Comment	I would like to express my support for the Amazon Data Center Project. Due to the failed policies of the Fauquier County, our schools are suffering. Funding is desperately needed to improve the conditions in our schools. Residents in this county are forced to drive hours to work in order to feed their families. I believe Data Centers will provide additional revenue to our town and schools. We need to invest in future to give young generations opportunity to live and work in this town. Otherwise, they will be leaving as soon as they graduate high school.

Comment	Folks - just to add my opinion to this discussion, my wife and I are opposed to the Amazon data center- from what we have been able to decipher from people in prince william county and manassas, they have a negative impact on the community. I fully support more businesses coming to fauquier county but don't feel that this is a good idea. Thank you

Agenda Item	Proposed Amazon Data Center
Comment	<p>I am adamantly opposed to the Town of Warrenton approving Amazon's request to build a data center in Warrenton.</p> <p>My wife and I moved to northern Fauquier County in 2007 and are the owners of a horse farm. We were drawn by the rural agricultural nature of the county and the friendly and welcoming citizens. We love the natural beauty and openness of Fauquier County and have chosen to remain here after I retired from a 37 year military career.</p> <p>I cannot state strongly enough my fear and apprehension of what approval of this proposal would mean to the nature and quality of life here. Building one data center, installing all the</p>

required infrastructure, will lead to additional projects that would affect all of northern Fauquier County. This will permanently mar the "atmosphere" and nature of our county forever.

I urge you to not be the ones who ruin Fauquier County by turning it in to Prince William County - West. Please vote to disapprove Amazon's request. Thank you for your consideration.

Sincerely, Jon Kreitz

Name	Ann M. Casey
Address	112B Blue Ridge Street
City	Warrenton
State	Virginia
Zip Code	20186
Email Address	[REDACTED]
Phone Number	[REDACTED]
Committee, Board, or Commission Type	Town Council
Agenda Item	Amazon Data Center
Comment	<p>Dear Town Council,</p> <p>I once again put forth my opposition to this proposed Data Center by the reasons listed below.</p> <p>WTC (Warrenton Town Council) amended the Zoning Ordinance on short notice last summer to allow Data Centers to be within town limits. It was done quickly and with minimal community input. This is a serious breach of trust between the community and the elected Town Council, and the WTC should prioritize restoring trust with their citizens, not accommodating tech giants.</p> <p>Remington &amp; Vint Hill are Planned Commercial Industrial Districts, and Data Centers should be kept there to protect our natural landscape and habitats.</p>

The proposed HB791 legislation in Richmond will tie data center tax revenue for the community to property/asset depreciation, NOT commercial income. This likely means a significant reduction in expected tax revenue for our community from this initiative.

WTC (Warrenton Town Council) does not get to decide where the high tension power lines will be placed to service the Amazon Data Center. The SCC (State Corporation Commission) will determine that. Approval of Amazon's SUP would place a great burden and battle on your constituents to contend with Dominion about the power line routing location, and above ground vs. below ground lines.

Amazon's SUP is lacking significant required information and detail per the established Special Use Permit Requirements. WTC should not even entertain this application until a complete and detailed application has been submitted for approval.

The SUP cites that "significant tax revenue" will be generated for the community, but provides absolutely no details or specifics on amounts

No details have been given on the environmental impacts, and no Environmental Impact Assessment has been completed as part of the application (to include the source and usage of water for cooling needs, as well as the disposal plan for the water)

It does not include a Load Letter, and therefore we cannot verify power need of the Data Center and are unwilling to accept Dominion's calculations (as that is a conflict of interest, given they are the sole source provider of the electricity). The Load Letter should be provided from an independent party. Noise calculations are lacking in the document

Includes a height precedent, which if approved, gives Amazon an open door to build vertically--is that truly acceptable to our community?

The SUP states that "the applicant [Amazon] will bear the cost of new infrastructure that will be needed and any upgrades to existing facilities" and yet, there is absolutely no analysis provided to determine what those infrastructure costs might be.

Sincerely;

Ann M. Casey

Comment	I am writing in opposition to the PC approving the data center SUP, mainly because there is not enough information about this project which could significantly affect the Town and Fauquier County. Specifically, how does the data center comply with the comp plan. How does putting a facility that looks like a prison at the town entrance way comply? Information is incomplete regarding the noise that would impact the community. Little is known about the considerable electric power resources needed for the facility which seem to be a moving target. Power that all rate payers would have to pay and would amount to twice the power consumed in Warrenton for residential uses. What is anticipated for transmission lines and substations? What is the game plan for additional data

centers which will appear to be in the works? With Prince William and Loudoun rapidly paving over their diminishing open spaces and farm lands with data centers, why should Fauquier follow their lead destroying our quality of life and rural economy, especially when the income from data centers (which is another unknown for the pending Warrenton facility) evidently hasn't kept property taxes from rising in those counties. Please go back to work to find answers to the questions we are asking.

Comment	The applicant still has not completed the application in full. We cannot process or vote based on an incomplete application. Anyone else attempting this would be shown the door until they completed the process correctly and completely. There is no rush, in my mind, as this entire process has been shrouded in secrecy and non-disclosure agreements which have been a place of refuge for those who wish this to come to fruition and not have any upfront reckoning with the constituents of the Town of Warrenton. One could wonder, "What is their objective? Who stands to gain from rushing this process?" The masthead of the Washington Post (owned by the CEO/President of Amazon) states that "Democracy Dies in Darkness". We are killing democracy here by avoiding

complete transparency in this matter. Why has no one provided information as to why this is such a promising idea? What are the benefits to the town financially and how does this enhance our quality of life? I heard an ad on Spotify the other day extolling the rural virtues and scenic views in Warrenton. How does this proposal maintain the tenets of that advertisement? Data centers are not pretty. Their appearance is stark, cold, militaristic, and reminiscent of a prison complex. Not what I would consider a welcoming view as the gateway to our town.

Name	Judy Marie Lamana
Address	7632 BEAR WALLOW DR
City	WARRENTON
State	VA
Zip Code	20186
Email Address	[REDACTED]
Phone Number	[REDACTED]
Committee, Board, or Commission Type	Planning Commission
Agenda Item	SUP for Blackwell Data Center
Comment	Dear Planning Commissioners,

I have lived just over the border from Warrenton since 1992 and the Army Training Center is my next-door neighbor. I shop in Warrenton, have always appreciated the quality of town leadership, and am not generally opposed to town growth or change.

I am a supporter of the Comprehensive Plan, which seems reasonable, as well as the Timberfence Parkway expansion when it is needed to relieve traffic on Broadview Avenue, even though I would be negatively impacted.

For the thirty years I have lived here, I have been telling everyone that of all the communities surrounding Washington, D.C., near and far, Warrenton is by far the best and most attractive place to live.

However, the Blackwell Data Center at the Gateway to Warrenton will downgrade my regard.

I believe such a use, based on dated zoning laws and an inadequately-scrutinized zoning amendment, would destroy the quality of the town and be an embarrassment. It would industrialize the Gateway to Warrenton, and thousands of people would be impacted every day.

These are my reasons.

The data center:

1. will be extremely visible.
2. will diminish the tourist value of Warrenton, as it will be looming over the gateway to town from its Washington, D.C. entrance.
3. will diminish the value of Warrenton to town residents and to those who identify with Warrenton and live nearby and shop in town.
4. the data center cannot be made attractive by false windows and the addition of exterior building trim. I have seen a photo of a nearby AWS data center with false windows. It does not look like the illustration slide at the prior planning commission meeting. It is still an ugly edifice.
5. provides a small revenue stream not commensurate with the burden of hosting it. And with the worst of Covid likely over, is not needed.

Ethical problems of the data center:

The town manager paved the way for the data center and then went to work for its owner. This is at minimum unethical. The town manager should have recused herself or not accepted the AWS job. Simply a small break between her two jobs means nothing. National laws make such unethical behavior a crime. This taints the whole decision making process of the town council as it certainly would have behaved differently had they known of the town manager's dual interests.

---

AWS purchased the land without contingencies, which is not prudent, unless you know its development for your purpose is “in the bag.”

The town council seemed to be “asleep at the switch” in simply requiring a special use permit instead of slowing the process down and thinking through whether a data center ordinance might be the better approach, similar to what the county did for utility-scale solar facilities, or whether certain areas zoned industrial should be off-limits to such an zoning amendment, given the new Comprehensive Plan.

The Planning Commission’s role:

I strongly believe the only thing you can do is to follow the new, current, Comprehensive Plan for Warrenton. So much money and so much time was put into its development. It is a good compromise.

The new Comprehensive Plan, which the town government, including the Planning Commission approved, is the “de facto” zoning that is wanted. It’s an updated plan, required by law, and the planning commission’s role was to help shape it and now its role is to follow it. Actual zoning changes, of necessity, often follow after a new Comprehensive Plan.

Your job is not to support a town council mistake or to be a “shadow” town council yourself.

Your vote will be an easy one if you stick to your mandate as Planning Commissioners and support the Comprehensive Plan that you helped create.

Thank you for this opportunity to be heard. Please disapprove of the Blackwell Data Center. Your decision is important.

Judy Lamana

Name	Wendy Wheatcraft
Address	851 Oak Leaf Court
City	Warrenton
State	VA
Zip Code	20186
Email Address	[REDACTED]
Phone Number	[REDACTED]
Committee, Board, or Commission Type	Planning Commission
Agenda Item	SUP 2022-03
Comment	<p>Dear Madam Chair Helander and Members of the Planning Commission,</p> <p>I reside at 851 Oak Leaf Court in Ward 1. I am writing to express my opposition of SUP 2022-03, Amazon Data Services. I respectfully request that the Planning Commission recommend denial of the application to the Town Council.</p> <p>First, I do not believe the applicant has provided sufficient information that would allow the Planning Commission to make an informed decision. We still don't have a complete and accurate noise study, and a visual impact study or viewshed analysis has never been offered. (A balloon test and a few</p>

elevation drawings does not constitute a viewshed analysis.) This application has undergone a number of significant changes over the past few months. Has there been sufficient time to thoroughly analyze and understand the effects of the latest submission on the Town? I say no.

That being said, we do know some things—the proposed height and massing of the data center, the lack of screening, the ground elevation of the subject parcel in relation to the surrounding area, the typical amount of noise generated by this type of facility—even with the muffling mechanisms in place—and the massive amount of power necessary to operate a data center. Taking these things into consideration, this facility, as proposed, would have adverse, audial and visual effects on the neighboring residential properties—including my own—and would negatively transform the main gateway corridor to the Town.

Last Thursday, Dominion Energy publicly revealed new plans to serve the electricity needs of the proposed project with distribution and potentially transmission lines connecting to one or two proposed substations. The preferred location for one data center is the Old Wire Factory on Falmouth Street. I wonder if the neighborhoods surrounding that property know this yet. There will definitely be adverse cumulative effects caused by the Amazon proposal.

The data center use is inappropriate for the subject property. It's a poor application. Again, I ask the Planning Commission to recommend denial of the application to the Town Council.

Sincerely,

Wendy Wheatcraft

Comment	I am a resident of Warrenton. I am against this Data Center. Please, let's keep Warrenton a town with manageable growth for us and future generations. There are plenty of medium sized cities with sprawl that already exist in Northern Virginia. Do we really need to be another? No. We do not. Let's keep Warrenton a great place to live for us and our children. Thank you.

Agenda Item	Data Center
Comment	I am a Warrenton resident having moved here last year from California. I love the charm, safe feeling, and history of this city and I feel adding a Data Center will completely change Warrenton making it just another city with possibly more crime like some of the larger cities have. It will lose the small town Mayberry feeling.

Comment	I was not able to attend the meeting tonight but I would like to make sure that my voice is heard. I am not in favor of the data center. I feel as if we were kept in the dark through the early stages and now are scrambling not to be railroaded into accepting defeat. I do not feel completely hopeless and I hope that the opinions of Warrenton residents is given the full weight it deserves.

Comment	I was gratified to see so many people at the meeting tonight, 11/15/2022. I am very much opposed to the Amazon data center because I believe it will not be good for the Town or the County. The entire process was rushed, not adequately analyzed, and purposefully left out input from the citizens. It is a really bad idea to put such a center in places that do not have adequate water, electrical, and infrastructure already in place. I encourage you to vote NO on this propositio

Comment	I am vehemently opposed to the Amazon Data Center. It will destroy our beautiful town of Warrenton and our gorgeous rural county. It will just open the doors for more data centers.They will then need giant and hideous power towers to supply the energy, destroying our landscape and decreasing our property values. No one wants to look at and listen to the awful noises the data center and towers make not to mention the carcinogenic affects they may have. I do not want the beauty of our rural county to be forever destroyed. Dominion has already destroyed some of the pristine farm land with these huge and ugly towers. We have been hearing the horrible complaints from PRINCE WILLIAM COUNTY residents. Please don't do this to your residents. It will be devastating to this special

county. I do not want Fauquier County to look like these other counties. You should be listening to your constituents and protect and treasure this unique county. I implore you to Please VOTE NO to AMAZON!! Thank you.

Comment	Please do not allow Amazon to build a data center in our beautiful rural county. It will forever destroy it. Once this decision is made there will be no going back. More and more data centers will be built like in Prince William and Loudon County. With data centers will come the hideous and ginormous power towers. Please listen to the people of the town and the county. This will not only affect residents in the Warrenton but in the entire county. I implore you to stop and think about this long and hard and do not ignore your constituents. I have lived here for 22 years and would like to stay here for may years to come. I don't want to live in any other county. Fauquier is a very beautiful and unique place with a very rural feel. No other surrounding county is like this.Please

please VOTE NO to AMAZON DATA CENTER!!!! Thank you.

Comment	I am opposed to the Amazon data center being built in Warrenton. We are one of the few towns left in the area that has not been obstructed and ruined by unnecessary developments. The data center will not lead to any benefits in the community and will only allow for more destruction. This one action would tarnish the beautiful land that so many have fought to protect, and suggest room for more opportunities to continue down this path in the wrong direction. I will continually fight for the protection of the rural community that I grew up in.

City	Rectortown
State	VA
Zip Code	20140
Email Address	[REDACTED]
Phone Number	[REDACTED]
Committee, Board, or Commission Type	Planning Commission
Agenda Item	AWS Data Center SUP Application
Comment	Hello, my name is Florence Keenan, and I have been a resident of Fauquier County for over 20 years. I'm also a retired attorney and have submitted comments to this Commission that reiterate what you've heard from so many speakers: this application is inaccurate, incomplete and premature—the noise study won't be ready until next year and you cannot rely on Amazon to adhere to its proposed conditions without detrimentally impacting Warrenton and the surrounding community. Planning Staff has also asked Amazon to consider green infrastructure and LEED standards as encouraged in Plan Warrenton 2040, but neither Amazon's nor Planning Staff's draft conditions for approval address these standards.

As a regulatory attorney, I would not have submitted this application in the first place because the SUP ordinance requires that a complete application be submitted. All of Amazon's amendments, modifications and changes over the course of this application process have undermined its credibility and wasted our time analyzing half-baked studies and factoids.

Moreover, Amazon has never credibly demonstrated how this data center is consistent with the recently passed Plan Warrenton 2040 — because it can't. The strategic plan is Plan Warrenton, where the only mention of data centers is to state that data centers are not appropriate for light industrial zoned areas (see page 70).

Instead, just four months after the Plan was passed, Amazon had a zoning amendment passed to allow a fortress-like data center on what should have become a community friendly mixed-use site. This data center is not compatible with the plan for Warrenton's New Town Character. Neither Loudoun nor Prince William counties have allowed data centers smack dab in their historic county seats of Leesburg or Manassas for obvious reasons— data centers are repellant and noisy.

Community development should be a win-win for Warrenton. It shouldn't result in a divisive and inappropriate win-lose proposition.

If the town really needs more revenues, then negotiate with the county for a greater cost-share portion of revenues from county data centers that depend on town infrastructure. Take the time to get this right.

Amazon should withdraw this application, at least until all the studies are finished and the application is complete. Amazon should also sit down with representatives of the county, town and residents to find a more appropriate location for any truly necessary data center.

Finally, Amazon should donate the Blackwell Road site to the town for a park, in exchange for tax deductions and perhaps even naming rights — "Amazon Park" could go a long way to heal the civic wounds and distrust that this application has generated. That would be a win-win.

---

Thank you.

Zip Code	20184
Email Address	[REDACTED]
Phone Number	[REDACTED]
Committee, Board, or Commission Type	Planning Commission
Agenda Item	Amazon Data Center SUP
Comment	<p>In recent years, I have been led successful efforts to stop a resort from being approved just west of Upperville, and a hotel/restaurant from being built on rural land near Marshall. The goal of these efforts was to protect historic towns and villages and open space.</p> <p>I'd like to make several observations contrasting these efforts with the Amazon data center decision before the Warrenton Planning Commission. To state the obvious, the Amazon one is much more significant and would change the town and county dramatically. But there are other dramatic differences. Fauquier County treated its comprehensive plan almost as policy and not just as a guideline. County staff was very helpful in sharing</p>

information about the applications and relevant zoning. FOIA requests were not needed to get information and county leaders actually met with residents and felt a responsibility to be responsive. Developers were required to submit complete applications and the county staff did considerable analysis.

The town's offices are just a block away but what a world of difference in how Warrenton is handling the Amazon data center. It sure seems that the town is on the side of Amazon and not the citizens.

I think it is pretty clear that the citizens do not want this data center to be approved. Over 1,800 residents have signed a petition opposing it. At last week's public hearing, the meeting spaces were completely filled, despite miserable weather, and 59 out of 60 persons spoke in opposition to it. Think of the hundreds of pages of comments the planning commission has received, and think about the mayoral election where the incumbent known to be supportive of the data center barely won over the challenger who was not.

I ask that this body send this incomplete application back to Amazon and not vote on it. That's your responsibility. If you were to vote on it, the decision to approve or deny the application could be made by a lame-duck town council that is likely to approve it and that would be the wrong decision for the people they and you represent.

zon Data Center

heartedly with the points already made in opposition to the proposed data center—the noise issues, health taxes and energy costs of residents, it's unsightly, and providing no benefit to the residents. But I do want ched on yet—just what will the data center(s) be used for?

ill facilitate data heavy systems ithat are required to centralize and conrol society This is a difficult topic to hat it could be true but I assure you all of these systems have already been built and are ready to be deploy re proposed data center (to create a VPN) doesn't add up. The intelligence agencies do not need that muc e network (VPN), nor does it need proximity to the town to operate a VPN— but it can and will be used to fit of society into a hyper-centralized society, even here in Fauquier County.

given a peek into that future when Dominion installed the smart meters on our homes and businesses. All smart meters give Dominion the ability to remotely manage and even ration our energy usage. It's documented to have decision-making authority regarding energy allocation—meaning Amazon gets to help decide how

tion will touch every aspect of our lives—energy consumption, voting, transportation, money, health, identity, and more.

The Internet Of Things, “Smart Cities”, and “The Cashless Society ” all need data centers in close proximity realized—and I’m not exaggerating when I say that these systems are already programmed and built—and they will be presented to us in a very benign and helpful way.

example of the language that will be used to sell the idea of "transformation" of our communities using data centers

positive transformation in data center communities around the world: Our data centers and cloud regions enable services that grow businesses, careers, and communities. Our efforts in partnership with communities help extend beyond our own facilities. These tailored investments inspire a ripple effect of economic, environmental, and

to go in depth on this but here is a brief description of some of the technologies that will be used in order to make our lives better:

**Digital Currency:** “FedCoin”—a US government digital currency—could turn your money off and on—if, for example, it could also control what you buy, where, and how often you buy it—no other digital or cash transactions. The product Votem describes its online-only voting system right on the AWS web site. That system works like the same as KNOWink poll pads and tabulators. They are black-box tabulating systems where observation of the vote is prevented. Amazon recently put out a report documenting how these systems are susceptible to hacking and vote manipulation.

**Blockchain Voter I.D.:** Requiring a blockchain voter I.D. would link us to a black box, digital control grid where the system controls the basic parts of our lives—our vote, our access to food and energy, control over our health options—everything. I wake up and no longer recognize the town and the County we once knew—and by then we won't be able to escape the same “Social Credit Score System” that China uses to control their citizens.

will make all this possible and a data center in our town will make it happen.

in opposition, along with the other very important land use issues that make this data center project a really big deal. Think about what you might be letting into our town—and think about the things I've just told you about, and how they will affect the lives of your children and grandchildren in the future.

I would like to see a recommendation of denial for the proposed data center project.

Thank you.

; to more information. I have a lot more documentation so please email me if you would like to know more.

### Public Comment

Name	Eric Gagnon
Address	200 Winchester Street
City	Warrenton
State	VA
Zip Code	20186
Email Address	[REDACTED]
Phone Number	[REDACTED]
Committee, Board, or Commission Type	Planning Commission
Agenda Item	Amazon Data Center Special Use Permit -- OPPOSITION
Comment	<p>Statement in Opposition to the Amazon Data Center SUP Application in Warrenton</p> <p>My name is Eric Gagnon, and my wife and I have lived at 200 Winchester Street in the Town of Warrenton for almost 23 years.</p> <p>Several months ago I heard about the Amazon Data Center (AWS) issue in Warrenton, and I knew it was a bad idea but hadn't really looked into it. However, this summer when I heard that the Warrenton town manager resigned her position to take a job with Amazon's AWS data center division, I got very concerned, and started looking into this issue further.</p>

And I have to say, the more I learned, the stronger my opposition has become to this project.

First, I learned that data centers were allowed into Warrenton's zoning plan by an act of administrative sleight of hand by Mayor Nevill, when they were never allowed before. This was done without any public transparency, public input, or deliberation. Without this change, Amazon could not even think about applying for a permit to build a data center on this site.

Other key shortcuts have been taken by our town government every step of the way, and the Town even invoked "executive privilege" to withhold essential information about the application and the roles of our town officials in that process.

Now I'm old enough to remember how executive privilege was used by Richard Nixon in Watergate and by every other crooked politician since then who's trying to cover up something they don't want the people to know about, and quite frankly I'm surprised to see it happening here.

In addition to the many other important issues raised by other speakers, I'm most concerned about the health effect of the sound and vibration generated by these data centers, and in this location, the sound will affect many hundreds of residents in homes and subdivisions who live within a one- to two mile radius of this site, and our home is within this radius. Last week, we also heard from people who are already experiencing adverse health effects from existing data centers in Prince William County and Haymarket.

I know now that, if constructed on this site, the proposed data center will be a clear and present health risk to all of us in town who live nearby.

Now I hope that there hasn't already been too much insider backroom dealing and hope that the decision to rubber stamp this deal hasn't already been made, but if you pass the buck to have it rushed through by a lame duck Town Council, I would then tell you that this town government is acting in opposition to the health and safety of our citizens—and as one of those citizens, I will not only support any and all lawful action to remedy this situation to keep this data center out of our town,

---

but would urge my fellow residents to do the same. And I will add that this would include a full and comprehensive investigation of every town official involved in this process.

Comment	This is absolutely ridiculous what you are allowing and trying to approve for Warrenton. You've already started to allow Warrenton to turn into Loudoun or Prince William by you approving 47 townhomes, and retail space to 4 acres next to Obriens, in front of an old neighborhood, that can't handle current pedestrian and vehicle traffic, and now you want a data center? Shame on each one of you for allowing this to get this far! Do not approve!

Comment	<p>If someone told you that some loud data center would be incessantly buzzing half a mile from your home you'd be irritated off too. I live right across the highway from the proposed data center. My mom purchased this home in 2014 and it's the home that she plans on retiring in. Constant buzzing will be not only annoying and irritable, it will be unsupportable. I cannot stress enough how much this will intrude into our lives and the hundreds of people living here. If you don't care about the hundreds of people this will be affecting, maybe you'll be sympathetic to our pets. Dogs and cats have a keen sense of hearing and this will affect them too.</p> <p>This data center means a reduced quality of life for the citizens</p>

of the town that you guys are supposed to represent. You need to listen to the voices of the people who will be directly affected by this. And you also need to listen to the experts who have pointed out the flaws in Amazon's noise study. I know Amazon is a business giant. And I know there is likely some incentive to letting them build a data center here. But why are we crawling closer and closer towards another crowded, unaffordable, and unlivable northern Virginia town?

Comment	<p>To whom it may concern:</p> <p>For the record we are firmly against the acceptance of the proposed Amazon data center in Warrenton, Virginia. We feel the quality of life in our community will be irreparably diminished if this proposal goes through. It has been well documented that such a center will undermine the towns longer term clean energy concept, that there are inherent health risks involved with the attendant noise and substantial transmission lines and that this is a continued extension of the extraordinary expansion of data centers throughout Loudoun county and beyond. Accepting this proposal would be a shocking set back to the massive efforts so many of our citizens have put into environmental preservation. The aesthetic negatives to the</p>

proposed location of this building abetted by the actually height of the building which has been surreptitiously cited as much lower than it is would present a shocking effect on our community which so many have labored to preserve. For these reasons and many others we stand firmly against this proposal.  
Dale and Ingrid Lindsay

Committee, Board, or Commission Type	Planning Commission
Agenda Item	Amazon Data Center
Comment	<p>Before the final hearing, you have received adverse comments on Amazon's application from some 60 people. You have heard from scientists, homeowners, and many others. A well documented and recurrent theme has been the concern about noise levels from the planned data center, with particular reference to health and quality of life issues as well as the negative impact of such developments on real estate values in the affected areas of Warrenton.</p> <p>My comments are focussed on process. By counsel for Amazon's own admission, the noise study that was submitted with the application was a draft. This admission was made once challenges had been raised to the findings in the study</p>

that had been filed with the application. It was not corrected forthwith and a final study has still to be submitted. The early study was therefore not a draft submitted by mistake or as a result of an oversight, but quite possibly a way of muddling the noise issues right from the beginning because Amazon now asks, it appears, to submit the final study at the site plan stage.

You are therefore asked to vote on an incomplete application. The controversy that surrounds failure to submit a final noise study is entirely of Amazon's own making. I ask that you refrain from approving the project until Amazon has submitted its final noise study so that the concerns of the many who will be affected by the operation of the center can be properly evaluated.

Comment	In bypassing the planning commission's clear but only inferred disapproval regarding the AWS Data center site, I urge the Council to avoid going against the will of the town and approving the site at this time. Checks and balances within the town's governance must still be respected in this process, thus a decision of this magnitude should also only be made when those in their positions at the time of voting will be in those positions in a full term.

### Public Comment

Name	Mike McGee
Address	28 Sire Way
City	Warrenton
State	VA
Zip Code	20186
Email Address	[REDACTED]
Phone Number	<i>Field not completed.</i>
Committee, Board, or Commission Type	Town Council
Agenda Item	AWS Data Center
Comment	Hello,

As I read in the Fauquier Now about the planning commission meeting regarding the Amazon Data Center in Warrenton, I was dismayed to learn that of the sixty people who spoke at the first meeting, only one spoke in support of the data center. I am a father of three kids under six and I have been a town resident here for nearly seven years. My wife and I chose Fauquier County to buy our first home and build our young family. I attended the second planning commission meeting on this matter, and signed up to give the statement below in person, and instead of another round of statements, we were essentially sent home.

IT is the most reliable path to a lucrative and successful career in our country. As I looked around the people in attendance at the planning commission meeting, their faces looked just like the ones in my own life that espouse the belief that hard work translates into a good career. I can tell you in no uncertain terms that I am living proof such a dream remains alive in the field of information technology. There is not a single person I saw in that audience that would have trouble finding a living wage job if they passed the AWS Associate DevOps certification course. That test and the associated Udemy course to prepare for it cost a total of \$160. That's quite a deal.

Projects like Clevengers village, which is a development of 700 houses on the Culpeper side of our county boundary tell us that we are at risk of incurring all the detriments of the so-called "sprawl" while reaping none of the rewards. Our town will suffer traffic congestion because of that development, and reap none of the taxable benefits of it.

As someone who spent much of my life in Fairfax county, I can tell you the quiet nature of Fauquier is appealing. I do not want Fauquier to become Fairfax, Loudoun, Prince William, or any other county in the Commonwealth. I want our county to be head and shoulders above them in our innovation and standard of living. I am interested in advancing education in all STEM fields as our #1 priority, and I wanted to speak to encourage the planning commission to recommend to you to approve the data center if we intend to make Amazon a true community partner.

The presence in our community could offer outstanding opportunities to partner with local schools, and I believe driving academic interest and NOT social media interest in technology needs to be a primary goal. Technology is not going away and understanding what a data center is on a technical level is a master course in applied skills. Civil, chemical, and IT engineers work in close collaboration to build, maintain, and add to a facility like this. I think this data center could encourage apprenticeship and internship programs for local high school or non-collegiate graduates which help create a path forward to success right here in our community. That is invaluable. Please hold them to standards that are appropriate, like noise, water, and power consumption when the facility is

---

completed, but please approve it.

The fact that two thirds of the speakers at the first meeting were not even from the town told me all I needed to know. These squeaky wheels should not be the only voices heard on this issue.

I would also like to say that while watchdogs and evaluation systems like LeapFrog and GreatSchools may have their biases, there are no public schools in Fauquier county with historically outstanding test scores. Our hospital was literally just rated the worst in the state, and the story of the Fauquier County Public School Superintendent as it relates to our hospital is harrowing. The condition of most of the businesses on Broadview Avenue between Winchester and Frost embarrasses me when I bring out of town residents to my home. When I hear "stop the sprawl," I interpret it as "we're doing it right already." Let me tell you right now: we can still improve. If we want Warrenton 2040 to be spectacular, we need to innovate.

Thank you for your time,

Mike McGee

Having been born in Fauquier County and having lived and taught there for several years, I still have a deep affection for and interest in that area.

I have followed the plans for construction of "data centers" in Warrenton and Prince William County with interest.

I encouraged the Planning Council and the Town Council to consider all aspects of this planned addition carefully and thoroughly before making any final decision.

Its location, size, noise, and likely congestion will seriously and permanently impact the special quality of the Warrenton area and its surrounding landscape.

I know that we cannot prohibit "progress" all together, but the special beauty and community of Warrenton deserve protection and careful planning to maintain its special qualities.

Hello, I am a citizen of this wonderful county and come into Warrenton daily as I live in Bealeton.

I am very disappointed in you all taking down the side street seating that was with Denim and Pearls.

You have taken away such a key seating area of that business that a lot of us enjoyed sitting at to dine in. It gave a lot of us options for if we didn't want to sit inside, and their roof top seating is very limited

This is not connected with the Main Street parklets that we all understand goes away during the winter for snow removal.

I as well as many wish for you to reconsider and put that seating area back for year round seating. No matter the weather we enjoyed sitting there.

Thank you!

Thank you for reaching out, the appropriate person will respond within 24 hours on regular business days. You can always reach us by phone at 540-347-1101, or stopping by the reception desk at Town Hall.

**Subject:** Amazon Data Center opposition

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am categorically opposed to any Amazon data center in Fauquier county. For years and years, this county has fought to remain small and rural, while adjacent counties have exploded with all-too-well-known signs of urban sprawl, most notably the huge power lines that mar the landscapes to the east. Is it possible that the planning commission members prefer to see power lines when they look out over Warrenton and Fauquier County. If they do, then they are the only ones.

In a mountainous region of Indonesia, those officials chosen to maintain the water quality of the downhill streams are required to live at the bottom of the stream. In that way the villagers are assured the officials will closely monitor the water quality.....or be forced to drink water polluted by their own mismanagement.

Perhaps, we could insist that those on the planning commission live directly under the power lines that Amazon requires for its purposes.

There is absolutely no reason for Amazon to put their data center in Warrenton! The natural beauty of which Prince William County could boast in the past has already been irretrievably ruined. For Gods sake, don't allow the planning commission or Amazon or anyone else to destroy our little corner of paradise.

Local resident

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

My family would like to voice our opposition to the horrific conversion of the town of Warrenton, from an idyllic small town to an ugly congested town devoid of any character or soul.

**We would like you to postpone any action until the following steps are taken:**

- Amazon submits a complete application**
- The new planning commission and town council are in place**
- A comprehensive and impartial review is conducted to understand how Amazon and possibly others exerted inappropriate influence on the process**
- Town residents are properly informed about the proposed facility and the town's long term data plans.**

The proposal should be denied if the town decides to vote without taking the above four actions.

Please stop pushing through important decisions that only benefit a select few without any oversight from the people that actually live in Warrenton.

Thank you,

Dear Sirs and Madames,

I plead with you to deny the permit to build an Amazon data center at Routes 17, 15 and 29. This would create such an insult to the character and beauty of your town and surroundings.

I am not a resident of Virginia, but a frequent visitor. My daughter attends college in your state, and as a history buff I regularly travel there. My sister lived for years in Warrenton and I have visited the historical sites of your city and vicinity numerous times, and plan to continue to do so in the future.

The beauty and history of your locale are a major draw for many people like me. Please do not ruin it! Don't let Amazon eat up a county that is closest to Heaven on Earth. Vote no!

Thank you,  
Amanda Warren

November 10, 2022

Warrenton Town Council

21 Main Street

Warrenton, VA 20186

Dear Town Council Members:

On behalf of the Oak Springs Homeowners' Association ("Association"), a property owner within the Town of Warrenton, and its Board of Directors, I am writing to request the Town Council disapprove the Special Use Permit (SUP) 2022-203 which has been requested by Amazon.

The Oak Springs subdivision is one of the closest neighborhoods in proximity to the proposed data center and is directly across from Blackwell Road where Dominion Energy plans to build a power substation, should the SUP be approved,

The Association is adamantly opposed to the SUP as it will adversely impact our neighborhood by 1) decreasing property values as much as \$88,000 to \$136,000 per parcel as per the National Association of Realtors; 2) generating intolerable noise levels exceeding both town and county noise ordinances and affecting our residents' health and well-being; 3) drastically changing the eastern vista of our community through heavy deforestation by removing hundreds of trees and further decimating the wildlife corridor; and 4) severely impacting ingress and egress along Blackwell Road and Oak Springs Drive during an extended construction process.

Although the Association has been monitoring this issue since April, interestingly, the Oak Springs subdivision has never been identified as a potential stakeholder. That, in of itself, is telling, along with the seemingly lack of transparency by Town officials to keep its public apprised, and its failure to seek out independent review of how such a project would impact not only our community but others. How does this SUP fit into the Town's 2040 Comprehensive Plan? How is building a 50 foot high 5 acre data center and power substation at the entrance to the Town, visible within a 2 mile radius, consistent with the goal of "preserving, enhancing and protecting the environmental, scenic, and natural quality of the Town?" Many of our residents have moved here to get away from the urban, industrial sprawl of the counties north to us. How does building a data center at Warrenton's northern gateway ensure that our beloved Town remains the bucolic, quaint town that it is?

The residents and property owners of the Oak Springs subdivision, as represented by the Association, depend on the prudence, forethought and commitment of its elected officials to represent its constituents in a fair and honorable manner. The Town Council must vote to disapprove this SUP, if it is to keep the confidence of the residents and property owners residing in Oak Springs.

Respectfully submitted, on behalf of the Association's Board of Directors,

**Subject:** Warrenton Residents Opposition to Data Centers

Internal Use Only

Dear Members of the Warrenton Town Council and Planning Commission,

We the residents of the Monroe Estates and Old Meetze Rd neighborhoods are highly concerned over the possibility of the Council approving the planned Amazon data center and a potentially larger data center at the old wire factory bordering our community.

As you know, significant questions have been raised around town management's involvement with Amazon prior to the Council's approval of code amendments allowing data centers in Warrenton. These questions, combined with the likely noise and size of these structures near neighborhoods and community areas form the basis of our concerns.

- We believe that large data centers are not compatible with residential neighborhoods or community areas designed for resident's enjoyment.
- We believe that construction and operation of large data centers within our communities is not consistent with the Town's Comprehensive Plan.
- We believe that any decisions to allow large data centers must be reconciled against existing Town code and your responsibilities under the Town Code of Ethics.
- And we believe that the noise level and unsightly appearance of these several hundred thousand square foot structures will negatively impact our quality of life and significantly lower our property values.

Please take a moment to read the details of our concerns in the [attached letter](#) and consider the following requests of Warrenton constituents:

- Pause and reconsider the actions leading to the 2021 zoning amendments in favor of data centers.
- Deny any large data center application within the town limits, beginning with the pending Amazon application.
- Adhere strictly to the requirements of the Town code, including the zoning ordinance, and your own Code of Ethics (attached).
- Respect and follow the 2040 Comprehensive Plan.
- Refrain from any decisions that will result in deleterious impacts to Warrenton residents, as required by Subsection 11-3.10.1 of the Town Code, including noise impacts, viewshed impacts, or degradation of property values.

#### The Residents of Monroe Estates and Old Meetze Rd Neighborhoods

Fauquier County is one of Virginia's most beautiful Counties; it is rural and should remain so.

If Amazon Data Center is built in Fauquier County it will only be the start, a foot in the door.

Then more large businesses will be asking for building approval/zoning change and like dominoes our county will lose it's rural-ness.

Amazon Data Center should be built next to cities, areas that are already zoned for businesses such as the Data Center.

Why come here and try to change a zoning that has been put in place for a very good reason; to keep Fauquier Rural.

To: The Warrenton Planning Commission  
Date: November 12, 2022

Dear Planning Commissioners:

I am writing to ask you **to not vote** on the Amazon Special Use Permit (SUP) application at your public hearing on Tuesday, November 15th.

The reason is that the application is quite incomplete as some of you and Amazon stated publicly on October 25th, acknowledging information gaps on critical issues including noise/vibration, view shed impacts and power supply. A vote that would prematurely advance Amazon's incomplete application to the Town Council would further **discredit the planning commission** and how the town has handled the entire Amazon situation.

I attended several meetings related to this issue and based on what I know, I am vehemently opposed to this data center. It would seriously tarnish one of the main gateways into our historic town, and would be visible from many parts of the town and even the county. The noise and vibration it would generate constantly would cause physical and mental harm to hundreds of residents, and it would lead the way for more data centers and massive power towers and transmission lines.

Based on the town's own rules, approving any SUP must meet two conditions. It must first be consistent with the town's comprehensive plan. Second, the development proposed under the SUP must not adversely affect surrounding homes and businesses. **The Amazon data center meets neither one.**

If this SUP is approved it will raise serious suspicion who will benefit financially from this decision. It most likely will also tarnish your reputation. I sincerely hope you come to your senses and if you really love this town and this county, and you have a conscience, you vote NO.

Thank you for the opportunity to voice my opinion.

Sincerely,

Willemina Buursink  
8495 Meadows Rd  
Warrenton, VA 20186

TO – members of the planning commission  
Amazon’s proposal is critically incomplete and changing almost by the day. So is Dominion power’s. it would be a travesty for the Commission to proceed to a vote in such a situation. Powerful forces are obviously trying to stampede Town and County gov’ts to move forward in the face of unsettled facts. That must be resisted. Please use your meeting to pin down all the issues that need to be fully disclosed and settled.  
Thank you

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Planning Commission:

I have been following the story of the data center from its genesis. It appears to me to be one of back-room dealings, from John Foote helping to write the ordinance which would allow a data center in town in the first place, to Brandi Schaeffer guiding the ordinance through the adoption process and then going to work for Amazon. It also appears that the application is incomplete and therefore there is not a complete picture of both the benefits and the negative impacts. Why rush this thing through? Approving a data center on that property will have effects far more reaching than just there; not only will precedent be set for more of them in the town, but the power lines associated with this one and other future data centers are still unknown and will have great effect on residents and business owners alike.

Please postpone any decision on the application until all information is complete and a fully informed decision can be made.

I am a lifelong resident of Fauquier County and care deeply about the town as well as the county.

Sincerely,

Michael Morency

Dear Members of the Planning Commission,

This Amazon Data Center should never have been allowed where it is proposed to be, and the whole process has bypassed an open and fair discussion.(Closed door meetings) Please note the former Town manager quit and within a month went to work for Amazon! Now you have before you a proposal that has not even been completed. I urge you to turn this incomplete application down for the best future of Warrenton.

Sincerely,

Lora H. Jenkins

**Subject:** Please OPPOSE Amazon Data Center SUP

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Members of our Warrenton Town Council,

**Please OPPOSE an SUP for Amazon's Data Center.**

Warrenton is a *community* (people sharing in-common interests.)  
 An IN-TOWN Data Center is **WRONG - antithetical to our community's common interests and our common character.**

**NO Data Centers were in our Comprehensive Plan** for future quality-of-life improvements.  
 A Data Center (concrete bunker) does not serve people, nor is it compatible with our living environment.

A Data Center does not expand our commerce base, residential capacity, or accessible aesthetic/recreational space. It would be a fenced, guarded, secured, confined compound adjacent a major retail center, large townhouse complex, and memory care facility. A highly-visible Data Center would be a horrendous, over-illuminated scab at our Town's gateway.

Moreover, **Amazon does not exhibit caring, or good neighbor qualities** - no regard for our citizenry or our bucolic Town.

- Amazon is deceptive; Amazon is entirely *self-serving*.
- Amazon is *intentionally* not fully compliant (...Does "getting played" not INSULT you?)
- Amazon **will never cooperate, never be forthcoming under the veil of "proprietary info."**

Amazon purports noise compliance here when their Data Centers in PW are "earaches."  
 Amazon claims noise here will be compliant except for a "rural parcel." ...*Where* are current, or future "rural" spaces in our small Town limits?

Amazon's **secretive, money-buys-approval deportment is a RED FLAG nightmare relationship.**  
 There is **nothing compatible, or complementary about Amazon's business model** - nothing our resident's will ever pride in...gain any betterment from...or get cooperation, caring, interacting from Amazon with our better-deserving community.

**Please do not SELL us OUT**

**Please do not SELL OUT** the generations of past, present, future families that have striven to make Warrenton an accessible, *people-first* Town to grow-up and live in.

- klisbeth

I wish to oppose the placement of the Data Center in Warrenton, Va. Also the substation should not be placed in the area that has been chosen. These monster facilities are not compatible with the areas landscape. Just because big money comes around knocking doesn't mean we as a town, need to take a knee to their wants. This complete complex, Data Center and Substation are too close to the everyday life of the residents. I say "NO" to the Data Center.

**Subject:** Comments for the Proposed Amazon Data Center SUP Public  
 Hearing of 15 November 2022

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To Whom It May Concern,

I continue to believe this data center opportunity is inappropriate at the proposed Amazon location on Blackwell.

Should you believe, the opportunity should go ahead, I strongly request that you defer any action by the Planning Commission until open issues with the supply of electrical power, noise related to the data center, and lighting are resolved.

### Open Issues

- 1.) Electrical Service/Substation. The new VEPCO/DOM study (interesting timing!) calls for a new substation either in the Town of Warrenton (off Falmouth St.) or in Section 2 of the proposed boundary adjustment. The substations are designed to support up to a 300MW load. This is about eight times the projected Amazon load. Both sites will impact residential streets such as Falmouth, Old Meetze and Walker Drive along with the Greenway recreational area.

The ability of the Town of Warrenton to influence the design of this electrical infrastructure will be severely hampered if it approves the data center before the design is fixed and agreed.

Recommendation. Delay approval until the electrical service issues are resolved.

- 2.) Burial of the Distribution Lines. The town zoning code requires the burial of the electrical lines that supply the data center. The proposed draft conditions, prepared by Mr. Foote's team, of the Special Use Permit changes the obligation to a conditional one

of a request. This language can allow the data center to go ahead even if the electrical supply is not buried.

Recommendation. Replace the term “shall request” to “will cause” in the conditions associated with the SUP. This removes the conditional language and ensures full conformance with the Zoning Ordinance.

- 3.) Noise Ordinance. Item 16 of the SUP conditions document states “the Applicant shall conduct a separate sound study one month after commencement of business operations to ensure compliance”. The language is perfect for a normal retail establishment such as Joe’s Pizza shop or Warrenton Foreign Car. The language is certainly inappropriate for a complex facility such as the Amazon Data Center.

The issue is when does the “commencement of operations” happen? Is it when Amazon:

- o Accepts the facility in its Data Center Infrastructure Management system
- o Executes its first production computational function
- o Has the facility is in a full production status (maybe 2 years out)
- o Or some point in between?

Additionally, the noise study should take place when the Amazon facility can be operated in its noisiest configuration or manner authorized under the Special Use Permit - all generators and air chillers operating concurrently at a minimum 50 percent loading. Some of the sample commencement of operations points will happen before the facility can meet this condition.

Note: Mr. Foote stated the facility can commence production activities on ‘bridging power’ and the build out incomplete.

Recommendation: Require Amazon to conduct the noise study within three months after the facility is sufficiently built out to be configured in the specified manner (all generators, air chillers, etc.) **and**, to ensure public confidence in the overall approach to noise management, cause Amazon to fund a system that provides continuous noise measurements of the facility from the date it starts generator

installations for a period of three years. This system will provide the town with near real-time sound level measurements.

-

- 4.) Perimeter Fence Lighting. Item 17 of the conditions for the SUP does not address lighting of the perimeter fence. Mr. Foote stated that Amazon will illuminate fence that runs around the perimeter of the facility. This is a normal practice for high security facilities.

By being located on the edge of the property, it will be close to adjacent properties and roadways. (See yellow dotted line of Mr. Foote's presentation to the Planning Commission for the location of the perimeter fence and walkway. See also Amazon's letter of 9 September 2022 where it states The Applicant has no need to illuminate anything but *its secure perimeter* and internal areas.)

Recommendation: Modify Item 17 of the SUP conditions document to include the statement that "Where not accomplished by building mounted lighting, the lighting of the perimeter fence will meet the same standards as exterior building mounted lighting (time of day dimming, LED technology, etc.) and individual lights cannot be higher than 3 feet above the fence.

Should the town desire to go ahead with the SUP, I believe it is more important to get it done correctly and completely than getting it done quickly. The incomplete request from Amazon certainly releases the town from any timelines. Getting it the SUP approved in this quarter or next quarter will not change Amazon's ability to meet its customer contractual obligations. They always have option 2.

I hope you find this email of use. Thank you for your time.

Regards,

Fred

Dear Town Council,

As both a resident and business owner in Fauquier County, I am concerned that there is a hearing planned related to an Amazon data center when Amazon's application is incomplete. Fauquier County should not allow large corporations skirt local ordinances and laws, and should comply with all appropriate work before hearings happen, let alone approvals.

Thank you.

Below are comments I submitted earlier, on an important issue that has not been raised at all in the Planning Commission work sessions on Amazon, nor in any of Amazon's submissions.

The Planning Commission would be neglecting its responsibilities if it did not consider these concerns and require Amazon to make a commitment to how many years it will operate the facility, and make provision for what happens to the massive building, fuel storage tanks, mechanical equipment, prison type fencing, and aged computer equipment at end of life.

 Subject: Amazon Data Center -- Obsolescence and Provisions for End of  
 Life

To the Warrenton Planning Commission -

As you review the proposed Amazon Data Center, please consider potential data center obsolescence and the need for protective provisions for end-of-life disposal of the warehouse, security fencing, generators, massive diesel tanks, etc.

Below are two commentaries by individuals with deep experience in data centers, suggesting high likelihood of data center obsolescence, even within less than 10 years, and particularly questioning the economic life expectancy of the Amazon proposed facility on Blackwell Road.

If the Amazon data center on Blackwell ceases operation in 10 years or less:

(a) Warrenton risks being left with a hulking vacant warehouse, substation, prison type fencing encircling the site, and other problematic detritus, on a prime location in Town; and

(b) tax revenues will be far less than expected, especially given Town and County tax incentive provisions that will allow Amazon to claim a 100% business property tax rebate for the first three years, after which the depreciated value of equipment will be a fraction of original taxable value.

NOTE: It seems to be the PC's practice to rely only on the applicant's information on issues like this. Given the high monetary self-interest of the applicant, and its tendency to make broad assertions without specific, quantified and independently sourced evidence, I believe it would be a failure of your duty to citizens to rely only on the applicant for this and all other key issues -- and I question whether Town staff have the time and expertise to provide reliable information and advice.

\*\*\*\*\*  
\*\*\*\*\*

**FRED SMITH'S COMMENTS:**

In an email to the PC on 9/5/22, Fred Smith made these comments:

*"The proposed data center will be 30 to 35 Megawatts (MW) in size. The campus is a single 220,000 square foot building. When compared to other Amazon facilities, the proposed Warrenton facility is small. It represents about 5 percent of the Amazon data center space within 23 miles of Warrenton. It will also be the smallest facility. **The small size means the Warrenton data center will - the day it opens - be an expensive data center for Amazon to operate. In the hyper competitive IT cloud services market, expensive infrastructure does not last long.**"*

Fred Smith is local (Old Busthead Road) and he has nearly 40 years' experience in the IT/Telecommunications industry including the construction, moving, acquisition and outsourcing of data centers. I urge you to meet with him or invite him to your Work Session so that you can hear more than just the self-interested views of the applicant.

**AL ALBORN'S COMMENTS ON DATA CENTER OBSOLESCENCE:**

Mr. Alborn is an IT journalist and resident of PWC. He sent these comments to the PWC Board of Supervisors, and they apply equally to the proposed data center on Blackwell Road. Note especially the text which I highlighted below :

---

**From:** Alan Alborn <[REDACTED]>  
**Sent:** Tuesday, October 11, 2022 9:55 AM  
**To:** BOCS Email Group <[BOCS@pwcgov.org](mailto:BOCS@pwcgov.org)>  
**Cc:** [bocs-cos@pwcgov.org](mailto:bocs-cos@pwcgov.org); Bill Wright <[wawright4@comcast.net](mailto:wawright4@comcast.net)>  
**Subject:** We need visionaries defining Prince William County's future.

Chair Wheeler and members of the PWC BOCS,

While I appreciate the cultural, environmental, historical, power (Dominion) and other issues surrounding data centers. I believe the real issue is the technology upon which their architecture is based. It is a very temporary solution to a real business problem. *The decision to support broad expansion of data center zoning should be based in a future technology vision, not a short term, discounted revenue stream.*

The replacement for current data centers is already in the pipeline. The people pitching them are probably quietly planning for the transition to "what's next" behind the curtain. The business market demands "what's now". The technology to watch regarding data centers and storage replacement in general is DNA.

I predict (based on MIT and Harvard's research) *the capacity of some of today's data centers will be available on a DNA thumb drive in the not too distant future.* It is an incredibly robust and stable solution (see: [https://wyss.harvard.edu/news/save-it-in-dna/?fbclid=IwAR23AuP8\\_XbrnSkS-4-e3NkMsGXRbXsMr51pjXWJPL00qhrZ2aq3yMgSbjs](https://wyss.harvard.edu/news/save-it-in-dna/?fbclid=IwAR23AuP8_XbrnSkS-4-e3NkMsGXRbXsMr51pjXWJPL00qhrZ2aq3yMgSbjs)).

Vision creation demands that you look in the right places to see what that future might look like. Here is one of many references on DNA for efficient data storage in the future. There are many more (see: <https://www.microsoft.com/en-us/research/project/dna-storage/news-and-awards/>).

I have always followed Gartner Group. This assessment is interesting in many areas. Check their prediction re DNA storage.

“By 2024, 30% of digital businesses will mandate DNA storage trials, addressing the exponential growth of data poised to overwhelm existing storage technology.” See: <https://www.gartner.com/en/newsroom/press-releases/2020-10-21-gartner-unveils-top-predictions-for-it-organizations-and-users-in-2021-and-beyond>

The actual solution might not even be under public discussion at the moment. Rather, it is the musing of some physicist in a University lab somewhere as he or she continues the tradition of thinking “out of the box” for solutions to storing business data.

In the world of technology, the only thing constant is change. The change is always faster, smaller, cheaper, and often surprising. For business and competitive reasons, “what’s next” is often created in secret and eventually surprises us. We shall see.

*These monoliths proposed to dot Prince William County are temporary solutions to a real business problem. They are not a long term solution to the world's appetite for massive amounts of data. To the businesses proposing these data centers, our community is an expendable and temporary resource.*

*Don't sell out citizens for a few additional tax dollars. The price we might pay in the future just isn't worth it.*

Feel free to check my LinkedIn resume to confirm my bona fides in this area. "Big data" is my profession. This is an informed opinion.

Regards,

Al

Hello Planning Commissioners, Town Manager, and Town Staff,

Attached please find my public comment for the Public Hearing tomorrow night, submitted to the email address on your website, with copy to you. I am unable to attend in person, and greatly appreciate your time in reading my comments.

Thank you in advance to all, for all of the time and consideration you will be extending to the public tomorrow evening and beyond in listening to their concerns.

Kindly,  
Suzan Fultz

To: The Warrenton Planning Commission  
Subject: Amazon Blackwell Road Data Center

Email: [citizencomment@warrentonva.gov](mailto:citizencomment@warrentonva.gov)

Date: November 14, 2022

Dear Planning Commissioners:

I am writing to ask you **to not vote** on the Amazon Special Use Permit (SUP) application at your public hearing on Tuesday, November 15th.

The application is incomplete as some of you and Amazon stated publicly on October 25th acknowledging information gaps on critical issues including noise/vibration, view shed impacts and power supply. This would be a premature vote in advance of Amazon's incomplete application.

There are concerning and unknown possible impacts upon our community that need to be addressed publicly and with transparency. A few known and possible negative impacts are:

- Noise pollution effecting untold numbers of residents—noise is an insidious problem that effects emotional, psychological, and physical health
- Air pollution from diesel generators and increased truck and auto traffic
- Water consumption. This may be the most horrific consequence of permitting data centers currently being discussed. It has been established that A typical data center which may house several thousand servers, can use **between 300,000 and 680,000 gallons of water per day**, equivalent to what a city of 30,000 to 50,000 people uses

- Devastated property values to those who live within five and perhaps more miles from the site
- Increased population stressing resources that are currently in balance. It is also known that residents of Warrenton live here because they do not want to live in developed and industrialized communities
- Taxes will increase. Contrary to what people commonly believe, taxes increase with industry. No industrial city has lower taxes than any rural community.

I am opposed to this data center. It would be devastating to the quality of life and standard of living we so appreciate in Warrenton. We cannot allow this or any other data center to be located in or around Warrenton; one of the main reasons I left Seattle was because of the devastating effects Amazon had on the city, I didn't anticipate such an horrific prospect to be possible in Warrenton.

Based on the town's own rules, approving any SUP must meet two conditions. It must first be consistent with the town comprehensive plan. Secondly, the development proposed under the SUP must not adversely effect surrounding homes and businesses. **The Amazon data center meets neither one of these two conditions.**

Sincerely,

Dr. Richard Spece  
7603 Cannonball Gate Rd

Sirs,

Gaining tax revenue is good if there is a need for it. Fauquier County is agriculture based, not industrial. Destroying the beauty and character of Fauquier would be a crime.

**Subject:** Data Center

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Planning Commission members,

In the initial moments of learning of the proposed Data Center for the Blackwell Road site, I was all for it. I thought it would not be very visible and would bring in clean industry tax benefits and would impact traffic marginally. Since then further reading and listening to these and more aspects of allowing a Data Center to be built in Warrenton or elsewhere in Fauquier County, I have come to the conclusion that it is a very bad idea.

First, how can the town or county allow one Data Center and deny others or many more. Second, the building will be 55 feet high and clearly visible to much of the community and to all those traveling into Warrenton or by the town. It is not architecturally interesting or aesthetically pleasing in the least and any landscaping, shrubbery and small trees, to address the plain box shape would only be visible to the few employees and that's not mentioning the ugly power plant that must be built there. Third, as I understand it, (I'm not an economist by any stretch) the tax benefits for the long term are questionable. The building, however, will be there for a very long time. Fourth, for many years the problem of water has been an issue in Fauquier County. Development of industry and housing has been impacted by our lack of water reserves. This new Data center would need lots of water to help cool the operations. That would be a drain on our already precious supply. Which brings me to the fifth reason the Data Center idea is a bad one, NOISE. The constant drone of the cooling system and the power production would be audible for miles all around the Data Center. What is around the Data Center site, a car dealership and the stripe mall style shopping center containing Giant grocery. But equally close or closer is the Poets Walk Memory Care facility, townhouse developments, housing developments, all personal living spaces. The noise from the data centers is a constant and never ending drone of sound. That takes a physical and mental toll on human health. As for the traffic issue well there is the plus. Sixth, the Data Center would employ only about 80 people and many of those would be commuting from elsewhere. But the low rate of employment for locals is a negative. Seventh, the use of the land is not what the long range plan for the town designated, far from the multi-use plan citizens designed. Eighth, the acquisition of enough power to support the needs of the Data Center must come from out of the county and it must get here somehow. The likelihood of underground transmission lines is slim and none as that is not cost-effective for taxpayers. So there will be a march of massive power towers some place in the county from Prince William

County or farther away. Whether it's down RT. 29 or off the beaten track a bit more , it will still come across rural holdings of the citizens of Fauquier County. That is a prime example of “not in my backyard” feelings and rightfully so. Who wants their property scalded by huge power transmission towers and the value of their property to go down. In essence the Data Center effects Fauquier County not just the town of Warrenton.

I have heard very little from those in favor of allowing the Data Center except on the tax issue and many seem to think that is a never ending source of income. Not allowing commercial use of the land for something like Costco is another argument for visual beauty vs. tax rewards but that also does not address the long range plan that has already been developed for the town of Warrenton. There has been no rise of a group supporting the Data Center with facts to back their argument. I have heard very little or read very little about the benefits except taxes for the Town of Warrenton or Fauquier County. Supporters are very quiet or very few.

It has been revealed that Amazon and its legal team have not been forthcoming with all requests from the Planning Commission. The rush to settle the issue before all studies are complete leaves a bad taste in my thoughts about the virtues of the project and its supporters. It feels like there is money to be made for some that is not so clean. I certainly hope that feeling is incorrect!

As a resident and public school teacher in Fauquier County for all of my adult life, I have watched and held my breath many a time on critical decisions made by the governing bodies. Many of those decisions have looked to protect and maintain the rural beauty and small town feel of Fauquier and Warrenton and I have been relieved. Often I have wished we could find a way to attract clean industry to help relieve the tax burden on home owners. Often I have wished the housing developments would not happen as they don”t pay for themselves in regard to use of police, fire and rescue, schools and road ways, more tax dollars needed. But such is the way of growth and movement from Northern VA and Washington DC. Thankfully it is not as bad in Fauquier and Warrenton as it is in counties and towns to our north and east.

Stay the course prescribed in the Comprehensive Plan and vote down the Data Center. It is not a good fit for us.

Sincerely,

Janie Mosby

**Attachments:** Tinnitus Demonstration.mp4  
**Importance:** High

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Members of the Warrenton Planning Commission,

The attached video (approximately 33 seconds in length) is a demonstration of the potential damage to human hearing (tinnitus) that can result from exposure to constant sound levels of the frequencies and intensity that originate from cooling fans on data centers. It is a close approximation to how I experience the world as someone with tinnitus.

Tinnitus is not a loss of hearing, unlike deafness, which is more easily understood and appreciated by individuals with normal hearing. It is a constant "noise" (hum, whine, ringing, etc.) that is generated in the auditory processing centers of the brain as a result of prolonged exposure to dominating background sounds in the environment. In addition, it tends to worsen over time, often progressing to the point where it obscures a sufferer's ability to comprehend other sounds and speech. There is no surgery, medication or hearing aid that can treat or eliminate the effect of tinnitus. Progressive tinnitus further complicates sufferers' lives by inducing depression, learning dysfunction, suicidal ideation and difficulties with anger management.

Tinnitus has increasingly impacted my quality of life over the past 45 years, robbing me of simple pleasures of normal hearing that we all too often take for granted.

You, the members of the Warrenton Planning Commission, are on the cusp of making a decision that raises the risk of fellow residents of our town acquiring this debilitating disorder. These individuals occupy more than 650 residences and business located within range of the sound levels emanating from the proposed AWS data center. As officials of our town government, and thus beholden to the citizens of Warrenton, your overriding concern in making any planning recommendation must be first to do no harm.

I urge you to take a mere 33 seconds to view the attached video and, having taken to heart the potential negative environmental impact of the proposed data center, to recommend to our Town Council that this project not be allowed to proceed.

Respectfully,  
Calvin W. Hickey

Warrenton Planning Commission

Reference: Amazon Data Center

As a 27 year resident of Fauquier County I have witnessed the growth and Development. Most of it in a positive manner because we have been represented by people who have stepped up to protect our beautiful county and continued to share the mission and vision that states to preserve the physical beauty, historical heritage and environmental quality of the county while ensuring that population growth and development is a positive force on the general welfare of our community.

Fauquier County stands for agriculture, farm land, equine, winery's, history and most of all good suburban living. We have it all and we the people need to protect it at all cost. I am nauseated and extremely opposed to any thought of a 220,000 sq ft Data Center landing in Warrenton. A sightly concrete box is not physical beauty. There must be other alternatives. Our neighboring counties are already becoming concrete jungles. A Prince William County study found that an overlay district where most of its data centers are concentrated was running out of land considered to be marketable to data center developers who might prefer to build elsewhere — a finding bolstered by a separate study. If you give them an inch they will take miles. Don't turn us into a concrete jungle. The fight is not over, you have a job to do the right thing.

Represent this county for the people. Search out more options, speak up and protect our county.

Oppose the "Amazon Special Permit Application".

Sincerely,  
Kimberly Siciliano

To: The Warrenton Planning Commission

Subject: Amazon Blackwell Road Data Center

Email:  
[citizencomment@warrentonva.gov](mailto:citizencomment@warrentonva.gov)

Date:

Dear Planning Commissioners:

I am writing to ask you to not vote on the Amazon Special Use Permit (SUP) application at your public hearing on Tuesday, November 15th.

The reason is that the application is quite incomplete as some of you and Amazon stated publicly on October 25th acknowledging information gaps on critical issues including noise/vibration, view shed impacts and power supply. A vote that would prematurely advance Amazon's incomplete application to the Town Council would further discredit the planning commission and how the town has handled the entire Amazon situation.

Based on what I know, I am opposed to this data center. It would seriously tarnish one of the main gateways into our historic town, and would be visible from many parts of the town and even the county. The noise and vibration it would generate constantly would cause physical and mental harm to hundreds of residents, and it would lead the way for more data centers and massive power towers and transmission lines.

Based on the town's own rules, approving any SUP must meet two conditions. It must first be consistent with town's comprehensive plan. Second, the development proposed under the SUP must not adversely affect surrounding homes and businesses. The Amazon data center meets neither one.

Thank you for the opportunity to voice my opinion.

Sincerely,

Amy and Andrew Zwirko

**Subject:** Warrenton Planning Commission Meeting Tonight  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Planning Commissioners,

**Please do not vote on the Amazon Special Use Permit (SUP) application** at your public hearing tonight, Tuesday November 15. As some commissioners have noted, the application is incomplete and does not address noise, view shed impacts, and water usage. If the application advances without this critical information, it will further discredit the planning commission and the Town's handling of the data center application.

The proposed data center would seriously impact the quality of life for many Warrenton and Fauquier County citizens. The data center and accompanying noise, water, view shed, and power issues would change Warrenton forever and would probably lead to the intrusion of more data centers and massive power lines.

Based on the town's own rules, approving any SUP must meet two conditions. First, it must be consistent with town's comprehensive plan. Second the development proposed under the SUP must not adversely affect surrounding homes and businesses. **The Amazon data center meets neither condition.**

Dave

The letter is SUPERB! It is obvious from your logical argument and substantiated facts that the ToW really has not met the criteria to take a vote. After rereading the letter, it is even more obvious that the PC should return the submitted application back to AMAZON as incomplete and requesting that they complete the application before a future resubmission.

Very well put. This letter needs wide distribution and careful consideration by the Planning Commissioners and the Planning Office Staff.

Bravo!  
John

As a citizen of the town of Warrenton I am very concerned about how the proposed Amazon industry will affect our small town. I have lived in Warrenton my whole life and greatly value the small town atmosphere and beauty. When I hear that Amazon would be more in the citizens favor, as far as the tax base, vs two hundred homes, my first thought is why do we need either. I don't understand why our planning commission feels we need to keep up in growth size of communities such as Gainesville or Loudoun county, when obviously it is not what the citizens desire. Our real estate taxes are fastly increasing and in this economy making it hard for long time citizens, who help build our town difficult to continue to live here, which is extremely sad. Therefore, I pray that when the town council votes on Amazon coming into our beloved town, great thought is taken into long term effects on the community and quality of life in general. Maybe step back and slow the growth.

**Subject:** I OPPOSE Amazon data center in Warrenton!

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To Whom it may concern,

I live and own a home in Warrenton, Virginia/Fauquier County.

As I am fully occupied as caregiver to my adult daughter with advanced mitochondrial disease and remain, by her doctor's orders, in isolation with her at this time, I am unable to attend today's meeting in person. Therefore, I am sending this email in my place.

I strongly OPPOSE the construction of the Amazon Towers data center and Dominion's expansion as a related result.

Fauquier County is a jewel in the heart of rolling Virginia hills and what drew me and many others to settling here is its "Norman Rockwell" type environment.

It is known that the Amazon towers will be obsolete-abandoned within 10 years—yet their impact will be for generations. The problems and detriments it will bring to our town are more numerous than any potential gains. From the dramatic increase of road traffic with daily trucks, the energy surge, the noise pollution it will cause, harm to local wild life, the huge water requirement needed to operate the center, the very few jobs it will bring—are completely against all the qualities and principals that attracted me to move to Warrenton many years ago. I believe it will completely ruin our town and harm my property values, not to mention my quality of life.

Furthermore, Amazon and Dominion are only interested in their financial bottom line and projects to their boards/share holders. You, as an elected official of the town, were elected in good faith and belief that you would protect the people of Fauquier County—and make decisions based on the happiness and well being of the community you represent. These data centers are completely opposite to all the qualities and benefits that Fauquier County represents and stands for.

So please vote NO against the proposed amendment to allow the data center.

Sincerely,

Eileen Baldwin  
Home Owner , Woods at Warrenton

To the Warrenton Planning Comm.  
Re: Amazon data center

Please postpone a decision and certainly a vote. The Town does not have enough information to make a decision. Amazon and Dominion keel changing their proposals. And most importantly, the citizens Do Not Want it. People are moving here because they want a small town life. We don't want to be Loudoun and Prince William. How many years have we said that?!

November 15, 2022

Dear Members of the Planning Commission,

I am a resident and property owner in the Oak Springs subdivision. In 2006 I moved to Warrenton from Alexandria away from the hustle and bustle of the suburbs, and for the past 16 years I have called Warrenton my home.

The back of my townhouse sits directly facing Blackwell Road. One of the reasons I chose this home was because I could sit quietly out on my deck and patio and enjoy the native wildlife and foliage.

If the Planning Commission, and ultimately the Town Council, approves the Amazon Special Use Permit (SUP), I will no longer be able to enjoy this amenity.

Additionally, my property value will drop substantially as studies have shown that residential areas around data centers depreciate anywhere from \$88,000 to \$136,000 per parcel. The quietude I once enjoyed will disappear and I will no longer be able keep my windows open during the night but for the incessant hum the data center would generate.

The wildlife corridor and the traffic along Blackwell Road and Oak Springs Drive will be severely compromised. I ask – how does this fall into line with Warrenton's 2040 Comprehensive Plan? Simply, it does not.

While I am cautiously relieved that Dominion Energy has chosen not to construct a substation along Blackwell Road, if the SUP is approved, the view from my home will still be a 220,000 square foot 50+ foot high concrete block.

Please give consideration to those of us whose lives will be severely impacted should this project move forward.

I respectfully urge the Planning Commission as well as the Town Council to disapprove the SUP and keep the bucolic town of Warrenton a place where I, and others, will be proud that our little town said a resounding 'no' to the corporate giant, Amazon.

Thank you for your time and consideration.

Respectfully,

Planning Commission

Town of Warrenton, VA

Re: Public Hearing to discuss the Special Use Permit requested by Amazon

Attention Commission Members:

As you are aware, there are a considerable number of concerns about various aspects of this issue and significant opposition, as will be demonstrated by the petition to be presented, the many speakers and others in attendance at the Hearing. The purpose of my comments is to support the call to not approve the Special Use Permit requested by Amazon in that it has been

demonstrated, thus far, that it is incomplete and full of unverified and bad information.

Given the concerns raised by the many speakers at the Hearing, as well as the concerns/reservations expressed by the members of the Commission, themselves, at the recent Work Session, it would seem inconceivable that approval of the Amazon request would be made. If not an outright denial of the request, at least action should be taken to keep the meeting open, or continued, or whatever the technical term is that would allow more time for the various concerns to be more thoroughly examined/ explored.

There is too much at stake to make a hasty decision and/or ignore what appear to be legitimate concerns, some of which I will mention below. It also should be recognized, and agreed to by the members of the Commission, that the legitimacy of any concerns/issues raised should be based on the merits of the issues themselves versus a consideration of where the people live who present/raise them or by the number of instances they are mentioned.

Any proposed 'changes' offered by Amazon and/or Dominion, also need to be thoroughly examined. What, on the surface, may appear to be an accommodation may, in the long run, present and/or add to other problems, such as setting up the Town of Warrenton for multiple Data Centers and their associated problems.

Careful attention must be paid to the language used, such as the terms Distribution lines vs Transmission lines. For example, instead of an offer by Amazon to pay for the undergrounding of 'all' electrical/power lines (which would include Transmission lines), an offer by Amazon stipulating only Distribution lines is relatively meaningless in that, it is understood, under Dominion's policy, Amazon would be required to pay for that anyway.

There may not be anything new presented at the Hearing. You have probably been exposed, in one way or another, to all of

them by now. So I will not go into detail discussing them. Rather, I will just list some of the more prominent concerns that have been identified, thus far, that I am aware of.

One concern calls into question the whole administrative process that allowed this to come about in the first place. That may not weigh in on the direct consideration of the Permit; but, it is out there and, in a way, overshadows the whole process.

Continuing weak, shifting, information from both Amazon and Dominion is another. It almost seems as though it was considered, by them, to be a 'done deal' from the beginning; so that more thoughtful, detailed, professional input by them wasn't that necessary.

The whole setting of the proposed Data Center, aka known as the 'viewshed', has been called into question. Is the proposed site one of those that has/had been identified as appropriate for that kind of development? I think the term 'industrialized' has been used to describe such sites/areas. I will not even bring up the ludicrous 'balloon test' results offered by Amazon at the Work Session.

Also, the issue of the noise that will be generated has been raised. It is understood that, as a result, some changes have been offered by Amazon; but, again, these need to be looked at in detail and in context. For example, noise measurement may be one thing at a relatively early stage of development; but, an entirely different matter once the Data Center would be in full operation.

The impact on nearby property values needs to be seriously considered. Speaking of 'value', the proposed tax revenue needs to be carefully examined, as well. In the end, it may not turn out to be what is being speculated/projected. Have the experiences, relative to tax revenue from Data Centers, in other locations/counties been explored? Especially, as concerns what was projected and what actual revenue was received!

Finally, another thing to consider is the projected advancement in technology. Already, there is talk of a time in, perhaps, the not too distant future that will call into question the need for so many Data Centers or even any at all! What happens then to all those structures and the related investments?!

There are many things to consider and, given the importance of this decision relative to the precedent it will set for further/future applications, it is imperative, in the discharge of your duties, to get it right the first time.

Respectfully submitted,

Tom Daily

Subject: Old Bust Head Brewing Company opposed to Transmission Lines  
Date: Tuesday, November 15, 2022 11:42:26 AM

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hello,

As owner of Old Bust Head Brewing Company, and 20+ acres of redeveloped historic retail, industrial, and commercial buildings in Vint Hill, I want to voice my strong opposition to any new overhead power lines in Fauquier County that might come as part of the Amazon data center submission. Our brewery is the anchor that makes the success of all our tenant's businesses possible, and the brewery is dependent on customers who visit our county for its rural and unique character. As we have seen time and time again, power lines destroy communities and are a serious detriment to tourism-dependent businesses like ours. This is why the county voted to underground power lines in Marshall Va, and the business owners and residents agreed to put up with the interim pain for the long term benefit. As a resident of Broad Run, 3.5 miles outside the Warrenton town limits, power lines at the gateway to town would cause destruction to my feelings about Warrenton as a community and seriously impact my motivation for investing in its future.

Please do not be the commission that is responsible for such a blight on what is now a rural and historic treasure.

Sincerely,  
Julie Broaddus

I am writing in opposition to approving the data center proposed by Amazon in the Town of Warrenton. The Planning Commission does not have sufficient information from Amazon to make an informed decision to recommend approval of Amazon's application for a Special Use Permit.

On a procedural point, there seems to be some confusion over the 100-day rule. That rule, which only applies to zoning applications, deems applications as "approved" after 100 days from an initial meeting if the application is not acted upon. That provision for a "deemed approval" appears nowhere in the code section governing Special Use Permits.

To the Warrenton Planning Commission and the Town Council

I am dismayed that our town planning commission and council are in such a hurry to vote on the special-use permit to allow Amazon to build a data center within the town limit.

The citizens of the town worked long and hard on the current Comprehensive Plan and to allow a data center in this area designated as one of the gateways into the town is in direct conflict to what was approved.

I feel the town council has not done due diligence to assure the citizens this application meets the town noise ordinance and will not be a visual eyesore. PEC and other citizen organizations have presented information against approval, and I have heard from people that they are “fear mongering”, if so then the town council and the planning commission need to do their due diligence to present noise studies to assure residents everything is in compliance with the current town standards.

What is the hurry? We have a new town council and planning commission coming on in January, allow them to review and make the decision.

Please deny or delay the application.

Thank you,

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Commissioners,

Besides all the arguments you already know for denying this application, this hearing should not even be taking place with an INCOMPLETE APPLICATION!

No one else in our community would be ushered along to a hearing with an incomplete application, but you are willing to do this with the biggest land-use decision in Warrenton's history.

I would also say, shame on you and the town administration for holding this hearing at Town Hall. This citizens should be allowed a comfortable and dry place to sit and watch the interactions as they wait their turn to speak. Instead, you will have hundreds of people standing out in the cold rain, unable to hear or see anything, and probably just going home. This is the Mayor's version of a "transparent government" I guess.

This hearing should not happen tonight and when the application is complete, you should hold a public hearing at a local auditorium where the citizens can actually participate.

I hope you will do the right thing!

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing to urge the Council to postpone any action approving the massive data center in town due to the noise and vibration that will be caused by the center. The noise will be a permanent loss of the quiet that is a part of Warrenton and once lost, cannot be regained. Approval of this proposal will permanently change Warrenton's small-town appeal and Fauquier County's rural character, and significant noise and visual impacts will affect citizens and visitors alike. Citizens and visitors will be greeted by a fifty-foot-high building on an elevated site, right at the eastern entry to Warrenton. The data center and power lines will be visible from many parts of both Warrenton itself and the surrounding countryside.

Please don't sell out the town for such a short-term financial gain at the expense of the town and its residents.

Hello!

Thank you for the opportunity to share my thoughts.

I love Warrenton. I moved here in October 2020 because I fell in love with its charm, its beauty, its support and protection of agriculture, and its small yet mighty Old Town district. I do not wish to move again- my roots have been set here in Warrenton and I want to stay here- yet I will likely find myself moving if this data center is approved. Let the other counties and cities who have let data centers move in be a dire warning- data centers come in, and peace, quiet, and charm move out. You approve just one and more are sure to follow.

Someone has to stand up to these monstrous corporations- please let the Council be the force which does not give in to the allure of promised revenue and potential jobs (both of which are uncertain), as I am positive that the cost will far outweigh any potential benefits.

Thank you,

**Subject:** Vote NO on the Amazon SUP

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Members of the Planning Commission,

I am strongly opposed to the Amazon data center SUP. A data center on Blackwell is simply not consistent with the vision for "New Town" included in the Town's 2040 comprehensive plan, which was *just* adopted. The construction of a data center on Blackwell will mean that we permanently lose the opportunity to attract a mixed use development in the Town gateway as described in the Comprehensive Plan (which residents could actually use and enjoy rather than just try to ignore).

It will also degrade the quality of life for the residents of the nearby communities, which constitute some of the Town's best reasonably priced housing. Don't believe what Amazon tells you about the noise. An Amazon data center is exceeding noise limits just up the road in Manassas, causing harm to local residents: [https://youtu.be/qpA\\_v45hnDs](https://youtu.be/qpA_v45hnDs). I watched the Planning Commission's recorded meeting from 11/15 and was particularly alarmed by the comments made by a resident of Waterloo North living on View Tree Mountain about the impact of the data center at the Warrenton Training Center on his neighborhood nearly a mile away. I was also moved by the gentleman at the end of the meeting from Oak Springs that played the sound of a data center for the Commission. We don't need that sound in our lives, not to mention the years of uncertainty and battling and construction related to the power source (which the SCC has ultimate control over).

Furthermore, a data center provides limited permanent jobs, and the tax revenue is [highly uncertain](#). There is also a very real possibility that Amazon and the data center lobby (which has seemingly boundless resources) will be able to achieve further tax breaks from the state legislature in the future. Amazon is notorious for its ability to avoid taxes (see [this 2022 piece](#) from the Institute for Tax Policy and Economic Policy), and cannot be trusted to accurately report the value of its equipment. If there is some dire need for revenue, then I'd rather pay more in taxes.

As you must very well know, data centers are bringing tremendous headaches to our neighbors to the north and east, and there has been exceptional and voluminous public opposition to this proposal from Town and County residents. I urge you to listen to the overwhelming majority and **vote down the SUP**.

Thank you for your public service and consideration of my comments. I appreciate your willingness to listen to hours upon hours of public comments and extend the public hearing to 11/22.

I wish to oppose the AWS center proposed for Warrenton. I have lived in Fauquier County since the mid-seventies. I have lived in four different residences here, now residing in The Town of Warrenton. My daughter lives here, my married daughter and her family live here. No one wants the character of our town ruined!

The Planning Commission should NOT approve this. It doesn't meet any of the requirements! It actually shouldn't have gotten to the Planning Commission.

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good morning!

Thank you for sharing the recording from the meeting Tuesday evening regarding the proposed Amazon Data Center. I was unable to attend, but I am most thankful for the outstanding representation from citizen against this proposal.

I just recently moved to Warrenton, in May 2021. I LOVE this town and am already serving on my community Board of Directors and getting involved as quickly as possible. I work from home and am also a Real Estate agent PT. My 97 yo WWII Veteran father lives with me. We relocated to Warrenton for the beauty, the people, and mostly for the less congestion and noise from Fairfax. I have also brought my son and his family here from Loudoun Co. They also came for the same reasons.

I have lived through and have witnessed the growth of Data Centers both in Loudoun and Prince William Counties. My daughter and her family live in Nokesville, just off Rt. 28 and I owned a ministry located off University Dr in Prince William from 2012-2018. I physically watched the surrounding acreage become COVERED in Data Centers in a matter of just a few short years. I witnessed the same when traveling to my son's home in Ashburn. These Data Centers are one reason that we all CHOSE to come to Fauquier. We made this decision to GET AWAY from the noise, the unsightly buildings, the high electrical resources - and basically, to a County where we believed valued land and families.

These data centers are de-valuing real estate. I have seen it in many transactions, and its just not fair to the homeowners. We see this same type of destruction when roads have to be built, but at least the roads serve the communities. The data centers could easily be placed AWAY FROM homes and local communities.

I am firmly against the data centers, yet I also firmly support the 2040 plan for Warrenton. I am in favor of modernization (to a point) within Fauquier, but I believe the data centers would be detrimental to this County.

Thank you,

Lois Hughes

**Subject:** Comments on Amazon Data Center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Thank you for receiving my comments.

The recent vote to turn rural land on the edge of the Manassas Battlefield National Park into Data Centers is one of the most egregious violations of the character and history of that space.

The data center proposed within the boundaries of the Town of Warrenton will undisputedly open the door for more of the same here.

Warrenton is a gem - a town that is absolutely beautiful at every entrance, whether coming in from 29 near Chevy, Meetze Rd, 29 near the community college, Culpeper St, 211, or 17, Each entrance has character and natural beauty. There is no way to hide the behemoth of a data center at one of those entrances to town.

Warrenton appreciates peace and quiet. Recent data centers erected along the Prince William Parkway PROVE without a doubt that the ambient noise reduces the quality of life of residents nearby, more than a highway or an airport ever would.

Warrenton likes smart growth. A warehouse-style building is not smart growth.

Warrenton likes transparency in the process. The number of speakers is testament to that.

Consider me a "no" on the data center consideration.

Respectfully,  
Jason Smolinski  
Warrenton resident

Dear Planning Commissioners:

My husband and I attended last Tuesday's Planning Commission meeting. I had signed up to speak, but had to leave before my name was called. Unfortunately, neither my husband nor I can attend the follow-up meeting. That is not because we don't think it is a meeting of the utmost importance. It is because we have both had deaths in the family, including my father, and consequently have numerous guests visiting. So it is with regret that we cannot attend.

There is not much more to add to all the the good comments that were made last week in opposition to this project of Amazon. I would merely like to point out the obvious, that the Amazon Data Center is nothing more than a Trojan house. Saying there will be no massive power lines for this particular data center is cold comfort, because more hideous and gargantuan Data Centers will follow, and with them will come the hideous, gargantuan power lines.

My husband and I fled Loudoun County after watching this disaster unfold there. We were not subjected to the noise factor because we weren't close enough, but the daily assault on our senses from being forced to look upon these hideous structures and the attendant power lines every day took its toll on our mental well being. At first it is subconscious, but soon it becomes impossible to ignore.

The "new look" for the data centers that the Amazon representative showed us on his slide was just as unrelentingly ugly as all the others and has no place in a small community such as Warrenton, dwarfing all surrounding structures, and in such close proximity to so many hapless residents.

The irreversible adverse effects of allowing this data center to be plunked down in the middle of our small, quaint and sweet town cannot be overstated. The unsightliness and noise is nothing but a blight on the surrounding area and without a doubt will cause the people subjected to this onslaught to suffer physically, mentally and even financially as their home values plummet. These data centers have already blighted enough areas. Perhaps the people who like them so much should install them in their own backyards.

For the well-being of this town and county, and for all the people living here you must vote against it.

I would very much appreciate a confirmation that you have received and read this e-mail.

**Subject:** Proposed Amazon Data Center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Town of Warrenton Planning Commissioners:

Citizens of the Remington Service District were once promised a 125-acre park (Fauquier Comprehensive Plan, 2003) but we lost our park to a utility solar site. The Remington solar facility produces about 20 megawatts of power annually at operating capacity. Meanwhile, Amazon's proposed Warrenton data center will consume between 5 to 20 megawatts per year (estimates vary due to a lack of information from Amazon and Dominion Energy).

Though we lost our park, Remington residents thought we were helping combat climate change. Now we are dismayed to learn our power generation might be used to satisfy Amazon's thirst.

Please don't approve this proposal; there are negative repercussions for every Fauquier citizen, but especially Remington residents, who have two power plants and one solar facility already.

How much more of a sacrifice must we make to satisfy Amazon, Dominion Energy, and Fauquier County desires? Please don't add more demand.

Sincerely, Mary M. Root

Chairman, Remington Community Partnership

**Subject:** Amazon Data Center SUP Noise Conditions are Deceptive and  
 a Give Away to Amazon  
**Importance:** Normal

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Planning Commission:

If you allow the Amazon Data Center SUP to move forward to the Town Council, you will be aiding and abetting an end run around the Warrenton noise ordinance.

Do not allow that to happen. Do not subject Oak Springs, North Rock, and the Highlands neighborhood to constant noise violations. You will be ruining their property values, their health, and their quality of life. These are real people, with real families.

The conditions developed for the SUP by Amazon and Town staff DO NOT REQUIRE COMPLIANCE WITH THE NOISE ORDINANCE. Read those conditions carefully, like a judge, like a lawyer. Those conditions tacitly give the green light to Amazon to build and commence operations in violation of the noise ordinance -- and only "undertaking" and "diligently pursuing" mitigation -- which is open-ended in time -- i.e., potentially forever.

Do not even think about allowing this to happen. Do not put the interests of a trillion dollar international corporation over the interests of residents and families in the nearby residential neighborhoods of Oak Springs, Highlands, and North Rock. These are not affluent households. Many are working class, modest-income families.

You will further be putting at risk the patients and employees at Poet's walk, the employees and patrons of Giant, Country Chevrolet, Piedmont Family Practice, the Harris Teeter Shopping Center, and many other nearby businesses. Do you really want

to drive away patrons and employees from these businesses, reducing their bottom line, and potentially endangering their continuing operation?

Think of the precedent you will be allowing if you allow Amazon's SUP to proceed, without a noise study, without compliance with the Town noise ordinance -- and with tacit written approval to violate the noise ordinance for an indefinite and potentially prolonged period,

Moreover, you must realize that Town staff have already been complicit with Amazon in trying to deceive you and the public. The Town Staff Analysis prepared for you says that the Noise Conditions require compliance with the Town noise ordinance. That is clearly not true. Instead the Noise Conditions tacitly approve violations, and only require "diligently pursuing" mitigation -- open-endedly -- potentially forever.

Meanwhile, in nearby Prince William County, Amazon is "diligently pursuing" mitigation by wrapping yoga mats around rooftop AC units, bound with bungee cords. Amazon clearly does not know how or whether it can meet even the weak noise standards in PWC -- much less the more protective noise standards of Warrenton.

Do not allow this Amazon SUP to proceed to Town Council without a noise study that demonstrates compliance with the Warrenton noise ordinance. And do not trust Town staff to review such a study. They do not have the expertise -- and have shown they are much more attentive to the needs of Amazon than the needs of residents and neighborhoods in Warrenton.

Look to your consciences, and to your responsibility to the people of this Town and County.

Sincerely,  
Cynthia Burbank

Data Centers are a horrible idea. They can be built in areas that don't have such a tremendous negative impact on the citizens of the town of Warrenton. The noise & resulting vibrations will decimate the quality of life we currently enjoy.

I can only surmise that officials making the decision on such an important issue are either ill informed or influenced by some other method. To even consider this going though unrestricted with an open contract is unethical. Why are you selling out our bucolic area?

This issue reminds me of what the chicken farms have done to the Shenandoah Valley. Promise of jobs & money have polluted ann Eden like area & proved to be a drain & eyesore to the farmer's & environment.

Respectfully, Kathryn Barber

Hello,

If someone told you that some loud data center would be incessantly buzzing half a mile from your home you'd be irritated off too. My mom purchased this home in 2014 and it's the home that she plans on retiring in. Constant buzzing will be not only annoying and irritable, it will be unsupportable. If you don't care about the hundreds of people this will be affecting, maybe you'll be sympathetic to our pets. Dogs and cats have a keen sense of hearing and this will affect them too.

This data center means a reduced quality of life for the citizens of the town that you guys are supposed to represent. You need to listen to the voices of the people who will be directly affected by this. And you also need to listen to the experts who have pointed out the flaws in Amazon's noise study. I know Amazon is a business giant. And I know there is likely some incentive to letting them build a data center here. But why are we crawling closer and closer towards another crowded, unaffordable, and unlivable northern Virginia town?

Dear Fauquier Planning Commission members,

At last Tuesday's meeting, many well-informed town residents gave convincing reasons for not rushing into granting the Supplementary Utility Permit (SUP) that is a prerequisite for building a data center on land originally designated for multi purpose uses. Too much secrecy shrouds what appears to have been a hurried "deal" with Amazon. An abundance of evidence gathered from other localities illustrates that noise pollution is potentially a very big problem. Understandably, trying to make adjustments after the center begins operation is not a viable solution. Now there is talk of perhaps one or more data centers within the town limits. These and their connecting power lines have the capacity to disrupt the peace and tranquility that the Greenway has been providing since its completion. That "green space" in itself is a treasured resource that we choose NOT to surrender under Amazon/Dominion's recommended plan of action. **VOTE 'NO!'** Don't allow data centers to proliferate within Warrenton!!!

Because I live just outside the town's southern boundary, I don't have a vote in town elections. There's a deep community spirit within Warrenton that both town and county residents respect. The Commission needs to take its time in reviewing the data that has already been presented before making an irreversible decision.

Your citizens do not want this data center shoved down our throats. We have been speaking out repeatedly. No one without property to sell has spoken in favor at any of the meetings I have attended.

The planning commission made the right call to DEMAND a full application. At least two said without one, they would have to vote no. Please realize the consequences of agreeing to this thing without all the data - of which you have precious little.

Somehow, I am beginning to think you wouldn't care what the commission says... You sure don't seem to care what your people say.

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Yesterday I received a notice from Dominion indicating that it has narrowed its proposals to 2 options, an overhead transmission route and an underground route. Both will pass by our house off of Walker Road. Walker road is a beautiful road and these actions will surely destroy that beauty. I understand that these proposals will be considered on December 13.

These proposals will be moot should Warrenton not grant the Special Use Permit (SUP) for Amazon to build its data center.

Please, I urge you to not grant this SUP! The target location for the data center is adjacent to Warrenton town centers for shopping, etc. It is largely a residential area! Data centers should be planned and built in areas set aside for industry, and should be banned from Fauquier altogether.

Please do not grant the SUP!!!!

**Subject:** Amazon Data Storage Building in Warrenton

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Mayor and City Council members,

It is with a heavy heart that I find myself writing to you tonight. A year and a half ago my wife and I moved to beautiful Warrenton - nestled in between the Shenandoah mountains and the "Big" city. When we heard about Amazon wanting to put a data storage warehouse in Warrenton city limits, I thought that can't possibly be right - "WHO" would want a huge, sterile, loud and ugly building (and possibly more) in this picturesque setting. I have been to two of the planning commission meetings concerning this special permit request and am just appalled by the lack of transparency by the city government (signing of NDAs - sounds illegal and if it isn't it should be!); the lack of a completed application from Amazon; the lack of real information from Amazon; and the lack of council members' thought processes (why do you think this is good for Warrenton). I have read that most council members have lived in Warrenton for years and it boggles the mind why you have even engaged with Amazon to begin with!

I grew up in Northern Va and like many people wanted to get away from the never ending crazy growth and building of mega centers. 30 years ago I loved driving through Warrenton on the way to the Shenandoah to hike, canoe, or fish, but I'm afraid that I will no longer like what I may see if we let Amazon and others make Warrenton look like Ashburn. I implore you to vote against this special permit and let's keep Warrenton special.

Thank you,

Dave Hettinger

Dear Mayor and City Council Members,

I lived in NOVA for twenty years, moved away due to my husband's job and we returned a year and a half ago. Previously living in Fairfax and Centreville, WE CHOSE WARRENTON to be our home because we loved it's idyllic atmosphere. **Your job is represent the people of Warrenton** and I think it's very clear that the residents DO NOT want the Amazon Data Centers and the power lines that come along with it. In your good conscience, how could you even entertain the thought of it?

No amount of revenue is worth ruining what Warrenton and Fauquier County represent- a break from the hectic NOVA area...a gateway to the mountains, wine and horse country. And we have yet to hear exactly what kind of revenue it will bring!

There are many downsides:

-Unsightly huge structures seen from miles away (not idyllic)

-

Dear Mayor and City Council Members,

I lived in NOVA for twenty years, moved away due to my husband's job and we returned a year and a half ago. Previously living in Fairfax and Centreville, **WE CHOSE WARRENTON to be our home** because we loved it's idyllic atmosphere. **Your job is represent the people of Warrenton** and I think it's very clear that the **residents DO NOT want the Amazon Data Centers** and the power lines that come along with it. In your good conscience, how could you even entertain the thought of it?

No amount of revenue is worth ruining what Warrenton and Fauquier County represent--a break from the hectic NOVA area...a gateway to the mountains, wine and horse country. And we have yet to hear exactly what kind of revenue it will bring!

There are many downsides:

- The beautiful nature of Warrenton will be forever ruined--there's no going back to correct it later. Think Ashburn. Rt. 29/66 and all of the warehouse buildings.
- Unsightly huge structures seen from miles away (not idyllic)
- Noise pollution
- Property values of ALL the residents will go down
- People will not want to move here (how does that help revenue?)
- Does not bring jobs

It seems so unjust that the fate of all of the residents is held in the hands of several people. You signed NDA's? There's been such a lack of transparency, but yet you were elected to protect the people of Warrenton. This is a decision that will affect the fate of Warrenton forever more.

Something has to be preserved...almost be sacred. Think about our National Parks and the pristine beauty that lies within. President Roosevelt and John Muir had a vision -- and COURAGE--100 years ago to preserve that land. Thank God they did, because can you imagine how ruined it be be today? They had the foresight to think about the residents of this country and the future beauty of this land.

Please have the foresight--and courage-- to preserve Warrenton and Fauquier County-- it's fate is in your hands--PLEASE VOTE NO TO THE AWS SUP!!

Respectfully,  
Laura Hettinger

**Subject:** Amazon Data Center Consideration...

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

December 13, 2022  
Warrenton Town Council

There is probably nothing in the comments offered below that the members of the Town Council or the Planning Commission have not heard recently regarding opposition to the proposed Amazon Data Center in the area up behind Country Chevrolet. The purpose of submitting the comments is to add yet another voice to the opposition and reinforce the various points that have been raised.

In addition to the many who have spoken at recent events, the Petition that has been signed by, reportedly, 1800 or more residents of the Town and County, is evidence that there is widespread opposition to the Amazon Data Center based on a number of factors that have been raised. The merits of the objections/concerns that have been raised should be taken into consideration based on their objective validity and regardless of the locations of their sources.

To begin, the current approach seems to contradict plans previously arrived at as a result of Comprehensive Planning by the Town and the County. Two industrialized zones (PCIDs) were identified in the County for uses such as Data Centers. It would seem that some coordination with the County would have been in order to assess whatever justification was used to motivate the Town to deviate from the original plans. The current situation, with respect to the proposed Amazon (and eventually other) Data Center(s),

along with the attendant Substations and Transmission Power Lines, has the potential to do irreversible damage to the rural, small-town and overall scenic character of the Town and the County.

The overall conduct of the process itself has been the subject of some concern/criticism. There have been complaints of matters being addressed without public input and allegations of Amazon undue influence. One example is the recognized mishandling and uncertainty regarding the whole noise issue. The hiring of the former Town Manager by Amazon only amplifies these kinds of concerns.

The noise compliance issue is a major concern, as you must be aware; but, it is understood that there are other parts/ sections/issues regarding the Amazon application that are not addressed or are inadequate. Given the level of scrutiny this whole Amazon Data Center project has attained, it is crucial that, as the saying goes, 'every T must be crossed and every 'I' dotted'. At this point, that is not the case and, therefore, the Special Use Permit (SPU) should be denied.

Respectfully submitted,

Tom Daily

Thomas R. Daily

Town Council  
Regular Meeting

**A RESOLUTION DIRECTING STAFF TO ADVERTISE A PUBLIC HEARING ON JANUARY 10<sup>TH</sup>, 2023 TO CONSIDER AN AMENDMENT TO THE FISCAL YEAR 2023 ADOPTED BUDGET FOR WATER AND SEWER CAPITAL PROJECTS**

**WHEREAS**, Warrenton, VA (Hereinafter "the Town") is a municipal corporation located within the County of Fauquier; and

**WHEREAS** the Warrenton Town Council is charged by the Code of Virginia with the preparation of an annual budget for the Town of Warrenton,; and

**WHEREAS**, on June 16, 2022, the Town Council adopted the Town of Warrenton Fiscal Year 2023 Budget; and

**WHEREAS**, at the September 13, 2023 Council meeting, the Town Council authorized the issuance of up to \$5,400,000 in bonds to finance Water and Sewer projects. After a bank request for proposal process was conducted on behalf of the Town by the Town's financial advisors, Davenport & Company, LLP, the Town opted for a 17-year bank loan in the amount of \$5,000,000 with Chase Bank, which closed on September 30, 2022; and

**WHEREAS**, a work session was conducted with the Town Council on December 13, 2022 to identify Water and Sewer projects to be financed with the bond, and some of those projects are not currently appropriated in the Fiscal Year 2023 adopted budget; and

**WHEREAS**, Code of Virginia §15.2-2507 requires that a locality must advertise a public hearing to amend the budget if the amount exceeds one percent of the total expenditures shown in the currently adopted budget; and

**WHEREAS**, The Warrenton Town Council wishes to authorize staff to advertise for a Public Hearing to gather Public Comments on the proposed amendment to the Fiscal Year 2023 adopted budget; and

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council Hereby adopts a resolution authorizing advertisement of a Public Hearing January 10<sup>th</sup>, 2023 to consider a budget amendment to appropriate Five Million Dollars for Water and Sewer capital projects.

**A RESOLUTION AUTHORIZING THE KEEPING OF SWINE ON THE PROPERTY KNOWN AS FAUQUIER HIGH SCHOOL**

**WHEREAS**, the Fauquier County School Board owns contiguous parcels of property in the Town of Warrenton's jurisdiction, identified as Parcel Identification Numbers 6974-86-3278-000, 6974-75-6925-000, 6974-75-6703-000, and 6974-76-0449-000 (hereafter referred to as the "property"); and

**WHEREAS**, the property houses Fauquier High School and related improvements and uses, including areas dedicated to agricultural education; and

**WHEREAS**, it is the goal of the Fauquier High School Agricultural department to provide a unique learning experience for students to understand food systems and careers in agriculture; and

**WHEREAS**, the Agriculture Department of Fauquier High School proposes to expand its programs, which will require certain improvement to the Property as identified in the materials provided to the Fauquier County School Board on its November 14, 2022 meeting (the "plan"); and

**WHEREAS**, some of the proposed improvements identified in the plan require permitting from the Town of Warrenton, including: 1) a Swine Permit from Town Council to keep two swine on the property per Section 3-5 of the Town Code, and 2) a building permit for a 768 square foot pole barn to be utilized for equipment storage, covered outdoor class area, and additional livestock, and 3) a Zoning Permit for additional fencing to create an enclosed pasture/paddock for the keeping of additional livestock; and

**WHEREAS**, the Town of Warrenton has received a Resolution from the Fauquier County School Board approving the plan and requesting that the Town Council waive any fees associated with applications, permits, and approvals related to the plan.

**WHEREAS**, the requested fee waiver would apply to the building and zoning permits for the proposed pole barn and fencing; and

**WHEREAS**, the Town strives to foster a positive working relationship with other local governmental entities; and

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council Hereby is Authorizing the keeping of two swine on the property known as Fauquier High School for educational purposes;

**BE IT FUTRHER RESOLVED** the applicant shall diligently pursue all necessary approvals and begin permitting within six (6) months from the date of December 13, 2022;

**BE IT FUTRHER RESOLVED** that the Town of Warrenton Town Council agrees to waive all permit fees associated with this request.

**A RESOLUTION TO AMEND THE FISCAL YEAR 2023 ADOPTED BUDGET BY \$10,650 TO INCREASE FUNDING FOR VIRGINIA REGIONAL TRANSIT**

**WHEREAS**, the Warrenton Town Council is charged by the Code of Virginia with the preparation of an annual budget for the Town of Warrenton; and

**WHEREAS**, on June 16, 2022, the Town Council adopted the Town of Warrenton Fiscal Year 2023 Budget; and

**WHEREAS**, during the development of the budget, the contributions to outside organizations were level-funded with Fiscal Year 2022; and

**WHEREAS**, Virginia Regional Transit (VRT) provides transportation services in the Town of Warrenton under a Federal 5311 operating grant that calls for certain funding requirements. The buses and routes operated by VRT are funded 50% by the Federal Transportation Administration, 18% by the Virginia Department of Rail and Transportation, and 32% through a local match. The local match provided by the Town of Warrenton is offset by a grant from the PATH Foundation, which brings the Town's share to 20% of the total operating cost; and

**WHEREAS**, the Fiscal Year 2023 funding request submitted by VRT reflected increased cost estimates to support existing routes that were not incorporated in the original adopted budget for Fiscal Year 2023; and

**WHEREAS**, the additional amount required to satisfy the funding requirements of the program for Fiscal Year 2023 is \$10,650; and

**WHEREAS**, meals tax revenues are estimated to exceed the budgeted amount based on year-to-date receipts, providing sufficient current revenue to fund this request;

**NOW THEREFORE, BE IT RESOLVED**, by the Town Council of the Town of Warrenton this 13<sup>th</sup> day of December 2022, that the Fiscal Year 2023 Budget be, and is hereby, amended to increase General Fund Meals Tax revenue by \$10,650 and to appropriate \$10,650 for an increase in the contribution to Virginia Regional Transit.

AMAZON DATA CENTER**

**WHEREAS**, the Town of Warrenton accepted a Special Use Permit, known as SUP 2022-03 Amazon Data Center, on May 6, 2022, for processing; and

**WHEREAS**, the Town of Warrenton Planning Commission held Work Sessions on July 26, 2022, and October 25, 2022 on SUP 2022-03 Amazon Data Center; and

**WHEREAS**, the Planning Commission Public Hearing on November 15, 2022, was continued to November 22, 2022, per the Applicant's request; and

**WHEREAS**, on November 22, 2022, the Planning Commission postponed the application indefinitely, without a request from the Applicant to continue the hearing and without closing the Public Hearing; and

**WHEREAS**, the Planning Commission subsequently advertised to continue the Public Hearing on December 20, 2022; and

**WHEREAS**, the period for a Planning Commission to review and make a recommendation on a zoning amendment is 100 days from the date of the meeting when it was first considered, under Virginia Code § 15.2-2285 (B); and

**WHEREAS**, the Town of Warrenton Zoning Ordinance states that Special Use Permits shall "be processed in the same manner as for zoning amendments"; and

**WHEREAS**, the Warrenton Town Council accordingly anticipates the Planning Commission will continue the Public Hearing and may recommend approval or denial of SUP 2022-03 to Town Council in a timely fashion;

**NOW, THEREFORE, BE IT RESOLVED** that the Warrenton Town Council hereby directs staff to advertise a Public Hearing on SUP 2022-03 Amazon Data Center at its scheduled meeting on January 10, 2023, and to place the matter on the agenda for possible action if a recommendation has been made by the Planning Commission, or if no recommendation has been made, barring any request for continuation from the applicant.

# TOWN COUNCIL REGULAR MEETING

21 Main Street

Tuesday, January 10, 2023 at 6:30 PM

## MINUTES

### A REGULAR MEETING OF THE TOWN COUNCIL OF THE TOWN OF WARRENTON, VIRGINIA, WAS HELD ON JANUARY 10<sup>th</sup>, 2023, AT 9:00 A.M.

#### Regular Meeting Work Session

**PRESENT** Mr. Carter Nevill, Mayor; Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney; Mr. Christopher E. Martino, Interim Town Manager; Mr. Tommy Cureton, Deputy Town Manager; Mr. Olaun Simmons, Town Attorney; Mr. Stephen Clough, Town Clerk.

**ABSENT** None

#### Regular Meeting

**PRESENT** Mr. Carter Nevill, Mayor; Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney; Mr. Christopher E. Martino, Interim Town Manager; Mr. Tommy Cureton, Deputy Town Manager; Mr. Olaun Simmons, Town Attorney; Mr. Stephen Clough, Town Clerk.

**ABSENT** None

**The minutes laid out will be a brief recap of the agenda items. Please see the included Transcript for more in-depth information.**

### **WORKSESSION - 9:00 AM**

The meeting was called to order at 9am. Mayor Carter Nevill welcomed the two new members Mr. Paul Mooney and Mr. David McGuire both recently elected to the Town Council as At Large Members.

#### **1. Organizational Meeting**

##### **1. Election of the Vice Mayor**

The mayor indicated that Councilman James Hartman had expressed interest in continuing his role as Vice Mayor. Mayor Nevill indicated to Staff to add this item to the evening session for voting.

## 2. Meeting Dates

The mayor presented a resolution before Council for the meeting dates.

Councilman Semple expressed an interest in moving the Work Session meeting dates to a different day than the regular meeting date and discussed committees for the Town Council.

A discussion was held on the merits of committees and changing the time and date of the work sessions.

Mayor Nevill directed Staff to evaluate the impact of Committees and a date and time change for the work sessions and to return to Council with the information.

Mayor Nevill also directed the Legal team to review the code of ethics and make suggestions to be brought back to the Council for review.

2. **SUP 2022-03 Amazon Data Center** - *The Owner/Applicant, Amazon Data Services, Inc., seeks a Special Use Permit under Article 3-4.12.3 of the Zoning Ordinance for an approximately 220,200 square foot data center on Industrial zoned parcel consisting of approximately 41.793 acre parcel identified as GPIN 6984-69-2419-000. Designated in the New Town Character District on the Future Land Use Map located off Blackwell Road and Lee Highway. The Owner/Applicant is requesting modifications for building height allowance, parking, and fence height allowance as part of the Special Use Permit.*

Denise Harris, Planning Manager introduced the topic with a presentation to the Council.

The discussion of the topic began with the history of potential development of the site. it proceeded into discussions of the completeness of the application, the zoning of the site, and parameters within the application that were addressed.

Councilmen Semple asked a series of questions about the process for the submission for consideration of the planning commission.

Ms. Harris addressed the series of questions from the Council.

Ms. Harris outlined the legislative process for the Special Use Permit and the way the application would be considered complete by the Town for processing and legislative action.

The applicant, Amazon Data Services, Inc., brought forth members of their team to introduce the request and respond to questions from the Town Council.

Council inquired about the plan for the site, noise study information, visual impacts to the site, construction traffic, and other inquiries.

The applicant responded to the Council's inquiries with various members of their team.

The presentation shifted to a discussion regarding the chillers for the Data Center and the noise levels that the Data Center would produce.

The firm that created the sound level estimates for the applicant explained the process by which the calculations and data were derived for the sound study produced for the Council.

Councilman Hamby suggested a condition of enforcement for the noise requirements tied to the occupancy permit. The Council discussed the merits of this proposal.

Additional discussion points included fire suppression systems, noise abatements, enforcement, lifespan of the data center, power lines and Dominion Energy, environmental impact, potential income from the site for the Town and County, and generators.

A brief recess was called, and the Meeting reconvened at 1:02pm

After the recess the Council focused on the proposed conditions of the SUP. Council requested staff assistance for wording on multiple conditions for the SUP. It was noted that legal review of the conditions would be required.

Enforcement of the noise ordinance and conditions was addressed by Mr. McGuire and others.

Mayor Nevill suggested deferring action on the SUP for thirty days after the opening of the public hearing this evening.

Discussion ensued on the proposal. The will of Council was to hold the public hearing at the evening meeting and discussion action after the conclusion of the speakers.

Discussion from the Council returned to the conditions of the Special Use Permit.

Staff was instructed to incorporate all of the conditions mentioned and discussed at the work session and prepare for an additional work session at the next Regular Town Council meeting if a vote was delayed at the evening session.

### **3. RollOutWarrenton!**

Frank Cassidy, Director of Public works and Utilities, introduced the topic. This topic was designed to make the temporary RollOutWarrenton! Program into a more permanent program.

Mr. Cassidy discussed the merits and challenges of the program and changes proposed by the staff.

Councilmen Mooney asked questions about the program and how it would work regarding liability, implementation, and options for the local businesses.

Mr. Cassidy addressed Council’s questions, emphasizing the relationship with Experience Old Town Warrenton on this endeavor.

Mr. Martino summarized the discussion for the Council and requested direction on weather to bring this item forward for a vote this evening or delay action until February.

Councilman Heroux inquired more about the process for RollOutWarrenton! and the proposal for the changes to the program.

Other Members of Council inquired about the astatic design and ADA issues with he Parklets under the proposal.

Vice Mayor Hamby confirmed with Mr. Cassidy that under the new proposal second street would be reopened.

Mayor Nevill directed staff to bring this item forward for a vote at the evening session.

**4. Scheduling of Special Meeting for Town Manager Recruitment**

Interim Town Manager Christopher E. Martino introduced the item. Baker Tilly had been selected as the vendor to facilitate the Town Manager search and proposed the week of February 6<sup>th</sup> for the first round of interviews.

Mayor Nevill requested that Council be on the lookout for an email with proposed dates for the virtual interviews.

**5. Agenda Review**

Mr. Martino reviewed the agenda. He informed Council Mr. Clough would be reaching out to the former Council members and Planning Commission Members to confirm their availability for this evening.

He confirmed that the election of the Vice Mayor would be moved to the New Business line for a vote this evening.

The Town Manager recapped the public hearings for the evening and informed Council that due to the public schools being out of session until the 3<sup>rd</sup> and the advertising deadline for the meeting being December 28<sup>th</sup> that taking the January meeting offsite to accommodate a larger crowd for the public hearings was not possible for this meeting. He further explained that preliminary discussions have been made to move the February Meeting offsite to Fauquier Highschool if desired.

Mr. Martino advised to move the February Meeting off site.

He also suggested that Council review their Handbook for updates to be brought forward at a later meeting.

**6. Closed Session**

**Closed Session under Va. Code §2.2-3711 (A)(8) Legal matters, specifically where such matters require the provision of legal advice, under Virginia Code Specifically relating to CFFC Lawsuit update and Walmart Tax Matter Update**

Vice Mayor Hartman moved to convene a closed session As permitted by Virginia Code § 2.2-3711 (A)(1), a personnel matter involving: Discussion, consideration, or interviews of prospective candidates for employment or appointment; OR assignment, appointment, promotion, performance, demotion, salaries, disciplining, or resignation of specific public officers, appointees, or employees of the Town; specifically dealing with Town Manager Recruitment. Mr. Jay Heroux Seconded

**Ayes:** *Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.*

**Nays:**  
**Abstention:**  
**Absent:**

Upon reconvening from the closed session, Town Council adopted the following Certification of Closed meeting:

**CERTIFICATION OF CLOSED MEETING**

**WHEREAS**, the Town Council of the Town of Warrenton has convened a closed meeting on this date pursuant to an affirmative recorded vote in accordance with the provisions of the Virginia Freedom of Information Act; and

**WHEREAS**, Section 2.2-3172 E of the Code of Virginia requires a certification by the Town Council that such closed meeting was conducted in conformity with Virginia law;

**NOW, THEREFORE, BE IT RESOLVED** that the Town Council hereby certifies that, to the best of each members knowledge, (i) only public business matters lawfully exempted from open meeting requirements by Virginia law were discussed in the closed meeting to which this certification resolution applies, and (ii) only such public business matters as were identified in the motion convening the closed meeting were heard, discussed or considered by the Town Council

Councilmen McGuire seconded, the vote for the motion was unanimous, as follows:

**Ayes:** *Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.*

**Nays:**  
**Abstention:**  
**Absent:**

**The Work Session meeting was adjourned at 3:09pm**

---

**REGULAR MEETING - 6:30 PM**

**APPROVAL OF THE AGENDA.**

Mayor Nevill Sought a motion to approve the agenda.

Councilmen Hamby requested to adjust the agenda. He requested the addition of the agenda item “Boundary Line Adjustment” be added to unfinished business.

Councilman Mooney requested that prior to the start of the public hearing staff and the applicant have another presentation so that the public could hear the information from the morning session.

Mayor Nevill explained the presentation would be part of the public hearing.

Councilman Heroux motioned to approve the agenda as amended, Vice Mayor Hartman Seconded.

Motion put forth by Councilmen Heroux was to approve the agenda as amended.

Seconded by Vice Mayor Hartman.

The vote was as follows:

**Ayes:** *Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire, Mr. Paul Mooney.*

**Nays:**

**Abstention:**

**Absent:**

The motion passed unanimously; the amended agenda was approved.

---

**PUBLIC HEARINGS.**

- 1. **A Resolution to Budget and Appropriate \$5,000,000 of debt proceeds for water and sewer capital projects, and \$75,090 for debt service in the water and sewer fund**

Stephanie Miller, Director of Finance introduced the public hearing. This public hearing is to consider amending the fiscal year 2023 adopted budget to appropriate water and sewer capital projects that will be funded by previously issued debt proceeds and to appropriate for the first interest payment on the debt.

The Public hearing was opened at 9:03pm

<b>Public Hearing: Resolution to Budget and Appropriate \$5,000,000 of Debt Proceeds for Water and Sewer Capital Projects and \$75,090 for Debt Service in the Water and Sewer Fund</b>		
<b>Name</b>	<b>Address</b>	<b>Topic</b>

KEN ALM	194 CULPEPER ST, WARRENTON, VA 20186	sugest 30 day extension for Councilman Mooney and McGuire to review.
------------	---	---

The Public hearing was closed at 9:05pm. Mayor Nevill turned the item over to Council for action.

Motion put forth by Councilmen Heroux was to approve the resolution to appropriate \$5,000,000 of debt proceeds for water and sewer capital projects, and \$75,090 for debt service in the water and sewer fund.

Seconded by Councilmen Hamby

Councilmen McGuire agreed with Mr. Alm that he would like to ask for more time to review.

Councilmen Semple requested to amend the original motion and delay the decision on this item for 30 days.

Councilmen Mooney seconded the motion to amend.

Council discussed the amendment to the motion.

Staff confirmed that the loan had already been secured and that this step was the appropriation of the funds to being work on the projects.

Frank Cassidy provided a brief overview of the projects this would be funding and the need for the funds.

After discussion, Councilmen Semple withdrew his motion to delay the decision for 30 days.

The vote was as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire.

**Nays:**

**Abstention:** Mr. Paul Mooney.

**Absent:**

The motion passed 6-0-1; the resolution to Budget and Appropriate \$5,000,000 of debt proceeds for water and sewer capital projects, and \$75,090 for debt service in the water and sewer fund was approved.

**2. A Resolution to Budget and Appropriate \$458,001 for the Timber Fence Trail Capital Project**

Stephanie Miller, Director of Finance introduced the public hearing. She stated that this item is also to amend the fiscal year 2023 adopted budget to appropriate only grant and

outside funding for segment two of Timber Fence Trail. She added that is an approved project in the adopted capital improvement program. It's funded by a federal grant that's administered by VDOT. The funding structure is 80 percent federal, 10 percent town, and 10 percent county. She expanded that this resolution is just fixing an error in the compilation of the budget data. During the development of the FY 23 budget, the Town share was selected for ARPA funding. That was properly appropriated, but the federal grant funding and the county funding was not included. This resolution will fix that and will appropriate the outside funding sources. There's no impact on town funds in this resolution.

Frank Cassidy described the Timber Fence Trail project. The initial phase was installed from Fauquier Highschool to just about the town line on Waterloo into the Gold Cup Community. This is part of the next phase of construction which would increase walkability and connectivity.

The Public hearing was opened at 9:18pm

There were no speakers.

**TOWN MANAGER'S REPORT.**

No Report from the Interim Town Manager. Mr. Martino requested Council consider a resolution to advertise the February 14<sup>th</sup>, 2023, Regular Town Council meeting to be held at Fauquier High School with a snow date prevision that if the school system is closed, the Council would reconvene at Town Hall.

Motion put forth by Vice Mayor Hartman to adopt the resolution as stated by the Interim Town Manger.

Seconded by Councilmen McGuire.

Councilman Heroux requested that it was ensured that the room have the capability of audio / visual production to stream the meeting for citizens that could not be at the meeting themselves.

The vote was as follows:

**Ayes:** Ms. Heather Sutphin; Mr. William Semple; Mr. Brett Hamby; Mr. James Hartman, Vice Mayor; Mr. Jay Heroux; Mr. David McGuire; Mr. Paul Mooney.

**Nays:**

**Abstention:**

**Absent:**

The motion carried unanimously, a resolution was passed directing staff to hold the February 14<sup>th</sup>, 2023, Regular Town Council meeting off site at Fauquier High School with a weather prevision that would move the meeting to Town Hall in the event of school closure.

---

## COUNCILMEMBERS TIME.

**Mr. David McGuire-** Thanked the public for coming out to the meeting and working together.

**Mr. Paul Mooney-** Started with the quote from Abe Lincoln, "Whatever you are, be a good one." Thanked the citizens for participating in the meeting and the staff for the guidance on his first meeting.

**Ms. Heather Sutphin-** Reminded all in attendance that everyone was here because they love our Town. She spoke on transparency and on the work she has done to make an informed decision on the data center. She shared her excitement that Vice Mayor Hartman opted to run for a second term. She welcomed the two new council members.

**Mr. William Semple-** Thanked the citizens that had come out tonight. He thanked staff for the work done on the data center project and thanked council for the hard discussions that lay before them to make.

**Mr. Brett Hamby-** Thanked all for coming out to speak tonight. He asked for the public to respect those that did choose to come out in favor of the data center. He spoke to the history of projects in Town and the opposition some had faced. He thanked those that stayed late tonight to have their voice heard.

**Mr. James Hartman-** Recognized that recently it was Law Enforcement Appreciation Day, and thanked the local law enforcement for the great job they do. He remarked on the passing of Dr. Ellsworth and his impact on the community. He welcomed the two new Councilmembers.

**Mr. Jay Heroux-** Thanked everyone for joining today. Remarked on a personal note of the passing of his father and the condolences he received during that time. He asked for feedback on the location of the proposed data center and what the citizens would rather see there if they had could. He asked for respect for the applicant and speakers and additional input from the community.

**Mr. Carter Nevill-** Thanked Vice Mayor Hartman for bringing up the passing of Dr. Weaver and remarked on their memories in the Town. He thanked everyone for their impassioned remarks

this evening noting that they were being heard. He added that the entire council is taking the responsibility and obligations with extreme seriousness and sobriety.

---

## ADJOURNMENT.

With no further business, this meeting was adjourned at 1:23am on Wednesday January 11<sup>th</sup>, 2023.

I hereby certify that this is a true and exact record of actions taken by the Town Council of the Town of Warrenton on January 10<sup>th</sup>, 2023.

---

Stephen M. Clough  
Town Recorder

**V. Draft Conditions of Approval**

**SPECIAL USE PERMIT CONDITIONS**  
**Applicant: AMAZON DATA SERVICES, INC. (the “Applicant”)**  
**Owner: AMAZON DATA SERVICES, INC.**  
**SUP2022-0003, Amazon Data Center**  
**PIN # 6984-69-2419 (the “Property”)**  
**Special Use Permit Area: ± 41.79 acres**  
**Zoning: INDUSTRIAL (I)**  
**Date: November 15, 2022**

In approving a Special Use Permit, the Town Council may impose such conditions, safeguards, and restrictions as may be necessary to avoid, minimize, or mitigate any potentially adverse or injurious effect of such special uses upon other properties in the neighborhood, and to carry out the general purpose and intent of this Ordinance. The Council may require a guarantee or bond to ensure that compliance with the imposed conditions. All required conditions shall be set out in the documentation approving the Special Use Permit (SUP). These conditions shall run with the land so as to bind future landowners. Any party or officer identified by title shall mean and include any successor to that person or entity’s powers or responsibilities.

1. **Site Development:** The Property shall be developed in substantial conformance with these conditions and the Special Use Permit Plan entitled, “Special Use Permit Plan for Amazon Data Services, Inc.,” prepared by Bohler Engineering, dated July 10, 2022 and revised through October 28, 2022, and consisting of 3 sheets, subject to minor modifications approved by the Town in connection with final Site Plan review and final engineering, and except as otherwise provided in these Conditions (the “SUP Plan”). The building and other structures to be constructed on the Property are referred to herein as the “Facility.”
2. **Use Parameters. Use Limitation:** The use approved with this SUP shall be limited to a data center as set forth in § 3-4.12.3 of the Town of Warrenton Zoning Ordinance.
3. **Electric Substation:** There shall be no electric substation constructed on the Property.
4. **Undergrounding of Electrical Lines from a Substation to the Facility:** Pursuant to Warrenton Zoning Ordinance § 9-26.1(C), the distribution lines from the off-site substation serving the data center are required to be underground. Applicant will ensure payment of the undergrounding of these distribution lines with the utility company in accordance with its requirements.
5. **Building Design and Elevations:**
  - a. The architectural design of the data center shall substantially conform to the elevations entitled “Illustrative Elevations,” shown on Sheet 6 of the SUP Plan. The Elevations shall be subject to minor modification approved by the Town in connection with Site Plan review. Additional changes to the design and materials may be made provided that any such changes are approved by the Planning Director prior to the issuance of a building permit.
  - b. At time of Site Plan, the Applicant shall provide all elevations for the building in compliance with the Town of Warrenton Zoning Ordinance Article 9-26.1.F. In

addition, the Applicant shall orient the building along Lee Highway to reduce the visible impact using architectural details such as a perceived reduction in massing and scale, fenestration and windows, exterior colors and materials, overhangs, canopy or porticos, recesses and/or projections, arcade, raised corniced parapets, and varying roof lines.

- c. The Facility shall be no greater than 37 feet in height, as that term is defined in the Town Zoning Ordinance. The mechanical equipment installed on the roof of the building shall be screened with mechanical louver screens.
6. **Signage:** There shall be no signage except for a street address; provided that if any further signage is sought it shall comply with applicable sign ordinance requirements.
7. **Fencing:** All fencing on the Property shall be as depicted on the SUP Plan, and shall not exceed 8 feet in height. Security fencing shall be the style and type as shown on Page 2 of the Special Use Permit Plan produced by Bohler dated July 10, 2022 and updated through October 28, 2022. Chain link fencing, with or without slatted inserts, and/or barbed wire or other similar visible deterrence devices shall not be permitted where visible from the public.
8. **External Fuel Storage Tanks:** The Applicant shall install above-ground double-walled fuel tanks that meet the definition of secondary containment under the DEQ LPR-SRR-2019-03 - Storage Tank Program Compliance Manual, Volume V - AST Guidance, and pursuant to 40 CFR Part 112, Section 8.1.2.2, in the general locations shown on the SUP Plan, for the storage of fuel supplies necessary to maintain an Uninterruptible Power Supply in the event of a loss of external electrical power.
9. **Parking:** The Applicant shall provide not fewer than 56 parking spaces as shown on the SUP Plan, one of which shall be a loading space.
10. **Site Maintenance:** The Applicant shall maintain the Property in a clean and orderly manner, and shall provide an on-site masonry screened refuse container station in the location generally shown on the SUP Plan.
11. **Access:** Access to the site shall be provided as shown on the SUP Plan, subject to changes approved by the Town in consultation with the Virginia Department of Transportation. Mountable curbs shall be provided as required by the Town. There shall be no access from either Routes 17 or 29.
12. **Access for Town Staff:** The Town is obliged to report annually to the Virginia Department of Environmental Quality as to the ongoing operation and maintenance of stormwater management facilities installed on the Property. The Applicant shall provide the Town Manager with an on-site employee who shall serve as the sole point of contact for arranging access to the Property for the Town's conduct of such inspections, and shall keep that point of contact current at all times.
13. **Water & Public Sewer Connection:** The Property shall connect to public water and public sewer at the Applicant's expense. The Applicant shall limit its water use to internal domestic uses such as service to bathrooms, kitchens, humidification, and external irrigation. It shall not use public water for the general purposes of cooling the data center, but may use it for the initial charging of

the cooling system. It shall consult with the Director of the Department of Public Works and Utilities as to the scheduling of the initial charging of the system so as to minimize the impact on the Town's water system.

14. Emergency Services:

- a. The Applicant shall coordinate training between the Town's fire and rescue companies and those other companies and departments that have experience with data centers after commencement of operations at the Property and when convenient for the Town's first responders. Furthermore, upon commencement of operations at the Property, the Applicant will provide the Town's first responders its "Data Center Response Manual" for use in training for emergencies at its Facility, and shall assist in advising those first responders how to implement its provisions.
- b. The Applicant shall assure that the water line systems at the Facility have sufficient fire flows, as determined by the Town Fire Marshal.
- c. The Applicant shall maintain Facility security personnel 24 hours a day, and each day of the year.

15. Pedestrian access: The Applicant shall construct a five-foot sidewalk on the east side of Blackwell Road along its frontage on that Road.

- Phase by phase*  
*- Independent sound - paid by Amazon*
16. Noise: The Applicant shall provide a sound study prepared by a qualified party or company approved by the Director of Community Development that demonstrates the operation of the data center will meet the requirements of § 9-14.2 of the Town of Warrenton Zoning Ordinance relating to noise, as a condition of approval of a site development plan. In addition, the Applicant shall conduct a separate sound study one month after commencement of business operations to ensure compliance with the aforesaid Section. If noise levels at any point where a measurement is required by the Ordinance to be taken do not so comply, the Applicant shall forthwith undertake such further mitigation measures as are required to achieve compliance within a reasonable time not to exceed 60 days, or, if 60 days is insufficient to achieve compliance, the Applicant shall promptly begin and diligently pursue mitigation until compliance has been achieved.

For reference, the Town of Warrenton Zoning Ordinance § 9-14.2 states:

9-14.2 The sound pressure level of sound radiated from an establishment, measured at the lot line of the site thereof that is the nearest thereto, shall not exceed the values in any octave band of frequency that are specified in Table 9-1 below, or in Table 9-1 as modified by the correction factors set forth in Table 9-2. The sound pressure level shall be measured with a sound level meter and an associated octave band analyzer conforming to standards prescribed by the American National Standards Institute.

Frequency Band Cycles per Second	Along Residential District Boundaries – Maximum Permitted Sound Level In Decibels	At Any Other Point on the Lot Boundary – Maximum Permitted Sound Level In Decibels
63	64	72
125	60	70
250	54	65
500	48	59
1000	42	55
2000	38	51
4000	34	47
8000	30	44

Condition	Correction in Decibels
On a site contiguous to or across a street from the boundary of any R-district established by this chapter.	Minus 5
Operation between the hours of 10:00 p.m. and 7:00 a.m.	Minus 5
Sound of impulsive character (e.g., hammering)	Minus 5
Sound of periodic character (e.g., sawing)	Minus 5
Tone (e.g., hum or screech)	Minus 5
Sound source operated less than:	
20% in any one hour period	Plus 5 <sup>1</sup>
5% in any one hour period	Plus 10 <sup>1</sup>
1% in any one hour period	Plus 15 <sup>1</sup>

1. Apply only one of these corrections. All other corrections (including any one of the footnoted) are cumulative.

17. **Lighting:** The Applicant shall submit a Lighting Plan pursuant to the provisions of § 9-8 et seq. of the Town of Warrenton Zoning Ordinance in connection with its Site Development Plan. All exterior lighting shall utilize LED and be designed and constructed with cutoff and fully shielded fixtures that direct light downward and into the interior of the property and away from adjacent roads and adjacent properties. All building mounted lighting shall have a maximum height of 25', and the Applicant shall install controls on the site fixtures such that they dim to 50% output between 11 PM and dawn. Freestanding parking lot lights shall be a maximum of 20.'
18. **Tree Save:** The Applicant shall provide a tree preservation plan at time of Site Plan that seeks to minimize land disturbance and maximize on-site vegetation.
19. **Best Management Practices:** BMPs shall incorporate aeration for water retention using solar power.
20. **Landscaping:** The Applicant will follow the Zoning Ordinance Article. All plantings must consist of native, drought tolerant species appropriate for the Town of Warrenton climate.

21. Employment Opportunities: The Applicant shall provide outreach to qualified persons residing in the Town of Warrenton who may be interested in employment at the data center through a variety of media such as the conduct of a job fair, the inclusion of a direct link to potential opportunities on the Town website, or on other websites for the purpose. Such outreach shall be made reasonably in advance of the construction of the Project so that interested persons may make application for positions, not less than six months prior to the anticipated completion of construction.
  
22. Programs for Local Schools: The Applicant shall ensure coordination by the appropriate Amazon personnel with the Town of Warrenton and the Fauquier County School Division regarding the establishment and maintenance of educational programs in the K-12 grades, and with Laurel Ridge Community College, to establish and maintain workforce development programs for career pathways in data center construction and operations, and such other programs as the parties may deem mutually beneficial.

## WARRENTON TOWN COUNCIL

January 10, 2023

Good-evening Mayor, Council Members, community members. My name is Josephine Gilbert and I live in the Scott District.

It's hard to believe that this town wishes to be known for the longest in history, continuous BLM Propaganda. Supporting a racist, fraudulent organization.

It's not right when a citizen has to FOIA it's government in order to get a response.

I've still not heard from the administration on the newly updated ordinance. Why is your Acting Town Administrator not allowing his staff to meet with me? Interesting, former Chief Kochis wanted to meet to relay attorney's comments. He said they were not allowed to respond directly to me.

Really? Couldn't put in writing?

I am a big believer in promoting from within when you have the talent, and you do have the talent here in Warrenton. In my 25+ year history in public service, most times it's better than going outside. The last hire proved so. Please consider as you begin your search for a new chief.

I am hopeful the new chief can work with a talented newly hired administrator in guiding you in stopping this takeover of our Court House Square on Saturday mornings.

Maybe a quick lesson on our Town Name Sake, Dr. Joseph Warren, more popular than George Washington in his time, is in order for next time.

Thank you

# Stop the Amazon Data Center Petitions Signers

Item i.

January 09, 2023

Town Council

Town of Warrenton, VA

Re: Public Hearing to discuss the Special Use Permit requested by Amazon

Attention Council Members:

As you are aware, there are a considerable number of concerns about various aspects of this issue and significant opposition, as has been demonstrated by the petition to that effect and the many speakers and others in attendance at the Hearing. The purpose of my comments is to support the call to not approve the Special Use Permit (SUP) requested by Amazon in that it has been demonstrated, thus far, that it is incomplete, at best, and full of unverified and bad information.

Given the concerns raised by the many speakers at the Hearing, as well as the concerns/reservations expressed and implicit in the denial action by the Planning Commission, it would seem inconceivable that approval of the Amazon request would be made. Perhaps, Amazon could be advised to restart the application process – *but with a more suitable site in mind* – and, this time, with complete and trustworthy data/input.

There is too much at stake to make a hasty decision and/or ignore what appear to be legitimate concerns, some of which I will mention below. It also should be recognized, and agreed to by the members of the Council, that the legitimacy of any concerns/issues raised should be based on the merits of the issues themselves versus a consideration of where the people live who present/raise them or by the number of instances they are mentioned.

Any proposed 'changes' offered by Amazon and/or Dominion, also need to be thoroughly examined. What, on the surface, may appear to be an accommodation may, in the long run, present and/or add to other problems, such as setting up the Town of Warrenton for multiple Data Centers, irrespective of the particular sites, and their associated problems.

Careful attention must be paid to the language used, such as the terms Distribution lines vs Transmission lines. For example, instead of an offer by Amazon to pay for

the undergrounding of 'all' electrical/power lines (which would include Transmission lines), an offer by Amazon stipulating only Distribution lines is relatively meaningless in that, it is understood, under Dominion's policy, Amazon would be required to pay for that anyway.

There may not be anything new presented at the Hearing. You have probably been exposed, in one way or another, to all of them by now. So I will not go into detail discussing them. Rather, I will just list some of the more prominent concerns that have been identified, thus far, that I am aware of.

- \* One concern calls into question the whole administrative (rezoning) process that allowed this to come about in the first place. That may not weigh that heavily on the direct consideration of the Permit; but, it is out there and, in a way, overshadows the whole process.

- \* Continuing weak, shifting, information from both Amazon and Dominion is another. It almost seems as though it was considered, by them, to be a 'done deal' from the beginning; so that more thoughtful, detailed, professional input by them wasn't that necessary.

- \* The whole setting of the proposed Data Center, aka known as the 'viewshed', has been called into question. Is the proposed site one of those that has/had been identified as appropriate for that kind of development? I think the term 'industrialized' has been used to describe such sites/areas. I will not even bring up the ludicrous 'balloon test' results offered by Amazon.

- \* Also, what has become a major issue is the 'noise' that will be generated. It is understood that, as a result, some changes have been offered by Amazon; but, again, these need to be looked at in detail and in context. For example, noise measurement may be one thing at a relatively early stage of development; but, an entirely different matter once the Data Center would be in full operation.

- \* The impact on nearby property values needs to be seriously considered. Speaking of 'value', the proposed tax revenue needs to be carefully examined, as well. In the end, it may not turn out to be what is being speculated/projected. Have the experiences, relative to tax revenue from Data Centers, in other

locations/counties been explored? Especially, as concerns what was projected and what actual revenue has been received!

\* Finally, another thing to consider is the projected advancement in technology. Already, there is talk of a time in, perhaps, the not too distant future that will call into question the need for so many Data Centers or even, at some point, any at all! What happens then to all those structures and the related investments?! It is speculated that Amazon, and other such companies, already have depreciation related procedures/processes in place that eventually would result in no tax revenue being generated at all. The location(s) of such facilities would end up being stuck with the stereotypical 'white elephant(s)'.

As has been demonstrated, there are many things to consider and, given the importance of this decision relative to the precedent it will set for further/future applications of this nature, it is imperative, in the discharge of your duties, to get it right the first time – Deny the Amazon Application.

Respectfully submitted,

*Tom Daily*

Thomas R. Daily

### Persistent 24/7 Data Center Noise in the community can cause:

- **Chronic Sleep Deprivation**
- **Anxiety and Depression due to combination of noise and lack of control when residents realize this noise even permeates their homes**
- **Difficulty with Concentration**
- **Increases stress related conditions such as:**
  - **gastrointestinal problems**
  - **auto-immune diseases**
  - **hypertension and cardiovascular disease**
- **Increased health risk as residents avoid outdoor exercise**

### **Chronic sleep deprivation** affects both your brain and body and can cause:

- **Anxiety, depression, mood swings, suicidal thoughts**
- **Memory and concentration**
- **For children it can decrease growth hormones**
- **Vehicular and Workplace accidents**
- **Impacts insulin release and increases risk of diabetes**
- **Less interest in exercise due to fatigue**
- **Hypertension, cardiovascular health, and stroke:**  
June 2022: American Heart Association updated the cardiovascular checklist by adding the importance of 7 – 9 hours sleep

**PERSISTENT 24/7 NOISE, AS WELL AS SLEEP DEPRIVATION DUE TO NOISE, CAN IMPACT MENTAL AND PHYSICAL HEALTH AND DRAMATICALLY LOWER QUALITY OF LIFE.**

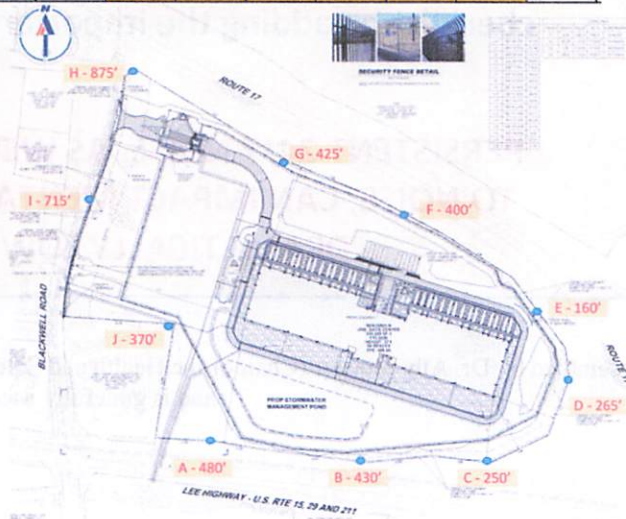

Assembled by Dr. Ally Stoeger (Chair of the Health and Safety Committee, Homeowners Association Roundtable of PWC) and is gratefully used with her permission.

Subject: Amazon Data Center  
From: "Irene D. Monti" <MontiID@pwcs.edu>  
Date: 1/9/23, 8:34 AM  
To: "eric@jumpcode.com" <eric@jumpcode.com>

Goodmorning,

Please add my name Irene Monti 70 Fairfax St as a no to the Data Center.  
I was under the impression that this was already approved by the council.

Best of luck,

Irene Monti

12

# An Open Letter to Warrenton Residents, Town Officials, and Media

## Ward 5 Town Councilmember Jay Heroux Has a Conflict of Interest in the Amazon Data Center Vote and Must Recuse (Not Vote) on this Issue

**Warrenton Town Council Member Jay Heroux is VP of Definitive Logic, an Arlington, VA-based IT contractor and partner to Amazon Web Services (AWS),** who has applied to the town to build a 220,000 square foot data center here in Warrenton, next to Country Chevrolet.

According to the Definitive Logic Web site, Mr. Heroux is "responsible for developing and executing clients' digital transformation technology projects" which certainly would include cloud-based IT projects financially connected to AWS.

**Definitive Logic has published extensive case studies and articles on their Web site highlighting the success of their AWS related projects.** Additionally, Definitive Logic is a featured "Certified AWS Partner" on the Amazon AWS Web site, further documenting its extensive ties to AWS.

Amazon is a giant dominating the IT world, and Definitive Logic is a small company. It appears that Definitive Logic is heavily dependent on the good will, cooperation, and partnership with Amazon to win contracts and to carry them out.

The Warrenton Town Charter states that (bold face added):

*§ 4-6. Conflict of interest.*

***No member of the Council shall participate in the vote on any ordinance, resolution, motion, or other proceeding in which he, or any person, firm, or corporation for which he is attorney, officer, director, employee, or agent has a financial interest other than as a minority stockholder of a corporation or as a citizen of the Town. (1964, c. 47)***

The attached examples document the extensive involvement between Mr. Heroux's employer and AWS, demonstrating the major financial contribution that this partnership brings to Mr. Heroux's company.

In light of this clear and compelling conflict of interest in violation of our Town Charter, we the undersigned residents of the Town of Warrenton call on Mr. Heroux to recuse himself from the upcoming Town Council vote on the AWS data center.

**If you agree with this letter, e-mail us at [eric@jumpcode.com](mailto:eric@jumpcode.com) and we will add your name and address to this letter. Additionally, you can contact Mr.**

**Heroux directly at: [jheroux@warrentonva.gov](mailto:jheroux@warrentonva.gov)**

**Distributed By:** Eric and Christina Gagnon, Your Neighbors at 200 Winchester Street

**Questions**

**1. Adequate Safety for Fire – There are some citizen concerns about the fire safety of a data center.**

**Zoning Reference: 11-3.10.3.2**

a. Please elaborate on the type of data center fire suppression system being used. Is it a wet system or a clean agent-type system? Electrical fires can be very complicated.	The facility will be fully sprinklered and will employ a pre-action dry pipe system (i.e., no water in pipe). Automatic water-based sprinkler systems are the most reliable types of systems and standard within data center facilities. This is not a clean-agent system.
b. Do the racks have fire detection and suppression systems?	The individual racks do not. Fire detection and suppression are handled by the system in the data hall.
c. What fire detection and suppression are associated with the fuel tanks?	None, which aligns with NFPA 33 code.
d. What fire detection and suppression are associated with diesel generators?	None, which aligns with NFPA 33 code.
e. What orientation/training will be provided to the local fire department regarding the data center fire detection and suppression systems?	Review and approval of the fire suppression system design and installation by the local jurisdiction is always performed prior to inhabiting the building. In addition to that review, AWS partners with local fire departments to ensure they are knowledgeable about data centers.
f. Will the facility fire detection system be integrated into the local fire system?	Yes, the fire protection system is monitored and integrated with the existing 911 system.
g. What is the AWS fire safety history in Northern VA? Have you had any fires?	We have a strong safety record in Northern Virginia and have only had one small fire which was self-extinguished.

**2. Noise – There are concerns of the citizens relating to the noise the data center will produce.**

**Zoning Reference: 11-3.10.3.3**

a. The assumption is that the cooling systems on the data center's roof will be the source of much of the noise. What can Amazon share with the town about the design and technologies being used to cool the data center? What engineering or other information can you share	The data center uses a chilled water plant consisting of air-cooled chillers to provide cooling. The chillers consist of a fan and a compressor. Both of these components will have noise mitigation (condenser fan silencers, compressor wraps, and barriers) added to fully comply with the Town's
--	--

<p>that will give the citizens confidence that the ordinances will be met?</p>	<p>Noise Ordinance. A noise model produced by Polysonics will be provided.</p>
<p>b. Does AWS have any corporate initiatives to constantly study and engineer solutions to make their data centers quieter? If so, how do they get into the fielded data centers?</p>	<p>AWS has an acoustical engineering team which in part focuses on continual improvement with respect to data center acoustics.</p>
<p>c. Do you monitor sound as part of your data center management and monitoring systems? If so, will that be done here?</p>	<p>AWS plans to measure sound levels throughout the construction and commissioning of this data center.</p>
<p>d. How will noise compliance be tested as the data center adds capacity?</p>	<p>Sound measurements will be taken at the completion of relevant phases of construction to confirm the data center is in compliance with the Town's noise Ordinance.</p>
<p>e. Are the manufacturing companies who build your air handling units innovating to reduce the noise, and how is AWS incentivizing them to do that?</p>	<p>AWS takes acoustics into account when selecting equipment suppliers. Our partners often employ full-time acoustical specialists and have testing facilities to accurately quantify the equipment sound levels, and develop mitigation solutions. AWS maintains a competitive bid process for suppliers, who know noise reduction is a significant component in AWS's selection of equipment.</p>
<p>f. In general, during the life cycle of the data center, do you refresh the air handling technology and other noise-generating infrastructure?</p>	<p>AWS data centers are designed to use specific cooling technologies, which limits options for refreshing to use other technologies. However, we are continually innovating and replace and update our equipment at the end of its useful life.</p>
<p>g. Can Amazon share its experiences from other smaller towns it has worked with as to how they meet noise ordinances?</p>	<p>We are aware of local noise ordinances and will comply with the Town's Noise ordinance.</p>

**3. Location – There are citizen concerns about data center growth in the town and county. Specific to this property, please answer the following questions**

**Zoning Reference: 11-3.10.3.6**

a. How much of the property will remain undeveloped?	Over 50% of the property will be undeveloped. Of the 41.8 total acres, approximately 9 acres will remain undeveloped outside of the proposed improvements, and ±20 acres (48%) of the property will constitute pervious cover and remain undeveloped.
b. What additional structures, if any, could be built there?	There will be no additional structures under the current Special Use Permit (SUP). Should AWS ever seek to place an additional improvement on the property, it would require an amendment of the SUP.
c. Can another data center be built on this property, or can the existing one expand within the property boundaries and zoning there now?	The SUP only allows for one data center of 220,000 sf.

**4. Landscaping – There are concerns that the data center will not be welcoming as one enters the town.**

**Zoning Reference: 11-3.10.3.8**

a. Please elaborate on the trees that will surround the property.	The predominant vegetation that will surround the property are stands of mixed hardwood and conifer trees. In areas where new plantings are proposed, a mixture of evergreen trees, 8’ tall at time of planting, consisting of, but not limited to Norway Spruce, Pitch Pine, and Loblolly Pine, Eastern Red Cedar, and Nellie R. Stevens Holly, will be used. Additionally, large deciduous trees, 3” caliper at time of planting, will be planted, including, but not limited to, Oak, Maple, and Elm.
b. How does AWS plan to make the site either appealing or not visible as a person enters or leaves the town?	The data center building is positioned at least 200’ from the surrounding roadways at the narrowest location to minimize visual impact on motorists entering or leaving the town. Additionally, a combination of extensive tree

	preservation and proposed plantings along the site perimeter will screen the proposed data center building from view from the surrounding rights-of-way.
c. How will the landscape protect the views of citizens whose homes look upon this lot today?	The data center building will be screened through a combination of existing plantings between the center and the adjacent residential areas, and existing and proposed plantings around the perimeter of the data center site.

**5. Timing/Phasing/Development/Duration**  
**Zoning Reference: 11-3.10.3.8**

a. Please confirm that the data center is being built in 1 stage. What will be built in 18 months? Are you at full capacity on opening day or is it a powered shell? If not, do you have an estimated timeline for fully operating at your desired capacity?	The building shell will be built in one stage with anticipated completion Q1 2025. Our interior buildout is in stages. Full capacity is estimated to occur between 2027 to 2032.
b. The SUP notes a cost of \$550,000,000 dollars for this facility. Does that cost reflect the cost to bring the data center to full operational capacity and commissioning, including the computing, storage, network, and other technology used to provide services?	\$550,000,000 is the estimate based on preliminary design and construction. It is likely that the final cost to bring the data center to full operational capacity and commissioning, including storage, network, and other technology, will exceed that amount.
c. Internally, is the raised floor area one open space or is it architected by data halls? How is capacity brought online in the physical space?	Capacity is brought online in phases.
d. Can AWS share what the expected life of the facility is designed for? 30 years, 40 years? Does the facility align to an Uptime Institute Design (Tier 2,3,4 etc.).	The building is designed for a 50-year life.
e. Is this design a new design for AWS or has a similar data center been built like this before? If so, what was the timeline for construction and being at full capacity.	Designs for AWS data centers are constantly evolving, striving to increase sustainability and reduce consumption. Timeline for shell construction is typically about one year. Full capacity is estimated to occur between 2027 – 2032.

6. Welfare and Convenience

Zoning Reference: 11-3.10.3.11

<p>a. Can AWS describe how the work performed in the Warrenton data center contributes to the community's welfare? What is it about the services provided to AWS customers in that data center that enhances or secures the lives of the citizens of Warrenton or, more broadly, in the community?</p>	<p>AWS sees this project as having many benefits and contributions to the Warrenton community. The project redevelops a vacant industrial site with a project that has a low impact to town services and traffic. Based on two 2020 Town-commissioned fiscal studies, it is estimated that this project will create approximately 300+ construction jobs and operational jobs, adding to the diversity of jobs in the Warrenton area both in salary and skill level. This project is anticipated to increase the financial diversity of the Town, bringing in increased tax revenue to support the Capital Improvement Plan (see, <a href="#">Fiscal Sustainability Analysis White Paper (RKG Associates, February 1, 2020)</a>; and <a href="#">Economic Base White Paper (RKG Associates, February 1, 2020)</a>).</p> <p>Further, AWS relies on the support of more than 100 Virginia businesses to build and operate its data centers. AWS's spending directly supports jobs in these businesses, and employment in associated sectors of the Virginia economy.</p> <p>The annual economic impact generated from the AWS data center operations is a source of long-term economic sustainability for the economy of the Commonwealth. In analyzing how the economic impact of AWS investments ripple throughout the regional economies, we break down economic impact into the following effects:</p> <ul style="list-style-type: none"><li>• The Direct effect is the change in value added by AWS suppliers in Virginia as a result of our region investment, such as construction firms, colocation providers, or power companies.</li></ul>
--	--

	<ul style="list-style-type: none"><li>• The Indirect effect is the change in value added by the indirect suppliers who supply to AWS's direct suppliers as a result of our Region investment, such as construction labor and materials.</li><li>• The Induced effect is the change in value added by the firms that supply household goods to workers at Amazon companies and AWS Region's direct and indirect suppliers.</li></ul>
<p>b. In towns similar in size and character like Warrenton, have you built data centers, and what was the impact on the town's character, economic base, and overall health and welfare?</p>	<p>We continuously invest in communities where AWS data centers are located by creating local jobs, generating economic growth, providing skills training and education, and unlocking opportunities for local businesses and suppliers. We also establish sustainability initiatives and develop engagement programs in collaboration with local organizations. We spend a lot of time listening to and understanding a community's needs and priorities so our data centers drive job creation, investment, and programs in those communities that specifically benefit their residents. We are proud of the ways we benefit our data center communities through our investments and employee engagement.</p>

**7. Traffic**

**Zoning Reference: 11-3.10.3.12**

<p>a. There is a gate to access the facility. Do you expect Blackwell Road to back up during shift changes as employees or suppliers clear the gate?</p>	<p>No. There will be few vehicles coming and going from the facility, and employees do not change shifts, as you might see at a major manufacturing operation. Deliveries, to the extent they are made, are scattered throughout a day and employees arrive at varied times to commence their shifts.</p>
--	---

**8. Served By Essential Public Facilities**  
**Zoning Reference: 11-3.10.3.15**

a. What is the initial and maximum amount of water needed to bring the data center online? We are not referring to recurring water use (e.g., bathrooms etc.) We are trying to gauge how much town water is required to bring the data center online.	The initial cooling system fill will be approximately 19,000 gallons with a maximum system volume of approximately 190,000 gallons.
b. Do you envision shifting to Town Water sources to cool the data center?	No, as our cooling system is a closed-loop water system that does not rely on town water for operational cooling.
c. Is there any scenario where AWS would require significant water from the town to operate the data center?	No. The filling of the closed-loop cooling system of approximately 190,000 gallons occurs over a 3 to 7-year period.
d. How would the town be made aware of a change in the design that would require an increase of town water to the data center?	AWS would be required to inform the Town and apply for an amendment to the SUP which requires Town review and approval.
e. Is the Town water supply a contingency should your cooling system fail?	No.
f. Under what scenarios would AWS require more power to the data center? Specifically, what assumptions have been provided to Dominion relating to electric demand and the equipment density in the data center?	There are no scenarios under which AWS would require more power.
g. Does AWS have an estimate, or can it disclose its Power Usage Effectiveness (PUE) expected for this data center? (PUE is an Uptime Institute measure).	Energy efficiency is a focused effort for sustainability within AWS. The PUE of AWS latest data centers ranges from 15% to 30% less than the Uptime institute's 2020 average of 1.55 for US data centers.
h. Is AWS assuming, over a period, that the racks will contain more servers and power as technology enables them to be smaller and do more?	Yes. AWS assumes that trend with implementing all technology, however the building is limited to the power demand as currently calculated.
i. Has AWS considered any use of solar power on this site? Does the property allow that type of use (it has a good line of sight to the sun), and using solar panels would offset any future power demands?	Onsite solar is not an option for this project, because onsite solar would not produce any meaningful power for the site. However, Amazon has 18 solar projects in Virginia alone, which add 2.9M megawatts of clean energy to the grid annually (enough to power more than 270,000 homes).

	<p>Amazon is committed to reaching net-zero carbon emissions by 2040 as part of The Climate Pledge – 10 years ahead of the Paris Agreement. As part of The Climate Pledge, Amazon is on path to power our operations with 100% renewable energy by 2025, five years ahead of our original commitment of 2030.</p>
<p>j. Please confirm that AWS will have a power bill it will need to pay for any electricity it uses at this data center. There are citizen concerns that they will be bearing all the costs for any electrical infrastructure improvements and not Amazon.</p>	<p>AWS pays for the electricity it consumes, and will cover the costs of the distribution line in accordance with the requirements of Dominion.</p>

**9. Desirable Employment and Enlarge the Tax Base –** There are citizen concerns that AWS will be tax-exempt and not pay its fair share of Town and County taxes.

**Zoning Reference: 11-3.10.3.17**

<p>a. Has AWS been offered and accepted any tax incentives from the state, county or town for this data center?</p>	<p>We currently receive Sales and Use Tax Exemption under Virginia code based on prior investment in Fauquier County. The Commonwealth of Virginia offers qualifying data centers the same tax treatment that it applies to all manufacturers. Like most states, Virginia exempts all manufacturing firms (regardless of size) from paying sales and use tax on their production equipment. The proposed data center would be eligible for the sales and use tax exemption on data center equipment under this legislation.</p>
<p>b. Can AWS disclose the amount of local taxes it has paid to local governments in the Northern VA area? Public record information should be used for this answer, but we will leave it for AWS if it desires to use other internal sources.</p>	<p>Our Economic Impact Report (publicly released) provides 2020 information which you can access at: <a href="https://d1.awsstatic.com/WWPS/pdf/aws-economic-impact-virginia.pdf">https://d1.awsstatic.com/WWPS/pdf/aws-economic-impact-virginia.pdf</a></p> <p>Among other taxes, AWS paid over \$220 million in business personal property taxes in 2020 in connection with its data</p>

	centers located in Fairfax, Loudoun, and Prince William counties. This amounts to 20% of personal property tax revenues received by these counties in the 2020 fiscal year.
<p>c. Data centers are taxed on tangible property per VA Code 58.1.3503, 58.1.3506, and 58.1.3295.3. Depreciation and technology refreshment of the compute, storage, and network equipment, including software, influences the tax revenue. The Amazon 2021 Annual Report states, "Property and equipment are stated at cost less accumulated depreciation and amortization. Incentives that we receive from property and equipment vendors are recorded as a reduction to our costs. Property includes buildings and land that we own, along with property we have acquired under build-to-suit lease arrangements when we have control over the building during the construction period and finance lease arrangements. Equipment includes assets such as servers and networking equipment, heavy equipment, and other fulfillment equipment. Depreciation and amortization are recorded on a straight-line basis over the estimated useful lives of the assets (generally the lesser of 40 years or the remaining life of the underlying building, three years prior to January 1, 2020 and four years subsequent to January 1, 2020 for our servers, five years for networking equipment, ten years for heavy equipment, and three to ten years for other fulfillment equipment). Depreciation and amortization expense is classified within the corresponding operating expense categories on our consolidated statements of operations". Does AWS expect that this facilities property and equipment will follow this guidance relating to refresh of servers, networking, and heavy equipment? How can AWS assist the town in developing a tax revenue estimate for this facility?</p>	AWS representatives are available to coordinate with the Town and county in developing tax revenue estimates.

**10. Existing Non-Conforming Structures**  
**Zoning Reference: 11-3.10.3.14**

<p>a. Please confirm there are no structures or materials left on the property from when it was a junkyard.</p>	<p>Country Chevrolet removed the parked cars along the southern property line at AWS's request. AWS will remove all additional trash and structures from the property.</p>
<p>b. Are there any pre-existing environmental conditions on the property from prior uses or years of neglect and non-use that you are now responsible for cleaning up?</p>	<p>The Phase II report commissioned by AWS indicated concentrations of certain Resource Conservation and Recovery Act ("RCRA") metals; Total Petroleum Hydrocarbons ("TPH") (Diesel Range Organics ("DRO"), gasoline range organics (GRO), and oil range organics (ORO); volatile organic compounds (VOCs) including benzene, toluene and xylene; semi-volatile organic compounds (SVOCs) including multiple polycyclic aromatic hydrocarbons (PAHs); and an organochlorine pesticide (toxaphene) in the soil samples collected from the western wooded section of the subject property which historically operated as a junkyard. Most notably, TPH-DRO and TPH-ORO were detected in shallow soils collected from boring HA-3 at concentrations that exceed the respective USEPA Regional Screening Levels ("RSL") for industrial soils.</p> <p>We speculate these constituents or contaminants are linked to possible illegal dumping of oil and other hydrocarbons on the site, as well as previous operations from the former junkyard.</p> <p>As part of site-preparation work, AWS will clean up the site in accordance with applicable law, and will remove 1) general waste, tires, and underground tanks from the site, and 2) any contaminated soils that were noted during the environmental phase II testing referenced above. All</p>

	contaminated soils will be removed and disposed of by AWS in accordance with law
--	--

**11. Fuel and Fuel Storage**

**Zoning Reference: 11-3.10.3.23**

a. How often do you anticipate a diesel delivery will be required to fill the tanks?	AWS estimates fuel deliveries every 2-3 months.
b. Does the fuel ever need to be recycled – e.g., been in the tank too long?	No.
c. Are there any other fuel, lubricant, chemical or other liquid, or HAZMAT materials that need to be delivered to the facility?	Yes. Batteries, oil, coolant, diesel exhaust fluid, hydraulic oil, mineral oil, propylene glycol and refrigerant.

**12. Day/Hours of Operation**

**Zoning Reference: 11-3.10.3.26**

a. Please disclose if there are any planned downtime hours where the data center will not be running.	There will be no downtime. Once operational the facility will operate 24/7/365.
b. Please disclose when the generator tests would generally be planned. Is that during the day and for how long? How many times a month do those tests occur?	Generator tests are conducted twice a month to verify operational reliability. Typically, the tests run for 10-20 minutes per generator. In the summer months (May - September) it is sometimes necessary to run generator tests in the early evening.
c. For equipment deliveries, will there be a planned window for receipt or pick up of equipment? Will large tractor-trailers or other trucks arrive on the lot late evening or early AM hours (e.g., 2200 to 0500)?	Deliveries are completed by box trucks and sprinter vans almost exclusively, between business hours of 7am - 6pm.

**13. Security Provisions – There are citizen concerns about the data center fencing.**  
**Zoning Reference: 11-3.10.3.28**

a. Why is a fence required?	All of our facilities are secured and are fenced as a matter of practice.
b. Is there razor wire or double fencing planned for this fence?	There is no razor wire, nor is there double fencing. There is a picture of the proposed fencing on the GDP.
c. In general, in the Washington DC area for AWS data centers, can you disclose if your facilities have been subject to any protests, destruction, acts of violence, bomb threats, or any other safety risk to the employees and community?	AWS cannot disclose security information about its facilities.
d. Please elaborate on where the security cameras are monitoring. Gate location? Perimeter? Rt29?	AWS Security posture is consummate with the assessed security threat designed to provide appropriate protection of customer data and employees. Cameras do not track exterior property.
e. How does a person enter the data center? Do they require a badge? Visit request?	AWS Security manages access to all AWS data centers. Our data centers are not open to the public.
f. Is there a Data Center Manager on 24x7? If there is an incident, please describe your incident management process. How will Police and Fire know who to deal with?	AWS data centers are staffed 24 hours per day. There is always a senior staff member on site who will coordinate police and fire response in an emergency.
g. Are your gate guards armed with firearms? If so, why?	AWS Security posture is consummate with the assessed security threat designed to provide appropriate protection of customer data and employees.

**14. Number of Employees – There are citizen concerns that the data center will not generate many jobs. The Amazon 2021 annual report states that Amazon strives to be Earth’s best employer.**

**Zoning Reference: 11-3.10.3.15**

a. Please elaborate on the expected employee count	When operational, there will be an estimated 25-30 total staff at the data center, working across three shifts. Per the Town Economic Base Analysis (RKG 2/1/2020), it is estimated that approximately 300 construction jobs will be created as a result of this project.
b. Please elaborate on the expected labor categories/job types	During operation, AWS employs data center technicians, facilities engineers, security, logistics personnel, and facility management.
c. What is the expected average and median salary for these jobs?	There is a range of salaries based on experience and seniority. Due to the privacy of our employees, this information is not disclosed. Salaries offered are highly-competitive.
d. Are the employees all AWS or are they contractors?	Data center employees are predominantly AWS staff.
e. If they are AWS employees, please provide an overview of their benefit package	Amazon offers a full range of benefits to regular, full-time US employees and eligible family members – including domestic partners and their children.
f. Are employees required to pass a background check? What steps does AWS take to ensure no internal security threats from employees?	Security posture is consummate with the assessed security threat designed to provide appropriate protection of customer data and employees.
g. Can AWS share its plan or expected use of local contractors in the construction of the data center?	Amazon has a rigorous pre-approval and competitive bid process; and local contractors are welcomed to participate. As said above, AWS relies on the support of more than 100 Virginia businesses to build and operate its data centers.

**15. Refuse and Service Areas**

**Zoning Reference: 11-3.10.3.32**

<p>a. Please elaborate on the type of waste the data center generates. How will the technology hardware (compute, network, storage, etc.) be disposed of and where?</p>	<p>AWS disposes all waste in accordance with applicable law. We are continuing to innovate and find ways to recycle technology hardware to reduce waste.</p>
<p>b. Does the data center contain a large-scale battery backup capability and how are the end-of-life batteries disposed of?</p>	<p>Each rack has a self- contained battery backup. AWS has standing agreements for battery/disposal/recycling end of life in accordance of law.</p>
<p>c. How will trash removal be handled for non-HAZMAT or computer equipment (e.g. normal trash, cardboard boxes)</p>	<p>Regular (non-hazmat) trash and recycling materials are collected via routine methods like any regular trash.</p>
<p>d. What is the plan for any HAZMAT material waste from the data center?</p>	<p>In accordance with applicable laws, hazardous materials are safely gathered by our team of professionals and collected by partner companies specially contracted to handle such material.</p>

the Members of the Warrenton Town Council  
21 Main Street  
Warrenton, Virginia 20186

Re: Special Use Permit #SUP2022-00003, Warrenton Data Center

Dear Mr. Mayor and Members of the Council:

For your consideration, the following items attached to this letter are for purposes of addressing matters to be considered in this Application.

1. One (1) copy of the noise impact analysis entitled "Noise Level Impact Analysis for Warrenton Data Center," prepared by Polysonics Acoustics & Technology Consulting, dated January 9, 2023; and
2. One (1) 11"x17" copy of the building renderings entitled "Illustrative Building Elevations," prepared by Corgan, dated December 15, 2022 and consisting of three sheets.

These documents have been prepared in consultation with your staff, and with AWS's consultants and internal experts.

Very truly yours,  
WALSH, COLUCCI, LUBELEY & WALSH, P.C.

*John H. Foote*

John H. Foote, Esq.

**Questions**

**1. Adequate Safety for Fire – There are some citizen concerns about the fire safety of a data center.**

**Zoning Reference: 11-3.10.3.2**

a. Please elaborate on the type of data center fire suppression system being used. Is it a wet system or a clean agent-type system? Electrical fires can be very complicated.	The facility will be fully sprinklered and will employ a pre-action dry pipe system (i.e., no water in pipe). Automatic water-based sprinkler systems are the most reliable types of systems and standard within data center facilities. This is not a clean-agent system.
b. Do the racks have fire detection and suppression systems?	The individual racks do not. Fire detection and suppression are handled by the system in the data hall.
c. What fire detection and suppression are associated with the fuel tanks?	None, which aligns with NFPA 33 code.
d. What fire detection and suppression are associated with diesel generators?	None, which aligns with NFPA 33 code.
e. What orientation/training will be provided to the local fire department regarding the data center fire detection and suppression systems?	Review and approval of the fire suppression system design and installation by the local jurisdiction is always performed prior to inhabiting the building. In addition to that review, AWS partners with local fire departments to ensure they are knowledgeable about data centers.
f. Will the facility fire detection system be integrated into the local fire system?	Yes, the fire protection system is monitored and integrated with the existing 911 system.
g. What is the AWS fire safety history in Northern VA? Have you had any fires?	We have a strong safety record in Northern Virginia and have only had one small fire which was self-extinguished.

**2. Noise – There are concerns of the citizens relating to the noise the data center will produce.**

**Zoning Reference: 11-3.10.3.3**

a. The assumption is that the cooling systems on the data center's roof will be the source of much of the noise. What can Amazon share with the town about the design and technologies being used to cool the data center? What engineering or other information can you share	The data center uses a chilled water plant consisting of air-cooled chillers to provide cooling. The chillers consist of a fan and a compressor. Both of these components will have noise mitigation (condenser fan silencers, compressor wraps, and barriers) added to fully comply with the Town's
--	--

that will give the citizens confidence that the ordinances will be met?	Noise Ordinance. A noise model produced by Polysonics will be provided.
b. Does AWS have any corporate initiatives to constantly study and engineer solutions to make their data centers quieter? If so, how do they get into the fielded data centers?	AWS has an acoustical engineering team which in part focuses on continual improvement with respect to data center acoustics.
c. Do you monitor sound as part of your data center management and monitoring systems? If so, will that be done here?	AWS plans to measure sound levels throughout the construction and commissioning of this data center.
d. How will noise compliance be tested as the data center adds capacity?	Sound measurements will be taken at the completion of relevant phases of construction to confirm the data center is in compliance with the Town's noise Ordinance.
e. Are the manufacturing companies who build your air handling units innovating to reduce the noise, and how is AWS incentivizing them to do that?	AWS takes acoustics into account when selecting equipment suppliers. Our partners often employ full-time acoustical specialists and have testing facilities to accurately quantify the equipment sound levels, and develop mitigation solutions. AWS maintains a competitive bid process for suppliers, who know noise reduction is a significant component in AWS's selection of equipment.
f. In general, during the life cycle of the data center, do you refresh the air handling technology and other noise-generating infrastructure?	AWS data centers are designed to use specific cooling technologies, which limits options for refreshing to use other technologies. However, we are continually innovating and replace and update our equipment at the end of its useful life.
g. Can Amazon share its experiences from other smaller towns it has worked with as to how they meet noise ordinances?	We are aware of local noise ordinances and will comply with the Town's Noise ordinance.

**3. Location – There are citizen concerns about data center growth in the town and county. Specific to this property, please answer the following questions**

**Zoning Reference: 11-3.10.3.6**

a. How much of the property will remain undeveloped?	Over 50% of the property will be undeveloped. Of the 41.8 total acres, approximately 9 acres will remain undeveloped outside of the proposed improvements, and ±20 acres (48%) of the property will constitute pervious cover and remain undeveloped.
b. What additional structures, if any, could be built there?	There will be no additional structures under the current Special Use Permit (SUP). Should AWS ever seek to place an additional improvement on the property, it would require an amendment of the SUP.
c. Can another data center be built on this property, or can the existing one expand within the property boundaries and zoning there now?	The SUP only allows for one data center of 220,000 sf.

**4. Landscaping – There are concerns that the data center will not be welcoming as one enters the town.**

**Zoning Reference: 11-3.10.3.8**

a. Please elaborate on the trees that will surround the property.	The predominant vegetation that will surround the property are stands of mixed hardwood and conifer trees. In areas where new plantings are proposed, a mixture of evergreen trees, 8’ tall at time of planting, consisting of, but not limited to Norway Spruce, Pitch Pine, and Loblolly Pine, Eastern Red Cedar, and Nellie R. Stevens Holly, will be used. Additionally, large deciduous trees, 3” caliper at time of planting, will be planted, including, but not limited to, Oak, Maple, and Elm.
b. How does AWS plan to make the site either appealing or not visible as a person enters or leaves the town?	The data center building is positioned at least 200’ from the surrounding roadways at the narrowest location to minimize visual impact on motorists entering or leaving the town. Additionally, a combination of extensive tree

	preservation and proposed plantings along the site perimeter will screen the proposed data center building from view from the surrounding rights-of-way.
c. How will the landscape protect the views of citizens whose homes look upon this lot today?	The data center building will be screened through a combination of existing plantings between the center and the adjacent residential areas, and existing and proposed plantings around the perimeter of the data center site.

**5. Timing/Phasing/Development/Duration**  
**Zoning Reference: 11-3.10.3.8**

a. Please confirm that the data center is being built in 1 stage. What will be built in 18 months? Are you at full capacity on opening day or is it a powered shell? If not, do you have an estimated timeline for fully operating at your desired capacity?	The building shell will be built in one stage with anticipated completion Q1 2025. Our interior buildout is in stages. Full capacity is estimated to occur between 2027 to 2032.
b. The SUP notes a cost of \$550,000,000 dollars for this facility. Does that cost reflect the cost to bring the data center to full operational capacity and commissioning, including the computing, storage, network, and other technology used to provide services?	\$550,000,000 is the estimate based on preliminary design and construction. It is likely that the final cost to bring the data center to full operational capacity and commissioning, including storage, network, and other technology, will exceed that amount.
c. Internally, is the raised floor area one open space or is it architected by data halls? How is capacity brought online in the physical space?	Capacity is brought online in phases.
d. Can AWS share what the expected life of the facility is designed for? 30 years, 40 years? Does the facility align to an Uptime Institute Design (Tier 2,3,4 etc.).	The building is designed for a 50-year life.
e. Is this design a new design for AWS or has a similar data center been built like this before? If so, what was the timeline for construction and being at full capacity.	Designs for AWS data centers are constantly evolving, striving to increase sustainability and reduce consumption. Timeline for shell construction is typically about one year. Full capacity is estimated to occur between 2027 – 2032.

**6. Welfare and Convenience**  
**Zoning Reference: 11-3.10.3.11**

<p>a. Can AWS describe how the work performed in the Warrenton data center contributes to the community's welfare? What is it about the services provided to AWS customers in that data center that enhances or secures the lives of the citizens of Warrenton or, more broadly, in the community?</p>	<p>AWS sees this project as having many benefits and contributions to the Warrenton community. The project redevelops a vacant industrial site with a project that has a low impact to town services and traffic. Based on two 2020 Town-commissioned fiscal studies, it is estimated that this project will create approximately 300+ construction jobs and operational jobs, adding to the diversity of jobs in the Warrenton area both in salary and skill level. This project is anticipated to increase the financial diversity of the Town, bringing in increased tax revenue to support the Capital Improvement Plan (see, <a href="#">Fiscal Sustainability Analysis White Paper (RKG Associates, February 1, 2020)</a>; and <a href="#">Economic Base White Paper (RKG Associates, February 1, 2020)</a>).</p> <p>Further, AWS relies on the support of more than 100 Virginia businesses to build and operate its data centers. AWS's spending directly supports jobs in these businesses, and employment in associated sectors of the Virginia economy.</p> <p>The annual economic impact generated from the AWS data center operations is a source of long-term economic sustainability for the economy of the Commonwealth. In analyzing how the economic impact of AWS investments ripple throughout the regional economies, we break down economic impact into the following effects:</p> <ul style="list-style-type: none"><li>• The Direct effect is the change in value added by AWS suppliers in Virginia as a result of our region investment, such as construction firms, colocation providers, or power companies.</li></ul>
--	--

	<ul style="list-style-type: none"><li>• The Indirect effect is the change in value added by the indirect suppliers who supply to AWS’s direct suppliers as a result of our Region investment, such as construction labor and materials.</li><li>• The Induced effect is the change in value added by the firms that supply household goods to workers at Amazon companies and AWS Region’s direct and indirect suppliers.</li></ul>
<p>b. In towns similar in size and character like Warrenton, have you built data centers, and what was the impact on the town’s character, economic base, and overall health and welfare?</p>	<p>We continuously invest in communities where AWS data centers are located by creating local jobs, generating economic growth, providing skills training and education, and unlocking opportunities for local businesses and suppliers. We also establish sustainability initiatives and develop engagement programs in collaboration with local organizations. We spend a lot of time listening to and understanding a community’s needs and priorities so our data centers drive job creation, investment, and programs in those communities that specifically benefit their residents. We are proud of the ways we benefit our data center communities through our investments and employee engagement.</p>

**7. Traffic**  
**Zoning Reference: 11-3.10.3.12**

<p>a. There is a gate to access the facility. Do you expect Blackwell Road to back up during shift changes as employees or suppliers clear the gate?</p>	<p>No. There will be few vehicles coming and going from the facility, and employees do not change shifts, as you might see at a major manufacturing operation. Deliveries, to the extent they are made, are scattered throughout a day and employees arrive at varied times to commence their shifts.</p>
--	---

**8. Served By Essential Public Facilities**  
**Zoning Reference: 11-3.10.3.15**

<p>a. What is the initial and maximum amount of water needed to bring the data center online? We are not referring to recurring water use (e.g., bathrooms etc.) We are trying to gauge how much town water is required to bring the data center online.</p>	<p>The initial cooling system fill will be approximately 19,000 gallons with a maximum system volume of approximately 190,000 gallons.</p>
<p>b. Do you envision shifting to Town Water sources to cool the data center?</p>	<p>No, as our cooling system is a closed-loop water system that does not rely on town water for operational cooling.</p>
<p>c. Is there any scenario where AWS would require significant water from the town to operate the data center?</p>	<p>No. The filling of the closed-loop cooling system of approximately 190,000 gallons occurs over a 3 to 7-year period.</p>
<p>d. How would the town be made aware of a change in the design that would require an increase of town water to the data center?</p>	<p>AWS would be required to inform the Town and apply for an amendment to the SUP which requires Town review and approval.</p>
<p>e. Is the Town water supply a contingency should your cooling system fail?</p>	<p>No.</p>
<p>f. Under what scenarios would AWS require more power to the data center? Specifically, what assumptions have been provided to Dominion relating to electric demand and the equipment density in the data center?</p>	<p>There are no scenarios under which AWS would require more power.</p>
<p>g. Does AWS have an estimate, or can it disclose its Power Usage Effectiveness (PUE) expected for this data center? (PUE is an Uptime Institute measure).</p>	<p>Energy efficiency is a focused effort for sustainability within AWS. The PUE of AWS latest data centers ranges from 15% to 30% less than the Uptime institute’s 2020 average of 1.55 for US data centers.</p>
<p>h. Is AWS assuming, over a period, that the racks will contain more servers and power as technology enables them to be smaller and do more?</p>	<p>Yes. AWS assumes that trend with implementing all technology, however the building is limited to the power demand as currently calculated.</p>
<p>i. Has AWS considered any use of solar power on this site? Does the property allow that type of use (it has a good line of sight to the sun), and using solar panels would offset any future power demands?</p>	<p>Onsite solar is not an option for this project, because onsite solar would not produce any meaningful power for the site. However, Amazon has 18 solar projects in Virginia alone, which add 2.9M megawatts of clean energy to the grid annually (enough to power more than 270,000 homes).</p>

	<p>Amazon is committed to reaching net-zero carbon emissions by 2040 as part of The Climate Pledge – 10 years ahead of the Paris Agreement. As part of The Climate Pledge, Amazon is on path to power our operations with 100% renewable energy by 2025, five years ahead of our original commitment of 2030.</p>
<p>j. Please confirm that AWS will have a power bill it will need to pay for any electricity it uses at this data center. There are citizen concerns that they will be bearing all the costs for any electrical infrastructure improvements and not Amazon.</p>	<p>AWS pays for the electricity it consumes, and will cover the costs of the distribution line in accordance with the requirements of Dominion.</p>

**9. Desirable Employment and Enlarge the Tax Base – There are citizen concerns that AWS will be tax-exempt and not pay its fair share of Town and County taxes.**

**Zoning Reference: 11-3.10.3.17**

<p>a. Has AWS been offered and accepted any tax incentives from the state, county or town for this data center?</p>	<p>We currently receive Sales and Use Tax Exemption under Virginia code based on prior investment in Fauquier County. The Commonwealth of Virginia offers qualifying data centers the same tax treatment that it applies to all manufacturers. Like most states, Virginia exempts all manufacturing firms (regardless of size) from paying sales and use tax on their production equipment. The proposed data center would be eligible for the sales and use tax exemption on data center equipment under this legislation.</p>
<p>b. Can AWS disclose the amount of local taxes it has paid to local governments in the Northern VA area? Public record information should be used for this answer, but we will leave it for AWS if it desires to use other internal sources.</p>	<p>Our Economic Impact Report (publicly released) provides 2020 information which you can access at: <a href="https://d1.awsstatic.com/WWPS/pdf/aws-economic-impact-virginia.pdf">https://d1.awsstatic.com/WWPS/pdf/aws-economic-impact-virginia.pdf</a></p> <p>Among other taxes, AWS paid over \$220 million in business personal property taxes in 2020 in connection with its data</p>

	centers located in Fairfax, Loudoun, and Prince William counties. This amounts to 20% of personal property tax revenues received by these counties in the 2020 fiscal year.
<p>c. Data centers are taxed on tangible property per VA Code 58.1.3503, 58.1.3506, and 58.1.3295.3. Depreciation and technology refreshment of the compute, storage, and network equipment, including software, influences the tax revenue. The Amazon 2021 Annual Report states, "Property and equipment are stated at cost less accumulated depreciation and amortization. Incentives that we receive from property and equipment vendors are recorded as a reduction to our costs. Property includes buildings and land that we own, along with property we have acquired under build-to-suit lease arrangements when we have control over the building during the construction period and finance lease arrangements. Equipment includes assets such as servers and networking equipment, heavy equipment, and other fulfillment equipment. Depreciation and amortization are recorded on a straight-line basis over the estimated useful lives of the assets (generally the lesser of 40 years or the remaining life of the underlying building, three years prior to January 1, 2020 and four years subsequent to January 1, 2020 for our servers, five years for networking equipment, ten years for heavy equipment, and three to ten years for other fulfillment equipment). Depreciation and amortization expense is classified within the corresponding operating expense categories on our consolidated statements of operations". Does AWS expect that this facilities property and equipment will follow this guidance relating to refresh of servers, networking, and heavy equipment? How can AWS assist the town in developing a tax revenue estimate for this facility?</p>	AWS representatives are available to coordinate with the Town and county in developing tax revenue estimates.

**10. Existing Non-Conforming Structures**  
**Zoning Reference: 11-3.10.3.14**

<p>a. Please confirm there are no structures or materials left on the property from when it was a junkyard.</p>	<p>Country Chevrolet removed the parked cars along the southern property line at AWS's request. AWS will remove all additional trash and structures from the property.</p>
<p>b. Are there any pre-existing environmental conditions on the property from prior uses or years of neglect and non-use that you are now responsible for cleaning up?</p>	<p>The Phase II report commissioned by AWS indicated concentrations of certain Resource Conservation and Recovery Act ("RCRA") metals; Total Petroleum Hydrocarbons ("TPH") (Diesel Range Organics ("DRO"), gasoline range organics (GRO), and oil range organics (ORO); volatile organic compounds (VOCs) including benzene, toluene and xylene; semi-volatile organic compounds (SVOCs) including multiple polycyclic aromatic hydrocarbons (PAHs); and an organochlorine pesticide (toxaphene) in the soil samples collected from the western wooded section of the subject property which historically operated as a junkyard. Most notably, TPH-DRO and TPH-ORO were detected in shallow soils collected from boring HA-3 at concentrations that exceed the respective USEPA Regional Screening Levels ("RSL") for industrial soils.</p> <p>We speculate these constituents or contaminants are linked to possible illegal dumping of oil and other hydrocarbons on the site, as well as previous operations from the former junkyard.</p> <p>As part of site-preparation work, AWS will clean up the site in accordance with applicable law, and will remove 1) general waste, tires, and underground tanks from the site, and 2) any contaminated soils that were noted during the environmental phase II testing referenced above. All</p>

	contaminated soils will be removed and disposed of by AWS in accordance with law
--	--

**11. Fuel and Fuel Storage**

**Zoning Reference: 11-3.10.3.23**

a. How often do you anticipate a diesel delivery will be required to fill the tanks?	AWS estimates fuel deliveries every 2-3 months.
b. Does the fuel ever need to be recycled – e.g., been in the tank too long?	No.
c. Are there any other fuel, lubricant, chemical or other liquid, or HAZMAT materials that need to be delivered to the facility?	Yes. Batteries, oil, coolant, diesel exhaust fluid, hydraulic oil, mineral oil, propylene glycol and refrigerant.

**12. Day/Hours of Operation**

**Zoning Reference: 11-3.10.3.26**

a. Please disclose if there are any planned downtime hours where the data center will not be running.	There will be no downtime. Once operational the facility will operate 24/7/365.
b. Please disclose when the generator tests would generally be planned. Is that during the day and for how long? How many times a month do those tests occur?	Generator tests are conducted twice a month to verify operational reliability. Typically, the tests run for 10-20 minutes per generator. In the summer months (May - September) it is sometimes necessary to run generator tests in the early evening.
c. For equipment deliveries, will there be a planned window for receipt or pick up of equipment? Will large tractor-trailers or other trucks arrive on the lot late evening or early AM hours (e.g., 2200 to 0500)?	Deliveries are completed by box trucks and sprinter vans almost exclusively, between business hours of 7am - 6pm.

**13. Security Provisions – There are citizen concerns about the data center fencing.**  
**Zoning Reference: 11-3.10.3.28**

a. Why is a fence required?	All of our facilities are secured and are fenced as a matter of practice.
b. Is there razor wire or double fencing planned for this fence?	There is no razor wire, nor is there double fencing. There is a picture of the proposed fencing on the GDP.
c. In general, in the Washington DC area for AWS data centers, can you disclose if your facilities have been subject to any protests, destruction, acts of violence, bomb threats, or any other safety risk to the employees and community?	AWS cannot disclose security information about its facilities.
d. Please elaborate on where the security cameras are monitoring. Gate location? Perimeter? Rt29?	AWS Security posture is consummate with the assessed security threat designed to provide appropriate protection of customer data and employees. Cameras do not track exterior property.
e. How does a person enter the data center? Do they require a badge? Visit request?	AWS Security manages access to all AWS data centers. Our data centers are not open to the public.
f. Is there a Data Center Manager on 24x7? If there is an incident, please describe your incident management process. How will Police and Fire know who to deal with?	AWS data centers are staffed 24 hours per day. There is always a senior staff member on site who will coordinate police and fire response in an emergency.
g. Are your gate guards armed with firearms? If so, why?	AWS Security posture is consummate with the assessed security threat designed to provide appropriate protection of customer data and employees.

**14. Number of Employees – There are citizen concerns that the data center will not generate many jobs. The Amazon 2021 annual report states that Amazon strives to be Earth’s best employer.**

**Zoning Reference: 11-3.10.3.15**

a. Please elaborate on the expected employee count	When operational, there will be an estimated 25-30 total staff at the data center, working across three shifts. Per the Town Economic Base Analysis (RKG 2/1/2020), it is estimated that approximately 300 construction jobs will be created as a result of this project.
b. Please elaborate on the expected labor categories/job types	During operation, AWS employs data center technicians, facilities engineers, security, logistics personnel, and facility management.
c. What is the expected average and median salary for these jobs?	There is a range of salaries based on experience and seniority. Due to the privacy of our employees, this information is not disclosed. Salaries offered are highly-competitive.
d. Are the employees all AWS or are they contractors?	Data center employees are predominantly AWS staff.
e. If they are AWS employees, please provide an overview of their benefit package	Amazon offers a full range of benefits to regular, full-time US employees and eligible family members – including domestic partners and their children.
f. Are employees required to pass a background check? What steps does AWS take to ensure no internal security threats from employees?	Security posture is consummate with the assessed security threat designed to provide appropriate protection of customer data and employees.
g. Can AWS share its plan or expected use of local contractors in the construction of the data center?	Amazon has a rigorous pre-approval and competitive bid process; and local contractors are welcomed to participate. As said above, AWS relies on the support of more than 100 Virginia businesses to build and operate its data centers.

**15. Refuse and Service Areas**

**Zoning Reference: 11-3.10.3.32**

<p>a. Please elaborate on the type of waste the data center generates. How will the technology hardware (compute, network, storage, etc.) be disposed of and where?</p>	<p>AWS disposes all waste in accordance with applicable law. We are continuing to innovate and find ways to recycle technology hardware to reduce waste.</p>
<p>b. Does the data center contain a large-scale battery backup capability and how are the end-of-life batteries disposed of?</p>	<p>Each rack has a self- contained battery backup. AWS has standing agreements for battery/disposal/recycling end of life in accordance of law.</p>
<p>c. How will trash removal be handled for non-HAZMAT or computer equipment (e.g. normal trash, cardboard boxes)</p>	<p>Regular (non-hazmat) trash and recycling materials are collected via routine methods like any regular trash.</p>
<p>d. What is the plan for any HAZMAT material waste from the data center?</p>	<p>In accordance with applicable laws, hazardous materials are safely gathered by our team of professionals and collected by partner companies specially contracted to handle such material.</p>

Project: Noise Level Impact Analysis for Warrenton Data Center  
Location: Town of Warrenton, Virginia  
Report #6246

Dear Mr. Connell,

Polysonics performed a noise impact analysis for the proposed Amazon Warrenton Data Center (DCA062) in the Town of Warrenton, VA.

The Town of Warrenton Zoning Ordinance (April 2002) provides maximum permissible noise levels for the property line. The noise level limits are presented in octave bands and have decibel correction for various site conditions.

Polysonics created a SoundPLAN model to determine the noise levels of the proposed mechanical equipment at the site.

Through our analysis, we determined that the proposed mechanical equipment will meet the Zoning Ordinance, provided the proposed mitigation is used at the chillers and generators.

Please let me know if you would like any further information.

Sincerely,  
Polysonics

**EXECUTIVE SUMMARY**

Polysonics performed a noise impact analysis for the proposed Amazon Warrenton Data Center (DCA062) in the Town of Warrenton, VA.

The Town of Warrenton Zoning Ordinance (April 2002) provides maximum permissible noise levels for the property line. The noise level limits are presented in octave bands and have decibel correction for various site conditions.

Polysonics created a SoundPLAN model to determine the noise levels of the proposed mechanical equipment at the site.

Through our analysis, we determined that the proposed mechanical equipment will meet the Zoning Ordinance, provided the proposed mitigation is used at the chillers and generators.

Details of the noise impact analysis including discussion of applicable standards, analysis methodologies, and resultant noise impact are provided herein.

**TOWN OF WARRENTON NOISE LIMITS**

The Town of Warrenton Zoning Ordinance (April 2002) provides maximum permissible noise levels for the property line (Section 9-14). The sound levels are presented in octave bands and have decibel correction for various site conditions (Tables 9-1 and 9-2 in the Zoning Ordinance). Note there is not an overall dBA requirement.

The limits for this site are not based on the “Along Residential District Boundaries” category, but the “At Any Other Point on the Lot Boundary” category, as the site does not share a boundary with residential properties. As will be seen below, there is a correction for the site being across the street from a residential district.

The limits applicable to the site are summarized in Table 1 below.

**TABLE 1: MAXIMUM NOISE LEVELS**

<b>Adjacency</b>	<b>Limit</b>	<b>Correction</b>	<b>63</b>	<b>125</b>	<b>250</b>	<b>500</b>	<b>1000</b>	<b>2000</b>	<b>4000</b>	<b>8000</b>
n/a	Base Limits	n/a	72	70	65	59	55	51	47	44
Residential	Daytime	-5 R-District, -5 Tone	62	60	55	49	45	41	37	34
	Nighttime	-5 R-District -5 10pm-7am -5 Tone	57	55	50	44	40	36	32	29
	Generator	-5 R-District	67	65	60	54	50	46	41	39

The nighttime correction is only applied during evening hours (assumed to be a standard 10:00 p.m. to 7:00 a.m.).

As will be shown in the input data below, Polysonics is assuming a tone would be present and is applying the correction. A tone is defined by ASA/ANSI S12.9-2021/Part 4 as the sound level in a frequency exceeding the averaged adjacent frequencies by a constant level difference. The constants are 15 dB for 25-125 Hz, 8 dB for 160-400 Hz, and 5 dB for 500-10,000 Hz.

POLYSONICS

The emergency generator is only expected to run (1) while being tested or (2) during a power outage/emergency. Therefore, we are applying the limited time period correction.

Based on a meeting with the Town of Warrenton on October 3, 2022 and the Noise Determination letter from the County (dated December 16, 2022), Polysonics understands the following:

- The property line is considered a vertical plane, and that any measurement or modeling should be at the loudest height.
- The noise levels shown in Table 1 are only applicable to the property line, and not to any of the surrounding properties.
- The background noise at the surrounding properties and the audibility of the noise sources beyond the property line is not considered in the ordinance.
- The letter of determination states that any measurements along the subject property line must include the correction factor for residential adjacency.

### **SOUNDPLAN MODEL**

Polysonics created an environmental noise model of site using SoundPLAN (Based on ISO 9613-2) version 8.2. This program is a three-dimensional computer model, which evaluates sound levels generated from a combination of sources. The model disperses the sound over the given terrain to determine sound level impact for the surrounding areas of interest. The model considers topography, type of sound source, sound source spectrum, and horizontal spacing of the parameters. Given these input parameters, it calculates average sound level at a grid of points or individual receivers.

Polysonics used civil drawings, architectural drawings, and mechanical drawings (8/12/2022 Issue for Bid set) to determine the location of the equipment and proposed building. Civil drawings and Google Earth were used to obtain topography within the site and the surrounding areas. A three-dimensional graphic of the SoundPLAN model can be seen in Figure 1 in the Appendix.

We included all major rooftop equipment in the model. The sound data for the equipment was obtained from Trane for the Chillers and Amazon for the other rooftop equipment. The generator equipment is based on an enclosure that can meet 65 dBA at 7 meters (25').

In order to be conservative, the Trane chiller data is based on high summertime ambient conditions, which is the loudest conditions.

The chiller sound mitigation is based on data received from qualified noise mitigation manufacturers, including Parklane Acoustics, Kinetics Noise Control, and VAW Systems Ltd. The mitigation includes compressor wraps and either louvers/baffles or a barrier around the equipment.

Tables 2 through 4 below show the input in the model, including the sound power data and mitigation applied to the chillers. All levels are unweighted (without A-weighting corrections). Table 3 is shown in one-third octave to demonstrate where tones would be applicable, but generally inputs and results use full octave band data.

4000	61	64	64	73	57	86
8000	54	57	57	67	50	88

Polysonics considered the following scenarios in the model:

- Unmitigated Chillers
  - o Daytime
  - o Nighttime
- Mitigated Chillers
  - o Daytime
  - o Nighttime
- Generators and Mitigated Chillers
  - o Daytime Testing

In all scenarios, the other rooftop equipment (Table 5) was included.

Noise levels were calculated at 59 feet above the ground, which is the height of the chiller fans. For the chillers, we calculated octave band results at the four loudest cardinal direction property line locations. For the generators, we included the generator nearest the property line, and calculated at that property line location.

The five calculation locations can be seen in Figure 2 in the Appendix.

We also calculated noise contours at 20' above the ground to show the calculated sound levels around the community.

### **MODELED RESULTS**

Table 6 below shows the unmitigated results of the calculations, the applicable noise district, and the loudest noise source at the location (when considering overall dBA). Sound levels that exceed the Town of Warrenton noise limits are highlighted in orange.

**TABLE 6: MODELED NOISE LEVELS - UNMITIGATED**

Scenario	Receiver	dBA	63	125	250	500	1000	2000	4000	8000
<b>Town Limits</b>	-	-	<b>62</b>	<b>60</b>	<b>55</b>	<b>49</b>	<b>45</b>	<b>41</b>	<b>37</b>	<b>34</b>
Day	North	63	67	63	61	59	53	48	41	36
	South	59	60	61	58	55	49	41	36	26
	East	61	64	64	61	59	57	52	46	35
	West	55	59	59	55	53	51	44	35	16
<b>Town Limits</b>	-	-	<b>57</b>	<b>55</b>	<b>50</b>	<b>44</b>	<b>40</b>	<b>36</b>	<b>32</b>	<b>29</b>
Night	North	58	58	62	58	56	53	47	42	32
	South	54	52	56	53	52	49	44	36	22
	East	56	54	59	56	54	51	46	40	30
	West	49	49	55	51	48	44	38	29	11

As seen in Table 6, without mitigation the Town of Warrenton noise level limits will be exceeded at the property line (at 59 feet above the ground).

Table 7 below shows the mitigated results.

**TABLE 7: MODELED NOISE LEVELS - MITIGATED**

Scenario	Receiver	dBA	63	125	250	500	1000	2000	4000	8000
<b>Town Limits</b>	-	-	<b>62</b>	<b>60</b>	<b>55</b>	<b>49</b>	<b>45</b>	<b>41</b>	<b>37</b>	<b>34</b>
Day	North	49	58	57	52	45	41	37	34	23
	South	46	55	53	48	43	40	35	30	14
	East	47	56	55	50	43	39	35	32	24
	West	41	51	50	44	37	33	28	21	0
<b>Town Limits</b>	-	-	<b>57</b>	<b>55</b>	<b>50</b>	<b>44</b>	<b>40</b>	<b>36</b>	<b>32</b>	<b>29</b>
Night	North	44	51	53	47	40	38	32	27	18
	South	42	48	49	44	38	37	29	23	9
	East	42	49	51	45	37	35	30	26	18
	West	36	43	46	40	32	30	22	14	0

As seen in Table 7, all of the sound levels at each frequency meets the Town of Warrenton Limits. The sound levels are between 2 and 11 dB below the Town limits.

Table 8 below shows the generator results (using the 65 dBA at 7 meters generator).

**TABLE 8: MODELED NOISE LEVELS - GENERATOR**

Scenario	Receiver	dBA	63	125	250	500	1000	2000	4000	8000
<b>Town Limits</b>	-	-	<b>67</b>	<b>65</b>	<b>60</b>	<b>54</b>	<b>50</b>	<b>46</b>	<b>41</b>	<b>39</b>
Generator	Gen	49	61	58	50	41	41	41	39	37

As seen in Table 8, all of the sound levels at each frequency meets the Town of Warrenton Limits.

**ADJACENT PROPERTY RESULTS**

Polysonics is including an expanded analysis to show the chiller noise level impacts to the surrounding properties. This analysis includes the resultant noise levels from the data center and a comparison between the data center and the background noise levels at surrounding properties.

In order to provide context for the overall noise levels, Polysonics has included a graphic which shows common sound levels and their perception in Figure 3 in the Appendix.

**Noise Levels Around Property**

A graphic showing the overall dBA mitigated noise levels can be seen in Figure 4 and 5 in the Appendix.

As seen in Figure 4 and 5, the noise levels at the residences are generally:

- Daytime
  - o 35 to 40 dBA to the north and east
  - o 35 to 42 dBA to the south
- Nighttime
  - o 30 to 35 dBA to the north and east
  - o 30 to 37 dBA to the south

When compared to the common sound levels in Figure 3, the data center noise levels would be considered “faint” or “moderate.”

**Background Noise Levels**

In order to establish the background noise levels around the adjacent properties, Polysonics performed measurements at 5 nearby locations between June 1 and June 6, 2022.

A map showing the measurement locations can be found in Figure 6 in the Appendix.

The equipment used for the measurement included one Larson Davis LXT sound level meter. The units meet ANSI S1.4 standards for Type I Sound Level Meters and were calibrated prior to the measurement, traceable to the National Institute of Standards and Technology.

Weather data was obtained from the weather station at Warrenton/Fauquier Airport. Table 9 below summarizes the periods of rain and wind gusts over 10 mph that occurred during the measurement.

**TABLE 9: WEATHER DATA**

Date	Rain	Wind
6/1/22	17:55-18:15	17:55-18:15
6/2/22	15:35-23:55	15:35-15:55 16:35-16:55 20:55-21:00
6/3/22	00:00-00:15	11:35-12:15
6/4/22	-	-
6/5/22	-	-
6/6/22	-	-

POLYSONICS

Polysonics used the same receiver locations in our SoundPLAN model to calculate the day/night sound levels.

Figures 7 through 11 in the Appendix compare the measurements at each location and the calculated data center noise level. Please note that since the Ordinance only applies to the property line, the sound data presented in these figures is overall dBA, not octave band.

As seen in Figure 7 through 11, in most cases the measured background ambient noise is above the modeled data. The only exception is at M1 (at the southern property line), where the ambient levels are around 1 decibel below the modeled levels in the early morning (12am-4am).

As seen in Figure 7 through 11, the ambient noise levels at the residences are generally:

- M1 (southern property line)
  - o 70 dBA daytime/55 dBA nighttime
- M2 (western property line)
  - o 65 dBA daytime/55 dBA nighttime
- M3 (northern property line)
  - o 55 dBA daytime/50 dBA nighttime
- M4 (northwestern property line)
  - o 65 dBA daytime/55 dBA nighttime
- M5 (near hotel)
  - o 55 dBA daytime/40 dBA nighttime

Polysonics would consider M5 (near hotel) the most representative of residential noise, as it is farthest from the roadway and nearest the residential areas.

## **CONCLUSIONS**

Polysonics' measurements were limited to data center property and other public spaces. These locations show that the data center is not likely to be audible in outdoor spaces during the daytime or indoor spaces during the nighttime. The background noise is generally between two to four times louder than the data center.

The community noise impact will generally be between 30 to 42 dBA, with the most impacted space being directly south of the site. The noise levels from the data center outside would be perceived as "faint" or "moderate".

Using M5 (near hotel), the results show that there may be some audible evening noise directly south of the site during the late hours.

The audibility of the noise at these locations would depend on the resident's sensitivity, the location of the resident (inside or outside), the time of day and other local noise sources.

The HUD Noise Guidebook states that a typical noise reduction of a residence is 20 dBA. Applying this reduction to the modeled data just south of the site, the noise levels within the nearest residences (windows closed) would be 22 dBA daytime/17 dBA nighttime. These levels are perceived as "faint" and it is very unlikely that the noise will be audible.

REPORT #6246

PAGE 9 OF 24

The audibility of the data center is not part of the Town of Warrenton Zoning Ordinance, but is disclosed in this report to fully disclose the impact to the community.

As shown in this report, the mitigated rooftop mechanical equipment and generators will meet the Town of Warrenton Zoning Ordinance noise limits at the property line at any height.

John Foote, Esq.  
 Walsh, Colucci, Lubeley, and Walsh PC  
 4310 Prince William Parkway, Suite 300  
 Woodbridge, VA 22192

**RE: Zoning Determination Letter on the Noise Ordinance regulations under Article 9-14 of the Zoning Ordinance as they pertain to the proposed Amazon Data Center on GPIN 6984-69-2419-000.**

Dear Mr. Foote,

Please see the following information in response to your request for a Zoning Determination Letter on the above-mentioned property within the Town of Warrenton.

- The zoning district for the parcel in question is I (Industrial) and is not within a Planned Unit Development or Overlay District.
- The proposed Data Center use requires a Special Use Permit from Town Council per Article 3-4.12.3 of the 2006 Zoning Ordinance, as amended. Data Center uses are subject to the performance standards provided under Article 9-14 of the Zoning Ordinance as it is not a residential use. Non-residential uses must be in conformance with these standards at all times. Violations of these provisions are subject to enforcement as Zoning Violations.

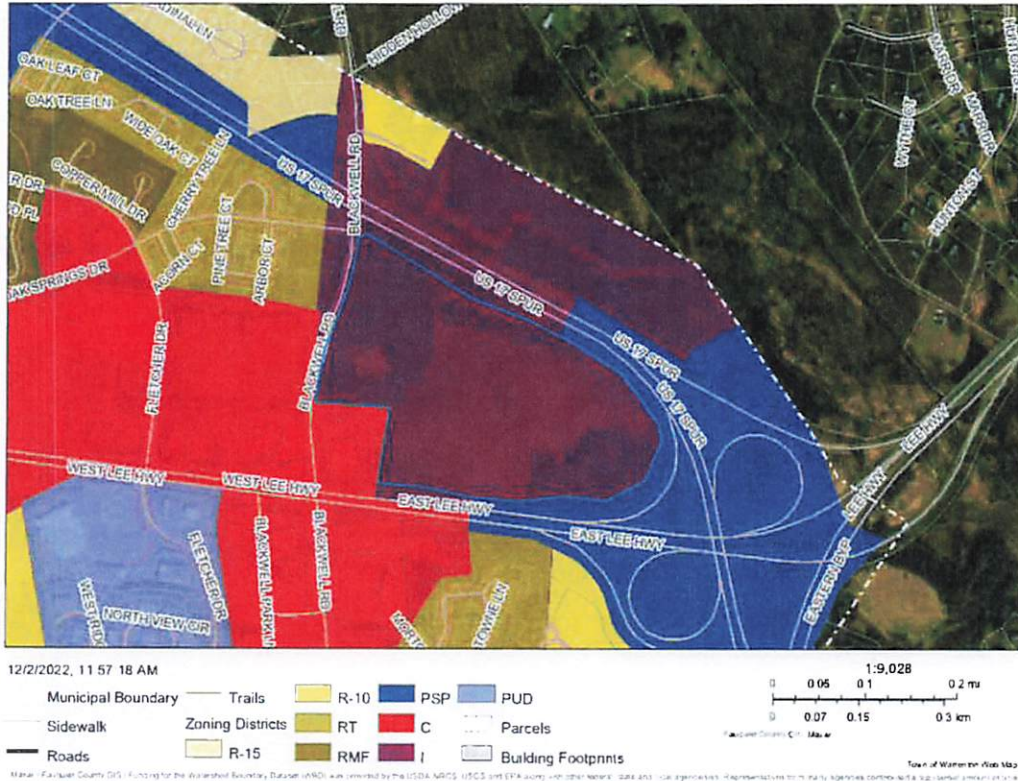

**Are all of the decibel readings set out in Table 9-1 of §9-14 to be measured at the Applicant's property line nearest to the sound source, and not at any other line. Further, does this mean that the second column in Table 9-1 is irrelevant to this project and that the third column is the starting point for calculation and analysis?**

- Per Article 9-14.2, sound pressure levels are to be measured at the property line nearest the establishment radiating the noise in question. Table 9-1 further states, under the third column, that sound pressure levels created by the establishment are to be met "*at any other point on the lot boundary.*" For the proposed Data Center, this means measurements would be taken at the property lines of GPIN 6984-69-2419-000, and these measurements need to show the Data Center as meeting the sound pressure limits at any of the property lines of the subject lot. Further, any subdivisions to the property would require conformance with these regulations to the new lot lines containing the Data Center use.
  - *Article 9-14.2. The sound pressure level of sound radiated from an establishment, measured at the lot line of the site thereof that is the nearest thereto, shall not exceed the values in any octave band of frequency that are specified in Table 9-1 below, or in Table 9-1 as modified by the correction factors set forth in Table 9-2.*
- The second column under Table 9-1 applies to measurements taken at the property line of the establishment radiating the noise, where "*along residential district boundaries.*" The nearest residential district boundary is located approximately 128 feet from the subject property across Blackwell Road. As the subject property does not have residential zoning

6984-69-2419-000  
Noise Zoning Determination  
12/16/2022

district boundaries along or adjoining its property lines, it is not subject to the second column under Table 9-1.

Town of Warrenton Zoning Map: 6984-69-2419-000

**The Ordinance applies a downward “correction” in decibel strength for R-district zoned properties that are “across the street” from the project site. Are the only affected properties the Oak Springs and the Highlands communities?**

- Table 9-2 requires a -5dB reduction, “on a site contiguous to or across a street from the boundary of any R-district established by this chapter.” The R-districts established by the Town of Warrenton are found in Article 3 of the Zoning Ordinance. As there are R-Districts across the street from the subject property, including GPINS: 6985-50-1018-000, 6985-50-1248-000, 6985-40-8633-000 (Oak Springs), 6984-68-2681-000 (Highlands: Townhouses), and 6984-68-7335-000 (Highlands: Single-Family Detached), the -5dB correction applies to the site. Additionally, the correction factor says “on a site.” It does not delineate or state that the correction factor only applies to the portion of the site across the street from/adjacent to a residential district. Therefore, any measurements along the subject property lines must include this correction factor.

**Is it correct that background noise may not be factored into analysis, because the language in §9-14.2 of the Noise Ordinance says that Tables 9-1 and 9-2 relate to the “sound pressure level of sound radiated from an establishment, measured at the lot line of the site thereof that is the nearest thereto” and that it shall not exceed the values set out in those Tables at that lot line? Is this true even when there is significant ambient noise?**

6984-69-2419-000  
 Noise Zoning Determination  
 12/16/2022

- The Zoning Ordinance does not provide specific guidance regarding ambient background noise. However, it does say, "*sound radiated from an establishment*" when describing what sound is measured. This language is inferred to mean that the only sound to be measured is the sound emanating from the subject property. How a noise analysis accounts for or corrects for background noise would be per the American National Standards Institute, as those are the standards by which sound pressure levels are to be measured. ANSI provides the ability to make adjustments for background sound in Chapter 6 of of ASA/ANSI S12.9-2021/Part 4. These regulations shall be followed when analyzing the noise levels created by the use.
  - 9-14.2. [...] *The sound pressure level shall be measured with a sound level meter and an associated octave band analyzer conforming to standards prescribed by the American National Standards Institute.*

**What is the legal definition of "tone" for purposes of the application of the Town Ordinance, and how is it to be measured given the absence of any standard?**

- The Zoning Ordinance requires a reduction in decibels for any "Tone (e.g., hum or screech) but does not define "Tone" nor provide any specific measurements for Tone. However, Merriam Webster's Dictionary provides the following definition, "*a sound of definite pitch and vibration.*" Should the Data Center create noise that may be considered a hum, screech, or definite pitch, then the decibel reduction for Tone would apply. Specific information regarding the Tone or pitch for the proposed Data Center has not been provided in sufficient detail to determine that the correction factor for Tone would not apply.
- Since the performance standards section mentions the American National Standards Institute (ANSI), their standards may be utilized in determining Tone. The Applicant would need to provide an analysis of the proposed Tone per the most recent applicable ANSI standards. For example, ASA/ANSI S12.9-2021/Part 4 notes the following for Tone.
  - *Annex C (informative) Sounds with tonal content. The test for the presence of a prominent discrete-frequency spectral component (Tone) typically compares the time-average sound pressure level in some one-third-octave band with the time-average sound pressure levels in the adjacent two one-third-octave bands. For a prominent discrete tone to be identified as present, the time-average sound pressure level in the one-third-octave band of interest is required to exceed the time-average sound pressure level for the two adjacent one-third-octave band by some constant level difference. The constant level difference may vary with frequency. Possible choices for the level differences are: 15 dB in low-frequency one-third-octave bands (25-125 Hz), 8 dB in middle-frequency bands (160-400 Hz), and 5 dB in high-frequency bands (500-10,000 Hz). NOTE 1 The above guidance is from Annex C of Part 3 of ANSI S12.9. Part 3 of ANSI S12.9 also contains guidance on the measurement of one-third-octave-band sound pressure levels. NOTE 2 ANSI S1.13 Annex A presents more accurate methods for determining the presence of prominent discrete tones using narrow-band analysis. NOTE 3 For each one-third octave band, if peak(s) to the spectrum of the signal in question are at or near to an edge (upper or lower) of the on-third-octave bank under test, then the test becomes inaccurate and can fail.*

**Is it accurate that the "corrections" that will apply to reduce the permissible decibel level at each frequency will be: 1) Adjacency of the residential properties mentioned above (-5 dB); 2) Operations between 10 pm and 7 am (-5 dB); and 3) Tone (-5 dB).**

6984-69-2419-000  
 Noise Zoning Determination  
 12/16/2022

- The following correction factors apply to the proposed development unless the Applicant provides further information proving the noise created by the establishment does not fall under the Tone category:
  - *On a site contiguous to or across a street from the boundary of any R-district established by this chapter. (Minus 5)*
  - *Operation between the hours of 10:00 p.m. and 7:00 a.m. (Minus 5)*
  - *Tone (e.g., hum or screech) (Minus 5)*

**At what height must relevant sound measurements be taken?**

- The Zoning Ordinance does not state at what height the sounds are to be measured, but it does state they are to be taken at the lot line. Lot lines delineate property ownership and are defined in the Zoning Ordinance as follows:
  - *Lot Line: A property boundary line of any lot held in single and separate ownership from adjacent property, except that, in the case of any lot abutting a street, the lot line or such portion of the lot as abuts the street shall be deemed to be the same as the street line, and shall not be the center line of the street, or any other line within the street line even though such may be the property boundary line.*
- However, as noted above, the Zoning Ordinance states that measurements are to be taken per ANSI standards. These standards provide different recommendations, including height measurements, based on numerous factors such as type of noise and environment. Any noise analysis would need to meet ANSI standards, including the height recommended for sound measurements. Noise analysis studies submitted to the Town would be reviewed to confirm that the study meets ANSI standards. For example, ANSI S12.9-2021/Part 4 says the following:
  - *Sound measurement locations All sounds, except high-energy impulsive sounds, shall be measured or predicted as if they had been measured by a microphone outdoors, over acoustically absorptive ground (grass), at a height of approximately 1.2 m and with no nearby reflecting surfaces within 1 wavelength of the lowest frequency of interest except the ground. Alternative microphone locations may be used, but their acoustical characteristics shall be specified. An example of an alternative location is outside an open, upper-story window in a high-rise apartment building where the purpose is to predict or assess the environmental sound at that location. High-energy impulsive sounds shall be measured or predicted as if they had been measured by a microphone within 50 mm of a hard reflecting surface (e.g., a building wall, roof, or ground plane, as appropriate). NOTE 1 A reflecting surface is required because sonic booms, which are one form of high-energy impulsive sounds, have traditionally been measured or predicted for a location on a reflecting ground plane or structure. NOTE 2 To ensure comparable data, sonic booms should be measured on a reflecting ground plane or other equivalent structure.*

**Is the Applicant permitted to take a +5dB correction for the fact that its generators are operated less than 20% in any one-hour period, given that they are only turned on briefly for testing once every two weeks? The noise associated with the generators was included in Polysonics' noise modeling, which inclusion is the criterion for thereafter applying that correction.**

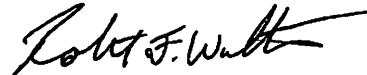

- An additional correction factor may be applied for the generator noise, provided they meet the requirements for the correction factor. The +5dB correction factor for operations less

6984-69-2419-000  
Noise Zoning Determination  
12/16/2022

than 20% in 1 hour would not apply to the noise generated by the chillers as they operate continually. As such, a separate analysis may be required for the Data Center that does not include the generators to confirm that the performance standards will be met at all times.

This Zoning Determination Letter only applies to the subject property noted above. This is a formal decision by the Zoning Administrator of the Town of Warrenton, Virginia. Any person aggrieved by any decision of the Zoning Administrator may appeal to the Board of Zoning Appeals. Appeals shall be made within thirty (30) days of the date of this letter by filing with the Zoning Administrator a notice of such appeal specifying the grounds thereof. The decision shall be final and unappealable if not appealed within thirty (30) days. The fees for filing an appeal are \$400.00 plus the cost of advertising and property notice mailings. Classified advertising is placed in the local paper for two consecutive weeks before the meeting, with costs averaging around \$700.00. The price for property notices varies and depends on the number of adjacent owners. The adjacent property notices are sent via certified letter with a return receipt at the current postage rate. The Zoning Office is located at 21 Main Street within Town Hall. Hours of operation are from 8:30 AM until 4:30 PM, Monday through Friday. If you have any questions regarding this notice or additional information about the appeal process, please get in touch with me at (540) 347-2405.

Sincerely,

Rob Walton  
Zoning Administrator  
Director of Community Development

### PETITION TO PROTECT FAUQUIER COUNTY AND THE TOWN OF WARRENTON

The Town of Warrenton and Fauquier County residents, property, and business owners signing below:

**OPPOSE** Amazon’s Blackwell Road Data Center and application, and any future data centers at Warrenton's Gateways, and **RESPECTFULLY REQUEST** the Warrenton Town Council to **DENY** Amazon’s application; and

**OPPOSE** Dominion Energy’s Blackwell Road substation, and **RESPECTFULLY REQUEST** the Warrenton Town Council to **DENY** Dominion’s future application for a substation; and

**OPPOSE** Dominion Energy’s new power lines to Dominion/Amazon’s Warrenton site, and only if approved, support participation in Virginia’s pilot underground transmission program to bury all transmission lines.

Committee, Board, or Commission Type	Town Council
Agenda Item	Amazon application
Comment	I am writing as a 25 year resident of Warrenton and the owner of three properties therein with regards to the ongoing issue of allowing Amazon's application for a SUP to construct a data center off Blackwell Road. While I would like to speak to the council directly in a public meeting I am constrained for health reasons to do so. It is manifestly sensible for Amazon to be required to fully address deficiencies in their submission. It seems obvious to me that given the long term consequences of approval of a permanent structure and supporting utilities are so significant and so opposed by so many community members that the Town Council should permanently deny it. If Amazon prevails this time, it is likely that additional data centers will be coming with need for additional electric energy

and the attendant degradation of life in our community.. The experiences in other adjacent counties where data centers have been built have been universally negative but once they are in place, they are permanent. Those of you on the council who may be inclined to support Amazon's bid for a data center are surely aware of the vast numbers of ordinary citizens who have raised their voices against it by speaking at open meetings and signing petitions against it. It is remarkable that there has been only one citizen who has spoken for it is a person who stands to make many millions of dollars if he succeeds by selling his property to more data centers in the community. EVERYONE else has spoken against it in strong, powerful terms.

The noise impacts to the nearby neighborhoods 24/7, 365 days a year will catastrophically impact the health and well being of those affected and substantially reduce their property values. Citizens of this Town and County are concerned and angry about the closed-door process that keeps them in the dark. It has been a process that gives Amazon special treatment and locks out citizens. Even worse, the Town continues to allow Amazon to lead this process. We already know that Amazon co-wrote the zoning amendment and are forcing a vote on their Special Use Permit. We now suspect Amazon is guiding Town staff how to gut the noise ordinance in order to help Amazon comply. The former Town Manager's move to work for Amazon in a Senior position just 2 weeks after resigning from the Town fuels the anger and distrust and further illustrates the councils' flagrant disregard for the legitimate concerns of so many of our citizens.

Should Amazon prevail in their quest for this data center in Warrenton, a result which will permanently change the character of our community, be assured that your lack of respect for the citizens you represent to favor one individual who will benefit handsomely financially will likely be memorialized by plaques with your names as those responsible for the deterioration of our once people friendly community to an ugly, unhealthy and unnecessary monument to the power of the undue influence of money. Amazon has the means to locate their data centers elsewhere without any hardship whatsoever, but sadly our citizens are not so fortunate. You at least owe so many citizens so opposed to this action, an explanation of your rationale supporting in your vote in favor of Amazon as in the best interests of the community at large.

Richard Polizzotto

Comment	Please do not rush to make a decision on the Amazon Data Center. Have all the information including a complete application. I understand that these Data Centers are very loud and use a great deal of energy. That does not sound like a good addition to Warrenton nor does it sound like a good option for Fauquier County.

Comment	Ladies and Gentlemen, As a resident of Warrenton, I urge you to deny Amazon's Data Center. I live across from that proposed center (behind Harris Teeter), and the noise factor will be a game changer for me, particularly in terms of real estate value! PLEASE honor the wishes of nearly everyone in Fauquier County by rejecting Amazon's proposal. Heather Sutphin, you are my representative, and I count on you to deny the data center. Additionally, the people who have settled here in Warrenton came because of the rural quality of our beautiful town. Please honor your commitment to keep the beauty of our area. I grew up here in Warrenton (from 1946 to 1966) and I retired here in 2019. Our values, including respect for others, must be

maintained. This respect includes honoring the wishes of your constituents!

Thank you all for the hard work that you do. Sincerely yours,  
Lucy Reed Morison

Comment	<p>Ladies and Gentlemen,</p> <p>I just submitted a note advocating the denial of Amazon's data center. I sent it to the town council. I hope this means that you will get a copy of my submission.</p> <p>I just want to add one more note: my father, Washington Reed, served this town and county as an architect until his untimely death in 1966. My mother did the same as a member on the Board of the Library, as a "gray lady" at Fauquier Hospital, and as a volunteer in several other ways: school, church, Thrift Shop, etc.</p> <p>They two would hope to keep the rural character of Warrenton and Fauquier County.</p>

Thank you for your consideration,  
Lucy Reed Morison

Agenda Item	Comments on Amazon data center
Comment	I am once again writing since due to health reasons I cannot attend to speak to all of you in person. I am once again pleading with you to DISAPPROVE the Amazon request to construct and operate a data center in Warrenton. As you are all aware, thousands of citizens oppose such actions while only TWO support it which should be reason enough to vote to disapprove it. It is abundantly clear that those inclined to approve it have been influenced to do so by factors which at this point can only be attributable to fear or personal gain in some way, and ask you to soberly reflect on your first responsibility to your fellow citizens is to act in the best interests of the community at large. If you do not, the result will be a permanent monument to your malfeasance to protect the

citizens of Warrenton from not only an eyesore but the degradation of the health and peace of so many. Over time, the reasons for your vote to support will come to light and be unfortunatly the legacy of your service to the community.

**Subject:** Amazon SUP: Hold Your Ground Amazon SUP is incomplete, insufficient, and untrustworthy  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Planning Commission and each of you individually:  
 I am writing as a concerned citizen to applaud your unanimous decision on 11/22/23 to send the Amazon SUP application back to Amazon and suspend further action until all required information is provided to you.,

Hold your ground. That was and is the right action. The Town Attorney, Town Manager, and majority of the Town Council are trying to bully you into voting, against your own consciences, so that they can advance the SUP prematurely to the Town Council for a vote on January 10.

From the very beginning, Amazon's initial application has all the hallmarks of Amazon's expectation that approval was a slam dunk, that they had assurances their application would be approved without normal requirements, that Amazon did not have to comply with all the SUP requirements that are necessary for any other applicant.

The original Amazon application was NOT COMPLETE. **The Application did not have a noise study, nor a water, sewer, stormwater impact analysis studies or lighting plan and Staff was unable to provide an analysis on all of those due to the omissions in the file even as of 11/15/22 in their Staff Report and Analysis.**

The fact that Town staff certified the application as complete does not make it so, when the evidence of incompleteness is overwhelming. In good conscience, you should not acquiesce in this falsehood.

Even a month after the staff accepted Amazon's application on May 6, Denise Harris identified a list of items that are missing from the SUP criteria - many of which still are.

You are well aware of the missing items and the inadequate, unreliable, and insufficient information. It is a long list, including the lack of a noise study, an unreliable and unacceptable balloon test, missing information on elevations, tree information that has

not been updated for the deleted substation, missing land use documents, and nothing on what happens to the data center when Amazon ceases operation. Most important of all, the only noise study ever submitted was quickly acknowledged by Amazon to have been a mistake, which should not have been submitted, after the study was shredded by Dr. John Lyver for invalid physics, incorrect use of tables, irrelevant information from Gainesville, and myriad other failings.

Citizens in this town and county are watching closely. We have done our homework and watched closely what happened in 2021 and what is happening today. There is anger and outrage about the abuse of process, the Town's closed door meetings with Amazon, the preferential treatment of Amazon, FOIA redactions that withhold information from public view, the prospect that the Town's noise ordinance will be ignored and violated, and the precedent that all of this sets of the future.

It is unconscionable. Do not condone it. On behalf of good government and the citizens who are watching closely, stand your ground and do the right thing: Do not vote up or down on the Amazon SUP. Insist that Amazon submit the required and necessary information, so that you can give it the careful review it warrants.

This is almost certainly the most important Planning decision ever to be made in the Town of Warrenton. It will have consequences and precedents that will reverberate forever. Do the right thing.

**Subject:** Amazon Data Center Application before the Planning Commission

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Planning Commission Members:

I am a resident of Fauquier County and I moved here from the "data center" capital of Virginia -- Loudoun County. I used to live in Ashburn and saw first-hand the detrimental effects of data centers built in that area.

The noise and unsightliness of these buildings are unacceptable. The issue of allowing Dominion Power to build above-ground power lines to this location is unacceptable as well. This will destroy the property values of those homes in the path of construction of these lines.

I am a member of the Piedmont Environmental Council and Project Fauquier and I support the active stance they are taking against this project in our County.

The Town Council is railroading a bad, incomplete, untrustworthy, and damaging Amazon project through an invalid process. There is overwhelming citizen opposition to this invalid process and this damaging project.

We ask the PC to hold its ground, to stand firm on the necessity of complete information, particularly a valid noise study. Every indication is that Amazon's data center will not meet the Town Noise Ordinance. And there is other missing information: lack of two required land use documents, lack of a meaningful "balloon test," lack of updated information on tree removal, and lack of updated information on elevations, among other things.

Members of the Planning Commission, please do not be railroaded into a vote before Amazon has submitted sufficient, adequate, trustworthy, and complete information. Stand your ground. We citizens are counting on you.

Thank you for the opportunity to submit my opinion.

Becky Benoit

Dear Planning Commission,

At your public hearing continuation meeting to be held on Tuesday 20 December, please consider the will of our town and county citizens and vote accordingly.

- The Town Council is railroading a bad, incomplete, untrustworthy, and damaging Amazon project through an invalid process. There is overwhelming citizen opposition to this invalid process and this damaging project.
  
- We ask the PC to hold its ground, to stand firm on the necessity of complete information, particularly a valid noise study. Every indication is that Amazon's data center will not meet the Town Noise Ordinance. And there is other missing information: lack of two required land use documents, lack of a meaningful "balloon test," lack of updated information on tree removal, and lack of updated information on elevations, among other things.
  
- Members of the Planning Commission, please do not be railroaded into a vote before Amazon has submitted sufficient, adequate, trustworthy, and complete information. Stand your ground. We citizens are counting on you.

Thank you.

I am unable to attend the December. 20th meeting, but I wanted to comment that I moved to Warrenton as a refuge from my work in the greater DC area. The drive home to this rural paradise far outweighs the commute and I'm devastated that allowing a data center to be placed in Warrenton is being considered. Our town is worth more than tax revenue. You are being asked to sell out the most valuable feature our town possesses...the rural, home-town feel. The whole reason we chose to live here is for that feeling. Please do not alienate the citizens who call Warrenton our home. There is overwhelming citizen consensus that the data center is not something we want.

Sincerely,  
Scott Ness

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Our Town Council is forcing a bad, incomplete, untrustworthy, and damaging Amazon data center project upon Warrenton residents through a process riddled with ethical improprieties. You have heard an overwhelming outcry of citizen opposition to this highly questionable process and this damaging project. Yet our elected officials seem to be indifferent to the profound objections of the very constituents who voted them into office. This callous indifference to the expressed opposition of constituencies represents nothing less than a complete abnegation of the compact critical to the functioning of representative governance.

You, the members of the Warrenton Planning Commission must resolutely refuse to give ground on the necessity of complete, verifiable and technically accurate information on all aspects of this project, and, in particular, as such information pertains to health-related issues associated with noise pollution, a well documented hazard associated with data centers. At present, there is every indication, including expert technical review and testimony previously provided to you, that the proposed Amazon data center will not meet the Town Noise Ordinance. Furthermore, there is a disqualifying absence of other critical documentation involving this proposed project that must be accessible for public review, including: the lack of two required land use documents; the failure to conduct a realistically valid test of line-of-sight visibility between the proposed facility and surrounding areas (i.e., a farcical and comically meaningless "balloon test"); the lack of updated information on tree removal; and, lack of updated information on elevations.

The Planning Commission is obliged to provide guidance on development in our community that will first and foremost do no harm. Please honor this obligation which is the core of your mission as part of our Town government. Do not succumb to political pressure to approve this project without sufficient, technically competent, and independently verifiable information.

We, your fellow residents of Warrenton, are counting on you.

Respectfully,  
Calvin W. Hickey

Dear Members of the Planning Commission,

I will be unable to attend the Dec. 20th hearing on the subject of the Amazon SUP, but wanted to make my opposition to the SUP clear on the record.

I commend the Planning Commission for suspending action on the SUP while waiting for a complete application that meets the minimum requirements for consideration. I urge you to continue to demand that the applicant provide the information you require to provide a well informed recommendation to the Town Council. To date the lack of a credible noise study alone is sufficient reason to delay further consideration of the proposal. There are other issues that also require further study and explanation.

This SUP will serve as such a significant precedent for the Town that I believe it is your responsibility to fully consider all aspects of the project prior to making a recommendation. Please, take your time, do not be bullied into thinking you must comply with some artificial deadline presented by the Town Council.

Respectfully Submitted,  
Douglas Larson

Member of the Planning Commission:

I will not be able to make the December 20th meeting but would like to express my opinion on this proposed project.

The citizens of Warrenton Va have been drawn to this town for many reasons but mostly for its small town feel. A good place to raise children with a country atmosphere. This data center does not fit this feeling. It is intrusive and does not fit the vision for this community. It will be an albatross at the entrance to town.

Aside from the obvious misfit in its location, it does not comply with the noise ordinance of the town. Your positions on the commission is to ensure the ordinance are enforced for the benefit of the whole community not to arbitrarily ignore them for what you feel maybe some financial gain for the township government. It has been clear that the majority of the residence of Warrenton are against the placement of the Amazon data center.

I respectfully request that you vote to turn down Amazon data center project application until they find a more suitable site.

Thank you

[REDACTED]

**Subject: Time Sensitive: Amazon Update -- and Request for You to Attend 12/20 Public Hearing**

To members and friends of Protect Fauquier

On Tuesday 12/13, the Town Council voted 4-3 to direct staff to issue notice of a Town Council Amazon public hearing on 1/10/23. (Unless Amazon requests a deferral, which is unlikely.)

Voting for this motion were Council members Sutphin, Heroux, Hamby, and Hartman. The Mayor does not vote, but clearly supports this move. We are grateful to Council members Bill Semple, Renard Carlos, and Sean Polster for voting against the motion.

Looking ahead, the Protect Fauquier Leadership Team expects the same 4 Council members to vote for the Amazon SUP on 1/10/23, immediately after the public hearing concludes. That will be a majority vote approving the SUP.

If the SUP is approved, Amazon not only gets the green light to build the Data Center, but is explicitly allowed to build and operate without meeting the Town's noise ordinance — something we doubt that any other applicant has ever been allowed. Amazon and Town staff propose conditions in the SUP that would require Amazon to "diligently pursue" noise compliance — but without ever setting a date for compliance. Moreover, Amazon has asked Town staff for "clarifications" about noise which could lead to gutting the noise ordinance, with absolutely no public notice or input.

You have a chance next week to speak against this travesty. On Tuesday 12/20, at 7 pm, the Planning Commission will hold a continuation of its public hearing, as demanded by the Town Council. Once again, we ask you to attend in numbers, wear red, and speak in opposition to the process.

**\*\*\* IMPORTANT: Please ask the PC to hold their ground and ABSTAIN from voting on Dec 20. Commissioners reasonably asked on Nov. 22 for more information in order to make an informed recommendation. If, on Dec. 20, they simply vote "No" for a recommendation, the Town Council will succeed in forcing a premature vote from the Commission, to set up their own hearing to approve the Amazon SUP on Jan. 10.\*\*\***

As it stands now, those of us who spoke at the 11/15 PC hearing are not allowed to speak again to the PC on 12/20. That means **those of you who did not speak on 11/15 are absolutely critical. We need your voices on 12/20, to speak for all of us, and send this message:**

*The Town Council is railroading a bad, incomplete, untrustworthy, and damaging Amazon project through an invalid process. There is overwhelming citizen opposition to this invalid process and this damaging project.*

*We ask the PC to hold its ground, to stand firm on the necessity of complete information, particularly a valid noise study. Every indication is that Amazon's data center will not meet the Town Noise Ordinance. And there is other missing information: lack of two required land use documents, lack of a meaningful "balloon test," lack of updated information on tree removal, and lack of updated information on elevations, among other things.*

*Members of the Planning Commission, please do not be railroaded into a vote before Amazon has submitted sufficient, adequate, trustworthy, and complete information. Stand your ground. We citizens are counting on you.*

For those of you who have already spoken, and those who will not be able to attend the 12/20 hearing, please email this same message to the Planning Commission now, before the hearing, at [citizencomment@warrentonva.gov](mailto:citizencomment@warrentonva.gov). Your voice is powerful, and makes our collective voice even more powerful.

Please also mark your calendar to attend and speak out at the Town Council Public Hearing January 10.

If you have any questions or suggestions, feel free to contact any member of the PF Leadership Team.

Have a wonderful holiday season, and take pride in standing up for what is right.

PF Leadership Team

**Subject:** Please DO NOT vote on Amazon tonight!

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Commissioners,

I was so incredibly encouraged by your integrity last month in the unanimous vote to postpone a decision regarding Amazon until they have completed all aspects of their application thoroughly. I implore you to stand your ground this evening and WAIT to vote until Amazon has given us all the information needed to make an informed decision for the people of Warrenton. It would be an egregious dereliction of duty for either the Planning Commission or the Town Council to vote on this matter without understanding the full impact that it could have on our town for decades to come.

If a vote were to take place without a completed application, the precedent that would set going forward, and the appearance of shady backroom deals that it would project to everyone, would be devastating for our community.

Please do the right thing.

Thank you,  
Bébhinn Rowland

I believe that the Amazon facility is a poor choice for Warrenton and Fauquier as a whole. This facility will change the landscape of Fauquier and will open the door for similar facilities. It is important to keep Fauquier green for future generations. Susan Hayes

**Subject:** Our local Economic Development

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

We all want to see Warrenton and Fauquier County grow intelligently. Pay our teachers more, invest in new businesses and provide for our citizens. No one can argue against this.

We now are dealing with the big question of the data center industry that requires very large amounts of electricity to operate. The electric power requires very big transmission line towers and lines to supply the data centers. And the data centers create noise levels that can damage our way of life. We know this from the experiences of our neighbors in Loudoun and Prince William counties. The VA State Corporation Commission makes all the final decisions.

The statements to change the power line routes and sub-station location from Dominion Energy and Amazon have been in response to local citizen pressure for the single data center at Blackwell Road. But we all know now that this is about not one, but many data centers in Warrenton and Fauquier county. If the Blackwell Road/Amazon data center is approved, **then the doors swing wide open for many other data centers** and the transmission lines/towers and sub-stations that will be needed to support their electric power requirements. These many additional data centers will generate 24x7x365 noise levels that Warrenton and Fauquier County have never experienced.

The quiet country town (and county), look and feel will be destroyed forever. We cannot allow this to happen. You have the ability to stop it now.

Please do your job and support your citizens and the intelligent growth we all desire.

Ken and Corinne Thomas  
Warrenton

**Subject:** meeting tonight on Amazon data center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Mr. Hartman,  
Please do your duty tonight and reject the proposed data center. We elected you to protect our town from this kind of abuse.

The plan set in place and approved by us does not allow this kind of use. It is to be mixed use, not a data center building with power lines, noise, and overwhelming structures invading the gateway to our town. The precedent set by this monster will see more and more of these data centers encroaching on the peaceful, rural surroundings of our entire county.

We do not want this. Our children need us to protect their future homes by denying this now before it is too late.

Please listen to your community's wishes and deny Amazon.

Susann Eastridge

To the Planning Commission:

I, respectfully, request that you require Amazon to provide a complete application, including but not limited to, a valid noise study. Please stand firm and abstain from voting until Amazon provides the previously requested information.

I am a resident of North Rock and will be directly affected by noise and the unsightly view if this Data Center is approved.

**Subject:** Opposition to Amazon data center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

This message is in strong opposition to the Amazon data center SUP that is being unnecessarily pushed forward for vote on January 10.

I am surprised at how 4 people can have so much power over a decision that is so clearly opposed by the majority of the residents of Warrenton. You were voted into a position that requires you to hold up the views and desires of your constituents and by voting for the SUP you are clearly going against those who have voted you into office and thus ignoring the true purpose of democracy to be a voice for your community. One has to question the motives of those putting forth this rushed vote and why you are able to do so. It is truly unfortunate that the "dirty politics" that has plagued our nation have now seeped into our own hometown. There is no benefit to the town or any of its residents to have this data center built. The number of "jobs" created is laughable and will have no positive impact on our local economy. Conversely, the negative impact to our small town greatly outweighs any benefit.

I ask that the PC stand firm on the necessity of complete information-particularly on a valid noise study. What makes Amazon "special"-other than the exorbitant wealth it has at its disposal to control the many facets of our world- to not require a sound noise study? Something that would be required of any other entity applying for the same permit.

Members of the Planning Commission, please do not be pushed into a premature vote without trustworthy and complete information. The citizens of Warrenton and Fauquier are counting on you to keep Warrenton small and vibrant and keep Fauquier beautiful.

Sincerely,  
Kathleen and Gregory Rizzo

**Subject:** comment for Planning Commission hearing of Dec 20 (tonight)

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Planning Commissioners,

I intended to speak on November 22, but was unable, when public comment was postponed. I am out of town for the holidays today, and am unable to speak in person, so am providing this written comment for tonight's public hearing. I live in the Scott District of the county.

Increasingly, Americans have a crisis of trust in institutions. Who can earn our trust? Who can keep our trust? Who are the honest brokers who care about their constituents and neighbors, advocating for the most discernible common good over powerful special interests?

I fear that Warrenton's and Fauquier's local governments are showing their cards as advocates for the big and powerful over the clear interests and desires of their constituents.

**I ask you to show courage in abstaining from a premature vote today.** In November, you reasonably postponed a hearing based on an incomplete application from Amazon that does not demonstrate goodwill or good intent to meet the town's basic requirements. **Your job is to assure due diligence.** By any measure, due diligence has not been met. Money and power, coercion and (arguably) bribery have poisoned the well of our local officials. **Fight back. You have a role, and your day to exercise that role courageously is here.**

The public response on November 22 showed you where the sentiment lies within our town. We want honest people, honest processes, and representation of our people's interests. You saw it and heard it; **don't forget the people of this town.**

My primary concern today is one of PRECEDENT. Any steps you and the Town Council take are PRECEDENT for the next of inevitably MANY data center applications. If you allow Amazon to dictate that this town lower the bar on environmental measures—namely noise, sightlines, and elevations—not to mention the obvious eyesore factor, every other application will rightly see this town's government as a pushover. Soon, Fauquier will be provided a rubber-stamp for approval of all data center applications over citizen concerns, in the infamous line of Loudoun and Prince William Counties.

- **This data center is intrusive and unfitting.**
- **This data center would be the first of many.**

Meditate on those two statements, and determine whether you can refute them.

I love living in a small town. I love knowing my neighbors, and trusting that we are looking out for each other. Some in our local government have failed to be honest brokers to the citizens of our community, and they will rightly face whatever consequences that breach of trust entails... to their relationships, to their political tenures, and to their own sense of morality. They will live with their decisions when they pass us on the sidewalk, when they examine their own consciences, and when they lay down to rest at night, possibly with an inescapable hum in their ears.

A few questions for those of any political persuasion:

- Is this the town we want, where the **public doesn't trust its officials**, doesn't believe its voice is heard, where you permit a man worth \$159 Billion, 2700 miles west of here to dictate priorities to our community?
- **Why should we (the people) trust** that any supposed tax revenues from a data center will offset the sales, meal, and property taxes we already pay?
- How are you showing your commitment to your neighbors by prioritizing tax incentives for a corporate behemoth over **incentives that could be offered current or would-be small business owners**, those who want to make this town a more inviting place to live?
- How are you showing your **commitment to our neighbors' health and sanity** in adding a major unregulated noise source next to a residential area of town?
- How are you showing your **commitment to our ecological environment** in incentivizing more massive power lines through our countryside, farmlands, and wetlands, and planting a massive electrical and water consumer right in town, all for one in-town customer?
- How does a **commitment to social justice** and housing for all square with forcing people to move out of their homes and incur an unrecoverable loss because of the unnatural presence of this monstrosity?
- How does a **commitment to living naturally in accordance with the earth we've inherited** ring true when we replace a cornfield and line of trees with a 4-5-story concrete monolith that produces nothing for us but heat and water waste?
- What of Fauquier's **commitment to agriculture**, given the inevitable cascading effects from this one decision?
- How are you adhering **to the principles of logic, order, and process...** and **the principle of trusting in the wise judgment of John and Jill Doe** to have input into a major community decision... when you undermine process by changing our town's already-approved planning document to do the bidding of the \$159 Billion Man?

**We don't need data centers here.**

**We don't benefit from data centers here.**

**We the citizens of this lovely town and county... do not WANT data centers here.**

There are better ways to address budget concerns and to continue to grow intelligently. There are rules to be followed in town planning, so as to not override the interest of the common man.

Do the right thing. Be a leader. Be the one we're counting on. **Restore our trust** by listening to your neighbors.

Respectfully,

Jonathan Snow

Council,

Please find an email chain from David Dobson regarding the issue of data centers, generally. Mr. Dobson owns the industrial land in my ward advertised for a reported 700,000 sq. ft. data center located across two residential communities (the residents of Old Meetze Road, Monroe Estates and Madisontown).

A portion of Mr. Dobson's property is also designated as one of two locations by Dominion Energy as a possible location for 300MV substation.

Like other emails we have received, I believe this should be construed as a citizen's comment and included in the record.

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

**Hi Bill - Yes, please be free to circulate this and my previous email to the rest of Town Council.** I sent it to you when I saw your points in the newspaper and will help if I can with any follow-up questions.

Just wanted to add some points and say I can only speak for my two Industrial tracts, not for AWS obviously, but I am focused on solving problems and achieving the best interests of the Town and neighbors on this, so this is just my 2 cents on things. But I have been fielding many calls and email requests for Industrial property in the Town, so here is what companies have regularly asked me for doing By-Right I Industrial permitted uses here. **This is why I sincerely believe that a well-conditioned data center SUP instead is in Town and neighbor best interests, and that any potential problems can be solved.** In short, looking at the alternatives, a carefully conditioned data Center SUP gives the Town and neighbors a much better solution. The Town and neighbors control everything better. So here is what I am asked by potential Industrial land buyers. First and foremost, many want to do large e-commerce distribution/logistics centers for fulfillment and distribution using US 29, 15, 17, 211 with nearby I-66, US 3 and 28, similar to the large distribution centers done by Amazon in the northern Baltimore area, southern Richmond area and on Centreport Parkway in Stafford, with generally 1,200,000+ SF of By-Right industrial distribution space, much like you see now being built in Gainesville and Haymarket these days, especially on US 55, I-66 and

US 29. Unfortunately, though, these come with several hundred employees, 24/7 operations, large brightly lit impervious parking lots, busy around the clock incoming and outgoing large tractor trailer trucks in the hundreds, plus constant employee cars coming and going too, for very heavy additional Town and neighborhood traffic, noise, loud and shaking truck rumblings and grid lock night and day. **And they do not pay large taxes to the Town or County or bring local school and community college educational support.** The northern Baltimore area, the southern Richmond area and Stafford Centreport Parkway recently have these, and I have streamed newspaper articles below on them as they show the standard big buildings and operations. These would be By-Right Permitted Uses for over 1,200,000 SF -1,300,000 SF of buildings here, with only 50' setbacks/buffers as permitted By-Right. And all with 35' building heights with roof-mounted HVAC systems, elevator areas and rooftop infrastructure as all permitted under Town Ordinances in addition to the 35' Height. This is really happening throughout America, and just 2 weeks ago I closed the sale of a new very large 3,000,000 SF (Yes, 3 Million SF) site of mine outside Atlanta to the Hillwood Company of Dallas, the company founded by Ross Perot, and now a major preferred developer for large Amazon logistics centers nationwide. I am seeing this everywhere. Why not avoid it here?

Another series of callers involve the placing of regional gun ranges and military and public safety training facilities here, like Crucible and GT Tactical are proposing in Spotsylvania, but they are asking for rezonings there, while here they realize that Industrial tracts in the Town of Warrenton have By-Right uses, especially if enclosed. And I have been contacted repeatedly by large commercial-retail groups wanting to use the 15% By-Right commercial rights which permit very roughly 250,000 SF By-Right commercial-retail use here, larger than AWS 220,000 sf data center, for yet another busy commercial-retail center or unattractive big boxes - larger than AWS - with 24/7 traffic, large heavily lit parking lots and multiple tractor-trailer bays, like Walmart, Home Depot or Giant Supermarket, only much larger like a new large Publix Food & Pharmacy shopping center. The first Publix in Northern VA abuts my Mixed-Use development in Fredericksburg, and I know the Publix team well and know that they definitely want to expand. Then there is the ask for a critically needed slaughterhouse for the east coast, especially Virginia and Maryland, as suggested recently here even for Marshall, and based on the large new slaughterhouse and meat packing plant going into North Platte, NE with the support, equity investment and pre-purchasing of all output by Walmart to solve some of their needs out west, but they are also searching for a solution in this general area for their east coast needs. And the Governors of both VA and MD are supporting this for cattle, sheep, chicken and hog producers needing slaughter and packaging facilities in both states, for obtaining better prices for producers and better meat prices for consumers here too. Costco does the same with its own wholly-owned chicken raising and processing facilities. The Costco executives have had me tour their meat packing operations near their Issaquah, WA headquarters with their senior people and potential partners. It was important enough to them at the time that both the Costco CEO and the Costco Chairman of the Board toured me through things with everyone. Both Walmart and Costco are very serious about controlling meat costs, and in my past work with them, both have been very professional and straightforward.

A concern is also for Amazon to think of doing the same here for Whole Foods and Amazon Fresh Groceries, even if in a JV with Walmart or Costco. I do not know what they all are thinking, but am concerned as this could be a key staging area for similar large operations.

I have resisted all these ideas for my two Industrial sites. **I have always said no to all these By-Right I Industrial proposals. I have always said no - because a carefully conditioned data center SUP seemed much better fiscally for the Town and for being able to condition things carefully in the best interests of the Town and neighbors, especially with the much smaller AWS building compared to these other very large wide-ranging 24/7 By-Right uses. These other By-Right uses would almost certainly be much larger and have more impact on the Town, but without the desired Town and community benefits or condition controls. Fortunately, the negatives can be avoided. The negatives can be avoided. I sincerely believe that Warrenton and its residents can do better with a carefully conditioned data center SUP. It just seems that the best interests of the Town and neighbors are served best by a carefully conditioned SUP on AWS.**

**And I definitely understand neighborhood questions on possible outdoor sound, vibrations and humming. I certainly understand. It's a very fair point as no one wants a bad situation. So just solve and avoid it, using good technology and design.** That's why I have looked carefully at this and believe it is taken care of with binding SUP Conditions and most importantly with straightforward good technology and design just like was done in Warrenton at the Fauquier Hospital's very large chilling, cooling and heating plant - which has negligible outdoor sounds, and is near many hundreds of homes, offices, and many patients and employees in the Hospital itself - all with no complaints. No complaints or problems despite its very large size. The same is true for the large OVH Data Center in Vint Hill which has no outdoor noise, vibrations or humming, and it's next to hundreds of homes, outdoor restaurants and shops and businesses with numerous outdoor guests, with no complaints from homes, businesses or outdoor patrons. No complaints. OVH Data Center shows that technology solves outdoor concerns. Two good local examples - OVH at Vint Hill is a large data center in Fauquier, with no outdoor noise, vibrations or bad humming - none, and the large OVH Data Center is easily verifiable too, just like Fauquier Hospital's large chiller plant.

The same is shown at the large Terremark-Equinix Data Center in Culpeper, directly on US 29 at the gateway into Culpeper. I was by the Terremark-Equinix Data Center last week visiting the new Germanna Community College - Daniel Technology Center abutting it. Germanna Community College does classes there for cybersecurity, healthcare, skilled trades, transportation, and high-tech careers.

All their buildings and classrooms are right next to the large Terremark-Equinix Data Center built almost 20 years ago - 20 years ago. I walked and drove all around it, took a very long time to check, talked to their security personnel (they have a large public safety team with numerous private security employees most living locally) - and there is just no

outdoor noise, vibrations, or bad humming there. None noticed or detected, and the Terremark-Equinix Data Center is immediately next door directly on US 29 with architecture that is pleasant and blends in at the gateway to Culpeper, so very similar to the AWS situation in Warrenton. It is attractive and normal looking, and visible directly from US 29, while AWS in Warrenton would be setback much more, have much larger 100' setbacks and substantial trees and vegetation in comparison. And Terremark-Equinix is now 20 Years Old! Yes, 20 Years Old! with no noise, no vibrations and no bad humming using 20-year-old technology - and today's technology is dramatically better for even better control of noise, vibrations or bad humming using today's dramatically better technology. Terremark blends in quietly as you can verify and see in person. It is another local Data Center to visit to see the facts, and not hear noise - just like the OVH Data Center in Vint Hill and the Fauquier Hospital's large chilling, cooling, and heating plant on the Hospital campus next to so many homes, offices and hospital patients, and employees there. The facts of all 3 of these large facilities show that today's technology eliminates outdoor noise, vibrations, and bad humming. These are 3 large direct nearby examples showing this, that can be easily visited and verified to see this directly. And no home and business AC and Heating Compressor units constantly cycling in and out for cooling and heating homes at all hours on homes, stores and businesses, which bother neighbors too. No tractor trailer, pick-up truck or car idling, grinding gears and truck rumbings and noises an or vibrations, and no starting/stoping's, horns, lights, or braking. Good technology, designs and conditions have regularly solved concerns. The same technology and tight SUP Conditions will do the same on AWS in Warrenton, so the Town and neighbors get all the good fiscal and other benefits with carefully conditioned SUP on data center development and operations. Good technology and conditions do this.

**This is just my 2 Cents, but I thought these points could help get Town and neighbors problems solved and everyone's best interests served. Good extensive SUP Conditions have been achieved by the Planning Commission to now support a well-conditioned SUP on AWS that benefits the Town and protects the community. That carefully protect and serve Town and Neighbor interests. In short, this data center is not an old rumbling pick-up truck with bad muffler noise and sound to disturb the Town and neighbors at all hours, but instead - done with these good SUP conditions, it can be a quiet Tesla EV.**

Best regards, David

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hi Bill - Good to see your points in the recent Fauquier Times article as seen by a Town Council Member, and to see that the Planning Commission will gather follow-up at its December 20 Public Hearing. I recently received the attached public information from Dominion Energy publicly confirming that there will be **NO** Towers, saying it will use instead underground lines, as you see in the attached materials, coming from their current Warrenton substation. All as described in their mail out attached which I received last Friday. This public news probably was mailed out to many hundreds of landowners, so definitely public information and a formal public position now. **Major good change and great improvement from the original lattice towers, so no more towers. They are formally and publicly gone now.**

I saw in this week's article in the two remaining points, elevation and potential noise, vibrations and humming. I have been looking at both, and believe these are already shown to be taken care of with binding SUP Conditions and most importantly with straightforward technology just like was done in Warrenton at the Fauquier Hospital's very large chilling, cooling and heating plant - which has negligible outdoor sounds, and is near many hundreds of homes, offices, and many patients and employees in the Hospital itself - all with no complaints. No complaints or problems despite its very large size. The same is true for the large OVH Data Center in Vint Hill which has no outdoor noise, vibrations or humming, and is next to hundreds of homes, outdoor restaurants and shops and businesses with numerous outdoor guests, with no complaints from homes, businesses or outdoor patrons. No complaints. OVH Data Center shows that technology solves outdoor concerns. Two good local examples - OVH at Vint Hill is a large data center in Fauquier, with no outdoor noise, vibrations or humming - none, and the large OVH Data Center is easily verifiable too, just like Fauquier Hospital's large chiller plant.

The same is shown at the large Terremark-Equinix Data Center in Culpeper, directly on US 29 at the gateway into Culpeper. I was by the Terremark-Equinix Data Center last week visiting the new Germanna Community College - Daniel Technology Center abutting it. None noticed or detected, and the Terremark-Equinix Data Center is immediately next door directly on US 29 with architecture that is pleasant and blends in at the gateway to Culpeper, so similar to the AWS situation in Warrenton. It is attractive and normal looking, and visible directly from US 29, while AWS in Warrenton would be setback much more, have much larger 100' setbacks and substantial trees and vegetation in comparison. And Terremark-

Equinox is now 20 Years Old! Yes, 20 Years Old! with no noise, no vibrations and no bad humming using 20-year-old technology - and today's technology is dramatically better for no noise, vibrations or bad humming using today's dramatically better best technology. Yet Terremark blends in quietly as you can verify and see in person. It is another local Data Center to visit to see the facts, and not hear noise - just like the OVH Data Center in Vint Hill and the Fauquier Hospital's large chilling, cooling, and heating plant on the Hospital campus next to so many homes, offices and hospital patients, and employees there. The facts of all 3 of these large facilities show that today's technology eliminates outdoor noise, vibrations, and bad humming. These are 3 large direct nearby examples showing this, that can be easily visited and verified to see this directly. And no home AC and Heating Compressor units constantly cycling in and out for cooling and heating homes at all hours on homes, stores and businesses, something worse. No tractor trailer, pick-up truck or car idling, start/stop, horns, lights, or braking. Good technology and facts have regularly solved concerns. The same technology and the tight SUP Conditions will do the same for AWS in Warrenton, so you have all the good benefits and careful development and operations. **Good SUP Conditions have been achieved by the Planning Commission to now support an SUP that benefits the Town and protects the community. In short, this is not an old pick-up truck with bad muffler noise and sound to disturb the neighborhood, but done with these SUP conditions, it can be a quiet Tesla EV.**

On the elevation question, this is an I Industrial Zoned By-Right land. It's By-Right Industrial with over 1,300,000 SF (One Million Three Hundred Thousand+ SF) of very wide ranging Permitted Uses By-Right to 35' Height everywhere for some 40 large purposes directly permitted by Ordinances. That will be developed, and **6 (Six) Times larger and 35' high, with extensive impervious parking and internal roadways, smaller buffers and less trees and vegetation, so much larger and unattractive compared to the much, much smaller AWS 220,000 SF. Why put 6 Times larger SF just as high with small setbacks and no extra trees and vegetation and more buildings and worse, By-Right without Planning Commission input as all By-Right,** if done just for those By-Right Permitted Uses, as Amazon regularly does, like the recent suburban Baltimore and Richmond Amazon fulfillment-distribution centers, then Warrenton ends up with over 1,300,000 SF of unattractive industrial cement tilt-up buildings like you see everywhere now on US 29 & I-66 in Gainesville. **Let's please, please avoid a worse solution like that here** - please avoid it. No one wants to push Amazon towards a massive distribution center or the other many other By-Right Permitted Uses here that will be up to 1,300,000 SF By-Right for who knows what. Let's go for the better route of a carefully-conditioned SUP with AWS, rather than a huge distribution center here instead with pickup trucks, tractor trailers and cars idling and coming and going at all hours with start/stop, rumbling tractor trailer engines and exhaust fumes, constant idling for truck exhaust fumes, horns, lights or braking. That is not better than an attractive, much smaller 220,000 sf building with no substation and plenty of extra buffer, trees, and vegetation. AWS as proposed and as Conditions require is better than a 1,300,000+ SF of By-Right buildings with no Planning Commission input. **And AWS prevents another garish, busy and brightly lit** Sheetz gas station, used and new car lot with bright spotlights everywhere at all hours, and large Giant (or new incoming Publix)

Grocery store and huge impervious brightly lit parking lot for hundreds of cars coming and going non-stop onto Blackwell Road right here. The AWS parcel also has By-Rights for 15% Commercial Permitted Uses under its current Industrial Zoning, for over 200,000+ SF (Two Hundred Thousand+ SF) of busy commercial-retail buildings and parking lots which can be avoided. All can be avoided with a carefully conditioned AWS SUP here instead.

Facts and technology show the better way, and strongly support and give good reason to follow the science here with a carefully conditioned SUP. No idling heavy tractor trailer trucks dropping off or waiting for delivery items, fumes from their constant tailpipe exhaust, no bold lights, honking horns or constant coming and going of tractor trailer trucks and hundreds of employee cars. I remember one person's playing a sound track of an old data center humming at a Planning Commission hearing - an old one to say there was humming, but old soundtracks, like a heavy metal band soundtrack from the 70's, are like comparing an old pick-up truck with a bad muffler to today's EV cars. It is not a good or fair comparison, it was unfair to the Planning Commission, as it is NOT the same thing at all - as today's technology addresses concerns on sound, vibrations, and humming - it is all shown in modern OVH Data Center at Vint Hill, the Fauquier Hospital's large chilling, cooling and heating plant that is so quiet, and at the no noise Terremark-Equinix 20-year-old data center in Culpeper on US 29. Even with 20 years old technology, it is quiet! The speaker did NOT tell the Planning Commission any of that, as it completely disproves his old data center soundtrack. And the speaker left out all the hundreds of home and business AC and Heating Compressor units constantly cycling in and out noisily for cooling and heating homes at all hours night and day, something loud and full of vibrations and humming from all home and business compressors. No mention of them and their noise for neighbors. As you will see with a visit, Terremark-Equinix, OVH and the Fauquier Hospital have good technology - and even 20-year-old technology like Terremark-Equinix at the gateway to Culpeper shows how to remove noise, vibrations and bad humming. And today's sound technology is dramatically better - 20 years dramatically better. Dramatically better for removing noise, vibrations and humming. That's the good science and technology of today. Think of today's EV vehicles - super-quiet due to better technology. The same can be done for this AWS data center SUP with Conditions.

Technology works! For example, OVH's Liquid Immersion Cooling/LIC is another type of solution operating already in Fauquier. OVH shows how straightforward and effective. It eliminates noise, vibrations, and humming, so simple, effective, and OVH and Fauquier Hospital-used solutions here successfully. Same for Terremark-Equinix data center entering Culpeper. There are many other good solutions too. The Fauquier OVH shows one way - so one answer is to just use super quiet Liquid Immersion Cooling/LIC. Simple, effective, and super quiet. Same for the Fauquier Hospital. Here is the link to some aerials and photos of the Fauquier Hospital's large chilling, cooling & heating plant right on hospital grounds, with two very large blue chemical tanks too, right next to numerous residences, offices and the hospital itself - with all its hundreds of patients, visitors, employees, healthcare professionals 24/7, from Google Maps: <https://bit.ly/3EHtft>. As you can see, they abut

many residences and offices, and hospital itself with all its patients, visitors and workers. Nobody complains as sound technology works. I thought you would also like to watch this short 2-minute video on Liquid Immersion Cooling/LIC for Data Centers in the article below, [CLICK HERE and see for yourself](#), as used by the large OVH Data Center right here in Vint Hill. No water is needed for cooling and there is no outdoor noise, vibrations, or humming. Super, super quiet with no outdoor noise, vibrations or humming. **So done in this careful way - AWS will be a very Big Win for Warrenton, with community funding, large \$3M-\$4M yearly tax revenues, large upfront Town tap fees with monthly fees too, and local business sales and services and incoming community support programs and well-paid jobs and educational opportunities. And all on an Industrial parcel only - a purely I Industrial parcel.**

And one thing worth much attention is how the Town of Warrenton and Fauquier County will benefit from AWS Data Center in Warrenton by the very large **\$3M-4M+** annual tax payments for both the Town and County for millions of dollars of critically needed school facility work and staff, public needs, parks, EMS, seniors and family community support programs, food banks, updating town vehicles and equipment, water & sewer line improvements, roadway, signage and signal improvements, Town employee salaries, insurance, bonuses, training, retention and other needed costs, public safety, multi-million upfront water & sewer tap availability fees plus monthly payments directly to the Town, and the well-paid high-tech jobs, use of many local Town business services and suppliers, and community planned educational initiatives like STEM programs, high-tech local high school and college data center and software oriented programs, charitable help and resident job training and job preferences too. And the record shows that Amazon-AWS routinely contributes well to local education, charitable, job training and STEM activities. That has always been their case for community support and contributions, as you see just some of the actual local examples streamed below.

**And a key point is this is already Industrial Zoned land - I Industrial Zoned By-Right land with over 1,300,000 SF of very wide ranging Permitted Uses By-Right for some 40 large industrial purposes directly permitted by Ordinance, that is 6 Times larger than the small AWS 220,000 SF, and worse, if done just for those By-Right Permitted Uses, you get what Amazon has done again recently in the northern Baltimore and southern Richmond suburban areas, with 1,200,000+ SF of By-Right industrial distribution space, several hundred employees, 24/7 operations, large brightly lit parking lots, and around the clock heavy transfer truck deliveries and pick-ups every night and day, with hundreds of cars and trucks coming and going constantly. Every day at all hours - night and day non-stop. The northern Baltimore area and the southern Richmond area both recently have these, and I have streamed newspaper articles below on both for a better understanding of what they do. There would be By-Right over 1,300,000 sf of By-Right buildings, with only smaller 50' setbacks/buffers as fully permitted By-Right. No one wants a massive distribution center or other Permitted Uses here that will be up to 1,300,000 SF By-Right for who knows what. **And, now with NO lattice tower transmission line as all are OUT now, no potable water for cooling use, better****

**architecture, more vegetation, more noise reduction, and privacy trees and particularly, no substation, let us go the better route of a carefully conditioned SUP with AWS.** We don't want a huge distribution center here instead with pickup trucks, tractor trailers and cars idling and coming and going at all hours with start/stop, horns, lights or braking. Facts and technology show the way, and strongly support and give good fair reason to follow the science here with a carefully conditioned SUP. No idling tractor trailer trucks dropping off or waiting for delivery items, no lights, honking horns or constant coming and going of tractor trailer trucks and hundreds of employee cars. And other alternative By-Right uses aren't always more attractive. For example, there is the critically need slaughterhouse for the east coast, especially Virginia and Maryland, as suggested recently even for Marshall, and based on the large new slaughterhouse and meat packing plant going into North Platte, NE with the support, equity investment and pre-purchasing of all output by Walmart. They will solve some of their needs out west with that, but are searching for a solution in this general area for their east coast needs. And the Governors of both VA and MD are supporting this for cattle, sheep, chicken and hog producers in both states, and for obtaining better prices for producers and better meat prices for consumers here too. The Walmart Company is very serious about controlling meat costs, and in my work with Walmart they are very professional and straightforward. What if AWS joint ventures with Walmart for this here to supply Amazon Fresh grocery stores and Whole Foods too?

In short, the Planning Commission has achieved many strong community-friendly results with their successful work here - **1.)** NO lattice tower transmission line as all OUT now, **2.)** no water for cooling use, **3.)** better architecture, **4.)** more vegetation, **5.)** more trees, **6.)** no substation, **7.)** very large **\$3M - \$4M+** annual tax payments to the Town and County for millions of dollars of critically needed school facility work and staff, public needs, parks, EMS, community, utility improvements, etc., **8.)** multi-million upfront water & sewer tap availability fees to the Town plus monthly payments to the Town, **9.)** many well-paid high-tech jobs, **10.)** use of many local Town business services and suppliers, **11.)** community planned initiatives like STEM programs, data center high-tech local high school and college programs, charitable help and resident job and training and job preferences planned too, and especially **12.)** respect of Town Noise Ordinance and binding SUP Condition to meet the best residential standards. All this and an achievable noise and humming solution for no outdoor problems by using the best technology like the improved Fauquier Hospital's own very large chilling, cooling, and heating plant and the large OVH Data Center in Vint Hill. And the Terremark-Equinix data center at the gateway to Culpeper too - all super positive.

**All these careful Conditions have been achieved, so it's a good time to memorialize them and support a carefully conditioned SUP. Done in this careful way, AWS will be a very Big Win for Warrenton, with key community funding, large yearly \$3M - \$4M+ tax revenues, large upfront Town tap fees and monthly fees too, local business and community sales and services, high-tech school programs and jobs. And all on an Industrial parcel - a purely I Industrial parcel so AWS will avoid all other bigger much less desirable By-Right Permitted Uses SF such as a busy round the clock logistics, distribution e-commerce fulfilment and warehouse**

operations to be avoided, so no much larger By-Right Amazon 1,300,000+ SF distribution center - 6 (Six) Times the size of AWS data center here without Planning Commission input - as Amazon recently launched outside Baltimore and another outside Richmond. Those and other huge and less attractive By-Right facilities, buildings and constant activities can be avoided. They and other Permitted Uses By-Right with their much, much larger buildings, parking lots, heavy traffic, constant tractor trailer trucks, hundreds of heavy tractor trailer delivery and shipping bays and continuous activities can be avoided with a much smaller and well-conditioned AWS SUP. And if done By-Right instead, which is the alternative, then Planning Commission review, hearings and extra conditions - so best to avoid By-Right Permitted Uses in this case. Would probably be worse uses and much larger buildings at 1,300,000+ SF (1.3M SF) and large impervious parking lots and lights, and would give the Town instead very low tax revenues, heavy traffic, round the clock - every night and day large rumbling tractor trailers, 24/7 coming and going, hundreds of tractor trailers idling and employees coming and going at all hours, throughout the night too for their fast delivery and shipping, lights and noise, large impervious parking lots and internal roadways, smaller setbacks, many neighbor complaints for sure as much different, larger and unpleasant than AWS, but all this is By-Right over 6 (Six) Times - 6 times - Larger than the much smaller AWS building and over 40 Permitted Uses to boot. ALL these can be avoided with a carefully conditioned data center SUP. The Town and especially the neighbors will do better.

So good Planning Commission resulted in 1-12 above already - in addition to many other Conditions - all binding Conditions, and the two points on elevation and sound are fairly resolved by completely avoiding the huge unpleasant 1,300,000+ SF Buildings & Parking By-Right Permitted Uses SF otherwise **and** by using good technology with binding Conditions, especially as AWS specifically binds itself to follow sound rules and the Ordinance to the better residential standards using better technology. Good benefits happen with all this, and bad results are avoided, and most importantly this will avoid a worse larger 1,300,000+ SF of By-Right Permitted Uses which can be done with no Planning Commission input, so those are gone too. I will keep working on this, have been giving my suggestions streamed below to the Planning Commission, and will send other points that may be useful for your consideration as I see them. Best regards, David

# Town council will hold public hearing on data center in January unless Amazon requests delay

By Robin Earl/Fauquier Times Staff Writer  
Dec 13, 2022

Councilmen Bill Semple (Ward 2) and Brett Hamby (Ward 3) at a May 10 Warrenton Town Council meeting  
Fauquier Times Staff Photo/Coy Ferrell

Mayor Carter Nevill indicated Tuesday morning that the Warrenton Town Council will hold a public hearing next month on Amazon’s data center application unless Amazon asks for a postponement.

The town planning commission will hold its own public hearing Dec. 20 and could vote to recommend approval or denial of the application at that point. However, the town council has the final authority on zoning applications.

Typically, the planning commission makes a recommendation on a special use permit after a public hearing. After the commission votes, the town council takes up the request. However, on Nov. 22, the planning commission declined to vote. The planning commission members agreed that they would wait to

decide until after Amazon's application was amended because they considered Amazon's application to be incomplete and deficient.

But that would have left Amazon without a decision within a "reasonable" time, according to a written opinion from town attorney Martin Crim. He said that the decision to delay was outside the authority of the planning commission. Virginia law defines "reasonable" as within 100 days for zoning amendments, which Crim has said are similar to SUPs.

He shared that opinion with the planning commission before Commissioner James Lawrence made a motion to delay the decision "indefinitely" and his fellow planning commissioners agreed unanimously.

After the planning commission declined to vote on Amazon's SUP, Crim reiterated his legal guidance and stated that the commission acted outside its authority and said the town council could take up the application without a planning commission recommendation.

Regretting the decision to delay indefinitely, Planning Commission Chair Susan Helander then scheduled a continuation of the commission's Nov. 15 public hearing for Dec. 20. Commissioners will discuss the application — and possibly vote on it. Regardless of how the commission votes, the application will move to the town council in January.

If the planning commission defers a vote – which according to Crim could only be done if the applicant requests it – a public hearing in front of the town council would be delayed until at least February.

Mayor Carter Nevill explained after the morning meeting Dec. 13 that, if the planning commission deferred a vote despite the applicant's wishes, the application would next go to the town council.

Town Council Member Bill Semple (Ward 2) made it clear that he disagrees with Crim's legal assessment about what is a "reasonable" period for the planning commission to consider the Amazon application, despite the deadline of 100 days. He said, "What's 'reasonable' can also mean the planning commission can act also reasonably, that is, not arbitrarily or capriciously....What's not reasonable is for us as a council to decide what is reasonable for them [the planning commission]."

Semple argued that the commission "delayed a decision until it had more information. They should be able to complete their review." He added that

since information on noise mitigation and certain elevations were still outstanding, the planning commission had a right to delay its decision until those elements were provided. "I think the planning commission acted reasonably and should be allowed to complete their work," he said.

Semple said that the Amazon application is one of the most significant the town has ever faced and that the planning commission should have the time it needs to receive and process all the information.

Planning Manager Denise Harris confirmed that the planning commission has requested more information on the noise and elevations – as well as other details — but has not received them. "I can't speak to what the applicant will provide by Dec. 20," she said.

Semple also said that Amazon has delayed consideration of its application at least twice, which should have reset the 100-day clock, but Crim answered that the delay was "within the framework" of the 100 days.

When Amazon submitted more information Oct. 28 —"what in many ways was a new application," said Semple— why "doesn't the clock start then?"

Since the applicant did not ask for the timeline to be reset, Crim said, it would stand.

Crim said if the SUP process did not move forward, "there would be the potential of a lawsuit against the town by the applicant."

"If the planning commission holds a public hearing and doesn't make a decision, it has gone outside its authority," he said. "If you think the planning commission should have more time, the downside of that is you get a potential lawsuit against the town for denial of due process, and so on so forth, unconstitutional taking, whatever the claims might be," Crim said.

"So the cautious approach is to go ahead and say the planning commission needs to act at its Dec. 20 meeting, and that the council will then act thereafter, unless, of course, the applicant asked for additional time from the planning commission."

Subject: Upcoming Dec. 20 Planning Commission meeting on AWS data center request - Terremark-Equinix Data Center in Culpeper, OVH Data Center in Vint Hill & Fauquier Hospital's Chilling Plant in Warrenton

Hi Sue, Jim, Ali, Steve, and Ryan - It will also be helpful to visit the Terremark-Equinix Data Center in Culpeper, directly on US 29. By chance, I was by the Terremark-Equinix Data Center when visiting the new Germanna Community College - Daniel Technology Center abutting it. Germanna Community College does large classes here for cybersecurity, healthcare, skilled trades, transportation, and high-tech careers.

Most importantly all these large classrooms are right next to the large Terremark-Equinix Data Center built almost 20 years ago. And there is just no outdoor noise, vibrations, or bad humming there. None noticed or detected, and the Terremark Data Center is immediately next door directly on US 29 with architecture that is pleasant and blends in. It is attractive and normal looking, and visible directly on US 29, while AWS in Warrenton would be setback much more, have much larger 100' setbacks and substantial trees and vegetation in comparison. And Terremark-Equinix is now 20 Years Old! Yes, a long 20 Years Old! and with no noise, no vibrations and no bad humming using 20-year-old technology - while today's technology is dramatically better for no noise, vibrations or bad humming using today's dramatically better best technology. Yet Terremark blends in quietly as you can verify and see in person. It is another a local Data Center to visit to see the facts, and not hear noise - just like the OVH Data Center in Vint Hill and the Fauquier Hospital's large chilling, cooling, and heating plant on the Hospital campus next to so many homes, offices and hospital patients, and employees there. The facts of all 3 of these large facilities show that today's technology eliminates outdoor noise, vibrations and bad humming. These are 3 large direct examples showing this, that can be easily visited and verified to see this directly. No home AC and Heating Compressor units constantly cycling in and out for cooling and heating homes at all hours on homes, something worse. No pick-up truck or car idling, start/stop, horns, lights, or braking. Good technology and facts have regularly solved concerns. The same technology and the tight SUP Conditions will do the same for AWS in Warrenton, so you have all the good benefits and careful development and operations. **All SUP Conditions have been well achieved by the Planning Commission to reasonably support an SUP now, an SUP that strongly benefits the Town and protects the community.**

**This is I Industrial Zoned By-Right land with over 1,300,000 SF of very wide ranging Permitted Uses By-Right** for some 40 large purposes directly permitted by Ordinances, that is 6 Times larger than the small AWS 220,000 SF, and worse, with no Planning Commission input, if done just for those By-Right Permitted Uses. **Please avoid a worse solution here - please avoid it.** No one wants a massive distribution center or other Permitted Uses here that will be up to 1,300,000 SF By-Right for who knows what. **Let us go for the better route of an SUP with AWS.** Don't want a huge distribution center here instead with pickup trucks, tractor trailers and cars idling and coming and going at all hours with start/stop, horns, lights or braking. Facts and technology show the way, and strongly support and give good fair reason to follow the science here with a carefully

conditioned SUP. No idling tractor trailer trucks dropping off or waiting for delivery items, no lights, honking horns or constant coming and going of tractor trailer trucks and hundreds of employee cars. I remember one person's playing a sound track of an old data center humming - an old one to say there was humming, but old soundtracks, like a heavy metal band soundtrack from the 70's, are like comparing an old pick-up truck with a bad muffler to today's EV cars. It is not a good or fair comparison, NOT the same thing at all - as today's technology addresses concerns on sound, vibrations, and humming - it is all shown in modern OVH Data Center at Vint Hill, the Fauquier Hospital's large chilling, cooling and heating plant that is so quiet, and at the no noise Terremark-Equinix 20-year-old data center in Culpeper on US 29. Even with 20 years old technology, it is still quiet! The speaker did NOT tell you that, as it completely disproves his old data center soundtrack. **And the speaker left out** all the hundreds of home and business AC and Heating Compressor units constantly cycling in and out noisily for cooling and heating homes at all hours night and day, something loud and full of vibrations and humming from all home and business compressors. No mention of them. As you will see with a visit, Terremark-Equinix, OVH and the Fauquier Hospital have new technology - and even 20-year-old technology - can remove noise, vibrations and bad humming. And today's sound technology is dramatically better - 20 years better. Dramatically better for removing noise, vibrations and humming. That's the good science and technology of today. Think of today's EV vehicles - super-quiet due to better technology. The same can be done for this AWS data center SUP with Conditions.

And finally, there are many who need these benefits - schools, students, teachers, high-tech educational programs, public safety personnel & equipment improvements, senior and community centers, parks, food banks, mental health efforts, homeless, family and children care efforts, food banks, public works staff, Town & County utilities, street repairs and many other needs.. Sincerely, David

Hi David,

**You know what's cool? Seeing IT hardware operating while submerged in liquid.**

**This [2-minute video](#)** from LiquidStack shows the process of 2-phase immersion cooling and why it is undeniably the most efficient data center cooling system in the world.

2-phase immersion is the cornerstone of tomorrow's data centers:

- **28 times more heat rejection than air cooling**
- **41% reduction in energy use vs. air cooling**
- **Zero water consumption**

**CLICK HERE - See for yourself! [Watch here](#)**

Kind Regards,

Alexandria Madamba  
Marketing & Sales Operations Coordinator | LiquidStack Inc.

---

LiquidStack has the world's largest install base of liquid cooling for data centers, edge and high-performance computing. LiquidStack's 2-phase immersion liquid cooling is the only proven, highly scalable, environmentally safe and sustainable solution to meet the growing thermal challenges of cloud, enterprise, 5G and edge computing applications. Find out more at [www.LiquidStack.com](http://www.LiquidStack.com).

Subject: Follow-Up Points: Upcoming Dec. 20 Planning Commission meeting on AWS data center request

Susan Rae Helander, Chair  
James Lawrence, Vice Chair  
Ali Zarabi, Member  
Steve Ainsworth, Member  
Ryan J. Stewart, Member

## **Town of Warrenton Planning Commission**

Hi Sue, Jim, Ali, Steve, and Ryan - Good to see that the Planning Commission will have its Public Hearing on AWS this December 20. That is a great step. A large number of conditions and positive changes have been achieved by Planning Commission's work. The package is very reasonable now.

And just in yesterday's mail, I received the attached public information from Dominion Energy saying formally and publicly that there will be **NO** Towers, and saying instead underground lines as you see in the attached materials, coming from their current Warrenton substation. All well detailed and described. This public news probably went out to many hundreds of landowners, so definitely public information and their formal public position now. **Major good change and great improvement from the original lattice towers, so no more towers. No more towers! They're formally and publicly gone now.**

And any noise, vibrations and humming are already shown to be taken care of with straightforward technology just like was done in Warrenton at the Fauquier

Hospital's very large chilling, cooling and heating plant - which has negligible outdoor sounds, and is near many hundreds of homes, offices and many patients and employees in the Hospital itself - all with no complaints. No complaints or problems despite its very large size. The same is true for the large OVH Data Center in Vint Hill which has no outdoor noise, vibrations or humming, and is next to hundreds of homes, outdoor restaurants and shops and businesses with numerous outdoor guests, with no complaints from homes, businesses or outdoor patrons. No complaints. OVH Data Center shows that technology solves outdoor concerns. OVH at Vint Hill is a real large data center in Fauquier with no outdoor noise, vibrations or humming - none, and the large OVH Data Center is easily verifiable too, just like Fauquier Hospital's large chiller plant. Two good local examples.

In short, the Planning Commission has achieved many strong community-friendly results with your successful work here - 1.) NO lattice tower transmission line as all OUT now, 2.) no water for cooling use, 3.) better architecture, 4.) more vegetation, 5.) more trees, 6.) no substation, 7.) very large \$3M - \$4M+ annual tax payments to both the Town and County for millions of dollars of critically needed school facility work and staff, public needs, parks, EMS, community, utility improvements, etc., 8.) multi-million water & sewer tap availability fees plus monthly payments to the Town, 9.) many well-paid high-tech jobs, 10.) use of many local Town business services and suppliers, 11.) community planned initiatives like STEM programs, data center high-tech local high school and college programs, charitable help and resident job and training and job preferences planned too, and especially 12.) respect of Town Noise Ordinance and binding SUP Condition to meet the best residential standards. All this and an achievable noise and humming solution for no outdoor problems by using best technology like the improved Fauquier Hospital's own very large chilling, cooling, and heating plant and the large OVH Data Center in Vint Hill. That is a tremendous result - all super positive. **All Conditions achieved, and a good time to reasonably support an SUP now. Done in this careful way, AWS will be a very Big Win for Warrenton, with key community funding, large yearly tax revenues, large Town tap fees, local business and community support, high-tech school programs and jobs. And all on an Industrial parcel - a purely I Industrial parcel so AWS avoids all other bigger less desirable By-Right uses such as round the clock logistics, distribution e-commerce warehouse operations are all avoided, so no By-Right an Amazon 1,300,000+ SF distribution center as recently launched outside Baltimore and another outside Richmond. Those and other huge By-Right facilities, buildings and constant activities can be totally avoided. They and many other Permitted Uses By-Right with their much, much larger buildings, parking lots, constant tractor trailer trucks, delivery bays and continuous activities more than AWS. Those worse uses would give the Town instead heavy traffic, tractor trailers, 24/7 coming and going, hundreds or employees coming and going in their cars at all hours, lights and noise, smaller setbacks, and all By-Right over 6 (Six) Times Larger than the much smaller AWS building. All this can simply be completely avoided here with a carefully controlled data center instead.**

Technology works! For example, OVH's Liquid Immersion Cooling/LIC is another type of solution operating already in Fauquier. OVH shows how straightforward and effective. It eliminates noise, vibrations, and humming, so simple, effective, and OVH and Fauquier Hospital-used solutions here successfully. There are many other good solutions too. The Fauquier OVH shows one way - so one answer is to just use super quiet Liquid Immersion Cooling/LIC. Simple, effective, and super quiet. Same for the Fauquier Hospital. Here is the link to some aerials and photos of the Fauquier Hospital's large chilling, cooling & heating plant right on hospital grounds, with two very large blue chemical tanks too, right next to numerous residences, offices and the hospital itself - with all its hundreds of patients, visitors, employees, healthcare professionals 24/7, from Google Maps: <https://bit.ly/3EHifft>. As you can see, they abut many residences and offices, and hospital itself with all its patients, visitors and workers. Nobody complains as sound technology works. I thought you would also like to watch this short 2-minute video on Liquid Immersion Cooling/LIC for Data Centers in the article below, [CLICK HERE and see for yourself](#), as used by the large OVH Data Center right here in Vint Hill. No water is needed for cooling and there is no outdoor noise, vibrations, or humming. Super, super quiet with no outdoor noise, vibrations or humming.

**All Conditions have been well achieved by the Planning Commission, and a good time to reasonably support an SUP now.** Best regards, David

Hi David,

**You know what's cool? Seeing IT hardware operating while submerged in liquid.**

This [2-minute video](#) from LiquidStack shows the process of 2-phase immersion cooling and why it is undeniably the most efficient data center cooling system in the world.

2-phase immersion is the cornerstone of tomorrow's data centers:

- **28 times more heat rejection than air cooling**
- **41% reduction in energy use vs. air cooling**
- **Zero water consumption**

**CLICK HERE - See for yourself! [Watch here](#)**

Kind Regards,

Alexandria Madamba  
Marketing & Sales Operations Coordinator | LiquidStack Inc.

## The Silent Data Center is Possible – Achieve it with Liquid Cooling

What if all of the server fan noise and all the noise emanating from the cooling equipment went away? **The data center would be virtually silent! Is that possible? It is possible by going with [liquid cooling](#) servers.**

The world is generally a noisy place that is sometimes soothing or relaxing, but most often unpleasant with excessive levels of noise. In urban areas, there is constant noise emanating from car engines, bus and delivery truck engines, and even noise from jet engines in the sky. In the suburbs, it's the lawn mower, grass trimmer engines or snow blower engines (in colder climate areas). In warmer climates, especially along the coast, it's quite common to hear the Harley Davidson motorcycle engines reverberating down the strip.

Conversely, if you've ever almost been run over by an electric car in a parking lot, you know it's virtually silent. Regarding the other noise generating devices I mentioned, I recently purchased an electric lawn trimmer and I have to say that this gen 3 product with advanced Lithium Ion batteries replicates the power of an old gas trimmer and is much lighter to boot – without the super load gas engine. Electric push lawn mowers have been around for a while, but now there are riding lawn mowers powered by Lithium Ion. Believe it or not Harley Davidson has announced that an electric "hog" is in development. Also, there has been a flurry of electric airplane engine testing successes and commercial flights up to 1,000 miles will be technically possible by 2024. It seems like the world is about to be a quieter place.

## Why Typical Data Center Infrastructure Noise is Above Average

Data centers are famous for being very noisy, surprisingly noisy in fact. If you have ever visited one or often work with [data center infrastructure](#), you are very familiar with how unpleasantly loud they can be. I recently visited one where the noise readings ranged from a low of 75 dBA to a high of 95 dBA. In comparison, normal conversation is about 60 dB, a power lawn mower is about 90 dB, and a jet engine at takeoff is 140 dB, according to the [National Institute for Occupational Safety and Health](#) (NIOSH). The federal government sets workplace standards for noise and doesn't require action until workers are exposed to average noise levels of 85 dB or greater during an eight-hour day.

Where does the sound in data centers come from? The servers themselves generate noise coming from the high velocity fans, but the highest levels come from the HVAC equipment (air conditioners) from the fans, condensers, compressors and evaporators. Some efforts can be made to lower this noise in a reactive way by installing sound-deadening acoustic tiles on the ceiling and data center's walls. However, data centers today (small and large), are extremely noisy environments

## The Silent Data Center is Possible – Achieve it with Liquid Cooling

What if all of the server fan noise and all the noise emanating from the cooling equipment went away? **The data center would be virtually silent! Is that possible? It is possible by going with [liquid cooling servers](#).** Liquid cooling servers do not have fans and make zero noise. There are two different types – emersion and direct to chip (sometimes called cold plate). Emersion technology floods the server with a liquid designed to collect and dissipate heat. This liquid circulates around the server and heat is rejected to a heat exchanger usually on the back of the server. With direct to chip, fluid (usually water) is sprayed on the plate on the back of the micro processor in the server. Both of these are dependent on a cold-water supply from outside the building. This cold-water supply also is silent inside the data center. Plus, all of those noisy fans, condensers, compressors and evaporators go away.

## Learn More about the Impact of Liquid Cooling in the Data Center Industry

There you have it, technology advancements are eliminating unpleasant sounds that you hear every day and now we can have silent data centers with liquid cooling – a world without noise. Check out my other [blog on liquid cooling](#) and why aside from the reduction of noise pollution, it is making its way back in the mainstream of the data center industry. .

**Sent:** Fri, 30 Dec 2022 09:55:34 0500  
**To:** "" <citizencomment@warrentonva.gov>  
**Subject:** AWS Data Center SUP Application Hearing 1/10/2023

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good evening, my name is Florence Keenan. For over 20 years I have been a Fauquier County, Marshall District, resident. Warrenton is my county seat where I shop, do business, exercise and meet friends.

I must reiterate: a vote on this application is premature—the required noise study hasn't been completed and noise is a significant issue. You cannot rely on Amazon to adhere to its proposed noise conditions without detrimentally impacting residents, because they propose to do noise studies after the data center is built. In other words, the building will be there, regardless of the noise.

All of Amazon's changes over the course of this process not only belie that the application was ever materially complete to be considered, but also have undermined Amazon's credibility, while wasting our time analyzing half-baked proposals and factoids.

Moreover, Amazon has never demonstrated how this data center is consistent with the recently passed Plan Warrenton 2040 —- because it can't. The only mention in the Plan of data centers states that they are not appropriate for light industrial zoned areas (see page 70) due to their voracious appetites for public utilities. Planning Staff has also asked Amazon to consider green infrastructure and LEED standards as encouraged in the Plan, but the draft conditions for approval do not address these standards.

Town documents demonstrate that discussions about data centers were on-going during the drafting of Plan Warrenton, so why didn't the Plan provide for them? Instead, just a day after the TC approved the Plan, Amazon had a zoning amendment introduced and passed within four months to allow a huge, noisy, closed data center on a site that the Plan called for becoming a community friendly mixed-use area. This data center proposal is totally contrary to the plan for Warrenton's New Town Character.

Neither Loudoun nor Prince William counties have allowed data centers smack dab in their historic county seats of Leesburg or Manassas for obvious reasons— data centers are unfriendly, noisy, locked eyesores that use enormous amounts of electricity while increasing air pollution. It's clear to us that this would be the first of several data centers in Warrenton, irrevocably destroying its character.

Community development should be a win-win. Due process requires that Warrenton's Plan and ordinances be addressed and that only a complete application be voted upon. Even if the federal government were the client, due process requires that our rules and residents' concerns be addressed.

If the town is so desperate for more revenues, then negotiate with the county for a greater cost-share portion of revenues from county data centers.

Amazon should also meet with representatives of the county, town and residents to find a more appropriate location for any truly necessary data center. Take the time to get this right.

Finally, Amazon should donate the Blackwell Road site to the town for a park, in exchange for tax deductions and perhaps even naming rights — "Amazon Park" could go a long way to heal the civic wounds and distrust that this application has generated. That would be a win-win.

Save Warrenton and pass on this application or deny it.

Thank you.

 Dr. John Lyver  
**Attachments:** PF NOISE, Summary of Dr. Lyver's analysis, for TC, 1 3 23.docx  
**Importance:** Normal

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Town Council -  
 On behalf of Protect Fauquier, I am submitting a noise analysis of the proposed Amazon data center, by Dr. John Lyver. (Attached.) Dr. Lyver's analysis was updated based on the Town's 12/16/22 Zoning Determination Letter.

***Dr. Lyver's analysis finds that the Amazon data center will violate the Town noise ordinance virtually across the board, probably around the clock, potentially 365 days/year, at all ten locations where Dr. Lyver analyzed the noise.***

***Further, the magnitude of predicted violations is substantial. In almost half the cases (i.e., 10 locations at 8 different frequencies), the level of exceedance is more than 10 decibels above the Warrenton noise limits.***

See the attached for more detail, and for a critical analysis of Amazon's proposed noise "conditions" and "commitments."

Please include this in the official public hearing record for the data center.

Cynthia J. Burbank  
 Secretary, Protect Fauquier

**Subject:** Say NO to Amazon and Dominion.

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Warrenton Town Council:

I am opposed to Amazon's plans to build a data center at the northeast gateway to Warrenton. It has no place at this location and will adversely impact the health, quality of life, and property values of those who live near it. It will ruin the beauty that is Warrenton!

To make matters worse, the application is incomplete and the Town Council appears to bending over backwards for Amazon while ignoring the almost unanimous opposition to this data center among Warrenton residents. For example, the town is considering giving the company a pass by not requiring compliance with its noise ordinance as part of the approval process, and doesn't even know how power would be supplied and which neighborhoods would be affected and how.

I respectfully suggest that your responsibility is to listen to those who elected you and not to a company that is earning a reputation for breaking the rules or trying to make its own to the harm of communities and neighborhoods across northern Virginia. Please vote no on this special use application so Warrenton doesn't become Amazon's next casualty.

Sincerely,

Tanina Frouge Linden, CFP®

**Subject:** Meeting Follow Up

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good afternoon Heather,

Thank you for meeting with me yesterday afternoon. I have several questions and concerns following our meeting that I would like to discuss further.

**1) You painted a dire picture of Warrenton's financial health, saying the Town of Warrenton (TOW) cannot continue like this financially, and described it as being an emergency situation.**

I went back and looked at the recording of the Warrenton Town Council (WTC) meeting on 12/13/2022, where audit company Brown Edwards presented the FY2022 Audit Results. The recording shows that you had left the meeting before this presentation. During their briefing, Brown Edwards gave a very positive financial report:

- General Funds: the unassigned funds balance over the past several years has been 7 to 9 months; a good rule of thumb is no less than 2 months.
- Budgetary Comparison - General Fund Revenue Compared To Budget for 2021 and 2022 actual revenue was higher than budgeted. In 2022 the town revenue was 5% higher than expected.
- Budgetary Comparison - General Expenditures Compared To the Budget for 2018-2022 actual expenditures were lower than budgeted. For 2022 expenditures were 15% below budget.
- Cash/Cash Equivalents Compared To Current Liabilities were "very favorable" and "the ratios were flat and comparable to the previous year."

There seems to be a huge disconnect between the state of the Town's finances that you were describing during our meeting yesterday and the description that Brown Edwards was giving just a couple weeks ago. Could you please tell me why that is? Where are you getting your information from?

During our meeting you also described a high turnover for police and mentioned that just to bring the town police up to par would require an 8% increase in taxes. I own a townhouse in Warrenton, and my town property taxes are \$127, so an 8% increase would be about \$10. For an average single family home it would be about \$20-25. I think most town residents would be willing to pay \$10-25 a year extra to make changes to the police department if needed.

**2) You also mentioned that the law team said the WTC can't just say they don't want a data center there. You have to have a reason such as safety, health, noise, otherwise you will get into a lot of trouble.**

I think the Planning Commission (PC) and the public have provided ample reasons for the WTC to reject the Amazon proposal. I outlined many of these in a 14 page report that I emailed you on 01/02/2023 titled Arguments Against Data Center in Warrenton which you mentioned yesterday that you had not read.

- Is in direct conflict with the Warrenton 2040 Comprehensive Plan
- Ruins the gateway to Warrenton and the southern gateway at the old wire factory
- Visual impacts
- Noise impacts
- Health impacts
- Construction impacts
- Impacts to historic Falmouth Street and Meetze Road
- Decreases property values
- Increases the need for high voltage power lines and new substations
- Attracts industrial businesses to Warrenton instead of hospitality focused ones
- Opens the door for additional data centers in Warrenton
- Increases the risk of an obsolete massive building on prime location in Warrenton

**3) You stated that you have received many phone calls in favor of the data center and that these people don't want to come to the meetings.**

- Could you please provide more information about the number of people and what their comments have been?
- Of the almost 700+ written comments the PC and WTC has received for their public hearings, 99% have been against. Why are these people that are calling you unwilling to go on record via email?

- Of about 124 people that have spoken in recent PC and WTC meetings, 2 have spoken in favor of the proposal and the reaction in the room has been very neutral, not negative in any way.
- If these people have concerns about speaking out, I'd like to propose a town referendum where citizens can vote on this issue.

**4) You mentioned that the Dominion power lines are coming anyway, even if the data center is not approved.**

- Dominion has said during several public meetings that if the Amazon data center is not approved, their power line project disappears.
- During Dominion's presentation to the WTC, Dominion stated several times that there is no need to add power to service the Town of Warrenton, not now or in the foreseeable future, unless the Town persists in engaging in the high-power demand data center industry.
- Town and County officials have a great deal of control as to whether Dominion will be back citing a need for more power lines. The more data centers that are approved, the greater the need for power there will be.
- The two areas in the County that are approved for data centers - Vint Hill and Remington - already have much of the needed power infrastructure in place.
- Do you have any additional information that I should be aware of?

**5) I believe you are misinformed that the Warrenton Training Center does not pay taxes because it is a government facility.**

- It is my understanding that the government pays taxes through the Amazon run data center. Please correct me if I am wrong.

**6) You stated that if the project is approved and the noise levels are too high, Amazon won't open.**

- There are no conditions in place to quantify noise coming from the data center and remediate Amazon noise violations when they occur.
- The time to ensure that the noise levels are not too high is NOW, not prior to site plan approval and certainly not after built and in operation. I included the mitigation efforts underway at Amazon's Tanner Way facility in my report - all of which have been unsuccessful to date, while Amazon continues to operate to the detriment of the nearby residents. Why would you not ensure the noise

can be mitigated, and the quality of life of Town residents be protected, now, when you have the opportunity and DUTY to do so.

**7) And finally, and most concerning is the fact that you told me "we met with Amazon via Zoom this morning."**

- I'd like to ask who the "we" you were describing is.
- Also, why are you meeting with Amazon via Zoom? This is just one more example of how flawed this Special Use Permit application has been. Conversations with Amazon should not be taking place via Zoom, where the entire Council and the public cannot benefit from the exchange. You are forming your opinion without the benefit of discussion with the entire Council and input from the public. Is this not an ethics violation?
- During this exchange with Amazon they apparently noted that they will be proposing a new cooling system on Tuesday, similar to the one at OVH in Vint Hill. Shouldn't the rest of the Council (including the two new Council members that are starting today) and the public be given a reasonable amount of time to weigh in on this new, pertinent information? With no noise study and no analysis etc from Town Staff, citizens have been working with NASA scientist John Lyver to determine the impacts of the data center noise, and we need time to evaluate any new information.

I welcome your comments/answers and hope you and the rest of the WTC do not move forward with this application. There are so many reasons that have been presented against it, and so many questionable practices that have occurred. Town and County residents deserve better.

As a very content resident of Warrenton, I must say there is no need for a rather large industrial-sized building along with “eyesore” overhead power lines so close to the center of town. Let’s keep Warrenton as the quaint, semi-rural town that it is.

Thank you  
Richard Zimmerman

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Mayor Neville,  
I'm writing to voice my opposition to the proposals associated with the above subject projects.

If the proposed substation to support the Amazon data center is approved, the substation noise and associated high power transmission lines will decrease property values and compromise the quality of life there and in the surrounding communities. The power line runs in Prince William and Loudoun County have already ruined the aesthetics of the countryside.

The estimated benefit to the town of \$3 4M for the proposed Amazon data center is insufficient to compensate for the negative impact to property values and quality of life. For this and other reasons, my wife and I join our neighbors and other area residents in opposing this proposal and urge you to vigorously advocate against these proposed projects.

Kindly ensure a copy of this email is provided to the new Council members at large and I urge you to use your position and influence as mayor to oppose the proposal on behalf of your constituents to protect property values and quality of life in Warrenton.

Sincerely,  
Robert and Nancy Waxer

**Subject:** Hear Us: Vote NO for the Amazon Data Center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Mayor Nevill, Councilwoman Sutphin, Councilman Semple, Councilman Hamby, Councilman Hartman, Councilman Heroux, Councilman Mooney, Councilman McGuire:

I enthusiastically and heartfully join with my neighbors and friends in opposition to Amazon's data center on Blackwell Road. It is a textbook example of something that just does not fit here. Warrenton is a gem, an escape, and is special. Your Yes vote would throw that away and open the door for quick development by other data centers, as has happened across the region to our eats.

I live a stone's throw and wish to never hear the constant hum of a data center or see its gargantuan shell from my home. I do not wish for my property's value to diminish because of this selfish vote.

I beg you to please vote no on Amazon's application. Hear the citizens you represent.  
 Sincerely,  
 Jason Smolinski and family  
 481 Cardinal Ln, Warrenton

To the Warrenton Town Council,

Please do not approve the Special Use Permit allowing Amazon to build a data center in residential Warrenton. It will stain our beautiful area that Warrenton distinctly and uniquely offers.

Cost and impact greatly outweighs promised benefits, with emphasis on the word "promised".

I hope the wisdom and judgement of the Council to do what is right for Warrenton will dominate the decision.

Thank you for your consideration.

A concerned citizen of Warrenton

I strongly oppose bringing Amazon to our beautiful quaint, historic town of Warrenton.

Amazon would never stand a chance to disrupt Williamsburg, VA. Why would you let them disrupt the historic town of Warrenton?

The 50 or so jobs they will bring and the tax revenue (minimal) will never compensate for the disruption of of this beautiful historic town.

Please, vote "NO" to the Amazon data center.

Now that the time is looming when you may be voting on this issue, please keep in mind that there's no rush on this. You're aware of the citizen opposition, and, if in fact, your reason for allowing the SUP would be a potential tax revenue, it's far from certain how that would play out. **Please deny the SUP.**

There's no reason that we can't wait for a few more years to see how Loudon and Prince William counties tax revenues come in. Amazon can certainly afford to keep this property if they wish or sell it. Let us please not make a mistake we might regret in the future.

**Attachments:** Amazon is contrary to the comp plan.pdf

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Council Members and Mayor,

Please see the attached document which summarizes where and how the 80-page Town of Warrenton Comprehensive Land Use Plan, PLAN WARRENTON 2040, is contrary to the Amazon SUP before the Town Council.

Please see that the attached document becomes part of the permanent record of the public process for this SUP application.

Thank you for you time.

**Subject:** For the Town Council Meeting on 10 January 2023

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good Day,

I have over 40 years' experience in managed IT infrastructure including the acquisition, building, relocation and closing of data centers.

By their very nature, data centers are sterile isolated environments which add little to nothing to the local community fabric.

I am against the Amazon Special Use Permit because it is for a data center and one the commercial drivers indicate will be dark in 12 to 15 years.

The major drivers are:

- Being built to support a single customer with a 10-year contract,
- Ongoing technology change will ease current facility colocation requirements,
- The facility will be at mid-life and needing renewal, and
- At 250,000 sqft the facility is too small to be economical as a general-purpose data center.

Assuming the town thinks it wants to go ahead, the decision should be delayed until several issues with the Amazon submission are resolved:

**Issue One – Electrical Power**

The Dominion/VEPCO sub-station location and distribution line path should be agreed prior to approval of Amazon's request. By agreeing to the Amazon data center without the substation issue resolved, the town will find itself in a weakened position in the sub-station negotiations with VEPCO. Additionally Amazon, one of VEPCOs largest customers, will have a reduced ability to leverage its relationship for the same reason.

**Issue Two – Noise Zoning Requirements**

The noise issue is unresolved. Amazon has mishandled its approach to this issue and has yet to provide documentation as to how it will meet zoning requirements. Amazon needs to stand by the approach submitted to the Planning Commission or go back and start the planning process again.

**Issue Three – Actual Noise Levels**

Data centers react dynamically to work loads and external environmental conditions. Given the history of questionable trust regarding this facility, I highly recommend Warrenton implement a “Trust but Verify” approach to noise levels on a 7X24 hour basis. A four-sensor system from Liveable Cities should cost about \$4,000 a year which is nothing in the context of this project. This is cheap insurance for all.

Additionally, Warrenton needs the ability to reduce or close operations at the data center if Amazon does not correct noise conditions that violate the zoning ordinance in a reasonable time frame.

**Issue Four – Perimeter Lighting**

The SUP conditions document makes a point to address parking lot and exterior building attached illumination. But it does not mention the more complex issue of perimeter fencing lighting. Amazon has stated that it will need to illuminate the perimeter fencing and path. This is the outer most item Amazon will illuminate.

I do not understand how the town will address a 50% percent reduction in illumination at 11 PM if it forces illumination levels below what Amazon needs to meet its security requirements? In reverse, will the fence be over illuminated up to 11 PM?

Zoning requires illumination to face inward. Does this mean the fence light fixtures will be outboard of the fence? Can Amazon meet its security requirements with light fixtures outside the secure area?

In closing, Amazon may be in a rush to complete this process but that is not Warrenton’s cross to bear. Amazon has a Plan B should the data center not be approved. Warrenton does not need to solve Amazon’s contractual or business needs.

Thank you.

Dear Town Official(s):

I join with my neighbors and friends in opposition to Amazon's data center on Blackwell Road. It has no place at this location and will diminish everything that is special about Warrenton and Fauquier. It will harm the health, quality of life, and property values of those who live near it. It opens the door to an onslaught of more data centers.

We moved to Warrenton 17 years ago and have raised our family here. We were drawn to Warrenton immediately - it is gorgeous, quiet, peaceful, wholesome, unique, charming, deep rooted - all traits that a Data Center isn't. I live here, work here, teach here, love here, grow here & belong here. Don't take this town away from us. Town citizens WILL leave, and it would be because of The Town Council not Amazon. You represent us but Amazon. Make the only right choice and vote against the Date Center.

Please LISTEN and let your hearts guide you.

Please vote no on Amazon's application.

**Subject:** Comments on Amazon SUP Related to Substation Location  
**Attachments:** Public Comment from Steve Wojcik 01102023.pdf

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Mr. Mayor and members of the Town Council,

Thank you for the opportunity to submit these written comments. I am submitting these comments in the pdf attachment below, elaborating on my recent email communications to you regarding concerns about locating a substation on the property associated with the 615 Falmouth St. address. Since the Dominion Energy representative stated at the December work session that the need is due to the Amazon SUP for a "data center" in town and would not be needed otherwise, please include this in the public record for the public hearing on this topic for the upcoming Town Council meeting.

The following is a summary of my comments:

At the December work session, Mr. Precker, the Dominion Energy spokesperson mentioned that the following are criteria they considered in choosing Options 1 and 2, the locations for a 5 to 10 acre substation, which he also linked directly to the electricity needs of the AWS "data center":

- 1) Avoiding wetlands,
- 2) Avoiding areas of storm water drainage, and
- 3) Access (which includes expansion, as he stated)

My comments focus on why that site is not suitable for an electrical substation for two reasons: 1) It goes against Dominion Energy's own criteria for site selection, and 2) it goes against the Warrenton Comprehensive Plan.

The middle of the property contains a pond surrounded by wetlands comprising several acres. They, in turn, are part of a storm water drainage system that also encompasses the land all the way to the northeast boundary of the property (the part that borders Old Meetze Road) to drain rainwater off significant parts of Falmouth Street and Old Meetze Road. Given that the wetland and storm drainage acreage comprise a large swath of the middle of the property, that leaves little room for future expansion of the substation unless Dominion disregards criteria 1 and 2. It is also unlikely that a 10 acre substation could be built without impacting the wetland or storm drainage areas. So why does Dominion Energy prefer this site? It goes against at least two of the three criteria, if not all three, that Dominion representatives stated to you at the work session.

The comprehensive plan calls for housing on that property and recreational and green space connecting the residential neighborhoods to the northeast with the Greenway. The current storm drainage area, the wetlands and ponds, could be incorporated into the residential area and the Greenway as recreational and green space.

Permitting a substation on the property substantially increases the likelihood that computer server warehouses, "data centers," will be built on the rest of the property. Permitting either conflicts with the Warrenton 2040 Comprehensive Plan.

For the record: I am opposed to siting an electric substation (for the reasons cited above) on the property at 615 Falmouth Street. Separately, I am opposed as well to siting "data centers", as the landlord has advertised, on this property. I oppose the latter for reasons of noise, as I first expressed at the August 2021 Town Council meeting and again at the December 2022 meeting, for any property adjacent to or across the street from residential properties— particularly this one because of its extremely close proximity to residences. Old Meetze Road is a narrow two lane street and about 40 feet separates the property from the homes across the street. Moreover, homes and townhomes on Falmouth St also are directly across the street from this property and the homes of Monroe Estates are close by. Furthermore, two sides of Alwyngton Manor share a boundary with the property.

Thank you.

Sincerely,

Steve Wojcik

**Subject:** AMAZON SUP 22 03: Need for provisions to protect Town in  
 event of technological or economic obsolescence  
**Attachments:** Why Returns on Digital Real Estate Don't Compute WSJ.pdf  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Town Council -  
 Please read this and consider it part of the public record for the Amazon SUP public hearing on SUP 22-03:

If, despite overwhelming citizen opposition, you approve the Amazon data center, you **MUST INCLUDE PROVISIONS FOR THE ULTIMATE ABANDONMENT OF THE DATA CENTER. You must not allow Amazon, in 8 years, 10 years, or whenever, to walk away and leave behind a massive empty computer warehouse, dozens of 50 gallon diesel drums, generators, mechanical equipment, and an 8' wire security fence. All on a prime piece of land, at the gateway to the small town of Warrenton -- and close to several Warrenton neighborhoods.**

Because the Planning Commission was forced to act before they had all needed information, many issues were given short shrift. This is one that got absolutely NO ATTENTION, despite comments from at least two citizens.

***The risk of technological or economic obsolescence of the Amazon data center on Blackwell is real -- within a timeframe as short as 6-8-10 years. New technology -- DNA chips -- to replace huge data centers is already in R&D and we all know how fast change happens in the tech sector.***

Fred Smith and I have both submitted detailed comments on this risk. It is real, both the possibility of **technological** obsolescence and the real possibility of **economic** obsolescence. In fact it is certain that Amazon will cease operations at Blackwell at some point. It is merely a matter of time before the Amazon computer warehouse becomes, like the Old Wire Factory, empty, abandoned, an eyesore, and a hazard.

To reinforce that concern, I attach a pdf of a 12/16/22 Wall Street Journal article. The article ends with this statement:

**If cloud computing demand keeps slowing or prospects like the metaverse fail to pan out then it will be bad for companies like Meta and Amazon, but it is the people who own those giant boxes in Virginia who could really get buried.**

In view of this and other evidence of potential obsolescence, a key part of your review of the Amazon SUP is to include carefully crafted SUP conditions that provide protections for the town and the nearby neighborhoods in the event that Amazon abandons this massive data warehouse in the "New Town" area envisioned in the Town Comprehensive Plan.

You don't necessarily need to nail down the percent likelihood of obsolescence/abandonment, or the likely year. But you should proceed on the assumption that **there is a risk of abandonment as soon as 6-8-10 years and there is certainty of abandonment over a somewhat longer period.**

Therefore, **it is imperative for the SUP to contain protective provisions for what happens to the massive structure, generators, mechanical equipment, 8 foot metal fencing, and diesel fuel containers on the property.**

**Subject:** Amazon SUP 22 03: Amazon SUP is incomplete, insufficient,  
 and untrustworthy  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Town Council:  
 Please consider these comments and include them in the official record of the public hearing on Jan 10, 2023.

From the very beginning, Amazon's initial SUP application had all the hallmarks of Amazon's expectation that approval was a slam dunk, that they had assurances their application would be approved without normal requirements, that Amazon did not have to comply with all the SUP requirements that are necessary for any other applicant.

The original Amazon application was NOT COMPLETE. **The Application did not have a noise study, nor a water, sewer, stormwater impact analysis studies or lighting plan and Staff was unable to provide an analysis on all of those due to the omissions in the file even as of 11/15/22 in their Staff Report and Analysis.**

The fact that Town staff certified the application as complete does not make it so, when the evidence of incompleteness is overwhelming. It is merely an indictment of the Town officials who directed the Town staff to find it complete, in the face of plain and clear evidence to the contrary. In good conscience, you should not acquiesce in this falsehood.

Even a month after the staff accepted Amazon's application on May 6, Denise Harris identified a list of items that are missing from the SUP criteria - many of which still are.

You should be well aware of the missing items and the inadequate, unreliable, and insufficient information. It is a long list, including the lack of a noise study, an unreliable and unacceptable balloon test, missing information on elevations, tree information that

has not been updated for the deleted substation, altered land use documents, and nothing on what happens to the data center when Amazon ceases operation. Most important of all, the only noise study ever submitted was quickly acknowledged by Amazon to have been a mistake, which should not have been submitted, after the study was shredded by Dr. John Lyver for invalid physics, incorrect use of tables, irrelevant information from Gainesville, and myriad other failings.

Citizens in this town and county are watching closely. We have done our homework and watched closely what happened in 2021 and what is happening today. There is anger and outrage about the abuse of process, the Town's closed door meetings with Amazon, the preferential treatment of Amazon, FOIA redactions that withhold information from public view, the prospect that the Town's noise ordinance will be ignored and violated, and the precedent that all of this sets of the future.

**Amazon's application and their behavior are an insult to you, and to all of the citizens of this Town and County. It reflects unmitigated arrogance and disdain for this small town and all of us. You are being "bought" by Amazon, perhaps not in a personal financial sense but in the sense of the lure of uncertain tax revenues. Do not sell your Town down the road. There are better ways to raise revenues, ways that honor the special character of this small, historic Town.**

Do not approve the Amazon SUP. On behalf of good government and the citizens who are watching closely, deny this application.

This is almost certainly the most important Planning decision ever to be made in the Town of Warrenton. It will have consequences and precedents that will reverberate forever. It will be your legacy, for better or for worse.

**Subject:** Amazon's New Offer re Noise Town Conditions for Proffers  
**Importance:** Normal

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Town Council -  
 RE: Amazon SUP 2022-03

According to Heather Sutphin, Amazon has come forth with an offer to switch the cooling technology for its proposed data center on Blackwell, in order to comply with the Town's noise ordinance.

Surely, this constitutes a proffer on Amazon's part, and both you and Amazon must comply with the Town's conditions for proffers, below (note especially highlighted portions).

Even if it were not required by Town ordinance, **it is absolutely essential that there be a thorough vetting and opportunity for public comment at a future public hearing on this switch in the technology for cooling the data center. At the minimum, a noise study is required (a legitimate noise study, one that uses physics correctly, and one that can be analyzed by citizens and objective experts), as well as probing for potential water and other impacts. YOU MUST NOT VOTE ON TUESDAY NIGHT on a switch of this magnitude, without full public notice and opportunity for comment.**

WARRENTON TOWN ZONING ORDINANCE  
 :

## 11-3.9.17 Conditional Zoning

....

### 2. Proffered Conditions.

As a part of an application for rezoning or amendment to the zoning district map, the owner or owners of the property involved may, prior to a public hearing before the Town Council, voluntarily proffer in writing such reasonable conditions, in addition to the regulations provided for the zoning district or districts as herein set forth, as he deems appropriate for the particular case to address impacts of the proposed use.

For the purpose of this Ordinance, proffered conditions may include written statements, development plans, profiles, elevations, and/or other demonstrative materials. Materials of whatever nature and intended as proffers shall be annotated with the following statement signed by the owner or owners of the subject property: "I (we) hereby voluntarily proffer that the development of the subject property of this application shall be in strict accordance with the conditions set forth in this submission unless an amendment thereto is mutually agreed upon by the Town Council, and the undersigned."

### 3. When Proffers Are Made.

Proffered conditions should be submitted for Staff review as part of the initial application for rezoning..

Proffered conditions made at the Planning Commission meeting shall be forwarded to the Town Council prior to the Council's public hearing.

To be considered by the Planning Commission, proffers must be submitted with the application prior to advertising for public hearing.

11 - 32 Updated April 2022

### 4. Contents of Proffer.

Proffered conditions shall be signed by all persons having an ownership interest in the property and shall be notarized. Proffered conditions shall contain a statement that the owners voluntarily enter into the proffers contained therein.

### 5. Review and Revision of Proffered Conditions.

Additional conditions may be proffered by the applicant during or subsequent to the public hearing before the Planning Commission, provided however that after proffered conditions are signed and made available for public review and the public hearing before the Town Council has been advertised (whether or not jointly held with the Planning Commission) **no change or modification to any proffered**

**condition shall be approved without a second advertised public hearing thereon.**

6. Modifications to Proffers.

After the Town Council's public hearing has been advertised, should additional or modified conditions be proffered by the applicant, which conditions were specifically discussed at the public hearing before the Planning Commission, then a second public hearing need be held only before the Town Council before the application and the modified conditions can be reviewed and acted on by the Council.

7. Additional Conditions.

Should additional conditions be proffered by the applicant at the time of the public hearing before the Town Council, which conditions were not addressed at the public hearing before the Planning Commission, or **if the proffered conditions are modified beyond the scope of any conditions considered at the public hearing before the Planning Commission, the application shall be the subject of a second public hearing before both the Planning Commission and the Town Council, which hearing may be held either separately or jointly.**

**Subject:** Please VOTE NO to data center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I will be short and concise. My husband and I moved to the Warrenton area of Fauquier County from Northern Virginia 18 years ago because we fell in love with the rural, country feel and the historic heritage of this area. Data centers and massive power lines are the antithesis to all that the Warrenton area represents. Please do not go down that road. Do not even open the door... "Just one" data center leads to more and more... we see this in our neighboring counties. Please VOTE NO TO AMAZON DATA CENTER IN FAUQUIER COUNTY.

Thank you,  
Mary Kasky

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Councilman Heroux and other Warrenton Officials,

Councilman Heroux should recuse himself or be recused of voting in regards to Amazon's application for a SUP. There is a serious conflict of interest both because he is VP at Definitive Logic and because of his connections with PATH, which just received millions from MacKenzie Scott. It would violate the Town's Code of Ethics if he casts a vote on this matter.

Thank you for ensuring a just vote!  
Erin

**Subject:** Data centers

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing in opposition to town council approving the Amazon data center SUP, mainly because there is not enough information about this project which could significantly and adversely affect the Town and Fauquier County. Specifically, how does the data center comply with the comp plan? How does putting a facility that looks like a prison at the town entrance way comply? Information is incomplete regarding the noise that would impact the community. Little is known about the considerable electric power resources needed for the facility which seem to be a moving target. Power that all rate payers would have to pay and would amount to twice the power consumed in Warrenton for residential uses. Significant emissions from power generation including huge generators would degrade our county's clean air. What is anticipated for transmission lines and substations? What is the game plan for additional data centers which will appear to be in the works? With Prince William and Loudoun rapidly paving over their diminishing open spaces and farm lands with data centers, why should Warrenton and Fauquier follow their lead destroying our quality of life and rural economy especially when the income from data centers (which is another unknown for the pending Warrenton facility) evidently hasn't kept property taxes from rising in those counties. I ask that you follow the advice our your own planning commission which has basically indicated that a vote for the SUP would be arbitrary and capricious and not in the best interests of the town or the county. Best regards James Rich, The Plains

Good afternoon Ms. O'Donnell

Thank you for your note. As I have previously stated, I am working with the Town Attorney to provide the necessary and required certifications regarding the concern that has been raised regarding conflict of interest.

As for the PATH Foundation, I am neither a paid employee nor a member of the Board of Directors of PATH. I sit on the Community Advisory Committee in a volunteer capacity. I represent Warrenton Baptist Church as a Community Deacon. As a Community Deacon, I spend a lot of time working with and in some of our most economically challenged and forgotten citizens in the Town and county. I share that perspective with the CAC team. The CAC meets every quarter and discusses various issues affecting the health and well-being of our community. I do not apply for PATH Grants nor am I asked to review or grant awards. The CAC has no decision-making authority whatsoever and is used by PATH to gather insight. I have never been briefed, asked to approve, or asked my opinions on any donation made to PATH. I am failing to see where the conflict-of-interest connection is.

Thank you

Jay

Jay Heroux  
 Ward 5  
 Town Council

**Subject:** Amazon SUP

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good Afternoon,

I have written before and have closely been following the Amazon Data Center proposed SUP, town council meetings, planning commission notes, etc. I still have some concerns that I would like to be noted as part of the proposed Amazon Data Center.

Amazon's SUP still lacks significant required information and detail per the established Special Use Permit Requirements. The application should not be considered until a complete and detailed application has been submitted for approval. In addition, no details have been given on the environmental impact and no Environmental Impact Assessment was completed as part of the application. I also know there are many issues around the noise study - or lack thereof. This is a big concern of mine and should also be for the council.

The Dominion power lines that are being proposed to run through the county, as we are being told, are directly related to the data center. The amount of concern from county citizens around these powerlines is substantial. Warrenton Town Council does not get to decide where the high tension power lines will be placed to service the Data Center (options running through our neighborhoods, one option runs through my own). The SCC will determine where the lines run and approval of the Amazon Data Center places a huge burden and battle on Fauquier constituents to contend with Dominion and SCC about power line routing locations as well as above ground vs. underground.

To summarize, I am highly opposed to the proposed Amazon Data Center, as well as the power lines that would be required along with it and would like the town council to take their constituents' concerns into consideration and deny the Amazon SUP. I also would like to add that I grew up in this town, then moved away...only to decide to move back with my husband and grow our family here because we LOVE Warrenton and Fauquier County...and we love it for the same reasons many of us do. The small town feel, the friendly people and strong sense of community. This Amazon 'battle' has really shown me even more how close this community is and I am very proud to see how folks have come together in an effort to not let a data center, and huge power lines, ruin the look and feel of a community that we all love. Please do not let us all

lose faith in our town leaders by approving this SUP, that your citizens are overwhelmingly against.

Thank you,

Samantha Handlin

**Subject:** Jesse Straight against Amazon Data Center

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hello all!

Thank you for all your work!

I am not a resident of the town of Warrenton--I live 3 miles south of Warrenton. But I know Warrenton as my hometown--and our lives and the lives of our friends and family will be significantly affected. And there will of course be consequences in the county.

Please vote to deny this SUP.

Here were my comments to the Planning Commission against the Amazon Data Center.

I have copied my speaking notes below.

I.

Hello, my name is Jesse

Straight, I am the owner and lead farmer of Whiffletree Farm which is 3 miles down Culpeper Street/Springs Road. Warrenton is my hometown and has been since I was born at Fauquier Hospital 40 years ago. My wife and I have 8 kids and one of my primary goals

in life is to raise my kids in such a way and to promote the good of my community in such a way that my kids can't help but fall in love with Warrenton, and that many of them might be proud to make their lives here.

## II.

I have two points to  
make here.

## A.

There have been a number  
of issues around this application that all seem very significant.

1.

An incomplete application,  
with important questions unanswered.

2.

There are still questions  
around the power lines servicing the building.

3.

A lack of transparency  
in the whole process.

4.

A conflict of interest  
with the former town manager taking a job with the applicant  
after working through the initial stages of this process.

5.

The context being that  
we are dealing with an applicant with great power and influence  
and with lots already at stake.

6.

With all these things

being the case, any reasonable person wouldn't blame us for not trusting this process to date.

B.

My second point is that from what I do know of this project is it is what my Fauquier High School Civics teacher Mr. Jacobs would call a "no-brainer" bad idea.

1.

Why in the world would we want to put such an ugly, inhumane eyesore at the entrance to our town? Even Manassas and Leesburg don't put data centers in their towns--this being a low bar to beat.

a.

In regards to preserving our beauty and character, it is hard to think of a more demoralizing move. This town is only as good as the good people who live here and work to care for it. If we as a community make moves like this that desecrate our beauty and character, there is only so much that good people will take. Eventually they will lose heart and quit, or move away to a place that has cared better for itself. Therefore, in this decision, you have before you the option of showing all these people who have cared and worked that they don't care and work in vain, and that we have a community that cares more for substantial long-term good over short term gains and the influence of outside powerful forces. In other words, you have the opportunity to make this more of the type of community

that my children will be proud to keep caring for.

III.

In conclusion, I ask

you to reflect on your roll—which as I see it is fundamentally to consider the true long-term good of Warrenton. And your legacy and conscience will be judged on that basis. Is this really what is the long-term good of

Warrenton? As I said before, I would

hope you also see that the answer to that is a no-brainer.

IV.

Thank you again for

your service to our town!

Jesse Straight

**Subject:** DECLINE AMAZON say no!

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

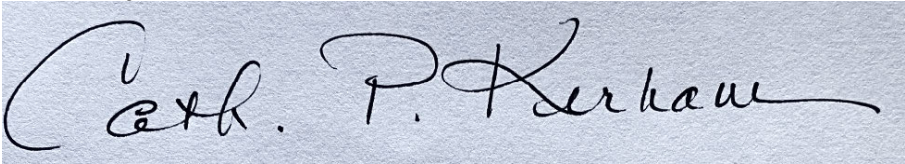

Dear Warrenton Town Council,

I am opposed to Amazon's plans to build a data center at the northeast gateway to Warrenton. **It has no place at this location and will adversely impact the health, quality of life, and property values of those who live near it.**

To make matters worse, the application is incomplete and the Town Council appears to be bending over backwards for Amazon while ignoring the almost unanimous opposition to this data center among Warrenton residents. For example, the town is considering giving the company a pass by not requiring compliance with its noise ordinance as part of the approval process, and doesn't even know how power would be supplied and which neighborhoods would be affected and how.

I respectfully suggest that your responsibility is to listen to those who elected you and not to a company that is earning a reputation for breaking the rules or trying to make its own which ultimately harm communities and neighborhoods across northern Virginia. **Please vote no on this special use application so that Warrenton doesn't become Amazon's next casualty.**

Sincerely

Catherine P. Kerkam

**Subject:** Follow Up Meeting With Jay Heroux/Comment For 1/10/23 WTC Public Hearing  
**Attachments:** Old Wire Factory.JPG

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Good afternoon Council Member Heroux,

I want to thank you again for meeting with me yesterday. I want to offer some additional thoughts regarding some of the issues we discussed. I've cc'd other Council members as they might benefit from the exchange. My thoughts are as follows:

**Fauquier is an agricultural/rural community.**

Fauquier County is very different from Loudoun, Prince William, Fairfax and Arlington Counties. Our residents and our elected officials both within the County and Town have taken great effort to preserve our rural landscape. Just outside of the Town of Warrenton limits are rolling fields and cow farms.

As of 2020, Fauquier County had over 100k acres of land in conservation easements. Fauquier County prides itself on its agricultural based wine industry (and more recently brewery industry) and equestrian events. Advertising efforts to attract visitors to the area focus on these industries as evidenced by the Fauquier County visitor video:

<https://www.youtube.com/watch?v=aPIGIzkrq9o>

The video encourages visitors to "take a breath", enjoy the "fresh air" and "breathtaking landscapes", visit our "**charming rustic towns and villages**" and "world class equestrian recreation" events. Fauquier County is the "best of Virginia horse and wine country."

The main page of the Warrenton website espouses those ideals as well:

"Welcome to Warrenton, Virginia!

Founded in 1810, the Town of Warrenton is a great place to live, work, visit, and discover history. The Town is the star of the Piedmont with the Blue Ridge Mountains as its backdrop and shopping, vineyards, and horse country on its stage. Town representatives and staff work with an actively engaged citizenry to continuously improve services in an affordable manner. We look forward to your participation in helping us accomplish our mission: providing public safety, economic opportunity, and quality public services in an attractive, well-planned community for the benefit and enjoyment of all."

Warrenton is the heart of the County, and benefits from visitors patronizing their businesses and restaurants. Local tourism would be impacted by data center development and the power lines that would come with them.

**If the Amazon data center were to be approved, this would set the precedent for additional data centers to be approved in the Town of Warrenton.**

As you are likely aware, two additional parcels are already being advertised for data centers in Warrenton - one just north of the Amazon site and one at the old wire factory (see attached document).

- According to the article below from July, owner David Dobson suggests 8 data centers could be built at the two locations.
- The article goes on to say that if they were built out to their marketed potential they could create 1.2 million more square feet of data center space inside the town's boundaries – more than five times the 220,000 square feet already proposed for an Amazon data center off Blackwell Road.

On what grounds could the Warrenton Town Council deny these data centers if the Amazon data center were to be approved? The Town would be opening themselves up for lawsuits.

[https://www.fauquier.com/news/in-addition-to-amazon-purchased-land-two-other-sites-in-warrenton-are-being-marketed-for/article\\_1168f7b2-f962-11ec-b370-7ff431bfce4b.html](https://www.fauquier.com/news/in-addition-to-amazon-purchased-land-two-other-sites-in-warrenton-are-being-marketed-for/article_1168f7b2-f962-11ec-b370-7ff431bfce4b.html)

<https://www.datacenterdynamics.com/en/news/two-further-sites-in-warrenton-virginia-being-offered-for-data-centers/>

**Higher Revenue Potential For Mixed-Use Development**

It is my understanding that the mixed-used development proposed for Walker Drive would have brought in \$2-3M per year to the Town. Amazon has not made tax revenue projections public, but the Fauquier Times has thrown out a \$1M/year figure. If accurate, the Town can expect more revenue from a mixed use development.

**Mixed-Use Development Would Create Long Term Income vs. Data Center Will Likely Become Obsolete**

With technological advances, the need for 6 acre/220,000 sq ft data centers will wane. At that point, Warrenton will be left with a large empty building (or multiple buildings) that will no longer provide tax revenue. The Town will then be looking to convert these buildings to other uses that would provide income. It would cost Amazon/other owners more to graze the building(s) than what they would get from selling the land. Potential buyers will not want to bare the massive expense to repurpose these buildings. What will the Town of Warrenton do then?

I welcome further discussion regarding these points or the Amazon data center application in general.

Thank you for your consideration,

Denise Schefer  
Fauquier County Resident since 1997  
Highlands Townhouse Owner

**Subject:** Warrenton Data Center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I am writing to urge the Council to decline the request to approve the massive data center in town due to the noise and vibration that will be caused by the center. The noise will be a permanent loss of the quiet that is a part of Warrenton and once lost, cannot be regained. Approval of this proposal will permanently change Warrenton's small-town appeal and Fauquier County's rural character, and significant noise and visual impacts will affect citizens and visitors alike. Citizens and visitors arriving from the East will be greeted by a fifty-foot-high building on an elevated site, right at the eastern entry to Warrenton. The data center and power lines will be visible from many parts of both Warrenton itself and the surrounding countryside.

Please don't sell out the town for such a short-term financial gain at the expense of the town, its quiet nature, and its residents.

**Subject:** Comments on Amazon SUP Related to Substation Location

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Mr. Mayor and members of the Town Council,

Thank you for the opportunity to submit these written comments. I am submitting these comments in the pdf attachment below, elaborating on my recent email communications to you regarding concerns about locating a substation on the property associated with the 615 Falmouth St. address. Since the Dominion Energy representative stated at the December work session that the need is due to the Amazon SUP for a "data center" in town and would not be needed otherwise, please include this in the public record for the public hearing on this topic for the upcoming Town Council meeting.

The following is a summary of my comments:

At the December work session, Mr. Precker, the Dominion Energy spokesperson mentioned that the following are criteria they considered in choosing Options 1 and 2, the locations for a 5 to 10 acre substation, which he also linked directly to the electricity needs of the AWS "data center":

- 1) Avoiding wetlands,
- 2) Avoiding areas of storm water drainage, and
- 3) Access (which includes expansion, as he stated)

My comments focus on why that site is not suitable for an electrical substation for two reasons: 1) It goes against Dominion Energy's own criteria for site selection, and 2) it goes against the Warrenton Comprehensive Plan.

The middle of the property contains a pond surrounded by wetlands comprising several acres. They, in turn, are part of a storm water drainage system that also encompasses the land all the way to the northeast boundary of the property (the part that borders Old Meetze Road) to drain rainwater off significant parts of Falmouth Street and Old Meetze Road. Given that the wetland and storm drainage acreage comprise a large swath of the middle of the property, that leaves little room for future expansion of the substation unless Dominion disregards criteria 1 and 2. It is also unlikely that a 10 acre substation could be built without impacting the wetland or storm drainage areas. So why does Dominion Energy prefer this site? It goes against at least two of the three criteria, if not all three, that Dominion representatives stated to you at the work session.

The comprehensive plan calls for housing on that property and recreational and green space connecting the residential neighborhoods to the northeast with the Greenway. The current storm drainage area, the wetlands and ponds, could be incorporated into the residential area and the Greenway as recreational and green space.

Permitting a substation on the property substantially increases the likelihood that computer server warehouses, "data centers," will be built on the rest of the property. Permitting either conflicts with the Warrenton 2040 Comprehensive Plan.

For the record: I am opposed to siting an electric substation (for the reasons cited above) on the property at 615 Falmouth Street. Separately, I am opposed as well to siting "data centers", as the landlord has advertised, on this property. I oppose the latter

for reasons of noise, as I first expressed at the August 2021 Town Council meeting and again at the December 2022 meeting, for any property adjacent to or across the street from residential properties— particularly this one because of its extremely close proximity to residences. Old Meetze Road is a narrow two lane street and about 40 feet separates the property from the homes across the street. Moreover, homes and townhomes on Falmouth St also are directly across the street from this property and the homes of Monroe Estates are close by. Furthermore, two sides of Alwyngton Manor share a boundary with the property.

Thank you.

Sincerely,

Steve Wojcik

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To members of the Warrenton Town Council,

I have been a Fauquier County resident (Marshall) for 40 years and am writing to urge you most strongly to vote to disapprove the proposed Amazon data center. My reasons go beyond the many uncertainties pertaining to this particular proposal though it would be the height of irresponsibility to approve a project around which so many unknowns remain.

The even bigger concern however, is that approving this proposal would open the door to a tidal wave of followers. Once the precedent is set that the county welcomes these facilities, there will be no way to prevent dozens of others from following suit. Fifty years of effort by many dedicated citizens and elected officials to protect the magnificent rural character of Fauquier Cty would be put in severe jeopardy, at best. One has only to drive a few miles to Loudon county to see what our future could look like. In the shorter term, you would see dozens of land owners racing to put their land for sale for upwards of \$1 million/acre while others, suffering from the presence of towering electric lines (and likely paying their added costs) will see their homes' values slashed.

Thank you for your attention

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Councilman Heroux,

It is difficult for me to imagine what sort of certifications could be provided that would ensure there is no conflict interest. This sounds like the set-up for major problems down the road. The idea that you are receiving business from Amazon, but could somehow vote in good conscience and expect people to have confidence in your honesty is frankly absurd.

McKenzie Scott donated \$15 million to the PATH Foundation. She is from California. How on earth did she even learn about PATH? The donation was obviously a move to grease the wheels for the data center. It is absolutely scandalous for you to give a 'yes' vote to the SUP, Councilman Heroux - much more reflection on Amazon than on you, but if you vote in favor of the SUP you become party to the crime. If you do choose to recuse yourself, you would gain my trust and I am sure trust from a lot of other people here in Warrenton.

We need to be able to trust our elected officials!

Dear Councilman Heroux and other Warrenton Officials,

Councilman Heroux should recuse himself or be recused of voting in regards to Amazon's application for a SUP. There is a serious conflict of interest both because he is VP at Definitive Logic and because of his connections with PATH, which just received millions from MacKenzie Scott. It would violate the Town's Code of Ethics if he casts a vote on this matter.

Thank you for ensuring a just vote!

Town Council  
Town of Warrenton, VA

Re: Public Hearing to discuss the Special Use Permit requested by Amazon

Attention Council Members:

As you are aware, there are a considerable number of concerns about various aspects of this issue and significant opposition, as has been demonstrated by the petition to that effect and the many speakers and others in attendance at the Hearing. The purpose of my comments is to support the call to not approve the Special Use Permit (SUP) requested by Amazon in that it has been demonstrated, thus far, that it is incomplete, at best, and full of unverified and bad information.

Given the concerns raised by the many speakers at the Hearing, as well as the concerns/reservations expressed and implicit in the denial action by the Planning Commission, it would seem inconceivable that approval of the Amazon request would be made. Perhaps, Amazon could be advised to restart the application process - *but with a more suitable site in mind* - and, this time, with complete and trustworthy data/input.

There is too much at stake to make a hasty decision and/or ignore what appear to be legitimate concerns, some of which I will mention below. It also should be recognized, and agreed to by the members of the Council, that the legitimacy of any concerns/issues raised should be based on the merits of the issues themselves versus a consideration of where the people live who present/raise them or by the number of instances they are mentioned.

Any proposed 'changes' offered by Amazon and/or Dominion, also need to be thoroughly examined. What, on the surface, may appear to be an accommodation may, in the long run, present and/or add to other problems, such as setting up the Town of Warrenton for multiple Data Centers, irrespective of the particular sites, and their associated problems.

Careful attention must be paid to the language used, such as the terms Distribution lines vs Transmission lines. For example, instead of an offer by Amazon to pay for the undergrounding of 'all' electrical/power lines (which would include Transmission lines), an offer by Amazon stipulating only Distribution lines is relatively meaningless in that, it is understood, under Dominion's policy, Amazon would be required to pay for that anyway.

There may not be anything new presented at the Hearing. You have probably been exposed, in one way or another, to all of them by now. So I will not go into detail discussing them. Rather, I will just list some of the more prominent concerns that have been identified, thus far, that I am aware of.

- \* One concern calls into question the whole administrative (rezoning) process that allowed this to come about in the first place. That may not weigh that heavily on the direct consideration of the Permit; but, it is out there and, in a way, overshadows the whole process.
- \* Continuing weak, shifting, information from both Amazon and Dominion is another. It almost seems as though it was considered, by them, to be a 'done deal' from the beginning; so that more thoughtful, detailed, professional input by them wasn't that necessary.
- \* The whole setting of the proposed Data Center, aka known as the 'viewshed', has been called into question. Is the proposed site one of those that has/had been identified as appropriate for that kind of development? I think the term 'industrialized' has been used to describe such sites/areas. I will not even bring up the ludicrous 'balloon test' results offered by Amazon.
- \* Also, what has become a major issue is the 'noise' that will be generated. It is understood that, as a result, some changes have been offered by Amazon; but, again, these need to be looked at in detail and in context. For example, noise measurement may be one thing at a relatively early stage of development; but, an entirely different matter once the Data Center would be in full operation.
- \* The impact on nearby property values needs to be seriously considered. Speaking of 'value', the proposed tax revenue needs to be carefully examined, as well. In the end, it may not turn out to be what is being speculated/projected. Have the experiences, relative to tax revenue from Data Centers, in other locations/counties been explored? Especially, as concerns what was projected and what actual revenue has been received!
- \* Finally, another thing to consider is the projected advancement in technology. Already, there is talk of a time in, perhaps, the

not too distant future that will call into question the need for so many Data Centers or even, at some point, any at all! What happens then to all those structures and the related investments?! It is speculated that Amazon, and other such companies, already have depreciation related procedures/processes in place that eventually would result in no tax revenue being generated at all. The location(s) of such facilities would end up being stuck with the stereotypical 'white elephant(s)'.

As has been demonstrated, there are many things to consider and, given the importance of this decision relative to the precedent it will set for further/future applications of this nature, it is imperative, in the discharge of your duties, to get it right the first time - Deny the Amazon Application.

Respectfully submitted,

Tom Daily

Dear Fauquier County Town Council ~

Although I am not a resident of Fauquier County, I am contacting you to plead with you to **deny the application for Amazon's Data Center.**

As a resident of neighboring Loudoun County, I know first-hand of what an eyesore the data centers are, and of how they seem to keep multiplying.....if you say 'yes' to one company, you end up saying 'yes' to another and another and another. Companies claim the data center will provide jobs and money by way of taxes paid. But each data center employs few workers, and depreciation begins the minute the building is complete. The positive economic impact of a data center will be brief, but the stain that it leaves on the county will remain for years to come.

**PLEASE learn from mistakes made in neighboring Loudoun County. PLEASE SAY NO TO DATA CENTERS.**

Sincerely,  
Karen W Belle

**Subject:** Please Deny Amazon Data Center Proposal

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

As home owners and residents of Fauquier County, we are dismayed by the idea of allowing a Data Center to be constructed at the northeast gateway to Warrenton. Data Centers in other locations are known for their noise and their consumption of power. A Data Center would put a strain on our power grid, add to environmental pollution and will adversely impact the health, quality of life, and property values of those who live near it. Please vote no on this special use application.

**Subject:** Amazon Data Center Call to Action

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Town Official(s):

I moved to Warrenton a little over a year ago with my family. I moved away from an area that was congested and was dotted with abandoned businesses, some of which were data centers. One reason for our move to Warrenton was because it was the opposite of the area from which we came. It pains me greatly to hear of the possible data center development, and what that could mean for the wonderful community that Warrenton is currently.

I join with my neighbors and friends in opposition to Amazon's data center on Blackwell Road. It has no place at this location and will diminish everything that is special about Warrenton and Fauquier. It will harm the health, quality of life, and property values of those who live near it. It opens the door to an onslaught of more data centers.

Please vote no on Amazon's application.

Sincerely,  
Marie D. Russo

**Subject:** Public Record Comment for Town Council Meeting on 10 Jan 2023

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Warrenton Town Council,

First, I would like to express my distress and disgust for the way the town council treated the planning commission. In its rush to force this terrible Amazon Special Use Permit (SUP) through no matter what the consequences, the town council and town lawyer threw the planning commission under the bus and put undue and entirely inappropriate pressure to rush this appalling SUP through the deliberative process. But when push came to shove, the planning commission voted against this incomplete, misleading, and deeply flawed SUP, and for very good reasons. This town council, the majority of which apparently decided on this project a long time ago, appears set to go against the town's approved comprehensive plan, the planning commission, and the fervent opposition of literally thousands of town and county citizens. I suspect this whole process over the last year has been nothing more than window dressing and smoke and mirrors for something many of you decided to push to fruition come hell or high water.

Although this council, or at least a majority of its members, appear to have already decided this matter, I am writing this to register in the public record my 100% opposition to this misguided and destructive SUP. If any of you are still genuinely considering the many demerits of this application, I can summarize just a few of the many reasons you must, repeat, must vote AGAINST this appalling idea.

- The Amazon SUP is deeply flawed, incomplete, misleading, and grossly inadequate for a far-reaching project of this magnitude and impact. As an example, it still does not contain the required noise study. And there is no

enforcement mechanism to make Amazon ever comply with town noise regulations.

- The Amazon SUP runs entirely counter to the town's comprehensive plan for development of this area.
- The proposed data center will have significant negative noise and visual impacts on Warrenton and nearby areas of Fauquier County, thus significantly impacting quality of life and property values.
- The power for this data center cannot be determined for sure and may involve miles of dreadful 130-foot tall power towers across the county and town, absolutely blighting whole swaths of the area, including homes, farms, woodland, and Piedmont scenery.
- If this data center is approved, almost certainly many more will come, destroying what makes it special here -- the small town, rural, scenic, and agricultural features that most citizens love about this area.

In summary, approving this SUP turns much of Warrenton and nearby Fauquier County into an industrial zone. In a few short years, this area will be just like Gainesville, Ashburn, or Manassas. A yes vote on this SUP is a vote to destroy our town and much of our county.

But you can do the right thing, the responsible thing, and the virtuous thing by providing a clear and decisive NO vote. Future generations will applaud your courage and integrity if you vote NO on this SUP and preserve what makes our town and county special. Or they may curse your names if you push through this monstrous project. The choice is yours. Please don't sell out our town and county for 30 pieces of silver.

Respectfully,  
William Ziegler  
Broad Run, Scott District  
Citizen of Fauquier County since 2005

**Subject:** vote no on amazon data center proposal

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Hello, Warrenton Town Council!

The only potentially positive thing I have heard or read about Amazon's proposed data center is that it will contribute to the town's tax revenue.

I think you can agree that the rest of the news has not been good and that a lot of unaddressed questions have accumulated and many suspicions have been aroused and not much has happened to allay all of this.

Aside from all that, it is obvious that data centers are not in the best interests of Warrenton or Fauquier County. They are not a small business - they are industrialization on a massive scale and would constitute a blight on the rural and suburban nature of our community as well as open the door to further destructive forces.

Do the right thing and vote no to Amazon's current proposal.

Sincerely,  
Pam and Jim Fletcher

**Subject:** No Amazon Data Center Blackwell Rd

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

I live at 226 N View Circle and am firmly against the proposed data center on Blackwell Road.

Over the holidays, i found myself having to pick up a family member in the middle of the night and drove past data centers to see the emissions in the night sky. Is this what we want for the residents living near the data center?

The data center is intrusive and unfitting for the town of warrenton and negatively impacts residents living in the area.

I quote the same questions posed by Mr Sniw in the recent letter to the editor posted by Faquier Now:

-Is this the town we want, where the public doesn't believe its officials will put PEOPLE's interests first?

-How are you adhering to the principles of logic, order, and process... and the principle of trusting in the wise judgment of the citizen to have input into a major community decision ... when you undermine process?

-In forcing people to move out of their homes and incur an unrecoverable loss because of the unnatural presence of this data center, are you committing to social justice and housing for all, or callously neglecting your middle-class neighbors in favor of the richest company on the planet?

-Why should we trust that any purported tax revenues from a data center will offset the sales, meal, and property taxes we already pay?

-Why would you prioritize tax incentives for a corporate behemoth over incentives that could be offered current or would-be small business owners?

-How does adding a major unregulated noise source next to a residential area of town show your commitment to our neighbors' health and sanity?

-How does incentivizing massive power lines through our countryside, farmlands, and wetlands, and planting a massive electrical and water consumer right in town, all for one in-town customer, show commitment to our ecological environment?

-What of Fauquier's commitment to agriculture, given the inevitable cascading effects from this decision?

The public response in recent months has shown you where the sentiment lies within our town. We want honest people, honest processes, and representation of our people's interests. You have seen it and heard it.

Dear  
 Warrenton Town Council Members,

We am writing to express our opposition to the proposed construction of a datacenter in our community. While we understand the potential economic benefits that a datacenter could bring to the area, we am deeply concerned about the potential negative impacts on the surrounding areas, as well as the noise and aesthetic effects on our community.

First and foremost, we are concerned about the power required for a datacenter. These facilities require a significant amount of energy to operate, and will require power lines to be installed. Their construction would likely involve the removal of trees and impact the views of many homeowners.

Furthermore, we are concerned about the noise that a datacenter would generate. The constant hum of fans and cooling systems can be disruptive to residents living nearby, and could negatively impact property values.

Lastly, the proposed location for the datacenter is not ideal for this kind of large-scale industrial operation. It is at the entrance of Warrenton and near a residential area and it would greatly impact the quality of life for local residents, and that area would be even more inconvenienced by the construction vehicles.

We urge the Town Council to consider the negative impacts that a datacenter would have on our community, and to carefully weigh the potential economic benefits against the potential harms. We ask that you take this proposal in consideration and take the residents concern in account while deciding if this is something that would be beneficial to the Warrenton community.

Thank you for your time and consideration.

Sincerely,

Luis and Staci Albisu

Dear Town Council Members,

Thank you for your service to our town. My family lives a few minuaway from where you will be voting, for which we are deeply grateful.

The integrity of small towns like Warrenton is under attack across the country. I am sure you have seen one you once knew lose its individual charm or die on the vine.I know you want to see Warrenton thrive. I imagine you think the Amazon taxes will help this happen.

I am not against data centers or well-designed development that takes into consideration the long-term effects of the project. This is not such a project.

This proposal represents a Faustian bargain, and our children will be paying the price in the loss of the very essence of our town.

This has been, as you know, a difficult process, and for many reasons, has eroded the bonds between much of the citizenry and those representing them. These bonds are difficult to repair.

Please do the right thing and vote no. This will repair those bonds and help us make a fully informed decision on future data center proposals .

Respectfully yours,  
Bernardine Clark  
Menlough

I have lived in Fauquier County for 34 years and would like to voice my disapproval of the proposed data center. Fauquier is a rural county at present with unsurpassed acreage and bucolic scenery. To open the door to this type of development would destroy the peaceful environment so many have endeavored to maintain. One only has to look at Loudoun and Prince William counties to see the negative impact data centers have brought to their communities. I urge you to vote NO on the proposed data center.

Sincerely,  
Sue Hays, resident of Hume

Good morning,

I fervently oppose the Amazon data center and hope that you will vote against its construction.

From my understanding, there is no concrete evidence pertaining to actual, instead of "projected", tax revenue. Also, the facility would be a nuisance with the noise decibel above town thresholds. All those aside, a data center, right in the heart of town would be an unsightly monstrosity. I moved to Warrenton because I longed for the small town feel and friendly residents, a data center would take all those away

Secondly, I ask that Mr. Heroux recuse himself from any discussions and votes involving the data center. He is the vice president of a small tech firm, Definitive Logic, which has ties to Amazon Web Services and partners with Amazon on projects. Because of this, he is not able to be objective and unbiased.

Kind regards,

Landy T. Barbera

January 10, 2023

Dear Town Officials,

I join my fellow residents in opposing the proposed Amazon data center on Blackwell Road. Having a young family, I have not been able to attend meetings. As I asked around for more information about the project and spoke with neighbors, a few things were clear:

1. Many residents have limited information about the data center project.
2. Many of the people I spoke with did not support the project, but being very busy with young kids and competing priorities, they had limited time to focus on additional information gathering and attending town meetings.
3. No one I spoke with voiced their support of the project.
4. Only one person seemed ambivalent, mentioning that the need for data centers is growing; however, that person did not go so far as to express support for the data center here.

I spoke with over 20 people, and while that number is small, I am skeptical that there is significant support for this project among our local population. As our representatives, please consider the number of people speaking out against the project in comparison to the number who have expressed support. Have you reached out to your constituents to ascertain their awareness

and ask their position? Is your vote truly representing your community and the town's best interests?

I moved to Warrenton in 2020, attracted by the balance between economic growth and preservation of the county's natural beauty and small-town community. Previously, I lived in Prince William County, where I experienced the consequences of short-sighted economic development plans. While there is a lot I loved about that county, it would be sad to see Warrenton follow in Prince William County's missteps. Those missteps have less to do with the mere presence of data centers and more to do with what businesses are brought into the county, what jobs they offer, where they are located, and how the growth in population and business byproducts is managed. The currently proposed data center on Blackwell Road seems to be a mistake on all those fronts.

I understand the promise of jobs and tax revenue is appealing, yet a majority of those jobs will be temporary construction jobs. With the county's growth and appeal, I believe there will be plenty of temporary construction jobs available here in the future. As for tax revenue, I'm not saying data centers shouldn't be considered. However, do you really want a barren path of massive transmission lines and electrical substations, leading to a data center on a hill at the crossroads entering town as the way we welcome people to Warrenton? I don't.

I ask you to vote "No" on the proposed data center and encourage Amazon to propose a new location. Amazon is *not* concerned about what is in the best interest of Warrenton and its citizens. Naturally, they're looking at their own business interests. As our representatives, I'm asking you to take a stand for our best interests.

Thank you for your hard work and dedication to our beautiful community and its residents.

Sincerely,

Corianne Pafford

**Subject:** Re: Amazon's New Offer re Noise Town Conditions for Proffers

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

For you and the public record of SUP-2022-03

This morning Amazon is presenting a significant new proposal and presenting a large amount of new information. I respectfully request:

1. You must treat this as a new SUP application.
2. You must allow citizens ample time to review and comment especially on the noise and water impacts. We all know Amazon's prior info contained bizarrely incorrect noise information - which was exposed only through citizens enlisting a noise expert to expose bad physics, misuse of tables, and flagrantly false noise conclusions. You must allow time and a PC public hearing to examine this materially new application and new technology.
3. If and when you vote in some future month, you must include all the details of Amazon's technology and assurances IN WRITING in the SUP. John Foote himself has written a book emphasizing that applicants can make false and misleading statements in the process and NONE of them mean anything unless they are incorporated in writing, in firm contractual terms, in a SUP decision.

Sent from my iPhone

On Jan 9, 2023, at 9:21 AM, Cindy Burbank [REDACTED] wrote:

To the Town Council -  
 RE: Amazon SUP 2022-03

According to Heather Sutphin, Amazon has come forth with an offer to switch the cooling technology for its proposed data center on Blackwell, in order to comply with the Town's noise ordinance.

Surely, this constitutes a proffer on Amazon's part, and both you and Amazon must comply with the Town's conditions for proffers, below (note especially highlighted portions).

Even if it were not required by Town ordinance, **it is absolutely essential that there be a thorough vetting and opportunity for public comment at a future public hearing on this switch in the technology for cooling the data center. At the minimum, a noise study is required (a legitimate noise study, one that uses physics correctly, and one that can be analyzed by citizens and objective experts), as well as probing for potential water and other impacts. YOU MUST NOT VOTE ON TUESDAY NIGHT on a switch of this magnitude, without full public notice and opportunity for comment.**

WARRENTON TOWN ZONING ORDINANCE

:

11-3.9.17 Conditional Zoning

....

2. Proffered Conditions.

As a part of an application for rezoning or amendment to the zoning district map, the owner or owners of the property involved may, prior to a public hearing before the Town Council, voluntarily proffer in writing such reasonable conditions, in addition to the regulations provided for the zoning district or districts as herein set forth, as he deems appropriate for the particular case to address impacts of the proposed use.

For the purpose of this Ordinance, proffered conditions may include written statements, development plans, profiles, elevations, and/or other demonstrative materials. Materials of whatever nature and intended as proffers shall be annotated with the following statement signed by the owner or owners of the subject property: "I (we) hereby voluntarily proffer that the development of the subject property of this application shall be in strict accordance with the conditions set forth in this submission unless an amendment thereto is mutually agreed upon by the Town Council, and the undersigned."

### 3. When Proffers Are Made.

Proffered conditions should be submitted for Staff review as part of the initial application for rezoning..

Proffered conditions made at the Planning Commission meeting shall be forwarded to the Town Council prior to the Council's public hearing.

To be considered by the Planning Commission, proffers must be submitted with the application prior to advertising for public hearing.

11 - 32 Updated April 2022

### 4. Contents of Proffer.

Proffered conditions shall be signed by all persons having an ownership interest in the property and shall be notarized. Proffered conditions shall contain a statement that the owners voluntarily enter into the proffers contained therein.

### 5. Review and Revision of Proffered Conditions.

Additional conditions may be proffered by the applicant during or subsequent to the public hearing before the Planning Commission, provided however that after proffered conditions are signed and made available for public review and the public hearing before the Town Council has been advertised (whether or not jointly held with the Planning Commission) **no change or modification to any proffered condition shall be approved without a second advertised public hearing thereon.**

### 6. Modifications to Proffers.

After the Town Council's public hearing has been advertised, should additional or modified conditions be proffered by the applicant, which conditions were specifically discussed at the public hearing before the Planning Commission, then a second public hearing need be held only before the Town Council before the application and the modified conditions can be reviewed and acted on by the Council.

### 7. Additional Conditions.

Should additional conditions be proffered by the applicant at the time of the public hearing before the Town Council, which conditions were not addressed at the public hearing before the Planning Commission, or **if the proffered conditions are modified beyond the scope of any conditions considered at the public hearing before the Planning Commission, the application shall be the subject of a second public hearing before both the**

**Planning Commission and the Town Council, which hearing may be held either separately or jointly.**

Dear Mayor and Council,

I, a town citizen and homeowner, urge you to use common sense and vote NO on the Amazon Special Use Permit this evening. The reasons are obvious and have been spelled out to all of you ad nauseum. I don't need to rehash everything again. Do the right thing for our community, not for your own bank accounts, and simply vote no. The decision is such an obvious one that, if you vote to approve this data center, the entire town will know that your pockets are being lined by Amazon and that there are illegal, shady, backroom deals going on. Don't go down that road. It's not worth it. Do the right thing. Vote no.

Dear Town Official(s):

My family and I have lived in Fauquier County for twenty years, and we have watched the successful maintenance of a rural environment, respecting nature and the citizens who moved here to enjoy the country life. We are standing with our friends and neighbors to oppose allowing Amazon to infiltrate this community and destroy what has been preserved thus far. We are certain that if any citizen of Fauquier wanted to live by data centers, they would move to neighboring counties for the experience. My family and I do not wish for such an environment and will continue to stand up and oppose Amazon's intrusion. We ask each of you to oppose Amazon's data center(s), as well, because they have no place in our county and are, quite frankly, not welcome.

We live nearby the proposed Blackwell Road site, and have been following the process by which Amazon has presented to our community. By allowing Amazon's data center (and surely more to follow), it will harm the health, quality of life, and property values of Fauquier County residents.

We are asking you to please vote NO on Amazon's application.

Sincerely,

Tara Sego-Jelenic

Dear elected official(s),

I am writing to express my opposition to the proposed Blackwell Road Data Center. I am a new Fauquier County resident who was drawn to the rural and small town feel of Fauquier County and Warrenton. Building this data center will not only be detrimental to our community from the negative effects of the data center itself but it will open up the door for numerous more data centers which will cause Fauquier County and Warrenton lose a lot of the charm and beauty which draws young families such as my wife and me to the community.

While it has been discussed that this data center will use underground distribution lines, the additional data centers, which will likely be encouraged to build here by a potential approval of the Blackwell Road Data Center, will require new, tall transmission towers which will ruin many parts of our community.

Sincerely,  
 Joseph Artrip  
 Fauquier County Resident

**Subject:** Amazon Data Center

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

The majority of the population in Warrenton and Fauquier County do not want the proposed Amazon's data center on Blackwell Road. It would diminish many of the special qualities about Warrenton and Fauquier that have already been lost by our surrounding neighbors/counties. It will harm the health, quality of life, and property values of those who live near it. It opens the door to an onslaught of more data centers.

Please vote no on Amazon's application.

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Town noise provisions prohibit new uses where there is any vibration perceptible to human feeling.

Previously and with new Amazon noise study nothing has been submitted demonstrating this Town requirement will be met by Amazon.

WARRENTON TOWN ZONING ORDINANCE

:

11-3.9.17 Conditional Zoning

....

2. Proffered Conditions.

**As a part of an application for rezoning or amendment to the**

zoning district map, the owner or owners of the property involved may, prior to a public hearing before the Town Council, voluntarily proffer in writing such reasonable conditions, in addition to the regulations provided for the zoning district or districts as herein set forth, as he deems appropriate for the particular case to address impacts of the proposed use. For the purpose of this Ordinance, proffered conditions may include written statements, development plans, profiles, elevations, and/or other demonstrative materials. Materials of whatever nature and intended as proffers shall be annotated with the following statement signed by the owner or owners of the subject property: "I (we) hereby voluntarily proffer that the development of the subject property of this application shall be in strict accordance with the conditions set forth in this submission unless an amendment thereto is mutually agreed upon by the Town Council, and the undersigned."

### 3. When Proffers Are Made.

Proffered conditions should be submitted for Staff review as part of the initial application for rezoning..

Proffered conditions made at the Planning Commission meeting shall be forwarded to the Town Council prior to the Council's public hearing.

To be considered by the Planning Commission, proffers must be submitted with the application prior to advertising for public hearing.

11 - 32 Updated April 2022

#### 4. Contents of Proffer.

Proffered conditions shall be signed by all persons having an ownership interest in the property and shall be notarized. Proffered conditions shall contain a statement that the owners voluntarily enter into the proffers contained therein.

#### 5. Review and Revision of Proffered Conditions.

Additional conditions may be proffered by the applicant during or subsequent to the public hearing before the Planning Commission, provided however that after proffered conditions are signed and made available for public review and the public hearing before the Town Council has been advertised (whether or not jointly held with the Planning Commission) **no change or modification to any proffered condition shall be approved without a second advertised public hearing thereon.**

#### 6. Modifications to Proffers.

After the Town Council's public hearing has been advertised, should additional or modified conditions be proffered by the applicant, which conditions were specifically discussed at the public hearing before the Planning Commission, then a second public hearing need be held only before the Town Council before the application and the modified conditions can be reviewed and acted on by the Council.

#### 7. Additional Conditions.

Should additional conditions be proffered by the applicant at the time of the public hearing before the Town Council, which conditions were not

addressed at the public hearing before the Planning Commission, or **if the proffered conditions are modified beyond the scope of any conditions considered at the public hearing before the Planning Commission, the application shall be the subject of a second public hearing before both the Planning Commission and the Town Council, which hearing may be held either separately or jointly.**

**Subject:** Letter to Warrenton Town Council, re: Data Center debate

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Town Council:

The public response to data centers in recent months has shown you where the sentiment lies within our town. More than any specific path to approve or disapprove a data center and its power infrastructure, we want honest people, honest processes, and representation of our people’s interests-- not backroom deals, grift, conflicts of interest, and secrecy.

You have seen it and heard it; **don’t sell a bad bill of goods to the people of this town.**

Increasingly, **Americans have a crisis of trust in institutions.** Who can earn our trust? Who can keep our trust? Who are the honest brokers who care about their constituents and neighbors, advocating for the most discernible common good over powerful special interests?

I learned today that Amazon's attorney, John Foote, teaches other attorneys that they can lie their way into approval, by saying "whatever it takes" to win over a locality like Warrenton. A book he wrote states the following:

- "Truths, half-truths, and outright falsehoods can pepper the legislative record in a battle for governing body approval" [just to get approval granted], but...
- "[none of it] is legally enforceable against the property once the zoning is approved."

I also hear that Amazon will claim tonight that it has concocted a never-before-seen, super-wham-o-dyne, new technology that is going to reduce noise concerns and magically meet the Town noise ordinance (though it has never been tested). Hmm... Coming from a man who out-right justifies **lying to your face**, do you trust this? As an engineer trained to read the reality around me and determine plausibility of a technical solution, consider me skeptical...

**Councilmember, can you be trusted** to represent this wonderful town with honesty and integrity? Are you an honest broker? Where do you stand? Are you an advocate for the big and powerful over the interests and desires of your neighbors and constituents?

Have money and power, coercion, and bribery poisoned the well of Warrenton politics?  
**Will you stand in the breach to fight those lacking in integrity?**

By any measure, due diligence on the part of Amazon regarding the planned data center has not been met. In November, the Planning Commission reasonably postponed a hearing based on an incomplete application from Amazon that does not demonstrate goodwill or good intent to meet the town's basic requirements. The Planning Commission has rightly recommended disapproval of the Special Use Permit. **The commission's job is to assure due diligence.** Yet, some on this council are now considering overriding the Planning Commission and their constituents and strong-arming the many who take umbrage with the backroom deals that have characterized this process. **Why would you even consider overriding the Planning Commission on this contentious issue, in which the applicant has obvious shortfalls?**

Any steps you take on this data center are **precedent** for the next of inevitably **many** data center applications. If you allow Amazon to dictate that this town lower the bar on environmental measures— namely noise, sightlines, and elevations— not to mention the obvious eyesore factor, every other application will rightly see this town's government as a pushover. Soon, Fauquier will be another rubber-stamp-wielding pushover for tech companies, in the infamous line of Loudoun and Prince William Counties. Our town's and county's character will be forever changed, and in a short 10 to 20 years, those data centers will be obsolete.

A few questions for those leaning toward support of the Amazon data center:

- Is this the culture you want engendered in the town you lead, where the **public doesn't believe its officials will put constituents' interests first**, above those of the richest company in the world, located 2700 miles west of here, with no stake in our local community?
- How are you adhering **to the principles of logic, order, and process...** and the **principle of trusting in the wise judgment of the citizen** to have input into a major community decision... when you **undermine process?**

- In forcing people to move out of their homes and incur an unrecoverable loss because of the unnatural presence of this data center, are you **committing to social justice** and housing for all, or callously neglecting your middle-class neighbors in favor of the richest company on the planet?
- **Why should we (the people) trust** that any supposed tax revenues from a data center will offset the sales, meal, and property taxes we already pay?
- Why would you prioritize tax incentives for a corporate behemoth over **incentives that could be offered current or would-be small business owners**?
- How does adding a major unregulated noise source next to a residential area of town show your **commitment to our neighbors' health and sanity**?
- How does incentivizing massive power lines through our countryside, farmlands, and wetlands, and planting a massive electrical and water consumer right in town, all for one in-town customer, show **commitment to our ecological environment**?
- What of Fauquier's **commitment to agriculture**, given the inevitable cascading effects from this one decision?

**I ask you to show diligence in listening to your neighbors and protecting this town, as your neighbors have been pleading for you to do.** The role for which you were elected is to work in support of our town's best interests, which includes shielding your constituents from negative impacts on their daily lives.

The primary concern for many of us is one of PRECEDENT. If Amazon succeeds, after you have driven off your neighbors and constituents with the inescapable and health-stealing hum of massive air conditioning units and peppered our bucolic farmland with industrial waste, we will all be staring at **abandoned and neglected shells and lost agricultural potential**, reminders of the brief Era of the Hulking Data Centers.

- **This data center is intrusive and unfitting.**
- **This data center would be the first of many.**

**We don't need data centers here.**

**We don't benefit from data centers here. Any presumed tax windfall is a temporary and unconfirmed figment.**

**We the citizens of this lovely town and county... do not WANT data centers here.**

Do the right thing. Be the leader we're counting on. **Restore our trust** by listening to your neighbors.

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

To the Warrenton Town Council:

It is obvious at this point that the application Amazon has submitted is incomplete, particularly in relation to the requirement for a noise study. Numerous examples have been brought to your attention of noise from data centers disturbing residential neighbors, so I do not understand how you could move forward in a responsible manner.

Further, the location of the proposed data center would be a permanent blight on the entrance to Warrenton from the east. There is no guarantee that new overhead power lines will not be needed which will impact negatively current property owners.

Is there a projection of the financial impacts of the installation? What is the anticipated net revenue to the town and the county?

Please vote no on the application. It is the only responsible action at this time. I grew up in Fauquier County, went to school in Warrenton and do not wish to see its charm so greatly diminished as it will be if you approve it. Take a drive down Route 50 east of Gilberts Corner (or even better, Ashburn) to see the impact of these monstrosities. Undoubtedly, there are better places to site a data center, or centers if this sets a precedent that will result in their proliferation.

Sincerely,

Michael Morency

Per John Foote in-his own land use book.

It doesn't matter if it is in the record, as Brett Hamby seeming to rely on this morning.

These oral statements mean nothing, per John Foote in his book. Even if they are in Amazon's slides, and even if flatly promised orally.

They only have legal standing if nailed down, clearly, in writing, in the SUP, without clever lawyer weasel words.

**Subject:** Town Council Vote on the Amazon Data Center

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Mayor Nevill and Town Council Members,

The January 4, 2023 edition of the Fauquier Times referred to the Amazon data center application as having travelled on a bumpy road. That is one way, and not an inaccurate way, of characterizing the process that has been under way for nearly two years, as detailed by the Times.

The issues that arise from this account, and which are ones that ought to govern your current deliberations and give you pause for concern, are, in my view, the following:

1. A faulty process largely attributable to Amazon. Much controversy can be traced back to Amazon's late admission that the original noise study, filed in support of the application, was just a draft. It was not marked as a draft in the application, but admitted to being a preliminary study by the applicant when probed for accuracy. The final noise study has not been submitted to this day.
2. The planned data center may conflict with the Town Comprehensive Plan. Hundreds of home owners, directly impacted by the possibility of having the data center at close quarters, and hence being subjected to constant noise, have pleaded before the Planning Commission and your own council, to reject the application.
3. Conflict of interest issues have been raised, and litigation initiated, which further points to citizens' widespread, serious and sustained rejection of this application.
4. A further point is that the entire process has shown that Amazon is less than a good faith applicant. Had that been the case, the application would never have been submitted with the noise issues unresolved. The question arises what sort of counterpart Amazon would be were this project to go forward ? A counterpart that simply forces its way through a permitting process is in all likelihood not one that you would want to do business with to begin with.

5. Finally, Warrenton, and Fauquier county, have a celebrated track record of having dodged the kinds of bullets that have transformed other towns and counties within a short space of time, to places where we would not want to live. No one has regretted the denial of a huge development project at North Wales in the 1960s and in the intervening years caution has governed approvals thus making sure that the town and the county have remained what they are today.

The Town Council has a responsibility to honor that legacy and to look beyond what the possible fiscal advantages might provide in the short term. You are at the helm of a ship that has sailed well for decades in the face of pressures from elsewhere. We only need to leave Fauquier to know what it is that we don't want.

Sincerely yours,

Margrete Stevens

**Subject:** Please Deny Amazon's Application

[EXTERNAL EMAIL] DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Town Officials:

I join my neighbors and friends in opposition to Amazon's data center on Blackwell Road. It has no place at this location and will diminish everything that is special about Warrenton and Fauquier County. I have lived here 20 years and do not want this county to be blighted by this data center. Driving through Prince William County and looking at the giant looming data centers makes me sad, mad and gives me anxiety. If you build one here it will just open it up for more. Please don't let the cancer spread here. It will harm the health, quality of life and property values of those who live here.

I implore you to do the right thing and deny the Amazon Data Center.

Thank you,  
 Marlena Maloney

Dear Warrenton Town Officials,

If you vote to authorize the proposed Amazon data center with its festoon of 240 kv transmission lines at the very gateway to Warrenton and Fauquier County, you will propel us all down a path that will irreversibly change this special place forever. Just this one data center will be an anathema to all of us, but it will also pave the way for an onslaught of acres and acres of forbidding dead zone developments.

After all these months of discovery and debate you are unquestionably aware of the problematic nature of data centers. There will be noise, imposing transmission lines and sterile industrial vistas. What has become obvious in the past year is that this data center will be the first in a deluge that will cascade throughout Fauquier County. It will be the end of a very, very special place.

Please vote no.

**Subject:** For Official Record AWS SUP Public Hearing and Jan. 10, 2022 Council minutes

**[EXTERNAL EMAIL]** DO NOT CLICK links or attachments unless you recognize the sender and know the content is safe.

Dear Council Members,

I request this comment be entered into the official minutes of the Jan. 10, 2023 Council Meeting, and in the official record for the AWS SUP 2022-03 Public Hearing.

Given the new AWS SUP information presented in the work session this morning, and the continued unresolved issues, and still-outstanding, thoughtful information requests on noise etc, it is inappropriate for Council to vote Jan. 10 on the Amazon Data Center SUP. Further, the enforceability of occupancy conditions discussed remains uncertain.

If Council chooses to vote, consider that the proposed use does Not comply with Comprehensive Plan; applicant’s proposed approximately 50 jobs does Not qualify them as a major employer for Warrenton. Further, the issues of water raised for other potential uses, did not take into account the bond resolution to improve the water system; these questions directed toward insinuating other uses are not feasible, are not vetted, and deciding the application without further study on other potential uses for the Blackwell parcel, is a disservice to Council’s and the community’s work on the Comprehensive Plan.

I applaud Council’s direction to staff this morning to re-instate committees and move the work sessions to a date prior to regular meetings. These changes need to be enacted prior to any vote on the AWS SUP. Council and community require time to digest and independently *verify* the Applicant’s assertions and new information from this morning’s work session on the AWS SUP. Last time a noise study was presented by Applicant, it was mis-represented as a true noise study, and only after community validation attempts revealed flaws, it was admitted by Applicant to be a ‘draft’ and faulty study; this admission was repeated again by Mr. Foote today.

Additionally, consider this application, if approved, will likely spur an SUP application for a data center at the Old Wire Factory. The electrification power will be there from the new substation. As consequence of a Council denial of potential SUP application for data center at Old Wire Factory on the heels of an approval for a data center on Blackwell Road, one could argue Council would be acting arbitrarily and capriciously in such a denial at the Old Wire Factory. If you do not want a data center at Old Wire factory, you cannot approve a data center on Blackwell. BOTH locations are inappropriate for a data center, both to Warrenton’s sense of place and our Residents’ quiet enjoyment, by sound and sight, of their homes and their hometown.

One has only to look north to Prince William and Loudon Counties, to know a Yes vote on the AWS SUP, seals the Town And County’s fate to multiple data centers and high tension power lines

throughout BOTH our Town and County, especially given the Town's intent through a Boundary Line Adjustment, to annex several industrially-zoned parcels. Please weigh your decisions; they will be your legacy. This will be recorded in the history of our Town, and there will be no do-overs.

Respectfully,  
Suzan Fultz, Scott District

TOWN COUNCIL WORK SESSION

File: January 10, 2023 AM Town Council Work Session.mp4

1 P R O C E E D I N G S

2 MR. NEVILL: I am on Tuesday, January 10th, I  
3 will call this work session the Town Council of Warrenton to  
4 order.

5 All members are present except for Ms.  
6 Sutphin, who I assume is on her way she will join us shortly.

7 I'd like to introduce our two new members. To  
8 my right, Paul Mooney and to my left is David McGuire.  
9 Welcome, gentlemen. I look forward to working with you.

10 And we will start off with our organizational  
11 meeting. This is a discussion about the election of the  
12 mayor, setting our meeting dates.

13 Good morning, Heather.

14 MS. SUTPHIN: Good morning.

15 MR. NEVILL: And just re-affirmation of  
16 Robert's Rules, which is set by ordinance that we are  
17 continuing to operate under Robert's Rules.

18 So the first discussion is the election of the  
19 vice mayor and Mr. Hartman has expressed interest in  
20 continuing to serve in the role of vice mayor.

21 Is there discussion from council or if there's  
22 any objection, we can just perhaps add that to the consent

1 agenda that the vice mayor shall remain as Mr. Hartman.

2           Okay. Meeting dates resolution, we have  
3 those set as in the packet before us. I don't believe there  
4 are any conflicts that we have identified in those. The  
5 meeting dates can be adopted as submitted as again in the  
6 consent agenda.

7           MR. SEMPLE: Mr. Mayor, I would like to talk  
8 about it.

9           MR. NEVILL: Mr. Semple. Yes, sir.

10          MR. SEMPLE: Thank you.

11           When we set these schedules, we also set those  
12 for our work sessions. And I believe one of the fundamental  
13 problems that we have had in exercising our legislative duties  
14 is that these work sessions occur in the morning, oftentimes  
15 where the matter is considered in the evening.

16           And certainly since I've been on the council,  
17 there have been a number of complex issues that I think require  
18 greater deliberation and which we haven't had. It forces the  
19 council to decide whether at the evening session they should  
20 take it down the road and basically there's an impulse at that  
21 time, as I've seen, to vote.

22           And sometimes I think we've probably voted a

1 little hastily, but that's just my opinion.

2           So I would recommend, and I believe that we  
3 should go back to the original concept that was here for years,  
4 that we hold an evening work session on the Thursday before  
5 the meeting. And the reason -- the additional reason for this  
6 is that it encourages public participation.

7           People working in the morning, most of the  
8 people who come the evening are expecting to hear from us,  
9 but we never say much because we've all talked about it. And  
10 naturally, the only way for them to learn about what's  
11 happened is to go back and review the video. And many people  
12 can't do that or do not find the time to do it. So I would  
13 like to recommend we change the order of these meetings.

14           As background, the City of Winchester holds  
15 its work session the evening after its previous meeting, and  
16 that work session is for the agenda the following month. In  
17 other words, there is plenty of precedent that other  
18 municipalities follow at least some interval between the work  
19 session and the regular meeting.

20           Now, I understand that Fauquier County does it  
21 differently. They hold their work session in the morning and  
22 their meeting in the evening, but they also have scheduled

1 one-on-one meetings to discuss the agenda beforehand with  
2 each supervisor.

3 I think that's impractical for us in many ways.  
4 We are not staffed at the same level. And so I think it worked  
5 before.

6 And I think there's a second issue that I would  
7 also think may be part of the scheduling, and I believe it's  
8 inherent to scheduling is the committees.

9 We have theoretically two standing  
10 committees. One is Finance, the other I think is Public  
11 Safety. And we have not -- we've abandoned the committee  
12 structure. And I think that also reduces what I call  
13 important internal communication between and among council  
14 members.

15 I think the most effective thing I've done with  
16 the council members recently was to serve collaboratively  
17 with Vice Chair Hartman in the nominating the committee for  
18 the Planning Commission.

19 And I found that was really beneficial in many  
20 ways, one of which is to have open dialogues with others on  
21 the council, not in hearings like this, where this is the only  
22 chance we seem to have them, but in settings which affect

1 policy. And I believe that, for example, I've heard that  
2 Culpeper does not even consider a matter before its council  
3 unless it's voted out of committee.

4 So those are the two issues that I would like  
5 to bring for discussion.

6 MR. NEVILL: Thank you. Comments from  
7 council?

8 MR. MOONEY: Mr. Mayor, I'd like to say  
9 something.

10 MR. NEVILL: Mr. Mooney.

11 MR. MOONEY: So in my reading here, I've --  
12 there're a couple things that I was going to bring up a lot  
13 of the things that Mr. Semple just brought up. I think most  
14 of the things that we do here, we need to do, have a legislative  
15 purpose.

16 And if we're concerned about our citizens and  
17 Joe the plumber and the people who we represent, I mean, it's  
18 hard for me to be here in the morning. I have a company to  
19 run and people that depend on me, and it would make a lot of  
20 sense, I agree to move it to the evening before.

21 I mean, in the military and in the Marine Corps  
22 we would never have a staff meeting the morning of briefing

1 the General, and that would give us time to work together to  
2 solve problems and hear from our citizens and hear their  
3 opinions.

4           And I don't know who was on council when that  
5 changed, but was there a legislative purpose to go from a few  
6 evenings before to the morning of, and I think that there's  
7 a lot of legislative purpose to go to maybe the Thursday before  
8 or five days before in the evening so that we can have a public  
9 participatory process. That's my comments.

10           MR. NEVILL: Ms. Sutphin.

11           MS. SUTPHIN: I actually would like to add. I  
12 know when I decided to get more involved, I used to go to the  
13 evening meetings and that's what got me so passionate about  
14 what was going on in the town, was being able to go and be  
15 there during the work sessions in the evening. I was new to  
16 the town council when we decided to do this, and I thought,  
17 well, let's try it. And I think everybody sort of thought,  
18 we'll give this a try and see what happens.

19           Since then, I think I've changed my mind. I  
20 actually spoke to a young lady last night on the phone who  
21 was very confused about our work sessions and about some of  
22 the things that were happening during the work session, why

1 was it changed to one day. So I really think that I've changed  
2 my mind. I think we should change it to two evenings, that  
3 way the public and our constituents could be more aware.

4 I think sometimes it's an extra workload on our  
5 workforce to have to be here and scurry to get all the  
6 information we've asked for them by that evening. I think  
7 it's been a little bit of a stress load on the council,  
8 honestly, because then we have to take off work to be here  
9 all day and it's scurries to do that.

10 So I think there's different reasons for that.  
11 And honestly, I would like to see some of the committees get  
12 back because also that's what our last town council, Jerry  
13 Wood got me on the Transportation and Safety Committee, which  
14 actually got our constituents more involved in the process  
15 as well. So I think too, I agree with Mr. Semple that --  
16 Councilman Semple that possibly these things could be  
17 changed.

18 And now that we have two new councilmen on,  
19 that it would be really good for us to get involved in the  
20 committees and do some different things. And hearing from  
21 what I have heard from different constituents and neighbors,  
22 I think it would be good for them to be more involved in the

1 process and understand exactly, how it is done, how all of  
2 our decisions are made, so...

3 MR. MOONEY: Mr. Mayor.

4 MR. NEVILL: Mr. Mooney.

5 MR. MOONEY: So my last comments were about  
6 the meetings and the work sessions.

7 I would like to follow up Ms. Sutphin about the  
8 committees. I think if we were to start with -- I mean in  
9 my opinion, it's the highest calling of us as local  
10 governments to protect health and safety. And within health  
11 and safety, you have, you know, health safety and the finance  
12 of the town. That's, in my opinion, three of our highest  
13 callings, and I think that might be a good place to start with  
14 those three committees.

15 And I know some of the council members have  
16 great -- they've worked a long time in Law Enforcement and  
17 Public Safety and would be great for that. And I don't know  
18 when or how we choose committee people or whatever, but  
19 there's just fantastic people in our -- that are citizens that  
20 could help with the Finance committee. I would love to be  
21 a part of the Finance committee. That's -- I do finances a  
22 lot. So I don't know how we pick it or what we do, but in

1 my opinion, those might be three committees that we could  
2 start with. I don't know if we vote on this or something.

3 Thank you, sir.

4 MR. NEVILL: Mr. McGuire?

5 MR. MCGUIRE: Yes, Mr. Mayor. I agree with  
6 Councilman Semple.

7 I think we need to take our time with a lot of  
8 these complex issues. We're spending the taxpayer's dollars  
9 and I think if we, you know, sort of cram everything in, maybe  
10 a rush to failure, that we need more time to look at a lot  
11 of these complex issues and look at the fidelity of things.

12 I mean, we just got a report today very  
13 complex, very scientific, things like that. I think we owe  
14 it to the public to have this transparency, to have their  
15 buy-in to what's going on. So I agree with what Councilman  
16 Semple said about having a separate working session and then  
17 having our actual council meeting on another day.

18 And I agree also that we need committees. You  
19 know, committees are the subject matter experts. I met some  
20 of my colleagues this morning briefly, people who've been in  
21 the FBI Academy, things like that. I think we need that.

22 You know, we've got people with long time

1 service, with the Fire Service, you know and OEM, Office of  
2 Emergency Management. So I think we need that because  
3 council members can't read all these things and I venture to  
4 guess, being honest, they probably don't. So I think it's  
5 good to go back to committees. So I think we should call for  
6 a vote on that.

7 I think we should call for a vote on amending  
8 the schedule.

9 MR. NEVILL: And with a work session, and  
10 typically what we would do in such a situation is direct staff  
11 to come back with a report on how to -- how committees would  
12 operate and form, because there's cost association, time, we  
13 need to understand about advertising and get some briefing  
14 on that. So we can come back to the work session next month  
15 with a follow up to discuss meetings determine -- I'm sorry,  
16 committees, what the committees would be.

17 But we should do so after deliberation with  
18 some proper guidance from staff as we have to understand, as  
19 I said, advertising when you have two members, FOIA  
20 compliance, etc.

21 So we will come back with a recommendation next  
22 month, and we can adopt them to select which committees we'd

1 like to move forward with. And then we can also -- if we like  
2 with the request for the meetings for evening again, we can  
3 -- my recommendation would be we continue with this format  
4 next month, but at next month we can determine to operate.  
5 So we're not making decisions on the fly as everyone has  
6 indicated. We don't make rush decisions. Let's have staff  
7 present and, next month we can adopt moving to the two night  
8 format. Is that agreeable?

9 MR. SEMPLE: I do have a question, Mr. Mayor.

10 MR. NEVILL: Mr. Semple.

11 MR. SEMPLE: Aren't these two standing  
12 committees per our town charter?

13 MR. NEVILL: I do not believe that committees  
14 are in the charter. The standing committees.

15 MR. SEMPLE: Are they -- okay. Well, my --  
16 they are listed on our website as two standing committees,  
17 and they've been that way ever since I've been on the council.  
18 So I'm just suggesting that as a proforma matter that at least  
19 those two and perhaps the third, that Councilman Mooney was  
20 discussing, should be considered.

21 But okay, that's fine. That -- but the other  
22 question is, since we are adopting a calendar, will we then

1 address the calendar again once we make the decision on these  
2 matters?

3 MR. NEVILL: The standing -- the regular  
4 council meeting should remain unchanged. And so the -- it  
5 would basically be looking at the calendar to adopt, or add  
6 the work session meetings accordingly.

7 And just on the note of the transportation  
8 committee, my recommendation to council would be that rather  
9 than it be a independent town committee, that it is a joint  
10 committee between the town and the county. We have discussed  
11 this at the Town County Liaison Committee, the transportation  
12 issues that impact our town, impact the region, and that in  
13 order to better form a alliance to work with, and VDOT being  
14 a large organization that it is, that I think if we combine  
15 our forces a joint transportation, particularly with the  
16 impact of Broadview Avenue and the Clevenger's Corner  
17 Development, I think that they would be advisable for this  
18 body to join with the county. And I'd like to request staff  
19 to explore that as well. Unless council has opposition on  
20 that issue.

21 MS. SUTPHIN: I think that'd be a great idea.  
22 I like that.

1 MR. HAMBY: Mr. Mayor, if I could real quick.

2 MR. NEVILL: Mr. Hamby.

3 MR. HAMBY: I think I'm the only one sitting  
4 here from when we had the old system framework to where we  
5 are now. A lot of the -- I was never too partial either  
6 direction.

7 But everybody has to understand I think the  
8 background. The issue that a lot of people had was you were  
9 increasing to four meetings a month, right? So you had a work  
10 session on one night, you had town council on another night,  
11 and each member was on two committees. So that made you  
12 eligible, or required to attend four meetings per month.

13 For some scheduling conflicts and prior  
14 councils, everything was moved to one day to mimic what the  
15 county does.

16 But like I said, I'm impartial. We can do  
17 either direction.

18 Also operating in the old committee format  
19 that we had before, I would ask that we would sit down and  
20 decide or if we're going to have Transportation, if we're  
21 going to have go back to Water and Sewer, or go back to --  
22 we need to really think of a good framework to figure out where

1 we're going to go on committees in the future, and how those  
2 are going to be discussed.

3 But as far as moving from the four meetings a  
4 month to the single meeting per month, that was just what the  
5 majority chose to do at the time.

6 So, like I said, I'm impartial either way. If  
7 the majority wants to move back, I'm fine with it.

8 I would also ask too that the other problem we  
9 had was staff. So I'd like somebody, I assume the manager  
10 to come forward with an estimate because we also had, not only  
11 was it the elected body that was there all these four nights,  
12 it's also staff. So there was a lot of staff time in all this  
13 also. So, thank you.

14 MR. NEVILL: Any other discussion? Mr.  
15 Semple.

16 MR. SEMPLE: I'd just like to add that I  
17 believe the standing committee has met every other month.

18 MR. NEVILL: Also, just like to point out,  
19 just for clarification, that, you know, to assumed, or to --  
20 committees were never eliminated. We moved to committees as  
21 a whole.

22 So the body would meet and anything that

1 would've previously gone to a committee was brought forth to  
2 this body in a work session. So this was not an elimination,  
3 it was not an attempt to prevent legislative discussion. It  
4 was actually an attempt to provide, to make sure that if it  
5 was important enough for a committee, it was important enough  
6 to come to Hall of Council.

7           And a lot of times committees would take on  
8 issues and -- would actually invent issues. And so it became  
9 kind of a place where ideas sort of spun and never went  
10 anywhere.

11           And so the intent of this was to bring in an  
12 efficiency, so that if there were particularly issues that  
13 needed to get forth, the body as a whole deliberated it  
14 together and heard it all together, rather than having select  
15 few understand it first and then bring it forth.

16           So was not intended to eliminate committees,  
17 it was intended to bring every member of this body into the  
18 form of the committee and to -- and create an efficiency. And  
19 as Councilman Hamby said, there are staff time and costs  
20 associated with it. So it was intended to kind of bring forth  
21 a more cost effective form of governance.

22           So I just want to clarify that for the public.

1 MR. NEVILL: Ms. Sutphin.

2 MS. SUTPHIN: And also -- I'm sorry.

3 MR. NEVILL: Ms. Sutphin.

4 MS. SUTPHIN: Also to add to that as well, I  
5 think that, coming into a pandemic had a lot to do with not  
6 going forward with some of the committees as well. We  
7 couldn't even meet here live for our meetings at first. So,  
8 going into a pandemic we didn't exactly know what we were  
9 headed into. So I think that had a lot to do with that as  
10 well.

11 So now that things are changing, we can look  
12 at things again, but it was never ever to keep the public out  
13 or anything like that. So we were dealing with a much  
14 different time when we made those decisions too.

15 MR. NEVILL: Thank you. Mr. Mooney.

16 MR. MOONEY: So the meetings as a whole those  
17 happened here on the diocese. Okay. I don't know if we moved  
18 from one topic to nothing -- another. I'd like to go back  
19 to the vice mayor. So do I need to wait till we stop this?

20 MR. NEVILL: Yeah. We are still under the  
21 organizational meetings if you'd like to discuss the vice  
22 mayor.

1 MR. MOONEY: I'd like to go back to the Vice  
2 Mayor putting something on the consent agenda.

3 Does that mean I'm just -- I'm saying I'm  
4 voting for it?

5 MR. NEVILL: Yes, the consent agenda is just  
6 an adopted agenda. So things like minutes and et cetera go  
7 on.

8 So if you wish to discuss it, we can -- it does  
9 not have to go on the consent agenda, it can go under new  
10 business and we can make a nomination and vote and discuss.  
11 Or if the council is unanimous in agreement, it can go on the  
12 consent agenda and then when we adopt the consent agenda, it  
13 is adopted as sort of a bulk motion.

14 MR. MOONEY: Okay. So if I'm not planning  
15 on voting then because I know nobody, does that mean we need  
16 to place it on the agenda and vote for it?

17 MR. NEVILL: If you would like to remove it and  
18 have it under new business, we can put it under new business  
19 and that would then be a nomination for vice mayor a second  
20 and we would have discussion and then a vote.

21 MR. MOONEY: Yes.

22 MR. NEVILL: If that's your preference, we can

1 do that.

2 MR. MOONEY: Yes.

3 MR. NEVILL: Okay. Then we will add it to new  
4 business.

5 MR. SEMPLE: Mr. Mayor, don't we require  
6 majority vote to move something off consent agenda?

7 MR. NEVILL: That currently is not on the  
8 consent agenda.

9 MR. SEMPLE: Okay.

10 MR. NEVILL: So it has not been placed, it was  
11 the determination of the work session as to where it would  
12 go, so...

13 MR. SEMPLE: This means we're going to place  
14 it under --

15 MR. NEVILL: Under new business.

16 MR. SEMPLE: Under new business.

17 MR. NEVILL: Yes.

18 MR. SEMPLE: Okay. Thank you.

19 MR. NEVILL: Any further discussion on the  
20 organizational meeting?

21 MR. MCGUIRE: Mr. Mayor, I have one thing to  
22 say.

1                   When we're talking about committees and  
2 everything else, I get that about the turn of like people with  
3 good ideas and everything else, but I think there would be  
4 some discipline with the committees in looking at certain  
5 issues and whatnot. I don't think there's going to be a lot  
6 of like, churn of creating issues that don't exist or good  
7 idea fairies, so to speak.

8                   But also I think, you know we need to move to  
9 you know, having a work session separate from when we do  
10 council on the same day. Because if you look at the election,  
11 the election was all about transparency and we owe the  
12 citizens transparency in government. We need to talk about  
13 these issues. We need to be plain as day and they need to  
14 digest them and then go back and talk about it and then move  
15 forward.

16                   So I strongly suggest that we go to a work  
17 session on a separate day.

18                   MR. NEVILL: Thank you, sir. We have  
19 advanced that and we'll be discussing that as meeting next  
20 month.

21                   MR. SEMPLE: Does the--

22                   MR. NEVILL: Council Semple.

1                   MR. SEMPLE: I'm sorry Mr. Mayor. I  
2 occasionally fail to ask to be recognized and I apologize.  
3 Does this particular session we have now also include  
4 discussion of our code of ethics or is that a separate issue?

5                   MR. NEVILL: That is not on the agenda, but...

6                   MR. SEMPLE: Well, I saw it, I thought in the  
7 staff report that included in this was the discussion of this  
8 document, which is our Town Council Handbook.

9                   And the reason I bring that up is that I would  
10 like to suggest possibly a change to the code of ethics. And  
11 this has to do with I think it's paragraph or number six and  
12 it's basically an obligation for the council that when there  
13 is a decision, and I think my understanding that's fairly a  
14 broad understanding, is that the council may make decisions  
15 either by ordinance or by resolution, legislative decisions.

16                   And recently there have been a couple of  
17 experiences where we made what was clearly, in my opinion,  
18 a legislative decision without involving all members of the  
19 council or even taking a vote. Part of the problem is that  
20 sometimes decisions are being made, what I call and I don't  
21 mean it to sound pejorative, by executive committee. In that  
22 there's a, what I call a foreign out rule and that happens

1 in politics. I mean, people get together and they decide on  
2 certain policy and that's fine. But what happens is that  
3 decisions are made without even going through the formal  
4 process of inviting and involving the entire council.

5 I mean, I believe that there have been  
6 instances in my representation where my constituents have not  
7 been represented in decisions and in a formal way and in a  
8 public way. And I would like to at least address that issue  
9 either through amending the code of ethics, saying that  
10 anything that is not outside of the public participatory  
11 process now states that it has to be public.

12 But I would also somehow like to emphasize that  
13 any time there is a legislative matter, it should involve all  
14 of the council and it should involve all the council at a time  
15 where they can properly deliberate on the issue among  
16 themselves. Thank you.

17 MR. NEVILL: So with agreement from council,  
18 can I direct our legal team to review our code of ethics and  
19 make said improvements and look for review and bring it back  
20 before council for adoption based upon Mr. Semple's request?

21 And I believe there's some other things,  
22 there's some sort of conflicting language that our code of

1 ethics also conflict with State code, et cetera. So I do  
2 believe that our code of ethics doe require sort of tuning  
3 up of sorts. So if we could look at that and then bring that  
4 back forth at a future meeting and we can adopt an improved  
5 code of ethics.

6 UNIDENTIFIED SPEAKER: Will do.

7 MR. NEVILL: Okay. Any further discussion on  
8 the organizational meetings?

9 And that will bring us to item B, which is SUP  
10 2022-03 the Amazon Data Centre. Ms. Harris is here to  
11 introduce.

12 MS. HARRIS: Good morning.

13 I'm going to give a brief overview of this  
14 application for town council and the public. This is  
15 generally the same presentation that the Planning Commission  
16 had. And then we can -- the applicant is here, they have  
17 brought subject matter experts and can come and do their  
18 presentation and answer Q and A from council.

19 So my intent this morning is just to give a high  
20 level overview of what the application is. There we go.

21 This is a request from Amazon Data Centre  
22 services for a property that is zoned industrial. It is in

1 the comprehensive plan and the New Town Character District.  
2 It is before you as a special use permit for an approximately  
3 220,000 square foot data center on approximately 41 acres.

4           The site would include a single story, 37 foot  
5 building, plus mechanical equipment on top of it. There  
6 would be a security fence surrounding the site with a guard  
7 gate with access on Blackwell Road. The applicant is  
8 requesting a modification to the zoning ordinance on the  
9 building height allowance by two feet. They're asking for  
10 a modification to the fence height for a maximum of eight feet,  
11 and then a modification of the loading spaces, which require  
12 approximately 21 loading spaces in the zoning ordinance  
13 reduced to one.

14           These two maps show you the zoning map, which  
15 is of the industrial district in purple, which is on the left  
16 with the surrounding zoning districts. Everything in blue  
17 is your public, semi-public. Basically it is the right of  
18 way for your roads. In this area, red is commercial and then  
19 the yellows and greens are residential. On the right hand  
20 side of this green, you have your future land use district  
21 and everything in brown is the New Town Character District.

22           A little bit of history of the site going back

1 to the Fauquier County real estate records.

2           There have been no improvements on this site  
3 from since 1997. Any research going back further would  
4 require deed research in the library. We have in the late  
5 90's many of you might remember that Walmart considered this  
6 site at this time then they moved to their current location.

7           In 2007, Wilson Land came with a proposed plan  
8 unit development called Warrenton Green on this site.

9 Planning omission spent over a year on that application, which  
10 required a zoning text amendment. They recommended approval  
11 to town council on the zoning text amendment and this was also  
12 approved by town council. Then the actual application that  
13 was enabled by the zoning text amendment was tabled and  
14 ultimately removed by the applicant in 2011.

15           The zoning ordinance states that the site is  
16 by right for industrial uses, all uses that are  
17 non-residential within the town of Warrenton must follow the  
18 noise performance standards, lighting, landscaping buffers  
19 on site plan, storm water and E&S.

20           So the zoning ordinance controls all those  
21 things and any use proposed anywhere in town must meet those.  
22 I'm not going to read all this, but the zoning ordinance

1 basically lays out the by-right uses that would be allowed  
2 on this site. And by-right means that the property owner is  
3 unable to do this administratively as long as they meet the  
4 zoning ordinance without any legislative approval.

5           These by-right uses are also in the staff  
6 analysis and included in the zoning ordinance. The  
7 comprehensive plan is a high level guide for the town, and  
8 this area was designated as part of the New Town Character  
9 District.

10           There are many goals throughout the entire  
11 comprehensive plan, and this is by no means a way of trying  
12 to incorporate all of them, but this particular site was  
13 looked at for a -- as a signature site for a regional employer  
14 job center, and that the New Town District overall is to create  
15 a mixed-use residential, entertainment, and commercial uses  
16 organized by a compact interior street grid, with a park area.

17           No individual site was -- or parcel was looked  
18 at in terms of the comp plan is not meant to look at individual  
19 parcels, it is meant to look at areas as a whole. And it was  
20 envisioned that anything in this area could go up to six  
21 stories with a step back approach to the existing  
22 neighborhoods, and that the comp plan was to evaluate

1 development incentives to stimulate private investment and  
2 new development.

3           These are gateway and signature streets on a  
4 national scenic byway, and that there is a desire within the  
5 comp plan to conserve, reuse, and promote historic resources  
6 to enhance the town's sense of place, and grow the economy  
7 through economic activity. The applicant will go into more  
8 detail, but this is their SUP plan, which shows the data centre  
9 placement on the site and the access onto Blackwell Road with  
10 the 24-hour security gate.

11           They also have elevations. I believe that  
12 they have brought elevations, hard copies and handed it out  
13 all to council this morning as well. Some of the basics of  
14 how the site would operate. The applicant can also speak more  
15 to this, but they've stated that they are looking at  
16 approximately 52 employees. There would be a five-foot  
17 sidewalk on Blackwell Road with no access on Lee Highway. The  
18 water and sewer would require an initial charging, and then  
19 they would use the daily -- anticipated daily in domestic use  
20 of about 300 gallons per day.

21           I've already gone through the waivers and  
22 modifications that they are seeking. The draft conditions

1 of approval were put forward in mid-November, and normally  
2 the process is such that there is -- the Planning Commission  
3 if they were to seek -- to recommend approval to the town  
4 council on anything they would normally try to tweak these  
5 as they make them forward to you.

6           However, the Planning Commission recommended  
7 denial on this application. So the conditions of approval  
8 remain unchanged since the November 15th draft that was put  
9 forward. They include no substation on the property, the  
10 illustratives of the building design, the five foot sidewalk  
11 on Blackwell with no access on Lee Highway, that all  
12 electrical lines will be underground to the substation, there  
13 will be no signage.

14           And I'm just going to hit the high levels,  
15 domestic use for water and sewer, they will provide training  
16 to the emergency services and access to the site.

17           The applicant, I believe this morning has  
18 provided an updated noise study, that demonstrates how and  
19 if it meets the zoning ordinance. There is also a condition  
20 saying that a separate sound study will be conducted one month  
21 after commencement of use. I will let you know that these  
22 conditions, while they were crafted in mid-November, the

1 applicant came forward on December 20th and proposed more  
2 conditions related to noise.

3           And that is something that I imagine they will  
4 be presenting to you and can be discussed at the will of  
5 council. They are also stating that the lights will be dimmed  
6 50 percent from 11:00 p.m. to dawn.

7           During the discussions with the Planning  
8 Commission, topics came up about employment opportunities and  
9 economic development for the town and education. With that,  
10 the applicant came forward with two additional conditions of  
11 approval which included, employment opportunities, hosting  
12 a job fair and outreach to the community, as well as working  
13 with our local schools and community college on implementing  
14 programs that would enable our potential workforce here from  
15 Warrenton.

16           The Planning Commission background is they  
17 started review of this process in January. They requested  
18 a balloon test that took place in September. They held  
19 another work session in October, and then a series of three  
20 public hearings to enable all of the public to speak that  
21 wanted to speak on the topic.

22           And then ultimately they recommended denial to

1 the town council, and their reasons being were lack of  
2 information on a number of topics that they felt had not been  
3 adequately addressed at that point. And those are outlined  
4 in your staff report as well. So that is my high level review  
5 and the applicant is here. And can --

6 MR. NEVILL: Thank you Ms. Harris.

7 MS. HARRIS: Give more detail --

8 MR. NEVILL: Any questions for Ms. Harris  
9 before we invite --

10 MR. HEROUX: Mr. Mayor I have a question?

11 MR. NEVILL: Go ahead, Mr. Heroux.

12 MR. HEROUX: Yeah. Thank you very much,  
13 Mayor. Good morning Ms. Harris. Thank you.

14 MS. HARRIS: Good morning.

15 MR. HEROUX: Just a couple of things. You  
16 mentioned the Warren Green Development.

17 MS. HARRIS: Correct.

18 MR. HEROUX: Can you elaborate a little about  
19 what was that plan to be?

20 MS. HARRIS: It was a planned unit development  
21 that was mixed-use and I was not here for the details of it,  
22 but it did include commercial, residential mixed-use

1 development on the site.

2 MR. HEROUX: Okay. Do you have a sense of how  
3 many homes we were talking about that time?

4 MS. HARRIS: I would have to look that up and  
5 get it back to --

6 MR. HEROUX: Yeah, if you could look in that'd  
7 be great. And then since then, have any other developers come  
8 forward?

9 MS. HARRIS: There has always been interest in  
10 the site. I believe Costco might have looked at it at one  
11 point, but we have not had anything official come before the  
12 town.

13 MR. HEROUX: Okay. And has it ever been any  
14 constraints on the property identified from the developers  
15 as to --

16 MS. HARRIS: I believe that the developers  
17 have stated that one of the major constraints is  
18 transportation improvements and access to the site for  
19 transportation.

20 MR. HEROUX: So getting in and out of the  
21 property itself --

22 MS. HARRIS: Correct.

1 MR. HEROUX: Is a problem for them. Okay.  
2 Has the property ever been considered for conservation  
3 easement?

4 MS. HARRIS: Not that I'm aware of.

5 MR. HEROUX: Okay. New Town Character  
6 District, by definition, does that exclude industrial zoning?

7 MS. HARRIS: No, the comprehensive plan is a  
8 guide.

9 MR. HEROUX: Okay.

10 MS. HARRIS: And it -- zoning is what is the  
11 legal entitlement to any property. So when we went through  
12 the comprehensive plan process, basically this -- you have  
13 to even back up before the comprehensive plan, what was called  
14 the Urban Development Area process, which is something that  
15 is actually a -- it is a VDOT recognition that allows us to  
16 apply for grants through VDOT with what's called a UDA.

17 So the town went through a process, it was a  
18 public process. There were committees, there were outreach  
19 meetings asking residents, what would you like this to look  
20 like in this area. They determined that they would like to  
21 have street malls redeveloped in a mixed-use fashion. They  
22 felt that the New Town District lent itself to a branding,

1 so to speak, of an area that would enable for entertainment  
2 uses.

3           It then morphed in the comp plan process with,  
4 again, public outreach, community input of wanting to create  
5 a Character District based around those UDA policies and  
6 goals. And that included preserving that land for a major  
7 employer since it is our last -- one of our last large pieces  
8 and it's zoned industrial. So there was a desire to set that  
9 area aside to allow for a major employer to use it potentially.

10           MR. HEROUX: Okay. And everything in the  
11 Character District as it was envisioned, I mean, I guess this  
12 goes not even specific to this property, but every -- well  
13 actually specific to that property, because that's what we're  
14 talking about. All that development, where does the money  
15 come from that? That's -- private developer has to express  
16 the interest in that, correct?

17           MS. HARRIS: Correct. The town can only  
18 provide guidance and regulations, but ultimately, it is the  
19 private market that decides what goes on --

20           MR. HEROUX: Okay.

21           MS. HARRIS: -- their parcel.

22           MR. HEROUX: Just wanted to clear.

1                   Okay. One more question, Mr. Mayor. Thank  
2 you for patience here.

3                   2015 Capacity Study on your slide there  
4 referring to water, could you just elaborate on that? Was  
5 that saying that's the water demand for that site that it could  
6 support?

7                   MS. HARRIS: No.

8                   MR. HEROUX: Oh.

9                   MS. HARRIS: So if I'm understanding your  
10 correct -- your question correctly, the 2015 Water and Sewer  
11 Study did an analysis of what the town's capacities were for  
12 water and sewer. That is currently under -- being updated,  
13 and I believe you've had a work session on it as well, and  
14 it'll be coming forward to you again.

15                   Basically, what that said is, according to the  
16 applicant, they are coming forward and saying, we're going  
17 to need to fill our tanks once.

18                   MR. HEROUX: Yeah.

19                   MS. HARRIS: And then after that, the  
20 operation of the site will be for domestic use only. The  
21 Water and Sewer Capacity Study envisioned a higher usage on  
22 that site based on the industrial by rate zoning.

1 MR. HEROUX: Okay. And has there ever been  
2 any attempt to or request to rezone that property from  
3 industrial to commercial residential? Has any request ever  
4 been come forward?

5 MS. HARRIS: Yeah, I'm only aware of the  
6 planned unit development that came forward.

7 MR. HEROUX: Okay. And when the applicant  
8 purchased the land, the deed said industrial, didn't mention  
9 anything about New Character District; is that correct  
10 assumption?

11 MS. HARRIS: No, it's the entitled -- the  
12 zoning is the entitlement to the property.

13 MR. HEROUX: So that's what's on the deed?

14 MS. HARRIS: Yes.

15 MR. HEROUX: Okay. Thank you, Mr. Mayor.

16 MR. HAMBY: Mr. Mayor?

17 MR. NEVILL: Thank you.

18 MR. HAMBY: Ms. Harris, can you provide the --  
19 when was the Blackwell Road site? When was that incorporated  
20 inside town limits?

21 MS. HARRIS: I would have to look that up for  
22 you.

1 MR. HAMBY: Could you look that up?

2 MS. HARRIS: Yes.

3 MR. HAMBY: And I'll come back. Thanks.

4 MR. NEVILL: Just -- I think, Mr. Heroux, to  
5 answer a few of your questions, based upon my recollection,  
6 I believe for the Warrenton Green property, it was requested  
7 for I think 177 rooftops residences and I think there was  
8 request for 1,000 room hotel. And one of the concerns that  
9 were put forth, that during the council meetings and the  
10 application of public hearing was that the applicant was  
11 asking for extra water, that the water demands were going to  
12 exceed what was suggested for the property.

13 And so they were going to go above what the  
14 property capacity was anticipated at, and they wanted a  
15 variance on that. And that was -- I believe one of the main  
16 concerns was cited in opposition was transportation impact,  
17 impact to schools, impact to cost, taxpayers, and as well as  
18 the impact on the waters -- and the water capacity and sewer  
19 capacity because they were asking for -- demonstrating there  
20 would be in excess of what was recommended for the property.  
21 So --

22 MR. HEROUX: Okay.

1 MR. NEVILL: -- that was what it was looked at  
2 in -- at the time.

3 MR. HEROUX: Okay.

4 MR. HAMBY: And, Mr. Mayor, one more. Ms.  
5 Harris, when was it zoned industrial, if you could look up  
6 both of those? Thank you.

7 MR. HEROUX: So, Mr. Mayor, back on the -- it  
8 was called Warrenton Green?

9 MR. NEVILL: Warrenton Green.

10 MR. HEROUX: Okay. When that 1,000 room  
11 hotel and 177 houses was proposed, did they proffer any road  
12 improvement to improve access there or what -- how was that  
13 access going to happen? Does anybody recall?

14 MS. HARRIS: We would have to go pull the files  
15 --

16 MR. HEROUX: Okay.

17 MS. HARRIS: -- for you.

18 MR. HEROUX: Okay. Just kind of -- I mean, I  
19 don't want to because unnecessary wrench. You know, the  
20 history of this property is very relevant, right? And so just  
21 anything on that would be helpful, but don't --

22 MS. HARRIS: Okay.

1 MR. HEROUX: Please don't go out of your way.

2 MR. NEVILL: I think a lot of the concerns came  
3 down to the fact that there could not be access off of Lee  
4 Highway based upon the exit ramp coming off of the 17th spur.

5 And again, I think residential concern had  
6 always been the impact of traffic on Blackwell and the  
7 capacity to hold that. So it was sort of -- that was the  
8 overwhelming concern was obviously, as I said, the  
9 residential impact plus the transportation impact and the  
10 water and sewer. So if -- with that, only one entrance in  
11 egress was a concern among the public based upon my reading  
12 of the minutes of the -- of those hearings.

13 MR. SEMPLE: I have --

14 MR. NEVILL: Mr. Semple?

15 MR. SEMPLE: I am -- yes. Thank you, Mr.  
16 Mayor. I have several questions.

17 I want to first talk about the status of the  
18 application. The application was first introduced in April,  
19 and then you made it a staff determination that it was complete  
20 in May?

21 MS. HARRIS: Correct.

22 MR. SEMPLE: Okay. And the completion then

1 was based on what criteria?

2 MS. HARRIS: I'll speak in a general format of  
3 how all land use applications come forward. They are  
4 submitted to the permit techs at our front desk, at which point  
5 the town per zoning ordinance has 15 days to review them.  
6 They are usually reviewed basically by a check mark of whether  
7 or not they meet the basic minimum requirements to come in  
8 for acceptance, and then staff sends it out to all the referral  
9 agencies, and then people take a look at it and say, this is  
10 what is required for staff to be able to do a proper  
11 assessment.

12 So in this particular case, that is the point  
13 when staff sent first referral comments back to the applicant  
14 saying, we need you to look and provide information on this,  
15 this, this, and this. And then it develops into a back and  
16 forth where the applicant provides a response letter and  
17 responds to staff, and eventually, it moves forward to the  
18 Planning Commission.

19 MR. SEMPLE: Okay. The reason I'm going to  
20 ask these series of questions is, I'm -- I just -- I don't  
21 know why we're even here. I don't know why we're having this  
22 public hearing today, and I don't know what compelled us to

1 be here when in fact, I believe that when we review these  
2 applications as they come in, we have plenty of time to make  
3 these decisions. So, all right. That's good. But that's  
4 a -- that -- then that's -- the staff then decides whether  
5 the application for purposes of processing is complete.

6 MS. HARRIS: Correct.

7 MR. SEMPLE: But that's a little different,  
8 isn't it? Than what -- let's say a legislative body or a --  
9 the Planning Commission would consider as a complete  
10 application when in terms of reviewing it on some merits  
11 because don't you and afterwards then review the application,  
12 say there's certain deficiencies. And then a -- and using  
13 criteria that's available under Article 11, you follow a  
14 certain series of questions that you ask one way or the other,  
15 and then they come back and you go back and forth, and so on  
16 and so forth. So during that period of time, the application  
17 still had its original date of acceptance --

18 MS. HARRIS: Correct.

19 MR. SEMPLE: -- in terms of what I call tolling  
20 the clock. Okay.

21 So let me then move on to the October 28th  
22 application, which was considered a resubmission.

1                   Now, I looked up the word resubmission and it  
2 either means resubmitting the original application or  
3 submitting a new one. And my concern is, did you -- did the  
4 staff within 15 days upon receipt of that October 28th  
5 application make a determination whether it was -- it tolled  
6 the clock, or was an amendment, or was a new application?

7                   MS. HARRIS: No, at that point it was before  
8 the Planning Commission, and so they were responding to the  
9 work session questions that had been raised and were  
10 submitting their formal information that would go to public  
11 hearing before the Planning Commission.

12                   MR. SEMPLE: But it was an application. It --  
13 the application was at that point not signed, or the affidavit  
14 was not, but that came in later. I think that came in  
15 November. But it was acknowledged it's a resubmission of an  
16 application.

17                   And I realize I may be parsing words here or  
18 that kind of thing, but my question is, why, if it was -- this  
19 is -- there's nothing I could see in any of the materials that  
20 this was simply fulfilling the requirements for a public  
21 hearing. What I thought -- what I saw technically, with --  
22 was a resubmission of an application.

1           And my -- the reason I asked this question is  
2 that I think that if you were to view it one way or the other,  
3 that the clock retolled starting October 28th, and we have  
4 until next October 28th to make a decision.

5           Now, I realize that's a legal question, but  
6 that's why I'm asking you, what is the status of the  
7 application at this point? Because I did notice that at one  
8 point, in a foyer response, you had labelled the application  
9 an amendment. And so at that level, when it's an amendment,  
10 there should be a determination whether that amendment is  
11 sufficient to either reset the clock or continue from the  
12 original application.

13           MS. HARRIS: A normal process for an SUP or  
14 rezoning, enables a lot of back and forth with first staff,  
15 then Planning Commission, and then ultimately town council,  
16 if it's so determined.

17           In the Planning Commission level, an applicant  
18 must have submitted all their materials, whether they're  
19 updated, responding to requests, what have you, the -- all  
20 the formal materials that they want considered by a public  
21 body for a public hearing need to come in 19 days before a  
22 public hearing.

1                   And at that point, that is what that October  
2 28th deadline was. The applicant bringing forward all the  
3 materials that they wanted to be considered for that public  
4 hearing.

5                   Normally what happens is an applicant works  
6 with staff and then they work with Planning Commission, and  
7 then they work with town council and they decide -- it's a  
8 applicant driven process in terms of the timeline and they  
9 can determine whether or not they want to stop the clock at  
10 any time to work out issues and bring things forward. In this  
11 case, the applicant agreed that they believed that they were  
12 under the jurisdiction of the Planning Commission passed that  
13 100 days, but they wanted to call the question and bring it  
14 before you at town council.

15                   MR. SEMPLE: All right. Well the issue is in  
16 terms of -- I don't want to get back into all that. We've  
17 already had that discussion regarding whether it was  
18 appropriate for the Planning Commission to have to adhere to  
19 100 day rule when in fact it had expired as of I believe  
20 November 4th.

21                   And but -- so I just want to know what to  
22 characterize the application where it is. So the next

1 question I have for you is, what is there today before the  
2 council that was not before the Planning Commission that we  
3 have in front of us now?

4 MS. HARRIS: I believe, but I just -- I haven't  
5 had a chance to look at it. I believe there is an updated  
6 sound study that has been provided to you.

7 MR. SEMPLE: Today?

8 MS. HARRIS: I was hand -- have they been --  
9 is it before them? Yes, it's in front of you.

10 MR. SEMPLE: So we haven't even had a chance  
11 to look at it.

12 MS. HARRIS: No, but the applicant is here to  
13 walk everyone through it. That's they have their subject  
14 matter experts here for the work session to have this  
15 conversation with town council.

16 MR. SEMPLE: All right. And this noise study  
17 is based on the existing technology?

18 MS. HARRIS: I don't know.

19 MS. SUTPHIN: Yeah.

20 MR. SEMPLE: Oh, I'll ask it. Okay, thank you  
21 very much. Okay. I'd like to ask you a few questions about  
22 the comprehensive plan. You said that it's a guide.

1 MS. HARRIS: Correct.

2 MR. SEMPLE: And that is partly what it is.

3 My understanding, the comprehensive plan is perhaps a little  
4 broader or perhaps narrower depending on how you look at it.

5 But in the Virginia Code, it calls for the  
6 comprehensive plan to be -- to assess the probable future  
7 conditions of the land. And I can't quote this word for word.  
8 And that in our ordinances as well as State code, it is  
9 enumerated often as something by which we must -- it's not  
10 just a guide, but it's something by which we must find that  
11 an application, especially as you'd be consistent with.  
12 Either with it specifically or with it in spirit or otherwise.  
13 And I have reviewed the comprehensive plan and I can't find  
14 anything.

15 As a matter of fact, what I see is a form of  
16 admission that it does not comply. There's a statement that  
17 says we can't possibly comply to all the various ideas or  
18 policies or plans in a comprehensive plan, which means it  
19 says, well, in my mind that means you haven't complied with  
20 any of them. You talk -- for example, when you talk about  
21 major employer, explain that to me a little bit. What is a  
22 major employer in your view?

1 MS. HARRIS: That would be up for town council

2 --

3 MR. SEMPLE: All right.

4 MS. HARRIS: -- to determine this is the  
5 adopted language that went through.

6 MR. SEMPLE: Okay. Because I understand that  
7 Amazon employs 1.6 million part-time. So I did a little  
8 calculation, I think to stack up all those people on the hill  
9 and 1.6 million people in the data center at 30 people per  
10 floor, it would get right back up there.

11 So I feel that one of the issues that you have  
12 brought forward, is that the comprehensive plan needs to be  
13 looked at very carefully. There is in fact, by our learned  
14 counsel he says the court's analysis suggests that where  
15 conformity between a proffer and the comprehensive plan is  
16 involved, it will apply a fairly rigorous inquiry.

17 And so do you not believe that -- is it in terms  
18 of comparing the comprehensive plan? What I see is very  
19 little in the staff report regarding the comprehensive plan  
20 and it's compliance. I -- there's only one mention of data  
21 centers in the comprehensive plan, and basically it is on page  
22 70 where it is talking about another area where in fact it

1 says there shouldn't be any data centers.

2           And I want to go back then to the New Town  
3 Character District. We spent, how many -- how long did we  
4 spend on this comprehensive plan? I mean, I voted against  
5 it and I -- actually, in this case, voted and I will be  
6 perfectly against the New Town. I thought there were going  
7 to be too many apartment buildings.

8           And I realized then that I didn't -- I thought  
9 that was going to create a problem. But once we adopted the  
10 comprehensive plan, I said, I'm going to support it. Because  
11 that is -- the Planning Commission went through this process,  
12 we had all these signatures and these little kids who said,  
13 this is what we want to see in our town.

14           It created all of these statements, and now all  
15 of a sudden we're looking at the comprehensive plan, and I  
16 just can't identify anything in it where this particular  
17 application is consistent with either its spirit or any  
18 specifics.

19           Now, I hear what is said that we want a major  
20 employer, but a major employer is one who employs majorly that  
21 is more than 30 people. And so that is not satisfying in my  
22 -- and we talking about economic development. In economic

1 development, we had at one point, there's been no study, for  
2 example, about what would happen if we -- if Nina Weisberg  
3 and her vision for the comprehensive plan, which she detailed  
4 in the letter were realized. And that's the total economic  
5 development.

6 In 2016, there was an economic development  
7 report issued on Walker Drive, which showed all of the  
8 economic development benefits. We don't -- do we have such  
9 a report in this application?

10 MS. HARRIS: I would defer to the applicant.

11 MR. SEMPLE: Okay.

12 MS. HARRIS: To speak to the economic  
13 development.

14 MR. SEMPLE: All right, because I just want to  
15 point out that there is a theory that there's somehow or other,  
16 that this land can't be used for other purposes.

17 And my comment is that Nina Weisberg wrote a  
18 letter on February 8th, 2021, detailing in great detail  
19 exactly why she wanted us to approve the comprehensive plan,  
20 and then what she was going to do with that property. And  
21 I'd like to enter that letter into the record. Now -- okay,  
22 so that ends that question.

1                   So in terms of the criteria, let's go back to  
2 the fundamental criteria. How many criteria, are you  
3 supposed to under the article 11 follow?

4                   I mean, in other words, to show that you have  
5 a series of requests that need to be satisfied. I don't  
6 actually need the number because what I want -- what I'm trying  
7 to get at is, I'd like to go to, the comment made by the  
8 Planning Commission. The Planning Commission decided that  
9 there were X things that they felt was either not received  
10 or insufficient, or didn't satisfy. Consistent with this,  
11 a series of things. I want to know why their decision was  
12 unreasonable.

13                   It appears to me if you were to take a look at  
14 how they reviewed all these things, there were still several  
15 things that were outstanding in the application. I'd like  
16 to know whether the application today is, in your opinion,  
17 complete.@"

18                   MS. HARRIS: The application -- again, the  
19 applicant has brought forward, I believe, updated information  
20 today. They are at the point now where they are responding  
21 to your all's requests.

22                   MR. SEMPLE: Okay.

1 MS. HARRIS: So you have here 32 criteria by  
2 which to review any special use permit against, whether it's  
3 a data center or a drive through. And it's up to Planning  
4 Commission and town council to weigh and balance of these 32  
5 criteria, what is applicable, what you would like to consider  
6 if the applicant has sufficiently --

7 MR. SEMPLE: All right.

8 MS. HARRIS: Responded to your personal  
9 desires to enable you to make a decision on this, or to craft  
10 a condition of approval that would help mitigate and address  
11 any concerns you may have.

12 MR. SEMPLE: Thank you. I'll wait until we  
13 hear from the applicant.

14 MS. SUTPHIN: Yes. Thank you for all your  
15 hard work, but these questions really should be towards  
16 Amazon. Expecting you to come up with all these things.

17 Amazon has taken the time to be here with us  
18 today, they've got a full group of people, and I know a lot  
19 of these questions would probably be better if Amazon answered  
20 them. There's been a lot of work -- I mean, the Comp Plan  
21 was like two to three years in the making, honestly. But,  
22 thank you for all your hard work.

1 MS. HARRIS: Thank you.

2 MS. SUTPHIN: You and Rob both have done a  
3 phenomenal job.

4 MR. MCGUIRE: I have a quick question.

5 MR. NEVILL: This meeting had precedent.

6 MR. MOONEY: Thank you, Mr. Mayor. I think I  
7 disagree with Heather. I think you work for the town,  
8 correct?

9 MS. HARRIS: Correct.

10 MR. MOONEY: It seems like I'm new to the  
11 discussion and I've done my best in my long tenure here on  
12 the seat to do as much research as I can. But it's my  
13 understanding that Mr. Semple's question is, is the  
14 application complete? And what I heard was you're asking the  
15 applicant to tell us if their application is complete?

16 MS. HARRIS: No, what I'm saying is that I  
17 believe the applicant is bringing forward additional  
18 information this morning. I have not seen it yet. I do not  
19 know what they are bringing forward to you.

20 MR. MOONEY: But is it fair for you to have the  
21 knowledge of whether the application is complete or not?  
22 Because I've submitted a lot of application for permits and

1 people have told me that they're not complete and I have to  
2 do a lot of things --

3 MS. HARRIS: Correct.

4 MR. MOONEY: In order to get a permit or  
5 whatever. So it would be, in my opinion, that you, who works  
6 for the town should know and should be able to say clearly  
7 yes or no, if the application is incomplete.

8 MS. HARRIS: This application was deemed  
9 complete for processing.

10 MR. MOONEY: Yes.

11 MS. HARRIS: For a legislative decision in  
12 May.

13 MR. MOONEY: By the Planning Commission.

14 MS. HARRIS: No. By the town.

15 MR. MOONEY: For the Planning commission to  
16 take up.

17 MS. HARRIS: Yes.

18 MR. MOONEY: So the town said that the  
19 application was complete.

20 MS. HARRIS: There is -- we are looking at,  
21 when an application comes forward, the minimum submission  
22 requirements to allow for it to start its review process. So

1 at that time, the taxpayers don't want the town spending town  
2 resources reviewing applications before one has even been  
3 paid for.

4 In order for us to accept it, it has to be paid  
5 for processing. And that is where this application came  
6 forward. There are legal steps that an application must go  
7 through that are outlined through state code and the zoning  
8 ordinance that allows an application to make its way through  
9 the process.

10 The decision makers can decide anytime whether  
11 or not they want to ask for additional information. They can  
12 ask the applicant if they will go get the information and bring  
13 it forward, if they will pause the clock. All those are  
14 things that the applicant and the decision makers can do as  
15 part of the process.

16 MR. MOONEY: Okay. So the taxpayers don't  
17 want it going back to what you said taxpayers. But so the  
18 staff said the application was complete, that we have a  
19 additional information that was submitted today. Is that not  
20 required for the application to be complete? The noise study  
21 was that not?

22 MS. HARRIS: That was something that was asked

1 for.

2 MR. MOONEY: Okay.

3 MS. HARRIS: During the first request of the  
4 applicant once we started processing and looking at it.

5 MR. MOONEY: So that wasn't something that  
6 originally, that the town staff deemed as pertinent to the  
7 application?

8 MS. HARRIS: No, we did. When we sent our  
9 comments back to the applicant, we said we need a noise study  
10 to analyze this properly.

11 MR. MOONEY: Did we need the noise study to  
12 complete the application?

13 MS. HARRIS: Not for processing.

14 MR. MOONEY: Okay. So the -- okay.

15 MR. SEMPLE: I wanted to say.

16 MR. NEVILL: Mr. McGuire.

17 MR. SEMPLE: I'm sorry.

18 MR. MCGUIRE: Just real quick. So I  
19 understand the process, what you're saying is somebody puts  
20 in a permit and if it's not complete, it still goes forward  
21 and they still bring fidelity to it, add parts to it, correct?

22 MS. HARRIS: Correct.

1 MR. MCGUIRE: Okay. So then if that's true,  
2 then how does that affect the timeline? At what point is it  
3 deemed correct and when does this clock start with Councilman  
4 Semple talking about this, that's what I want to know.

5 MS. HARRIS: The clock starts when we accept  
6 it.

7 MR. MCGUIRE: Okay.

8 MS. HARRIS: And the applicant can pause it at  
9 any time.

10 MR. MCGUIRE: Okay. And has it been paused?

11 MS. HARRIS: No.

12 MR. MCGUIRE: Okay. And so what you're  
13 saying is they can continuously work on this as they go?

14 MS. HARRIS: Correct.

15 MR. MCGUIRE: And then is it complete, and is  
16 that the date from when it is, or you just -- it's from when  
17 they submitted it? The original submission.

18 MS. HARRIS: The original submission is what  
19 triggers us to enable to begin the conversation of staff  
20 review and agency review.

21 MR. MCGUIRE: Okay. Okay. Thank you.

22 MR. SEMPLE: Yeah. I'm sorry Mr. Mayor.

1 MR. NEVILL: Mr. Semple.

2 MR. SEMPLE: I don't mean to -- I sound like  
3 I'm asking you a lot of questions and you're doing a great  
4 job by the way, answering them. To me, the status of the  
5 application bore on the whole issue why the Planning  
6 Commission eventually made a recommendation in December and  
7 originally decided that they were going to defer the  
8 application until they received more information. Is the  
9 status of the application itself, and I realize it seems like  
10 a technical matter, but my concern is that -- is whether or  
11 not the clock is still pending and even if it were pending,  
12 we'd have until May to decide this based on our ordinance,  
13 which is narrower than state code.

14 Whether or not the submission of the October  
15 28th application constituted, whether there was a  
16 determination of that application, whether -- because it was  
17 marked an amendment, whether it changed the clock or not, and  
18 whether that -- there was an -- a letter that was issued to  
19 that effect.

20 MS. HARRIS: I believe you're asking me a  
21 legal question. All I can tell you is that it is normal  
22 procedure for an applicant to submit their materials 19 days

1 prior to the Planning Commission public hearing.

2           This is something that is standard practice,  
3 it's in the by-laws and it's what enables us to know that we  
4 have everything that the applicant wants reviewed for a public  
5 hearing, and it to go to meet the deadline for the legal ad.

6           MR. SEMPLE: Guess my question is -- I'm not  
7 trying to parse quibble with words as what are submission of  
8 materials and what is an application and we can, I guess take  
9 that up at some other time, but thank you for your answers.

10           MS. HARRIS: Sure. I will say respectfully  
11 that a lot of these questions you might want to ask the  
12 applicant because our state code and zoning ordinance really  
13 is written for a applicant to be able to process a question  
14 before a legislative body. And it really is up to the  
15 applicants to call the question, or pause the clock to provide  
16 more information.

17           MR. NEVILL: Thank you Ms. Harris. I just  
18 want clarification I think. Is it the correct statement to  
19 say that the application was deemed complete on May 6th? We  
20 have seen in previous SUP applications come before us,  
21 modifications changes, what is submitted on day one to the  
22 time that it gets to us, even from the morning work session

1 to the evening public hearing, which oftentimes we have  
2 extended to allow for more information to be gathered or  
3 deferred.

4           As, you know, from that morning session, even  
5 then changes are made. So, the application is dynamic, it's  
6 fluid, it is constantly seeing updates and improvements to  
7 answer the questions brought forth, but the technical  
8 definition of it being complete to allow it to submit into  
9 that process, it was complete and is complete correct -- is  
10 that correct?

11           MS. HARRIS: Correct.

12           MR. NEVILL: Thank you. At this point, why  
13 don't we bring the applicant up and they can address some of  
14 the concerns that have been brought forth.

15           MR. REINKE: Thank you. My name is Jay  
16 Reinke, I'm with AWS Data Center Development. And AWS stands  
17 for Amazon Web Services, which division of Amazon are part  
18 of Amazon. So I brought a whole team. And Steven, do we have  
19 a slide?

20           Thank you. Thanks so much. I brought a team  
21 here with us and I'd love to, as you -- as I mention the team  
22 if you guys would stand up, Brent Heckler, who is an Engineer

1 and Manager, Kyle Crass, who's a Civil Engineer, Ian Brewe,  
2 who's Acoustical Engineer, Rob Sims, a Mechanical Engineer,  
3 Mark Matthews, who manages our builds, Becky Ford, Economic  
4 Development, myself and Brian Knies. Okay. Also, we have  
5 Bolher Engineering, John Wright, and Connor's not with us this  
6 morning.

7           Then we have architects, Corgan, Mike Halls,  
8 and then a local firm, Polysonics, Chris Karner. Okay, I'm  
9 going to move forward. So what we did -- I know we got a list  
10 of kind of 15 categories of questions, and I try to put those  
11 in a way that would flow somewhat smoothly. So the way I did  
12 it was I put four of those under kind of a site build -- and  
13 Steven, if I don't -- there we go. So I put four other site  
14 build kind of location questions, landscaping, existing  
15 non-conforming, then timing, then we'll go into operations  
16 and then project impact. Okay.

17           Site build would -- here's a site. It is --  
18 it'll be about 50 percent developed, it will be about 220,000  
19 square foot building. There will be no additional buildings  
20 without a modification to the SUP. There will be one entrance  
21 off Blackwell Road, and we're going to see the setback from  
22 Blackwell Road is about 200 feet.

1                   Typically the industrial -- the zoning for the  
2 industrial on that site's about 50 feet. We're moving it back  
3 an additional 150 feet. There'll be a storm water management  
4 pond on there, which is the one to the south, parking to the  
5 west, and then you'll see some of our generators to the north.

6                   Questions on location at all. Matter of fact,  
7 if you'll turn to Section 3, and you should have had -- there  
8 was a number of questions came out and unfortunately, I put  
9 this in a different order than which the questions came, which  
10 probably just adds to the confusion, but try to make it to  
11 flow a little bit smoother.

12                   MR. HEROUX: Mr. Mayor.

13                   MR. NEVILL: Mr. Heroux.

14                   MR. HEROUX: Good morning, Mr. Reinke. Could  
15 you expand the data center on the property that's remaining?

16                   MR. REINKE: Not without an SUP modification.

17                   MR. HEROUX: Okay. But that is a  
18 possibility.

19                   MR. REINKE: Yeah. I mean, it would be up to  
20 you, but we have no plans to.

21                   MR. HEROUX: Okay, thank you.

22                   MS. SUTPHIN: I have a question.

1 MR. REINKE: Sure.

2 MS. SUTPHIN: This is something that I've been  
3 trying to find the right words, but of course I'm not an  
4 engineer. So there is a way I know to like build up some of  
5 the landscape to have like --

6 MR. SEMPLE: Berm.

7 MS. SUTPHIN: Yes. What did you call it  
8 again?

9 MR. SEMPLE: Berm.

10 MS. SUTPHIN: Berm. Okay. So, to like the  
11 -- I know one of the big things is people are really worried  
12 about what it would look like coming into town. So is there  
13 a way to build up the landscape? I know there's trees and  
14 stuff there now --

15 MR. REINKE: Can I go -- I'm going to go to the  
16 next slide, it may help answer that.

17 MS. SUTPHIN: Okay.

18 MR. REINKE: Yeah. What I did -- I  
19 personally, and then as well as the team, when we came, we  
20 drove this site a number of places, and you'll see that the  
21 site's generally covered by trees. And when I did -- coming  
22 down 29 and then going West on 17, when -- right when you kind

1 of come to that intersection, that's when you'll see right  
2 into this site.

3                   And I call it the site where you have most  
4 exposure to the building as well as when you're coming up from  
5 the South and going onto 15 Lee Highway. And you'll -- you  
6 look and you'll see a little exposure, and you'll see the two  
7 arrows. And Steve, I'm trying to get my pointer here. I just  
8 moved forward, so let me go back .

9                   MR. TEW: Give me one second, sir.

10                   MR. REINKE: It's probably more a user issue  
11 than a system issue. Okay. So when I'm pushing this, I'm  
12 going forward.

13                   MR. TEW: Working on that on the back end, sir.  
14 Give me one second.

15                   MR. REINKE: Okay. If you'll go back one  
16 please. Thank you Steven. I'll tell you what, here's --  
17 yeah, so there's two -- so really draw the areas covered by  
18 trees. So when you're driving by the two areas I call the  
19 maximum exposure, where you'll see a building the most are  
20 what I have as those two arrows. And that's where we depicted  
21 the building.

22                   I don't think we did a good job of explaining

1 that to the Planning Commission. Well that's -- Anybody want  
2 to see my podcast? And so I don't think we did a good job  
3 explaining that to the Planning Commission that when we showed  
4 the building, this is what would be the most exposure you'll  
5 see of the building. This is again from Lee Highway in the  
6 area when you're kind of coming from the North and taking a  
7 left on Lee Highway, you kind of look.

8           And even when we drove by today, it's -- the  
9 berm -- it's a little bit higher there. I'm going to have  
10 John Wright come up in a second talk about berms. I'm going  
11 to go to the next slide. What I try to do is -- this is --  
12 the top picture is kind of from Google Earth, and this is what  
13 it looks like today, and this is what it would look like in  
14 the future.

15           We're going to -- by the way, one of the things  
16 from an industrial standard, I think one of the questions was  
17 what were you going to do with such an ugly building once you  
18 leave? Well, first of all, I'm not sure we'll ever leave,  
19 but from an industrial standing, we don't consider this in  
20 an ugly building.

21           Again, ugliness and beauty is always up to a  
22 reference point, but a lot of time, an effort was into -- put

1 into windows here to trying to make it attractive. So if  
2 someone does see the building, it's an attractive looking  
3 building.

4 This is from -- going on to -- on 17 as you're  
5 coming off 29 looking -- and you almost look right into the  
6 site and you'll see where we try to add windows, architectural  
7 aspects again to make it more attractive.

8 And again, so the top picture is kind of what  
9 it looks like today. Again, we didn't add a the telephone  
10 pole wires there, but -- and then the bottom picture is what  
11 it would look like once it's built. I'm going to go back  
12 because I just want to go -- what we did -- and someone asked  
13 one time, can you block some of the -- is my pointer working  
14 Steven? Okay.

15 MR. TEW: In theory it should be. Try it  
16 again and we'll see if it works.

17 MR. REINKE: No, that's okay. Just to the  
18 South of the building, you'll see a row of trees there. We  
19 put those -- we're going to put evergreen trees there at some  
20 point. Look, it's going to be five or ten years. I want to  
21 make sure it's clear. It's not going to be immediate.

22 Eventually they'll grow up and in theory,

1 block the view from Lee Highway. Again, I'm not sure our  
2 architect appreciates us blocking the view of something you  
3 spend a lot of time on. But we're doing the best we can to  
4 block the view. Again, from an industrial standards, we  
5 think that's going to be from -- attractive, very attractive.

6 MR. HEROUX: Mr. Mayor, just a question.

7 MR. NEVILL: Yeah.

8 MR. HEROUX: Yeah, Mr. Reinke, I just want to  
9 make sure we're clear here. So that yellow boundary line you  
10 have there with -- those are the existing trees, correct?

11 MR. REINKE: Yes.

12 MR. HEROUX: And the intent is not --

13 MR. REINKE: The yellow -- I'm sorry, the  
14 yellow line's the boundary, right.

15 MR. HEROUX: Right. But the trees that are  
16 sort of in that boundary line there, the intent is not to cut  
17 those down.

18 MR. REINKE: Correct.

19 MR. HEROUX: Okay. Correct. Yeah.

20 There's your work -- your pointer's working now.

21 MR. REINKE: Yeah, I was going to -- Steven was  
22 kind of going without my control, I don't think. Okay.

1 MR. MCGUIRE: Mr. Mayor.

2 MR. NEVILL: Yes sir.

3 MR. MOONEY: I have a question.

4 MR. NEVILL: Mr. Mooney. Sit off sir first.

5 MR. MOONEY: Okay. You said in theory --  
6 theory is -- so in theory it'll block it, but potentially not.

7 MR. REINKE: Yeah, I mean, look -- I mean, it's  
8 going to take five to 10 years for those trees to grow up enough  
9 to block the view.

10 MR. NEVILL: Mr. McGuire?

11 MR. MCGUIRE: Yeah, Jay. So we're talking  
12 about like a finished product here, and Ms. Sutphin brought  
13 up about the berm and made your brief, I guess, changed course  
14 of direction.

15 So my question is, we're looking at finished  
16 product. How did we get here? We're talking about traffic  
17 on Blackwell Road, how -- all this construction traffic is  
18 going to be going there. Has the town, or has the applicant  
19 considered all the mitigation of all this?

20 You're talking about heavy earth moving  
21 equipment, all these things. I mean, we've talked about, you  
22 know, maybe transportation being a problem for this site, for

1 other use. How are we going to mitigate all the construction  
2 traffic? Have you considered that? Do you have a plan for  
3 that, and you can brief us today, or in the future?

4 MR. REINKE: Yeah. So if you look at the top  
5 of the screen, what we're going to have is we're going to have  
6 a security gate there, and that's your entrance. On the  
7 bottom, if you -- I'm going to see if my pointer's working.  
8 Yay. All right. Yeah, think about right there, that's going  
9 to be a construction entrance. So we'll have two entrances  
10 for a while. So as the site's being built, you'll have going  
11 -- so it's not just one entrance coming in, you'll have trucks  
12 coming in and out both from the North and to the South.

13 MR. MCGUIRE: And has there been a traffic  
14 study done as how that's going to affect normal everyday  
15 traffic?

16 MR. REINKE: Yeah. John Wright, do you have  
17 a second? Come up.

18 MR. WRIGHT: Okay. Yeah. Good morning.  
19 John Wright with Bohler. So with respect to the construction  
20 access with any site plan application, you're going to have  
21 a maintenance of traffic plan that identifies signage,  
22 striping, temporary flaggers, wherever that may be during

1 construction. Since we haven't begun the site plan process,  
2 that document is yet -- is not available.

3 But to Jay's point, you can see that existing  
4 access road for -- you guys are familiar with the site, it's  
5 already constructed. So that makes for a great access point  
6 into the site for construction.

7 MR. MCGUIRE: Maybe it's a question to you,  
8 Mr. Mayor. Has the police department considered how we're  
9 going to deal with traffic, emergency services, everything  
10 else during this construction process?

11 MR. WRIGHT: Yeah. What I would suggest from  
12 a consulting standpoint, as we develop that maintenance of  
13 traffic plan, we sit down with personnel from the town,  
14 police, fire, just to outline what we're going to do there.

15 For any project you're going to have  
16 construction traffic, and that's why we're trying to make sure  
17 it's all on Blackwell Road. As mentioned, there is a gravel  
18 access off Lee Highway, but we do not want to use that for  
19 construction access just because of the close proximity to  
20 the ramps and a lot of traffic day in, day out along Lee  
21 Highway.

22 MR. MCGUIRE: I understand that, but I think

1 this is a crucial point to this whole process because we're  
2 talking about egress and exit out of the town and everything  
3 else like that. I think we need to know that before we can  
4 even vote on this. This is --

5 MR. WRIGHT: As I pointed out --

6 MR. MCGUIRE: Serious issue.

7 MR. WRIGHT: Part of the site plan as part of  
8 the process. So once they develop that as part of the --

9 MR. MCGUIRE: Right. But I think the towns  
10 should look at it as well from a public safety standpoint.

11 MR. WRIGHT: Oh yeah. Absolutely. They'll  
12 have --

13 MR. NEVILL: And it will be. I think he's  
14 answered because that's --

15 MR. MCGUIRE: Okay.

16 MR. NEVILL: That's the case and that will be  
17 done. There's also a construction bond that puts forth the  
18 cover costs of damages, etc. So this is pretty standard  
19 practice and that will be addressed as it would with any other  
20 construction project anywhere else in town.

21 MR. WRIGHT: Yeah. Absolutely.

22 MR. REINKE: Can you sit back for a second?

1 MR. HAMBY: Mr. Mayor.

2 MR. NEVILL: Yeah.

3 MR. WRIGHT: Regarding the --

4 MR. HAMBY: Mr. Wright. You're -- Mr.  
5 Wright, you have construction traffic. You have equipment,  
6 earth movers and things like that. Once they're on site, they  
7 don't leave, right?

8 MR. WRIGHT: Yeah. They're going to be  
9 circling there and the --

10 MR. HAMBY: So they're not coming in and out  
11 every day.

12 MR. WRIGHT: Absolutely.

13 MR. HAMBY: You're basically going to have  
14 people that operate that equipment may be coming in and going  
15 in the morning and the evening, things like that. So.

16 MR. WRIGHT: Yeah. Basically that's how it's  
17 done. As with any site design, I touched on this at the  
18 Planning Commission when people were speaking regarding  
19 what's the elevation of the site.

20 With any good design, you want to balance your  
21 cut and fills, your dirt so you can keep all the dirt on sites  
22 so you're not trucking excessive amounts or importing

1 excessive amounts. And back to your question Ms. Sutphin  
2 regarding the berm. As you know, Lee Highway sits quite a  
3 bit lower than the site. The existing site grades are between  
4 470 and 490.

5 So it's a constant slope up into the site. So  
6 berming wouldn't be as an effective measure to screen.  
7 That's why we've proposed a series of evergreen trees between  
8 the pond and the building that would help screen those gaps  
9 that Jay mentioned earlier.

10 MR. NEVILL: And also the slide that we're  
11 looking at right now shows additional trees. So you're  
12 showing more trees than you have previously in the previous  
13 applications. You've actually increased the number of  
14 vegetation?

15 MR. REINKE: Yes. Though -- again, we  
16 thought the building was well designed, but folks want trees,  
17 we'll put trees there.

18 MR. NEVILL: Please continue.

19 MR. REINKE: The -- also on the -- if we go  
20 back, but there was some issues on, hey, was the site dirty?  
21 That -- there -- or was the stuff cleaned up? They did find  
22 some contaminated soil, so we're going to remediate that soil.

1 MR. SEMPLE: I'm sorry, Mr. Mayor, may I ask  
2 a question?

3 MR. REINKE: Yeah, absolutely.

4 MR. SEMPLE: We did a balloon study.

5 MR. REINKE: Yes.

6 MR. SEMPLE: And was supposed to show the  
7 impact -- visual impact from a variety of different locations.  
8 And I think some determination was made and at that point the  
9 building could be seen. But my understanding was the balloon  
10 study was done at 37 feet, and that did not take into account  
11 anything that might be mounted on the roof.

12 MR. REINKE: That's not my understanding.

13 MR. SEMPLE: Okay.

14 MR. REINKE: And maybe John, if you come back  
15 up. But -- now we had the balloon studies that the floor  
16 level, the roof, and I'll go into a picture here when we go  
17 into cooling some other things where we'll show what the roof  
18 level is, where the parapet is, where the chiller deck is,  
19 and you run the chillers. And so the top of the chillers  
20 should have been 57 feet.

21 MR. SEMPLE: 57.

22 MR. REINKE: Is where I believe, and that's

1 where the balloon stand was.

2 MR. SEMPLE: And that's where the balloons  
3 were positioned?

4 MR. REINKE: Yes.

5 MR. SEMPLE: All right. Okay. Because my  
6 understanding with moon test did not use 56 to 57 feet, but  
7 would you --

8 MR. REINKE: John, do you --

9 MR. SEMPLE: I'd like to confirm that.

10 MS. PFEIFFER: Jessica Pfeiffer with Walsh.

11 MR. SEMPLE: Yes. Yes. Hi.

12 MS. PFEIFFER: Hi. Good to see you. So each  
13 of the balloons were at a different height and I can get you  
14 those heights, but the height that it was based off was the  
15 rooftop equipment. If rooftop equipment was located close  
16 to the corner, that is the height that we took.

17 So for example, if you had chillers close to  
18 that corner, we took the height of the building plus the  
19 chillers, but if the chillers were in the middle of the  
20 building, we didn't. Does that make sense?

21 MR. SEMPLE: All right.

22 MS. PFEIFFER: And I can get you each of those

1 heights so that you can understand.

2 MR. SEMPLE: All right.

3 MS. PFEIFER: But there are four varying  
4 heights because of that very reason. As you can see from our  
5 elevations, you have rooftop equipment that's higher in some  
6 areas than other areas.

7 MR. SEMPLE: Okay. Because I think that  
8 depending on its visual impact, it will be quite then variable  
9 based on what portion of the building you're viewing and from  
10 where. And so I was just thinking that the balloons gave a  
11 sort of four corner aspect to this, but otherwise we wouldn't  
12 get a real impression of what the actual visual impact was  
13 until built, I guess.

14 The other question I have is, I thought that  
15 as of the October 28th application, that there was not a visual  
16 of -- from Lee Highway. Did you just show one? I'm sorry  
17 if I missed it.

18 MR. REINKE: Yes. It's on the screen now.

19 MR. SEMPLE: It's on the screen now.

20 MR. REINKE: And --

21 MR. SEMPLE: Is that a new -- is this a new --  
22 or was this before the Planning Commission?

1 MR. REINKE: This was before the Planning  
2 Commission.

3 MR. SEMPLE: That was --

4 MR. REINKE: Correct John and Jessica?

5 MR. WRIGHT: Yes.

6 MR. SEMPLE: Yeah, it was just a comment that  
7 was made in the -- to the 10/28 application, that there will  
8 seem to be a visual missing, but I may have it wrong. I'm  
9 sorry. So that's from Lee Highway.

10 MR. REINKE: And you will see they're -- those  
11 are actual windows, though if you're inside the building --

12 MR. SEMPLE: Right.

13 MR. REINKE: You would not be able to see  
14 outside the building. So they're windows. So from the  
15 outside they look like an office building windows. It's the  
16 whole intent.

17 MR. SEMPLE: Yeah. Because here's what the  
18 comment was, the illustrative elevations do not include a  
19 visual from Lee Highway, the town's gateway. Therefore staff  
20 is proposing further design conditions specific to the  
21 building orientation of Lee Highway. And I'm just wondering  
22 if there's just -- that's just a little confusion.

1 MR. REINKE: Jessica, do you remember  
2 (inaudible) that?

3 MS. PFEIFFER: Yeah. Just to take a step  
4 back, we always had elevations. We submitted elevations, we  
5 got comments on the elevations, which were essentially to make  
6 them look more office like.

7 MR. SEMPLE: Okay.

8 MS. PFEIFFER: We first focused on the Route  
9 17 side where we upgraded them with the windows. And what  
10 we didn't have, which was that comment was the Route 29 side.  
11 And then we had that done in time for the Planning Commission.

12 MR. SEMPLE: Okay.

13 MS. PFEIFFER: Such that it was in our  
14 presentation at all three Planning Commission hearings.

15 MR. SEMPLE: Thank you.

16 MS. PFEIFFER: And before you tonight.

17 MR. SEMPLE: All right.

18 MR. NEVILL: May I ask one, just  
19 clarification, the elevation that's being shown currently on  
20 the screen is different than the one that was handed in the  
21 packet, which is the one that we are -- should consider the  
22 application.

1 MR. REINKE: The windows here? Is that --

2 MR. NEVILL: This one shows windows and the  
3 one that's before us sort of shows the disruptive pattern  
4 paneling.

5 MR. REINKE: Yeah.

6 MR. NEVILL: And that --

7 MR. REINKE: And technically -- I had a  
8 conversation with -- and Mike, please come on up if you got  
9 a second. Mike Halls is our Architect. I just -- he actually  
10 has windows on that one. They're hard to see. They're in  
11 the middle. And I just -- I'm going to go back.

12 MR. NEVILL: Did you go back to the Route 17?

13 MR. REINKE: Yeah. So if you look down at  
14 this one, and Mike had a point that the windows are kind of  
15 in -- the go ahead, Mike.

16 MR. HALLS: Now, the windows are essentially  
17 within those volumes that are extending off of the building.  
18 We're essentially just looking at two different options here  
19 for what we -- different modifications that we could do in  
20 order to provide windows and the best aesthetic qualities for  
21 the building.

22 MR. REINKE: And that was my call. So I

1 didn't feel like the windows were prominent enough, so I asked  
2 Mike to revise and show the windows a little bit more  
3 prominent.

4 MR. NEVILL: So, but that sort of blue  
5 paneling, that kind of disruptive patterning is what the  
6 building -- it shows on the other elevation. So that will  
7 continue on that facade as well, that elevation?

8 MR. HALLS: Yes.

9 MR. NEVILL: Okay. Thank you.

10 MR. REINKE: Thank you. All right.

11 MR. HEROUX: Mr. Mayor.

12 MR. NEVILL: Mr. Heroux.

13 MR. HEROUX: Yeah. Mr. Reinke, back on the  
14 soil, you mentioned that there were some soil issues, just  
15 curious on the property. It's my understanding at one point  
16 in time that property was a junkyard. Are there any remaining  
17 vehicles or any other junk on the property?

18 MR. REINKE: Nothing extremely obvious.

19 MR. HEROUX: Okay.

20 MR. REINKE: So -- but anything that's from  
21 there we're going to remove.

22 MR. HEROUX: Okay. So when you dig, you could

1 potentially see something that may have been buried, you know,  
2 potential --

3 MR. REINKE: Yeah, we'll remove it.

4 MR. HEROUX: Okay. But (inaudible) say you  
5 remove it. Thank you.

6 MR. REINKE: Okay. So what --

7 MR. MCGUIRE: Mr. Mayor.

8 MR. REINKE: I try to do is address questions  
9 3, 4, 5, and 10.

10 MR. NEVILL: Mr. McGuire?

11 MR. REINKE: I'm sorry.

12 MR. NEVILL: Mr. McGuire?

13 MR. MCGUIRE: Yeah, I have a quick question  
14 since you brought up about soil and things like that.

15 I know it's a requirement for the federal  
16 government to do like an archeological study. We're in the  
17 civil war crossroads of battlefields and things like that.  
18 Have you looked at that and consider what sort of historical  
19 evidence is on the ground and anything else if we're  
20 disturbing something like that, whatnot?

21 MR. REINKE: Yeah. And so just let you know,  
22 typically I've done that in the past, especially when you have

1 to go for a federal permit and you know there's a known  
2 battlefield. In this area there's not -- I haven't seen a  
3 known battlefield in that site. So let's -- and so I don't  
4 believe -- John, do we do? Do you know if we did an  
5 archeological study?

6 MR. NEVILL: I believe there was an  
7 architectural -- you know, yeah. So it's in the staff report,  
8 I believe.

9 MR. HEROUX: Section B.

10 MR. NEVILL: Section which?

11 MR. HEROUX: Page B7.

12 MR. NEVILL: Page which seven?

13 MR. HEROUX: It's in the attachment B, Staff  
14 Analysis. Mr. Mayor?

15 MR. NEVILL: Yeah.

16 MR. HEROUX: Section B, Historical and  
17 Cultural Resources.

18 MR. NEVILL: Okay. Yeah. So the analysis  
19 has been done --

20 MR. HEROUX: Yes.

21 MR. NEVILL: And no --

22 MR. HEROUX: Right.

1 MR. NEVILL: No triggers were identified.

2 MR. HEROUX: Correct.

3 MR. NEVILL: Thank you Mr. Heroux.

4 MR. HEROUX: Yeah. Thank you.

5 MR. MOONEY: Mr. Mayor, I have a question.

6 MR. NEVILL: Yes.

7 MR. MOONEY: Is this like hold your question  
8 till the end, or is this just like --

9 MR. NEVILL: Nope. Come on.

10 MR. MOONEY: We're going to be here till 6:30  
11 when the Planning Commission -- when the meeting starts?

12 MR. NEVILL: We'll bring lunch in.

13 MR. MOONEY: We'll bring lunch in. Okay.

14 All right. I just -- I don't know because I don't want to  
15 ask questions that you possibly will answer later on down the  
16 road because I got a list of questions.

17 MR. REINKE: Yeah.

18 MR. MOONEY: So I don't know if I should wait  
19 and like let you present.

20 MR. REINKE: So I'm about to go into -- so what  
21 I try to do is location landscaping.

22 MR. MOONEY: Okay.

1 MR. REINKE: Kind of what's -- existing  
2 conditions and then timing. Time is -- by the way, a build  
3 -- to build the shell, make sure there's -- to build the  
4 shell's about one year process. So you'll do your site work  
5 then you --

6 MR. MOONEY: Is a what? I'm sorry.

7 MR. REINKE: What's that?

8 MR. MOONEY: Is a what?

9 MR. REINKE: To -- about a one year process?  
10 So once you do your site work, we'll go vertical and we'll  
11 build the whole shell and then we'll build that out at ten  
12 different phases. And we'll go into that in a second.

13 MR. MOONEY: Okay. So I can ask location  
14 questions then?

15 MR. REINKE: Yeah, please.

16 MR. MOONEY: Okay, great. So I see like the  
17 landscaping looks nice and it blocks well from the road. And  
18 I could probably ask you questions literally for the next 75  
19 days because I just, you know, getting in all this. But I'm  
20 going to start with a few.

21 You can see it from the road, right? And you  
22 guys have done, you know, an acceptable job of blocking it

1 from the road in some people's opinion. There's other areas  
2 in the town like North Rock where you're going to see it all  
3 the time. Have we -- let me see what I wrote down here, have  
4 we taken that into consideration?

5 MR. REINKE: Yeah. Matter of fact -- I mean,  
6 ironically, we're going to see -- I'm going to go to and slide,  
7 let me go back.

8 MR. MOONEY: And I have questions like kind of  
9 from --

10 MR. REINKE: And we're going to get into this  
11 a little more. If you see -- there we go. Okay. Up there  
12 is what we call a screen wall. So your condenser units --  
13 your chiller units are up top at that portion of the building  
14 and that's the screen wall --

15 MR. MOONEY: Okay.

16 MR. REINKE: To hide those.

17 MR. REINKE: What we're going to end up doing  
18 though, to change that, we're going to actually do a sound  
19 wall around all 300 -- we're going to that in a minute. Sound  
20 wall around all 360 degrees of the chiller. Typically, what  
21 you do on a site that's all industrial, you'll just screen  
22 the chillers from aesthetic viewpoint. We're going to

1 actually screen the whole -- all chillers 300 -- so from the  
2 backside.

3                   And that's why from -- even from the Lee  
4 Highway, we didn't show the chillers because the software  
5 shows from -- down from that road you can't see the chillers  
6 up in the roof. But if you're up top and you're looking down,  
7 it's going to be screened by a sound wall. Now I'll go into  
8 that --

9                   MR. MOONEY: But not like a pretty green tree  
10 that people move to Warrenton for.

11                   MR. REINKE: So --

12                   MR. MOONEY: It's not going to be screened by  
13 a pretty green screen that people move to Warrenton for. It's  
14 going to be screened by a building screen.

15                   MR. REINKE: Yeah.

16                   MR. MOONEY: That -- so the road gets blocked  
17 by the trees, but some people in the higher grounds are going  
18 to be screened by a screen.

19                   MR. REINKE: Yes.

20                   MR. MOONEY: Okay. All right. Another  
21 question. Location wise. America is a very big nation and  
22 we have lots of really cold areas where you don't necessarily

1 need chillers to keep things cold. And lots of different  
2 areas, even within Fauquier County, or surrounding counties,  
3 or maybe on top of other data centers in Loudoun County could  
4 be a potential option for a data center.

5 Why did you guys choose this location in town  
6 for this data center and not literally anywhere else in the  
7 world?

8 MR. REINKE: You know, and this location was  
9 chosen because it was -- it already zoned industrial.

10 MR. MOONEY: Okay.

11 MR. REINKE: And so that made -- that met the  
12 major aspect of it. And then there's always business needs  
13 that we have that kind of depicts where different data centers  
14 go. And so just a business need for this data center.

15 MR. MOONEY: A business need federally, or  
16 privately, or just for Amazon?

17 MR. REINKE: It is just a business need.

18 MR. MOONEY: Okay. Okay. So -- but you -- so  
19 you can't say why this exact location was --

20 MR. REINKE: Well, I mean we -- the location  
21 is great from an industrial standpoint. We're going -- by  
22 the way, just FYI, on a side note, we'll talk about a few

1 different things. But I mean, I love to live in Warrenton  
2 and let you know what I know about this data center. I'd want  
3 the data center here. So I think it's great benefit for the  
4 town. But yeah, it's -- we chose this location because it's  
5 already zoned industrial.

6 MR. MOONEY: Did you say you live in Warenton?

7 MR. REINKE: No, I said I'd love -- like to,  
8 no.

9 MR. MOONEY: Oh, okay. Those are my  
10 questions right now, Mr. Mayor.

11 MR. NEVILL: Okay.

12 MR. MOONEY: That's all I have. I have a  
13 couple more about (inaudible).

14 MR. MCGUIRE: Mr. Mayor, I have a quick  
15 question.

16 MR. NEVILL: Mr. McGuire?

17 MR. MCGUIRE: So a couple months ago, an  
18 architect came before this body and talked about actually  
19 possibly burying the data center. Have you considered doing  
20 that? And why not?

21 MR. REINKE: You know, and I know John, you've  
22 talked about that. Do you want to come back up again and --

1 MR. WRIGHT: Yeah.

2 MR. REINKE: Yeah. Remember we talked about  
3 bearing the data center? You keep bringing it up.

4 MR. WRIGHT: Okay. So I think if I understand  
5 the question, you're talking about lowering the building down  
6 into the ground? Well, like I mentioned earlier, so when you  
7 look at a site design options, you want to look at grading,  
8 you want to look at the existing elevations of the ground.  
9 And we optimized roughly right now to have at that certain  
10 elevation of the site.

11 So that's why, you know, when you looked across  
12 the pad, the elevations range from 470 to 490, we're right  
13 around 486. So that's kind of that sweet spot in the middle.  
14 So pushing it down wouldn't do anything different unless  
15 you're really pushing it down 10, 20, 30, 40 feet, which then  
16 you have issues, where's all that dirt go.

17 And then you're creating a bowl there that  
18 becomes just like a bathtub, for example, that you can't get  
19 the water out. So a lot of the utilities are governed by  
20 elevations of buildings, how we freed sanitary water, our  
21 storm outfalls. So that's why everything goes in the picture  
22 as far as just bearing the data center. Does that make sense?

1 MR. MCGUIRE: So the site actually constrains  
2 you from doing a lot of --

3 MR. WRIGHT: Yeah. Yeah. There's a lot of  
4 site constraints for site --

5 MR. MCGUIRE: So what you're saying is it  
6 might not be the best optimal site for this place.

7 MR. NEVILL: No.

8 MR. WRIGHT: No.

9 MR. MCGUIRE: I'm sorry Mr. Mayor, I was  
10 asking him. So --

11 MR. WRIGHT: What do you mean? Can you repeat  
12 the question?

13 MR. MCGUIRE: You said you have constraints on  
14 what you can or can't do there. So what I'm saying is probably  
15 not the best place to put this then.

16 MR. WRIGHT: No, just back -- no backing up.  
17 Any site has constraints with elevations.

18 MR. MCGUIRE: Right. Okay.

19 MR. WRIGHT: With --

20 MR. MCGUIRE: Okay.

21 MR. WRIGHT: Sewer water.

22 MR. MCGUIRE: Right.

1 MR. WRIGHT: Storm outfall.

2 MR. MCGUIRE: Right.

3 MR. WRIGHT: And you look at it as a whole, as  
4 you design a site.

5 MR. MCGUIRE: Right. Okay. And I still  
6 don't understand what you said Jay, about best business  
7 practice. I don't understand that. You -- in reference to  
8 asking Mr. Mooney -- answering Mr. Mooney, you said best  
9 business practice. I don't understand that. I think that's  
10 -- that needs to be explained.

11 MR. REINKE: Mr. McGuire, forgive me, what was  
12 reference to the question? So there's a business need --

13 MR. MCGUIRE: Right?

14 MR. REINKE: So --

15 MR. MCGUIRE: You won't explain that business  
16 need. That's what I would like to know. I mean, I think the  
17 public needs to know what's the business need?

18 MR. REINKE: Well --

19 MR. MCGUIRE: Why can't we stay that? I mean.

20 MR. REINKE: From a land use perspective,  
21 there's --

22 MR. MCGUIRE: No, from the facility --

1 MR. REINKE: Yeah. I mean, there's a --

2 MR. MCGUIRE: I just --

3 MR. REINKE: There's a business need that we  
4 believe we have here.

5 MR. MCGUIRE: Okay.

6 MR. REINKE: And so we chose to be here.

7 MR. MCGUIRE: And you choose not to say why,  
8 what that is.

9 MR. REINKE: It's just a business need.

10 MR. MCGUIRE: Okay. I think that's important  
11 that we need to know. I mean that's just, there's a veil of  
12 whatever there. So.

13 MR. REINKE: Understood.

14 MR. MCGUIRE: Okay.

15 MR. SEMPLE: Mr. Mayor. I have some  
16 questions.

17 MR. NEVILL: Mr. Semple.

18 MR. SEMPLE: Go back to the slide that was up  
19 there that showed. So that is -- that's the visual image of  
20 this -- the gateway. I know it's not Lee Highway of  
21 Warrenton. As people drive by on the 17 bypass, they will  
22 see that?

1 MR. REINKE: Yes.

2 MR. SEMPLE: Wow. Okay. I wonder if there's  
3 any other visual impression of Warrenton that is anything  
4 close to that along any of our bypasses.

5 The question I have -- the next question I  
6 have, I'm sorry, is you said that you bought the property for  
7 business purposes. And of course I understand they're  
8 proprietary reasons why you can't disclose all these reasons,  
9 but you purchased it -- but it wasn't just because it was an  
10 industrial use, you required a special use permit.

11 And why did Amazon decide to go ahead and  
12 purchase the land before knowing the SUP was even approved?

13 MR. REINKE: You know, there's times where we  
14 take business risk, and that was a business risk we deemed  
15 appropriate at the time.

16 MR. MOONEY: Mr. Mayor.

17 MR. NEVILL: Mr. Mooney.

18 MR. MOONEY: Is there a reason why the  
19 business risk was -- I want to be clear that I think based  
20 off of your podcast that we heard that we might -- could be  
21 friends, but I want to ask this question.

22 You're -- a business decision to pay 10x what

1 the property is worth prior to even having a -- you know, you  
2 -- it's a business risk. I understand business --

3 MR. REINKE: Sure.

4 MR. MOONEY: Risk, but I don't understand a  
5 business risk that I don't think I might have a really good  
6 shot at paying 10x or something for. Does that --

7 MR. REINKE: Yeah, and if we paid 10x, then  
8 that's our fault for sure. What we find is -- when we look  
9 at data -- when we look at land that's zone industrial in  
10 different parts of the country, we recognize that often demand  
11 for that land is high, especially at the time when we bought  
12 it.

13 So the land was high, and so it -- when you want  
14 to move and get things done, there's times where we just will  
15 make a business decision and go. We want to move quickly.  
16 And so you go -- it's easier on Monday morning quarterback  
17 and go, you know, maybe we shouldn't. And it's a bad, I guess  
18 valuation, but the decision was made at the time and --

19 MR. SEMPLE: Yeah, again, I just -- I'm sorry  
20 Mr. Mayor, but this -- there are other industrial parcels of  
21 land throughout Northern Virginia that have such uses by  
22 right, and yet, this particular land within the boundaries

1 of a small town is -- required a special use permit.

2                   And what I just don't understand is what was  
3 so attractive about this particular parcel that made it worth  
4 the purchase price, given the condition that you didn't even  
5 know whether there was going to be an approval or not?

6                   MR. REINKE: Well, we understood that there  
7 was a -- we had rumors out there, there was a phenomenal town  
8 council to deal with that made it attractive partly. And I  
9 say that tongue in cheek, there was -- there are business needs  
10 at times to move quickly.

11                   MR. SEMPLE: No, excuse me. You said a  
12 phenomenal town council?

13                   MR. REINKE: Yeah, it was -- I'm trying to give  
14 you a compliment, but --

15                   MR. SEMPLE: No, I -- why was the town council  
16 phenomenal?

17                   MR. REINKE: It was tongue in cheek. Purely  
18 tongue in cheek. Yeah. Purely. So it is purely a business  
19 decision to be here in this area.

20                   MR. SEMPLE: All right. Okay. Well, this  
21 goes to other questions, but, of course -- all right. But  
22 so we -- I think the -- you're doing this, the process. I

1 just want to -- there was a earlier question, you were on  
2 number 3 of the --

3 MR. REINKE: There was three, four -- yeah, I  
4 was going to cover 3, 4, 5, and 10.

5 MR. SEMPLE: Okay, 2, 4, 5, and 10. Let me  
6 just see which --

7 MR. REINKE: So we --

8 MR. SEMPLE: Let me see where you are.

9 MR. REINKE: Communication, landscaping,  
10 kind of preexisting.

11 MR. SEMPLE: Are we dealing with this?

12 MR. REINKE: Yes. So -- yes.

13 MR. SEMPLE: This is the document we're  
14 dealing with?

15 MR. REINKE: Yes, sir.

16 MR. SEMPLE: So two, four -- let me just make  
17 sure I'm following -- tracking this properly. Four.  
18 Because we asked a location question. And that's 3, 5, timing  
19 phasing, and --

20 MR. REINKE: Then ten, which is kind of  
21 preexisting, which was just --

22 MR. SEMPLE: Okay. And others will answer

1 the other questions.

2 MR. REINKE: Yes.

3 MR. SEMPLE: I'm sorry, I don't want to ask you  
4 questions that you're not assigned.

5 MR. REINKE: Well, you can. I'll probably  
6 bring someone else up.

7 MR. SEMPLE: All right. Thank you. So let's  
8 go back to noise.

9 MR. REINKE: Okay.

10 MR. SEMPLE: You haven't -- we haven't  
11 addressed noise. Are you going to --

12 MR. REINKE: I'm going to bring --

13 MR. SEMPLE: You're going to represent  
14 something on that?

15 MR. REINKE: Yeah.

16 MR. SEMPLE: All right.

17 MR. REINKE: Would you bring -- Kyle Crass?

18 MR. NEVILL: Why don't we at this point let the  
19 presentation continue and if we have questions at any given  
20 point, we can do that. I think we're getting ahead of  
21 ourselves in some of our questioning. So --

22 MR. REINKE: Yes.

1 MR. NEVILL: Allow the applicant to continue  
2 the presentation. And as questions arise specific to that  
3 moment, let's ask questions then.

4 MR. REINKE: Ideally. Okay. I want to move  
5 forward. So under operations, there was a series of  
6 questions and so we just said, served by essential public  
7 facilities, kind of cooling noise, fire safety, fuel storage,  
8 operations, security, and refuse. So we'll cover all those.  
9 And, Kyle Crass, if you would come up. This moves it forward,  
10 this is the pointer? A little bit of delay. Just -- there  
11 you go.

12 MR. CRASS: Okay. So good morning, everyone.  
13 So this slide that's on the page right now is really sort of  
14 a little bit of a general informational slide that does have  
15 the one highlighted selection that we have for this data  
16 center.

17 There's two types of cooling that are  
18 generally seen in data centers. You have a non-compressor  
19 based, non-mechanical cooling type solution. That would be  
20 the direct air, directive evaporative that Mr. Mooney over  
21 here was referring to earlier. And then there's also a  
22 compressor based mechanical system, which is DX, is commonly

1 referred to direct expansion, where we have air cooled chilled  
2 water systems in addition to water cooled chilled water  
3 systems.

4                   Due to the constraints on this site, so we  
5 chose a non-consumptive water-based system, which put us into  
6 the air-cooled chilled water system that we have presented  
7 in the design. I'm going to ask, actually, Mr. Rob Sims, if  
8 you want to come up and just give a brief overview of this  
9 slide. He's our mechanical designer of record for this  
10 project here.

11                   MR. SIMS: Hi, Rob Sims. So simple diagram.  
12 Basically, an air cooled chilled water system. So high  
13 level, you basically have your heat load within the building,  
14 that kind of larger white rectangle, recirculating air. Then  
15 a chilled water coil or an air handler unit, that has chilled  
16 water that circulates through that.

17                   It's a closed loop chilled water system, so  
18 that water is not consumed as in, it's not evaporated off to  
19 atmosphere, it's just pumped in a circle that then transfers  
20 the heat from within the building out to the air cooled  
21 chillers.

22                   Those are effectively packaged refrigerant

1 based systems that then discharge the heat to atmosphere  
2 similar to every compressor based system, similar to what  
3 would be in your house. Condenser fans, refrigerant cycle,  
4 kind of basic mechanical equipment. So, thank you.

5 MR. CRASS: So, all right. I really have a  
6 hard time. I really want ot walk over that direction here.  
7 So the image that's on the top right is just a typical air  
8 cooled chiller just for representative -- illustrative  
9 purposes there. The bottom figure, I think is somewhat  
10 important and I am going to walk over here just for the --  
11 I can put my big boy voice on here if that's all right with  
12 everyone, unfortunately.

13 MR. HAMBY: You -- unfortunately, you got to  
14 come back towards the mic. I can give you the wireless mic  
15 if you'd prefer.

16 MR. CRASS: Yeah, that would be better just  
17 for the sake of actually discussing this, just so that folks  
18 understand. Can you guys hear me okay?

19 MR. HAMBY: Yes, sir.

20 MR. CRASS: All right. I just want to point  
21 out this diagram. So this is a representation of the  
22 building, and there's some important features on here that

1 I think I wanted to communicate to you without using the little  
2 pointy red dot that wasn't really working so well.

3           So this is the rooftop, as you see here in the  
4 gray, all right? This rooftop has a parapet wall, which is  
5 around here. This parapet wall extends above the rooftop  
6 deck. This parapet wall is generally designed so that we can  
7 do maintenance on top of the structure without having a  
8 handrail.

9           So it is generally, I believe, 42 inches above  
10 the deck height to allow for code compliance to be basically  
11 a safety rail so you don't have to tie off when you're on the  
12 roof.

13           On top of that you have this elevated chiller  
14 deck here. That is actually the platform that those  
15 mechanical pieces here will sit on.

16           They will have different pieces of piping and  
17 elements coming under it that go into the building, both to  
18 and from with the chilled water.

19           In addition, this right here, this block and  
20 this block right here, these don't show it. This was sort  
21 of the last rendering that we had, but in light of the new  
22 noise study, we actually will now have 360 degree wraparound

1 sound attenuating screen panels that will be around the  
2 facility here on top of the roof deck there.

3 MR. HAMBY: Mr. Mayor, if I could real quick.

4 MR. NEVILL: Mr. Hamby.

5 MR. HAMBY: So the cooling that you're using  
6 in this closed loop, this is -- you're stating it's 19,000  
7 gallons initial filling of water and 190,000 gallons total.

8 So by contrast, the pool at the WARF is roughly  
9 460,000 gallons, just the pool that the town operates. After  
10 the loop is full and operating, is that when it -- how does  
11 that -- what's the draw after operation?

12 MR. CRASS: Yes, sir. Great question.  
13 Thanks for asking that. So the way that this building is  
14 designed, is it's designed to be built out in phases.

15 So the phases correspond to basically a data  
16 demand or demand for the service that we're providing. So  
17 you have the shell, which is built within that one-year  
18 timeframe that we discussed. And then the first phase will  
19 be built out on the interior section.

20 When that first phase is built, that will  
21 correspond to the first phases of chillers and all the other  
22 mechanical equipment. That first phase of mechanical

1 equipment requires 19,000 gallons to fill that system, and  
2 then it then runs and performs over its lifespan.

3           At the end of our construction and maintenance  
4 -- construction period, each of those other phases will be  
5 built out in land, and then correspondingly have 19,000  
6 gallons to fill the system. So we have ten phases, which  
7 correspond to 190,000 gallons. That is how we got to those  
8 quantities.

9           The consumption on a regular basis will be, I  
10 believe it was 380 gallons.

11           MR. SIMS: 328.

12           MR. CRASS: 328 per day? So basically it's a  
13 office facility equivalent basically. Does that answer your  
14 question, sir?

15           MR. HAMBY: Absolutely.

16           MR. MCGUIRE: Mr. Mayor, I have a question.

17           MR. HAMBY: (Inaudible) 328 is not for  
18 cooling?

19           MR. CRASS: Correct. But that is the water  
20 demand for the facility for the day.

21           MR. NEVILL: Mr. McGuire.

22           MR. MCGUIRE: So with that system, is it ever

1 purged for maintenance or anything else like that with the  
2 water and the water is ever like dumped into the sewer or  
3 anything else like that, or?

4 MR. CRASS: No, sir.

5 MR. MCGUIRE: So it's never -- it's always in  
6 that closed loop and it'll never be purged for maintenance  
7 or anything like that?

8 MR. CRASS: I wouldn't say the word never be,  
9 sir. But --

10 MR. MCGUIRE: Well, I'm just asking --

11 MR. CRASS: In general, the typical lifespan  
12 of these facilities -- oh, go ahead.

13 MR. SIMS: Mr. McGuire?

14 MR. MCGUIRE: Yeah. Sure.

15 MR. SIMS: Pleasure. Thank you. Great  
16 question. So regular maintenance on a closed loop chilled  
17 water system, in my background, comes from in the field in  
18 --

19 MR. MCGUIRE: Okay.

20 MR. SIMS: In working with construction in  
21 contracting. Regular maintenance on those is they test the  
22 water once a year, and that's literally about this much water.

1 MR. MCGUIRE: Okay.

2 MR. SIMS: So it's a couple of ounces of water  
3 that they pull up to make sure that we're not having any  
4 corrosion in the system that will --

5 MR. MCGUIRE: Right.

6 MR. SIMS: Gum up or block the --

7 MR. MCGUIRE: Okay.

8 MR. SIMS: The coils. So if there's any  
9 makeup in the system, it's literally a couple of ounces per  
10 year.

11 MR. MCGUIRE: Okay.

12 MR. SIMS: So once we fill up and once we get  
13 to that 190,000 gallons for cooling, we have no extra added  
14 water.

15 MR. MCGUIRE: Okay. And then if the -- and I  
16 understand that. I appreciate that. And then if the system  
17 like, I don't know, I'm thinking like teapot or whatever, does  
18 it ever have like a safety valve if it gets too hot that it's  
19 got to dump out or -- I'm just concerned --

20 MR. SIMS: Yeah.

21 MR. MCGUIRE: About like, you know, it's ended  
22 up in the Chesapeake or something like that?

1 MR. SIMS: I mean, so this is --

2 MR. MCGUIRE: You know what I mean?

3 MR. SIMS: This is a pressurized system, so  
4 it's an a --

5 MR. MCGUIRE: Right. That's what I thought.

6 MR. SIMS: American Society of Mechanical  
7 Engineers pressurized system. So there are relief valves in  
8 there, and those relief valves are there to protect the people  
9 on the inside.

10 So that way the relief valve is the sacrificial  
11 aim that if pressure gets too high or temperature gets too  
12 high, that relief valve opens up. Now, that's an emergency  
13 situation, that is not standard operation.

14 MR. MCGUIRE: And is that like dumped out as  
15 steam, or dumped out as hot water?

16 MR. SIMS: The water temperature is low enough  
17 that at that point it is just water. So we're talking water  
18 temperatures in a range of 55 to 85 degrees Fahrenheit. So  
19 temperature is not an issue. It's not -- actually, my  
20 background is also in steam system, so I may or may not have  
21 opened up a steam valve once or twice.

22 We're not going to be dumping steam out of the

1 system. It would be a pressure related system, and it would  
2 be a chilled water purge. It is cold enough water that you  
3 could touch it. You're not going to wash your hands with this  
4 because it's too cold.

5 MR. MCGUIRE: Okay. All right Thank you.

6 MR. SIMS: You're welcome.

7 MR. SEMPLE: I have a couple of questions, Mr.  
8 Mayor.

9 MR. NEVILL: Mr. Semple.

10 MR. SEMPLE: Guess you stand up. Will all  
11 these chillers be operating at the same time or will they be  
12 cycling on and off based on various internal demand?

13 MR. SIMS: So the chiller is stage based on  
14 time. So as load goes up the chillers will ramp up in various  
15 phases. So Phase 1 can be loaded. This is hypothetical.  
16 Phase one can be loaded to 80 percent of capacity. It means  
17 those chillers are 80 percent.

18 Phase 2, might be loaded to 100 percent  
19 capacity. So there's varying stages that they could be  
20 loaded at. Also during the day, we don't ramp up and run flat  
21 out. We will throttle the chiller in order to make sure that  
22 we are meeting what the demand load is. So if it's a cooler

1 day outside, the chiller is going to run at a lower speed.

2 MR. SEMPLE: I've read that some of the new  
3 chips that are coming out are running hot, hotter, and let's  
4 say the new equipment comes in it runs hotter. Will these  
5 chillers be designed to accommodate prospective increase in  
6 heat dissipation requirements?

7 MR. SIMS: Yes. So in -- without getting too  
8 much of the details, I remember when we were running rooms  
9 at 60 degrees Fahrenheit because we had --- because the chips  
10 weren't happy. Chips now in general are happy between 100  
11 and 104 degrees air temperature.

12 So we are looking and I can't say too much, but  
13 us and our competitors are always looking to adjust and get  
14 those temperatures warmer because the chips and equipment --  
15 cooling equipment is more efficient at warmer temperatures.

16 MR. SEMPLE: Right. For -- that's correct.  
17 That's what I heard. Now, so there -- is there a plan -- we're  
18 talking about plan maintenance, that is -- what is the life  
19 of one of these chillers in terms of before you think you  
20 actually have to replace the unit?

21 MR. SIMS: Properly maintained chillers per  
22 1978 Ashrae requirements will operate between 20 and 25 years.

1 MR. SEMPLE: Twenty five years. So -- all  
2 right. Okay.

3 MR. SIMS: And that 1978 number, not that I  
4 remember it for any specific reason, that is the last time  
5 Ashrae did a study on equipment.

6 MR. SEMPLE: I have one last question. The  
7 location of chillers in the design, what I'm looking at now,  
8 I guess in that little box in the right.

9 MR. SIMS: Yes.

10 MR. SEMPLE: Does that show the chillers, or  
11 is that behind -- or the chillers' behind it?

12 MR. SIMS: So the -- yeah, it's hard to get  
13 it(inaudible). Sorry. So in the small little gray area  
14 here.

15 MR. SEMPLE: Yeah.

16 MR. SIMS: That's that screen parapet that you  
17 would see up at the top. So the chillers are behind in this  
18 dark gray area in this lower picture.

19 MR. SEMPLE: So the building is -- I'm looking  
20 at the aspect of the building because most of the noise  
21 theoretically are coming from the chillers? In this issue  
22 about noise abatement.

1 MR. SIMS: Most of the consistent noise would  
2 be coming from the chillers, but they're also set back from  
3 property line and from the edge of the building.

4 MR. SEMPLE: Now are there any other  
5 generators or anything like that that we -- that in fact are  
6 run? Let's say you have a power -- let's say there's a  
7 blackout. There is a -- the power -- we have them from time  
8 to time. We had a very serious one recently where Warrenton  
9 was out for a couple of days. What are you doing to  
10 accommodate providing a backup emergency power, and where are  
11 those generators located?

12 MR. SIMS: So backup emergency power for any  
13 mission critical facility is via generators. Those  
14 generators are backed up I believe right behind where the  
15 chillers are on the ground. And keep in mind those generators  
16 are not run on a consistent basis to your point Mr. Semple.  
17 If there is a utility outage, the utility outage takes down  
18 our facility completely. That means that our customers can  
19 no longer access data. So we have to bring -- keep the  
20 building online.

21 MR. SEMPLE: Well, I understand that. Yeah.  
22 And those generators generate enough power to run the entire

1 facility?

2 MR. SIMS: Correct.

3 MR. SEMPLE: How much power is that?

4 MR. SIMS: I don't know if we have that in a  
5 future slide or not.

6 MR. CRASS: Yeah, we can try to get that.

7 MR. SIMS: We can get that information too.

8 MR. CRASS: I just don't have it at hand.

9 MR. MOONEY: Mr. Mayor.

10 MR. CRASS: We'd have to take that as an action  
11 item to look at --

12 MR. SEMPLE: As a what?

13 MR. CRASS: As an action item to look up.

14 MR. SEMPLE: All right, thank you.

15 MR. CRASS: I just don't have the figure off  
16 hand.

17 MR. SEMPLE: All right. Thank you.

18 MR. CRASS: We have to figure. I don't have  
19 it off the top of my memory.

20 MR. NEVILL: Mr. Mooney.

21 MR. MOONEY: Thank you Mr. Mayor. You said  
22 that there's -- you used an engineering term. Married into

1 an engineering family, so I don't -- you used an engineering  
2 term for the screen and like circulating the noise. Do we  
3 have those screens around the generators? Because you're  
4 going to have generators there.

5 MR. SIMS: Go the next slide.

6 MR. CRASS: Yeah. Let me go the next slide.  
7 Hold on.

8 MR. SIMS: And that's going to be a great  
9 discussion too with -- on the noise portion of the  
10 computation.

11 MR. CRASS: Is it going? There it goes. So  
12 this slide shows the noise mitigation solutions that are going  
13 to be put in place to enable compliance with the town ordinance  
14 with respect to noise.

15 So we have condenser fan silencers that is the  
16 green box on top of those chiller units. We also have a  
17 compressor wrap, which is a sound mitigation material. And  
18 then we also have a sound wall. And is this the -- I was going  
19 to say, is this time to bring up the sound?

20 MR. SIMS: Yes.

21 MR. CRASS: Yeah. So let me bring up Mr. Ian  
22 Brewe and Chris with Polysonics. They're our sound

1 consultants and we can talk sound.

2 MR. BREWE: Hi there. Ian Brewe, AWS  
3 acoustical engineer. So we've developed -- you know, looking  
4 at the town ordinance, and like you say, the major noise  
5 component was the chillers up on the rooftop decks. So we've  
6 developed a strategy to mitigate that noise through these  
7 three components.

8 The first is the condenser fan silencer on  
9 these chiller units. Most of the fan is emitted -- most of  
10 the noise is emitted by the fan and goes vertical. Here we've  
11 positioned a giant muffler on top of the chillers, so that  
12 will reduce the noise off those fans as it comes vertical.

13 The next major noise component is the  
14 compressors at the base of the chiller. And to address the  
15 noise from that, we'd be wrapping those with acoustical  
16 blankets. While they look pretty light, when we think about  
17 noise reduction, we think about absorption and we think about  
18 transmission loss.

19 Transmission loss is the amount of noise that  
20 goes through a structure. So this blankets provide both, the  
21 material allows the sound to be absorbed by the blanket, and  
22 then it also has insulation, and a dense material within the

1 blanket to reduce that transmission through the blanket.

2           Finally we've enclosed the entire two sets of  
3 chillers. So there'll be a sound wall around each of the  
4 banks of chillers up on the roof. And those go above the  
5 height of the chiller to, you know, kind of the mid-level of  
6 where those silencers are. So that allows us to reduce the  
7 noise from those chillers in all directions.

8           We've also taken into account indoor modeling,  
9 all the other minus -- minor mechanical equipment up on the  
10 rooftop, and you know, use that in our calculations.

11           MR. SEMPLE: I'm sorry to ask. But have you  
12 used this technology, these sound abatement procedures at --  
13 in other data centers?

14           MR. BREWE: Yes, I have.

15           MR. SEMPLE: And can we possibly go -- are any  
16 within our geographic locality?

17           MR. BREWE: Pardon me. No. They -- the ones  
18 I was working on were not in this area.

19           MR. SEMPLE: So where are they?

20           MR. BREWE: A lot of them were in Europe where  
21 there's -- we had some very strict noise.

22           MR. SEMPLE: So if I go to Europe and we can

1 delay this vote until I come back --

2 MR. BREWE: Well, I'll take a good trip.

3 MR. SEMPLE: Perhaps I can go hear what this  
4 sounds like.

5 MR. BREWE: Yeah, I don't know anywhere  
6 locally that I could point to that has a mitigation system  
7 similar to this.

8 MR. SEMPLE: Similar like this.

9 MR. BREWE: Yeah.

10 MR. SEMPLE: Okay.

11 MR. NEVILL: So just to clarify, in Europe,  
12 the noise emission standards are much more stringent than they  
13 are in America's so to me?

14 MR. BREWE: You know, it varies locale to  
15 locale. You know, the standards are non-centralized here in  
16 the US and in Europe. So there's some various levels and it's  
17 impossible to say it's more strict or less strict than in any  
18 one place.

19 MR. NEVILL: Then since we don't have nearby  
20 areas to compare, would it be safe or fair to say that this  
21 is in excess of mitigation efforts? This would make this  
22 location unique in that it goes above and beyond what is

1 standard in the industry?

2 MR. BREWE: The noise regulation has pushed us  
3 to use quite a bit of noise mitigation in this scenario. Yes.

4 MR. NEVILL: Okay.

5 MR. MOONEY: Mr. Mayor.

6 MR. NEVILL: Mr. Mooney.

7 MR. MOONEY: So this unique situation that  
8 we're in, does Leesburg -- the town of Leesburg, or the town  
9 of Manassas have any data centers?

10 MR. BREWE: I don't know.

11 MR. MOONEY: Oh, okay. If it's -- if this is  
12 not -- okay, hold on a second. I got more questions for you,  
13 sir.

14 MR. BREWE: Okay.

15 MR. MOONEY: All right. So the -- you  
16 answered the noise on the things, but the generators, those  
17 things are going to be loud when they turn on when we have  
18 power outages.

19 Do we have a mitigation for the sound of the  
20 generators? And if not, I believe Mr. Ford is the architect  
21 of the application. Is there -- why -- is it something that  
22 should be a condition that is set or am I not making myself

1 clear? Like, should we make the noise variance for the  
2 generators not a condition for you guys to be met?

3 MR. BREWE: Let me address what will -- what  
4 the generator noise mitigation is. So the generators  
5 themselves sit within a sound enclosure.

6 Here we're looking at using very high  
7 performance sound enclosures for these, and that reduces the  
8 mechanical noise, is what we refer to it off -- coming off  
9 the engine body, and in the air intakes. That's all enclosed  
10 within a generator enclosure. The exhaust is run through a  
11 silencer. It would be a critical grade silencer here in this  
12 application.

13 MR. MOONEY: Okay.

14 MR. BREWE: To reduce that exhaust noise from  
15 that.

16 MR. MOONEY: And -- Sorry, go ahead.

17 MR. BREWE: No. Go ahead.

18 MR. MOONEY: You are the polytech? What is --

19 MR. BREWE: No. I'm -- I am with AWS. Chris  
20 here is our consultant for the noise --

21 MR. MOONEY: For the noise --

22 MR. BREWE: Study.

1 MR. MOONEY: For the noise --

2 MR. BREWE: With Polysonics.

3 MR. MOONEY: Okay. The noise issue has been  
4 brought up for -- has been going on for a while, correct?

5 MR. KARNER: Yeah. Correct. Hi, I'm Chris  
6 Karner from Polysonics.

7 MR. MOONEY: Hi, Chris. This noise has been  
8 going on for a while. The town's been asking about it, right?

9 MR. KARNER: Yes.

10 MR. MOONEY: Is this the first time you've  
11 been in front of us?

12 MR. KARNER: Yes.

13 MR. MOONEY: Okay. That might be a question  
14 that I would ask. Like, so you never -- so you were never  
15 there for the Planning Commission to ask questions to?

16 MR. KARNER: No.

17 MR. MOONEY: Okay.

18 MR. KARNER: It's been -- the report has been  
19 ongoing and I would say yesterday was the -- you know, the  
20 time we were finally ready to release the report. So.

21 MR. MOONEY: But you're -- but --

22 MR. SEMPLE: I'm sorry. You're saying the

1 report wasn't complete till yesterday?

2 MR. KARNER: It was ongoing, but yes. So the  
3 --

4 MR. SEMPLE: So at no time was the report ever  
5 in a condition before the Planning Commission to be -- fulfil  
6 one of the criteria that is mandatory under our review. Is  
7 that correct?

8 MR. KARNER: I don't -- I can only speak to the  
9 --

10 MR. SEMPLE: You don't have to answer that  
11 question.

12 MR. KARNER: Noise part on that report.  
13 Sure. All right.

14 MR. HEROUX: Mr. Mayor.

15 MR. NEVILL: (Inaudible).

16 MR. HEROUX: Yeah. I'm going to try and not  
17 blend phasing with noise, but I just want to make sure we  
18 understand, because I think they're sort of related.

19 MR. KARNER: Right.

20 MR. HEROUX: As I understand your design. So  
21 the chillers that are on the roof, can you describe how they  
22 are, at what drives, like -- let me back up. The total

1 capacity of chillers will not be installed on day one, is my  
2 understanding. Is that correct, Ian?

3 MR. BREWE: That is correct.

4 MR. HEROUX: Okay. So what drives the  
5 addition of chillers onto the roof over the phasing of your  
6 project?

7 MR. BREWE: I'm going to defer either Kyle or  
8 Brent. Somebody want to --

9 MR. HECKER: Glad to be back. So part of the  
10 phasing, what drives the chiller requirements is it's actual  
11 footprint and making sure that we're not, you know, we don't  
12 want to deploy all of our chillers right off of day one because  
13 we don't -- if we don't need them, you know, it -- the most  
14 efficient piece of equipment is one that you don't have to  
15 use.

16 MR. HEROUX: Right.

17 MR. HECKER: So if we don't have to use it,  
18 then we don't want to install it. So our phasing is based  
19 on, okay, we need capacity at this site, we're going to add  
20 IT, we need to add IT, we need to add chillers.

21 MR. HEROUX: Okay. So it's -- you -- what  
22 drives it? And again, I'm just trying to -- for everybody's,

1 you know, make this as comprehensive as possible for all of  
2 us.

3 MR. HECKER: Yes.

4 MR. HEROUX: Is what drives us is actually  
5 what's happening inside the data center.

6 MR. HECKER: Correct.

7 MR. HEROUX: That there are servers, storage,  
8 network capacity that is needed because of some business  
9 demand from a customer says, hey, you know, we need to, so  
10 you keep adding capacity inside compute network storage, and  
11 as that's added, you're doing a measurement and saying, oh,  
12 we need more chilling on the roof.

13 MR. HECKER: Yes.

14 MR. HEROUX: Because it's getting a lot in  
15 here.

16 MR. HECKER: Yeah.

17 MR. HEROUX: Okay. All right. So that  
18 drives that. In your data center management system you're  
19 managing -- you're measuring temperature.

20 MR. HECKER: Correct.

21 MR. HEROUX: Are you managing or measuring  
22 noise?

1 MR. HECKER: We -- noise is something --

2 MR. HEROUX: Outside.

3 MR. HECKER: Noise outside is one of the  
4 conditions that we have made as part of the sub.

5 MR. HEROUX: Okay. So we'll talk about that,  
6 I guess.

7 MR. HECKER: Yeah.

8 MR. HEROUX: Okay. So there'll be monitoring  
9 of noise on the outside. Okay. The noise -- there's server  
10 storage, compute, there's capacity running inside. How much  
11 of what's happening inside contributes to the noise outside.  
12 You have a sense of that?

13 MR. BREWE: In this application and the way  
14 this cooling system is, it's really not a factor, because  
15 everything is self-contained, you know, and some of the other  
16 applications where you're bringing in, you know, you've got  
17 more of a direct path.

18 MR. HEROUX: Right.

19 MR. BREWE: That interior noise can't escape.  
20 But in this situation, it's really not.

21 MR. HEROUX: So the noise source is  
22 predominantly the chillers on the roof.

1 MR. BREWE: That's correct.

2 MR. HEROUX: Which is driven by the capacity  
3 that you need inside the data center. So is it a safe  
4 assumption that, you know, as assuming, let's just type it  
5 that, you know, this goes through that we will have to examine  
6 this noise at various points in time in the life cycle of this  
7 data center until one day, you know, I would assume that you'd  
8 say, hey, we're at capacity here, you know, this data center.

9 MR. BREWE: Right.

10 MR. HEROUX: You know, is -- and you know,  
11 maybe design changes or whatever, but --

12 MR. BREWE: Right.

13 MR. HEROUX: This is a stage process.

14 MR. BREWE: Right.

15 MR. HEROUX: You are not at a hundred percent  
16 capacity on day one.

17 MR. BREWE: That's correct.

18 MR. HEROUX: When you flip the switch here.  
19 Okay.

20 MR. BREWE: And the noise study is based on  
21 that final a hundred percent capacity.

22 MR. HEROUX: Okay.

1 MR. BREWE: Running at 100 percent on a hot  
2 summer day.

3 MR. HEROUX: Okay. But we have a -- we have  
4 time. There will be time to get there because your business  
5 has to support.

6 MR. BREWE: That's right. And we plan to  
7 measure as we install and make sure that, you know, always  
8 looking towards that 100 percent capacity and date.

9 MR. HEROUX: Okay. Thank you very much.  
10 Thank you Mr. Mayor.

11 MR. MCGUIRE: Mr. Mayor?

12 MR. NEVILL: Yes.

13 MR. MCGUIRE: I have a question.

14 MR. NEVILL: Actually, Mr. Mooney did have the  
15 floor, was interrupted by Mr. Semple. Do you have any further  
16 questions, Mr --

17 MR. MOONEY: I'll wait.

18 MR. NEVILL: Okay. Mr. McGuire.

19 MR. MCGUIRE: Yeah. Quick question. So  
20 obviously we can't go to Europe to hear the noise, and there  
21 was a good citizen that came before the council, before they  
22 had a recording of what it would sound like.

1                   So in fairness, I would ask you all if you could  
2 bring in a sample of the tape of the noise of the generators  
3 and the chiller system. Everybody needs to hear what they  
4 sound like. If you could do that, I really would appreciate  
5 that.

6                   MR. BREWE: Oh. I have to confer with my team  
7 on that.

8                   MR. REINKE: Yeah. And Chris, maybe you  
9 speak to that. I do -- as a matter of fact I remember I was  
10 here for that.

11                   MR. KARNER: Yeah.

12                   MR. REINKE: He's got three young boys and his  
13 passion to protect his boys resonated with me. The problem  
14 with -- it's the decibel level, right? So we're about to show  
15 a study -- and by the way, one of the things we're point out.  
16 When we ran the model and the model's key, we ran it at 140  
17 degree temperature day.

18                   So other words, we want to be at 99.9 percent  
19 on this. So it's a 50 degree day that the compressors are  
20 not going to run as at -- as speed that it would at 104 day.  
21 So when you see the model just recognize it's the hottest and  
22 even the nighttime model, it was at 89 degrees. So it's also

1 a hot night and just an FYI note.

2 MR. MCGUIRE: Okay.

3 MR. REINKE: When he -- we're going to see this  
4 when Chris goes to this study. What we did is -- it's below  
5 the ordinance at every octave. And --

6 MR. MCGUIRE: But can we hear it though?  
7 That's what I'm asking.

8 MR. REINKE: Yeah. And --

9 MR. MCGUIRE: Can we get an example? I mean,  
10 in all fairness to you and everybody else --

11 MR. REINKE: Right. Was it --

12 MR. MCGUIRE: Can we hear it? We can talk,  
13 you know, the figures and everything else.

14 MR. REINKE: Right.

15 MR. MCGUIRE: But we just need to hear it. I  
16 ask you if you can do that.

17 MR. REINKE: Yeah. I --

18 MR. MCGUIRE: I think that's.

19 MR. REINKE: I don't know. I've never have  
20 you been able to do anything like that?

21 MR. MCGUIRE: Well, there's always a  
22 precedent for something.

1 MR. REINKE: Right.

2 MR. BREWE: Can I speak to that? So -- and  
3 I've been in a lot of town halls where --

4 MR. MCGUIRE: Yeah.

5 MR. BREWE: Where that's been requested and --

6 MR. MCGUIRE: Right.

7 MR. BREWE: I've also seen a lot of examples  
8 where it's been done --

9 MR. MCGUIRE: Sure. Great.

10 MR. BREWE: Poorly, because really to  
11 understand what that decibel level and what that impact is,  
12 you have to be in a calibrated environment where, you know,  
13 if I play something right here, you're going to hear it  
14 differently than Mr. William. So --

15 MR. MCGUIRE: Right. Right. What I mean, I  
16 think we can get some idea of it though. That's what I'm  
17 saying. I think we're talking about noise. Noise is  
18 relative till you hear it.

19 MR. BREWE: Right.

20 MR. MCGUIRE: You know, and I think, you know,  
21 if that gentleman came here from the town, he played that tape,  
22 I think, you know, it's incumbent on you. You give an example

1 of this.

2 MR. BREWE: Okay, I will -- we'll take that  
3 into consideration.

4 MR. MCGUIRE: I think it's very important  
5 because it is hard to -- you know, we can talk about something,  
6 but until we hear it or see it, you know, and that's fairness  
7 to you too.

8 MR. BREWE: Sure.

9 MR. MCGUIRE: I mean.

10 MR. REINKE: And Chris is about to walk  
11 through, but the -- what -- one of the things that they did,  
12 Polysonics, is they measured the ambient noise at the site  
13 now at five different locations. Is that five different  
14 locations?

15 And it's interesting because the way the --  
16 with the mitigation and what we're running at 104 degree day,  
17 we're below all the ambient noise that's already there, except  
18 for about between 2:00 and 4:00 at night.

19 And -- still well below the ordinance, but at  
20 that point it will -- the noise at the area would be slightly  
21 less than what it is our data center. So I say that just  
22 because I -- at least for context and realize that the ambient

1 noise is louder. And if I remembered, was it five to ten  
2 decibels louder?

3 MR. KARNER: (Inaudible).

4 MR. REINKE: Much. Yeah.

5 MR. KARNER: The ambient noise is much louder.

6 MR. REINKE: Okay.

7 MR. MCGUIRE: So I would just also like, you  
8 know, in addition to an example, you can say like, it's  
9 equivalent to like five buses running at night or whatever  
10 it is. You know what I mean?

11 MR. REINKE: Yeah.

12 MR. MCGUIRE: So people and the good citizen  
13 can understand that. So you can wrap their head around that.

14 MR. KARNER: Yeah. So I totally understand  
15 what you mean. My concern with doing that, and it's kind of  
16 what Ian was getting at, is, so whoever measured and measured  
17 the actual audio of the site was at a certain sound level.

18 He played it back to you at a certain sound  
19 level that may or may not have matched whatever he measured  
20 at the site. If we come with a new recording, it'll sound  
21 different, but sound levelwise, it really has nothing to do  
22 with what people experience if you come with a tape recorder

1 of a recording.

2                   You should have a sound meter here saying,  
3 okay, turn it down till you get to whatever you're going to  
4 hear. So sound, decibelwise, it should match what the  
5 perception is going to be at the site. Because if I could  
6 bring in somebody whispering, turn it up to 100 DB you'll be  
7 like, boy, whisperings really loud.

8                   So that would be my concern with duplicating  
9 that effort or that effort in the first place. It would be  
10 more of a, what does it sound like, rather than how noisy is  
11 it going to be? So that would be the benefit of a recording.

12                   MR. MCGUIRE: Right. And I also think it's  
13 fiduciary our responsibility as a town that maybe we hire an  
14 independent sound expert to find out what this is.

15                   Because if this data center goes in, it's going  
16 to be there forever. I think we owe that to the citizens to  
17 have an independent study that says, here's what the sound's  
18 going to be. I think that's very important,

19                   MR. FORD: Your Honor. We know that the  
20 question of noise is probably one of the most important  
21 questions that the council has to consider. When you look  
22 at the noise study, and noise study was submitted, it may have

1 been faulty at the early stage because it was submitted  
2 because we did not know it was a draft.

3 But what we have done was submit a noise study.  
4 This noise study picks up on several things, one of which is  
5 the discovery that that was an inadequate noise study at the  
6 time.

7 Also, we did receive the interpretation from  
8 the zoning administrator that we sought. And that was one  
9 of the reasons that Mr. Karner couldn't finish his noise study  
10 until now.

11 That said, what that noise study shows, and  
12 what he can tell you about is that, with the modeling that's  
13 possible without the facility actually existing on the  
14 ground, is that we meet the noise ordinance about minus 2  
15 decibels to 11 decibels below the requirements of your  
16 ordinance, which is your legal standard at every part -- point  
17 on the property, which it has to be measured, which is  
18 basically everywhere around it. That's what the noise study  
19 shows today.

20 We recognize, and I think this is something  
21 that is important to us as well as it is to the council, is  
22 that that's a modeling study.

1                   And consequently there -- while the ordinance  
2 -- while there's a draft condition right now that talks about  
3 meeting it at site plan and subsequently, there has been  
4 discussion of an additional ordinance SUP condition, which  
5 would require consistent testing during the phases of  
6 construction to indicate that the actual operation of the  
7 facility continues to satisfy the requirements of the noise  
8 ordinance.

9                   That's your standard. And that meets it both  
10 at the frequency level, at the decibel level. That's the  
11 standard. The council -- I don't think it's even suggesting  
12 the council intends to make up a new noise standard of some  
13 kind. We also took into consideration the concept of hum,  
14 which is in your ordinance, but is not a defined term.

15                   So what we are suggesting, and which we will  
16 work with Ms. Harris on is the language of the new noise  
17 condition, which has been floated to the staff in which some  
18 of you may already know about, which will take into  
19 consideration not only the modeling today, but noise during  
20 construction, satisfying the requirements of your lawful  
21 ordinance.

22                   MR. NEVILL: Mr. Mooney.

1 MR. MOONEY: Just one quick question I wanted  
2 to ask Mr. Ford. So we've talked about you -- the willingness  
3 to take on the additional conditions about the phasing and  
4 you talked 10, 50, 80, 90, 100 percent operational. Is that  
5 -- are those the phasing you're discussing?

6 MR. FORD: That's in the current draft, but it  
7 may not be satisfactory. It may be that we have to look at  
8 that because I was not aware myself until recently, it's a  
9 ten-phase operation.

10 MR. MOONEY: Okay.

11 MR. FORD: It may be that we do it simply phase  
12 by phase.

13 MR. MOONEY: Phase by phase by phase. And  
14 then if the -- if found not in compliance, how would the  
15 definition of that condition be? Would it be that operations  
16 do not commence until the sound is met? Or is there sound  
17 -- the commission -- the operations can continue and then  
18 while mitigation efforts are underway?

19 MR. FORD: Under the current proposal there  
20 will be a period of time during which steps could be taken  
21 to remediate the condition to bring it back into conformance  
22 rather than simply taking a 500 million dollar investment and

1 shutting it down, removing its occupancy permit.

2 That seems a little extreme. There should be  
3 a period of time in which remediation can occur after that,  
4 it's a different question.

5 MR. MOONEY: And that's 60 days. Is that the  
6 current?

7 MR. FORD: That's the current one. I can't  
8 remember exactly where we were in our discussions with Mr.  
9 -- with Rob and -- Rob Walton and Denise, but the concept would  
10 be a period of time to remediate, but it's got to be  
11 remediated.

12 MR. MOONEY: Yeah.

13 MR. FORD: And our people have understood that  
14 because we must meet your town noise ordinance, and that's  
15 been a commitment from Amazon since our first presentation.

16 MR. SEMPLE: I have some questions. I'm  
17 sorry to interrupt you.

18 MR. NEVILL: Mr. Semple.

19 MR. SEMPLE: Is that all right?

20 MR. MOONEY: Yeah.

21 MR. SEMPLE: When you're doing your testing,  
22 I think you'll show us a model. Are you using a DBA or DBZ

1 Standard?

2 MR. KARNER: The town standard is an Octave  
3 bands, which is unweighted.

4 MR. SEMPLE: Unweighted, so it's DBZ?

5 MR. KARNER: So we -- but we -- not JBZ -- DBZ,  
6 it would be called. But we look at DBA generally because that  
7 matches human hearing.

8 MR. SEMPLE: Yeah but --

9 MR. KARNER: So we look at both.

10 MR. SEMPLE: The town's ordinance is DB -- is  
11 unweighted.

12 MR. KARNER: It's unweighted, but we also --

13 MR. SEMPLE: So it's flat across the  
14 frequencies?

15 MR. KARNER: Correct. No corrections.

16 MR. SEMPLE: All right.

17 MR. KARNER: Yes.

18 MR. SEMPLE: So it'd be 20 hertz at -- up to  
19 20,000 hertz depending on how young you are.

20 MR. KARNER: No, the town zoning ordinance  
21 goes from 63 to 8,000.

22 MR. SEMPLE: Okay. All right.

1 MR. KARNER: So everyone should be able to  
2 hear those.

3 MR. SEMPLE: Right. Discussing this issue,  
4 it's not just the -- necessarily the amplitude. And I want  
5 to talk about the amplitude and whether it's additive in your  
6 view of ambient noise with respect to the noise coming  
7 directly from the day, sir.

8 My understanding is our ordinance requires it  
9 only to be measured based on what comes out the facility. Is  
10 that correct? Does it -- doesn't involve ambient noise.

11 MR. KARNER: No, it does not.

12 MR. SEMPLE: All right.

13 MR. KARNER: It's only at the property line  
14 from the facility.

15 MR. SEMPLE: Okay. And I -- so the  
16 measurement that you take I guess is at various areas around  
17 the perimeter that represents what would be reason -- what  
18 a reasonable impact might be on the neighborhood?

19 MR. KARNER: That is where we measured. We  
20 also measured over by the hotel, just south of the site. So  
21 we got permission from the --

22 MR. SEMPLE: Okay. Now there are various DB

1 -- shall I say based on certain aspects, there are penalties,  
2 DB penalties in our code --

3 MR. KARNER: Correct.

4 MR. SEMPLE: In the noise ordinance?

5 MR. KARNER: Yes.

6 MR. SEMPLE: One of which depending on when,  
7 at night or during the day, or how frequently, whether it goes  
8 on and off, and also with respect to whether it's a tone. Did  
9 you measure assuming that this would be considered a tone?

10 MR. KARNER: The measurement did not have  
11 anything to do with the modeling other than as a comparison.  
12 So we did model as -- and we modeled everything based on data  
13 from the manufacturer and the site plan, and then compared  
14 it to the code.

15 Yes. We did assume a tone would come. It's  
16 not clear from some of the chiller data, it looks like there  
17 may be some tone. So we did assume that but once we put in  
18 all the mitigation those tones may or may not be there. But  
19 we assumed the tone penalty in --

20 MR. SEMPLE: Actually, I didn't quite -- you  
21 said -- so you are agreeing that the chillers create a tone?

22 MR. KARNER: Unmitigated the data shows that

1 the chillers would likely have tones.

2 MR. SEMPLE: Okay. All right. That's all I  
3 need to know. Because I -- the other issue I have is whether  
4 you consider ambient noise plus the chiller noise as an  
5 accumulative effect. Or they can be distinguished in some  
6 way.

7 MR. KARNER: Measurement wise, they would be  
8 cumulative. But human perception wise, I think you would  
9 hear them separately because traffic comes and goes. Ambient  
10 noise, you'd hear your HVAC system and then you might -- if  
11 you were to hear the data center, you would hear it.

12 MR. SEMPLE: Because there's a difference  
13 between traffic and it's very -- and that's noise as far as  
14 I'm concerned.

15 MR. KARNER: Yes.

16 MR. SEMPLE: And a tone which creates maybe a  
17 buzz or in this case a hum. It depends on the quality as to  
18 its impact on the human ear.

19 MR. KARNER: Yeah, I -- that's correct.

20 MR. SEMPLE: I can tell you that because I'm  
21 a musician and I play the clarinet and the oboes drive me nuts.  
22 So it's a -- the question that I have is whether -- I know

1 in an orchestral setting. The trombones always seem to be  
2 able to drown out the woodwinds.

3 So I just want to know when we're measuring  
4 this, we're actually measuring the direct noise from the  
5 chiller. And that your determinations subtract the ambient  
6 noise or include it or we -- in other words, to our citizens,  
7 the most important aspect is to what extent does this facility  
8 change the character of what they become used to?

9 MR. KARNER: Sure. I -- no, I agree. The --  
10 we looked -- our report looks at it from those two different  
11 ways. We look at it from the town ordinance, which is  
12 property line, you know, Octavan frequencies.

13 And that's kind of the end of where the town  
14 zoning ordinance cares. It doesn't say you can't hear it,  
15 it doesn't say you're never going to hear it.

16 So we did also look in our modeling at the noise  
17 beyond the site impacting the surrounding areas. Some of  
18 that is in the report too later on.

19 The quality of the sound as it'll show later  
20 in the report, there's some figures that show the ambient  
21 noise up here and then the modeled noise you know,  
22 significantly lower in that we don't -- you know, we would

1 be surprised if you heard it during the day, if it's 20 DB  
2 quieter based on what we measured around the property and  
3 primarily at the hotel, which is closest to the residential  
4 area.

5 MR. SEMPLE: Saying you wouldn't.

6 MR. KARNER: I'm not saying you wouldn't hear  
7 it at all. I would say it's significantly less than the  
8 background noise during the daytime. And only during some  
9 evening hours. I don't know if we have the presentation with  
10 the figures in there or the report or if you have the report  
11 in front of you. But I'd be happy to walk through that.

12 MR. SEMPLE: But what if your report is wrong?

13 MR. KARNER: So again I mentioned it briefly.  
14 We have the manufacturer says, here's our sound data. They  
15 measured at the plant in a anechoic chamber or reverberation  
16 chamber.

17 They say, here's our equipment. They give it  
18 to Polysonics. We put that in a sound model that has the  
19 geography based on the site plans in the topography. We put  
20 that piece of equipment in our model, and then we run the  
21 model. It's not complicated, it's just putting pieces in  
22 place. The noise propagation is based on international

1 standards.

2                   So if there's any model, any other consultants  
3 would come in and have those same inputs. Here's the  
4 geographical location of the thing. Here's how loud the  
5 thing is. Here's how loud it is far away. So there's not  
6 -- I'm not making up anything in the model. It's all based  
7 on known data.

8                   MR. SEMPLE: No, I know. But noise is a real  
9 world condition. I mean, in other words, I understand  
10 modeling is what you have. And I'm concerned also with the  
11 compliance factor that we should -- it seemed to me be pretty  
12 dog onshore that before we launch ahead without assurances.

13                   At least I personally would want to hear an  
14 example of this kind of system. I'm sorry, they're in Europe  
15 because the ones that people are complaining about now in  
16 Prince William, apparently this is superior to, or in other  
17 words, different than the noise issues that they're  
18 experiencing. I wouldn't want us to have that same problem  
19 here.

20                   MR. KARNER: No, I understand. Yeah.

21                   MR. SEMPLE: And the only way to be sure of  
22 that, as far as I'm concerned, is to actually go out and listen

1 to an actual system in some way. Understand maybe you have  
2 one or two or you can provide an example.

3 Do you have some of these in a warehouse? I  
4 mean, in other words, do you have these system as you have  
5 developed, have you built a working model of this system? Or  
6 is this a new idea that will simply be applied here on  
7 construction?

8 MR. KARNER: This model we've used throughout  
9 all of Northern Virginia the OVH over in Vint Hill, we use  
10 the same modeling system.

11 MR. SEMPLE: Oh, I'm not asking about your  
12 modeling system. I'm really basically talking about the  
13 system itself.

14 MR. KARNER: Yeah. I just -- if you had  
15 doubts about the modeling is what (inaudible).

16 MR. SEMPLE: Yeah. Okay

17 MR. BREWE: Yeah. I just wanted to add, you  
18 know, to your point and to the point of the phasing and when  
19 we will be taking measurements you know, as we start to build  
20 this out, we will take measurements. We will compare it to  
21 our modeled results. We will continually iterate to  
22 understand.

1 MR. SEMPLE: Right. Well, I'd like to ask, I  
2 have here a draft provided by one of our members of council  
3 at a meeting with you guys, I guess, and Mr. Foote providing  
4 a wonderful set of standards then and on November 30th.

5 I'm wondering if these are the standards that  
6 you guys are going to apply because actually I think it's  
7 pretty good.

8 MR. HEROUX: Mr. Mayor, if I can address that.  
9 I think what we're talking about here is the distinction  
10 between modeling and the real world. Okay. Real world data  
11 can be close to or different or completely different once you  
12 get in the real world.

13 So I think what we're talking about here is on  
14 this particular issue of noise, is that in the conditions to  
15 the SUP, we need to have some pretty strict or tight agreements  
16 that we both agree on.

17 The councilman's correct. I took a shot I'd  
18 say, well, you know, what would it be in the best interest  
19 of the citizens? How do we make sure that as this thing comes  
20 online, it doesn't get louder and louder and louder, right?

21 And it's just forgotten that well, you know,  
22 we approved it when we only had, you know, two servers running

1 the data center. Sounded good then. And I don't know,  
2 that's not your intent. Okay. So please don't, you know,  
3 take what I'm saying wrong.

4           So I think we've got to move on here. Is to  
5 just -- you know, that this is an issue in hazard, this has  
6 been described that this data center will come online over  
7 time. So as we look at the conditions that has to be factored  
8 into. Okay. That we will have measurements as capacity  
9 comes online.

10           If that capacity comes online right, and it's  
11 over the (inaudible), then that capacity was added, comes  
12 offline. Okay. Until there can be some engineering to fix  
13 it, right? So this is a staged increment -- a staged  
14 implementation of bringing capacity online, right? You have  
15 a powered shell, right? Which is an empty building.

16           And then you're adding capacity and things are  
17 going to go on the roof and noise is going to be heard. Now,  
18 I do have one sort of simple, I know we've used a lot of  
19 engineering terms here today, but just simple. So everybody,  
20 you know myself, golden retriever can understand it.

21           If you're standing at the corner of Blackwell  
22 Road and it's 60 decibels of traffic and noise going around

1 down there, which I think it is actually, and now you turn  
2 a data center on that's say it's at 40, is it 110 -- 100  
3 decibels down there?

4 MR. KARNER: Oh dear. No.

5 MR. HEROUX: So what happens there?

6 MR. KARNER: So the easier way to say it, if  
7 they were both 60, the total noise level would be 63. So at  
8 40, the noise level would probably not increase. That  
9 doesn't mean that it's not audible, but the overall sound  
10 level would not increase. Anything below ten of the original  
11 value. It's probably not going to.

12 MR. HEROUX: Okay. That -- I mean these are  
13 important things to understand because, you know, most of our  
14 -- we're not sound engineers.

15 MR. KARNER: Sure.

16 MR. HEROUX: So it's not stacking things on  
17 top of each other, if you will. But you know I think on this  
18 noise issue at least from, you know, my perspective as they've  
19 stated, this is an incremental build of capacity into a data  
20 center.

21 That as they add capacity, we need to make sure  
22 that the conditions show that we will measure it and make sure

1 it's on, it is in compliance. And if new capacity is brought  
2 online that isn't, that capacity comes down.

3 MR. KARNER: Yeah. I don't have it --

4 MR. HEROUX: I understand, yeah.

5 MR. KARNER: I just --

6 MR. HEROUX: I agree. Thank you.

7 MR. MCGUIRE: Mr. Mayor.

8 MS. SUTPHIN: Mr. Mayor.

9 MR. REINKE: Mr. Heroux, AWS is fully aligned  
10 with that.

11 MR. HEROUX: Fully what?

12 MR. MCGUIRE: Mr. Mayor.

13 MR. HAMBY: Mr. Mayor. I have a -- and I think  
14 that's what you just said, that you're fully aligned. I'd  
15 like to see phased occupancy permitting.

16 So every phase, which I believe is that what  
17 -- that's what you just said, correct? And I know you didn't  
18 say it in front of the microphone. So could you say it in  
19 front of the microphone so we have it on the record?

20 MR. REINKE: Yes. AWS is aligned with that.

21 MR. HAMBY: We want a phased occupancy permit.  
22 So as we go phase by phase, if your phase turns on and does

1 not comply, it gets turned off.

2 MR. REINKE: Yes.

3 MR. HAMBY: Period.

4 MR. REINKE: That phase. Yeah.

5 MR. HAMBY: Mr. Manager, can we make sure that  
6 that's in writing and on the record. So as we move, as  
7 proposed, if we move to the end of this, Amazon agrees that  
8 every phase is attached to an occupancy permit.

9 So just like he was showing on his model up  
10 there as this building, proposed building were to open, as  
11 it goes through the phases, it comes back to the town and it's  
12 in occupancy per occupancy per occupancy.

13 And I'm not sure of the -- all the conditions  
14 because I've glanced over it three or four times, but I know  
15 they're all working documents from what happened in the  
16 Planning Commission while it was going through that process.  
17 I believe you're at 180 days, right. Turn it on. If it  
18 doesn't work, you have 180 days to change it.

19 MR. KARNER: Yes.

20 MR. HAMBY: Is that correct? No. No. And  
21 just one person sitting up here, right. You turn it on, you  
22 fail the noise ordinance, you're off. You can fix it, you

1 can turn it back on. You can attempt again, you fail, you're  
2 off.

3 Is that acceptable on the Amazon side? I  
4 don't know.

5 MR. FORD: That is acceptable.

6 MR. SEMPLE: Excuse me.

7 MR. MCGUIRE: Mr. Mayor --

8 MR. NEVILLE: That's okay. Mr. Hamby has the  
9 floor.

10 MR. HAMBY: You can interrupt me, it's okay.

11 MR. NEVILLE: Everybody calm down. I'm still  
12 talking. Yeah. Mr. Hamby has the floor.

13 MR. HAMBY: So in order for us to go through  
14 and I'd really like to see the -- and maybe somebody could  
15 do this while we're here, right? I'd like to see all the  
16 conditions in writing that came from planning so that we can  
17 start going through and looking at that list while we're going  
18 on. Is that okay? Can we get a written copy? Do we have  
19 that --

20 MR. NEVILLE: Are the conditions --

21 MR. HAMBY: I saw it on the --

22 MR. NEVILLE: In the staff report.

1 MR. HAMBY: I saw it on the slide. Could  
2 somebody just make.

3 MS. SUTPHIN: But they're in your -- they're  
4 in your (inaudible). Do you want a (inaudible)?

5 MR. HAMBY: Could I? Yeah, because I have to  
6 close his presentation to get back to the other presentation  
7 and that was my request for now. Thank you.

8 MR. SEMPLE: Mr. Mayor, I have a question.

9 MR. NEVILLE: Mr. Semple.

10 MR. SEMPLE: I don't think we should be making  
11 this kind of determination. I think there are legal  
12 ramifications, enforcement ramifications. I think  
13 occupancy permit ramifications (inaudible). I think this is  
14 extremely complicated.

15 This is a new idea that was done basically ex  
16 parte. And I think that without involvement of either in --  
17 under Robert's rules, you could easily either put this on the  
18 table or assign it to a committee for review. But I think  
19 it would be a very bad mistake to make a decision on the fly  
20 this evening based on conditions that none of us have ever  
21 have -- have been able to review.

22 MR. HAMBY: Mr. Mayor, if I could ask, we're

1 -- if we're in a work session and I'm asking for conditions  
2 to place on a work session, would this be the most appropriate  
3 place to bring up conditions to an SUP?

4 MR. MCGUIRE: Mr. Mayor

5 MR. HAMBY: That is my understanding, yes.

6 Mr. McGuire: Mr. Mayor.

7 MR. NEVILLE: Mr. McGuire.

8 MR. MCGUIRE: Yes. So I want to commend you  
9 for what you said about compliance. Having been a former  
10 police officer, you know, you don't write tickets for revenue,  
11 you write it for compliance.

12 So my concern, tagging off Congressman --  
13 Council man Hamby's, you know, concern is that, you know --  
14 and I'm not suggesting it's you, I'm just hypothetical. If  
15 somebody has deep pockets, will they just continue to pay  
16 fines and not comply? That's my concern. Okay. That we  
17 don't enforce the law and the ordinance of the noise.

18 That's a big concern because if somebody's got  
19 big pockets, they can just continue to pay and pay and pay.  
20 I think I agree with you. It should be important. We need  
21 to be able to shut anyone down that's affecting the health  
22 and welfare of our citizen.

1 MR. HAMBY: Mr. Mayor, if I could real quick,  
2 because I know other people waiting and I'm not looking for  
3 a fine, I'm not looking to find them, right?

4 I'm looking to the occupancy permit is  
5 attached to their ability to make money. I'm not interested  
6 in them paying a fine for not conforming to the rules. I'm  
7 looking to turn them off.

8 MR. MCGUIRE: I agree. I agree. Just want  
9 to be stated to be clear.

10 MR. HAMBY: Just to clarify.

11 MR. MCGUIRE: Yes, Absolutely.

12 MS. SUTPHIN: So, Mr. Mayor.

13 MAYOR NEVILLE: Ms. Sutphin.

14 MS. SUTPHIN: What I want to because it kind  
15 of went over, your system operates like the system at Vint  
16 Hill, is that correct? Is that what --

17 MR. KARNER: I'm sorry, no. The modeling  
18 program, the sound modeling program that we used also is in  
19 Vint Hill. We do have some data centers in Manasas and then  
20 Loudoun that we also -- I mean Polysonics specifically.

21 MS. SUTPHIN: The system that we're talking  
22 about and the noise is comparable to the one that's in VInt

1 Hill.

2 MR. KARNER: The equipment on the roof and the  
3 mitigation is specific to this building. But the noise --  
4 it was in reference to how does modeling compared to measured  
5 noise.

6 So I'm saying that I used Sound Plan, which is  
7 the program that I used on this data center, and I used it  
8 at the OVH in Vint Hill also.

9 MS. SUTPHIN: Okay. Because I know we all  
10 were invited to go to that place to the one at Vint Hill. I  
11 myself went I know.

12 MR. MCGUIRE: I'm sorry, who was invited? I  
13 didn't hear that.

14 MS. SUTPHIN: Okay. The council members.

15 MR. MCGUIRE: When was this?

16 MS. SUTPHIN: Okay. Well there were people  
17 that were invited. I'm sorry you did not come.

18 MR. KARNER: It's in the county. It's not the  
19 town.

20 MR. MCGUIRE: No, I was just asking --

21 MS. SUTPHIN: But you were not on council at  
22 the time. So you were not --

1 MR. NEVILLE: Order please, order please.

2 Ms. Sutphin has the floor.

3 MS. SUTPHIN: Yes. So I know when I walked  
4 around we went through the building, I actually climbed up  
5 on the roof and spent 45 minutes on the roof.

6 So I just want to make it clear to myself that  
7 the sounds and the system are similar and possibly that the  
8 noise that I did or didn't hear would possibly be what would  
9 be.

10 MR. KARNER: I can't say that because it's  
11 different equipment, but I -- again my point was to say that  
12 we can model conditions and have them be similar to existing.  
13 The sound behaves in a very predictable way. And so our model  
14 reflects that.

15 MS. SUTPHIN: Because I know I went out of my  
16 way to try to go and visit. It's very hard to get inside.  
17 But I actually did go and visit three different ones. One  
18 was in Manasas, and two were in Loudoun. I wasn't allowed  
19 in the gate.

20 MR. KARNER: No, they don't let you.

21 MS. SUTPHIN: But I did get fairly close to the  
22 building. So as -- you know, if we're interested in actually

1 going and hearing, I mean, I would love to go to Italy or  
2 wherever. But you know, maybe road trip, I don't know. But  
3 to actually hear it for myself was huge.

4               So you know, just letting, you know taking the  
5 time out of our day to actually go and visit some of these  
6 buildings is something that we need to do too, or needed to  
7 have done. So thank you.

8               MR. NEVILLE: Just to -- may I clarify this,  
9 I think Ms. Sutphin too, I think answer your question from  
10 what I'm hearing. So you're talking about the modeling that  
11 you did at OVH is the same modeling that you -- this is the  
12 same modeling software that you --

13               MR. KARNER: Same software, same process.

14               MR. NEVILLE: So let me ask you then the  
15 question, what was the accuracy level as far as the modeling  
16 to the actual --

17               MR. KARNER: If not followed up but accurate  
18 in the way that no one's complained about OVH over.

19               MR. HAMBY: Mr. Mayor. What's the noise  
20 ordinance at OVH of Vint Hill? What's their noise ordinance?

21               MR. KARNER: It's (inaudible) county. So  
22 it's a little different. I think it is per frequency also

1 but a little different set than you have here.

2 MR. HAMBY: Thank you.

3 MR. MOONEY: Mr. Mayor.

4 MR. NEVILLE: Mr. Mooney, may have the floor.

5 MR. MOONEY: Okay. A massive amount of  
6 things have just transpired in like the last ten minutes and  
7 I need to go back to quite a few things. I've worked really  
8 hard to prepare for this meeting as you can see about my trees  
9 that I've cut down here.

10 All right. Number one, going back to the  
11 noise. So we screen the noise, it goes up, right? Doesn't  
12 go out. Because I remember when we saw -- when COVID first  
13 started, we had like the sneeze test done by CNN. It would  
14 like, you know, show the dissipation right, of your sneeze  
15 and how COVID affected people. So if the sound is buried,  
16 if it's -- the sound is protected, all the people by these  
17 barriers and it goes up, how does it dissipate and does it  
18 affect the people at higher elevations around town? And have  
19 we looked at that?

20 MR. KARNER: Sure. So barrier wise, yes.  
21 But if you saw he also had a silencer on top of the unit and  
22 then the compressor wraps, which silences it at the unit, the

1 sound, when it comes out of that is already mitigated.

2 MR. MOONEY: Okay.

3 MR. KARNER: The barrier -- the sound will go  
4 up and kind of mushroom over the top but that adds the distance  
5 before it hits the receiver as if there was no barrier there.

6 MR. MOONEY: But have we done something that  
7 says like on the noise study or the study that shows like the  
8 different elevations around town when -- as the noise comes  
9 up and mushrooms out?

10 MR. KARNER: Yes.

11 MR. MOONEY: Because it's obviously going to  
12 affect people in town at higher elevations, right?

13 MR. KARNER: Uh-huh.

14 MR. MOONEY: The barriers currently around it  
15 are going to help the people potentially close by but when  
16 it mushrooms up and it hits the higher points so.

17 MR. KARNER: I --

18 MR. MOONEY: Do we have that study that we can  
19 show people that--

20 MR. KARNER: Yeah. So it's in the noise study  
21 that the barrier, I don't think is -- the barrier is not in  
22 it, but the source noise mitigation, the wraps and the stuff

1 on top is in it.

2           The noise study has contours shown at 20 feet  
3 above the ground, regardless of the elevation. So it rises  
4 with the elevation, falls with the elevation, and that shows  
5 the noise levels throughout the community. Some distance,  
6 not everybody, but just down to about 30 DB.

7           MR. MOONEY: Okay.

8           MR. KARNER: So pretty far out.

9           MR. MOONEY: The next, I got a lot of issues,  
10 Mr. Mayor, is that all right if I keep going?

11           I completely agree with Ms. Sutphin. I -- and  
12 Mr. McGuire. I've not been able -- or I've not been on any  
13 field trips to anything. And if it goes to Italy, I would  
14 happily pay my own way. I wouldn't put that on the taxpayers  
15 but I think it would be really interesting to see that.

16           And I do think that -- I believe that Mr.  
17 McGuire and I should be afforded the opportunity for a field  
18 trip to go see some of this stuff and listen with our own ears  
19 if you will. Okay. So I don't know how we do that. Can we  
20 ask for a field trip? Can I say I need to go on a field trip  
21 to look at these?

22           UNIDENTIFIED SPEAKER: (Inaudible) Yeah,

1 MR. MOONEY: I can. Okay. All right. So, I  
2 would also -- all right. So this question is for Mr. Foote  
3 and you, sir. Mr. Foote just said that the noise is one of  
4 the most important things, the most important studies, the  
5 most important issues.

6 I find it quite disturbing. And quite  
7 frankly, it shows somewhat of a cloud and clouds create shade.  
8 And people, the citizens, have just spent months listening  
9 and spending time. It just adds to this cloud. Why Mr. Foote  
10 is this the first time anybody is hearing from this gentleman  
11 and are we expected to vote on this tonight? Just hearing  
12 for the first time from this gentleman on what you said you  
13 just said is the most important issue on this whole thing.

14 MR. FOOTE: If I said the most important  
15 issue, I think I agree that it's a very significant issue.  
16 I don't disagree with that. What I would say is that when  
17 we produce our -- produce the first noise study, and realized  
18 in talking to Chris that more work needed to be done on that,  
19 that led us into a deeper analysis of your own noise ordinance.

20 And that occurred, I want to say it was after  
21 -- at least after one of the Planning Commissioner meetings,  
22 if not after the second Planning Commission meeting, and maybe

1 the first.

2           And when we were doing that, what we discovered  
3 was there are multiple ambiguities in that noise ordinance.  
4 It is not revealed wisdom as to how it's appropriately  
5 interpreted. As a consequence of that, before we could  
6 finish the noise study, we sought a zoning determination from  
7 the zoning administrator of the town as to how those  
8 ambiguities were to be finally concluded.

9           That held up a completion of this noise study  
10 today that has been presented until, well, I think probably  
11 not more than two weeks ago, December 16th, three weeks ago.  
12 And so that was provided to Mr. Karner and Mr. Karner proceeded  
13 to remodel the process.

14           And so it -- because this has to be reviewed  
15 by the folks at AWS, Mr. Brewe and others. It -- this -- in  
16 this system, it's just not something that gets turned around  
17 overnight. And so consequently from December 16th and when  
18 he went and remodeled and did what he did with his computer  
19 magic, that's why we can only produce it today. But we have  
20 produced it today, and it is -- it shows a satisfactory result.

21           It is not because we tried not to do it, it's  
22 because we had to get clarity on your own ordinance. And even

1 the zoning administrator and your staff acknowledged when we  
2 got into it that there were in fact ambiguities in it.

3                   They had to do research into its history.  
4 They had to do research into what they thought it meant. They  
5 had to go into ANSI, which is the National Standards and  
6 Incident. I'm sure you know, to conclude as to what your own  
7 ordinance meant to tell us. But we had to meet, and that's  
8 what we did.

9                   MR. MOONEY: Okay. So, Mr. Brewe.

10                   MR. KARNER: Okay. Karner. (Inaudible)

11                   MR. MOONEY: Oh.

12                   MR. KARNER: Yes sure.

13                   MR. MOONEY: So how long have you been working  
14 on this?

15                   MR. KARNER: I think we did the initial  
16 measurement last summer so --

17                   MR. MOONEY: So you've been involved since  
18 last summer?

19                   MR. KARNER: Yes.

20                   MR. MOONEY: And then my next question is to  
21 the engineer from Mr -- from Bowler. What's your name, sir?

22                   MR. BREWE: Who me?

1 MR. MOONEY: Yes.

2 MR. BREWE: (Inaudible).

3 MR. MOONEY: How long have you been involved  
4 in this?

5 MR. BREWE: So our role has been involved  
6 since we put together this SUP so back when it first was  
7 submitted.

8 MR. MOONEY: But you've been running the whole  
9 project?

10 MR. BREWE: I'm from the civil perspective.

11 MR. MOONEY: Okay. But I've seen you before.

12 MR. BREWE: Yeah.

13 MR. MOONEY: So that's why I'm asking. So my  
14 -- again, my question goes back to, yes, you just produced  
15 a noise study now, and you just produced some of the final  
16 -- or you've been producing the final drawings.

17 We didn't have a final drawing from you, but  
18 you've been involved in Citizens and Town Council have been  
19 able to ask you questions, correct? Throughout this whole  
20 process.

21 MR. BREWE: Right.

22 MR. MOONEY: I still find it very troubling

1 that for the first time, we don't -- the Planning Commission  
2 was never able to ask you questions -- nothing against you.

3           The Planning Commission was never able to ask  
4 you questions, even though you've been -- even though he's  
5 been involved, he's never been able to be questioned by  
6 Planning Commission or anybody on council.

7           So that I don't know that I find that  
8 upsetting. I mean, if we're going to be asking to be voted  
9 on this, and we're just seeing you now, I don't know if there's  
10 a reason for that. And thank you, gentlemen. That --  
11 questions more for Mr. Foote.

12           Am I wrong in that we're just meeting this  
13 gentlemen? All right. So I guess we won't get an answer.  
14 I would like to now go back -- is -- thank you, sir.

15           MR. BREWE: Okay.

16           MR. MOONEY: My next question is for Mr.  
17 Reinke. You're the gentleman in charge?

18           MR. REINKE: Loosely.

19           MR. MOONEY: Loosely.

20           MR. REINKE: Loosely.

21           MR. MOONEY: What is that term in charge? I  
22 -- from what Mr. Semple just said. Are you -- have you --

1 I'm guessing because he has some paperwork, but have you or  
2 any of your staff met with somebody from Town Council with  
3 Mr. Foote, who I believe is your attorney without our attorney  
4 present?

5 MR. REINKE: In person?

6 MR. MOONEY: No. Yes. In person or on Zoom?

7 MR. REINKE: I've had Zoom calls, yes.

8 MR. MOONEY: And so your attorney was present  
9 but not our attorney?

10 MR. REINKE: I don't know if Mr. Foote was  
11 present. Were you present?

12 MR. FOOTE: Yes. I was.

13 MR. MOONEY: Yeah, Mr. Simmons, were you  
14 present?

15 MR. SIMMONS: No. Sorry. I was not but Mr.  
16 Crim may have been present.

17 MR. MOONEY: But we don't know because we  
18 don't have meetings of those meetings. Meetings of those  
19 meetings, correct?

20 MR. SIMMONS: Yes, sir. I can check with Mr.  
21 Crim though.

22 MR. MOONEY: Okay. Is that okay to do

1 meetings like that? I mean, with the applicant and people  
2 on council --

3 MR. NEVILL: Typically when an applicant  
4 meets with a member of council, a staff member is present,  
5 typically legal counsel has not been required or present.  
6 And these are usually fact finding or a chance to have an open  
7 dialogue to express concerns.

8 MR. REINKE: Yeah.

9 MR. NEVILL: And to -- for fact finding.

10 MR. REINKE: Yeah, Mr. Mooney, prior to AWS,  
11 I felt a lot of different things and we'd always meet with  
12 Town Council, board supervisors, whoever it may be that had  
13 an interest in the project.

14 MR. MOONEY: Okay.

15 MR. REINKE: Partly. And partly there's  
16 almost a working session like this help me understand what's  
17 going on with the issues, how you resolving it.

18 MR. MOONEY: Okay.

19 MR. SEMPLE: Well, I have--

20 MR. MOONEY: Can I get a copy of that?

21 MR. SEMPLE: May I -- am I interrupting or a  
22 question.

1 MR. MOONEY: No, you may.

2 MR. SEMPLE: Well, this -- but this meeting  
3 was held before the Planning Commission made its decision.  
4 So I'm wondering why if there was this percolating along, it  
5 wasn't encapsulated or presented to the Planning Commission  
6 December 20th. I think that's when our meeting was.

7 MR. REINKE: Would you repeat the question.  
8 I want to make sure I understood it.

9 MR. SEMPLE: The concept that is presented  
10 here, that was, I think upon which a lot of this is formulated  
11 is a way of compliance where if you don't comply, you can't  
12 occupy, don't comply, you can't occupy.

13 And the issue is this formula was available  
14 too. And part of the discussion, while the Planning  
15 Commission was enduring its deliberations, and we rely on the  
16 Planning Commission for its subject matter expertise.

17 And it seemed to me that what was presented on  
18 December 20th was an amendment. It showed a couple of minor  
19 little details. And I've got to say that the record was --  
20 the material presented, the Planning Commission was actually  
21 added to two days after the meeting that -- which showed a  
22 certain phased requirement, but it didn't show anywhere near

1 the detail nor did it provide anywhere this noise ordinance  
2 information.

3           It would seem to me that would -- should have  
4 -- that should be considered by the Planning Commission before  
5 we as a council make a decision.

6           And that's my concern, is that all this  
7 occurred ex parte outside of the Planning Commission at a time  
8 when their people were available to meet with them and they  
9 didn't. And I would like to get the view of the Planning  
10 Commission regarding this aspect, using their subject  
11 expertise before we make a decision.

12           MR. REINKE: And by the way, Mr. Mooney, I want  
13 to address one thing and address both the -- because I've zoned  
14 in the data centers. Typically, noise is not the issue. It  
15 is right here today. So though a civil engineer's always  
16 involved at the very beginning and civil engineer often walks  
17 through just because civils.

18           And there's always usually at some sort of  
19 sound study no matter what data center we go, usually it's  
20 either not to site plan or even building plan. So it's a  
21 little bit different in this case it's so early. The -- as  
22 far as the -- we've never done a staged CO before, right?

1 Brand new. And we thought that part of it is  
2 though the study would show -- in most jurisdictions, you show  
3 the study and it's done, right? Here going, hey, to your  
4 point, how do you know that the model's accurate?

5 We believe the model is accurate, but to be  
6 safe, we agreed that let's do a staged CO, which I'm fine with.

7 MR. SEMPLE: Isn't that a form of a waiver?

8 MR. REINKE: I don't know. Mr. Foote is --

9 MR. SEMPLE: I mean, we have a requirement.  
10 We're talking about the difference between a site plan and  
11 approval of the SUP who seemed to me we would want to know  
12 as a condition that the condition will be met prior to and  
13 not subject to eventually a site plan overview. That is, this  
14 is a provision.

15 I don't have the number and I don't have  
16 article 11 in front of me, but it seemed to me that compliance  
17 should not be a future event. It should be something we know  
18 now. For all the reasons we just discussed that we haven't  
19 heard it, we don't know it, it's hypothetical. And I wouldn't  
20 want to make a vote on a hypothesis, on a hypothetical that  
21 it might work because we have a study. I would like to know  
22 that it will work.

1                   And it seems to me that it'd be unreasonable  
2 to make a decision based on something as important as noise  
3 when in fact it is simply a model.

4                   MR. HEROUX: Mr. Mayor.

5                   MR. NEVILL: Mr. Heroux.

6                   MR. HEROUX: It -- again, maybe we can park  
7 this a little bit. There's a lot of other things that I think  
8 we need to hear from here. But on the noise at this stage  
9 in any project, there is no data center on this property. The  
10 only thing we can do is model it. There's no other way to  
11 test this. It doesn't exist.

12                   So what do we have to do? We have to have a  
13 noise study that demonstrates from an engineering perspective  
14 and an analytic perspective that the design can meet it.  
15 That's the best we can do at this point because we have a  
16 physical building that doesn't exist.

17                   Then we go into a site development plan, which  
18 will go through planning. Rob's team, that whole site  
19 development plans to be reviewed. We will go through  
20 permitting. We will go through inspections, okay? This is  
21 the beginning of a very long process of oversight and  
22 governance on your facility should it be approved.

1                   Then what happens is we run a test because  
2 guess what we're dealing with now? The real world, the real  
3 data center in its real location, in its real physical  
4 instance is present. And the chillers on the roof that we're  
5 talking about hypothetically now are now installed in the  
6 roof. And it's time to flick the switch on and measure in  
7 the real world in that specific location, not in some computer  
8 model sitting in an analyst office. No disrespect.

9                   Real world, what is it doing? That's what  
10 it's going to take. The conditions that Mr. Semple's talking  
11 about, I wrote them and if you read them, I wrote them in this  
12 -- as a suggestion because I like to see progress, not talk.  
13 I like to see progress and actually things you can actually  
14 examine and those conditions are written in the interest of  
15 the citizens where I said, well, if this does go through and  
16 noise is in fact the issue, then we may or may be darn sure  
17 that a multi-billion-dollar company doesn't think they can  
18 just throw a \$250 fine at us and be happy with it.

19                   What are we going to do? Yeah. You know, I  
20 work in the tech sector, it -- public knowledge, right? You  
21 know how you get the tech sector's attention, you shut the  
22 revenue stream down. Am I right?

1           So that's why those conditions were written to  
2 say how do we tighten up the occupancy permit if you add  
3 capacity? And actually I think if I -- I'd have to go back  
4 and look at it. I think at that point I thought it was just  
5 one phase. I didn't realize it was ten. And that's fine.  
6 I understand designs changes, right?

7           But the intent was if you turn it on and the  
8 building does not meet the noise conditions, the building  
9 comes off. That inhibits your ability to book revenue, to  
10 provide services to your customers. It's done. And so what  
11 are you stuck with? A \$500 million facility doing nothing.

12           That was the intent of the language to protect  
13 the citizens to say where you get a big company is you inhibit,  
14 you don't inhibit. I don't mean that the right way, but you  
15 know what I'm saying is you stop their -- if they don't comply,  
16 you stop their ability to operate. Not with fines, not with  
17 penalties, not with broad oh, we'll fix it in 180 days, maybe  
18 we'll get back to you. No, shut it down. Give me a plan on  
19 how you're going to fix it. You need to test next week, next  
20 Thursday? Fine, we'll be out there. We'll get there.

21           I think I also advise that we should hire an  
22 independent sound expert, right? That could evaluate the

1 data. So I really think -- I would just -- you know, we have  
2 a lot to cover here.

3 Can we -- with no disrespect to anybody on the  
4 council here, can we move on to some of the rest of your  
5 presentation because there's some other items that I think  
6 we have to hear from that the citizens are concerned with?  
7 And we can certainly return back to noise if that's important.

8 But I just want to -- if I can, models are  
9 great. Go visit data centers in Europe or wherever the heck  
10 you want to go. All right? That's great. I encourage you  
11 to do that. But every data center's different, okay?

12 They are built differently. We have to worry  
13 about this data center on this property that this applicant  
14 purchased and has a right to develop and they've got to make  
15 a case here on how it's going to meet our designer -- our  
16 requirements or not. So let's let them make the case,

17 MR. SEMPLE: Mr. Heroux --

18 MR. REINKE: Mr. Mayor.

19 MR. SEMPLE: There's people in Prince  
20 William, who took your approach and look what they're dealing  
21 with now,

22 MR. REINKE: Mr. Mayor.

1 MR. HEROUX: This is Warrenton.

2 MR. NEVILL: Mr. McGuire.

3 MR. MCGUIRE: Yeah, just -- I'll be brief. It  
4 -- you know, I like to connect things full circle. It's like  
5 what we talked at the beginning of the meeting. You know,  
6 we're talking about having a business meeting and then having  
7 council at a different time and date.

8 I think this is a clear example why we need to  
9 do that. Okay? I understand the data center is not up there,  
10 but this is at the 11th hour, this huge study comes in. We  
11 need to digest it and everything else.

12 And I agree with Mr. Heroux that we do need an  
13 independent council of a sound expert to go over this. I  
14 think we should all agree with that. I'm not a scientist.  
15 I don't know about sound decibels and everything else. I  
16 think we owe the fiduciary responsibility to do the right  
17 thing.

18 It's not like a building or any -- it's a huge  
19 investment. I got that. We're not going to be able to pull  
20 it out of there once it goes in. I think we have to do due  
21 diligence and error on side of caution.

22 MR. NEVILL: I do agree with Mr. Heroux. I

1 think let's continue on. Many of the questions may be  
2 answered as you continue on with the presentation, so let's  
3 move this forward.

4 MR. REINKE: Okay. By the way, Mr. Mooney,  
5 just FYI, the two things that drive AWS is data security. And  
6 just if you're running your company and you have confidential  
7 information, you don't want anyone getting access to it as  
8 well as uptime.

9 So if you, again, running your computer, your  
10 company on a cloud-based system, you want to make sure you  
11 want to operate it. With that, I develop them and I have  
12 access to a lot of different things in this world. I can't  
13 get into our own data centers FYI. I cannot get into our own  
14 data centers. They limit.

15 And just even just you'll see about cages and  
16 our focus on data security is as tight as it gets. Okay, well  
17 here was -- we're going to move off noise, but you have a bad  
18 time in this slide. So it just shows that we're below the  
19 ordinance.

20 Again, where we model the chillers, what we  
21 mean is highly conservative and we picked very hot days and  
22 beyond -- below ambient noise. Okay, fire safety. There's

1 a couple number sections on questions fire safety. Can we  
2 go through those, like to go through those and see if there's  
3 any issues on fire safety at all? Matter fact, yeah. I don't  
4 have my slides but what section fire safety is?

5 UNIDENTIFIED SPEAKER: Section one?

6 MR. REINKE: Yeah. Section one.

7 MR. MOONEY: Yeah. So Mr. Reinke, can you  
8 just provide an overview fire suppression system in the data  
9 center. What type it is my understanding, you know, you have  
10 water systems, you have clean agent systems.

11 What is the fire system -- suppression system  
12 you're using should God forbid a fire breakout in the day,  
13 sir?

14 MR. REINKE: Yeah. So it's a water system and  
15 they're called a dry pipes. So the water's not into the pipe  
16 until there's a reaction kicks off and the water flows to the  
17 pipe that prevents and the accidental leaks and Kyle come on  
18 up and -- it's not -- so it's not a clean agent system.

19 MR. MOONEY: Okay.

20 MR. CRASS: Yeah. So that's great question.  
21 I think that's an intelligent question. These types of  
22 systems they're fully sprinkled pre-action dry pipe system.

1 So what that means is, until we have a device in there, I think  
2 it's very early smoke protection alarm something.

3 So it picks up when there's -- it's very  
4 sensitive by the way and it will pick up if there's any smoke  
5 in there. That starts the pre-action portion of this. What  
6 that does is it actuates a valve. That valve then is open  
7 to the water pressure of the fire suppression pump system.

8 And then the rest of the sprinkler head as the  
9 heat and all that is detected in that zone, it then creates  
10 the sprinkle down in effect in the data hall.

11 MR. MOONEY: Okay. And the water is that part  
12 of that 190,000 gallons or is that draw from -- if the fire  
13 breaks out it's drawing from the system?

14 MR. CRASS: Do we have tape on this? Yeah.  
15 So then that would --

16 MR. MOONEY: It is.

17 MR. REINKE: So with that system that just  
18 draws from the city in the event of a fire.

19 MR. MOONEY: Got you. Okay. And how about  
20 on the diesel generator side? Is there any kind of fire  
21 monitoring on the generators if fire breaks out on those  
22 devices?

1 MR. REINKE: NFPA 33 doesn't require fire  
2 suppression inside the generators itself.

3 MR. MOONEY: Okay. So what happens there if  
4 all of a sudden they -- I mean, you have -- what kind of  
5 monitoring do you have I guess on the generators if, again,  
6 God forbid, one of them lights up?

7 MR. REINKE: Hopefully, doesn't happen.

8 MR. MOONEY: Right.

9 MR. REINKE: If a generator does happen to  
10 light up or there is an issue. It is contained inside the  
11 generator enclosure itself. It's not open to the surrounding  
12 environment.

13 MR. MOONEY: Okay.

14 MR. REINKE: So we do have fire extinguishing  
15 available because it's a different type of fire. So we're  
16 not going to use -- you can't use water to put out a fuel fire.  
17 So you're going to be taking a fire extinguisher foam and  
18 calling the fire department to make sure that it don't spread  
19 anywhere else.

20 MR. MOONEY: Okay. And councilman here,  
21 maybe you can help me on this one is, the -- if there is a  
22 fire in the data center, I understand it's like modern fire

1 alarm systems today are integrated into town systems. It's  
2 not like a fire bell rings out. You got to wait for somebody  
3 here. How does that -- how would it -- how would our town  
4 fire department be notified there's a fire in the data center?

5 MR. HAMBY: I'm sure they have a typical  
6 monitoring system. They're staffed 24 hours a day. So you  
7 get the call from the guards.

8 Typically, how it works when you have that is  
9 you get the call from the guards, but when the fire alarm goes  
10 off, they just -- it goes to a municipal monitor that  
11 dispatches it.

12 MR. MOONEY: Okay.

13 MR. SEMPLE: So then --

14 MR. MOONEY: And then without on the rack side  
15 in the zone, do the racks themselves have any kind of fire  
16 suppression system or is it -- it's more the sprinkler system  
17 that if that zone is detecting smoke, it's going to go down?

18 MR. REINKE: Yeah. So the racks themselves  
19 do not have their own fire suppression system.

20 We've actually performed studies that show  
21 that the racks do not propagate to adjacent racks. We've  
22 stacked them next to one another. If there is a fire in a

1 certain zone and the sprinkler head does break, then it breaks  
2 where that sprinkler head was to extinguish that fire.

3 MR. MOONEY: Okay. So it sounds like the  
4 system you're talking about here obviously lack of clean  
5 agent, it's a system that -- and I'm making an assumption here  
6 that our fire department should be fairly familiar with.  
7 They're not walking into a situation where they've never been  
8 exposed to these types of agents or conditions in a --

9 MR. REINKE: Correct. You have a Walmart  
10 right up the street. It's a same type of our system.

11 MR. MOONEY: Okay. Very good. All right,  
12 thank you.

13 MR. MCGUIRE: So there's no additional like,  
14 special equipment or fire truck that you need from the town?

15 MR. REINKE: No.

16 MR. MCGUIRE: Okay. And is any of the runoff  
17 from the fire hazardous?

18 MR. REINKE: Hazardous?

19 MR. MCGUIRE: Yes.

20 MR. REINKE: I mean, it's a water system  
21 coming out of black iron pipes. So it --

22 MR. MCGUIRE: No. I mean, with the fire

1 suppression is anything in the data center that creates  
2 hazardous water or anything like that?

3 MR. REINKE: Not to my knowledge.

4 MR. MCGUIRE: Thank you.

5 MR. MOONEY: Do we want to move on to number  
6 eight?

7 MR. MCGUIRE: Yes.

8 MR. MOONEY: Back -- oh, I'm sorry. Mr.  
9 Mayor.

10 MR. NEVILL: Come on.

11 MR. MOONEY: Okay. Essential public  
12 facilities and maybe back on cooling. Is there any scenario  
13 where you would shift over to town water to cool the data  
14 center other than the 190,000?

15 MR. MCGUIRE: I have a point of order. Point  
16 of order. Yes. I'm sorry, I'm confused. I thought we were  
17 going to allow them to brief or who's driving the brief here.

18 Are we -- that's -- I thought we were going hold  
19 all our questions. Are you briefing or -- I'm confused who's  
20 running the brief here.

21 MR. REINKE: Please what we decided to do, we  
22 kind -- we had a set of questions. And we broke them down

1 between build -- kind of site build then operations. So we're  
2 going through the operations.

3 MR. MCGUIRE: Okay. I just thought we were  
4 going to listen to you and then we're holding our questions.  
5 I'm may be confused. Per my wife, you do not want to listen  
6 to me very often.

7 MR. MOONEY: We moved to that stage of the  
8 presentation. I believe that's the questions to discuss,  
9 slide that's before us, correct?

10 MR. MCGUIRE: Yeah.

11 MR. MOONEY: Okay. That's what I assumed.

12 MR. MACGUIRE: Yeah.

13 MR. MOONEY: So, and I'm sorry, I prepared a  
14 bunch of questions, so I'm just walking down them.

15 Is there any situation where the data center  
16 would -- or the design would shift over to needing significant  
17 amount of water to cool the data center? Like the chillers  
18 that's out, you're going from air to water?

19 MR. CRASS: No. We would not pull from  
20 utility water and even an emergency.

21 MR. MOONEY: Okay. So, and would that be a  
22 rather major change to the data center?

1 MR. CRASS: That would be a complete shift. I  
2 mean, we would have to redesign the entire building in order  
3 to accommodate the amount -- that amount of municipal water.

4 MR. MOONEY: Okay. So that would, if again,  
5 scenario, if that happened, we're talking building permits.  
6 You're talking probably a whole complete redesign here.

7 MR. REINKE: Demo and restart.

8 MR. MOONEY: Okay. On the power side with --  
9 again, I'm going to service -- served by essential public  
10 facilities here on the power side.

11 How is the power tied to the phasing? Do you  
12 need more power as you go -- as you grow, or is it all the  
13 power coming in at one time? Can you just overview for that?

14 MR. REINKE: Yeah. You need more power as you  
15 grow.

16 MR. MOONEY: Okay. And what's your window  
17 for growth? What are you anticipate -- maybe you're going  
18 to get this later Jay. Is it a -- what's the window to get  
19 the -- where you want to be at capacity if you want?

20 MR. REINKE: Yes. Three to seven years at  
21 full capacity.

22 MR. MOONEY: Three to seven years?

1 MR. REINKE: Yes.

2 MR. MOONEY: Okay. Well, you'll be at full  
3 capacity?

4 MR. REINKE: Yes.

5 MR. MOONEY: Okay. Solar power, any kind of  
6 consideration of solar on the site?

7 MR. REINKE: No. And we've talked to our  
8 folks about that. There's a number of issues around that.  
9 And ironically we have eight solar farms in Virginia right  
10 now.

11 And that Amazon is -- you guys can read in the  
12 website, highly sustainable. So we're always pushing  
13 towards zero carbon footprint sustainability for the -- even  
14 the acreage we have, they're just saying the solar typically  
15 is not beneficial.

16 MR. MOONEY: Okay. Just not enough scale to  
17 put that in there. Okay. Typical problem.

18 And again, I'm not trying to be -- I'm not  
19 trying to rick you all. I'm not trying to -- I just want to  
20 clarify some statements that I've heard around town, right?  
21 Just for the benefit of all of us to be on the same set of  
22 facts.

1                   You're going to consume electricity in this  
2 data center?

3                   MR. REINKE:    Yes.

4                   MR. MOONEY:    Will you get a power bill from  
5 Dominion?

6                   MR. REINKE:    Yes, we will.

7                   MR. MOONEY:    So you have to pay for your own  
8 power?

9                   MR. REINKE:    Yes or they'll cut us off.

10                  MR. MOONEY:    Okay.

11                  MR. REINKE:    Yes.

12                  MR. MOONEY:    And is electricity in your -- in  
13 every data center.  How would you rate that as an expense in  
14 the data center?

15                  MR. CRASS:     Number one,

16                  MR. MOONEY:    It is your --

17                  MR. CRASS:     It is our biggest expense.

18                  MR. MOONEY:    Okay.  So we're talking probably  
19 a good chunk of money to run data centers?

20                  MR. CRASS:     Yes.

21                  MR. MOONEY:    Okay.  But you do pay for your  
22 power?

1 MR. CRASS: We pay for our power and it is a  
2 -- I don't know the exact numbers, but it's not one that I  
3 would be able to pay out of my own pocket.

4 MR. MOONEY: I understand. Okay. All  
5 right. Mr. Mayor, you're the four for others. I do have some  
6 more questions but don't want to dominate here.

7 MR. NEVILL: We have other questions about the  
8 public services or public facilities?

9 MR. SEMPLE: Are we talking about power lines  
10 at this phase? In other words, power being delivered to the  
11 property?

12 Because my question is, one of my concerns  
13 obviously is that -- and I understand that you don't have any  
14 control over what Dominion decides but I read in the paper  
15 yesterday that there was some deal that was arranged and I  
16 think I saw it somewhere, that Amazon was able to convince  
17 Dominion to put a substation somewhere else as well as to run,  
18 I guess, underground power line -- distribution lines and I'm  
19 just wondering, Dominion has said, time and time again that  
20 if there were no data center, we wouldn't have this problem.

21 And my concern is A, does Amazon see that it  
22 has any responsibility at all for power lines that are being

1 delivered the service because simply because it exists and  
2 or any other reason or is there -- or there will be any times  
3 a need for more power at certain times in the future that may  
4 in fact require more distribution lines or transmission lines  
5 not only for this or possibly future projects.

6 MR. REINKE: Now this -- the data center on  
7 this site is what do you see the 220,000 square feet is it,  
8 there's going to be no additional data centers on this site.  
9 With that, there'd be no additional need for power.

10 MR. SEMPLE: Just on that site.

11 MR. REINKE: Yes.

12 MR. SEMPLE: Does Amazon have any plans for  
13 any other data centers in town?

14 MR. REINKE: Not that I'm aware of.

15 MR. SEMPLE: I mean, there's been no  
16 discussion with any other landowners at all. (Inaudible) I'm  
17 sorry, regarding any discussion with any other landowners at  
18 all regarding future possible sites?

19 MR. REINKE: None.

20 MR. SEMPLE: And because we saw, I was given  
21 -- when I was -- we first engaged in this process, was informed  
22 that Amazon was looking at two additional sites at the time

1 that they were looking at this one.

2 MR. REINKE: Yeah. We were -- we always  
3 looking at additional sites. So what makes the best site?  
4 So before we bought this site, we looked at several sites in  
5 town.

6 MR. SEMPLE: In town?

7 MR. REINKE: Yes.

8 MR. SEMPLE: And those do not potentially  
9 remain possible for you in the future. I'm not saying that  
10 you're going to use them, but do they remain potentially  
11 possible?

12 MR. REINKE: Not for what we want to build, no.

13 MR. SEMPLE: Okay. Thank you.

14 MR. MOONEY: Mr. Mayor.

15 MR. NEVILL: Mr. Mooney.

16 MR. MOONEY: Could we put the slide back up I  
17 want to make sure I'm following your guidance there. Okay.  
18 Yeah. Good. Fuel storage. Can you just give us a quick  
19 overview on the fuel tanks? How much is there? What are they  
20 needed for?

21 MR. CRASS: Sure. So fuel tanks per  
22 generator we have 24 hours of storage, which equates out to

1 roughly 4,700 gallons of fuel times 28 generators.

2           They are set back away from the building per  
3 NFPA standards to meet -- actually beyond NFPA standards. So  
4 in the event of per previous discussion, if there's a fire  
5 event at the generator, it doesn't affect the building.  
6 There's a central fuel oil fill system, which is right around  
7 10 to 12,000 gallons to provide us an ability to dump fuel  
8 into that tank and then distribute to the generators after  
9 that.

10           MR. MOONEY: Okay. And you said it's for  
11 24-hour operation?

12           MR. CRASS: That is a 24-hour emergency.  
13 Yes.

14           MR. MOONEY: Okay. So just again, from  
15 experience, that's certainly day times I've been associated  
16 with usually had a 30-day supply of fuel. So that's -- I mean  
17 the industry changes and so forth, but that's interesting.  
18 Okay.

19           MR. CRASS: Mr. Simmons, just correct me, is  
20 a five day.

21           MR. MOONEY: Oh, five day. Okay.

22           MR. CRASS: External storage tank.

1 MR. MOONEY: Okay.

2 MR. CRASS: Yeah.

3 MR. MOONEY: Okay.

4 MR. SIMMONS: One day in the belly tank of the  
5 generator, four additional in auxiliary tanks.

6 MR. MOONEY: Okay. And then God forbid  
7 again, if we have an extended outage, you just fuel truck's  
8 got to come in and resupply. That is basically --

9 MR. CRASS: Correct. And that's why we go to  
10 a central fill because then there's this one point, instead  
11 of having an individual fill at each generator, because that's  
12 just, fill, pull off, fill, pull off. And they have to do  
13 that however many times, however many generators we have. We  
14 have one fill point, they plug in, dump their fuel and take  
15 off.

16 MR. MOONEY: Okay. And where do you source  
17 the fuel? Is that locally you buy fuel or do you have a  
18 corporate account, or how does that work? Do you know maybe?

19 MR. CRASS: We typically bought from local  
20 fuel suppliers that we had inter contract agreement that they  
21 can supply. They verify that they can supply us for the fuel  
22 that we need. We have not entered an agreement with the

1 local, to my knowledge.

2 MR. MOONEY: Okay. I understand. And then  
3 on the fuel tanks themselves, in terms of, is there any kind  
4 of safety and fire monitoring on the tanks themselves?  
5 What's -- what happens over there?

6 MR. CRASS: So the tanks themselves, the  
7 biggest concern with the fuel tank is a leak.

8 So we design our tanks to UL2085, which is a  
9 X dual skin tank with an interstitial leak detection. As far  
10 as fire concern goes, if there's a fire at a fuel tank, we'll  
11 see the smoke. We have systems that we can see and we pole  
12 alarm to have that extinguisher also with local fire  
13 extinguishers to take out.

14 MR. MOONEY: Okay. And then I would assume,  
15 tell me if I'm wrong, that some of the stuff like we talked  
16 about the generators and there's some visuals here that you  
17 see. Is the external of the data center, is the property  
18 video monitored in your operation center, in the data center  
19 or remotely? How is the plant and property, if you will  
20 monitored?

21 MR. REINKE: It's monitored tightly and  
22 exactly how we say. Unfortunately we can't go into details.

1 MR. MOONEY: Understand.

2 MR. REINKE: Cause then we kind of alleviate  
3 the security of the site.

4 MR. MOONEY: But it is monitored?

5 MR. REINKE: It is monitored.

6 MR. MOONEY: Okay.

7 MR. REINKE: Yes.

8 MR. MOONEY: All right. If we can shift to  
9 security, is there a fence around the data center?

10 MR. REINKE: There is a fence, yes.

11 MR. MOONEY: Okay. We've heard some from  
12 citizens describe it as a prison style fence. I don't know  
13 if any standard exists for a prison style fence. When I look  
14 at prisons, I see razor wire, I see multiple fences. You got  
15 any razor wire on this fence?

16 MR. REINKE: We do not. No. Matter of fact,  
17 John, you don't -- you have a picture? Just --

18 MR. WRIGHT: (Inaudible)

19 MR. MOONEY: Okay.

20 MR. REINKE: That should have.

21 MR. MOONEY: Okay. So I mean, we'll look at  
22 it, but there's no rate -- I mean, prison -- okay.

1 Monitoring, you talked about that. And again, if I'm pushing  
2 because it opens up your aperture for security then don't  
3 answer the question.

4 But my understanding is there is a gate and  
5 there is a guard. Can you just maybe elaborate on access to  
6 the data center?

7 MR. REINKE: Access to the data center is  
8 highly limited, so very few folks, matter fact, I can't get  
9 in. So and so you'll need a special pass or you need to be  
10 some sort of vendor that has permission.

11 MR. MOONEY: Okay. And you have a guard at  
12 the gate --

13 MR. REINKE: Yes, we do.

14 MR. MOONEY: -- someone there? Okay, and is  
15 it monitored 24/7?

16 MR. REINKE: Yes, it is.

17 MR. MOONEY: Okay. All right. In terms of  
18 refuse and service areas do you have a sense of other than  
19 the day-to-day coffee cups and so forth, I'm assuming just  
20 everyday refuse. Is there any other waste that's generated  
21 in the data center, whether that's be batteries or maybe even  
22 if you talk about like your technology, if something fails

1 in the rack, how does that disposed of?

2 MR. REINKE: I'm going to let Mark Matthews  
3 answer.

4 MR. MOONEY: Thank you.

5 MR. MATHEWS: Sure. So I'm Mark Matthews.  
6 Hi, sir. We're not a production facility, so we don't  
7 generate a lot of waste.

8 Certainly our services are digital cloud  
9 services. We do have racks, and the racks have a lifetime.  
10 Those lifetimes are measured in years and they are disposed  
11 of when they are past their lifetime.

12 How those are disposed. We have contracts  
13 with providers to make sure that any hazardous material  
14 contained within the racks is properly disposed of in  
15 accordance with local and federal provisions.

16 MR. MOONEY: Okay. So you're not throwing a  
17 rack in the dumpster?

18 MR. MATHEWS: Absolutely not.

19 MR. MOONEY: Okay. How about batteries and  
20 --

21 MR. MATHEWS: We do -- the racks do have  
22 battery backups for that instant before that the diesel

1 generator would kick on and provide power so that we never  
2 shut down the servers.

3 MR. MOONEY: Yeah.

4 MR. MATHEWS: Those batteries are disposed of  
5 in accordance with all local and federal regulations through  
6 contractor provided services.

7 MR. MOONEY: Okay. So then town services,  
8 our refuse trucks should show up. There should be picking  
9 up your dumpster, which should have regular office trash?

10 MR. MATHEWS: We have just regular office  
11 trash. No mixed waste, no hazardous waste, nothing like  
12 that. We're a mature company. We monitor those things. So  
13 we have practices in place to properly dispose of material.

14 MR. MOONEY: Very good. You'll (inaudible)  
15 Mr. Mayor. Thank you.

16 MR. NEVILL: To follow up on that line of  
17 questioning, does bring a concern. Would you be agreeable  
18 to a condition that assured that, and particularly what I'm  
19 looking at is if the site at any future time is decommissioned,  
20 that the applicant agrees to remove toxic, hazardous heavy  
21 metals or whatever from the building and so that the building  
22 is left and environmentally clean, would you be -- would that

1 be an agreeable condition?

2 MR. MATHEWS: That's always the case. I  
3 would be shocked if that's not always the case.

4 MR. NEVILL: I would be shocked as well. But  
5 I think this is as an assurance as a condition to make sure  
6 that hazards materials are disposed of properly. And so that  
7 we're not accused of failure of diligence.

8 We've seen other sites that have been left with  
9 equipment that over time is the roof fails, leaks, it leeches  
10 into the system. So we just want to make sure it's upon  
11 abandonment of the site or the facility that it is  
12 environmentally sound and clear.

13 And if that's a -- I don't think that's a  
14 burdensome condition. And I'd like to direct staff to -- if  
15 council has agreement on that to consider that drafting.

16 MR. MOONEY: Mr. Mayor.

17 MR. NEVILL: Mr. Mooney.

18 MR. MOONEY: So when we addressed the fire, we  
19 said if the fire expression goes off there will be no hazardous  
20 materials that would bleak out and now we're agreeing to  
21 dispose of hazardous materials. If so, are there hazardous  
22 materials inside or are there not? Does that make sense?

1 Like we asked if the fire expression system goes off when the  
2 water leaks out.

3                   How do we keep the hazardous materials? And  
4 we're said -- and we were told that nothing is hazardous and  
5 now we're asked -- now we're asking if we decommission the  
6 building, will you guys remove all the hazardous materials?  
7 And you say, yes. It -- my -- I would thought -- I would think  
8 my thought process would you be -- you guys would answer. No.  
9 There's no hazardous material, but sure. But the answer is  
10 yes, we'll get rid of it, so. If the fire suppression goes  
11 off, does that -- is there hazardous material that would leak  
12 into the environment around here if the fire suppression goes  
13 off?

14                   MR. REINKE: Not that I'm -- none and even  
15 because we have apply --

16                   MR. MOONEY: So then why -- so then it wouldn't  
17 necessarily --

18                   MR. REINKE: So we can -- I did say no, but I  
19 just said yes because (inaudible) yeah, it's an easy -- that's  
20 an easy --

21                   MR. MOONEY: Right --

22                   MR. NEVILL: I mean, I think to go back at the

1 beginning, this site currently contains some contaminated  
2 soils from the junkyard that was there.

3                   So I'm just addressing that fact that anything  
4 that over time may deteriorate. So as I said, we see right  
5 now that you come in, you have to cleanse the soil where there  
6 is damaged soil based upon how it was left by the previous  
7 occupant.

8                   And we're just looking to prevent that from  
9 happening. Is my line of questioning on this, just to make  
10 sure that heavy metals or whatever that over time through  
11 deterioration addressing that.

12                   MR. HEROUX: Mr. Mayor, just for  
13 clarification for Mr. Mooney is what I was referring to and  
14 my question was, in the fire suppression system itself was  
15 there any hazardous material like Helan or any kind of  
16 chemicals like that? That's what I was referring to.

17                   Not -- I mean, your laptops at home have  
18 hazardous materials and with batteries and so forth. So my  
19 question was specifically to the fire suppression system is  
20 what I was addressing.

21                   MR. MCGUIRE: Mr. Mayor.

22                   MR. HEROUX: Very well.

1 MR. MCGUIRE: Yeah. Quick question about  
2 your security, because I'm familiar with secure facilities.  
3 At your gate there, when you have unauthorized people and it  
4 happens often, you know, people are curious and everything  
5 else or try to get in. How are you mitigating on Blackwell  
6 Road the turnaround?

7 MR. REINKE: You'll actually -- would you  
8 Steven, would you pull up that. You'll see in front of the  
9 gate a little wider circle. That's a turnaround circle.

10 MR. MCGUIRE: Right. Okay. And that's  
11 sufficient enough because --

12 MR. REINKE: Yes.

13 MR. MCGUIRE: I know a military incident for  
14 --

15 MR. REINKE: And for an 18 wheeler, they  
16 designed it for a 18 wheeler to be able to turn around.

17 MR. MCGUIRE: And then how are we going to  
18 mitigate that on Blackwell Road though? That's -- I see your  
19 turnaround but there's going to be a bottleneck for you as  
20 well, or a choke point.

21 MR. REINKE: I'm making -- I'm getting  
22 nervous. Hopefully, I don't think there's any -- hopefully

1 there shouldn't be that many folks coming into our site and  
2 turning around.

3 MR. MCGUIRE: Right, right.

4 MR. REINKE: So --

5 MR. MCGUIRE: Well, I'm just saying worst case  
6 scenario, that's all.

7 MR. REINKE: Yeah. Even if they're -- if it's  
8 just one, I'm assuming. Even if you say one a day and I don't  
9 think one a day going out in Blackwell.

10 MR. MATHEWS: So just, if I may sir.

11 MR. REINKE: Yeah.

12 MR. MATHEWS: This is not going to be a high  
13 traffic kind of facility, right?

14 MR. MCGUIRE: Right.

15 MR. MATHEWS: It's not a large -- it's not a  
16 production facility.

17 MR. MCGUIRE: Sure.

18 MR. MATHEWS: So there's not large shift  
19 turnovers. It's not a heavily populated office space. So  
20 there's not a lot of employees coming in and out. There are  
21 periodic services, there are kind of weekly deliveries.

22 MR. MCGUIRE: I'm not worried about them.

1 I'm worried about the curiosity seekers and --

2 MR. MATHEWS: Certainly yeah --

3 MR. MCGUIRE: You know, what I mean? That's  
4 what I'm saying.

5 MR. MATHEWS: If there's a thousand cars that  
6 show up at the gates.

7 MR. MCGUIRE: No.

8 MR. MATHEWS: Trying to to get a look inside,  
9 that's going to be a problem. But I mean certainly the  
10 turnaround is sufficient. It's similar to what used to be  
11 military. If you go to the Washington Navy yard, they've got  
12 a similar kind of traffic, well even worse traffic problem  
13 but they have sufficient turnaround space to handle those  
14 kinds of problems.

15 MR. MCGUIRE: I appreciate it. The other  
16 thing is, for the record, Mayor, I think we've talked about  
17 trash and everything else and my understanding, like our  
18 sanitation system's pretty much under pressure, things like  
19 that, I think we really should look at a cost basis about how  
20 we were doing sanitation for this Amazon facility.

21 It should be in our best interest. So -- and  
22 not putting more pressure onto the system with how many

1 garbage trucks we have and how many crews, things like that.

2 MR. MOONEY: Mr. Mayor.

3 MR. NEVILL: Mr. Mooney.

4 MR. MOONEY: I have a question. So you -- so  
5 it's not -- so this facility is not per the Comp Plan A, it  
6 doesn't employ a lot of people. Based off what you just said,  
7 you said very few people are going to be coming in. So this  
8 doesn't meet the high employer designation.

9 MR. REINKE: On a daily operation. You're  
10 somewhere between 25 to 35, maybe 40 folks. Construction  
11 wise, we estimated 300 plus jobs. Then you have auxiliary  
12 jobs of folks coming in doing delivery of some other stuff.  
13 But from that pure folks coming in that site, you're somewhere  
14 between 25 and 40.

15 MR. MOONEY: Okay. Thank you.

16 MR. REINKE: And by the way, sometimes, and I  
17 know that seems like why such a wide range and you heard Mr.  
18 Heroux say this, there's a number of things going on. There's  
19 compute, there's storage, there's networking, those are three  
20 major things within a data center.

21 Every one of those takes different amount of  
22 different folks. And so there's a little bit of variability

1 of how that's being operated, what the demand is to show what  
2 the exact level of people working there will be.

3 MR. MOONEY: Thank you. Mr. Mayor, another  
4 question. Who thought of these questions? Who thought of  
5 the things that the items and -- was that you?

6 MR. HEROUX: Mr. Mayor I prepared for this  
7 meeting and I prepared, 20 some odd questions. I forwarded  
8 them to Mr. Martino who then forwarded them onto the  
9 applicant. I thought that was the responsibility I had to  
10 have.

11 MR. MOONEY: Okay. Thank you.

12 MR. SEMPLE: Are we going to be discussing  
13 revenue and other aspects? Can we go ahead.

14 How much revenue does Amazon expect to earn  
15 from this? Oh, here's another question. That's not my  
16 question. I'm sorry.

17 One of the issues that we must consider is how  
18 much revenue we can expect to get from this site and I'd like  
19 to know if you have an approximate number, how much that is?

20 MR. REINKE: Yeah. So we'll talk about kind  
21 of community impact if Becky Ford will come up.

22 MS. FORD: Thanks, Jay.

1 MR. SEMPLE: Hi, there.

2 MS. FORD: Hi there. So the question was?

3 MR. SEMPLE: Well, how much -- we will receive  
4 revenue from primarily two sources, real estate taxes and  
5 business tax, property tax, personal property tax.

6 MS. FORD: Real property and business  
7 personal tax.

8 MR. SEMPLE: And almost all of it will come  
9 from the latter, the county will get its share of the real  
10 estate tax as it does now.

11 MS. FORD: Correct.

12 MR. SEMPLE: So how much does -- how much do  
13 you expect that you'll be able to contribute to our tax base  
14 from this?

15 MS. FORD: Sure. Great question. And I just  
16 want to be clear. We don't do the analysis, of course, the  
17 county does the analysis.

18 So this is based on the information that we've  
19 provided to Fauquier County and the commissioner's estimate  
20 of what the tax calculation might be.

21 MR. SEMPLE: Well, are they only calculate the  
22 real estate tax?

1 MS. FORD: Okay.

2 MR. SEMPLE: I mean that I'm -- I'm looking for  
3 what the calculation is.

4 MS. FORD: Sure.

5 MR. SEMPLE: That affects our income revenue.

6 MS. FORD: So based on the investment  
7 information that we provided which was approximately \$550  
8 million in a capital investment, the county estimate --

9 MR. SEMPLE: It's not. Okay, thank you.  
10 That's not my question.

11 MS. FORD: I understand. The county  
12 estimated approximately over a five-year period just at \$4  
13 million property tax, business property tax revenue.

14 MR. SEMPLE: One million?

15 MS. FORD: Four.

16 MR. SEMPLE: Four over five-year period. Per  
17 -- so that amounts to about 900. I'm just trying to do math  
18 calculation per year. Okay. And we have --

19 MS. FORD: And --

20 MR. SEMPLE: Yes.

21 MS. FORD: And I just want to make sure that  
22 amount changes on an annual basis because as you know, that

1 property depreciates, so it's on a depreciation schedule,  
2 which is on average to your point, just under 900.

3 MR. SEMPLE: 900,000. Okay. So it's not the  
4 million we we're talking about. And then -- I think I've  
5 heard.

6 And the other is that we have an incentive  
7 process under our ordinance that allows you three years of  
8 actually having -- it's a -- not -- it's a 100 percent discount  
9 that is over three years. You don't have to pay that. Is  
10 Amazon going to take advantage of that particular incentive?

11 MS. FORD: We have not asked for any  
12 incentives from the town.

13 MR. SEMPLE: You have what?

14 MS. FORD: We have not asked for any financial  
15 incentives from the town.

16 MR. SEMPLE: What?

17 MS. FORD: Tax incentives.

18 MR. SEMPLE: Could you?

19 MS. FORD: I imagine we could.

20 MR. SEMPLE: Yes.

21 MS. FORD: If we did, we would have to come  
22 before this body and request that.

1 MR. SEMPLE: That's fine. But I mean, we  
2 would grant it. I mean, we have these incentives by  
3 ordinance. And I think you'd probably qualify.

4 So what we're looking at here is \$900,000  
5 represents, do you know what the town budget is? How much  
6 it is?

7 MS. FORD: I do know what the town budget  
8 approximately.

9 MR. SEMPLE: Yeah. So it's about three  
10 percent of our income. And -- okay, so what happens if it  
11 depreciates, on what basis does it depreciate? Do you know?

12 MS. FORD: Well, the county would set that  
13 schedule, but I believe it's 55 percent in the first year.  
14 And then it scales down from there.

15 MR. SEMPLE: How quickly?

16 MS. FORD: Over -- I believe a five-year  
17 period.

18 MR. SEMPLE: So the full -- the equipment  
19 could be fully depreciated in five years? Now, unless you  
20 replace it then on the basis in which we would apply our  
21 property tax could be zero.

22 MS. FORD: I'm sorry, could you repeat that?

1 What?

2 MR. SEMPLE: What I'm talking about, you're  
3 talking about an accelerated depreciation. Generally, a  
4 straight line depreciation is 20 years, but sometimes you have  
5 MACRS, which is a modified accelerated depreciation schedule.  
6 In this case, this seems to be a very rapid depreciation  
7 schedule for five years.

8 MS. FORD: This is for the equipment. I just  
9 want to --

10 MR. SEMPLE: Yeah. For the equipment.

11 MS. FORD: Sure.

12 MR. SEMPLE: Right. And this is on which we  
13 rely on our revenue. This is where I guess for some reason  
14 is one of the primary reasons that we want to have this.

15 We're working on this project. So if that's  
16 the case, I'm just saying if you say it's fully depreciated  
17 in five years, then this year, 900,000, and this is just rough  
18 math, next year we'll get 700,000. Then the following year  
19 we'll get 300,000.

20 Eventually it goes to zero. And the only --  
21 the way you offset that, of course, is you're putting in new  
22 equipment and you start the depreciation. Is the

1 depreciation done per -- will be determined based on the  
2 current shall I say, age of the equipment, that of a particular  
3 piece of equipment of a singular server.

4 MS. FORD: So I'm not a tax expert. We  
5 actually have tax experts on our team. We didn't bring them  
6 today, but what I can tell you is that the equipment comes  
7 into service and it's valued and then it depreciates. And  
8 as you mentioned, we do replace our equipment over time.

9 MR. SEMPLE: Right.

10 MS. FORD: Industry standard for something  
11 like that is generally five to seven years.

12 MR. SEMPLE: Okay. So we will always be  
13 seeing a cycle where the income will come in at initially,  
14 if you totally replace it five years from now we start back  
15 up again theoretically.

16 MS. FORD: That's recent.

17 MR. SEMPLE: I understand this is all sort of  
18 a mix. And so we don't know exactly what it is. And in fact,  
19 I don't think we can ask what it is eventually by state law.  
20 I don't think we can know it deterrent, we can make that direct  
21 query.

22 But it does come in and so that means that the

1 total revenue of from this site is going to be \$900,000 to  
2 the town. Which is, I mean, if we're the first when you pay  
3 it, presumably in the first year but maybe in the fourth year,  
4 depending on whether you take advantage of the incentive.

5 So, all right. That represents less than  
6 three percent of our budget. The second point that I'd like  
7 to make is whether any comparison has been made with other  
8 economic uses of the property.

9 That is, I understand Amazon wants to put a  
10 data center there, but it could put other things there as well.  
11 And I'm just wondering whether from an economic benefit point  
12 of view, one of the things I'm reading here is what is the  
13 economic benefit to the town?

14 And I'm just having a lot of problem  
15 appreciating what that is except perhaps during construction  
16 and because you more have 30 or 40 or 50 employees and compare  
17 that to the overall economic benefit of a build out under the  
18 comprehensive plan that would be mixed use. And I haven't  
19 seen that comparison. Have you done any kind of analysis like  
20 that?

21 MS. FORD: So we've not done a specific  
22 analysis of a mixed use development or alternate of course,

1 our intended use for the site as a data center and I think  
2 the point that you made we're looking at roughly 52 jobs for  
3 this facility.

4                   The average salary is roughly \$122,000  
5 annually. I think 52 in terms of comparison is similar to  
6 the town. Aren't there approximately 60 town employees?

7                   MR. SEMPLE: In what?

8                   MR. HEROUX: There's about 100 anyway. 122  
9 or 140 based on yeah full-time, but it's 275.

10                  MS. FORD: So --

11                  MR. NEVILL: Like a quick point of  
12 clarification, just the county commissioner revenue sets  
13 depreciation schedule. And Mr. Martinez, I just wanted to  
14 turn to you if there's any input that I think Mr. Semple asked  
15 some very specific questions, not so much that Ms. Ford could  
16 answer, but are relevant to our -- the way we depreciate, the  
17 way that we set our tax records.

18                  I don't believe that there is an incentive that  
19 we could offer after the fact. But if you could just clarify  
20 I think some of the points or answer some of the questions  
21 that Mr. Semple asked.

22                  MR. SEMPLE: Yes. Yeah. And would -- and

1 there's a state law, I think that it affects the depreciation  
2 schedule regarding data centers, and I'd like you to take a  
3 look into that.

4 MR. MARTINO: Certainly. Thank you, Mr.  
5 Mayor, Council members. So you're correct. First of all,  
6 beginning with the commissioner of the revenue assesses all  
7 of real estate and the business tangible assets which have  
8 to be reported by the businesses each year.

9 And the town sets the rate on that. The town  
10 rate is currently a dollar on the personal business tangible  
11 assets. This is all in the staff analysis beginning on page  
12 15 -- B15,16, and yeah, pretty much 15 and 16. So the  
13 property, the assets are depreciated over four-year period,  
14 beginning at 55 percent going to 45, 35.

15 And after four years, it stays at 25 percent  
16 of the original cost. And then as the applicant has  
17 explained, those servers, those assets are being refreshed  
18 over time.

19 So after the first -- my experience is after  
20 the first time through the building, it basically levels out  
21 because new assets are coming in and then all assets are going  
22 out, they're coming in at being taxed at a higher rate.

1                   The new lower tax assets are leaving the  
2 building. So it will level off as it gets to capacity. It's  
3 somewhere between, a million and a million three.

4                   This is based on the meeting that we had with  
5 Mr. Maybach on the commission of the revenue to make sure we  
6 were understanding what Amazon has brought forward.

7                   The value of the investment they're making  
8 \$550 million is also what they've represented to the county  
9 and similar to what some other data centers have reported to  
10 the county. And so that's where we got -- we obtained our  
11 information about the reasonableness of the estimates.

12                   MR. SEMPLE: Okay. The \$550 million estate  
13 reported to the county. I'm really actually interested in  
14 what is the direct impact on our revenue.

15                   MR. MARTINO: So the direct impact would begin  
16 as they open phase one.

17                   Obviously be a little lower, but over as it  
18 gets to full capacity, our best estimates are to be anywhere  
19 from a million to a million three depending on how quickly  
20 the servers are refreshed but that would be some years out.  
21 So you're looking at more like in the early years that  
22 \$700,000-\$900,000 number.

1 MR. SEMPLE: What is the phasing? In other  
2 words, what percentage of the building will be subject to this  
3 income calculation over let's say the first three or four or  
4 five years?

5 Assuming I'm -- I don't mean to -- assuming  
6 that you're saying that there is a three-year incentive  
7 process that they could apply for.

8 MR. MARTINO: They can apply for it. It is  
9 not a giving. The decision as to whether or not to offer it  
10 or not rest entirely with the town council. So nothing is  
11 entitled.

12 MR. SEMPLE: Okay.

13 MR. MARTINO: And --

14 MR. SEMPLE: All right. But then what would  
15 you think our revenue count for the next five years? Could  
16 you sort of give an estimate what the average income could  
17 --

18 MR. MARTINO: I think you did the quick  
19 calculation that it's going to be plus or minus one percent  
20 of the -- if our -- well, excuse me, the general fund budget  
21 is, \$17 million. So now we're looking at 900.

22 MR. SEMPLE: Oh, yes, I see what you're

1 getting. You're looking at,

2 MR. MARTINO: Let me open up my trusted  
3 calculator here. So --

4 MR. MOONEY: While you're doing that also, Mr.  
5 Martino, can I just jump in real quick? But I thought that  
6 the depreciation on the town -- on the countywide schedule,  
7 it never went to zero, didn't it go?

8 MR. MARTINO: That's correct, it never goes to  
9 zero it stays --

10 MR. SEMPLE: Its 25 percent.

11 MR. MOONEY: Holds at 25, right?

12 MR. MARTINO: So the initial year would be at  
13 the half of one percent of the general fund budget and would  
14 broaden the tax base significantly and you can go to the budget  
15 document and look at the pie chart of the town's revenue base  
16 but --

17 MR. SEMPLE: Can I see some independent  
18 calculation of this?

19 Do we have it, I mean, the impact in terms of  
20 its effect on the general fund and when it could occur and  
21 over what period of time based on the phased build out of the  
22 facility, including its depreciation schedule?

1 MR. MARTINO: We don't -- we haven't -- we  
2 don't have the detail to go into that kind of analysis.

3 MR. SEMPLE: Okay.

4 MR. MARTINO: By state code the information on  
5 business tangible and personal property taxes is confidential  
6 to whomever is filing.

7 And so what we are relying somewhat on our  
8 conversations with commissioner of revenue indicated if  
9 they're making an investment of X dollars, that breakout on  
10 a data center is approximately 80, 20 business tangible to  
11 real estate.

12 MR. SEMPLE: So we won't really know. Go  
13 ahead.

14 MR. MOONEY: I have a document here that's  
15 dated April 15th, 2016, revised July 18th, 2016. And I  
16 believe it was written -- the title is Potential Fiscal  
17 Economic Impacts the Proposed Walker Drive iPod Rezoning  
18 Application and I believe that Mr. Foote wrote this, is that  
19 correct?

20 MS. HARRIS: I don't know (inaudible)

21 MR. MOONEY: Okay. I'm sorry. Somebody  
22 wrote it and it details the economic impact and I'm just --

1 I found this and I'm just wondering if it -- I mean, it goes  
2 into detail about the local impacts of -- for the different  
3 areas, how much tax revenue, real estate taxes, it goes to  
4 a lot of things for the walk or drive.

5 I'm just asking if we could get something like  
6 this or why we don't have something like this for this project  
7 that's going to be, that, you know we're going to have to vote  
8 on it and could drastically impact it or not impact it that  
9 much.

10 And I also think -- never mind. I'll hold that  
11 question and comment later. So do we have an answer to that?  
12 Do we know why we don't have this for this project?

13 MS. HARRIS: I'm not sure what this is --

14 MR. NEVILL: I believe what we have -- I think  
15 -- if I think I'm in answering or hearing your question. I  
16 think while we have an estimate based on what is known and  
17 like I think what Jay said with the sound, we're not going  
18 to know until we actually know in some of these instances.

19 So we have the estimates as to the \$555 million  
20 investment and our figures are based upon that estimate; is  
21 that correct?

22 MS. HARRIS: That's correct.

1 MR. NEVILL: And I just want clarification for  
2 Mr. Simmons in terms of voting on a special use permit  
3 application what are -- in terms of impact revenue wise is  
4 that an allowable reason to vote up or down a application?

5 MR. SIMMONS: No, that's not allowable  
6 reason. The conditions that you have to consider in section  
7 and Article 11, and that is not one of them.

8 MR. NEVILL: Just wanted to clarify --

9 MR. MOONEY: Mr. Mayor, can you ask that -- I  
10 mean, can you ask that question again?

11 MR. NEVILL: That reasons by which we can vote  
12 a condition or vote an SUP up or down. Impact to the tax base  
13 is an important decision -- is important in our overall  
14 decision making process, but impact is not a reason by which  
15 we can approve or deny it.

16 So we can either approve it because of its  
17 impact, nor can we deny it because of the impact.

18 MR. SEMPLE: So nobody on the council will  
19 consider income at all in terms of its decision?

20 MR. NEVILL: To clarify what I just said.

21 MR. SEMPLE: Yeah.

22 MR. NEVILL: It is important for our overall

1 perspective as we understand this. I just wanted to clarify  
2 that reasons to vote up or down cannot be contingent upon  
3 income revenue impact. And so I just said it is important  
4 for us to consider.

5 MR. SEMPLE: You mean expressed reasons?

6 MR. MCGUIRE: I understand what you're saying  
7 about procedure, but I think just getting to the tone of what  
8 Mr. Mooney is saying, I think we need to be able to say to  
9 the good citizens, why is this so good? What is the benefit?

10 And I think we need to do that because there's  
11 a lot of ambiguity and, you know people need to know the whole  
12 story.

13 MR. HEROUX: Mr. Mayor.

14 MR. NEVILL: Mr. Heroux.

15 MR. HEROUX: It - the impact on employment and  
16 tax is one of the 32 criteria that is in section 11, or Article  
17 11 I think is -- has been referred to with regards to the impact  
18 to the citizens, if my members are correct the property as  
19 it exists today provides the citizens \$500 a year.

20 So if we have an estimate here of \$900,000 a  
21 year to four million, there's your delta.

22 MR. MCGUIRE: But that's -- it's different now

1 because it's been sold.

2 MR. HEROUX: Yes. And that number the real  
3 estate property tax, again -- if it the number -- if my  
4 number's correct, the real estate property tax went to  
5 \$12,000. So I'm saying the prior owner who owned that  
6 property few years if you go back to 2013.

7 MR. MCGUIRE: Yeah. No, I understand.

8 MR. HEROUX: Was \$500.

9 MR. MCGUIRE: Understood.

10 MR. HEROUX: That's what the town got out of  
11 that property to serve this citizen, this town, \$500 a year.

12 MR. MCGUIRE: No, understood. Yeah, I  
13 understand.

14 MR. NEVILL: Are there any jobs on site?

15 MR. SIMMONS: Sorry?

16 MR. NEVILL: Are there any jobs on site?

17 MR. SIMMONS: There are no jobs on that site.  
18 That what I'm aware of. I think it was farmed. I think the  
19 hay I don't know who did that or what kind of -- what they  
20 did with the hay.

21 MR. SEMPLE: Mr. Harrow, when we start talk  
22 about this, we must consider the comprehensive plan. The

1 comprehensive plan shows a use for that, that could produce  
2 potentially a greater economic benefit if it were built out  
3 according to those expectations.

4           That's the question that we're asking. Are  
5 there other usage of this property under the comprehensive  
6 plan consistent with the comprehensive plan where this is not.  
7 Which could potentially provide a better use of that property?

8           One of the questions we have, of course, this  
9 is relayed fallow, I mean yes. Forever. I mean, you have  
10 to guess the age of the rock that's sitting up there. And  
11 I appreciate that. But my point is that when -- in 2017 when  
12 this was first brought to the attention to the council about  
13 how to better use our industrial land.

14           The question was put to them about data centers  
15 and there was a very negative response. In fact, my  
16 predecessor said, you'll tie up land for 50 years.

17           So my point is that historically speaking and  
18 also in the comprehensive plan, our at least portion of our  
19 industrial land it was expressly indicated on page 70, as I  
20 said before, was not appropriate for a data center. Yeah,  
21 we should look at the comprehensive plan in terms of the  
22 potential use.

1                   And this is what I think the study my colleague  
2 has talked about that before we make a decision like this that  
3 is perfectly appropriate to see if the comprehensive plan  
4 provides a use. And as I pointed out before Nina Weisberg,  
5 when we adopted the comprehensive plan was all for it.

6                   So this is why I think that making a judgment  
7 on a special use permit has to be consistent with a  
8 comprehensive plan that we make sure that it is.

9                   MR. HEROUX: Mr. Mayor?

10                  MR. NEVILL: Mr. Heroux

11                  MR. HEROUX: I -- with all due respect, Mr.  
12 Semple and I understand where you're coming from. I've been  
13 here 28 years in this town that van's been vacant for 28 years.  
14 I don't know where this development is coming from. This  
15 applicant, we have to listen to this applicant.

16                  This applicant purchased this land under a  
17 deed that said it was industrial. And they are standing here  
18 today with a proposal before us. This discussion that we're  
19 supposed to wait for something else to appear out to the sky,  
20 whether it's Nina or whoever. There's supposed to be a  
21 thousand-person hotel there.

22                  I didn't realize that. How would that have

1 looked in the grand entrance of the town? I mean, there's  
2 just inconsistencies here. Okay. The land has been vacant  
3 for 28 years. We have an applicant who legally purchased the  
4 land under a zoning that, so it was industrial. They put a  
5 plan in front of us to hear today, we have to decide on that.

6 MR. MOONEY: Mr. Mayor, may I. Mr. Rowe, with  
7 all due respect, I'm asking for an economic study that we got  
8 in 2017 for our project. We have some of the brightest minds  
9 in the world sitting in this room. And I'm just asking for  
10 an economic study for one of the most consequential decisions  
11 this town will ever make.

12 MS. HARRIS: I believe the town did a series  
13 of studies. A fiscal analysis might be what you're referring  
14 to in 2017 fiscal sustainability analysis, a white paper, a  
15 company called RKG Associates.

16 MR. HEROUX: Attached the comprehensive plan.  
17 It's a very interesting study. It talks about our tax  
18 revenues and the impacts on residential. It's not a very  
19 encouraging study, actually, if you read it. Yeah.

20 MS. HARRIS: I think it looked at a number of  
21 developments across several different designations from the  
22 comprehensive plan. And one of those was as I believe a mixed

1 use a commercial area.

2           And the study laid out the potential revenues  
3 from those. I don't recall the exact numbers offhand and I  
4 can certainly ask one of my colleagues to pull that off the  
5 town website, but as I recall, it wasn't anywhere near the  
6 rough estimates that we just talked about the \$900,000.

7           MR. SEMPLE: Yeah, but you were just talking  
8 about the revenue to the town. What my colleague is  
9 referencing is the overall economic development impact on the  
10 town itself.

11           And that includes the employment structure,  
12 the meals taxes, the fact that you'd have a mixed use that  
13 has an aggregate impact over time. And that I think is what  
14 the relevant question is, as opposed to a single monolithic  
15 data center that has on any given day 35 employees.

16           So that to me is what I think the relevant  
17 reason is into our decision making process whether it's  
18 consistent with a comprehensive plan.

19           MS. HARRIS: Sure. It's understandable.  
20 And as I recall, the -- that new town district expands beyond  
21 the single parcel that we've designated interest in  
22 developing for a data center.

1                   So I think there's likelihood potentially that  
2 other things could develop around there in line with the mixed  
3 use that you've referenced, perhaps to compliment the  
4 employees who are working at the facilities.

5                   MR. NEVILL: If I may real quick, what -- and  
6 I know we've been sitting here discussing the towns. What's  
7 the tax revenue for the town and the county combined? Because  
8 everybody knows everything that occurs in town, the county's  
9 going to cut. So what's the total tax generation of this tax  
10 -- of this proposal town and county? Do you have that?

11                   MS. HARRIS: Average over that same period of  
12 time is roughly \$2 million for the county and then under a  
13 million dollars for the town.

14                   MR. NEVILL: Okay. Thank you.

15                   MS. HARRIS: You're welcome.

16                   MR. NEVILL: Vice Mayor has requested a short  
17 recess just to give everyone a chance to stretch their legs.  
18 And if we could reconvene it, is 1:00 agreeable.

19                   MS. HARRIS: Thank you.

20                   [RECESS]

21                   MR. NEVILL: All right. We're reconvening at  
22 1:02 PM. I'd like to ask a reminder -- or let everyone know

1 that, if they are following online and have the agenda pulled  
2 up from this morning go to your agenda page and refresh it.

3 MR. NEVILL: Materials that were presented  
4 this morning have been uploaded and added to the packet. So,  
5 refresh your agenda and it should have all the updated  
6 materials, in it. Have we -- Mr. Reinke, have we finished  
7 your presentation? Do you have any further?

8 MR. REINKE: We are done and -- but we're open  
9 to questions. We'll be here as long as you want us here.

10 MR. NEVILL: Okay, so I think at this point we  
11 turn it to counsel for questions and we can discuss what  
12 conditions we've been looking at and wait for the town manager  
13 to return.

14 MR. HEROUX: Hey, Mr. Mayor.

15 MR. NEVILL: Mr. Heroux.

16 MR. HEROUX: What I think we -- what I would  
17 suggest that we focus on is the draft conditions of approval  
18 that, if my package is correct here, it's on page B22 of our  
19 package that, we review it.

20 MR. NEVILL: I know we spoke earlier about the  
21 noise and putting some conditions, seeing if the applicant  
22 was amenable to conditions around noise tests and occupancy

1 permit. But I think we need -- I would suggest that we move  
2 to looking at the draft conditions of approval to make sure  
3 we are addressing concerns that we've got.

4 MR. NEVILL: Okay. Specific to noise,  
5 currently the draft applicant -- the draft and condition  
6 accounts for 60 days, applicants will probably begin to  
7 diligent pursue mitigation until compliance has been  
8 achieved. We've discussed, a more stringent condition on  
9 that, correct?

10 MR. HAMBY: That's correct. So, we need to  
11 remove 60 days and replace with -- I don't know if, do we want  
12 to try and craft that or Ms. Harris, do you want to help us  
13 with that replace 60 days?

14 MR. NEVILL: The certificate of occupancy  
15 will not be granted, or at every stage of phasing --  
16 (inaudible)

17 MS. HARRIS: If counsel wants to, provide  
18 staff with clear direction --

19 MR. NEVILL: Oh, okay.

20 MS. HARRIS: We will spend time with our legal  
21 counsel to draft conditions. So, for example, there are some  
22 things that need to be cleaned up now with these conditions

1 because they were written back based on the October 28th  
2 submission.

3 MR. NEVILL: The applicant has come in with  
4 new submissions. We want to make sure that dates and  
5 references go back to that. So things like for example, if  
6 the applicant is talking about sound walls, we want to make  
7 sure that that is incorporated into this document every step  
8 of the way.

9 MR. NEVILL: In terms of their elevations with  
10 the correct dates. In regards to noise, we would love to hear  
11 direction from Council as to what you would like. We heard  
12 a number of things this morning related to the staging of it,  
13 and that, after site plan review permits, inspections, once  
14 it's built that particular phase, you run a test in the real  
15 world and then if it's violated, it's shut down. That's what  
16 we heard this morning.

17 MR. HAMBY: Correct. Phase by phase.

18 MS. HARRIS: Phase by phase.

19 MR. HAMBY: So if there are -- I believe you  
20 stated ten phases, is that correct? From start to finish  
21 phase by phase? Each phase.

22 MR. REINKE: So if a new phase comes online and

1 that phase exceeds the noise ordinance, that phase does not  
2 get (inaudible).

3 MR. HAMBY: That's correct.

4 MS. HARRIS: So one question I have for you is,  
5 there was also talk about an independent sound expert  
6 verifying this. We do not have the resources within our town  
7 currently to be able to do this. So we would have to go hire  
8 an independent sound expert. Do you want to do that at each  
9 phase? And then the question becomes who pays for it?

10 MR. HAMBY: I would ask Amazon to pay for that  
11 at each phase.

12 MR. REINKE: Amazon would pay for that. Each  
13 phase.

14 MR. MCGUIRE: Mr. Mayor.

15 MR. NEVILL: Mr. (inaudible)

16 MR. MCGUIRE: Mr. McGuire.

17 MR. NEVILL: Mr. McGuire, I'm sorry.

18 MR. MCGUIRE: Yeah, no worries. Yeah, I  
19 agree with what is being said here, but also like, it's almost  
20 like we're in a court of law and you know, the litigant is  
21 saying something that's obviously going to be favorable for  
22 them. I think we owe a fiduciary to the town that we do our

1 own independent sound study and maybe we can get somebody pro  
2 bono to do it.

3 MR. NEVILL: But I think we need to -- as maybe  
4 prosecutor in a court of law, make sure this is ground truth  
5 because obviously somebody's going to present something  
6 that's favorable to them. I think we owe it to the citizens  
7 to have our own independent study and I think we should agree  
8 to do that. So to make sure we're doing the right thing and  
9 ask like consensus on that.

10 MR. HAMBY: Okay, I would ask that Amazon pay  
11 for the noise study by an independent that the town of  
12 Warrenton chooses

13 MR. MCGUIRE: Amazon will do that.

14 MR. HAMBY: Is that better?

15 MR. REINKE: Yes. I appreciate that. Thank  
16 you so much.

17 MR. SEMPLE: Mr. Heroux. Yeah Mr. Simmons,  
18 do we do -- have you made a legal determination that this is  
19 a -- this would be a legal condition?

20 MR. SIMMONS: This particular request?

21 MR. SEMPLE: Well as -- well actually I don't  
22 -- here goes the point, I don't know what the condition is

1 until we flush it out, I guess here. But I'm presuming it's  
2 at a minimum it will incorporate most of this material, that  
3 was drafted, presented in November.

4 MR. NEVILL: Would you not advise that before  
5 we enter into a condition that is -- it requires enforcement  
6 that we determine it can be enforced? And whether in fact  
7 there is anything consistent in Virginia law that allows us  
8 to actually do two things. One is to enforce it and how to  
9 enforce it.

10 MR. NEVILL: What penalties, if for example,  
11 what is the penalty if we tell Amazon that it has to not occupy  
12 a certain space and it goes ahead and occupies a certain space?  
13 What are -- what is the remedy and what are the penalties?

14 MR. SIMMONS: Enforceability is always easier  
15 when you have something in writing, right?

16 MR. SEMPLE: Yes. So --

17 MR. SIMMONS: That's what the perfect  
18 conditions are for.

19 MR. SEMPLE: Right.

20 MR. SIMMONS: Proposed conditions are for.  
21 And so once we have these proposed conditions signed by the  
22 applicant then we have something which we can enforce. You

1 mentioned earlier that you're not interested in obtaining  
2 fines from the applicant. I understand that because they can  
3 afford to pay those fines very easily. So the question is,  
4 how do you enforce the proposed conditions?

5 MR. SEMPLE: Right.

6 MR. SIMMONS: The way that you do that is by  
7 going before a judge and explaining to him that the applicant  
8 has agreed to do x, y, and z and they haven't done those things.

9 MR. NEVILL: And then at that point you ask the  
10 court to -- for a declaratory judgment of some sort, declaring  
11 the applicant to do either comply with the proposed conditions  
12 or whatever, we -- they've agreed to do by way of the proposed  
13 conditions and ask the court to enforce those proposed  
14 conditions. So the court gets involved to help us.

15 MR. SEMPLE: So in order to make sure that we  
16 understand what our, options are, I think it would be good  
17 to have an opinion, as to what -- exactly what the legal remedy  
18 is for us and that potential exposure we potentially have.

19 MR. SIMMONS: Well, one of the legal remedies  
20 is injunction, right?

21 MR. SEMPLE: Yes.

22 MR. SIMMONS: Where they're enjoined from

1 doing certain things.

2 MR. SEMPLE: Yes, that's correct.

3 MR. SIMMONS: Required to do certain things.

4 MR. SEMPLE: It seems -- that seems like a very

5 --

6 MR. SIMMONS: (Inaudible) very important.

7 MR. SEMPLE: Relatively heavy, requirement on  
8 the part of the town and so in your opinion, you would have  
9 to wait until you receive a completely drawn document before  
10 you can make a judgment.

11 MR. SIMMONS: Well, we definitely want to see  
12 the proposed conditions to first of all make sure they're  
13 legal and then enforceable as well.

14 MR. SEMPLE: And you -- do you think you can  
15 make that determination today?

16 MR. SIMMONS: I think, well, let's have a look  
17 at them. I think so, but let's have a look at them to see.

18 MR. SEMPLE: All right.

19 MR. HEROUX: Mr. Mayor.

20 MR. NEVILL: Mr. Heroux.

21 MR. HEROUX: So I just distributed, you know,  
22 Councilman Semple's referring to a document that I had, taken

1 the initiative to prepare back in November. I forwarded out  
2 to everybody Mr. Martino, you have it Ms. Harris has it. I'm  
3 not saying that's the language.

4 MR. NEVILL: Okay. You know, that is a  
5 suggestion, you know, there are certainly smarter folks in  
6 the room, but I think the intent of what you're hearing from  
7 the dais here, I don't want to again speak for everybody but  
8 is -- now that you've heard it, is we go by phase.

9 MR. NEVILL: We all know that noise is an  
10 issue. It's permitted by phase. If it doesn't meet the  
11 noise ordinance, then that phase that came online that pushed  
12 it over the limit, okay? For being out of compliance is shut  
13 down. The applicant can't operate, you know, that part of  
14 the zone or that building and has to remedy it.

15 I mean, they can remedy on their time. I mean,  
16 if it's just going to sit there it's your nickel, right? Is  
17 then -- they'll need time to retest, right? Because if they  
18 want to fix it, you know, they obviously need to test it. We  
19 had to give them that leeway and then it's tested.

20 MR. NEVILL: We have an independent, tester  
21 that as I understand the applicant's willing to agree to pay  
22 for, they bring it back online. We test, let's say it passes,

1 great. Keep it online if it doesn't shut it back down, right?  
2 And that's the pattern as we go through this on the -- on every  
3 phase with the assumption that, at -- you know, at full  
4 capacity, you know it is compliant. Now, you can look beyond  
5 that and say, okay, so what happens when it's at compliance?

6 How do we know it stays in compliance when  
7 you're at capacity, right? And I don't know if that's an  
8 annual test or something like that. I haven't really thought  
9 through that, but, you know, the noise thing you've seen it  
10 we've heard it. I mean, this is a concern of the citizens  
11 because of experiences that they've seen in other locations.  
12 I totally get it. Right?

13 MR. NEVILL: We're talking one data center  
14 here, but it doesn't matter. There's, people live around  
15 this thing. We got to make sure this is addressed and it's  
16 enforceable and that you and I -- the town, not you and I,  
17 the town and Amazon it's a partnership. We agree on this,  
18 right? I would expect that you want to come into this town  
19 and be a good partner, right?

20 MR. SEMPLE: Your expectations are right on.

21 MR. HEROUX: Right. So you know that the  
22 agreement can be reached that it's enforceable. They

1 understand it as least ambiguous as you can.

2 MR. NEVILL: So I don't know if that gives you  
3 the intent of what we're trying to do here. I sent you an  
4 email. It has some language in there. That language was  
5 primarily based. I didn't realize the phases at that time.  
6 So there may be something in there and you can leverage, but  
7 it is an idea. It is not -- it's just Jay thinking at 11  
8 o'clock at night is what it is. That's all it is.

9 MR. SEMPLE: Should we include what you --  
10 data center use and change of control?

11 MR. HEROUX: I'm sorry?

12 MR. SEMPLE: Should we include this idea of  
13 change of control and --

14 MR. HEROUX: Yeah.

15 MR. SEMPLE: And this penalty if they decide  
16 to abandon ship and, go somewhere else or whatever?

17 MR. HEROUX: So that, that is an item.  
18 Certainly if you want to -- I don't -- if you're -- I can  
19 address that now, if you're familiar with the change of  
20 control issue. So the -- and I think it may have been  
21 mitigated, because one of the options or one of the scenarios  
22 is that you operate the data center and let's just say for

1 whatever reason decide to get out of that business, right?

2 MR. NEVILL: And that some other entity,  
3 whether that be the government or a non-profit or any entity  
4 that doesn't pay taxes, okay? Now takes on that building.  
5 Well, now we've lost a tax revenue asset as a town, right?

6 MR. NEVILL: So there was some language that  
7 was proposed here to say, if that that in fact happens that  
8 there's a step down, right? That there's a payment to the  
9 town on your exit from there.

10 Now, when that was thought about in speaking  
11 with the commissioner of the revenue in Fauquier County, there  
12 are provisions that if there is change in control, and let's  
13 say a non-tax paying entity did own the building, but had an  
14 outsourcer, you know, a commercial provider in there  
15 providing services that they're taxed.

16 MR. NEVILL: So I think the change of control  
17 issue is resolved based on, what I heard from Mr. Maybach.  
18 So, I don't think that is an issue based on what I know now.

19 MR. NEVILL: Okay. So we are clear on the  
20 conditions for the noise as presented. We also discussed the  
21 condition upon cessation of operations or abandonment of the  
22 facility. Is that pretty -- I don't think that should be too

1 hard too draft, just to be a sentence or two. And I think  
2 there's again, just regarding remediation of any  
3 environmental impact of, you know, cleaning up the site.

4 MR. REINKE: Yes.

5 MR. NEVILL: Okay.

6 MR. MOONEY: Mr. Mayor.

7 MR. NEVILL: Mr. Mooney.

8 MR. MOONEY: The draft conditions of approval  
9 that's what you just referenced that we're all good with,  
10 right? We just --

11 MR. NEVILL: Yes.

12 MR. MOONEY: Okay. But we were just given  
13 these?

14 MR. HEROUX: They were in your packet.

15 MR. MOONEY: Today?

16 MR. HEROUX: When the agenda went live on I  
17 believe it was Thursday night last week. Yeah. These have  
18 been in existence, Denise, since when?

19 MS. H: November 15th.

20 MR. HEROUX: November 15th. Thank you.

21 MR. SEMPLE: You -- but they haven't been  
22 available to our new members. And my point is that I think

1 out of deference to the fact when I -- when you -- when  
2 Councilman Heroux joined, he asked for a 30-day delay to  
3 review the Central Business District density proposal.

4 MR. NEVILL: That I think that whatever we do  
5 tonight however this is drafted, that we take an additional  
6 30 days not only recognition of our new council persons who  
7 what got their cell phones last Thursday, have an opportunity  
8 to review all this material before they're asked to, make a  
9 decision.

10 MR. HEROUX: Yeah. My concern, Mr. Mayor  
11 there is with regards to Mr. Semple, your statement on the,  
12 CBD deputy chair I agree. I did request for an extension,  
13 only because like several weeks earlier, I had been asked to  
14 serve on the town council.

15 MR. NEVILL: I didn't run for election, I  
16 didn't study the issues. I got a phone call to fill a vacancy.  
17 So that was primarily the reason for that. This the -- these  
18 draft conditions have been available on the town council  
19 website and available with the public since, is it November,  
20 Denise?

21 MS. H: November 15th.

22 MR. HEROUX: Since November. So, the

1 election was when? November 6th?

2 MR. SEMPLE: Yes. But your conditions that  
3 you were proposed in November was not available.

4 MR. HEROUX: No I -- what I'm saying is those  
5 conditions ignore them. If you want throw them away.

6 MR. SEMPLE: No, but they --

7 MR. HEROUX: I'm looking to Ms. Harris to  
8 write the conditions that will -- we will --

9 MR. SEMPLE: Mr. Heroux, what you're looking  
10 for is you're asking these student members of council to  
11 review conditions. They have not been able to review or  
12 assimilate until this -- including me, until today.

13 MR. NEVILL: And I think that there should be  
14 an opportunity for those who are first acquainted with this  
15 entire process to have a chance to 30 days to look at it. And  
16 you're saying that's not a good idea?

17 MR. HEROUX: What I'm saying is ignore --  
18 maybe we're talking past each other. The special use permit  
19 conditions that are in front of us now have been available  
20 since November. Okay.

21 MR. NEVILL: We have given Ms. Harris  
22 direction on sort of the intent of what we would like it to

1 say. I'm relying on her and the team to write that, ignore  
2 my suggestion from months ago. It's irrelevant. Okay.  
3 What I'm asking is this is the -- this document, draft  
4 conditions has been on the website since November. Okay.

5 MR. NEVILL: Work from this and then we're all  
6 going to see the same conditions from Ms. Harris at some point  
7 today when she prepares them.

8 MR. SEMPLE: But there's a difference between  
9 having been elected and having actually joined the council.  
10 And I think that yeah, in your case you didn't run you were  
11 appointed. But it doesn't matter.

12 MR. NEVILL: The fact is that these two  
13 individuals have gotten on the council and they've only just  
14 received their documents. There's a ton of information on  
15 this entire project. And you're asking them to have presumed  
16 -- already presumed to have acted as if they were on the  
17 council and understanding what the complexities are.

18 MR. NEVILL: And I'm just saying it's a  
19 courtesy to them. And the fact that they are new and because  
20 we have, at least until May, and particularly maybe perhaps  
21 next October, they have a chance to be able to look at this  
22 material. I don't see any reason why the council needs to

1 resent this tonight and to vote on it tonight.

2 MR. HEROUX: Mr. Mayor, I believe the  
3 applicant has a right to a decision with no disrespect to my  
4 new colleagues here on the dais. You've been at town halls  
5 on this topic. The information has been out there. Many of  
6 the community organizations have posted all sorts of full  
7 information.

8 MR. NEVILL: There's been the opportunity to  
9 meet with them. I believe it's CFFC that had all the  
10 (inaudible) this information has been out there for months.  
11 Okay, months.

12 MR. SEMPLE: Yes. Mr. Heroux. But what --  
13 show me where the right of the applicant is codified so that  
14 we have to make a decision this evening.

15 MR. HAMBY: I'm not sure what you guys are  
16 actually going round and roundabout. Nobody forced either  
17 of the new members to show up here today, right? No one's  
18 asking them. I don't think anyone's asked them to do  
19 anything, right?

20 MR. MCGUIRE: Mr. Mayor I --

21 MR. NEVILL: Mr. Hamby, have you finished --

22 MR. HAMBY: I'm not asking them to recuse

1 themselves. I'm not asking them to vote. I'm not asking  
2 them to do anything. You -- both of you came here on your  
3 own accord. You can do as you choose.

4 MR. NEVILL: I think, Mr. Semple's asking that  
5 you're not included or you're given more of a delay or you're  
6 given more time or you're given more. Anything else?

7 MR. NEVILL: I don't think anyone's asked,  
8 either of you to forfeit your rights or not be carrying out  
9 your elected duties. I'm just not sure what Bill and Jay are  
10 going back and forth about for you -- maybe you guys can  
11 explain it on your -- I see your fingers on the trigger. You  
12 guys can explain yourselves. I just don't know why you guys  
13 are arguing back and forth.

14 MR. SEMPLE: Well, I'm just concerned that  
15 we're going to vote tonight. And I'm concerned that we're  
16 going to vote under conditions that I feel haven't given all  
17 of us an opportunity to appreciate the complexity and all of  
18 the materials in this proposal. Especially in -- when you  
19 take a look at conditions like this and you start scribbling  
20 changes here from the dais, and then we ship them off and they  
21 come back tonight, and there's been no.

22 And these -- this is one of the most important

1 decisions this council, I think will have made in the last,  
2 at least decade -- two decades, maybe forever, regarding the  
3 future of our town. And I think that it's important that we  
4 get it right. And I feel that the entire council should  
5 deliberate and be part of this process and have a given an  
6 adequate time.

7 I noticed, for example, Mr. Mooney has just  
8 spent hours. I mean, look at him. He's got all these sticky  
9 notes and everything like that trying to get prepared for  
10 this. And this man is probably exhausted, and he is trying  
11 to do his job. But -- and with respect to what Mr. Heroux  
12 has just said, here's a guy who has really shown tremendous  
13 dedication, but he really didn't get oriented to -- he didn't  
14 even go through orientation. He didn't understand what the  
15 scope is of what the job was. He -- I don't even know if he  
16 signed the code of ethics yet.

17 I don't even know if he's been onboarded yet.  
18 And yet, what we're asking him to do is make a decision, you  
19 know, impact the future of the town for decades.

20 And I'm just saying as a courtesy to them, as  
21 well as to us who have not been part of this process, and I  
22 have not been part of this process, that you allow us an

1 opportunity to serve our citizens and represent our  
2 constituents by being part of the deliberative process and  
3 to not be faced with having to make the decision on a day it's  
4 presented.

5                   That's -- we just talked about that this  
6 morning. We were going to now, hopefully, revise our  
7 schedule so that we have organizational meetings on Thursday.  
8 I mean, not organization, I mean, work sessions on Thursday  
9 so that we're given enough time to deliberate.

10                   We're not even asked to give -- I don't think  
11 -- we're not even asked to give four hours to deliberate on  
12 this matter. I just don't -- I think that that's not  
13 appropriate. I don't think it's good judgment. I don't  
14 think it's good government, and I just I'm very upset with  
15 it. And I feel that -- I don't know why the council feels  
16 it needs to proceed. And that's where I'm thinking this is  
17 headed. And if someone can tell me, no, we're not going to  
18 vote tonight, I'll shut up.

19                   MR. HAMBY: And, Bill, I hear you, and I  
20 understand what you're saying. My only point was I think  
21 these two gentlemen should be allowed to speak for themselves.  
22 You're making a case of them voting or not voting, and I don't

1 know -- I'd rather just hear what you both have though. If  
2 that's how you feel --

3 MR. MCGUIRE: Mr. Mayor?

4 MR. HAMBY: -- please speak.

5 MR. NEVILL: Mr. McGuire.

6 MR. MCGUIRE: Sure. Yeah, I understand what  
7 people are saying. Okay. Yes, I ran for an election, I want  
8 to be here, I am here. Okay. I believe in doing your job,  
9 but I think being elected and being in the seat are two  
10 different things. I have not been able to address anyone from  
11 Amazon in an official capacity.

12 That's vitally important. I represent the  
13 town at large. So until I'm able to do so, I cannot do my  
14 job. I cannot get fidelity or ask questions, and get the best  
15 deal for the town. Okay. We have the sound study. You  
16 know, I mean, am I supposed to look at that for the next few  
17 hours before we go and possibly vote on this? I don't think  
18 that's fair. I don't think it's fair to my colleague, Mr.  
19 Mooney, or anything else. I think it's a special case. It's  
20 not your case, it's our case.

21 We've just been onboarded. You know, not even  
22 -- I -- we haven't even signed W-2s and everything else, or

1 signed a code of ethics, but now we're going for possibly to  
2 vote on this. And I am asking for more time. I think it's  
3 fair. I think it's fair to the citizens, fair to me, fair  
4 to my colleague. It's good government. You don't rush the  
5 failure. Okay.

6           And I did run an election, I won it, I'm sitting  
7 in the seat now, and I would expect my colleagues and you,  
8 Mr. Mayor, would respect that, respect that I am elected.  
9 Yes, I could have as citizen talked to him on the sidewalk.  
10 He wouldn't necessarily give me the time of day. But now I'm  
11 in an official capacity. And I think that's fair, that's  
12 open, that's not biased.

13           If you -- and we're all honest here. I believe  
14 everything -- everybody wants to do the right thing. I really  
15 believe that. Okay. So I'm not pointing fingers. I'm  
16 saying give me more time to digest this, to do the right thing.  
17 I think you would agree with that. That's a reasonable --  
18 anybody -- any reasonable person would do that. And so I'm  
19 asking for more time.

20           MR. MOONEY: Mr. Mayor?

21           MR. NEVILL: Mr. Mooney.

22           MR. MOONEY: All right. So I -- I'm just

1 going to say that I appreciate Mr. Hamby saying that we should  
2 speak for ourselves, but I also appreciate Mr. Semple, who's  
3 the only person on council to have reached out to me after  
4 the election and just say congratulations. So I just wanted  
5 to say that there is that so that I appreciate him doing that.

6 My point is that I agree with Mr. McGuire that  
7 we need to act reasonably. And it seems Mr. Heroux and maybe  
8 some others want to push this through, but I have 85,000 emails  
9 in the last three days from the people that I represent as  
10 an at large throughout the whole county that completely  
11 disagree.

12 And whether that's -- they don't have the  
13 information, I don't have the information, we're trying to  
14 rush this through, I haven't been able to have any  
15 distinguished secret meetings with Mr. Reinki to ask him  
16 questions, with Mr. Foote, I haven't had that opportunity.

17 And I too think it's absolutely reasonable to  
18 ask for if not 30, 90 days. This is, in my opinion, and if  
19 you disagree with me, just look at the number of foyer requests  
20 that the clerk gets. It used to be 1 to 3 a month, now it's  
21 1 to 3 an hour. We're not that big of a town.

22 And I think that rushing this today -- I mean,

1 I think that, Mr. Heroux, you said earlier you -- Amazon wants  
2 us to be a good partner, and you agreed you want us to be a  
3 good partner. Well, if the two newest council members  
4 represent the entire town of Warrenton and we're going to be  
5 asked to rush through this without giving the 99 percent of  
6 the emails I get are from my people saying that they're against  
7 it, that's not being a good partner.

8           That's not acting reasonable in a public  
9 participatory process with the people that we represent.  
10 That's like -- he seems like a very nice guy. I just met him.  
11 I'm excited to get lunch and talk to some of these other guys,  
12 but I think it's -- I would ask for 90 days. I mean, that's  
13 three months, and that's less than May.

14           And I have busted my ass to read every document  
15 I could possibly read. Been lugging this thing around, got  
16 this guy. I'm doing everything reasonable to make an  
17 educated vote for the entire town of Warrenton that I  
18 represent, not just my people. And there's new information  
19 today.

20           There's the gentleman that's extremely  
21 knowledgeable in sound. There's things that the only reason  
22 why we have them is because of foyer requests. That's the

1 type of thing that -- you know, Mr. Mayor, you made a comment  
2 to me outside of the WARF when we were at election, like, yes,  
3 Mr. McGuire and I ran unopposed and it's because people were,  
4 you know, dragging you and your name, you know.

5           And it's like talking to a bunch of the  
6 citizens that I represent, we ran unopposed because nobody  
7 wants to deal with this. You know, people want the government  
8 to act for the citizens and be responsible, and I think that  
9 giving -- I don't know what the percentage, I don't know.

10           I can't do math in public. Maureen. Just the  
11 two of us, additional time to continue reading through this  
12 material, to have meetings to talk about things, to ask if  
13 the data center can look like a barn. You know what I mean?

14           We've got an architect back there. He'd  
15 probably love to make it look like a barn with a hayloft and  
16 fake tractors out in the yard, you know, to like make it more  
17 of the green Fauquier county that we all moved here for. So  
18 I agree.

19           I think -- I don't think it's unreasonable to  
20 ask for more time. I think it was granted to one person on  
21 council for a pretty important matter. But I think with  
22 everything that's going on, that -- I think everybody would

1 reasonably agree with me that this could be the most  
2 consequential decision that we're ever going to make.

3           And I don't plan on recusing myself from it.  
4 I want to represent the people that elected me. So that's  
5 what I ask. And I -- I'm kind of -- I really hope we don't  
6 have to vote on that tonight. I don't know why that would  
7 ever be. I would never want Ms. Sutphin to have to vote on  
8 something on her first day. I yield.

9           MS. SUTPHIN: Mr. Mayor?

10          MR. NEVILL: Ms. Sutphin.

11          MS. SUTPHIN: I would have to say as far as --  
12 the one thing that I have to say is I know when I was running,  
13 we had some important things going on. I personally reached  
14 out to each and every one of the council members myself and  
15 met with them.

16               I did ask to meet with one of them and never  
17 heard anything. But you both ran unopposed. There was one  
18 young lady who did run, but was kind of convinced, I believe,  
19 to step down. But there were two of you. There was never  
20 any question if you won.

21               So you didn't really have a campaign to run or  
22 fight for. And I've actually seen both of you at some of the

1 meetings. So to kind of put it out that none of us reached  
2 out to you, well, you didn't reach out to us either because  
3 I would've loved to have met with you. So -- and I did --  
4 I was here the day you were sworn in.

5           So anyway, this is something and -- that's been  
6 very important. And it's been in the news, it's been in the  
7 paper, it's been all over Facebook, it's been all over  
8 everywhere. So unless you just moved in from Italy, you've  
9 heard about it, you've read about it.

10           All of the information -- I had a conversation  
11 with the young lady last night. All of our information is  
12 online. We don't hide anything. So it's all there and we  
13 welcome any questions. Any confusion that you might have  
14 had, would've been good to reach out to the -- your council  
15 members and say, let's get up to speed on this. But I haven't  
16 heard from anybody either.

17           So I just wanted to put that out there. Being  
18 new, I had to get up to speed rather quickly about the comp  
19 plan, and I spent my whole spring breathing over a comp plan  
20 that was, by the way, online, so I got it and read it.

21           But a lot of this stuff, we just have to follow  
22 by our heart, get as much information as we can. And I too

1 am here for my constituents, so -- whom I love, my community  
2 that I'm from. Thank you.

3 MR. MCGUIRE: Mr. Mayor.

4 MR. NEVILL: Mr. McGuire.

5 MR. MCGUIRE: I think that's true. I  
6 understand that. But the bottom line is I'm here and my  
7 colleague's here in official capacity. I'm sitting in the  
8 chair. I need to be respected for that. And this is a  
9 complex, very complex -- we all agree it's a complex issue.

10 I think we all agree we want the best deal if  
11 possible for the town, but I'm here in an official capacity.  
12 And to negate that is wrong. It absolutely is wrong. It's  
13 very discourteous to the people that voted for me and my  
14 colleague and to force this is not right. It's just not  
15 right.

16 You know, we just got -- I got this sound study  
17 just now. I don't know if you all seen it before this, but  
18 it is a complex issue. And I think we do -- we are afforded  
19 more time. I think if you want to be fair, you should do that  
20 because by saying, you know, we're just going to go forward  
21 and you need to be plused up, well, that sends a message.

22 I think we all want to be fair and upfront, and

1 I think you should be fair. You should grant us more time  
2 because then that's the appearance of being fair and honest.  
3 And I do need more time. It's different when you can read  
4 up upon an issue, but until you're sworn in, you have no  
5 capacity to address certain things or to see foyer requests  
6 or see emails that people sent and everything else.

7 It's different when you're sitting in the  
8 chair. And I think -- I would hope you would be fair and you  
9 respect us that we've been elected. That's what I'm asking  
10 for.

11 MR. NEVILL: So what is the will of the body?

12 MR. HAMBY: To what?

13 MR. NEVILL: To --

14 MR. HAMBY: We're in the work session. You  
15 want us to vote on something?

16 MR. NEVILL: No, I mean, I guess at this point,  
17 the request has been put forth to delay the public hearing?  
18 Is that what I'm understanding from the two gentlemen?

19 MR. MCGUIRE: Mr. Mayor? No, I'm not asking  
20 to delay the public hearing right now. That's a possibility,  
21 but I'm saying we need to be -- myself and Mr. Mooney need  
22 to be afforded more time before a vote.

1 MR. NEVILL: Agreed. And I understand that's

2 --

3 MR. MCGUIRE: Yes.

4 MR. NEVILL: -- what I'm asking --

5 MR. MCGUIRE: Okay.

6 MR. NEVILL: -- is that, so your request is to  
7 defer the public hearing to February at the earliest so that  
8 you have the time, is the question --

9 MR. MCGUIRE: Yes, I would -- if Mr. Mooney is  
10 in favor of that, yes.

11 MR. SEMPLE: No, I don't think they're  
12 requesting you defer the public hearing. You can have the  
13 public --

14 MR. MCGUIRE: The vote.

15 MR. SEMPLE: -- but we defer --

16 MR. MCGUIRE: It's vote.

17 MR. SEMPLE: -- the vote.

18 MR. NEVILL: Then that's --

19 MR. MCGUIRE: Yes.

20 MR. NEVILL: -- the will. Then the council  
21 can make that decision.

22 MR. SEMPLE: Yeah.

1 MR. MCGUIRE: Right.

2 MR. NEVILL: So that -- that's what I'm  
3 clarifying. So the --

4 MR. HAMBY: But that -- that's my question  
5 too. Like, all that's tonight. That's while we're sitting  
6 in council, right?

7 MR. MCGUIRE: Right.

8 MR. HAMBY: Here, work session, since 8:00  
9 a.m., we've been working on this. We need to keep working  
10 on this draft or if everybody's happy with the draft, okay.

11 But to me, we need to keep working through the  
12 draft. We still have other stuff on the agenda, so let's --  
13 to me, right? Just my opinion, let's finish work session.  
14 We'll worry about tonight, tonight.

15 MR. MCGUIRE: Well, I think we should continue  
16 to work, but I think we should be afforded more time before  
17 we vote on this. That's the specific question that I'm asking  
18 for.

19 MR. HARTMAN: Mr. Mayor, we're going off the  
20 assumption that Mr. Semple brought up, and a lot of times he's  
21 right, that we're going to vote on this tonight. Nobody said  
22 we're going to vote on this tonight. You might think -- you

1 might feel that it's going down that path, but we're simply  
2 working through questions and issues that all of us have up  
3 here on the dais. Nobody said we're voting on this tonight.

4 I fully respect your request for more time. I  
5 get it. Like Ms. Sutphin said, when I was elected to whatever  
6 years ago, I had a 300-page comp plan thrown in my face. I'd  
7 never seen this thing before. I'd been to a few meetings  
8 about it before and I knew -- I thought I knew what the comp  
9 plan was all about, but I didn't. So I had to catch up. So  
10 you guys are going to have to catch up, and I think you have.

11 You've done a lot of work. I've seen your  
12 sticky notes over there and everything. And as far as the  
13 personal issues of who reached out to who and who didn't and  
14 secret meetings and transparency and all of that BS, I'm tired  
15 of hearing it, for one.

16 So let's move on. I respect your request and  
17 I'm willing to grant that. I think it's the right thing to  
18 do that you need more time.

19 MR. MOONEY: Thank you.

20 MR. HARTMAN: This is your first meeting.

21 Okay?

22 MR. MOONEY: Thank you.

1 MR. HARTMAN: So let's move on. Let's work  
2 through this public -- I mean this work session. If we want  
3 to delay the public hearing, I don't care whether we have it  
4 or we delay it or what we do tonight. At some point, we're  
5 going to have to have a public hearing.

6 So it's already been advertised. We might as  
7 well keep on with that tonight and delay the vote. I'm fine  
8 with that. I think you guys need more time to ask questions.

9 You said you wanted to meet with some of the  
10 Amazon people; am I correct? So yeah, so some of the others  
11 here have, it was termed a secret meeting. Nothing secret  
12 about it.

13 You're going to have one, maybe somebody's  
14 going to say that's a secret meeting. I don't know. I don't  
15 care. I, for one, for the record, have never met with Amazon.  
16 So let's move on. Let's continue the --

17 MR. MCGUIRE: Mr. Mayor, just one last thing.  
18 I appreciate my colleague saying that. I agree. We just  
19 need more time. I'm willing to work on this and do due  
20 diligence. So I appreciate your comments. Thank you, sir.

21 MR. SEMPLE: Just to confirm then, we -- the  
22 will of the majority of the council is that they provided more

1 time?

2 MR. NEVILL: I think the will we've just heard  
3 is that we proceed with the public hearing and determine at  
4 the time; is that correct? Public --

5 MR. HAMBY: So I'd say we need to finish work  
6 session and let's move into nighttime Town Council and take  
7 care of Town Council business at Town Council time.

8 MR. HEROUX: I agree.

9 MR. NEVILL: Okay.

10 MR. HAMBY: Well, not a work session.

11 MR. SEMPLE: I understand it's not work  
12 session, but in these work sessions, we do sometimes arrive  
13 at head nods, we used to call them, where there is some clarity  
14 as to what the process will be and I don't see why. We just  
15 heard from Councilman Vice Mayor Hartman, and there are the  
16 three of us here who think we -- that they should be afforded  
17 more time.

18 And I'd just like to see if there's a head nod.  
19 We -- it's not a -- it is not a vote, but it's an indication  
20 of where we could probably expect, what might happen this  
21 evening.

22 MR. HARTMAN: That's fine with me. And let me

1 just add, you know, I too I sat down this morning and then  
2 this thing was plopped down in front of me. I've never seen  
3 it before, this noise study.

4 I was expecting we were going to go through it  
5 today. It -- it's almost two o'clock, we haven't -- we --  
6 we've touched on it, but we haven't gone through it.

7 And now we're asking that Amazon pay for a  
8 noise study from a company so to speak that we choose and  
9 authorize. So is that something we're going to do today?  
10 That we'll authorized today and talk about at the next work  
11 session?

12 MR. HAMBY: No, these --

13 MR. HARTMAN: Is that --

14 MR. HAMBY: These are all creating a draft of  
15 SUP conditions that the town needs to agree to and Amazon needs  
16 to agree to.

17 MR. HARTMAN: So I got to sit down and read  
18 through 30 some pages of technical data. I've looked through  
19 it, I can comprehend most of it. I've got some questions,  
20 but I would've expected that we would've gone through this  
21 today.

22 MR. MOONEY: Mr. Mayor, may I ask a question?

1 MR. NEVILL: Mr. Mooney.

2 MR. MOONEY: The draft conditions of  
3 approval, is this -- basically, if we all agree on these  
4 conditions and Amazon agrees on these conditions, then it's  
5 a go?

6 MR. HARTMAN: No, you can still vote out.

7 MR. HAMBY: Those are just the conditions for  
8 the SUP.

9 MR. MOONEY: Okay.

10 MR. HAMBY: You can add -- you can delete your  
11 setting conditions.

12 MR. MOONEY: Okay. Thank you.

13 MR. HAMBY: Mr. Mayor, I have a question on  
14 number 11.

15 MR. NEVILL: Okay, Mr. Hamby.

16 MR. HAMBY: Access to the site provided as  
17 shown in the SUV plan. Subject to change is approved by town  
18 consultation with VDOT. Can the town condition -- this may  
19 be a legal question.

20 Can the town condition that that site can never  
21 use Route 17 or Route 29 for access? Will that be always  
22 connected to the SUP? I understand Blackwell Road is their

1 frontage where they want now.

2 MR. REINKE: Yeah.

3 MR. HAMBY: But can the town in these  
4 conditions that always sticks with the SUP, they'll be denied  
5 access to 17 and 29 for eternity?

6 MR. REINKE: I think you could write that into  
7 the conditions assuming the applicant --

8 MR. HAMBY: But, I mean, it's already here.

9 MR. REINKE: Okay.

10 MR. HAMBY: I'm just saying, is that correct  
11 that that's enforceable, that --

12 MR. REINKE: Yes.

13 MR. HAMBY: -- nothing will ever change on  
14 this SUP that -- without them coming back --

15 MR. REINKE: Yes.

16 MR. HAMBY: -- and trying to do something --

17 MR. REINKE: That's right. Exactly right.

18 MR. HAMBY: Okay. Thank you.

19 MR. MCGUIRE: In regards to that question, so  
20 is there only one way in and out of this site?

21 MR. HAMBY: Blackwell Roads proposed,  
22 correct.

1 MR. MCGUIRE: Is that sufficient for safety  
2 for your people and everything else? That's what I'm asking.

3 MR. REINKE: We typically prefer not, but  
4 we're okay with it on this site.

5 MR. MCGUIRE: Okay.

6 MR. SEMPLE: I have one last question. Has  
7 there ever been a data center ever shut down for  
8 non-compliance?

9 MR. REINKE: Not that I'm aware of.

10 MR. SEMPLE: Thank you.

11 MR. HEROUX: Mr. Mayor?

12 MR. NEVILL: Mr. Heroux.

13 MR. HEROUX: Just clarity on Section 13. Ms.  
14 Harris is -- you know, we described the uses of the water,  
15 which, you know, seem right and, you know, it's not going to  
16 use it for cooling. I think we confirmed that today. But,  
17 Mr. Reinke, just confirm -- make sure I'm getting this right.  
18 What I think I did heard is you need a tap and you will tap  
19 into the water system for fire suppression?

20 MR. REINKE: Yes.

21 MR. HEROUX: Okay. So I think we just need to  
22 make that clear here because I could -- one could read this

1 as, you know, outside of all the things that are listed here,  
2 we can't use any, but they do need it for fire suppression.  
3 So if we could just make that clarity on that one, please.

4 MR. NEVILL: Further questions or issues on  
5 the conditions that are set forth in the November 15th?

6 MR. MCGUIRE: Mr. Mayor, just one quick  
7 question. So in terms of fire, I'm not a fireman, but if you  
8 cannot sufficiently suppress the fire, and I know it's a  
9 controlled facility, are you -- you're going to allow the town  
10 to come in?

11 MR. REINKE: Absolutely.

12 MR. MCGUIRE: Okay. But I'm just saying  
13 because there's a security issue from your standpoint.

14 MR. REINKE: Right.

15 MR. MCGUIRE: Okay.

16 MR. HARTMAN: Under number 20, Mr. Mayor,  
17 landscaping would -- I think if you haven't heard it already,  
18 it -- invisible and silent, I think are the two words of the  
19 day.

20 Make this thing silent and invisible. Would  
21 you be willing to increase some of the four season buffering,  
22 particularly where your arrows were earlier where you could

1 see the site from the roadway?

2 MR. REINKE: Actually, generally --

3 MR. HARTMAN: Particularly along Lee Highway  
4 where folks live in the townhouses across the street, if we  
5 could double the amount of evergreens four-season screens so  
6 that in a few years when they mature that those folks aren't  
7 looking at the data center?

8 Years ago, Walmart was going to be the end of  
9 all days in Warrenton. We were just going to build Walmart  
10 and the main street here would dry up and go away and blow  
11 away with the dust. And it was the end of time. We have  
12 Walmart now for 20 years. It's great.

13 Everybody that opposed it shops there, but  
14 they required a four-season screen around Walmart and Home  
15 Depot. Coming in the southern gateway to Warrenton, you  
16 really can't see Home Depot and Walmart after a number of years  
17 because of the requirements of the four-season screen. I'd  
18 like to see the same thing here. I appreciate the architect  
19 and his --

20 MR. REINKE: In --

21 MR. HARTMAN: In the building and, I know you  
22 --

1 MR. REINKE: Yeah, no offense to --

2 MR. HARTMAN: Thank you.

3 MR. REINKE: -- Mr. Mike Halls.

4 MR. HARTMAN: Looks good, but to be honest  
5 with you, if -- and I'm not saying it is approved, you know,  
6 I don't think anybody wants to see it.

7 MR. BREWE: Thank you.

8 MR. REINKE: There we go. And so where are  
9 you thinking ideally? Because what we have -- the --

10 MR. HARTMAN: Right there along Lee Highway.  
11 Go across the street south of where your red dot is.

12 MR. REINKE: Right there.

13 MR. HARTMAN: Well, is a subdivision, number  
14 of homes and --

15 MR. REINKE: And --

16 MR. HARTMAN: Along there where you're --

17 MR. REINKE: I know there's power lines in  
18 there. It's --

19 MR. BREWE: Yeah, there are some existing  
20 easements, but to your point, you know, obviously we're --

21 MR. HARTMAN: All right --

22 MR. BREWE: But -- yeah, so we are increasing

1 the landscaping along the pond area to help screen that. You  
2 have the existing trees that'll save there. There could be  
3 some additional plantings we do in that area. Jay?

4 MR. HARTMAN: If there could be some  
5 additional --

6 MR. BREWE: Yeah, they'll exceed the --

7 MR. HARTMAN: -- four-seasons evergreen?

8 MR. REINKE: If we can do it, we will do it.

9 MR. MOONEY: So evergreen type variety.

10 MR. HARTMAN: We're talking about -- is this  
11 -- we were talking about that sort of gap there?

12 UNIDENTIFIED SPEAKER: Yeah, over here.

13 UNIDENTIFIED SPEAKER: So is that number 20?

14 MR. NEVILL: Yeah, I think he's talking about  
15 this gap right here --

16 MR. HARTMAN: Yeah.

17 MR. NEVILL: -- sort of. Maybe along the  
18 property line or along the fence line.

19 MR. BREWE: Yeah, and the question -- the  
20 reason why we placed those trees between the pond and the  
21 building because the elevation change.

22 MR. HARTMAN: Yeah.

1 MR. BREWE: So that'll get you the most screen  
2 because you push them down low --

3 MR. HARTMAN: Yes.

4 MR. BREWE: -- you're not going to see them,  
5 so that's why we pushed them back into the site.

6 MR. HARTMAN: Yeah, I wouldn't want to ask you  
7 to plant anything where it's useless.

8 MR. BREWE: Yeah.

9 MR. HARTMAN: So as much as can be done to  
10 screen that building from those folks that live across the  
11 street.

12 MR. REINKE: Understood. Absolutely.

13 MR. NEVILL: Further conditions we -- with  
14 request to be worked on?

15 MR. HEROUX: Mr. Mayor, I -- maybe I just have  
16 a question. Ms. Harris, are we giving you good guidance? Is  
17 it helping?

18 MS. HARRIS: This is very helpful. I would  
19 ask if the applicant is able to get us an updated SUP plan.

20 MR. SEMPLE: Mr. Mayor, will we have a chance  
21 to review these conditions and maybe add additional editorial  
22 or comments this evening?

1 MR. NEVILL: That was part of the -- is part  
2 of the legislation process, yes.

3 MR. SEMPLE: Yeah. Uh-huh.

4 MR. NEVILL: Mr. Mooney?

5 MR. MOONEY: What does that mean? That we'll  
6 be able to say things and it'll get changed or...

7 MR. NEVILL: Yes, during the -- or if a motion  
8 is made, conditions can be added and that the draft motion  
9 would include, you know, the motion would be to approve or  
10 deny but to approve with the set conditions to include. And  
11 you can enumerate those conditions at the time. So you have  
12 the ability to add conditions as part of the motion, correct?  
13 Yeah.

14 MR. MOONEY: And thank you

15 MS. HARRIS: Mr. Mayor?

16 MR. NEVILL: Ms. Harris.

17 MS. HARRIS: One other thing that I would add  
18 is there have been a number of commitments made here today,  
19 and I would ask that we ensure that those commitments are  
20 captured in not only the conditions, but the SUP plans, things  
21 like sound walls, the special treatments for the noise. So  
22 we need to make sure everything that is important to council

1 that has been committed to, is actually captured in the  
2 conditions.

3 MR. NEVILL: Okay. So how would you like to  
4 capture that? Is that for any individual members to contact  
5 you through email and say, this is what we -- my condition  
6 needed? So if you have a specific condition that you want  
7 to address, please, make sure that Ms. Harris has that as soon  
8 as possible after the meeting.

9 MR. HARTMAN: So if this is delayed voting on  
10 this tonight, there will be another work session next month?

11 MR. NEVILL: Yes, we could come back to  
12 another work session.

13 MR. HARTMAN: And I know I don't expect all of  
14 you to be here. We'll work on that.

15 MR. NEVILL: Okay. Any further questions for  
16 Mr. Reinke?

17 MR. REINKE: Thank you.

18 MR. NEVILL: Thank you for your time this  
19 morning. Bring us next to item on the agenda. Let's roll  
20 out Warrenton.

21 MR. CASSIDY: Hi. Good afternoon. Frank  
22 Cassidy, public works utilities director. Happy New Year.

1 Congratulations new council members and Mayor Nevill.

2 This is to bring us up to date on the  
3 RollOutWarrenton program and trying to create and lay the  
4 framework for a permanent program. Moving from a temporary  
5 program into a permanent program. Okay.

6 We all know what the RollOutWarrenton was --  
7 began as a town-wide initiative, developed to assist all  
8 businesses as they're coming through the pandemic, as an  
9 economic incentive to create an environment that encouraged  
10 all kinds of creative use and temporary uses for businesses  
11 to compete and stay in business during the pandemic.

12 Over the years, the program has proved  
13 successful and it is in line with your 2040 plan, although  
14 not in the slides here. It hits on several main factions of  
15 your 2040 plan, especially your economic and fiscal  
16 resilience goals, all of them, land use and character  
17 districts, as well as your community facilities goals, and  
18 even your open space parks and environmental goals in your  
19 2040 plan.

20 But the goal of the program itself is to  
21 provide these opportunities and provide extra signage, as  
22 well as enhance the sense of community as we move forward.

1 Background. Started in May in 2020, moved  
2 through the system. I'm going to fast forward here right to  
3 where we're at today because the last meeting was December  
4 13th the 2022, where initial set the framework to say that  
5 we need to move this program into a more permanent structure.  
6 Being as a pandemic is behind us, we have proven that it was  
7 a successful program that businesses in the community seem  
8 to like it.

9 So now it's time to tighten it up and try to  
10 make this program, again, permanent. We have met on December  
11 22nd with EOTW. The president as well as the chairperson for  
12 EOTW, discussed strategies, went over our framework for this.  
13 Been working with this with our risk manager, Michael Potter,  
14 as well as staff to try to put this together with the staff  
15 recommendations. And this is where we're at.

16 These staff recommendations are based upon  
17 trying to create a consistent, predictable as well as a fair  
18 system for any business town-wide to take part in this program  
19 as we move forward. It's actually been called a parklet  
20 program. Parklets are actually one aspect of this.

21 This is more of a public use of a right-of-way  
22 program or a public space leasing program, if you will,

1 because the parklet is almost secondary as to where they're  
2 placing them. They're -- they are using our space town owned  
3 property right-of-ways for the extension of their business.  
4 So even though we refer to it as a parklet program, just as  
5 we go through the general requirements, I'd like you to keep  
6 that in mind that it's a lot more than just a parklet.

7           If that means that after this program, if they  
8 sign up for the program, they don't necessarily need to put  
9 a parklet in that space. They could use that space for  
10 however they deem most profitable for their business as long  
11 as it complies with these general requirements.

12           So looking at the general requirements, again,  
13 there is a minimum requirement for the use of the public space.  
14 Any installation of any of these accessory structures would  
15 have to meet the criteria that are set forth through the  
16 parklet program guide. And you should have a copy of the  
17 guide in with your -- with the agenda items that has been  
18 updated, again, with the assistance of EOTW and risk  
19 management.

20           Why is risk management an important aspect of  
21 this? Because of ADA requirements as well as insurance.  
22 Again, this is our property, so that anything that we put in

1 our right-of-ways or we authorize to be happening on our  
2 streets or our right-of-ways, we do share some liability with.  
3 So we have to be careful on that.

4 Any space requested along First Street or  
5 Second Street must also comply with maximum space  
6 requirements as outlined in the guide for the two spaces.

7 Why did we do this? Again, to try to work on  
8 an equitable approach so that, whoever, regardless of what  
9 street they might be cornering on, it's just not a carte  
10 blanche or they could use the entire space. It was an attempt  
11 for us to try to understand or identify ways to try to keep  
12 this somewhat contained, and again, equitable as we go  
13 forward.

14 The effective dates. Based upon prior  
15 successes of this program, and again, you know, weather aside,  
16 we have found that the most effective dates on this go from  
17 about April 1 till November 2nd. November 2nd, yes, it's not  
18 an entire month, but that would be a target date and it would  
19 provide some flexibility on there as we move through to maybe  
20 continue it to Thanksgiving.

21 But we didn't want to tighten it up right to  
22 Thanksgiving. We needed to try to give us a buffer. Why

1 those dates? For the most part, by the time April comes along  
2 where we're past our snow seasons, weather starting to warm  
3 up, etc.

4           And then as we get into November, that's when  
5 we have, the leaves starting to fall, crowds start to wane,  
6 and then we have to start thinking about snow and snow removal,  
7 and cleaning these spaces up as we go there. So that's where  
8 those dates and times came from. As we look at the effective  
9 dates, that's how we got there with those effective dates.

10 Let's see.

11           Responsibilities, requirements for use.  
12 This would be their space, similar to a lease, a rental space.  
13 That means that whoever, whatever business entity would rent  
14 this space from us, they're required to maintain it. We have  
15 been spending an awful lot of time, energy, and town resources  
16 maintaining these spaces, even though we, in essence the --  
17 that they were our space, but we are taking care of them for  
18 the most part.

19           We need to start shifting some of that  
20 responsibility to take some pressure off of our town staff,  
21 free them up to do other things. Again, the whole gist of  
22 this is for the town to provide the opportunity so this can

1 continue. Those who want to take advantage of it, can take  
2 advantage of it.

3 This is -- if they don't want it, they don't  
4 -- you're not required to have it. But the town is going to  
5 provide that opportunity for businesses to take advantage of  
6 this. So they have to maintain their insurance on it. They  
7 have to show us that they have proof of insurance.

8 They have to keep it clean. If it doesn't meet  
9 the standards that the town sets based upon the guides or the  
10 overall aesthetics and continuity of the district of which  
11 it's in, then we would have the right to have that ceased.  
12 That lease would cease and they would have to move things out  
13 of our right-of-way.

14 Big issues here are ADA and safety. Okay? I  
15 will be the first one to tell you that the ADA and safety were  
16 not 100 percent compliant with the past programs when we set  
17 these up. We took advantage of some of the lax of rules and  
18 regulations in order to make this work.

19 As a permanent program and because those  
20 emergency provisions are no longer in effect, we have to make  
21 sure that we tighten these up. So the -- we -- if we start  
22 this permanent program, it has to make sure that we meet all

1 those requirements.

2           That's everything as far as access off curbs  
3 to the space between the curb side to the parklets. I don't  
4 know if you remember, we tightened ours up right to the curb  
5 so you could get direct access to it. That was part of that  
6 ADA accessibility. If they don't have access to those  
7 parklets and they're putting those parklets out, they could  
8 -- that could be a violation of an ADA structure.

9           We also have to make sure that if there's any  
10 alcohol served out there, that they meet all the requirements  
11 of the alcohol license that is issued to that business. That  
12 means it has to be contingent to the business, it has to be  
13 clearly marked, identified, it has to be roped off in essence  
14 to show where that space is, and it has to be included in the  
15 application form as well as the requirement, as well as safety  
16 issues.

17           We have to make sure that whatever is placed  
18 in those right-of-ways have the proper reflectors for traffic  
19 as well as it ensures the safety of the pedestrians that are  
20 in those spaces.

21           Design criteria for parklets is pretty much  
22 straightforward. Again, you're going to hear this

1 repetitively, you're going to read it competitively in that  
2 guide. They must meet the structural integrity to provide  
3 safety, ADA, as well as that buffering for pedestrians.

4           We have to make sure that if we put these things  
5 out -- there was one reason -- even though some people  
6 commented that it were ugly and there was too much wood used,  
7 there's a reason why we use that much wood on those is because  
8 we beefed them up to the point to try to protect the safety  
9 of those -- of the pedestrians that would be sitting in them  
10 from an automobile.

11           The speed limit was lowered on Main Street to  
12 also absorb some of that impact, if you will, as long as they  
13 comply with the speed limit, and you move through on those.  
14 Fortunately, we only had some minor incidents where we had  
15 contact with our parklets. And our parklets and the whiskey  
16 barrels combined, did a nice job. But I am telling you that  
17 the whiskey barrels are not identified as a -- as an authorized  
18 bollard system or anything that should be there for traffic.

19           So we have to take that in consideration as we  
20 move that forward. That's something that we are probably  
21 going to have to work closely with the businesses to make sure  
22 that we get there on that one. And again, I'll go back to

1 how this whole program started. It was a collaboration,  
2 right between the town and the businesses to make it work.  
3 There's going to be a certain amount of flexibility and  
4 continued collaboration and experimentation in this as we  
5 move forward, even as it becomes a permanent program. So  
6 that's the design criteria, and it's all outlined in that  
7 program guide.

8           We will also put together a permit process, but  
9 we are working with community development. They already have  
10 the system that they could come through with a basic general  
11 building permit system. This would be in essence a  
12 right-of-way lease agreement type permit. With the required  
13 information, they would come in, you apply for a permit, and  
14 we either issue it, deny it, or we provide input and we try  
15 to get it there.

16           We do function through community development  
17 as a -- we find ways to try to make things work, not to  
18 immediately say no to something. So if it comes in, it's not  
19 meeting that criteria, we'll work with that applicant to see  
20 how we can make it work as we move through that. You'll see  
21 the bullet points there, the applicant's name, contact  
22 information, insurance, etc, proof of requirements and all

1 required fees.

2 Right. Next one, proposed fee structure.

3 This was a little bit of a structure -- struggle because again,  
4 we're trying to be fair and equitable. How do we do this?

5 If we compare this with other jurisdictions, we had to be  
6 careful because jurisdictions like Arlington or Alexandria,  
7 they're in the thousands of dollars per month for this kind  
8 of a program. Leesburg as well, has very high.

9 So how -- where did we land? We actually  
10 landed on a dollar 20 per square feet per month. That is about  
11 half of the going commercial rate out there for any kind of  
12 leased commercial space. So in looking at this, we know where  
13 our minds, where we're looking at. This is an extension of  
14 your commercial space. You're going to use it for a  
15 commercial. It should be treated as a commercial rental type  
16 space.

17 But because it's public space and we want to  
18 try to encourage it. We don't want to charge the full rate.  
19 So about half sounded very equitable and that was agreed to  
20 by the EOTW staff.

21 They said it sounded pretty reasonable. And  
22 if you think about it -- if you look at our parking structures

1 and the design criteria, if you're looking at a parking space  
2 that's about 20 feet by 8, that's 160 square feet. And you  
3 do the math, that's about what, \$10 a month? I'm just  
4 kidding. \$120 times the 160 square feet.

5           And that would be the monthly rental fee for  
6 this, or the lease fee for this. We also have an agreement  
7 form that they'd have to sign and it would be month to month.  
8 Or they could do it seasonally, however they want to do it  
9 seasonally would be April one through the end of the period  
10 in November.

11           All right. Additional requirements for the  
12 road closures. Road closures kind of took on different  
13 experiments, through the process. I will say that the town  
14 seemed to take the lead on a lot of these road closures. And  
15 that was met with some success, and that was also met with  
16 some criticism.

17           But in essence in looking at the whole program,  
18 and in talking to the businesses and the EOTW. We felt that  
19 the road closures should actually come from them. If the  
20 businesses didn't want the roads closed then why are we  
21 closing the roads? The -- if they wanted it to be on every  
22 Friday instance, for example then there should be an

1 application process for this. So, in short, we're looking  
2 at these road closures as a special event permit request.

3 And that special event request can be every  
4 Friday. It could be every Thursday and Friday. It could be  
5 the weekends it would come in through an application, just  
6 like they are now for special events. We'd review it and then  
7 we'd process that through. But that would be driven by the  
8 businesses.

9 Some of the concerns that were given to us from  
10 the business was actually when First Fridays rolled around.  
11 We had concerns that by having -- just as an example, by having  
12 the streets closed every Thursday and Friday, the actual first  
13 Friday event lost some of the excitement. It lost some of  
14 that attraction. It wasn't as special anymore.

15 So there was actually concerns that there were  
16 just too many street closures. It just it kind of lost its  
17 excitement. So this was another part of that thought process  
18 going in there.

19 Not to mention town staff, now town staff was  
20 out there every Thursday -- I mean, I'm sorry, every Friday  
21 and every Saturday. We were out there every morning, we're  
22 cleaning things up. Yes, we went to the magnetic Ballards.

1 And I think those were very successful.

2                   We were very closely with the police  
3 department. We came up with all kinds of creative ways to  
4 do it, to try to save money and staff. But in short, it did  
5 take police staff, and it took public work staff to make that  
6 work twice a week, every week as we moved through.

7                   Not to mention, every time that you close the  
8 street, we have to worry about street cleaning and extra trash  
9 cleanup because it's like a special event. So those were the  
10 considerations that we're taking in for the road closures.  
11 The Second Street, Second Street became an interesting  
12 conversation as we are going through.

13                   I think, that this was, it needs to be  
14 discussed a little bit more while we're looking at Second  
15 Street. There's no doubt that that was successful for the  
16 business that is adjacent to Second Street. But we -- it came  
17 to our attention very quickly that there's three new  
18 businesses now on Second Street that were not there when these  
19 street -- when that street was closed originally.

20                   There's another business that's getting ready  
21 to open up -- forgive me, I forget the name of the restaurant  
22 that's going in there where CBs used to be. But they're

1 working hard to get that restaurant back open. When CBS was  
2 functioning, they did not want Second Street closed. It  
3 wasn't until they in essence, went out of business that they  
4 said, we don't object to Second Street being closed anymore.

5 Right now, we are being told that there is more  
6 opposition to closing Second Street in total than there is  
7 to keeping it open. I'm hearing a lot of positives of keeping  
8 it open. The benefits to closing Second Street is it gives  
9 us another pedestrian way.

10 And I'll get to First Street in a minute,  
11 because First Street I think, is turning out to be a very  
12 successful experiment. But it gives another pedestrian way,  
13 gives another access point. The real challenge with Second  
14 Street is that darn slope.

15 The restaurant, the Molly's that was using  
16 that did a very good job of being innovative and taking those  
17 in there. But if you're looking at the safety concerns that  
18 we had down there, some of those benches had a steep drop.  
19 If you're sitting on the wrong side of one of those picnic  
20 benches and you went over the wrong way you had a long way  
21 to go.

22 So the -- we did our best. Long story short,

1 at this point, we're recommending that if you want to close  
2 Second Street, we keep close during the duration of this  
3 project. Much like we did before, close it during the  
4 duration, and then you can -- we can authorize the rental of  
5 that space in line with all the other manuals, etc. But also  
6 work towards a plan to better redesign Second Street.

7           If the overall intent is to keep Second Street  
8 closed on a permanent basis, is our opinion that that street  
9 has to be redesigned for ADA accessibility. I believe the  
10 mayor and I were talking one night out there the actual look  
11 of that and everything would be like a tiered structure as  
12 you go through, take that slope out of it and make it more  
13 of a gradual start creating some of those level spaces in there  
14 so you could use it better.

15           That's a heck of a project that obviously would  
16 cost a lot of money to do. So that's where we're at with  
17 Second Street. At this point, we are being asked and I was  
18 asked to put in a staff report to keep Second Street Open.

19           Now, First Street again has been a -- I think  
20 it's been a very successful experiment to this. It's  
21 becoming a rather nice public space. We are getting a lot  
22 of compliments from the farmer's market, the winter market

1 as well as people are that are being used over here, just  
2 having a cup of coffee. They give them a general space to  
3 sit down without the pressures of anything. They're just  
4 sitting there using it as their space, that community space.  
5 And it's providing that nice pedestrian access.

6 We do have some short-term plans that were  
7 coming in on First Street, in line with the concept drawing  
8 that we have for First Street. And working these into the  
9 current budget that we have. So -- and I think that's  
10 important. The current budget that we have doesn't allow us  
11 to redesign First Street, but we are able to do some things.  
12 We're going to seal coat the pavement.

13 We're working very closely with Parks and Rec.  
14 Try to bring in some tick 10 tac-toe ground games and some  
15 other passive recreational activities to that space. Again,  
16 the farmer's market has complimented us because that's now  
17 a place where the kids, when they're coming here with their  
18 families, they could have their safe space. While the  
19 farmer's market is going and outdoor gazebo with some seating  
20 give you a -- get a little bit of a reef structure with some  
21 shade, various benches.

22 We're going to have plans to bring out some

1 more benches of picnic tables. The whiskey barrel planters  
2 will start having some string lighting with some additional  
3 lighting because it is dark over there. We recognize that  
4 we do have to lighten it up.

5                   And you'll see, even for tonight's meeting,  
6 we're going to have some temporary lighting out there just  
7 to provide some safety provisions over there. And then some  
8 additional wayfinding signs.

9                   Specifically put a nicer wayfinding sign up  
10 here on Main Street or First Street, similar to the one that  
11 we have down at First Street as you're coming up. That is  
12 all working within what we have available to us to continue  
13 that concept of that community space that are on First Street.

14                   So that is where we're at with this. Our next  
15 step was basically get feedback, ask questions, take your  
16 concerns and come back to you next month with a complete  
17 program. As setting it up. So I stand here for questions.

18                   MR. NEVILL: Questions from Mr. Cassidy? You  
19 can go. Ms. Sutphin?

20                   MS. SUTPHIN: (Inaudible).

21                   MR. CASSIDY: Yeah. I know. I do feel it.

22                   MR. MOONEY: I do feel it.

1 MR. CASSIDY: (Inaudible).

2 MR. MOONEY: Yeah, watch your finger. Thank  
3 you. I just -- I have a few questions. Signing like a  
4 liability when each one of them decides to embark on this  
5 adventure of renting this excellent space out do they sign  
6 like a -- like releasing the town of all liability?

7 MR. CASSIDY: Yes. It's part of the  
8 agreement. And forgive me if I glazed over some of it. The  
9 actual program guide as well as these provisions are something  
10 that we had in place last year, a year and a half ago, as we're  
11 trying to move into a forward notion on this. So there's  
12 already agreement that we have them signed. That does do  
13 that. But yeah, asking the attorney, that only goes so far  
14 with liability, right?

15 This your signature, we still have to worry  
16 about insurance. No offense. You still have to make sure  
17 that you have the insurance documents and things like that,  
18 but yes, it is an agreement with some release of liability  
19 as well as an agreement that they know that that's their space  
20 to take care of now. It's almost like a rental lease. It's  
21 --

22 MR. MOONEY: Sure. Okay. I was just

1 wondering. I think it's -- I like what you guys did last year.  
2 That was great. I could actually go on dates, so thank you.  
3 And I know it's a lot of your idea. I'm pushing it, so I really  
4 appreciate it.

5 MR. CASSIDY: Who said that?

6 MR. MOONEY: You never admit it.

7 MR. CASSIDY: It was everybody's idea?

8 MR. MOONEY: You'll never admit it but thank  
9 you.

10 MR. MOONEY: How -- you said you've gotten a  
11 lot of input from all the businesses in town. Was there any  
12 opposition to it or?

13 MR. CASSIDY: Sure.

14 MR. MOONEY: There was.

15 MR. CASSIDY: Yeah.

16 MR. MOONEY: And is that --

17 MR. CASSIDY: That all came factored into how  
18 we got here with these staff recommendations. I -- and I  
19 think the experiment on this. I don't -- I'm convinced that  
20 you're only ever going to get to about a 50/50 mix on whatever  
21 happens out there.

22 And correct me if I'm wrong, but that seems to

1 be where it landed no matter what we did. We're renting out  
2 parking spaces, which means somebody's going to be mad that  
3 we're taking up a parking space. We're closing the street,  
4 which means somebody's going to get mad that they can't drive  
5 or sit down the street.

6 So in the other side of the coin, they're happy  
7 that they're doing. So it really is a 50/50 mix. But again,  
8 that's the idea of this program is we're trying to push this.  
9 So what we're saying is the town's giving you the opportunity.  
10 Okay.

11 We've shown different ideas of how it worked,  
12 and a lot of them were phenomenal. I remember coming out  
13 there, holy smokes, it was just a great community feel. The  
14 atmosphere was wonderful. We tried to capture that. But --  
15 so we want to try to continue to push that opportunity, but  
16 yet if we don't have that buy-in, if we don't have it from  
17 the actual participants then we're just going to be out there  
18 closing the street.

19 MR. MOONEY: Okay. My next question is, can  
20 one restaurant rent all of the parking spots?

21 MR. CASSIDY: No.

22 MR. MOONEY: Or is there a limit?

1 MR. CASSIDY: Yeah, there's a limit based on  
2 the Park Lake guide. It has to be directly -- because of their  
3 alcohol license as well and their insurance. Is really the  
4 driving force on this. It has to be adjacent to or contingent  
5 to their business. So it's either has to be in front of them  
6 or directly aside of them.

7 And what we're doing is we're saying that you  
8 get one parking space to start with. Because that's really  
9 how these are lined up, right? If you look at the businesses,  
10 that's how it went. If you look at the Ellie's, there's one  
11 parking space in front of it. So you -- that parking space.

12 So again, out of equity, how do you -- if you  
13 have the opportunity to get more, then let's transfer that  
14 another parking space. So we're trying to keep it, that's  
15 another reason why our original park lists were eight by eight  
16 because we're trying to stay consistent with the size so that  
17 you could rent an eight by eight section, two of them made  
18 a parking space, right?

19 So that's how it all came together. So it's  
20 one parking space. So you get one if you want a second one,  
21 then there's provisions in there. You have to get the  
22 adjacent property owner's permission to do so to expand as

1 well as the town. And if you want to go to the side, so you  
2 get one in the front and one of the side, you have to apply  
3 for an additional one on that through the town.

4 MR. MOONEY: Okay. And then, so you said it's  
5 the same process as your wonderful permit process?

6 MR. CASSIDY: Pretty much, yeah.

7 MR. MOONEY: That is excellent. Okay.  
8 That's good. And then the way finding signs, do we -- is that  
9 going to list -- can you tell me about that?

10 MR. CASSIDY: If you notice someone back here  
11 it's just as you're coming up on First Street, that's what  
12 it is. Just kind of has arrows it says Welcome to -- what  
13 does it say? First Street Plaza. I always get it straight  
14 First Street or Town Hall Plaza. It says Town Hall Plaza.  
15 It says arrows restaurants this way, food that way.

16 So we'll put one here. You know town Hall  
17 Plaza. This one -- we're going to try to make it a little  
18 fancier because it's the gateway off of Main Street.

19 The original plan had like an arch and all that  
20 kind of stuff. But it basically says it's a map system. This  
21 one also has a blank section on the bottom where we're trying  
22 to get some kind of an interactive map placed in there. It

1 says you are here and here's where all your restaurants are  
2 as we move forward. But wayfinding signs really, if you want  
3 to go restaurants here and stuff.

4 MR. MOONEY: I like that. Yeah, that's what  
5 I was going to ask. If there's some interactive way, because  
6 we do have a large source of revenue from the restaurants and  
7 stuff.

8 If there's some way, like I've got a lot of  
9 friends who are moving here and they kind of just roll right  
10 through and they don't have like an interactive map that can  
11 tell them where they can buy stuff to all different  
12 restaurants. There's new restaurants. I mean, it's  
13 awesome. But I just was wondering if that was also in the  
14 plan.

15 MR. CASSIDY: That's also working close with  
16 EOTW on, so, yeah.

17 MR. NEVILL: What is that? Ms. Sutphin.

18 MS. SUTPHIN: First of all, thank you for all  
19 of your hard work, because I know this is -- I mean, it's hard.  
20 I know you and Tommy both work really hard on it. And it's  
21 thankless because no matter what there's somebody who doesn't  
22 like the idea. Oh yeah. He thinks too, I think too.

1                   But a lot of times you vote on one thing, it  
2 makes this group really, really happy and excited. And this  
3 group not so much, but you've done a great job with that. And  
4 I'm excited that we're going to continue it this coming  
5 spring. Are we -- and this is, and I'm sorry if I missed  
6 something, but this area through here, is it going to keep  
7 open after April or is Denim and Pearl going to be able to  
8 open up this side like they --

9                   MR. CASSIDY: Yes.

10                  MS. SUTPHIN: -- have in the past? If they  
11 want to, if they want to continue with that.

12                  MR. CASSIDY: If it goes with the program  
13 guide, that's before you as directed. Then Denim and Burp  
14 -- wow. Denim and Pearls will be able to go in front and then  
15 they'll have the opportunity to one more size of that 20 by  
16 8 on the side. So --

17                  MS. SUTPHIN: So just the one on the front and  
18 the one on the side?

19                  MR. CASSIDY: That's correct. But you would  
20 not be anywhere near the amount of space that they had for  
21 the last two years.

22                  MS. SUTPHIN: That's a lot.

1 MR. CASSIDY: That was an agreement with EOTW  
2 because of that public space idea. And the way this is being  
3 used now as more of a public space.

4 Again, equity. How do you get there? So the  
5 challenge with that space would have to meet again. Say it  
6 again. ADA Insurance, etc. But it would not be that big.  
7 They'd have the opportunity to Mr. Mooney's point for an  
8 additional 20 by 8 section.

9 MS. SUTPHIN: Okay. And then the streamed  
10 lights, I like that idea. I think that would be really  
11 pretty. I've spent a little bit of time going through some  
12 of the -- we get a lot of e-mails from towns and cities and  
13 all this other stuff. So I really appreciate all the work  
14 that you put into trying to think outside of the box and think  
15 of different ideas. So thank you.

16 MR. CASSIDY: Thank you.

17 MR. NEVILL: Just to clarify, so as you said,  
18 if an adjoining property granted them access. So if  
19 Gentleman Pearls were to go to their neighbor on Main Street  
20 and request access for that space, they could then lease that  
21 space as well?

22 MR. CASSIDY: That's correct. I think the

1 best example of that one is Sunny Hills. Sunny Hills actually  
2 had two -- I think two and a half parking spaces that they  
3 took up. And how did they get that? Is because they got the  
4 permission from those neighboring businesses. It wasn't  
5 right in front of them. So it's that same concept. Like I  
6 said, it's the same concept we're trying to carry through that  
7 we implemented the last couple years.

8           Just tightening it up. I think the biggest  
9 change here is your fee structure and the businesses have a  
10 responsibility for not the town. We're not building their  
11 parklets for them anymore. We don't have the resources to  
12 do that any longer, those (inaudible) the life. And then they  
13 must maintain them the way they are and then restricting those  
14 sizes a little bit out of equity. And again, we're using the  
15 size of parking spaces as that guide.

16           MR. NEVILL: And so what we're looking at,  
17 this would be an adoption of an ordinance in the February  
18 meeting; is that correct or is this?

19           MR. CASSIDY: Yeah, we'll try to get -- I'm  
20 surprised Joel's not here. I tried to reach out to her.

21           MR. NEVILL: (Inaudible) that feedback.

22           UNIDENTIFIED SPEAKER: Councilman Hamby.

1 Councilman Hamby your mic.

2 MR. HAMBY: Last time we tried April and we  
3 were too late. So they wanted March, and I know we can't  
4 please everybody, but --

5 MR. CASSIDY: Understand.

6 MR. HAMBY: -- a couple wars up there on Main  
7 Street.

8 MR. CASSIDY: But EOTW -- not to interrupt,  
9 but EOTW was with us on this, and they went over those dates.  
10 The real challenge with March is snow. All right. We still  
11 get and you all know better than I'm still getting acclimated  
12 to this but you're -- you have some snow events in March that  
13 can sneak up on you.

14 MR. HAMBY: So ETOW was involved and ETOW is  
15 okay with the presentation you just gave?

16 MR. CASSIDY: That is correct. And I'll look  
17 to deputy town manager, Tommy Keon. He was in the meetings  
18 with EOTW and there's an e-mail in your package that outlines  
19 what we discussed that I incorporated in our staff report  
20 based upon their feedback. So that staff report that I  
21 provided is not just us, that is the EOTW input.

22 MR. CURETON: And if I may just briefly,

1 excuse me, to Frank's point, we met with EOTW on that December  
2 22nd date. At that time, we said, hey, can you please go out  
3 scan your merchants, get their feedback as it relates to here  
4 the draft options for how this program will look.

5 We asked to have that information back one week  
6 later. I think the following Tuesday, we got a lengthy e-mail  
7 from Joel and EOTW outlining their support for the initiative.  
8 And then again, to Frank's point, that's been identified in  
9 your packet of information.

10 MR. MARTINO: So, Mr. Mayor, to your question  
11 you could take this up this evening. I believe it only  
12 requires a resolution for us to move forward with the program,  
13 or we can bring it back in February. Your call.

14 MR. NEVILL: Okay. Does counsel wish to  
15 bring it up this evening or is there desire to?

16 MR. HEROUX: Mr. Mayor, I just have a question  
17 to answer that question. I just want to make sure I  
18 understand from the -- what it was to what it is and the impact  
19 to the business owner. Before -- well, let me say what it  
20 is. From what I just heard you say, Frank is in this program,  
21 they now have to rent the space. They didn't have to do that  
22 before.

1 MR. CASSIDY: Correct.

2 MR. HEROUX: Is that correct?

3 MR. CASSIDY: Correct.

4 MR. HEROUX: Okay. They now have to buy a  
5 parklet. They didn't have to do that before.

6 MR. CASSIDY: That's correct.

7 MR. HEROUX: Okay. They have to provide  
8 liability insurance for the space they're renting. They  
9 didn't have to do that before?

10 MR. CASSIDY: No, they had to do that before.

11 MR. HEROUX: Okay. That cost was already  
12 baked in. And then they have to maintain the parklet, which  
13 they didn't have to do before?

14 MR. CASSIDY: That's correct.

15 MR. HEROUX: Maybe it was sort of partnership  
16 you guys were --

17 MR. CASSIDY: The maintaining we're just  
18 going to get a little bit better at pushing on it a little  
19 bit. Because we -- I again, we're just moving through taking  
20 care of it, where now they're going to have to be required.

21 For the most part, they were maintaining their  
22 spaces, pretty well on their own. So I don't want to give

1 the impression that we were -- you know, they were just all  
2 a mess because they weren't. This -- so the -- yes, you're  
3 hitting on the two big difference.

4           The two big differences is some kind of a  
5 monthly fee or, you know, whatever you all decide is seasonal,  
6 monthly. And then they have to provide their own whatever.  
7 Okay. That's what I'm saying cautionary, it's not  
8 necessarily a parklet program.

9           The parklet is something that we're allowing  
10 them to put in the space. They can just rent the space and  
11 do something on their own. You don't necessarily need a  
12 parklet in there. Is the parklet -- yes. The parklets a  
13 better way to go, looks better, etc. But -- yeah. It was  
14 pretty much a town was supplying the soup to nuts for the last  
15 couple years.

16           MR. HEROUX: And your sense, I guess from  
17 speaking to the rollout folks and the vendors is that, or you  
18 know, restaurants and so forth that expense they were, I mean,  
19 is -- are they comfortable with that? And here's where I'm  
20 going with that. We hit these restaurants pretty hard when  
21 a meal's tax, right?

22           That obviously everyone in the town pays. I

1 mean, that's our predominant source of revenue in this town,  
2 right? Is meals tax. That hits the bottom line of the  
3 restaurant because impacts prices. So are they okay with --  
4 look, you're now have to put about \$1,300 out over seven months  
5 for rental. You have to expense a parklet of whatever size  
6 and shape you're going to make it. I mean, are these numbers  
7 adding up to them, I guess is my concern.

8 MR. CURETON: It is our understanding that  
9 EOTW and Joel had that conversation because that was --  
10 basically they received a very similar presentation the EOTW  
11 did to this presentation that you all are seeing today. And  
12 that they did understand that there was a financial impact,  
13 if you will, as it relates to the rental of -- or the leasing  
14 of that, right of way space along with having to provide the  
15 funding to go towards the parklet itself.

16 It's much like in any other community space  
17 that you would have or a right of way space. And the  
18 comparison I often make is to a park. For example, we have  
19 a soccer shots program that is an outside vendor who comes  
20 in and rents space within the park to offer, you know, their  
21 business.

22 They charge a registration fee to the

1 participants, etc. Much like they charge for a meal. And  
2 so it really aligns conveniently with how we are already  
3 operating in other areas within the town. It's just now it's  
4 more focused towards the right of way of Main Street or I mean,  
5 as we've talked about previously, any business in town can  
6 have a parklet. It doesn't just have to be here on Main  
7 Street. I think at some points maybe, and Eli Agave may have  
8 had a parklet at one point. I can recall in the first year  
9 of the program.

10 MR. HEROUX: But your sense is that they  
11 understood the expense?

12 MR. CURETON: That is our sense based upon the  
13 conversations we had with EOTW.

14 MR. HEROUX: Okay. I'm just a little  
15 sensitive. I mean, we need these guys. I mean, read the  
16 budget, right? Meals tax and to just pinch them a little bit  
17 more. I just want to make sure that they're on board with  
18 that and understand and they see the business benefit of it.

19 That a \$1,300 investment to rent space equates  
20 to five times earnings or whatever. They can see the business  
21 case on that. I mean, it seems like a reasonable -- I mean,  
22 this is public land. I mean, you know, we're releasing it

1 back. All that seems -- I just want to make sure that the  
2 businesses themselves can absorb this expense and they're  
3 comfortable with it.

4 MR. CASSIDY: Thank you. I mean, you asked a  
5 couple loaded questions there we don't know. Obviously, it  
6 might be one of these things that we don't know until, they  
7 start figuring it out. But again, to Mr. Curetons' point,  
8 this is not just a restaurant thing.

9 We had several businesses taking advantage of  
10 it that were not restaurants. And again, trying to build that  
11 equity in there. And then we also still have some businesses  
12 out there because they're on private property, that really  
13 these provisions are just letting them continue. There's a  
14 couple restaurants that are still out there. The -- we didn't  
15 have to roll up, their parklets because they weren't on public  
16 land, right? So there's still some out there taking  
17 advantage of it.

18 MR. HEROUX: Yeah, I know, I get. I mean it  
19 is a great idea. It's -- I mean, it's such a positive  
20 difference in the town. I just loved it. But, you know, I  
21 may just to reiterate, when it comes to these restaurants in  
22 any of these business on Main Street, especially the

1 restaurants.

2                   They carry the freight here in this town,  
3 right? Meals tax, I mean, 38 percent is fast food and the  
4 balances is sit down. So I just want to make sure that they  
5 understand what they're getting into. It's a positive thing  
6 for them. It's not going to crush them on the bottom line  
7 too much. And they see a benefit to it.

8                   MR. CASSIDY: And we're trying. Yes, of  
9 course. That's part of that consideration.

10                   MR. SEMPLE: (Inaudible).

11                   MR. NEVILL: Mr. Cassidy is -- oh, I'm sorry.

12                   MR. SEMPLE: I have a question.

13                   MR. NEVILL: Go ahead.

14                   MR. SEMPLE: Oh, thank you. First of all, I  
15 want to tell you how I impressed I am by the substance and  
16 thoroughness of your presentation. You've obviously spent  
17 a lot of time and with EOTW thinking through a lot of these  
18 issues. I'm just interested in the design aspects. I think  
19 one of the problems we had with the previous is some people  
20 equated them, as you said, to -- I don't know, cattle

21                   MR. CASSIDY: Well, and that was actually the  
22 design. That was -- how we were going after it.

1 MR. SEMPLE: I know. I mean, that is that  
2 there was a sentiment that it wasn't particularly  
3 artistically pleasing or whatnot. And so I'm just wondering,  
4 going to design patterns what flexibility there is. Because  
5 you talk about engineered materials and things like that.

6 I think one of the advantages is that I think,  
7 owners will try to be a little more creative in their spaces  
8 so that maybe perhaps consistent with their business or what  
9 not. What type of flexibility do you see? I mean, are we  
10 going to be actually seeing a little bit more inventive type  
11 of parklet as we look forward?

12 MR. CASSIDY: Well, I mean, again, that's --  
13 yes. I mean, it's to both of these points. The -- our  
14 parklet guy was based upon what we had put together and  
15 assembled. And that's -- that to us was the least expensive  
16 option to try to put something together.

17 It met the requirements of ADA, it met the  
18 requirements of the sturdiness. Yes. Did we, yeah, look  
19 like a horse barn or something. But I mean, it is horse  
20 country right? And that was part of that design that went  
21 into that. But that's what I mean by 50/50, right.

22 Some people loved them, some people didn't.

1 Of course we'd like to see the creativity out there with the  
2 caution that the -- so the design guys just one option if they  
3 go out and purchase one of these and some of these could be  
4 expensive.

5                   We are looking at some park that designs that  
6 were upwards of 30, \$40,000, right? Yeah. I don't think  
7 we're going to see those show up because that could be  
8 counterproductive. That's cost prohibitive. But yes, the  
9 -- we are encouraging people to be creative with, as long as  
10 you meet those basic guidelines and it works in your business  
11 model.

12                   The caution to that is we can't have a neon or  
13 something that clashes with the overall character. So we  
14 have to be careful. And we tried to build those provisions  
15 in here without being too subjective, that it really has to  
16 make sure that we're meeting the character idea of what --  
17 and I'll use Main Street should look like. So it's not just  
18 a hodgepodge of I don't know, sticks and bricks. So yeah,  
19 I mean, there has to be some design criteria. Is there some  
20 subjectivity issue?

21                   I mean, we're all human, but we're going to try  
22 to work with him to try to make it so it captures that character

1 of old Main Street. The other spots where they're a little  
2 less restrictive because again, they're on private property  
3 and they're more open. Does that help?

4 MR. SEMPLE: Well, I have one other question.  
5 I think we have a smart scale or some type of grant pending  
6 with VDOT to do some work on Main Street.

7 MR. CASSIDY: Yes.

8 MR. SEMPLE: And my concern is that if it's a  
9 fairly heavy investment and that work begins, will that change  
10 or modify the requirements under this program?

11 MR. CASSIDY: Our plan and what we're talking  
12 about as we move forward with Main Street is to try to reopen  
13 some more of those creative discussions on what you all and  
14 what the town wants Main Street to look like. I think the  
15 overall concept is to build this program into a more permanent  
16 part of the overall design so that it's part of it. And that  
17 would be our goal as we move forward with any Main Street  
18 design.

19 MR. NEVILL: And -- I think just to follow up  
20 on that, when we look at the revenue sharing program, which  
21 still has to be worked out and goes to my recommendation of  
22 having a joint transportation committee with the county to

1 hopefully find revenue sharing opportunities for tourism.

2           And economic development, we look at that and  
3 there's definitely bump outs and there's opportunities to  
4 extend the sidewalk which would -- we still may have the least  
5 opportunity there. But it would, instead of having to build  
6 a parklet, instead of having to have that investment to create  
7 that corral, if the sidewalk were extended, it would just be  
8 stanchions and tables at that point.

9           So over time, this could become more cost  
10 favorable to the businesses as we incorporate this into our  
11 design plans for that revenue sharing product when it comes.

12           MR. HARTMAN: And this keeps Second Street  
13 open; is that right? Is it --

14           MR. CASSIDY: As it is, yes. I mean, that  
15 would be our recommendation is do not close Second Street.  
16 Again, based upon the feedback ---

17           MR. HARTMAN: With the new businesses and the  
18 restaurants, I wouldn't want to restrict access to that.

19           MR. CASSIDY: And again, I can't stress it  
20 enough. We could be flexible. I mean, we -- I -- that's the  
21 beauty of this whole program. I mean, how many times did we  
22 come back just in the past year --

1 MR. HARTMAN: Just wanted to make sure I was  
2 clear on this.

3 MR. CASSIDY: -- or try that.

4 MR. HARTMAN: Okay. Mr. Semple gets on me all  
5 the time because I don't talk enough and that's because I try  
6 to keep my foot out of my mouth. But I was going to ask a  
7 design question. You asked it, so thank you.

8 MR. CASSIDY: There you go.

9 MR. HARTMAN: Mr. Mooney asked two questions  
10 earlier and I thought he had my notepad over there. But so  
11 I didn't have anything to say, but you brought it up and I  
12 just want to go on record saying that I'm strongly opposed  
13 to -- there will be no snow in March.

14 MR. CASSIDY: Yes.

15 MR. HARTMAN: So thank you.

16 MR. CASSIDY: But believe me, I think I'm the  
17 only one out there, polar works, that wants a little snow.  
18 But we've had a couple false alarms. It's a -- it's rather  
19 disappointing.

20 MR. NEVILL: Mr. Mooney.

21 MR. MOONEY: Mr. Mayor, I being new, I would  
22 like, I take their word for it. I would like to go talk to

1 some of the businesses. Do we have a list of people that are  
2 forwarded or against it? I don't know if that delays the vote  
3 or if that's silly, but I would like to talk.

4 MR. HARTMAN: If I may. I mean, you should  
5 probably contact EOTW. Talk to them. They have a list and  
6 they can tell you who they talk to and who they have and help  
7 you. They're tremendous resources, if you haven't already.

8 MR. MOONEY: I haven't. I just got the e-mail  
9 from Steven. But is that something that we're just going to  
10 vote on this thing tonight? Is that what we're asking?

11 MR. NEVILL: That's the question I'm asking  
12 council, as if we could add it to the agenda and vote on it  
13 tonight if preferred, if you'd rather delay. I think one of  
14 the messages that the merchants do want to know is affirmation  
15 as to the start date of this.

16 So they can start their planning and have an  
17 understanding. That was the feedback we got from them last  
18 year, was that the longer it took for us to make up our minds,  
19 the more that they were put up against the wall having to make  
20 their decisions. So the request from the businesses, I think  
21 is to have this determined and decided so that they can plan  
22 for it. But it is up to council as to whether or not it goes

1 tonight or goes.

2 MR. HEROUX: Mr. Mayor, I would suggest that  
3 we vote on it tonight for that very reason. Businesses need  
4 to monitor their cash flow. They need to figure out whether  
5 they make this money and do the revenue estimate.

6 Sooner we can let them know the better they can  
7 plan and they can make that decision if they want to  
8 participate or not, because it's voluntary for them to do.  
9 So I think the sooner we can let them know, the better they  
10 can plan.

11 MR. NEVILL: Thank you.

12 MR. MCGUIRE: I had just one question. Mr.  
13 Mayor, how many in favor do you think you'll be planning for?

14 MR. CASSIDY: How many what? I'm sorry.

15 MR. MCGUIRE: How many parklets will you have  
16 you think?

17 MR. CASSIDY: I'll be completely honest with  
18 you because we're not supplying everything. I don't  
19 anticipate as many as we've had before. So I would estimate  
20 right off the bat, one, two, I'd say five, maybe six business  
21 will take an advantage of it.

22 MR. MCGUIRE: Okay. But thinking as they go.

1 MR. CASSIDY: And I think I'm high. Yes.

2 MR. MCGUIRE: Okay.

3 MR. CASSIDY: Just based upon --

4 MR. MCGUIRE: Okay.

5 MR. CASSIDY: -- the programming.

6 MR. MCGUIRE: Yeah, I agree, Mr. Mayor, we  
7 should vote on it.

8 MR. NEVILL: Okay. We'll add that to the end  
9 tonight. Just for clarification for the new members. The  
10 town took the initiative in the past parklets were brought  
11 up in discussion, I think in 2016. And it was sort of  
12 conditionally approved to say that they could be done.

13 But again, the cost of doing such would be  
14 borne by the businesses themselves. No businesses took up  
15 the opportunity. And then during the pandemic in an effort  
16 to adapt to the shutdowns and closures. We sort of fast  
17 tracked this rollout process using CARES Act funding, to find  
18 a cost efficient very creative solution in building these and  
19 providing them for their businesses. And so it was a courtesy  
20 of economic development use of CARES Act funding. But it was  
21 always clear that these would have an end of life span.

22 We got an extra two years out of them. And so

1 businesses have been aware that eventually the cost of these  
2 would be borne by them as their business plan. And the good  
3 news is as a test trial, they were able to see the benefits.  
4 And I think it was -- they were overwhelmed by how successful  
5 they were.

6           And I think to Councilman Heroux point, they  
7 pay for themselves. I think that there's no doubt that they  
8 have made a complete business change in what they can do. And  
9 as far as the meals tax, I think just a reminder, that's a  
10 trust tax. So that doesn't impact their bottom line.

11           So they hold that in trust and that is  
12 something that does not come out of their bottom line. So  
13 I think the general increase in revenue, having that extra  
14 space and going to the equitable approach. One of the  
15 concerns we hear from a lot of people is, you know, well,  
16 that's my property as a town resident. And you're just kind  
17 of giving it to them to profit off of. And I think this is  
18 a way to tell the taxpayers that, you know, we're not just  
19 handing this over for their use, you are getting a benefit  
20 back on this. That it is fair and equitable to the town tax  
21 payer.

22           MR. CASSIDY: And if I may, just on those

1 lines, and to your point that you -- believe me a buck 20 a  
2 square foot is not recovering the town's cost on this, right?  
3 For administrative fees and monitoring safety and additional  
4 trash and all that. So it's just there.

5 And also, a couple of the businesses did take  
6 advantage of the parklets that we had out there. We provided  
7 them the opportunity that we disassembled them and they could  
8 take them. So they did. So you might see some of those  
9 models pop back up out there if they could they -- you'd have  
10 to refreshen them up the wood replace some pieces and parts.

11 But we did make that an offer also last year  
12 as we were telling them, this is the end of life of these.  
13 So there should be no surprise on what's -- how this is being  
14 rolled out. No pun intended, like how I did that. Yeah.

15 MR. NEVILL: All right. So we'll add this to  
16 the agenda for this evening.

17 MR. CASSIDY: This evening?

18 MR. NEVILL: Yeah. Thank you Mr. Cassidy.

19 MR. CASSIDY: Thank you.

20 MR. NEVILL: Next up is scheduling a special  
21 meeting for the town manager recruitment. We're nearing the  
22 phase where we have, I think over 50 applicants right now.

1 Baker Till is in the process of whittling that down. We  
2 should soon have a packet of resumes for individual council  
3 members to come in and review. Can come in individually or  
4 on two on twos. And review the applicants to whittle it down  
5 to a final pool that we will interview. And so this is setting  
6 a date for a special meeting to have those closed session  
7 interviews, correct?

8 MR. MARTINO: That's correct. Mr. Mayor and  
9 Ms. Braun is -- has been the lead on this, as you know. She  
10 has some family commitments today that had come up.

11 MR. NEVILL: Yes, sir.

12 MR. MARTINO: But though a special meeting  
13 would be for the week of February 6th for the first round of  
14 interviews. These would be virtual interviews with the let's  
15 say the top tier candidates. And then a second special  
16 meeting for the week of February 20th.

17 And this would be for your final candidate.  
18 So if you start with six and you whittle it down at three.  
19 And then hopefully after the -- your second in-person final  
20 interviews, you're in a position to make an offer and  
21 negotiate and hire. So that's the item before you and for  
22 your consideration today.

1 MR. NEVILL: Okay. So it's the week of  
2 February 6th, then if we send out a sort of a doodle poll or  
3 something and we can get consensus of when counsel can meet  
4 for that special meeting?

5 MR. MARTINO: That's one way we can handle it.  
6 Yes.

7 MR. NEVILL: Okay. So be on the lookout for  
8 that e-mail, respond as quickly as possible so we can set that  
9 date and have it advertised and announced.

10 MR. MCGUIRE: Okay. And then Mr. Mayor,  
11 who's part of the interview process then?

12 MR. NEVILL: Council.

13 MR. MCGUIRE: Okay. Thank you.

14 MR. NEVILL: Agenda review.

15 MR. MARTINO: Thank you. So we have some  
16 proclamations for the council to take up and recognize some  
17 former council members. We do need to confirm -- actually  
18 I don't believe the Planning Commissioners will be available  
19 this evening.

20 But going to ask Mr. Cloud to follow up with  
21 folks. So that'll be for Councilman Ronald Carlos, Kevin  
22 Carter and Sean Pollster. All who have stepped down from the

1 council at this point. And then you have Citizen's Time.

2 And -- what was the last county I guess you have about 30 folks  
3 signed up for Citizen's Time at this point.

4 And then there was some discussion earlier  
5 about the whether the Vice Mayor vote would be in consent or  
6 a new business. I think that's going to go into a new business  
7 if I heard that correctly.

8 MR. NEVILL: That's correct.

9 MR. MARTINO: Okay. So I got ahead of myself  
10 there. The public hearings first will be to budget  
11 appropriate \$5 million of debt proceeds that you have already  
12 borrowed for the water and sewer capital projects. And  
13 75,000 for the debt service on that borrowing.

14 So you recall there was a work session that Mr.  
15 Cassidy and Mr. Friend had with you back in December, really  
16 went through the nitty gritty of water and wastewater  
17 treatment facilities and systems. And laid out the priority  
18 of the projects that need to be taken care of. And so this  
19 will actually budget appropriate for those specific projects  
20 that you've been briefed on.

21 And the debt service, as I mentioned, the first  
22 debt service payment on that borrowing. Also to budget

1 appropriate the 458,000 for the Timber Fence Trail Capital  
2 project. We have some grant money that has -- is available  
3 to us and some county participation. The capital project  
4 that was adopted in the last CIP only appropriated the town  
5 share of that funding. And this will appropriate the  
6 remainder of funding necessary for that capital project. And  
7 then, of course, is the SUP 2203, the Amazon Data Center that  
8 you spent in the morning discussing.

9           And a couple of issues that I think you need  
10 to address at this point is if you're going to hold the public  
11 hearing or not. You can defer the entire public hearing and  
12 decision. You can open the public hearing and then continue  
13 it to a later date. February meeting, you can open and close  
14 the public hearing, but take no vote. And you can obviously  
15 open, close, and then also vote on the item. So I ask that  
16 for some -- from direction on that because if we're going to  
17 continue the public hearing into February, we would look for  
18 another location. We did not have time to do that for today's  
19 meeting.

20           The schools did not come back into session  
21 until January 3rd, we needed to advertise by December 28th,  
22 and so the logistics just did not make that possible.

1 However, we've made preliminary arrangements for a different  
2 location if you are going to continue or conduct the entire  
3 public hearing in February. So that's something that I would  
4 ask for some council guidance on at this point in time.

5 MR. HEROUX: Mr. Mayor.

6 MR. NEVILL: Mr. Heroux.

7 MR. HEROUX: If we don't vote tonight -- if it  
8 goes on, and we have to go to that scenario of another  
9 facility, a larger facility?

10 MR. MARTINO: Yes, sir. We had preliminary  
11 arrangements with the -- at the Fauquier High School.

12 MR. HEROUX: Okay.

13 MR. MARTINO: In their Falcon room where the  
14 school board has their meetings.

15 MR. HEROUX: Okay. Does that room have the  
16 ability to broadcast meetings?

17 MR. MARTINO: I believe so.

18 UNIDENTIFIED SPEAKER: Yes, sir.

19 UNIDENTIFIED SPEAKER: Wait for the mic to  
20 come on. There you go.

21 UNIDENTIFIED SPEAKER: Yes sir, it does.

22 MR. HEROUX: Okay. I think that's just

1 important because we have a lot of thousands of citizens  
2 coming in from commuting and they probably want to hear it.

3 MR. NEVILL: (Inaudible) public hearing and  
4 defer the vote until (inaudible) February (inaudible).

5 UNIDENTIFIED SPEAKER: Mr. Mayor your mic.

6 MR. NEVILL: So in the event that the --  
7 tonight we go through the public hearing and close and opt  
8 to defer the vote, the public hearing will be closed, there'll  
9 be no more speakers. We feel that the need for the larger  
10 venue to accommodate speakers would be necessary.

11 MR. MARTINO: I would say so as a  
12 precautionary, or contingency, or anticipating, those folks  
13 would still share their thoughts and comments with you during  
14 Citizens Time.

15 MR. NEVILL: So to pay -- to play it safe,  
16 should we just assume to make a contingency plan to hold it  
17 at offsite regardless of the outcome tonight, we can just --

18 MR. MARTINO: Yes, sir.

19 MR. NEVILL: -- hold an offsite meeting. And  
20 you know if it's on the agenda, it's on the agenda. If it's  
21 not on the agenda, we're on vacation at another location.

22 MR. MARTINO: Yeah. And that would work.

1 And --

2 MR. NEVILL: Okay. Let's play it if -- Ms.  
3 Rebel(ph).

4 MR. MCGUIRE: Mr. Mayor, I think we should  
5 leave the public hearing open tonight, but we should also  
6 continue it to next month. Because I think that's in what  
7 the Vice Mayor said giving us more time. And also I look at  
8 the capacity. I don't think there's going to be enough  
9 people, they're going to be able to be heard tonight. I think  
10 it's -- we're all agreeing with in terms of fairness. So.

11 MR. MOONEY: I would --

12 MR. NEVILL: Okay. Mr. Mooney.

13 MR. MOONEY: Yes, I would also agree, Mr.  
14 Mayor. Just -- I mean, if we -- if we're looking to close  
15 it tonight, I don't know how many speakers there are, I just  
16 know how many emails I've gotten.

17 And we could -- I don't know if how late we're  
18 going to be here, or how late people want to be here, or if  
19 it just ends, or if you just say the meetings end. I don't  
20 know how that works, but it would make sense to keep it open  
21 so that people don't feel like they had --

22 MR. NEVILL: Council has that option.

1 MR. MOONEY: Okay.

2 MR. NEVILL: Okay.

3 MR. MARTINO: Okay. On the consent agenda,  
4 we have the calendar for the regular meetings which I believe  
5 you agreed to adopt. And the rollout warrant and item that  
6 you were just briefed on, and the new business is the Vice  
7 Mayor item. And then just for -- and I'm just trying -- manage  
8 this time, certainly want to commend Denise and Rob for the  
9 tremendous work they've taken on in bringing -- ushering the  
10 whole Amazon SUP forward.

11 But the organizational items also, one of the  
12 items as you go through your council handbook that you want  
13 to take a look at and update as you see fit is to adopt biennial  
14 goals. And these are very important because you have a 2040  
15 plan, which is a 24 -- a 20-year document, and then you have  
16 an annual -- the six-year CIP and an annual budget.

17 And staff needs some prioritization of how to  
18 get from 20 years out to what do you want to do tomorrow. And  
19 this biennial goal that your handbook calls for is a  
20 magnificent tool for you to give that clear direction to the  
21 town manager and staff.

22 And it coincides with your elections every two

1 years, so it's -- I think it works hand in glove with the  
2 timeline that you have before you. So I just bring that to  
3 your attention to consider and suggest that a very good time  
4 to begin to -- aside from next month's meeting on the 14th,  
5 to begin to really hash out how you're going to prioritize  
6 the many, good and important projects would be at your fiscal  
7 retreat that you've scheduled for February 18th.

8 MR. NEVILL: Okay. And I think to your point  
9 in your email you identified that adopting this biennial plan  
10 along with the budget is a good synchronized time to do so.

11 MR. MARTINO: Yes, sir. And that's your  
12 meeting for this evening.

13 MR. NEVILL: All right. Mr. Vice Mayor, do  
14 you have a motion?

15 MR. HARTMAN: Yes, sir. Mr. Mayor. Thank  
16 you Mr. Martino. Thank you. Mr. Mayor, I move the council  
17 convene in close session to discuss as permitted by Virginia  
18 Code 2.2-371188, consultation with legal counsel regarding  
19 specific legal matters requiring the provision...

20 [CLOSED SESSION]

21 MR. NEVILL: 3:08. We will read back into  
22 session and affirm the closed session. Turn to the Vice Mayor

1 for the motion.

2 MR. HARTMAN: Mr. Mayor, I move that the  
3 council certify that in the closed session just concluded  
4 nothing was discussed except the matters or matter -- the  
5 matter or matters. One specifically identified in the motion  
6 to convene in closed session and two lawfully permitted to  
7 be discussed in closed session under the provisions of the  
8 Virginia Freedom of Information Act is cited in that motion.

9 MR. NEVILL: So move by Vice Mayor Hartman,  
10 second by Councilman Hamby. Discussion on the motion we'll  
11 affirm via roll call vote. I will start to my right.  
12 Councilman Mooney.

13 MR. MOONEY: Aye.

14 MR. NEVILL: Councilwoman Sutphin.

15 MS. SUTPHIN: Aye.

16 MR. NEVILL: Councilman Semple.

17 MR. SEMPLE: Aye.

18 MR. NEVILL: Councilman Hamby?

19 MR. HAMBY: Aye.

20 MR. NEVILL: Vice Mayor Hartman.

21 MR. HARTMAN: Aye.

22 MR. NEVILL: Councilman Heroux?

1  
2  
3  
4  
5  
6  
7  
8

TOWN OF WARRENTON

January 10, 2023

TOWN COUNCIL WORK SESSION

File: January 10, 2023 PM Town Council Regular Meeting.mp4

1 P R O C E E D I N G S

2 TOWN CLERK: We are all set when you are Mr.  
3 Mayor.

4 MR. NEVILL: 6:30 p.m. on Tuesday, January  
5 10th. I will call this Town Council meeting of the Town of  
6 Warrenton to order. All members are present. We may conduct  
7 business as a full quorum. Our first order of business is  
8 the invocation. We have the Reverend Wallace Smith from the  
9 police department to please. Let's bow our heads, please  
10 rise.

11 REVEREND WALLACE: Heavenly Father Lord we  
12 are grateful to live in a country, in a town where we can meet  
13 peacefully and have a say so in how we are governed. Father,  
14 we thank you for that freedom and we pray tonight's meeting  
15 will go peacefully.

16 MR. NEVILL: We pray Lord, that it will be  
17 civil and we also pray Lord that there will be unity in the  
18 outcome. We also pray a blessing on our town officials, our  
19 council, that serve us unselfishly and give their time Father.  
20 So thank you Lord. We pray for wisdom tonight and pray for  
21 a great outcome. And we ask this in Jesus' name. Amen.  
22 Please remain standing. We'll turn to the flag and reflect

1 the pledge.

2 COUNCIL: Pledge allegiance to the flag of the  
3 United States of America and to the republic for which stands,  
4 one nation under God, indivisible, with liberty and justice  
5 for all.

6 MR. NEVILL: Okay, this brings us to Citizens  
7 Time where members of the audience are willing -- are able  
8 to speak on matters of importance to them regarding issues  
9 to the town of Warrenton.

10 A reminder that this is a time to speak on  
11 issues, not on the public hearing this evening. So any of  
12 the three issues tonight on the public hearing, if you're  
13 speaking specifically to that issue, please reserve your  
14 comments for that. Individuals are limited to three minutes.  
15 There is a timer on the dais.

16 The light will be green when it turns yellow.  
17 You have 30 seconds. We ask that you please conclude your  
18 comments at that time.

19 At that we have a lot of speakers to get through  
20 this evening and in deferent to all of them, we ask that you  
21 please conclude your statements and we will gavel you out at  
22 that time so that the next speaker can have the floor at that

1 time.

2                   When you come to the dais, please -- or the  
3 lectern, please state your name and your address and at this  
4 point I will turn it over to the town clerk.

5                   TOWN CLERK: Mr. Mayor, our first speaker  
6 tonight is Eric Gagnon. Our next speaker will be Mark Smith  
7 and Lee Owsley. I ask that the second and third speaker  
8 please come up and line up in front of the table here.

9                   MR. NEVILL: And just -- we'll also ask that  
10 you please refrain from applause or any other commentary  
11 Following again in deference to all the speakers who are here  
12 this evening. In order that everyone may be heard faithfully  
13 and dutifully, we please ask that we keep a civil decorum in  
14 this room.

15                   TOWN CLERK: So our first speaker will be Mark  
16 Smith, followed by Lee Owsley, followed by David Richardson.  
17 Mark Smith are you here?

18                   MR. SMITH: Yes.

19                   TOWN CLERK: If you'd come down please sir.

20 (Inaudible)

21                   MR. SMITH: Sorry I couldn't get you back  
22 there.

1 TOWN CLERK: Understood.

2 MR. SMITH: Mark Smith, 232, Northview Cir  
3 Warrenton, Virginia 20186. Mr. Mayor, with all due respect,  
4 I would like to quote you from the Fauquier times June 29th,  
5 2022, when they interviewed you and Renard Carlos about the  
6 mayoral campaign.

7 You said he looks -- you look forward to  
8 continuing to make Warrenton a go-to destination of day  
9 trippers and vacationers. I would like to see 20 years from  
10 now that the actions we have taken have put the town on the  
11 right trajectory to revive prosperity to residents and  
12 businesses alike.

13 A boutique, hotel and a historic building  
14 would help Warrenton continue to thrive. So would adding a  
15 day spa or entertainment space in the former town hall  
16 building behind the district courthouse. I grew up in this  
17 town. While it has grown in my lifetime, it has never lost  
18 its small town character.

19 Said -- he says the credit for that goes to  
20 residents. Our greatest success belongs to our residents,  
21 our jobs is to create an environment where opportunity for  
22 success exists. Trying to connect that to why we're even here

1 at this point.

2 I would like to make a few more comments along  
3 the same line. Paul Mooney, welcome. He said, it is the  
4 distinct honor and privilege of him and his wife Kelly, who  
5 was raised in Warrenton, Virginia to serve the residents of  
6 this wonderful town and community.

7 David McGuire, new to this, the primary  
8 responsibility of a town council member is to listen and to  
9 be a voice for the citizens, to have integrity in all his  
10 actions, both public and private, putting the citizens in the  
11 town first and everything he will do as a council member.

12 Mr. Semple credits much of their success and  
13 happiness to the safe environment Warrenton provided. As a  
14 consequence, Bill and Sally share an avid commitment to  
15 preserving the Warrenton they love.

16 James Hartman. He enjoys living in Warrenton  
17 and working to preserve the unique character and charm of our  
18 small town and the quality of life. Brett Hamley, it is his  
19 distinct honor to serve and to continue to serve the residents  
20 of Ward 3.

21 Jay Heroux and Heather don't at all in their  
22 profile, refer anything to preservation the community, which

1 is fine. Acknowledging your public pronouncements of this  
2 town, I would ask a couple of things. One that you do not  
3 vote this evening, but put this off until this gets reconciled  
4 in a respectful and thorough manner.

5 I would ask you to go home tonight and ask your  
6 God --

7 MR. NEVILL: Thank you, sir.

8 MR. SMITH: -- for wisdom and courage to shut  
9 this down. Thank you.

10 TOWN CLERK: Lee Owsley. David Richardson,  
11 Lee Owsley on deck. David Richardson.

12 MS. AMSTER: Hi, I'm Barbara Amster speaking  
13 in David Richardson's place. We are switching places  
14 tonight. We're reading parts one and two of a letter.

15 The data center or no data center seems to  
16 hinge on council member Heather Sutphin who as districts one's  
17 rep should be opposing it. We have reasoned, pleaded and  
18 gently petitioned, but she hasn't changed her mind in all this  
19 time. I'd like to share this letter, which was sent to  
20 Heather Sutphin and really should be known to all of us.

21 Thank you for meeting with me yesterday  
22 afternoon. I have several questions and concerns. You

1 painted a dire picture of Warrenton's financial health saying  
2 the town of Warrenton cannot continue like this financially  
3 and described it as being an emergency situation.

4 I went back and looked at the recording of the  
5 Warrenton town council meeting on 12/13/22, where audit  
6 company Brown Edwards presented the 22 Audit results. The  
7 recording shows that you had left the meeting before the  
8 presentation, but during that briefing, Brown Edwards gave  
9 a very positive financial report.

10 General funds, the unassigned funds balance  
11 over the past several years has been seven to nine months.  
12 A good rule of thumb is no less than two months. The budget  
13 in 2021 and 22 actual revenue was higher than a budgeted. In  
14 22 the town revenue was five percent higher than expected.

15 Actual expenditures were lower than budgeted  
16 for 2022 expenditures were 15 percent below budget. Cash  
17 equivalents compared to current liabilities were very  
18 favorable and the ratios were flat and comparable to the  
19 previous year.

20 There seems to be a huge disconnect between the  
21 state of the town's finances that you were describing during  
22 our meeting yesterday and the description that Brown Edwards

1 was given just a couple of weeks ago. Could you please tell  
2 us why that is?

3           You also described a high turnover for police  
4 and mentioned that just to bring the town police up to par  
5 would require an eight percent increase in taxes. I own a  
6 townhouse in Warrenton and my town property taxes are \$127.  
7 So an eight percent increase would be about \$10 for an average  
8 single family home, \$20 to \$25.

9           You also mentioned that the law team said the  
10 council can't just say they don't want a data center there.  
11 You have to have a reason such as safety, health, noise,  
12 otherwise you will get into a lot of trouble. You've heard  
13 hours and hours of testimony on this, but among arguments  
14 against it's indirect conflict with the Warrenton 2040  
15 comprehensive plan, it ruins the gateway to Warrenton, visual  
16 impacts, noise impacts, health impacts, construction  
17 impacts, decreased property value, increasing the need for  
18 high voltage power lines.

19           MR. NEVILL: Thank you Ms. Amster.

20           MS. AMSTER: And I'll have to stop --

21           MS. SUTPHIN: And when did we meet? When did  
22 we meet? You never met with me.

1 MR. NEVILL: The council woman is out of  
2 order.

3 MS. SUTPHIN: No, you never met with the me.

4 MR. NEVILL: The council woman is out of  
5 order. Please.

6 MS. SUTPHIN: (Inaudible).

7 MR. NEVILL: The council woman is out of  
8 order, please.

9 MR. RICHARDSON: All right. I am David  
10 Richardson. I live at 726 Acorn Court. Continuing with the  
11 letter. You mentioned the Dominion power lines are coming  
12 anyway, even if the data center is not improved -- approved.  
13 That's not what Dominion says. They've said several times  
14 that no data center, no more power lines.

15 In fact, there's no need to add any more power  
16 to Warrenton in the foreseeable future if the data center is  
17 not built. Anyway, the more data centers are approved, the  
18 greater need for power. The two areas in the country --  
19 county that already have them are Vint Hill and Remington.  
20 They have lots of power there.

21 There's a easy alternative for Amazon, just  
22 build it where there already are, where they've already had

1 this problem. Let's see. You stated that if the project is  
2 approved and the noise levels are too high, Amazon won't open.

3 Put it in writing. We deserve to see it. We  
4 deserve to have time to look at it before anything is done.  
5 Put it in writing. It's not a deal without writing. So  
6 there's no -- okay. The time to ensure that the noise levels  
7 are not too high is now prior to the site plan approval and  
8 certainly not built in operation. It includes mitigation  
9 efforts, etc.

10 And finally the most concerning is the fact you  
11 told me we met by Amazon by Zoom this morning. Is that legal?  
12 Aren't there laws against that? Why are you meeting with  
13 Amazon by Zoom? Conversations with Amazon should not be  
14 taking place by via Zoom, where the entire council and public  
15 cannot benefit from the exchange.

16 You're forming your opinion without the  
17 benefit of discussion with the entire council in front of the  
18 public. Isn't that an ethics violation? Amazon apparently  
19 noted that they'll be presuming -- proposing a new cooling  
20 system on Tuesday similar to the one at in Vint Hill.

21 If the rest of the council members that are --  
22 and the two members that are starting today and the public

1 should be given a reasonable time -- amount of time to wait  
2 on the new pertinent information. With no study and no  
3 analysis from the town staff, citizens have been working with  
4 NASA scientists, John Lyver to assume that the -- To determine  
5 the effects of the data center noise and we need time to  
6 evaluate the new information. This whole thing stinks.  
7 Thank you.

8 MR. NEVILL: Thank you, sir.

9 TOWN CLERK: David Fox. David Fox on deck.

10 Joan Morris, after Joan Morris, Steve Wojcik.

11 MR. FOX: David Fox. I live on 257 Hidden  
12 Creek Lane. And it strikes me as really ineffective that in  
13 this format you the members of the town council hear a  
14 constituent speak knowledgeably and earnestly about their  
15 opposition to granting the special use permit. And all the  
16 while you sit there ostensibly listening yet don't need to  
17 respond.

18 Then another constituent comes up inevitably  
19 hammering away at this abomination of a proposal. This can  
20 be expected given how many compelling arguments there are  
21 against this special use permit to allow what would be the  
22 first of many data centers to infiltrate our beloved town.

1 I haven't been able to attend the work  
2 sessions. I'm a teacher in town, teaching the students  
3 constantly what is right and that's why I'm here actually  
4 because this seems really wrong. So let me get -- all right.

5 So I haven't been at the work sessions where  
6 citizens get a sense as to why you'd be in favor of this  
7 project. Even in the face of such clear opposition from the  
8 citizens -- citizenry you represent. I have heard that the  
9 primary motivating factor, having you believe that this is  
10 a good proposal, can be summed up in a single word revenue.  
11 And that reason has been ripped to shreds by citizens time  
12 and again, even in the short meeting time that we've had this  
13 meeting.

14 So I'll give you, we have a me a minute left.  
15 Members of the town Council, all but the last five seconds  
16 of the time that I am granted to share with us the people you  
17 represent, the reasons you will be voting to support granting  
18 this special use permit.

19 For those who cannot attend the work sessions  
20 I will give you. Now I'm down to 43 seconds. I would like  
21 to hear if there's something we're missing, can you please  
22 share with us? Okay. So I'll squeeze in whatever your

1 incentive is for supporting this proposal after seeing the  
2 veritable parade of your fellow citizens' faces. So  
3 adamantly opposed.

4 If you vote for this, I really don't know how  
5 you would be able to walk down Warrington's Main Street and  
6 be able to look and make eye contact with anyone here. You  
7 have railroaded. If you vote for this, you have railroaded  
8 the citizenry. I'll leave it at that.

9 TOWN CLERK: Joan Morris.

10 MR. NEVILL: Please order.

11 TOWN CLERK: Joan Morris, Steve Wojcik. On  
12 deck after Steven would be Douglas Larson.

13 MS. MORRIS: Good evening. My name is Joan  
14 Morris. I live at 385 Falmouth Street and I am here once again  
15 to urge you to vote no on the special use permit that would  
16 allow Amazon to build an enormous data center at the entrance  
17 to our town.

18 The visual blight, the harmful and incessant  
19 noise, the copious amounts of water that would be needed would  
20 all forever diminish our community and degrade the essence  
21 of living in Warrenton. Once it is here, it will remain.

22 The majority of Warrenton residents. Your

1 constituents, your neighbors, your friends, are not only  
2 opposed to the location of this project, but dismayed and  
3 disappointed that much of this process was carried out behind  
4 closed doors with little or no transparency. What good could  
5 possibly come from this project or bring to our community who  
6 benefits, who loses?

7 I believe we all know the answer to those  
8 questions. Please vote no. And I want to thank our  
9 representative, Bill Semple for being the only council member  
10 who answered the questions of FauquierNow last week. Thank  
11 you.

12 TOWN CLERK: Stephen Wojcik on deck. Douglas  
13 Larson, then Mr. Ken Alm.

14 MR. WOJCIK: Yeah, and I'm not talking about  
15 the public hearing, I'm talking --

16 MR. NEVILL: Reminded everyone, please state  
17 your address as well.

18 MR. WOJCIK: Yeah, I will. I just  
19 preliminary. Steve Wojcik 621 Old Mets Road. Thank you for  
20 the opportunity to speak.

21 The following are takeaways from the written  
22 comments I sent you earlier. They focus on the site bearing

1 the address 615 Falmouth Street and why it's not suitable for  
2 an electric substation for two reason. One, it goes against  
3 Dominion Energy's own criteria for site selection which you  
4 heard at the December 13th work session.

5           Number two, it goes against the Warrenton  
6 comprehensive plan. At the December work session, Mr.  
7 Parker, the Dominion representative, stated that the  
8 following criteria were considered in choosing 615 Falmouth  
9 Street as an option for a five to ten-acre substation.

10           One, avoiding wetland. Two avoiding areas of  
11 stormwater drainage and three, avoiding access for future  
12 expansion of the substation. The problem for Dominion is  
13 this, that the middle of the property contains a pond  
14 surrounded by wetlands, comprising about approximately three  
15 acres or about 10 percent of the property as the US Fish and  
16 Wildlife Services map I sent you shows.

17           They're part of and connected to a stormwater  
18 drainage system that also encompasses the land all the way  
19 to the northeast boundary of the property. The part that  
20 borders Old Mets road together the total area makes up  
21 approximately 30 percent of the property and bisects it in  
22 the middle.

1           The town of Warrenton relies upon this drain  
2 water drain to -- rainwater for significant parts of  
3 Falmouth's street and Old Mets Road. Indeed, the town's  
4 public works department has spent considerable manpower,  
5 money and physical resources over the last several years to  
6 assure that water flows from Falmouth Street down Old Mets  
7 Road and onto the property because it is the lowest lying area  
8 in the vicinity.

9           And I gave you all the details of what I've  
10 observed. Given that the wetland and storm drainage acreage  
11 comprise a large swath of the middle of the property, that  
12 leaves little room for future expansion of the substation  
13 unless dominion violates or disregards its own criteria.

14           Moreover, it is even -- even without  
15 expansion, a 10-acre substation could be -- is unlikely to  
16 be built without impacting the wetland or the storm drainage  
17 area. An equally important question is, should this not  
18 concern the town council? And maybe it does. And please let  
19 me know. It could significantly affect the town storm water  
20 management in the area and have consequences for the homes  
21 nearby.

22           I'm going to -- I only have 30 seconds, so I

1 already spoke last time about the how the -- that property  
2 across the street and a substation violates, or not violates,  
3 but contradicts what the comprehensive plan is. I just want  
4 to say that the -- whatever happens on that property,  
5 especially with a substation there does not just impact the  
6 homes on Old Mets Road, the eight homes that are our neighbors.  
7 It does also affect the home and the, I think, approximately  
8 30 town homes directly across the street from the Falmouth  
9 Street, as well as the historic Ellington Manor property,  
10 which borders it on two sides. Thank you.

11 MR. NEVILL: Thank you Mr. Wojcik.

12 TOWN CLERK: Douglas Larson. On deck Ken  
13 Hom. After Ken James Hanover.

14 MR. LARSON: Good evening. I'm Doug Larson.  
15 I live at 134 Mosby Circle in Ward Five here in the town. And  
16 tonight I would like to address the town council about my  
17 concerns regarding the proposed boundary line adjustment.

18 In January of last year, I wrote to my then  
19 Councilman Kevin Carter, who's no longer on the council and  
20 expressing my reservations about the proposal that was  
21 announced in the paper.

22 He -- his response included these words, and

1 I'm quoting, "There will be plenty of opportunities for input  
2 if the process moves forward. We simply aren't there yet.  
3 I can't weigh in on how I would vote as there is currently  
4 nothing to vote on. And of course, I haven't heard from the  
5 experts or the public, but I assure you the process will be  
6 open to the public and inclusive." That seemed like a  
7 reasonable response until in May, the mayor sent a formal  
8 letter initiating the boundary line adjustment with Fauquier  
9 County. In that letter, he indicated that a majority of the  
10 town council supported that action.

11           We can find no record of any vote taken by the  
12 town council on that matter. And while it is possible that  
13 a majority weighed in on support of the mayor's action, we  
14 do not know who they were. Where was the input from the  
15 experts and the public and the promised open and inclusive  
16 process that Mr. Carter promised would occur?

17           The boundary line adjustment proposes adding  
18 more than 60 percent of the land area to the town, and yet  
19 the public has heard nothing about the rationale for this  
20 dramatic request, much less given the chance to offer any  
21 comments. I urge that the town council be more transparent  
22 in their actions and give the public the opportunity to

1 understand and comment on the proposed boundary line

2 adjustment. Thank you.

3 TOWN CLERK: Ken Hom.

4 MR. NEVILL: Thank you, sir. Next.

5 TOWN CLERK: Ken Hom. On deck, James Hanover  
6 after that, David Dwight Ike.

7 MR. HOM: My name's Ken Hom I live at 194 Copp  
8 Street in Ward Five.

9 Just a one little bit on the boundary line  
10 adjustment also is the fact that if you read through all the  
11 comprehensive plan, there is no mention of a boundary line  
12 adjustment there. And to date, there have been no mailings  
13 out to the people who would be affected by the boundary line  
14 adjustment, who are outside the town limits, or even people  
15 within. Is this something that they want? So that's just  
16 one part on boundary line adjustment.

17 What I actually came to -- actually just to  
18 mention I'll make this short is -- and I don't know that, you  
19 know, it probably will fall on deaf ears in many ways, but  
20 the council and the Warrenton government and the staff and  
21 stuff have a real credibility problem. There's a real lack  
22 of trust that the people here -- these people here they don't

1 trust that they're being listened to.

2           They don't trust the fact that, that you really  
3 care about that you're -- they mainly think that you're  
4 interested in the short road, the short term fix rather than  
5 looking down the road; the long road because it isn't just  
6 about the town growing. It has to do with the depth of the  
7 types of jobs that are here, the diversity of those things  
8 that those are real jobs, and they aren't just ones that are  
9 min wage jobs.

10           So growth, if you look at Middleburg,  
11 Middleburg has not grown in the last 10 years. Zero, zero  
12 percentage in Middleburg, and there are many towns like that.  
13 So what we expect from you is basically is to use your  
14 resources to basically make our lives better, our citizens,  
15 make our our streets better, our sidewalks better, more parks,  
16 make the life of the people who live here better. That will  
17 draw in people. It's the quality of life. It's not the  
18 numbers that go in. Thank you.

19           TOWN CLERK: James Hanover. David Dwight Ike  
20 Miller.

21           MR. HANOVER: Right (inaudible). This is the  
22 general comments, I believe.

1 MR. NEVILL: Yes.

2 TOWN CLERK: Yes.

3 MR. HANOVER: Oh, excellent. First of all, I  
4 want to say, many of us who are in here have strong opinions  
5 about what's going on with the town and perceptions. And I'm  
6 sure that you realize from what you're hearing and many people  
7 said it as I might have, that there might be a perception issue  
8 in terms of whether or not you're listening.

9 So I ask that you deeply regard what we say and  
10 understand that we too are Warrentonians. I've been visiting  
11 Warrenton since 1996 and living here since 2002 or 2005  
12 whatever six, thank you.

13 I love this region. I think it's a beautiful  
14 area. And I think that all of you are here by the way, have  
15 immense responsibility. And the fact that my neighbor, Jay  
16 Heroux stepped up and actually volunteered for this position  
17 and no one else did say volumes, right? I mean, this is not  
18 an easy job. There was no election because nobody else  
19 stepped up to the plate. That's true.

20 When we all look at ourselves, we need to  
21 remind ourselves we're not in those chairs, you guys are. But  
22 we want you to make the wise choice and look to see critically

1 and apply critical thinking to many of the proposals coming  
2 across. And I'll speak later on that. I'm going to be brief.  
3 I just want to say thank you and I want you to deeply regard  
4 what you're hear tonight. Thank you.

5 TOWN CLERK: David Dwight Ike Miller, Aaron  
6 O'Donnell. David Dwight Ike Miller, Aaron O'Donnell, Lori  
7 Carnet. Aaron?

8 MS. O' DONNELL: Aaron. Hi, my name is Aaron  
9 O'Donnell. I'm actually -- I'm at 52 Blue Ridge Street,  
10 Warrenton, Virginia. As you'll see my eight-year-old wrote  
11 on his folder. He actually wrote these comments. He was  
12 going to practice, he was going to deliver them, and he got  
13 sick.

14 So on behalf of Sean, I have 26 points, one for  
15 each letter of the alphabet he certainly took counsel with  
16 us. He had a lot of spelling help, but they are very much  
17 his own. He chucked anything he didn't think was just  
18 perfect. So this data center would be A, at our expense. B,  
19 bad for wildlife. C, changes to make Warrenton better. D,  
20 disruptive to our community. E, exceptionally bad for the  
21 environment.

22 F, foolish. G, good for big companies, bad

1 for everyone else. H, how would anyone think this was a good  
2 idea? I, I am asking you to do the right thing. J, Justice  
3 is important. K, this will kill wildlife, Sean is a  
4 naturalist, in case you haven't figured this out. L, leave  
5 that 40 acres for the frogs. M, money isn't worth it. N,  
6 noisy.

7 O, only going to be used for a few years. P,  
8 please protect Fauquier. R, follow the rules, this is too  
9 noisy. S, Sean thinks this land should be for the frogs. T,  
10 in 10 years this will be obsolete. U, ugly. V, the vampire  
11 bat it will suck energy out of Warrenton. That was a hundred  
12 percent Sean.

13 W, we the people of Warrenton don't want this  
14 data center. X, xylophones are loud but they sound nice.  
15 Data centers sound loud and awful. Y, you are preventable  
16 --you are capable of preventing this. And Z, you'll catch  
17 good Zs tonight if you do the right thing. I would also like  
18 to add that Councilmember Heroux, is that how you pronounce  
19 your name?

20 MR. HEROUX: Heroux.

21 MS. O' DONNELL: Heroux, should abstain from  
22 voting. You have two conflicts of interest. One, because

1 you're a member of the Path Foundation. Path Foundation  
2 received 15 million from McKenzie Scott, who owns, I think  
3 it's 3% of Amazon currently. Additionally, you have business  
4 ties with Amazon. So in good context you cannot vote. It's  
5 also against our own rules. So thank you so much.

6 MR. NEVILL: Thank you. Keep order for next.

7 TOWN CLERK: Lori Carnet. Lori Carnet, Carol  
8 Chase Collins. Lori Carnet, Carol Chase Collins. Christine  
9 Fox, Christine Fox. Perfect. Christine?

10 MS. FOX: Yes.

11 TOWN CLERK: Perfect.

12 MS. FOX: My name is Christine Fox. I live at  
13 140 Mosby Circle here in Warrenton. I've had a business here  
14 for 32 years and have lived in town close to 30. Tonight,  
15 I will share one of my father's maxims with you. You get what  
16 you inspect, not what you expect.

17 Our Town Planning Commission was charged to do  
18 just that with the Amazon Data Center application. Over the  
19 course of many months of meetings and requests for specific  
20 information from the applicant, there are many unanswered  
21 questions. The lack of adequate information could have  
22 long-term negative consequences for our community from which

1 there may not be any recourse.

2           The council may have expectations without  
3 answers for example, noise levels, limits, and revenue stream  
4 in addition to those raised by the Planning Commission. What  
5 is your guarantee that they will be met? What harm to the  
6 community will occur if you do not inspect every aspect of  
7 this application? How do you plan to address all of these  
8 concerns? You may even find that you have more questions.  
9 I respectfully ask that you do not proceed until all the  
10 questions are answered. Our community is protected and an  
11 equitable solution is achieved. Thank you.

12           MR. NEVILL: Thank you, Ms. Fox. Next order.  
13 Chris -- Christopher.

14           MS. CHASE: Carol.

15           TOWN CLERK: Carol Chase Collins?

16           MS. CHASE: Carol Chase Collins. Yeah, it's  
17 a long walk from the back room. Anyway, good evening  
18 everyone. I so much appreciate the work that you do. I live  
19 at 490 Winchester. I'm -- ditto everything they said. I had  
20 some notes written which I left at home, so this'll be really  
21 short. I just agree with everything that's been said  
22 opposing this. I think it would be very bad for the town,

1 would make me very sad because my grandchildren have been born  
2 here and are living here. I waited a long time to move to  
3 Fauquier and I'm even happier to be living in Warrenton now.

4 And that I'm the -- I guess I represent the  
5 average woman on the street. I don't have anything factual  
6 to bring up. It's all been brought up by other people who  
7 I think have said it very well. And I just want to ditto all  
8 that and pray that you all will vote no, because I think this  
9 is very bad for our town.

10 Oh, I did think of one thing I could say. It's  
11 like wanting to have a beautiful, fancy pair of Italian  
12 leather boots. If they don't fit, they don't fit. And if  
13 they cost too much, they cost too much. Please vote no.

14 MR. NEVILL: Thank you, ma'am.

15 TOWN CLERK: Christopher Bonner.

16 Christopher Bonner. On deck, Steve Byfield after Steve,  
17 it'll be Amy Hampton.

18 MR. BONNER: Good evening, members of  
19 council. Ladies and gentlemen, my name is Chris Bonner. I  
20 live at 602 Fauquier Road in Warrenton and I'm delighted to  
21 be here. I'm concerned about conflicts of interest or the  
22 appearance of conflicts of interest.

1 I'm here to talk about that rather than the  
2 abomination that is the Amazon Data Center proposal. A  
3 conflict, most classically would be the 1919 Chicago White  
4 Sox where eight of their players were found guilty of  
5 accepting money from gamblers to throw the World Series to  
6 the Cincinnati Reds.

7 We don't have anything quite like that here,  
8 but where a member of this council is also a strategic partner  
9 of Amazon that is a clear-cut conflict of interest. And the  
10 remedy is for that member to recuse himself. It is something  
11 that the vote that each of you make is a very precious and  
12 sacred thing.

13 And I urge you in your private councils and  
14 also in the public, to keep in mind that each vote that you  
15 are making on behalf of the citizens here and throughout  
16 Warrenton is your mark in history and is how you'll be  
17 remembered for the town that you are building today and the  
18 legacy you are leaving for tomorrow. Thank you.

19 TOWN CLERK: Steve Byfield.

20 MR. NEVILL: Thank you, sir. Next up.

21 TOWN CLERK: Steve Byfield, on deck Amy  
22 Hampton. On deck, Kevin Hampton. We have David Dwight Ike

1 Miller, Laurie Cane, or Lee Osley come on down too. Steve  
2 ByField, Amy Hampton, Kevin Hampton, Allies Robbie? We have  
3 one? Amy Hampton?

4 MS. HAMPTON: Yes. Hi, my name is Amy  
5 Hampton. I live at 90 Dorsett Lane in Ward One.

6 I would just ask that you please deny this  
7 application and thank you for your time and your  
8 consideration.

9 MR. NEVILL: Thank you, ma'am.

10 TOWN CLERK: Kevin Hampton. Kevin Hampton?  
11 Perfect.

12 MR. HAMPTON: Good evening. My name is Kevin  
13 Hampton. I live at 90 Dorsett Lane, Ward One.

14 I'm opposed to the data center. I have a  
15 10-year-old son. I'm worried about how this is going to  
16 affect him adversely. Also, I don't want my equity in my  
17 residence that I work so hard for to be eroded. Please vote  
18 no. Thank you.

19 MR. NEVILL: Thank you, sir.

20 TOWN CLERK: Allies Robbie. Allies Robbie.  
21 On deck Ruth Fugi. I know I pronounced that wrong. I'm  
22 sorry.

1 MR. ROBBIE: Thank you, Mr. Mayor.

2 Council members, I have to say I feel a little  
3 younger being on this side of the equation than I was a couple  
4 OF weeks ago. Thank you for the opportunity to serve the  
5 citizens of Warrenton and I just have a few brief points. I'm  
6 not going to elaborate on the expertise that so many  
7 individuals have provided you the analysis.

8 What I do bring and I hope to share with you  
9 is the history of my time in service to the town of Warrenton  
10 and the plans that you work so hard to ratify and adopt in  
11 our comp plan. That was a long process. A lot of work, a  
12 lot of resources, a lot of public participation, a lot of  
13 children that send their postcards about how they envision  
14 Warrenton being in 20 years.

15 We kept the economic viability and  
16 sustainability of Warrenton at a primary source and  
17 motivation for the measures that the comp plan called for.  
18 because that was clearly at the time a concern by the previous  
19 administration in the town of Warrenton that we needed  
20 economic viability.

21 So you ratified a plan. I'm kind of surprised  
22 that, frankly, as an only individual who did not vote for the

1 plan, nor did I vote for the text amendment, I am encouraging  
2 you to support your own plan that you voted for.  
3 Theoretically, I should be on the other side of the equation,  
4 but I feel like you did a lot of work.

5           You planned it, you ratified it, you received  
6 a lot of public participation, and you're abandoning the own  
7 -- your own plan that you worked so hard on with a lot of  
8 resources and a lot of public participation. Now, if you're  
9 willing to say that maybe our vision was wrong, maybe this  
10 was not going to achieve where we needed to be, then look,  
11 all of us I think are capable of making a mistake and owning  
12 it.

13           Redemption is a good thing and we are, as you  
14 know, in this community we all know each other. I know many  
15 of you personally, we are a community that cares for each  
16 other. Let's go back to the plan and say, ey, look, that  
17 vision maybe was nice, but it's not going to get us where we  
18 need to go.

19           And we're going to go back to the public and  
20 see how we can improve that, including whether this use for  
21 an Amazon data center is compatible with the historic  
22 character of Warrenton, Heritage Tourism, Journey Through

1 Hallowed Ground, all the things that we have worked on for  
2 30 years to try to achieve, the resources that we've spent  
3 here, the dollars that we've spent promoting that, the color  
4 scheme, the flags, all the things that all the other experts  
5 have talked about.

6           If that plan no longer applies, then let's go  
7 back and let's redraw the plan and say, Hey, look, you know,  
8 at the time it looked like a good idea, but today maybe it  
9 just doesn't meet the conditions on the ground. We ought to  
10 be able to have some flexibility and go back, ask this  
11 wonderful crowd and citizenry here to say, hey, look, how can  
12 we draw another plan? But I think you're selling yourself  
13 a little short. If you voted for it, stick up for it to be  
14 honest. I love you guys a lot, a lot of you I know personally,  
15 and I thank you for your service.

16           TOWN CLERK: Ruth Fugi. Excuse me. Ruth  
17 Fugi. Jennifer George. Jason Smolinski.

18           MR. SMOLINSKI: Smolinski.

19           TOWN CLERK: Ruth Fugi. Jennifer George,  
20 Jason Samalinski. Samal -- how did you pronounce that?

21           MR. SMOLINSKI: Smolinski.

22           TOWN CLERK: Smolinski. Jason.

1 MR. SMOLINSKI: Yes. A little shorter.  
2 There we go. I appreciate your time this evening, and my name  
3 is Jason Smolinski.

4 This is my first ever attendance of a public  
5 hearing of any sort. Although I have lived in Warrenton for  
6 12 years, my family and I, we live at 481 Cardinal Lane in  
7 Warrenton. It's only 4/10 of a mile from the proposed site  
8 of the data center. We live in Ward 1, which is the same area  
9 which would contain this property.

10 We are firmly against this proposal at 481  
11 Cardinal Lane. We are against it for a number of reasons.  
12 First, we are against its proximity to hundreds and hundreds  
13 and hundreds of residents in Ward 1. There are over 700  
14 residential properties within a half mile of this site.

15 The structure would be about 600 feet from the  
16 closest residential property in Highlandtown, about 800 feet  
17 from the nearest residence in Highlands of Warrenton, about  
18 1,000 feet from the closest in Oak Springs. And down  
19 Blackwell Road, outside of the neighborhoods it would be about  
20 a quarter mile to the nearest non neighborhood residential  
21 property.

22 We're also against the noise that will

1 continuously pollute the neighborhoods closest to the site,  
2 potentially into our homes, especially at nighttime when  
3 those sounds outside are a little more noticeable. We're  
4 against the potential for high power towers, which will be  
5 visible to hundreds of town residents in Ward 1, including  
6 potentially from our own front porch and to visitors coming  
7 in through that gateway of Warrenton.

8           That's the site that they would see, which  
9 would be pretty ugly. We are against most of all the  
10 precedent that this sets, which could carve out parts of our  
11 town in the future as a patchwork of concrete and constant  
12 noise that none of us asked for. In short, we are firmly  
13 against the proposal and the effects it would have on our  
14 quality of living. Thank you for your time.

15           TOWN CLERK: Jennifer George.

16           MR. NEVILL: Thank you, sir. Next up.

17           TOWN CLERK: Frank Michael Kolaski is on deck.

18           MS. GEORGE: Hi, my name is Jennifer George  
19 and I live at 579 Pineview Court in Warrenton.

20           Thank you for giving me the opportunity to  
21 speak today. I share the same concern as those who have  
22 already spoken here tonight, and without reiterating what has

1 already been said, I would like to add my perspective as a  
2 new homer here -- homeowner here in the town of Warrenton.

3 I currently live in Monroe Estates, right next  
4 to the old wire factory, which is a site that will be a new  
5 home for more data centers if this is approved. We moved from  
6 Manassas a little less than two years ago. We wanted to get  
7 away from all the construction and the congestion that that  
8 area had.

9 We fell in love with Warrenton. We love the  
10 small town feel we get from living here, we love not having  
11 to fight traffic every day to go to the store, we love our  
12 friendly neighbors, we love that not every piece of land is  
13 developed and we enjoy the nature that the county has.

14 If you would've told me two years ago that they  
15 plan on putting data centers right next to my house and in  
16 my town, I would've thought twice about moving here. I moved  
17 here to get away from that. By approving this, you'll deter  
18 other families who want to get away from that, from moving  
19 here.

20 I don't want the data centers. I believe  
21 Warrenton will lose its charm and it will be the beginning  
22 of the end of that small town feeling. Please do not approve.

1 Thank you.

2 TOWN CLERK: Frank Michael Koska. Frank  
3 Michael --

4 MR. KOKASKA: Kokaska.

5 TOWN CLERK: What did you say?

6 MR. KOKASKA: Kokaska.

7 TOWN CLERK: Kokaska?

8 MR. KOKASKA: Yes, sir. Good evening. Mike  
9 Kokaska representing the Highland Commons HOA directly across  
10 the property -- from the property.

11 And I guess we just really want to ask, have  
12 you reviewed all of the testimony that has been from all the  
13 public hearings that the Planning Hearing Commission has been  
14 given?

15 You know, the biggest key is the noise issue.  
16 When we asked the local police force what it takes to enforce  
17 a noise ordinance, it's basically a \$500 day fine, easily  
18 absorbed within the project of this nature. Again, this  
19 person just spoke before us, the Highland Commons Association  
20 is one of the closest facilities, and so I represent 188  
21 families in that subdivision alone. And we asked to vote  
22 against the Amazon project. Thank you.

1 MR. NEVILL: Thank you, sir.

2 TOWN CLERK: Michael McGee. Michael McGee.  
3 On deck Robin Lohnes. Susan Whitis -- Whitis?

4 MS. LOHNES: I'm Robin.

5 TOWN CLERK: Robin. Come on down. Robin.  
6 Robin Lohnes.

7 MS. LOHNES: Yes. Good evening, Mr. Mayor  
8 and members of the Town Council. My name is Robin Lohnes.  
9 I am a resident and property owner in the Oak Springs  
10 subdivision. I'm also the President of the Oak Springs  
11 Homeowners Association. Thank you for the opportunity to  
12 speak.

13 Back in November, on behalf of the  
14 association, I spoke in opposition to the SUP before the  
15 Planning Commission. At that time, the association also  
16 submitted written comments in opposition with copies  
17 forwarded to each of you with the exception of the two newly  
18 elected council members, which I welcome.

19 In the written testimony, we touched on a  
20 number of issues, the adverse impact on property values, the  
21 deforestation along Blackwell, the destruction of wildlife  
22 habitat, and the ensuing construction nightmare that will

1 occur along Blackwell, as well as several other secondary  
2 roads in our community if this project should move forward.

3           The association remains in opposition to the  
4 SUP for the above reasons. But this evening I would like to  
5 touch on the construction issue and reiterate on behalf of  
6 our residents their concerns. Seemingly, this particular  
7 issue has garnered very little oversight. The SUP projects  
8 construction will be 18 months.

9           That is a year and a half, a very long time for  
10 our residents. Per the application, the only ingress egress  
11 to the data center will be on Blackwell Road. Just before  
12 you come to the intersection of Oak Springs Drive, the  
13 entrance to our subdivision is less than 1/10\*\*\* of a mile  
14 from that entrance.

15           The impact of such a long term construction  
16 project is alarming. Blackwell from 29 Business  
17 Intersection and further North will be severely impacted, as  
18 well as Oak Springs Drive and other secondary roads such as  
19 Fletcher, as both residents and commuters try to avoid the  
20 construction area.

21           Additionally, there's been a lot of  
22 discussion, both external and internal regarding noise

1 abatement and how to mitigate that, but little or none  
2 regarding the noise that would be generated by heavy  
3 construction machinery, bulldozers, tree felling equipment,  
4 and the like.

5           Further, the impact on traffic flow and the  
6 effects of the wear and tear of Blackwell alone will be  
7 significant. Both the applicant and staff analysis has been  
8 fairly silent on this issue. Accordingly, the association  
9 respectfully requests this issue to be given strong  
10 consideration in the event the project does move forward, and  
11 inform and have a designated plan in place well in advance.

12           MR. NEVILL: Thank you, ma'am.

13           MS. LOHNES: Thank you.

14           MR. NEVILL: Appreciate it.

15           MS. LOHNES: Appreciate it.

16           TOWN CLERK: Susan Whitis, Susan Harford.

17 Susan Whitis, Susan Harford.

18           MS. HARFORD: Susan Harford.

19           TOWN CLERK: Yeah. Absolutely.

20           MS. HARFORD: My name's Susan Harford, 158B  
21 Fairfield Drive, Warrenton.

22           I want to -- I don't want to echo what everybody

1 has said. There have been people who've really made some  
2 really important points that I hope you all heed. But my big  
3 disappointment in this besides the process, which I do think  
4 as hardworking as all of you are, I do think it leaves you  
5 vulnerable right now in terms of the way the process has been  
6 perceived.

7           So I encourage you to think about that. But  
8 the other thing that really disappoints me is I feel like  
9 you're giving up on the comprehensive plan that you work so  
10 hard on. I was reading it, it looks really good. It looks  
11 really hard to pull off.

12           So I can see why maybe you want to take some  
13 shortcuts here to get some infrastructure and some other  
14 dollars in here, but please don't do that. I was looking at  
15 the economic feasibility part at the end, you all haven't even  
16 started. There's a whole section on actions that you want  
17 to take.

18           And I think the timing of this precluded you  
19 guys from getting work on that. It still leaves open. So,  
20 I think you can hear from the town people, we want to help  
21 you execute that plan, we know it's hard. Ask us, involve  
22 us, and we'll help you do it. Thank you.

1 MR. NEVILL: Thank you, ma'am.

2 TOWN CLERK: Bill Wright. On deck Michael  
3 Fox, on deck David Wynn.

4 MR. WRIGHT: Hello, my name is Bill Wright. I  
5 live in Gainesville, in Prince William County. I'm here  
6 tonight to offer you sympathy, support and a warning. Be  
7 careful which camels nose you allow under your tent. I see  
8 a lot of similarities in what you are considering tonight and  
9 what has been riding rough shot over Prince William for more  
10 than a year.

11 I even see some of the same players now plying  
12 their trade here in Warrenton. Due to the gothic horror story  
13 imposed upon the citizens of Prince William, I've watched your  
14 plight with interest and a sense of foreboding. Are we all  
15 doomed to the same fate of being sacrificed on the altar of  
16 big techs insatiable appetite for land, power and water?

17 Are we all to be sold down the river by public  
18 servants who courted public trust on election day only to  
19 betray it afterward? Is trust and transparency in government  
20 an antiquated concept that has fallen victim to greed and  
21 expedience?

22 The American Economic Liberties Project

1 sponsored a report entitled Ban Secret Deals, How Secret  
2 Corporate Subsidy Deals Harm Communities, and What To Do About  
3 It. It should be required reading for all public officials.  
4 The report focuses on non-disclosure agreements, which are  
5 a common tool of large corporations to co-opt government  
6 officials to assist in their quest to expedite contentious  
7 proposals free from public scrutiny.

8           Although purportedly intended to protect  
9 trade secrets or other proprietary information,  
10 non-disclosure agreements often flaunt that narrow  
11 definition in order to inhibit meddlesome public inquiries.  
12 These non-disclosure agreements violate a fundamental  
13 principle of local democracy, that a community should be able  
14 to provide input into the use of public resources and receive  
15 information that allow it to evaluate the work of elected  
16 officials and government employees.

17           The term civic planning has been rendered an  
18 oxymoron in Prince William County. Do you want the same fate  
19 for Warrenton? Before you sign on, let me take you on a tour  
20 of the lunar landscape Western Prince William County is  
21 becoming as a result of indifferent public officials.

22           Your town is a place to live, enjoy, and raise

1 your families. It is not just a ripe opportunity to be  
2 plundered. Ask two simple questions of anyone advocating a  
3 contentious development proposal. What's in it for you?  
4 And would you have your own family live next to it? You would  
5 save yourself a lot of time. And unsavory acquaintances.

6 Thank you

7 TOWN CLERK: Michael McGee.

8 MR. NEVILL: Thank you.

9 TOWN CLERK: Point of order.

10 MR. NEVILL: Order please.

11 MR. SEMPLE: Mr. Mayor. Point of -- Mr.

12 Mayor. Point of order.

13 MR. NEVILL: Michael, one second.

14 MR. SEMPLE: We're hearing from a number of  
15 residents on the subject that is part of our --

16 MR. NEVILL: Public hearing.

17 MR. SEMPLE: -- public hearing, and I'm just  
18 wondering if we're looking at the right list. I mean, are  
19 all these citizens time signups?

20 TOWN CLERK: Yes, sir.

21 MR. SEMPLE: All right. Thank you. Just --

22 MR. MCGEE: Good evening. I'm Mike McGee. I

1 live at 28 Sire Way in Warrenton. Thank you for letting me  
2 speak. I'm a father of three kids all under six, and I've  
3 been a town resident for seven years here. I'm here today  
4 because I don't think the recent meetings on this data center  
5 accurately reflect the need for this project in our community.

6 IT is the most reliable path to a lucrative and  
7 successful career in our country. I look around and many of  
8 the faces I see look just like the people in my own life who  
9 espouse the belief that hard work translates into a good  
10 career. I'm here to tell you that dream lives on in the field  
11 of information technology.

12 Meanwhile, projects like the Clevenger's  
13 Village Development of 700 homes just down to 11 over the  
14 border in Culpeper County, tell us that we are at risk of  
15 incurring all the detriments of the so-called sprawl like  
16 traffic through town, while reaping almost no benefits like  
17 tax rewards.

18 As a resident of the town in Fauquier County,  
19 I find that unacceptable. Can opponents to the data center  
20 convince us that Warrenton and Fauquier County would not  
21 suffer second and third order effects if the data center is  
22 constructed 50 feet over the border in a neighboring county

1 where we can do nothing about it and have no say in it?

2 I'm interested in advancing education in STEM  
3 fields as our number one technology. I want to encourage the  
4 town council to approve this if they intend to make Amazon  
5 a community partner. The presence of a data center in our  
6 community could offer the partnerships with youth in our  
7 schools, it could drive academic interest in technology  
8 rather than social media interest in technology. That needs  
9 to be a primary goal.

10 Technology is not going away and understanding  
11 what a data center is on a technical level is a master course  
12 in applied skills, including civil network, mechanical, and  
13 computer engineering. I think it's construction could  
14 result in opportunities and apprenticeship, internship  
15 programs for local high schools, or non-college graduates,  
16 which would help create a path forward to success here in our  
17 community.

18 I would also like to say that our test scores  
19 are in the bottom 50 percent of the state according to public  
20 school review, while our per capita income is in the top 5  
21 percent. Just last month, I read an article that our hospital  
22 was named the only state -- the only one in the state to receive

1 a D grading, the worst hospital in the state.

2 If your message is stop the sprawl, and that  
3 can be interpreted as we're doing everything right already.  
4 Then let me tell you my opinion is that we can still approve.  
5 Thank you.

6 MR. NEVILL: Thank you, sir.

7 TOWN CLERK: Michael Fox. Michael Fox.

8 MR. FOX: Yes. I wanted to speak at the  
9 public hearing.

10 TOWN CLERK: Understood.

11 MR. FOX: Thank you.

12 TOWN CLERK: David Wynn.

13 MR. WYNN: David Wynn. I reside at 7960  
14 Wellington Drive, Warrenton, Virginia. I had sent the  
15 Council and the Mayor a document over the weekend entitled,  
16 35 Instances Where the Plan -- the Comprehensive Plan is  
17 Contrary to this SUP for our Compact Urban Environment.  
18 There's 35 different instances. You can go through the  
19 80-page plan. I have -- I don't have time to read them all,  
20 so let me share with you a few of them.

21 The plan says, A guiding vision of the town  
22 plan is to promote the town and maintain its small town

1 character. This SUP in no way promotes and maintains the  
2 small town character. Another goal of the plan is to allow  
3 for a range of commercial spaces at appropriate heights and  
4 square footage, and with context and sensitive transitions  
5 into existing neighborhoods.

6 This SUP plan does not achieve any of these  
7 goals and is not sensitive to existing neighborhoods,  
8 especially Oak Springs and North Rock and many other  
9 communities. The comprehensive plans says Warrenton is made  
10 up of cherished existing neighborhoods in an old town filled  
11 with history.

12 Residents value the charm of this community  
13 and seek to enhance it. The land use plan format serves to  
14 preserve the existing neighborhoods through a public process.  
15 This SUP in no way preserves the charm of the community, nor  
16 enhances it, nor does it preserve or protect existing  
17 neighborhoods, and the citizens have spoken through the  
18 public process and they do not want this land use plan.

19 The Comp Plan says the New Town Character  
20 District -- I'm sorry, the Comp Plan says that, this site seeks  
21 as a potential for an entertainment hub, a mixed-use  
22 development integrated with an educational institution such

1 as Virginia Tech, exploring a campus business hub concept.  
2 This SUP does not achieve any of these goals of the town for  
3 an entertainment, mixed-use, education, or employment  
4 center.

5           The plan says, architectural --  
6 architecturally new structure should blend in with the  
7 architecture of the neighborhood in which it is located.  
8 This SUP plan certainly does not blend in with the  
9 architecture of the neighborhood in which it is located.

10           The Comp Plan says the town will enable  
11 residents to live and work in the town. The concept will  
12 encourage the integration of the workplace and residential,  
13 commercial, and land use components already existing in the  
14 town. Industrial sites should be co-located, or located near  
15 one another, scattered sites or strip sites are strongly  
16 discouraged.

17           This SUP is an example of standalone spot  
18 zoning in industrial development. It is not integrated, and  
19 it is not transitioned properly into the surrounding  
20 community. Thank you. I can't get to all 35, but you have  
21 them in front of you.

22           TOWN CLERK: Lee Olsey.

1 MR. NEVILL: Thank you, sir.

2 TOWN CLERK: Lee Oley, Josephine Gilbert,  
3 Bridget Wolf.

4 MR. NEVILL: Lee Olsey, Josephine Gilbert.

5 TOWN CLERK: Bridget Wolf.

6 MR. NEVILL: Bridget Wolf.

7 TOWN CLERK: William Ziegler. Ms. Wolf? Go  
8 on. We got one coming. Who are you, ma'am?

9 MS. WOLF: I'm Bridget Wolf.

10 TOWN CLERK: Bridget Wolf. All right. Give  
11 me one second.

12 MR. NEVILL: Who was next?

13 TOWN CLERK: I've got Josephine next.  
14 Bridget Wolf, are you William Ziegler?

15 MR. ZIEGLER: Yes.

16 TOWN CLERK: Perfect. Josephine.

17 MS. GILBERT: Good evening Mayor, council  
18 members and community members. My name is Josephine Gilbert  
19 and I live in the Scott District. Before I go on, I want to  
20 thank our law enforcement. Yesterday was Law Enforcement  
21 Day. Thank you folks for taking care of us.

22 Okay. It's hard to believe that this town

1 wishes to be known for the longest in history continuous BML  
2 -- BLM propaganda, supporting a racist, fraudulent  
3 organization. It is not right when a citizen has to  
4 (inaudible) it's government in order to get a response. I've  
5 still not heard from the administration on the newly updated  
6 ordinance.

7           Why is your acting town administrator not  
8 allowing his staff to meet with me? Interesting, Former  
9 Chief Coaches wanted to meet to relay attorney's comments.  
10 He said they were not allowed to respond directly to me.  
11 Really? Couldn't put it in writing, huh?

12           I'm a big believer in promoting from within  
13 when you have the talent, and you do have the talent here in  
14 Warrenton. In my 25 plus year history in public service, most  
15 time it's better than going outside the last higher proof,  
16 so please consider as you begin your search for a new chief.

17           I'm hopeful for the new chief -- I'm hopeful  
18 the new chief can work with the talented newly hired  
19 administrator in guiding you in stopping this takeover of our  
20 courthouse square on Saturday mornings. Maybe a quick lesson  
21 on our town namesake, Dr. Joseph Warren, more popular than  
22 George Washington in his time, is in order for next time.

1 Thank you.

2 MR. NEVILL: Thank you Ms. Gilbert.

3 TOWN CLERK: Bridget Wolf.

4 MS. WOLF: Hi, my name is Bridget Wolf. I  
5 live at 7188 Homestead Court in the Ivy Hill Subdivision. My  
6 home is about a mile from the proposed Amazon building. I  
7 really -- I moved to Warrenton two years ago. I've been able  
8 to put roots down in the community, become involved civically,  
9 and I really appreciate everything this town has to offer and  
10 I just feel like the Amazon data center isn't in keeping with  
11 what's going on in this town. Thank you very much. I hope  
12 you vote against the data center. Thank you.

13 MR. NEVILL: Thank you, Ms. Wolf.

14 TOWN CLERK: William Ziegler. On deck, Bert  
15 Harris, Brian Haggerty.

16 MR. ZIEGLER: Good evening. My name's  
17 William Ziegler. I live in Broad Run, Scott District. I've  
18 been a citizen of Fauquier County since 2005. First, I would  
19 like to express my distress and disgust for the way the Town  
20 Council treated the Planning Commission.

21 In its rush to force this terrible Amazon  
22 special use permit through, no matter what the consequences,

1 the Town Council threw the Planning Commission under the bus  
2 and put undue an entirely inappropriate pressure to rush this  
3 appalling SUP through the deliberative process.

4           But when push came to shove, the Planning  
5 Commission voted against this incomplete, misleading, and  
6 deeply flawed SUP, and for very good reasons. The Town  
7 Council, the majority of which apparently decided on this  
8 project a long time ago, appears set to go against the town's  
9 approved Comprehensive Plan, the Planning Commission, and the  
10 fervent opposition of literally thousands of town and county  
11 citizens.

12           I suspect this whole process over the last year  
13 has been nothing more than window dressing and smoky mirrors  
14 for the sweetheart deal for Amazon you decided to push to  
15 fruition come hell or high water. Since this council, or at  
16 least a majority of its members appear to have already decided  
17 this matter, why am I even here tonight speaking?

18           Like so many others here tonight, I am here to  
19 register in the public record my 100 percent opposition to  
20 this misguided and -- to this misguided and destructive SUP.  
21 If any of you are still genuinely considering the many  
22 demerits of this application, I can summarize just a few of

1 the many reasons you must. I repeat must vote against this  
2 appalling idea.

3           These -- the Amazon SUP is deeply flawed,  
4 incomplete, misleading, and grossly inadequate for a project  
5 of such grave impact. For example, it does not contain the  
6 required noise study and there is no enforcement mechanism  
7 to make Amazon ever comply with town noise regulations.

8           The Amazon SUP runs entirely counter to the  
9 town's Comprehensive Plan for development of this area. The  
10 proposed data center will have significant negative noise and  
11 visual impacts on Warrenton and nearby areas of Fauquier  
12 County, thus significantly impacting quality of life and  
13 property values.

14           The power for this data center cannot be  
15 determined for sure, and may involve miles of dreadful  
16 130-foot-tall power towers cutting across the county and  
17 town, absolutely blighting whole swaths of the area,  
18 including homes, farms, woodland, and our Piedmont scenery.

19           If this data center is approved, almost  
20 certainly many more will come, destroying what makes it  
21 special here. The small town, rural, scenic and agricultural  
22 features that most citizens love about this area. In

1 summary, approving this SUP turns much of Warrenton and nearby  
2 Fauquier County into an industrial zone.

3 In a few short years, this area will be just  
4 like Gainesville, Auburn, or Manassas. A yes vote on this  
5 SUP is a vote to destroy our town and much of our county. But  
6 you can do the right thing, the responsible thing and the  
7 virtuous thing by providing a clear and decisive, no vote.

8 MR. NEVILL: Thank you, sir.

9 MR. ZIEGLER: Thank you.

10 TOWN CLERK: Brian Haggerty. Brian  
11 Haggerty. On deck Kenneth Thomas, Julie Broaddus.

12 MR. HAGGERTY: Good evening council. My name  
13 is Brian Haggerty and my address is 8226 Stable Gate Road,  
14 and I'm a local real estate agent with my beautiful wife that's  
15 down in that corridor somewhere. We live in Warrenton, and  
16 my family and I have resided -- have been residents of  
17 Warrenton for approximately nine years and we love our  
18 Warrenton.

19 And I believe due diligence is very important  
20 as all of you do, especially when dealing with real estate.  
21 As local real estate agents, we sold a property very close  
22 to our current location across from a power -- from a power

1 substation in 2020.

2                   And I wanted to share the buyer feedback we  
3 received from the buyers because it's small potatoes compared  
4 to what we're staring at, and I believe the fallout will be  
5 much greater affecting a larger number of homes and  
6 homeowners. We had 17 showings on this property, showing  
7 number 1, and this is a response from the buyers.

8                   Is your client interested in this showing?

9 Somewhat, close to the power station. Showing 2, is your  
10 client interested in this listing? Not interested.

11 Absolutely love the house, but the power is too loud and they  
12 have a newborn on the way.

13                   Showing 3, clients did a drive by and were not  
14 in love with a lot. Showing number 4, very interested in the  
15 listing -- oh, follow up, I'm sorry. The buyer decided the  
16 power station is too close to the home. These are real  
17 people. Showing number 5, we're very interested, but the  
18 power utility is just too close.

19                   Showing number 6, not interested. Showing  
20 number 7, not interested, utility too close. There's a lot  
21 of consistency here. Showing number 8 is a client interested  
22 in listing? Not interested, beautiful home, power station,

1 not for the buyers. Showing number 9, is your client  
2 interested in this listing?

3 Not interested. Power lines across the  
4 street are a deal breaker for my client. And it just goes  
5 on and on and on. Whole other page. Same response. In my  
6 opinion -- in the opinion of the great citizens in Warrenton,  
7 which this building is full -- a ton of them, we are owed a  
8 due diligence and ordinary care by the council.

9 It is in my opinion, that we vote to -- is it  
10 in my opinion that a vote to approve a special use permit would  
11 not be showing ordinary care to its citizens because many  
12 unknowns still exist? Approving a special permit is a bad  
13 deal for Warrenton and the environment. And I would like the  
14 council to take my vote as a no to the special use permit.  
15 Thank you for your time.

16 MR. NEVILL: Thank you, sir.

17 TOWN CLERK: Kenneth Thomas. Kenneth  
18 Thomas, on deck Julie Broaddus, Anne Kehoe.

19 MR. THOMAS: Yes. Good evening everyone.  
20 Thank you for this time. As a 12-year resident of Fauquier  
21 County, my wife and I, Karine, are now very concerned as are  
22 most of the people in this room about what you're going to

1 be voting on this special use permit. If it's approved, then  
2 many bad things are going to happen to all of us.

3 Noise levels, as we've heard, not for just the  
4 one Amazon data center, but you know what's going to come after  
5 that. When the electricity is put in place to support that  
6 one data center, there will be many other data centers that  
7 will be applied for in this town.

8 Let's just stop and think for a second. If  
9 Warrenton were 1,000 acres of farmland and data centers were  
10 applied for on the -- in that 1,000-acre area with no homes  
11 nearby, electric lines could be brought into that area, houses  
12 and -- would not be disturbed, developments would not be  
13 affected.

14 That's not what we've got here though. We've  
15 got a town, a historic town that needs to be preserved and  
16 protected. This kind of business is a wrong, wrong way to  
17 go. And the bigger picture, if this is approved, this SUP  
18 other data centers are going to be built.

19 Noise levels of one data center are one thing,  
20 but when you've got another three or four across Route 17 from  
21 this one, and then all along the Greenway near the Wire Factory  
22 down below, you're going to have centers of noise that are

1 going to be created in the Northern and the Southern parts  
2 of the town. You don't want this. No one in this room wants  
3 this. And frankly, no one in this town wants this.

4           Then if more Data Centers are built, last  
5 point, the Wellington substation in Prince William County is  
6 going to be called on to supply more electricity and that means  
7 130 foot towers and lines coming down Route 29 to support that  
8 additional electric requirement. Again, take action now.  
9 Do not approve this SUP. Thank you.

10           MR. NEVILL: Thank you, sir.

11           TOWN CLERK: Julie Broaddus. Julie  
12 Broaddus, Anne Kehoe. Are you Julie?

13           MS. BROADDUS: Hello. Hi. My name is Julie  
14 Broaddus. My husband and I own a property here on Main Street  
15 as well as commercial buildings in Vint Hill and Old Bust Head  
16 Brewing Company. And we live about three miles from the  
17 Amazon property. We love this community.

18           I want to speak now about both my great concern  
19 over the proposed data center and the annexation of county  
20 land to enlarge the towns area by 60 percent. The beautiful  
21 rural sense of place we enjoy here in Fauquier County is not  
22 by accident. It reflects innumerable hours of work by our

1 county leaders, county community activists, and  
2 organizations, and input from county citizens with their  
3 voices and votes.

4           As one of those people who has devoted much of  
5 my heart and soul to this effort, it is tragic to me that with  
6 no regard to the vision of these citizens, the town would be  
7 able to annex county land, including land which is zoned  
8 rural-agricultural and invalidate the hard fought  
9 regulations that have been put in place to keep power lines  
10 underground, landscaping and screening in place, and a  
11 hard-edge between developed and undeveloped land.

12           My worst fear is this expansion may be a result  
13 of greed for more land that could be sold at the highly  
14 lucrative price paid by data centers sprawling the edge of  
15 our beautiful, increasingly unique and historic town,  
16 destroying the hard-edge, and crossing it with a blight of  
17 high power tower transmission lines.

18           As a business owner, I fear as well. Our  
19 brewery is dependent not only on local neighbors, but on  
20 customers who visit our county for its rural and unique  
21 character. They relax as they approach and leave behind the  
22 sound walls, wide shoulders, guardrails and power towers of

1 Prince William County.

2                   This is a major reason why they keep coming  
3 back, not only to Old Bust Head and Vint Hill, but to  
4 businesses in Old Town as well. While working with the county  
5 ARB years ago, I did an analysis of Route 29 and documented  
6 how the rural character of our view sheds has degraded one  
7 decision at a time until that character is lost.

8                   As we have seen time and again out of character  
9 structures and power lines destroy the unique quality of rural  
10 communities and our serious detriment to tourism dependent  
11 businesses like ours. I'm asking for transparency, which  
12 appears to be a theme tonight. We have earned the right to  
13 know what the town has planned for the land included in this  
14 expansion, and it is -- and it's possible impact on the demand  
15 for more transmission lines. Thank you.

16                   MR. NEVILL: Thank you, Ms. Broaddus.

17                   TOWN CLERK: Anne Kehoe. On deck Edwin  
18 Broaddus and Roseanne Woodruff.

19                   MS. KEHOE: Hello, I'm Anne Kehoe, 7,000  
20 Beaconsfield Lane, Warrenton, Virginia. I've been here  
21 since this thing has started and I've spoken to you all many,  
22 many times. I just -- at this point -- at this point in, it

1 seems like a game, I'm wondering who's supporting this.

2           Just so many people come and fill these rooms  
3 and speak from their hearts, give you the facts, the figures,  
4 the emotion, and ask not to support this SUP. Nobody -- I've  
5 heard one fellow tonight who thinks it's a good idea. The  
6 -- everybody else is asking you not to support it.

7           I do have a problem with the lack of  
8 transparency. I'm looking forward to you all making the  
9 right decision by not supporting the SUP, by saying no to  
10 Amazon, by saying no to the disfigurement of our county and  
11 our town, and support the citizens of Fauquier County and the  
12 town who have come here and asked for your support. Please  
13 don't do this. Thank you.

14           TOWN CLERK: Edwin Broaddus.

15           MR. NEVILL: Thank you.

16           TOWN CLERK: Edwin Broaddus, Roseanne

17 Woodruff.

18           MR. BROADDUS: Good evening. My name is  
19 Edwin, or Ike Broaddus. Julie and I live at Old Bust Head  
20 Road in Broad Run, about five miles from here. We also own  
21 a building down on Main Street, 70 Main, where there are  
22 probably 30 or so businesses that reside there. We don't vote

1 in this town, but we do pay taxes here. We love this place  
2 because it's our town.

3 It is the seed of our local government. Our  
4 kids went to school here. We don't feel that we're crossing  
5 a line when we come to buy groceries, or shop on Main Street,  
6 or eat a pizza at Black Bear. It's been our town for almost  
7 30 years and we care deeply about its future.

8 Tonight I want to raise my concern about the  
9 annexation the town has announced. I don't have an opinion  
10 yet as to whether the annexation is a good thing or a bad thing.  
11 However, I have a strong opinion that the proposal should be  
12 carefully and thoughtfully considered, and that the opinions  
13 of every stakeholder who might be impacted also be considered.

14 Since this project is huge and impacts folks  
15 in and out of the town, it should, in my opinion, be vetted  
16 and discussed with civic groups, residents, business owners,  
17 and landowners on both sides of the county line and -- county  
18 town line. Time should be taken for people to debate the pros  
19 and cons and for folks to listen to one another until every  
20 voice has been heard.

21 As some of you know, I'm running for the Scott  
22 District Supervisor's seat currently held by Holder Trumbo.

1 If elected, I believe this annexation will be one of the most  
2 important issues we collectively need to address. I'm told  
3 that the town may have the power to annex whatever it wants  
4 without regard to the opinions of its neighbors in the county,  
5 and -- but I hope that the town council will invite active  
6 and meaningful engagement with your counterparts on the Board  
7 of Supervisor. If I'm fortunate enough to be among them, I  
8 promise to bring an open mind and a collaborative spirit to  
9 these discussions.

10 My hope is that our elected leaders, whether  
11 I'm among them or not, will discuss the myriad potential  
12 impacts of an annexation and communicate those impacts to all  
13 stakeholders, listening careful -- carefully to their  
14 reaction and their input, and gain consensus on what is best  
15 for both town and county residents and businesses. Thank  
16 you.

17 TOWN CLERK: Roseanne Woodruff. Roseanne  
18 Woodruff, on deck Jonathan Elliot.

19 MS. WOODRUFF: Yes. My name is Roseanne El  
20 Woodruff. I live at 9255 Tournament Drive, Warrenton. I'm  
21 asking for you to vote no to this nightmare for the reasons  
22 the citizens have already given you virtually to a one. This

1 nightmare will ruin our town. It is the end of Warrenton as  
2 we know it.

3           And just a continuing nightmare. I don't know  
4 what else to tell you that everyone has spoken so eloquently,  
5 so smartly. I'm very proud of the citizens and how much work  
6 and research they have done to give you the reasons and the  
7 rationale why you must say no to Amazon and this absolute total  
8 nightmare that will destroy our town. Please say no to  
9 Amazon. Thank you.

10           TOWN CLERK: Jonathan Elliot, on deck Susan  
11 Russell, Jonathan Elliot on deck Susan Russell.

12           MR. ELLIOT: Jonathan Elliot. I'm at, 10120  
13 Brown Moore Lane. Thank you council members for the  
14 opportunity to speak to you all this evening.

15           It seems to me that there are essentially three  
16 major points to this discussion and if any of the council  
17 members plan on voting in favor of the SUP this evening, I  
18 think it necessary for each of these three points to be  
19 addressed by those council members.

20           First, the impressive number of compelling  
21 reasons against the SUP. We've heard them all this evening.  
22 The noise, the project's conflict with the comprehensive

1 plan, the eyesore, the overwhelming public opposition, the  
2 power lines, the driving down of property values, the  
3 predicted obsolescence of data centers, the planning  
4 commission's recommendation against the SUP.

5           The project is a gateway to further data  
6 centers in the town and the poor incomplete application that  
7 Amazon provided. The second issue that needs addressing is  
8 the complete lack of compelling reasons in favor of the  
9 project. So can the council actually provide any compelling  
10 reasons in favor of it?

11           The third issue that needs to be addressed is  
12 the number of abnormalities surrounding the project. First,  
13 council member Heroux business relationship with Amazon.

14           Second, the opaqueness of the former town  
15 manager's role in the zoning tax amendment for the data center  
16 location. Just prior to taking a job with Amazon Web  
17 Services. Three, the Planning Commission feeling that their  
18 hands were tied when trying to get answers from Amazon.

19           At the last Planning Commission hearing one of  
20 the commissioners said, I think the problem here is that the  
21 applicant is not encouraged to negotiate with us because they  
22 feel they have the town council votes to proceed. And that's

1 a real shade because we only have so much power here.

2 Our conditions can be ignored. Our vote could  
3 be ignored. If the applicant truly felt like we could make  
4 conditions of approval that they had to abide by, I think it  
5 would be a different story but that's not the case. And it's  
6 again, I think it's a miscarriage of justice that the  
7 applicant does not feel the need to sweeten the offer so to  
8 speak and quote.

9 And finally, the withholding emails between  
10 town and Amazon has requested through FOIA. If no council  
11 members plan to vote in favor, that's great. If any do, I  
12 think all three of these things need to be addressed. The  
13 reasons against, the complete lack of reasons given for and  
14 the abnormalities around the process.

15 These things are not addressed. It makes a  
16 certain conclusion hard to resist that there are in fact no  
17 sufficiently compelling reasons only nefarious ones. Thank  
18 you.

19 TOWN CLERK: Susan Russell. On deck Redmond,  
20 Mary Air. Good. That's Susan, Susan Russell.

21 MS. BURBANK: I'm sorry. I'm Cindy.

22 TOWN CLERK: You're not yet Ms. Burbank, it's

1 Susan Russell first.

2 MS. BURBANK: Okay. Sorry. Go Susan.

3 MS. RUSSEL: Okay. Hello. I am Susan  
4 Russell and I live -- I am not a town resident, but I live  
5 about a quarter of a mile away from the town limits. I have  
6 lived in Fauquier County for 47 years and shop and get my mail  
7 in the post at the post office. So I'm in town often.  
8 Despite the fact that the population of the town has grown  
9 from 5,000 people in 1990 to 10,127 in 2019.

10 And the county has gone from 32,000  
11 individuals in 1976 to 73,000 in the county in 2020, the town  
12 in the county officials have not lost sight of what makes  
13 Warrenton attractive to old timers like me, newcomers and  
14 visitors. We have a town and a county that is steeped in  
15 history culture, and agriculture.

16 Those of us who have lived here are proud of  
17 the small town feel and rural character that makes us unique.  
18 Smart planning and forward thinking by officials has been the  
19 reason why we have grown but not lost our identity.

20 I have seen a drastic change of attitude by the  
21 leaders of the town by their secretiveness and sometimes  
22 questionable plans for the town and county as well as their

1 lack of concern about what the public wants evident by totally  
2 ignoring any attempts by individuals or communities who ask  
3 questions. There has been no transparency at all.

4           Tonight I am focused on the so-called  
5 borderline adjustment proposal. A good percentage of the  
6 land in question is presently zoned as rural, low density  
7 housing or rural agriculture. Is without -- where'd that go  
8 -- is without -- htese areas are without water or sewer  
9 presently. When town officials have been asked what is their  
10 long-term plan for the open space, they have given no answer.

11           Do they have one or is that also a secret? Who  
12 is going to pay for all of the infrastructure we needed for  
13 such a massive adjustment? The public that's -- the public  
14 that's who. A public who does not want their town or county  
15 turned into another suburb of Northern Virginia.

16           And what about the plan to add two more  
17 bypasses to accommodate the development of the land annexed?  
18 These roads would cut through a few already established  
19 communities and destroy trees and uproot wildlife, both of  
20 which are an integral part of living in a rural area.

21           And what about our gateways into the town that  
22 were the subject of a resolution to protect those gateways

1 a few years back. Gateways that advertise our character and  
2 set us apart from the overly developed used to be towns such  
3 as Leesburg and Manassas.

4 I have spoken to many people who moved here  
5 from those used to be towns to get away from the  
6 overdevelopment that created higher taxes, more road  
7 congestion, more crime and the alienation that comes from  
8 living in that type of environment.

9 We do not want to lose what we have. I believe  
10 that with some imagination -- Imaginative thinking and  
11 planning, we can survive quite easily while we preserve the  
12 quality of life that so many of us hold so dear. Thank you.

13 TOWN CLERK: Thank you. Ms. Russell Redmond  
14 Manier, Redmond Manier. On deck Juan Archilla and Anne  
15 Ziegler.

16 MR. MANIER: I'm Redmond Manier. 3489  
17 Landmark Road, the Plains. And my son is now a fourth  
18 generation resident of Fauquier county. You may already know  
19 that our county was once the western part of Prince William  
20 until it was petitioned off in 1759 and named Fauquier.

21 This beautiful home we all share is one of the  
22 best examples of thoughtful land conservation in Virginia and

1 indeed in the nation. But it is still vulnerable to unwise  
2 decisions by local government.

3           Regarding Amazon, if you let this camel's nose  
4 under the tent soon you'll have more camels than you could  
5 bargain for, followed by the goats, the sheep, the dogs, the  
6 chickens, the works. At that point, you might as well rejoin  
7 us to Prince William for the two counties will then be  
8 indistinguishable from each other. Just don't do it.

9           TOWN CLERK: Thank you sir. Juan Archella  
10 Juan Archella on deck and Ziegler then Mr. Kevin O'Neill.

11           MR. ARCHELLA: Good evening. I'm Juan  
12 Archella. I live in 7485 Eddington Drive, Warrenton,  
13 Virginia, which is in the Brookside development in the Scott  
14 District of Fauquier County. I'm one of the co-leaders in  
15 the Brookside to spread the word about the Amazon data center  
16 and its related transmission power lines and substation.

17           We're thankful that the maining chamber of  
18 Power tower routes to avoid our area. I can tell you that  
19 there is still very strong opposition among our 1050  
20 homeowners to the proposed Amazon data center and any new  
21 transmission power towers in Warrenton.

22           We dine shop and tour the town of Warrenton

1 because we love the small town charm of it and how it is in  
2 stark contrast to other more industrialized areas in Northern  
3 Virginia that has similar data centers and power towers.  
4 Supporting the Amazon data center we feel is starting a risky  
5 precedent that could change the nature of the town and the  
6 things that draw people to visit the town.

7           How is a massive industrial building with some  
8 50 to 100 HVAC units roaring 24 /7 on the rooftop a welcome  
9 into the gateway to the town. Not to mention the new 120 feet  
10 power towers and new substation needed down the road. It  
11 opens Warrenton to the same dominance of data center business  
12 that has changed the character of Loudoun and Prince William  
13 counties.

14           If asked the question, what does Warrenton  
15 want to be? Is it being a home to data centers and their  
16 needed power towers, what you want it to be? If one reads  
17 the town's comprehensive plan, the answer would be a clear  
18 and convincing no.

19           But if this application is approved, multiple  
20 successive applications likely will follow to dominate the  
21 use of similar land tracks and predictably result in even more  
22 substantial overhead transmission power towers to blight the

1 small town charm of Warrenton in rural countryside of Fauquier  
2 county, just as we've seen in neighboring counties.

3 Please I urge you to heed the practically  
4 unanimous opposition against the town -- amongst town and  
5 county citizens against the Amazon Data Center. Your own  
6 planning commission's recommendation for denial of the  
7 special use permit. And please vote no against this Amazon  
8 Data Center special use permit. Thank you.

9 MR. NEVILL: Thank you, sir.

10 TOWN CLERK: Kevin O'Neill, Ann Ziegler.  
11 Jessica Matthews on deck. Ann Ziegler and Jessica Matthews  
12 on deck.

13 MR. O'NEILL: Good evening. My name is Kevin  
14 O'Neill. I reside at 7382 Hope Lane, Warrenton, Virginia  
15 20187. I am the director of the Fauquier Climate Change  
16 Group. And I am not a resident of the city obviously, but  
17 we have several members who are residents and I'm here to make  
18 a statement for our group.

19 Everybody has been very eloquent, they've  
20 talked very well. You've all heard probably 90 percent of  
21 the reasons. I'm going to be selfish and try and keep this  
22 as short as possible if I possibly can. I want to make three

1 points. The first point, Fauquier place is a special place  
2 and that we are all neighbors.

3 This is the common theme. I wrote an op-ed on  
4 this probably close to a year ago and I believe it in my heart.  
5 Amazon in my opinion is not acting like a good neighbor. As  
6 one example, as so many people have said, they haven't shown  
7 the respect to finalize their noise assessment because they  
8 don't think they have to.

9 They think this is a lock. They are treating  
10 the town like a bunch of rubes who just fell off the turnip  
11 truck coming into town and they're acting like a bunch of  
12 sharpies who figure they can do what they want because they're  
13 Amazon, they're big.

14 Point two, what are they going to bring to  
15 Warrenton and the county that makes dealing with them  
16 worthwhile to us, money? One lesson I have learned in life  
17 is the easiest thing in the world to make is money. If you  
18 make your decisions based on that, you're making a bad  
19 decision.

20 The jobs will not be there. People have  
21 already discussed that. They'll have, according to Mr. Foote  
22 50 positions, there may be 10 for maintenance and so forth

1 that people in Fauquier county can get. They'll bring in a  
2 few experienced managers and the rest will be new grads from  
3 UVA or from Virginia Tech because they're cheaper and they  
4 know stuff.

5 They're more up to date. Those people are  
6 going to live up in Fairfax or in Arlington, not here.  
7 They're not paying taxes here. I worked up until about 10  
8 years ago for a company that has many data centers around the  
9 world. That is a recurring thing.

10 My third point and the last one, this is not  
11 a train that's on a set of tracks. This is not an either or  
12 decision. What we need to do is look at this again and see  
13 if there's a better place to put the data center. Thank you.

14 TOWN CLERK: Jessica Matthews, Katherine  
15 Hayes, Jessica Matthews, Katherine Hayes.

16 MS. MATHEWS: This seems to be the disabled  
17 part of the -- my name is Jessica Matthews. I'm a resident  
18 of Marshall, 111329 Pasture Lane. Have been for 40 years.  
19 And in that time I've been enormously impressed by the  
20 farsighted land use planning that has allowed this county to  
21 preserve its character while Loudoun and Prince William have  
22 lost theirs. I'd like to make just three points.

1                   First, with due deference to the public  
2 service that you all provide, it would be the height of  
3 irresponsibility to vote to approve an proposal or even to  
4 hold a vote on a proposal about which there are so many  
5 unanswered questions. As many others have listed them.

6                   Noise, electrical supply, alignment with the  
7 comprehensive plan and many others that the essential  
8 elements of this proposal have changed constantly over the  
9 months.

10                   Second, you are not considering a single  
11 proposal. You are setting a precedent. Everyone in this  
12 room knows that if you open this door, a tidal wave of others  
13 will follow. And on what basis would you turn them down? You  
14 must consider this to do your duty in its long-term context.

15                   And third, the process that has led to tonight  
16 is not one that any of us can be proud of. Democracy is a  
17 two-way street. The citizens here tonight and at so many  
18 other meetings are doing their duty. They're asking  
19 questions, they're not hearing answers. We ask tonight that  
20 you provide those answers before you hold a vote. Thank you.

21                   MR. NEVILL: Thank you, ma'am.

22                   TOWN CLERK: Katherine Hayes. Laura

1 Hettinger, Brian Haggerty.

2 MS. HAYES: Good evening. I wanted to  
3 emphasize that I think whatever happens in the town does  
4 affect all of us in the county. My name is Catherine Hayes.  
5 I reside outside the town limits off Bear Waller Road. I have  
6 followed very closely the controversy regarding a proposal  
7 to establish a data center in an unacceptable location and  
8 where it is considered an incompatible use of land.

9 I applaud the awesome leaders and the  
10 organizations of concerned citizens who have voiced such  
11 strong opposition. I don't have to go through all the reasons  
12 that you've already heard and we all know very well of what's  
13 wrong with having a data center in the proper and an improper  
14 place.

15 And so there's been a wealth of unfavorable  
16 facts and figures that have been circulated through the news  
17 media and the negative comments from experts cannot be  
18 ignored. You are about truly obligated to perform your  
19 fiduciary duty to serve in the best interest of the public  
20 good. Your decision will not only impact all of us, but will  
21 put at stake the future of a special place that we often call  
22 the crown jewel of the Piedmont.

1                   Please deny this application. Go back to the  
2 drawing board to prepare and share with the county officials  
3 a better land use plan. There will be future proposals for  
4 data centers and I think we need to be prepared. Thank you.

5                   TOWN CLERK: Thank you ma'am. Laura  
6 Hettinger. Brian Haggerty. Brian Haggerty.

7                   MR. EDINGER: I'm Dave Edinger, speaking for  
8 my wife, Laura.

9                   TOWN CLERK: Perfect.

10                  MR. EDINGER: Thanks. Good evening. I  
11 resent the fact being here tonight. I've been to three of  
12 the previous meetings with the Planning Commission. We have  
13 all these people have spoken eloquently about why we  
14 shouldn't, I haven't heard one thing about why we should have  
15 this in our town Warrenton.

16                  I've read in the newspapers, I haven't seen  
17 anything other than so-called revenue, but I have yet to see  
18 anything in writing that says this is good for Warrenton. In  
19 all my years of experience, I've been to -- this is probably  
20 my first time speaking in front of the town council but there's  
21 two type of people that worked for town council.

22                  People that want to save something, want

1 something to not change or there's people that want to change  
2 something either for profit or directly or indirectly or for  
3 benefit. Which begs the question, why are you guys here and  
4 what is your motive?

5 I don't -- I haven't heard a thing in the media  
6 about any of you one way or the other. Are we -- we want it  
7 because of this or we want it because of that, or we don't  
8 want it. I haven't heard anything. I've been here two  
9 years, I haven't heard anything. Why do we want this in our  
10 town? That's a good question.

11 I think that needs to be answered. I hear  
12 about NDAs. I would just -- I didn't follow the turn up truck.  
13 NDA can't be a good thing. You're hiding something. I don't  
14 understand why the government would allow something like that  
15 but NDA is telling me there's a secret and the citizens of  
16 Warrenton don't know what that is.

17 As everyone else has mentioned. I can't think  
18 of a good reason why it's here. Power lines, ugliness, noise.  
19 You go to Ashburn, you go to Manassas, you go to Gainesville.  
20 Is that what you want to drive through? I don't. The reason  
21 why I'm here today is because I'm debating whether to stay  
22 here in Warrenton.

1 I just bought a house two years ago and I'm  
2 already thinking I'm selling it. So I wish the council  
3 members think long and serious on this and hopefully vote  
4 against it. Thank you.

5 TOWN CLERK: Thank you, sir. Ryan Haggerty.  
6 Ryan Haggerty, Corey Ann (Inaudible)

7 MR. HAGGERTY: I already spoke. Thank you.

8 TOWN CLERK: Roy Stefanik. Anne Ziegler.

9 MS. ZIEGLER: Good evening counsel. Thank  
10 you for listening to all of us. My name is Anne Ziegler. I'm  
11 a Scott District residence for 17 years. That doesn't sound  
12 like much but for me, I've never lived in any house more than  
13 four years in my whole life as a Navy daughter, as an Air Force  
14 veteran and then as a Navy wife following around my retired  
15 naval aviator.

16 I am not an activist. I am just one of the many  
17 residents of the area that does not wish to see this town  
18 turned into an industrial wasteland. You know the reasons  
19 why we don't want it. But ask yourself why did Amazon choose  
20 to overpay for a field in our town?

21 They could have bought land anywhere and they  
22 do buy land everywhere. Why here? Why take us on because

1 we're a bunch of pumpkins that they can just, you know,  
2 overwhelm. We're too stupid, too greedy to worry. Or is it  
3 because our leaders were for sale? That question has come  
4 up. I don't know.

5 Show us you represent Warrenton and its  
6 residence. Do not roll over for a giant company's blatant  
7 disregard for a small town. Do not sell us out for some  
8 unknown amount of money. Some pittance that Amazon tosses  
9 at your feet. A pittance that apparently they get to  
10 quantify.

11 Can you really trust anything coming from this  
12 applicant knowing that the half-truths and falsehoods are in  
13 the playbook? We saw that from Mr. Fietz's publication. So  
14 please, I ask you to be the council that saves Warrenton, not  
15 the council that destroys it. Be the council that we admire,  
16 trust and respect, not the one that we despise for ruining  
17 our home.

18 TOWN CLERK: Corey Ann Payford. Roy  
19 Stefanik. Diane Rotman, Rotman. Corey Ann Payford. Roy  
20 Stefanic, Diane Rotman, Kristen Snow.

21 MR. STEFANIK: Good evening. Roy Stefanik,  
22 5731 Wilshire Drive in Warrenton. I don't have a lot more

1 to add here. Amazon has had multiple chances to make their  
2 case and they repeatedly failed to meet the standards  
3 necessary to make the project acceptable.

4 This has been presented by our large swath of  
5 concerned citizens in a myriad of different ways and in many  
6 various aspects of the Amazon request. Again, the undeniable  
7 fact is Amazon fails after being given many chances to meet  
8 basic requirements on several metrics within the allotted  
9 time to make the data center work.

10 On many occasions, Amazon has shown itself to  
11 be consistently untrustworthy. It doesn't inspire  
12 confidence either that Amazon announced that it's laying off  
13 over 18,000 employees starting January 18th. Many in the  
14 technology organization and its stock fell 50 percent last  
15 year.

16 The Planning Commission denied authorizing it  
17 outright because of a plethora of reasons. This is very  
18 straightforward and I can't make my point any clearer.

19 Please say no to the data center. Thank you

20 TOWN CLERK: Diane. Rotman, Kristen Snow.

21 MS. ROTMAN: I just want to make sure

22 (inaudible) Citizen's Time.

1 TOWN CLERK: The Citizen's Time. Yes, ma'am.

2 MR. NEVILL: This should be on items not  
3 associated with the public hearing.

4 MS. ROTMAN: Very good. Good evening, Mr.  
5 Mayor, council members, my name is Diane Rotman I reside at  
6 280 Gay Road as a town resident. As we start a new year, I  
7 wanted to publicly recognize the town employees for their  
8 commitment to the residents and visitors Our town employees  
9 consistently prioritize the needs and concerns of the  
10 residents and visitors.

11 Warrenton employees exhibit awareness,  
12 empathy, and professionalism in their interactions. I am  
13 always impressed and appreciative when interacting with any  
14 town employee. So I want to say thank you to all of our town  
15 employees and every person that is employed by the town to  
16 let them know their efforts and commitment are recognized.

17 In reviewing the job announcement for the  
18 recruitment of a new town manager. I was a little stunned  
19 to see that the management of town employees ranks ninth only  
20 above all other duties as assigned in the job responsibilities  
21 section of the job announcement.

22 Well interaction, meeting, working with

1 counsel, following policy procedure, regulations, laws  
2 occupies the first four bullets of the job responsibilities.  
3 I can only hope that this was an oversight by the contracted  
4 recruiter, Baker Tilley.

5           And because our employees need and deserve a  
6 leader who will have excellent communication thoroughly and  
7 accurately communicate with them, know their team and how to  
8 connect a level of diplomacy. They must have self-awareness,  
9 have and can manage change, and be collaborative at all levels  
10 of the town organization and town management as well as have  
11 critical thinking skills and adaptability.

12           As the job announcement winds down and the  
13 selection process begins. I sincerely hope everyone  
14 involved will remember the leadership qualities while not  
15 referenced in the job announcement by the contracted  
16 recruiter. The new town manager will need as the town moves  
17 forward to the future and fulfilling the entire job duties  
18 and responsibilities for the position. Thank you.

19           MR. NEVILL: Thank you, Ms. Rotman,

20           TOWN CLERK: Kristen Snow, Cynthia Burbank,  
21 Dale Seitz, Sandra Seitz. You're on deck. Kristen Snow,  
22 Cynthia Burbank, Dale Seitz, Sandra Seitz

1 MS. BURBANK: Before you start the clock, a  
2 lot of our citizens are confused who've been called up because  
3 they thought they signed up for public hearing time. So I  
4 just want to assure you, this is not a plot on the part of  
5 the citizens here. They -- there may have been a mix up in  
6 the computer or something but they intended to be speaking  
7 during the public hearing time, but I intend to speak at  
8 Citizens Time.

9 My name is Cindy Burbank Barnell Court  
10 Warrenton. I have some positive things to say, so you know,  
11 I won't be talking about Amazon. Tonight I believe you will  
12 be recognizing several individuals through resolutions of  
13 gratitude for their service.

14 I would like to single out two of them and also  
15 suggest a third entity who deserves your gratitude and praise.  
16 Ali Zarabi, Renard Carlos, and the good citizens of this town  
17 and county. First Ali, an extraordinary gentleman who has  
18 given 18 years of conscientious, thoughtful service on the  
19 Warrenton Planning Commission.

20 Eighteen years throughout that time, Ali  
21 always did his homework, always focused on the citizens and  
22 the town and was thoughtful and courteous. Ali has a huge

1 fan club around this town and we are very grateful to him for  
2 his service. We all are in great debt of gratitude.

3           Second Renard, in many ways a younger version  
4 of Ali always courteous, thoughtful, considerate,  
5 respectful, focusing on the best interests of the town where  
6 he grew up. I recall running into someone who knew him and  
7 his mom for almost forever and this person said his mom raised  
8 Renard and his brother right.

9           What higher praise for him and for his mom. He  
10 has spoken up for more transparency in government and to  
11 listen to the citizens because he realized the citizens had  
12 something valuable to bring to the table. He came within 11  
13 votes of being our mayor, 11 votes and conceded at the end  
14 with great grace. So thank you Bernard.

15           Third, the citizens of Fauquier and Warrenton.  
16 The people here appreciate what a special place this town and  
17 county are. How many times have you heard that from them?  
18 That term special place, they mean it. And that's where  
19 they're coming from in all their comments to you.

20           Most -- it is a charming and historic and  
21 beautiful town and county, but most of all it is special for  
22 its residents who are smart, neighborly and conscientious.

1 They speak honestly from the heart and they truly understand  
2 why this place deserves protection from the kind of  
3 development we see in neighboring counties. Sorry, prince  
4 William.

5 At the end of a planning commission hearing  
6 about a month ago, Selma Rosen said, to the people of Fauquier  
7 County, listening to your remarks and comments, they're  
8 amazing. They're absolutely amazing. You guys have thought  
9 through so many different things and presented so many  
10 different ideas. The quality of the comments is just  
11 extraordinary. I say amen to that and ask everyone here,  
12 patch yourselves on the back and your neighbors --

13 MR. NEVILL: Thank you Ms. Burbank.

14 MS. BURBANK: Thank you

15 TOWN CLERK: Kristen Snow. Kristen Snow,  
16 Dale Seitz on deck Sandra Seitz.

17 MR. SEITZ: How you all doing tonight? I'm  
18 Dale Seitz. I live at 6642 Riley Road in Baltimore, Virginia.  
19 I'm a former residence in the -- of the towns of Oak Springs.  
20 I'm a student at Kettle Run and Fauquier high school. To  
21 start we've heard a lot of things about the data center.

22 You've guys listened for -- God knows how long

1 but, we'll be raising the taxes on our people, everyone  
2 working in the county here going to get a booster -- boost  
3 on their taxes, losing money. You're not going to make a  
4 penny more.

5           To continue, this will put a strain on the  
6 amenities of our county especially like our water and what  
7 not, our sewer, our electric. Considering the fact that  
8 we're going to have to run a whole another bit of electric  
9 to it just to power it. Data center like I was saying won't  
10 power itself.

11           It's going to use a good bit of Dominion's  
12 fossil fuel power generating tons of CO<sub>2</sub> and everything else  
13 in our environment. There's numbers on that, but to give you  
14 an idea. The noise, Oh Lord, I like to compare it to a box  
15 fan. Running on high outside your window, 24/7, 365 never  
16 goes away. Droning on and on.

17           Sound studies were blown out of Amazon's  
18 polluted water by a retired NASA scientist. The balloon test  
19 was a joke. Cooling wise, the air handlers removed the heat  
20 from the inside, but heat got to go somewhere, don't it? It  
21 goes out. So any of you guys that are into quality of our  
22 air or global warming or any of that, that'll affect that.

1                   Did I mention it'll all be loud? Removing --  
2 talking about the lot itself. They were talking about  
3 removing a great amount of the trees obviously place the data  
4 center, but they're going to leave some of the outer skirt  
5 trees to help block it for spring and summer because that's  
6 not going to block it in the fall and winter when all the leaves  
7 fall off our trees.

8                   This is going to forever change Warrenton and  
9 Fauquier county as itself. It's going to change the total  
10 feel and the outlook. At this point we might as well bulldoze  
11 the high school. It's already got water and electric there,  
12 place it up there.

13                   I've never been big into Washington DC and this  
14 town itself has never been big like Washington DC We reside  
15 in a small, quiet, and quaint town that resides over an hour  
16 away from all that rush and city feel. Amazon's been  
17 everything but truthful and trustworthy towards us as a town.

18                   As a community as a whole. Think of the future  
19 and the long-term effects to our town and county. And as I  
20 like saying, what good is a giant junkie data center we're  
21 going to bring to our little town and county. Anyway, thank  
22 you.

1 TOWN CLERK: Sandra Seitz. Sandra Seitz.

2 On deck Jean Banish.

3 MR. SEITZ: Hi, my name is Sandra Seitz. I  
4 live at 6642 Riley Road, new Baltimore, and I am strongly  
5 opposed to the Amazon Data Center. I've lived here 42 years,  
6 24 of those were here in town. I still own that home as a  
7 rental in the towns of Oak Springs and it would be greatly  
8 impacted by this data center.

9 As a self-employed single mom, I count on that  
10 income and the value of the property. Over the past six  
11 months, hundreds of citizens have spoken to the town council  
12 and the Planning Commission with overwhelming opposition to  
13 this data center.

14 2000 residents of this town and county have  
15 signed the petition that calls on you to deny the Amazon data  
16 center and that list is growing. We are angry about the  
17 closed door process that gives Amazon's special treatment and  
18 locks out citizens. This destroys our trust in you as  
19 Warrenton's town government.

20 Even worse, you continue to allow them to lead  
21 this process. We already know that Amazon co-wrote the  
22 zoning amendment and has forced a vote on their SUP and the

1 facts remain that Amazon has proven that they are unreliable,  
2 untrustworthy, and have already presented us with deceitful  
3 and inaccurate studies.

4           We know this because it has been proven. You  
5 all know this deal is shady and so do we. The very future  
6 of our town is at stake. How can you favor Amazon a  
7 trillion-dollar company over the hardworking families of your  
8 own town? We don't want to be like our neighboring counties  
9 overrun with data centers and power towers.

10           We live in a beautiful, unique historic area  
11 that we all call home and it's why so many residents flee our  
12 neighboring built out counties to come live here. So we need  
13 to protect it and treasure it, not destroy it. If you choose  
14 to approve this Amazon data center against the will of the  
15 people and the overwhelming amount of opposition, then you  
16 will lose the trust in support of the citizens and this town  
17 cannot function without it.

18           Do you recall the words of the Warrenton's town  
19 mission statement? If you say yes, then read it again closely  
20 because the process that you have been following is not  
21 consistent with this mission statement that says, in  
22 cooperation with and for our citizens, the mayor, town council

1 and staff of Warrenton are dedicated to providing public  
2 safety, economic opportunity, and quality public services in  
3 an attractive well-planned community with historic character  
4 for the benefit and enjoyment and accessibility of all.

5           So we ask that you keep your word and honor your  
6 pledge to serve and protect the residents of Warrenton. And  
7 do not approve the Amazon data center. Please do the right  
8 thing and vote no. Thank you all for your time.

9           TOWN CLERK: Jean Banish on deck. David  
10 Dobson and Amy Trato.

11           MS. BANISH: Good evening Jean Banish Scott  
12 District. It has been a real pleasure with this shall I call  
13 it opportunity to meet and talk with all of my neighbors near  
14 and far. Since this plan was submitted, you have each had  
15 time and means to gather information from all your  
16 constituents about how they would elect to fill their needs  
17 and the needs of the community.

18           Only the newest members of the council have  
19 been doing that instead of decision making in the vacuum of  
20 selective information that was manipulatively fed into the  
21 town hall system by this plan's applicant. It would be wiser  
22 to defer to more broadly informed views fresh from the field

1 instead of promoting a personal sense of budgetary  
2 desperation.

3           We all get that you are afraid to the point even  
4 of fashioning your neighbors here to help you as the enemy  
5 and then squandering the opportunity you have had to utilize  
6 our talents toward improvement. Tomorrow, Warrenton will  
7 have the same problems it has today, but will it have also  
8 broken the spirit of neighbors and youngsters who came  
9 together to unite and offer their best efforts.

10           You are seeing that rare and precious event  
11 disappear. It depends on whether you vote to either dig into  
12 work with all of us or else sell out your community to a poorly  
13 sided and inadequate data center plan. Bypass pangs of pride  
14 and of being critiqued for sitting up on a dais and really  
15 understand the value of the expressions people have put their  
16 lives on hold for to bring to you.

17           No resident wants to lose their own choices and  
18 opportunities that you can't see just because one of you by  
19 one vote forces Warrenton to become locked into the data  
20 center company store wave that proceeds to swallow up and  
21 drown this region until one of you, one, shows the fortitude  
22 to start bringing it into check and to work with your residents

1 to figure out saner and more humane ways to handle our  
2 problems.

3                   Statistically, 87.5 to 100 percent in each  
4 town ward, 99 percent regionally, well over the absolute  
5 minimum threshold standard of two thirds are saying it is an  
6 error to approve this plan. No matter how many advantages  
7 are statistically given to the insignificant and often  
8 anonymous expressions in favor of this plan, including by  
9 Amazon and Dominion employees whom I have found are not at  
10 all always for it.

11                   MR. NEVILL: Thank you Ms. Banish.

12                   MS. BANISH: I have two more minutes.

13                   MR. NEVILL: Ma'am.

14                   MS. BANISH: Could you?

15                   MR. NEVILL: This is the citizen's time not  
16 part of the public hearing.

17                   MS. BANISH: Should I continue it later?

18                   MR. NEVILL: Yes. For the public hearing --  
19 for the -- you -- for the organization you have the five  
20 minutes. David Dobson. On deck, Amy Trato and Kirk Goldsby.

21                   MR. DOBSON: Hello Mr. Mayor, members of the  
22 town council, town staff and all the supporters. I'm here

1 obviously in support of AWS. Seems odd, but it's true. Let  
2 me tell you why. Number one, we've heard a lot about what  
3 people think AWS will bring to the town, but we haven't heard  
4 what others have brought to the town such as OVH Data Center,  
5 which does not have noise, vibrations or humming or TerraMark,  
6 Equinix at the gateway to Culpepper, which does not have  
7 noise, vibrations or humming or Fawkia's own hospitals, huge  
8 chilling plant which has no humming, vibrations or noise.

9           Then you're thinking, well wait a minute, what  
10 about Bear Waller Road and the Warrenton Data Center there  
11 that's owned by the federal government? Well, that is the  
12 answer. The federal government doesn't have to listen to  
13 you, doesn't have to listen to the Planning Commission,  
14 doesn't have to listen to any of the public.

15           It's a force to itself. So there are reasons  
16 why good things are happening now and it's important that we  
17 look at those, not just throw knives, throw bricks, throw  
18 stones at things that could be good.

19           Now number two, what have we forgotten to talk  
20 about? The what if. What is the what if here? The what if  
21 here is 1,300,000 square feet of by right logistics  
22 distribution center that could be built without talking to

1 you, without talking to the Planning Commission, without  
2 talking to the public, without talking to anyone. So is that  
3 better for the town of Warrenton?

4           No taxes, heavy duty traffic. 1000 employees  
5 just like Amazon did in Richmond, just like they did in  
6 Baltimore and just like Stafford is doing on Center Park  
7 Parkway and Courthouse Road. So the what if needs attention,  
8 you can't just ignore tomorrow. You can't ignore tomorrow.  
9 It could be -- would be a lot worse. Tractor trailers are  
10 not known for their friendliness.

11           And then finally, let me talk about some of the  
12 statements. Now, I believe in free speech. It's a brand new  
13 year and I'm happy for everything because guess what? I'm  
14 from Georgia and if you watched that game last night, you saw  
15 a 65-7 victory and you saw better than that Nick Saban saying  
16 that Georgia was a great football team. So I feel good. Now  
17 the last thing though is just that there will be benefits.

18           If you're a homeless person, if you're a social  
19 senior citizen, if you're a student, if you're somebody who  
20 needs help, they'll bring it. \$4 million a year, 500,000 in  
21 water and sewer payments for availability fees and then  
22 everything past that. So there are good things. I'm just

1 saying. Please --

2 MR. NEVILL: Thank you, sir.

3 MR. DOBSON: -- give them the shift they  
4 deserve.

5 MR. NEVILL: Thank you Mr. Dobson.

6 MR. DOBSON: Thank you very much.

7 UNIDENTIFIED SPEAKER: Amy Trato. On deck,  
8 Kirk Goldsby and Grambo Jeffrey.

9 MS. TRATO: Good evening Mayor, town council  
10 members, Amy Trato from Scott District. I wanted to talk to  
11 you tonight about Dominion Energy's letter to the town,  
12 wherein Dominion Warren, the town that if it seeks development  
13 from the data center industry, you will have the need for more  
14 transmission lines, which will be above ground and more  
15 electrical infrastructure in the future.

16 The Dominion Energy sent the same letter to the  
17 county. And at the Dominion presentation during your work  
18 session last month, the foundation for that letter, was  
19 inquired into the Dominion representative and they confirmed  
20 that Dominion has indeed have interest from other data centers  
21 that want to pursue development in the town and in the county.

22 You asked those representatives if they had

1 information about it and they did not and they referred you  
2 to the economic development team. So I was wondering if that  
3 has been pursued and if not, I would ask that you pursue,  
4 asking the Dominion Economic Development team what future  
5 they know about so we can look at the whole picture.

6 Also, today the same questions were asked of  
7 Jay Renkie with Amazon, and I believe that you asked the wrong  
8 person today. According to the Amazon presentation, you do  
9 have the economic development person here, Becky Ford and this  
10 is a rare opportunity for town council probably to explore,  
11 Amazon's Data Center plans for the town and the county. So  
12 I would ask you to pursue that please. Thank you.

13 UNIDENTIFIED SPEAKER: Kirk Goldsby, Grambo  
14 Jeffrey.

15 MR. GOLDSBY: Hi, I'm Kirk Goldsby, I live at  
16 173 Main Street, in the town Warrenton. Thank you all for  
17 being here tonight. I think I've said it in the past that  
18 you have a very thankless job and you do a lot of work that's  
19 unseen. I fully appreciate that. I'm standing up here, not  
20 to say anything new because I think everything that needs to  
21 be said has been said, at least the things that I could think  
22 of.

1                   So that's one of the beauties of standing up  
2 late is people have already covered most of the points. The  
3 point that I'd like to make is this, I've lived in the county  
4 and the town for most of the last 30 years. Well, I've lived  
5 in the county for 30 years and the town for the last, what,  
6 16 years or so.

7                   And I -- and I'm sure 99 percent of the people  
8 who are speaking tonight would say the same thing. We live  
9 here because this town is a jewel. When I moved here in 1993,  
10 there were a lot of towns that looked like this but many of  
11 them have done it wrong and they are no longer the jewels they  
12 once were.

13                   Warrenton is one that stands still as a jewel,  
14 and we want to keep it that way, and I would hope you would  
15 want to keep it that way as well. This proposal to have this  
16 stain on the edge of town in my view is not the right way to  
17 do. Please preserve this jewel and please do what you can  
18 to stand in the way of this proposal going forward. Thank  
19 you.

20                   MR. NEVILL: Jeffrey Grambo, Jeffrey Grambo.  
21 On deck Larry Colick.

22                   MR. GRAMBO: Good evening Town Council and

1 welcome to Council Member Moony and McGuire. Glad to see  
2 you're up here. My name is Jeffrey Grambo I live at 300  
3 Winchester Street and have been a resident of the town of  
4 Warrenton for over 18 years. As I said before at the  
5 supervisors' meeting, I've never seen such a -- such an issue  
6 garner so much attention.

7 I've written to each council member, the four  
8 that voted for the vote tonight to tell me why this SUP is  
9 so good for the town. What am I missing? Only Council Member  
10 Heroux has responded to me. I'm still waiting to hear the  
11 reason why the data center is such a good idea for this town.

12 The council to me has not been honest about the  
13 rezoning of the property in question and the trashing of the  
14 Warrenton 2040 plan. Tell me why the Amazon would spend  
15 millions of dollars for a piece of property if they were not  
16 guaranteed approval to construct a data center on the -- on  
17 that site.

18 These facts can't be ignored. I've heard that  
19 the council examined the facts and make the best decision  
20 possible, but after reading the handwriting on the wall, I  
21 don't believe it. I have to consider putting my house up on  
22 the market. I'll be sure when I put the house up, I'm going

1 to have to disclose that I can hear the Warrenton Data Center  
2 24/7 in the required disclosure, which probably result in a  
3 lower asking price.

4           So I need to ask if property values go down,  
5 will the tax appraisals go down too? I urge you to vote  
6 against this special use permit and I -- but unfortunately  
7 I think I'm standing here wasting my time. Thank you.

8           MR. NEVILL: Larry Colback. On deck Richard  
9 Rose, Brandon Wilson.

10           MR. COLBACK: Before you start the clock  
11 though Mayor, I just want to say as a citizen this is very  
12 confusing. When we came in, we were asked if we, you know,  
13 to sign up either to an agenda item and people are speaking  
14 at public hearing. So I want to just still reserve, you know,  
15 my right. I'm here to speak at the public -- at the citizens'  
16 time right now. So anything I say to right now I do not want  
17 to be construed if I happen to put a word in there that is,  
18 you know, associated with --

19           MR. HAMBY: (Inaudible) public hearing time  
20 (inaudible) public hearing.

21           MR. COLBACK: I -- I'd signed -- right now I'm  
22 signed up for citizens' time.

1 MR. HAMBY: Okay, do you mind to --

2 MR. COLBACK: I want to reserve that right.

3 MR. HAMBY: You can to the point (inaudible).

4 MR. COLBACK: Okay. That's, what I wanted to  
5 -- okay basically as -- yeah, I'm just here for citizens' time  
6 right now and really what I wanted to do is I just wanted to  
7 welcome our new at large council members, you know, thank you  
8 very much for serving.

9 And I also wanted to thank Councilwoman  
10 Sutphin for a recent decision that I was on an issue that came  
11 up before the council a number of months ago, the Planning  
12 Commission made a -- what I feel was to be a wrong decision.  
13 They voted to approve a special-use permit for a gas station  
14 up at Harris Teeter.

15 That came before the council and I think during  
16 discussion at the council. Some of the arguments against it  
17 were -- that were rightly brought up was that it had negative  
18 health impacts. At that time they were talking about  
19 possible gas fumes and things of that nature, but also it did  
20 not fit the location.

21 And then also the other thing said that  
22 citizens don't want it. And I thought -- I think those were

1 very valid and very important arguments to deny that  
2 special-use permit. So for the new, at large council  
3 members, I hope you hold the same standards for other  
4 special-use permits because of all that -- you know, things  
5 that were coming up and then things that are on the, you know,  
6 just current events here in town, I went back and I started  
7 looking at the comprehensive plan, you know, kind of a little  
8 bit more thoroughly.

9 I did notice that the comprehensive plan does  
10 not really address one of the items that you're going to hear  
11 about tonight. Obviously you heard a lot of it tonight, but  
12 it's data centers. No mention in the comprehensive plan.  
13 But then also in the comprehensive plan the Newtown Warrenton  
14 Character District, I think is fairly phenomenal. I mean,  
15 it talks about some of the parcels that are currently empty  
16 right now and are not being used.

17 And it talks about bringing educational  
18 campuses, in mixed use campuses and everything. So if you  
19 deny a special-use permit for a particular application, that  
20 might be, you know, maybe against -- I want to say the  
21 betterment of the town does -- that does not preclude, you  
22 know, other opportunities that are very much so for the

1 benefit of the town.

2           So I ask each of you and Council Sutphin to  
3 apply like I said, the same standards that you did for a  
4 gasoline station at Harris Teeter to something that really  
5 might be very detrimental if it comes in for a special-use  
6 permit to the town. And if an application does come before  
7 you to deny that application. Thank you.

8           MR. NEVILL: Richard Rose. On deck; Brandon  
9 Wilson, Jen Nemro.

10           MR. ROSE: Hi, my name's Richard Rose and my  
11 wife Kathy and I live at 189 Mosby Circle in Warrenton. And  
12 before I start I'd just like to thank Jay Harrow for getting  
13 back to me on the email that I -- emails that I sent you. I  
14 appreciate that very much.

15           I'm here today to state my opposition to the  
16 proposed data center. My wife and I have lived in Warrenton  
17 since 2005 having previously lived in Eastern Loudoun County  
18 for almost 28 years. We left Loudoun because we thought  
19 Loudoun was bad, and boy, you ought to see it now. It's --  
20 since we've been gone, it's nothing but data centers.

21           My wife and I love Warrenton. It's a  
22 beautiful small town that I'm lucky enough to be able to walk

1 my dog Chanda through every day of the year. We walked  
2 through town, we live right across from the cemetery. I was  
3 born and raised in Cohasset, Massachusetts. It's a small  
4 historic town like Warrenton, almost 400 years old, settled  
5 by Pilgrims that came up from Plymouth.

6           If I were to go back to Cohasset today, it  
7 wouldn't be any different than it was when I left it in 1961.  
8 And it's proof that you don't have to put data centers or this  
9 other garbage in order to have maintained a town and to keep  
10 it charming and to keep it really dedicated to the people that  
11 live in it.

12           Our selectmen, that's what we call our, town  
13 council members, their efforts go towards maintaining the  
14 charm of the town, just keeping it up and making it a place  
15 that you want to live. And that's the way we feel towards  
16 Warrenton. I'd ask that you listen to your constituents and  
17 that you vote no on the data center. We don't need to mine  
18 Warrenton for the money, please say no to Amazon.

19           MR. NEVILL: Brandon Wilson. Sir, your hat.  
20 Mr. Rose, your hat.

21           MR. WILSON: Good evening. My name is  
22 Brandon Wilson. First I'd like to thank you all for being

1 here this evening, and thank you for everyone that's  
2 previously spoke. Even the people I disagree with. Legacy,  
3 right? So going back generations, my family between here and  
4 Stafford County for generations and generations.

5 I've grown up here since second grade in 1995.  
6 Where Marshalls currently stands is where I sold pumpkins in  
7 my Cub Scout troop, 1166. Obviously things have changed but  
8 the legacy of this town, we moved here when I was very little  
9 because my parents remembered and they'd tell me stories to  
10 me and my sister when we were still in car seats of how Seven  
11 Corners was all farmland.

12 It is not that, and I figured maybe they lived  
13 through the seventies a little too hard. But having seen  
14 Longhorn Steakhouse develop where I used to fall asleep in  
15 the woods there and maybe not. In 2014, report from CBRE 30  
16 local employees was the average the data centers were able  
17 to provide.

18 At areadevelopment.com, 30 employees was the  
19 average that they found in a 2016 report. Time Magazine,  
20 August 4th, 2021, 10 to 59 employees was the national average  
21 for local employees. As far as developing jobs for local  
22 people that's not really what that the data center does

1 according to most data.

2           It will destroy property values will go down  
3 as tax rates go up and I've -- it'll be a permanent eyesore.  
4 And whether or not it's a noise pollutant it's the gate to  
5 the town, it's the entrance to the town. So plenty of  
6 heartstrings have been tugged on, but the legacy here is the  
7 special-use permit for Amazon.

8           I don't understand why it couldn't have gone  
9 to something else. The amount of overdose deaths that are  
10 continuing to go on in this county and others and still we've  
11 -- when was the last time we had a movie theatre in this town?

12           When was the last time there was something for  
13 the kids to do? The amount of small families that are growing  
14 up here, I mean, we look like Mayberry and I love it but my,  
15 there was a murder on the end of Frazier Road in the early  
16 2000s over drugs.

17           There have been multiple overdoses in the last  
18 year over drugs and there's still very little for kids to do.  
19 And we're putting this thing in, in one of the poorer parts  
20 of town. And as far as special-use permits go, I'm  
21 flabbergasted as to why something couldn't have gone to a  
22 multi-use place.

1                   We -- we've educational, we have recreational,  
2 there are many small businesses. I just don't understand the  
3 appeal. I mean, I know the folks on the hill need power as  
4 well, and I don't know if that's part of what's being leaned  
5 on?

6                   I don't know if it's because of all the  
7 underhanded things and bizarreness there, but having lived  
8 in LA for two years, New York for four years, I just -- do  
9 I have to go to Venezuela? Like where do I have to go to get  
10 away from the noise and the hustle and the bustle?

11                   I just don't want to see this become seven  
12 corners. So I ask, will your legacy be David or will it be  
13 a feckless servant of Goliath?

14                   TOWN CLERK: Jen Nemro, John Lawver. Jen  
15 Nemro, John Lawver. Mr. Lawver.

16                   MR. LAWVER: Yeah, I requested five minutes  
17 for the public hearing.

18                   TOWN CLERK: So this is still Citizen Time,  
19 sir.

20                   MR. NEVILL: So are you reserved for the  
21 public hearing?

22                   MR. LAWVER: Yeah. I get my five minutes.

1 I'm representing about 90,000 people

2 MR. NEVILL: You'll get that during public  
3 hearing.

4 MR. LAWVER: Okay. Well that's what I had  
5 signed up for anyway. Thank you.

6 TOWN CLERK: Yes, ma'am.

7 MS. NEMRO: Sorry. Hi there. I am a little  
8 frozen, standing outside listening to this. I -- my name is  
9 Jen Nemro. I live in Monroe Estates at 585 Galina Way. I  
10 am a local realtor. I am a mother. I'm a volunteer. I am  
11 a community supporter. And I'm here tonight to ask that you  
12 vote no, no to the data centers.

13 What is going to happen with your vote is going  
14 to affect my direct community and the upcoming years. I  
15 recently moved from the southern end of Fauquier County into  
16 the town of Warrington in February of 2020, right before COVID  
17 hit. My family, I have four young children. My husband is  
18 an educator, and we volunteer in all of the local schools.

19 We moved into the town of Warrington rather  
20 than choosing other areas in Warrington because we loved the  
21 community feel. We wanted to be in a town environment where  
22 we could walk to stores, where we could support local

1 businesses.

2                   And my community, I have since then sold three  
3 to four houses in my own community, bringing people from  
4 different parts of Prince William County, other parts of  
5 Fauquier County into my neighborhood. My neighborhood will  
6 be greatly affected by your decision because as Mr. Dobson,  
7 who was here, spoke earlier, with all respect Mr. Dobson, the  
8 reason you are in support of this is because your own pockets  
9 are going to be greatly increased by a vote for the data  
10 centers.

11                   I know you personally, we've talked about real  
12 estate in the past. You own the old wire factory right  
13 outside of my neighborhood. You own existing land on the  
14 other side of my neighborhood. My neighborhood will be boxed  
15 in by data centers if you vote yes. We will no longer enjoy  
16 the quiet freedoms of walking into Old Town, walking on the  
17 Greenway and the quiet enjoyment of my neighborhood.

18                   I am greatly concerned as a realtor and as a  
19 community member of the property values going down in my own  
20 neighborhood. I love Warrington. I grew up in Prince  
21 William County. I've seen the changes there. I never  
22 thought I would live in Fauquier County. As a young child,

1 my sister took horseback riding lessons in Fauquier County.

2 We used to drive out here every weekend.

3 I always said to myself, I will never live in  
4 this community. And here I am as a 45-year-old adult, raising  
5 my four children in this beautiful town. And I beg of you,  
6 I ask of you to vote no to this hearing, to this -- any data  
7 centers in town. I don't think it's the right place for them.

8 Mr. Nevill, I'd love to continue to support  
9 your store. I want to be here. I want to be a volunteer in  
10 our community, and I'd like to continue as a realtor to bring  
11 other people who want to live in quaint town into our  
12 community. Thank you for your time. Please vote no.

13 TOWN CLERK: Thank you. Mr. Mayor, I have no  
14 one further signed up for Citizen Time. I'd like to call a  
15 few names again to see if they're still here. Lee Ousley,  
16 David Dwight, Ike Miller, Laurie Carnet, Steve Byfield, Corey  
17 Ann Parford, Ruth Yugi, Kristen Snow, Susan Whites.

18 One more time. Lee Ousley, Laurie Carnet,  
19 Steve Byfield, Corey Ann Parford, Ruth Yugi, Kristen Snow,  
20 Susan Whites. That's my list for Citizen Time Mr. Mayor.  
21 Okay. I have one. Were you signed up for the public hearing?

22 MS. SNOW: I'm Kristen Snow, but I thought I

1 was signed up for the public hearing.

2 TOWN CLERK: It looks like you signed up for  
3 both. Did you want to adjust?

4 MS. SNOW: We'll speak at the public hearing.  
5 Thank you.

6 TOWN CLERK: Yes, ma'am.

7 MR. NEVILL: All right. So we will bring  
8 Citizens Time to a close and move on to an approval of the  
9 agenda.

10 MR. MOONEY: Mr. Mayor, is there anybody else  
11 that wasn't signed up that needs to speak?

12 MR. NEVILL: Is there anybody else who's  
13 signed up -- who's not signed up, who wishes to speak at  
14 Citizen Time?

15 TOWN CLERK: Yes, Mr. Mayor, Roy Francis,  
16 decide to speak for Citizen Time.

17 MR. FRANCIS: Good evening. I've watched you  
18 guys all day. I'm not prepared to speak tonight, but I felt  
19 compelled to come up here and say a couple of things. One  
20 is about the boundary adjustment -- the boundary line  
21 adjustment. I don't believe, and I think everybody here  
22 doesn't believe that there's any need for a boundary line

1 adjustment.

2                   And if there is, it's only for one reason. And  
3 I think that's pretty sad. We've gone down this road before  
4 with other things and we haven't expanded. We expanded for  
5 a couple of things for good reason and they've done well. But  
6 this, this situation, we're in right now is not a reason to  
7 expand the boundaries of this town. It's only greed.

8                   I was here this morning as you guys are well  
9 aware, and I welcome the two new people, Mr. Mooney and Mr.  
10 McGuire. Welcome. I hope you do well and bring everything  
11 to order here. I admired the conversation and you people need  
12 to know I was here for the morning session, so what I'm saying  
13 is coming from the morning session.

14                   I welcomed the conversation about the vote  
15 tonight -- possible vote tonight. I thought it was a spirited  
16 discussion. I admired how everybody handled the situation  
17 and the thinking is that the two new people don't believe  
18 they're ready to cast a vote should that happen tonight,  
19 should it come up. I think it's reasonable that we have an  
20 extension for the 30 days.

21                   The council had a good discussion on that, and  
22 I admire you people for taking that under consideration. I

1 hope you follow through with what I heard this morning, which  
2 is we will have the public hearing and we will do the vote  
3 in February. I hope you do that. I don't know because you  
4 didn't vote on it. I understand that, you did not vote on  
5 it so it's not in concrete, but you folks need to know it was  
6 talked about.

7                   Now lastly, I don't need to go into the data  
8 center issues. Mr. Semple's point was well taken. There are  
9 other uses for that property to generate more money. You can  
10 paint this picture any way you want to, but I'm telling you,  
11 you can put lipstick on a pig and what do you have? A pig.  
12 Thank you.

13                   TOWN CLERK: Thank You, sir. Mr. Mayor, Lee  
14 Ousley.

15                   MR. OUSLEY: I'm actually Terry Ousley, but my  
16 wife is out of town taking care of her father. But I just  
17 wanted to say that as a member of this community and as a store  
18 owner, we love Warrenton and I just encourage all of you to  
19 think of the town, to think of all the people who have spoken  
20 here, and who you represent and vote no against the data  
21 center. I don't know how you can walk the street of this town  
22 if you vote yes. Thank you.

1 TOWN CLERK: I have no further speaker signed  
2 up Mr. Mayor.

3 MR. NEVILL: Thank you. Anybody else who  
4 wishes to speak? Okay, we'll turn to council for approval  
5 of the agenda.

6 MR. HAMBY: Mr. Mayor, I'd like to adjust the  
7 agenda tonight.

8 MR. NEVILL: You'd like to make an amendment  
9 to the agenda. Yes, sir.

10 MR. HAMBY: I'd like to make an addition of  
11 boundary line adjustment.

12 MR. NEVILL: Okay. Under new business or  
13 unfinished business.

14 MR. HAMBY: Add that under unfinished  
15 business?

16 MR. NEVILL: Okay. So recommendation to add  
17 boundary line adjustment to unfinished business. Any  
18 further amendments to the agenda?

19 MR. MOONEY: Yes Mr. Mayor, I'd like to move  
20 to amend the agenda as part of public hearing. But prior to,  
21 I guess it's E-3 now, so prior to the public hearing, but part  
22 of the public hearing. If we could have a staff -- another

1 staff and applicant presentation so that the public can hear  
2 some of the new information that we heard earlier.

3 MR. NEVILL: Mr. Mooney, that will be part of  
4 the public hearing. The staff will have a presentation and  
5 the applicant will be here to present. So it's part of the  
6 public hearing.

7 MR. MOONEY: Okay. Thank you.

8 MR. NEVILL: You're welcome.

9 MR. MOONEY: I just -- I was going to say  
10 something else, but in light of our conversation this morning,  
11 that that was the amendment that is I want to push through.  
12 Thank you.

13 MR. HEROUX: I second the motion on the agenda  
14 Mr. Mayor.

15 MR. NEVILL: Well, we need a motion to approve  
16 first.

17 MR. HEROUX: Oh, sorry. On the agenda.

18 MR. NEVILL: Need to approve as amended.

19 MR. HEROUX: I got it.

20 MR. NEVILL: So you move to approve?

21 MR. HEROUX: We're going to approve as  
22 amended. That's what I was thinking I was trying to say.

1 MR. NEVILL: Second move by Councilman  
2 Heroux.

3 MR. HARTMAN: I second.

4 MR. NEVILL: Second by Vice Mayor Hartman.  
5 Discussion. Hearing none. All in favor?

6 AUDIENCE: Aye.

7 MR. NEVILL: Opposed? Motion carries on  
8 unanimately and the agenda is adopted. That brings us to our  
9 first public hearing this evening, which is resolution to  
10 budget. An appropriate \$5 million of debt proceeds for water  
11 and sewer capital projects. \$75,090 for debt service in the  
12 water and sewer fund. Ms. Miller to present.

13 MS. MILLER: Good evening. This public  
14 hearing is to consider amending the fiscal year 2023 adopted  
15 budget to appropriate water and sewer capital projects that  
16 will be funded by previously issued debt proceeds and to  
17 appropriate for the first interest payment on the debt.

18 These capital projects were reviewed with  
19 council at the December work session. They are all included  
20 in the adopted 2023 to 2028 capital improvement program. But  
21 some of the projects were planned in the out years, and so  
22 they are not included in the FY 23 adopted budget.

1                   In September, council approved the use of 4.5  
2 million in ARPA funding and authorized the issuance of five  
3 million in debt for water and sewer projects. This  
4 resolution will appropriate the projects to be funded by those  
5 sources and will appropriate the first interest payment on  
6 the debt.

7                   MR. NEVILL: Questions for Ms. Miller from  
8 council? Okay, hearing none at 9:03 p.m. We'll open the  
9 public hearing.

10                  TOWN CLERK: Our first speaker, Mr. Mayor is  
11 Ken Alm. David Dobson is on deck, sir.

12                  MR. NEVILL: Is -- are they speaking for the  
13 -- this is the debt service.

14                  TOWN CLERK: Yes, sir.

15                  MR. NEVILL: Okay.

16                  MR. ALM: It was nice to get a chair back  
17 there. Ken Alm, 194 Culpeper Street. I'll make this really  
18 short. I was at the December work session for this subject  
19 area. It's quite a lengthy one and I'm just -- would like  
20 the council to at least consider delaying this for 30 days  
21 so the new -- two new council members could get that same  
22 briefing. It was quite extensive and you know, I think if

1 they're going to vote on \$5 million, they should be up to speed  
2 on it. Thank you.

3 TOWN CLERK: Our next speaker, Ms. Mayor, is  
4 David Dobson.

5 MR. DOBSON: I have to apologize. I actually  
6 was just having trouble with the sign in, so I'm not speaking  
7 twice. Thank you.

8 TOWN CLERK: Okay. Thank you, sir. I have  
9 no additional speaker signed up, sir.

10 MR. NEVILL: Anybody else wishing to speak on  
11 the resolution of budget appropriate \$5 million debt  
12 proceeds? Hearing none at 9:05 p.m. I will close the public  
13 hearing and turn it over to council for action.

14 MR. HEROUX: Mr. Mayor, like to make a motion  
15 to approve the resolution, to appropriate the 5,000 debt  
16 proceeds for water and sewer capital projects and 75,000 for  
17 debt service in the water and sewer fund.

18 MR. NEVILL: So, moved by Councilman Heroux.

19 MR. HAMBY: I'll second.

20 MR. NEVILL: Second by Councilman Hamby.

21 MR. MCGUIRE: Mr. Mayor?

22 MR. NEVILL: Discussion, Mr. McGuire?

1 MR. MCGUIRE: Yes, I agree that myself and my  
2 new colleague, Mr. Mooney, need to look at this and have that  
3 brief. We did not get that brief. We were -- when we were  
4 going through our orientation, it was talked about, but we  
5 need to see the line by line what we're spending on. So I'd  
6 ask for more time.

7 MR. HEROUX: So, Mr. Mayor, I'd like to move  
8 to amend

9 MR. NEVILL: Secondary subsidiary motion to  
10 amend.

11 MR. HEROUX: And that would be to delay the  
12 decision on this for 30 days.

13 MR. NEVILL: So it's a motion to postpone.

14 MR. HEROUX: To postpone right, for 30 days to  
15 give our new council members an opportunity to review the  
16 material.

17 MR. NEVILL: So there's a motion to postpone.  
18 Is there a second?

19 MR. MOONEY: I second that Mr. Mayor.

20 MR. NEVILL: Second by Councilman Mooney.

21 Discussion on the motion to postpone specific to the  
22 discussion on the motion to postpone.

1 MR. MOONEY: Yes, Mr. Mayor, I spent some time  
2 with Frank and some of his employees, and I think that there's  
3 a great need for it. But I would like to get to brief and  
4 see -- spend some time looking at the financials and see if  
5 there's -- you know, if the only way to pay for it is just  
6 to take out more loans or if maybe appropriating funds  
7 differently somehow. I would like the time to do that.

8 MR. NEVILL: Councilman Semple.

9 MR. SEMPLE: Mr. Mayor, I think that if you  
10 took a look at the materials that were presented included a  
11 very extensive analysis of our needs, including the projected  
12 buildout of the town over the next several years at a three  
13 percent rate of increase. Plus, it required several shifts  
14 of projects that were in our capital improvement plan from  
15 later years and brought them forward.

16 I think there were questions as to what  
17 projects and how they should be prioritized based on their  
18 specific potential of failure. And all these things are --  
19 it was a complex -- I felt a complex proposal. I thought it  
20 was well presented during our last session.

21 And I certainly would have no problem voting  
22 today on this. But what I do ask is that our new council

1 members who would not have really had an opportunity to sit  
2 in on those discussions, be a part of the deliberative policy  
3 process, particularly public policy process and give an  
4 opportunity to give it a review. Thank you.

5 MR. HAMBY: Mr. Mayor?

6 MR. NEVILL: Mr. Hamby.

7 MR. HAMBY: I certainly, as we discussed  
8 earlier, I understand first day I've been there. Could we  
9 have staff give an assessment? I don't know how complicated  
10 this is because I feel like I've been doing it for so many  
11 years, but it probably looks complicated from the outside.  
12 Can staff come up and say, are there consequences if we don't  
13 act because some of this stuff that was included in this, they  
14 had listed as critical.

15 So before we do anything, can staff say of this  
16 spreadsheet for priority projects, what's the consequences  
17 of some of this stuff, I believe is cast has to come from a  
18 factory, takes forever to get here, what are we going to do  
19 if it breaks.

20 MR. NEVILL: To clarify, the bond has been  
21 secured, correct?

22 MS. MILLER: Yes. So we entered into a

1 17-year loan with Chase Bank in September after the  
2 authorization provided by council. So we already have the  
3 proceeds, the debt has already been issued. So, we're  
4 waiting to use the money to get these projects appropriated.  
5 But I'll let Frank speak to the aging infrastructure and some  
6 of the projects.

7 MR. CASSIDY: Hi, good evening. Frank  
8 Cassidy, director of Public Works and Utilities. This is the  
9 follow up to our presentation that we provided last month with  
10 waste water treatment and the water treatment plant  
11 facilities, a critical infrastructure and the improvements  
12 that are needed out there at the plant with the  
13 reprioritization of the CIP and realigning these funds.

14 So, to go directly to the question, these are  
15 projects that we need to start working on now to try to get  
16 these projects moving to try to preserve upgrade and otherwise  
17 address the failing issues out there at that waste water  
18 treatment plant.

19 So this was the next follow up presentation  
20 that we outlined the projects in the last presentation,  
21 priority one, priority two, at the wastewater plant and the  
22 water treatment plant. And what this does is it gives you

1 a breakdown to those projects as outlined what those funds  
2 are going to be used for.

3           And then we would discuss the rest of the CIP  
4 items and all the other reorganization of those items as we  
5 go into the budget structure. If you recall the  
6 presentations that we gave, the primary clarifier, for  
7 example, was out in 28, the CIP in 2028.

8           But because it became a critical item to start  
9 working on today, that's one of those items that we have to  
10 start working on. So delaying this would delay the process  
11 that we already put in place to try to move forward to get  
12 this stuff corrected.

13           Because these are a couple years out to even  
14 start, to your point, that we have to get the engineering  
15 drawings, we have to get the design specs on them and then  
16 we have to worry about trying to get the equipment and  
17 materials out to get these projects finished in a timely  
18 fashion.

19           MR. HAMBY: And that was my question. So, a  
20 lot of the stuff that came in, especially for the people who  
21 don't live inside town, this is the town's water treatment  
22 plant we're talking about, a lot of the stuff 1954, 1958 circa

1 way before me. The money's already been borrowed, the  
2 money's already in place. The only thing that we're talking  
3 about is to these projects that are on, it's just where the  
4 money's going into these.

5           So, like we said before, these are -- some of  
6 these are critical, there's a long PowerPoint with pictures  
7 that I guess could staff's shoot -- that these guys if they  
8 haven't got it yet but some of the stuff's in dire need. So  
9 I'm just looking at you for your opinion. If it's delayed,  
10 what are the consequences? The plan has to run 24/7.

11           MR. CASSIDY: We're waiting for this -- the  
12 appropriation of the funds. But I did provide a very high  
13 level overview during the orientation of the council members  
14 on that. I didn't go into the great details because it was  
15 a complex issue in just a couple hours that we had at the time.

16           But that was the charts I was showing and I  
17 believe it was you all that were pointing out that the aging  
18 of that structure. So again, to your point that's -- this  
19 is the organization of how we were presenting -- how we're  
20 going to spend those allocated funds, give you the assurance  
21 that yes, we're doing this in the priorities that we have set  
22 forward, that that's the need of the plant, and we had to

1 readjust those funds and that's there.

2                   So, it's already a month in delaying the  
3 structure. We're just talking to people, but we cannot  
4 actively engage until we get this money starting to get  
5 allocated.

6                   MR. NEVILL: To clarify. So council has  
7 already approved the expenditure of these funds. This is  
8 just the allocation of the funds. We directed staff to  
9 procure a bond and funding to be able to proceed with these  
10 projects so that we could fulfill and get moving on them using  
11 some from debt servicing and the rest from ARPA funding. So  
12 this is really a fulfillment of direction that staff has  
13 already -- I mean, the council's already given to staff,  
14 correct?

15                   MR. CASSIDY: Yes. In a nutshell, I mean,  
16 that hits the nail in the head. You already said, okay, you  
17 could have that money and spend that money. All we're doing  
18 is isolating and then telling you specifically what that  
19 money's going for. So it was all approved for a water and  
20 sewer project. Now we're telling you what exactly those  
21 projects are down to the dime on that money.

22                   MR. MCGUIRE: Mr. Mayor?

1 MR. NEVILL: Mr. McGuire.

2 MR. MCGUIRE: Yes. I know you briefed those.  
3 If you could just provide me like, priorities of work and what  
4 -- when you're going to start, that's what I want see with  
5 the amount of money, that's just one I want to see.

6 MR. CASSIDY: I'll be more than happy to give  
7 the details on that. We have again charts and etc, but I think  
8 it's outlined in the staff report and the information that's  
9 in your package on this. Those projects that are listed right  
10 there, that Ms. Miller did provide to you is exactly how we're  
11 going about it. We are actively working on getting these  
12 projects pushed because these are the priority of those  
13 projects. These are the isolated priorities that get these  
14 projects done, and we move them around to get them in the  
15 priority.

16 MR. MCGUIRE: And that's the order of  
17 precedent?

18 MR. CASSIDY: Yes, sir.

19 MR. MACGUIRE: Okay, then I'm satisfied then.

20 MR. MOONEY: Mr. Mayor, I guess, should I make  
21 a motion to withdraw? I understand that there's an urgency,  
22 but I don't feel comfortable voting on how we're going to spend

1 5 -- \$9 million. I understand the urgency. You guys have  
2 done the work. I'll abstain.

3 MR. NEVILL: So Mr. Semple would withdraw the  
4 motion?

5 MR. SEMPLE: I withdraw the motion.

6 MR. NEVILL: So, the motion's been withdrawn  
7 by the men who submitted it -- the council member who submitted  
8 it. Thank you. So we're now back to the main motion, which  
9 is the motion to approve. Further discussion from council  
10 members?

11 MR. HEROUX: I just reiterate, Mr. Mayor,  
12 thank you to Frank. I encourage my new members here, I'm sure  
13 you're going to do this, go to the treatment plant, do that  
14 tour. It was one of the first things I did and it's  
15 fascinating that team over there does a phenomenal job. It  
16 is an aging infrastructure, I call them MacGyver over there.

17 They kind of pull it together, but we can't --  
18 I mean, that's dangerous. This is -- I do not want to be the  
19 council that is on the news because we didn't make the right  
20 decisions to make sure our citizens have clean water. So,  
21 I would just encourage us to move forward tonight on this.

22 MR. NEVILL: Any further discussion?

1 MR. MOONEY: No.

2 MR. NEVILL: Okay. Hearing none, we'll call  
3 the question. All in favor?

4 AUDIENCE: Aye.

5 MR. NEVILL: Opposed?

6 MR. MOONEY: Abstain.

7 MR. NEVILL: The motion carries 6-0 with one  
8 abstention, Mr. Mooney. Okay, that'll bring us to our next  
9 public hearing, which is resolution budget appropriate, \$458  
10 and \$1 for the Timber Fence Trail Capital Project. Ms.  
11 Miller, again, to present.

12 MS. MILLER: yes. So this is also to amend  
13 the fiscal year 2023 adopted budget to appropriate only grant  
14 and outside funding for segment two of Timber Fence Trail.  
15 So this again, is an approved project in the adopted capital  
16 improvement program. It's funded by a federal grant that's  
17 administered by VDOT.

18 The funding structure is 80 percent federal,  
19 10 percent town, and 10 percent county. And so this is really  
20 just fixing an error in the compilation of the budget data.  
21 So during the development of the FY 23 budget, the town share  
22 was selected for ARPA funding.

1                   So that was properly appropriated but the  
2 federal grant funding and the county funding was not included.  
3 So this resolution will fix that and will appropriate the  
4 outside funding sources. There's no impact on town funds  
5 whatsoever in this resolution.

6                   MR. NEVILL: Thank you Ms. Miller. Questions  
7 for Ms. Miller?

8                   MR. HEROUX: Mayor.

9                   MR. NEVILL: Mr. Heroux.

10                  MR. HEROUX: Just to confirm our contribution  
11 to this from the town taxpayer perspective it's \$50,000 is  
12 what we're chipping in?

13                  MS. MILLER: Yes. And we're covering it with  
14 ARPA funding so it's not actually coming out of town funds.  
15 That's a grant funding also. What we're appropriating  
16 tonight is the 80 percent federal share and the 10 percent  
17 from the county.

18                  MR. HEROUX: Okay. So we got a little free  
19 one here coming at us.

20                  MR. SEMPLE: Mr. Mayor.

21                  MR. NEVILL: Mr. Semple.

22                  MR. SEMPLE: Could you a little brief

1 discussion for the sake our audience here today, what we're  
2 doing with the Timber Fence Project is and why we're spending  
3 this money?

4 MS. MILLER: So we've already completed  
5 segment 1. I'll let Frank talk about segment 2.

6 MR. CASSIDY: Good afternoon. This is  
7 section 2 of Timber Fence Trail. Part one was put in from  
8 the high school up to just about the town line there on  
9 Waterloo. This trail now will go along the backside of the  
10 high school and basically connect Waterloo into the Gold Cup  
11 community.

12 So this is part of a -- we call it part two,  
13 but really it was all one kind of a continuous project, so  
14 this is the next section of the -- of that project. So we're  
15 working with the school district as well as VDOT to get this  
16 project done as a continuation of connector of that trail,  
17 all part of walkability, connectivity, etc. Is that  
18 (inaudible).

19 MR. HAMBY: Mr. Mayor?

20 MR. NEVILL: Mr. Hamby?

21 MR. HAMBY: I'd like to make a motion that we  
22 approve the resolution.

1 MR. NEVILL: We have to get the public hearing  
2 first.

3 MR. HAMBY: I'm sorry. I'm getting way ahead  
4 of myself.

5 MR. NEVILL: 9:18 p.m. I will open the public  
6 hearing. Are there any speakers who wish to speak?

7 TOWN CLERK: Yes, sir. My first speaker is  
8 Linda Robinson and Stewart Robinson.

9 MR. NEVILL: I guess, and I said it is possible  
10 that they may have signed up for the wrong public hearing.

11 TOWN CLERK: Absolutely possible. And I'm  
12 assuming David Dobsons did the same.

13 MR. NEVILL: Yeah, I believe so.

14 TOWN CLERK: Then I have no further speaker  
15 signed up other than those.

16 MR. NEVILL: Is there anybody else who wishes  
17 to speak on the appropriation of these funds? It's 9:18 p.m.  
18 I will close the public hearing and I'll turn to council for  
19 motion on that. Council Vice Mayor.

20 MR. HARTMAN: Mr. Mayor, I would now like to  
21 make a motion to approve the resolution to budget appropriate  
22 funds for the Timber Fence Trail Capital Project.

1 MR. NEVILL: So, move by Councilman Hartman.

2 Is there a second?

3 MR. HAMBY: I'll second.

4 MR. NEVILL: Second by Councilman Hamby.

5 Discussion on the motion. Hartman has preference, if you'd  
6 like to say anything.

7 MR. HARTMAN: This is a project long in the  
8 making. It's another segment, myself and this is in my ward  
9 and my neighbors over there would very much like to see this  
10 come to fruition. Like I said, it's been a long time, it  
11 improves our walkability, there so many kids that can walk  
12 safely from that neighborhood, the Gold Cup neighborhood and  
13 my neighborhood included in that to get to Fauquier High  
14 School, and the shopping center, and the wharf. So it's a  
15 great project and I'm glad to see it moving forward. Thank  
16 you.

17 MR. NEVILL: Okay. Discussion from the rest  
18 of council.

19 MR. HAMBY: Mr. Mayor, we've been working on  
20 this project for so many years. I'm just ready to continue  
21 through. I know that this has been in phases, but it seems  
22 like we've been working on it forever, so hopefully we can

1 get it complete. And I hope that they're ready to keep  
2 construction going, so move forward.

3 MR. MOONEY: Mr. Mayor.

4 MR. NEVILL: Mooney.

5 MR. MOONEY: Yes, I would like to say that I'm  
6 excited to vote for this one. I had a good talk with Ms.  
7 Miller, thank you on this one. So thank you. Excited for  
8 this one.

9 MR. NEVILL: Any further discussion?

10 MR. HEROUX: Mr. Mayor, may I just reiterate,  
11 it's a this great project and I applaud the creativity and  
12 the financing of it. So that's a good deal for the town and  
13 all the citizens. Thank you.

14 MR. SEMPLE: Mr. Mayor.

15 MR. NEVILL: Mr. Semple.

16 MR. SEMPLE: It's going to get my favorite  
17 Greenway a little competition, and that's on the other side  
18 of town. And I think at one point there was some speculation  
19 we might be able to actually draw walkability all the way  
20 around the perimeter. So perhaps this is the start of a  
21 wonderful effort to a connector town along the outside of the  
22 circle. But I'm looking forward to walking with my dog and

1 it'll be terrific. Thank you.

2 MR. NEVILL: Thank you, sir. Any further  
3 discussion? Hearing none, we'll call the question. All in  
4 favor?

5 AUDIENCE: Aye.

6 MR. NEVILL: Opposed? Motion carries  
7 unanimously and the budget is amended, and the funds are  
8 appropriated. This brings us to the SUP 2022-03 Amazon Data  
9 Center. And I believe we will begin with a presentation from  
10 Ms. Harris, and then I will open the public hearing and at  
11 that point, the applicant will have an opportunity to present  
12 and then we will follow with a public citizen input.

13 MS. HARRIS: Good evening. Steven, it's the  
14 one marked conditions. This morning as council is well  
15 aware, we held a several hour work session on this particular  
16 application. The applicant is here again tonight to speak  
17 and give a presentation, but staff's going to give a quick  
18 update per the direction of council after the work session.

19 We worked on the draft conditions of approval  
20 and tried to -- our best to incorporate the will of what we  
21 had. And so I'm going to quickly go through what the proposed  
22 changes to any draft conditions of approval may be, so that

1 everyone is aware of it. They've been handed out in hard copy  
2 to all of you, and they've been shared with the applicant.  
3 So with the next one, next slide, please. He left?

4 UNIDENTIFIED SPEAKER: Yeah.

5 MS. HARRIS: Everything highlighted in yellow  
6 is what has been modified. The first condition simply  
7 revises the special use permit plan to today's date. The  
8 applicant submitted updated documents that demonstrate the  
9 proposed increased landscaping that was shown to you this  
10 morning.

11 Number two is a new condition which will relate  
12 to the noise condition later, but basically says that during  
13 the site plan development, that the applicants going to submit  
14 a plan that includes the internal part of phasing of the  
15 building as well as the external as it relates to technology.  
16 And that each distinct phase is going to be identified during  
17 the site plan stage.

18 Then they will be given a conditional  
19 certificate of occupancy for each individual phase, at which  
20 point the certificate of occupancy would --- final one, would  
21 be granted upon completion of all phases. So that's setting  
22 up the process that we'll discuss more in a minute for the

1 noise.

2                   Next you have under the building design and  
3 elevations, again, the three elevations that were shown this  
4 morning with the windows are incorporated that their  
5 architectural design would be in substantial conformance with  
6 the elevations provided to you this morning.

7                   And then, D was added to incorporate the  
8 commitment of silencers sound walls, acoustical wraps, and  
9 other noise equipment that would be utilized to meet the town  
10 zoning ordinance. For the water and sewer connection, we  
11 added a sentence that says it does not exclude or prevent the  
12 property owner from utilizing the town's water for fire  
13 suppression. That was another one that came up this morning.

14                   And then the noise ordinance, this has been  
15 rewritten to try to speak to the desire to capture each phase  
16 and have the applicant have to conduct a test after each phase  
17 is built, but not receive their certificate of occupancy for  
18 that phase until they demonstrate that they meet the noise  
19 ordinance. It then states that if they do not meet the noise  
20 ordinance, they will not get their certificate of occupancy  
21 for that particular phase.

22                   Then the second one, B, states that the

1 applicant shall produce and pay for an annual noise test to  
2 be submitted to the town by July 1st. And then it  
3 incorporates the previous language of if for any reason they  
4 do not meet the noise ordinance annually there's a remediation  
5 package, but they should always meet it based on the fact that  
6 they are not going to be granted a certificate of occupancy  
7 if they don't meet it when they build.

8           Next. Under landscaping, we heard the  
9 request to add language saying that in addition, the applicant  
10 will provide double the town zoning ordinance required  
11 landscaping requirements along Lee Highway and Blackwell of  
12 carnivorous trees to provide a four season visual coverage.

13           Number 22 relates to the termination of use,  
14 which states that, it's two fold, one is if they are inactive  
15 for 30 consecutive days, or 30 days within any 180-day period,  
16 that they're going to empty all the fuel storage tanks and  
17 take all other reasonable steps to prevent any soil or water  
18 contamination.

19           And then it further states if within one year  
20 of termination of the use, the owner shall remove all  
21 hazardous materials and make sure that the site is left clean  
22 and free of hazardous materials as determined by the town.

1                   And then finally, number 25 was added stating  
2 that any violation of the conditions of this SUP may result  
3 in appropriate enforcement action by the town, including the  
4 issuance of a notice of violation and corrective order and  
5 after notice and an opportunity to be heard revocation of the  
6 SUP. The statement does not limit the remedies of the town  
7 in the event of a violation of the conditions of this SUP,  
8 nor does it imply any limitation of the town's enforcement  
9 of conditions in unrelated SUPs.

10                   So with that, those are the updated  
11 conditions. Please let staff know if we misrepresented what  
12 we might have heard, if we can help modify anything further.  
13 But this is where we're at after this morning's work session.

14                   MR. NEVILL: Are these conditions clear from  
15 the discussion that we had this morning?

16                   MR. SEMPLE: May I comment, Mr. Mayor?

17                   MR. NEVILL: Mr. Semple.

18                   MR. SEMPLE: It seems these conditions seem to  
19 have significantly diluted to what I thought we were talking  
20 about this morning. Going back again to Councilman Heroux's  
21 original draft, which he presented in November. His  
22 compliance standards were significantly more stringent.

1           And it would -- for example, one of the things  
2 -- that's why I think it's very difficult to do this on the  
3 fly like we're doing for this evening because I think there's  
4 just too many variables in this. But I'm just -- the question  
5 I have is that there's -- the noise compliance adds this phrase  
6 at the end.

7           And if this is an annual noise test, then it  
8 would seem to me what we would want to have is some type of,  
9 perhaps active noise monitoring system in the perimeter that  
10 could be active year-round and every day. That -- if there  
11 is for example, the problem with B is that the annual noise  
12 test, it could go into non-compliance on January 2nd, and you  
13 won't have your noise test until December 31st.

14           And during that entire time, the noise could  
15 not be in compliance, but you wouldn't know it until you  
16 measured it. And then the other problem is that 60 days is  
17 insufficient to achieve compliance. The agents -- "The  
18 applicants shall probably begin and diligently pursue  
19 mitigation until compliance has been achieved." The words  
20 begin and diligently pursue are vague.

21           I mean, diligence is one of those terms that,  
22 I mean -- I guess is in the mind of the beholder. And so I

1 think we need stricter standards that there has to be  
2 compliance within a specific period of time. And like  
3 Councilman Heroux's suggestion, that if it -- there -- does  
4 not comply, they can't either occupy or use that particular  
5 space.

6 I mean, that is, as you coordinate this with  
7 the phase, you also coordinate it with the build out of the  
8 unit -- I mean, of the building so that -- I mean, I happen  
9 to like -- very much like what Mr. Heroux presented, and I  
10 would think that would be a baseline for our discussion.  
11 Thank you.

12 MR. NEVILL: Councilman Heroux.

13 MR. HEROUX: Yeah. Thank you, Mr. Mayor.

14 With regards to 17B and where Councilman Semple is going, and  
15 maybe this is a question for the applicant, you know, when  
16 we get to that is, you know, is there that possibility of a  
17 continuous monitoring capability to monitor the noise? And  
18 then, with regards to the 60-day statement, that, I think we  
19 need to tighten that up. That if it's in -- if it's at a spec,  
20 then something's got to get powered down to bring an in spec.

21 So with 17B, is there a way we can tighten this  
22 up that you are monitoring it or Amazon is monitoring it in

1 real time as accurate as it can be? I know there's different  
2 technologies with that and so forth, but if finds ourselves  
3 out of spec, that it -- there's got to be some immediate step.  
4 I mean, there's -- the language of the 60-day is insufficient.  
5 We corrected that I think very well in 17A. Can we bring some  
6 of that into 17B if my references here are correct?

7 MR. NEVILL: Yes.

8 MR. MCGUIRE: Mr. Mayor?

9 MR. NEVILL: Mr. McGuire.

10 MR. MCGUIRE: Yes, in regards to 17B, I  
11 thought today's consensus that the town was going to get a  
12 noise expert and Amazon was going to pay for it. I think the  
13 language that's written here is not correct. I think the  
14 intent was to have our fiduciary to the town residence by  
15 hiring an expert that Amazon would pay for. And then now,  
16 it looks like Amazon's going out and producing and paying for  
17 an annual noise test. I don't see how that's good for us.  
18 We need to be looking for somebody and have evidence and pay  
19 for it because obviously, I think they're going to get data  
20 that they want.

21 MR. MOONEY: Mr. Mayor, the --

22 MR. NEVILL: Mr. Mooney.

1 MR. MOONEY: I think that's what they agreed  
2 to.

3 MR. NEVILL: Yeah, the --

4 MR. MOONEY: Okay.

5 MR. NEVILL: That's what it's -- it reads,  
6 "The applicant shall produce and pay for."

7 MR. MCGUIRE: Okay. I just want to be --

8 MR. NEVILL: Yeah.

9 MR. MCGUIRE: -- be clear.

10 MR. NEVILL: I think that --

11 MR. MCGUIRE: Okay.

12 MR. NEVILL: -- that part, I think --

13 MR. MCGUIRE: That's all. Okay.

14 MR. NEVILL: -- is clear.

15 MR. MCGUIRE: Just want to be clear.

16 MR. HAMBY: The town's going to dictate --

17 MR. MCGUIRE: Right.

18 MR. HAMBY: -- who it is.

19 MR. NEVILL: Yeah.

20 MR. MCGUIRE: Okay. I just --

21 MR. HAMBY: But Amazon has to foot the bill.

22 MR. MCGUIRE: Right. I just want everybody

1 be clear, so...

2 MR. NEVILL: So Councilman Heroux has -- and  
3 the recommendation is to tighten the language on B specific  
4 to how it's monitored, and the clarification of the 60 days.  
5 Is that what the direction --

6 MR. HEROUX: Yeah. You know, and it may be a  
7 question to the applicant if there's -- if there is a way to  
8 monitor it on a consistent basis, post phase, full deployment.  
9 And then if it is out of spec, if it's out of compliance, that  
10 there are some immediate actions that step it down. I mean,  
11 that's an idea. I'm open to suggestions here, but I think  
12 we need a little bit tighter on 17B --

13 MR. HAMBY: Forty eight hours.

14 MR. HEROUX: -- as we have in 17A.

15 MR. HAMBY: Forty eight hours.

16 MR. HEROUX: Forty eight hours to fix it?

17 MR. HAMBY: Fix it or turn it off.

18 MR. MCGUIRE: And I'm just asking, how did you  
19 come up with that?

20 MR. HAMBY: The building's monitored 24 hours  
21 a day. Someone's always there.

22 MR. MCGUIRE: Okay.

1 MR. HAMBY: What's reasonable --

2 MR. MCGUIRE: Okay.

3 MR. HAMBY: -- I mean, 24 hours, 48 hours, or  
4 better yet -- well, I'm not sure, but --

5 MR. MCGUIRE: I'm just asking --

6 MR. HAMBY: I'm sure whoever their repair  
7 service is, and I'll just throw it back to fire department,  
8 right? They have four hours to be on site and they have 48  
9 hours to fix it. Standard contract. I'm not sure what they  
10 have, but either way, it needs to either be turned off or  
11 mitigated.

12 MR. MCGUIRE: Okay.

13 MR. HAMBY: If 48 hours isn't good, choose  
14 what's -- it was just a suggestion.

15 MR. SEMPLE: Mr. Mayor? Sorry.

16 MR. NEVILL: Mr. Semple.

17 MR. SEMPLE: Yeah, my additional concern is  
18 that I asked this morning of the Amazon representatives  
19 whether they ever knew of a data center that had been shut  
20 down for non-compliance noise standard, and they didn't know  
21 anyone in the entire world.

22 And now we are attempting to create a standard

1 here that we will need to somehow enforce. And I just -- I  
2 don't think there's enough teeth in this to ensure that if  
3 something were to go wrong, we would be -- there would be an  
4 adequate incentive, I would say in terms of penalty, for  
5 Amazon to not potentially just disregard it because it's a  
6 basic operating expense or whatever the provision is.

7 I understand that it -- that this would be  
8 probably have to go to a court in order to enjoin Amazon from  
9 using the facility. And I just -- my problem is I can't see  
10 it in a good neighbor situation where Amazon comes in and is  
11 operating, and all of a sudden it violates these noise  
12 standards, and all of a sudden we're in the court because we're  
13 trying to keep the noise down.

14 And I just -- it -- it's a good idea, and I think  
15 that there is really only solutions, but it defers the actual  
16 judgment. I know we had this discussion before, and I don't  
17 want to go over it again, is that, yes, we don't know -- we're  
18 working on models and we don't know how this is going to work.

19 But I'm just concerned that we're fooling  
20 ourselves if we think that this will actually solve a problem  
21 if there is one. That's why I was actually trying to  
22 recommend we, say kick this thing -- can down the road at least

1 another month so we could take a look at this because this  
2 I think is the most critical aspect of the -- of all the  
3 conditions here, this is the most critical one.

4           And the one that I think has really affected  
5 our residents the most in terms of their looking at this. And  
6 well, the tests look good. And I have to say, I have read  
7 through the report. I -- we won't know until the real world  
8 experience, whether it actually will work.

9           And as Amazon has indicated, this is a new  
10 technology. It's one that does not exist in the United  
11 States. They have a few -- if they pay for our tickets to  
12 go to Italy, we might be able to go here -- listen to one.  
13 But I -- we don't have that opportunity to do that here. So  
14 we're going into a situation that I think is really,  
15 essentially, speculative in a major way.

16           And I just really want to make sure that we have  
17 that -- our ducks in a row so that if it doesn't comply, that  
18 we actually have some remedy that -- and this is why I think  
19 it's a legal issue that I thought could be reviewed, as to,  
20 one, how do we enforce this? And two, what are the  
21 complications when you get new enforcement action between a  
22 small town and a company that employs 1.6 million people?

1 MR. NEVILL: Does -- to follow up on that, does  
2 condition 25 give us extra -- does that cover some of the  
3 questions that have been asked as far as our enforcement?

4 MR. SIMMONS: I think beginning with the  
5 notice of violation, just to put the one notice about what  
6 the issues are is important so that -- that notice of violation  
7 provision you're talking about?

8 MR. NEVILL: Yeah, was --

9 MR. SIMMONS: Yeah.

10 MR. NEVILL: -- issue 25. Yeah. Which is  
11 the violation of any conditions may result, sort of seems to  
12 give the town broad policing power as to --

13 MR. SIMMONS: Right.

14 MR. NEVILL: -- you know, condition or revoke  
15 the SUP upon violation.

16 MR. SIMMONS: Right. That's where  
17 compliance actions typically start because you're required  
18 to give the applicant or the owner notice of how they're in  
19 violation to give an opportunity to make it right. Most times  
20 when you give a property owner notice if they're in violation  
21 of an ordinance, they tend to work with the town to come into  
22 compliance.

1           Typically, these cases don't end up going to  
2 court, but that's obviously an option that we have. And we  
3 have that. Even without the -- even without 25, the paragraph  
4 25, we have the option of if we have these proposed conditions  
5 and they're in writing and they go along with the application  
6 as approved by council, if they don't comply with these  
7 conditions, then we have the opportunity at that point to go  
8 to court.

9           And obviously, no one wants to go to court  
10 because it's expensive, it's costly, and we're trying to be  
11 good neighbors with AWS if the -- if this application's  
12 approved, but that may be the only recourse that we have.

13           MR. SEMPLE: But if there were litigation, we  
14 went to court, and Amazon decided that, well, we're wrong and  
15 they are complying, they could contest this and it could be  
16 a long, relatively drawn out process, correct?

17           MR. SIMMONS: That's true. It could be.  
18 Hope -- but the -- I think the idea from the town's perspective  
19 is to try to, talk to Amazon and try to reach an -- a reasonable  
20 amicable outcome in terms of compliance with the proposed  
21 conditions. I mean, once these things are in writing and  
22 spelled out very clearly as we're doing today, talking about

1 the conditions that are involved and making it as clear as  
2 possible.

3           When the judge looks at these conditions, he  
4 can see what the intent of council is. Can also see what the  
5 intent of AWS is in terms of entering into this understanding.  
6 It makes it easier for us to enforce these conditions. In  
7 terms of how long it'll go on in a court, that's very hard  
8 to say, obviously, but we -- I think we're on good footing  
9 with conditions like these in place.

10           MR. MCGUIRE: Mr. Mayor?

11           MR. NEVILL: Mr. McGuire.

12           MR. MCGUIRE: Yeah, the big thing is about  
13 enforcing it. So in the meantime, we go before court and  
14 everything else, they're not going to shut down. So the noise  
15 -- I'm just saying, worst case scenario, noise continues.  
16 What are we going to do? I mean, they've got armed guards.

17           And, I mean, I've shut down bars in my day as  
18 a cop. It's pretty easy. But I'm just -- worst case  
19 scenario. I mean, we need to know what we're really getting  
20 ourselves into here because, I've been to a bank one time and  
21 the bank does not have to give you your funds. I'm just  
22 saying.

1 MR. SIMMONS: Yeah.

2 MR. MCGUIRE: Okay. So with this, same  
3 thing. I mean, we're trying to be reasonable. We're up  
4 against billion-dollar corporation, we should think most  
5 dangerous course of action.

6 MR. SIMMONS: Yeah.

7 MR. MCGUIRE: You know, and that's a concern  
8 because it's -- the noise will be continuing and everything  
9 else.

10 MR. SIMMONS: Yeah.

11 MR. MCGUIRE: So --

12 MR. SIMMONS: And, you know, that -- I mean,  
13 that is definitely a worst case scenario situation because  
14 you have situations where some people who are not in  
15 compliance with the zoning code and not in compliance with  
16 the town code, and you file a because of action, then they  
17 were made out of compliance. It does happen in those cases.

18 With AWS, I'm thinking they probably don't  
19 want to end up in a newspaper that describes the ways in which  
20 they're not in compliance with the zoning code. But who is  
21 to say? But, to your point, they could continue to violate  
22 while the case is pending, and we would do everything we could

1 do to stop that violation as quickly as possible through the  
2 court system.

3 MR. MOONEY: Mr. Mayor, I'd like to make a  
4 comment. I mean, I agree that I don't see how we're going  
5 to enforce it. We can't chain ourselves to the server  
6 machines and not let them use it. They're still going to be  
7 making money. And with how long things could stay in  
8 litigation -- is the yellow house on Winchester Street still  
9 in litigation? We're still making money?

10 MR. HAMBY: Is there a yellow house there?

11 MR. MOONEY: The big one.

12 MR. HAMBY: True.

13 MR. MOONEY: But that's still an operation and  
14 he's still making money. I think we need to figure out how  
15 we're going to enforce this versus a litigation that could  
16 go on for months. I mean, this has gone on for months, so...

17 MR. HAMBY: Mr. Mayor, if I could?

18 MR. NEVILL: Mr. Hamby.

19 MR. HAMBY: We attached condition 17 under  
20 Section A to their occupancy certificate. After occupancy  
21 is granted, if they're in violation for noise ordinance with  
22 their chilling or anything else, can we revoke their occupancy

1 permit until the system is done? Can we put that in as a  
2 condition for them to have to close a phase until their units  
3 repaired or complies?

4 MR. SIMMONS: I think we can add that as a  
5 condition.

6 MR. HAMBY: We can use it as a condition?

7 MR. SIMMONS: I think so.

8 MR. HAMBY: So the condition that we put on  
9 17A, right? We can move down to 17B. We could say that they  
10 have 48 hours to comply if there's a problem, there's a  
11 ordinance violation outside. And if they can't, their  
12 occupancy permit is revoked until such a time as they are under  
13 the ordinance again.

14 MR. SIMMONS: Yes, the language works.

15 MR. HAMBY: Denise, was that confusing?

16 MS. HARRIS: No.

17 MR. HAMBY: Okay.

18 MS. HARRIS: But I would offer just for  
19 consideration that you keep B, just the first sentence, and  
20 ask the applicant if they can do continuous or annual. And  
21 then create a C, which gets to what you're talking about right  
22 now.

1 MR. HAMBY: Because we had this discussion  
2 this morning, I'm not interested in fines. Most of us get  
3 enough Amazon stuff at our house to pay their fines, right?  
4 So would their occupancy permit shut them down? I don't want  
5 them fined, I want them taken offline. So do we need -- and  
6 this -- I'm not sure, this may be the manager or the attorney,  
7 but do we need them to come up here again and let's discuss  
8 this with them?

9 MR. NEVILL: Uh-huh.

10 UNIDENTIFIED SPEAKER: Yes, sir.

11 MS. HARRIS: The applicant is here and can  
12 give another brief presentation if --

13 MR. HAMBY: Please --

14 MS. HARRIS: -- you're interested.

15 MR. HAMBY: Can we, Mr. Mayor?

16 MR. NEVILL: Could we bring the applicant  
17 forward to discuss these conditions then?

18 MR. MOONEY: Mr. Mayor, can I ask a question?

19 MR. NEVILL: Mr. Mooney.

20 MR. MOONEY: Mr. Simmons, can we get something  
21 from your firm that says these provisions are enforceable by  
22 law?

1 MR. SIMMONS: I think what will be written to  
2 the conditions is the things that we will use to enforce the  
3 conditions. So everything we're talking about now will be  
4 written into the conditions, and we'll use that in our legal  
5 action if it goes to that point -- if it gets to that point.

6 MR. SEMPLE: Mr. Simmons. I'm sorry. May I?

7 MR. NEVILL: Mr. Semple.

8 MR. SEMPLE: I mean, are you -- have you seen  
9 provisions like this before in a data center or --

10 MR. SIMMONS: Yes.

11 MR. SEMPLE: And they're identical or similar  
12 or --

13 MR. SIMMONS: Very similar.

14 MR. SEMPLE: Similar?

15 MR. SIMMONS: Yes.

16 MR. SEMPLE: And that there is no issue with  
17 -- I mean, here's one of the problems I have. You have a new  
18 phase, and then you try and do this if the next phase creates  
19 a violation. But it's -- but we have a -- it's a cumulative  
20 problem. As we found out, if you -- discussed, if you have  
21 10 chillers here, the 20th chiller may put it over the cap,  
22 actually in order to comport with the decibel requirements.

1           And I think these are DB -- I have number of  
2 issues. I believe that our standard table is based on a DBZ,  
3 which is a unweighted frequency scale. And report that we've  
4 received was based on DBA. I'm not comfortable, first of all,  
5 that based on the representation from Amazon, that we  
6 shouldn't otherwise independently -- we're doing this because  
7 we feel that the Polysonics has produced a report that we can  
8 rely on, I guess to some extent.

9           And I -- I'm -- I'd like to question whether  
10 we shouldn't get a second opinion as to what -- with respect  
11 to this technology before we adopt something like this because  
12 we don't know how excessive it may very well be. There are  
13 alternative views, and we discovered this before.

14           And I -- that other experts have come in and  
15 found that the noise thresholds could not be -- would be too  
16 high. I mean, would be -- would not be met and you'd have  
17 to -- you could never at any level satisfy. Even with this,  
18 we might be in a circumstance if we are not sure about the  
19 character of these chillers in terms of the noise,  
20 dissipation, emanation, that they could qualify.

21           MR. SEMPLE: And then, so we're stuck with a  
22 real big problem. That's again one reason I'm again,

1 encouraging that we take a little bit closer examination of  
2 this so that we have everything on the table that we have  
3 before we decide to even do this.

4           But going back to this, I think I agree with  
5 Councilman Heroux, we need to have something that has more  
6 teeth to it before we adopt it. But I think it's very  
7 important, we make sure that even if we adopt this, that there  
8 will ever be an opportunity that in enforcement, there won't  
9 be a continuing problem over a period of time. That  
10 technology simply does not satisfy our ordinance under any  
11 circumstances.

12           MR. MCGUIRE: Mr. Mayor.

13           MR. NEVILL: Mr. McGuire.

14           MR. MCGUIRE: I agree with Councilman Semple.  
15 I tried to look at this over the break, it's like Sominex.  
16 I'm not a scientist, that those had the age reference to that  
17 one. But I think what we need to do is to have an independent  
18 study, just to say that, are these numbers correct? Because  
19 we're basing enforcement, if I hear Councilman Semple  
20 correct, based on Amazon's data.

21           I mean, I think in all fairness and fiduciary  
22 to the town, we need to know, is that correct? I think we

1 need to find that out. I think we owe it to our citizens to  
2 know like, what is the independent and what's the sound  
3 threshold and things like that, if we're going enforce it.

4 MR. MOONEY: Mr. Mayor, didn't we talk about  
5 that earlier? Getting an independent third party study to  
6 verify this stuff?

7 MR. NEVILL: Uh-huh.

8 MR. MOONEY: I mean, I thought that's what we  
9 talked about.

10 MR. HAMBY: Mr. Mayor, I believe that when we  
11 were discussing earlier, these are the conditions for the SUP  
12 set forward as to the, I'll just call it, the draft of  
13 conditions. The question always comes up, all the sound  
14 modelling, like I understand, it's been all around all the  
15 time. It's kind of like traffic modelling. We do traffic  
16 modellings all the time until the traffic shows up. You never  
17 know if it works.

18 Same with the sound. Everybody's trying to  
19 decide what the sound's going to be on a building that doesn't  
20 exist. The biggest thing to do is if we do move forward with  
21 this, is to control the building itself. If they turn it on,  
22 the sound is too loud, we, the government, control their

1 occupancy permit. It's the most control that the government  
2 has over any business.

3           They turn off, they can't operate. I think  
4 that when they came in this morning, they gave a pretty good  
5 propelling presentation on the types of stuff that they're  
6 going to use. Now, I understand because we've been hearing  
7 it for months, just like everybody else, there's some data  
8 centers in another county, north of here, that's loud.

9           There happens to be a data center in this  
10 county that people think is loud. I think that overall, I  
11 think that everyone's sitting up here for better, for worse,  
12 and I think everybody out everywhere doesn't want a loud data  
13 center operating. So, the conditions mentioned, we need to  
14 figure out what conditions we want to impose.

15           In the SUP, this is the part where the  
16 government tries to control what the private sector puts up.  
17 What do we want to do? We've seen study by private citizens,  
18 we've seen studied by the applicant, we've seen presentations  
19 by the applicant of their type of HVAC system that they want  
20 to use.

21           If these aren't good enough at 60 days, which  
22 I don't agree with 60 days, 60 days' way too long, if we want

1 to do 48 hours, and if they can't mitigate it, yank their  
2 occupancy permit for that phase, they shut down. There are  
3 going to be from the presentation this morning, 10 phases,  
4 10 occupancy permits. Something's wrong on the roof, making  
5 too much noise, occupancy permits pulled on phase number two,  
6 they turn it off.

7           That's their revenue generating business. I  
8 would imagine that they would try and fix it as quickly as  
9 possible.

10           MR. SEMPLE: Mr. Simmons, I'm sorry.

11           MR. HAMBY: Go ahead, Bill.

12           MR. SEMPLE: Will your firm give us a written  
13 opinion that this does not -- that this is consistent with  
14 Virginia Law. I mean, I've read a little bit, and I can't  
15 say, but I understand there's a limit of \$500, for example,  
16 that precludes for noise violations in the Virginia Code.  
17 And I'm worried that under the Dillon's rule, that we need  
18 to be perfectly sure that we have not overstepped our  
19 authority in creating this provision.

20           And I think we should have a written opinion  
21 because if we do this and we find that it's invalid, I mean,  
22 then we're really -- I'm not going to say where, we're in real

1 trouble. Will you be able to do that?

2 MR. HAMBY: Yes, sir.

3 MR. SEMPLE: All right. But I think we should  
4 wait for that opinion before we proceed.

5 MR. HEROUX: Mr. Mayor.

6 MR. NEVILL: Mr. Heroux.

7 MR. HEROUX: Yeah. Thank you. I'm trying to  
8 simplify a little bit here. So, this industry, the IT  
9 industry, runs, especially in businesses like Amazon or  
10 Microsoft Azure or Google or Oracle or IBM or any of these  
11 guys. It runs on performance and it runs on service level  
12 agreements.

13 That's what gets the attention of these cloud  
14 service provider. There're customers that depend on them to  
15 have their servers and their technology up 99.99 percent of  
16 the time. Industries like the airline industry and hospitals  
17 and energy require very high availability. National  
18 security, I mean, you go down the list require very high  
19 availability. That's how they run their business.

20 So, you have that business side of it. Then  
21 we have the citizen side of it. What I don't think any of  
22 us wants up here is that, should this pass, that there's an

1 a noisy data center sitting out in our town that doesn't get  
2 fixed for 6, 7, 8, 9 months a year. So, what we're trying  
3 to find the balance here is incentivizing Amazon to understand  
4 their business, but at the same time almost have another  
5 service level agreement, which is to the town. The service  
6 level agreement is that the data center's in compliance with  
7 the noise.

8           And that just as you would be monitoring your  
9 servers and your networks and your storage to make sure that  
10 you're hitting that service level for your customer, that  
11 you're monitoring the noise to make sure you're hitting your  
12 service level for the citizens of this town, that it's a  
13 compliant data center.

14           And so you have -- I think we're trying to get  
15 on B is that that continuous monitoring is there after all  
16 the phases are built, or even as the phase are being built  
17 that you're monitoring it and we're there. If something for  
18 some reason goes wrong, I mean, this is mechanical equipment,  
19 things can burn out, who knows, I'm not an air guy?

20           But to Councilman Hamby's point that there's  
21 immediate action. That within 48 hours, there are steps  
22 taken to remediate that so the citizens don't have to listen

1 to this for some period of time that it may or may not get  
2 fixed. That's ultimately we're trying to achieve here.

3           So I don't know, again if we can hear from the  
4 applicant on kind of their thoughts on this, but I think that's  
5 what we're trying to -- where we're trying to get to. And  
6 if I'm following Councilman Semple, correctly, I think from  
7 council perspective is, in asking this and putting this in  
8 this SUP, are we overextending ourselves or I think what I  
9 heard you say is no, I mean, pulling an occupancy permit is  
10 an inherent authority that we have. We can pull our occupancy  
11 permit for the Hampton Inn or any, if they're not doing what  
12 they're supposed to do.

13           So, you know, I just maybe go back to you as  
14 like what we're talking about here. Are we overextending?

15           MR. SIMMONS: I don't think we are. I think  
16 what Councilman Semple was talking about was fines that we  
17 could impose. But again, we're not talking -- we're not  
18 interested in doing fines here. So, the maximum fine is laid  
19 out in the code. But we're talking about something different  
20 from that. We're talking about doing an injunction action.  
21 Causing --making them do one thing or another, stop doing one  
22 thing or another. So let's -- you know, we're within our

1 rights to do that and the conditions allow us to enforce it  
2 that way.

3 MR. SEMPLE: Mr. Councilman Heroux, since you  
4 have such -- you have experience in this, I'd like to ask the  
5 question. I mean, Amazon setups, gets its data center  
6 rolling and it has a client, we don't know who it is. And  
7 that client has critical -- mission critical requirements.  
8 And you're saying that if on one day the noise sort of exceeds  
9 the threshold, we're going to march over there and tell them  
10 to shut down their services?

11 MR. HEROUX: Exactly what I'm saying.

12 MR. SEMPLE: And you're actually going to  
13 believe, let's say these are mission critical services to  
14 people who demand them from, without naming, potential  
15 clients, that demand that they can't tolerate or they wouldn't  
16 be able to tolerate any downtime in existing bandwidth or  
17 latency. And you're saying we can go ahead and do something  
18 like that?

19 MR. HEROUX: I'm saying put the onus on Amazon  
20 to put the right engineering in place to design it so it works.  
21 Go into the design knowing this, put the risk on them to  
22 deliver this. It's a condition that they know when you're

1 doing business here, this is what it is. And they've got to  
2 engineer that out into their design to make sure it works.  
3 I'm open for, you know, we talked about 40 hours.

4           That's why I'd like to see the -- I'd love to  
5 see the applicant here. Let's get some feedback going on  
6 this. But, you know, yeah. This is the standard that we want  
7 them to deliver to. And if you don't meet it, then you don't  
8 operate. It's the same -- I mean, we can walk into any  
9 facility around here in this town and look at -- whether it's  
10 giant food, a pharmacy, you name it, and say, if they're not  
11 compliant, we can pull them.

12           MR. MOONEY: Mr. Mayor.

13           MR. NEVILL: Mr. Mooney.

14           MR. MOONEY: We heard from the applicant today  
15 that the VP can even walk into the facilities. And I think,  
16 to your point, I think we've put enough onus on Amazon to come  
17 up with things for this SUP. And I think that -- I completely  
18 -- I don't understand how we could tell some of their clients  
19 that were shutting them down without any of this stuff.  
20 Having a written notice from our law firm stating that it is  
21 enforceable in the State of Virginia.

22           I mean, we -- imagine we -- let's imagine some

1 people, and we vote and we pass this, and then the noise study  
2 -- they break the noise study and there's nothing here that's  
3 enforceable and they just keep going and I'm -- all these  
4 people. How can we enforce this?

5 MR. MCGUIRE: Mr. Mayor.

6 MR. NEVILL: Mr. McGuire?

7 MR. MCGUIRE: Yes. So basic police work says  
8 that something's an ordinance violation is not arrestable.  
9 So if in my house I'm violating the Warrenton noise ordinance  
10 and the police show up, they can't really kick my door in to  
11 make me stop. It's a legal matter. So, for us to say, we're  
12 going to go there and -- we're going to issue tickets and  
13 tickets and it's going to end up in court and everything else,  
14 so there is no teeth to this. So if I don't answer the door  
15 to the police, you can't break the door in because my music's  
16 too loud.

17 MR. HAMBY: I don't think you needed a  
18 special-use permit though, to buy your house.

19 MR. MCGUIRE: Yeah. But then what I'm saying  
20 though is what -- and let me finish, is they can continue to  
21 operate like Mr. Semple said, they're not going to stop  
22 because of what we're saying. We can't even get in there to

1 begin with. That's what I'm saying. I think we're going  
2 down a bad road here in trying to enforce this. We really  
3 need to know from Virginia Law and code as to what we can and  
4 can't do. I mean, we tell them to cease and desist, what are  
5 we going to do if they say no?

6 MR. HAMBY: An SUP is a conditional use,  
7 correct? So the conditional use rests in the allowance of  
8 the governing body of the town. So if they are in violation  
9 and we deny them occupancy, that SUP must cease operations;  
10 is that correct based upon our policing?

11 MR. SIMMONS: That's correct.

12 MR. MCGUIRE: But also I'm talking about after  
13 it's built, if there's noise violation too. That's what I'm  
14 talking about.

15 MR. HAMBY: But I understand what you're  
16 saying. I mean, I get it and I understand, but it would be  
17 like Harris Teeter us denying the SUP, but them building a  
18 gas station anyway. I mean it's -- these are all the things  
19 that we deal with in the government of, you know, the town  
20 of Warrenton, our side has become strict to where we require  
21 an SUP. This stuff isn't done by by-right.

22 And that's one of the things to go into later

1 is that if this proposal was 300 yards north or this was 300  
2 yards east of where it sits right now, none of us would be  
3 in this room. None of us. We -- no one would be creating  
4 any data for the data center, which we've created a lot of  
5 over the last six months because if you move into the county,  
6 it's all by-right.

7           It'd have gone. It'd all been by-right. Vin  
8 Hill's by-right, Remington's by-right. So -- hang on though,  
9 not to get off track, but the SUP controls that we have in  
10 Warrenton are much more stricter than Fauquier County itself.  
11 That's why we're here. We're here talking about it. We're  
12 trying to set the conditions of the SUP.

13           And I don't disagree that somebody cannot  
14 follow the law. Happens every day. Like I understand but  
15 we have used occupancy enforcement for hotels in town. We've  
16 occupancy permits for all kinds of different things. That  
17 is the greatest thing that the government has. They can pull  
18 your occupancy permit and close you down.

19           MR. MCGUIRE: But there's public access to  
20 those buildings, that's the thing.

21           MR. HAMBY: I get it.

22           MR. MCGUIRE: I'm concerned about when it's

1 build.

2 MR. HAMBY: We don't need to send a SWAT team  
3 though, we get it.

4 MR. MCGUIRE: No, absolutely not.

5 MR. HAMBY: We can call them on the phone.

6 MR. MCGUIRE: Nobody's talking about that.

7 What I'm saying is you have to agree, it's not enforceable  
8 if they don't let us in there to deliver it, they can continue  
9 to operate. That's what I'm saying. After it's even up and  
10 running.
