brand that doesn't seem to benefit anyone  
9 in the town; and it has so many negative aspects  
10 that could linger and disturb us forever, for the  
11 rest of our lives.

12           And it just seems like such a diversion  
13 from all of these noble goals and the wonderful  
14 things that you had planned.

15           So it's very hard for me to understand  
16 how this all came about and why this wasn't rejected  
17 before, because it just seemed like such a bad idea  
18 from every point of view.

19           I don't see any benefit to the citizens  
20 of Warrenton and the surrounding county. I just  
21 don't see any benefit. I see so many negatives, and  
22 I see the focus being diverted from what is good and

1 noble and what you actually need to do and what we  
2 need you to do, to this horrific nightmare that is  
3 the Amazon data center.

4           And, you know, maybe we could end up  
5 being a little town that's just kind of a corporate  
6 town, which is not what we're after.

7           So I don't understand it, and I'm still  
8 looking for explanations how all of this occurred or  
9 why we're even still pursuing this.

10           You know, given the pros and cons, the  
11 balance sheet, when you put it there, it just seems  
12 like such a bad idea that will disturb us, disrupt  
13 us, and ruin our community forever. And I just -- I  
14 can't understand it, so I'd like some explanations.

15           Thank you.

16           (Applause.)

17           MR. CLOUGH: Eric Gagnon, Christina Gagnon,  
18 Peggy DiVincenzo, Jimmy Stone, Jeffrey Martin.

19           MR. GAGNON: My name is Eric Gagnon, and my  
20 wife and I live at 200 Winchester Street.

21           Last month I came here and talked about  
22 Councilmember Jay Heroux's apparent conflict of

1 interest before the Town Council.

2 Paragraph 8 of our town's own code of  
3 ethics says that a council member shall not  
4 influence government decisions where organizational  
5 responsibility or a personal relationship may give  
6 the appearance of a conflict of interest.

7 Mr. Heroux has minimized his conflict,  
8 but I've spoken with many of my neighbors in Ward 5  
9 and have shown them examples from your company's own  
10 website. They tell me your company's ties certainly  
11 give the appearance of a conflict of interest at the  
12 very least.

13 They also say they wonder why somebody  
14 didn't find out about this conflict issue before and  
15 prevent you from even being involved in this matter  
16 from the beginning.

17 (Applause.)

18 MR. GAGNON: Last week -- last week we  
19 received a Conflict of Interests Act declaration  
20 from Mr. Heroux. This declaration minimizes your  
21 company's conflict, but it also states that your  
22 role is business development. In other words,

1 sales.

2                   Now, I've been in sales and marketing  
3 for technology companies for over 50 years, and I  
4 know that in sales, relationships matter.

5                   If Mr. Heroux votes in favor tonight,  
6 it's going to open a lot of doors for his company,  
7 meaning new contacts and sales leads from potential  
8 prospects by way of the influence he has exerted in  
9 this vote.

10                  Under our town code of ethics, this  
11 puts him in an organizational responsibility and in  
12 a personal relationship that would give the  
13 appearance of a conflict of interest.

14                  Last week, the Mayor issued a statement  
15 saying that state law overrides any local conflict  
16 of interest rules, and that there is no conflict.  
17 If this is true -- if this is true -- and it isn't  
18 true -- then why even have a town code of ethics at  
19 all if you won't enforce it?

20                  (Applause.)

21                  MR. GAGNON: And if 47 of our neighbors in  
22 Ward 5, including three living on the street where

1 you live, Mr. Heroux, saw the obvious appearance of  
2 a conflict and signed an open letter urging your  
3 recusal, then does what they say even matter here?

4           This is just one example of the many  
5 ways this Town Council under the Mayor's leadership  
6 has detached itself from the will of the people of  
7 Warrenton.

8           (Applause.)

9           MR. GAGNON: Councilmembers who have any  
10 hope of reelection or election to the council or to  
11 county office should think very carefully about this  
12 when they cast their vote tonight.

13           MAYOR NEVILL: Thank you, sir.

14           MS. GAGNON: My name is Christina Gagnon,  
15 Ward 5, Warrenton.

16           I'm so happy to see how many town and  
17 county citizens have come out tonight to get  
18 involved in our local government; and I hope this  
19 involvement continues into the future, because there  
20 is so many town issues that need the citizens'  
21 input.

22           There's an organizational chart that

1 I'm sure you're all familiar with in the Warrenton  
2 Town Council handbook. It illustrates the level of  
3 power and authority for each branch of the town  
4 government and the relationships to each other. At  
5 the top are the town's citizens. Underneath that  
6 are all the other branches of our local government.  
7 So we the citizens are at the top,  
8 bearing the most authority and the most  
9 responsibility for guaranteeing that our rights are  
10 safeguarded and our laws and ordinances reflect what  
11 is guaranteed in our constitution, both state and  
12 federal.

13 Only the circuit court is shown  
14 slightly higher on the chart because that's where we  
15 go first to adjudicate any conflicts between the  
16 citizens and the decision making made within our  
17 town government.

18 I would clarify this chart by adding  
19 the words "the rule of law" next to the circuit  
20 court, because no court bureaucracy is the guiding  
21 light of our political system, but instead it is the  
22 rule of law.

1 Citizens have redress to previous court  
2 rulings if they can show that the law has not been  
3 faithfully followed.

4 That's why I'm so happy and optimistic  
5 tonight seeing all my fellow citizens taking the  
6 responsibility of citizenship seriously by showing  
7 up and getting involved regardless of where they  
8 come down on any given issue.

9 And this tremendous involvement from  
10 our community gives me the faith and belief that in  
11 the long run, the rule of law will prevail.

12 Thank you.

13 (Applause.)

14 MR. CLOUGH: Peggy DiVincenzo, Jimmy Stone,  
15 Jeffrey Martin, Allen Dianic, Kevin Kaher (ph).

16 MS. DIVINCENZO: Good evening. My name is  
17 Peggy Divincenzo. I live at 428 Falmouth Street,  
18 and I've been in Warrenton for just under five  
19 years.

20 I grew up in a small town, and one of  
21 the things that attracted me about Warrenton was  
22 that feeling, the feeling of being in a small town;

1 and also having a sense of community after living in  
2 Fairfax County for, I guess, the last -- previous  
3 30 years.

4           So I've certainly been following all of  
5 this controversy, and I'm very sad to think that the  
6 sense of community and the beauty and the character  
7 of Warrenton could be changed by one really, you  
8 know, cataclysmic decision to turn it into something  
9 else.

10           And even though I haven't been here  
11 that long, I -- it was part of the reason that I  
12 came here. It's more affordable, and it feels like  
13 the place that I grew up: Beautiful physically, a  
14 sense of community, a sense of connection with  
15 people, and the lack of the impersonal that I  
16 experienced for most of the time that I was closer  
17 into Fairfax County and D.C.

18           You know, it feels like this is a very  
19 important turning point for this town, and I think  
20 that you have this tremendous opportunity to be true  
21 to the vision of what Warrenton was set out to be  
22 many years ago, but also to prevent the sense of

1 community to dissipate and the sense of  
2 dissatisfaction to become prominent, the sense of a  
3 lack of confidence.

4           But you know, you've heard from so many  
5 people in previous meetings and this evening, and  
6 you'll hear from more; and I think it's really  
7 absolutely critical if you want to maintain the  
8 sense of community and the sense of character of  
9 this town and what it has been for all of those  
10 years that I admired it so much before I moved here.

11           I think that it's going to be important  
12 to really make the right decision.

13           You know, gentlemen, read the room.

14           UNIDENTIFIED SPEAKER: Amen.

15           MS. DIVINCENZO: Thank you.

16           MR. CLOUGH: Jimmy Stone, Jeffrey Martin.

17           MR. STONE: I'm Jimmy Stone. I live in  
18 Cedar Run District.

19           I've been in Fauquier County for  
20 30 years since my 30-year career in the United  
21 States military and foreign service overseas where I  
22 worked with many, many governments. Six on three

1 continents.

2                   And coming here, I had the privilege  
3 and pleasure of serving for nine years on Fauquier  
4 County's planning commission. And I have to say  
5 that when I worked with the planning commission and  
6 the supervisors and the staff of this county, I  
7 found something very close to perfection in terms of  
8 the honesty, openness, dedication, and integrity of  
9 government. I wish I could see that here.

10                   I worked on dozens of land use  
11 applications. I can't remember any decisions by  
12 commissioners or supervisors that were made in the  
13 dark with winks and nods; and this application  
14 simply reeks of that.

15                   (Applause.)

16                   MR. STONE: Enough has been said about the  
17 faults and the lapses in this application. I have  
18 to say I believe filling the gaps will only weaken  
19 the case for it, and so I would just deep six it,  
20 gentlemen, and start over in the light of day or not  
21 at all.

22                   (Applause.)

1 MR. CLOUGH: Jeffrey Martin, Allan Dianic.

2 MR. MARTIN: Good evening. My name is  
3 Jeffrey Martin. I'm at 185 North View Circle,  
4 Warrenton.

5 I remember driving through this small  
6 town shortly after graduating high school every time  
7 I'd go to see my grandparents in Pennsylvania. I  
8 fell in love with the town, could always picture  
9 myself living here.

10 After my time in the military and a few  
11 years working on the eastern side in Washington,  
12 D.C., I finally made a transfer and was able to move  
13 with my wife here from Fredericksburg in 2020, and  
14 have loved it ever since.

15 Moving here from Fredericksburg I  
16 wanted to get away from the noise of that area.  
17 Now, there's a plan to put a large noise generator  
18 within eyesight of my house. I just can't believe  
19 it, that we would want to influence the beauty of  
20 this town by building an eyesore that's going to  
21 ruin the lives and living conditions of so many.

22 I'm not going to stand here and go

1 through all the questionable actions taken by this  
2 Town Council and their predecessors. We've heard it  
3 enough. I hope you've listened to it throughout  
4 this, rather than just looking down and not making  
5 eye contact at all whatsoever to someone who is  
6 speaking.

7 (Applause.)

8 MR. MARTIN: Thanks for looking up.

9 This is my first time speaking at a  
10 town event such as this, and I'm proud of my town.

11 (Applause.)

12 MR. MARTIN: And I'm proud that so many  
13 people have come out to speak. And I hope you will  
14 take the time to listen to them and do their will.

15 I have not heard anyone in any of the  
16 planning commission meetings or council meetings  
17 that I've been at that has actually come out who is  
18 not paid by Amazon to speak in favor of this  
19 application.

20 (Applause.)

21 MR. MARTIN: So by that, I hope that you as  
22 a Town Council listen to the will of the people and

1 do your jobs and forgot about this application.

2 Thank you for your time.

3 (Applause.)

4 MR. CLOUGH: Jeffrey Martin, Allan Dianic,  
5 Kevin Kaher. Jeffrey Grambo.

6 MR. DIANIC: Good evening. My name is Allan  
7 Dianic. I live on Spy Plane Lane in Warrenton.  
8 Probably the most memorable street name there is in  
9 Virginia.

10 And I want to thank you for the  
11 opportunity to speak to you tonight. This is not  
12 something I do often. I'd actually rather be home  
13 with my wife enjoying Valentine's evening.

14 But we moved here 11 years ago from  
15 Florida. I grew up in Florida. To give context, I  
16 lived in Florida before Disney was built. I lived  
17 in Florida when they launched Apollo 8. I watched  
18 it go up.

19 What I saw in Florida was very  
20 interesting. We saw growth. I left for the  
21 military. I came back. I saw more growth. I saw a  
22 couple of kinds of growth. There were some that

1 were public-private partnerships. They managed  
2 their growth.

3           There were many beachside communities  
4 that were beautiful. Some of them -- one of them, I  
5 remember, just north of where we lived. It was  
6 called Indian Rocks Beach. A beautiful area.  
7 Nothing was taller than a palm tree.

8           Over the years I went back one year,  
9 and there was nothing but 20-story condominiums  
10 lining the beach. From Gulf Boulevard you cannot  
11 see the Gulf. That was not a public-private  
12 partnership. There was no community. It was  
13 largely an absentee area. The character of that  
14 beautiful little town was lost.

15           We go further south, towns like  
16 Redington Shores and Pass-a-Grille very strongly  
17 advocated for height restrictions and advocated for  
18 controls on architecture. Those towns remain very  
19 nice, particularly Pass-a-Grille, when compared to  
20 some of the beautiful little coastal towns in New  
21 England. They worked very hard for their south Anna  
22 Maria Island.

1 Holmes Beach. We know some of the  
2 owners down there of hotels, and they've fought  
3 pitch battles with big money and large institutions  
4 trying to take over the beach. They're one of the  
5 few communities in that area that survived where  
6 nothing is taller than a palm tree. They thrive.  
7 They have very good business. And people come from  
8 all over the state, particularly Floridians, to see  
9 a little bit of what's left of old Florida.

10 So when we look at the future, the most  
11 important thing that you should consider here is the  
12 public-private partnership and the trust that we  
13 have to have between those of us in the citizenry  
14 and those of us who were honored to serve.

15 We saw in Florida -- and one of the  
16 things that made us want to move up here was the  
17 beauty of the area up here, the hills, the  
18 mountains, and how can you see -- from Warrenton you  
19 can see the Shenandoah. You can see the beautiful  
20 hills in this area.

21 But I'm also reminded of areas in  
22 Florida where you cannot see the Gulf from Gulf

1 Boulevard. You cannot see the Atlantic from A1A,  
2 50 yards away, because tall buildings have been  
3 built because Town Councils sold beachfront property  
4 that had been preserved to build several large  
5 buildings that are eyesores and block the ocean and  
6 block the pleasure of the people.

7 So as we think of things going forward,  
8 this partnership, we've heard many people tonight  
9 talk about Warrenton. We have lived here 11 years.  
10 It's absolutely a beautiful place to live. I'm very  
11 glad we moved here. Please preserve it as the  
12 special place that it is. I want my children to  
13 grow up looking west and seeing the Shenandoah.

14 MR. CLOUGH: Jeffrey Martin, Kevin Kaher,  
15 Jeffrey Grambo, Richard Keister, Owen Paun.

16 MR. KAHER: Hi, my name is Kevin Kaher. I  
17 grew up in Warrenton. I just recently moved back to  
18 the area.

19 Jay Heroux should recuse himself from  
20 the vote on the Amazon data center.

21 (Applause.)

22 MR. KAHER: In the town ethics, it says

1 members will conduct themselves in an ethical manner  
2 to earn and maintain the public's full confidence  
3 and integrity. One of these councilmembers works  
4 for a company that states on their website that they  
5 are partners with AWS. That's more than just  
6 associates.

7 This is a clear violation of town  
8 ethics, even just the appearance of a conflict of  
9 interest. The potential for your employee, the town  
10 attorney, to have agreed with you this is not a  
11 violation is partial at best. It would have been  
12 more ethical for this matter to be run through the  
13 Commonwealth's attorney.

14 And, again, the integrity of this body  
15 demands that he recuse himself.

16 I was an United States Army officer,  
17 combat veteran and company commander. They say you  
18 learn more from bad leadership than good leadership.  
19 Mr. Mayor, I don't see any leadership.

20 (Applause.)

21 MR. KAHER: Be a leader, do your job.

22 I would also remind the rest of the

1 council of the oath that you swore. When making any  
2 decision, you swear to represent the people of  
3 Warrenton, not politics, corporations, or self  
4 interest.

5 Thank you very much.

6 (Applause.)

7 MR. CLOUGH: Jeffrey Martin, Jeffrey Grambo,  
8 Richard Keister, Owen Paun, Kevin (indiscernible).

9 MR. GRAMBO: Too many Jeffreys here.

10 Good evening, Town Council and Mayor.  
11 My name is Jeffrey Grambo. I live at 300 Winchester  
12 Street, and have been a Town of Warrenton resident  
13 for over 18 years.

14 Please tell me why this SUP is good for  
15 the town. Tell me what I'm missing if it's such a  
16 good idea. I've emailed you. No one has come back  
17 with, hey, it's a good reason. Here is my good  
18 reason. This is why we need it.

19 Why does Warrenton have to become, you  
20 know -- excuse me. How does Warrenton become a more  
21 attractive place to live with a data center as a  
22 welcome mat?

1                   Have you councilmembers done your  
2 research? Have you been looking at the newspapers?  
3 What do neighboring jurisdictions -- are they happy  
4 with the data centers they now have to live with?  
5 Are these large buildings an attraction to the  
6 community? Is the constant drumbeat of noise  
7 something they want?

8                   Let's not forgot about the tax revenue  
9 these centers are supposed to bring, with a promise  
10 that seems to be constantly coming up short.

11                   If there are councilmembers that  
12 believe that the majority of the town residents  
13 favor this data center, well, then let's have that  
14 question put to a vote where the people can vote.

15                   (Applause.)

16                   MR. GRAMBO: Let them decide. Let the  
17 people decide, not a couple of figureheads.

18                   The overwhelming majority who oppose  
19 this data center must be invisible to those members.

20 If such an overwhelming majority of citizens are  
21 opposed to the data center, how can you be for it?  
22 Have you no sense of duty or obligation to the

1 citizens?

2 All that was done in the dark to  
3 advance the data center application will come to  
4 light. These rules you must comply with. Your Open  
5 Meetings Act is to keep business of the council open  
6 and transparent to the citizens.

7 I sit as a trustee on a board  
8 responsible for billions of dollars. Not millions.  
9 Billions. If I met with principals about investment  
10 rewards that were not open to the public, I would be  
11 going to jail.

12 I urge you to deny this special use  
13 permit.

14 Thank you.

15 (Applause.)

16 MR. KEISTER: Good evening. My name is  
17 Richard Keister, 560 Highland Town here in  
18 Warrenton.

19 And I think our last two speakers there  
20 hit a couple of really good spots, a couple good  
21 points that are absolutely essential to what's going  
22 on here tonight.

1           Everybody who has an elected office has  
2 an oath. Federal level, state level, local level.  
3 Now, we have enough problems at the national level.  
4 It doesn't matter what your political persuasion is.  
5 It's on both sides. And we can't affect that very  
6 much at our level.

7           State, very much the same thing.

8           But we shouldn't be having the  
9 contentious situation we have here today because the  
10 citizenry out here clearly does not want this data  
11 center.

12           I mean, is there anyone here tonight  
13 who wants this?

14           MR. KEISTER: Now, I understand -- I  
15 understand in politics some people want something,  
16 some people don't. Some people are right in the  
17 middle, and they don't care. But people are  
18 affected by the decision you make. The vote you  
19 make tonight will materially affect the way people  
20 live their lives.

21           It will affect their finances on the  
22 value of the properties that they have purchased,

1 and it is a betrayal of the trust that people who  
2 come into this community, buy property, establish a  
3 life, because a plan was in place, zoning was in  
4 place, and now it has been changed.

5           People don't make decisions based on  
6 what somebody might do five years from now. They  
7 make decisions based on what's going on, what does  
8 the city say we want to do, what is in place, what  
9 are the safeguards that I have for my life, for my  
10 family's life, and for my community's life.

11           And the one thing is you are public  
12 servants. You did take an oath of office. The  
13 simple thing here is to do the right thing, the  
14 right thing for the citizenry of this town.

15           (Applause.)

16           MR. KEISTER: It's not a hard thing to do.  
17 It may not be what you necessarily personally  
18 believe is the right thing to do. It may not be  
19 what you want to do. But it is your job as a public  
20 servant.

21           And you are a local public servant. We  
22 should not have to fight so hard to have our voices

1 heard.

2                   And I do hope that tonight, and through  
3 all the other meetings that have been held on this,  
4 that you understand the local citizenry does not  
5 want this. They don't want it in the future either.

6                   We've seen what's been going on in  
7 other communities. It doesn't have to happen here.  
8 You are the people who can prevent that. Stand up  
9 and do the right thing.

10                   Thank you.

11                   MR. CLOUGH: Owen Paun. Owen Paun. Kevin  
12 Cass (ph), Cynthia Burbank, David Gibson.

13                   MR. PAUN: Hi. My name is Owen Paun. I  
14 live at 786 General Wallace Court. And I would like  
15 to respect the wishes of the Town Council and defer  
16 my comments to the public hearing so that they will  
17 be on record.

18                   UNIDENTIFIED SPEAKER: Good evening. I work  
19 for PEC, but I want to make some general remarks  
20 tonight.

21                   I was hired by PEC in 2021 right as  
22 this issue was coming to light. And where I worked

1 before in the development industry, we typically  
2 left engagement with residents up to others.

3           So after getting involved, I've been  
4 blown away by the passion and depth of knowledge  
5 that the town and county residents have brought  
6 throughout this entire process; and I know they'll  
7 approach the number of issues that we may face in  
8 the future that might arise with that same tenacity  
9 and determination, whether the impacts are more data  
10 centers, the siting of new energy infrastructure  
11 that they rely on, or the diesel emissions from data  
12 center generators that might result from the  
13 variants that DEQ is currently considering.

14           And for any of those issues, I would  
15 urge you-all to consider the big picture impacts and  
16 the impacts both on and off site like you would any  
17 other proposal.

18           Thanks for the work you do, and thanks  
19 to everyone for coming up tonight.

20           (Applause.)

21           UNIDENTIFIED SPEAKER: All the comments are  
22 clearly about the public hearing agenda for the data

1 center. If all these comments are supposed to be on  
2 the public record, why don't you just go forward  
3 with the public hearing (inaudible) --

4 (Applause.)

5 UNIDENTIFIED SPEAKER: Mayor, to be fair to  
6 anybody who is here to speak about a non-SUP matter,  
7 we should continue with the public hearing so they  
8 don't have to wait until all the comments --

9 UNIDENTIFIED SPEAKER: There's a young man  
10 here who wants to speak (indiscernible.)

11 UNIDENTIFIED SPEAKER: If somebody wants to  
12 speak about a non-SUP matter, then they should be  
13 able to speak during citizen's time.

14 MAYOR NEVILL: So to clarify, we can ask  
15 anybody who is not wishing to speak on the SUP to  
16 speak now, and then we move to the public hearing?

17 UNIDENTIFIED SPEAKER: Of course.

18 MAYOR NEVILL: So is there anybody who is  
19 here signed up for citizens' time who does not wish  
20 to speak on the matter of the SUP?

21 (Laughter.)

22 MAYOR NEVILL: Perfect timing.

1 MR. GIBSON: Let's talk about land. Let's  
2 talk about land, because this isn't really about  
3 Amazon or a data center. It's about land.

4 I'm Dave Gibson. I live at 7548 Fox  
5 View Drive, one half mile from here. I've lived in  
6 Warrenton for ten years. I'm a refugee from Tysons  
7 Corner.

8 (Laughter.)

9 MR. GIBSON: And I'm very happy to be here.  
10 Always have been. When my wife and I got here, we  
11 both dug in. We joined several different  
12 organizations. I did some weekend auditing for the  
13 Virginia Outdoor Foundation. I'm now on the  
14 advisory board to the AG forestal committee for the  
15 county. I'm proud to be a member of the board of  
16 citizens for Fauquier County.

17 (Applause.)

18 MR. GIBSON: I have brought -- I have  
19 brought 40 years of experience in 50 countries to a  
20 little business on environmental consulting that I  
21 run out of my home here in Warrenton; and I think  
22 I'm making a difference, and I'm trying awful hard.

1                   So let me -- Mark Twain once said "Buy  
2 land. They don't make it anymore." Okay. "Buy  
3 land. They don't make it anymore."

4                   Well, they don't. And when you do  
5 things like drop solar farms or data centers or  
6 things that really don't belong in a rural  
7 landscape, you're taking away some of those finite  
8 resources.

9                   So Fauquier is an extraordinary place.  
10 It's wonderful. Warrenton is the pearl in the  
11 center. But they have to -- they've got to have a  
12 synergistic effect. They've got to live  
13 symbiotically, as we say, right?

14                   It's not an accident that this has come  
15 along as far as it has. We've got half of this  
16 county, 200,000 acres in conservation either in  
17 easements or AG forestal or in BDR purchases. We've  
18 made enormous investments in land and retention of  
19 rural lifestyles; and we've done it at great, great  
20 cost, and everyone in this room has been a part of  
21 it and played a role.

22                   And I think it's something that is

1 diametrically opposed to what we're talking about  
2 here this evening. But it's about land. Because  
3 there's not much of it left, right?

4           The county and the town have been  
5 entrusted to steward this land. We need to take it  
6 more seriously than we are right now, because all I  
7 see following behind this conversation is another  
8 hundred conversations about solar farms.

9           And we can guarantee that for every one  
10 of these plans that we do put in data centers, we're  
11 going to get at least one more solar farm. Period.  
12 Full stop. Every one of the data centers have all  
13 been committed to going net neutral, and they can't  
14 possibly do it unless they add more significant area  
15 of farm. So we're going to lose it.

16           So let me help just remind you -- the  
17 last minute is your legacy. Your legacy will be  
18 whether we retain our focus and attention on land.  
19 I don't think it's an Amazon data center. I think  
20 it's all about land, the way -- the lifestyle that  
21 we have.

22           I urge you to keep that in mind when

1 you do your thinking on this.

2 Thank you.

3 (Applause.)

4 MAYOR NEVILL: So at this point I will open  
5 it up. If anyone who has signed up for citizen's  
6 time who wishes to speak about an issue other than  
7 the SUP to please stand up and approach the podiums  
8 or lecterns.

9 MS. KEENAN: Hello. I'm Florence Keenan.  
10 I'm a resident of Fauquier in the Marshall District  
11 for the past quarter century.

12 Having travelled the world, I always  
13 know there's no place like home. In my heart and  
14 mind I cannot separate Warrenton from Fauquier. I  
15 do not know where the town ends and the county  
16 begins.

17 As a county taxpayer, my taxes fund the  
18 schools in Warrenton. I also love to shop, do  
19 business, visit friends, and swim at the wharf. I  
20 often refer my retiring friends to come live in  
21 Warrenton. It's an ideal town.

22 Mr. Mayor, I know you as my honest

1 jeweler. You repaired all the jewelry I inherited  
2 from my mother. It was just costume. Some would  
3 think it was junk, but you really took beautiful  
4 care of it. In fact, I was gobsmacked once when I  
5 paid an invoice for all of \$0.33.

6 I know you're honest. I recently  
7 referred a friend from Arlington to you to do the  
8 same with their inherited jewelry.

9 My apologies, Mr. Hartman. I didn't  
10 know you were in jewelry. My experience is with the  
11 Mayor.

12 My point is that the county and town  
13 are intertwined, and that what you decide tonight  
14 will affect all of us in Fauquier. If the wharf is  
15 a drain on the town's revenues and resources,  
16 negotiate with the county for more cost share.

17 And I may kick myself later when I say  
18 this, but as a non-town resident, I'd be willing to  
19 pay more than the \$5 I pay now to swim at the wharf.

20 Okay.

21 There are other ways to approach the  
22 issues of revenues, tax and raise not -- without

1 raising taxes. I know you. You're a fiscal  
2 conservative. You're an honest shopkeeper. Please  
3 apply your creativity and your dedication and your  
4 skill to this issue.

5 Thank you.

6 (Applause.)

7 MS. BURBANK: Hi. My name is Cindy Burbank,  
8 and I live on Barn Owl Court in Warrenton.

9 As you're seeing tonight, the residents  
10 of Warrenton and Fauquier County are truly  
11 extraordinary. They have a deep appreciation and  
12 affection for this town. It is part of the Norman  
13 Rockwell charm of Main Street.

14 Warrenton is something that is all too  
15 rare in this country as urbanization and  
16 industrialization spread their tentacles and wipe  
17 out vibrant small towns like Warrenton.

18 It's also the neighborliness of the  
19 people who live here. When my husband and I first  
20 moved here 12 years ago, we were amazed at the  
21 people who waved us that we did not know, and then  
22 we were amazed at how easy it was to get to know

1 them and like them. And then we, too, were waving  
2 at everyone we crossed paths with.

3 In the words of Garrison Keillor: The  
4 people here are all above average, way above  
5 average. They are smart. They come from all across  
6 the economic spectrum, and they have a wealth of  
7 experience and wisdom to draw on.

8 They are also caring. The number of  
9 non-profits here is incredible. I have been a  
10 volunteer with VolTram, Hero's Bridge, Path, and  
11 Habitat for Humanity. These organizations reach out  
12 to all kinds of people to help them. The staff and  
13 volunteers with these groups are devoted, common  
14 sense, and quick to lend a hand.

15 Your first allegiance is to town  
16 residents. We understand that. But to echo Lori  
17 and others, do not discount the residents of this  
18 county.

19 County residents know that Warrenton is  
20 the heart and soul of Fauquier County. County  
21 residents make every effort to support this town.  
22 County residents choose to dine at Warrenton

1 restaurants, to shop at Warrenton businesses, and to  
2 patronize Warrenton's services. County residents  
3 come to farmer's markets, first Fridays, fall  
4 festivals, and the Christmas parades.

5 County residents add tremendously to  
6 the vibrancy and economic health of this small town.  
7 Please weigh their concerns, too.

8 I implore you not to take these people,  
9 town and county, for granted. Do not turn a deaf  
10 ear to them. Their voices count. Their values  
11 count. They have full hearts and rich experience to  
12 draw on, and they are deeply concerned about the  
13 future of this town and this county. Do not betray  
14 us.

15 Thank you.

16 (Applause.)

17 MR. DUVALL: Mr. Mayor and members of the  
18 Town Council, as an actor I have had the privilege  
19 to play many roles over the years. My work has  
20 taken me all over the world, but I have always  
21 returned to Fauquier County, Virginia, with a sense  
22 of relief that comes from my appreciation for all

1 that makes this place special.

2 Historic Warrenton is at the center of  
3 this special place, and we must all work to preserve  
4 the character of this town.

5 I urge the Town Council to consider  
6 carefully their important decision regarding the  
7 precedent-setting SUP that might open the doors to  
8 improperly located data centers and the energy  
9 supply infrastructure that is required to power them  
10 within the town.

11 The remarkable outpouring of opposition  
12 to this proposal indicates that the vast majority of  
13 town and county residents agree that this is a bad  
14 use of this site for the many reasons you are  
15 familiar with.

16 Please vote to preserve the unique  
17 character of Warrenton and deny the Amazon SUP.

18 Respectfully yours, Robert Duvall.

19 I would like to add --

20 (Applause.)

21 MR. DUVALL: I would like to add that my  
22 wife and I have lived in this area for 27 years, and

1 my wife said at one time that I will always  
2 remember, that Virginia is the last station before  
3 heaven. Let's keep it that way.

4 (Applause.)

5 MS. NEMEROW: Good evening. My name is Jen  
6 Nemerow. I live at 585 Galena Way in the Town of  
7 Warrenton in Monroe Estates.

8 It's going to be a little hard to  
9 follow that. But thank you, Mr. Duvall.

10 Councilmembers, first and foremost, I  
11 want you to know that I love this town. I'm a  
12 native of Virginia. I grew up in Northern Virginia,  
13 and I moved out to Warrenton in Fauquier County  
14 about 12 years ago.

15 I am a mom of four young children.  
16 I've already told you that one time before. I'm a  
17 local volunteer, a community member, and a local  
18 Realtor. I have a degree in real estate and urban  
19 planning. I've sold more than 400 homes in our  
20 greater area in the last five years.

21 I know about real estate, and I know  
22 how it affects everyone involved in the process.

1                   Your decisions affect my profession and  
2 my family personally as a town resident who lives  
3 next to the old wire factory.

4                   I have dealt with clients who have  
5 faced stressful home sales as a result of the  
6 decisions of local area representatives like  
7 yourselves. I have had homebuyers choose other  
8 areas over our town recently because of current  
9 events.

10                  I am incredibly disappointed in the  
11 events that have transpired in our town in the past  
12 year. You have created a comprehensive plan that  
13 apparently some of you, yourselves, do not support.

14                  You are elected by your neighbors, your  
15 own community, to represent us, yet we all feel you  
16 are not listening. We are speaking to you, we are  
17 pleading to you, yet we feel you are not asking what  
18 we want. You are limiting what we can speak to you  
19 about or how often we can speak to you about it.

20                  You have heard from countless  
21 residents, business owners , experts, and more, and  
22 yet we still feel you are not listening to us.

1 Councilmembers, I plead with you  
2 tonight to perform your elected duties to uphold  
3 your own code of ethics and preserve our town's  
4 history and character and hear what your residents  
5 are saying to you.

6 Please do the right thing and vote  
7 tonight, and in other votes, accordingly, to what  
8 your neighbors are asking and what they want of you.

9 Thank you.

10 (Applause.)

11 MS. COLLINS: My name is Carol Collins. I  
12 live in Ward 5 in Warrenton. I've just come here to  
13 say a few things to the council. I know I'm not  
14 supposed to speak about -- of the issue right now.

15 Being involved in local government is  
16 new to me, so I looked online to see what the town  
17 website says about the council. And as other people  
18 have already mentioned, there are -- I believe you  
19 have an important task. You do have my prayers for  
20 wisdom in the decisions that you have to make. You  
21 have a big responsibility, as you know. We respect  
22 that, and we appreciate your service for that.

1           You do have to stick to the code of  
2 ethics, I believe, which refers to Councilmembers as  
3 stewards of the public interest. I like that. But  
4 it is a big responsibility.

5           And it also says that you determine  
6 policies with the advice, information, and analysis  
7 provided by, among other sources, the public.

8           In the meetings I've attended, a great  
9 deal of information and analysis has been presented  
10 by people who have researched, studied, analyzed,  
11 and have experience that bears on an issue.

12           The code of ethics says that you have  
13 meaningful involvement of the public, that you will  
14 listen to public discussions, which is why we're  
15 here. So I'm here to ask you not to ignore the  
16 public input.

17           Thank you.

18           (Applause.)

19           MS. SMITH: My name is Pat Smith. I live at  
20 215 North View Circle. I was born here. My family  
21 left. My husband and I came back here 20 years ago.  
22 I have two questions for you.

1 Who do you think you are working for?

2 (Applause.)

3 MS. SMITH: My next question is: Are you  
4 blind? Everywhere you go you see "Stop Amazon." It  
5 has to make people wonder why in the world elected  
6 officials are going against the people that pay  
7 their taxes which pays all the town's employees and  
8 you-all are kicking us in our butt.

9 (Applause.)

10 MS. EDWARDS: Good evening. My name is  
11 Tracy Edwards, and I reside on Foxcroft Road. I  
12 have been a resident of Warrenton and Fauquier  
13 County since 1995.

14 In the almost 30 years that I have been  
15 a resident there have been decisions made for both  
16 our county and here in town that have been  
17 questionable regarding balancing growth and  
18 maintaining Fauquier County as a beautiful farming  
19 community and Warrenton as a picturesque quaint  
20 town.

21 The most recent approval of Waterloo  
22 Junction that includes 47 townhomes and retail

1 behind O'Brien's Irish Pub is a clear representation  
2 that you, the current council, are not looking out  
3 for the best interests of the residents of the Town  
4 of Warrenton.

5           While the plans may look good on paper,  
6 adding 47 homes to that small area will result in  
7 traffic, parking, and a pedestrian nightmare.

8           The side streets cannot support  
9 overflow parking, especially Norfolk Drive being an  
10 older neighborhood with narrow streets and no  
11 sidewalks. The almighty dollar went above safety --  
12 the safety of pedestrians and keeping our streets  
13 open and safe. Which brings me here tonight.

14           In doing my due diligence before  
15 speaking tonight I have yet to read anything that  
16 provides full disclosure for how this data center  
17 and subsequent data centers waiting in the wings  
18 would provide substantial financial benefit that  
19 trickles down to being significantly beneficial to  
20 us, the taxpayers.

21           (Applause.)

22           MS. SMITH: Nor has there been full

1 disclosure of noise levels, construction, and  
2 environmental impact for everyone.

3           What I have read is that residents in  
4 surrounding counties that now have a data center  
5 next to them are extremely distraught from the  
6 negative ramifications of these buildings.

7           Without the ability to provide us full  
8 disclosure, your decision should be based solely on  
9 a long forgotten way of thinking: Do unto others as  
10 you would have done unto you.

11           (Applause.)

12           MS. SMITH: Your decision tonight will have  
13 profound negative impacts on many residents going  
14 forward.

15           Do any of you live in these  
16 neighborhoods that are going to be drastically  
17 affected?

18           If you don't, think about these  
19 questions: Would you want massive construction  
20 noise or construction vehicles impeding traffic to  
21 your home? Do you want your land values to plummet?  
22 Do you want to look out your window and see a

1 massive concrete 25-foot-high-plus? Would you want  
2 your backyard solitude to be replaced by the buzzing  
3 or humming of electrical transmission?

4 If you answered no to any questions,  
5 then your vote must be no. You should not approve a  
6 plan that you would not want to happen to you or  
7 your family.

8 When it's time to vote, remember, do  
9 unto others as you would have done unto you.

10 Thank you.

11 (Applause.)

12 MS. LAVASH: I hope you forgive me for  
13 speaking before my turn, but I have to go to school  
14 tomorrow, so.

15 My name is Lalo Lavash (ph), and I'm  
16 speaking on my own behalf.

17 I live in Cedar Run District, just  
18 outside of Warrenton, which is a quaint and charming  
19 town. It is my personal opinion that putting a data  
20 center behind Country Chevrolet will distort the  
21 charming look and feel of our town.

22 While it may bring in some tax revenue,

1 the amount of revenue doesn't make up for the  
2 downsides.

3 For example, most people don't want to  
4 see a large unsightly building near the town  
5 entrance. This building won't be something that  
6 people in town can use because it's a high-security  
7 building surrounded by an 8-foot metal fence.

8 You should also consider the problem of  
9 noise. A retired NASA engineer from Amazon's noise  
10 study is not credible. People in town don't want to  
11 hear a loud humming caused by equipment that never  
12 stops.

13 If you let Amazon put a data center in  
14 our town, you're paving the way for other data  
15 centers to ruin our town even more. If you vote  
16 yes, the town will never be the same again.

17 I know there's a lot of pressure on  
18 your shoulders, but I believe you will make the  
19 right decision.

20 Thank you.

21 (Applause.)

22 MS. AMSTER: My name is Barbara Amster. I

1 live at 726 Acorn Court.

2           And contrary to what you may have read  
3 in today's Washington Post, it says it's Fauquier's  
4 wealthy that oppose the data center.

5           (Laughter.)

6           MS. AMSTER: Actually, it is the poorest  
7 citizens of Warrenton who are most in the path of  
8 the data center, living in the -- living in District  
9 1, which is the closest Warrenton has to affordable  
10 housing.

11           District 1 is almost entirely made up  
12 of townhouses -- many of which are rentals --  
13 apartments, senior living, schools. It is a  
14 completely integrated neighborhood of young  
15 families, seniors, and recent immigrants. These are  
16 not the wealthy or the powerful. We are the  
17 powerless who can rely only on our elected officials  
18 to protect us.

19           Our own council member has turned her  
20 back on us, and so all we have left to appeal to is  
21 you, the body as a whole.

22           The ones whose minds seem to be made up

1 from the very start, we don't understand you.

2 I have stood before you four times to  
3 plead for my neighborhood, my family's health, my  
4 property value, and my deeply felt affection for  
5 Warrenton.

6 There's little more to say, so I appeal  
7 to your individual consciences and your pride in  
8 your own family name. Remember your legacy. A yes  
9 vote here today will taint your names forever --

10 (Applause.)

11 MS. AMSTER: -- as the data centers  
12 accumulate and strangle the Warrenton we love.

13 You were elected to represent us, not  
14 huge companies like Amazon. We put our trust in you  
15 to do the right thing.

16 (Applause.)

17 MS. BOLTHOUSE: Hi, I'm Julie Bolthouse,  
18 director of land use with Piedmont Environmental  
19 Council, and I would like to share some trends and  
20 news with you to emphasize the power of the data  
21 center industry in Northern Virginia.

22 So they have an army of lobbyists. And

1 rules that you think are in place right now, but  
2 they are changing and they continue to change in  
3 their favor, and they gain -- as they gain more  
4 influence and power in our state.

5 First, data center development  
6 continues to boom in both Loudoun and Prince William  
7 County. Data centers are also being considered in  
8 Stafford, Spotsylvania, Orange and Culpeper County.

9 Dominion continues to move forward with  
10 a \$627 million, 500 KV transmission loop project  
11 throughout the floodplain of Broad Run to serve new  
12 data centers coming online and existing data centers  
13 that are increasing the density of their servers.

14 Loudoun Wildlife and PEC are pushing  
15 back, but it's deemed a reliability project, so  
16 there's little that can actually be done.

17 Due to projected grid reliability  
18 issues during the summer peak, the issuance of a  
19 local variance for data centers located in the  
20 counties of Fairfax, Loudoun, and Prince William is  
21 being considered by the Department of Environmental  
22 Quality. That variance will allow data centers to

1 run their diesel generators for more and longer  
2 periods of time than is currently allowed under the  
3 Clean Air Act standards.

4 Diesel generators release particulate  
5 matter that impacts our health. Prolonged exposure  
6 can increase the risk of cardiovascular,  
7 cardiopulmonary, and respiratory disease and lung  
8 cancer.

9 There are 101 data center campuses  
10 under this variance and each of them has a number of  
11 generators.

12 But let's go into the General Assembly.  
13 Study bills proposed by Chap Peterson to study the  
14 impacts of the explosive data center development on  
15 our grid, the rate payer, and the environment  
16 failed in the House after lobbyist after lobbyist  
17 and developer after developer got up in their suits  
18 and opposed it.

19 The Cloud Computing Cluster  
20 Infrastructure Grant Fund is sailing through. This  
21 extends the data center sales and tax exemption to  
22 2040, and establishes a \$140 million grant for data

1 centers to utilize for site development.

2 Keep in mind that Virginia has already  
3 offered 135.9 million in tax breaks to the data  
4 center industry in 2022.

5 Be careful who you think your friends  
6 are, because I can guarantee you I'm not one of  
7 these high-paid lobbyists.

8 Thank you.

9 (Applause.)

10 MS. BROADDUS: Hello. My name is Julie  
11 Broaddus. I own Old Bust Head Brewing Company, and  
12 a property on Main Street. I live just a few miles  
13 from where the data center will come in.

14 This is a powerful change coming to  
15 Virginia. We see it happening through Loudoun and  
16 Prince William counties, and we see and feel the  
17 impact it has on those communities.

18 This application is the first  
19 full-scale data center in Fauquier County. Do you  
20 have a plan or vision for more? Do you have a plan  
21 or a vision on how to prevent more?

22 Why are they so unlike any other use

1 that has existed before? For me, there are three  
2 main reasons: One, the scale; two, the emptiness;  
3 and, three, the power requirement.

4 To give a sense of scale, the footprint  
5 of the Amazon data center will be 200,000 square  
6 feet. That is twice the size of our Home Depot.  
7 And including the added level for equipment, about  
8 twice as tall.

9 To give a sense of emptiness, unlike a  
10 Home Depot, almost no one goes in there. We're not  
11 invited to go in there. We're not allowed to go in  
12 there. These enormous buildings are cold and  
13 unwelcoming. We all know this about data centers,  
14 and I assume we have all felt this. If you haven't,  
15 drive through the black hole of data centers in  
16 Ashburn. You get a really strange feeling.

17 (Applause.)

18 MS. BROADDUS: We were just there the other  
19 night, and I realized this feeling is just like the  
20 one described in Harry Potter. Like, you are  
21 encircled by dementors, and paraphrasing, it is an  
22 intense cold that sucks the happiness from you until

1 you have no sense of self anymore, a feeling that  
2 you will never be cheerful again.

3           This is what we're inviting into our  
4 community and what has already left its mark in  
5 Ashburn, driving away tourism, employment, people.  
6 There is no there there.

7           As for the power requirement, this  
8 center at full build-out will consume about the same  
9 or possibly even more power than our entire town.  
10 The power requirement in Northern Virginia is  
11 expected to double over the next 14 years because of  
12 data centers; and it's already maxed out. That  
13 means more high-voltage lines will be needed.

14           And if we bring a large scale data  
15 center to Warrenton, it will be hard to argue that  
16 they shouldn't come through here.

17           At this moment, we still have control.  
18 But this is the last moment. Right now is our last  
19 opportunity to set ground rules that would be the  
20 precedent for all future applications, which we all  
21 know will absolutely come.

22           This precedent will be inherited by all

1 future mayors, town councils, and people in the  
2 community.

3           If this government is unhappy with the  
4 burden of deferred maintenance and the costly rec  
5 center they inherited, think how future mayors and  
6 town councils will feel when, because of this  
7 government, they are left without the ability to set  
8 adequate height, footprint, landscaping, air  
9 quality, enforceable employment requirements to  
10 defend against the power towers that the future data  
11 centers will bring.

12           We've encountered before negative sound  
13 impacts. We have an ordinance for that. We've  
14 encountered applications for uses in inappropriate  
15 locations. We have never --

16           MAYOR NEVILL: Thank you. Your time is up.

17           MS. BROADDUS: Okay. Thank you.

18           (Applause.)

19           MAYOR NEVILL: Before we proceed, we are  
20 trying to -- this citizens' time is intended for  
21 issues not on the SUP. If you'd like to speak on  
22 the SUP, we can move to public hearing and include

1 those.

2 UNIDENTIFIED SPEAKER: Absolutely.

3 MAYOR NEVILL: Excuse me. Then we'll have  
4 to do that procedurally. We have an item on the  
5 agenda to move forward. So unless there's anyone  
6 here wishing to speak on an issue not on the SUP for  
7 citizen's time, I'll invite them up now.

8 UNIDENTIFIED SPEAKER: We're past that.

9 MAYOR NEVILL: Not according to the agenda,  
10 ma'am. I'm sorry.

11 So if citizens' time is complete, then  
12 we will move on to an approval of the agenda. I'll  
13 turn to council for an approval of the agenda.

14 MR. HAMBY: Mayor, (indiscernible).

15 MAYOR NEVILL: So moved by Councilman Hamby.

16 MR. HARTMAN: Second.

17 MAYOR NEVILL: Second by Vice Mayor Hartman.

18 Is there discussion on the motion?

19 MR. MOONEY: Mr. Mayor, I'd like to amend  
20 the agenda to add an item to vote to direct the town  
21 staff to release to the Town Council those items of  
22 communication between the former town manager and

1 Amazon to which the town has asserted its privilege,  
2 that we need a vote for.

3 MR. MCGUIRE: And I second that motion.

4 MAYOR NEVILL: So moved by Councilman  
5 Mooney. Seconded by Councilman McGuire.

6 Is there discussion on the motion?

7 MR. SEMPLE: Yes, I would like to say a few  
8 words on it --

9 MAYOR NEVILL: Yes, sir.

10 MR. SEMPLE: -- Mr. Mayor.

11 I'm in favor of this. I have asked the  
12 council to release, for my review, these emails, and  
13 the decision was that I needed a -- I needed a  
14 majority vote of the council for me, a member of  
15 council, to see them. So I think at the very least  
16 they should be released to the public.

17 Thank you.

18 (Applause.)

19 MAYOR NEVILL: We have a motion and second.

20 Is there further discussion?

21 (No responses.)

22 MAYOR NEVILL: All in favor.

1 MR. MCGUIRE: I'm sorry.

2 MAYOR NEVILL: Mr. McGuire.

3 MR. MCGUIRE: Mr. Mayor, yes.

4 I also believe it's a point of  
5 information. For us to really vote on this, we  
6 really need to see that information. I believe  
7 that's correct under Robert's Rules. So we need to  
8 know that information. We need to see it. And I'd  
9 like to know who has seen it, and why we can't see  
10 it as duly elected officials.

11 (Applause.)

12 MAYOR NEVILL: I guess that will be  
13 discussed at the time of the motion. Obviously, the  
14 FOIA counsel has indicated certain items are  
15 privileged for various reasons. And according to  
16 our council rules, that the -- or council  
17 guidelines, that in order for these to be released  
18 for dissemination among council, the guidance has  
19 been to request a vote from council to disseminate  
20 them among members.

21 MR. MOONEY: Are we going to move that to  
22 new business?

1           MAYOR NEVILL: We'll move that to new  
2 business.

3           MR. SEMPLE: All right.

4           MAYOR NEVILL: Okay. It's a matter of a  
5 FOIA issue, and we're just following the FOIA  
6 counsel recommendations.

7           The request -- in order to release the  
8 information to individual members of council,  
9 council can only direct as a body; and so in order  
10 for Councilmembers to request that, council as a  
11 body needs to authorize the release of those records  
12 for individual members.

13           So we will discuss that. We'll add  
14 that to new business.

15           UNIDENTIFIED SPEAKER: (Indiscernible.)

16           MAYOR NEVILL: Excuse me. Excuse me,  
17 please.

18           Is there further discussion from  
19 council on the motion?

20           MR. MOONEY: Nope.

21           MR. SEMPLE: Well, Mr. Mayor, I'm just  
22 wondering why since it seems to be a condition

1 precedent to our review of this SUP, why we  
2 shouldn't take up that matter now?

3 MAYOR NEVILL: Mr. Crim, point of order.

4 UNIDENTIFIED SPEAKER: You're embarrassing.

5 MAYOR NEVILL: Could this be moved to before  
6 the public hearing?

7 MR. CRIM: That's the council's choice. But  
8 if you want to look at the emails, the confidential  
9 emails as a former --

10 UNIDENTIFIED SPEAKER: We can't hear you.

11 MAYOR NEVILL: Excuse me. Please restrain.  
12 And order, please.

13 MR. CRIM: If you want to look at the  
14 confidential emails of the prior town manager or the  
15 current town manager, then you would not be able to  
16 do that tonight. You would need to have a vote to  
17 postpone action on the SUP if you want to review  
18 that before the vote.

19 So the motion before you is a motion to  
20 amend the agenda --

21 MAYOR NEVILL: The agenda, yeah.

22 MR. CRIM: -- to put this on the new

1 business.

2           MAYOR NEVILL: Okay. So it's true, the  
3 current motion before us is a motion to amend the  
4 agenda to add to new business.

5           MR. SEMPLE: I would like to amend that  
6 motion. I would like to move that we take up that  
7 matter now before the SUP and we decide --

8           MR. CRIM: So, as I understand, the motion  
9 to amend the -- motion to amend the agenda would be  
10 to have that item placed prior to the public  
11 hearing?

12           MAYOR NEVILL: Okay.

13           MR. CRIM: Is that the -- is that correct?  
14 So rather than having it placed on new business, you  
15 would take that up out of order on the agenda prior  
16 to the public hearing. Am I correct?

17           MAYOR NEVILL: That is -- yes. So there's a  
18 motion to amend the amendment -- the motion to amend  
19 to add the item to. Or unless you wish to rescind  
20 the original and rephrase it.

21           MR. MOONEY: Okay.

22           MR. HAMBY: Mr. Mayor, has --

1 UNIDENTIFIED SPEAKER: (Indiscernible.)

2 MAYOR NEVILL: Excuse me, please. Order.

3 MR. HAMBY: Has the appeal been filed for  
4 the FOIA case?

5 MR. CRIM: Not to my knowledge.

6 MR. HAMBY: So it hasn't been, because --

7 MR. CRIM: I've not been served with  
8 anything.

9 MR. HAMBY: -- it's reported --

10 MR. CRIM: All I know is what it says in the  
11 paper.

12 MR. HAMBY: It's reported in the news that  
13 they've appealed the FOIA case. So should the  
14 records stay sealed until the FOIA case has run its  
15 course?

16 MR. SEMPLE: They have not appealed yet.  
17 They are waiting for the final ruling from the judge  
18 until they --

19 MAYOR NEVILL: Excuse me, please. Order.

20 MR. HAMBY: I'm just reading the news. It's  
21 right here.

22 So has the appeal been filed? If the

1 appeal has been filed, should it remain sealed until  
2 their appeal is over, or --

3 UNIDENTIFIED SPEAKER: No.

4 MR. HAMBY: -- should we --

5 MR. MCGUIRE: But I think we're talking  
6 about two separate issues here. One is a court  
7 fight. These are Councilmembers that want to see  
8 this information. I think we have a right to do  
9 that. It's a separate issue.

10 (Applause.)

11 MAYOR NEVILL: All right. So to get back to  
12 where we were, we have a motion on the floor to  
13 amend the agenda to add a request to release these  
14 records for individual Councilmembers' review. That  
15 has been moved and seconded.

16 And then we have a motion to amend that  
17 to add it prior to the public hearing.

18 And so there's a motion. Is there a  
19 second on that motion?

20 MR. CRIM: I think you've already discussed  
21 it so a second would be unnecessary at this time.

22 MAYOR NEVILL: Okay.

1 MR. CRIM: So the order of the vote would be  
2 on the placement of the agenda item first, and then  
3 on whether the agenda should be amended at all, and  
4 then finally on the agenda as amended.

5 MAYOR NEVILL: Okay. So the first motion  
6 before us is to move the item to prior to the public  
7 hearing.

8 MR. MOONEY: And what would the purpose --  
9 or what would the procedure be for that?

10 MR. HAMBY: What's the procedure in order to  
11 look at -- or to move forward with Mr. Semple's --  
12 can you explain the procedure?

13 MR. CRIM: The procedure for this motion, or  
14 the procedure for releasing the documents?

15 MR. HAMBY: Releasing the documents.

16 MR. CRIM: The procedure for releasing the  
17 documents, if we're directed by staff -- by the  
18 council, it would be for the staff to collect the  
19 records, which, as I understand it, are the emails  
20 between the previous town manager and Amazon, and  
21 prepare those for the review of the Town Council  
22 members.

1           So that would be a process that we  
2 would -- could do tomorrow. But unless you want to  
3 halt the meeting while we go back to town hall and  
4 collect those emails, there's no way for us to do  
5 that tonight.

6           UNIDENTIFIED SPEAKER: (Indiscernible.)

7           MR. MOONEY: For the discussion,  
8 Mr. Mayor -- for the discussion, I was told that as  
9 an elected official I can't see the emails unless we  
10 vote and have a majority of the vote of the council  
11 say that I, as an elected official, can see the  
12 emails of an employee. That's my understanding.

13           So my motion to amend the agenda is to  
14 get that vote so that I can see the emails that were  
15 redacted.

16           Now, prior to or after the public  
17 hearings, I think it's imperative that elected  
18 officials be able to see things that could  
19 drastically change opinions on an incredibly  
20 consequential issue.

21           (Applause.)

22           MR. MCGUIRE: I agree with that.

1 MR. SEMPLE: May I speak -- be recognized?

2 MAYOR NEVILL: Yes.

3 MR. SEMPLE: The reason I had moved to amend  
4 before the public hearing is that it doesn't make a  
5 whole lot of sense to move forward unless we've had  
6 a chance -- if they're substantive -- because by the  
7 time the public hearing is over, we will probably  
8 vote. And if we're going to wait until the end of  
9 this meeting, this will have no material impact or  
10 benefit upon our review.

11 So that's why I'm -- I have amended to  
12 take up this vote now, and then to make those emails  
13 available to council for review as a condition of  
14 our continuing this process.

15 MAYOR NEVILL: So the first motion that  
16 we're considering is the motion to move the item to  
17 prior to the consent agenda. So shall I call the  
18 question on that?

19 Is there further question or further  
20 discussion on where we're standing?

21 MR. MOONEY: Can you say that again,  
22 Mr. Mayor? I didn't hear you. I cannot hear.

1           MAYOR NEVILL: Sorry. So the motion right  
2 now we have before us is a motion to move the  
3 request to prior to the public hearing immediately  
4 following the approval of the agenda.

5           So if that is the will of council, we  
6 can take a vote on that. And that's the amendment  
7 to the amendment to amend -- or amendment to amend  
8 the agenda.

9           MR. MOONEY: Yes, Mr. Mayor.

10          MAYOR NEVILL: Any further discussion?

11          MR. SEMPLE: I'm sorry. Would you restate?  
12 I'm sorry. I want to know what amendment amending  
13 amending we are amending.

14          MAYOR NEVILL: We have two amendments --

15          (Laughter.)

16          MR. MCGUIRE: I couldn't have said it better  
17 myself.

18          MR. SEMPLE: All right. I'm having problems  
19 with the acoustics up here, and I apologize.

20          MR. CRIM: Mr. Mayor, again, what you would  
21 be voting on first is an amendment to the amendment  
22 to the agenda.

1           MAYOR NEVILL: Right.

2           MR. CRIM: And that would be to have --  
3 change the amendment to the agenda to move to add  
4 this new item next after the approval of the agenda.

5           MAYOR NEVILL: Yes.

6           MR. CRIM: And then if you vote on that, you  
7 vote on the amendment to the agenda, and then you  
8 vote on the agenda.

9           MAYOR NEVILL: Yes, sir.

10          MR. CRIM: So that's -- you can do that in  
11 five -- you know, in 15 seconds.

12          MAYOR NEVILL: Yes. Okay.

13                 So the first motion before us, I'll  
14 call the question on that, is the motion to move the  
15 amendment to the agenda to following the approval  
16 agenda item before the public hearing.

17          MR. SEMPLE: Okay. Great.

18          MAYOR NEVILL: So all in favor of the  
19 placement of the amendment to prior to the public  
20 hearing? Opposed?

21                 Ms. Sutphin?

22                 (No response.)

1 MAYOR NEVILL: Ms. Sutphin, are you --

2 MS. SUTPHIN: I'm sorry, I'm a little bit  
3 confused.

4 MAYOR NEVILL: Ms. Sutphin, the question --

5 MS. SUTPHIN: I'm confused as to what  
6 exactly we're voting for.

7 MAYOR NEVILL: Ms. Sutphin, what we are  
8 currently -- it is a placement of the request to  
9 move -- there's a first motion to amend the agenda  
10 to add discussion to release the FOIA documents to  
11 individual councilmembers for review. This is the  
12 initial, primary amendment.

13 The subsidiary amendment to that is  
14 requesting that that be moved to prior to the public  
15 hearing. So currently we have three yeas and three  
16 nays.

17 (Indiscernible shouting.)

18 MS. SUTPHIN: I'm a nay.

19 MAYOR NEVILL: So the motion to --

20 (Booing.)

21 MAYOR NEVILL: Please keep it civil and  
22 orderly. So the motion to move the amendment to

1 follow the public hearing has failed.

2                   Now the motion is to add to new  
3 business under new business discussion releasing the  
4 FOIA documents to individual councilmembers. So  
5 that is amending the agenda to add to new business  
6 that release.

7           MR. MCGUIRE: And Mr. Mayor, do we get a  
8 chance to debate that or...

9           MAYOR NEVILL: Yes.

10          MR. HEROUX: I believe we do.

11          MAYOR NEVILL: Yes, the debate. So now the  
12 discussion is to --

13          MR. MCGUIRE: Right.

14          MAYOR NEVILL: -- add that agenda item to new  
15 business.

16          MR. MCGUIRE: So I would like to speak in  
17 favor of it, because I think the truth is mighty and  
18 should be heard.

19          UNIDENTIFIED SPEAKER: Yes.

20          MR. MCGUIRE: I think we need to know  
21 everything before we make a decision. And I believe  
22 everybody is honest on this board. And I think we

1 should be allowed to see that. As a council member,  
2 I need to know all the facts. And everybody is  
3 honest, and I believe that's the case. So let's see  
4 what's going on.

5 (Applause.)

6 MAYOR NEVILL: The motion on the floor is  
7 the motion to amend. Further discussion?

8 MR. SEMPLE: Yes, Mr. Mayor. May I be  
9 recognized?

10 I mean, that's -- we're at over 3,400  
11 emails that are involved in this. And I don't know  
12 if I have 3,400 emails on my computer.

13 I think it's absolutely important for  
14 members of council to be fully aware of the entire  
15 record, and it seemed to me that would be a basic  
16 obligation of our duty of -- to properly serve the  
17 public and to execute our duty, constitutional duty;  
18 and, therefore, I can't understand why we even need  
19 to have a majority vote to see these.

20 (Applause.)

21 MR. SEMPLE: And now that appears to be the  
22 recommended requirement from our town attorney. I

1 just urge council to recognize that these emails are  
2 central to our duty as members of this council and  
3 to our responsibility to serve the public honestly  
4 and fairly.

5           And there have been just significant  
6 questions about the relationship that our previous  
7 town manager had in this proceeding, and I think  
8 it's something that we should be able to look at.

9           (Applause.)

10           MR. SEMPLE: So if there's nothing there,  
11 there will be nothing there, but I think we should  
12 have just an opportunity to look at it.

13           Thank you.

14           MR. MOONEY: So Mr. Mayor, point of  
15 clarification. I asked that the council move to  
16 amend the agenda to put on the agenda a vote for the  
17 council to vote to approve with -- to let elected  
18 officials see emails, and Mr. Semple made a motion  
19 to move that to the agenda or to before -- or before  
20 the public hearings.

21           And for the record, that was voted down  
22 by the majority of the Town Council?

1           MAYOR NEVILL: Yes, the placement of it  
2 failed the vote. So now the motion is to add it to  
3 new business for a discussion. So this would move  
4 the discussion to -- the vote on the release would  
5 be under new business.

6           MR. MOONEY: Under H. Got it.

7           MAYOR NEVILL: Yeah, under H.

8           MR. MOONEY: So can I move to amend my  
9 current -- my current -- can I move to amend the  
10 current amendment to have another vote to see if we  
11 can get a vote to see if elected officials can see  
12 the emails after the public hearing, but prior to a  
13 vote?

14           (Appause.)

15           MAYOR NEVILL: I'm sorry, could you please  
16 clarify that?

17           (Laughter.)

18           MR. MOONEY: Yes, Mr. Mayor.

19                   Am I allowed, Mr. Crim, to take away my  
20 first motion and remotion so that everybody is  
21 clear?

22           MR. CRIM: No, sir. Once the motion is made

1 and debated, it belongs to the body as a whole.

2 There's no such thing as withdrawing a motion.

3 MR. MOONEY: Very well.

4 I move to amend my initial amendment to  
5 the agenda to put after the public hearing -- since  
6 before the public hearing has gotten voted -- to  
7 move it after the public hearing but before our vote  
8 that the Town Council votes to allow elected  
9 officials to see the emails prior to the vote.

10 MR. SEMPLE: I second.

11 (Applause.)

12 MAYOR NEVILL: So was that a clear motion  
13 to --

14 MR. CRIM: Yes.

15 MAYOR NEVILL: So that's clear and clean?

16 MR. CRIM: A subsidiary amendment to the  
17 main amendment.

18 MAYOR NEVILL: Okay. And so that would move  
19 the discussion of that release of the emails  
20 following the closure of the public hearing and  
21 prior to --

22 MR. CRIM: Action.

1 MAYOR NEVILL: -- action.

2 MR. MCGUIRE: Mr. Mayor.

3 MAYOR NEVILL: I'm sorry, is that clear?

4 MR. CRIM: That is correct.

5 MAYOR NEVILL: Okay.

6 MR. MCGUIRE: Mr. Mayor.

7 MAYOR NEVILL: Mr. McGuire.

8 MR. MCGUIRE: Yes. So I want to know what  
9 is the precedent that I have to have a vote to see  
10 this. That's what I want to know. What is this  
11 based on? Like, I think I can look at them. I  
12 think everybody could look at them. I think that's  
13 a privileged thing. I think others have probably  
14 seen them.

15 I want to know what this is based on  
16 that it has to take a vote of the council for me to  
17 see this.

18 MAYOR NEVILL: A point of order is that that  
19 discussion would actually be germane at the point of  
20 the discussion. Right now --

21 MR. MCGUIRE: Well, I'm asking you now.

22 MAYOR NEVIL: I know, sir. But the

1 discussion is --

2 (Applause.)

3 MR. MCGUIRE: Well, it is germane because  
4 we're going on precedent that I don't know anything  
5 about. So I want to know where in Robert's Rules or  
6 where in the town rules that we have to vote on this  
7 for me to see this.

8 MR. CRIM: The Mayor has ruled it not  
9 germane, so that is -- I'm not going to answer a  
10 question that the Mayor has ruled is not germane.

11 (Booing.)

12 MR. MCGUIRE: Well, you brought it up,  
13 Counselor, so I want to know, like, where you come  
14 from on this.

15 MAYOR NEVILL: That is germane to the point  
16 when we get to the actual motion, when we get to the  
17 discussion on that. Currently the motion on the  
18 floor is the motion of the placement of the agenda  
19 item.

20 Per Robert's Rules, the discussion  
21 should be germane specific to the motion on the  
22 floor and not the -- we're getting ahead of

1 ourselves, in other words.

2                   So discussion right now is on the  
3 placement of the -- so we have a second amendment to  
4 request that the item be placed following the  
5 closure of the public hearing and before any action  
6 is taken.

7                   So is there discussion on that?

8                   MR. SEMPLE: Well, once again, Mr. Mayor,  
9 this will accomplish a very important responsibility  
10 for the council, to be able to review all of these  
11 emails. They are integral to the process that we  
12 have experienced since this application was --  
13 before this application was submitted. And I think  
14 it's germane and material to our decision, and I  
15 think we would be arbitrary and capricious and  
16 unreasonable if we didn't do this.

17                   (Applause.)

18                   MAYOR NEVILL: So with the motion on the  
19 floor, the amendment to the amendment to place an  
20 item following the closure of the public hearing and  
21 prior to action, all in favor? Opposed?

22                   Councilman Sutphin?

1 MS. SUTPHIN: Opposed.

2 MAYOR NEVILL: Motion fails. Please,  
3 decorum.

4 UNIDENTIFIED SPEAKER: What are you hiding?

5 MAYOR NEVILL: Please, order. Order,  
6 please. So the motion now is to add to new  
7 business.

8 So we've exhausted motions to place it  
9 prior to the public hearing and following. So now  
10 the motion on the floor is to move it to new  
11 business.

12 Is there further discussion on the  
13 movement to add it to new business?

14 (No responses.)

15 MAYOR NEVILL: Hearing none. All in favor?  
16 Opposed?

17 Councilman Sutphin?

18 MS. SUTPHIN: Yea.

19 MAYOR NEVILL: I'm sorry, was that a yea?

20 UNIDENTIFIED SPEAKER: Yes, I heard a yea.

21 MAYOR NEVILL: So it's a 5-2 approval to add  
22 that to new business.

1 MR. MOONEY: So, Mr. Mayor, as a point of  
2 clarification, the elected officials won't be able  
3 to see the emails until after we vote?

4 MAYOR NEVILL: Yeah.

5 MR. MOONEY: Okay.

6 MAYOR NEVILL: So it is --

7 UNIDENTIFIED SPEAKER: (Indiscernible.)

8 MAYOR NEVILL: So that has been added to new  
9 business. We now have the agenda itself to adopt.

10 Is there any further discussion on the  
11 agenda?

12 UNIDENTIFIED SPEAKER: (Indiscernible.)

13 MAYOR NEVILL: It's already been moved and  
14 seconded.

15 UNIDENTIFIED SPEAKER: Oh, I'm sorry.

16 MAYOR NEVILL: That's all right.

17 All in favor of approving the agenda as  
18 amended?

19 (Multiple responses.)

20 Councilman Sutphin?

21 MR. SEMPLE: I didn't vote, Mr. Mayor.

22 MAYOR NEVILL: I'm sorry.

1 MR. SEMPLE: Nay. For clarification, I'm  
2 voting -- I'm sorry. I wish to clarify.

3 Again, I reiterate the fact that moving  
4 it to the agenda means we will not be able to see it  
5 before we vote. I think it's good that we put it on  
6 the agenda. So if I sound confused, I'm a bit  
7 confused after all this. But then if that's the  
8 only option that's available, then I will vote aye.

9 MAYOR NEVILL: I'm sorry, so your vote is an  
10 aye?

11 MR. SEMPLE: Aye.

12 MAYOR NEVILL: Okay.

13 Councilwoman Sutphin?

14 UNIDENTIFIED SPEAKER: Postpone the vote.

15 MS. SUTPHIN: Okay. So if I vote aye --

16 MAYOR NEVILL: Okay.

17 MS. SUTPHIN: -- this is going to the --

18 MAYOR NEVILL: This is the approval of --

19 MS. SUTPHIN: I want to know who is on first

20 and --

21 MAYOR NEVILL: I'm sorry. This is the

22 approval of the agenda as amended including under

1 item H, item number 3, would be to -- discussion of  
2 the release of the emails at the -- involved in the  
3 lawsuit brought forth by CFFC. So thus far we have  
4 six ayes to approve the agenda.

5 MR. MCGUIRE: Mr. Mayor, I'm sorry. Did you  
6 just say that we were postponing a vote on the CFFC  
7 lawsuit? I thought it was on the floor about  
8 Councilmembers looking at the email.

9 MAYOR NEVILL: It is the release of the  
10 emails specific to -- at the request of council,  
11 correct.

12 MR. MCGUIRE: Yeah. That we see them, yes.

13 MAYOR NEVILL: Yes.

14 MR. MCGUIRE: Just to be clear, yes.

15 MAYOR NEVILL: That is the agenda item, yes,  
16 sir.

17 MR. MCGUIRE: Okay. Gotcha.

18 MAYOR NEVILL: Councilwoman Sutphin?

19 MS. SUTPHIN: Okay. Aye.

20 MAYOR NEVILL: Okay. So the motion passes  
21 unanimously.

22 MR. MOONEY: Mr. Mayor, I said nay.

1           MAYOR NEVILL: I'm sorry?

2           MR. MOONEY: I said nay.

3           MAYOR NEVILL: Okay. I'm sorry. My  
4 apologies. Councilman Mooney is a nay.

5           MR. MCGUIRE: Let me amend the record. I'm  
6 a nay, as well.

7           MR. SEMPLE: I also say nay.

8           MAYOR NEVILL: So it is a 4-3 vote to  
9 approve the agenda as amended.

10           Okay. All right. That will bring us  
11 to the public hearing, and we can reopen the public  
12 hearing continued from January 10th. It is reopened  
13 at 8:53 p.m. And I believe we have two speakers  
14 lined up.

15           And then, Mr. Clough, please, will you  
16 read an instruction to lay out the ground rules.

17           MR. HEROUX: Mr. Mayor, thank you. Just a  
18 declaration as required by Virginia Code. Declare  
19 that I have no conflict of interest, and I have made  
20 a conflict of interest declaration that has been  
21 filed with Mr. Clough and is available for public  
22 release.

1 MR. CLOUGH: Mr. Mayor, we'll start with the  
2 speakers from 1/10 that had -- had been signed up  
3 but not had the opportunity to speak yet. We may --  
4 we'll call those names, and see if they are in the  
5 audience, and then we'll proceed with the order of  
6 operations from the public hearing that we've got  
7 tonight, including Warrenton residents first.

8 The organizations that have signed up  
9 that have already spoken will not get time, but any  
10 new organization will get five minutes to speak.

11 Citizens will have three minutes to  
12 speak, sir.

13 MAYOR NEVILL: Okay. Thank you. And,  
14 again, as with citizen's time, citizens are --  
15 speakers are reminded to state their name and  
16 address or their ward or magisterial district for  
17 the record.

18 So we have two speakers from citizens'  
19 time who are lined up, so we will afford them, and  
20 then we will go to the order as called by  
21 Mr. Clough.

22 MR. CLOUD: Does that mean I'm up? Hey, I'm

1 Chris Cloud. And I'm in Marshall District. And I  
2 want to speak about the data centers; and I want it  
3 to be on the record if that's possible. Doesn't  
4 really matter one way or the other.

5 In shocking agreement with Ms.  
6 Broaddus, I've been in Ashburn a lot. I'm not  
7 advocating for data centers. I think they are  
8 Dante's third circle of hell, but I have not heard  
9 one person yet ask the correct question. Nobody is  
10 asking the right question.

11 I remember when everybody brought out  
12 their pitchforks and their torches and they ran  
13 Disney off. Yay, no Disney America. And the exact  
14 same piece of property is now known as Dominion  
15 Valley.

16 And I remember when it -- when property  
17 in Gainesville was eminent domain because it was  
18 adjacent to property that butted up to the sacred  
19 battlefield. That property in question is now the  
20 commuter parking lot on I-66 in Gainesville.

21 Be careful what you-all wish for. This  
22 is not a feasibility study for Amazon. They spent a

1 million dollars an acre for that land. It's not a  
2 question about data centers or not data centers.  
3 It's a question about what they're going to do with  
4 property they rightfully own. And I challenge  
5 anybody in here to turn down a million dollars an  
6 acre and be very concerned about what happens to it  
7 when you're in the islands.  
8 If it's not a data center, they have  
9 every right. You need to ask what are they right to  
10 do -- what do they have every right to do?  
11 Do you want a fulfillment center up  
12 there? Do you want to see a thousand vans coming  
13 and going every day? Do you want to see Dominion  
14 Valley up there? Is that better? With the hotels  
15 and the hospitals and the fire stations and the  
16 schools and the drain on the entire -- the  
17 environment, the community?  
18 That's fine, but don't go into this  
19 blindly because it's going to give you another --  
20 they're not going to give up the property they spent  
21 a million dollars an acre for. And it's theirs.  
22 Oh, and by the way, we do have personal property

1 rights in this country. 1.3 million people have  
2 died defending our rights, and they have a right to  
3 do things with their property.

4 Now, it may not be a data center, but  
5 just keep your fricking eyes open that it's probably  
6 going to be something that you're going to regret.

7 Good night.

8 (Applause.)

9 MR. PENNELL: Good evening. My name is  
10 Daniel Pennell, 195 Onyx Way in Warrenton.

11 I actually make my living basically  
12 doing what Jay does. I'm a senior director with an  
13 IT consulting firm federal contractor that oversees  
14 all of our DOD and three letter agency contracts.

15 I spent a great deal of my work doing  
16 data centers, moving various government agencies out  
17 to AWS.

18 But one question that I have about  
19 this, apart from the fact that I don't want an  
20 eyesore in my town -- and my fiancée said she won't  
21 move here now if it gets approved. So now I've got  
22 to go find another place to live.

1           You know, one of the things you guys  
2 haven't discussed -- I haven't heard discussed is  
3 the security. Let's assume -- I think it's  
4 reasonable to assume that these data centers being  
5 out here are going to always be three letter  
6 agencies or DOD. They are going to be applications  
7 and data storage; and that's what it's going to be.  
8           The contracts for that kind of work  
9 require heavy physical security. And security can  
10 get a little interesting, and the rules around it  
11 can get interesting.

12           For example, I can almost guarantee you  
13 that the cameras around this facility will do some  
14 form of biometric tracking. They will probably do  
15 facial imaging. They want to know who is around the  
16 property, who has been repeatedly back there. They  
17 will probably use the same technology the state  
18 police use on their cruisers to identify license  
19 plates. You'll notice that the entire property is  
20 circled by roads. These are -- the data in these  
21 places will likely be DOD or three letter agency  
22 type data.

1           So that means they are going to be  
2 targets. So since they'll be targets, they have to  
3 be defended. That's why you need the big fences.  
4 That's why you need all of that. To protect that,  
5 you need to know who is around it, how often, when,  
6 and you may even need to start looking into who  
7 lives near it.

8           So if you look at when the government  
9 ran its own centers, they were set far back from  
10 residences, heavily guarded, often underground. So  
11 one of the things you're very likely going to give  
12 up here in addition to the eyesore and the rest of  
13 it, is they're going to need to secure that  
14 facility; and they're going to use technology to do  
15 it.

16           And that means they're going to need to  
17 know about the people who move in and around it, the  
18 cars that move in and around it, and they are going  
19 to invade your privacy. That's just a given.  
20 Accept it. They have to defend that data.

21           Now, I will also go on to say this is  
22 probably going to kill property values. It will.

1 It just will. Nobody wants to live near data  
2 centers. Nobody wants to come down here and be  
3 around that. You move here to get away from it, not  
4 to embrace it. Nobody wants to live --

5 (Applause.)

6 MR. PENNELL: -- in Fairfax or Loudoun or  
7 Ashburn. They all escaped here. Now we're just  
8 going to end up going to, I don't know, Woodstock.

9 So I would also say, Mr. Heroux, you  
10 have no place making a claim for no conflict of  
11 interest. I know our business.

12 (Applause.)

13 MAYOR NEVILL: Thank you, sir.

14 MR. PENNELL: I know our business.

15 MAYOR NEVILL: Thank you, sir. Your time is  
16 up.

17 MR. PENNELL: And I know your business.

18 MAYOR NEVILL: Thank you, sir. Your time is  
19 up.

20 MR. PENNELL: And you --

21 MAYOR NEVILL: Thank you, sir. Your time is  
22 up.

1 MR. PENNELL: Yeah. Thank you.

2 (Applause.)

3 MR. CLOUGH: Julie Broaddus, David Fox,  
4 Christine Fox, Ruth Fugee. It's from the 1/10 list.

5 UNIDENTIFIED SPEAKER: I didn't hear  
6 (indiscernible).

7 MR. CLOUGH: Julie Broaddus, David Fox,  
8 Christine Fox.

9 MS. BROADDUS: Hi. I didn't realize the  
10 last thing was still citizen time so I'm glad that I  
11 also had the ability to speak at the public hearing.

12 Julie Broaddus, Scott District. I live  
13 not far from where the data center is supposed to  
14 be.

15 I'm just going to finish up what I  
16 didn't get to say last time, which is, you know, we  
17 have encountered uses before that have negative  
18 sound impacts, and that's why we have a sound  
19 ordinance. We've encountered applications for uses  
20 in inappropriate locations, but we have never  
21 encountered uses of this scale, this empty, with  
22 such an undeniable impact on the need for additional

1 power generation and transmission lines.

2 We have also never encountered a use  
3 with such an addictive price tag for our landowners,  
4 or with such a demand that is spreading so quickly  
5 for this use.

6 We have never made a deal with such a  
7 behemoth of a company worth \$1 trillion whose annual  
8 earnings would be enough to literally write a check  
9 for the \$15 billion worth of real estate in Fauquier  
10 County.

11 Have you done everything in your power  
12 to find alternate solutions for taking care of  
13 infrastructure needs and expenses? Have you done  
14 your best knowing that after this moment we are  
15 largely relinquishing our ability to control future  
16 applications?

17 This is our moment to set our own plans  
18 for what data centers here might look like; and it  
19 can be done. Let's be different. Let's not lose  
20 what we have in our effort to protect it.

21 Unlike the Amazon data center proposed,  
22 the data center in Vint Hill, which exists, is

1 smaller than Home Depot with 70,000 square feet.  
2 It's about 15 feet tall, and it was put in an  
3 existing office building far from residences, and  
4 power lines were required to be underground.

5 It generates tax revenue. Let's not be  
6 greedy and lose sight of what we have. Let's use  
7 the control we have at this moment to shape our own  
8 future.

9 Thank you.

10 (Applause.)

11 MR. CLOUGH: David Fox, Christine Fox, Ruth  
12 Fugee.

13 MS. FUGEE: Ruth Thorman (ph) Fugee, 284  
14 Amber Circle, Warrenton. I'd like to offer a look  
15 at the vision of zoning in Warrenton.

16 From the station he helped construct,  
17 Vint Hill Farms Station, my father, Jim Thorman,  
18 worked on the design of the radio receiving towers  
19 that were responsible for breaking the enigma code.

20 He opened a radio repair shop on the  
21 corner of 3rd street and Main Street because he  
22 liked the fly fishing at Thornton River and Goose

1 Creek.

2 He often spoke of his experience as a  
3 business owner in the development of land use zoning  
4 in town beginning in 1950 with the first planning  
5 commission with the supervision of Paul Mellon.

6 The planning commissions go on to  
7 gather the input of the residents on growth and  
8 development. Mr. Mellon began the Piedmont  
9 Environmental Council, to whom we owe the continued  
10 protection of open and forested land. And he  
11 donated the land for Sky Meadows.

12 I was born at Fauquier Hospital,  
13 graduated from Fauquier High, trained as a nurse at  
14 Fauquier Hospital. Our children farm in Fauquier  
15 County. And hopefully, I will die in my bed off of  
16 Academy Hill Road where my mother taught 3rd grade  
17 in Warrenton Elementary.

18 "Protect open and forested land." This  
19 is a quote from the Warrenton zoning history. I  
20 urge you to be a part of a legacy of philanthropy  
21 and conservation. Land use planning in Warrenton  
22 through the administration of special use permits is

1 the right of town residents, and we don't want an  
2 Amazon data center at the entrance to Warrenton.

3 Thank you.

4 (Applause.)

5 MR. CLOUGH: Georgia Herbert, Laura  
6 Hettinger, Ann Kehoe, Richard Keister.

7 MS. FOX: I know. I was totally skipped  
8 over. So, I'm "Christina" Fox, not "Christine" Fox.  
9 I often get confused with the dress shop owner, so I  
10 want to make sure it's "Christina" Fox for the  
11 record.

12 Good evening. My name is Christina  
13 Fox, and I live at 7241 Hastings Lane. I'm a  
14 certified dyslexia therapist, and I own and operate  
15 Dyslexia Intervention Services out of my home.

16 I sent all of you an email awhile back.  
17 Thank you, Mr. Heroux, for responding to me. I  
18 appreciate it.

19 I want to remind all of you how this  
20 data center is going to disrupt the lives of  
21 thousands of citizens that reside close to the site.

22 .2 miles from Poet's Walk, this is a

1 home for people with Alzheimer's disease,  
2 Parkinson's disease, and dementia. .4 miles from  
3 Bradley Elementary, Highland School, a nursing home,  
4 and, of course, let's not forgot the townhomes and  
5 all the single-family homes located close to the  
6 site.

7 So my question to all of you: How  
8 would you feel if a data center was put in your  
9 backyard? How would you feel if your children were  
10 subjected to the constant loud buzzing noise while  
11 they are trying to learn? How would you feel if you  
12 had loved ones residing at Poet's Walk who not only  
13 have a debilitating illness but have to listen to  
14 the constant drone of noise?

15 How would you feel if your business,  
16 your livelihood, like mine, could be in jeopardy  
17 because your Town Council voted for tax revenue over  
18 the rights of citizens to live, work, and learn in  
19 peace?

20 I would ask that all of you, and those  
21 citizens who are for this data center, ask these  
22 questions of yourself before you vote this evening.

1 I am an advocate for those residents at  
2 Poet's Walk who can no longer speak for themselves.  
3 I am an advocate for children with learning  
4 differences.

5 If you vote yes, the fight is not going  
6 to end here.

7 Thank you for your time. Good evening.  
8 (Applause.)

9 MS. HERBERT: Good evening. I'm Georgia  
10 Herbert, and I live at 5722 John Marshall Highway,  
11 which is near The Plains, Virginia.

12 More than 35 years ago I was elected to  
13 the Board of Supervisors for Fauquier County, and I  
14 served for eight years on the Board of Supervisors.  
15 And I understand a little bit about the public  
16 service inspiration that encourages, and has  
17 encouraged, I assume, each of you, to serve on the  
18 Town's Council.

19 It is public service. I call on you to  
20 remember that and act in the public interest.

21 The application that is before you, and  
22 particularly the SUP, is not consistent with the

1 comprehensive plan that you worked so hard on. It  
2 is filled -- the proposed SUP that is the subject of  
3 this hearing is full of weasel words. It is not  
4 going to be easily enforceable, if enforceable at  
5 all. And if you attempt to enforce it, it's going  
6 to be extremely expensive and extremely difficult  
7 and extremely time consuming.

8 So that if the SUP is not complied  
9 with, if these terms that you think and that Amazon  
10 is representing to you will protect the community  
11 are not met, it can go on for a long time before it  
12 gets dealt with. And I'm not sure it would -- you  
13 will have the ability to actually shut it down or  
14 require them to -- make them come into compliance.

15 So you have something that's not  
16 consistent with the comprehensive plan. You have  
17 something that is absolutely not consistently  
18 enforceable. It's not internally consistent. It's  
19 not something that you're going to easily -- that is  
20 going to be easy to enforce. And I urge you to take  
21 a deep breath, do the right thing, and vote no.

22 Thank you.

1 (Applause.)

2 MS. HETTINGER: Good evening. My name is  
3 Laura Hettinger. I live at 7280 Waverly Drive in  
4 Warrenton.

5 Just one thing real quick. It was  
6 really -- I don't know about anyone else, but I  
7 thought it was very confusing earlier with citizen's  
8 time versus the SUP time. Inconveniently all of  
9 those speakers did not get put on record, as it  
10 sounds like. So I think in the future maybe make it  
11 more clear to the citizens speaking what's going on,  
12 because it was very confusing.

13 So I saw the future of Warrenton today.  
14 How did I do that? I drove through Ashburn. And  
15 let me tell you, like the woman said earlier, it's  
16 like the devil's hole. It was sickening. I  
17 literally felt anxiety. It's horrible.

18 So like the gentleman with the beard  
19 said earlier, be careful what we ask for with this  
20 data center. It's not "the" data center. That's  
21 not what so much we're worried about. It's -- we  
22 all know, let's make this a reality, a fact here,

1 this is not one data center. It's going to be many.

2 It's going to be Ashburn.

3 I visited my father-in-law in Ashburn

4 five years ago before he moved back here, and I was

5 appalled. I saw two data centers. What is this?

6 And then now it's -- I flew over it the other day.

7 It's amazing. It's just miles and miles of data

8 centers. Miles. And that is what's going to happen

9 here.

10 You-all took on this job of

11 representing us, and how would you look in the

12 mirror and honestly say this could be good for this

13 city? Revenue is the only thing you can think of.

14 And like someone pointed out earlier, that's not

15 even -- they are going to get out of it. It's

16 Amazon. They don't even pay taxes. So are we

17 really going to get any revenue?

18 And it's sort of like selling your soul

19 to the devil. You're selling the soul of Warrenton

20 to the devil.

21 (Applause.)

22 MS. HETTINGER: If someone were poor and

1 needed money and robbed a bank, if a company is  
2 trying to cheat and do revenues and dump pollution  
3 into the river and pollute the river, you would  
4 think that's vile and repugnant, but yet we're going  
5 to allow this to happen to our quaint, beautiful  
6 town and the county as a whole.

7 A lot of us moved here for this  
8 environment and you are going to take it away.

9 (Applause.)

10 MS. HETTINGER: And everyone keeps talking  
11 about your legacy. I don't think you care about  
12 your legacy. That's very evident. So whatever is  
13 going on here is very suspect.

14 This vote earlier -- thank you, Council  
15 People, who spoke up to try to clear the record.  
16 Thank you for trying.

17 (Applause.)

18 MS. HETTINGER: But the fact that that was  
19 voted no before you're going to make a vote on this  
20 issue that is going to affect the history, like  
21 everyone is pointing out, of this town and the  
22 county as a whole for the future to come is

1 ridiculous.

2 Today is Valentine's Day, so for the  
3 love of Warrenton, vote no.

4 Thank you.

5 (Applause.)

6 MR. CLOUGH: David Fox, Ann Kehoe, Richard  
7 Keister, Katherine Kulig (ph).

8 (No responses.)

9 MR. CLOUGH: Ann Kehoe, Richard Keister,  
10 Katherine Kulig, Joan Morris, Leigh Owsley.

11 MS. OWSLEY: Hi. I'm Leigh Owsley. I live  
12 at 54 Winchester Street, and I own Latitudes Fair  
13 Trade Store at 78 Main Street. I've been in  
14 business for 12 years there.

15 And fair trade is a way of doing  
16 business in which every member of a supply chain is  
17 treated with dignity, respect, and no one is  
18 exploited for undue gain by anyone else in the  
19 system. That way of doing business and creating  
20 community is really important to me, and so I'm  
21 especially concerned as a business person in the  
22 town and as a town resident about the proposed data

1 center.

2 But I'm really here mostly speaking as  
3 a business person on Main Street. And I am  
4 incredibly privileged. Like, almost every day --  
5 I'm sorry I'm crying. But almost every day people  
6 come in and they say, "Oh, my gosh. This town is so  
7 quaint. It's so beautiful. It's so lovely."

8 I'm sort of like an ambassador for  
9 Warrenton. Like, people come in and they say they  
10 are thinking about moving here, and I'm all over it.  
11 "You'll love it. It's great."

12 And I just feel incredibly privileged  
13 to get to see that. And I've never been more proud  
14 of my town than in these meetings. I'm just so  
15 proud of my town.

16 (Applause.)

17 MS. OWSLEY: But I just really think that  
18 the relatively small increase in revenue that Amazon  
19 has said that they'll generate is really going to be  
20 a horrible trade-off in terms of tourism and housing  
21 value.

22 We all know people come to tourist --

1 to the town of Warrenton. They don't come to  
2 Walmart. They come for our cute town. And I don't  
3 -- I think even though the data center is, like, not  
4 on Main Street, it's going to affect the ambiance of  
5 Main Street. And I think it's going to have a  
6 really high cost.

7 And I really wish that you-all would  
8 look at those emails before you vote. I understood  
9 that you were saying you were trying to get it done.  
10 And now it sounds like it's not going to happen and  
11 I amend the amend the amend so you can see those  
12 emails before you vote and make a really wise  
13 decision.

14 Thank you.

15 (Applause.)

16 MR. CLOUGH: Ann Kehoe, Richard Keister,  
17 Katherine Kulig, Joan Morris, Mark Smith, Jason  
18 Smolinski, James L. "Lou" Spencer, Melissa  
19 Widenfield, David Wynn.

20 MAYOR NEVILL: Actually, sir, I just want to  
21 -- the gentlemen coming down the aisle, I think, is  
22 just procedurally before you, if you don't mind.

1 MR. CLOUGH: It's Mr. Fox, correct?

2 MR. FOX: Yeah. David Fox. I live at 257  
3 Hidden Creek Lane. I'm sorry I missed the call of  
4 my name earlier.

5 I've spoken several times to the  
6 council, to the planning commission, as well, over  
7 the course of these -- this process. It's been a  
8 very bonding experience with my, you know, fellow  
9 citizens. And it's remarkable, this "us against  
10 them." It shouldn't feel that way. It's an  
11 abomination.

12 (Applause.)

13 MR. FOX: And I wonder sometimes politically  
14 if there is a capacity for shame; but we are close  
15 to that point, and is it not too late. It is not  
16 too late to do the right thing. It is really close,  
17 but it is not too late to do the right thing. Any  
18 of you --

19 (Applause.)

20 MR. FOX: Any of you who are somehow still  
21 on a fence about this thing that we are all so  
22 vehemently opposed to -- how you could even be near

1 the fence is beyond me. But if you're on the fence  
2 and you believe that this is what you should be  
3 looking at when you make your decision, I implore  
4 you, whatever dignity that you may be able to summon  
5 to either delay your vote or to vote no, because  
6 that is what the people clearly want you to do, it  
7 is essential for your legacy, for your ability to  
8 walk down any street in this town with any semblance  
9 of dignity. That's what it is down to at this  
10 point.

11 I can't believe it has gotten to this  
12 point, but here we are. It is not too late. We are  
13 really close to it being too late. If you are on  
14 the fence, step away from that fence. It really is  
15 not what we need as a town. It is clear as day.

16 Thank you.

17 (Applause.)

18 MR. SPENCER: Mr. Chairman, Town Council  
19 members, residents of Warrenton, good evening, and  
20 Happy St. Valentine's Day. My name is Lou Spencer.  
21 I live in Essex County, Virginia.

22 I'm the assistant business manager of

1 the United Association Local Union No. 5, plumbers  
2 and gas fitters. And I'm the recording secretary of  
3 the Virginia Building and Construction Trades  
4 Council. We represent thousands of plumbers,  
5 construction trades and contractors living and  
6 working in Northern Virginia and across the  
7 Commonwealth.

8 I support the Amazon data center.

9         Needless to say, data center  
10 construction has been good for the construction  
11 trades in our area. Data center owners and the end  
12 users have been responsive and responsible. They  
13 want their buildings built properly, and we are  
14 eager to work for them.

15         Let's remember those earned wages and  
16 medical, retirement, and apprenticeship training  
17 benefits stay here in this community.

18         I wish the residents in the Town of  
19 Warrenton much success and happiness. We are  
20 blessed to have this debate before us. I travel  
21 throughout the Commonwealth, and I can tell you  
22 there's areas in Virginia that have little to no

1 economic growth.

2 Know this: When and where you decide  
3 to build is your decision. We want to build it for  
4 you. We will build it right. We will build it on  
5 time.

6 (Boos.)

7 MR. SPENCER: Know this: When and where you  
8 decide to build it is your decision. We want to  
9 build it for you. We will build it right. We will  
10 build it on time, under budget, with topnotch  
11 craftsmanship.

12 In closing, please approve the Amazon  
13 data center special use permit.

14 Thank you.

15 (Boos.)

16 MR. CLOUGH: Mr. Mayor, your mike.

17 MR. SMOLINSKI: Good evening. James  
18 Smolinski at 481 Cardinal Lane in Ward 1. I was  
19 here last month, and I'm happy to be back again.

20 There are three specific things that  
21 that I would like to comment on in my three minutes.

22 The first is that this is for many of

1 us all about the noise. And it's not imaginary.  
2 Noise is a critical concern. And we are fortunate  
3 that our neighbors in Prince William County have  
4 warned us about this. At the last meeting last  
5 month someone from Prince William drove out here to  
6 give us that warning, and it would be good of us to  
7 heed that warning.

8 Second, it is also all about our  
9 property values as many of you have mentioned. The  
10 potential impact to home values because of noise;  
11 the viewshed; power towers, if that winds up being a  
12 thing, should be a major concern for the Town  
13 Council, especially our council member who is in  
14 real estate.

15 As I stated last month, we're talking  
16 almost 800 residential units within a half mile of  
17 the structure. The gentleman earlier mentioned  
18 hearing the data center nearest him a mile away.  
19 We're talking half a mile to 800 residential units.

20 Number 3, the swift erosion of our  
21 public trust. It was enough to draw us all out  
22 here, and it was enough to draw me out here for the

1 first time last month.

2           So we've -- my family has been here for  
3 about 12 years. Previously, you could actually  
4 dialogue with those who were representing your  
5 neighborhood. It's been a bit of a black hole for  
6 the last six months or more trying to have that  
7 dialogue. I've tried to articulate my concerns to  
8 my Ward 1 council member as far back as August.  
9 I've never received acknowledgment. I would love an  
10 auto reply at least. Just something to say "there  
11 you go."

12           When you take this job, you should be  
13 willing -- you must be willing to dialogue and to  
14 have the conversation with your constituents. We  
15 deserve a conversation about the future of our town  
16 and our county, some back and forth a little bit.  
17 Maybe not avoiding us.

18           As for voting against seeing the emails  
19 before a vote, it's despicable; and shame on those  
20 who voted no.

21           (Applause.)

22           MR. SMOLINSKI: We're sort of traveling

1 forward at a high speed here toward a transformed  
2 Warrenton. We have literally been warned by our  
3 neighbors of what's coming. Just recently last  
4 month we've been warned. This will open the door  
5 for more data centers on adjoining properties, other  
6 big properties within the town. It's going to be a  
7 patchwork of approval springing up here and there  
8 without any sort of vision.

9           If you open the doors prematurely, the  
10 flood will come in. We will have failed to be  
11 different than any other county around us; and you  
12 will have failed us, as well.

13           Happy Valentine's Day.

14           MAYOR NEVILL: Thank you, sir.

15           MR. SMOLINSKI: Thank you for your time.

16           MS. WIEDENFELD: I am Melissa Wiedenfeld. I  
17 live at 12 Fishback Court in Warrenton.

18           I am not part of a special interest  
19 group. I am a constituent. And I would like to  
20 thank my Town Councilman Bill Semple for his  
21 incredible work and --

22           (Applause.)

1 MS. WIEDENFELD: -- and his support for Ward  
2 2 citizens. This is something I don't see  
3 elsewhere.

4 Today the Amazon-Jeff Bezos Washington  
5 Post mischaracterized this debate as one of wealthy  
6 Fauquier County citizens opposed to industry. This  
7 is wrong. All of my friends and my neighbors, all  
8 of us here are of modest circumstances. And we were  
9 vehemently opposed to bringing Amazon to Warrenton.

10 How did we get to this point? We need  
11 to first reject this SUP, and then investigate those  
12 emails, those secret meetings, the former town  
13 manager turned Amazon employee.

14 (Applause.)

15 MS. WIEDENFELD: But more importantly, how  
16 did we get so many Town Council members willing to  
17 choose a major corporation over the health and well  
18 being of their constituents?

19 (Applause.)

20 MS. WIEDENFELD: Please do the right thing.  
21 Please reject the SUP. The tax income isn't worth  
22 destroying the town.

1 Thank you.

2 (Applause.)

3 MR. CLOUGH: Ann Kehoe, Richard Keister,  
4 Katherine Kulig, Joan Morris, Mark Smith, David  
5 Wynn, Bridget Wolfe, Alfred Young, Christina Bills.

6 (No responses.)

7 MR. CLOUGH: Ann Kehoe, Richard Keister,  
8 Katherine Kulig, Joan Morris, Mark Smith, David  
9 Wynn, Bridget Wolfe, Alfred Young.

10 MR. YOUNG: My name is Alfred Harris Young.  
11 I live at 347 Falmouth Street in Ward 2. I am a  
12 resident and business owner of the Town of  
13 Warrenton.

14 I've come here tonight on my wife and  
15 my wedding anniversary. Instead of spending the  
16 evening together, I've come to urge the elected body  
17 to see that an overwhelming majority of the citizens  
18 of the Town of Warrenton strenuously object to the  
19 Amazon data center.

20 Also, we are strongly opposed to the  
21 high voltage transmission lines that are being  
22 proposed to run down the historic Falmouth Street

1 and adjoining streets where I live. These have no  
2 place in this beautiful town of Warrenton, which I  
3 love.

4 I would also like to say that there's  
5 absolutely no way Amazon will be able to comply with  
6 the noise ordinance. The notion that you will have  
7 them self monitor is absolutely ridiculous.

8 (Applause.)

9 MR. YOUNG: I've made a small list of just a  
10 few of the things that the citizens of the Town of  
11 Warrenton will be sacrificing if this is allowed to  
12 proceed.

13 The residents that are in close  
14 proximity to this center will be sacrificing their  
15 peace and quiet as they sit in their homes, on their  
16 porches, or in their backyards. They will no longer  
17 be able to open their windows without constant  
18 noise.

19 We will also be sacrificing thousands  
20 of dollars in property value as the effects of the  
21 data center and transmission lines are realized.

22 In addition, we will be sacrificing the

1 faith in the elected officials to make decisions and  
2 the processes that they use to have the voters and  
3 the town's best interests in mind.

4                   Finally, I would like to ask you, what  
5 will you, the members of this Town Council, be  
6 sacrificing? Will you be able to walk down the  
7 street or conduct your business knowing that you  
8 sold out your town and your voters?

9                   (Applause.)

10                  MR. YOUNG: In my opinion that's a  
11 possibility that you may need to consider. So  
12 please, please, please vote no on the Amazon data  
13 special use permit.

14                  Thank you.

15                  MR. CLOUGH: Mark Smith, David Wynn, Bridget  
16 Wolfe, Christina Bills.

17                  MS. WOLFE: Hello. My name is Bridget  
18 Wolfe. 7188 Homestead Court, Warrenton.

19                  I've been to pretty much all of the  
20 meetings with the planning commission and the Town  
21 Council about this SUP, and I'm really disappointed.

22                  I moved out here a couple of years ago

1 because I was trying to get away from the rat race  
2 of Fairfax County. And I bought a house. I live  
3 here. I work here. I have made friends here. I've  
4 become involved in the community. And I really  
5 think that this data center is really not what's --  
6 at the entrance of the town is really not what we  
7 need, and I really hope you can find it within your  
8 hearts to do what the constituency [sic].

9 I know a lot of people have left, but  
10 there have been quite a few people here tonight who  
11 have been very enthusiastic, energetic, passionate  
12 about what they want.

13 Please don't vote for this SUP. Please  
14 keep taking care of the town.

15 Thanks.

16 (Applause.)

17 MR. CLOUGH: Mark Smith, David Wynn,  
18 Christina Bills, Christopher Bonner, Jonathan  
19 Elliott, Jennifer George, Kirk Goolsby, Jeffrey  
20 Grambo.

21 MR. FRANCIS: Good evening. I'm Roy  
22 Francis. I'm speaking for Mark Smith. Let me get

1 my eyeballs on here.

2           There are issues that periodically  
3 arise that are bigger than most. My fellow  
4 residents and members of the Town Council, this is  
5 one of those. There are issues so big and so  
6 important that you should consider and determine  
7 just how the people of the town actually feel about  
8 it. I believe this is definitely one of those  
9 issues.

10           Tonight, I'm asking you, the Town  
11 Council elected by the people, to delay this vote  
12 and consider a town referendum on this proposal.

13           (Applause.)

14           MR. FRANCIS: In fairness to all concerned,  
15 I believe everyone in this room would agree and  
16 support that action.

17           We know there is a timeline to vote,  
18 but the health, both mentally and physically, of the  
19 citizens you supposedly represent are far more  
20 important than a meaningless timeline.

21           Amazon can wait.

22           (Applause.)

1 MR. FRANCIS: There is no reason that this  
2 has to be immediately decided upon. And a special  
3 vote by the townspeople is truly the satisfactory  
4 decision that can end the bitter angst and major  
5 divisiveness caused by the absolute lack of  
6 transparency by this very body.

7 (Applause.)

8 MR. FRANCIS: You have a perfect opportunity  
9 to bring the citizens together to support this  
10 proposal or vote it down. You, the Town Council  
11 members, should consider relieving yourselves of  
12 this strain, the pressure, and the unfortunate  
13 ramifications of your vote when it isn't necessary.

14 This is such an important issue. Let  
15 the people decide, not you.

16 (Applause.)

17 MR. CLOUGH: David Wynn, Christina Bills,  
18 Christopher Bonner.

19 MR. WYNN: Good evening. I'm David Wynn,  
20 resident of Warrenton.

21 I have -- a couple weeks ago, three,  
22 four weeks ago, I sent the whole Town Council a list

1 of 35 instances where this data center conflicts  
2 with the comp plan.

3           The comp plan is only 80 pages long.  
4 When was the last time you read it? There's 35  
5 instances in the comp plan that do not agree with a  
6 data center. Please read the comp plan. It's only  
7 80 pages. I could read those to you, but I won't do  
8 that tonight.

9           If you go to the zoning ordinance,  
10 Special Use Permits and Waivers Authorization,  
11 Section 11-3.10.1, it will tell you what gives you  
12 the authorization to approve an SUP. I could go  
13 through this, also. If you read it, you would see  
14 that you cannot approve the data center. If you'd  
15 like me to give a couple of examples, I'd be happy  
16 to.

17           "Upon finding that the use with  
18 conditions will have a deleterious impact and will  
19 reflect the spirit and intent of the comprehensive  
20 plan of this ordinance" -- it does not. I could go  
21 through there. There's -- again, read the zoning  
22 ordinance.

1                   And what I would leave you with is I  
2 would suggest that you remove the data center text  
3 from the zoning ordinance so we don't have any data  
4 centers in our compact urban environment.

5                   (Applause.)

6                   MR. WYNN: There is simply no place in our  
7 small town for data centers in a compact urban  
8 environment. I don't know how you can't see that.  
9 It's like building an industrial plant right in the  
10 middle of a residential community. That's what  
11 you're doing.

12                   It's urban blight, and it's noise, and  
13 it's anathema to the comp plan. And you cannot find  
14 authorization in the zoning text for this special  
15 use permit. I defy you to do it. Please read the  
16 comp plan, please read the zoning ordinance under  
17 the heading Special Use Permits and Waivers  
18 Authorization. It's very simple.

19                   Thank you.

20                   (Applause.)

21                   MS. ELLIOTT: Good evening. I'm speaking  
22 for Jonathan Elliott, my husband. I live at 10120

1 Brown Moore Lane in Marshall. I'm going to speak to  
2 you about the special use permit application you'll  
3 be voting on.

4 I'm a civil engineer, and I review site  
5 construction plans and permit applications. I gave  
6 this one a read, and I found it to be an incomplete  
7 application. In my experience it is incomplete to  
8 an extent that would be unusual for approval in a  
9 large scale project such as this one.

10 Now, we know in a special use the  
11 burden of proof is really on the applicant to  
12 provide a thorough analysis of the downsides and  
13 compelling reasons why they could receive an  
14 exception. That is what the statement of  
15 justification in this permit is for.

16 But this statement of justification  
17 fails to provide the requested analysis. There are  
18 16 criteria here to be addressed. In my judgment,  
19 the applicant did adequately discuss and analyze six  
20 of the 16 criteria, but the remaining ten either  
21 we're avoided or the responses have not stood up to  
22 closer examination.

1           Let's take environmental impact for one  
2 example. This is criteria 10 and 16.

3           10: Whether the proposed special use  
4 permit at the specified location will result in the  
5 preservation or destruction, loss or damage of any  
6 significant topographic or physical, natural,  
7 scenic, archeological, or historic feature.

8           16: The effect of the proposed special  
9 use permit on environmentally sensitive land or  
10 natural features, wildlife habitat, and vegetation,  
11 water quality and air quality.

12           In the initial submittal, the applicant  
13 responds, "In 2020, the applicant became the world's  
14 largest purchaser of renewable energy. Its  
15 facilities are almost four times as energy efficient  
16 as other enterprise data centers," et cetera, et  
17 cetera. It goes on like that.

18           That response does not adequately  
19 address environmental impact. How could it?

20           Similar comments can be made about the  
21 eight other criteria. What improvements the  
22 application has now have essentially been made at

1 the direction and demand of the citizens.

2           The planning commission and the  
3 citizens have spent the last few months essentially  
4 doing the applicant's work for them: Providing  
5 analysis, addressing the tough questions, quality  
6 control studies, developing feasibility options,  
7 even correcting typos and topographic errors.

8           Perhaps Mr. Foote can let everyone know  
9 how to bill their time.

10           This application, even as it stands  
11 now, is, in my judgment, not thorough or complete  
12 enough to move forward. You would be right to vote  
13 no.

14           Thank you.

15           (Applause.)

16           MR. CLOUGH: Christina Bills, Christopher  
17 Bonner, Jennifer George, Kirk Goolsby, Jeffrey  
18 Grambo, Brian Hagerty, Amy Hampton.

19           MS. RUFFNER: Hi. I'm Montana Ruffner,  
20 Scott District, and I am taking Chris's spot.

21           My grandparents came to this area in  
22 the '60s with an aim to raise a family with values

1 of stewardship for each other and for the  
2 environment, our beautiful, kind world in the  
3 rolling hills of the Piedmont.

4 I married a boy from Warrenton whose  
5 family has been in Fauquier well over a century. He  
6 grew up on Bear Wallow Road near Old Gold Cup. We  
7 saw that development gobble up our historic and  
8 vital cultural landmarks. Can we look to our past  
9 for this current situation?

10 Fast forward to now. My husband works  
11 in Old Town for his family's business that's been  
12 here for close to 50 years.

13 I, too, work in Old Town. I run a  
14 community farmer's market in Upperville, and I  
15 volunteer with organizations -- sorry, I guess I'm a  
16 little nervous up here, y-all. I, too -- give me  
17 30 seconds. We are -- and volunteer for  
18 organizations in this wonderful county. We are  
19 blessed to enjoy this county from edge to edge, and  
20 to be the next generation here.

21 As a young couple thinking about  
22 growing our lives and family, I know I'm not the

1 average speaker here. Probably a couple decades  
2 younger. But I am here to give you the voice of the  
3 next generation that has the opportunity to grow in  
4 this charming community. And I had the hopes of  
5 continuing the legacies of Fauquier-tonians and  
6 Warrentonians. We are the future.

7 I ask you not to cower down or sell out  
8 and allow the next generation, y-all's offspring, to  
9 enjoy this incredible town and county.

10 Please don't let the monsters in that  
11 spread throughout our community, from data centers  
12 to gigantic transmission lines -- for us in our  
13 neighboring counties -- and generally poor planning.  
14 And remember, be the change you wish to see in the  
15 world and make choices that don't keep you up at  
16 night.

17 Thank you.

18 (Applause.)

19 MR. CLOUGH: Brian Hagerty, Amy Hampton,  
20 Kevin Hampton, James Hanover, Susan Hartford,  
21 Katherine Hayes.

22 (No responses.)

1 MR. CLOUGH: Brian Hagerty, Amy Hampton,  
2 Kevin Hampton, James Hanover, Susan Hartford,  
3 Katherine Hayes.

4 (No responses.)

5 MR. GRAMBO: Excuse me, sir. I have a  
6 question. I did speak earlier. Was my conversation  
7 disregarded, or do I need to give it again now?

8 MAYOR NEVILL: If you would like to give it  
9 again now for in the record, that is fine.

10 MR. GRAMBO: Thank you very much. I'm glad  
11 I didn't throw it away.

12 Good evening, Town Council, and Mayor.  
13 My name is Jeffrey Grambo. I live at 300 Winchester  
14 Street, and I've been a Town of Warrenton resident  
15 for over 18 years.

16 Please tell me why this SUP is good for  
17 the town. Tell me what I'm missing. What are the  
18 reasons why a data center, which is so wildly  
19 unpopular, is such a good idea for Warrenton? How  
20 does Warrenton become a more attractive place to  
21 live with a data center as a welcome mat.

22 The Town Council has not been honest

1 about the rezoning of the property in question and  
2 the trashing of the 2040 plan. What did happen to  
3 the 2040 plan?

4 Have you Councilmembers done your  
5 research? Neighboring jurisdictions -- are  
6 neighboring jurisdictions happy with the data  
7 centers they now have to live with? Are these large  
8 buildings an attraction to the community? Is the  
9 constant humming noise from these centers something  
10 that we want?

11 Let's not forget about the tax revenue  
12 these centers are supposed to bring. The promise  
13 seems to be constantly coming up short.

14 To our Councilmembers that believe a  
15 majority of the town residents favor the data  
16 center, then let's have a vote, as Mr. Francis has  
17 alluded to. Let's have a referendum. Let's let the  
18 people vote.

19 (Applause.)

20 MR. GRAMBO: Why is that bad?

21 And I didn't comment earlier, not  
22 letting other Councilmembers read data. On the

1 board I serve on, if I was excluded from reading  
2 data before I made a decision, I would be raising  
3 hell.

4 (Applause.)

5 MR. GRAMBO: Are these people here invisible  
6 to you? If such an overwhelming majority of the  
7 residents are opposed to the data center, how can  
8 they -- how can you be for it? Have you no sense of  
9 duty or obligation to the citizens?

10 And I'll allude to it again: What was  
11 done in the dark with our town manager, et cetera,  
12 and these emails that are being kept secret by the  
13 council to other Councilmembers -- I saw you  
14 Mr. Heroux. I saw you. These rules must apply.  
15 Your Open Meetings Act must be to keep the business  
16 of the council open and transparent to citizens.

17 And I'll say it again: I sit as a  
18 trustee on a board responsible for billions of  
19 dollars. I'm not a millionaire, not a billionaire.  
20 I'm just a retiree. But I sit on the board. If I  
21 met with principals about investments or awards that  
22 were not open to the public, I would be going to

1 jail.

2 I urge you to deny the special use  
3 permit.

4 Thank you very much.

5 (Applause.)

6 MR. CLOUGH: Brian Hagerty, Amy Hampton,

8 Katherine Hayes, Lori Karnay, Larry Kolvech (ph),  
9 Robin Lonas (ph), Redmond Meunier (ph), Jessica  
10 Matthews, Michael McGee, David Dwight "Ike" Miller.

11 (No responses.)

12 MR. CLOUGH: Brian Hagerty, Amy Hampton,  
13 Kevin Hampton, James Hanover, Susan Hartford,  
14 Katherine Hayes, Lori Karnay, Larry Kolvech, Robin  
15 Lonas, Redmond Meunier, Jessica Matthews, Michael  
16 McGee, David Dwight "Ike" Miller.

17 UNIDENTIFIED SPEAKER: May I suggest just  
18 letting people who haven't spoken get in line and  
19 speak.

20 MR. CLOUGH: We still have additional  
21 sign-ups to do, yes, sir.

22 MR. MILLER: I don't think anybody else is

1 waiting.

2 My name is David Dwight "Ike" Miller.  
3 I've been a resident of this county almost my entire  
4 life. And my family, my father, started a business  
5 in town in Warrenton in 1968 when I was two. Miller  
6 Carpets is still there. We've been paying taxes to  
7 this town for a long time. I think I have some  
8 standing.

9 I'm not here to talk about overhead  
10 power lines. They're ugly. We all know that. Not  
11 here to talk about job creation. Amazon will bring  
12 whoever they want. I'm not here to talk about tax  
13 revenue, although even sitting and watching you  
14 folks this morning, there were a lot of valid  
15 questions about how much money and when.

16 I'm not here to talk about noise. Same  
17 thing applied this morning. So many questions from  
18 some Councilmembers, because it's just not clear.  
19 Not here to talk about the massive reduction in the  
20 value of the property that's going to be adjacent  
21 nearby if this disaster unfolds.

22 Others have talked about that. I'm

1 asking you to focus on two words: Courage and  
2 resolve. Most of you have made up your minds  
3 already. That's kind of a real shame. Especially  
4 those of you who want to vote in the affirmative.  
5 I'm sure you've listened -- or maybe you haven't  
6 listened. Nobody wants this.

7 Have the courage, those of you that  
8 want to vote yes, to change your vote tonight.  
9 Surprise us. Surprise your fellow Councilmembers.

10 Your legacy is real, if you care. Some  
11 of you care about it. It's going to be permanently  
12 damaged.

13 And if this disaster unfolds, we, the  
14 people, don't want to hear a couple of things. I'll  
15 just paraphrase them: We were assured from Amazon  
16 that they would work with us in good faith. We  
17 voted for the SUP based on the best information we  
18 had at the time. Well, we thought revenue was too  
19 important to ignore this. We had to meet an  
20 application timeline.

21 The application is incomplete. You-all  
22 know that. Smarter people than me have pointed it

1 out.

2                   And finally, we were acting in the best  
3 interests of the citizens. Right. You know, we  
4 don't want to hear it. It will fall on deaf ears.

5                   After the December 7th bombing of Pearl  
6 Harbor, Japanese Admiral Yamamoto purportedly  
7 stated, "I fear all we have done is to awaken a  
8 sleeping giant and fill him with a terrible  
9 resolve."

10                  The sleeping giant, it's not Amazon.  
11 Guess what, it's not even you guys. Here is your  
12 sleeping giant right here. And if you don't listen  
13 to us and you vote this in, the legal battle will be  
14 long and painful; and we will prevail. We will get  
15 those emails. We will get this overturned. We will  
16 not let you destroy this beautiful town.

17                  I'm on Main Street every day. And just  
18 like Leigh Owsley, I'm so proud to be up there, and  
19 so happy to see what's there, to see what I see.

20 Don't wreck it.

21                  Thank you.

22                  (Applause.)

1 MR. GERRISH: I know I'm in your list there  
2 somewhere.

3 Good evening. My name is Dave Gerrish.  
4 My family and I live in Old Town on High Street in  
5 Ward 2, and have done so for over 30 years.

6 I work in Old Town on Main Street now  
7 for over 40 years. The nature of my work puts me in  
8 touch with a broad cross-section of our public. I  
9 have been involved in many community projects and  
10 with many community organizations over the years.

11 First of all, I would like to say that  
12 it is always an honor to live in a country where we  
13 have the freedom to speak our mind especially to our  
14 elected officials and hopefully feel as though they  
15 are truthfully listening.

16 (Applause.)

17 MR. GERRISH: I came tonight to speak in  
18 opposition to the Amazon data center. The pros and  
19 the cons have been discussed now for months.

20 The point I would like to emphasize  
21 this evening is that it is quite clear that the  
22 wishes of the vast majority of our constituents are

1 opposed to the center being located in town.

2 My ask is that you listen to your  
3 citizens. My god, listen to them --

4 (Applause.)

5 MR. GERRISH: -- and then act in their best  
6 interests.

7 I have heard some discussion about the  
8 idea of a silent majority in favor of the data  
9 center. I can only tell you that from where I sit  
10 and from what I hear there is no silent majority on  
11 this issue. And, frankly, I believe this is one of  
12 those impassioned issues that on rare occasion rise  
13 to the public interest, and silence is not an  
14 option.

15 Thank you. Thank you.

16 (Applause.)

17 MR. FOX: Good evening, and Happy  
18 Valentine's Day. My name is Michael Fox. I live at  
19 7241 Hastings Lane here in Warrenton.

20 Going through school, we used to hear  
21 from our history teachers all the time -- when we  
22 asked why we had to learn stuff in history -- that

1 those who don't remember history are condemned to  
2 repeat it.

3                   Well, in this case we don't really have  
4 to look back too far for our history. Right up the  
5 road we've got Loudoun County, and we've got Prince  
6 William County. Is that the history that you want  
7 to repeat here in Fauquier County? Because if it  
8 is, I don't think the people that voted for you knew  
9 that that was your vision for the future of Fauquier  
10 County.

11                   (Applause.)

12                   MR. FOX: And to follow through with this  
13 would really be a betrayal of their trust.

14                   And speaking of betrayal, we'll go back  
15 even a little bit further in history to a famous  
16 person who betrayed someone close to them. His name  
17 is Judas Iscariot. And I hope you guys don't have  
18 the same problem he did after he realized what he  
19 had done. So if you betray your constituents, I  
20 hope the 30 pieces of silver is worth it.

21                   Thank you.

22                   (Applause.)

1 MS. CLARK: My name is Bernadine Conley  
2 Clark. I live on Menlough Drive in Warrenton.  
3 I am not a NASA engineer, a noise  
4 expert. I'm not a lawyer. I'm not a wealthy  
5 landowner, and I'm not a politician. I like to read  
6 books. So it occurred to me that to be helpful I  
7 might offer some parallels between this project and  
8 some well-known works of wisdom.

9 There's Faust. Faust sells his soul to  
10 gain revenue, power, and worldly knowledge. This  
11 SUP proposes that Warrenton sell its soul for  
12 revenue and to be in the good graces of one of the  
13 most powerful corporations in the world. But you  
14 know what, the parallel doesn't actually work  
15 because Faust was guaranteed his riches.

16 The benefits Warrenton will reap are  
17 still undetermined. So instead of a Faustian  
18 bargain, you-all are voting for a Faustian scratch  
19 ticket.

20 (Applause.)

21 MS. CLARK: Then there's Gatsby. You look  
22 at Gatsby and the Valley of Ashes. It's an ugly

1 wasteland, but it seems a necessary blight on the  
2 landscape. The poor live there because it's the  
3 only place they can, and the rich race by it in  
4 their fast fancy cars.

5 But this parallel also doesn't hold  
6 totally true because our Valley of Ashes will not be  
7 limited to one site as the data centers proliferate,  
8 our Valley of Ashes, it will insinuate itself into  
9 the fibers of our town.

10 Ultimately the story that best holds is  
11 a classic. The story of the scorpion and the frog.  
12 The frog is enjoying his pond. A scorpion comes by  
13 and says, "I need a ride over the water."

14 The frog says, "Dude, you're a  
15 scorpion." And the scorpion says, "No, no, no. I  
16 just need a ride across the pond, really."

17 So the frog trusts the scorpion and  
18 lets him on his back, and then feels his stinger and  
19 the venom seeping into his system. And as he's  
20 dying, he says to the scorpion, "Why did you sting  
21 me?" And the scorpion responds, "Because it is my  
22 nature."

1 (Applause.)

2 MS. CLARK: The scorpion scuttles to shore,  
3 and the frog -- well, the frog croaks.

4 Just to be clear -- and, Mr. Heroux,  
5 this is for you -- Mr. Heroux, I respect scorpions.  
6 They deserve my respect. They deserve to be seen --  
7 respect to be seen for their nature, for who they  
8 are. They are part of this world. They are part of  
9 the ecosystem. And I know that I would be naive,  
10 and Dante would suggest proud, not to respect their  
11 true nature. And I know that I would be naive, and  
12 Dante would suggest proud, if I let them into my  
13 pond.

14 You have a choice. You're informed.  
15 You're educated. Do the right thing. Don't let  
16 them into the pond.

17 (Applause.)

18 MAYOR NEVILL: (Indiscernible) speakers.

19 MR. PAUN: Hi. My name is Owen Paun. I  
20 live at 786 General Wallace Court, which is in the  
21 first ward.

22 I've heard a lot of people talk about

1 the townhouses; and I live in one of those  
2 townhouses. I, along with my wife and three  
3 children, 8, 6, and 2, who go to Bradley just down  
4 the road.

5 But I haven't always lived in  
6 Warrenton. From 2012 to 2015, I was a missionary in  
7 Russia. I was a missionary there, and I saw what  
8 the government and oligarchs together were able to  
9 do in the face of public opposition because it  
10 ultimately didn't matter.

11 In 2015, I was forced to leave Russia  
12 because the government passed a law restricting  
13 religious freedom. I had to move to a different  
14 country, so I went to Bulgaria.

15 When I was in Bulgaria, I lived and  
16 ministered in a village 25 kilometers from Sofia,  
17 the capital city, that did not have running water.  
18 It had pipes. They laid the pipes. But the city  
19 planner refused to turn the water on unless they  
20 received a bribe. And the village was too poor.  
21 And I'm not accusing anyone here of accepting a  
22 bribe. The point is about responsiveness.

1           After Bulgaria, when I returned to  
2 America, I returned to Loudoun County where I  
3 attended school board meetings that we all saw were  
4 not responsive to the parents, arrested some of  
5 them, called those who attended domestic terrorists.

6           I left there in 2021, and I moved here  
7 to Warrenton where I hoped to find a city government  
8 that was responsible to its people, a school that  
9 was safe that I could take my children to.

10           My wife and I found a local church.  
11 Just a couple months ago we entered the membership  
12 of Warrenton Baptist.

13           We opened this ceremony -- this  
14 ceremony -- this meeting with prayer. And if that  
15 matters to you, Jesus commands us to love our  
16 neighbors as ourselves, and he warns us that you  
17 can't serve good and mammon.

18           I am asking you, as a citizen, as a  
19 resident of Ward 1, who walks his children to school  
20 -- if you go to Bradley and you see someone walking,  
21 it's me. There's not very many of us.

22           My children will wake up with the sound

1 of the data center. They will walk to school with  
2 it. They will go to school with it. They will come  
3 home, and they will go to sleep at night with the  
4 sound of the data center. That is not a future that  
5 I want for my children, and I don't know what will  
6 happen if that comes.

7 And they talk about prices. Yeah, I'm  
8 worried about my property value. I worry more about  
9 my children. I worry more about our quality of  
10 life. That's why we came here. That's why we left  
11 Fairfax and Loudoun; and I know I'm not the only one  
12 who has that story.

13 I've seen places that privilege the  
14 state over citizens: Russia, Bulgaria, Loudoun.  
15 And in this room right now we have the state flag of  
16 James Madison and Thomas Jefferson, and we have the  
17 flag of their Declaration of Independence and their  
18 Constitution. I don't have the chance to vote on  
19 this. Although, if you move it to a referendum, and  
20 I don't know if you can -- if you do that, I would  
21 have the right to vote. But in this current --

22 (Applause.)

1 MR. PAUN: In this current system all I can  
2 do is appeal to you to love your neighbors -- and  
3 they have let you know how they feel -- to represent  
4 your constituents to deny the SUP and to bring  
5 transparency.

6 Thank you.

7 (Applause.)

8 MS. ARRUDA: I think we were supposed to be  
9 in alphabetical order, and somehow I got missed.  
10 I'm not sure what your order was.

11 MR. CLOUGH: We're not in alphabetical  
12 order. We're going by the sign-up list. We started  
13 with the 1/10 sign-up to hit the speakers that had  
14 not been yet -- had the opportunity to speak from  
15 1/10. So we had -- we were continuing to call names  
16 then.

17 MS. ARRUDA: Well, can I go ahead and go?  
18 Because I've been waiting for -- I was supposed to  
19 be number 40 on that list, and I still haven't heard  
20 my name called, so, can I go? Okay. All right.

21 Hello. My name is Dawn Arruda, and I  
22 live at Pinnacle Court in the Reserve at Moorhead in

1 this great Town of Warrenton.

2 I wear many hats in my professional and  
3 private life. And as some of you may know, I am a  
4 Realtor. I am an HOA president. I'm a proud member  
5 of the Rotary Club and a vice chair of the Fauquier  
6 Chamber of Commerce.

7 But tonight I'm here just on behalf of  
8 me and all of you.

9 (Applause.)

10 MS. ARRUDA: I'm showing up tonight on  
11 Valentine's Day eve -- which pretty much will soon  
12 turn into the next day if we're here too much  
13 longer. But I'm here today because today is the day  
14 of love, and that's why we're all here tonight.

15 We are here to exclaim our love of this  
16 town. A town that so many of my clients could not  
17 wait to move here. A town where when you come to  
18 the borders of this town your blood pressure drops  
19 ten points. A town where you come to the events and  
20 the parades to feel that connection of a simpler  
21 time. It's a town that we all cherish and love.  
22 County residents, as well as town residents.

1 We are all here tonight to ask you, all  
2 of you, to continue to love this town by saying no  
3 to Amazon.

4 I don't need to tell you all of the  
5 reasons that this is a bad deal and why it stinks of  
6 an inappropriate back-door distrust and why this  
7 Amazon machine is not wanted here for so many  
8 reasons.

9 The facts all speak for themselves, and  
10 you have heard them multiple times. You-all know  
11 it's the wrong place, the wrong location, to put  
12 this center.

13 My biggest fear is that the information  
14 that we don't have, the information that some of you  
15 thankfully are asking for, the information that is  
16 not available to us, the information that you guys  
17 will not share even with the new Councilmembers,  
18 that information, it scares me.

19 And the reason it scares me is because  
20 there's some information in there that I'm afraid is  
21 going to show a side of our town that I do not want  
22 to know. But it has to be answered.

1 My heart on this Valentine's Day hopes  
2 and prays that the people -- all of these people's  
3 voices will be heard.

4 I saw the mockup of a planned use for  
5 this property that would fit the comp plan and bring  
6 much needed affordable housing so that we can keep  
7 our young people here. A plan that has green  
8 spaces, walking paths, that lends itself to an  
9 entrance to our town that is worthy of our town.

10 The data center is not worthy of the  
11 entrance of your town, and neither is the one that  
12 you guys are talking about at the maple farm. We  
13 need to explore other options.

14 That we cannot set a precedent for  
15 these data centers. We cannot invite them to our  
16 communities. Let's learn the lessons from all of  
17 those who have come before us and all that are  
18 currently fighting to keep these from taking over.

19 MAYOR NEVILL: Thank you, ma'am.

20 MS. ARRUDA: Do the right thing.

21 MAYOR NEVILL: Thank you, ma'am.

22 MS. ARRUDA: Love, love, love this sweet

1 little town, and say no.

2           MAYOR NEVILL: Thank you.

3           MS. ARRUDA: Thank you.

4           MR. EBRAHIM: Good evening, everyone. My  
5 name is Raeid Ebrahim. I live at 32 Blue Ridge  
6 Street. I'm a senior at Fauquier High School. I  
7 also attend Mountain Vista Governor's School. And I  
8 am also a candidate for the Board of Supervisors in  
9 the Center District.

10           And before I start my comments, I would  
11 like to thank Town Councilmember Bill Semple, Paul  
12 Mooney, and Dave McGuire for supporting --

13           (Applause.)

14           MR. EBRAHIM: -- for supporting the -- for  
15 supporting the motion to delay the vote until the  
16 emails have been released. The vast majority of the  
17 people of our town want all the facts to be  
18 considered before we approve such a motion. Thank  
19 you for standing up for transparency.

20           So I have lived in the Town of  
21 Warrenton with my family for over seven years. It's  
22 a great place to live. The air is clean, the people

1 are kind, and our small town and open spaces are  
2 delightful and are unique.

3           However, Amazon's proposed data center  
4 on the intersection between Blackwell Road and Lee  
5 Highway, right on the entrance to the Town of  
6 Warrenton, has the potential to alter our town and  
7 our community without providing convincing benefits  
8 to the people of Warrenton.

9           I'm standing here today to urge the  
10 Town Council to reject Amazon's special use permit  
11 application for a data center.

12           I have a rhetorical question. Which  
13 would you rather see while entering our hometown, a  
14 field of beautiful green trees that reflect the  
15 natural appeal of our hometown, or a large concrete  
16 behemoth of a building with no conceivable visual  
17 appeal? I think that most people of this town would  
18 agree that they would not want a large ugly concrete  
19 data center welcoming you right at the entrance of  
20 our town.

21           Some may argue that the data center  
22 will bring many benefits that may outweigh these

1 costs, and I disagree. The potential benefits to  
2 our community that Amazon's proposed data center  
3 would generate would be slim.

4 One area that's been discussed is  
5 revenue. According to the Fauquier Times, the  
6 center would only generate about 800,000 a year,  
7 which is 3 percent of the town's budget. And that  
8 is not even considering the fact that if Amazon  
9 wishes to, they can apply for tax rebates, which  
10 would further recoup that cost and further lower the  
11 tax revenue.

12 The number of jobs the data center  
13 would generate is unclear, but according to the  
14 Fauquier Times would be -- the estimates range from  
15 30 to 52 employees. And out of these 30 or so  
16 employees working at the data center, how many of  
17 them will actually be people who live in our town?  
18 Potentially, very few.

19 In a 3 to 1 vote, the Warrenton  
20 Planning Commission recommended that the data center  
21 be rejected, setting important concerns about noise,  
22 power and tax revenue. Additionally, the commission

1 pointed to the fact that Amazon does not have a  
2 detailed plan about what would happen when the data  
3 center is commissioned. We should listen to these  
4 experts who have our best interests in mind.

5           It is my belief that when approving  
6 applications for development the primary question  
7 one should ask is this: Will this development  
8 benefit the people of our community? And I think  
9 it's clear that the data center will clearly benefit  
10 Amazon, but it will harm the people of Warrenton.

11           The technology in this data center  
12 would likely become obsolete within a few years.  
13 (Inaudible) would have a long (inaudible) of our  
14 town.

15           Members of the Town Council, I politely  
16 urge that you do what is right for the people of  
17 Warrenton and respect Amazon's -- I'm sorry --  
18 reject Amazon's application.

19           Thank you.

20           (Applause.)

21           MR. CLOUGH: Brock Bacos, Doug Barylski,  
22 Matthew Brinkley, James Brown.

1 MR. RICHARDSON: Hi. I'm --

2 MAYOR NEVILL: I'm sorry, could you repeat  
3 -- Mr. Clough, can you please repeat those names?

4 MR. CLOUGH: Brock Bacos, Doug Barylski,  
5 Matthew Brinkley, James Brown.

6 MR. RICHARDSON: Okay. I'm Dave Richardson.  
7 I'm on the list somewhere. If I may have a chance  
8 to speak.

9 MAYOR NEVILL: We have somebody coming down  
10 whose name was called.

11 MR. RICHARDSON: Oh, okay.

12 MR. BARYLSKI: I'm Doug Barylski. I live at  
13 189 North View Circle. Thank you for establishing  
14 this forum to get as many citizens in here as  
15 possible. I'm not going to repeat the comments that  
16 were made by many others. I do agree with them and  
17 oppose this data center.

18 I am befuddled as to why a  
19 representative of our skilled union laborers would  
20 support a specific development when we're not  
21 opposed to development per the comprehensive plan,  
22 as in mixed use, as originally intended. And I

1 think that an excellent compromise is to continue  
2 with the original intent of the comprehensive plan  
3 as mixed use.

4           One thing I would like to add is even  
5 if the plans did comply with the sound, you know,  
6 compliance that's required, later on if they did not  
7 comply, the only enforcement would be fines, which  
8 Amazon would be more than happy to pay because  
9 they've got beaucoup bucks, and the fines do not  
10 make up for anything that would be any kind of real  
11 penalty if they didn't comply.

12           So even if we thought that our sound  
13 levels were adequate, they are still going to get  
14 abused downstream.

15           Thank you very much.

16           (Applause.)

17           MR. CLOUGH: Brock Bacos, Matthew Brinkley,  
18 James Brown, Barbara Burke.

19           MR. RICHARDSON: Your Honor, if I may. I'm  
20 on the list. I'm David Richardson. I live in the  
21 Oaks Springs District. It's a little more than half  
22 a mile from where the data center would be built.

1 I'm an economist, and I want to talk  
2 about money. And nobody has really talked about  
3 money explicitly in this discussion.

4 And I'm thinking some of these people  
5 just across Blackwell Road that are 200 yards  
6 possibly from the data center, they are going to  
7 lose half the value of their houses, or more.

8 You know, this is money that goes from  
9 the citizens of Warrenton straight into the pockets  
10 of Amazon. These are ordinary people that are  
11 paying to a trillion dollar company. This is what  
12 you're voting for. Is this what you really, really  
13 want to have happen?

14 Another aspect to this is -- well, the  
15 absent council person from Ward 1, hopefully, she  
16 did not sell her house while this is going on,  
17 because selling her house is a crime in this  
18 situation. It's called insider trading.

19 (Applause.)

20 MR. RICHARDSON: If she had, she's looking  
21 at jail time.

22 But it gets worse because she's in the

1 real estate business and she has been selling houses  
2 for clients. If she used her insider information to  
3 make these deals work, she's still guilty of insider  
4 trading.

5           You people, the rest of you, a lot of  
6 you are in different -- I don't know about the  
7 jewelry business. I'll give Your Honor a little bit  
8 of a break here. But look at your business  
9 dealings. If you've used this insider information  
10 in any way in your business dealings, you're taking  
11 the same kind of risk. How do you get out of it?  
12 You vote no. It's easy as pie.

13           So, conscience. What is conscience?  
14 It's the still, small voice that tells you that  
15 someone is watching. Well, someone -- the Post is  
16 watching. The Times is watching. Jennifer Wexton  
17 is watching. Everybody is watching you. Do you  
18 really want to take that kind of chance? The way  
19 not to is to vote no.

20           One last little bit. You know, self  
21 respect is an important thing in our lives, and we  
22 can think of it as more important than we really

1 realize sometimes. No amount of money, no new job,  
2 will pay for your loss of self respect. Think of it  
3 that way. Do the right thing. Vote no.

4 Thank you.

5 (Applause.)

6 MR. CLOUGH: Brock Bacos.

7 MS. MILLER: I go by McKenzie Miller. My  
8 parents own 122 West Shirley Avenue. I live at 8688  
9 Lees Ridge Road.

10 This -- I just like -- I don't even  
11 understand why we're here. Like, it's interesting  
12 how we've gotten this far. It's like I'm -- it's  
13 unnerving. I feel like I'm on a drug right now, and  
14 I haven't taken anything in, like, 24 hours.

15 For many reasons this is going to ruin  
16 the real estate game for people buying and people  
17 selling.

18 But on the noise level, I suffer from  
19 chronic illness and this will affect me. Like, I  
20 probably won't even be able to go to, like, Giant or  
21 anything.

22 And I went to Highland School until I

1 was kicked out, and I can't imagine having to play  
2 sports there or, like, going outside when this  
3 structure is here.

4           And, honestly, I think if Amazon wants  
5 to buy this place, they can build affordable  
6 housing. Why can't you guys spend this much time  
7 agonizing over affordable housing? Okay.

8           (Applause.)

9           MS. MILLER: Politics are local. Okay.  
10 Politics are local. What we are debating here is on  
11 a national level. Okay. And how we fix it is  
12 solving it right here. Why can't you guys be the  
13 affordable housing extraordinaires of the country?

14           Charlottesville is not fixing  
15 affordable housing.

16           And to be honest, I don't know if I can  
17 trust any of you guys. And if I have any semblance  
18 of truth it would be one of them, but I feel like  
19 the pressure of the rest of you guys being brushed  
20 off makes that one person decide to go a different  
21 direction.

22           And I know you don't know me, Carter

1 Nevill, but I grew up working for your father at  
2 Stable Door. And I loved walking up the road to see  
3 Mr. Timberlake. And I was from Charlottesville, so  
4 my family went to Timberlakes on the downtown mall.  
5 And I always thought Mr. Timberlake was the  
6 Timberlakes. Like, he owned Timberlakes.

7 And so the whole, like, smallness of  
8 this town, like Leigh Owsley who owns the shop on  
9 Main Street. And I don't know how we didn't have  
10 that before. I don't know how we're going to  
11 survive without Latitudes.

12 In all honesty, I'm here today because  
13 of Hope Porter's grandson, his wife -- outside of my  
14 Aunt Luki's (ph) Christmas party [sic], because it  
15 just rattles me to my core.

16 And the fact that I stood in front of  
17 you guys in the comprehensive plan and I felt like  
18 you were just looking at me but not paying attention  
19 or can, like, tell me what I told you. And for  
20 somebody who has a disability and lives on a small  
21 budget, I'm afraid for my future, so I wish you guys  
22 would take that into consideration.

1 Thank you.

2 (Applause.)

3 MR. CLOUGH: Brock Bacos, Matthew --

4 UNIDENTIFIED SPEAKER: Forgive me, but I  
5 really think you really are off. The list of people  
6 who are on your list are showing up to speak out of  
7 sequence. You want to continue?

8 MR. CLOUGH: Brock Bacos, Matthew Brinkley,  
9 James Brown, Barbara Burke, Andrew Burrows.

10 (No responses.)

11 MR. CLOUGH: Brock Bacos, Matthew Brinkley,  
12 James Brown, Barbara Burke, Andrew Burrows,  
13 Sebastian Byrum (ph), Brian Caine, Chris Cloud,  
14 Robin Cooke.

15 UNIDENTIFIED SPEAKER: We're off the list.  
16 Let's get back on the list.

17 UNIDENTIFIED SPEAKER: He's working on it.

18 MR. CLOUGH: Sebastian Byrum, Brian Caine,  
19 Chris Cloud, Robin Cooke, Raymond Cultrera, Diane  
20 Cultrera, Althea Daniels -- Aleeta Daniels, Marlene  
21 Dennis.

22 MR. FUGEE: Thank you. I'm on the list,

1 too.

2 (Indiscernible discussion.)

3 MR. FUGEE: I've gotten permission to go  
4 ahead.

5 UNIDENTIFIED SPEAKER: You called my name,  
6 but I'd like to let this gentleman go.

7 Which would you like to do?

8 MR. CLOUGH: The Mayor said you may  
9 continue, sir.

10 MR. FUGEE: Thank you. My name is Tom  
11 Fugee, Ward 2. And I believe this meeting was set  
12 on Valentine's Day to purposely deter people from  
13 being here.

14 (Applause.)

15 MR. FUGEE: Your townspeople -- your  
16 townspeople have the right to live in a space  
17 peacefully and free from recurring disturbances or  
18 disruptions.

19 They say the proposed data center won't  
20 change the town's character. It will. They say the  
21 200,000-square-foot facility will be a major  
22 employer. It won't. They say the facility won't

1 adversely impact home values. It will.

2           They say the facility will be a major  
3 contributor to tax revenue. It won't. They say the  
4 facility won't be an eyesore. It will. They say  
5 there's a major silent majority who wants the  
6 facility. There isn't.

7           They think that at the polls the voters  
8 will not punish the Mayor and the Town Council  
9 members who voted in favor of the facility. They  
10 will.

11           (Applause.)

12           MR. FUGEE: You must understand -- you must  
13 understand that the approval of the proposed  
14 facility has the potential for new centers and  
15 transmission lines. Don't believe it. Look to  
16 Prince William County. The newly proposed data  
17 center plan there would call for the construction of  
18 as many as 14 centers, 270 acres.

19           On page 3 of the Fauquier Times  
20 distributed tonight, there's quotes from the land  
21 use lawyer, John Foote, who spoke on behalf of  
22 Amazon, and I quote, "Noise? As you go further up

1 the hill, you likely will not know it's there."

2 UNIDENTIFIED SPEAKER: Somebody wake him up.  
3 He's right over there.

4 MR. FUGEE: "It may be no noise at all."

5 Our PWC neighbors, Prince William  
6 County, have massively, massively risen in unison to  
7 protest the constant loud noise and vibration of  
8 Amazon's existing data center in Manassas. This  
9 isn't a might happen here. It's a happen there.

10 Finally, is the approval of the data  
11 center the legacy that the Town Council wants to  
12 pass on to their families, friends, and constituents  
13 to be able to say I voted to further enrich Jeff  
14 Bezos?

15 Listen to your townspeople. Listen to  
16 your planning commission.

17 MAYOR NEVILL: Thank you, sir.

18 MR. FUGEE: Listen to your own judgment and  
19 your conscience. Vote no.

20 MAYOR NEVILL: Thank you, sir.

21 (Applause.)

22 UNIDENTIFIED SPEAKER: Sebastian Byrum,

1 Brian Caine, Chris Cloud, Robin Cooke, Raymond  
2 Cultrera.

3 MR. CULTRERA: Present. Good evening. My  
4 name is Ray Cultrera. I'm residing in the Marshall  
5 District near Orlean.

6 First of all, I am not for specifically  
7 or specifically against data centers. They have  
8 become part of our Internet connected age, and we  
9 all utilize the data and services that they provide.

10 But they're also a bit like a pig farm.  
11 And don't get me wrong, I like pork, and I have  
12 great admiration and respect for the farmers who  
13 raise pigs and other animals.

14 But we can probably agree that pig  
15 farms frequently have certain characteristics. So  
16 let's say this pig farm has been around a long time,  
17 many years, and a developer then decides to build a  
18 community next to it. That's not the best planning  
19 for the new community, but as a buyer of a home or  
20 business in that community, that's your choice. You  
21 are fully aware and signing on to the noise and the  
22 smells coming from that pig farm.

1                   But if a community has already been  
2 planned and built, it has got homes, schools, and  
3 businesses, and then somebody decides to start a pig  
4 farm right next to that community, that's bad  
5 planning on the part of the pig farm.

6                   So the noise and smells coming from  
7 that farm don't do any favors for the homeowners and  
8 the businesses in that area who did not sign up for  
9 that when they invested in the community.

10                  I've read the reports that neighbors to  
11 the north and east in Loudoun and Prince William  
12 Counties are now regretting sharing their living  
13 spaces with data centers. They are complaining of  
14 the nonstop noise and diesel fumes coming from those  
15 structures, in many cases sitting right in their own  
16 backyards, and making these neighbors miserable in  
17 their own homes.

18                  If I were sitting in one of your seats  
19 there on the council, of course, I would be making  
20 decisions with the goal of hopefully improving life  
21 for my fellow citizens, not degrading it.

22                  And, of course, it's difficult. But I

1 will use the word that other people have used: It's  
2 difficult, but it's courageous to say no to this  
3 facility.

4           Because if I were sitting in your seat  
5 and didn't say no to this proposal, I would be  
6 helping to open the floodgates for the next data  
7 center and the next and the next; and at that point  
8 it would be too late to take a stand. Our neighbors  
9 in Loudoun and Prince William are discovering that  
10 for themselves.

11           Thank you for your time.

12           (Applause.)

13           MR. MITCHELL: My name is Sam Mitchell. I  
14 live on Springs Road. My family has been on the  
15 property for 124 years, and I love that property  
16 very much; and I'm sure that everyone in this  
17 audience loves Warrenton the way I love that  
18 property, and I hope very much that you will respect  
19 that love.

20           I specifically want to talk about  
21 taxes. The only benefit of the data center is to  
22 the Town of Warrenton, certainly not to the people

1 for the many reasons you've heard. So how much  
2 money are we talking about? How much are you going  
3 to sell a heritage for?

4 Well, the Town will not tell us. I've  
5 spent many hours trying to understand, okay, what's  
6 the revenue? The best anyone can come up with is  
7 about 3 percent of the town's revenues, which works  
8 out to something like \$1.8 million. Not very much.

9 So you have to say, okay, what's the  
10 tax situation really going to be? That's at best.

11 And if you take a look at the taxation  
12 of data centers, you find that the taxation creates  
13 a heads I win/tails I win situation for Amazon. The  
14 people of Warrenton are in a lose-lose situation.  
15 Let me explain.

16 The level and trend of the tax receipts  
17 is quite uncertain, largely under the control of  
18 Amazon, and subject to serious risk of serious  
19 decline. So what we're looking at here is a  
20 situation where the immense damage, hellish damage,  
21 you're doing to your fellow citizens is -- could end  
22 up benefitting the town very little. Let me give

1 you some numbers.

2           The taxation of data centers is exempt  
3 from retail sales and use taxes. They do pay real  
4 estate taxes, but most of the tax revenue comes from  
5 personal property taxes.

6           Well, let me tell you, Amazon or the  
7 data center industry got passed a law in April of  
8 last year which says that the personal property part  
9 of the taxes -- taxation of data centers has to be  
10 based on depreciated costs.

11           Okay. As everybody in the audience  
12 knows, computers depreciate very fast. So let's say  
13 the data center is not an economic success, and in  
14 four years the tax base for the personal property  
15 tax has gone down to nothing. No tax, no revenue.

16           So basically you're selling the  
17 heritage of Warrenton --

18           MAYOR NEVILL: Thank you, sir.

19           MR. MITCHELL: -- what everybody has talked  
20 about for a risk of very disappointing tax revenues.

21           MAYOR NEVILL: Thank you, sir.

22           MR. MITCHELL: That's a bad deal.

1 (Applause.)

2 MR. CLOUGH: Sebastian Byrum, Brian Caine,  
3 Chris Cloud, Robin Cooke, Diane Cultrera, Aleeta  
4 Daniels, Marlene Dennis, Alan Dyanic.

5 MR. CAINE: My name is Brian Caine. I live  
6 in the Marshall District. Thank you for getting me  
7 on the list.

8 I just want to say that I am  
9 appreciative of the pressure that the Town Council  
10 is under. You know, you have Richmond and a  
11 governor there who is out ahead of you on wanting to  
12 do business with the data center industry. That's a  
13 hard pressure.

14 You have a Congressional representative  
15 for this district, a new representative for us, who  
16 really has been very silent during the process. So  
17 you don't have a lot of backup, and you've got  
18 pressure to kind of move ahead at the interest of  
19 what I call special interests.

20 But my real message is for us, the  
21 audience, I think we need to really -- and I think  
22 tonight has really has shown that we can show up and

1 we can do what is our obligation as citizens, which  
2 is really to fight for the right and fight for our  
3 rights.

4 And one thing I just want to mention is  
5 the composition of the board.

6 I've been here eight years. I've just  
7 kind of watched through the paper and through the  
8 news just like, what the heck is going on with this  
9 board? I mean, they're just -- it's kind of a clown  
10 show at times. You know, we've been through three  
11 or four city managers since I've been here. A  
12 couple members have resigned in the middle of their  
13 term. Who resigns in the middle of their term for  
14 no specific reason?

15 And then how did the appointed members  
16 get their jobs? Well, they got their jobs because  
17 the Mayor and a former member, Sean Polster, I think  
18 is his name, got together -- and I'm just recalling  
19 my reading it in the newspaper. We got together.  
20 We thought these two guys would be good, Mr. Heroux,  
21 and the other gentleman, and, you know, we're going  
22 to put them on the board.

1                   So we have appointed members making  
2 decisions for us. Not elected members, appointed  
3 members. That's kind of how countries like England  
4 and Australia and other civilized countries do  
5 things. The citizens don't really get to vote.  
6 Kind of the political class decides who gets to  
7 vote. So I just --

8                   (Applause.)

9                   MR. CAINE: I really -- I really think we as  
10 citizens have to kind of get our game up and keep an  
11 eye and force accountability from our leaders, and I  
12 don't think we have done that.

13                   And as some other people have very well  
14 articulated, better than I can, we're going to  
15 lawyer up on this thing, we're going to fight you  
16 every step of the way, and ultimately we're going to  
17 take you out of office the next time you run. We're  
18 going to take you out.

19                   Thank you very much.

20                   (Applause.)

21                   MR. CLOUGH: Diane Cultrera, Aleeta Daniels,  
22 Marlene Dennis, Alan Dianic, David Downey, Patricia

1 Drunagel, Joe Duvall, Raeid Ebrahim, Tracy Edwards.

2 MS. CULTRERA: I'm Diane Cultrera. I live  
3 just outside of Orlean. Please do not approve this  
4 proposed Amazon data center on Blackwell Road.

5 For a very long time Virginia has  
6 enjoyed a reputation for its natural beauty and  
7 quality of life. However, now that Virginia hosts  
8 the largest data center market in the world, how  
9 long will it be before the state's motto, "Virginia  
10 is for Lovers," becomes laughable?

11 As officials of the Town of Warrenton,  
12 you-all, of course, know what makes our town and  
13 county so very special. In a nutshell, it is a  
14 wonderful and beautiful place to live, to do  
15 business, and to visit; and most of all it is the  
16 people that live and work here.

17 And they, your constituents, are very,  
18 very concerned about the potential high levels of  
19 noise coming from the proposed data center. This  
20 also translates into being very concerned about the  
21 quality of their lives going forward.

22 The noise levels arising from the data

1 centers in Loudoun and Prince William County have  
2 been intolerable for those families in nearby  
3 communities; and this will be no different for the  
4 families living near this proposed data center.

5 Please, each of you, look to your  
6 conscience, look into your hearts, and take a step  
7 back from this proposal to reflect on what you --  
8 what has made Warrenton and all of Fauquier County  
9 so very special.

10 You were elected to represent, serve,  
11 and protect your community and constituents, not to  
12 represent Amazon.

13 You've seen the wonderful, amazing  
14 turnout here this evening in opposition of this  
15 proposal; and on top of that you recently received a  
16 petition signed by almost 2,000 residents of this  
17 town and county that called on you to deny the  
18 Amazon data center on Blackwell Road.

19 I hope you will honor the concerns and  
20 wishes of citizens of this town and county by  
21 denying approval of this Amazon data center.

22 Thank you.

1 (Applause.)

2 MR. CLOUGH: Aleeta Daniels, Marlene Dennis,  
3 Alan Dianic, David Downey, Patricia Dunagel, Joe  
4 Duvall, Tracy Edwards, Carolyn Elmhurst, Alicia  
5 Englert, Patricia Ewing, Scott Filling, Roy Francis,  
6 Ruth Fugee.

7 MR. DOWNEY: Good evening. Mayor and Town  
8 Council, my name is Dave Downey from Scott District.

9 About 20 years ago my family and I  
10 moved from Michigan, and we chose Warrenton/Fauquier  
11 County for many of the reasons that we've all been  
12 talking about: Good schools, recreation, good mix  
13 of daily conveniences, the rural beauty; and because  
14 Warrenton is a Main Street community, something that  
15 I always cherished.

16 I was struck early on with the ethos of  
17 our area to preserve the rural landscape and small  
18 town appeal. We have something extraordinarily  
19 special here, and it's clearly in great danger.

20 I came out tonight really to prove that  
21 there is not a silent majority out there in favor of  
22 this. I came out to go on record and ask the Town

1 Council to deny this special use permit. It's clear  
2 the vast majority -- the clear majority of the  
3 citizens that don't want to see a data center scar  
4 the town, or massive new power infrastructure  
5 destroy our landscape.

6 I don't need to reiterate all the  
7 details that so many other people have eloquently  
8 stated. This is a choice tonight, and you do have  
9 the discretion.

10 In addition to being a resident, I'm  
11 also the CEO of the International Downtown  
12 Non-Profit Association. I understand the challenges  
13 that you have before you. I've seen communities  
14 across North America struggle with growth pressures  
15 and municipal finance while at the same time  
16 striving to maintain affordability, inclusion, and  
17 remain authentic.

18 Just last week, as a matter of fact, we  
19 were in Durham, North Carolina. We were meeting  
20 with stakeholders. Both public and private sector  
21 leaders, citizens, visitors alike; and I can tell  
22 you, to a person, the community is lamenting how

1 their recent development has ripped the soul out of  
2 Durham. A gritty small town just ten years ago,  
3 they are now striving to find a way to reclaim what  
4 they had.

5           Tonight really is a question about  
6 leadership. I was struck in early 2000 [sic] back  
7 in the beginning of the pandemic when local  
8 governments were striving to innovate and  
9 problem-solve to overcome the impacts of the  
10 pandemic; and I was extraordinarily proud, quite  
11 frankly, in a very small case, where one day in 2020  
12 I see a picture of a street closure for outdoor  
13 dining. I recognized the location, and it was Denim  
14 & Pearls.

15           One of the very first images that our  
16 industry saw of town leadership innovating the use  
17 of outdoor public space for their people was my town  
18 of Warrenton.

19           Warrenton literally became a beacon of  
20 great civic leadership for the nation. It was one  
21 of the first images of how we were going to adapt to  
22 the current effects of the pandemic at the time.

1 I would like to actually echo some of  
2 the recommendations here I heard tonight of prior  
3 speakers and suggestions that Town Council and the  
4 county trustees come together and innovate to create  
5 perhaps another national beacon of innovative  
6 practice; intergovernmental cooperation to find  
7 alternative ways to solve our municipal finance  
8 needs instead of selling out our future.

9 Thank you.

10 (Applause.)

11 MR. CLOUGH: Patricia Drunagel, Joe Duvall,  
12 Tracy Edwards, Carolyn Elmhurst, Alice Englert,  
13 Patricia Ewing, Scott Filling, Roy Francis, Ruth  
14 Fugee, Gregory Hanwick, Candace Harper, Gertraud  
15 H-E-C-H-L. "Hechl," I apologize. Georgia Herbert,  
16 Laura Hettinger.

17 MS. HECHL: Hello. My name is Gertraud  
18 Hechl. I live in the Scott District, and I work in  
19 Warrenton.

20 I would like to go on record against  
21 approving the special use permit. And I have been  
22 listening to so many citizens and so many eloquent

1 arguments, that there's not much to say and add to  
2 it, but I would like to add, and I would like to  
3 remind everybody, that it's your turn now to  
4 actually listen to what everybody said; and in order  
5 to facilitate that, I would like to remind you of  
6 your town code of ethics.

7 It has been quoted many times, but not  
8 the preamble to the mission, which says, "in  
9 cooperation with and for our citizens." And that's  
10 all I would like to say.

11 And all the citizens have spoken. Very  
12 few were for it. So I think I kindly ask you to  
13 vote accordingly and listen to your citizens.

14 Thank you.

15 (Applause.)

16 MR. SEMPLE: Point of order, Mr. Mayor.

17 Point of order.

18 I'm hearing a number of names from  
19 citizens who spoke at citizens' time coming up  
20 again. For example, Georgia Herbert, and others.  
21 And I'm wondering if there's any way you might  
22 reconsider, because I think there's continued

1 confusion about when to speak and where. And it's  
2 really -- there shouldn't be a distinction, that  
3 shouldn't be a difference that matters.

4 (Applause.)

5 UNIDENTIFIED SPEAKER: What's the answer?

6 MR. CLOUGH: To continue?

7 Tracey Edwards, Carolyn Elmhurst, Alice  
8 Englert, Patricia Ewing, Scott Filling, Gregory  
9 Hanwick, Candace Harper, Laura Hettinger, Thomas  
10 Higginson, Richard Hinton, Gayle Hinton, Billy  
11 Hodge, Betsy Hostrop, Phillip Kasky, Margaret  
12 Keapproth-- I apologize if I pronounced that one  
13 incorrectly.

14 MR. HANWICK: Thank you, everyone, and good  
15 evening. I'm Greg Hanwick (ph), 6890 Emma Court in  
16 Warrenton.

17 Council, as well as everyone here,  
18 thank you very much for your time. It's really just  
19 incredible to be able to get up here and speak  
20 myself, as well as have you listen, as well as see  
21 all these folks turn out and voice their opinion.

22 My very short story would be, after

1 retiring from the Marine Corps a few years ago, my  
2 wife and I had a lot of choices to make; and we  
3 chose Warrenton specifically. There were many  
4 attractive places we could go, even after overseas  
5 stationings. And let's face it, who turns down San  
6 Diego? But we did. We chose Warrenton.

7 And we chose a very specific place to  
8 live in Warrenton because of its conservation of  
9 nature, because of its wetland type areas, and we  
10 also chose this area because of its general  
11 knowledge -- its general knowledge and supporting  
12 use of conservation, and the use of land.

13 To have a data center come into that --  
14 and you have heard a lot of folks talk about it.  
15 There is a lot of -- I'll give one of my short  
16 stories, too. But that data center and the noise  
17 that it will make and the way that it will look and  
18 the future that it predicts of other things coming  
19 in will take away from that attractiveness, the  
20 purposes that people live here, the purposes that  
21 people stay here.

22 A very quick story that you've heard is

1 the noise that the data center might make. I,  
2 myself, from years in the Marine Corps, whether it  
3 was loud noises or soft noises, that continuous  
4 noise is going to damage people. You don't have to  
5 be close to it. You can be far away from it. The  
6 vibrations of engines, the chemicals that come with  
7 something like this, it's going to hurt people.

8 We heard a gentleman speak that said  
9 Amazon owns that land. They can do whatever they  
10 want with it. One phrase in life is "you always  
11 come with a solution." This is not some sort of  
12 Yellowstone TV show where people can blow up their  
13 land, alter rivers, and things like that. This is  
14 Virginia. This is Warrenton. If Amazon owns that  
15 land, if they wanted to do something with it, that  
16 can be controlled. They can do something that's  
17 beneficial to the community, something that's better  
18 for Warrenton.

19 We've also heard that there are  
20 questions of both law and fact surrounding what's  
21 going on with this special use permit; and until  
22 those questions of law and fact are answered and

1 answered appropriately and answered to the  
2 satisfaction of the citizens, it makes -- gives the  
3 perception, it gives that appearance of an  
4 impropriety.

5 And until those questions of law and  
6 fact are answered, it brings into question whether  
7 or not even voting would have any impact, because  
8 maybe some folks have the impression that maybe some  
9 folks have already made their deals with Amazon --

10 MAYOR NEVILL: Thank you, sir.

11 MR. HANWICK: -- or with someone else. And  
12 elections are not -- they're not worried about being  
13 reelected.

14 MAYOR NEVILL: Thank you, sir. Your time is  
15 up.

16 MR. HANWICK: Thank you all.

17 MR. HIGGINSON: Good evening. My name is  
18 Thomas Higginson. My wife and I live in Rectortown.

19 I'd like to offer for your  
20 consideration a proverb, "The first step is always  
21 the most difficult."

22 How is that relevant? Warrenton is a

1 lovely, historic town. And as represented by its  
2 logo, you see the silhouette of a historic court  
3 building, small scale other buildings, trees and  
4 open space. It is not Manassas. You do not see  
5 data centers in the town logo.

6 The Fauquier County countryside is  
7 surpassingly beautiful. You don't see transmission  
8 towers crawling across it the way you do in Prince  
9 William. This is not Prince William.

10 If you all approve this data center,  
11 you make the job of the next applicant a whole lot  
12 easier; and by extension, the applicant after that.

13 This applicant's job is clearly the  
14 most difficult, and subsequent applicants, if you  
15 approve the center, will have a much easier time.  
16 Therefore, your legacy, if you approve it, will be  
17 indirectly promoting multiple data centers that  
18 crawl across our beautiful countryside like an ugly  
19 skin infection and cannot ever be removed.

20 Therefore, I suggest to you, consider  
21 the first step is always the hardest.

22 (Applause.)

1 MR. HINTON: Good evening. My name is  
2 Richard Hinton. My wife and I live at 7628 Movern  
3 Lane in Warrenton. We've lived here for 17 years.

4 Each time we have to venture into  
5 Manassas or Prince William or Loudoun, we are so  
6 grateful to return home to wonderful Warrenton, a  
7 safe enclave from the craziness of Northern  
8 Virginia.

9 There's a saying, "Democracy dies in  
10 darkness." And from the start there's been a dark  
11 cloud over this whole procedure. The town manager  
12 resigns, hired away by Amazon, councilmembers with  
13 ties to Amazon, violations of ethics code.

14 The project seems to be seemingly  
15 fast-tracked with gaping unanswered holes in the  
16 application.

17 I was naive to believe that this  
18 corruption would not come to our wonderful enclave.  
19 I was wrong. I'm feeling betrayed by the Town  
20 Council. This monster is knocking at our door. If  
21 you let it in, you will be in a world of hurt.

22 You have heard two previous speakers

1 both with real world experience dealing with large  
2 corporations, Chuck Cross, Department of Treasury;  
3 and John Benefield, attorney from Middleburg.

4           They have stated: If you think you can  
5 shut down an operating data center, you're wrong.  
6 You will be tied up for years in court. Litigation  
7 is the only way, and it is long and it is expensive,  
8 and your opponent is infinitely more funded than you  
9 are.

10           Finally, just ask Dale Brown, president  
11 of the Great Oak Homeowners Association in Manassas,  
12 who are fighting an existing data center, not a  
13 proposed one, but one where hundreds of residents  
14 whose peace of mind and health are adversely  
15 affected by the never-ending noise.

16           Lastly, despite Amazon's smoke and  
17 mirrors, this center's very location near a nursing  
18 home and hundreds of homes should be rendered DOA,  
19 dead on arrival.

20           Thank you.

21           (Applause.)

22           MR. KASKY: Good evening. Phil Kasky. My

1 wife and I have lived in this area in Warrenton for  
2 the last 19 years.

3 Last year we moved from just south of  
4 town to the northern area of our ZIP code into Vint  
5 Hill in the 55-plus section. Our friends call it  
6 the old folks section, and it's probably accurate.

7 But even though we're aging we're still  
8 engaged like ordinary citizens. We really are  
9 activated now with this issue on the data center.  
10 We're concerned. We're frustrated. We're fearful.  
11 We're angry. Angry because this council is not  
12 listening to us. You're certainly not representing  
13 your constituents.

14 I mentioned the word "fearful." You  
15 know, I was listening -- I didn't have the pleasure  
16 of being in the audience, but I watched it on the  
17 video, the last public hearing, where one of your  
18 members commented that she felt threatened, fearful  
19 to walk around in our town, because she was recently  
20 or had prior to the meeting been confronted by a  
21 neighbor who got in her face, and apparently was  
22 expressing his frustration rather close, so she felt

1 fearful.

2                   Can you imagine the number of folks in  
3 our area who feel the same kind of fear, but it's  
4 very personal and it's very dehumanizing? They fear  
5 that their property values are declining. That's  
6 been proven in Loudoun and Prince William County.  
7 We see that right now.

8                   They hear the noise level. You know,  
9 there was an article that was published by the  
10 Washington Post just four days ago on February 10th  
11 that focused on residents in both those same  
12 counties, Prince William and Loudoun, and the impact  
13 that the noise from these data centers is having on  
14 their quality of life.

15                   In fact, they talked about one family  
16 that has been driven from their living quarters  
17 upstairs. They can't even go to bed to sleep in the  
18 bedrooms. They're forced to go down into their --  
19 into the storage area in their basement because the  
20 noise from the fans on the rooftop is so loud.

21                   The sound (indiscernible) are  
22 ineffective, at least sufficiently so that it's

1 causing headaches and nausea with some of those  
2 residents.

3           So, yes, folks are certainly angry.  
4 They are fearful. They see that this board is only  
5 focused on one thing, and that's a revenue flow.  
6 But are you so hardhearted you can't see the harm a  
7 data center is doing to this town, to this  
8 community?

9           I think I'm going to part with this  
10 last comment -- is let's not make the same mistake  
11 in this town as we have seen in our two northern  
12 counties. There's a need for data centers, just not  
13 here.

14           And I ask for God's sake, why aren't  
15 you listening?

16           (Applause.)

17           MR. CLOUGH: Tracey Edwards, Caroline  
18 Elmhurst, Alice Englert, Patricia Ewing, Scott  
19 Filling, Candice Harper, Loretta Hettinger, Gayle  
20 Hinton, Billy Hodge, Betsy Hostrop, Margaret  
21 Keapproth, Florence Keenan, Ann Kehoe.

22           MR. PECCATIELLO: I think he called my name,

1 but I don't know if he pronounced it correctly. So  
2 I'm up here.

3 MR. CLOUGH: Apologies, sir.

4 MR. PECCATIELLO: Larry Peccatiello. And  
5 I've been a resident of Fauquier County since 1981;  
6 and it was at that time I came here to join the  
7 Washington -- as we used call them back then, the  
8 Redskins.

9 Prior to that I was fortunate enough to  
10 live in a lot of areas. I lived on the West Coast  
11 in Seattle. I lived in Florida. I lived in  
12 Oklahoma; Tennessee; Texas; Annapolis; Michigan;  
13 Ohio; Williamsburg; Virginia. Lived in a lot of  
14 areas.

15 And when we came here, we really fell  
16 in love with this place and thought what a unique  
17 area it was to live in. And we lived in a lot of  
18 great places. And over that period of time we  
19 bought and sold a lot of homes. Never once did I  
20 ask the Realtor to show me something near comparable  
21 to what is a data center or other building of that  
22 type. Never asked to show us something near the

1 power lines, which is the collateral damage for the  
2 data center.

3           So I've been coming to those meetings  
4 because, as Dominion showed the profiles of where  
5 the data center would reach its source of energy,  
6 they showed some -- it's called overhead power  
7 lines, option number 2; and that was going right  
8 behind my property, and also through four of my  
9 neighbors' property more intense than mine.

10           And we all had -- it was Glenn Ambler  
11 Estates. It was eight homes on ten-acre plots. And  
12 in one case it was going right through one of my  
13 neighbor's yard with a million-dollar view that  
14 would now be viewed through the power lines.

15           So I came to this thing with a lot of  
16 interest and a lot of concern because at that time  
17 that was an option.

18           Well, I refrained from speaking because  
19 I said, you know, I don't have all the facts. I'm  
20 not really putting the work into it, all the  
21 details. And then I got to thinking, I don't think  
22 anybody has all the facts.

1 (Applause.)

2 MR. PECCATIELLO: I really think this whole  
3 thing comes along with a lot of doubt; and the doubt  
4 that I look at -- you talk about the water supply,  
5 that seems to be up in the air. The energy source  
6 seems to be up in the area. The noise that it will  
7 generate, that's definitely up in the air; and now  
8 we've outsourced that to Amazon, itself, to take  
9 care of that.

10 The revenue, I don't think anybody  
11 really knows the revenue. You hear about Amazon not  
12 paying any taxes. You hear about all the things  
13 they can depreciate. And they really -- when you  
14 talk about gross revenue, you really don't even know  
15 what the net revenue is going to take.

16 MAYOR NEVILL: Thank you.

17 MR. PECCATIELLO: I know on that same piece  
18 of property years ago Costco was denied because of  
19 other things that were not compatible with the  
20 council.

21 MAYOR NEVILL: Thank you, sir. Your time is  
22 up. Can you please state your name for the record.

1 MR. PECCATIELLO: I'm sorry?

2 MAYOR NEVILL: We did not get your name when  
3 you came to the podium.

4 MR. PECCATIELLO: Glenn Ambler [sic]. Glenn  
5 Ambler.

6 MR. CLOUGH: Thank you, sir.

7 MAYOR NEVILL: Okay. Thank you, sir. We  
8 appreciate it.

9 MR. PECCATIELLO: You're welcome. So when  
10 you talk --

11 MAYOR NEVILL: Sir, your time --

12 MR. PECCATIELLO: -- about the revenue --

13 MAYOR NEVILL: Sir, your time is up.

14 MR. PECCATIELLO: -- I think that's --  
15 that's doubtful. I think Costco probably would have  
16 given you a whole lot of revenue probably in sales  
17 tax alone.

18 But anyway. So there's a lot of  
19 negativity about what it's going to generate. As  
20 far as jobs are concerned, I'm sure we all know  
21 that's not going to be a lot.

22 Then there's talk about the revenue,

1 itself, if there's federal access to the data  
2 center, what -- that sort of tempers the amount of  
3 revenue. And with the training center right up the  
4 road here, there's been a lot of rumors as to  
5 whether that might be involved with this indulgence,  
6 which would, also, I think, affect the revenue.  
7 So, therefore, there's doubt. When  
8 there's doubt, you don't run towards it. You run  
9 away and you give yourself some time to figure it  
10 out.

11 (Applause.)

12 MAYOR NEVILL: Thank you, sir. The next  
13 speaker, please.

14 MR. PECCATIELLO: Say it again, please.

15 MAYOR NEVILL: Sir, your time is exceeded.  
16 Thank you very much.

17 MR. PECCATIELLO: Oh. I had a couple more  
18 things.

19 MAYOR NEVILL: Sir, your time is up.

20 Please --

21 MR. PECCATIELLO: First of all, I want to  
22 say --

1           MAYOR NEVILL: We have other speakers who  
2 are signed up to speak, sir. If you would, please  
3 yield the floor.

4           MR. PECCATIELLO: Well, let me just say one  
5 thing. When we started this thing, there were five  
6 members on the council. Now there's seven. It's  
7 like you -- we call them "at large," where they came  
8 from. But I guess it's like the old west where the  
9 posse has to add two more hired guns. One of them  
10 who is compromised; and when you ask him if he  
11 should recuse himself, he outsources that to a third  
12 party. And I say to myself, why don't you ask us  
13 who to recommend to outsource it to? Maybe we can  
14 give you some legal attention there and recommend  
15 our own people.

16           MAYOR NEVILL: Thank you, sir. Your time is  
17 up.

18           MR. PECCATIELLO: So it goes on -- okay --  
19 on and on.

20           MAYOR NEVILL: Sir, I've asked you to please  
21 yield the floor.

22           MR. PECCATIELLO: One thing.

1           MAYOR NEVILL:   Sir --

2           MR. PECCATIELLO:   Ask yourself -- ask  
3 yourself if you were in a situation where you had to  
4 live near or near -- or access to these -- this  
5 situation near the power lines, how would you vote?

6           UNIDENTIFIED SPEAKER:   Exactly.

7           MAYOR NEVILL:   Thank you, sir.

8           MR. PECCATIELLO:   Kind of like the windmills  
9 in Martha's Vineyard.

10           (Applause.)

11           MS. KEENAN:   Okay. At last. I'm Florence  
12 Keenan, a resident of Fauquier County for over  
13 20 years in the Marshall District.

14                   Conservation of our historic and  
15 natural resources doesn't happen easily, but so far  
16 our community has valued their importance. I'm not  
17 afraid of change, and I would not oppose a data  
18 center appropriately located. But this application  
19 is so seriously flawed in concept, content and  
20 process that I'm truly mystified that it appeals to  
21 any of you.

22                   There will be few jobs for

1 Warrentonians. The only possible appeal is money.  
2 But there are alternatives for raising tax revenues,  
3 like negotiating with the county for a greater  
4 revenue share. There's also the possibility of a  
5 community-friendly mixed-use development as  
6 envisioned in Plan Warrenton, and the Town Council  
7 recently passed that.

8 Amazon could build that mixed use  
9 development.

10 If you've decided to ignore the plan,  
11 why haven't you engaged your residents and convinced  
12 them of the wisdom of your new data center vision  
13 for Warrenton?

14 Look around, the vast majority are  
15 against this application.

16 Instead, Amazon's flawed application  
17 has been facilitated with a useless, unenforceable  
18 noise condition that won't seriously address the  
19 problems created at Warrenton's gateway and next to  
20 hundreds of residences.

21 Listen to Buddy Riser, the director of  
22 Loudoun's Department of Economic Development, who

1 has made Loudoun into the data center capital of the  
2 world. He said, "My pitch to bring in data centers  
3 was an anti-jobs argument. This isn't about jobs.  
4 Whatever you want to say, data centers are high  
5 impact development. They're big. They have a lot  
6 of energy needs. My lesson learned is to be very  
7 strategic, set real expectations, define the  
8 envelope where it would be appropriate for data  
9 centers. Include them around existing  
10 infrastructure and transportation corridors, and  
11 consider proximity to environmentally sensitive  
12 areas and residential areas."

13           If you start encroaching or  
14 overlapping, that could be a dangerous precedent.  
15 This data center would encroach on residences in  
16 historic areas while the noise would overlap both.  
17 That would set a dangerous precedent for Warrenton.  
18 You already heard this morning the existing noise  
19 exceeds our ordinance. Add to that the data center  
20 noise. That's what the people will feel, not some  
21 study will note.

22           Once you let this camel's nose under

1 the tent, there will be more data centers in  
2 Warrenton; but at what cost to the historic charm,  
3 residential real estate values, residents' health,  
4 community spirit, and character of Warrenton?

5           Once built, the damage is done. There  
6 is no going back. That would be your legacy.

7           There's no easy answer, but there are  
8 alternatives. Negotiate with the county for a  
9 greater share of tax revenues and seek more  
10 mixed-use development as prescribed in the Plan  
11 Warrenton.

12           MAYOR NEVILL: Thank you ma'am.

13           MS. KEENAN: Thank you.

14           MS. MOORE: Doesn't seem like people are  
15 going by when their names is called, so I'm just to  
16 go to as well.

17           UNIDENTIFIED SPEAKER: We are.

18           MS. MOORE: Oh, you are?

19           My name is Meleana Moore. I live at  
20 156 Sterling Court here in town. I'm in Mr. Hamby's  
21 district. And I own Framcraft on Main Street.

22           And I just wanted to go on record

1 saying that I'm against the data center. I don't  
2 know if that really matters to or not, but it  
3 mattered to me.

4 And I did have a couple things to offer  
5 of maybe solutions to get back at Amazon, like,  
6 maybe don't shop at Amazon, you know.

7 (Applause.)

8 MS. MOORE: Maybe quit shopping from Amazon.  
9 That might be an idea that could stick it to the  
10 man.

11 And another suggestion that I have is  
12 that maybe run for Town Council.

13 That's all I have.

14 MR. DIANIC: My name is (indiscernible) Alan  
15 Dianic. I live on Spy Plane Lane. I'm in the  
16 county.

17 I really -- there's been so many great  
18 speakers. I've been sitting here trying to think  
19 about all the things that I might say. They've  
20 already said better than I've said them.

21 As you know, I said before, I moved  
22 here from Florida. I found this -- our family found

1 this to be a wonderful place to live.

2           People think Florida is a paradise.

3 Well, I'll tell you this part of Northern Virginia  
4 is wonderful. It's beautiful. The land has great  
5 beauty, and it's really part of ours to protect. I  
6 don't understand any plan that would seriously  
7 jeopardize the environment within which people live.

8           I ask you to protect that. It's in  
9 your hands. And I heard a suggestion earlier  
10 tonight: Have a referendum.

11           There is tremendous pressure. I can  
12 see it on your faces. All right. And I'm not  
13 immune to knowing the wire brushing that some of you  
14 are feeling. All right. I've been through it. I  
15 was in the military. I've got a couple of wire  
16 brushings from people who knew how to do it.

17           And so thank you for listening, but do  
18 something with the message that we're giving you.

19           There's a large number of people here  
20 who have asked you thoughtfully to take a different  
21 path than the one you're apparently on.

22           So if nothing else, if there is a

1 silent majority, a referendum will certainly answer  
2 that question ultimately.

3 (Applause.)

4 MR. DIANIC: And there will be no question,  
5 and there will be no responsibility. The council  
6 will have done its job, and the data center would go  
7 forward based on a true sampling of the people.

8 My concern is as we're speaking here  
9 and I've been watching faces, I'm not convinced that  
10 everybody cares; and that's deeply concerning to me.

11 A gentleman earlier spoke about having  
12 lived in Russia. My parents came after World War  
13 II, managed to escape from Eastern Europe with the  
14 clothes on their backs, and managed to get a  
15 sponsorship and come to this country. And the one  
16 thing they always taught us was that this system  
17 works, and to trust in it.

18 So I have to believe that. And on top  
19 of it my faith tells me that we have to ultimately  
20 believe that the right thing is going to happen.

21 But I'm deeply concerned that we're  
22 going to go down a path that years from now at least

1 one member who votes for it is going to regret it  
2 and say I wish I hadn't done that.

3 So you might save yourself the trouble  
4 and just vote against it now.

5 Thank you very much.

6 MR. CLOUGH: Sir, would you repeat your  
7 name? Sir, would you come back and repeat your  
8 name? I missed it.

9 The next speakers while he's coming  
10 back: Tracey Edwards, Caroline Elmhurst, Alice  
11 Englert, Patricia Ewing, Scott Filling, Candace  
12 Harper, Laura Hettinger, Gale Hinton, Billy Hodge,  
13 Betsy Hostrop, Margaret Keapproth, Ann Kehoe,  
14 Richard Keister.

15 Yes, sir.

16 MR. DIANIC: My name is Alan Dianic, and I  
17 live on Spy Plane Lane in Warrenton, the county.

18 MS. KEAPPROTH: Good evening, everyone. And  
19 it's a fine time we've been having tonight, right?

20 So this is the situation in which the  
21 Town of Warrenton finds itself. There is  
22 overwhelming opposition to the Amazon data center

1 being built in Warrenton. Oh, I'm sorry I forgot to  
2 say my name. Margaret Keapproth.

3 This is clear from the more than 2,000  
4 signatures on various petitions, and from verbal  
5 comments at previous Town Council meetings, written  
6 and spoken comments by numerous residents of  
7 Warrenton and affected or concerned Fauquier  
8 residents.

9 I attended most Town Council evening  
10 meetings since last July. The December planning  
11 board meeting where the board voted no, thank  
12 goodness, on the data center. I've door-knocked and  
13 spoken to folks in Warrenton and nearby areas.

14 A data center in Warrenton is extremely  
15 unpopular with virtually everyone except for the  
16 very few individuals directly benefitting due to  
17 employment by Amazon or aiding Amazon in this effort  
18 for personal gain; and we know that is happening.

19 (Applause.)

20 MS. KEAPPROTH: I have heard no one say that  
21 they are looking to forward to a data center, that  
22 it will enhance life in Warrenton, because it won't.

1                    Yet most of Town Council, particularly  
2 the Mayor, continues to press forward with this  
3 project. Why?

4                    Nondisclosure agreements have been  
5 used. Why? To cover unethically shared information  
6 extract illegal agreements, offer incentives of  
7 personal gain to town officials.

8                    When actions are conducted under cover  
9 of darkness, the worse actions come to mind.  
10 Sunlight is the best disinfectant, and open  
11 discussions, actions, et cetera, make for an ethical  
12 process.

13                    The FOIA process exists for that  
14 reason. FYI, I have been a FOIA officer, and I  
15 highly recommend that the Town Council press for  
16 unredacted email messages. You are authorized  
17 those. You are the decision maker, and you require  
18 those.

19                    When pressed on why Amazon should build the  
20 data center in Warrenton --

21                    MAYOR NEVILL: Thank you, ma'am. Your time  
22 is up.

1 MS. KEAPPROTH: Well, that was my main  
2 point: Get those emails.

3 MS. SOSA: I understand that there's an  
4 order, but I have school tomorrow, and I really need  
5 to get my word in. Thank you. I'm Alexandra Sosa.  
6 I'm from Gainesville and Prince William County.

7 When this all started, my home was the  
8 most affected. It took away my summer. It took  
9 away my mom and dad from spending time with me. It  
10 took away a lot of things. It nearly took away my  
11 home; and I'm still very worried that there's a  
12 chance that that could happen.

13 When school said that they wanted us to  
14 get involved in local government, this was not what  
15 I expected it meant.

16 Because of the stupidity of this whole  
17 thing -- the fact that it wasn't just immediately  
18 rejected, not only because of the fact that a lot of  
19 people came here to avoid this area looking like  
20 Fairfax or some other bigger metropolitan area. We  
21 came here because it is rural. We came here with  
22 two-plus-hour commutes to avoid data centers.

1                   And I know for a fact I wasn't scammed  
2 out of a neighborhood for 12 years of my life  
3 because my parents wanted to be close to data  
4 centers and eventually more neighborhoods.

5                   I have had a lot of my life impacted by  
6 this because my parents have not been able to find  
7 the time to be with my sister and I due to the fact  
8 that this has been taking up a lot of their spare  
9 time when they're not working.

10                  And I'm really hoping that you-all make  
11 the right decision in denying this data center,  
12 because if you say yes, well, I hope your pillow is  
13 warm on both sides.

14                  Thank you.

15                  MR. CLOUGH: Gayle Hinton, Billy Hodge,  
16 Betsy Hostrop, Ann Kehoe, Richard Keister, Kirsten  
17 King, Karen King, Kevin Koehr, Colleen Koehr,  
18 Katherine Kulig, Sally Lahm, Judy Lamana.

19                  MS. HINTON: Good evening. Gayle Hinton,  
20 reside at 7628 Movern Lane, Warrenton, but I'm not  
21 sure for how much longer if this goes through.

22                  Will I move? I don't want to. I don't

1 want to feel like I have to or I'm forced to.

2 We moved here from Manassas in 2005  
3 amidst many foreclosures, many defaults. It was the  
4 worst market. We got stuck with two houses and a  
5 bridge loan, and I hope not to be in that position  
6 again.

7 In Manassas you might be familiar with  
8 their big company -- I don't know if it's still  
9 there -- IBM. And they used to say it stood for "I  
10 bought Manassas." I don't want that to happen here.

11 I feel like this permit should have  
12 been denied long ago. I believe it's the wrong site  
13 and will adversely affect neighborhoods, schools,  
14 nursing homes.

15 The planning commission did not  
16 approve. You might recall Ali, a former member,  
17 urged the council to stick to the comprehensive plan  
18 that they worked for years, resources spent. He  
19 said stick up for it, and he didn't even vote for  
20 it.

21 The applicant has spun a very rosy  
22 picture, and I expect it may not match reality.

1 "You will likely not know it's there. It makes no  
2 noise."

3 A year later, it was clear Amazon had  
4 discovered the Town's noise requirements. Then it  
5 was "your noise ordinance can be satisfied."

6 Their application states "the project  
7 will have no adverse affect or no adverse impact on  
8 schools, police, fire services, libraries, housing,  
9 or parks. And after construction, it's effect on  
10 Blackwell Road traffic will be minimal.

11 Then there's the issue of NDAs and  
12 secrecy, back-door -- and Amazon only wanting to  
13 meet, I heard, with two people at a time.

14 One official asked for respect for AWS.  
15 Why? He said because their taxpayers, they have  
16 rights, and they're the third largest taxpayer. I  
17 think respect works both ways.

18 The AWS representative spoke of  
19 progress. The kind you find in Manassas, Prince  
20 William, Loudoun, is that what he was referring to?  
21 That kind of progress, I say, my behind.

22 Please don't turn this beautiful,

1 unique town into another Manassas. It's the wrong  
2 fit. It seems like it's been trying to fit a square  
3 peg in a round hole.

4 And let's see. Oh, I feel we'll lose  
5 good town residents. People here love their town.  
6 They have not just equity, but their hearts and  
7 lives here.

8 And, thank you.

9 MAYOR NEVILL: Thank you.

10 MR. FILLING: Thank you, Council, for this  
11 time to speak tonight. I think it's a very  
12 important topic. My name is Scott Filling. I live  
13 in The Plains, Virginia. I've lived here since the  
14 year 2000.

15 I've been very involved with Fauquier  
16 County in a lot of different issues, mostly Route 17  
17 traffic calming. I've seen a lot of games played in  
18 this county along the way.

19 I think the turnout tonight here is a  
20 huge testimony to how much people care about  
21 Fauquier County and Warrenton. It's very important  
22 to keep it the way it is.

1 Progress does have to happen, of  
2 course, over time, but I think this data center is a  
3 bad, bad idea. It's going to bring the power towers  
4 with it. The Dominion electric power company.

5 I fought with Piedmont Environmental  
6 Council here back -- right here, 2007 to 2008. We  
7 fought for two to three years as a community. They  
8 were going to use eminent domain to take land,  
9 homes, beautiful farms, what makes this area so  
10 precious.

11 You allowing this data center is going  
12 to open a gateway for them to come back in, and  
13 they'll mostly like try to spread those large power  
14 towers that are ugly all over the land, and do what  
15 they planned to do in the past, most likely.

16 Working with or getting to know  
17 Dominion power company, they're evil, pretty much.  
18 They'll lie to your face, from the lowest level to  
19 the highest level. Lot of false data. And I think  
20 it's a double-edged sword here dealing with this  
21 data center. I don't think it should be approved.  
22 I don't think it fits. I think you've heard plenty

1 of very good examples here tonight.

2                   And I think a vote of no is the right  
3 decision, quite honestly.

4                   A lot of people are looking for you to  
5 be understanding and human of this situation.  
6 You're going to be despised if you ruin this county  
7 and you ruin this. And some of you may just say  
8 that's fine. Maybe I've got other plans. I'm going  
9 to leave anyway. But if you stay, you're going to  
10 be despised. You'll be hated. That's not a good  
11 thing.

12                   Please do the right thing tonight,  
13 gentleman.

14                   Thank you.

15                   (Applause.)

16                   MS. PREMEN: Katherine Hayes name was called  
17 earlier, but she had to leave, and so she asked me  
18 to take her place; is that acceptable?

19                   Okay. My name is Nancy Browning  
20 Premen. I live at 583 Chittenden Drive in  
21 Warrenton, Virginia. I was born and raised in  
22 Warrenton and have lived in Fauquier almost my

1 entire life. My father's family goes back  
2 generations.

3 I love Fauquier. I love Warrenton. I  
4 worked in Bethesda for years and had a sticker on  
5 the side of my office that said "I love Fauquier  
6 County." People would come in and go, "Where is  
7 that?" And I'd say, "West of Manassas," at which  
8 point they'd just about fall over and say, "You come  
9 all that that way?"

10 And I said yes, because we're  
11 different. It's so pretty out there. You have to  
12 see it, but don't come live there. We don't need  
13 any more people building it up. But it's gorgeous  
14 and you'll love it.

15 So I did that. I did that commute. My  
16 husband did it for 20 years until it became two  
17 hours each way.

18 So I don't want to see my home that  
19 I've loved for all of these years become Prince  
20 William or Loudoun or all of these places that all  
21 of these other people lived in.

22 And the other thing I will say is

1 months ago I was told that the 4-Hs on the Town  
2 Council, Hamby, Hartman, Heroux, and Heather, would  
3 vote for Amazon.

4 I hope that you've listened to the  
5 people here, your constituents, because if the four  
6 of you still vote that way, then what they've said  
7 has made to impression on you. So listen to the  
8 people of Fauquier, listen to the people of  
9 Warrenton and what we want, and do what's right for  
10 your constituents, and that's vote no.

11 Thank you.

12 (Applause.)

13 MS. KING: Hello. My name is Kirsten King,  
14 and I live in Warrenton Lakes subdivision, and I'm  
15 part of the Center District.

16 And I was going to talk, like so many  
17 people have already, about the loss of property  
18 values and what a drag it will be to drive into  
19 Warrenton and see those towers, but since you've  
20 decided to vote before you look at any of that other  
21 information, it's all kind of a moot point, and  
22 you've taken the wind out of my sails.

1 So you apparently have your minds made  
2 up, which, you know, to listen to anyone else is  
3 almost pointless. But maybe you'll have a change of  
4 heart and do the right thing and vote no.

5 Thank you.

6 (Applause.)

7 MS. LAMANA: Good evening, Mayor. Good  
8 evening, Council. My name is Julie Lamana, and I  
9 have lived just outside Warrenton at 7632 Bear  
10 Wallow Drive for over 30 years.

11 I've made it a point during that time  
12 to shop in town for groceries and gifts.

13 For all that time I would tell anyone  
14 who would listen that our town was the most  
15 attractive place to live in the 360-degree circle  
16 around Washington, D.C.

17 That is being challenged now by street  
18 traffic and empty stores, but the crushing blow to  
19 our quality of life may be the Blackwell data  
20 center. It's an outsized edifice that will brand  
21 our town as no longer a special place to live, shop  
22 and dine. Outsized data centers do not belong in

1 small towns. And putting such a huge structure on  
2 our eastern gateway and on a hilltop, it's the wrong  
3 spot.

4           People are concerned about noise, but  
5 the town will lose all control of to that issue  
6 should it be built.

7           Data centers house specific client data  
8 that needs to be available 24/7. A data center just  
9 can't be turned off and on due to a noise violation.  
10 Who knows whose data will be housed there. It could  
11 be NSA's. It could be a hospital's. Keeping it up  
12 and running could even be a matter of national or  
13 even international security.

14           Look at what the Department of  
15 Environmental is doing to the data centers in Prince  
16 William, Loudoun, and Fairfax Counties because of a  
17 shortage of transmission capacity. DEQ is proposing  
18 a variance to let them use their noisy diesel  
19 generators for power during certain periods from  
20 March to July of this year.

21           While there will be a public hearing at  
22 the end of the month on this, there are no documents

1 available to the public on the need for this diesel  
2 power. How can this be a public hearing with  
3 nothing to review beforehand? That means it's a  
4 done deal. The use of noisy diesel power will be  
5 allowed.

6 So if you vote for Blackwell, you, too,  
7 will have no say if data center demand outstrips  
8 transmission capacity, or if similar problems  
9 happen. The needs of data center clients will trump  
10 the needs of town residents and those that shop and  
11 work here.

12 Do we really want this David and  
13 Goliath power imbalance between the Town and the  
14 powers that be as a contributing negative to all of  
15 the other negatives of data centers. Save for  
16 revenue for the town government is positive. Are we  
17 that desperate for revenue? I could be sympathetic  
18 to that, but no one has made the case.

19 As far as good jobs go, the server  
20 rooms are noisy, most over 90 decibels. So it's  
21 going to be noisy inside the structure.

22 Thank you very much. And just one

1 thought: You know, so many people spoke during the  
2 public citizen time. If there's any way you can  
3 include their comments, I think that would be a  
4 really great thing.

5 Thank you.

6 (Applause.)

7 MS. LAHM: Good evening. My name is Sally  
8 Lahm. My address is 7035 Low Court in new  
9 Baltimore.

10 There have been many speakers talking  
11 about -- for months now -- the threats of impacts of  
12 noise. I'm going to do address some other aspects,  
13 particularly operational sustainability and  
14 potential impacts of the fuel storage tanks and the  
15 generators.

16 All of the aspects I'm about to  
17 describe should be part of comprehensive  
18 environmental and health impact studies, which  
19 should be done for this particular project. So I'm  
20 referring to eight to ten permanently full fuel  
21 storage of enormous volume.

22 Operational sustainability is about

1 mitigating risks through defining specific  
2 behaviors. Human error and neglect are two of the  
3 biggest risks to operations.

4           With the level of investment made in  
5 data center infrastructure, weather and incidental  
6 damage to the fuel and generator systems must be  
7 prevented. Protecting and maintaining fuel lines  
8 tanks and engine generators should be of highest  
9 priority.

10           Some questions to ask include: How  
11 will the data center operator manage the stored bulk  
12 fuel? What is the site's risk of a natural  
13 disaster? What is the site's risk of a human-caused  
14 disaster? Will specialized additional equipment be  
15 installed to reduce the generator's emissions output  
16 when and if fuel is utilized? Is water storage  
17 planned?

18           Water storage is very important due to  
19 the high heat that can be generated by the computer  
20 servers. What kind of fuel will be stored? Is it  
21 diesel or gasoline? Each fuel type has its own  
22 assets, hazards, and constraints.

1 Fuel treatment is an important  
2 operational sustainability site characteristic.  
3 Does the design and operational plan of the storage  
4 tanks include a fuel treatment system and regular  
5 maintenance of the fuel storage system? Above  
6 ground storage tanks hold flammable substances. The  
7 vapors can explode and harm humans, domestic animals  
8 and wildlife, and damage property.

9 What are the measures to control and  
10 prevent leakage of vapors from the tanks? What are  
11 the measures to control and prevent leakage of  
12 liquid fuel?

13 Hazardous substances from leaking tanks  
14 can contaminate rivers, reservoirs, and other water  
15 bodies. Spills to surface waters can threaten fish,  
16 other wildlife, and domestic animals. Leaked  
17 contents can seep into the soil, contaminate ground  
18 water and impact private and municipal drinking  
19 water wells.

20 Well, my last comment will be then:  
21 Councilmembers, are you aware of these aspects?  
22 They are just a few of the myriad aspects of the

1 fuel storage system which should be addressed in a  
2 comprehensive operations safety and maintenance plan  
3 by Amazon.

4           MAYOR NEVILL: Thank you, ma'am.

5           (Applause.)

6           MR. STRAIGHT: Pardon me. I have some young  
7 kids here, and my daughter signed up to speak. Is  
8 it okay if she goes ahead? All right. Thank you.

9           MS. SPRINGS: Hello. My name is Josephine  
10 Straight, and I live at 8717 Springs Road.

11           Town's Council, please vote no on the  
12 Amazon data center. I have two main points why I  
13 think it would be the wisest choice not to vote for  
14 the Amazon data center.

15           Number one, it is against the town  
16 comprehensive plan. It would give up a good  
17 location for people to have a small business, homes,  
18 or a place of recreation. Instead, there would be a  
19 loud, ugly warehouse.

20           I really know the potential value of  
21 undeveloped land because of where I live. In 1968,  
22 people started pushing for a huge housing

1 development on North Wales. Hope Porter led the  
2 resistance to this.

3           The housing development was not  
4 approved, but if it had, our next door neighbors  
5 would have been overrun with development. As a  
6 consequence, the farm where my dad raises animals  
7 would then be overrun with development. It's not,  
8 instead, he can give healthy food and a wholesome  
9 place to visit and build community.

10           Please keep the land open to a  
11 beneficial use, not a warehouse.

12           Second, the Amazon data center is  
13 located on the entrance to our town. As people  
14 enter Warrenton, they will see the data center and  
15 think this is not healthy or pleasant to be around.  
16 This is not making Warrenton unique. They will  
17 think, I don't want to visit this town or start a  
18 business here when its filled with ugly  
19 developments.

20           If people see homes, thriving small  
21 businesses, or a place of recreation, they will  
22 think: This shows Warrenton works really hard and

1 well to preserve wholesome spots. I want to visit,  
2 raise a family, and protect this special town.

3 I know about the pressure that you must  
4 have to vote yes for the Amazon data center, but I  
5 ask you, please fight Warrenton -- to please fight  
6 to make Warrenton a place for people to thrive.

7 Thank you.

8 (Applause.)

9 MR. CLOUGH: Katherine Kulig, Cindy Lieser,  
10 Yakir Lubowsky, Luke Marrazzo, Adriana Marrazzo,  
11 John McCarthy Anna Miller, David Miller.

12 MS. KOEHR: Colleen Koehr, 6797 Carters Run  
13 Road.

14 Thank you all for your public service  
15 and willingness to represent the will of the people  
16 who voted you into office.

17 I've heard many reasons why the  
18 citizens of our town and county object to the data  
19 centers in general, which include noise pollution;  
20 air quality; light pollution; visual aesthetics;  
21 neuropsychiatric effects such as sleep disturbances  
22 headaches, depression, fatigue, concentration

1 dysfunction, memory changes, dizziness,  
2 irritability, tinnitus, and anxiety.

3           None of those side effects sound very  
4 appealing to me. It's like a TV commercial for a  
5 pharmaceutical that might help with one ailment but  
6 induces ten others.

7           No amount of revenue personally gained  
8 or as a community is worth sacrificing the tranquil  
9 beauty, or risking the debilitating effects this  
10 data center could cause.

11           It's obvious that the four of you who  
12 voted against the disclosure of the secret emails  
13 have no interest in doing the right thing. How  
14 could you vote against any information that could  
15 shed light on possible nefarious dealings that  
16 should impact your vote?

17           (Applause.)

18           MS. KOEHR: This smells of corruption.

19           If you choose to vote against the will  
20 of the people you represent and who voted you into  
21 office, I don't know how you could look in the  
22 mirror, let alone walk down Main Street and look the

1 citizens of Warrenton in the eyes.

2           Please have courage. Help us all sleep  
3 better at night and vote against this special use  
4 permit for Amazon.

5           MR. LEBOWSKY: Good evening. Yak Lebowsky.  
6 I'm from Ward 3. And I think most of you know I  
7 spent two terms representing Ward 3 on the Town  
8 Council, so I have sat where you're sitting but I  
9 hasten to point out I've never done what you're  
10 doing. Never.

11           But, hey, you know what, I didn't come  
12 up here to lecture you. I came up to tell you a  
13 joke. So it's an old joke, and I'm mindful of the  
14 fact that, you know it's going to be hard to compete  
15 with the joke that you guys have made of the  
16 planning and approval process but --

17           (Applause.)

18           MR. LUBOWSKY: -- let's see what happens.

19           So a guy comes to a cocktail party, and  
20 he spots a really beautiful women right away and  
21 makes a beeline for her. And he thinks, hey, I'm  
22 going to press my luck here a little bit.

1                   So he says, hey, honey, I'll give you  
2 50 bucks, 50 bucks, to come home with me. So, you  
3 know, she ignores him.

4                   So he says, well, how about a hundred  
5 bucks, and she's still ignoring him. So he says,  
6 well, I'll tell you what, I'll give you 200 bucks to  
7 come home with me. So, she laughs.

8                   He's thinking, okay. What do I do  
9 know? He says, how about 500 bucks. I'd give you  
10 \$500 to come home with me. So now she's listening.  
11 So he closes for the kill. He says, a thousand  
12 bucks. I'll give you a thousand bucks. So she  
13 says, you know, let me think about that for a  
14 minute.

15                   So while she's thinking, he's say,  
16 okay, well, let's maybe talk about 750. She says  
17 750? It was 500, it was a thousand, and now we're  
18 750. Well, what do you take me for? And he says,  
19 well, of course we've established that. Now we're  
20 just haggling over the price.

21                   So, again, it's an old joke. And  
22 everybody is feeling spongy. And probably standing

1 up and stretching would be a good idea. I know when  
2 I got up I felt a lot better than when I was sitting  
3 down.

4 But if there's groans -- because  
5 usually people do find this a pretty funny joke. If  
6 there's groans tonight, it's because Amazon had you  
7 guys at the 50 bucks --

8 (Applause.)

9 MR. LUBOWSKY: -- with no haggling.

10 So, you know, my wife comes from a  
11 French family. The French have a saying, they say  
12 "worse than a crime, a blunder."

13 Think about it.

14 (Applause.)

15 MS. MARRAZZO: Good evening. My name is  
16 Audrey Marrazzo, and I live at 835 Oak Leaf Court.  
17 That's in the Towns of Oak Springs development, the  
18 townhouses; and it is about half a mile from the  
19 proposed Amazon data center site.

20 I'm a little resentful to be here at  
21 this hour tonight. It's been a long day, and I've  
22 been waiting to hear my name for about five hours

1 now. Very patiently, I might add.

2                   And I'm 8 months pregnant and it's  
3 Valentine's Day. So why am I here? I'm here  
4 because I love Warrenton. I bought my first home  
5 here. I married my husband here. We started our  
6 family here, and we are growing our family here. We  
7 hope to raise our family here.

8                   I go to the local family-owned gym and  
9 I shop at my local farm. I chose Warrenton because  
10 I saw the soul of this town, and I fell in love with  
11 it. I take so much pride in my small town  
12 community. If you bring these Amazon data centers  
13 here, the soul of this town is going to change.

14                   To be frank, I don't understand why  
15 this is even still a discussion. The people of this  
16 town have made themselves abundantly clear to you.

17                   (Applause.)

18                   MS. MARRAZZO: Your own Planning Committee  
19 has made themselves clear to you.

20                   We do not want it. Why are we still  
21 talking about it? Why are we still having meetings  
22 -- three meetings talking about amendments and

1 negotiations. It doesn't matter. You can talk  
2 about noise ordinances and fines and everything else  
3 all you want, but the fact of the matter will not  
4 change and we do not want it. It's as simple as  
5 that. So please vote no on the data centers.

6 Thank you.

7 (Applause.)

8 MR. MCCARTHY: I am deeply bitter that I  
9 didn't come up with Faustian scratch-off. That was  
10 a great line.

11 (Laughter.)

12 MR. MCCARTHY: Thank you, Mr. Mayor, Members  
13 of Council. My name is John McCarthy.

14 My wife and I are now in our third  
15 decade as residents of the Town of Warrenton, the  
16 place we raised all four of our daughters, all of  
17 whom are jointly and severally liable for the gray  
18 hairs that I show you at the moment.

19 I love this place, as I know each and  
20 every one of you do, also. I count several of you  
21 as my personal friends, and so I envy you neither  
22 your job, this meeting, or your impending vote.

1 I had a series of prepared remarks  
2 about what, in my opinion, was the very poor state  
3 of this application that you've taken up and is  
4 before you tonight; the inadvisability of the  
5 amendment you approved -- prior council approved,  
6 that allowed the application in the first place; and  
7 the sweeping non-disclosure agreements you entered  
8 into that allowed it to be proceeding on this site.

9 I think the case against all of those  
10 have been made by others jointly and severally, to  
11 continue the theme, by this night and other nights,  
12 so I'm going against what I normally advise my  
13 colleagues and staff to do, and that's to speak  
14 extemporaneously just with some notes on another  
15 matter; and that is the subject of regulatory  
16 capture.

17 Unlike some other speakers tonight and  
18 in the past, I don't think you mean ill. I don't  
19 think you have ill intent. I don't think you're  
20 behaving evilly. I do think some of you have become  
21 complicit in the applicant because you have worked  
22 so closely with the applicant.

1                   Regulatory capture is a well-known  
2 tendency of regulators to develop an over sympathy,  
3 indeed, again, without meaning evil about it, a  
4 complicity with the regulated, and they feel an  
5 investment in the success of those regulated people.  
6 This all too often, however, comes at the expense of  
7 the public interest.

8                   As a local government manager for  
9 30 years and a student of local government for at  
10 least ten more, I have seen this happen often and  
11 been guilty of it myself.

12                   Nine out of the ten issues that come  
13 before public officials develop absolutely no  
14 interest in the public consciousness. You can't buy  
15 or beg an opinion from the public on 9 out of 10 of  
16 the things you do. And sometimes that tenth thing  
17 becomes as big deal long after you've started  
18 considering it.

19                   That creates a situation where you're  
20 suddenly feeling like you're being whipsawed and  
21 suddenly people want you to vote no when they didn't  
22 have any opinion for the last six, eight, nine

1 months.

2                   When you march down a path on a project  
3 you regulate and suddenly it generates enormous  
4 interest and much of that is negative, there's a  
5 natural tendency to feel attacked and affronted and  
6 then dig in your heels. When that happens, it is no  
7 shame to learn, to grow, and to alter your opinions  
8 based on new information. Leadership does not mean  
9 you stick to your guns to the sad bitter end,  
10 particularly when you find you're not aiming the  
11 right way, and you don't even know who you're  
12 shooting at or for anymore.

13                   Please vote no.

14                   (Appause.)

15                   MR. MARRAZZO: Good evening. My name is  
16 Luke. My wife was the eight-month-pregnant woman  
17 who spoke to you-all right before that last  
18 gentleman.

19                   MAYOR NEVILL: Please state your last name,  
20 as well.

21                   MR. MARRAZZO: Sure. Sorry. Luke Marrazzo.  
22 I live in the Town of Oaks Springs.

1 I guess just on the record I want to  
2 say how amazingly proud I am of her. That was just  
3 an amazing speech from the heart, and it's about  
4 family.

5 (Applause.)

6 MR. MARRAZZO: And that's really what this  
7 has been about to us from the beginning.

8 You know, in the Towns of Oak Springs  
9 we will be affected by the noise. You know, there's  
10 no way around that. We will be affected by the  
11 construction. But from the beginning this has been  
12 about the texture of life in Warrenton for us.

13 When we moved here, we got married and  
14 we picked a house here. Rather, we chose Warrenton,  
15 you know. Not because it had amenities, not because  
16 it had big box stores we wanted to shop at. You  
17 know, we picked it because it has a measurable  
18 character, something that we wanted not only for  
19 ourselves, but for the family that we're building.

20 You know, there is -- sorry, you know,  
21 I had prepared remarks, but I just wanted to talk  
22 about her speech because it was amazing and its

1 exactly what we want for Warrenton.

2           You know, I guess the other point in  
3 this is that Warrenton is unified in this. And the  
4 unity is demonstrated, of course, not just by the  
5 fact that were a thousand people in this room today,  
6 but also by, you know, their politics. I saw people  
7 with NRA hats, and I saw people with Black Lives  
8 Matter pins. You don't see those two people in the  
9 same room very often. You know.

10           And really beyond their politics,  
11 though. We've heard from farmers. We've heard from  
12 Main Street business owners. We have heard from  
13 teachers. This is a heart and soul of Warrenton.  
14 Warrenton flows through these people's veins, and,  
15 you know, they're channelling the same spirit of  
16 Warrenton that rejected the -- you know, the  
17 development that would have turned North Wales into,  
18 you know, a residential bacchanal.

19           So, you know, we have an opportunity to  
20 continue with that spirit, to preserve the texture  
21 of life of Warrenton, and to make this a place that  
22 my wife can be happy that our kids are growing up in

1 and going to the schools.

2                   So thank you all very much. Have a  
3 good night.

4                   MR. MELIA: Good evening, Mr. Mayor,  
5 Councilmembers. My name is Adam Melia (ph). 7311  
6 Ridge Dale, Warrenton.

7                   I don't have an Amazon -- or a "Stop  
8 Amazon" sign in my front yard. I don't have one of  
9 those cool red shirts that some of the folks wear  
10 saying "Stop the Towers" or "Stop Amazon." I've  
11 never been to a council meeting before. I've never  
12 really wanted. No offense. I respect what you-all  
13 do. And I vote. I do vote. But I've never shown  
14 up to one of these before. I wasn't even planning  
15 to be here this evening until this morning.

16                   I am the silent majority. And I -- or  
17 I'm a representative of the silent majority. And  
18 I'm here to say -- to urge you to not assume that  
19 the silent majority is for the data center.

20                   (Applause.)

21                   MR. MELIA: Don't assume this.

22                   And I think it's a wonderful suggestion

1 to move this to a vote for the people.

2 (Applause.)

3 MR. MELIA: Because we can just extinguish  
4 that assumption. Let the people decide. Amazon is  
5 a tidal wave. I don't envy this job, this decision  
6 that you-all have to make. So maybe don't make it.  
7 Let us decide. I mean, we're urging -- we're  
8 letting you know how we feel, and hopefully the  
9 silent majority is a little less silent.

10 Please vote no for the Amazon data  
11 center.

12 Thank you.

13 (Applause.)

14 MR. KOEHR: My name is Kevin Koehr. I live  
15 at 16453 Waterloo Road.

16 I'd like to point out that we are all  
17 here, and we were all here for seven hours last  
18 month, because you won't listen. So just listen.

19 This is where I grew up. I've lived in  
20 six states, three countries, and I moved back here.  
21 I commute to Baltimore so that I can live in a place  
22 like this that doesn't look like Northern Virginia.

1 I would go over all the reasons why the  
2 citizens you represent do not want the special use  
3 permit to be approved, but you already know them  
4 from countless hours of testimony. Your job is to  
5 represent the people of this town.

6 I heard it mentioned that there are  
7 many people that support this permit being approved.  
8 Who are these unnamed people? In seven hours last  
9 month, and in almost five and a half hours, we've  
10 had four other than Amazon, two of which had a  
11 financial investment in this, and one of which said  
12 it would be the lesser of two evils.

13 At best, supporters of this are  
14 indifferent or just simply remain silent. They  
15 don't care. These are the people you serve right  
16 here, and we do care.

17 (Applause.)

18 MR. KOEHR: Most of whom, including me, have  
19 lived here because it wasn't developed with  
20 structures like data centers. Why are you here?

21 You sit in a seat of public service,  
22 but is that how you're acting?

1           The town manager who orchestrated the  
2 vote to change the zoning now works for Amazon.  
3 This council voted against seeing the emails. Why?  
4 Why do you vote against transparency unless you have  
5 something to hide?

6           The petition to stop this has more  
7 signatures than the number of voters than voted for  
8 you, Mayor. The special use permit was opposed by  
9 the planning committee. Members vote on our future  
10 that are not elected by us.

11           One of the Town Council members works  
12 for the company -- works for a company that proudly  
13 partners with Amazon, and his integrity and oath  
14 demand he recuse himself, but he hasn't. Another  
15 council member maybe could be facing charges for  
16 insider trading. We'll see how that goes.

17           It is the minority of well-positioned  
18 and well-funded individuals that have a financial  
19 interest in seeing this permit get approved, not the  
20 Town of Warrenton.

21           It is only the polite manner of the  
22 townspeople -- and some of them have said it, not

1 their ignorance that stops them from calling this  
2 process what it is: Corruption.

3 From the change of zoning which  
4 violates the town's comprehensive plan to the  
5 blatant conflicts of interest, there is no telling  
6 what an investigation would reveal behind all the  
7 non-disclosures and private business dealings.

8 We are the people. We are showing you  
9 our will. Listen to us. If you vote yes, you are  
10 willfully ignoring your oath and the will of the  
11 people you represent.

12 Thank you.

13 MAYOR NEVILL: Thank you, sir.

14 MR. KOEHR: Thank you.

15 (Applause.)

16 MR. CLOUGH: Katherine Kulig, Cindy Lieser,  
17 David Miller "Ike," Wendell Mose, Joan Morris,  
18 Charles Nelson, Jen Nemerow, David Norton, Justin  
19 O'Donnell, Nigel Ogliv, Jonathan Conor O'Neill.

20 MR. NELSON: Hi. My name is Charles Nelson.  
21 I live on Singleton Circle in Warrenton. Been a  
22 resident of Warrenton for almost 20 years now.

1                   One of the things I wanted to point out  
2 was the gentleman who came up here and said Amazon  
3 owns the land, look at the Disney property, and it  
4 could turn into something else. Well, you know,  
5 what else is on the Disney property out in Hay  
6 Market? A Boy Scout's camp that's faithfully served  
7 children for 15 years.

8                   There's other good options for land  
9 use. Just because they own the property, doesn't  
10 mean it can't be repurposed for better purposes.

11                   Secondly, quite honestly, I'm not going  
12 to plead, beg, ask for you guys to do the right  
13 thing like so many other people have done here. I'm  
14 just going to tell you do the right thing because  
15 you're not the Town of Warrenton. These people are  
16 the Town of Warrenton --

17                   (Applause.)

18                   MR. NELSON: -- and they clearly, clearly  
19 made their voice heard.

20                   There's been one person here who was  
21 neutral about this, one person who was in favor of  
22 it, who wasn't even a county resident and was a

1 special interest representative for a union. If  
2 there's so many plumbers in Fauquier County or  
3 Warrenton that are for this project, where are they?

4 (Applause.)

5 MR. NELSON: I don't see any of them.

6 I will also say on the record for all  
7 of the people who spoke in the public section before  
8 these special projects public discussion, you  
9 disenfranchised them by not including their comments  
10 on the record. So I'm going to put on the record  
11 that there was dozens of people in addition to  
12 everybody during this comment section that were also  
13 opposed to the Amazon data center.

14 Your rules here and the way you're  
15 going about this are corrupt. I would like an  
16 answer right now from you guys why this can't be put  
17 towards a referendum and a public vote. Why?

18 The only reason in reality is the same  
19 reason that you're not going to disclose the emails  
20 that are in such controversy here. It's because you  
21 know there's something in the emails that you don't  
22 want the public to see, and you're afraid of what's

1 going to come out that's going to cast even worst  
2 light on the decision-making process.

3           And the reason why it's not going to go  
4 to a referendum and public vote is because you know  
5 it will be defeated soundly which goes against  
6 whatever deals with the devil you have made.

7           (Applause.)

8           MR. NELSON: So don't punish your  
9 constituents for whatever deals you made prior to  
10 these public hearings and public comments that have  
11 come out. Meeting after meeting after meeting with  
12 nothing but people opposed to this.

13           If you're doing your job which you were  
14 elected to do -- it wasn't to represent your own  
15 personal interests or your personal opinion on  
16 topics. You were elected to those chairs or put in  
17 those chairs to represent the Town of Warrenton and  
18 our residents, not your opinion. So do the right  
19 thing.

20           (Applause.)

21           MS. MOOSE: My name is Wendy Moose. I live  
22 on Alexander Lane, Warrenton. It's late, so I will

1 be brief.

2 I'm not going to repeat everything that  
3 everybody else has said so elegantly. You don't  
4 need to hear that again.

5 But I wanted to say we moved here in  
6 2021 in large part because of your plan, and we  
7 moved here at great expense, and now, now we have  
8 this. We still have boxes we haven't unpacked.

9 So I wanted say we're angry. We feel  
10 cheated. This feels like bait and switch. This  
11 feels like breach of contract. How can you do this?  
12 You make a plan, you publish it, and then now this.

13 And I know we're not alone. I think  
14 lots of people here feel this way.

15 Thank you.

16 (Applause.)

17 MR. NORTON: Good evening. My name is David  
18 Norton. I live at 318 Falmouth Street. I'm a  
19 lifelong resident of Warrenton, and also a business  
20 owner here since 1984.

21 I served on this Town Council for  
22 16 years. If I've done my math right, that's about

1 as long as all eight of you combined.

2 (Applause.)

3 MR. NORTON: I mention that only to make  
4 sure you know I understand the pressure some of  
5 you-all feel. You're facing a mammoth company that  
6 has already purchased this property and you feel  
7 like you can't go against them or you need to make  
8 them whole. Well, you don't. You owe them nothing.  
9 And you have all the legislative latitude in the  
10 world to just say no. So remember that, please.

11 It was their decision to purchase this  
12 property, supposedly with no promises made, right?  
13 They have not met the criteria of the SUP. It does  
14 not comply with the comprehensive plan. It will be  
15 an eyesore on the gateway to our community, and your  
16 own planning commission has recommended denial.

17 And we all know that the noise is going  
18 to be a problem for our residents. There's no  
19 question about that.

20 Whatever tax revenue you think you're  
21 getting from this, it's not worth the risk to our  
22 community.

1           This was Brandie Schaeffer's vision for  
2 our town. It's not the citizens' vision. You  
3 listen to all of these people that have come out for  
4 the last two months to speak to you. Your decision  
5 to say no should be one of the easiest ever.

6           (Applause.)

7           MR. NELSON: To Amazon, I say this: Let's  
8 take a lemon and make some lemonade. Let's work  
9 together to build a business park on this property.  
10 A beautiful business park with fountains and green  
11 space and walking trails where thousands of our  
12 commuters could work at high-paying, high-yield jobs  
13 -- high-paying jobs right here at home. That would  
14 be a win-win --

15           (Applause.)

16           MR. NELSON: -- for our town and our county,  
17 and it would produce far more tax revenue than  
18 Amazon is going to produce for you; and all that  
19 other money that would be spent at home by employing  
20 our commuters here. It's a win- win.

21           Amazon, you could help make this dream  
22 come true. Be the heroes, not the villains that

1 destroy our beautiful historic town.

2                   So, Town Council, I remind you, you owe  
3 them nothing. So just say no to this terrible idea  
4 and work together to come up with something much  
5 better that benefits Amazon, our community, and our  
6 citizens.

7                   Thank you.

8                   (Applause.)

9                   MR. O'NEILL: Good morning. Jay Conor  
10 O'Neill. I live at 379 Wilson Street in the Town of  
11 Warrenton, Ward 3. I've been a town resident for  
12 over a decade, and a lifelong resident of Fauquier  
13 County.

14                   I vehemently oppose the Amazon SUP and  
15 believe if our Town Council looks at the proper land  
16 use governing principles, you-all will oppose it as  
17 well.

18                   I believe it's a slippery slope. You  
19 know, why are we voting now on this SUP when we can  
20 say no, let's not vote on it, let's revisit the data  
21 center ordinance and make Amazon reapply? There's  
22 no harm in that. They have plenty of money. They

1 can hire more lawyers. They can write another SUP.

2 No problem. Everybody here says no.

3 You know, everyone here has mentioned  
4 and spoke elegantly and educated about this  
5 proposal, and I believe that the data center will be  
6 both a public and private nuisance.

7 You know, everyone has talked about  
8 this silent majority, and that's why I came to speak  
9 here tonight, to know that you-all know that you  
10 have constituents that are opposed to the data  
11 center.

12 I don't believe Amazon has proven there  
13 aren't better locations for the data center. I  
14 don't believe that the conditions of the SUP have  
15 been met. There's no hardship, loss of reasonable  
16 rate of return on the land, or they have not proven  
17 that their application will not change the central  
18 character of the neighborhood, town, or ward.

19 You know, I had a real estate professor  
20 in college. He said that people are like rats.  
21 They follow the water in the sewer.

22 And I have to believe the data centers,

1 you know, they're going to follow the data center  
2 ordinances. They are going to follow that SUP.  
3 This first SUP is going to say, hey, you know what,  
4 this one falls, then the next domino, and the next  
5 domino. The next thing you know we're Ashburn,  
6 we're Leesburg, we're Prince William County; and I  
7 know none of you-all want that.  
8 I know you-all have been lifelong  
9 residents of Fauquier County. I know several of you  
10 personally, and I know that you-all want what's best  
11 for Warrenton, and an Amazon data center isn't  
12 what's best for Warrenton.

13 Thank you.  
14 (Applause.)

15 MR. O'DONNELL: My name is Justin O'Donnell,  
16 and I live at 52 Blue Ridge Street. My family has  
17 boycotted Amazon for several years after becoming  
18 aware of some very disturbing things about the  
19 company.

20 The idea of having Amazon or AWS as a  
21 corporate neighbor, entrusting them to keep their  
22 word about following the noise ordinance, is

1 something I cannot stomach.

2                   Some of you councilmembers, and you,  
3 Mr. Mayor, say that we need the data center because  
4 of the tax revenue the town will receive. Is the  
5 tax money worth it?

6                   What is Amazon like as a company?  
7 Let's review some lawsuits.

8                   Amazon is currently being sued for many  
9 evil practices, including price gouging in  
10 California during the pandemic lock-downs;  
11 mistreatment of employment -- or in employment,  
12 termination of pregnant women; selling recalled  
13 items; falsely labeling plastic items as  
14 biodegradable. These lawsuits are not simply  
15 isolated cases being brought into court. They are  
16 representative.

17                   Amazon relies on forced child labor in  
18 China. Yes, it sounds crazy or unbelievable, but it  
19 isn't so hard to believe when you think of how  
20 notorious Amazon is for its terrible treatment of  
21 its own employees right here in the U.S.

22                   Selling things cheap and getting them

1 to your doorstep quickly has a cost. That cost is  
2 mistreatment of other humans.

3 But it gets even worse. Although  
4 public outcry has finally caused Amazon to scale  
5 back, a few years ago, Amazon sold truly vulgar  
6 items encouraging and grooming pedophiles.

7 You can still buy the Pimp Bible: A  
8 sweet secrets of sin [sic]; and a host of other  
9 equally shockingly titles on Amazon today. If you  
10 don't believe me, get on and look for yourself.  
11 There are vulgar books and items readily available  
12 still. This is the neighbor we are inviting into  
13 Warrenton.

14 Amazon is also guilty of massive  
15 amounts of tax evasion. If you find that -- find  
16 any of this hard to believe, just look -- take a  
17 look online. Look up "why boycott Amazon" in your  
18 search bar.

19 So do we have good reason to trust  
20 Amazon to shut off their machines if the noise is,  
21 as predicted, disruptive to the surrounding  
22 neighborhoods? I think not.

1 Do we trust them to pay taxes? Again,  
2 I think we shouldn't.

3 Amazon reps also insist that the cloud  
4 created by data centers are truly a boon for  
5 Warrenton. Yes, we love to store photos and surf  
6 the web as much anyone, but we don't need one right  
7 here, an eyesore and an ear sore for the surrounding  
8 neighborhoods.

9 And last month we heard from an Amazon  
10 rep that Amazon needs lots of space for -- or, I  
11 guess, he forgot to mention last month that they  
12 need lots of space in the cloud for pornography.

13 Mr. Mayor, Councilmembers, I beg you,  
14 don't commit the folly of trusting Amazon to keep  
15 their word. Amazon has no intention of doing  
16 anything other than making money for themselves at  
17 the expense of Warrenton.

18 MAYOR NEVILL: Thank you, sir. Thank you.  
19 (Applause.)

20 MR. CLOUGH: Joan Morris, Jen Nemerow, Nigel  
21 Ogilvie, Laura Ort-Presley, Leigh Owsley, Mary Page.

22 MR. HARRIS: My name is George Harris. I

1 live at 5866 University Court.

2 My wife and I grew up in Richmond, and  
3 we moved to Michigan to work, and then we moved to  
4 Northern Virginia and lived in Burke beginning in  
5 1993. When we retired in 2012, we looked around the  
6 state for some place to go.

7 I grew up in the countryside as a kid  
8 in a small town called Chatham (indiscernible) and I  
9 like the country environment; and Warrenton has it.

10 It's a beautiful place. It's quaint.  
11 The people are friendly. You get to know people.  
12 It's lovely to come into this town in the spring and  
13 summer and the fall. It's just nice. That's why we  
14 moved out here from Burke. And we have the great,  
15 good fortune of having wonderful neighbors in a  
16 beautiful neighborhood.

17 It was quite a shock to discover the  
18 thing about Amazon and their data center.

19 I spent my career in heavy  
20 construction. And Amazon is a big, big organization  
21 with truckloads of money. When you guys made a deal  
22 with them, you jumped on the back of the tiger and

1 didn't realize he might be hungry.

2           Anyhow, I would strongly ask you to  
3 reconsider that because you're the last gateway.  
4 The very last one. It's your fiduciary duty to do  
5 what's right for the community, your neighbors, the  
6 people you grew up with, the people you work with.  
7 Because if you don't, you don't get another chance.  
8 You can say "I'm sorry" ten years from now, but it  
9 won't make any difference. The deal is done.

10           Vote no.

11           (Applause.)

12           MS. PAGE: My name is Mary Page. I live at  
13 4318 Buckminster Lane in Scott District. And I've  
14 just got to say I'm amazed that we're even here.  
15 And it's nothing more than a testament to Brandie  
16 Schaeffer. Man, she was good. That she could  
17 convince somebody at Amazon to pay \$40 million for a  
18 parcel that wasn't zoned for their intended uses,  
19 you've got to give it to her.

20           And not only was she good, she was  
21 smart. Because no sooner was the ink dry on that  
22 document that she hightailed it out of here to

1 follow her \$300,000-a-year job with Amazon, and she  
2 left a stinking, heaping mess in your pockets that  
3 you-all have to deal with.

4           Fortunately, the SUP process gives you  
5 the out that we all so desperately are begging you  
6 to take.

7           And I'm going to read from your own  
8 documentation. This is from the town's ordinances:  
9 The purpose of a special permit is to carefully  
10 review uses which need extra deliberation to ensure  
11 the surrounding area is not adversely impacted.

12           You have your answers, gentleman. This  
13 is your out. Just say no.

14           Thank you.

15           MR. CLOUGH: Joan Morris, Jen Nemerow, Nigel  
16 Ogilvie, Laura Ort-Presley, Leigh Owsley. I'm going  
17 to pronounce this incorrectly, I apologize, Larry  
18 Peccatiello.

19           UNIDENTIFIED SPEAKER: He spoke earlier.

20           UNIDENTIFIED SPEAKER: So many have.

21           (Indiscernible comments.)

22           MR. CLOUGH: Daniel Pennell, Jeffrey Pierce,

1 Hillary Pierce, Kevin (indiscernible) Joseph Roca,  
2 Mary Root.

3 MS. ORT-PRESLEY: Hi. My name is Laura  
4 Ort-Presley, and I'm in the Scott District in  
5 Fauquier County.

6 How fitting that we are here on Saint  
7 Valentine's Day. The day we celebrate the life of a  
8 martyred clergyman and physician who was tortured  
9 and put to death for ministering to the persecuted  
10 Christians by the Romans around 270 A.D.

11 We commemorate his life today by  
12 focusing on the love and compassion he devoted to  
13 others through his life, which leads me to quote  
14 from Mahatma Gandhi: Where there is love, there is  
15 life.

16 So you may be wondering what that has  
17 to do with the meeting and vote on Amazon data  
18 center's special use permit. I would say  
19 everything.

20 Councilmembers have the opportunity to  
21 act in a respectful and loving matter for the town,  
22 county, and residents who will bear the brunt of the

1 noise, the relentless and harassing noise that we  
2 know is part and parcel of the building of an Amazon  
3 data center.

4 Responsible, educated expertise has  
5 come to show us that this is a nuisance that will  
6 not be ameliorated once this business is built.

7 The burden to protect the public health  
8 and well-being is yours. You have had the benefit  
9 of the Planning Commission's recommended denial.  
10 These are your experts. You have the benefit of the  
11 expertise brought forward by the efforts of Protect  
12 Fauquier and residents of your town and county, all  
13 of which inform you that this noise will occur and  
14 will be continuous and audible for miles around.

15 You have had the benefit of legal  
16 advice telling you that the state will decide how  
17 the power needed by the data center will get to the  
18 data center. My home is still on the route as far  
19 as I'm concerned until the state says otherwise.

20 You have also been advised that you  
21 will not have the power to order the data center to  
22 shut down. Let's get real, guys. Your legal budget

1 does not match Amazon's.

2           You should now also be aware that the  
3 State of Virginia tends to give about \$34 billion to  
4 Amazon to construct numerous data centers and to  
5 relieve Amazon of any tax burden for at least  
6 15 years.

7           One company is being granted about half  
8 of Virginia's surplus. That buys a lot of power in  
9 the statehouse. And with proposals to deprive  
10 localities of the right to regulate noise and zoning  
11 within their borders, can you afford to ignore what  
12 is clearly the right action now?

13           There is no evidence to show that  
14 Warrenton will profit, or by how much. There is no  
15 evidence to show that the residents living near the  
16 data center will have any legal remedies available  
17 to them to stop the noise, compensate their lost  
18 property values, compensate any medical or  
19 psychological care they may need, or compensate them  
20 for lost business when customers shop elsewhere.

21           There's no evidence to show that the  
22 balance tilts towards the betterment of the town or

1 the county. A cherished way of life will be lost,  
2 harm will be done. Where is the good for the many.

3 So I ask you again: Where is the love,  
4 of Warrenton, of Fauquier County, of our neighbors,  
5 of our way of life?

6 MAYOR NEVILL: Thank you, ma'am.

7 MS. ORT-PRESLEY: Vote love, vote life, vote  
8 community and rural values. Vote no. I do.

9 MAYOR NEVILL: Thank you.

10 (Applause.)

11 MR. PIERCE: I'm Scott Pierce. I live at  
12 199 Old Orchard Lane in Old Town.

13 I thought I'd start with joke that does  
14 not involve prostitution. We need some levity  
15 here. It's a new spin on an old joke.

16 So New Jersey has the largest  
17 repository of toxic waste dumps, and Virginia has  
18 the largest data center population because New  
19 Jersey had first choice.

20 (Laughter.)

21 MR. PIERCE: Thank you. Apparently, I'm  
22 here all night.

1 I'm not anti-Amazon Web Services. I'm  
2 not anti-data. I'm not a Luddite. Actually, I make  
3 my living from technology. I'm a big fan of  
4 technology. It's just this particular data center  
5 at this particular location is wrong for Warrenton.  
6 I think you've heard that.

7 Charles Dudley Warner, not Mark Twain,  
8 said that politics makes strange bedfellows. If you  
9 look around this room -- I know there are fewer of  
10 them tonight -- but there are some strange  
11 bedfellows here all voicing the same thing. I mean,  
12 we've got young and old, we've got little kids with  
13 poems. We have got young rising politicians. We've  
14 got black. We've got white. We have got Democrats  
15 and Republicans, and at least one wild-eyed  
16 libertarian. Thank you very much.

17 I don't think that's ever happened  
18 before. In fact, we have the Piedmont Environmental  
19 Council and me on the same side of an issue, and I  
20 think that's actually near miraculous.

21 Nevertheless, here we are. You've  
22 heard all of the information. If you're listening

1 to it, I don't know. I suspect not. I suspect  
2 there's more going on. I have an old friend that  
3 says there's a rat in the woodpile. I imagine  
4 there's a rat in the woodpile.

5 So we all suspect that there is  
6 corruption. There's the appearance of it. I don't  
7 know. We'll find out. I suppose that the truth  
8 will out. What you've done in the darkness will be  
9 reported in the light either now through litigation  
10 or at a future time.

11 But all of us strange bedfellows are  
12 here to say one thing: Just say no to the special  
13 use permit. Give it to the voters to decide through  
14 a referendum. That silent majority you claim  
15 supports this will not turn out. But we will.

16 (Applause.)

17 MR. PIERCE: And here's one other thing: I  
18 know that as politicians -- those of you who are  
19 elected, not the appointed ones -- are worried about  
20 reelection. Everybody is worried about reelection.  
21 In a happier time, it would not be reelection you  
22 should be worried about. It would be the tar and

1 feathering that might be coming. That doesn't  
2 happen today. You should count your lucky stars for  
3 that.

4 Thank you.

5 (Applause.)

6 MR. RAMUNDO: Good evening. I'm Kevin  
7 Ramundo. I am speaking tonight as an individual,  
8 not as president of Citizens for Fauquier County.

9 For months you have heard all of the  
10 reasons why should deny Amazon's special use permit.  
11 Hundreds of citizens have spoken at meetings like  
12 this. Thousands of comments have been sent to town  
13 officials. Over 2,000 people have signed a petition  
14 opposing it. And many, many opinion letters have  
15 run in the local media.

16 Some of you discount this outpouring of  
17 almost unanimous opposition by claiming it's from  
18 non-town residents or special interest groups. This  
19 rationale is simply an excuse to justify support for  
20 the wildly unpopular data center.

21 Just like the claim that there are many  
22 people who want it. Where have they been? Where

1 are they tonight?

2 Giving a thumbs up to this data center  
3 will likely overshadow any of this council's good  
4 work, and those of you who vote for it will share  
5 the sad legacy of ignoring your constituents,  
6 putting a data center in the worst possible  
7 location, acquiescing to possible wrongdoing, and  
8 bowing to the will of Amazon.

9 And let's be clear, if you approve this  
10 one -- you know this -- you're welcoming others with  
11 open arms because you have set such a low bar  
12 including waiving your own requirement for a noise  
13 study before you would approve it.

14 You might think that people will forget  
15 your vote, but they won't. No other town issue has  
16 garnered anywhere near the amount of attention and  
17 concern generated by this data center.

18 If built, it will be a visible and  
19 noisy reminder of how Warrenton's small town charm  
20 was sacrificed for a few hundred thousands of  
21 dollars a year in property taxes.

22 It will be a monument to a Mayor and a

1 Town Council that ignored the wishes of its citizens  
2 and came out on the wrong side of the most  
3 consequential land decision in this town's history.

4           You might also think that approving  
5 this tonight will put this issue in the rear-view  
6 mirror. It won't. The thousands who have asked you  
7 to reject this data center aren't going away, and  
8 they will be more motivated than ever.

9           The only way to mitigate this  
10 controversy and harm to Warrenton is by rejecting  
11 this project. There is simply no justification to  
12 do otherwise.

13           Amazon's data center will not make the  
14 town better, and it will impact the health and  
15 well-being of hundreds of people who elected you and  
16 who will experience a reduced quality of their live  
17 and their property values.

18           So please follow the lead of your  
19 planning commission and reject this SUP. It is your  
20 duty and your responsibility.

21           Thank you.

22           (Applause.)

1 MS. PIERCE: Wow. Big scary microphone.  
2 My name is Hillary Pierce. I'm a  
3 resident of Ward 5, just off of Winchester Street.  
4 My husband Scott just spoke a moment ago.  
5 I've been a native Northern Virginian  
6 all my life. I've lived all over Northern Virginia.  
7 Excuse me. 21 years ago my family and I escaped  
8 from Ashburn and Loudoun County, and we finally made  
9 it to Warrenton. Yay.  
10 We've had family in the county since  
11 the '60s: Parents, grandparents, his sisters,  
12 nieces, nephews. All of our kids have grown up  
13 here. This is where we call home.  
14 We live here because we don't want to  
15 live there, and we don't want you to bring there  
16 here.  
17 (Applause.)  
18 MS. PIERCE: We're here because it is a  
19 special place. We have a family friend who travels  
20 all over the world, and she has said Warrenton is  
21 special. There's something special here. We moved  
22 here because it's special. We're going to stay here

1 because it's special. Here is special.

2 I'm not here to talk about all the  
3 things that everybody else has talked about, the  
4 health risks or the facts and figures on how this is  
5 not good for our community. I'm not even going to  
6 raise the questionable process that's been going on  
7 with undisclosed facts and incomplete applications.

8 I'm not a Luddite, as my husband said.  
9 I very much like the Internet like most people do,  
10 but I'm here to say that there are right ways and  
11 wrong ways to go about development. And the process  
12 that's been going on here is giving every appearance  
13 of being the wrong way.

14 (Applause.)

15 MS. PIERCE: I'm also here to say that there  
16 are right locations and wrong locations for this  
17 sort of development. And the location that we are  
18 discussing for this particular data center, which is  
19 not zoned for this, is the wrong place.

20 (Applause.)

21 MS. PIERCE: And I'm adding my voice to the  
22 thousands of citizens whom you represent to tell you

1 read the room and just say no.

2                   And if you cannot vote no tonight, then  
3 don't vote because you don't have all of the  
4 information, and you cannot give a reasonable  
5 informed vote without all of the facts.

6                   Thank you. Good night.

7                   (Applause.)

8                   MR. CLOUGH: Daniel Pennell, Joseph Roca,  
9 Mary Root, Susan Shear, Peter Schmidt, Rosemary  
10 Schneider, Pat Smith, Jason Smolinski.

11                  MR. ROCA: All right. Joseph Roca, Scott  
12 District. Really, it's difficult to follow-up on  
13 all of the great speakers we have.

14                  You absolutely should vote no for all  
15 of the reasons presented. And beyond that, look,  
16 integrity is gift you give to yourself. There's a  
17 lot of questionable stuff that has been raised here.  
18 I wouldn't vote on something I couldn't in good  
19 conscience. Go with your conscience, have  
20 integrity.

21                  Thank you.

22                  (Applause.)

1 MS. SCHNEIDER: Hello. My name is Rosemary  
2 Schneider. I live at 116 North View Circle,  
3 Warrenton Virginia. I've been here since 2000.  
4 23 years.

5 I came here. I was happy here. So in  
6 my search for the ideal place, I want to stay here.  
7 But when things change, I might not. So say no.  
8 For the record, say no to Amazon.

9 (Applause.)

10 MR. CLOUGH: Daniel Pennell, Mary Root,  
11 Susanne Shear, Peter Schmidt, Pat Smith, Jason  
12 Smolinski, Julianne Sonnenburg, Morgan Sosa, Wu  
13 Spencer, Margrete Stevens.

14 MS. SONNENBURG: Good morning. My name is  
15 Julianne Sonnenburg. I live in the Scott District.  
16 I've lived in Warrenton for 11 years and Fauquier a  
17 total of almost 30 years. I'm against the data  
18 center.

19 A couple of reasons off the top:  
20 According to Computer World publication, data  
21 centers are energy guzzlers; and by 2025, data  
22 centers will be consuming 20 percent of the global

1 electric supply.

2           Number two, energy used by data centers  
3 doubles every four years. The MIT Press: Cloud now  
4 has a greater carbon footprint than the airline  
5 industry. Two, a single data center can consume the  
6 equivalent of 50,000 homes worth of electricity.

7           So at the last session about this time  
8 in the morning, Mr. Heroux said: If not a data  
9 center, then what?

10           So I thought about it for the last  
11 month, and what -- the gateway of Warrenton should  
12 represent the values of the town. It should be  
13 something that we're proud of. It should be  
14 something that attracts homeowners, increases home  
15 values, brings in revenue, brings in new businesses  
16 and is -- offers stability in a downturned economy.  
17 It's not a data center. My proposition would be a  
18 university campus extension.

19           University campuses. A publication put  
20 out by the Federal Reserve Bank of New York:  
21 Universities are engines of growth, have a direct  
22 economic impact, raises skills of the area

1 workforce, helps local businesses create jobs for  
2 skilled workers. Universities spend money in their  
3 local area and employees local workers.

4 Research activities raise demand for  
5 high-skilled workers, which has spill-over effects  
6 into the local economy. New companies are drawn to  
7 the area because of these research projects.

8 I went out and did an Internet search  
9 on colleges and universities and how they help the  
10 local economies, and the page just filled up. It  
11 just goes on and on and on about the economic  
12 advantages to having a university in your town.

13 So if not a data center, then what?  
14 This is my proposition.

15 MAYOR NEVILL: Thank you, ma'am.

16 MS. SONNENBERG: Okay. Thank you.

17 MR. CLOUGH: Morgan Sosa, Wu Spencer,  
18 Margrete Stevens, Elizabeth Tesendori, Francis  
19 Thompkins, J.T. Thompkins, Patricia Tucker, Arthur  
20 Van Keller -- Von Keller, Anne-Marie Wash Wharton.

21 MS. STEVENS: Good evening, or good morning.

22 I'm tired, but I'm here to speak. My

1 name is Margrete Stevens. With my husband Michael,  
2 I live on a farm in the Cedar Run District. We have  
3 owned the farm for 30 years. It dates back to 1820.

4 I come from Denmark. My husband is  
5 English. We could have retired elsewhere, but we  
6 chose Fauquier County. We love our farm. We love  
7 this part of Virginia, and we love Warrenton.

8 Tonight, I want to add my voice to all  
9 of those who have spoken out against the data  
10 center, but I also want to invite you, as you come  
11 towards the end of what, I think, is your road, to  
12 look back the beginning of this project.

13 You'll recall that some months after  
14 the initial submission of the application, Amazon,  
15 when challenged, conceded that the noise study that  
16 had been submitted with the application was in fact  
17 a draft and not final.

18 I have worked as a lawyer for 30 years  
19 in international arbitration. During those  
20 30 years, I have never known a party to instruct a  
21 law firm to submit a document in draft form without  
22 marking it as such: Crossed, writing "draft" up in

1 the right corner.

2 I suggest to you that the original  
3 draft could not possibly have been an oversight or a  
4 clerical error. Instead, it was likely a deliberate  
5 decision to muddle the noise issue from the very  
6 beginning. But who can say for sure --

7 (Applause.)

8 MS. STEVENS: -- what it really was because  
9 it's difficult to prove, and this is all now in the  
10 history.

11 But it seems that Amazon succeeded in  
12 this strategy. The noise conditions to be attached  
13 to Amazon's special permit have been under  
14 deliberation until this month. I just understand  
15 that it was even discussed this morning.

16 We have also learned recently that  
17 enforcements mechanisms may not be workable. These  
18 are not issues to deal with in the 11th hour on the  
19 cusp of voting. These are issues that need to be  
20 resolved before you make your final decision.

21 This project is flawed. Its  
22 implementation is uncertain. It's hugely unpopular.

1 And most importantly, it is destructive and  
2 irreversible.

3 And I urge you to vote no.

4 MS. TESSANDORI: Hi. Good evening. My name  
5 is Beth Tessandori, and I live at 96 Meadowview lane  
6 in Warrenton in Ward 2.

7 First of all, props to everybody that  
8 came out, and props to Robert Duvall. Wow.

9 Our neighborhood is known as Monroe  
10 Estates, and I'm speaking on behalf of our HOA  
11 associations.

12 Monroe Estates is a quiet neighborhood  
13 of 48 homes that was built 20 years ago. As the  
14 crows fly, we are approximately one and one-half  
15 mile from the proposed data center on Blackwell  
16 Road.

17 At first glance, you might not think  
18 Monroe Estates has a direct interest in your vote  
19 tonight on this current application. However, our  
20 neighborhood sits alongside the historic Alwyngton  
21 Manor, built in 1855 by John Quincy Marr.

22 Adjacent to Monroe Estates runs the old

1 wire factory down Old Meetze Road. By now you're  
2 well familiar with this site as option one for  
3 Dominion's energy location for a large substation  
4 that would provide power to the Amazon data center  
5 on Blackwell Road.

6 Substations are huge, ugly; and while  
7 not as noisy as a data center, still not what you  
8 would expect near a beautiful wedding venue or a  
9 nice quiet neighborhood.

10 Our neighbor on Old Meetze, Steven  
11 Wojcik, has told you the wire factory property is  
12 also a drainage collection area for the town's storm  
13 water management, complete with a large pond at the  
14 center of an even larger wetland. A completely  
15 inappropriate site for a large substation, and as  
16 Dominion has said, unnecessary if you choose not to  
17 approve Amazon's application.

18 In addition to the substation, you are  
19 aware that the owner of this property, David Dobson,  
20 is marketing the wire factory for an  
21 eight-data-center building totalling 700,000 square  
22 feet. That is three times the amount that the

1 Blackwell Road proposal is.

2 Amazon has already considered this  
3 property and will most certainly be the next SUP  
4 application before you if Blackwell is approved.

5 Mr. Mayor, we appreciate that at least  
6 twice you have stated opposition to a data center or  
7 substation at this location.

8 On December 13th, you wrote: I stand  
9 by my opinion that the wire factory site is  
10 inappropriate for a data center due to proximity to  
11 residential and historic neighborhoods, and know  
12 that some of my voting colleagues share my opinion.  
13 I prefer option B for that proposed substation, and  
14 for those same reasons, I will advocate for that.

15 We ask you to remember that opinion  
16 when Mr. Dobson, one of the three advocates for the  
17 data center who have spoken in these hearings, comes  
18 before you. We would like to know that these words  
19 will reconcile with the second special use permit  
20 when it comes before this council.

21 How can the council possibly stop the  
22 SUP at the old wire factory once you have set a

1 precedence on Blackwell Road?

2                   You stated that your opinion is based  
3 on proximity to a historic neighborhood. We agree.  
4 Our neighborhood is --

5                   MAYOR NEVILL: Thank you, ma'am.

6                   MS. TESSANDORI: -- 300 feet from the wire  
7 factory.

8                   MAYOR NEVILL: Thank you.

9                   UNIDENTIFIED SPEAKER: If it was an HOA  
10 (indiscernible).

11                   MAYOR NEVILL: Okay. An HOA. I'm sorry.  
12 If you'd like another two minutes, you may continue.

13                   (Applause.)

14                   MS. TESSANDORI: We have heard arguments  
15 that Amazon will somehow add to the town's economic  
16 viability. Have you asked your residents what we  
17 would give up in exchange for no data center? How  
18 about we only collect garbage once a week? That  
19 number alone would probably get you pretty close to  
20 a few hundred thousands dollars a year that you seem  
21 to think that you will get from Amazon.

22                   I'm sure we could give you dozen more

1 suggestions that are better than a data center.

2           In your last hearing, Mr. Heroux asked:  
3 If not a data center on the Blackwell property, then  
4 what? But that question is irrelevant. Just  
5 because citizens don't approve -- don't want to have  
6 a data center approved there doesn't mean citizens  
7 can't come up with an alternative.

8           Likewise, just because Amazon rushed  
9 ahead, paid a huge sum of money for a property, does  
10 not mean the town must grant them this special use  
11 permit. They are a large corporation that made a  
12 business decision. That decision should not place  
13 the onus on this council to grant them anything.

14           And the drive of some of the council to  
15 do so calls into question what arrangements were  
16 made behind closed doors.

17           (Applause.)

18           MS. TESSANDORI: I thank you again for your  
19 time. And if you must vote tonight, do it with a  
20 clear conscience and vote with your constituents.

21           (Applause.)

22           MR. SNOW: Hi. My name is Jonathan Snow. I

1 did not hear my name, but I did sign up earlier  
2 today so I want to speak out.

3 My name is Jonathan Snow. I live at  
4 5443 Wemberly Drive in Warrenton, up in the Scott  
5 District.

6 Mayor, Councilmembers, town staff, I  
7 feel like I'm going to repeat a lot of what's  
8 already been stated today. So this is yet another  
9 testimony, but I tried to switch it up a little bit.

10 I'm tired. You're tired. We're all  
11 tired. But I'm here and I wouldn't be anywhere  
12 else. This is so important. This is about us, and  
13 this is about where we're going.

14 I'm sure you've heard "Keep Austin  
15 Weird." We've all heard "Keep Austin Weird" about  
16 Austin, Texas. It is a weird place, but it didn't  
17 get there by accident. It's got a university there.  
18 They don't make decisions. They attract high-tech,  
19 they attract university students, but they make  
20 decisions to keep themselves different.

21 We've got something that's a lot better  
22 than weird. We've got special. I've heard that

1 word so many times tonight. Keep Warrenton special.

2 That is what's different here. When  
3 people ask us about our hometown, people that are  
4 not from here, people who visit here, we cannot help  
5 but extol the unique wonderful things here. We say  
6 this is special.

7 You can obviously tell that the  
8 community cares deeply about this town. I've heard  
9 the silly notion about the silent majority of data  
10 center lovers hiding out at home or out at dinner  
11 tonight in local restaurants foregoing this meeting.  
12 If they cared that much, they'd be here, too.

13 The doers, the people who want to keep  
14 this place special are all here, and you can't help  
15 but hear the overwhelming message.

16 We've asked a lot of questions about  
17 data centers and what they would really do to our  
18 town. We voiced a lot of concerns about what people  
19 are seeing and hearing in neighboring counties.

20 What we haven't heard from anyone is a compelling  
21 reason for the project that is currently proposed.

22 Why there? How will environmental

1 factors be honestly -- by a third party be  
2 maintained and enforced? How can we be assured that  
3 this town government cares about process and about  
4 the people given everything that we've heard  
5 tonight?

6 How can we be assured that a crazy  
7 train of data center lawyers won't be rolling down  
8 tomorrow banging on your door to sell this town  
9 out?

10 The only compelling reasoning I've  
11 heard today is from one guy for why the SUP should  
12 be approved: I am here on behalf of Amazon. Get  
13 out of my way. We'll take our own noise reading  
14 once a year. Thank you.

15 Compelling.

16 Are you okay with that? Should you be  
17 okay with that? If so, you are naive.

18 Where is the compelling case for the  
19 other position? What's the argument? What's the  
20 advocacy?

21 This country writ large is bleeding.  
22 We have a crisis of trust. And increasingly the

1 people are being pushed aside at the behest of a  
2 small minority of powerful interests. We can solve  
3 our problems, and we should do so starting at the  
4 lowest levels of government.

5 We all need people we can believe in.  
6 Robert Duvall gets it. Do you?

7 Stand up and lead, listen to your  
8 people, hold Amazon to account.

9 MAYOR NEVILL: Thank you, sir.

10 (Applause.)

11 MR. CLOUGH: Francis Thompkins, J.T.  
12 Thompkins, Patricia Tucker, Arthur Von Keller,  
13 Anne-Marie Walsh Wharton, Melissa Weidenfeld, Dave  
14 Wynn, Bridget Wolfe, Barry Wilson, William Woodward.

15 MS. WALSH: Good evening, gentlemen. I'm  
16 Ann-Marie Walsh, and I live on Bear Wallow Road.

17 And just a few comments to make that I  
18 do have. And the speakers that we've had so far  
19 have been tremendous. Congratulations to you all.

20 We were talking -- I've heard several  
21 comments about a referendum. Well, believe it or  
22 not, we have a community not terribly far away from

1 us that there was a proposed cell tower development,  
2 we can call it, and they had a referendum, and they  
3 defeated it. The name of that town -- and if you go  
4 visit them -- it's Sperryville. Yep. Nearby  
5 Sperryville defeated it.

6 So it made me think about, why aren't  
7 the citizens of Warrenton having that same option?  
8 And I'm glad it came up tonight.

9 In addition, seems to be that  
10 justifying this project is because of a revenue  
11 shortfall that may be is happening or is being  
12 predicted. If that is the case, then the town  
13 leaders, town staff, are responsible, not the  
14 citizens.

15 (Applause.)

16 MS. WALSH: There is an erosion of public  
17 trust that is growing deeper and deeper and deeper  
18 by the week for each of you with the exception of  
19 our two new members. I don't include you in that at  
20 all.

21 In the local newspaper very recently  
22 there was report that the Town expected tax revenue

1 in four years at about 4.7 million from Amazon.

2 Which is bubble gum to Amazon.

3 My concern is that perhaps what's  
4 driving this a little bit is the desire of the town  
5 to have a three-level deck parking -- or parking  
6 deck, excuse me -- directly behind the post office  
7 in Old Town, Warrenton, which is unnecessary and  
8 unneeded. We have parking. It's just not dealt  
9 with correctly.

10 And I will mention this to you, as well  
11 as to the attorney for Amazon that's been here all  
12 evening: Amazon is not a good neighbor. Believe  
13 me, they are not. And you can just look at what  
14 they did with -- in Fairfax with the schools, and a  
15 book that was -- Amazon was selling that wasn't  
16 selling too well. It was written by a Marxist  
17 professor to turn over the country, and all those  
18 bad kind of things. And Amazon contacted the school  
19 system in Fairfax: Would you like to have this book  
20 for your classes?

21 Of course, we would.

22 Well, people heard about it, and you

1 didn't hear much more about it. And it turned out  
2 they donated those books to schools that had  
3 minority -- more minorities than they had the white  
4 students, and they got a tremendous tax deduction  
5 for it.

6 So they are not a good neighbor.

7 And another question I'd like to ask  
8 is: Who are they selling the data to?

9 MAYOR NEVILL: Thank you.

10 MR. CLOUGH: Dave Wynn, Bridget Wolfe, Barry  
11 Wolfson, William Woodward, Susan Yankitis --

12 UNIDENTIFIED SPEAKER: "Yankitis."

13 MR. CLOUGH: "Yankitis." Alfred Young,  
14 Ellen Zaro Belane, Andrew Ziewert, Amy Ziewert,  
15 Kevin O'Neill, Aaron O'Donnell, Andrew Orleans,  
16 Corianne Pafford.

17 UNIDENTIFIED SPEAKER: Susan Yankitis had to  
18 leave, but she asked me if I just reinforce everyone  
19 else's statement saying that she, too, is opposed  
20 for all the reasons already stated. And to say vote  
21 no.

22 Thank you.

1 MR. CLOUGH: Richard Rose, Dale Sites,  
2 Sandra Sites, Kenneth Thomas, Susan Litus, Brandon  
3 Wilson, Roseanne Woodruff, Bill Wright, William  
4 Ziegler.

5 (No responses.)

6 MR. CLOUGH: Last call for any of the names  
7 that I've called.

8 (No responses.)

9 MR. CLOUGH: Mr. Mayor, I have no other  
10 names on my list.

11 (Indiscernible comments.)

12 MR. CLOUGH: He's going to ask for you to  
13 come up. Just give it a second.

14 MAYOR NEVILL: So all of the names have been  
15 called who signed up previously?

16 MR. CLOUGH: All of the names that have  
17 signed up, I've called, yes, sir.

18 MAYOR NEVILL: Okay. Then, if you have not  
19 signed up and wish to speak, you may please approach  
20 the podiums. If there's several of you, just line  
21 up, and you can take your turns as it goes on  
22 yielding from side to side if that makes a sense.

1 MR. CLOUGH: We'll start on the left side  
2 here and alternate sides.

3 Please state your name clearly.

4 MR. WILSON: Yes, my name is Ken Wilson. I  
5 live at 88 Frazier Road here in -- right in the  
6 town.

7 Brandon Wilson is my son. You just  
8 called his name. He's been -- not as famous as  
9 Robert Duvall working in film, but he's working in  
10 film tonight so he couldn't make it.

11 I fell in love with Warrenton, like  
12 you've heard from so many others. I was in college  
13 at George Mason driving through the town to visit  
14 friends in Charlottesville. I had my girlfriend,  
15 who is now my wife.

16 About the 5th trip we took, she said  
17 let's drive through Old Town Warrenton. I thought,  
18 what, there's an older McDonald's, an older gas  
19 station? She said, no, there's a sign that says  
20 "Old Town."

21 Well, we came up there, drove down Main  
22 Street once, and I said, let's park the car and take

1 a look around.

2 Well, the few minutes looking around  
3 turned into about two and a half hours. We almost  
4 missed dinner. But from then on, we always had a  
5 special spot in our heart.

6 And when we escaped from Fairfax County  
7 27 years ago, I continued to work in Fairfax, and I  
8 put up with that commute because it's worth it here.  
9 We came here because my little town of Fairfax City  
10 that I grew up in as a child was no longer a little  
11 town.

12 We wanted our children -- we wanted to  
13 raise our children in Warrenton, the Warrenton that  
14 we saw. And we knew it was going to change, but  
15 this is a phenomenal -- this change is -- it's  
16 earthquake proportions. Once you break it, there's  
17 never going back again.

18 This is a terrible idea. And the idea  
19 of voting on something without the information --  
20 for you new members, I mean, this is crazy, you  
21 know. You need that information. It needs to be  
22 out in the open. This is a bad idea, and it doesn't

1 need to be in the town.

2 Data centers are important, but stuffed  
3 into the middle of one of the last really great  
4 little towns in Virginia is just unspeakable, and I  
5 hope you vote no.

6 Really more to the point, I do hope you  
7 throw it to the citizens, because I don't think  
8 you're going to find anybody in that alleged silent  
9 majority who likes the idea. It's not going to  
10 happen.

11 (Applause.)

12 MR. WILSON: Please let us speak for you.  
13 And I realize you guys are in a terrible bind.  
14 Amazon, you know, we've heard it. They are  
15 incredibly powerful. But, you know what, if you  
16 could just hand it over to the citizens, maybe we  
17 could back you up on this. We could take care of it  
18 for you. Let us do it.

19 Thank you.

20 MR. STEFANIK: My name is Roy Stefanik. I  
21 live at 5731 Wilshire Drive in Warrenton.

22 It's very late. I'll keep my comments

1 very brief. You know, I agree entirely with the  
2 gentleman who just spoke ahead of me. You're  
3 talking about a company that their annual earnings  
4 are about 16,000 times your annual budget. So if  
5 you try to challenge them, if you try to take them  
6 on or you try to push them around using ordinances  
7 or other types of legal means, they have the  
8 capacity to run rings around you.

9 My concern for you is that -- for all  
10 of us -- and I'm speaking metaphorically. I'm not  
11 trying -- I don't mean this literally. But, you  
12 know, if you allow the data center here, it's like  
13 the equivalent of tossing a hand grenade into the --  
14 into the community here, and there's going to be  
15 shrapnel, and there's going to be people who are  
16 going to be hurt by it by all the reasons that have  
17 been described previously.

18 And that also means that you-all have  
19 the potential to be hit with shrapnel as a result of  
20 those positions, too, as time goes on and you find  
21 out, you know, some of the things that Amazon may  
22 potentially do.

1                   And there's also been talk here about  
2 whether -- you know, there's been FOIA requests.  
3 There's been FOIA requests and, you know, questions  
4 of, you know, prior emails. And if there's a  
5 finding of information that was supposed to have  
6 been disclosed earlier and we -- and, you know, the  
7 community finds out that these things have been  
8 going on without their knowing, there will be even  
9 greater shrapnel for everybody involved.

10                   So I think it's best to try to avoid  
11 any kind of long-term damage, and please vote no.

12                   Thank you.

13                   MS. BOENISH: Speaking as an individual from  
14 the Scott District. Jean Boenish. My text number  
15 is (310) 676-1935.

16                   There is no reason to be misled into  
17 prematurely discussing details of points that are  
18 already prohibited by the superseding laws you took  
19 an oath to uphold and govern by.

20                   Point 1, as Mr. Semple pointed out,  
21 Town SUP applications cannot separate out  
22 consideration and impacts of electrification and

1 facility's requirements. That is only one way this  
2 application has been incomplete and disingenuous  
3 from the start.

4 Point 2, the town code states, quote:  
5 Special use permits may be granted upon finding that  
6 the use, with conditions, will not have a  
7 deleterious impact and will reflect the spirit and  
8 intent of the comprehensive plan, as well as this  
9 ordinance.

10 The findings have been that even with  
11 conditions the SUP is indeed expected to have a  
12 deleterious impact. This prohibits granting the  
13 SUP. And it will not reflect the spirit and intent  
14 of the comprehensive plan, also prohibiting granting  
15 the SUP. And its incompleteness and disingenuous  
16 are inadequate to meet the ordinance, also  
17 prohibiting granting the SUP.

18 Point 3, the town did not initiate  
19 eminent domain to acquire threatened properties, as  
20 the town charter allows, so the town has no right to  
21 threaten or harm residential atmospheres by granting  
22 this SUP.

1 (Applause.)

2 MS. BOENISH: Point 4, residential proximity  
3 is the initial and insurmountable problem with this  
4 SUP no matter what type of potential pollution  
5 hazard or accident is considered.

6 Also, adding any pollution potential  
7 from this SUP's new source does the opposite of the  
8 Virginia Codes, "policy of the Commonwealth to  
9 minimize the transfer of environmental wastes."

10 Point 5, Article 1, Section 3 of the  
11 Virginia Constitution is the ultimate recourse  
12 Virginians have for protecting themselves.

13 By flouting warnings to not violate  
14 legal implementation of Article 1, Section 3 of the  
15 Virginia Constitution, on November 9th, 2022, three  
16 of the Town Council Members negligently elected to  
17 forfeit their Town Council seats.

18 The town has chosen not to address  
19 legal activation of that ultimate and constitutional  
20 community protective mechanism. Nevertheless, it  
21 leaves four non-negligent voters on the council.

22 MAYOR NEVILL: Thank you, ma'am.

1 (Applause.)

2 MR. WARD: Yes, sir. My name is Wally Ward.  
3 I live at 192 Pinnacle Court.

4 I signed up on the computer. I did all  
5 the stuff. I put in my email address. I put in my  
6 phone number, sat here and listened for 5 hours  
7 while some people have been called up three or four  
8 times. And I guess I didn't do it right. Next time  
9 I'll come into the town hall and get somebody to do  
10 it for me. Okay.

11 I got a couple questions. I'm really  
12 disappointed to see that my Ward 1 councilman isn't  
13 here tonight. I'm curious how many people could not  
14 come in and could phone it in? We just want this  
15 meeting with just you and everybody else on the  
16 phone? What's the scoop on that? Is that legal?  
17 You've got a lawyer up there. I'd like to find out.

18 Number two, you have two new councilman  
19 and another councilman who want to find out about  
20 all these mysterious emails. You-all voted no,  
21 we're not going to let them read it. We're going to  
22 make them vote on it. I don't think that's very

1 nice.

2                   Number three, Mr. Mayor, you have said  
3 in the paper you believed in open government. FOIA,  
4 the Freedom of Information Act, is not the ceiling.  
5 It's the floor. Open government would mean we  
6 didn't even need the file this Freedom of  
7 Information Act stuff.

8                   (Applause.)

9                   MR. WARD: You've got the guy with the most  
10 obvious, obvious conflict of interest getting up and  
11 loudly proclaiming he doesn't have it. I don't  
12 think there's anybody in the audience that believes  
13 that. Not a one.

14                   (Applause.)

15                   MR. WARD: And finally, the four H's, if I  
16 was on a town council anywhere in America and I  
17 wanted to make people lose faith and confidence in  
18 my government, the integrity, the openness and  
19 honesty, I don't think they could have done a better  
20 job than that.

21                   That's all I've got to say.

22                   Oh, and, by the way, vote against it.

1 MS. HAMBLY: Hi. My name is Dorothy Hambly.

2 I live on 152 Moffett Avenue.

3 UNIDENTIFIED SPEAKER: (Inaudible.)

4 MS. HAMBLY: Oh, okay. Sorry. I've never  
5 done this before. But you did just say that if you  
6 have not signed up but you want to speak now, you  
7 can. So I figured I'd come down here.

8 I just want to say I moved to Fauquier  
9 County this year. Been here since June. But I did  
10 previously work here for a couple years on  
11 automotive art sales.

12 But before this, I did live in Loudoun  
13 County for eight years, and you've really got to  
14 take it to heart, you do have a very special small  
15 town here that a lot of other counties are quickly  
16 losing, especially in Loudoun County, which was once  
17 viewed as one of the most beautiful areas in Virginia,  
18 and now has been completely overtaken with data  
19 centers to the point where a lot of times in the  
20 county meetings they will simply rubber stamp any  
21 data center that comes in.

22 And I've tried to get lots of my

1 friends motivated to come and speak at those  
2 meetings; and, you know, what they say, it doesn't  
3 even matter because the Amazon and other data center  
4 lawyers will be right there with their money and  
5 their influence and it won't even matter; and that  
6 is the wrong attitude for citizens to have. Their  
7 voice and their vote always matters and should be  
8 listened to.

9           And the last thing I will say is that  
10 for four years we lived on a very beautiful and  
11 picturesque property on Route 50 almost to  
12 Middleburg, and there was two houses there. One of  
13 them was about 100 years old. And what happened is  
14 they decided to make a data center, \$17 million was  
15 the price tag of that about 15, 20 acres, whatever  
16 it was in land.

17           Obviously, the tenants that live there  
18 were working class, could not possibly afford to buy  
19 out that property. And the landlord that we all  
20 paid the rent to had cancer, so they basically  
21 waited until he died and sold for millions of  
22 dollars. All the tenants had to leave at

1 Christmastime of that year, which was absolutely  
2 heartbreaking. And for the people that did try to  
3 stay, the rent as much as quadrupled.

4 And what all this amounts to is that if  
5 you just rubber stamp data centers just because of  
6 the money, the working class will not be able to  
7 afford to live in your county and your town, and it  
8 is going to destroy the character of your locality.

9 Thank you-all for listening.

10 MS. BEAUCHAMP: For the record I did sign up  
11 and my name was not called. Erin Beauchamp,  
12 B-E-A-U-C-H-A-M-P.

13 16 years ago my husband and I left the  
14 overdevelopment of Prince William County where we  
15 grew up, and we found refuge in the quiet of  
16 Warrenton.

17 I'm a public servant, just like  
18 yourselves. I'm a vastly underpaid kindergarten  
19 teacher right here in Fauquier County Public  
20 Schools. But I stay here because I'm a part of this  
21 community, and that's more important to me than  
22 going where there's higher pay thanks to tax revenue

1 from lots of big corporations.

2           As you can imagine, we talk a lot in  
3 kindergarten about listening. I won't rehash all  
4 that you've heard from experts and lay people alike  
5 against this SUP. You've heard from the masses.

6 But I want to ask you: Have you heard with more  
7 than your ears? Have you listened with your whole  
8 brain, with your heart, with your conscience?

9           As you sit before us this evening, you  
10 hold immense power over the future of our town and  
11 county. This power has been entrusted to you by We  
12 the People, the foundation of representative  
13 democracy. It is your duty as representatives in  
14 this democracy to carry out the wishes of the  
15 people. We the People say no to this data center.

16           If you betray that trust placed in you  
17 by We the People, you will certainly be voted out.  
18 You'd better be real sure that the scratch that  
19 Amazon promised to line your pockets with is enough  
20 to buy you a one-way ticket and a new identity,  
21 because you'll never be able to show your face  
22 around here again.

1 (Applause.)

2 MS. BEAUCHAMP: But, you know what, that's  
3 not even what counts right now. What counts here is  
4 a mother's wisdom. I often tell my sons that the  
5 only thing they have to do to make me proud is to be  
6 kind and do the right thing. When you wake up  
7 tomorrow morning, will you be able to look yourself  
8 in the mirror and be proud of who you are because  
9 you've done the right thing? Will your mom be  
10 proud?

11 Thank you.

12 MS. LOCKE: My name is Patricia Locke. I  
13 live at 7336 Iron Bit Drive in Warrenton, Virginia.

14 We moved here from New Jersey in 2015.  
15 My son has lived here. He has a farm in Amissville.  
16 We also have land in Amissville.

17 We moved to Warrenton mostly because of  
18 my mom. She lived with us. And rather than build  
19 on the land in Amissville, we moved here to --  
20 because it was a beautiful place, and it was close  
21 to a hospital. And I decided to make it, after she  
22 passed, our forever home, which now I'm sort of

1 wondering.

2 I don't know why with all the facts  
3 that you've been given you can even have to think  
4 about this.

5 (Applause.)

6 MS. LOCKE: Not only all the negative things  
7 that you've been told with pollution, the noise, but  
8 even further than that, the noise pollution on  
9 people will cause illnesses. The air pollution will  
10 cause illnesses.

11 I don't know -- they're going to come  
12 back at you. These people are going to get sick.  
13 You can't have 24 hours of constant noise and not  
14 have it disrupt your mind.

15 I just don't understand. And I do not  
16 understand why, if you want a decision made, you  
17 can't give the facts to your members -- your two  
18 members. You don't want to give the emails. You  
19 don't want us to know, but you want a decision made.  
20 You can't make a decision without having all the  
21 facts. I don't know how they would. I don't know  
22 how with clear conscience you can actually vote

1 anything but no on the data centers.

2 Thank you.

3 MS. BYFIELD: Mr. Mayor, before my time  
4 begins, I'd like to respectfully request a check-in  
5 with Councilmember Sutphin, just a confirmation that  
6 she is still with us.

7 MAYOR NEVILL: She is still with us.

8 MS. SUTPHIN: Yes, I'm still with you.

9 MS. BYFIELD: Thank you. Okay. So my name  
10 is Nicole Byfield. I own and live in the Highlands  
11 of Warrenton singles.

12 I oppose this SUP. I would like to  
13 yield the remainder of my time to my husband Steve.

14 MR. BYFIELD: Good morning.

15 Councilmember Hamby, in the last  
16 meeting during your closing remarks you commented  
17 about support for the data center. You said, "I  
18 know that it looks like everybody is against, but  
19 there are a lot of people for."

20 While that statement may be factually  
21 correct to some degree, it remains an abstract  
22 notion. No one has yet qualified or quantified that

1 statement.

2                   Firstly, it should be noticed that the  
3 comprehensive plan, while not an actionable  
4 guarantee, was, however, a formal statement of  
5 intent. Absent a public outcry to the comp plan  
6 since its passing, it's reasonable to assume that  
7 the intent still stands as a community's wishes.

8                   Now, without a public demonstration of  
9 support for the data center, we're all left to  
10 wonder why the average citizen would desire one. It  
11 would seem as though the strongest argument would go  
12 something like this: The additional tax revenue  
13 will help keep our taxes low.

14                   Once again, this is another abstract  
15 notion. While revenue is necessary for a town to  
16 function, equally, if not more important, is how  
17 that revenue is managed. Additional revenue alone  
18 does not necessarily keep taxes down.

19                   One only need to look to our neighbors  
20 and ask the following: Why is it that with all of  
21 the data centers Loudoun and Prince William have  
22 higher real estate taxes than we do?

1                   While I'm sure there's a logical  
2 explanation for this, it does nothing to  
3 substantiate the most common argument for support.

4                   As is evident from these meetings there  
5 is apparently no benefit to the average citizen from  
6 this data center that is great enough to motivate  
7 the illusive silent majority to speak on behalf of  
8 support for this SUP.

9                   Protect Fauquier, along with CFFC and  
10 PEC did their due diligence. Their petition puts a  
11 name to each one of thousands of voices of  
12 opposition. We aren't left with an amorphous  
13 suggestion of "a lot of people." As the saying  
14 goes, they brought receipts.

15                   I would like to contextualize some of  
16 the signatures from that petition. Councilman  
17 Hamby, more people have signed that petition in your  
18 ward than voted for you in the 2020 election.

19                   (Applause.)

20                   MR. BYFIELD: Councilman Heroux, more people  
21 signed that petition in your ward then voted for  
22 you. Now, full disclosure, the bar wasn't very high

1 considering there's only so many members on the Town  
2 Council. Now, I don't bring that up as a slight,  
3 but it's worth highlighting the fact that you're  
4 filling a vacancy that was created by a conflict of  
5 interest associated with the applicant.

6 Councilmember Sutphin, my own ward  
7 representative, you ran opposed, winning 54 percent  
8 of the vote. Not only did more people sign the  
9 petition just in Ward 1 than voted for you, but  
10 there are more signatures from our ward than the  
11 combined total of yours and your opponent's votes.

12 (Applause.)

13 MR. BYFIELD: Lastly, Councilmember Sutphin,  
14 at the November 9th Town Council meeting, in regards  
15 to your vote on the Harris Teeter gas station, you  
16 stated, and I quote, "The safety, health, and  
17 welfare of it being so close to their homes, I just  
18 don't think that I can support it at this time."

19 MAYOR NEVILL: Thank you, sir.

20 MR. BYFIELD: "I just can't. I have to  
21 think of my constituents" --

22 MR. MAYOR: Thank you, sir.

1 MR. BYFIELD: -- "and what they want, and  
2 when it severely impacts their well-being, I cannot  
3 support it."

4 MR. MAYOR: Thank you, sir. Your time is  
5 up.

6 MR. BYFIELD: Once again, your constituents  
7 are counting on you.

8 (Applause.)

9 MR. PUTNAM: Good morning. My name is Hutch  
10 Putnam, native Warrentonian.

11 I moved back here to my hometown about  
12 a year and a half ago to raise my three children  
13 here. I live just outside of the town limits at  
14 7716 Warrington Chase Drive, but I'm also an owner  
15 -- a property owner within the town limits and  
16 overseer of a number of other properties within the  
17 town limits.

18 I wasn't really going to say anything,  
19 but I wanted to make sure that I lent my voice in  
20 opposition to the approval of this SUP. There's  
21 probably really only one sliver of this that -- or  
22 aspect of this argument against the data centers to

1 which I really feel like I can express, you know, or  
2 shed a little bit of light on to. Everybody here,  
3 with great passion and articulation, has covered so  
4 much.

5 Last 25 years, I've worked in real  
6 estate. You know, I was a contractor, homebuilder,  
7 broker, and now developer. And though I can't  
8 necessarily disclose all the details here tonight,  
9 please know that there are developers, there are  
10 investors, there are entrepreneurs, there are  
11 business people that have creative, feasible, and  
12 revenue-producing ideas, not necessarily just for,  
13 you know, this particular parcel, but ones that are  
14 very, very close to it, ones that are in the  
15 historic district.

16 And the interesting thing about these  
17 ideas and these things, which I'll probably be up  
18 here talking to you here in the coming months, is  
19 that all of them are by-right uses or align  
20 perfectly with the comprehensive plan.

21 So if your decision, you know, is  
22 swayed towards approval of this SUP because the

1 notion is, if not this, then what -- it's been  
2 sitting there for decades underutilized -- know that  
3 there are alternatives that can bring this town  
4 sustainable revenue and are compatible with the  
5 character of our town.

6 (Applause.)

7 MR. PUTNAM: So there's really no need to  
8 give up the ghost on this. The goal of solidifying  
9 the future financial viability of the obligations of  
10 this town can be accomplished. They truly can.  
11 Just not this way.

12 (Applause.)

13 MS. RUFFNER: Hi, guys. I'm back up here  
14 for round two, and this time I'm feeling a little  
15 fired up.

16 You guys have sat here and watched this  
17 town bleed their hearts out to you with emotion,  
18 with rationale, with facts. Science to emotional,  
19 we've run the gamut out here, and you have a member  
20 who has scrolled Facebook this evening.

21 You want to talk about a transparency  
22 issue. You want to talk about mistrust. We are out

1 here bleeding our hearts out at 1:00 a.m., missing  
2 our families on the day of love. Well, it's over  
3 now, right? And you guys are literally so  
4 disrespectful -- not a general blanket. Some of you  
5 I can see haven't pulled a phone out.

6 But to sit here and watch and know that  
7 people are on there -- so there's a benefit of being  
8 young. I'm tech savvy enough to find out and notice  
9 how long people have been on here.

10 So we are out here asking you guys for  
11 something, and this is a slap in the face. This is  
12 literally exactly the problem. You guys are not  
13 listening. You are being disrespectful to your  
14 constituents.

15 So if you want to talk about issues,  
16 this is one of those. So hear your people, focus on  
17 your job. Some of you didn't get this because you  
18 wanted it. Some were gifted it. The rest of you  
19 ran for this.

20 And there are things that will have  
21 late nights, but respect us, because we, like you,  
22 love it here.

1                   And if I was in a position like you  
2 guys, you would never look to the boss, a leader of  
3 any organization, any town, to say, you know what,  
4 what meme is on Facebook?

5                   So this here is an issue. It's an  
6 issue beyond the data centers. It's an issue  
7 beyond, you know, power towers. It's an issue  
8 beyond planning. This is an issue of respect from  
9 us to y'all.

10                  And for the record, that's Montana  
11 Ruffner, Scott District.

12                  (Applause.)

13                  MAYOR NEVILL: Is there anyone else here who  
14 desires to speak on the issue this evening?

15                  MR. MOONEY: Mr. Mayor, I'd like to make one  
16 -- just one point of clarification.

17                  The couple that talked, she yielded her  
18 time. And in fairness, it is 1:00 or whatever it  
19 is. But I don't know if he also signed up. But he  
20 should also be given his chance if he did.

21                  UNIDENTIFIED SPEAKER: (Indiscernible).

22                  MR. CLOUGH: Sir, we can't hear you for the

1 record.

2 MR. BYFIELD: Good morning, again. I just  
3 want to say -- use this time here to say I hope my  
4 -- as I explain this, I hope my tone wasn't  
5 offensive. I didn't mean to be disrespectful at  
6 all.

7 I had a lot here, as you could see, to  
8 try to cram in, and having practiced this to fit it  
9 in in a certain amount of time. So I hope that no  
10 -- at no point my tone came across as disrespectful.

11 So I honestly appreciate all of your  
12 service to this community. As I've been watching  
13 for the past few months, I will -- I empathize with  
14 you. Let's just put it that way. I know these long  
15 days. I know the last meeting, same as this, 1:00  
16 in the morning.

17 So, thank you.

18 MAYOR NEVILL: Thank you, sir.

19 (Applause.)

20 MAYOR NEVILL: Do any other individuals wish  
21 to speak?

22 (No responses.)

1           MAYOR NEVILL: I'm hearing none. At 1:14  
2 a.m., we'll close the public hearing.

3           MR. HEROUX: Mr. Mayor.

4           MAYOR NEVILL: And turn the issue over to  
5 council.

6           MR. HEROUX: Mr. Mayor.

7           MR. SEMPLE: Mayor, may I be recognized?

8           MR. HEROUX: Mr. Mayor, I move the Town  
9 Council to adopt the following resolution for  
10 approval of SUP 2203, a resolution pursuant to  
11 Section 11-3.10 of the zoning ordinance of the Town  
12 of Warrenton for approval of the application for a  
13 special use permit 2203.

14           Whereas Warrenton, Virginia, herein  
15 after referred to as a town, is a municipal  
16 corporation located within the County of Fauquier;  
17 and whereas Amazon Data Services, Inc., the  
18 applicant, is requesting a special use permit  
19 approval on a parcel of land containing  
20 approximately 41.793 acres identified as GPIN  
21 698469-2419-000, located off Blackwell Road and Lee  
22 Highway in the town of Warrenton, and herein after

1 referred to as "the property."

2           And whereas the applicant has applied  
3 for a special use permit pursuant to section  
4 3-4.12.3 of the zoning ordinance to allow for  
5 approximately 220,000-square-foot data center to be  
6 located on the property here, herein after the  
7 special use permit.

8           And whereas the applicant requested  
9 waivers and modifications to increase the building  
10 height from 35 feet to 37 feet, increased the fence  
11 height from 6 feet to 8 feet, and decrease the  
12 parking loading space requirement from 22 spaces to  
13 one space.

14           And whereas pursuant to Section 11-3 of  
15 the zoning ordinance, upon petition of the applicant  
16 for approval of the special use permit, the Planning  
17 Commission upon advertisement and notice properly  
18 given pursuant to Section 15.2-2204 of the Virginia  
19 Code, held a public hearing on November 15th, 2022;  
20 November 22nd, 2022; and December 20th, 2022.

21           And whereas the Town Council received  
22 and considered the recommendation of the Planning

1 Commission for denial of the special use permit.

2                   And whereas the Town Council of the  
3 town of Warrenton held a public hearing on January  
4 10th, 2023, upon notice properly and duly given, and  
5 whereas the Town Council of the Town of Warrenton  
6 held an open -- the public hearing on January 10th,  
7 2023, to February 14th, 2023, upon notice properly  
8 and duly given.

9                   And whereas the Town Council has  
10 considered the issues and the applicant addressed  
11 the applicable factors listed in Section 11-3.10.3  
12 of the zoning ordinance for the town of Warrenton.

13                   And whereas the Town Council finds that  
14 the application meets the criteria for approval in  
15 the Town of Warrenton zoning ordinance, and that the  
16 application is consistent with the Town of  
17 Warrenton's comprehensive plan based on the analysis  
18 in the staff report.

19                   And whereas the Town Council, in  
20 consideration of all the foregoing, is of the  
21 opinion that the application for the special use  
22 permit be approved subject to certain conditions.

1                   Now, therefore, be it resolved that the  
2 Warrenton Town Council approves SUP 03 subject to  
3 the attached special use permit with conditions of  
4 approval, dated February 14th, 2023, and all  
5 documents referenced in the conditions of approval  
6 with requested waivers and modifications listed  
7 above.

8           MAYOR NEVILL: So moved by Councilman  
9 Heroux.

10           MR. HAMBY: Second.

11           MAYOR NEVILL: Seconded by Councilman Hamby.

12                   Turn it over to discussion to council.  
13 Start to my right, and ask Mr. Mooney.

14           MR. MOONEY: Do we go in order, Mr. Mayor,  
15 or...

16                   (Simultaneous speakers.)

17           MAYOR NEVILL: (Indiscernible.)

18           MR. MOONEY: Would you like to go?

19           MR. SEMPLE: Yes. Thank you.

20                   As I understand it, let me explain to  
21 you what I see is the prerogative we have as  
22 legislators up here on the dais.

1           The law, as I understand it, is that we  
2 are granted a presumption of validity in our  
3 decision.

4           Reasonableness of a legislative action.  
5 Legislative action is presumed to be reasonable.  
6 However, if the presumptive reasonableness of the  
7 action is challenged by probative evidence of  
8 unreasonableness, that challenge must be met by  
9 evidence of reasonableness, and the legislative  
10 action will be upheld if such evidence is sufficient  
11 to make the issue fairly debatable.

12           And that's the key phrase "fairly  
13 debatable."

14           The relevant question, however, is not  
15 who presented the greatest number of expert  
16 witnesses or even who won the battle of the experts,  
17 but rather whether there is any evidence in the  
18 record sufficiently probative to make a fairly  
19 debatable issue of a decision. The evidence must  
20 meet both quantitative and qualitative tests.

21           The town, however, is required to  
22 follow its own ordinances; and that's *Renkey v.*

1 County Board of Arlington County 2006.

2           There, in that decision, they  
3 determined that when the county rezoned a portion of  
4 the landowner's property from R5 to CR without  
5 complying with the eligibility requirement set out  
6 in its own ordinance requiring that a site must  
7 first be rezoned C3 before it could be rezoned CR,  
8 its action was arbitrary and capricious, therefore,  
9 rendering the rezoning void and of no effect.

10           The authorization section for the  
11 special use permits is found at Section 11.3-10.1  
12 under Article 11 of the town ordinance.

13           The relevant section states in part:  
14 Special use permits may be granted to establish or  
15 construct uses or structures which have the  
16 potential for a harmful impact upon the health,  
17 safety, and welfare of the public upon finding that  
18 the use with conditions will not have a deleterious  
19 impact and will reflect the spirit and intent of the  
20 comprehensive plan, as well as its ordinance.

21           In my opinion, if the town does not  
22 expressly follow the requirements of this section --

1 and even if it believes it does -- its decision  
2 could be construed as unauthorized and therefore  
3 null, void, and without effect.

4           The reason -- the question here is  
5 whether the decision reflects the spirit and intent  
6 of the comprehensive plan, and in my -- and could it  
7 be challenged with evidence of unreasonableness; and  
8 I don't believe any expert in the world would get up  
9 there who could sufficiently find sufficient --  
10 sufficient probative evidence where that application  
11 meets that requirement.

12           The second instance where the town  
13 violates its own ordinance can be found in Section  
14 11-3.10.2 under Article 11 of the town ordinance.

15           This section states 11-3.10.2,  
16 Application: Application for a special use permit  
17 shall be filed on the appropriate form, therefore as  
18 provided by the zoning administrator and in  
19 accordance with the instructions which accompany the  
20 form.

21           Special use permits shall contain the  
22 same information as required for zoning amendment

1 applications set forth in Section 11-3.9.

2           In addition, unless waived in part by  
3 the zoning administrator -- and that did not happen  
4 -- the application shall provide all of the  
5 information, data, and studies needed to allow the  
6 Planning Commission, and -- not "or" -- and the Town  
7 Council to reach conclusive evaluations.

8           Here the question is whether the  
9 requirements of the application have been met, or  
10 whether the information, data, and studies made  
11 available were sufficient to allow both the Planning  
12 Commission and the Town Council to reach conclusive  
13 evaluations.

14           At the very least, the Planning  
15 Commission, upon making its recommendation, declared  
16 that it had not received sufficient information to  
17 reach conclusive evaluations.

18           The Town Council further effectively  
19 denied the commission the opportunity to do so  
20 because it stated that irrespective of whether the  
21 commission made a recommendation or not, the town  
22 would take up the matter.

1 From the staff report, here's what the  
2 Planning Commission actually said. The Planning  
3 Commission recommended denial 311 -- Ainsworth  
4 against, Zarabi abstained -- to the Town Council  
5 based on the following reasons: Lack of information  
6 regarding noise. The information provided is  
7 insufficient to assure that when the facility is  
8 operational it will comply. And to enforce the  
9 notion we placed in the special use, our attorneys  
10 essentially said that this will end up in  
11 litigation.

12 I've see nothing since from a modeling  
13 -- from the applicant's own sound experts, which is  
14 a model, that contravenes this particular  
15 recommendation from the Planning Commission.

16 I mean, you can model it. They model  
17 it. As I said in the morning session, they modeled  
18 the Titanic. They just -- no one just expected an  
19 iceberg.

20 Lack of information regarding power.  
21 This is a particular bone that I wish to pick for  
22 me. We have nothing in writing. All we know is

1 that there's no longer a substation on their -- on  
2 their property. But the impact has to include the  
3 electrical impact, just as it includes  
4 transportation, just as it includes all the other  
5 impacts that are listed, and we must consider under  
6 the 31 criteria. And I will get into those.

7 I believe that it is important -- it  
8 behooves us to understand the overall impact of this  
9 of this application, and it doesn't matter whether  
10 it's on the property or not. We have traffic  
11 studies. We should be able to look at the power  
12 impact.

13 And, as I said this morning, this --  
14 Dominion has already proposed running -- it's taking  
15 a 30 -- I mean, a zero to 40 foot right of way right  
16 center line down Falmouth Street, up East Lee  
17 Street, right through Walker Drive.

18 And it affects not just my ward. It  
19 affects both Wards 1 and 3. And that's an impact  
20 that I just think is just intolerable. It sets a  
21 precedent. It will mean that in the future data  
22 centers can be built around any small, little town,

1 and they can just run these power lines wherever  
2 they want without any benefit at all to the  
3 residents. Not at all. Nothing. We get zero out  
4 of this.

5 So the third issue is tax  
6 justification. One of the things I have not heard  
7 from anybody on this dais is why we're doing this.

8 And the one -- I've heard a variety of  
9 reasons. I mean, there's some secret federal  
10 client, or that if we don't do it, they'll take over  
11 and somehow or other assert the supremacy clause and  
12 we can't have any bearing on it.

13 But the biggest reason is revenue.  
14 Now, I heard this morning they're not going to build  
15 thing out for seven years, and the revenue  
16 depreciates. And they could -- they don't have to,  
17 they may not, but they could ask for a three-year  
18 incentive where they don't have to do anything at  
19 all.

20 And then, what's the fourth problem?  
21 What if there's litigation? I mean, they may want  
22 to go ahead and just continue on in face of all

1 that. But what you're seeing is a huge delay in  
2 whatever revenue there will be.

3 But the second point is, is that based  
4 on our own ordinance, that revenue must be  
5 consistent with the comprehensive plan. It says so  
6 under 17. And I'll get right to it.

7 It is 17 under -- excuse me while I'm  
8 looking it up -- under the 31 steps of evaluation:  
9 Whether the proposed special use will provide  
10 desired employment and enlarge the tax base by  
11 encouraging economic development activities  
12 consistent with the comprehensive plan.

13 That's not -- that's unavoidable. You  
14 have to see whether -- that economic development.

15 So let's go to the comprehensive plan.  
16 Somebody asked, well, has anybody looked at the  
17 comprehensive plan? I have. And, in fact, I have  
18 three volumes like this about the comprehensive plan  
19 that I prepared when we looked at this back -- way  
20 back when, the same night we initiated this  
21 amendment. We initiated the same night we adopted  
22 this. We had every opportunity to put data centers

1 into this plan. And did we? No. The fact is  
2 there's one mention of data centers, and that's only  
3 in one of the character districts, and it recommends  
4 that they shouldn't have it because it would require  
5 too much power.

6 But now let's just see what's in the  
7 comprehensive plan. The future land use  
8 descriptions --

9 MAYOR NEVILL: (Indiscernible.)

10 MR. SEMPLE: Excuse me?

11 MAYOR NEVILL: You have a minute remaining.

12 MR. SEMPLE: A minute?

13 MAYOR NEVILL: Yes.

14 MR. SEMPLE: Okay. I have one minute. I'm  
15 being timed. Okay.

16 I'll tell you right here, all you have  
17 to do is look through this and you will see, through  
18 the design characteristics -- and I can't read all  
19 this off in a minute, but the fact is New Town is  
20 not designed for a data center. It's designed for  
21 everything but.

22 It's a mixed used,

1 high-intensely-economic development involving all  
2 kinds of various benefits to our town, and this data  
3 center will not.

4 Thank you.

5 (Applause.)

6 MAYOR NEVILL: Councilman Mooney.

7 MR. MOONEY: My question -- my question is  
8 for Mr. Crim. We're timed? We have a time to -- we  
9 have a timed response for this?

10 MAYOR NEVILL: Robert's Rules affords each  
11 member ten minutes for each time. There's two  
12 options to speak, and ten minutes towards each time.

13 MR. SEMPLE: Point of order. Will we be  
14 able to speak twice?

15 MAYOR NEVILL: Yes. Yes, sir.

16 MR. MOONEY: Good evening. Mr. Mayor,  
17 colleagues, and citizens. Thank you all for being  
18 here at 1:30 in the morning once again.

19 I've written this out -- I've written  
20 out this formal statement here because I'm so  
21 frustrated and upset, and I'm seriously concerned  
22 about saying something inappropriate in my remarks.

1           First, I'd like to say that there's  
2 probably some of you out there who at some point  
3 will not be very happy with me on one condition or  
4 another. I'm sure of it. I'm human and you're  
5 human, so I'm sure.

6           Second, I'm a Marine, and I'm proud of  
7 it. We have a way of getting things done and are  
8 literally famous for getting things done. Our  
9 beloved country has sent Marines to get things done  
10 for nearly 250 years. And when we go, we take -- we  
11 take hard the responsibility of being true to those  
12 who sent us.

13           It is said of Marines that we are the  
14 few and the proud. We are both. Our motto, as you  
15 all know, is Semper Fidelis. Always Faithful.  
16 Faithful to one another, and to those who send us to  
17 get things done. There's no better company than a  
18 Marine when you're outnumbered and facing something  
19 daunting and unpleasant.

20           I want to be clear that I deeply  
21 respect and appreciate the colleagues I'm honored to  
22 have joining me in opposition to this application.

1           Mr. McGuire and I are new members of  
2 this council, still relatively fresh off the  
3 election and door knocking and listening to the  
4 people of this town in every single ward. We are  
5 the two councilman who represent every citizen in  
6 the Town of Warrenton.

7           These good people are the ones who sent  
8 me, who sent us. They sent all of us here to get  
9 things done for them. And this is -- and they did  
10 not send me here, nor us, to participate in  
11 evasiveness or an irregular process, nor to advance  
12 dubious initiatives that are opposed overwhelmingly  
13 by those who sent us under this big dark cloud.

14           Of note for claiming -- and some of  
15 these thoughts have already been said, but I'm going  
16 to say them again for the record: Claiming a silent  
17 majority in favor of the Amazon application, I tell  
18 you there is no such thing. Look out there and see  
19 part of the vocal majority that opposes it on  
20 Valentine's Day plus. Valentine's Day and some  
21 hours.

22           It pains me to admit that I've joined a

1 town leadership that has lost completely the trust  
2 of its citizens. It pains me even more to  
3 acknowledge that I fully understand how that trust  
4 was lost.

5 For the last 18 months, Warrenton  
6 government has behaved, in part of the time, as if  
7 ignoring the citizens. And at other times it's like  
8 we're at war with the citizens.

9 So many appearances -- and I say  
10 "appearances" -- of impropriety without concern for  
11 the message that those send to the people that  
12 elected us -- or got appointed. So many dismissive  
13 and impolite comments made when the public  
14 righteously complains.

15 There's much about this to complain  
16 about from the former manager leading Amazon through  
17 this process and then acquiring this great job  
18 afterwards, and yet the council never undertook an  
19 independent investigation which remains a critical  
20 un-taken step in reassuring the public, not --  
21 reassuring the public, not because, you know, she's  
22 gone, but because Amazon remains.

1                   And they wish to become -- they wish to  
2 become the most visible corporate citizen in  
3 Warrenton. They're used to getting their way.

4                   And what is "their way"? You know, if  
5 that's to get what they want including potentially  
6 through, you know, improperly influencing employees,  
7 we all have a right to know who we are inviting into  
8 our town as a great neighbor.

9                   When citizen groups try to obtain the  
10 correspondence the ex-manager exchanged with Amazon  
11 during that period, the citizens were blocked to the  
12 point that the town went to court to prevent anyone  
13 from seeing what the email traffic said.

14                   And when the judge, who made a ruling  
15 defining the "or" to mean "and" and caused the town  
16 to prevail on executive privilege, the town  
17 leadership celebrated the successful continued  
18 hiding of the truth from the public and town  
19 officials, and said it was a victory for the  
20 citizens.

21                   And the final touch of bizarre and  
22 interesting, when Councilmen Semple and McGuire and

1 I asked to see the same correspondence in a  
2 controlled environment on a computer in Town Hall,  
3 we were blocked from the -- from this by the town  
4 staff and leadership, to which I just tried to get a  
5 vote to see before we got to make this vote, and got  
6 rejected.

7 Why? While this executive privilege is  
8 asserted against the public, it cannot be raised  
9 against us. We are members of the elected  
10 government.

11 The last I checked, the town manager  
12 and town attorney, who are both employees, are  
13 elected -- is not an elected official [sic] -- the  
14 town attorney and manager, who are both employees --  
15 neither of them are elected officials as the three  
16 of us are. Neither of them have a vote in this  
17 critical application before us for the most  
18 consequential decision in this town's history, and  
19 possibly ever will have.

20 Yet they have arranged to see the  
21 emails as if it's like we cannot even -- we -- even  
22 though we have the responsibility to govern the town

1 and keep it out of trouble. We have the  
2 responsibility to govern the town and keep it out of  
3 trouble.

4 This withheld material could shed  
5 critical light onto what is now taking place  
6 frequently seemingly in the dark. And these  
7 situations continue.

8 Meetings with some of my colleagues  
9 with Amazon -- and some of those meetings even just  
10 the day before our big January public hearing and  
11 right after -- collaboration from some of our  
12 colleagues with no participation from town staff or  
13 town attorney present crafting the positions, the  
14 conditions that Amazon -- in ways they are subject  
15 to nearly everyone now observing [sic]. And these  
16 conditions that Amazon had a month to review after  
17 our last session, I had three hours to review before  
18 this.

19 These are conditions. In a business  
20 deal, in the Marine Corps, you would be fired giving  
21 that much time. It's embarrassing.

22 One of the colleagues is a professional

1 in the same industry shared by Amazon and data  
2 centers -- has been called out by many people  
3 tonight giving the appearance -- the appearance --  
4 whether it's actual or not, our town code of ethics  
5 requires us on council to avoid even the appearance  
6 of impropriety. The appearance.

7 So I call on this colleague to recuse  
8 himself from this vote only --

9 (Applause.)

10 MR. MOONEY: -- in my opinion -- in my  
11 opinion, to give the public -- to give the public  
12 back some small, small part of the confidence that  
13 it has lost in us. But it appears he intends to  
14 stand behind the opinion of the town attorney who  
15 kept the emails from elected officials without a  
16 majority vote.

17 There is much wrong in this  
18 application, with this application's path to  
19 process. My colleague, Mr. Semple, has done an  
20 admirable job listing these issues -- an admirable  
21 job. I thank him and endorse him.

22 How much time do I have left?

1 First, although it is important --  
2 first, although it is the most important thing,  
3 there seemed to always be some (indiscernible)  
4 seemed to always lose sight of the fact that an SUP  
5 application, the most important consideration is  
6 preventing undesirable outcomes for those living  
7 near the impacted locations, my constituents, as an  
8 at-large member. This means full mitigation of the  
9 problems that come with the permitted use.

10 Because the applicant has no right only  
11 to ask for it -- no right for the permit, only ask  
12 for it.

13 So where there will be noise and  
14 vibration, it must be at a level that is in -- at an  
15 impact the citizens will find acceptable, and this  
16 level must be with certainty before the noise and  
17 vibration begin.

18 I reached out and had a meeting with a  
19 technical expertise [sic] to go over this noise  
20 study because we received no briefing until today,  
21 this morning, when I asked for it. And it was not  
22 given to me by the staff. It was given to me by the

1 applicant without an independent sound study. A  
2 month ago we were handed this complex noise study,  
3 as I stated earlier, on the day we were supposed to  
4 vote for the application.

5 And I'm ashamed and embarrassed to  
6 acknowledge that some of my colleagues were prepared  
7 to vote on this application then without even  
8 reading the study, let alone understanding it.

9 And of note, today, we found out that  
10 the equipment used in the noise study that the  
11 Planning Commission didn't even get to hear may not  
12 even be the same equipment that's used on the data  
13 center.

14 For this SUP, it is also additionally  
15 required that the permanent use be in accordance  
16 with the comp plan. Yes, the comp plan that the  
17 citizens, the town, experts, everybody in the local  
18 community worked for three years -- nearly three  
19 years to complete, which did not -- which did not  
20 contemplate data centers, as Mr. Semple already  
21 said.

22 We know that some pretend to ignore

1 this application is not in accordance with the comp  
2 plan and doesn't advance the comp plan and  
3 objectives and doesn't further the vision. The same  
4 night -- what we don't know is why or how it worked  
5 out which is why we will -- we will see the email  
6 correspondence one way or another.

7 And I ask my colleagues in all  
8 sincerity: Don't you want to see those before an  
9 embarrassing vote again? A vote where you could  
10 betray your constituents' happiness and destroy the  
11 tranquility of our community all for the allure of a  
12 tax that would equal only about 3 percent of our  
13 budget or maybe -- because we don't even have an  
14 economic impact study by the applicant.

15 I also believe that we have spent  
16 probably the first year of revenue that we would  
17 make figuring this whole thing out.

18 And I will come back to my time later.

19 MAYOR NEVILL: Councilman Hamby.

20 MR. HAMBY: I'm going to switch gears. This  
21 certainly is a great town. It always has been. But  
22 one of the things about this town is every few years

1 or generations it rips itself apart.

2 I understand -- I certainly heard both  
3 sides all the time in-person, videos, walking down  
4 the street. People ask from time to time, and more  
5 often than not: Why another auto parts store? Why  
6 another fast food restaurant?

7 A lot of it is, this is why. We tear  
8 ourselves apart every time an economic development  
9 issue comes about, Walmart, Home Depot. It's the  
10 same thing. It ruins friendships. It makes people  
11 mad. We go into just a spin. I do understand.

12 This is an economic development  
13 opportunity on a piece of land. I've heard  
14 everything from the town annexed the land into town  
15 after Amazon came. It's not true. It's been in  
16 town since 1960. We did not zone it industrial.  
17 It's been zoned industrial for decades.

18 I've seen a turnstile of applicants go  
19 through. Walmart has tried. Costco has tried.  
20 Target has tried. There's been talk of satellite  
21 colleges over the years. Residential. Everything  
22 has been tried there. And I even pulled some stuff

1 out from the old archives. We've tried several  
2 times. We've tried multi-families. We've tried  
3 everything else. I even got the thing from  
4 Ms. Schaeffer, the Warrenton Green, that they tried  
5 '07, '09-ish when that was. But even then it didn't  
6 work.

7 And one of the big problems with the  
8 Blackwell Road site is transportation. So when they  
9 ran all the presentation back in the day for the  
10 Warrenton Green spot, they had 29 access. There is  
11 no 29 access now. But Blackwell Road is the only  
12 thing that VDOT will allow in and out.

13 So all this has morphed. You know,  
14 it's turned into -- it's turned into mortal combat.  
15 It just happens. I get it. Everybody's really  
16 charged up and everybody feels the way that they  
17 feel about their side.

18 When it goes down to -- you know, even  
19 the wire factory comes in. There's nothing proposed  
20 on the wire factory. I get it. But when Orchard  
21 Ridge came through and they were going to put  
22 housing on the wire factory, same thing: Turned

1 down. And even the stuff for the -- I'll just call  
2 it the new Warrenton Green proposal.

3           Look, I understand it. If you don't  
4 want a data center, I understand. I hear your  
5 opinion. But some of the stuff that's on there,  
6 like, they're proposing a grocery store possibly.  
7 I'm pretty sure that some of the groups have opposed  
8 the grocery store that's proposed at 605. They're  
9 proposing housing on it. Do they suggest that the  
10 town goes into an unmanned -- or unchecked mandate  
11 for a new school seats? And the satellite college  
12 is back again.

13           I think that the county has done a very  
14 good job at Laurel Ridge. They just built the tech  
15 building, and now we can think about putting a  
16 different college on a different end of town.

17           But in the end, the town did not sell  
18 property to Amazon. That was a private transaction.  
19 The town does not own the property now. The  
20 application before us is for a data center.

21           And I understand how people feel.  
22 Believe me. I've been hearing it for months. We've

1 had stuff like this before, and I understand. And

2 it will continue. I understand. Hang on here.

3 UNIDENTIFIED SPEAKER: (Indiscernible.)

4 MAYOR NEVILL: Excuse me?

5 UNIDENTIFIED SPEAKER: (Indiscernible.)

6 MR. HAMBY: I understand.

7 UNIDENTIFIED SPEAKER: (Indiscernible.)

8 MR. HAMBY: But at the --

9 UNIDENTIFIED SPEAKER: (Indiscernible)

10 comprehensive plan.

11 MAYOR NEVILL: Excuse me. The councilman  
12 has the floor, please.

13 MR. HAMBY: But --

14 UNIDENTIFIED SPEAKER: (Indiscernible).

15 MAYOR NEVILL: The councilman has the floor,  
16 please.

17 MR. HAMBY: The pros.

18 UNIDENTIFIED SPEAKER: There's no pros  
19 (indiscernible).

20 MAYOR NEVILL: The councilman has the floor,  
21 please.

22 UNIDENTIFIED SPEAKER: (Indiscernible).

1           MAYOR NEVILL: The councilman has the floor,  
2 please.

3           UNIDENTIFIED SPEAKER: I don't care.

4           MR. HAMBY: Okay.

5           UNIDENTIFIED SPEAKER: (Indiscernible.)

6           MR. HAMBY: Okay. Well, lets go the other  
7 way, right.  
8           Vint Hill. Vint Hill OVH data center  
9 sits in the middle of Vint Hill. People have been  
10 coming up here to town, Warrenton, talking about  
11 data centers.

12           Now, I have enjoyed going to Old Bust  
13 Head a lot, right, over the years, My beverage has  
14 never vibrated off the table, and I've always been  
15 able to have a conversation, yet the data center is  
16 right out back, right? Right across the street.

17           The housing at Vint Hill backs up to  
18 OVH right across the street.

19           UNIDENTIFIED SPEAKER: (Indiscernible).

20           MAYOR NEVILL: Excuse me, please.

21           MR. HAMBY: I understand. Hold on.

22           UNIDENTIFIED SPEAKER: (Indiscernible).

1 MR. HAMBY: Hold on.

2 UNIDENTIFIED SPEAKER: (Indiscernible).

3 MR. HAMBY: Okay. And then if OVH does  
4 expand as is going around, right, how could they  
5 build it across the street from the Portland VA  
6 Hospital? If data centers are so bad, how could  
7 they build -- the state, the local, and the federal  
8 government proposed to build across the street.

9 UNIDENTIFIED SPEAKER: (Indiscernible).

10 MR. HAMBY: Okay. Okay. Maybe they don't  
11 care.

12 So pros: There's no traffic at a data  
13 center. Pros: There's no school seats at a data  
14 center. Pros: There's not a lot of services  
15 involved in the data center.

16 UNIDENTIFIED SPEAKER: (Indiscernible).

17 MR. HAMBY: The benefits are tax money  
18 generated. So whether it's \$800,000 or whether it's  
19 \$1.4 million -- I've heard both, we've asked  
20 Mr. Maybach, I think, twice. He's given us  
21 estimates twice. I think it's \$2.3 million to the  
22 county. In between 800- and \$1.2 million to the

1 town per year.

2 UNIDENTIFIED SPEAKER: (Indiscernible).

3 MR. HAMBY: Okay. I'll -- go ahead. I'll  
4 -- you can move on.

5 MAYOR NEVILL: Excuse me. Please be  
6 respectful. The Councilmen have the time to speak  
7 during the discussion.

8 Councilmen -- or Vice Mayor Hartman.

9 MR. HARTMAN: Okay. I'm just going to keep  
10 this simple and short and sweet.

11 I feel that the -- I have all the  
12 information that I need, and that the application  
13 does meet the criteria for approval in the town  
14 zoning ordinance; and that the applicant is -- the  
15 application is consistent with the Town of  
16 Warrenton's comprehensive plan in spirit and intent  
17 based on staff analysis.

18 I feel that the applicant has met the  
19 SUP requirements. As simple as that. And has  
20 answered questions that were perhaps unanswered --  
21 felt unanswered by the Planning Commission.

22 And quite simply, like it or not, the

1 applicant owns the land, and this is an SUP before  
2 us regarding that, and they have presented the  
3 application for SUP consideration. And I believe  
4 that they have met the requirements. So I have all  
5 the information that I need to make my reasonable  
6 and informed opinion.

7 Thank you.

8 MAYOR NEVILL: Thank you, sir.

9 Councilwoman Sutphin, I'm sorry. I  
10 overlooked you.

11 Councilwoman Sutphin.

12 MS. SUTPHIN: Hello. Yes, I'm here. Let me  
13 -- I actually wrote a few things down myself.

14 So sitting here I actually did get an  
15 email from someone, and it said it perfectly.

16 Many years ago I regularly attended  
17 budget hearings. My interest was the school system.  
18 Many people spoke on behalf of the schools. At the  
19 end of the hearing, the late John Adams, who was  
20 chairman of the board of supervisors would say he  
21 appreciated everyone who attended, but there were  
22 many, many, many more citizens who couldn't or

1 didn't attend for one reason or another, and he had  
2 to represent them as well.

3 I can't agree with this more. I have  
4 heard so many. And you know what, their names don't  
5 even matter. I don't need to prove. I know in my  
6 heart. I've had emails, messages, phone calls from  
7 people expressing they're scared or intimidated to  
8 come to these meetings because of the way they see  
9 people treated.

10 We had several people today who were in  
11 support, and they got disrespected. So what makes  
12 people feel that they're going to be okay coming in  
13 and expressing their opinions?

14 When I took an oath, I represent all of  
15 Warrenton and all of my ward. I have neighbors who  
16 agree. I feel like I've gotten all the information.  
17 I feel that Amazon has bent over backwards to try to  
18 meet our demands. We owe them respect just like we  
19 owe every one of the other businesses respect.

20 So thank you for giving me the time,  
21 but I feel like that's about all I need to say. And  
22 I respect each and every one of my fellow councilman

1 for their opinions.

2                   And I totally agree with everything  
3 that Councilman Hamby said. This happens. But I  
4 love my town. I love my community. And I'm going  
5 to do what I feel is best in my heart.

6                   So, thank you.

7                   MAYOR NEVILL: Thank you, Councilwoman.

8                   Councilman Heroux.

9                   Please, we've asked -- please keep the  
10 order and allow the councilmembers to speak.

11                   MR. HEROUX: Thank you, Mr. Mayor.

12                   I've done a lot of research on this, so  
13 please bear with me here.

14                   I want to start with property rights  
15 and use. This land has been part of Warrenton since  
16 1960. For 63 years, owners of this land -- I think  
17 there were various ones -- had opportunities to  
18 develop it. It has been zoned for industrial for  
19 decades. I have a map that shows industrial in  
20 1970.

21                   To my knowledge, no one has requested  
22 that the land be brought into any kind of

1 conservation easement. Well, I think that's  
2 unallowable in a service district of which Warrenton  
3 is.

4 But as someone said earlier, we've  
5 made, I think, remarkable achievements in the  
6 town -- or, I'm sorry, in the county where a  
7 significant part of our county, like 26, 30 percent  
8 is actually under conservation easement. Which is a  
9 good thing, but this land has particularly remained  
10 vacant for decades.

11 We all know that a text amendment to  
12 change the industrial zoning to allow data centers  
13 was approved in 2021. Four members of this Council  
14 that are here tonight voted for it. Three members  
15 who are not here -- you know, are not part of this  
16 council anymore, they also approved it. That text  
17 amendment was unanimous to allow data centers by SUP  
18 on all Warrenton industrially-zoned land.

19 And I say "by SUP" as opposed to  
20 by-right, which in Fauquier County there are use  
21 cases where you can do it by-right. You won't have  
22 a hearing. And we did that to be able to work with

1 applicants to get the right situation and use cases  
2 for the citizens.

3           And even prior town councils before  
4 this council have talked about data centers on that  
5 land. The prior owner of this land legally and  
6 within all their rights sold the land. The legal  
7 title that Amazon purchased identified the land as  
8 industrial zone. It didn't say New Town District.  
9 It said industrial.

10           The land was sold in a private sale  
11 transaction. The town did not own this land, and  
12 the town is not in the business of approving land  
13 purchases and picking winners and losers. This is  
14 not communist China. In this country we approve and  
15 encourage private property ownership which many of  
16 us here benefit from; and property rights. And we  
17 rely on the private sector to bring jobs and  
18 opportunity to town.

19           Now, let's talk about (indiscernible)  
20 zone land use. This SUP brings to use -- use to  
21 this land that's really done not so much for us for  
22 a very long time. But it more importantly

1 eliminates the risk of other by-right uses on this  
2 land that can cause much greater negative impact to  
3 the town.

4           In particular, it could be a crematory.  
5 It could be a frat house, a sorority house. All  
6 sorts of uses around -- mechanical uses. And  
7 particular to this -- to this applicant, a  
8 distribution center. By-right. Okay. Trucks  
9 rolling out of there 24 hours a day. It brings --  
10 by-right. It doesn't come to vote. It happens.

11           It brings a land use type that does not  
12 bring additional cost to the town. We've talked  
13 about rooftops and how they -- you know, school  
14 buses and schools. Nothing wrong with rooftops, but  
15 that is a cost.

16           It doesn't put a lot of demand on town  
17 services, like our police, fire, and water. For  
18 example, we have a car wash in town that uses 3  
19 million gallons of water from the town a year.

20           This SUP does not create a traffic and  
21 parking problem for the town. As Councilman Hamby  
22 pointed out, the only access to this property is on

1 Blackwell Road. VDOT has denied any actions or any  
2 planning to make it off of 15 or 17. It's  
3 inaccessible.

4 The SUP develops land that's supposed  
5 to be urban and dense, okay. I mentioned earlier  
6 Warrenton is a service district. We are supposed to  
7 be residential, commercial, and industrial dense.  
8 That's why we have a service district. And that is  
9 done so the remainder of the county can remain  
10 rural, as I think we're doing a good job doing.

11 The SUP does not ruin a commercial --  
12 or, I'm sorry, a rural and historic entrance to the  
13 town. The entrance to the town is commercial.

14 We have great partners with Country  
15 Chevrolet and Sheetz and CVS and the Hampton Inn.  
16 They employ our citizens. They pay taxes.

17 There's over 300 lights -- I counted  
18 them -- of all types at night as you enter the Town  
19 of Warrenton. That's not rural. It's busy and it's  
20 loud, as we talked about today at the -- at the  
21 hearing.

22 Let's talk about the comprehensive

1 plan. And I've read it. There's 246 goals, 28 with  
2 historic resources; 29 -- or 49 with community  
3 facilities; 21 with housing; 21 office space, parks  
4 and environment; 44 were transportation circulation;  
5 28 with economic and fiscal resilience; and 55 with  
6 land use.

7 There are at least five areas in the  
8 economic area alone that align with the  
9 comprehensive plan. I encourage you to read it.

10 Let's talk about the character  
11 districts. The (indiscernible) property falls into  
12 a character district referred to in the  
13 comprehensive plan as the New Town District. And  
14 New Town, again, is mixed use, large lots, etc.

15 Nothing in the comprehensive plan  
16 rezoned the AWS property from its current legal land  
17 use of industrial to some other use. That didn't  
18 happen.

19 The rough estimate of New Town District  
20 total acreage, my estimate -- don't take this to the  
21 bank -- is about 137 acres. The AWS property is 41  
22 acres. That's about 30 percent. That means 70% of

1 the land that's in the New Town District is still  
2 available for development.

3 I know a speaker came up here and said  
4 there's some great ideas. I look forward to hearing  
5 those. There's already an idea being worked through  
6 the town for an apartment complex so -- in the New  
7 Town District. So there's plenty of land left in  
8 New Town District to go there and do what we want to  
9 achieve consistent with the plan.

10 I won't go into the details here. You  
11 know, again, the staff report, I think, does a good  
12 job. We've got no issues on fire safety. I think  
13 we made enormous progress on the noise with the  
14 conditions that the applicant did agree to.

15 Lighting, again, they're going to  
16 reduce it at night by 50 percent. That's an  
17 ordinance requirement. And, again, I counted 300  
18 lights in the entrance to town. That is not rural.

19 Location and footprint. I mean, you  
20 know, it is in a -- again, it shows the  
21 documentation that they've submitted. I hope you've  
22 all looked at the new elevation drawings they

1 showed. Amazon made an attempt here, I think, to  
2 blend the architecture a little bit more naturally  
3 with what we have here. They're doubling up the  
4 landscaping to put more trees in there to hide it;  
5 and, again, do more prevention on the sound.

6           The timing and phasing was described.  
7 And I know from the traffic perspective, anytime you  
8 have construction, there's going to be traffic. But  
9 most of that, according to the last testimony,  
10 should happen during any of the excavation and then  
11 when the powered shell is done, okay. That's done  
12 in about 12 to -- about 12 months, I believe.  
13 Construction traffic should decrease.

14           I mentioned about road improvements.  
15 VDOT has said no road improvements. The only access  
16 here is Blackwell Road. Imagine some high usage,  
17 high density instance in that property and the  
18 traffic nightmare that it would create at Blackwell  
19 Road.

20           Talked about water and town resources.  
21 Again, the initial load into the -- into the Amazon  
22 data center is about 190,000 gallons. Compare that

1 to the wharf: 435,000 gallons is what's needed to  
2 run the wharf.

3 We got a lot of better (indiscernible)  
4 use cases there with the hospital needing 15 million  
5 gallons, warrenton Training Center uses 4.7 million  
6 gallons, and we got a laundromat that uses about  
7 2.7.

8 Let's talk about jobs. Okay. I've  
9 heard a lot of people scoff at 52 jobs. Now, I'll  
10 tell you from a personal experience, my father --  
11 when I was in high school, my father lost his job.  
12 We almost lost our house and everything. We would  
13 have been happy with one job, let alone 52.

14 52 jobs at the -- at the salaries that  
15 Amazon has described here is about \$6.9 million of  
16 annual payroll into town. This property has never  
17 generated \$6.9 million of annual payroll.

18 It creates 52 jobs that perhaps some of  
19 our residents who are commuting into Loudoun County  
20 and Prince William County -- they can stay -- they  
21 can work in town. They can be home with their  
22 families at night. They can have dinner with their

1 families.

2 I'm going to tell you that vacant  
3 (indiscernible) land only means -- sorry -- only  
4 means three things. When you see vacant  
5 industrially-zoned land, it means it's not meeting  
6 the potential to create opportunities for our  
7 citizens. The citizens are carrying way too much of  
8 a tax burden, and we're waiting for the next best  
9 thing that comes around.

10 I'll hold my comments here, Mr. Mayor,  
11 so others can speak.

12 MAYOR NEVILL: Councilman McGuire.

13 MR. MCGUIRE: Thank you, Mayor. I want to  
14 thank everyone for coming out tonight.

15 Democracy is very important to me. My  
16 father and all my uncles fought in World War 2.  
17 They were wounded. I had an uncle that was a  
18 prisoner of war. I also served in Iraq and  
19 Afghanistan.

20 I think it's important that we listen  
21 to our citizens because otherwise we come -- become  
22 the oppressive government.

1           A lot of people do not want this.  
2 People are up here talking about economic benefit  
3 and everything else. We don't see the second and  
4 third order effects of this. You know, this is  
5 going to open up the floodgates to proliferation of  
6 more of these data centers.

7           And there's all this information that  
8 has been withheld from us. It's a question of, do  
9 we have, like, open and honest government? Do we  
10 have transparency?

11           I mean, I never thought I would ask --  
12 sit on a dais as an elected official and ask to see  
13 information to make a vote and then be denied by my  
14 colleagues. I mean, that's -- that's unthinkable.

15           (Applause.)

16           MR. MCGUIRE: If it's open and honest,  
17 then -- and there's nothing wrong, then it should be  
18 seen. That's the rule I grew up with.

19           So I question a lot of this. And  
20 that's going to be a lasting effect for everybody on  
21 this dais that votes for this. They own this vote.  
22 They've already voted to deny us information about

1 it. I think that's atrocious.

2 But, also, I think you have to look at  
3 the noise ordinance and things like that. And today  
4 during the work session Deputy Chief Carter got up  
5 there and explained that basically if there's noise  
6 complaint, a good police officer goes out there and  
7 listens with their good ears -- and nothing against  
8 the police. I was the police for many years -- a  
9 police officer for many years. And they determine  
10 whether or not it's offensive or not.

11 I can't imagine that we're not in the  
12 21st century leveraging technology to do  
13 enforcement.

14 So basically just on the appearance of  
15 that alone, and by the fact that we're not going to  
16 go with technology, it's a wash. You know, that's  
17 like looking at somebody and saying they're speeding  
18 or not. If we don't use technology, you know  
19 basically what they're telling you good citizens is  
20 your complaints mean nothing. They don't want to  
21 listen to you.

22 You're going to complain and basically

1 it's going to go nowhere, and I just -- I think  
2 that's atrocious. It's appalling that we would not,  
3 like, change our noise ordinance to reflect the use  
4 of technology.

5           And this is a rush. I don't know why.  
6 It's like Councilman Mooney mentioned, we received  
7 the noise study. We don't have enough time to read  
8 it. I'm not a scientist. I suggest the council  
9 actually hires an independent sound study and we  
10 look at this thing.

11           You know, there's other sources of  
12 revenue.

13           And I'm also -- you know, a lot of  
14 people don't know my background. I'm from Chicago;  
15 that's the land of corruption. The land of  
16 corruption. I'm here in Virginia for a reason.

17           I want to tell you one thing: I've  
18 never been in a government body where good citizens  
19 have said "raise my taxes so I can keep the town I  
20 have." That speaks volumes. Volumes. And you know  
21 what, you will be heard. This fight is not over.  
22 This fight is not over. Trust me on that.

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22

(Applause.)

MAYOR NEVILL: Council members are afforded a second time to speak during discussion. I will turn it over to Councilman Semple who led us off.

MR. SEMPLE: Again?

MAYOR NEVILL: You have your second opportunity, sir.

MR. SEMPLE: Thank you. Turn this on. Bring it over here.

Okay. I listened to Mr. Heroux, and --

UNIDENTIFIED SPEAKER: (Indiscernible).

MR. SEMPLE: Excuse me?

UNIDENTIFIED SPEAKER: (Indiscernible).

MR. SEMPLE: No, please.

MAYOR NEVILL: Councilman Semple has the floor. Point of order.

MS. BOENISH: (Indiscernible).

MAYOR NEVILL: Councilman Semple has the floor. The motion --

MS. BOENISH: (Indiscernible.)

MAYOR NEVILL: No, I'm sorry. Ms. Boenish, I'm sorry.

1 MR. SEMPLE: Please.

2 MAYOR NEVILL: Councilman Semple has the  
3 floor.

4 MS. BOENISH: (Indiscernible).

5 MAYOR NEVILL: Ms. Boenish. All right.  
6 I'll reset your time, Mr. Semple.

7 MR. SEMPLE: Thank you.

8 Mr. Heroux makes much of the fact that  
9 the property has been around in our -- within the  
10 town limits since 1960. I guess it has technically  
11 been around since the Ice Age, and it's been used  
12 for agricultural purposes which I guess is a  
13 non-conforming use. But, gee, someone said, what's  
14 wrong with that?

15 Nina Weissberg attempted to create  
16 Warrenton Green, which was approved, during --  
17 around 2007-2006 era; and she was very excited about  
18 it. And it was a mixed-use development. But she  
19 ran into the recession.

20 She also, when we approved the  
21 comprehensive plan, hardily endorsed New Town and  
22 70-foot apartment buildings she hoped one day she

1 could build.

2 Yes, it's true that at some point the  
3 town did consider a data center back in 2011, but I  
4 can tell you right now, they thought it was -- it  
5 didn't happen. And they thought a large data center  
6 would take up too much power.

7 So it doesn't matter. This is a  
8 special use permit. This means it has -- and the  
9 criteria, I have not heard anything from my fellow  
10 councilman that I would say that would rise to the  
11 fairly debatable level to approve this thing.

12 That is, I can't see anything in  
13 anything they've said so far that in my opinion  
14 would justify this opinion under the law and under  
15 this.

16 Now, I have prepared, and I distributed  
17 to Council, a 44-page document. Now, I only started  
18 this early -- when I finally was able to get some of  
19 the latest details in the noise ordinance. And  
20 speaking of that, I'll talk about that in a second.  
21 Circulated it around, and it's on the record.

22 50 jobs, that's great. But, you know;

1 let's just -- this is hypothetical. Hypothetical  
2 what they can do -- what other uses for the property  
3 is really not one of the criteria in the ordinance.

4 We must rely on the ordinance itself to  
5 define how a special use permit is decided; and  
6 we're not doing that.

7 I looked up -- just as a lark, I looked  
8 up what the traffic would be for a fulfillment  
9 center. And it's a fairly massive looking building.  
10 And a fulfillment center, it showed a traffic study  
11 of 3,600 cars additional per day, and it would  
12 create not 50 jobs, but a thousand jobs. A thousand  
13 jobs.

14 So if we're making comparisons to  
15 potential uses, a fulfillment center may be just the  
16 ideal thing. Because that traffic use was one-third  
17 of the traffic use that would have been created by  
18 Walker Drive. And you looked at the (indiscernible)  
19 report, it was one-fifth the traffic use, and yet  
20 this Town Council approved that application.

21 And here's a case, by the way, where  
22 Amazon wherein that Walker Drive application the

1 applicants were willing to contribute towards  
2 amelioration. There were three traffic circles.  
3 They were going to contribute \$400,000. \$300,000 at  
4 traffic -- right in front of Hidden Creek Lane.  
5 This applicant is going to contribute money, yes, to  
6 Dominion so that it can build distribution lines  
7 through our ward. That, to me, is key difference.  
8 So among other things, I just want to  
9 say that I cannot at this point within ten minutes  
10 go down all the evaluation criteria which I think is  
11 relevant. But I've talked about the comprehensive  
12 plan. You can look in the sections in New Town and  
13 find for yourself.

14 The fact that you can -- I think even  
15 the applicant himself -- or themselves said that  
16 while you can't really -- the comprehensive plan, I  
17 think -- I'll look for a comment here by them, but  
18 in fact it looked to me like an effort to not  
19 mention the -- to conform to the comprehensive plan.  
20 It picked from here to here.

21 We're talking about -- even the staff  
22 report did not say it was consistent with the

1 comprehensive plan. It did not make that  
2 declarative statement. It only described what was  
3 in the comprehensive plan, but it was otherwise  
4 silent on whether it was consistent.

5 So I don't think that there's any  
6 argument at all that this is consistent with the  
7 comprehensive plan. And I believe there isn't any  
8 probative evidence that it is.

9 Not only that, I don't think there's  
10 any probative evidence under any of these other  
11 criteria that they met that really are sufficient to  
12 justify the SUP that is to protect the citizens from  
13 the noise and from all of the other harms created by  
14 this singular use. And that's what it is.

15 And it doesn't matter whether it's an  
16 industrial use now or has been. The criteria must  
17 compare with the comprehensive plan. There isn't a  
18 comprehensive plan, we know, that immediately  
19 launches into being with all of the zoning  
20 accompanying it.

21 I mean, it's a given that eventually  
22 your zoning will reconcile with your plan. But this

1 SUP is designed, and there are possible uses under  
2 the industrial zone that might be good to an SUP.  
3 That doesn't mean that you couldn't find one in an  
4 industrial zone. It just means this one doesn't  
5 work right.

6 And that's what my argument is about  
7 this, and why we hadn't carefully considered.

8 As far as the noise ordinance is  
9 concerned, well, I circulated to council 19 comments  
10 on the noise ordinance because I thought it was  
11 deficient in terms of its enforceability, in terms  
12 of its language. Here it is. And yet we haven't  
13 made one change.

14 I asked this morning, for example, that  
15 instead of using the word "mitigation" or "to  
16 mitigate," they might use word "to comply." And  
17 mitigation does not mean to comply.

18 I'm sorry about this sound.

19 So I'm really disappointed, but I do  
20 want to say something about my residents and all you  
21 who have come out. I ran -- I'm not a politician.

22 I don't know what's happening. Am I

1 hearing? Is it -- all right. Unfortunately, my  
2 hearing aids just gave out.

3           When I ran for office, I took -- I took  
4 my job seriously. I love my ward. I love my  
5 residents. I divide them into 13 little  
6 neighborhoods. They all had something different,  
7 something unique.

8           And I love walking my dog around.

9 You've probably see me on the Greenway. I mean  
10 that's the joy of what I do. I didn't do this to  
11 put this on my tombstone. I did this because of you  
12 guys. And I'm sorry that this decision is being  
13 made over the will of the people.

14           Thank you.

15           (Applause.)

16           ADMINISTRATIVE JUDGE: Councilman Mooney.

17           MR. MOONEY: This is why I ran. This is why  
18 I ran, because the citizens are here at daggone 2:15  
19 in the morning. So energetic. That's awesome.  
20 Thank you for being here.

21           To finish off my statement, to  
22 Mr. Hamby's point, I don't -- I don't believe the

1 application is complete based off of the noise study  
2 and everything else.

3           And nobody sleeps right next to OVH.

4           And from a revenue standpoint, we could  
5 just open up another Chick-fil-A on the other side  
6 of town and make three times the revenue.

7           (Applause.)

8           MR. MOONEY: And to Ms. Sutphin's comment,  
9 David Dobson has been here at every single meeting;  
10 and he's doing great.

11           To Mr. Heroux's point, there wouldn't  
12 be a distribution center there. VDOT has to approve  
13 a driveway that I put an ADU on to approve two more  
14 cars to go into a driveway. So I don't think they  
15 would approve the distribution center on that lot.

16           And if our test is that we made \$500  
17 for the past few years, then no offense.

18 Mr. Cureton, we should knock down the wharf and put  
19 a data center there, and we should put a data center  
20 at Eva Walker Park, and we should put a data center  
21 at Rady Park and all the other parks that don't make  
22 us any money.

1 (Applause.)

2 MR. MOONEY: So that's not a good test in my  
3 opinion. In my opinion. And I think that it's -- I  
4 think it's a shame that we didn't get, as a council,  
5 a chance to discuss between ourselves and our  
6 attorney whether these conditions will even be  
7 binding in a court of law in the state of Virginia.  
8 One lady -- one lady came up here and  
9 talked about bait and switch, and I just want to  
10 highlight some of the whys from our potential  
11 applicants, if that's allowed.

12 You know, many of our potential  
13 applicants for town manager talked about how  
14 incredible our town is and how incredible our 2040  
15 comprehensive plan was, and the leadership and the  
16 input from the citizens, and the amazing community  
17 development of our 2040 plan. If they get here they  
18 might feel like they got a bait and switch.

19 And then I just want to read from the  
20 Fauquier County Visitor's Guide. It says: Take a  
21 breath. You know you're in Fauquier County when the  
22 air changes.

1                   And that's why I live here. I'm the  
2 youngest person on the council, and this decision  
3 will affect me and my family and our future in this  
4 town.

5                   And I am also sorry.

6                   And I want to point out that we are  
7 blessed. We are truly, truly blessed to live in a  
8 great place in a world that is not so great.

9                   Thank you guys for being here.

10                  MAYOR NEVILL: Councilman Hamby.

11                  MR. HAMBY: I think we did pretty good -- we  
12 did a pretty good job on the conditions. I think  
13 that we started from the -- from the Arizona side.  
14 I think we have pretty tight conditions.

15                  Certainly been a move through  
16 conditioning a data center, and I feel like we're  
17 certainly well ahead of the other areas with data  
18 centers conditions-wise.

19                  Some of the other stuff. I know that  
20 there's been a lot of conjecture and everything else  
21 as we've gone through this.

22                  You know, the 2017 council, you know,

1 we unanimously voted to pursue data centers, but  
2 nothing happened for quite a while. Fauquier County  
3 was the one that actually introduced, actually,  
4 Amazon to the Weissberg property when all this  
5 started.

6 So as we move forward past this, I've  
7 certainly got a lot to say. So I'm hoping Robin and  
8 Jarvis stay after. Whatever time this ends. But as  
9 you move forward, there's certainly a lot -- there's  
10 a lot to be said.

11 I know that for the last few months  
12 it's been -- at least on this end, right, it's been  
13 -- we've been constantly under attack, daytime,  
14 nighttime, weekends, even at the Super Bowl.

15 So that's all I have to say. We can  
16 move on.

17 MAYOR NEVILL: Thank you, sir.

18 Vice Mayor.

19 MR. HARTMAN: I don't really have anything  
20 else to add to my previous comments other than, you  
21 know, I was born and raised here. I love this town.  
22 I made a career here. I retired here.

1                   And, you know, I've traveled all over  
2 the world and all over the country, and I could have  
3 gotten jobs anywhere and moved anywhere, but I chose  
4 to stay here.

5                   And I do love this town. I love my  
6 neighborhood. I like where I live. And my father  
7 was a business person in this town. He was actually  
8 on council.

9                   I heard from you, now you're going to  
10 hear from me. My mother was an educator in this  
11 very building. I sat out there somewhere and  
12 graduated from this school.

13                   So my support for the SUP, I stated  
14 earlier. And, you know, it's got nothing to do with  
15 whether or not I value our lifestyle and things of  
16 that in Warrenton.

17                   That's all I have to say.

18                   MAYOR NEVILL: Councilwoman Sutphin, do you  
19 have anything further?

20                   MS. SUTPHIN: No. I think I've already said  
21 everything. But thank you everyone for coming.

22                   MAYOR NEVILL: Thank you, ma'am.

1 Councilman Heroux.

2 MR. HEROUX: Yeah. Thank you, Mr. Mayor.

3 I'm sorry I forgot to say this in the  
4 beginning: I want to apologize to the women in the  
5 audience here that you had to hear a joke about  
6 prostitution. That was very inappropriate.

7 As a deacon in this community, I go  
8 around to some places that probably most of you have  
9 never been in. We have sex trafficking in this  
10 community, and I've talked with these women. They  
11 live very difficult trapped lives. It's not funny.

12 So let's talk about -- my comments that  
13 I've been working through here have actually been  
14 all based on the SUP criteria.

15 So when we talk about tax revenue, that  
16 is an evaluation criteria consideration. Not "the"  
17 consideration, but certainly a consideration. I did  
18 mention the \$500 that's, you know, from the prior  
19 owner. Any tax revenue bill that citizen gives us  
20 is valuable. I'm not demeaning \$500.

21 Amazon, I believe they're real estate  
22 bill was 12,500. Yeah, we can say they're a big

1 company, they can afford it. But paid it.

2           You know, we've had estimates of about  
3 \$4.5 million over five years or four years for this.

4 You know, I went back and looked at that. I said,  
5 well, what does that really mean? If we say it's  
6 about 900k a year, what does that really mean?

7           And went back and looked in the budget.

8 And it pays for town refuse and recycling costs for  
9 about a year with some money left over. It covers  
10 most of the budget for our line item on street  
11 maintenance for line item 4200, which is about \$1.1  
12 million.

13           It covers close to 60 percent of the  
14 wharf operating costs, which is about \$1.6 million.  
15 The wharf loses about half a million dollars a year  
16 because it doesn't bring in enough revenue to cover  
17 its operating expenses, on top of the \$4.6 million  
18 that we still own on the wharf.

19           We cover the cost of annual debt  
20 service. That's about, I think, 438k or 735k. It's  
21 somewhere in that range. And some of my numbers may  
22 be off.

1                   And then, you know, it basically covers  
2 almost 60 percent of our legal, HR, and finance.  
3 So, you know, put the number in context of what it  
4 means to you and us as services.

5                   All the other items on affordable  
6 housing, storage, open space, fuel storage,  
7 accessory, I thought the staff report covered that  
8 -- covered that well.

9                   One thing I have heard a lot from folks  
10 is about, you know, becoming like Prince William  
11 County or Loudoun County. I had the same concern.  
12 You know, I was, like, wow. You know, how does that  
13 happen?

14                   But as I settled into this role, I  
15 began to understand a couple things that -- you  
16 know, put me at the top of the list of not  
17 understanding things.

18                   First of all, this Council only has  
19 jurisdiction over 4.25 square miles, and that's  
20 about 264 acres of industrial zone. That's all we  
21 control.

22                   By comparison, Prince William County is

1 348 square miles. 81 times the size of Warrenton.  
2 The digital Gateway that they recently approved is  
3 3.3 square miles, or 2,100 acres. The data center  
4 opportunity zone is 15.6 square miles, or 10,000  
5 acres.

6 Loudoun County is about 520 square  
7 miles, 122 times the size of Warrenton. I estimate  
8 their data center space might cover -- they have 25  
9 million square feet. I don't know how many acres  
10 that is. 500 or so.

11 Compare that to Fauquier County. We're  
12 647 square miles, or 414,000 acres. And if my  
13 numbers are right, I think only about 4,000 of those  
14 acres are actually zoned industrial.

15 And we've -- like I said earlier, we've  
16 done, I think, some phenomenal work in protecting  
17 easements in the land that have just created, as  
18 you've said and I agree with you, just some  
19 beautiful landscape. And I congratulate the folks  
20 that have done that. But this is the service  
21 district, and it is designed to be dense so we can  
22 do that all up there.

1 My point on becoming Prince William and  
2 Loudoun County is that if we were to do that, we'd  
3 pretty much have to plow the town under to become  
4 like that. We have limited use here. Limited land  
5 space to do this. And so that's pretty unreasonable  
6 or unlikely.

7 Anything on the Fauquier County side  
8 with regards to data centers and any of the  
9 industrial zoning properties in the county, that  
10 needs to be, you know, discussed with our good  
11 friends on the Board of Supervisors.

12 And everything I read from them and  
13 some of my conversations with them, I don't hear  
14 anything from the Fauquier Board of Supervisors that  
15 are saying open the floodgates, we're ready to take  
16 on Prince William County. I just do not hear that,  
17 and I don't believe that is their intention at all.

18 In regards to the Warrenton Training  
19 Center, I know there's been some issues there. I'm  
20 sorry to hear that. And I would suggest that you  
21 call Senator Tim Kaine and Senator Warner and our  
22 Congressman. That's federal land. We have

1 absolutely no jurisdiction over what they do there.  
2 If it's -- if it's not -- if it's a disturbance, if  
3 there's something going on there, that's who you  
4 need to talk to. Because we can't roll in there and  
5 do much about that.

6           Look, the town has worked really hard  
7 on this with the applicant and staff. The applicant  
8 has taken a lot of additional steps here. They have  
9 rights. They purchased the land. Just like if any  
10 of us was to come here, we have rights to listen and  
11 to plead our -- you know, to present our case.

12           They've not asked for tax breaks.  
13 They're investing \$550 million in our town. That  
14 tax revenue also goes to the county. That goes back  
15 into our schools. And so I encourage my  
16 councilmembers to support this SUP.

17           And I want to thank the town staff for  
18 a lot of hard work that they've done over the past  
19 year in some very difficult situations, and, I  
20 think, in some cases some pretty unfair accusations  
21 that I just don't believe to be true. So I  
22 encourage my councilmembers to support the SUP.

1 Thank you, Mr. Mayor.

2 MAYOR NEVILL: Thank you, sir.

3 Councilman McGuire.

4 MR. MCGUIRE: Yes, I think the current SUP  
5 is not in compliance with the 2040 plan. And, also,  
6 I think we need to amend the noise ordinance.

7 And, also, you know, we've heard people  
8 -- some of my councilmembers resonate and talk about  
9 certain things about property rights and everything  
10 else. We will hear that again as people sell land  
11 and people try to get more data centers and  
12 everything else, you will hear that echoed. Okay.

13 Also, if we're worried about spending  
14 and we need revenue, maybe we need to take a hard  
15 look at what our output is. If we're losing money  
16 on certain things, maybe we need to, like, raise the  
17 rates on things, you know. Nothing is free, you  
18 know I think, you know, people need to look at --  
19 take a hard look and what we're spending our money  
20 on. And, you know, we have a low tax rate.

21 And I think a lot of people would like  
22 to keep things the way they are then give way to,

1 like, a data center that's going to have impacts for  
2 years to come.

3           And, also, I think, you know, you try  
4 to ride the tiger, you usually end up inside.

5           And I think the other thing is second  
6 or third order effects. I'm a historian myself.  
7 We're making a seminal moment here, a pivotal moment  
8 for the town. It will never be the same as we know  
9 it. Whether that's good or bad, we're going to  
10 change the face of this place. Okay.

11           So we're going to change the face of  
12 Main Street potentially, our green space, our horse  
13 country, all that, by one vote. So I ask my  
14 councilmembers to really think long and hard, not  
15 about tomorrow, but about tomorrows and what we're  
16 doing here. And I think it's very important.

17           So, thank you.

18           (Applause.)

19           MAYOR NEVILL: That closes the debate.

20 We'll call the question. All in favor?

21           (Multiple responses.)

22           MAYOR NEVILL: Opposed?

1 (Multiple responses.)

2 MAYOR NEVILL: Councilwoman Sutphin?

3 MS. SUTPHIN: So let me just make sure that

4 I understand --

5 MAYOR NEVILL: I'm sorry, Councilwoman

6 Sutphin --

7 MS. SUTPHIN: -- that if I --

8 MAYOR NEVILL: Councilwoman Sutphin, the

9 question is called to approve -- I'm sorry. I

10 should have restated that.

11 So the motion on the floor is to  
12 approve the SUP condition as stated by Councilman  
13 Heroux. So let me go back and restate the question,  
14 which is a motion before us to approve --

15 MR. MCGUIRE: Mayor, I'm sorry, for a  
16 second. I thought the motion is on the floor. I  
17 thought it's not to approve or disapprove. Right?  
18 I thought he read the motion saying it's up for  
19 vote.

20 MAYOR NEVILL: Yeah, there's a motion on the  
21 floor --

22 MR. MCGUIRE: Right.

1           MAYOR NEVILL: -- to call --

2           MR. MCGUIRE: But I'm just saying --

3           MAYOR NEVILL: -- the question. I restate  
4 the motion.

5           MR. MCGUIRE: I wouldn't say, like, it's up  
6 for approval. It's up for vote.

7           MAYOR NEVILL: Okay. Calling the question.  
8           The motion on the floor is a resolution  
9 pursuant to Section 11-3.10 of the zoning ordinance  
10 of the Town of Warrenton for approval of application  
11 for a special use permit as submitted by Councilman  
12 Heroux.

13                   So that is the motion. The question is  
14 called. So I'll restate the roll call -- or, i'm  
15 sorry, I'll restate the: All in favor?

16                   (Multiple responses.)

17           MAYOR NEVILL: Opposed?

18                   (Multiple responses.)

19           UNIDENTIFIED SPEAKERS: (Indiscernible).

20           MAYOR NEVILL: The motion did receive a  
21 second at the beginning.

22                   Motion carries 4 votes to 3.

1                   That brings us now to the consent  
2 agenda. I seek a motion to approve the consent  
3 agenda.  
4                   MR. HAMBY: Move to approve the consent  
5 agenda.  
6                   MAYOR NEVILL: So moved by Councilman Hamby.  
7                   MR. HARTMAN: Second.  
8                   MAYOR NEVILL: Seconded by Vice Mayor  
9 Hartman. Please -- order, please.  
10                   Is there discussion on the motion?  
11                   Please. We'll restore order.  
12                   UNIDENTIFIED SPEAKER: (Indiscernible).  
13                   MAYOR NEVILL: Motion on the floor is to  
14 approve the consent agenda.  
15                   Is there discussion on the motion?  
16                   (No responses.)  
17                   MAYOR NEVILL: Hearing none, I'll call the  
18 question. All in favor?  
19                   (Multiple responses.)  
20                   MAYOR NEVILL: Opposed?  
21                   MR. SEMPLE: Abstain.  
22                   MR. MOONEY: What was the motion?

1           MAYOR NEVILL: Motion to approve the consent  
2 agenda.

3           MR. MCGUIRE: Abstain.

4           MR. MOONEY: I abstain.

5           MAYOR NEVILL: So I have four eyes. I have  
6 two abstentions.

7           Council McGuire?

8           MR. MCGUIRE: I said I abstain.

9           MR. HAMBY: Abstain for a reason?

10          MAYOR NEVILL: They don't have to state it.  
11 They have an absolute right for that.

12           Okay. So that brings us now to new  
13 business. And, I'm sorry, we have three items under  
14 new business. First is the appointment of the  
15 acting town manager. And we have -- or I'm sorry --  
16 I'm sorry?

17          MR. CLOUGH: There was the update to the  
18 agenda so the acting town manager was added to the  
19 consent earlier.

20          MAYOR NEVILL: I'm sorry?

21          MR. CLOUGH: There was an update to the  
22 agenda for this evening. The acting town manager

1 appointment was part of the consent agenda.

2           MAYOR NEVILL: Okay. I'm sorry. Hang on  
3 just a second. I'm having a hard time hearing you.  
4 My hearing aid must have just given out.

5           UNIDENTIFIED SPEAKER: My computer died.

6           MR. CLOUGH: Yeah. That was part of the  
7 consent.

8           MAYOR NEVILL: Okay.

9           MR. CLOUGH: That was part of the consent.

10          MAYOR NEVILL: Oh, it's good. Okay.

11          MR. CLOUGH: This is just unfinished. And  
12 then the new business for Mr. Mooney.

13          MAYOR NEVILL: Okay. I'm sorry. I was  
14 looking at an earlier draft of the agenda.

15                 So new business would be then  
16 Councilman Mooney's request. So giving him an  
17 opportunity to make a motion to direct the staff to  
18 release the emails.

19          MR. MOONEY: Mr. Mayor, I make a motion to  
20 direct the staff to release the emails.

21          MAYOR NEVILL: Can you state specifically  
22 which emails?

1 MR. MOONEY: All of the 3,000 emails on the  
2 FOIA request.

3 MAYOR NEVILL: So moved by Councilman  
4 Mooney.

5 MR. SEMPLE: I'll second.

6 MAYOR NEVILL: Second by Councilman Semple.  
7 Discussion on the motion?

8 MR. MOONEY: I think it's a great idea.

9 (Applause.)

10 MAYOR NEVILL: Councilman Semple.

11 MR. SEMPLE: I've already spoken to the  
12 issue before, and I think it's absolutely necessary  
13 that we get to see those.

14 MAYOR NEVILL: Councilman Hamby.

15 MR. HAMBY: (Inaudible.)

16 MR. MCGUIRE: Go ahead.

17 MAYOR NEVILL: Any further discussion?

18 Councilman McGuire -- Vice Mayor, I'm sorry.

19 (Simultaneous speakers.)

20 MR. MCGUIRE: Yes. Go ahead.

21 MR. HARTMAN: Yeah, you know, I just -- I  
22 read today's news a little bit, and I saw in

1 Fauquier Now -- and to quote them: The nonprofit's  
2 legal counsel, Whiteford Taylor Preston, said in a  
3 previous release they do not believe the town's  
4 actions represent a fair and open process and plan  
5 to file an appeal soon.

6 So I agree with Mr. Mooney, I think  
7 it's a good idea. But I'd like to see -- I'd like  
8 to give it 30 days. Let's see if there's an appeal  
9 filed. Let's see what the courts have to say. Let  
10 that process run out.

11 And no matter what the decision is,  
12 once that process has run out, at the end of the  
13 day, I don't think there's anything to hide there, I  
14 think we should release those emails and have  
15 everybody look at them.

16 MR. SEMPLE: Well, why didn't we do it  
17 before?

18 MR. MCGUIRE: Mr. Mayor.

19 MAYOR NEVILL: Mr. McGuire.

20 MR. MCGUIRE: No, I think there should be no  
21 time frame on it. I think we should see those now.  
22 I mean, I don't know what I don't know. And I'm not

1 accusing anybody of anything, but I would just like  
2 to know what the background is.

3 I agree with the Vice Mayor. He wants  
4 to release them. I'm in favor of that. I'm glad  
5 he's supporting this. But I think the 30 days, it  
6 should not be in conjunction with the lawsuit. We  
7 are members of Town Council. We have a fiduciary to  
8 the town. I need to know those sooner than later.

9 MR. SEMPLE: Mr. Mayor, may I say something?

10 MAYOR NEVILL: Mr. Semple.

11 MR. SEMPLE: Look, whatever happens with the  
12 CFFC lawsuit is irrelevant to this question. I  
13 asked for the right as a member of council to be  
14 able to look at emails. I even offered to do it in  
15 camera. I offered to do it in association with  
16 others who could watch me so I wouldn't spirit them  
17 away or somehow use them to my own benefit.

18 I'm a member of council. I should be  
19 able to see this. We are the government.

20 And I asked, and I did not receive a  
21 reply, from Mr. Crim what his legal theory was that  
22 we needed to have four votes.

1                   And so I think this is an issue. I  
2 want to investigate it further. I want to find out  
3 if there is a legal basis that we have to require  
4 this. Why we need even others on council under  
5 these circumstances to have access to the -- to what  
6 happens on staff?

7                   I can understand we have our ethics  
8 requirements and there are limitations, but I think  
9 just to ask -- this means that when you have four  
10 people who decide that they want to hide something,  
11 the other three have no access to it. They can just  
12 decide to stall them out if they want to.

13                   And I think that is really a critical  
14 issue in terms of transparency and honest  
15 government. Thank you.

16                   MR. HAMBY: Mr. Mayor, Mr. Mooney's motion  
17 was to release it to council, correct?

18                   MAYOR NEVILL: Yes. Just for clarification,  
19 that is released to council eyes only.

20                   MR. HAMBY: I have no problem with that.  
21 And as long as -- it's not going to affect the  
22 appeal process if an appeal is filed, correct?

1 Yeah, I have no problem with that.

2           MAYOR NEVILL: Mr. Mooney.

3           MR. MOONEY: That's great. I don't know why  
4 everybody wouldn't want to see them.

5           Mr. Hamby, you mentioned that it passed  
6 unanimously to approve the -- the -- holy -- it's  
7 3:00 in the morning -- it passed unanimously to  
8 approve the zoning text amendment, but if that was  
9 based off of nefarious appearance or whatever, I  
10 would expect that the elected officials and my  
11 colleagues would have -- too late now -- would have  
12 wanted to see that before we -- before we voted on  
13 it.

14           And I'm -- yes, I would like to see the  
15 emails now, you know. And I don't know why I have  
16 to ask.

17           MAYOR NEVILL: Further discussion?

18           MS. SUTPHIN: I would think --

19           MR. HARTMAN: I must have misunderstood --

20           (Simultaneous speakers.)

21           MAYOR NEVILL: I'm sorry.

22           Councilwoman Sutphin, you have the

1 floor.

2 MR. HARTMAN: Sorry.

3 MS. SUTPHIN: I'm sorry. Vice Mayor

4 Hartman, I didn't mean to interrupt.

5 MR. HARTMAN: Go right ahead.

6 MS. SUTPHIN: Possibly if we did this at a  
7 later date we could go into closed session where  
8 it's only the council and our legal team to look at  
9 these emails. And it would only be -- this is just  
10 to the council, correct?

11 UNIDENTIFIED SPEAKER: Yes.

12 MAYOR NEVILL: Yes, ma'am.

13 MR. HARTMAN: Okay.

14 MS. SUTPHIN: I honestly don't think there's  
15 anything to hide, but I think this should be closed  
16 into the council.

17 MAYOR NEVILL: Understood. Thank you.

18 Vice Mayor.

19 MR. HARTMAN: (Inaudible) clarify it. I was  
20 confused that the motion was to release to the  
21 council.

22 MAYOR NEVILL: Okay.

1 MR. HARTMAN: I was concerned about the  
2 appeal process if released to the public. I am in  
3 favor of eventually at some point when the time is  
4 right releasing all of this publicly, for the  
5 record.

6 MAYOR NEVILL: Councilman Heroux.

7 MR. HEROUX: Yeah, I guess on this one,  
8 Mr. Mayor, I just want to make sure for all parties  
9 that however this is released within council that  
10 it's very clear the responsibilities members have of  
11 reviewing the information and what can be disclosed  
12 and not disclosed.

13 I think we've just got to be very, very  
14 clear on that because there's pending litigation  
15 that I think -- you know, whether it's our side or  
16 the other side, make sure that process stays pure.  
17 I mean, I just want to make sure there's guidance on  
18 this, that information is not flying around that  
19 messes it up for whoever.

20 So I have no problem releasing it, but  
21 we -- as long as there's very good guidance on what  
22 the responsibilities are of all the Councilmembers

1 with regards to releasing this information and the  
2 sensitiveness of some of that information that may  
3 have nothing to do with Amazon.

4 MR. MCGUIRE: Mr. Mayor.

5 MAYOR NEVILL: Hang on. Just a quick  
6 question.

7 MR. MCGUIRE: Okay.

8 MAYOR NEVILL: Mr. Martino, I'm sorry. Just  
9 Councilman Heroux's request is that if this motion  
10 is to pass, just that's there clear guidance for the  
11 Councilmembers upon review through counsel to ensure  
12 that what is protected rightfully under FOIA remains  
13 so pending the outcome of any further litigation.

14 MR. MARTINO: We can have staff work with  
15 them. It will take a lot of Stephen's time and a  
16 lot of Lindy's time. I haven't seen any of these.  
17 But we'll work with the Council to make that happen.

18 MR. CLOUGH: Mike, sir.

19 UNIDENTIFIED SPEAKER: It's on.

20 MR. SEMPLE: Mr. Mayor, I don't understand  
21 what the town manager has to do with this request.

22 MAYOR NEVILL: I'm just asking for -- if

1 staff will be part of it. It has to assemble the  
2 information. And just to provide, you know, the --  
3 obviously to the request of Mr. Heroux, the  
4 framework.

5 MR. SEMPLE: I don't get the understanding  
6 why staff would be looking at these emails before we  
7 do.

8 MAYOR NEVILL: Because --

9 MR. SEMPLE: It would seem to me  
10 presumptively that the Town Council should have  
11 access to the emails. I don't belabor this.

12 I'm not -- I mean, I don't know what  
13 FOIA exception would apply if we were to go to  
14 closed session to review these emails. Perhaps  
15 there's one. But, to me, it seems it should be  
16 fairly straightforward that -- and I think we have a  
17 code of ethics which requires us to hold things in  
18 confidence.

19 So I think -- I mean, I think there's  
20 an implication that somehow or the other one of the  
21 three people who are making this request are going  
22 to just send it to the press.

1 MR. HAMBY: Mr. Mayor, Mr. Martino said he  
2 had not read them and that he was going to compile  
3 them for (inaudible).

4 MR. CLOUGH: Mr. --

5 MR. MARTINO: My understanding is you're  
6 asking for staff support.

7 MR. MCGUIRE: I'm sorry, I can't hear what  
8 is being said.

9 MR. MARTINO: My understanding is you're  
10 asking for staff support to help make these  
11 available to you.

12 UNIDENTIFIED SPEAKER: And you'll be reading  
13 them?

14 MR. MARTINO: Me? I'm not going to read  
15 them.

16 UNIDENTIFIED SPEAKER: Okay.

17 MR. MARTINO: I have no need to read them.

18 UNIDENTIFIED SPEAKER: (Indiscernible).

19 MR. MARTINO: I mean, Steven and Lindy. And  
20 we'll pull them together for you to take a look at.

21 MR. MCGUIRE: Mr. Mayor.

22 MAYOR NEVILL: Mr. McGuire.

1 MR. MCGUIRE: Yes. So my understanding is  
2 we'll be able to see these. They will not be  
3 redacted or anything else like that. We'll see all  
4 the emails complete, everything else?

5 MAYOR NEVILL: Mr. Crim?

6 MR. CRIM: (Inaudible).

7 MR. MCGUIRE: Okay. And then obviously  
8 there would be some guidelines as to what we cannot  
9 speak about because there's a pending lawsuit. So I  
10 understand that.

11 MR. CRIM: Mr. Mayor, in response to  
12 Mr. McGuire's question about the emails. There is  
13 -- there are emails, just a small number, that have  
14 to do with tax information, so we would have to  
15 redact that because it would be a crime to share  
16 that other than for the purposes of collection or  
17 assessment.

18 So those numbers will have to be  
19 blacked out, but we can get everything else to you.

20 Does that make sense?

21 MR. MCGUIRE: Yes.

22 MR. HEROUX: Mr. Mayor.

1           MAYOR NEVILL: Mr. Heroux.

2           MR. HEROUX: That's my point. I'm not  
3 implying that any council member is going to do  
4 anything wrong or with the press, but there are some  
5 restrictions here to protect the privacy of some of  
6 the citizens.

7           So I'm just -- let's have some guidance  
8 on that so everybody knows the rules of the road  
9 when they're looking at the emails. That's all I'm  
10 saying.

11          MR. MOONEY: Mr. Mayor, with -- may I? With  
12 all due respect, I understand what I can disclose  
13 and not disclose. Thank you.

14          MAYOR NEVILL: Call the question.

15                 All in favor?

16                 (Multiple responses.)

17          MAYOR NEVILL: Opposed?

18                 (No audible responses.)

19          MAYOR NEVILL: Ms. Sutphin, are you an aye  
20 or a nay?

21          MS. SUTPHIN: An aye.

22          MAYOR NEVILL: Thank you. Motion carries

1 unanimously, and the documents will be assembled by  
2 staff. And members of council who wish to review  
3 them will be contacted and arrangements will be made  
4 for such time for them to take the review.

5 That will bring us to unfinished  
6 business which is a resolution directing staff to  
7 close 2nd Street to vehicular traffic. And I will  
8 seek a motion.

9 MR. HAMBY: The motion for 2nd Street. This  
10 afternoon I was able to meet with Casey (ph) from  
11 Molly's. We had -- the permanent bollards needed to  
12 be acquired at a cost of \$5,500. They've agreed to  
13 -- three businesses, they're going to split it with  
14 us.

15 So instead of being the permanent  
16 bollards, we want the bollards like on the Greenway  
17 where you can pull them out for emergency use. You  
18 know what I'm talking about, right?

19 So I would move that we move forward  
20 with the 2nd Street closure except change the  
21 monetary from 5,500 to one-half for the town and  
22 one-half for the businesses.

1           MAYOR NEVILL: Okay. Looking at the  
2 resolution. The resolution does not specify -- oh,  
3 no. Okay. So be it further resolved -- so I guess  
4 the motion would be to adopt the resolution  
5 directing staff to close 2nd Street to vehicle  
6 traffic with an amendment -- or no, this wouldn't be  
7 an amendment. We've changed the wording that the  
8 Town Council hereby directs staff to purchase and  
9 install with cooperation or with --

10           UNIDENTIFIED SPEAKER: Removable.

11           MAYOR NEVILL: -- with removable bollards in  
12 partnership with businesses on Main Street paying  
13 for -- is that --

14           MR. CURETON: Can we go with just a basic  
15 "in partnership with EOTW"?

16           MAYOR NEVILL: Yes, absolutely.

17           MR. CURETON: Thank you.

18           MAYOR NEVILL: So the motion would be to  
19 direct staff to close 2nd Street to vehicular  
20 traffic. And the last line to clarify that the  
21 bollards are not permanent, but they are removable  
22 bollards for safety purposes. And in partnership in

1 terms of funding with EOTW.

2 MR. CURETON: Yes, sir.

3 MAYOR NEVILL: Is that clear to staff?

4 MR. CURETON: Yes, sir.

5 MAYOR NEVILL: Is that clear to council?

6 (Multiple responses.)

7 MAYOR NEVILL: We have a motion. Do we have  
8 a second?

9 MR. HARTMAN: I'll second.

10 MAYOR NEVILL: Seconded by the Vice Mayor.

11 Turn it over to discussion.

12 Councilman Mooney.

13 MR. MOONEY: Yeah, I just want to verify  
14 that other restaurants around town are -- you said  
15 are -- they're able to rent their 8 by 10 area of  
16 2nd Street, right? So they don't have to be on Main  
17 Street. They don't have to be in Old Town. If  
18 another restaurant wants to pay the town money, they  
19 can -- they can get one of those spots, or is it  
20 just the restaurants right there in Old Town?

21 MR. CURETON: If a business on Main Street  
22 want to enter into an agreement with another

1 business on Main Street to facilitate the use of the  
2 space that is directly in front or adjacent to their  
3 space, they are more than welcome to collaborate  
4 with one another to produce that agreement.

5 MR. MOONEY: But not another business, like,  
6 say, on Broadview or something like that?

7 MR. CURETON: If El Agave wants to serve  
8 meals to 2nd Street, they are more -- we are more  
9 than happy to, you know, allow that.

10 MR. MOONEY: I've just been asked by  
11 different restaurant owners to be granted the same  
12 level of business opportunities --

13 MR. CURETON: Absolutely.

14 MR. MOONEY: -- as the people on Main  
15 Street.

16 MR. HAMBY: And this agreement is between  
17 three businesses that are working together. So I'm  
18 sure that EOTW probably has or could have agreements  
19 with whoever else would like to.

20 MR. MOONEY: Okay.

21 MR. CURETON: Correct. And, historically,  
22 we have actually had other restaurants within town

1 that are not on Main Street actually offer a parklet  
2 if you will. I believe El Agave did it in the first  
3 year when parklets were made available to  
4 restaurants.

5 MAYOR NEVILL: Further discussion?

6 (No responses.)

7 MAYOR NEVILL: All in favor?

8 (Multiple responses.)

9 MAYOR NEVILL: Councilwoman Sutphin.

10 MS. SUTPHIN: Aye.

11 MAYOR NEVILL: Thank you. Opposed?

12 (No responses.)

13 MAYOR NEVILL: Carries unanimously. And the  
14 resolution is adopted.

15 That brings us to the town attorney's  
16 report.

17 MR. CRIM: In light of the hour, Your Honor,  
18 I'm going to omit the report this month.

19 MAYOR NEVILL: Thank you, sir.

20 Turn to the town manager's report.

21 MR. MARTINO: Thank you, Mr. Mayor. I do  
22 have a few things to share, and I will be brief

1 given the hour.

2                   But the first item is about filling our  
3 police chief position. I've had the opportunity to  
4 brief you individually and as the council earlier  
5 today. And Acting Chief Carter has demonstrated  
6 that he can lead the force forward.

7                   And after speaking with you and some  
8 other community leaders, it is really with my great  
9 pleasure that I would like to announce the promotion  
10 of Acting Chief Tim Carter to be the new police  
11 chief for the Town of Warrenton, and just ask you to  
12 join me in congratulating the chief.

13                   (Applause.)

14                   MS. SUTPHIN: If I were there in person, I  
15 would be standing up and clapping, as well.

16                   MR. MARTINO: Any words of wisdom you want  
17 to share very quickly?

18                   UNIDENTIFIED SPEAKER: Yeah, you're a cop.

19                   MR. CLOUGH: It's on. You've just to speak  
20 into it.

21                   CHIEF CARTER: Are you sure? All right.  
22 I'm not used to being that close to a microphone.

1 Sorry. Forgive me. Are you sure it's on? There we  
2 go.

3           You know, I'll go with something I  
4 wrote, just to make sure I keep it -- I'll be brief,  
5 which everybody knows that's difficult for me.

6           I want to say I'm honored and I'm  
7 humbled to be named as the chief of police of the  
8 Warrenton Police Department. I've served this town  
9 with pride for over 30 years, and this is without a  
10 doubt the highlight of my career.

11           But it is so in part because of the  
12 dedicated men and women that I get -- that I have  
13 the pleasure to lead and the wonderful community and  
14 supportive community that I have the privilege to  
15 serve.

16           I want to thank Mr. Martino and the  
17 council for their vision and faith in me. I'll do  
18 everything in my power to be worthy of it.

19           And my goal for our department is to  
20 continue the community-centric focus that we have  
21 had these last three years. That is of utmost  
22 importance to me.

1                   And the last thing that I will say  
2 since we did work through Valentine's Day is I want  
3 to thank my wife and my daughter for the countless,  
4 countless hours over the last 30 years. I know my  
5 daughter's only 16, but my wife's been with me that  
6 entire time. You know, it's a lot of time away, but  
7 they supported me in my passion for service to this  
8 town. I love them for it. And I thank them for  
9 that because this moment right here would not have  
10 been possible without that support.

11                   So, thank you.

12                   (Applause.)

13                   MAYOR NEVILL: Thank you, Chief.  
14 Congratulations. We will have a swearing-in  
15 ceremony at the start of the next Town Council  
16 meeting in March. We should probably schedule that  
17 at 6:00.

18                   MR. MARTINO: Right.

19                   MAYOR NEVILL: We'll rely on Betty Compton  
20 to get word out to the community so that anybody  
21 wishes to come and celebrate the pinning of the  
22 chief's badge onto now-Chief Carter can come and

1 please celebrate. So announcements on that will go  
2 out. And again, it will confirm the time on that.

3 MR. MARTINO: Right. Thank you. Thank you.

4 Next item very quickly: Again, I had  
5 the opportunity to brief you on this. It's the  
6 town's pay for performance program. And I have  
7 really come to recognize and rely on the great  
8 workforce that you have here in Warrenton. They're  
9 very passionate, very dedicated, and very engaged to  
10 make a difference; and I see that every day.

11 And so this pay for performance, it  
12 might be a small thing, but right now the evaluation  
13 date is September 30th, but the merit pay date isn't  
14 until July 1. And so we're going to adjust that  
15 merit pay date to better align with the actual  
16 performance evaluation.

17 So we'll do that over -- in two steps.  
18 Will move the merit pay date from July 1 to April 1  
19 this year, and then from April 1 to January next  
20 year, and then it'll be very close to the evaluation  
21 date as it was before we went to the one evaluation  
22 date. So that's the second thing I want to share

1 with you.

2                   And then we have two ordinances that we  
3 want to bring amendments that we want to bring to  
4 the Council next month. So I want to let you know  
5 we'll be advertising for those public hearings to  
6 amend the ordinance.

7                   The first is to indemnify town  
8 employees who may be subject to litigation or  
9 liability during the normal course of their duties  
10 as a town employee. That is a situation that came  
11 up recently.

12                   And the second is an ordinance to amend  
13 the town code to provide for the appointment of the  
14 town clerk by the town manager; and that's something  
15 that the Council had been talking about in the past  
16 year. And so we'll be able to clean that up again  
17 to make it -- more alignment.

18                   So that's what I have for you this  
19 evening. And, again, thank you for your support.

20                   I think that the pay plan adjustment  
21 date is going to be very well received by the  
22 workforce. They'll very much appreciate it. And

1 I'll make sure they know that you were in the lead  
2 on that.

3 Thank you.

4 MAYOR NEVILL: Thank you, sir. Greatly  
5 appreciate it. And grateful for staff.

6 We'll turn it over to councilmembers'  
7 time. I will start to my right.

8 Councilman Mooney.

9 MR. MOONEY: Thank you for all the citizens  
10 that are here. I appreciate everything everybody  
11 has done for this process. And, yeah, I'm sorry  
12 about the resolution that happened.

13 And I also want to thank my wife for  
14 this 3:00 a.m. night on Valentine's Day.

15 So, thank you and have a good night.

16 (Applause.)

17 MAYOR NEVILL: Councilman Semple.

18 MR. SEMPLE: Well, I can't tell those of you  
19 out there how disappointed I am. I thought that --  
20 when I represented you -- or voted into office, your  
21 first obligation was your constituents [sic]. I  
22 mean, I thought that's what I ran on. And I just

1 don't see anything here where my constituents  
2 benefit.

3 UNIDENTIFIED SPEAKER: That's just because  
4 you're not benefitting, also.

5 UNIDENTIFIED SPEAKER: You didn't get to see  
6 (indiscernible).

7 MR. SEMPLE: Unfortunately, at this  
8 particular point I can hardly hear because my  
9 hearing aids collapsed about an hour ago.

10 So I -- but I just want to say thanks  
11 for all those who worked so hard and came here  
12 tonight on Valentine's Day and showed up with such  
13 fervor and passion trying and save our town from --  
14 I don't care what you say, but pretty soon we're  
15 going to see these data centers -- we already have a  
16 proposal on the street from the farm along the  
17 Greenway for \$950,000 an acre. And they've already  
18 made the proposal and annexed the end of the town.  
19 So here we go.

20 And for those of us who -- and I have  
21 to admit from the time I was a little kid and I came  
22 to Fauquier County when I was 3 years old, and my

1 granddaddy said, "They're going to build 66 over my  
2 dead body." And they almost did because he's buried  
3 in Emmanuel Church about 600 feet from the on-ramp.

4 And I said to my wife, "They're going  
5 to bury this damn distribution line over my dead  
6 body." And she said, "Don't say that." And now I'm  
7 actually faced with the specter they might.

8 And so, it's been a sad day for me.

9 On a positive note, I want to say  
10 congratulations to the Chief. I really do look  
11 forward to working with him.

12 I thank Mr. Martino for his service.  
13 And he -- I don't think he'll be here at the next  
14 meeting.

15 Will you?

16 Yeah, I think you'll be retired. I  
17 mean, our next -- so thank you for all your work.  
18 You've done a tremendous job in restoring the  
19 confidence of our staff and the work they do. And I  
20 have great confidence that you will enjoy your  
21 retirement. I guess you will retire.

22 MR. MARTINO: Again.

1 MR. SEMPLE: Again. And maybe after this it  
2 will be permanent.

3 And I look forward to Tommy taking on  
4 the role temporarily. He's done a great job the  
5 time before.

6 So, that's all I have to say. Thank  
7 you.

8 MAYOR NEVILL: Councilman Mooney has  
9 requested another --

10 MR. MOONEY: Thank you. Thank you,  
11 Mr. Mayor.

12 I just I want to say two more things.  
13 I want to thank the staff for tonight. Nothing -- I  
14 want to thank Stephen for his outstanding work as  
15 the Town Clerk.

16 And I want to let the citizens know  
17 that I'm still really excited to be here and serve  
18 for you, and I'm going to keep doing the best I can.

19 So, thank you.

20 (Applause.)

21 MR. MOONEY: Thank you, Mr. Mayor.

22 MAYOR NEVILL: Councilman Hamby.

1 MR. HAMBY: It's certainly been a long day  
2 starting at 9:00. Thanks to everybody that came out  
3 on all of the meetings. This has been starting  
4 since May of last year.

5 Congratulations to the Chief.

6 Thank you to the staff. I know that we  
7 changed venues and had to move just about everything  
8 we own over to the high school. It's late in the  
9 hour. And that's all I have.

10 MAYOR NEVILL: Thank you, sir.

11 Vice Mayor.

12 MR. HARTMAN: Yeah, it's late in the hour,  
13 so I'm going to hold off on my remarks I had  
14 prepared.

15 And one of the unfortunate parts of  
16 going, what, fourth, I think, is that everybody has  
17 already said what I wanted to say, but I'll repeat  
18 it: Thank you to the staff, Stephen, Tommy,  
19 everybody that put this on, the staff that's in the  
20 back room that no one has seen tonight.

21 The men and women of the police  
22 department, thank you very much.

1 Betty, your volunteers.

2 I know I'm going to forget somebody, so  
3 I won't go on.

4 Congratulations, Chief Carter. I  
5 think, what was it, 1992, I was on the hiring  
6 committee that hired you. So this has all come full  
7 circle. It's pretty wild.

8 Mr. Martino, you're going to be sorely  
9 missed. It's been a pleasure having you as interim  
10 these last few months. Time flew by, but it's been  
11 a pleasure to watch you work and your leadership  
12 management style. And I just -- we can't thank you  
13 enough. So, thank you, sir.

14 And I think that's it. Thank you.

15 MAYOR NEVILL: Councilwoman Sutphin.

16 (No response.)

17 MAYOR NEVILL: Councilwoman Sutphin.

18 MS. SUTPHIN: I'm here. So I wanted to  
19 start off by thanking all of our employees for their  
20 endless contributions, all of the things that  
21 (indiscernible.) It is just crazy all of the behind  
22 the scenes that they do. So pulling this off was

1 something that's fantastic, honestly. Just to make  
2 sure that all of our constituents are heard.

3           And, Stephen, who has helped me  
4 tremendously, because I was visiting my brother who  
5 had been really sick for the past two weeks, working  
6 with me to make sure that my computer is up and that  
7 everything is working correctly. You've been a huge  
8 staple and a wonderful addition to our staff.

9           I could go on and on and on and thank  
10 people on our staff, robin, Denise. But all of the  
11 police officers that are there, all of the  
12 volunteers, everybody that's there to make this  
13 happen.

14           I want to make it perfectly clear that  
15 each one of us that are sitting up there love our  
16 community, and that's why we're involved. I am sad  
17 (indiscernible) that it's been put under scrutiny  
18 that we don't care about our town.

19           So I just want to put it out there that  
20 all of us have lost plenty of sleep, have been under  
21 a tremendous amount of stress. Some that you don't  
22 even know about.

1                   And that's one of the things I always  
2 realize: Before you cut somebody down, see where  
3 they're coming from. Each of us have different  
4 things that we're going through and different  
5 reasons why we vote how we vote and how we feel.

6                   Thank you to each of my Council  
7 members, and our wonderful Mayor, who has tried to  
8 keep some type of dignity to the meetings. It's  
9 been a little bit difficult.

10                  But thank you, everybody, for holding  
11 down the fort.

12                  And, Mr. Martino, we are going to miss  
13 you. I love teasing you and giving you a hard time.

14                  And all of the work that Tommy put in,  
15 as well.

16                  And a special congratulations to Chief  
17 Carter. That has a nice ring to it. I'm very proud  
18 of you, and I know you're going to do our town  
19 wonderful.

20                  So thank you, and good night.

21                  MAYOR NEVILL: Thank you, Councilwoman.

22                  Councilman Heroux.

1 MR. HEROUX: Thanks, Mr. Mayor.  
2 Chief Carter, congratulations. It's  
3 fantastic news. Well deserved and well done.  
4 Mr. Martino, I'm going to miss you.  
5 Fantastic job. And just enjoyed your counsel and  
6 mentoring over the past few months. I wish you-all  
7 the best.  
8 To the staff -- great job again  
9 tonight, Stephen. I mean, just phenomenal. And all  
10 the staff. In this job I'm just amazed every day at  
11 how the staff keeps the machine going and keeps the  
12 town running. It's just an amazing team.  
13 Onward, I am very optimistic about the  
14 future of Warrenton. It can continue. It is a  
15 great community, can continue to be a great town.  
16 We have some fantastic proposals we're  
17 hearing about with housing and road improvements and  
18 parks. I mean, there is just bright features [sic].  
19 And, you know, admittedly, I'm a guy  
20 that's on a sunny side of the mountain. That's  
21 where I want to be. And I think this is going to be  
22 a great place.

1 I would ask as we go forward here, you  
2 know, we talk about our community and all that's  
3 good about it, but there are people in our community  
4 that are really struggling. We got people sleeping  
5 at Walmart at night. We got people that sleep in  
6 the woods. We got people in some of our motels that  
7 are really, really struggling. We've got elderly  
8 that are lonely.

9 We got women that get beat up by their  
10 husbands and boyfriends, and they got nowhere to go;  
11 and then they find them and they drag them out of a  
12 room by their hair. We've got some problems here.  
13 So we got to get after that, okay, as we look at  
14 these plans.

15 And then Valentine's Day, last but not  
16 least, I'm sorry to my wife I was here tonight. But  
17 Happy Valentine's Day and I love you.

18 MAYOR NEVILL: Mr. McGuire.

19 MR. MCGUIRE: Yeah, I just want to thank all  
20 the good citizens that stuck it out and came out  
21 tonight.

22 Chief Carter, Warrenton PD, I

1 appreciate your support.

2           Your comprehensive plan, and all that  
3 stuff that you did to make this happen, the staff,  
4 Stephen, Mr. Martino, Tommy, appreciate it.

5           Mr. Martino, you will be missed. I  
6 enjoyed your banter and everything else.

7           And also, the people behind the scenes  
8 that are doing a lot of stuff that don't get  
9 recognition, I appreciate that.

10           And lastly but not least, my fellow  
11 councilmembers, you know, I appreciate you-all,  
12 like, listening to me. You didn't have to agree  
13 with me per se, but I think, you know, we all have  
14 good intentions.

15           And I was really appreciative that the  
16 looking at the emails is passed. I think that sends  
17 a really -- a message to everyone, especially me  
18 that, you know, we're moving in the right direction  
19 for open and fair and honesty and transparency. I  
20 appreciate that.

21           Thank you, Mr. Mayor.

22           MAYOR NEVILL: Thank you, sir.

1           And again, as I will be the broken  
2 record here to thank all of the volunteers this  
3 evening.

4           I want to first of all start with all  
5 of the citizens who came out and spoke and who have  
6 been speaking since July. You know, as I said, we  
7 have been listening. Our job obviously is to weigh  
8 all aspects. And we have heard you. We understand  
9 your passion, and we definitely share the same  
10 concerns.

11           However, we are also forced and charged  
12 with fiduciary responsibilities towards, you know,  
13 applicants, the town, the future, and looking  
14 towards what is before us and what our  
15 responsibility as elected officials in a republic  
16 requires us to do.

17           And I appreciate the care with which  
18 all of my fellow councilmembers took this entire  
19 process. It was a very -- a lot of thought. A lot  
20 of meetings were taken with staff to learn more. A  
21 lot of individual research was taken by individual  
22 members.

1 I have spent [sic] way down rabbit  
2 holes visiting sites, just learning as much as  
3 possible, and I really appreciate all of the effort  
4 that everyone did to bring facts to their decision.

5 I want to thank Betty and the  
6 volunteers. It's been a long night. It's been  
7 incredible that -- your devotion to stand all this  
8 time. It's a testament to your fortitude.

9 I want to thank the officers again for  
10 providing security and safety to all of the members  
11 of the public who came here this evening, ensuring  
12 that everyone arrived safely and were able to depart  
13 safely.

14 Stephen, for all of your clerking  
15 duties and responsibilities ensuring this was a  
16 successful meeting.

17 Mr. Crim, for your legal guidance and  
18 -- to Council, continually.

19 Jonathan, Stephen, and the entire IT  
20 team bringing a remote live-streaming capability and  
21 making it seem to work flawlessly. You guys  
22 continue to over-deliver.

1                   And, you know, we need to find more  
2 support for you as this is a big ask. And I know  
3 that accessibility and openness in government relies  
4 on a strong IT investment, and we have opportunities  
5 there to increase that accessibility so that our  
6 process -- our democratic process is more available  
7 to the public. And look forward to working with  
8 council towards investing in ensuring that that  
9 becomes more accessible.

10                   I want to thank Denise, Rob, and  
11 Stephanie, who I believe are probably still here  
12 this evening. It's been long. They've been putting  
13 in so much work and so much effort on this; and,  
14 again, I think they faced a lot of unfair criticism.  
15 And I am sorry for that. They have done their jobs  
16 faithfully, dutifully, and with the best interest of  
17 this town in providing factual information to both  
18 the Planning Commission and to Council so that we  
19 could reach a decision.

20                   I Congratulate Chief Carter on a  
21 well-deserved, well-earned promotion. We look very  
22 much forward to you continuing to lead this

1 department into the 21st century with modern  
2 policing, community policing.

3           This department is a shining star in  
4 the Commonwealth, and I look forward and know that  
5 you will continue to lead it to be, again, the envy  
6 of towns across this Commonwealth. And I hope that  
7 that is respected and rewarded and acknowledged by  
8 other communities just what is going on here in  
9 Warrenton, in our Warrenton police department in  
10 outreach with the community. I just -- you know,  
11 keep it going. You're going to do a great job.

12           And to Mr. Martino, echoing what  
13 everyone else has said, it's been an absolute  
14 pleasure working with you. The command of respect  
15 -- the respect that you've commanded from staff,  
16 universal -- I mean, it is just to -- to hear from  
17 everyone in staff how much they've enjoyed working  
18 with you, the leadership you've brought.

19           We had a strong staff. We had a good  
20 vision. And you've taken something and accelerated  
21 it, and you've imbued in them a new sense of  
22 commitment to the future of Warrenton. So thank you

1 very much for taking time out of retirement to  
2 provide your guidance.

3                   And to Tommy, I look forward to your  
4 leadership in -- as interim and future leadership  
5 within the role in the Town of Warrenton.

6                   So, and with that, at some time at 3:12  
7 on February 15th, we'll call us adjourned.

8                   (The Town Council meeting was adjourned  
9 at 3:12 a.m. on February 15, 2023.)

Draft: Not Yet approved by Town Council

**February 14<sup>th</sup>, 2023 Regular Town Council Meeting**  
**Minutes**

**Attachment 4: Signed legislation**

FORM MOTION FOR CONVENING A CLOSED MEETING 02/14/2023

I move that the Council convene in closed session to discuss the following:

As permitted by Virginia Code § 2.2-3711 (A)(1), a personnel matter involving: Discussion, consideration, or interviews of prospective candidates for employment or appointment; OR assignment, appointment, promotion, performance, demotion, salaries, disciplining, or resignation of specific public officers, appointees, or employees of the Town; specifically dealing with **Town Manager Recruitment, Acting Town Manager Appointment, Police Department Personnel Update**

As permitted by Virginia Code § 2.2-3711 (A)(3), a matter involving: discussion or consideration of the acquisition of real property for a public purpose; OR disposition of publicly held real property specifically involving \_\_\_\_\_ [Give location of property], because discussion in an open meeting would adversely affect the City's bargaining position or negotiating strategy.

As permitted by Virginia Code § 2.2-3711 (A)(4), a matter requiring the protection of the privacy of individuals in personal matters not involving the public business.

As permitted by Virginia Code § 2.2-3711 (A)(7), consultation with legal counsel or briefing by staff members or consultants pertaining to: \_\_\_\_\_ probable litigation involving \_\_\_\_\_ [Give subject]; OR \_\_\_\_\_ the pending case of \_\_\_\_\_ [Give case name], where such consultation or briefing in open meeting would adversely affect the negotiating or litigating posture of the City.

As permitted by Virginia Code § 2.2-3711 (A)(8), consultation with legal counsel regarding specific legal matters requiring the provision of legal advice by such counsel, relating to **Walmart Tax Matter Update, process and substance for consideration of SUP 2022-03** \_\_\_\_\_ [Give nature of matter].

As permitted by Virginia Code § 2.2-3711 (A)(29), discussion of the award of a public contract for [Give nature of the contract] involving the expenditure of public funds, including interviews of bidders or offerors, and discussion of the terms or scope of such contract, where discussion in an open session would adversely affect the bargaining position or negotiating strategy of the City Council.

As permitted by Virginia Code § 2.2-3711(A)(19), a matter involving: **Police Department Briefing on Safety of Town Council, RSM Briefing of Information Technology evaluation.**

[IDENTIFY THE APPLICABLE PARAGRAPH OF § 2.2-3711(A) OR OTHER LAW AND GIVE THE SUBJECT MATTER AND PURPOSE FOR THE CLOSED SESSION.]

Absent from Meeting:

**CERTIFICATION MOTION AFTER RECONVENING IN PUBLIC SESSION:**  
(requires a recorded roll call vote)

I move that the Council certify that, in the closed session just concluded, nothing was discussed except the matter or matters (1) specifically identified in the motion to convene in closed session and (2) lawfully permitted to be discussed in a closed session under the provisions of the Virginia Freedom of Information Act as cited in that motion.

approved by Town Council

February 14<sup>th</sup>, 2023  
Town Council  
Regular Meeting

**A RESOLUTION ANNOUNCING A SPECIAL MEETING UNDER VIRGINIA CODE § 2.2-3712 (B) WITHIN THE NEXT 15 DAYS AT TOWN HALL, 21 MAIN STREET FOR THE PURPOSES OF INTERVIEWING CANDIDATES FOR THE POSITION OF TOWN MANAGER**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the County of Fauquier; and

**WHEREAS**, the Town Council has been working with Baker Tilly, a recruiting firm, to advertise and recruit candidates for the position of Town Manager; and

**WHEREAS**, at a Special Meeting on February 10<sup>th</sup>, 2023, the Town Council identified candidates to proceed with and interview; and

**WHEREAS**, Virginia Code § 2.2-3712 (B) states "The notice provisions of this chapter shall not apply to closed meetings of any public body held solely for the purpose of interviewing candidates for the position of chief administrative officer. Prior to any such closed meeting for the purpose of interviewing candidates, the public body shall announce in an open meeting that such closed meeting shall be held at a disclosed or undisclosed location within 15 days thereafter"; and

**WHEREAS**, the Warrenton Town Council wishes to conduct interviews within the next 15 days from the period February 15<sup>th</sup>, 2023 through March 1st, 2023; and

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council Hereby adopts a resolution announcing a Special Meeting under Virginia code § 2.2-3712 (b) within the next 15 days at Town Hall, 21 Main Street for the purposes of interviewing candidates in closed session for the position of Town Manager.

Regular Meeting

**A RESOLUTION INSTRUCTING THE TOWN CLERK TO ENTER THE APPROPRIATE CITIZEN TIME COMMENTS FROM THE TOWN COUNCIL MEETING ON JANUARY 10<sup>TH</sup>, 2023 INTO THE RECORD FOR THE PUBLIC HEARING ON AMAZON SUP 2022-03**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the County of Fauquier; and

**WHEREAS**, the Town has implemented new technology for citizens to sign up to speak for citizens time and the public hearings; and

**WHEREAS**, due to sign up errors and confusion at the January 10<sup>th</sup>, 2023 Town Council meeting, some citizens spoke on the Public Hearing item SUP 2022-03 at Citizen's time; and

**WHEREAS**, due to the importance of this topic, the Town Council wishes to have all comments from the citizens made available on the record for consideration; and

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council Hereby resolves to instruct the Town Clerk to enter the appropriate citizen time comments from the Town Council meeting on January 10<sup>th</sup>, 2023, into the record for the public hearing on amazon sup 2022-03

**BE IT FURTHER RESOLVED** that only those speakers who made comments during the actual public hearing will be restricted from making a comment during the continuation on February 14<sup>th</sup>, 2023 to ensure fairness and equality to all.

**RESOLUTION PURSUANT TO SECTION 11-3.10 OF THE ZONING ORDINANCE OF THE  
TOWN OF WARRENTON FOR APPROVAL OF APPLICATION FOR A  
SPECIAL USE PERMIT 22-03**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the County of Fauquier; and

**WHEREAS**, Amazon Data Services, Inc., ("the Applicant"), is the requesting a Special Use Permit approval on a parcel of land containing approximately 41.793 acres, identified as GPIN 6984-69-2419-000, located off Blackwell Road and Lee Highway in the Town of Warrenton and hereinafter referred to as the "Property"; and

**WHEREAS**, the Applicant has applied for a Special Use Permit pursuant to §3-4.12.3 of the Zoning Ordinance, to allow for approximately 220,200 square-foot data center to be located on the Property, hereinafter the "Special Use Permit"; and

**WHEREAS**, the Applicant requested waivers and modifications to increase the building height from 35 feet to 37 feet, increase the fence height from six feet to eight feet, and decrease the parking loading space requirement from 22 spaces to one space; and

**WHEREAS**, pursuant to §11-3 of the Zoning Ordinance upon petition of the Applicant for approval of the Special Use Permit, the Planning Commission upon advertisement and notice properly given pursuant to §15.2-2204 of the Virginia Code held a Public Hearing on November 15, 2022, November 22, 2022, and December 20, 2022; and

**WHEREAS**, the Town Council received and considered the recommendation of the Planning Commission for denial of the Special Use Permit; and

**WHEREAS**, the Town Council of the Town of Warrenton held a Public Hearing on January 10, 2023, upon notice properly and duly given; and

**WHEREAS**, the Town Council of the Town of Warrenton held open the Public Hearing on January 10, 2023 to February 14<sup>th</sup>, 2023, upon notice properly and duly given; and

**WHEREAS**, the Town Council has considered the issues and the Applicant addressed the applicable factors listed in §11-3.10.3 of the Zoning Ordinance for the Town of Warrenton; and

**WHEREAS**, the Town Council finds that the Application meets the criteria for approval in the Town of Warrenton Zoning Ordinance and that the Application is consistent with the Town of Warrenton's Comprehensive Plan based on the analysis in the staff report; and

**WHEREAS**, the Town Council, in consideration of all of the foregoing, is of the opinion that the application for the Special Use Permit be approved subject to certain conditions;

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council approves

SUP 22-03, subject to the attached Special Use Permit with Conditions of Approval dated February 14<sup>th</sup>, 2023, and all documents referenced in the Conditions of Approval, with requested waivers and modifications listed above.

**A PROCLAMATION RECOGNIZING FEBRUARY 2023  
AS BLACK HISTORY MONTH IN THE TOWN OF WARRENTON, VIRGINIA**

**WHEREAS**, Black History Week was originally initiated in 1926 by Dr. Carter G. Woodson, a native of Buckingham County, Virginia; and

**WHEREAS**, since the Bicentennial year of 1976, Americans of all walks of life have come together during the month of February to honor the accomplishments of Black Americans in every area of endeavor throughout our history; and

**WHEREAS**, African Americans have contributed greatly to the heritage, progress, and advancement of the United States of America, the Commonwealth of Virginia, Fauquier County, and the Town of Warrenton; and

**WHEREAS**, the history and culture of African Americans make up an important part of the history and culture of the United States, the Commonwealth of Virginia and the Town of Warrenton; and

**WHEREAS**, in the late 1980's Karen Hughes White and Karen King Lavore began to share their individual genealogies, finding common threads and connections; and

**WHEREAS**, The Afro-American Historical Association of Fauquier County was established by Karen Hughes White and Karen King Lavore in 1992 to further our community's appreciation and understanding of Fauquier County and Warrenton African American history, genealogy and culture; and

**WHEREAS**, The Afro-American Historical Association is home to a 4,269 square foot museum located in The Plains, VA housing 1,634 artifacts detailing the rich history of Fauquier County's Black residents and those of the historic Black communities in Warrenton, such as Oliver City, Madisontown, Haiti Street, and the historic landmarks of Eva Walker Park and the Rosenwald Schools; and

**WHEREAS**, The Afro-American Historical Association regularly conducts programs, special events, lectures exhibits and open houses celebrating the collective and individual lives and artistry of our community's past and current residents, such as: The AAHA Virtual Genealogy and Local History Series; Historic African Churches; Annual Community Celebrations; Veterans and Military Day; Art Collections and Music Day; and

**WHEREAS**, The Afro-American Historical Association's library and archives and its rich inventory of books, transcripts, monographs, photographs, letters and other memorabilia are open to the public for research; and

**WHEREAS**, The Afro-American Historical Association recently opened its new Digital Map Center and webpage allowing all to explore our historic African American communities through story maps that "tell the history of the lives of those often overlooked and omitted Americans from history's pages"; and

**WHEREAS**, The Afro-American Historical Association is an invaluable resource to the Warrenton community; and

**NOW, THEREFORE, BE IT PROCLAIMED** that the Warrenton Town Council hereby proclaims the month of February 2023 as "Black History Month" in the Town of Warrenton; and

**BE IT FURTHER PROCLAIMED** The Warrenton Town Councils recognizes the Afro-American Historical Association and the contributions that it has made to the Town, its progress, and its prosperity.

### TOWN COUNCIL SPECIAL MEETING

Warrenton Police Department, Community Room: 333 Carriage House Ln, Warrenton, VA 20186  
Saturday, February 25, 2023 at 9:00 AM

### MINUTES

#### A SPECIAL MEETING OF THE TOWN COUNCIL OF THE TOWN OF WARRENTON, VIRGINIA, WAS HELD ON FEBRUARY 14<sup>th</sup>, 2023, AT 9:00 A.M.

Special Meeting

**PRESENT**

Mr. Carter Nevill, Mayor; Mr. William Semple; Ms. Heather Sutphin; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney; Mr. Christopher E. Martino, Interim Town Manager; Mr. Tommy Cureton, Deputy Town Manager; Mr. Stephen Clough, Town Clerk.

**ABSENT**

None

#### TOWN OF WARRENTON TOWN COUNCIL SPECIAL MEETING: BUDGET RETREAT 9:00AM

##### 1. Welcome

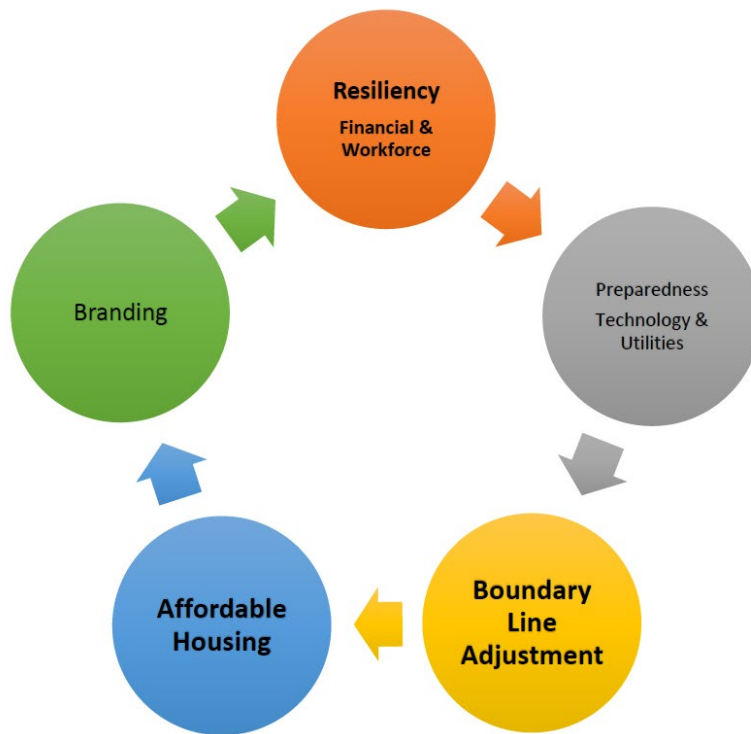

The meeting was called to order at 9am. Mayor Carter Nevell stated that a quorum was physically present.

Mayor Nevill stated that by unanimous consent a Closed Session on the Recruitment for a New Town Manager was added to the agenda as the last item at the conclusion of the Budget Retreat.

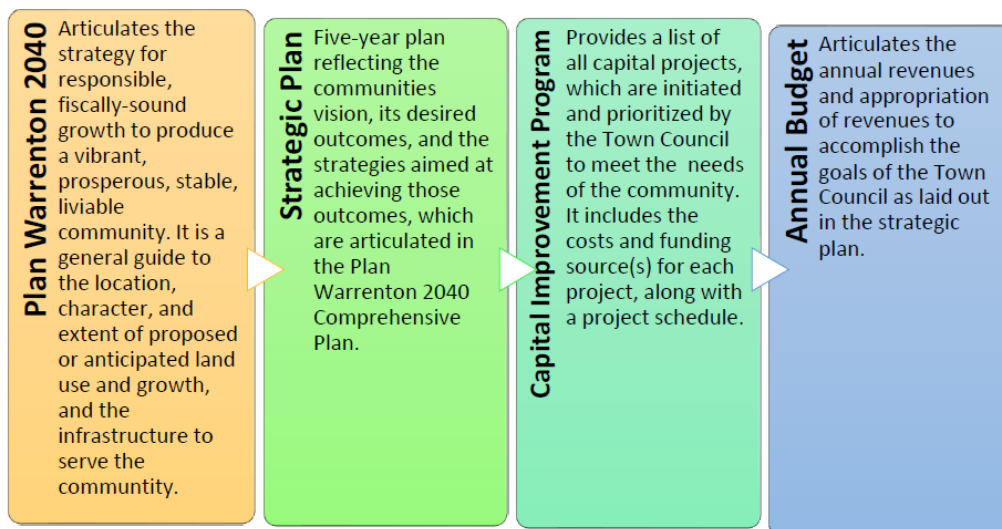

Interim Town Manager Christopher E. Martino introduced the agenda for the day. He stated that the goal of the day was a starting point for the fiscal 2023-2024 Budget and the Capital Improvement Plan.

Mr. Martino spoke about how the Town views itself with regard to the future by following Warrenton Plan 2040 and the Mission, Vision, and Values Statement that the Council had adopted. He highlighted the Goals of the Plan 2040 and the steps that the Council had been making to achieve the long term strategic goals they had laid out.

The Interim Town Manager continued to discuss the goals that the Council had laid out at the strategic retreat held in September of 2022. Highlighting that the Boundary Line adjustment item had been identified as no longer being a goal of the Town Council.

Mr. Martino began to lay out to the Council ways to tackle the goals laid out from the Council.

Mr. Martino recommended adopting a biannual goal to offer direction to Staff on their focus for the near future. He spoke on leadership philosophies that helped navigate staff from where the

Town was now, to where the Town was headed and how staff could help the Council attain those goals.

Mr. Martino shared a video by Simon Senik: Know your why.

[https://www.ted.com/talks/simon\\_sinek\\_how\\_great\\_leaders\\_inspire\\_action](https://www.ted.com/talks/simon_sinek_how_great_leaders_inspire_action)

Mr. Martino proposed the Town of Warrenton's "Why" was to provide quality of life for its citizens.

## 2. Fiscal Trends and Analysis

Stephanie Miller, Director of Finance, Presented to the Council an overview of financial trends and analysis. Topics included:

- **General Fund Overview**
  - Peer Comparisons
  - Fund Balance History and Trends
  - Review Historical Revenue and Expenditure Trends
  - Debt Management and Capacity
- **Enterprise Fund Overview**
  - Water and Sewer
  - Stormwater Management
- **Human Capital Overview**
- **Capital Improvements & Capital Asset Replacement**
- **5-Year Financial Projection**

The Council inquired about debt management, taking on additional debt, debt financing projects, and ratings.

Mr. Martino recommended consideration of the 50% Fund Balance Policy by the Council.

The Town Council discussed the 50% Fund Balance Policy and the factors that played into the policy and how it would affect the Town.

Ms. Miller introduced the concept of a budget stabilization fund and a waterfall account structure.

The Council finished the presentation from Ms. Miller

## 3. Human Capital

Mr. Martino introduced Ms. Kasey Braun, Human Capital Manager, to the council by highlighting that the most important asset that the Council had was the staff they employ. "We don't make widgets, we provide services."

Ms. Braun introduced the Classification and Compensation study to the Council. The study reviewed the pay plan, merit performance, and aspects of the pay structure for the Town of

Warrenton. He highlighted that the last time a comp and comp study was last completed in 2015, with approval for the current study being authorize in 2018 but delayed by the effects of the Pandemic. The Towns pay structure had not been updated since 2003.

Ms. Braun gave a brief overview of the Class and Comp study and the Paypoint HR vendor and how they produced the report.

Ms. Braun introduced a proposed Pay Play update to the Council. She reviewed the plan and explained the changes from the previous plan to the current plan today.

The financial impact of the proposed pay plan was discussed.

Discussions from Council circled around the changes to the pay plan and a proposed 10% increase in employee compensation across the board for staff.

Councilmen Mooney inquired as to why the proposal was a 10% compensation increase for all staff as opposed to a merit or a performance-based increase.

Mr. Cureton explained that the pay plan adjustment was proposed based on the data from the class and comp study to maintain the competitiveness in the market and that other avenues existed for merit and performance-based increases.

## 5. Lunch

The Council recessed for a lunch break.

## 6. Transportation

Mr. Martino started the discussion with a video by Michael Jr., Know Your Why. <https://www.youtube.com/watch?v=1ytFB8TrkTo>

The discussion was focused on the following topics:

- Transportation
  - Projects
  - VDOT Sources & Uses
  - What role does the County play in this moving forward?

Ms. Denise Harris provided a transportation update presentation to the Council.

Council discussed the presentation and inquired about long term positions on projects in the pipeline.

Mr. Frank Cassidy, Director of Public Works and Utilities, addressed questions from Council on road maintenance. He addressed the reactionary mentality that staff has had recently due to the

constraints of the pandemic and the changing philosophy of staff to refocus the efforts into utilizing the best impact of the finances and programs available.

### **7. Break**

A short recess was called. At the conclusion of the recess, Mr. Tommy Cureton announced adjustment to the schedule stating that some of the original agenda items for the day would be addressed as individual departmental reports at upcoming Town Council meetings.

### **8. Summarize 6- Year CIP & 5 Year Budget**

Ms. Miller introduced the changes made to the Capital improvement projects and how the finance team was communicating them to the Council.

Staff and Council reviewed the Capital Improvement Projects including the newly added escalation factor that has been implemented to better capture future costs.

Councilmen Semple inquired about the status of the remaining ARPA funds and the proposal from Habitat for Humanity to use the funds for affordable housing.

Mr. Martino explained that he had met with Habitat to discuss a proposal, but that habitat had to meet with the County and other partners for the next step in the process.

Mr. Cassidy addressed questions from the Council for the Water and Sewer system and the improvements planed to the Town's Water and Treatment Plants. Discussion focused on capacity, necessary improvements, and deferred maintenance of the facilities.

Council discussed the criticality of the proposed projects and how to address the issues presented.

Mr. Martino presented summary data that mapped out a way for the Town's budget to incorporate the options laid out from staff over the course of the day. The data showed five year projections including capital and debt service projections.

Mr. Heroux asked Mr. Martino if there was a scenario that would lead to the Council needing to raise the tax rate to fund the projections.

Mr. Martino answered that if economic conditions changed drastically based on how Warrenton has the tax structure established some taxes may need to be raised.

Discussion from Council resolved around living within the means of the budget and balancing the tax rates across the stakeholders.

### **9. Biannual Goal**

Mr. Martino introduced a pathway to narrow down the Plan 2040 into pieces to focus on and accomplish over the next two years. He opened the discussions to the Council for them to identify the goals they wished to focus on.

Mayor Nevill thanked Mr. Martino for his efforts in this presentation, discussion, and preparations for the upcoming budget season.

The Council thanked Staff and Mr. Martino for the efforts made for today's presentations.

### 10. Closed Session on Recruitment for a New Town Manager.

Vice Mayor Hartman moved to convene a closed session under:

**Virginia Code § 2.2-3711 (A)(1), a personnel matter involving: Town Manager Recruitment, Acting Town Manager Appointment, Police Department Personnel Update**

Mr. Paul Mooney Seconded.

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

**Nays:**

**Abstention:**

**Absent:**

Upon reconvening from the closed session, Town Council adopted the following Certification of Closed meeting:

#### CERTIFICATION OF CLOSED MEETING

**WHEREAS**, the Town Council of the Town of Warrenton has convened a closed meeting on this date pursuant to an affirmative recorded vote in accordance with the provisions of the Virginia Freedom of Information Act; and

**WHEREAS**, Section 2.2-3172 E of the Code of Virginia requires a certification by the Town Council that such closed meeting was conducted in conformity with Virginia law;

**NOW, THEREFORE, BE IT RESOLVED** that the Town Council hereby certifies that, to the best of each members knowledge, (i) only public business matters lawfully exempted from open meeting requirements by Virginia law were discussed in the closed meeting to which this certification resolution applies, and (ii) only such public business matters as were identified in the motion convening the closed meeting were heard, discussed or considered by the Town Council

Vice Mayor Hartman proposed the certification, Councilmen Hamby seconded, the vote for the motion was unanimous, as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

**Nays:**

**Abstention:**

**Absent:**

**ADJOURNMENT.**

**With no further business, this meeting was adjourned at 3:50pm on Saturday February 25<sup>th</sup>, 2023.**

**I hereby certify that this is a true and exact record of actions taken by the Town Council of the Town of Warrenton on February 25<sup>th</sup>, 2023.**

### WORKSESSION - 9:00 AM

The Mayor Called the meeting to order at 9:00am. A quorum was present, and business could be conducted.

1. Closed Session

Closed Session under VA. Code §2.2-3711 (A)(8) Legal matters, specifically where such matters require the provision of legal advice, under Virginia Code

Councilmen Semple moved to convene a closed session as permitted by Virginia Code § 2.2-3711 (A)(1), a personnel matter involving: Discussion, consideration, or interviews of prospective candidates for employment or appointment; OR assignment, appointment, promotion, performance, demotion, salaries, disciplining, or resignation of specific public officers, appointees, or employees of the Town; specifically dealing with Town Manager Recruitment. Councilmen Heroux Seconded. There was no discussion.

- Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.
- Nays:
- Abstention:
- Absent: Mr. Brett Hamby.

Upon reconvening at 10:13 AM from the closed session, Councilmen Semple moved to adopt the following Certification of Closed meeting:

**CERTIFICATION OF CLOSED MEETING**

**WHEREAS**, the Town Council of the Town of Warrenton has convened a closed meeting on this date pursuant to an affirmative recorded vote in accordance with the provisions of the Virginia Freedom of Information Act; and

**WHEREAS**, Section 2.2-3172 E of the Code of Virginia requires a certification by the Town Council that such closed meeting was conducted in conformity with Virginia law;

**NOW, THEREFORE, BE IT RESOLVED** that the Town Council hereby certifies that, to the best of each members knowledge, (i) only public business matters lawfully exempted from open meeting requirements by Virginia law were discussed in the closed meeting to which this certification resolution applies, and (ii) only such public business matters as were identified in the motion convening the closed meeting were heard, discussed or considered by the Town Council

Councilmen Heroux seconded, there was no discussion, the vote for the motion was unanimous, as follows:

- Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.
- Nays:
- Abstention:
- Absent: Mr. Brett Hamby

**2. Lease Franchise Agreements**  
**1. Glo Fiber**

Mayor Nevill introduced Mr. Olaun Simmons, town attorney, to introduce the Glo Fiber lease franchise agreement.

Mr. Simmons summarized the requests from Glo Fiber and stated what the following steps would be.

Mayor Nevill and Councilmen Mooney asked for clarification on the bidding process.

## 2. Water Tower DISH Lease Agreement

Mr. Simmons summarized the request from Dish regarding use of the Town water tower as a transmission station. Additionally, this would require the removal of Sprint's equipment that was already on the water tower and replacing it with Dish's. Mr. Simmons stated the next steps the Town would need to take.

Councilmen Heroux asked for clarification on why Dish was seeking a contract instead of Sprint.

Mr. Simmons clarified that Sprint's contract for the water tower was ending.

Councilmen Hamby asked about the negotiation process for Dish's potential lease.

Mr. Cassidy outlined the rental process of several entities that were using the water tower's space, and why Dish was seeking a lease.

Councilmen Semple asked if this was outside of the planning commission's review.

Mr. Cassidy stated that this was standard practice as outlined by state and local codes.

## 3. Ordinance Changes-

### 1. Recorder Appointment Designated the Responsibility of the Town Manager

Acting Town Manager Cureton outlined short-term Town history regarding the resignation of the previous Town Clerk and the appointment of a temporary Town Clerk. Mr. Cureton outlined state and local codes regarding the appointment of a Town Clerk.

Mr. Cureton stated that the goal that evening was to designate appointment power for the Town Recorder to the Town Manager.

Councilmen Semple asked about the Council's role in appointing a Town Recorder. Specifically being appointed by Council but *administered* by the Town Manager.

Mayor Nevill mentioned the hiring process of the Town Clerk, and the purpose of designating appointment power to the Town Manager for efficiency.

Councilmen Mooney voiced an opinion that the Council should appoint the Town Recorder.

Mayor Nevill pointed out the greater oversight that a Town Manager would have over the Town Recorder, rather than the Town Council.

There was discussion and agreement that wording should be changed.

## 2. Indemnification of Town Employees

Acting Town Manager Cureton stated that Town employees are not protected from legal action; therefore, there was recommendation of a policy that indemnified employees from legal liability of the Town. Mr. Cureton assured that disciplinary actions and performance evaluations were still in place, but the Town would cover employees if they were sued personally for Town actions.

Mr. Simmons stated that this is a standard policy for governments.

Councilmen Heroux asked if police were covered and if insurance premiums would be increased.

Mr. Simmons stated that police would be covered but insurance premiums *may* increase.

Councilmen Mooney commented about the impacts of wording on legal interpretation.

Councilmen Semple agreed with concerns about wording.

Mr. Simmons stated that that night was for receiving public opinions and acting as a jumping-off point.

Mayor Nevill asked whether it should be removed from the agenda. Councilmen McGuire affirmed. Mayor Nevill stated that it would be removed from the agenda for further consideration.

Councilmen Sutphin mentioned her previous experience referencing the need for a policy protecting employees in this manner. Mayor Nevill agreed.

Councilmen Mooney stated that rushing was a bad idea.

Councilmen Sutphin stated that protecting employees was necessary with policies able to be tweaked after or during implementation. Councilmen McGuire agreed.

Vice Mayor Hartman emphasized the importance of acting soon.

Mayor Nevill stated that it would be left on the agenda for the evening.

## 4. Town / County Liaison Update

Acting Town Attorney Cureton mentioned various topics from the Town/County Liaison meeting, including Dominion Power Lines; relocation of Town utility department to Coral Farm and the transfer of that land to the Town; water filling station project update being completed soon; crosswalk protection at Lee and Ashby streets; housing near route 211; affordable housing; and ADA issues at facilities.

Councilmen Semple asked about funding and timelines for the public works facility. Mr. Simmons stated that the estimated costs for the facility were \$30,000,000. Mr. Cassidy gave tentative time tables for moving forward with the project, and when an official timetable would be given.

Councilmen Mooney asked about the environmental study. Mr. Cassidy and Mayor Nevill stated answered that the current facility would need to be reviewed for future development and the potential site's environmental study was half-complete.

Councilmen Semple mentioned a previous proposal from Habitat for Humanity for Haiti Street.

## 5. Town Council Handbook

### 1. Rules of Procedure

### 2. Ethics Statement

Mr. Cureton stated that the code of ethics was drawn from the Virginia State code of ethics.

### 3. Boards Committees Commissions

Mr. Cureton provided a brief outline of active and inactive committees the Town operates and that have authority over the Town. Mr. Cureton pointed out that many of the Town's inactive communities had disbanded in 2020, with the COVID-19 pandemic.

Mr. Cureton provided a cost estimate based on salaries, advertising, staffing, etc. necessary for four committees to meet bi-monthly.

Councilmen McGuire recommended increased tasks be delegated to committees for cost and time efficiency with possible consolidation of duties between them.

Councilmen Semple asked why so much money needed to be spent to return to previous functions. Mr. Cureton stated that time management and technological requirements introduce new costs. Mayor Nevill stated that in the past, there had been exploitation of staff to reduce costs without a true cost assessment.

Councilmen Semple stated that the Town did not previously note the consequences of staff being overworked in the past, despite there likely being consequences of individuals working multiple positions. Councilmen Semple stated that a conversation of which committees were most necessary was needed because of this.

Councilmen Sutphin emphasized the importance of costs of the meetings, and a discussion of which committees are most necessary.

### 4. Work Session Meeting Dates

Mr. Cureton described a brief history of the dates and time in which work sessions were held in different locations for the Town of Warrenton. Mr. Cureton stated that if work sessions were in the evening, they would likely need more of a police presence and staff to rearrange the dais. If work sessions were on a different day, the council could have more time to think about specific issues.

Mayor Nevill recommended that the work sessions remain in the morning, as employees already work during the day. Therefore, if employees were needed, they could be called down without extra pay.

Councilmen Semple outlined the negative effects of having a work session on the same day as the regular meeting.

There was discussion about how the public cannot attend work sessions during work hours.

Councilmen Semple referenced a possible schedule in which the work is after the regular meeting.

## 6. Agenda Review

Acting Town Manager Cureton stated that the swearing-in ceremony for Chief Carter would be held that evening.

Mr. Cureton stated that they would move forward with public hearings on Glo Fiber, the Dish water tower lease, indemnification for employees, and language changes for the Town Recorder appointment.

Mr. Simmons stated that the Town Attorney Crim had recommended the Town participate and sign all documents related to an opioid settlement in a lawsuit filed against Walmart, CVS, Walgreens, and other retailers. Councilmen Heroux asked for clarification about how the Town was participating. Mr. Simmons stated that it was so the Town could receive money from the settlement. There was discussion about how to use the money.

Councilmen Semple asked if Mr. Cureton could provide an update on the Amazon SUP site during the meeting.

There was discussion about the purpose and clarity of Citizen's Time during the regular meeting.

The Meeting was adjourned at 12:22 PM.

---

## REGULAR MEETING - 6:30 PM

Mayor Nevill called the meeting to order at 6:30 PM, a quorum was present and business could be conducted.

### 1. Swearing in Ceremony for Chief Carter 6:00 PM

Chief Timmothy Carter was sworn in by Gail Barb, Clerk of the Circuit Court of Fauquier County.

## **INVOCATION.**

Chaplain Wally Smith of the Warrenton Police Department led the invocation.

## **PLEDGE OF ALLEGIANCE.**

Mayor Nevill led the pledge of allegiance.

## **CITIZEN'S TIME.**

Dave Winn, 7960 Wellington Dr, Warrenton spoke regarding lack of permits for the Amazon Data Center.

Dave Gibson, 7548 Foxview Dr, Warrenton, spoke regarding permits for the Amazon Data Center.

Denise Schefer, 6080 Whippoorwill Dr, spoke regarding Amazon Data Center permits.

Melanie Burch, 98 Alexandria Pike, spoke about ARPA funding.

Kevin Ramundo, 9757 Elmwood Rd, spoke about Amazon Data Center permits.

Greg Ashwell, 9476 Foxville Rd, spoke about ARPA funds for Habitat for Humanity.

Barbara Amster, 726 Acorn Ct, spoke regarding zoning for and lobbying against the Amazon Data Center.

Erin O'Donnell, 52 Blue Ridge St, spoke regarding the Amazon Data Center.

Dana Pappas, 7101 Westmoreland Dr, spoke about ARPA funding for Habitat for Humanity.

Josephine Gilbert, Scott Dr, spoke regarding Black Lives Matter and culture wars.

Eric Gagnon, 200 Winchester St, spoke regarding the Amazon Data Center.

Ann Kehoe, 7000 Beaconsfield Ln, spoke regarding the Amazon Data Center.

Bernardine Connely Clark, 71 Menloyh Dr, spoke about Amazon Data Center permits.

Cindy Burbank, 6347 Barn Owl Ct, spoke regarding the Amazon Data Center permits.

Larry Kavolich, 39 Brookshire Dr, spoke regarding Amazon Data Center SUP.

## **APPROVAL OF THE AGENDA.**

## **PUBLIC HEARINGS.**

1. **Public Hearing: Lease-Franchise Agreement Glo Fiber**

Mr. Simmons summarized Glo Fiber’s request for the installation of telecommunication equipment within the Town’s right-of-way via a franchise agreement.

Mayor Nevill opened the floor for public hearing at 7:17 PM.

There were no speakers.

The Public Hearing was left open through the conclusion of the bid process.

**2. Public Hearing: Lease-Franchise Agreement Water Tower**

Mayor Nevill opened the floor for public comment on the Dish Lease-Franchise agreement at 7:18 PM.

There were no speakers.

The Public Hearing was left open through the conclusion of the bid process.

**3. Public Hearing: Indemnification of Town Employees**

Mr. Cureton answered a question from the worksession regarding insurance premiums. Mr. Cureton had contacted the Town’s insurance regarding the earlier questions from Council but had not heard back.

Councilmen McGuire asked if this policy was treating police officers the same as all other employees.

Councilmen Mooney asked for clarification on the insurance policy’s indemnification and the adoption of an indemnification policy.

Councilmen Heroux states that this is the codification of the insurance policy so it may take place.

Mayor Nevill opened public hearing for the indemnification of Town employees at 7:23 PM.

Jean Boenish with BASS spoke regarding taxpayer money, the Amazon Data Center, and employee misconduct, and the First Constitutional Amendment. Mayor Nevill notified Ms. Boenish to remain on topic.

The Public hearing was closed at 7:28PM

Councilmen Heroux described the purpose of indemnification and why it is necessary, how it is unrelated to the Amazon SUP, and how many organizations and governments already require such indemnification. Councilmen Sutphin, Councilmen McGuire, Councilmen Semple, and Mayor Nevill contributed examples for clarity.

Councilmen Mooney stated that it should be examined before passing. Councilmen McGuire stated that he felt a sense of urgency, especially for police officers.

Vice Mayor Hartman motioned to approve Ordinance 2023-02 to amend sections number 2-97, 2-98, and 2-99. Councilmen Sutphin seconded. There was no discussion. The vote was as follows:

- Ayes: Ms. Heather Sutphin; Mr. William Semple; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.
- Nays:
- Abstention:
- Absent: Mr. Brett Hamby.

**The motion passed unanimously; Indemnification of Town Employees was approved.**

**4. Public Hearing: Recorder Appointment Designated the Responsibility of the Town Manager**

Mayor Nevill read the wording changes prompted from the discussion from the morning worksession. The changes to the language established the Appointment of the Clerk by the Town Council and the management of the clerk and deputies a responsibility of the Town Manager. Mayor Nevill opened the public hearing for the recorder appointment redesignation to the Town Manager at 7:41 PM. Mayor Nevill closed public hearing at 7:42 PM.

Vice Mayor Hartman motioned to approve the Ordinance to amend section 2-96 of the Town Code. Councilmen Sutphin seconded.

Councilmen Semple stated that he investigated how other localities appointed/hired their Town Recorders, and this was how they did it. The vote was as follows:

- Ayes: Ms. Heather Sutphin; Mr. William Semple; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.
- Nays:
- Abstention:
- Absent: Mr. Brett Hamby.

**The motion passed unanimously; the ordinance to redesignate hiring/appointment duties of the Town Recorder to the Town Manager and Town Council respectively was approved.**

**NEW BUSINESS.**

**1. Opioid Settlement.**

Town Attorney Simmons stated that Town Attorney Crim recommended that the Town participate in this opioid settlement.

Councilmen McGuire stated that he wanted to see how much money would be diverted to the police department for Narcane purchase.

Mr. Simmons clarified that this paperwork was necessary for the Town's receipt of money from the settlement. Vice Mayor Hartman stated that purpose of funding could be decided later.

Mayor Nevill called the question of whether to approve the resolution for the Town's participation in the opioid settlement against various retailers. The vote was as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. James Hartman,  
Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

Nays:

Abstention:

Absent: Mr. Brett Hamby.

**The resolution passed unanimously.**

---

## 2. Acting Town Manager Extension

Mayor Nevill explained that this resolution was to extend Acting Town Manager Cureton's contract by three days to attend the following Town Council Meeting in which Mr. Cassidy would be appointed Interim Town Manager.

---

Councilmen Heroux motioned to approve the resolution to extend Mr. Cureton's contract by three days. Vice Mayor Hartman seconded. The vote was as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. James Hartman,  
Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

Nays:

Abstention:

Absent: Mr. Brett Hamby.

**The motion passed unanimously; Mr. Tommy Cureton's tenure as the Acting Town Manager was extended.**

---

## 3. Town Recorder Appointment

Mayor Nevill explained that given the passage of the Ordinance to amend section 2-96 of the Town Code, there needed to a resolution to appoint Town Clerk Clough as the Town Recorder.

Vice Mayor Hartman moved to approve Mr. Clough as the Town Recorder. Councilmen Sutphin seconded.

There was discussion commending the service of Mr. Clough.

The vote was as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. James Hartman,  
Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.

Nays:

Abstention:  
Absent: Mr. Brett Hamby.

**The motion passed unanimously. Mr. Stephen Clough was appointed as the Town Recorder.**

---

**TOWN ATTORNEY'S REPORT.**

Mr. Simmons commended Chief Carter on his appointment and thanked him for his service.

**TOWN MANAGER'S REPORT.**

Mr. Cureton referenced the promotion of Mr. Diggs to the Town's Fire Inspector in Fire in 2023. Mr. Cureton announced that Mr. Diggs had passed necessary inspections and training necessary for this position.

Three employees had graduated the Town CDL program within the Town's Public Works Department.

Mr. Cureton stated that the budget would be submitted by April 1, 2023.

Mr. Cureton stated that there had been communication about violations of the Amazon Data Center SUP to the owner of the site.

Councilmen McGuire asked to see a report about such violations.

---

**COUNCILMEMBERS TIME.**

**Councilmen Mooney** - Commended Town Clerk Clough and Chief Carter for their appointments. Mooney also thanked citizens for speaking to the Council. He stated that he thought someone should be put in charge to make sure the Amazon SUP is not in violation.

**Councilmen Sutphin** - Commended Chief Carter and spoke about his character. She mentioned the COVID-19 Pandemic and other factors that made the past several years difficult but stated that the Town's police and employees have made it better. Ms. Sutphin acknowledged National Women's Month.

**Councilmen Semple** - Commended Chief Carter and referenced his own military service. Semple commended citizens for demonstrating their views.

**Vice Mayor Hartman** - Congratulated the Town's employees for their achievements.

**Councilmen Heroux** - Congratulated Chief Carter and Town Clerk Clough. Thanked the Public Works crew for helping with infrastructure issues. Mr. Heroux pleaded with citizens to drive slower. He also suggested people participate in charity.

**Councilmen McGuire** - Referenced his police service and stated that individuals have attacked the council too harshly. McGuire asked citizens to treat the Council with more respect. McGuire congratulated Chief Carter and Town Clerk Clough. Referenced St. Patrick's day.

**Mayor Nevill** – Referenced the Police Department’s goal of having 30% of officers be women. Congratulated Town Clerk Clough for his work and modernization of the Town’s systems. Congratulated Chief Carter for being confident, compassionate, and having good leadership.

**ADJOURNMENT.**

**With no further business, this meeting was adjourned at 8:13 PM on Tuesday, March 13<sup>th</sup>, 2023.**

**I hereby certify that this is a true and exact record of actions taken by the Town Council of the Town of Warrenton on March 13th, 2023.**

---

Stephen M. Clough  
Town Recorder

Draft: Not yet approved by Town Council

Now, on 3/14/23, the Town Council is trying to make the townspeople responsible for all legal expenses in defense of every bit of wrong doing that resulted in the Council's vote to approve the data center SUP. The people will have none of it, but you on the Council can easily fix the whole problem by changing your vote now to a proper denial of that data center SUP.

Instead of the Warrenton Town Council actually following all ethical codes and legal rules, its consideration of passing an ordinance such as this is nothing less than conspiracy to commit self-dealing in order to evade just correction and to further defraud the taxpayers and the town. It is yet another bad ordinance that the Town is being poorly counseled to copy from Manassas. Four Town Council members have an immediate and pervasive conflict of interest in this bottomless re-direction of town funds for their exhaustive defense; the Town Charter prohibits their votes on this issue; the other Council members are expected to see past false claims and not support further cover-up of wrong doing that this ordinance attempts to supply.

Specifically the Town Attorney (from Manassas) and Town Council members who are indefensibly trying to skirt the issue of the invalidity of their 2/15/23 vote want their constituents whom they did not represent to pay for those Council members' wrong-doing, literally even if it bankrupts the town, as this ordinance wording completely allows. It also coerces the effective equivalent of non-disclosure agreements - to get those who receive monetary coverage for their own defense to also supply cover for the Town's defense. This does not make your first data center vote right but tries to intimidate and punish all town residents for recognizing and democratically working to correct the Town Council's habitually authoritarian non-public-servant-like actions.

Since the Town Council's improper and highly questionably vote, townspeople have been voting online by their Virginia Constitutional right to nullify the Town Council's bad administration by a majority of the community vote to deny the data center SUP, as partial redress. The public-service direct link to casting that voting ballot is currently posted on Nextdoor social media and available on flyers around town for sharing and helping elders each cast their vote as well:

<https://www.powr.io/form-builder/i/35132408#page>

The most obvious, reasonable, and practical initial solution for the Town Council is threefold:

**Seek honorable legal advice elsewhere.**

**Refuse to take up the ordinance irresponsibly placed before you.**

**Rescind and re-vote:** The Town Charter conveniently provides that any four Council members can now call for and immediately conduct a special meeting specifically to "rescind the Town Council's improper SUP vote of 2/15/23, and replace it now with a vote properly denying that SUP". That should take 5 minutes and cost nothing. There would be no breach of agreement as the entire 2/15/23 vote was previously identified as conducted in violation of the Town Charter's conflict of interest rule, perjury notwithstanding, so no contract could be made or legally entered as a result of that invalid vote; the SUP applicant's attorney-representative was well aware of the more than questionable legality surrounding any vote to grant the data center SUP. Stop the Town Council's compounding legal violations and really save the Town money by correcting the pivotal mistake: Let's hear a motion and second to call a special meeting now to "rescind the Council's previous Amazon Data Center vote and vote properly now to deny that Special Use Permit application 2022-03.

– Jean Boenish 3/14/23, to the Town Council at the Public Hearing

The community recognizes only as invalid and unrepresentative of the will of the community the Town Council's 2/15/23 vote on Warrenton, VA, Special Use Permit application 2022-03 Amazon Data Center.

The townspeople and Fauquier County community, including every individual thereof, refuse and abjure any and all responsibility and liability for the misdeeds, actions, lack of factually-based decision making, and negligence, individually and as a voting bloc, of the Town Council members, Town staff, and Town employees, whether current or former, who supported, facilitated, or neglected to actively oppose the vote to grant rather than to logically and appropriately deny that SUP. The Town Council was fully forewarned by its constituents either to not vote as they did, contrary to their oaths of office, or to let the townspeople vote directly on the issue of this SUP.

Further, no deadlines or limitations stand on the community's right to reverse any and all effects of said Town Council's vote and maladministration, whether admitted or not, including current and future attempts by the Town to pass culpability and payment for defense of malfeasance, whether proven or not, on to the people of the Town, including inhabitants of future Town boundary line adjusted or annexed areas; neither can any culpability or liability rightfully be passed to the county or to county residents.

Further, all costs of property and incidental damage, claims, value reductions, loss of appropriate natural-quality habitat, or results of failure to properly maintain a residential atmosphere in any granted-SUP-affected area, must be borne individually, together, or separately, only by any and all Town Council members and staff and employees thereof who did not and have not acted to reverse and nullify the Town Council's supposed granting of the SUP on 2/15/23, whether by abuse of legal authority, negligence, ignorance of policy or law, or on bad advice of counsel.

Full Virginia Constitutional protection is afforded to every citizen who has recognized the Town Council's ongoing maladministration surrounding and consequent to this SUP and the Town Council's 2/15/23 vote thereon and who has or will individually vote to correct that maladministration in accordance with their full Virginia Constitutional rights, including all pertinent community manifestations of Article 1, Section 2, and Article 1, Section 3, without limitation on, impedance of, or liability or penalties for full and immediate effective expression and representation of the will of the majority of the community in this regard.

Further, any individual, authority, volunteer, or observer of any governmental branch who fails to uphold and ensure the right of the community to effect these corrections through Article 1, Section 2 and Section 3, is in immediate constitutional violation and fully liable therefor and responsible for every result therefrom. No costs, fees, hikes, liabilities, or penalties of any kind may be passed back down to the people, taxpayers, residents, or representatives who are acting through or supporting Article 1, Section 2 or Section 3, or both, to correct apparent maladministration. No charges need be brought by or on behalf of the community for a public servant's neglect of upholding sworn adherence to Article 1, either Section 2 or Section 3, since the majority of the community's expressed corrective mandate suffices.

— Jean Boenish 3/13/23, as a public service to the community

**WARRENTON TOWN COUNCIL****March 14, 2023**

Good-evening Mayor, Council Members, community members. My name is Josephine Gilbert and I live in the Scott District.

So here we are, 2 weeks after making the national and possibly international news on the goings of Saturday morning at the courthouse square. What has been accomplished? A community and business leader outed because he took sides and threw his staff under the bus. A parent distraught because their 17<sup>th</sup> year old is on social media. A political leader who took sides before finding out what happened.

It amazes me how this town and county still has not figured out we're in a cultural war and our town is being used. Look at what's happening with our schools? Where do you think they were organized? You may not want to admit it, but this group represents evil and indoctrination. Why should you continue to spend another penny on them? Don't you know they are fraudulent? Even Amazon stopped their fundraising/charity program with BLM.

Cost to the town so far in excess of \$75,000

I'm meeting with Chief Carter to go over the ordinance.

This is not hard, they need a new place to meet.

Agenda Item	Amazon Web Services SUP Application
Comment	<p>I write regarding the special use permit application you will be voting on.</p> <p>I'm a Civil Engineer, and I review site construction plans and permit applications. I gave the SUP application in question a read, and I found it to be an incomplete application.</p> <p>In my experience, it is incomplete to an extent that would be unusual for approval in a large-scale project such as this one.</p> <p>Now we know in a special use the burden of proof is really on the applicant to provide a thorough analysis of the downsides and compelling reasons why they should receive an exception.</p>

Draft: Not yet approved by Town Council

This is what the Statement of Justification in this permit is for. But this Statement of Justification fails to provide the requested analysis.

There are sixteen criteria here to be addressed. In my judgment, the applicant did adequately discuss and analyze 6 of the 16 criteria. But the remaining 10 either are avoided or the responses have not stood up to closer examination.

Let's take the environmental impact for one example... This is criteria 10 and 16

"10. Whether the proposed Special Use Permit at the specified location will result in the preservation or destruction, loss or damage of any significant topographic or physical, natural, scenic, archaeological or historic feature.

16. The effect of the proposed Special Use Permit on environmentally sensitive land or natural features, wildlife habit and vegetation, water quality, and air quality."

In the initial submittal, the Applicant responds "In 2020, the Applicant became the world's largest purchaser of renewable energy. It's facilities are almost 4 times as energy efficient as other enterprise data centers etc etc" it goes on like that

In my judgment, that response does not adequately address the environmental impact. How could it? Similar comments can be made about the 8 other criteria. What improvements the application has, have essentially been made at the direction and demand of the citizens.

The Planning Commission and the citizens have spent the last few months essentially doing the Applicant's work for them -

providing analysis, addressing the tough questions, quality controlling studies, developing feasibility options, even correcting typos and topographic errors.

This application, even as it stands now, is in my judgment not thorough or complete enough to move forward.

You would be right to vote no.

Comment	Hello,

I recently moved to Old Town Warrenton. I'm not able to attend the town council meeting tonight but wanted to make my voice heard. I oppose Amazon and the power towers. I do not want to see Warrenton turn into Arlington or another hub of endless buildings. Please save this lovely town!

Sincerely Taryn Meeks

Comment	<p>Regarding the data center permit, thank you for your courageous vote to bring some growth and revenue to Warrenton. Doing what is right is not always popular, and I was truly impressed by your professionalism and courage in the midst of resistance. Many of us who welcome bridled growth, such as this permit, fail to see how a possibly slightly humming data center would bring about noise pollution next to an existing highway--an absurd position to take in my opinion. Again, thank you and keep up the great work in keeping Warrenton unique and thriving at the same time.</p> <p>-Charlie Keith</p>

I am writing to urge the Council to decline the request to approve the massive data center in town due to the noise and vibration that will be caused by the center. The noise will be a permanent loss of the quiet that is a part of Warrenton and once lost, cannot be regained. Approval of this proposal will permanently change Warrenton's small-town appeal and Fauquier County's rural character, and significant noise and visual impacts will affect citizens and visitors alike. Citizens and visitors arriving from the East will be greeted by a fifty-foot-high building on an elevated site, right at the eastern entry to Warrenton. The data center and power lines will be visible from many parts of both Warrenton itself and the surrounding countryside.

If any members have not physically visited the Ashburn data alley, they may not appreciate the gravity of this decision.

Please don't sell out the town for such a short-term financial gain at the expense of the town, its quiet nature, and its residents.

Prof Mosgoeller's missive is on its way ! Hope someone is in the office to retrieve it, should it seem a good idea to read aloud tonight.

It will be a general statement only.

Hi Mark

To write a statement I should know the situation.

Is the situation like the following: A company plans to built a huge sth. which will increase the residents permanent (day and night, 7 days /week ) exposure to EMF (electromagnetic fields).

In short:

The project will (or may) increase the risks associated with EMF in the low frequency range (50 60 Hz, powersupply). Possibly EMF in the high frequency range (telecommunication, data exchange)by radiofrequencies) is also on the list.

In the USA the environmental immissions from EMF appliances are limited. Official safety standards are issued by the so called IEEE (I triple E). Typically citizens are concerned because high voltage powerlines can increase the environmental field exposure, while the official safety limits for EMF field exposure do not protect for diseases associated with long term exposure. There are ways to minimize EMF Imissions (from high voltage power lines and reduce associated risks by specific arrangement of the electric wires. I recommend to consider environmental field reduction allready in the planning phase better safe than sorry.

Dear Town Council, It was my intent to speak this evening as part of the public comments. A sudden illness keeps me from doing so. While it is very last-minute, I hope these comments can be included in the record. Below is my prepared comment.

Regards,  
Ellen Zagrobelny

I'm going to speak to you about the special use permit application you will be voting on.

I'm a Civil Engineer, and I review site construction plans and permit applications. I gave the SUP application in question a read, and I found it to be an incomplete application. In my experience, it is incomplete to an extent that would be unusual for approval in a large-scale project such as this one.

Now we know in a special use the burden of proof is really on the applicant to provide a thorough analysis of the downsides and compelling reasons why they should receive an exception. This is what the Statement of Justification in this permit is for. But this Statement of Justification fails to provide the requested analysis.

There are sixteen criteria here to be addressed. In my judgment, the applicant did adequately discuss and analyze 6 of the 16 criteria. But the remaining 10 either are avoided or the responses have not stood up to closer examination.

Let's take the environmental impact for one example... This is criteria 10 and 16 "10. Whether the proposed Special Use Permit at the specified location will result in the preservation or destruction, loss or damage of any significant topographic or physical, natural, scenic, archaeological or historic feature.

16. The effect of the proposed Special Use Permit on environmentally sensitive land or natural features, wildlife habit and vegetation, water quality, and air quality."

In the initial submittal, the Applicant responds "In 2020, the Applicant became the world's largest purchaser of renewable energy. It's facilities are almost 4 times as energy efficient as other enterprise data centers etc etc" it goes on like that

In my judgment, that response does not adequately address the environmental impact. How could it? Similar comments can be made about the 8 other criteria. What improvements the application has, have essentially been made at the direction and demand of the citizens.

The Planning Commission and the citizens have spent the last few months essentially doing the Applicant's work for them -

providing analysis, addressing the tough questions, quality controlling studies, developing feasibility options, even correcting typos and topographic errors.

This application, even as it stands now, is in my judgment not thorough or complete enough to move forward.

You would be right to vote no.

Dear Director of Community Development Rob Walton,

THE SPECIAL USE PERMIT SHOULD BE APPROVED. THE COUNCIL SHOULD BE DECIDING THE FUTURE PATH OF WARRENTON AND SINCE IT HAS A NEGLIGIBLE EFFECT ON HISTORIC WARRENTON THE COUNSEL SHOULD OBVIOUSLY APPROVE THE PERMIT ON THE BASES THAT IN ORDER TO HAVE A HISTORY TO PRESERVE, ONE MUST ACCEPT HOW HISTORY IS MADE.

THIS APPROVAL WOULD BE HISTORICAL AND THE LOCATION IS PERFECT.

Sincerely,  
Nicholas Allen

Town Council  
Regular Meeting

ORDINANCE 2023-02

AN ORDINANCE TO ADD SECTIONS NUMBERED 2-97, 2-98, AND 2-99 TO THE TOWN CODE TO PROVIDE FOR INDEMNIFICATION OF TOWN STAFF

WHEREAS, Section 15.2-1520 of the Code of Virginia allows the locality to authorize the Employment of counsel to defend localities and political subdivisions, governing bodies, officers or employees in certain proceedings; costs and expenses of such proceeding; and

WHEREAS, the Town Council has determined that it is appropriate and in the public interest to provide for the indemnification of Town Elected Officials, Officers and Employees; and

NOW, THEREFORE, BE IT ORDAINED by the Warrenton Town Council this 14th day of March, 2023, that the Warrenton Town Code be, and is hereby, amended to add sections numbered 2-97, 2-98, and 2-99 as follows:

**Sec. 2-97. - Defense and indemnification generally.**

(a) Upon compliance by town officers and employees with the provisions of subsection (d) of this section, the town council may employ the town attorney or other counsel to provide for the defense of the town, the council, or any member thereof, or any officer or employee of the town, or of any trustee or member of any board or commission appointed by the town council, in any legal proceeding to which the council, or any member thereof, the town or any of such persons may be a defendant, when such proceeding is initiated against it, or them, by virtue of any actions in the furtherance of their duties in serving the town as its governing body or as members thereof or the duties or service of any officer or employee of the town or any trustee or any member of any board or commission appointed by the town council.

(b) To the extent that such liability is not covered by insurance, the town shall indemnify and save harmless its officers and employees in the amount of any judgment obtained against such officers and employees in any state or federal court, or in the amount of any settlement of a claim, provided that the act or omission from which judgment or settlement arose occurred while the officer or employee was acting within the scope of his or her public employment or duties. The duty to indemnify and save harmless prescribed by this subsection shall not arise where the injury or damage resulted from deliberate wrongdoing, [willful or wanton conduct](#), [gross negligence](#) or recklessness on the part of the officer or employee.

(c) To the extent that such costs and expenses are not covered by insurance, all costs and expenses of such proceedings so defended shall be charged against the treasury of the town and shall be paid out of funds provided by the town council. Further, if any settlement is agreed upon [with the concurrence of Town Council](#) or judgment is rendered against any of such named persons or the council, the town council shall pay such settlement or judgment from public funds or other funds or in connection therewith may expend public or other funds for insurance or to establish and maintain a self-insurance program to cover such risk or liability.

(d) The duty to defend or indemnify and save harmless provided by this section shall be conditioned upon:

(1)Delivery, to the town attorney or an assistant town attorney, at the attorney's office, by the officer or employee, the original or a copy of any summons, complaint, process, notice, demand or pleading within three calendar days after service with such document; and

(2)The full cooperation of the officer or employee in the defense of such action or proceeding and in defense of any action or proceeding against the town based upon the same act or omission, and in the prosecution of any appeal thereof.

**Sec. 2-98. - Reimbursement of legal fees and expenses for criminal investigation and prosecution.**

If any elected official, officer or employee of the town shall be investigated, arrested or indicted or otherwise prosecuted on any criminal charge arising out of any act committed in the discharge of official duties, and no charges are brought, or the charge is subsequently dismissed, or upon trial the elected official, officer or employee is found not guilty, the town council may reimburse the elected official, officer or employee for reasonable legal fees and expenses incurred in the defense of the investigation or charge. The reimbursement shall be paid from the treasury of the town.

**Sec. 2-99. - Limitations on defense and indemnification.**

The benefits of sections 2-97 and 2-98 shall inure only to elected officials, officers and employees and shall not enlarge or diminish the rights of any other party. The provisions of sections 2-97 and 2-98 shall not be construed to impair, alter, limit or modify the rights and obligations of any insurer under any policy of insurance. The provisions of sections 2-97 and 2-98 shall not be construed in any way to impair, alter, limit, modify, abrogate or restrict any immunity available to or conferred upon any unit, entity, officer or employee of the town, the town or the town council or any right to defense and/or indemnification provided for any governmental officer or employee by, in accordance with, or by reason of any other provision of Commonwealth or federal statutory or common law.

ORDINANCE 2023-01

AN ORDINANCE TO AMEND SECTION 2-96 OF THE TOWN CODE TO PROVIDE FOR APPOINTMENT OF THE TOWN CLERK/RECORDER BY THE TOWN MANAGER

WHEREAS, Section 15.2-1536 of the Code of Virginia requires the appointment or designation of a clerk for every governing body of a locality; and

WHEREAS, Town Charter § 3-8 authorizes the Council to appoint a Recorder whose term of appointment, duties, and compensation shall be prescribed by the Council; and

WHEREAS, Town Charter Article VI creates the office of Town Manager as chief executive officer of the Town with the responsibility for proper administration of the Town government and the power to appoint all officers and employees of the Town and to remove all officers so appointed, as well as such other duties as may be required by the Council; and

WHEREAS, the Town Council has determined that it is appropriate and in the public interest to delegate the authority to appoint the Town Clerk and Recorder to the Town Manager; and

NOW, THEREFORE BE IT ORDAINED by the Warrenton Town Council this 14th day of March 2023, that Section 2-96 of the Warrenton Town Code be, and is hereby, amended as follows:

**Sec. 2-96. - Town recorder.**

The town council shall appoint, and the town manager shall hire a recorder and may appoint deputy or assistant recorders. The recorder shall attend all meetings of the town council, and keep a record of the council proceedings, and perform such other duties as the Town Code imposes on the recorder. He The recorder shall have such other functions, powers and duties as state law assigns to a clerk of a governing body or as the Town Manager may assign. may be provided by the town council. A deputy recorder shall have all the authority of the recorder in the recorder's absence, and an assistant recorder shall have such authority of the recorder as is delegated by the town manager or recorder.

**PLEASE FILL OUT THIS FORM IF YOU WOULD LIKE TO ADD YOUR MUNICIPALITY OR COUNTY TO THE SHARE THE AIR SIGN-ON LETTER**

\_\_\_\_\_ is committed to providing a 100% tobacco-free and vape-free parklands, park facilities, and open public spaces in order to provide a clean, healthy, and safe environment for all Virginians.

Signing this letter is self-enforcing and voluntary. No tobacco nor use of any electronic smoking device is allowed on publicly owned parklands, park facilities, and open public spaces.

As part of this agreement, the signee agrees to:

- Establish voluntary compliance to prohibit tobacco and electronic smoking device use on parklands, park facilities, open public spaces, all enclosed and designated areas, including common areas, playgrounds, and shelters.
- Enforce the tobacco and e-cigarette-free voluntary policy when violations occur. If a person is in violation of the voluntary compliance, an owner, manager, or park employee will direct that person to extinguish (or turn off, if electronic) the product being smoked or vaped.
- If a person continues to violate the voluntary compliance, an owner, manager or park employee can inform that person that a violation constitutes as a nuisance.
- Park staff will be informed of the voluntary policy and given enforcement statements to help encourage voluntary compliance and will help to distribute flyers informing the community of the voluntary tobacco- and e-cigarette-free policy.
- Post signage in a manner and location that adequately informs the community of the tobacco- and e-cigarette-free policy.
- Advertise and promote this policy on the municipality's website using provided campaign language.

**A RESOLUTION TO IMPLEMENT VOLUNTARY TOBACCO FREE AND E-CIGARETTE FREE AREAS IN TOWN PARKS**

**WHEREAS**, smoking increases risk for disease, disability and death for smokers and those who are exposed to second-hand smoke throughout their life; and

**WHEREAS**, children exposed to even small amounts of secondhand smoke are at a heightened risk for adverse health effects; and

**WHEREAS**, cigarette butts and one-use disposable e-cigarette products lead to increased litter in parks, playgrounds and sidewalks, causing pollution and degradation of our streams and ponds; and

**WHEREAS**, by encouraging tobacco free and e-cigarette free areas the Town of Warrenton aims to reduce the normalcy and social acceptability of smoking behaviors and encourage the role modeling of healthy behaviors; and

**WHEREAS**, by committing to and partnering with the Share the Air campaign, the Town of Warrenton promotes a clean, healthy, and safe environment for the community

**NOW, THEREFORE, BE IT RESOLVED** by the Warrenton Town Council of the Town of Warrenton, Virginia that voluntary tobacco free and e-cigarette free areas will be within 50 feet of any sporting event, spectators or gathering in parks shall be adopted and signed accordingly calling for voluntary nonsmoking.

# What is YST?

Item a.

- Y Street is the Virginia Foundation for Healthy Youth's award-winning volunteer statewide youth initiative.
- Launched in 2004 to work on 2 major issues: **TOBACCO & OBESITY**
- Partnered with **90+** High Schools across Virginia to train and engage youth in policy change.

**Campaign Goal:** Create 100% Item a.  
**Tobacco-Free and E-Cigarette-Free  
Outdoor Public Spaces**

**Become a Champion** by  
**adopting** a tobacco-free and e-  
cigarette-free outdoor policy.

# Comprehensive Policy Means:

- Prohibit tobacco and electronic smoking device use in all outdoor recreational areas **at all times**.
- Require **tobacco-free and e-cigarette-free signs** to be posted in visible, prominent locations.
- Notify** staff and volunteers about the tobacco-free and e-cigarette-free policy.
- Announce and post the policy to **inform your communities**.

# WHY GO TOBACCO-FREE

- Tobacco and e-cigarette use in outdoor places **creates litter** that is not only unsightly but also poses **significant risks** to humans, pets, and the environment.
- Parklands and recreation centers serve as **pillars of health** for families and should reflect that to promote **healthy communities**.
- Recent events **banning e-cigarette products** from store shelves highlight risks associated with usage.

**83% of** Virginians in and around Warrenton believe that cigarettes, empty e-cigarette, and vaping cartridges are litter, and are toxic to humans and animals.

**69% of** Virginians in and around Warrenton believe tobacco litter negatively impacts their outdoor experience.

**76% of** Virginians in and around the Warrenton area are in favor of tobacco-free outdoor policies.

# POLICY IMPLEMENTATION AND PARTNER RESPONSE

Item a.

*This program being very low cost and low barrier was the perfect way to start initiatives in our town that help improve the quality of life for our citizens. Not just for our residents, but our visitors as well.*

**Emmy Houck, Parks & Recreation Coordinator, Ashland**

**Congratulations  
ASHLAND PARKS &  
RECREATION for going  
smoke-free, vapor-free,  
and tobacco-free.**

*When I or my staff have been at parks or playgrounds, and fields, parents have pointed out the signs and they've been very happy that we are advertising the fact that you shouldn't be smoking or vaping near sports fields or playgrounds.*

**Chris Clarke, Director of Parks and Recreation, King George County**

**Congratulations  
KING GEORGE COUNTY  
PARKS & RECREATION for going  
smoke-free, vapor-free,  
and tobacco-free.**

<b>Council Meeting Date:</b>	September 12, 2023
<b>Agenda Title:</b>	Share the Air Initiative
<b>Requested Action:</b>	Resolution at September Town Council Meeting
<b>Department / Agency Lead:</b>	Parks and Recreation
<b>Staff Lead:</b>	Kelly Koernig

### EXECUTIVE SUMMARY

The Share the Air Campaign promotes tobacco-free and e-cigarette free outdoor public spaces across Virginia. The Town of Warrenton is seeking a resolution to commit to the campaign, add the following language to be added to park rules “Avoid the use of tobacco and e-cigarettes within 50ft of any sporting event, spectators or gathering in parks”, as well as approve signs to be installed at all town parks. This will help us align with and support the Plan Warrenton 2040 goal, P-1 Preserve, enhance, and protect the environmental, scenic, and natural quality of the town.

### BACKGROUND

In Fall 2019, the Virginia Foundation for Healthy Youth’s youth-led program “Y Street” launched the Share the Air Campaign. This campaign aims to create tobacco-free and e-cigarette-free outdoor areas and public spaces across the Commonwealth through voluntary policy adoption. Y Street members collected nearly 7,000 surveys in their local communities across Virginia to assess public perception of tobacco use and the harms of secondhand smoke and aerosol from vape products outdoors.

In Fall 2021, the Town of Warrenton Parks and Recreation Department was first approached by high school students from Y Street and we began discussions about bringing this campaign to the Town of Warrenton. The Town of Warrenton Parks and Recreation Department is ready to move forward with our commitment to the Share the Air campaign. We are seeking a resolution to commit to the campaign, add the following language to our park rules, “Avoid the use of tobacco and e-cigarettes within 50ft of any sporting event, spectators or gathering in parks” and install signage in our parks.

At the August 8, 2023 Council work session, a brief overview and presentation was given to council. The high school students from Y Street will present at the September evening meeting and we will seek approval from council to pass the resolution to commit to the campaign and implement voluntary tobacco free and e-cigarette free areas in town parks.
