

PUBLIC SAFETY & WELFARE COMMITTEE MEETING AGENDA

WEDNESDAY, SEPTEMBER 04, 2024 AT 5:00 PM

ROOM 0041, LOWER LEVEL, MUNICIPAL BUILDING, 106 JONES STREET, WATERTOWN, WI

Virtual Meeting Info: <https://us06web.zoom.us/join> Meeting ID: 543 850 6085 Passcode: license One tap mobile +16469313860

<https://us06web.zoom.us/j/5438506085?pwd=2Bzl5YIFWz8CJhn4zgXM1kDcE0mHoL.1>

All public participants' phones will be muted during the meeting except during the public comment period.

1. CALL TO ORDER

2. RECIEVE COMMENTS FROM THE PUBLIC

Each individual who would like to address the Committee will be permitted up to three minutes for their comments

3. APPROVAL OF MINUTES

A. Public Safety minutes from August 7, 2024

4. BUSINESS

A. Discuss and possible action: Fire Department Fireworks

B. Review and take possible action: Stop Sign Request at intersection of Deer Trail and Willow Creek Parkway

C. Review and take possible action: Amend Chapter 500-5 of City of Watertown Municipal Code of Ordinances, One Way Streets and Alleys

D. Review and take action: Special Event - Freedom Ride

5. ADJOURN

Persons requiring other reasonable accommodations for any of the above meetings, may contact the office of the City Clerk at mdunneisen@watertownwi.gov, phone 920-262-4006

A quorum of any City of Watertown Council, Committee, Board, Commission, or other body, may be present at this meeting for observing and gathering of information only

PUBLIC SAFETY & WELFARE COMMITTEE

August 7, 2024

5:00 p.m.

1. CALL TO ORDER

Members Present	Also in Attendance	Citizens Present
<ul style="list-style-type: none"> • Dana Davis, Chair • Brad Blanke (virtual joining at 5:12 p.m.) • Steve Board • Eric Schmid 	<ul style="list-style-type: none"> • Andrew Beyer • Chief David Brower • Alder Jonathan Lampe 	<ul style="list-style-type: none"> • Annette Bliefernicht • Roger Bliefernicht • Meredith Degnew

2. RECEIVE COMMENTS FROM THE PUBLIC

There were no comments from the public.

3. APPROVAL OF MINUTES

A. Public Safety and Welfare minutes from June 5, 2024

- [Public Safety Meeting Notes 6.5.24.pdf](#) (0.03 MB)
- Motion to approve by Board, 2nd by Schmid and passed unanimously.

4. BUSINESS

A. Review and take action: Parking on Front Lawns

- [Parking on Front Lawns.pdf](#) (0.09 MB)
- Davis shared information from Mr. Zirbes and explained that this ordinance actually falls under the jurisdiction of the Plan Commission and, if approved by PS&W, would need to be referred to the Plan Commission for review. Lampe spoke in support of this ordinance. He said that using the lawn as a parking lot is happening in his district. Schmid spoke in opposition. Blanke spoke in opposition.
- **MOTION:** Board made a motion to recommend this ordinance to the Plan Commission for review. Motion failed for lack of a second.

I. Review and take action: Special Event – Blocktoberfest

This item was moved up in the agenda upon agreement of the PS&W Committee.

- [2024-22 Application Redacted.pdf](#) (0.75 MB)
- [2024-22 Map.pdf](#) (0.06 MB)
- [Memo re PSW SPECIAL EVENT.pdf](#) (0.05 MB)
- **MOTION:** Motion to approve by Board, 2nd by Davis and approved unanimously.

B. Review and take possible action: Add a "Right Turn Only" sign at the west exit of Berres Brothers Coffee on Air Park Drive

- [August 7 Narrative.pdf](#) (1.44 MB)
- **MOTION:** Board made a motion to direct the staff to add the appropriate sign (Right Turn Only? One Way?) at the west exit of Berres Brothers Coffee and West Street, 2nd by Schmid and passed unanimously.

E. Review and take possible action: Carriage Hill Drive Speed Study Results

This item was moved up in the agenda upon agreement of the PS&W Committee.

- [2024.0807 AB Carriage Hill Traffic Study.pdf](#) (0.09 MB)
- [Chicane Sketch.pdf](#) (0.26 MB)
- The Committee discussed the Traffic Study report and the recommendations made by the Engineering Dept.

- **MOTION:** Schmid made a motion to request that Parks, Rec and Forestry work with the Engineering Dept. to plant trees strategically on Carriage Hill Drive, 2nd by Board and passed unanimously.
- **MOTION:** Board made a motion to direct Engineering to investigate the location and cost of bump outs to slow traffic on Carriage Hill Road, 2nd by Davis and approved unanimously.

C. Review and take possible action: Request for pavement marking at intersection of Dayton Street and West Street

- [2024.0807 AB West Street Striping Request.pdf](#) (0.08 MB)
- [Site Map.pdf](#) (0.66 MB)
- [20240715154017.pdf](#) (0.28 MB)
- **MOTION:** Schmid made a motion to approve marking at the intersection of Dayton Street and West Street, 2nd by Davis and passed unanimously.

D. Review and take possible action: Milford Street on-street parking at Grinwald Park

- [2024.0807 AB Repeal West Side Parking on Milford Street by Grinwald Park.pdf](#) (0.09 MB)
- [SITE MAP.pdf](#) (0.87 MB)
- [Milford St Park Docs \(003\).pdf](#) (0.95 MB)
- [Grinwald Land Donation.pdf](#) (0.04 MB)
- [ORD Repeal Portion of Section 500-9 A Parking Prohibited in Specified Places of City of Watertown General Ordinances - DRAFT.pdf](#) (0.03 MB)
- **MOTION:** Board made a motion to request that Park, Rec and Forestry continue to look for alternative soccer parks with necessary parking that will accommodate the large crowd that gathers on Sundays at Grinwald Park, 2nd by Davis and passed unanimously.

F. Review and take possible action: City of Watertown Fireworks Ordinance

MOTION: Blanke made a motion to table this item until the next meeting to allow time for input from the Fire Chief, Police Chief and an examination of the code. 2nd by Board and passed unanimously.

G. Review and take action: Special Event - Wine Walk

- [2024-20 Application Redacted.pdf](#) (0.55 MB)
- [2024-20 Map.pdf](#) (0.15 MB)
- [Memo re PSW SPECIAL EVENTS.pdf](#) (0.05 MB)
- **MOTION:** Motion to approve by Blanke, seconded by Board and approved unanimously.

H. Review and take action: Special Event - MCL Annual Fundraiser

- [2024-21 Application Redacted.pdf](#) (0.80 MB)
- [2024-21 Map.pdf](#) (0.06 MB)
- [Memo re PSW SPECIAL EVENTS.pdf](#) (0.05 MB)
- **MOTION:** Motion to approve by Blanke and seconded by Board. Motion passed unanimously.

J. Review and take action: Special Event - Watertown Homecoming Parade

- [2024-24 Application Redacted.pdf](#) (0.36 MB)
- [Memo re PSW SPECIAL EVENTS.pdf](#) (0.05 MB)
- **MOTION:** Motion to approve by Board, 2nd by Davis and approved unanimously.

K. Review and take Action: Special Event - YMCA 5K Riverfest Run

- [2024-26 Application.pdf](#) (0.25 MB)

- [2024-26 Map.pdf](#) (0.14 MB)
 - [Memo re PSW SPECIAL EVENT-2024-26.pdf](#) (0.05 MB)
 - **MOTION:** Motion to approve by Blanke, 2nd by Schmid and approved unanimously.
- L. Review and Discuss: Special Event - St. Paul's Church Picnic
- [2024-25 Application Redacted.pdf](#) (0.68 MB)
 - [2024-25 Map.pdf](#) (0.07 MB)
 - [RE Aug 18 permit request for St Paul's Episcop....pdf](#) (0.22 MB)

5. ADJOURN

There being no additional business to come before the Committee, a motion was made by Schmid to adjourn and seconded by Board. The motion carried unanimously.

MEMO

Fire Department

To: Public Safety and Welfare Committee

From: Fire Chief Reynen

Date: 8/27/2024

Subject: Fireworks Data

Background

We were approached to provide data on fireworks incidents and their impact on the Fire Department.

Budget Goal

Maintains a safe and healthy community, with an eye toward future needs and trends.

Financial Impact

N/A

Recommendation

According to Wisconsin Department of Health Services, in 2021, fireworks related incidents and use was at a high in 2021, and have since decreased. <https://www.dhs.wisconsin.gov/injury-prevention/fireworks-stats.htm> In 2021, there were 140 reported Emergency Department visits that were related to Fireworks and 107 in 2022.

Nationally, fireworks related incidence is about 3.1 per 100,000 individuals in 2022, down from 3.5 in 2021. According to the National Fire Protection Association, more than 31,000 reported fires are started by fireworks annually.

The Watertown Fire Department has no records of fireworks related incidents from the last two years. This may be due to the way the records were entered and coded due to the nature of the call. However, there are no major concerns or trends fire or medically related to fireworks that I am aware of for the city residents.

MEMO

Engineering Division of the Public Works Department

To: Chairperson Davis and Committee Members

From: Andrew M. Beyer, P.E., Director of Public Works/City Engineer

Date: August 28, 2024

Subject: Public Safety & Welfare Committee Meeting of September 4, 2024

Background

Agenda Item:

Review and take possible action: Stop Sign Request at Deer Trail and Willow Creek Parkway

BACKGROUND:

Alderperson Wetzel received a request for a stop sign to be placed at the intersection of Deer Trail and Willow Creek (see attached site map). Per the Manual of Uniform Traffic Control Devices (MUTCD), stop signs should be used if engineering judgement indicates that one or more of the following conditions exist:

- A. Intersection of a less important road with a main road where application of the normal right-of-way rule would not be expected to provide reasonable compliance with the law;
- B. Street entering a through highway or street;
- C. Unsignalized intersection in a signalized area; and/or
- D. High speeds, restricted view, or crash records indicate a need for control by the STOP sign.

Drivers on Willow Creek Parkway are required to yield to traffic on Deer Trail due to the T-intersection. Although item D. cites high speeds, stop signs should not be used for speed control per the MUTCD. It doesn't appear that a vehicle crash has occurred in this location in the last five years.

Historically, the City has not placed stop signs in residential neighborhoods, due to the cost/quantity and maintenance of said signs to be place in residential neighborhoods.

Attachments:

- Site Map

MEMO

Budget Goal

2024 Operations Goal #5

Financial Impact

Signage installation and maintenance cost.

Recommendation

Engineering Division offers the following options:

1. Deny the request based on failure to meet MUTCD requirements to warrant stop sign placement.
2. Place the sign pending available funding.

2024 Operational Goals

1. Proactively maintains and improves our parks and infrastructure to ensure quality, safety and compliance
2. Supports employee retention and growth, and also works to address critical staffing areas
3. Invests in the assessment, strategic planning and maintenance of our city buildings
4. Promotes and fosters innovative approaches for community development and growth
5. Maintains a safe and healthy community, and expands community education on safety and health

MEMO

Engineering Division of the Public Works Department

To: Chairperson Davis and Public Safety & Welfare Committee

From: Andrew M. Beyer, P.E., Director of Public Works/City Engineer

Date: August 28, 2024

Subject: Public Safety & Welfare Committee Meeting of September 4, 2024

Background

Agenda Item:

Review and take possible action: Repeal § 500-5 One-Way Streets and Alleys – Third and Fourth Streets

BACKGROUND:

In 2022, the Downtown Main Street Reconstruction Task Force recommended bump outs be placed in Downtown Main Street at several Main Street intersections, including Third Street & Fourth Street, during the Wisconsin Department of Transportation's (WisDOT) 2028 Main Street Reconstruction Project. The Downtown Main Street Reconstruction Task Force also made a recommendation in 2022 that a traffic study be conducted in the downtown area to study one-way streets and explore the viability of converting them to two-way streets.

As part of WisDOT design process of Main Street, WisDOT ran an analysis on the viability of bump outs at Main Street and Third Street and Main Street and Fourth Street if the current one-way streets were made two-way. The results found that if Third & Fourth Streets were converted to two-way traffic at Main Street, the proposed bump outs would not be feasible as both streets are "truck routes" and there would be insufficient turning radius for trucks. If these two streets remain one-way, then the bump outs would work at both Third and Fourth Streets at Main Street.

The City of Watertown placed money in the 2024 budget to conduct the downtown traffic study, a request for proposals was advertised and using Qualification Based Selection, raSmith was selected to conduct the study. The City has held a kickoff meeting with raSmith and their representatives shared the following comments:

- They agreed with WisDOT that if Third & Fourth Streets were converted to two-way traffic, the bump outs would be removed.

MEMO

- If Third & Fourth Streets were converted to two-way traffic parking on Main Street between Second & Third Streets may be impacted as a designated turn lane may be needed (a designated left turn lane currently exist between Third & Fourth Streets). The need for a designated turn lane will be assessed as part of raSmith's traffic study once field traffic data is collected.
- Engineering Division received preliminary analysis from raSmith this week and their research did confirm that if Third and Fourth Streets were converted to two-way traffic, the proposed bump outs would need to be removed at both intersections. The preliminary study results indicated that if these two streets were converted to two-way traffic, the intersections at Main Street would likely continue to operate acceptably for traffic flows. They also noted that if converted to two-way traffic, national studies concluded there are economic and safety benefits of the conversion from one-way to two-way traffic.

The preliminary analysis is attached. Key takeaways of the abbreviated study are:

- Historic daily traffic counts show a steady decline in volumes along Main Street/3rd Street/4th Street. Existing traffic levels are about one-half of the peak conditions of the early 1990s.
- The Third Street/Fourth Street intersections are expected to operate acceptably under two-way configuration.
- The intersections are expected to have surplus capacity to accommodate future traffic growth.

Bump out review, and the conversion of both Third and Fourth Streets from one-way to two-way traffic was presented before both the Downtown Main Street Reconstruction Task Force and Public Works Commission on August 27, 2024. The Task Force made a positive recommendation to Public Works Commission to remove bump outs at the intersections of Main Street & Third Street and Main Street and Fourth Street to allow for conversion of Third Street & Fourth Street to two-way as part of the 2028 WisDOT Main Street Reconstruction Project. Public Works Commission approved removing bump outs proposed at both intersections to potentially allow for two-way traffic on both streets. The Commission was informed that if they approved converting Third & Fourth Streets to allow for two-way traffic, this item would move onto Public Safety & Welfare Committee for ordinance revision. It should be noted that if Public Safety & Welfare repeals sections of Chapter 500, the conversion from one-way to two-way traffic would not occur until WisDOT's reconstruction of Main Street in 2028.

Attachments:

- Site Map
- Detail Sheets
- RA Smith Draft Preliminary Analysis
- Draft Ordinance

MEMO

Budget Goal

2024 Operations Goal #5.

Financial Impact

No financial impact until 2028. Any costs can be added to the 2028 City Budget.

Recommendation

Engineering Division recommends the conversion of Third and Fourth Streets from one-way to two-way traffic during the WisDOT reconstruction of Main Street in 2028. To move forward to Common Council would require Committee approval to repeal §500-5 One-way streets and alleys of the following streets:

Name of Street	Location	Direction of Travel
Fourth Street {Amended by Ord. No. 72-36}	From Western Ave. to Madison St.	North
Third Street {Amended by Ord. No. 72-36}	From Madison St. to Western Ave.	South

2024 Operational Goals

1. Proactively maintains and improves our parks and infrastructure in an effort to ensure quality, safety and compliance
2. Supports employee retention and growth, and also works to address critical staffing areas
3. Invests in the assessment, strategic planning and maintenance of our city buildings
4. Promotes and fosters innovative approaches for community development and growth
5. Maintains a safe and healthy community, and expands community education on safety and health

The schematic design plan for Main St illustrates a series of urban interventions along a corridor. Key features include:

- Intersections:** The plan shows intersections with 3rd St, 4th St, and 5th St. Each intersection is marked with a red circle and a blue star indicating a specific design point.
- Stationing:** The plan includes stationing markers along Main St, ranging from 22+00 to 30+00.
- Design Features:** Various urban design elements are labeled, including Custom Kiosk Planters, Bench, Bollards, Bubbler, Stilewalks, Terrace, Street, Bike Rocks, Potential Temporary Parker Options, Benches, Crosswalks, Block ID Signs, and Bike Rocks.
- Traffic Flow:** One-way traffic flow is indicated by arrows labeled "One Way" at the intersections.
- Legend:** A legend in the top left corner defines the symbols used for Accent Paving, Opportunity, and Enhanced Crosswalks.

CREATIVITY BEYOND ENGINEERING

MEMORANDUM

DATE: August 20, 2024

TO: Andrew Beyer, P.E., Director of Public Works/City Engineer, City of Watertown

FR: Justin Schueler, P.E.
Shana Brummond, P.E., PTOE

RE: Downtown One-Way/Two-Way Street Conversion Traffic Study
Preliminary Findings (abbreviated study)
Watertown, Wisconsin

INTRODUCTION

The City of Watertown is evaluating the conversion of several streets in the downtown area from one-way to two-way operations to improve access, simplify circulation for motorists, reduce travel speeds, and better accommodate multi-modal users. raSmith has been retained to assist the city with this study. The existing roadway grid provides a series of one-way paired streets, generally between 3rd Street and 9th Street extending from Western Avenue to Division Street. The focus of the conversion study will be on the 3rd Street and 4th Street corridors, which are important north-south travel routes through Watertown. These streets provide access to various commercial/institutional/residential land uses, serve as truck routes through the city, and have signalized intersections with Main Street (Wisconsin State Highway 19).

WIS 19/Main Street (through downtown) is planned for reconstruction in 2028 and the Wisconsin Department of Transportation (WisDOT) is currently working on design plans for the project. Elements of the roadway design, including traffic signal equipment and use of curb bump outs, would be impacted if 3rd Street/4th Street are converted to two-way operations. WisDOT has requested that the city provide a decision on the possible conversion as-soon as possible to allow for the project design process to remain on schedule. raSmith has conducted an abbreviated study to develop traffic volume estimates and evaluate preliminary traffic operations along the 3rd Street/4th Street corridors under one-way and two-way configuration. The intent of this study is to assist the city in their decision-making process to meet WisDOT's schedule. Procedures and findings of the abbreviated study are summarized in this memo.

A full study of preliminary findings is anticipated to be completed later in 2024 and will cover additional evaluation including more detailed safety and economic assessment, concept improvements with cost estimates, and summary of feedback received at a public involvement meeting. A final study will be completed in 2025 (after the Main Street-Cole Memorial Bridge reopens) and is anticipated to include field traffic data collection, updated operational analysis, a parking evaluation, and final intersection geometry and traffic control recommendations.

STUDY AREA

The overall downtown one-way street system study area is shown in Exhibit 1. The one-way street network is not continuous through downtown, with many of the streets having sections that currently

operate as two-way (especially near Main Street). This discontinuity adds to the complexity of the network and introduces additional driver confusion.

The abbreviated study focuses on the 3rd Street and 4th Street corridors between Market Street and Madison Street includes the following six intersections:

- 3rd Street with Market Street (three-way stop)
- 3rd Street with Main Street (traffic signal)
- 3rd Street with Madison Street (one-way stop)
- 4th Street with Market Street (three-way stop)
- 4th Street with Main Street (traffic signal)
- 4th Street with Madison Street (all-way stop)

raSmith collected information regarding the existing roadway geometrics and traffic control in the study area, as shown in Exhibit 2.

CRASH ANALYSIS

raSmith obtained crash data for the most recent five-year period (2018 to 2022) within the overall downtown study area and the 3rd Street/4th Street corridors.

During the five-year period, 331 crashes were reported within the downtown study area. The crashes included 1 fatality, 55 injury and 275 property damage only. Specific crash patterns included:

- Majority of crashes occurred along Main Street. Angle crashes were the predominant type.
- Five head on crashes occurred within the downtown study area.
- Seven crashes involving pedestrians occurred within the downtown study area.
- Five crashes involving bikes occurred within the downtown study area. No bike crashes occurred along Main Street.

A total of 42 crashes were reported along the 3rd Street corridor (Western Avenue to Madison Street) and 43 were crashes reported along the 4th Street Corridor. The crashes included 16 injury and 69 property damage only. Specific crash patterns included:

- Majority of crashes occurred at the Main Street/3rd Street (20) and Main Street/4th Street (17) intersections.
- Two of the five head-on crashes occurred along 3rd Street (1) and 4th Street (2).
- Six crashes occurred at the 4th Street/Dodge Street intersection, five of which were angle crashes.
- One pedestrian crash occurred along 4th Street (near Market Street)

Additional crash information is provided in Appendix A.

TRAFFIC VOLUMES

The following sections provide information on daily and peak hour traffic volumes within the study area.

DAILY TRAFFIC VOLUMES

The one-way street system in downtown Watertown was originally implemented in the 1970s to accommodate increasing traffic volumes and address vehicular operational concerns. Historical Annual Average Daily Traffic (AADT) information published by WisDOT shows traffic volumes in downtown

Watertown have been declining since the mid-1990's (see historic Main Street daily volumes in Figure 1 and additional detail in Appendix B). Existing daily traffic volumes are at levels about one-half of those experienced during peak years in the early 1990s.

PEAK HOUR TRAFFIC VOLUME ESTIMATES

The Main Street (Cole Memorial) Bridge over the Rock River is currently under construction and closed for all of 2024. Due to the bridge closure, current intersection traffic counts could not be collected. raSmith utilized a mix of historic count data and local knowledge of the downtown travel patterns to estimate peak hour intersection traffic volumes for use in the preliminary analysis. Raw traffic data sources included WisDOT's hourly bidirectional traffic count data along the study area roadways, historic Year 2004 and 2017 intersection counts at Main Street with 3rd Street and 4th Street, and Year 2022 counts from the adjacent Main Street intersection with 5th Street location.

Estimated Year 2024 existing peak hour traffic volumes are shown in Exhibit 3. These counts are representative of non-summer conditions. A comparison of historic data showed more intense morning and evening peak period traffic during non-summer months, as compared to summer months. This would be expected due to school related traffic increasing during peak periods of the non-summer months.

Additional traffic volume data including daily traffic volumes, historic traffic counts and estimated traffic volume parameters (peak hour factor, heavy vehicle percentage) is provided in Appendix B.

PRELIMINARY TRAFFIC ANALYSIS

The study intersections were analyzed in Synchro software using the procedures set forth in the Highway Capacity Manual 7th Edition (HCM7). Level of Service (LOS) is a quantitative measure from the HCM referring to the overall quality of flow at an intersection. LOS ranges from very good, represented by LOS "A," to very poor, represented by LOS "F". For analysis and design purposes, LOS "D" was used to define acceptable peak hour operating conditions and is consistent with current WisDOT practice.

EXISTING ONE-WAY TRAFFIC OPERATIONS

Results of the preliminary existing traffic analysis are shown in Exhibit 4. All movements at the focus study intersections operate acceptably at LOS C or better under the current one-way configuration. Year 2024 one-way configuration 95th percentile queues are shown in Exhibit 5. Existing queues are accommodated within the existing turn-lane storage and do not back-up between the two signalized intersections. Westbound queues at Main Street/4th Street (325') are shown to extend beyond the adjacent 5th Street intersection.

TWO-WAY TRAFFIC OPERATIONS

The existing traffic volumes were reassigned to reflect two-way traffic on 3rd Street and 4th Street as shown in Exhibit 6. The two-way analysis assumed single lane approaches along 3rd Street and 4th Street and existing geometry along Main Street, as shown in Exhibit 7. Signal timings were optimized

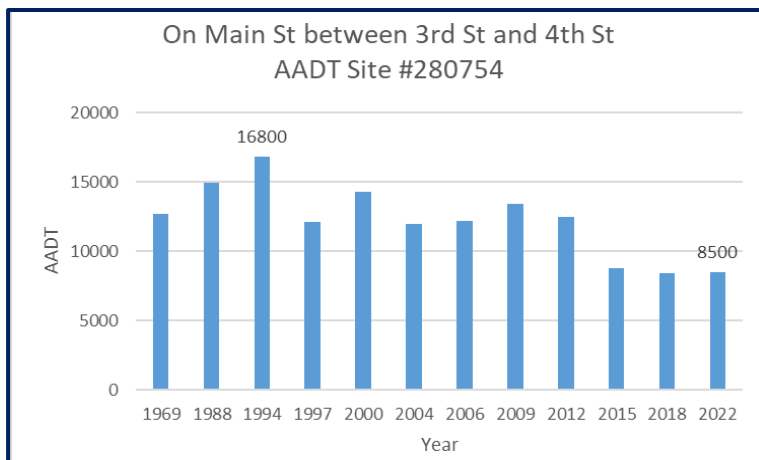

Figure 1
Historic AADT Volumes along Main Street

for the analysis but generally remained similar to existing conditions (including maintaining the existing 80 second cycle length and use of a lagging westbound left-turn at Main Street/4th Street).

The preliminary two-way street analysis results are shown in Exhibit 8. All movements at the focus study intersections are expected to continue to operate acceptably at LOS C or better under the two-way configuration. Year 2024 two-way configuration 95th percentile queues are shown in Exhibit 9. Queues are expected to continue to be accommodated within the existing turn-lane storage and not back-up between the two signalized intersections. Westbound queues at Main Street/4th Street (350') are expected to continue to extend beyond the adjacent 5th Street intersection.

SUPPLEMENTAL OPERATIONAL ANALYSIS

SimTraffic, the micro-simulation companion program to Synchro, was also used to further test the weekday evening peak hour conditions (the higher volume peak) under two-way operations. Specifically, the simulation was used to assess traffic queueing between the intersections along Main Street and the impact of vehicles making left-turn from the mainline onto a side street (requiring trailing vehicles to wait until the turn is completed). The comparison of SimTraffic and Synchro reported queues is provided in Exhibit 10. Overall, the SimTraffic simulation showed similar queueing patterns as compared to Synchro and backups were not observed to extend past the adjacent 3rd Street/4th Street signalized intersections. Approximately 10 to 15 occurrences of mainline Main Street left-turning vehicles (eastbound and westbound at 3rd Street, westbound at 4th Street) were observed to momentarily block through traffic while waiting to make the turn. The standing queue dissipated within the same or next signal cycle, resulting in short term localized delays.

An additional sensitivity test was conducted at the focus area intersections under the two-way configuration to evaluate if the conversion provides surplus capacity to accommodate potential higher volume conditions that may occur with future redevelopments in the downtown area. The analysis showed the intersections have surplus capacity under the two-way configuration and are expected to operate acceptably at LOS D or better conditions with a 15% increase in traffic volumes.

NATIONAL STUDIES OF ONE-WAY TO TWO-WAY CONVERSION

raSmith reviewed several national studies of one-way to two-way street conversion projects in downtown areas. Reported economic and safety benefits of the conversion projects included:

- Positive economic impact on existing development and catalyst for future redevelopment
- More direct access to destination
- Easier to navigate the roadway system
- Less roadway signage
- Slower and safer vehicle speeds
- Increase pedestrian activity

CONCLUSIONS

Based on the preliminary findings, the focus study intersections are expected to operate acceptably with 3rd Street and 4th Street as two-way streets. The two-way configuration provides acceptable level of service and queueing, and the intersections were show to have surplus capacity to accommodate future traffic growth. Under two-way configuration, north-south traffic along 3rd Street and 4th Street is expected to distribute between the two roadways. Generally, traffic traveling in/out of downtown to/from the north is expected to use 4th Street and traffic to/from south is expected to use 3rd Street. Traffic along 4th Street is expected to be slightly higher (as compared to 3rd Street) with more traffic using 4th Street (north of Main Street) and a higher intensity land use (post office, Turner Hall, churches).

As previously noted, this abbreviated study is intended to assist the city in their decision-making process on the one-way to two-way conversion and to meet WisDOT's project timeline. More detailed studies will be conducted in the future and the following elements will be further evaluated as part of the full traffic study:

- Need for additional exclusive left-turn lanes along Main Street
- Consideration to remove the traffic signal at Main Street intersection with 3rd Street
- Roadway cross section alternatives along Main Street, 3rd Street and 4th Street
- Bicycle accommodations
- Impacts to on-street parking
- Cost estimates
- Considerations for conversion of other one-way streets in the downtown area

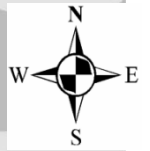

ADDITIONAL CONSIDERATIONS

Several other Wisconsin cities have successfully converted one-way streets to two-way streets in recent years, including:

- Court Street, City of Janesville
- St. Paul Avenue/North Street, City of Waukesha
- US 10/WIS 42 (8th Street/10th Street), City of Manitowoc
- Wells Street/State Street, City of Milwaukee
- Wisconsin Avenue/Lake Avenue, City of Racine

News articles on these projects identified the desire for slower vehicle speeds, more inviting conditions for pedestrians and bicyclists, improved vehicular circulation, and better business visibility as some of the reasons for pursuing the change. General post-conversion reporting on the completed projects has been positive. Additional correspondence with these communities could be helpful to the City of Watertown during the evaluation and implementation process.

The City of Watertown currently has several roadways designated as truck routes through the downtown area, including 1st Street, 2nd Street (north of Main Street), 3rd Street, 4th Street, Main Street, and sections of Market Street and Madison Street. If 3rd Street and 4th Street are converted to two-way, the City of Watertown could consider consolidation or relocation of these truck routes to provide increased flexibility for design of the Main Street, 3rd Street, and 4th Street corridors.

**DRAFT ORDINANCE TO
REPEAL A PORTION OF SECTION 500-5, ONE-WAY STREETS AND
ALLEYS OF CHAPTER 500 TRAFFIC CODE OF THE CITY OF
WATERTOWN**

**SPONSOR: ALDERPERSON DAVIS
FROM: PUBLIC SAFETY & WELFARE COMMITTEE**

**WITH FULL SUPPORT FROM: PUBLIC WORKS COMMISSION AND
THE DOWNTOWN MAIN STREET RECONSTRUCTION TASK FORCE**

THE COMMON COUNCIL OF THE CITY OF WATERTOWN DOES ORDAIN AS
FOLLOWS:

SECTION 1. Section 500-5 One-Way Streets and Alleys, is hereby repealed as follows:

Name of Street	Location	Direction of Travel
Fourth Street [Amended by Ord. No. 72-36]	From Western Ave. to Madison St.	North
Third Street [Amended by Ord. No. 72-36]	From Madison St. to Western Ave.	South

SECTION 2. All ordinances or parts of ordinances inconsistent with the provisions of this ordinance are hereby repealed.

SECTION 3. This ordinance shall take effect and be in force the day the WisDOT Main Street Reconstruction project is completed and opened to the traveling public. This is anticipated to be in Fall 2028.

Indemnification and Hold Harmless

(Read carefully before signing!)

Indemnification: By signing below, I acknowledge that for good and valuable consideration, I (applicant), on behalf of myself and the organization, if applicable, agree to indemnify, defend and hold harmless the City of Watertown and its officers, officials, employees and agents from and against any and all liability, loss, damage, expenses and costs, including attorney fees, arising out of the activities performed as described herein, caused in whole or in part by any negligent act of omission of the applicant/organization, anyone directly or indirectly employed by any of them or anyone whose acts may be liable, except where caused by the sole negligence or willful misconduct of the City.

Certification: By signing below, I certify that I am at least 18 years of age and that I have reviewed and understand the City's Insurance Requirements and Ordinance for Special Events. My signature further confirms: (i) I understand the filing of this application does not ensure the issuance of a Special Event Permit; (ii) The special event application fee is non-refundable (iii) I will be responsible for ensuring the event and event participants comply with all applicable City ordinances, traffic rules, park rules, state health laws, fire codes, alcohol licensing regulations, and any other applicable laws, rules and regulation;. (iv) Fees for park facilities, food vendor permits, fireworks permit, any other applicable City of Watertown permits or licenses, other municipal services and equipment, etc., are in addition to the Special Event Permit application fee; (v) I am authorized to apply for this Special Event Permit on behalf of the organization holding the event (if applicable). (vi) The information contained in this application is true and correct to the best of my knowledge. I understand that intentionally providing false or misleading information in this application will be the basis for denial/revocation of the permit and may lead to civil or criminal penalties.

If there are any changes to the Special Event after submittal of the application, I agree to notify the City of Watertown of these changes for review.

Name of Applicant: Keith Jasinski Signature:  Date: 7/30/24

SPECIAL EVENT APPLICATION FEE & EXTRAORDINARY SERVICES

Application fee is due when the application is submitted and is nonrefundable if the event is cancelled. If the event is rescheduled for a date within 6-months, the application fee would apply to the rescheduled date; if the event is rescheduled for a date later than 6-months of the original event date the application fee is nonrefundable.

\$50.00 - first application for the year of the applicant if submitted 45 days or more prior to event date.

\$35.00 - each subsequent application of the applicant if submitted 45 days or more prior to event date.

(The fee is doubled if submitted less than 45 days prior to event date)

Extraordinary Services - measurable financial costs which are above and beyond the normal levels of public health and safety services on a nonevent day. See the special event fee schedule for more information. Extraordinary services do not include the provision of police protection against hostile individuals targeting the event's message or intentions.

The applicant is liable for and must pay to the city clerk the actual cost of all extraordinary services provided by the city and is required to pay 50% of the estimated extraordinary services prior to the special event with the remaining amount billed at the conclusion of the event. Sales tax will be added if applicable. By signing the applicant acknowledges that they have been made aware of this information.

Signature of Applicant:  Date: 7/30/24

Submit Special Event Application and fee (cash or check) in person or by mail to:

City Clerk 106 Jones Street

PO Box 477

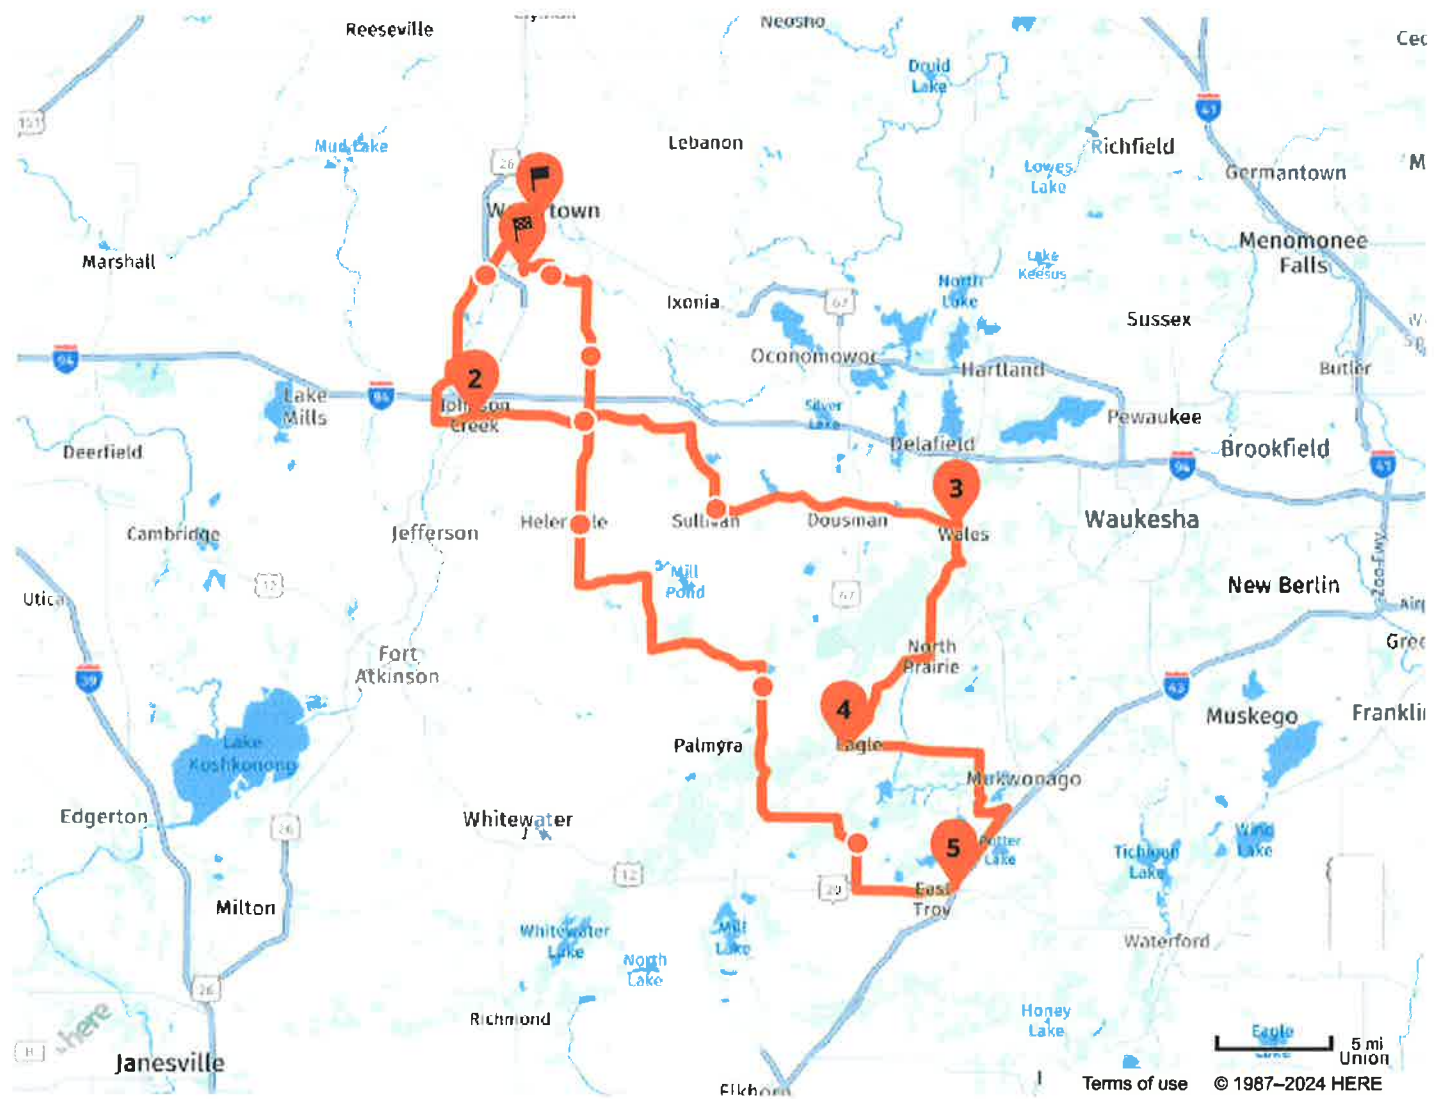

Watertown, WI 53094
